# Preface

The District Census Hand Book (DCHB) containing Primary Census Abstract and data on "amenities" for each village and town in the district. The intention of this publication is to place the data collected at the Census alongwith the village and town level amenities data collected from the Mandal Revenue Officers/ Municipal officials in this publication. The amenities data is validated by comparing with secondary data obtained from Heads of the Departments. For example, information on schools was compared with data available with Commissioner, School Education and information on post offices was compared with data obtained from the Chief Post Master General and so on. Validation of data in the above manner was by no means an easy exercise. Scores of officials had put in gruelling efforts for months together. The entire data and manuscripts were computerized. We are now reasonably confident of the correctness of the data but we will not make any utopian claims of cent per cent accuracy. There may be errors but we will be safe in saying that they are minimal.

The District Census Hand Book is divided into the following major components.

1. Introduction.
2. Brief history of the district.
3. Census and non-Census concepts.
4. A detailed write up on the physical features, major cultural and social events, major developments during the decade, places of religious and historic importance etc.
5. Primary Census Abstract (PCA) at the district level, mandal/town level and village level.
6. Brief analysis of PCA data.
7. Village Directory and Town Directory.
8. Brief analysis on Village Directory and Town Directories.

It will not be out of place to mention here that there is perhaps no other publication from any agency that encapsulates so much data on a district. The amenities data includes information on sectors such as Education, Health, Water and Electricity supply, Communication and Transport facilities etc. The idea of presenting amenities data juxtaposed to the Census data is not only unique but also tremendously useful for the data users.

The District Census Hand Book is further enriched with a district map and mandal maps depicting villages/towns with population size and also amenities such as Educational Institutions, Hospitals, Telegraph and Telephone facilities, Banks, Police Station etc.

Some improvement over earlier DCHB have been made to bring more completeness to the data presented in this volume.

1. The names of Colleges, Girls' High Schools, Hospitals run by Government and others have been given as an additional information. Similarly the names of Cinema Halls have been given.
2. Ranking of Mandals according to population is also given.

3. More Appendices and Annexures to important statements are given to make the data more comprehensive.

In the previous Censuses, the manuscripts prepared by this department were supplied to Government of Andhra Pradesh who in turn brought out the publications at their cost. However due to the procedural rigmorale some delay was unavoidable in placing the DCHBs before the data users and planners.

This time, keeping in view the above difficulties, the printing and publication of District Census Hand Books has been taken up centrally under the arrangement of the office of the Registrar General and Census Commissioner, India, New Delhi. The processing of data and preparation of Camera Ready Copies electronically including finalisation of write up was attended to in the office of the Director of Census Operations.

I am grateful to the Chief Secretaries, Principal Secretaries, Secretaries, District Collectors, Municipal Commissioners and other senior officials of the Government of Andhra Pradesh for their co-operation and assistance throughout the Census Operations and in the process of collection of the non-Censal data.

I am extremely grateful to Sri D.K.Sikri, IAS, Registrar General and Census Commissioner, India for the help, guidance and constant support in finalising this volume. My sincere thanks to Sri R.P. Singh, Deputy Registrar General (Map) and Dr.I.C. Agrawal, Assistant Registrar General (SS). Sri. S.L. Jain, Deputy Director for giving guidence, help and co-ordinating this project work and their colleagues in the office of the Registrar General, India.

I also take this opportunity to acknowledge the valuable contribution made for this publication by Sri.J.K.Banthia, Ex-Registrar General, India.

Most of the work relating to DCHB has been carried out under the able guidance and direction of Sri V.S.Bhaskar, IAS, Director of Census Operations, Andhra Pradesh, Hyderabad. I take this opportunity to acknowledge his valuable contribution made for this publication.

The credit for preparation of District Census Handbooks goes to a team of devoted officers and staff of this Directorate who have involved in this project. The names of individuals associated with this project are shown in “Acknowledgements”. I am grateful to all of them.

I hope that the data users will find this publication very useful.

# (iii)Physical features of the District

**General :**

Chittoor district is a part of Rayalaseema and lies in the extreme south of the state approximately between 12°.37' - 14°.8' north latitudes and 78°.3' - 79°.55' east longitudes. It is bounded on the north by Anantapur and Cuddapah districts, on the east by Nellore and Changai - Anna districts of Tamilnadu, on the south by North Arcot Ambedkar and Dharmapuri district of Tamilnadu and on the west by Kolar district of Karnataka state. The district can be divided into two natural divisions.

