FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third part, Part C of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this Statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the *planners in chalking out more effective developmental programmes.*

One of the most important innovations is the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D.Block level will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of the State Govt./UT administration and the Census Organisation. The data have been collected and compiled under the direction of Ms. Sobha Nambisan, Director of Census Operations, Karnataka on behalf of the State Govt. administration which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr.K.P.Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M.Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K.Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K.Singh, Deputy Director who was assisted by S/Shri V.K.Jain and Hariram, Investigators and staff. Technical guidance in the preparation of the maps was initially provided by Dr.B.K.Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992.

A.R.Nanda
Registrar General, India

PREFACE

In the foreword to the 1991 series of the District Census Handbooks, Sri A.R.Nanda, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain the salient data on the population for every village and town as revealed by the 1991 Census. They also contain a wealth of information regarding these villages and towns which, although not part of the population census, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information has also considerable importance in the context of planned development.

The District Census Handbook is therefore divided into two parts: Part A containing information regarding each village and town (Village Directory and Town Directory) which is not census data and part B which contains the data on the population collected during the 1991 Census - the Primary Census Abstract. The data published in Part B was collected in February 1991 at the time of the population census. This data was then manually tabulated in the Regional Tabulation Offices set up for the purpose. Subsequently, as a part of the countrywide project taken up in collaboration with the National Informatics Centre, the Primary Census Abstract data was computerised. The data for Part B of the District Census Handbook was therefore available on tape for the entire country by November 1992. The State Informatics Officer of the National Informatics Centre at Bangalore supplied the print-outs of the Primary Census Abstract data which helped us to bring out the Part B portion of the District Census Handbook of each district fairly quickly.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in early 1990 and continued till the middle of 1992. For operational convenience, the Village Directory format was divided into two portions, one relating to the area and land use particulars and the other relating to the amenities available in each village. The relevant formats were mailed to the Deputy Commissioners of Districts and Chief Secretaries of Zilla Parishads for obtaining the villagewise particulars. Similarly the Town Directory formats were mailed to the Deputy Commissioners and Commissioners of Corporations. The villagewise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1981 District Census Handbooks.

Since the Primary Census Abstract data was available on the computer, it was decided to publish the District Census Handbooks in two separate volumes, with Part B appearing in print first.

In the preparation of the District Census Handbooks the role of the Census Directorate is that of data collector. For accomplishing this task we have had the ready co-operation of the staff of different departments of the State Government. The cost of printing of the District Census Handbooks is borne by the Government of Karnataka.

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation of this volume.

I am thankful to Shri A.Venkateshan, the State Informatics Officer, National Informatics Centre, Bangalore for all the assistance he and his staff members have rendered for computerisation of the data and for preparation of the camera ready copy of the manuscripts of all the Districts.

I am deeply grateful to Shri A.R.Nanda, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Shri M.K.Jain, the present Deputy Registrar General (SS) as well as to Mrs. Minati Ghosh, Deputy Registrar General (Map).

Lastly, I am thankful to the Government of Karnataka for having readily agreed to bear the cost of printing these District Census Handbook volumes and to the Director of Printing, Stationery and Publications for the keen interest he has evinced in bringing out these publications.

Bangalore,
Date: 16-11-1992

Sobha Nambisan
Director of Census Operations,
Karnataka.

ANALYTICAL NOTE

Brief History of the District Census Handbook :-

The District Census Handbook series was, for the first time, included in the census publication programme at the 1951 census in order to satisfy the growing demand for micro-level data by the administrators, the planners and the other census data users. The District Census Handbooks sought to replace 'Part IV - Taluk Tables' and 'Part V - Village Tables' of the earlier censuses and to present the basic demographic and economic data in the form of 'Primary Census Abstract' in respect of each and every village and town within the jurisdiction of the district concerned. In addition, these volumes were to contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

At the 1961 census, the scope of the District Census Handbook was greatly enlarged by incorporating in it - (i) a descriptive account of the district, (ii) a set of non-census tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban (census enumeration block level) Primary Census Abstract containing the ninefold industrial classification of workers. In a somewhat general way, information on the availability of certain basic amenities in villages and towns, such as the sources of drinking water and educational institutions, was also presented in these volumes. These general guidelines were, by and large, followed in Karnataka too. However, the scope of the District Census Handbooks of 3 out of the then existing 19 districts, namely Bangalore, Dharwar and Mysore, was confined to the publication of the village-wise and urban (census enumeration block wise) Primary Census Abstract only.

The 1971 census witnessed an overall improvement in the matter of compilation as well as presentation of the data. A country-wide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. In 1971, the District Census Handbook was split up into three portions - (i) Part A - consisting of land use data on villages and also the data on the nature and extent of amenities and services available in the villages and towns of the district - presented in the form of Village Directory and Town Directory respectively, (ii) Part B - consisting of the Primary Census Abstract (including the nine-fold industrial classification of workers) for the district, the taluks, the towns, the villages and the census enumeration blocks in case of towns; and (iii) Part C - consisting of an analytical note based on an analysis of the census data as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in minute detail, a set of statistical tables based on the census data in respect of the district and the constituent taluks and towns thereof besides a set of tables generated on the basis of the villagewise census data in association with the villagewise data on the availability of amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overview of the developmental programmes implemented in the district during the preceding decade. Publication of the District Census Handbooks was planned in such a way as to minimise the delay inherent in the compilation of a voluminous mass of data gathered from different sources. Accordingly, 'Part A', comprising the Village Directory and the Town Directory for the finalisation of which there was no apparent need to wait till the completion of the tabulation of the data gathered at the census, was to be published first and 'Part B', consisting of the Village/Urban Primary Census Abstract was to be released next. A lower priority was assigned to 'Part C' for the obvious reason that besides administrative statistics it was to include a set of socio - demographic and economic tables generated on the basis of the data gathered at the census and an analytical note prepared thereof. In Karnataka, however, 'Part A' and 'Part B' portions of the District Census Handbooks were combined together and published in a single volume for each district except Bangalore. In the case of Bangalore District, since it was felt that the size of such a combined volume would be unweildy, Part A and Part B were published separately. As regards 'Part C', compilation of data took more time than anticipated and, in addition, there was an inordinate delay in executing the printing job at the State

Directorate of Printing. As a result, only a portion of Part C (depicting some of the census tables) relating to Bangalore District was published somewhat belatedly and the proposal to publish the remaining portion of Part C for Bangalore District as well as the entire portion of Part C for the other districts was finally abandoned.

Instead of witnessing an expansion as in the past two censuses the scope of the 1981 series of the District Census Handbooks was curtailed to a considerable extent in that it was confined to the publication of Village Directory, Town Directory and the Village/Urban Primary Census Abstract. Thus, at the initial stage itself there was no proposal to compile and publish the administrative statistics and the various socio-demographic and economic tables based on the census data, that is, the portion which constituted 'Part C' of the 1971 series. But for this change, the approach in 1981 regarding uniformity and comprehensiveness were very much the same as in 1971. In order to avoid delay in publication, as in the past, the District Census Handbook was proposed to be published in two parts, namely, 'Part A' consisting of the Village Directory and Town Directory and 'Part B' consisting of the Village/Urban Primary Census Abstract besides the Special Primary Census Abstracts at taluk/town level in respect of the Scheduled Castes and Scheduled Tribes population of the district.

At the 1981 census, the contents of the Village Directory and the Town Directory were slightly enlarged and the formats were restructured. In the Village Directory all the amenities except power supply were brought together under a broad heading with the provision that 'in case an amenity is not available in the referent village, the distance to the nearest place where that particular amenity is available may be indicated in broad ranges'. A new item 'approach to the village' was included. In the remarks column, a provision was made to report the number of copies of newspapers in circulation in the village as also the number of motor cars, the number of motor cycles and the number of tractors available in the village. Further, in order to examine whether there is any correlation between the availability of amenities and the population size of a village, an additional column was provided in the Village Directory to indicate the population and number of households. The contents of Part A were further enlarged by including two appendices, namely, a list of villages not having any amenities and a distribution of villages according to the proportions of Scheduled Castes and Scheduled Tribes in the total population of the village. The Town Directory formats were also modified by the addition of a few items such as class of town, population, Scheduled Castes and Scheduled Tribes population, decadal growth rate of population, working women's hostel, adult literacy classes/centres, storage system regarding drinking water supply etc., and also by providing for recording the information about the nearest place (and distance) having educational, medical and fire-fighting facilities in case such a facility is not available in the referent town. As compared to 1971, while one statement indicating religion-wise population of the town was dropped, another statement to provide information about the amenities available in notified slums in Class I and Class II towns was added. As regards the Primary Census Abstract of towns, the urban block-wise presentation of data was given up and details were presented only upto the level of Wards/Divisions. However, information on the number of persons belonging to Scheduled Castes and Scheduled Tribes was furnished for each census enumeration block within the town in the form of an appendix and an annexure thereto provided the description of the boundaries of each census enumeration block. Further, instead of the nine-fold classification of workers adopted at the 1971 census, on this occasion the classification was restricted to 4 categories. In Karnataka, in 1981 also, both Part A and Part B portions of the District Census Handbooks were published together in a single volume for each district. However, because of certain technical compulsions, all the information relating to Scheduled Castes and Scheduled Tribes was excluded from the main formats and was presented separately at the end in the form of a Supplement (separate booklets were brought out in the case of Bidar and Mandya Districts).

2. Scope of the 1991 District Census Handbooks:

As in 1981, in 1991 too, the District Census Handbooks are proposed to be brought out in two portions, namely Part A consisting of the Village Directory and the Town Directory and Part B

consisting of the Village/Urban ward-wise Primary Census Abstract in addition to the District Primary Census Abstract and the Special Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes. Though, the scope of the 1991 series of the District Census Handbooks has, by and large, remained the same as in 1981, a few significant changes have been made in the Village Directory format as well as the Primary Census Abstract format. In Karnataka, unlike at the previous censuses, on this occasion, the 'Part A' and 'Part B' portions of the District Census Handbooks of each district are being brought out in separate volumes.

The manner of presentation of data has also undergone a significant change in that the Village Directory and the Primary Census Abstract data are presented according to the location of villages and towns within the jurisdiction of a Community Development Block rather than their location within a taluk*. In other words, the traditional practice of taluk-level presentation of data has now been givenup in preference to the Community Development Block level presentation of data which is considered as more meaningful in the present day context. Since C.D.Block is the lowest administrative unit for developmental planning, the choice of the C.D. Block as the unit for data presentation is expected to help the planners in formulating micro-level developmental plans. Another innovation at the 1991 census is the arrangements made for the dissemination of the data in collaboration with the National Informatics Centre through its country-wide computer network. In the published volumes of the District Census Handbooks, therefore, the computer codes assigned to the villages in the 1991 census and the corresponding codes in 1981 are presented so as to facilitate the data users who may prefer to use the data either from magnetic tapes or floppies.

(i) Village Directory :

The Village Directory format adopted for the 1991 series has 18 columns. When examined with reference to the 1981 format it will be noticed that two columns have now been left out - while one of these columns refers to the 'staple food' the other refers to the 'remarks' under which, information about the places of religious, historical or archaeological interest in the village as also information about the number of copies of newspapers in circulation, the number of motor cars, motor-bicycles and tractors available in villages was published in 1981. As compared to 1981, there is no change in the scope and coverage of the information presented in the 18 columns of which 8 are devoted for amenities and 6 are meant for indicating the area of the village and the land use pattern. The remaining four columns are meant for indicating the location code and name of the village, total population and the number of households enumerated in the village and the name of the nearest town as also the distance to that town. The aspects covered under the amenities are: educational, medical, sources of drinking water supply, postal and telegraph, weekly market, communication, nature of approach road and power supply. Further, if a village did not have any educational facility at all, instead of merely reporting the fact and stopping at that, an indication of the distance (in ranges) that the villagers have to traverse to reach a place with educational facilities (at the basic level) is reported. The same procedure of reporting is adopted regarding medical facilities, drinking water supply, postal and communication as well as weekly market facilities. The distance ranges adopted for reporting are the same as in 1981, namely -5 km, 5 - 10 km and 10+km. In an explanatory note, which precedes the presentation of the Village Directory Statements, details about the abbreviations used under various columns are furnished.