The mountainous plateau comprising 31 mandals of Madanapalle division and on the east comprising the mandals of Puttur, Narayanavanam, Vadamalapeta, Kammapalle, Karvetinagar, Vedurukuppam, S.R. Puram, Palasamudram, Nagari, Nindra, Vijayapuram, Pichatur, Nagalapuram, Satyavedu, Varadaiah palem, B.N. Khandriga, K.V.B. Puram, Thottambedu, Srikalahasti and yerpedu. Eight mandals viz., Chittoor, Gangadhara Nellore Puthalapattu, Penumuru, Gudipala, Yadamarri, Thavanampalle, Irala stand almost as dividing line between the two natural divisions of the district. The eastern ghats are predominant in the western region and they gradually bend towards the sacred hills of Tirupati, passing through Chandragiri erstwhile taluk and entering into Nellore district. The general elevation of the mountains of the district is 2,500 ft., above the sea level.

The district occupies an area of 15,151 sq. kms. with density of population of 247 per sq. kms. The total population of the district is 3,745,875 of which 2,934,845 is in rural and 811,030 is in urban. The percentage of rural population in the district is 78.35% while that of urban population is 21.65%. The scheduled caste population in the district forms 18.75% of the total population while the scheduled tribe accounts for 3.42%. Of the 210 towns in the state, 15 are located in this district.

**Rivers :**

The rivers flowing in the district are non-perennial in nature and for major part of the year remain dry. The important rivers in the district are ponnai which is a tributary of river Palar and Swarnamukhi which rises in the eastern ghats and finally enters into Nellore district. Other important rivers of the district are the Kusasthali, the Beema, the Bahuda, the Pincha, the Kalyani, the Araniyar and the Pedderu which flow in different mandals of the district. Besides the above rivers, there are a number of small hilly streams flowing in the district.

**Climate and Rainfall :**

The climate of the district is dry and healthy. The upland mandals consist of 31 mandals in Madanapalle division and these are comparatively cooler than the eastern mandals except Chittoor where the climate is moderate. The district has the benefit of receiving rainfall during both the south west and north east monsoon periods and the normal rainfall received during these periods is 388.3 and 531.5 MMS respectively. The rainfall received from the south-west monsoons is more copious compared to north-east monsoons in the western mandals and in the central part of the district, where as the rainfall received from north east monsoons is comparatively copious in the eastern mandals of the distrit.

**Soils :**

The major portion of the district is covered by red soils with portions of alluvial soil in Chittoor and Bangarupalem erstwhile taluks. The soil in the district constitute red Loamy 57% red sandy 34% and the remaining 9% is covered by black clay, black loamy, black sandy and red clay.

**Flora and Fauna :**

**Flora :**

The climate, topography and geology have played an important role impressing the flora of the district. The district has hills and plateau and elevation ranges upto 1.318 metres. The floristic compositions in the forests vary from dry mixed deciduous to thorny scrub with occasional patches of dry, evergreen growth. The forests of this region can be broadly classified into the following three principal types.

1. Dry tropical south Indian dry mixed deciduous forests.
2. Southern Cutch thorn forest groups and
3. Tropical dry evergreen forests.

Mesophytic type of flora like syzygium cumini (Neredu), pongania gharia (Kanuga) and large trees of terminalia arjuna (Erramaddi and Tellamaddi) are found. Large trees of mango, phoenix, sylvestris (lta) and different types of grass along water courses are also found.

**Fauna :**

In the forests of this district at present wild animals like tiger and panther (Panthera pardus) are present in small numbers. Sloth-bear (Melursus ursinus) is found still in good numbers in all class 1 reserves of the district wild dog (cuonalpinus),wild pig(Suscristatus),porcupine(Hystri indica), Hyaena (Hyaena striata) Jungle cat (Felis chaus), Jackal (Canis aureus), fox (Velpes bengaleusis), wolf (canis lugus) etc., are the other carnivores present in the district. The commonly found herbivora present in the district are sambur (Rusa unicolor, black buck (Antelope cervicapse), chital (Axis ), wild sheep (civis cycloceros), mouse deer (Memina indica), hare (lapium finidus), rabbit etc. A number of species among birds, exist in this district. Among the birds the birds of large grey babbler (turdiodes malcolmi), the large grey shrike (Lanius excubitor, the king crows, mynas and crows bee-eaters hoopoes, swifts, vultures, eagles, kites, owls, sand grouse, quails, partridges,green pigeons,pigeons,peacocks etc., are found in this district.

**Major Characterists with reference to economic resources**

**Forestry :**

The total forest area in the Chittoor district is about 30% of the total area of the district consisting of 4514 sq. kms. The forests of Bhakarapet and Tirupathi ranges mainly confined to the imposing Sheshachalam hills are believed to the part of ancient Dandakaranya as expounded in the famous epic of Ramayana.

Among the forest products, red sandal is the most

rich and valuable forest product and its revenue per sq. km., is Rs. 18,550. The revenue of the forest division-wise and product-wise for 1977-98 is as follows.

**Table (b)**

## Minerals and Mining :

The mineral importance of this district is very little. Steatite is the only mineral mine in erstwhile puttur and Gangadhara Nellore blocks of the district, which is being exported to other states, mainly to Tamilnadu for utilising in fertilizers as a filler. The occurrences of gold, iron and red moulding sand are also noticed in certain parts of the district.

The production of the principal minerals along with their value from 1997-98 is given in the following statement.

## Dairy Development :

Since the beginning this district is considered as a surplus district so far as milk production is concerned. Between the years 1940-1945 co-operative milk supply units were established at Chittoor, Srikalahasti, Puttur and Kalikiri. The area of participation of milk producers began with a dairy at Chittoor under intensive milk supply scheme in 1969 in order to eliminate the middlemen. Dairyfarming became permanent rural income generation activity with the trust of DPAP/IRDP programmes in the district from 1975-76 onwards.

At present besides the milk products factory at Chittoor, 5 milk chilling centres one each at V.Kota, Madanapalle, Piler, Pichatur and Srikalahasti are in function and a liquid milk plant is proposed at Renigunta to handle further milk procurement.

## Industries :

The number of large and medium scale industries were only 20 as on 1998 providing employment to 29,318 persons.

The important lines of activity are manufacture of granite polish, road metal, extraction of essential oils, shoe uppers, hatcheries, PVC pipes, hardware, G.I. Buckets, para boiled rice units, wax coated safety matches, poultry feed mixing plants and finished leather products, etc.

The following statement indicates the production of selected items in the district between 1997-98.

**Sericulture :**

The industry is an admixture of both agriculture based and hence sericulture is an agro based cottage industry. In view of its increasing popularity with rich returns i.e., Rs. 20,000/- to 25,000/- net income per annum, per acre, it has attracted more and more number of farmers. By the end of March 2000 as much as 41,932 acres are covered under mulberry cultivation in the district.

The following statement indicates the progress made by the sericulture department under different items for 1992-93 to 1999-2000 (up to march).

**Fisheries :**

This district is dependable on rivers, Tanks and Reservoirs to undertake fishing activities. Since rivers flowing in the district are mostly non-perennial in nature and for major part of the year remain dry, the fishing activities mostly undertaken in rainy season. However this activities continued through out the year in the tanks and reservoirs. There are 7 fish forms in the district by which fish seeds area-wise to supply to fisherman for worth of Rs. 433,264/- during the year 1998-99.

About 66.63 hectares of Agricultural land was converted into fish tanks / ponds upto 1998-99. The production of inland fish during 1999-2000 was 3,328 tonnes. Several welfare schems have been introduced for the benefit of fisherman. Under this 451 dragnets, 133 gillnets, 3 trawl nets, 555 castanets were supplied and also 300 houses were constructed during the year 1998-99. There are 3 iceplants for processing and preservation of fish.

An amount of Rs. 26,490 was realized under Licensing scheme Rs. 46,310 was realized by disposal of 6 reservoirs and Rs. 2,78,927 by disposed of 176 tanks during the year 1998-99.

**Transport :**

During the decade 1991-2000 there was considerable increase in the motor vehicle traffic in this district. The position of Motor vehicles on road between 1998-99 and 1999-2000.

# (vi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Chittoor district has derived its name from its headquarters town Chittoor. It is located between $12^{0}37''$ to $14^{0}08''$ North latitude and $78^{o}03''$ to $79^{0}55''$ East longitude.

Among some of the important personalities of the present generation hailing from this district mention may be made of Dr. Sarvepalle Radha Krishnan, who had the good fortune of becoming the first Vice President and second President of the Republic India. Late Sri M. Ananthasayana Ayyangar, worked as Deputy Speaker and Speaker of Lok Sabha and also as Governor of Bihar.

The plains, Valleys, Plateau and hills combine to make this district one of the most picturesque in the State. The prominent cliff known as the Nagari Nose, is conspicuous for miles around. The imposing Seshachalam hill over which the famous pilgrim center of Tirupati is located is perhaps one of the most picturesque spots in this part of the country. The Horsely Hills, which have been developed into a hill station at Madanapalle.