---

* *In Karnataka, the "Taluk Panchayat Samiti" corresponds to the Community Development Block, and for the sake of maintaining uniformity with the all-India pattern, the term C.D.Block has been used throughout in the District Census Handbooks. The jurisdiction of a Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns.*

The main agency which has furnished the villagewise information on amenities is the Zilla Parishad which in turn has collected the relevant particulars through its field formations, namely the Chief Executive Officers (i.e., the Block Development Officers) of the various *Taluk Panchayat Samitis*. These details were examined for consistency as well as with reference to the particulars reported in 1981 and cases of deterioration or of abnormal developments were referred back for reverification and rectification. For instance, as compared to 1981, for several villages, Wells and Tanks did not find a mention as a source of drinking water supply. When referred back, the concerned Chief Executive Officers clarified that in most of these cases, the drinking water wells of yester years have either dried up or fallen into disuse on account of the increasing number of borewells drilled in such villages and also because of the implementation of the National Rural Water Supply Scheme, the Mini-Water Supply Scheme and Accelerated Water Supply Scheme etc. So also regarding the availability of pucca approach road facility several instances of deterioration were noticed. Such cases too were referred back so that the factual data may be verified again and reported for publication. Information about the number of educational institutions, nature of government run medical institutions and postal, phonocom and telegraph facilities as furnished by these officers have been cross-checked with the data obtained from the concerned Departments as well to ensure a higher level of reliability.

In case of uninhabited villages, i.e., villages which returned 'nil' population at the 1991 census count, except the name and the total area no other information is furnished. Instead of putting a dash under each column to indicate this fact, the word 'uninhabited' is printed along the line.

In order to facilitate easy reference, an alphabetical list of villages is given at the begining in respect of each C.D.Block. This list indicates the code numbers assigned to the villages for purposes of census enumeration as well as the computer codes assigned (at the stage of computerisation) as also the corresponding codes according to the 1981 census. At the end of the Village Directory the following appendices are given:- C.D. Block-wise abstract of amenities; list of villages not having any amenities except Drinking Water, land utilisation data in respect of non-municipal towns and distribution of villages according to the proportion of Scheduled Castes population and Scheduled Tribes population.

(ii) Town Directory :

As in 1981, in 1991 too, there are seven statements which furnish information on the following aspects - growth history; physical aspects and locational particulars; municipal finance; civic and other amenities; civic amenities available in the notified slums of Class I and Class II towns; medical, educational, recreational and cultural facilities; and trade, commerce, industry and banking. The scope of the various column headings adopted in 1981 has remained unchanged in 1991. However, in Statement-I, slight modifications have been made to accomodate the 1991 census data - an additional column is provided for indicating the 1991 population and the growth rate registered by the town during the decade 1981-91. In Statement-I an additional column has been provided for indicating the name of the C.D.Block within the jurisdiction of which the referent town is located. It may be incidentally mentioned that, in Karnataka, the civic bodies functioning in the Statutory Towns do not fall within the administrative jurisdiction of the C.D.Blocks (i.e., Taluk Panchayat Samitis).

In the Town Directory statements, the towns are arranged in an alphabetical order of their names and the aggregate particulars about urban agglomerations if any in the district have also been furnished in the same order. Where an urban agglomeration includes two or more independent towns, the names of these constituent towns are shown in the correct sequence as per the alphabetical arrangement of their names. But, the details which ought to have been furnished in the subsequent columns have been skipped with a view to avoiding repetition. Instead, immediately after the name of the town, a cross reference is given by printing the message "see ..... urban agglomeration". The name of the core town of the urban agglomeration too appears at its correct sequence with the legend printed thereafter and immediately below that, i.e., in the next line the same name with the suffix urban agglomeration appears again without bearing any

serial number. Against this name the cumulative totals for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is then followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core town and followed by the others arranged in an alphabetical order of their names. This procedure, it may be recalled, is the same as that adopted in 1971 as well as in 1981 and this enables one to have a fairly good assessment of the data relating to the smaller civic administrative units that form part of the larger unit and also of the aggregate data relating to the larger unit itself. In case there are 'outgrowths' which are not 'urban areas' in their own right, the particulars relating to such areas are merged with the data relating to the concerned core town. Such towns which have 'outgrowths' are marked out by an asterisk mark and for all purposes, the term 'town' would cover the core town as well as its outgrowths. In an appendix the names of the revenue villages which have been identified as outgrowths and the population thereof are indicated separately. In the case of villages certain parts of which are regarded as outgrowths while the other parts are considered as 'rural', the data relating to the outgrowths (i.e., the urban component) is included in the Town Directory statements and the data pertaining to the rest of the portion retained in the rural frame appears in the Village Directory. In Statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole, the legend 'see the constituent towns' is printed against the name of the urban agglomeration instead of allowing the entire line to remain blank.

The particulars furnished in Statement I which deals with the growth history are entirely based on the current as well as the previous censuses. As such, this has been compiled in the Census Directorate without seeking information from the concerned civic bodies. The details presented in the remaining statements have been furnished mainly by the concerned civic authorities such as the Municipal Commissioners, Chief Officers of towns, Secretaries of Mandal Panchayats, Administrative Officers etc. Except for the information regarding municipal finance, most of the information on other apsects had to be gathered by the civic authorities from several offices and institutions located in the town through correspondence and or by deputing officials for the purpose. The particulars so furnished were scrutinised in the first stage and cases of abnormal variations as compared to the situation in 1980 and also inconsistencies were referred back to the reporting agency for reverification and rectification so as to ensure that the details now given in the Town Directory represent the factual position.

The scope of the information presented under various columns and the abbreviations used are explained in a note which precedes the presentation of the Town Directory statements.

(iii) Primary Census Abstract :

The Primary Census Abstract is presented village-wise in the case of 'rural' areas and town-wise (upto ward or division level) in the case of urban areas. The outgrowths of a town are treated at par with a ward or division of the core town irrespective of the number of census enumeration blocks into which it is constituted. Within the district, the Community Development Blocks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each C.D.Block, the total figures with the rural-urban break-up is given first and this is followed by the village-wise data and then by the ward-wise data for the towns if any, within the jurisdiction of the C.D.Block. In the case of a village of which only a portion has been incorporated in a town or has been recognised as an outgrowth of a town, the details relating to only that portion which is not so incorporated or so recognised but has been retained in the rural frame is presented under various columns. The names of villages (and their respective areas) which are fully included in urban areas or have been recognised as outgrowths of towns for purposes of the 1991 Census (but are retained in the jurisdictional lists of the Survey and Settlement authorities) if any within the boundaries of the C.D.Block are indicated in the flyleaf which precedes the PCA statement for the C.D.Block

After presenting the PCA data for all the villages and towns covered by the C.D.Blocks in the district,

the PCA data relating to all the urban areas of the district (i.e., statutory as well as non-statutory towns) are furnished. For this purpose, the towns/urban agglomerations are arranged in an ascending order of their location code numbers. And, for each town the ward or division-wise details are presented here.

In Karnataka, as already mentioned, the jurisdiction of a C.D.Block is coterminus with that of the Taluk of the same name, but excludes the areas incorporated in statutory towns and cities. By and large, a C.D.Block corresponds to the rural areas of the taluk. However, if there are any non-municipal census towns and areas which have been identified as outgrowths of statutory towns within the jurisdiction of the taluk, then such towns and outgrowths are also regarded as lying within the jurisdiction of the concerned C.D.Block. The PCA particulars relating to such units are presented under the concerned C.D.Blocks against the urban category and are repeated again at the end under the caption 'District Urban'.

In the case of an urban agglomeration, the aggregate figures obtained by the addition of the data relating to the constituent towns and outgrowths thereof if any are presented against its name. Thereafter, the data for the constituent towns starting from the core town including the location code, are presented in a continuous sequence. In case a town has outgrowths (which are not towns in their own right) in the first line the aggregates relating to the core town as well as its outgrowths are given and this is then followed by the details relating to the core town and the outgrowths separately. Each outgrowth is treated at par with a municipal ward or division while presenting the ward-wise PCA for towns.

3. Brief note on Census concepts :

Census taking is a massive operation carried out in a short span of time with the active participation of a very large number of census enumerators. The reference moment for the 1991 census count is the sunrise of March 1, 1991. However, the enumeration of the population was spread over a period of 20 days from 9-2-1991 to 28-2-1991 followed by a revisional round from 1-3-1991 to 5-3-1991 for updating the population count with reference to the sunrise on March 1, 1991. The questionnaires canvassed by the enumerators, namely the Household Schedule and the Individual Slip are brief in their wordings and the concepts used for purposes of the 1991 Census Operations and the manner in which the schedules are to be filled in have been explained in a booklet entitled Instructions to Enumerators for filling up the Household Schedule and the Individual Slip. Some of the important concepts and the relevant explanations are indicated in the following paragraphs.

(i) **Urban areas** :- The definition adopted in 1961 and adhered to in 1971 as well as in 1981 (though with a slight modification regarding the classification of fishing and forestry) has been retained for the 1991 census also. According to this definition the urban areas include :

i) all places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees, etc.

ii) all other places which satisfy the following criteria :

a) a minimum population of 5,000

b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits and

c) a density of population of at least 400 per square kilometre (1000 per square mile)

d) all places which, though not satisfying the above criteria, had pronounced urban characteristics.

(ii) **Urban Agglomeration**: This concept, which replaced the concept of 'town-group' in 1971, has been retained for the 1991 census. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to, but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called "urban

agglomeration". An urban agglomeration may consist of :

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a) ; or

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Geographical contiguity with the statutory limits of the core town is the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the urban agglomeration. This is purely a statistical concept and for carrying out the actual census, the administrative jurisdictions of the city or the towns concerned as well as of the outgrowths have been kept quite intact. The data are presented for the urban agglomeration as a whole and also severally for each of the constituent units.

(iii) **Rural areas - i.e., villages** : Areas which are not classified as 'urban' according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages, the boundaries as determined by the local usage have been adopted. The revenue village may consist of a single nucleated settlement or comprise of several settlements or clusters of houses located at several places within the territorial limits of the village or the village may not be having any human settlements at all (i.e., it may be totally uninhabited). The census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule:

1) When the main settlement of the village with or without the surrounding open lands is constituted into an urban area, the remaining tracts of the revenue village are together treated as a separate unit for purposes of census i.e., the truncated portion itself is considered as an independent revenue village.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by a Government Notification such areas, whether populated or not, are excluded from the revenue village concerned and the village boundaries are redefined for census purposes.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged completely under reservoir projects but are still retained in the jurisdictional lists of the Survey and Settlement authorities pending a resurvey and such other procedures, are taken note of as revenue villages but are omitted for census purposes i.e., these are not treated as census villages. Similarly, entire revenue villages, which have been identified as outgrowths of urban areas for purposes of 1991 census are treated not as census villages but as urban areas. The names of such villages, if any, in a Taluk/C.D.Block are indicated in a fly leaf.

4) If there are forest areas that do not form part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit into which such forest areas are divided (eg.Forest Beat) is reckoned as the census village. A Forest Range may consist of several such census villages. (In Karnataka this phenomenon is noticeable only in Kollegal Taluk of Mysore District).

(iv) **Census Enumeration Block** : The smallest unit adopted for census taking is the Census Enumeration Block. Generally, the towns and cities are divided into wards or divisions and, wherever such units exist, their distinctive identities have been maintained. The geographical area comprised in each such ward or division or, the town in its entirety, is constituted into several blocks in such a way that every bit of land specifically stands included in one or the other enumeration block and also that there is no over-lapping of areas. In the urban areas, the Census Enumeration Blocks are constituted in such a way that each such Block contains about 120 households covering a population of about 600 persons. However, in view of the condition that

each block should have clear-cut boundaries easily recognisable on the field, blocks which are either larger or smaller than the norm have also been constituted In the case of non municipal towns, if the town boundaries are not specifically notified, the jurisdiction of the entire revenue village concerned is regarded as the jurisdiction of the town as well In the case of towns which are under the administration of Mandal Panchayats, the Panchayat jurisdiction need not necessarily be identical with the jurisdiction of the non-municipal census town

In the case of villages, depending upon the population data based on the Houselisting Operations carried out during 1990, each village has been constituted into one or more number of Census Enumeration Blocks The work-load norm for the rural areas is 150 households covering an approximate population of 750 persons However, numerous Census Enumeration Blocks with below norm population have been constituted and a single enumerator has quite often been entrusted with the enumeration work in 2 or more contiguous blocks so as to ensure that the aggregate population is quite close to the norm Further, in each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting the Blocks Each hamlet or island, if any, found within the jurisdiction of the village - irrespective of its population size - has been constituted into a separate Block in order to maintain its geographical identity Further, even the villages known to be uninhabited at the time of houselisting operations have been constituted into separate blocks In other words, a complete coverage of the territorial jurisdiction of each and every village has been ensured