The famous temple town of Tirupati is situated at a distance of over 67 kms., from Chittoor. There are two railway stations for this town, one at Tirupati west and the other at Tirupati East. This place is connected by bus from all important places in the district as well as from outside places such as Bangalore, Chennai, Hyderabad, Guntur, Vijayawada etc. Tirupati has many temples and holy spots, the most important of which is the historic shrine of Sri Venkateswara, the Lord of Seven Hills. This shrine is located at the top of Tirumala a cluster of seven hills.

The famous temple of Padmavati also known as Alivelumanga, the consort of Lord Venkateswara is an important pilgrim center at Tiruchanur, which is situated at a distance of abour 5 kms., from Tirupati.

The famous temple of Lord Siva, known as Dakshina Kasi, is situated in Srikalahasti. The temple is one of the most ancient and sacred places in South India and the Lingam is known as Vayulingam, one of the five elements of Lord Siva. The name Srikalahasti is a compound of three words - "Sri" meaning Spider, "kala" meaning serpent and "Hasti" an elephant and all these are said to have worshipped Lord Siva in the past and attained Sadvimukthi (Salvation) with Siva. The marks of all these three are found on the Linga which is claimed to be Swayambhu (Self-manifest) and for that reason, particularly sacred.

Telugu is local language, Tamil and Kannada are spoken especially at places which are adjacent to Tamilnadu and Karnataka States. However urdu language also spoken by a large number of Muslims living in different parts of the district.

# (viii) Non Census Concepts

**Improved drinking water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

**System of sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

**Type of latrine and Method of disposal of night soil :**

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate(CBR) :**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1000$$

**Crude death rate(CDR)**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

**Natural growth rate :**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR) :**

**N**umber of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

**Age specific marital fertility rate (ASMFR) :**

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

**General fertility rate (GFR) :**

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

**General marital fertility rate (GMFR) :**

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

**Total fertility rate (TFR) :**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

**Total marital fertility rate (TMFR) :**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

**Age-specific mortality rate (ASMR) :**

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

**q1**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2**

Probability of dying between birth and age 2.

**q5**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR) .

**Infant mortality rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR) :**

Number of infants dying within the first month of life (28 days or under ) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

**Early neo- natal mortality rate :**

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

**Late neo-natal mortality rate :**

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

**Post neo-natal mortality rate (PNMR) :**

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

**Peri-natal mortality rate (PMR) :**

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Still birth rate(SBR) :**

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Maternal mortality rate(MMR) :**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

**Eligible couple (Couples per 1000 population):**

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

**Child woman ratio (0-4) :**

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

**Child woman ratio (5-9) :**

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

**Migration :**

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been

explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration :**

The migrational movements are of three types

(i) Migration within the state itself with its components.

(a) Migration within the district of enumeration (intra district migration).

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country ( inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural - Urban components of migration:**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

**Size class of UA / town**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Tirupati Municipality has largest population 228,202 whereas Ekambarakuppam is the smallest town with a population of 6,797. There is no town in the district which has less than 5,000 population.

**(b) Size class and status of towns, Population, Growth, Density, sex ratio, Work participation rate and Literacy rates in the district:**

**Size class and status of towns :**

During every Census the number of Census towns and statutory towns changes due to addition of new Census towns and deletion of declassification of old Census towns, notifying of new statutory towns, de-notifying of old statutory towns etc., for the purpose of analysis of varied demographic characteristic urban areas have been divided into six classes by size of population of the 15 towns in the district. Tirupati and Chittoor are categorized as class I towns, while there are 2 class II, 6 class III, 4 class IV and one in class V Towns. Not a single town is categorized as class VI.

**Population Growth :**

The population of district was 3,261,118 as per 1991 Census and has gone upto 3,745,875 persons in 2001 adding 484,757 persons during the decade 1991-2001. The growth rate revealed by the district 14.86% is more or less equal to the state growth of 14.59% during the decade. Chittoor district ranks 11th in growth rate among 23 districts in the state.

Rural-Urban growth rates shows wide variations. The rural growth rate is recorded as 12.22 while urban growth rate is 25.58. As regards growth rate in rural population, the district occupies 15th position, when we speak about urban growth rate, it occupies 4th place in the state.

**Density :**

The overall density of population in the district is 247 persons per sq.km and is below the state average of 277. Among urban areas Tirupati(M) town has recorded highest 9,485 persons per sq.km followed by 7,997 persons in Madanapalle Municipal town.

Least density i.e., 559 persons per sq.km. has been reported in Tirumala census town.

**Sex Ratio :**

Chittoor district has possessed 982 females per 1,000 males while it was 966 in 1991 Census. It is higher than state average sex ratio of 978. The district occupied 10th rank in respect of sex ratio among 23 districts. Gudipala mandal has the highest sex ratio of 1,021, while Nagalapuram 1020, Pichatur 1015, Thottambedu 1007, Palamaner and Vadamalapeta 1005,Gudupalle 1003, Peddapanjani 1002, Gangavaram and also Thavanampalle 1001 have followed. Among urban units Tirupati NMA (CT) has reported highest sex ratio of 1,093 and Tirupati Municipal Town reported lowest sex ratio of 931.

**Work Particpation Rate :**

The work participation rate for total workers is defined as percentage of total workers to total population. The total workers participation rate in Chittoor district is 46.8%. Again percentage of main workers stands at 39%. The total worker's participation rate separately for males and females in the rural areas are 59.8% and 41.6% respectively. Against corresponding figures for urban areas are 48.7% and 10.4% respectively. Among main workers as seen for the percentage of workers of 2001 Census over 1991 has decreased. The female workers participation has slightly gone up from 33.76% in 1991 Census to 35.4% at 2001 Census.

**Literacy Rate :**

While calculating effective literacy rate, children in 0-6 age group have been excluded. The district returned 2176990 literates forming 66.8% of the population of the district, excluding 0-6 age group. Separating for urban and rural areas the literacy rate workedout to 63% and 80.2% respectively. Again within the urban areas male and female literacy rates separating workedout to 87.9% and 72.3%. For the rural population the male and female literacy rates workout to 74.7% and 51.2%.

**(c) Scheduled Castes and Scheduled Tribes of earlier Censuses:**

To uplift social and economical status of Scheduled Castes and Scheduled Tribes, one of the basic requirement of these population is the availability of data on age, sex, marital status, economy, education, fertility etc. In this regard these particulars are being collected in each census from 1951 onwards and provided to planners and administrators to take-up necessary steps to evolve suitable plans for the development of Scheduled Castes and Scheduled Tribes.

The President of India has notified some castes, races or tribes or parts of groups within castes, races or tribes as Scheduled Castes under Article 341 of the Constitution of India. Similarly, under Article 342 of the Indian Constitution, President of India has declared all such tribes or tribal communities or parts of groups within the tribes or tribal communities as Scheduled Tribes. The list of Scheduled Castes and Scheduled Tribes are notified for each State or Union Territory and are valid only within the jurisdiction of that State and Union Territory. The list of Scheduled Castes and Scheduled Tribes is provided in this volume under the sub-heading on 'Census concepts'.

**Scheduled Castes population in the district as per 1991 Census :**

As per 1991 census, there were 599516 Scheduled Castes population comprising 305199 males and 294317 females. This works out to 18.38% to the total population of the district. Of the total population of Scheduled Castes, 90.21% were living in rural areas of the district.

The following statement reveals that Scheduled Castes population has recorded 25.19% growth rate during the decade 1981-91. It was 22.04% in rural areas which is equal to the growth rate of total district. Growth rate in Urban areas was 64.34% which is 39.15% more than the district.

The sex ratio of Scheduled Castes population is 964. Where as the sex ratio for general population in the district was 972. The sex ratio in rural area of the district was 965 to total district sex ratio among Scheduled Castes population. In urban areas it was

959, where as the sex ratio of general population was 953. Literacy rate among Scheduled Castes 31.59% which was lower than the district 49.75%. In urban areas their literacy rate was 54.10%.

# Section I - Village Directory

**(a) Note explaining the abbreviations used in Village Directory :**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages ( villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

**Columns 1 : Serial Number**

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

**Column 2 : Name and Location Code Number of village**

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census. Population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for

Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks:**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/Mandal Parishad/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/Mandal Parishad/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/Mandal Parishad/Town |
| 4. | Village Primary Census Abstract | Mandal Parishad/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented Mandal Parishad wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each Mandal Parishad is presented both for rural and urban areas separately. All the villages within the Mandal Parishad constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the Mandal Parishad. In case a Mandal Parishad is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the Mandal Parishad is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of mandals, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Mandal Revenue Officer in acres have been converted and shown in hectares. The area figures of the Mandal Parishad is the total of the village areas coming under each Mandal Parishad. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the mandals/Mandal Parishads within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/mandal. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Mandals and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

# Annexure - I
# Fertility and Mortality, 1991 Census

Crude birth rate is the most commonly used measures of fertility. To know the fertility rates, certain information was collected from all ever married women during 1991 Census such as (i) Age at marriage (ii) Number of children ever born alive. For currently married women, in addition to above data, if any child born at preceding one year to the Census has also collected. Definition of fertility measures is given in the chapter on Census concepts.