(v) **Location Code Number** Every State in the Country, every District in the State, every Taluk or Town in the District, every C D Block (or its equivalent) in the District, every village in the taluk and every ward or division in the city or town and every enumeration block in the village or town is assigned a number in a particular order for carrying out the census enumeration When these numbers are written side by side in the same order, starting from the State and separated by an oblique mark, the identity of any particular census enumeration block can be known quite easily The numbers assigned are in Arabic numerals, except in the case of towns in which case Roman numerals have been adopted For assigning the location code numbers the States in the Country, the Districts in the State, the Towns in the District and the Taluks/C D Blocks in the District are arranged in the alphabetical order of their names The villages in a taluk are organised into revenue circles or hoblis for administrative purposes and each such unit will have a headquarter town or village The identity of such units is maintained while assigning the location code numbers Starting from the circle of which the Taluk Headquarters happens to be the Circle headquarters as well, the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction or in a serpentine manner starting from the north-west corner After exhausting all the villages in that circle, the villages of the adjacent circle are assigned numbers in the same manner The numbering of villages run continuously for the Taluk through the different Circles or Hoblis

The entire set of the 1991 census data relating to the village directory and the village/urban ward-wise PCA has been computerised For this purpose a separate code structure has been developed The computer codes assigned to the villages in each Taluk or C D Block are indicated in the alphabetical list of villages along with the corresponding location code numbers assigned for enumeration purposes So also particulars about the codes assigned to towns are indicated in the alphabetical list of towns which preceedes the presentation of the PCA statements in respect of the urban areas of the district

(vi) **Building** A building is generally a single structure on the ground Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office *cum*-residence, etc

(vii) **Census House** : A 'census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

(viii) **Household** : A 'household' is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households having unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashramas* etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not have a house to live in and may temporarily dwell on the roadside pavement, in hume pipes, temples, *mantaps*, platforms etc., or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households, referred to as 'Houseless Households' for census purposes, were enumerated on the night of February 28, 1991.

ix) **Criteria for enumeration of a person in a particular household :**

1) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1991 (both days inclusive);

2) All those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 - 28, 1991) but are not present at the time of the enumerator's visit ;

3) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1991 and

4) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

(x) **Literate** : A person who can both read and write with understanding in any language is 'literate'. A person who can merely read but cannot write, is not 'literate'. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 6 years or less are treated as illiterate.

(xi) **Workers and Non-workers** : For census purposes 'work' is defined as 'participation in any economically productive activity'. Such participation may be physical or mental in nature and would involve not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The reference period for determining whether a person is a worker or a non-worker is the year i.e., the 365 days, preceding the date of enumeration. The criterion is liberal and, even a person who has participated in the production of goods and services for a very brief period is entitled to be categorised as a worker. Depending upon the nature of his or her activity during the reference period, every person enumerated at the census is classified as either a worker or a non-worker.

Among 'workers' however there are two categories:

Main Workers : Those who have worked for a major part of the year i.e., for 183 days or more (6 months or more) during the reference period even though this may be in broken spells and in different occupations.

Marginal Workers : Those who have not worked for a major part of the year under reference i.e., those who have worked for less than six months (i.e., for less than 183 days) during the entire reference period.

In view of the past experience that women are often classified as non-workers because of non-reporting of their work or as those who have not worked for a major part of the year, special efforts have been made at the 1991 census for eliciting accurate information by asking probing questions.

In respect of main workers as also marginal workers, further details on the sector of economy in which they worked, the actual nature of work done by them, their employment status (i.e., employer, employee, unpaid family worker or own account single worker) have been gathered at the census.

Important terms such as cultivators, agricultural labourers and household industry are explained below.

a) **Cultivators**: For purposes of census, a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation as well. A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land, will not be treated as 'cultivator'. Similarly, a person working in another person's land for wages in cash or kind or a combination of both will not be treated as ' cultivator'.

Cultivation involves ploughing, sowing and harvesting. For certain reasons, the growing of certain crops is not considered as cultivation and a person engaged in growing of such crops is not regarded as a cultivator. A person can be classified as cultivator or not, *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation.

1. Cereal and Millet crops : Paddy, wheat, jowar, bajra, maize, ragi, barley, etc.
2. Pulses : Arhar, gram, kesari, moong, masur, urd, etc.
3. Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred crops.
4. Oil Seeds : Sesamum, ground-nut, rape seed, mustard, linseed, sunflower, castor, etc.
5. Cash crop : Sugarcane

The growing of the following crops *is not considered* as cultivation :

1. Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. Edible nuts (other than groundnut) : Walnut, almond, cashewnut, etc.
3. Fruits : Bananas, apples, grapes, mangoes, oranges etc.
4. Coconut
5. Ganja, cinchona, opium and medicinal plants.
6. Betel nuts (areca)
7. Flowers
8. Roots and tubers, chillies and spices
9. Vegetables
10. Other crops not specifically included under cultivation.

b) **Agricultural Labourer** : A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on the land on which he or she works.

c) **Household Industry** : Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in the case of urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry

should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. The goods produced should not be exclusively for consumption by the household itself but should be wholly or partly for sale.

d) **Other Workers** : All workers, i.e., those who have been engaged in some economic activity during the reference period of last one year, who are not Cultivators or Agricultural Labourers or workers in Household Industry were categorised as 'Other Workers' (OW) at the time of census enumeration and further details about the nature of industry, trade or service in which they were engaged were gathered by the enumerators. On the basis of this descriptive information, at the tabulation stage, each such worker has been further categorised as belonging to one or the other of the following Industrial Categories based on Revised National Industrial Classification - 1987.

III Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities;

IV Workers in mining and quarrying activities;

V(b) Workers in manufacturing, processing, servicing and repairs which are carried on as other than household industry;

VI Workers in construction;

VII Workers in trade and commerce;

VIII Workers in transport, storage and communications, and

IX Workers in other services.

(xii) **Non-workers** : All those who have not at all participated in any economic activity during the reference period of one year preceding the date of enumeration are classified as non-workers.

Depending upon the manner in which such non-workers engaged themselves for most of the time during the reference period of one year they are classified into one or the other of the following six categories at the time of census enumeration itself. However, the Primary Census Abstract presented in this volume does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) **Household duties** : This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) **Students** : This will cover all full-time students including children attending school.

c) **Dependents** : This category includes all dependents such as infants, children not attending school and permanently disabled from work because of illness or old age. Dependents will include even able bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) **Retired Persons or Rentiers** : A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he or she does not have to work, will come under this category.

e) **Beggars** : This will cover beggars, vagrants or cases such as persons without indication or source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

f) **Inmates of Institutions** : This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institutions would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

4. Brief History of the District* :

As an administrative unit under the current nomenclature, Chikmagalur district has a history of about four decades. However, in this densely forested mountainous district, human settlements are known to have existed in the remotest past, namely the Old Stone Age. Ancient tools have been unearthed by Robert Bruce Foote at several sites near Kadur, Nidaghatta and Lingadahalli. So also, many cists of the megalithic period have been discovered at places such as Mattavara in Chikmagalur taluk and Sakrepatna in Kadur taluk. Several places of this district find a mention in myths and legends as well as in historical documents and monuments. For instance, Lord Vishnu, in His incarnation as Varaha, the Great Boar, after killing Hiranyaksha is believed to have rested for a while near Gangamoola on the peak of the mountain which has since been known as "Varaha Parvata". The drops of sweat which trickled down the tusk and eye-brows of the Great Boar were transformed, on touching the ground, into the three rivers named Tunga, Bhadra and Netravati. Parusharama, an incarnation of Lord Vishnu, is believed to have roamed about the Sahyadri mountains stretching along the district and to have reclaimed the entire West Coast for human habitation by a throw of his battle-axe on the surging seas. *Parashu*, the weapon of Parashurama, in the form of a large-sized axe carved out of stone, is found enshrined in a small temple at Hiremagalur and is being worshipped from time immemorial. The site at which Hariharapura village is now located is believed to be the spot at which Dakshabrahma, the father of Dakshayini the spouse of Lord Shiva, performed an important sacrifice. Sages such as Agastya, Gauthama, Mrikandu, Markandeya, Vibhandaka and Rishyashringa are believed to have set up their hermitages and dwelt at several places in this district which even now abounds in lofty hill ranges, vales and ravines, rivers and streams. According to a legend, a long spell of severe drought which afflicted Angadesha was broken when, as a remedial measure, sage Rishyashringa, renowned for his super-human powers, was tactfully enticed to the kingdom. He married Shanta, the princess of Angadesha and later went to Ayodhya to officiate at the *Putra Kameshti Yaga* performed by Dasharatha. The holy town of Sringeri derives its name from Rishyashringagiri which means "the mountain of Rishyashringa". According to another legend, sage Vibhandaka (the father of Rishyashringa) performed penance on the bank of the river Tunga at Kigga near Sringeri. Rishyashringa too had his hermitage here and finally, he is believed to have been absorbed in the Shiva-linga which is found enshrined in the Rishyashringeshwara temple at Kigga. Shakunagiri, a lofty hill near Ayyanakere Lake, is believed to be the place to which Hanuman flew back from Lanka in search of Sanjivini, the medicinal plant which was badly required to reawaken the coma-stricken Lakshmana, the brother of Rama. Another legend indicates that during their exile, the Pandavas spent some time at Machcheri (identified as Matsyapuri) and, at a place called Kichakanagudda, Bhima is supposed to have killed Kichaka, the brother-in-law of King Virata. Janamejaya Maharaja is said to have performed Sarpa Yaga at the site where the village-site of Hiremagalur is now located. An implanted stone pillar found here is pointed out as the *Yupa Sthambha* (sacrificial post) which was used during that legendary Sarpa Yaga. Renowned preceptor 'Guru Dattatreya' is known to have dwelt at and performed penance at several places on Chandradrona-Parvata which is now known as Bababudangiri and is located near Chikmagalur. Dattatreya Peetha is one of the important centres of pilgrimage in Chikmagalur district.

Coming to historical times, the first dynasty which is manifestly known to history as having ruled this region is that of the Kadambas of Banavasi. The area included in this district formed part of

*Source : *Gazetteer of India, Karnataka State, Chikmagalur District, Bangalore, 1981.*

the Kadamba-mandala and was later on under the suzerainty of the Chalukyas for a long period. Though ruled by the Kadambas, the Gangas of Talkad, the Pallavas of Kanchi and the Santaras of Humcha none of the places of this district enjoyed the distinction of being a seat of administration. However, in about 1209 A.D. Balludeva Santara is said to have shifted his capital from Humcha in Shimoga district to Kalasa of this district. Subsequently, this place came to be known as Kalasa One Thousand and retained its importance for a long time as a seat of administration.

Chikmagalur district is particularly identified with the origin and early career of the Hoysalas. Sosevuru, the home-town of Hoysalas is thus an important historical place of this district. Sala, the first ruler of this dynasty seems to have consolidated himself at this place which is identified with the present Angadi village in the southern portion of Mudigere taluk. His successors rose to prominence, at first, as vassals of the Chalukyas and later on assumed all the royal titles and held sway in the south for more than two hundred years. However, the Hoysalas soon shifted their capital from Sosevuru to Belur at first and from thence to Halebid (also known as Dora Samudra) of Hassan district. As a consequence, none of the places of Chikmagalur district rose to prominence during the reign of the Hoysalas. There are, however, a few places of historical and cultural importance in the district as is borne out by the lithic monuments such as hero stones, inscriptions etc., which have been discovered at such places. For instance the hero stones and inscriptions found in Asandi indicate that the Sevuna army which had penetrated to Belavadi, deep inside the Hoysala territory, was repelled in 1276 A.D. Then, Asandi village was a minor seat of administration and a centre of Kalamukhas. A hero stone of 1367 A.D., found at Bidare in Kadur taluk records that a warrior named Kankeya who fought along with King Ballala III in the assualt on Biligi smiting the army of Turukas was killed in action on 8 September 1342.

During the reign of Vijayanagara, no other place except Sringeri seems to have gained prominence. In 1346 A.D., the founders of the Vijayanagara empire granted nine villages including Sringeri to their spiritual mentor and their main source of inspiration Shri Bharati Teertha, so that along with his disciples he could stay at Sringeri and carry on with his religious and spiritual pursuits. From that period onwards, Sringeri received continued attention of the Vijayanagara monarchs and gradually developed into one of the most prominent spiritual centres of Karnataka.

After the fall of Vijayanagara, local chieftains established themselves at several places and reigned supreme. This region was ruled at first by the Balam Chiefs and then came under the control of the Nayakas of Keladi and the Sante-Bennur Chiefs. The Sante-Bennur Chiefs also known as Basavapatna Chiefs and Tarikere Chiefs, at first, had their principal seat of administration in Shimoga district. In 1636 A.D., when they were forced out by Ranadulla Khan they moved over to Tarikere and later recouped their strength after retreating to Kaldurga and fortifying it. They were subsequently vanquished by Haidar Ali in 1761 A.D., and their territories were annexed to Mysore Kingdom. After the fall of Tipu Sultan in 1799 A.D., this entire area was taken over by the British and rendered to the Wodeyars of Mysore under their suzerainty. In 1830, Sarja Hanumappa Nayaka - a scion of the Tarikere Chiefs - joined the insurgent forces. He was later captured and hanged to death in 1834.