**Fertility Levels** :

This is dependent on fertility pattern by age, which is indicated by the age specific fertility rates. General fertility rate, total fertility rate and gross reproduction rate are other indicators of fertility. Fertility measures were worked out on F-series tables of 1991 Census of Andhra Pradesh. An analysis of these measures is given in the subsequent paragraphs.

**Age Specific Fertility Rate** :

The following statement shows the age specific fertility rates for Total, Rural and Urban areas along with the corresponding fertility rates of state during 1991 Census.

**Annexure –I (a)**
**Age Specific Fertility Rates/Levels, 1991**

| Age Group | Chittoor District | | | Andhra Pradesh State | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 15 - 19 | 0.073 | 0.075 | 0.066 | 0.085 | 0.092 | 0.066 |
| 20 - 24 | 0.173 | 0.174 | 0.166 | 0.179 | 0.185 | 0.162 |
| 25 - 29 | 0.142 | 0.144 | 0.137 | 0.150 | 0.155 | 0.137 |
| 30 - 34 | 0.092 | 0.094 | 0.080 | 0.103 | 0.108 | 0.087 |
| 35 - 39 | 0.052 | 0.053 | 0.050 | 0.068 | 0.071 | 0.055 |
| 40 - 44 | 0.027 | 0.027 | 0.026 | 0.037 | 0.039 | 0.029 |
| 45 - 49 | 0.018 | 0.017 | 0.019 | 0.020 | 0.021 | 0.017 |

It can be seen from the above statement that the age specific fertility rate is higher in the age-group of 20/24 both in rural and urban areas of the district. However, the same is lesser than that of state rate except in urban areas of the district. Among the other age-group, the rates are either slightly increased or decreased over the state average. This trend of age specific fertility rate particularly in the age-group of 20-24 indicates that the people are conscious of population problems resulted the early marriages are gradually decreasing.

**Age Specific Marital Fertility Rate** :

The following statement shows age specific martial fertility rates of the Chittoor district as well as state recorded during 1991 Census. The age specific marital fertility rate is very low in the age group of 45-49 in total as well as in rural than that of the state total and rural except in urban. In the age-group of 15-19 this rate is higher than the state in total, rural and urban. In the age group of 20-24; 25-29 the fertility rate of the district is lower than the state in total and rural but in urban the rate is higher in 20-24; and same in 25-29. However, it can be observed that the rates are slightly higher or lower over the state average.

Different fertility measures given below reveal that lower level of the district when compared with the state except mean age at marriage, the state figures are higher than the district.

**Mortality Levels :**

Information on the questions on children ever born and children surviving canvassed for all ever married women has been tabulated by age of the mother from this estimates of child mortality worked out by using brass technique.

**Child Mortality :**

From the estimates of child mortality (number of deaths) by ages 1,2,3 and 5 given above as Q1, Q2, Q3 and Q5. It is observed that child mortality in Chittoor district is subsequently higher when compared to the state.

# Annexure III
# Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census and 2001 Census

**Migration** :

During 1991 Census, the migrants by place of birth were broadly classified as (A) Migrants born within the State of Enumaeration, (B) Migrants born in other states of India and (C) Migrants born in other countries. The migrants born within the state are divided again as (i) Migrants born elsewhere in the district of Enumeration and (ii) Migrants born in other districts of state. Migrants by place of birth have returned 194.64 lakhs in Andhra Pradesh state comprising 62.53 lakhs of males and 132.11 lakhs of females. It has been constituted 29.27%, 18.54% of male and 40.30% to the total population, males and females respectively in the state.In Chittoor district 829,779 persons constituting 25.5% are migrants, male migrants constitute 14.0% and female migrants constitute 37.3% to the respective sex. Males are forming more percentage in inter migrants to total migrants than that of female inter district migrants percentage to total female migrants. Similar trend can be observed in the case of migrants born in other countries.

The following statement shows the distribution of migrants by place of birth with sex break-up in the district as well as in the State.