There were frequent changes in regard to the boundaries of the taluks and the district during the British period. It appears that the district initially had only four taluks, viz., Kadur, Yagati, Garudanagiri and Banavar. Later, Yagati was absorbed in Kadur taluk and Garudanagiri was merged with Banavar taluk. Till 1875, the western portion of Chikmagalur taluk formed part of Vastare taluk. Mudigere taluk was constituted in 1876. Lakkavalli gave its name to a taluk which included Bababudangiri and parts

of Koppa and Balehonnur taluk. In 1822, Kadur and Banavar were merged into a single taluk. In 1886, when Hassan district was restored, the jurisdiction of this district was restricted to the area as found at present. The headquarters of this district which was located at Chikmagalur in 1865, was continued to be located at Chikmagalur and the name of the district too was retained as "Kadur District". In 1897, *Kalasa magane* (group of villages around Kalasa) were transferred to Balehonnur taluk and the headquarters of Koppa taluk was located at Hariharapura village. It may also be noticed that as in 1897, Yedehalli Sub-taluk (corresponding to Narasimharajapura Taluk) formed part of Koppa taluk. Thus, after 1886, though there were some internal changes in respect of boundaries of the taluks within the district, the jurisdiction of the district itself remained unchanged. Balehonnur lost its status as a Taluk headquarters. Hariharapura reverted to the status of an ordinary village as the headquarters of Koppa Taluk was moved to Koppa town. Sringeri has lost its *Jahgir* status. In 1947, the name of the district was officially changed from "Kadur District" to "Chikmagalur District". Thenceforth, the nomenclature of this district too conformed to the general pattern of naming a district after the name of the town in which the headquarters is located.

5. Location and Physical Aspects* :

Situated somewhat south-west off the geographical centre of the State, the Chikmagalur district covers a compact but hilly and densely forested area of 7201 square kilometres lying between the north latitudinal parallels of 12 degrees 55 minutes and 13 degrees 54 minutes and the east longitudinal parallels of 75 degrees 5 minutes and 76 degrees 22 minutes. Chikmagalur is bounded on the north by the Shimoga district. On its eastern side, however, Chikmagalur district shares its borders with three districts - to the north-east lies the Chitradurga district, for a small stretch on the proper east lies the Tumkur district and to the south-east lies the Hassan district. On the south, the district is bounded by the Hassan district and on the south-west and the west, the Western Ghats constitute a natural barrier which separates it from the Dakshin Kannad district.

Large parts of this district are situated in the heavy-to very heavy rainfall zone of the State. These tracts are characterised by a mountainous terrain and constitute the *Malnad* region. However, about a fourth of the total area of the district, namely, that which lies on the eastern sectors of the taluks of Kadur and Tarikere, consists of more or less level lands and partakes of the features of the *Maidan* region. In Chikmagalur district, the transition from Malnad to Maidan is quite striking and somewhat abrupt as one approaches Lakkavalli from the west.

The congeries of mountains in this district seem to range themselves into a central ridge running north to south, with a great loop of mountains on either side. The main ridge commences near Ballalarayanadurga, and passing east of Metrigudda and Koppadurga, separates the basin of the Bhadra river from that of the Tunga and further runs up north towards Mandagadde, to join the central range of the Shimoga district. On the western side of this ridge lies the fertile valley in which the renowned Sringeri town is situated. To the east lies the famous Jagara valley. Situated on the right bank of the river Bhadra, this valley is almost completely surrounded by the Baba Budangiri range of mountains. Known as Chandradrona Parvata in the legends, this Baba Budangiri range happens to be the loftiest range on the table-land of Karnataka. It is located in the central portion of the district and this chain of mountains forms a horse-shoe shaped ridge of tremendous dimensions. The ridge has an opening to the north-west. The northern arm, commencing with the Hebbe Gudda peak (1337 metres MSL) stretches eastwards without interruption

*Source : - *Gazetteer of India, Karnataka State, Chikmagalur District, Bangalore 1981.*

for about 25 km. Bending southwards, it presents to the east an unbroken wall of about 32 km. The southern arm is formed by the Basavanagudda and the Woddinagudda ranges. The summit of the hills consists of steep grassy slopes and the ravines are full of vegetation. On the sides of the hills there are dense forests as also Coffee Plantations.

Mullayyanagiri (1927 metres MSL) is the loftiest peak, that is, the highest point, in Chikmagalur district as also in the State itself. Kudremukh is another lofty peak (1896 metres MSL) and since it resembles the face of a horse to the viewers from a distance, it has for long been an important land mark well-known to the navigators on the west-coast. The Baba Budangiri is an equally lofty peak (1895 metres MSL) and it incidentally happens to be a noted centre of cultural importance to the Hindus as also to the Muslims of the district. Devirammanagudda, Kalhattigiri (1877 metres MSL), Metrigudda (1663 metres MSL), Woddingudda (1527 metres MSL), Ballalarayanadurga (1507 metres MSL), Gangamoola (1458 metres MSL), Lakke Parvata (1421 metres MSL), Shakunagiri (1419 metres MSL) and Kanchikaldurga (1245 metres MSL) are the other prominent peaks in Chikmagalur district.

As many as seven rivers originate in Chikmagalur district. However, the Tunga and the Bhadra are the principal rivers and of these, the Bhadra river has been harnessed, within the district itself, for purposes of irrigation and power-generation. The Tunga, the Bhadra and the Netravati originate at different points in Gangamoola on the Varaha-Parvata. The Tunga and the Bhadra flow in a north-eastern direction and after their confluence at Kudli in Shimoga district constitute the mighty Tungabhadra of the Plains. Netravati, on the other hand flows westwards and is subsequently enriched by the Kumaradhara whereafter it constitutes a major river of the coastal district of Dakshin Kannad. The Hemavati river has its source near Javali in the Mudigere taluk. It flows in a south-easterly direction and consitutes an important tributary of the Cauvery river. The twin streams Veda and Avati originate in the eastern side of the Baba Budangiri range near the Mullayyanagiri peak. The immediate source of the Veda is the Gauri-halla. These two streams flow in a north-eastern direction and join near Kadur. The single river thus formed, is called the Vedavati. It is also known as the Hagari river. The Yagachi river, also called the Badari, rises in Seethalayyanagiri of Baba Budangiri range in Chikmagalur taluk. After traversing southwards for a distance of about 20 km, the Yagachi enters the Hassan district. Among these seven rivers, the Tunga, the Bhadra, the Veda and the Avati belong to the Krishna basin whereas the Hemavati and the Yagachi belong to the Cauvery basin.

Geologically, the district is made up entirely of Archaean Schists and Gneisses. The Dharwar Schists cover about 50 per cent of the area and occur in three well-defined belts, namely, the Kudremukh-Gangamoola belt, the Koppa belt and the Baba Budangiri belt. The remaining area is made up of granitic gneisses and granites collectively grouped under the name "Peninsular gneissic complex". The gneisses found around Balehonnur are considered to be older than 3000 million years and to represent the oldest rock formations in the State. The minerals of economic importance which occur in this distrct are asbestos, bauxite, chromite, clay, copper, corundum, garnet, graphite, iron ore, kaolin, kyanite, limestone, manganese and mica. Of these minerals, iron is found extensively and is being exploited on a large scale.

This mountainous malnad district, especially its central and western belts, is endowed with some of the most useful and dense forests of the country. These forests have for long been providing shelter to numerous coffee plantations on hill slopes and, have for long been exerting a beneficial influence on the climate and rainfall experienced by the district. Though the eastern belt of the district also has some forest areas, these forests are neither extensive nor rich in vegetation. The dense-forests of yester-years seem to have been over-exploited in these parts because of easy accessibility and a relatively higher density of population.

A meteorological observatory is located at Balehonnur in the western belt. Besides this, there are rainguage stations at several places all over the district. Nature has blessed this district with a salubrious climate. Throughout the year, the climate is agreeable and quite cool. Though March, April and May are regarded as the summer months, during this period the maximum day temperature stays around 30 degrees celsius and the night temperatures would hover around 19 degrees celsius. The South-west monsoon sets in during June and, under its influence, there will be an appreciable drop in the day temperature. The rainy season lasts till the end of October. This season is marked by incessant and heavy rainfall to very heavy rainfall in the western tracts and, intermitent and medium to heavy in the eastern tracts. The day temperatures would be relatively low and nights too would be quite pleasant. After September, the day temperatures begin to increase and the nights become progressively cooler. Winter sets in during December and this season, lasting till the end of February, is one of clear bright weather during the day and chilly cold weather during the night. The western and the southern regions of the district have a relatively more severe winter and a pleasant summer on account of the hilly terrain and the abundance of natural vegetation.

Composed, as it is, of two distinct physiographic regions, the district is subject to vide variations both in the quantum of rainfall and the number of rainy days in a year. Though the overall average annual rainfall is 1990 mm, the eastern belt receives a rainfall of about 600 mm only. On the other hand, the western zone receives a rainfall of about 3000 mm. In Sringeri taluk, for instance, the normal annual rainfall is of the order of 3695 mm and that in Koppa taluk is 3003 mm. In fact it is quite close to the western borders of Sringeri taluk that Agumbe (Shimoga district) - the place which receives the heaviest amount of rainfall in the State and is therefore hailed as the Chirrapunji of Karnataka - is located. The total number of rainy days in a year in the district lies in the range of 42 at Kadur in the east and 122 at Balehonnur in the west and the average for the district as a whole is 92. Normally, the district receives timely and adequate rains and the overall climatic conditions are conducive for carrying on horticultural (including coffee plantations) and agricultural activities throughout the year without hindrance.

6. Administrative divisions and jurisdictional changes during the decade :

Chikmagalur district belongs to Mysore Division which is one of the four Administrative Divisions into which the State is organised. The district is divided into seven taluks and the headquarters of these taluks are located at Chikmagalur, Kadur, Koppa, Mudigere, Narasimharajapura, Sringeri and Tarikere respectively. These taluks are grouped into two Revenue Sub-Divisions. Chikmagalur Sub-Division comprises of the taluks of Chikmagalur, Mudigere, Koppa and Sringeri while Tarikere Sub-Division has jurisdiction over the taluks of Tarikere, Kadur and Narasimharajapura. During the decade 1981-91, the district has not witnessed any jurisdictional changes either with regard to its outer boundaries or with regard to the boundaries of the taluks of which it is composed of.

For purposes of Development Planning and implementing the programmes, Zilla Parishads have been constituted in the State. Accordingly, a Zilla Parishad, having jurisdiction over the entire district (excluding statutory urban areas) has been constituted for Chikmagalur district. Under this Zilla Parishad there are seven Taluk Panchayats and the jurisdiction of each Taluk Panchayat is coterminus with the general administrative jurisdiction of the Taluk of the same name but excludes the areas incorporated in the statutory towns or cities, if any, located within the taluk concerned. Thus, all villages as also places classified as non-municipal towns or as outgrowths of statutory towns at the 1991 census come under the jurisdiction of the taluk panchayats. "Taluk Panchayat" is analogous to the unit more popularly known as the "Community Development Block" throughout the country. In order to conform to the All India pattern in the presentation of the 1991 census data, instead of the term Taluk Panchayat,

the term C.D.Block has been used in this volume in appropriate contexts.

According to the 1991 census, there are 10 towns or urban areas and 1113 villages in the district. As compared to the position which prevailed in 1981, there is practically no change in either the number of towns or the number of villages in the district. However, after 1981, as a consequence of the dissolution of town municipalities at Ajjampura, Koppa, Mudigere, Narasimharajapura and Sringeri and the constitution of Mandal Panchayats at these places for carrying out the civic administrative functions, these five places have lost their status as statutory towns and, for purposes of the 1991 census, have been classified as non-municipal census towns. As already mentioned, the administrative jurisdiction of the C.D.Blocks covers these non-municipal towns as well. As regards the villages, it may be noticed that after 1981, in Chikmagalur taluk a portion of Machenahalli village has been constituted into an independent revenue village named Kurubara Boodihalu (vide Notification No.RD.21.LRD.81 dated 28.7.1982) and in Kadur Taluk, a revenue village named K.Thimmapur has been completely incorporated in the limits of Kadur Town (vide Notification No.HUD.2.MBL.82 dated 29.3.1984) and has therefore lost its status as an independent village for census purposes. The following statement indicates the talukwise distribution of the towns and villages of the district and also indicates the reasons for changes in the number of villages, if any, in the taluks concerned.

Statement showing the no. of villages/towns in each taluk of the District, decadal variations if any and reasons thereof.