In the above statement the migrants were broadly classified as (A) Migrants born within the state of Enumeration (B) Migrants born in other states of India and (C) Migrants born in other countries. The migrants born within the State have divided again as (i) Migrants born elsewhere in the district of Enumeration and (ii) Migrants born in other districts of the State.

As usual the migration by place of birth is found more in intra-district both Chittoor district and State for both male and female. The migrants from other districts of the state and other states of India are higher than that of intra-district migrants. Among the three classifications of migrants, the migrants born within the state of enumeration has occupied 1st place both in Chittoor district and Andhra Pradesh State with 82.64% and 94.56% respectively. The percentage of female migrants is more in intra district migration and slightly less in other two categories in the state and also in the district. Domination of females in intra-district migration may be due to marriages.

**India-State-District differentials** :

The comparative data on religion among India, Andhra Pradesh and Chittoor district reveals that concentration of Hindus was higher followed by Muslims and Christians as per 1991 Census findings. Hindus were returned on the higher side in the State with nearly seven percent more than the national average, while in Chittoor district they were more over eight percent than National and nearly one percent more than the State. They constituted 82.4%, 89.14% and 90.32% in India, Andhra Pradesh and Chittoor district respectively. Muslims recorded as 11.7% in India, 8.91% in Andhra Pradesh and 8.80% in the district. It shows their percentage in the district is less than the percentage of India and the State. The percentage of Muslims in the State is less than the country, while the percentage of Christians in the country is also less than the State i.e.,2.3% in India 1.83% in the State and 0.83% in the district. Buddhists, Sikhs and Jains are negligible in the State and district.

In Chittoor district though the percentage of population of Hindus recorded 89.9 as against 90.3 in 1991 their growth rate in 1991-2001 has fallen to 14.4% as against the growth rate of 19.2 % in 1981-1991.

In respect of Muslims, their percentage to total population has recorded 13.4 at India level as against 11.7% in 1991. In Andhra Pradesh their percentage has gone up to 9.2% from 8.9% in 1991. In respect of Chittoor district, Muslims constituted 9.2% of total population during 2001, whereas the corresponding figure recorded in 1991 was 8.8. However in this district the growth rate of Muslims in the decade 1991-2001 has declined to 19.5% as against the growth rate of 21.3% recorded in 1981-1991.

The other main religion going by numerical strength is Christians. They constituted 2.3% of total population at India level during 2001census. Their growth rate during the decade 1991-2001 is 22.6% at India level as against the growth rate of 16.9% recorded in 1981-91. In Andhra Pradesh their percentage growth rate of this religion continues to show the negative trend. The percentage growth rate of this community recorded during 1991-2001 is (-) 2.8 as against (-) 15.1 recorded during decade 1981-1991. In Chittoor district during 2001 Christians constituted 0.8 % to total population as against 0.8 % in 1991. The percentage growth rate of this community during 1991-2001 has recorded 4.6% as against (-) 5.8% in 1981-1991. In respect of other main communities though, their growth rate show abnormal increase, their numerical strength is very less.

The above table indicates the distribution of major religions between rural and urban in Andhra Pradesh and Chittoor district during 2001 census whereas the previous Annexure has given details recorded in 1991 census. The above Annexure and inset table to Annexure show that the distribution of Hindus and Muslims between rural and urban at state level as well as at district level is almost same. In 2001 census 55.0% Christians lived in rural areas as against 60.5% in 1991 at state level. The concentration of Jains and Sikhs is more in urban areas than rural areas both at state level and district during 1991 and as well as 2001. It is interesting to note that Buddhists lived more in rural areas than in urban areas at state level during 91 and 2001 censuses. Whereas this community is more in strength in urban area of Chittoor district during 1991 and 2001 censuses.

# Annexure V

The district has returned 32,61,118 persons during 1991 Census, comprising never married, married, widowed and divorced or separated with 15,06,741 (46.20%), 15,59,792 (47.83%), 1,80,037 (5.52%) and 14,538 (0.45%) respectively.

In the sex break-up, the percentage among males and females under the above 4 categories are 57.44 and 42.56 never married, 48.76 and 51.24 married, 15.86 and 84.14 widowed, 27.37 and 72.63 divorced or separated recorded respectively in the district. The females percentage is dominated in all categories except in the category of never married.

The population has been distributed in 18 age groups starting from 0-9, 10-14 etc., The above statement shows that married, widowed and divorced,seperated persons were found in the age-group of 10-14, which reflect bad events such as child marriages etc. In the never married category both males and females were covered in almost all categories. The reasons for never married persons found in the old age group may be due to physically handicapped or mentally disabled etc. There was no separate data collected in the Census for such reasons.

*Source: Socio cultural Tables (C-Series)-2001*

The above inset table gives the details by age, sex and marital status composition of the population separately for total, rural and urban areas of the district during 2001 census, whereas the previous Annexure shows the above details for 1991 census. In 1991 while furnishing age group-wise marital status data, a separate age group 15-44 where the marital status was high has been shown. In 2001 census keeping in view of persons aged less than 18 years and persons aged less than 21 years, being high concentration of marital status, has been furnished. In the district population of 3,745,875 persons, 932,566 (24.9%) males and 703,939 (18.8%) females were recorded as never married. In the total district population, 922,007 (24.6%) males and 952,348 (25.4%) females were found married during 2001 census. It is pity to note that as against 186,266 widows 31,230 widowers were found in the district during 2001 census. The reason for high percentage of widows can be attributed to aged males marrying younger females. As against total population of 1,310,627 persons in the age group less than 18 years, 51.4% males and 47.3% females were found never married in 2001 census. In respect of married persons under the age group less than 18 years, only 0.1% males and 1.0% females were recorded in 2001 census which means public are more conscious about Marriage Act and also ill-fate of early marriages. Similar trend is noticed both at rural and urban areas even for age group less than 21 years. There is no much variation in the figures of marital status of the district between 1991 and 2001 censuses.

# Annexure VI
# Age , sex and Education in the district as per 1991 Census and 2001 Census

The education table was worked-out on the basis of literates in the district.

**Definition of literate :**

A person who can both read and write with understanding in any language is to be considered as literate. If a person who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All the children in the age of 6 years or less have been treated as illiterate even if the child is going to school and may have picked up reading and writing.

The following table gives age, sex and education in the district at 1991 Census:

The Annexure presented in the pre-page gives the details of Age, Sex and Education in the district for 1991 census whereas the above inset table reveals the data for 2001 Census. As was done in the previous Census, the children in the Age group 0-6 have been treated as illiterates even in 2001 census. It is seen from the above table that the district has recorded 66.8% literates in 2001 as against 49.8% literates in 1991. In the district the literacy rate for males has recorded 77.6% as against 55.8% in females during 2001 Census. From the above inset table it is noticed that in the school going age groups i.e 7 to 14 years, their literacy rate recorded between 75.2% and 91.0%. In all the age groups male literates are dominating females. The highest educated are found in the age group 11 years with 94.6% and their sex-wise breakup recorded 96.9% in males and 92.1% in females. It is a good trend that the essentiality of the education is felt much by the general public.

# Annexure VII
# Distribution of different mother tongues returned in 1991 Census at District\Mandal level and the data at District level for 2001

**Mother Tongue :**

Mother tongue is the language spoken in the childhood by a person's mother to the person. If mother dies in infancy, the language mainly spoken in the person's home in childhood will be treated as mother tongue. In the case of infants and deaf-mutes the language usually spoken by the mother will be the mother tongue. A very large number of mother tongues have been returned during 1991 Census. It lead to thorough scrutiny and rationalisation, which resulted in 1576 rationalised mother tongues and 1796 names were treated as unclassified or "others". The 1576 rationalised mother tongues were further classified following the usual linguistic methods for rational grouping based on available linguistic information. Thus a total inventory of classified mother tongues returned by 10,000 or more speakers at the all India level were grouped under appropriate languages, where possible, was prepared for final presentation of the 1991 Census data. The total number of languages so arrived at is 114, of which 18 languages are included in Eighth Schedule to the constitution of India (Scheduled languages).

The above inset table gives the abstract of the languages as mother tongues and their strength in the district recorded in 2001 Census whereas the previous annexure shows the details for 1991 census. In 1991 the data was presented in alphabetical order whereas in 2001 the mother tongue data has been presented basing on their numerical strength in descending order. The mother tongues having minor returns have been clubbed together and added in the category of 'Others'. Telugu being the region's language has recorded 77.6% to total population in the district. Even in 1991 their percentage has recorded 77.6to total population. The next highest language being spoken is Tamil with 12.2% to total population of the district whereas in 1991 the percentage of Tamil speaking people recorded 13.1 to total population. The language Urdu is spoken by 8.7% to total population whereas it was recorded 8.2% in 1991. In respect of other schedule languages it is noticed that their strength is negligible both in 1991 and 2001. In the district almost all the schedule languages (except Kashmiri) returned in 2001.