7. Brief Analysis Of Data :

(i) Area and Population :-

According to the Surveyor General, India, the total geographical area of Chikmagalur district is 7201 square kilometres. However, according to the village records, as reported by local officers, the aggregate area of the villages and towns of the district is 7233.6 square kilometres. The slight difference between the two figures is attributable to the difference in the methods employed by the two sources for measuring the area of the district. Incidentally it may be mentioned that the smallest unit for which the area figures are furnished by the Surveyor General is the district. As a result, the village records constitute the main source of information regarding area figures at the taluk level. The total area of the district is unevenly distributed among the 1113 villages and 10 towns comprised in the 7 taluks into which the district is constituted. Areawise, Chikmagalur is the largest taluk (1614.3 sq.km.) and Sringeri is the smallest (442.8 sq.km). These two taluks, which occupy the extreme positions among the 7 taluks, respectively account for 22.32 per cent and 6.12 per cent of the total area of the district. With an area of 1415.9 sq.km., Kadur taluk ranks next to Chikmagalur and is closely followed by Tarikere (1222.4 sq.km.). The area of Mudigere taluk is also fairly large (1162.0 sq.km.). The aggregate area of these three taluks constitutes 52.53 per cent of the total area of the district. The remaining two taluks, viz., Koppa and Narasimharajapura belong to the category of geographically small taluks and the combined area of these two taluks constitutes 19.03 per cent of the total area of the district.

According to the 1991 census, the total population of Chikmagalur district is 1,017,283 persons. This population is unevenly distributed amongst the 1021 villages and 10 towns located in the 7 taluks of the district. In terms of area, Chikmagalur taluk is the largest and Kadur ranks next. However, in terms of population size, Kadur taluk ranks first (259,914 persons) and it is followed by Chikmagalur taluk (253,722). The third place, both areawise and populationwise, is held by Tarikere. These three taluks respectively account for 25.55 per cent, 24.94 per cent and 20.15 per cent of the total population of the district. Both in terms of area and population, Sringeri happens to be the smallest taluk. The population of this tiny taluk constitutes just 3.27 per cent of the total population of the district. Narasimharajapura and Koppa are also quite small in population size. The population of these three small taluks together constitutes a mere 16.73 per cent of the total population of the district.

(ii) Rural-Urban Composition :-

Amongst the 1,017,283 persons enumerated in Chikmagalur district at the 1991 census, 845,422 persons have been returned from the rural areas and the remaining 171,861 persons have been returned from the urban areas. In terms of percentages, the rural and urban components of the population of the district are seen to be 83.11 per cent and 16.89 per cent respectively. Talukwise particulars indicate that rural as well as urban categories of population are to be found - though in different proportions - in all the seven taluks. At the taluk level, the rural component is the highest in Koppa taluk (93.77 per cent) and the least in Chikmagalur taluk (76.03 per cent). This proportion is seen to lie between 80 and 90 per cent in the remaining five taluks of Kadur (82.50 per cent), Mudigere (87.74 per cent), Narasimharajapura (88.42 per cent), Sringeri (87.54 per cent) and Tarikere (83.36 per cent). The urban component, on the other hand, happens to be the highest in Chikmagalur taluk (23.97 per cent) and the least in Koppa taluk (6.23 per cent) and is seen to lie in the range of 10 to 20 per cent in the remaining five taluks.

The jurisdiction of the taluk - rural area corresponds to that of the Community Development Block (i.e. Taluk Panchayat) of the same name. Table 1 gives talukwise i.e. C.D.Blockwise, distribution of the rural population of the district by sex and also indicates the number of villages in each taluk.

Table 1 : Population and Number of villages, 1991

Sl. No.	Name of C.D.Block/ Taluk Rural	Population of villages			Number of villages	
		Persons	Males	Females	Total	Inhabited
1	2	3	4	5	6	7
1	Chikmagalur	192,906	97,638	95,268	232	216
2	Kadur	214,428	108,256	106,172	306	268
3	Koppa	75,574	37,535	38,039	80	80
4	Mudigere	112,692	56,434	56,258	140	140
5	Narasimharaja-pura	49,800	24,749	25,051	58	58
6	Sringeri	29,126	14,389	14,737	49	47
7	Tarikere	170,896	86,864	84,032	248	212
	District Rural	845,422	425,865	419,557	1113	1021

At the 1991 census count, 92 villages constituting 8.27 per cent of the total number of villages in Chikmagalur district, have returned a 'nil' population. These 'uninhabited' villages are found in four out of the seven taluks and the largest concentration of such villages is noticeable in Kadur taluk. This taluk alone accounts for 41.3 per cent and this is followed closely by Tarikere taluk which accounts for 39.1 per cent. The share of Chikmagalur taluk is 17.5 per cent while that of Sringeri is a negligible 2.1 per cent. Except Sringeri, the other taluks cover the eastern portion of the district which partakes of the features of the Plains. In the case of villages with habitations, out of a total of 1021 villages, as many as 268 (i.e., 26.25 per cent) are found in Kadur taluk. The taluks of Chikmagalur and Tarikere rank next with a tally of 216 villages (i.e., 21.16 per cent) and 212 villages (i.e., 20.76 per cent) respectively. It is evident that these three taluks covering the eastern tracts of the district account for 68.17 per cent and the remaining 31.83 per cent is shared by four taluks. In terms of number of villages, Sringeri is the smallest taluk and Kadur the largest. The talukwise distribution of villages in the district is uneven and the range of variation viz., 47 in Sringeri and 268 in Kadur, is quite large. The taluks in the plains have a relatively larger number of villages than their counterparts in the hilly and mountainous regions.

The rural population of the district is very unevenly distributed among its seven taluks (or C.D.Blocks). The taluk-rural population varies between a minimum of 29,126 persons in Sringeri and a maximum of 214,428 persons in Kadur and the average population per taluk is 120,775. Apart from Kadur, the other taluks with a population greater than the average are Chikmagalur and Tarikere. The taluks of Kadur, Chikmagalur and Tarikere cover relatively larger geographical areas, have a larger number of villages and naturally account for a relatively higher proportion of the population as well. The aggregate population of these three units constitutes as much as 68.40 per cent of the rural population of the district. Mudigere taluk holds the fourth rank and it accounts for another 13.33 per cent. The balance viz., 18.27 per cent is shared by the remaining three taluks (C.D.Blocks) of Koppa (8.94 per cent), Narasimharajapura (5.89 per cent) and Sringeri (3.44 per cent). The proportion of the rural population of taluk (C.D.Block) to the total rural population of the district varies between 3.44 per cent in Sringeri and 25.36 per cent in Kadur. This range of variation is indeed quite wide. However, this is a reflection of a similar situation with regard to geographical area as well as the number of villages. As may be seen from the following table, the urban population is also distributed in an uneven manner amongst the towns of the district.

Table 2 : Population and Number of Towns, 1991

Sl. No.	Name and Civic administration status of the town	Population		
		Persons	Males	Females
1	2	3	4	5
1	Ajjampura (MP)	8758	4485	4273
2	Birur (TMC)	20095	10153	9942
3	Chikmagalur (CMC)	60816	31460	29356
4	Kadur (TMC)	25391	13128	12263
5	Koppa (MP)	5022	2514	2508
6	Kudremukh (NAC)	7792	4243	3549
7	Mudigere (MP)	7953	4171	3782
8	Narasimharaja-pura (MP)	6524	3378	3146
9	Sringeri (MP)	4146	2078	2068
10	Tarikere (TMC)	25364	13051	12313
	ALL TOWNS	171861	88661	83200

Note : Following abbreviations are used in Col.2 regarding civic administration status :-

(CMC) : City Municipal Council;

(TMC) : Town Municipal Council;

(NAC) : Notified Area Committee and

(MP) : Mandal Panchayat.

The urban population of the district is distributed among 10 towns and the average population per town is 17,186. Sexwise distribution of the population in each town is indicated in Table 2, which incidentally shows that the population is lower than the average in as many as 6 out of the 10 towns of the district. The townwise population is the highest viz., 60,816 in Chikmagalur and the least viz., 4,146 in Sringeri. The population of Chikmagalur town constitutes 35.39 per cent whereas that of Sringeri forms a mere 2.41 per cent of the urban population of the district. Kadur and Tarikere rank next to Chikmagalur and have an almost equal population. These two towns together account for 29.53 per cent of the urban population of the district. The population contributed to the urban total is 5 per cent or less in the case of 6 towns viz., Ajjampura (5.1 per cent), Mudigere (4.63 per cent), Kudremukh Mining area (4.53 per cent), Narasimharajapura (3.8 per cent), Koppa (2.92 per cent), and Sringeri (2.41 per cent). Of these 6 towns, only one viz., Kudremukh Mining Area, is a statutory town and the rest are non-statutory towns administered by Interim Mandal Panchayats. A size-group classification of towns indicates that the district does not have a class I town (i.e., a city with a population 100,000 plus) and that Chikmagalur the largest town of the district belongs to the category of class II towns (50,000 - 99,999); the three medium-sized towns of Kadur, Tarikere and Birur are class III towns (20,000 to 49,999); the five small towns of Ajjampura, Koppa, Kudremukh Mining Area, Mudigere and Narasimharajapura are class V towns (5,000 to 9,999) and Sringeri, the smallest town belongs to class VI category (below 5,000). Obviously, there is a preponderance of small towns in Chikmagalur district and this phenomenon seems to be a characteristic feature of the districts located in the hilly malnad region of the State.

(iii) Classification of new places as towns, declassification and or merger of old towns during the decade 1981 - 1991 :-

As in 1991, in 1981 too, Chikmagalur district had 10 towns. There has thus been neither an addition to the number of towns nor a reduction in the number of towns during the inter-censal decade. No new place has been classified as a town at the 1991 census. At the same time, none of the towns of the 1981 Census has been either declassified or has lost its independent status due to a merger with some other town.

Table 3 : New Towns/Towns declassified, merger in 1991 Census

Name of Town	Population
1	2
(a) Added	--
Nil	
(b) Declassified	--
Nil	
(c) Wholly merged with other town	--
Nil	

However, it may be incidentally mentioned that between 1981 and 1991 the entire geographical area of K.Thimmapura - an uninhabited village of 1981 census- has been fully incorporated within the limits of Kadur town and also that in 5 towns the erstwhile Municipalities were dissolved and interim Mandal Panchayats were constituted for looking after the civic administration.

(iv) Decadal variation in population 1981 - 1991:-

A comparative idea about the decadal variation in the population of the district and its constituent taluks, with the rural-urban breakup, may be had from the details furnished in Table 4 in which the proportion of urban population to the total population of each unit is also indicated in respect of the two censuses.

During the decade, Chikmagalur district has witnessed a net addition of 105,514 persons of whom 93,532 (i.e., 88.64 per cent) are residing in rural areas and the remaining 11,982 persons representing 11.36 per cent are residing in urban areas. This addition is unevenly distributed in the rural and urban areas of the seven taluks. As may be seen from the above table, in the urban areas of one of the taluks, viz., Sringeri, there is a net loss. Kadur, the most populous taluk of the district has witnessed an addition of 28,111 persons and is followed by the taluks of Chikmagalur and Tarikere. These three taluks, together, account for 74.96 per cent of the net addition to the population of the district. With an addition of just 1,646 persons, Sringeri taluk holds the bottom-most place among the seven taluks of the district.

Table 4 reveals that the district has registered a decadal growth rate of 11.57 per cent. It may

Table 4 : Decadal change in distribution of Population

Taluk	Population						Percentage decadal variation (1981-91)			Percentage of urban population	
	1981			1991							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1981	1991
1	2	3	4	5	6	7	8	9	10	11	12
1. Chikmagalur	227954	167372	60582	253722	192906	60816	11.30	15.26	0.39	26.58	23.97
2. Kadur	231803	194316	37487	259914	214428	45486	12.13	10.35	21.34	16.17	17.50
3. Koppa	75678	70919	4759	80596	75574	5022	6.50	6.56	5.53	6.29	6.23
4. Mudigere	113483	98428	15055	128437	112692	15745	13.18	14.49	4.58	13.27	12.26
5. Narasimharajapura	51417	45315	6102	56324	49800	6524	9.54	9.90	6.92	11.87	11.58
6. Sringeri	31626	27354	4272	33272	29126	4146	5.20	6.48	-2.95	13.51	12.46
7. Tarikere	179808	148186	31622	205018	170896	34122	14.02	15.33	7.91	17.59	16.64
District Total	911769	751890	159879	1017283	845422	171861	11.57	12.44	7.49	17.54	16.89

be incidentally noted that this growth rate is far below the overall decadal growth rate returned by the State, which is 21.12 per cent. Among the taluks, Tarikere tops the list with a decadal growth rate of 14.02 per cent and is followed by Mudigere (13.18 per cent). This rate is greater than the district average in only one more taluk, viz., Kadur (12.13 per cent). In the remaining 4 taluks the decadal growth rate is below the district average and this rate touches the lowest figure of 5.2 per cent in the case of Sringeri.

The rural-urban break-up shows that the rural population (which accounts for as much as 83.11 per cent of the total population of the district) has registered a decadal growth rate of 12.44 per cent. On the other hand, the urban population (which forms 16.89 per cent of the total population of the district) has witnessed a decadal growth rate of just 7.49 per cent. The growth rate for urban areas generally tends to be higher than that for the rural areas. The 1981-91 decadal growth rates for the urban and rural areas of Karnataka State as such are 29.62 per cent and 17.66 per cent respectively. It is evident from a comparison of the two sets of data that the growth pattern noticed in Chikmagalur district during 1981-91 does not reflect the general pattern noticed in the State.

The talukwise particulars reveal that in six out of the seven taluks, the rural decadal growth rate is higher than the corresponding urban decadal growth rate. The difference between the two rates is highly pronounced in the taluks of Sringeri and Chikmagalur where the rural growth rates are 6.48 per cent and 15.26 per cent respectively as against the corresponding urban growth rates of -2.95 per cent and 0.39 per cent. In the other taluk, viz., Kadur, the urban segment of the population has registered a decadal growth rate of 21.34 per cent in contrast to 10.35 per cent which is the rate registered by the rural segment during the same period. As between 1981 and 1991, there has been no change in the places classified as urban for census purposes in any of the seven taluks of the district. Table 4 highlights the fact that in the matter of population growth Chikmagalur district, especially its urban segment, has experienced a very sluggish trend during the last decade.

(v) Trends of Urbanisation :-

The proportion of urban population to the total population is a measure of urbanisation. According to Table 4, the level of urbanisation of Chikmagalur district has declined during the decade of 1981-91. The proportion of urban population has moved down from 17.54 per cent in 1981 to 16.89 per cent in 1991. Though the extent of the decrease is marginal, the negative trend is quite clear. This phenomenon of a fall in the proportion of urban population is noticeable in six out of the seven taluks. It is only in Kadur taluk that there has been an increase in this regard - the proportion of urban population to the total population of this taluk has risen from 16.17 per cent in 1981 to 17.50 per cent in 1991.

The number of places classified as towns within a taluk or a district is also an important index of urbanisation. On this count, Chikmagalur district has not witnessed any change during the decade 1981-91. The number of towns in the district has remained unchanged at 10 over the decade.

However, as has been pointed out earlier, there is a definite decline in the status of towns. In 1981, all the ten towns enjoyed the status of statutory towns. During the inter-censal decade five towns lost this status due to the dissolution of municipalities which had been constituted decades ago for looking after the civic administration of respective areas. These places have however been continued as non-municipal census towns at the 1991 census despite a downgrading of the civic administration status from "Town Municipal Council" to "Mandal Panchayat".

(vi) Population size of villages :-

The rural population of Chikmagalur district is dispersed in 1021 inhabited villages scattered unevnly over its seven taluks. According to 1991 census, the average population of a village of this district is 828 persons. Talukwise details reveal that this average is the least, viz., 620 persons, in the case of Sringeri Taluk and the highest in the case of Koppa Taluk (viz., 945 persons). The position of Narasimharajapura taluk is comparable to that of Koppa, for this taluk has returned the third highest average size viz., 856 persons per village. Sringeri, Narasimharajapura and Koppa rank amongst the smallest taluks of the district in the matter of grographical area, population and number of villages. These are located in the mountainous malnad region and share common physical characteristics. That there should be such a marked difference in the average population size of a village is quite inexplicable. In Kadur taluk, which incidentally has the highest number of inhabited villages, the average population size of a village is 800 persons whereas in Chikmagalur taluk, which is the second largest taluk in terms of inhabited villages, the average size is 893 persons. In Tarikere, which is also a taluk with a large number of inhabited villages, the average number of persons per village is 806 - a figure which is well below the district average. It is thus evident that the average size of a village is subject to considerable variations within the district. A distribution of the 1021 villages of the district by population size-class is given in Table 5.

In the entire district, there are only six villages with a population of 5000 or more and, in none of these, the population touches the 10,000 mark. While Tarikere the eastern most taluk, which partakes of the characteristics of the plains to a relatively greater extent, accounts for two such villages, the taluks of Kadur, Chikmagalur, Mudigere and Narasimharajapura account for one village each. Such a large sized village is found neither in Sringeri taluk nor in Koppa taluk. In fact, the population of the Taluk Headquarters town of Sringeri is less than 5000 and that of Koppa town is marginally higher than this mark. In the district as a whole, small villages with a population of less than 500 constitute as much as 43.78 per cent and the medium - sized villages with a population in the range of 500 - 1999 account for another 47.89 per cent. In Sringeri taluk, where the average size of a village is the least, 28 out of the 47 villages (59.58 per cent) have a population of 500 or more and the remaining 19 villages (40.42 per cent) are small villages each with a population of less than 500. The taluk wise details reveal that the proportion of very small villages is the least in Narasimharajapura taluk (12.07 per cent) and the highest in Kadur taluk (20.52 per cent). The proportion of small villages lies in the range of 8.75 per cent in Koppa taluk and 30.00 per cent in Mudigere taluk. However, in the case of medium-sized villages with 500 to 1999 inhabitants each, Koppa taluk tops the list with 62.50 per cent and is followed by Sringeri taluk with a tally of 57.45 per cent. At the other end, Mudigere taluk holds the bottom-most place with 41.43 per cent while Chikmagalur taluk (42.59 per cent) holds the penultimate place. The proportion of large villages varies between a minimum of 2.13 per cent in Sringeri taluk and a maximum of 10.65 per cent in Chikmagalur taluk. In Kadur, the taluk with the largest number of inhabited villages, this proportion is 7.84 per cent - a figure slightly above the district average of 7.74 per cent. It may also be noticed from Table 5 that out of the 79 villages in this population range, as many as, 44 are located in the taluks of Chikmagalur and Kadur and another 12 are in Tarikere taluk. Thus, larger villages, as also very small villages, are found in relatively larger numbers in the taluks occupying the eastern half of the district.

(vii) Density of Population :-

The overall density of population in Chikmagalur district as per 1991 census is 141 persons per square kilometre. The rural-urban breakup shows that the

Table 5 : Percentage distribution of villages by population ranges, 1991

Taluk/C.D.Block	No. and Percentage of inhabited villages	No. and percentage of villages in each range (figures in paranthesis indicate percentage of villages in each range)					
		Less than 200	200 - 499	500 1999	2000 - 4999	5000 - 9999	10,000 & above

	(100.00)	(18.06)	(28.24)	(42.59)	(10.65)	(0.46)	
2 Kadur	268	55	67	124	21	1	-
	(100.00)	(20.52)	(25.00)	(46.27)	(7.84)	(0.37)	-
3 Koppa	80	15	7	50	8	-	
	(100.00)	(18.75)	(8.75)	(62.50)	(10.00)	-	-
4 Mudigere	140	28	42	58	11	1	-
	(100.00)	(20.00)	(30.00)	(41.43)	(7.86)	(0.71)	-
5 Narasimharajapura	58	7	17	30	3	1	-
	(100.00)	(12.07)	(29.31)	(51.72)	(5.17)	(1.73)	
6 Sringeri	47	8	11	27	1	-,	
	(100.00)	(17.02)	(23.40)	(57.45)	(2.13)	-	
7 Tarikere	212	39	51	108	12	2	
	(100.00)	(18.40)	(24.06)	(50.94)	(5.66)	(0.94)	
Total	1021	191	256	489	79	6	
	(100.00)	(18.71)	(25.07)	(47.89)	(7.74)	(0.59)	

density figures for the rural and urban areas of the district respectively work out to 119 persons per sq. km. and 2280 persons per sq. km. The overall average density of population for Karnataka is 236 as per 1991 census. The density figures for the rural and urban areas of the State are 166 and 3257 respectively. In Chikmagalur district, the urban areas are more densely populated than their rural counterparts and this feature conforms to the general pattern noticed in the State.

As in the matter of population, in the matter of geographical area too, the villages of the district differ from each other to a considerable extent. Density of population at the village level is an important tool for comparative analysis. The village wise data disclose that the number of persons per sq.km is 50 or less in 16.65 per cent of the 1021 populated villages of the district and that in another 19.10 per cent of the villages the density is in the range of 51 - 100. Villages with a density of 100 persons or less thus account for 35.75 per cent. As may be noticed from Table 6, those with a density in the range of 101 - 200 constitute 35.16 per cent while those with a density of more than 500 persons form a mere 3.92 per cent. A distribution of the populated villages of the district according to density ranges is presented in Table 6.

Table 6 : Distribution of villages by density ranges

Range of density (per sq.km.)	Total no. of villages in each density range	percentage of villages in each density range
1	2	3
- 10	39	3.82
11 - 20	31	3.04
21 - 50	100	9.79
51 - 100	195	19.10
101 - 200	359	35.16
201 - 300	157	15.38

501 and above	40	3.92
Not known	-	-
All ranges	1021	100.00

(viii) Sex Ratio :-

Among the 1,017,283 persons enumerated at the 1991 census in Chikmagalur district, 514,526 are males and the remaining 502,757 are females. The sex ratio, expressed as the number of females per thousand males', for the district, works out to 977. This figure is considerably higher than the average sex ratio for the State, which is 960. It may be of

interest to note that in 1981, the sex ratio for the district was 953 while that for the State was 960. Thus, during the decade 1981-91, quite contrary to the general trend noticed in the State, the sex ratio has registered an upward trend in Chikmagalur district. This phenomenon assumes added significance when it is known that at the All-India level too the sex ratio has suffered a setback, for the All-India sex ratio has moved down from 933 in 1981 to 927 in 1991.

The rural-urban break-up of the population shows that the sex ratio is generally higher in rural areas than that in urban areas. The sex ratio for the rural areas of Chikmagalur district works out to 985 whereas that for urban areas works out to 938. An examination of the data relating to the rural areas at the taluk level i.e., C.D.Block level, (see Table 7) discloses that the sex ratio is the least in Tarikere taluk (967) and the highest in Sringeri taluk (1024). It may be incidentally noted that Sringeri is the smallest taluk of the district. Koppa and Narasimharajapura which are also quite small in population size have a favourable sex ratio, for in both these taluks the number of females exceeds that of males to a significant extent. In Kadur taluk which is the largest in terms of population size, the sex ratio is seen to be 981 - a figure slightly lower than the average for the rural areas.

Table 7 : Sex Ratio for Rural Population of C.D.Blocks, 1991

Sl.No.	Name of C.D.Block	No. of females per 1000 males
1	2	3
1	Chikmagalur	976
2	Kadur	981
3	Koppa	1013
4	Mudigere	997
5	Narasimharajapura	1012
6	Sringeri	1024
7	Tarikere	967
-	District Rural	985

The sex ratio for the urban areas of the district as such is 938. However, as may be seen from the following Table, there are considerable differences at the town level. In Chikmagalur, the most populous town of the district, the sex ratio is 933 and in Sringeri the smallest town the sex ratio is 995. The sex ratio is above the district average in the towns of Tarikere, Ajjampura, Birur and Sringeri and touches the maximum of 998 in the case of Koppa town. In the remaining 5 towns, the sex ratio is lower than the district average and reaches the minimum of 836 in Kudremukh town. It may be incidentally mentioned that in 1981, Kudremukh town had a much lower sex ratio viz., 576. In comparative terms, the sex ratio of this mining town has considerably improved during the decade.

Table 8 : Sex Ratio for Towns, 1991

Sl.No.	Name and Civic Administrative Status	No. of females per 1000 males
1	2	3

9	Sringeri (MP)	995
10	Tarikere (TMC)	943
-	District Urban	938

(ix) Scheduled Castes :-

At the 1991 Census, 195,852 persons in a total population of 1,017,283 enumerated in the district have returned themselves as belonging to Scheduled Castes. Of them, it may be further noted 175,176 (89.44 per cent) are residing in rural areas and the remaining 20,676 (10.56 per cent) are residing in urban areas. In terms of proportions, the Scheduled Castes constitute 19.25 per cent of the total population of the district, 20.72 per cent of the rural population and 12.03 per cent of the urban population. The proportion of the Scheduled Castes population in Chikmagalur district is significantly higher than the State average which is 16.38 per cent.

If the villages of the district are classified according to the proportion of Scheduled Castes population to the total population of the village concerned, the distribution of the villages would be as shown in Table 9. It may be noted that persons belonging to Scheduled Castes are not found in 153

villages. In 47.34 per cent of the 868 villages having Scheduled Castes, their proportion to the total population exceeds the 20 per cent mark.

Table 9 : Proportion of Scheduled Castes Population to Total Population in villages, 1991

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
0 - 5	123	14.17
6 - 10	99	11.41
11 - 15	124	14.29
16 - 20	111	12.79
21 - 30	170	19.58
31 and above	241	27.76
All ranges	868	100.00

Town wise information furnished in Table 10 which is given below reveals that the persons belonging to Scheduled Castes are found in varying numbers in all the towns of the district. The proportion of Scheduled Castes is above the district urban average (12.03 per cent) in the towns of Narasimharajapura and Kadur and happens to be the highest (viz., 17.07 per cent) in Birur Town. In Chikmagalur, the most populous town of the district, the persons belonging to the Scheduled Castes constitute 11.62 per cent. This figure is quite close to the district average. The proportion of Scheduled Castes is well below the 10 per cent mark in the towns of Mudigere, Tarikere, Sringeri and touches the lowest figure of 6.15 per cent in the case of Koppa town.

Table 10 : Percentage of Scheduled Castes Population in Towns, 1991

Name of Town	Total Population	Total S.C.Population	Percentage of S.C. Population to Total Population
1	2	3	4
1 Ajjampura (MP)	8758	998	11.40
2 Birur (TMC)	20095	3430	17.07
3 Chikmagalur (CMC)	60816	7068	11.62
4 Kadur (TMC)	25391	4199	16.54
5 Koppa (MP)	5022	309	6.15

8 Narasimharajapura (MP)	6524	918	14.07
9 Sringeri (MP)	4146	264	6.37
10 Tarikere (TMC)	25364	1879	7.41
District Urban	171861	20676	12.03

(x) Scheduled Tribes :-

At the 1991 Census, 26,534 persons out of the 1,017,283 persons enumerated in the district have returned themselves as belonging to Scheduled Tribes. Amongst these persons, 24,553 (92.53 per cent) and 1981 (7.47 per cent) are residing in the rural and the urban areas respectively. The Scheduled Tribes constitute 2.61 per cent of the total population of the district. This figure is considerably lower than the State average which is 4.26 per cent.

If the villages of the district are classified by ranges according to the proportion of Scheduled Tribes to the total population of the concerned village, the distribution of the villages would be as shown in Table 11 which is given below. At the outset it may be noted that persons belonging to Scheduled Tribes are not found in 636 villages out of the 1021 populated villages of the district.

Table 11 : Proportion of Scheduled Tribes Population to total Population in villages, 1991

Percentage range of Scheduled Tribes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
0 - 5	221	57.40
6 - 15	110	28.57
16 - 25	23	5.97
26 - 35	18	4.68
36 - 50	7	1.82
51 and above	6	1.56
All ranges	385	100.00

Townwise particulars furnished in Table 12 indicates that in all the towns of the district there are several persons belonging to Scheduled Tribes and also that their numerical strength varies between a minimum of 22 in the two towns of Sringeri and Koppa and a maximum of 518 in Chikmagalur. When viewed with reference to the total population of the town, the Scheduled Tribes constitute less than 0.50 per cent in 3 towns, between 0.50 and one per cent in 2 towns and 1.00 to 2.00 per cent in 3 towns. In the remaining 2 towns, viz., Ajjampura and Narasimharajapura, the share of the Scheduled Tribes in the total population of the town is seen to be a little more than 3 per cent. In Chikmagalur, the most populous town of the district, the Scheduled Tribes constitute 0.85 per cent.

Table 12 : Percentage of Scheduled Tribes Population in Towns, 1991

Name of Town	Total Population	Total Scheduled Tribes Population	Percentage of Scheduled Tribes Population to total population
1	2	3	4
1 Ajjampura (MP)	8,758	279	3.19
2 Birur (TMC)	20,095	81	0.40
3 Chikmagalur (CMC)	60,816	518	0.85
4 Kadur (TMC)	25,391	112	0.44

6 Kudremukh (NAC)	7,792	138	1.77
7 Mudigere (MP)	7,953	156	1.96
8 Narasimharaja-pura (MP)	6,524	205	3.14
9 Sringeri (MP)	4,146	22	0.53
10 Tarikere (TMC)	25,364	448	1.77
District Urban	171,861	1,981	1.15

(xi) Literacy :

According to the 1991 Census, out of the 1,017,283 persons enumerated in the district 147,192 persons i.e., 14.47 per cent are in the age group of 0 - 6 years. At the 1991 Census, all these persons, that is children below 7 years of age are by definition treated as illiterate. These persons are therefore to be excluded while computing the literacy rates. Accordingly, since 531,164 persons in a total population of 870,091 persons aged 7 years and upwards have returned themselves as literate, the literacy rate for Chikmagalur district works out to 61.05 per cent. The sexwise break-up shows that the literacy rates for the male and female segments of the population aged 7 years and upwards work out to 70.56 per cent and 51.31 per cent respectively. These literacy rates for Chikmagalur district are slightly higher than the corresponding averages for the State which are 56.04 per cent for total population (excluding 0 - 6 age group), 67.26 per cent for males and 44.34 per cent for females.

The particulars relating to rural areas indicate that the number of literates in the 7 plus age group is 415,210 and of them 245,919 are males and 169,291 are females. These literate persons constitute 57.46 per cent of the total rural population. In the male and female segments of the rural population, the proportion of literate comes to 67.59 per cent and 47.19 per cent respectively. Taluk-level (i.e., C.D.Block level) data set out in Table 13 provides a comparative idea about the magnitude of inter-taluk differences regarding 'total' as well as sexwise literacy rates.

Table 13 : Literacy Rates for Rural Population of Taluks (C.D.Blocks) by sex, 1991 (Excluding children in the age-group 0 - 6)

Sl.No.	Name of Taluk/ C.D. Block	Percentage of Literates		
		P	M	F
1	2	3	4	5
1	Chikmagalur	56.14	66.33	45.71
2	Kadur	54.53	66.70	42.11
3	Koppa	64.86	73.28	56.56
4	Mudigere	53.85	62.91	44.75
5	Narasimharajapura	63.16	70.38	56.06
6	Sringeri	70.75	78.43	63.27
7	Tarikere	57.68	67.98	47.04
	District Rural	57.46	67.59	47.19

Among the Taluks, Sringeri tops the list with a tally of 70.75 per cent and is followed by Koppa (64.86 per cent). Mudigere, where the literacy rate is just 53.85 per cent holds the bottom-most place. In Kadur, which is the largest taluk in terms of number of villages and population, the literacy rate is 54.53 per cent and the taluk holds an unenviable sixth place among the seven taluks of the district. Even in Chikmagalur taluk, the percentage of literacy does not measure up to the district average. If the literacy rates for males are examined it is seen that the taluks of Sringeri (78.43 per cent) and Mudigere (62.91 per cent) occupy the top most and the bottom-most places respectively. The literacy rate is above the district average in Koppa (73.28 per cent), Narasimharajapura (70.38 per cent) and Tarikere (67.98 per cent) and significantly lower in the taluks of Chikmagalur (66.33 per cent) and Kadur (66.70 per cent). In the case of female population, the literacy rate varies between 42.11 per cent in Kadur and 63.27 per cent in Sringeri. The position of Mudigere is better only in comparison to that of Kadur. Apart from Sringeri, the other taluks where the female literacy rate is higher than the district average are Koppa (56.56 per cent) and Narasimharajapura (56.06 per cent). These three taluks are small in population size, and are located in the hilly malnad tracts of the district.

As in the case of rural areas, in the case of urban areas also there are considerable differences

in the literacy rates for males and females. The literacy rates for females are consistently lower than those for the males in each and every town of the district. The literacy rate for the urban population works out to 78.50 per cent. The sexwise break-up shows that the literacy rates for the male and female segments of the urban population are 84.73 per cent and 72.03 per cent respectively. Townwise particulars regarding literacy rates are furnished in the following Table i.e., Table 14.

Table 14 : Literacy rates for Towns, 1991 (Excluding children in the age-group 0-6)

Name and civic administration status of town	Percentage of literates		
	P	M	F
1	2	3	4
1 Ajjampura (MP)	68.98	77.46	60.22
2 Birur (TMC)	68.19	76.14	60.04
3 Chikmagalur (CMC)	84.16	88.87	79.08
4 Kadur (TMC)	70.11	76.74	62.99
5 Koppa (MP)	90.28	94.50	85.97
6 Kudremukh (NAC)	86.19	91.35	79.91
7 Mudigere (MP)	85.20	90.52	79.20
8 Narasimharajapura (MP)	81.90	86.61	76.82
9 Sringeri (MP)	88.90	92.42	85.36
10 Tarikere (TMC)	75.95	84.18	67.26
District Urban	78.50	84.73	72.03

In six out of the ten towns, the literacy rate is higher than the district urban average and the highest literacy rate of 90.28 per cent has been returned by Koppa town. The position of Sringeri the smallest town and an important religious centre is next only to that of Koppa. The literacy rate in Chikmagalur, the most populous town of the district, is fairly above the district urban average whereas that in Kadur and Tarikere, the second and third most populous towns, is quite low viz., 70.11 per cent and 75.95 per cent respectively. The lowest literacy rate of 68.10 per cent is noticed in Birur which happens to be the fourth largest town in terms of population size.

The sexwise details show that in the case of males the literacy rate touches the maximum of 94.50 per cent in Koppa and is followed by 92.42 per cent in Sringeri. This rate is above 90 per cent in two other towns viz., Mudigere and Kudremukh Notified Area. As in the case of total literacy rate, in the case of male literacy too, Birur holds the last place among the towns and has returned the lowest rate of 76.14 per cent. In the case of females, the literacy rate exceeds 80 per cent in Sringeri (85.36 per cent) and Koppa (85.97 per cent), lies between 70 - 80 per cent in the towns of Kudremukh Notified Area, Mudigere, Chikmagalur and Narasimharajapura and is below 70 per cent in Tarikere, Kadur, Ajjampura and Birur. With a female literacy rate of just 60.04 per cent, Birur holds the bottom-most place among the towns of the district.

(xii) Main Workers, Marginal Workers and Non-Workers :-

Every person enumerated at the 1991 census has been classified either as a main worker or as a marginal worker or as a non-worker depending on whether or not the person concerned participated in any economic activity and, if yes, the total duration of participation in terms of days during the reference period of one year preceding the date of enumeration. Accordingly, in the total population of Chikmagalur district, 412,276 (i.e, 40.53 per cent) are main workers, 45,182 (i.e., 4.44 per cent) are marginal workers and the remaining 559,825 (i.e., 55.03 per cent) are non-workers. A comparison with the corresponding figures for the State as a whole - which are 38.45 per cent main workers, 3.54 per cent marginal workers and 58.01 per cent non-workers-reveals that the proportions of main workers and marginal workers are significantly higher in the population of Chikmagalur district.

The sexwise break-up shows that in the male population of the district, 56.75 per cent are main workers, 0.79 per cent are marginal workers and 42.46 per cent are non-workers. On the other hand, in the female population while the main workers constitute a mere 23.93 per cent and the marginal workers account for another 8.18 per cent, the non-workers form as much as 67.89 per cent. Evidently, the male segment of the population contains a much larger proportion of workers than its female counterpart and this feature noticeable in Chikmagalur district conforms to the general pattern noticed in the State.

Within the district, there are considerable differences in the proportions of main workers, marginal workers and non-workers returned by the rural areas and the urban areas respectively. As compared to 42.23 per cent in the case of rural population, the main workers in the urban population constitute a mere 32.12 per cent- a difference of 10 percentage points which is quite significant. The marginal workers too are found in a relatively larger proportion (5.18 per cent) in the rural population than in the urban population (0.82 per cent). On the other hand, the non-workers account for 52.59 per cent of the rural population as against 67.06 per cent returned by the urban population. Within each of these categories, viz., rural and urban, there are differences among the administrative units such as taluks (i.e., C.D.Blocks) and towns. A comparative idea about the variations among the administrative units in the rural areas may be had from the particulars presented in Table 15.

Table 15 : Percentage of Main Workers, Marginal Workers and Non-Workers for Rural Population of Taluks (C.D.Blocks), 1991

Sl No	Name of the Taluk/C D Block	Percentage of											
		Main Workers to Total Population			Marginal Workers to Total Population			Total Workers to Total Population			Non-Workers to Total Population

	District Rural	42 23	57 72	26 52	5 18	0 88	9 54	47 41	58 60	36 06	52 59	41 40	63 94

At the taluk-level (i.e, C.D.Block level) the proportion of main workers happens to be the least (38.90 per cent) in Kadur and the highest (48.52 per cent) in Mudigere. The range of variation, which is 10 percentage points, is quite large. It may be recalled that Kadur is the most populous taluk of the district and since it has returned the lowest proportion of main workers the overall average for the district too has been adversely affected. In contrast, in Chikmagalur, the second largest taluk, the proportion of main workers is slightly above the district average. However, this proportion is well below the district average in the third largest taluk of Tarikere. In Sringeri, the smallest taluk of the district too the proportion of main workers is below the district average. In the male segment of the rural population of these taluks, the proportion of main workers varies between 56.56 per cent in Chikmagalur and 59.95 per cent in Sringeri and is seen to be 57 38 per cent in Kadur. The range of variation is very narrow. In the female segment, the proportion of main workers is the least (20.06 per cent) in Kadur and the highest (37.11 per cent) in Mudigere. Tarikere (21.55 per cent) and Sringeri (23.21 per cent) are the other taluks in which this proportion is lower than the district average. In the case of female population of the taluks, the proportion of main workers varies within a wide margin covering as much as 17 percentage points.

Marginal workers are found among males as well as females in the rural areas of all the taluks. The proportion of marginal workers to total population varies between 2.03 per cent in Mudigere and 9.74 per cent in Kadur. The sexwise details reveal that the disparity between the proportion of marginal workers among males and females is quite large-as against a mere 0.88 per cent in the case

of males, among females the marginal workers constitute as much as 9.54 per cent. In the case of males, this proportion varies between 0.47 per cent in Chikmagalur and 1.58 per cent in Kadur. On the other hand in the case of females, this proportion varies between 3.29 per cent in Mudigere and 18.06 per cent in Kadur. It may be generally observed that in the taluks where the proportion of main workers is low that of marginal workers is relatively high inasmuch as the proportion of total workers in the taluks takes on a more balanced appearance. As may be noticed in Table 15, the proportion of total workers varies between 44 79 per cent in Tarikere and 50.55 per cent in Mudigere and the average for the district is 47.41 per cent.

The total population is divided into two broad streams - those of workers and non-workers. Thus if the proportion of workers is low that of non-workers is high. The converse is also true. According to Table 15, the non-workers constitute 55.21 per cent in Tarikere and 49.45 per cent in Mudigere

A town-wise percentage distribution of the urban population of the district by sex, according to the categories of main workers, marginal workers and non-workers is set out in Table 16.

Table 16 Percentage of Main Workers, Marginal Workers and Non-Workers in Towns, 1991

Sl No	Name and Civic Administrative Status of Town	Percentage of

9	Sringeri (MP)	33 00	53 23	12 67	0 65	0 43	0 87	33 65	53 66	13 54	66 35	46 34	86 46
10	Tarikere (TMC)	32 43	53 37	10 04	1 24	0 24	2 29	33 67	53 61	12 53	66 33	46 39	87 47
	District Urban	32 12	52 06	10 86	0 82	0 36	1 32	32 94	52 42	12 18	67 06	47 58	87 82

In the urban population of the district 32.12 per cent are main workers. Among the towns, Kudremukh Notified Area has returned the highest proportion of main workers (36.50 per cent) and is followed by Birur (33 15 per cent) and Mudigere (33.13 per cent). On the other hand this proportion is very low in Ajjampura (30.59 per cent) and happens to be the least in Narasimharajapura (30.13 per cent). The range of variation, which covers about 6 percentage points only, is quite moderate, especially if the position in Kudremukh a mining town-were to be ignored, for the difference between the highest and the second highest figures, accounts for 3 percentage points.

In all the towns of the district, with the exception of Kudremukh Notified Area, the proportion of main workers in the male population lies between 50.37 per cent and 53.47 per cent. In Kudremukh this proportion touches the maximum viz., 59.67 per cent. In the case of female population, the proportion of main workers varies between 8.52 per cent in Narasimharajapura and 14.29 per cent in Birur and the average for the district is 10.86 per

cent. Kudremukh, which has the highest rate for male population has a very low rate of 8.79 per cent - slightly above the lowest figure - for the female population.

Marginal workers are met with in varying numbers in all the towns of the district. The proportion of marginal workers to total population varies between a negligible 0.06 per cent in Ajjampura (and 0.07 per cent in Mudigere) and a cognisable 2.05 per cent in Kadur. The other towns which have returned a proportion which is higher than the district average of 0.82 per cent are Birur (0.94 per cent), Tarikere (1.24 per cent) and Koppa (1.28 per cent). Sexwise details show that the male population of Ajjampura as also that of Koppa does not contain any marginal workers at all. The proportion of male marginal workers is thus nil in these two towns, less than 0.10 per cent in the towns of Mudigere and Narasimharajapura and is above 0.50 per cent in only one town viz., Kadur (0.91 per cent). Female marginal workers are found in all the towns. The proportion of marginal workers in the female population varies between 0.10 per cent in Mudigere (and 0.12 per cent in Ajjampura) and 3.27 per cent in Kadaur. Apart from Kadur, the other towns in which this proportion exceeds 2 per cent are Koppa (2.55 per cent) and Tarikere (2.29 per cent).

If the proportion of total workers to total population for the towns is examined it is noticed that it varies within a narrow range, viz., 30.47 per cent in Narasimharajapura and 37.03 per cent in Kudremukh Notified Area. Next to Kudremukh, Kadur has returned the highest proportion of workers (34.24 per cent) and it is followed closely behind by Birur (34.09 per cent). Table 16 discloses that the proportion of non-workers in towns is the highest in Narasimharajapura town (69.53 per cent) and the least in Kudremukh Notified Area (62.97 per cent). The proportion of non-workers in the male segment of the population is less than 50 per cent in all the towns and is slightly below 40 per cent in Kudremukh Notified Area. On the other hand, in the female segment of the population, the proportion of non-workers exceeds 90 per cent mark in the towns of Narasimharajapura (91.16 per cent), Kudremukh Notified Area (90.50 per cent) and Ajjampura (90.33 per cent), lies between 85 to 90 per cent in 6 towns and is slightly lower than 85 per cent in only one town viz., Birur (84.12 per cent).

Analysis of the particulars regarding the main workers, marginal workers and non-workers in different rural areas, as well as in different urban areas of the district, discloses that the variations among the various units do not conform to any particular pattern.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

The Primary Census Abstract furnishes, in a nutshell as it were, vital information on the basic demographic and economic composition of the population. This statement, referred to as PCA, summarises the whole mass of data gathered at the Census. The smallest geographical unit with a clearly defined boundary identifiable on the field that has been delineated for ensuring cent per cent coverage of the area under the jurisdiction of various administrative units is the Census Enumeration Block. The details gathered in the household schedules in respect of each and every person enumerated in each such block have been meticulously tabulated to prepare this Primary Census Abstract. The tabulation has been done entirely by manual processing of the data at the Regional Tabulation Offices. The village PCA is derived from the Block PCA and in case of urban areas, the Block PCA has yielded the ward and Town PCA. In turn, the Taluk (Rural) and Taluk (Urban) as well as Taluk (Total) PCA statements as well as the C.D.Block-wise PCA Statements are built up on the basis of Village-wise and Town-wise data. This process goes on until it yields the data for higher and higher administrative divisions, such as the District and the State, culminating at the apex in the form of a single line statement for the country. The entire edifice thus rests on the information contained in the household schedules filled up by the enumerator.

The District Primary Census Abstract is presented immediately after this Explanatory Note. This statement gives the aggregate figures for the district with the rural-urban break up, the aggregate figures for each C.D.Block (with the rural-urban break up) and the aggregate figures for each town/urban agglomeration within the district. It is important to note that the lowest unit for which the data are presented here is the C.D.Block and not the traditional taluk*. Thereafter the C.D.Blocks within the district are taken up one by one in the alphabetical order of their names. For each C.D.Block, an alphabetical list of villages (which indicates the code numbers assigned to villages in 1991 as well as the corresponding code numbers assigned in 1981) precedes the presentation of the village-wise PCA followed by the ward-wise PCA in respect of towns and outgrowths if any within the jurisdiction of the concerned C.D.Block. After thus exhausting all the C.D.Blocks in the district, the town/urban agglomerations are covered one by one in the ascending order of their location code numbers without regard to the fact whether any of these towns or portions thereof (eg. outgrowths) have already been covered under one or the other of the Community Development Blocks. As in 1981, on this occasion too, the PCA has been compiled separately in respect of the Scheduled Castes and Scheduled Tribes Population of the District. The District PCA for Scheduled Castes and for Scheduled Tribes are presented after the PCA for the urban areas. The pattern of presentation of data in these two statements is the same as that adopted for presentation of data in the District PCA.

It may be recalled that in Karnataka the term Community Development Block is not in vogue and that its equivalent is the Taluk Panchayat Samiti. The jurisdiction of each Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns. In other words, the administrative jurisdiction of a Taluk Panchayat Samiti covers all the villages of the Taluk (as listed out for the 1991 census) as also the villages or parts thereof which have been classified as non-municipal towns for purposes of the 1991 census and the revenue villages or portions thereof which have been identified as outgrowths of statutory towns and have therefore been excluded from the purview of Rural PCA. It is important to remember that in this statement, the particulars relating to the non-municipal towns (such as those administered by Mandal Panchayats) and those relating to the outgrowths (places which are not towns in their own right) are repeated - for these appear once below the concerned C.D.Block and again under the 'urban areas' of the district.

* *For purposes of comparison with 1981 data the Taluk wise District PCA with Rural - Urban breakup is given in Appendx I.*

The Primary Census Abstract has 21 main columns to furnish information about the name of the unit, area, number of occupied residential houses, number of households, population, number of persons in the age-group of 0-6, number of persons belonging to Scheduled Castes and Scheduled Tribes, number of literates, number of main workers and their distribution among nine industrial categories, number of marginal workers and the number of non-workers. In the District PCA, each column indicating the data on population characteristics is sub-divided into 3 columns in order to indicate the total as well as the sex-wise break-up whereas in the village/town PCA, each such column (with the exception of Total Population and Population in the 0-6 age group) is sub-divided into two columns to indicate the sex-wise break-up only.

It may be mentioned at this juncture that for each town/urban agglomeration in the district, information regarding the total population, Scheduled Castes Population and Scheduled Tribes Population of each census enumeration block as also the particulars regarding the boundaries of each Census Enumeration Block have been compiled and are kept for the census data users' reference in the Library of the Office of the Director of Census Operations, Karnataka.

COLUMN 1 : Location Code Number :- The location code number assigned to the village or the town as the case may be is entered in this column.

COLUMN 2 :- Name of Village/Town/Ward :- The name of the village or the town as finally adopted for the 1991 census purposes is entered in this column. The towns and cities are often divided into smaller geographical segments called wards, mohallas or divisions for purposes of administration. Such units bear distinctive locality names or specific numbers. It is this name or the number of the ward or its equivalent unit that is mentioned here in the case of towns.

Irrespective of whether a town is divided into administrative wards or not, every town is invariably constituted into territorial divisions for the conduct of civic elections. This delimitation of constituencies is done as an essential and preliminary process of civic elections scheduled to be held periodically. So, in some cases the name or number reported in this column refers to such territorial divisions and not to administrative divisions.

COLUMN 3 : Area of the Village in Hectares and of Town in Square Kilometres :- For the villages, the area is reported here in hectares upto two places of decimal and for the towns, as also the wards or divisions thereof, the area figures are furnished in square kilometres upto two places of decimal. It may be incidentally mentioned here that for none of the towns in the State, Ward/Division-wise area figures are available. If the area figures are not available for any reason, a dash (-) is entered in this column.

COLUMN 4 : Number of Occupied Residential Houses :- A 'Census House' could be wholly residential or partly residential or else completely non-residential according to the use to which it is put. All census houses enumerated as either wholly or partly residential at the time of the census count are added together to get the data for the block and from thence to derive the data for higher units. Houses found vacant at the time of the census count are not reckoned as occupied residential houses. The information for this column has been compiled from the Abridged Houselists.

COLUMN 5 : Number of Households :- This information too is compiled from the Abridged Houselists. The actual total number of households including the 'normal', 'institutional' and the 'houseless' that were enumerated at the census count is mentioned in this column. Generally, the number of households in any unit would be equal to or more than the occupied residential houses in that unit because of the houseless households that one may come across in that unit and also because of the occasional instances of two or more households sharing a common census house.

COLUMNS 6, 7 AND 8: Total Population (including Institutional and Houseless Population):- The total population as on the reference date is furnished in column 6 while in the next two columns the sex-wise break-up is given. The institutional population refers to such of those who were enumerated in institutions like hostels, chummeries, hospitals, prisons etc. The houseless persons

represent those who were enumerated on the night of 28th February 1991 at the places where they were found at that time, provided they had not already been enumerated elsewhere.

COLUMNS 9, 10 and 11 : Population in the age group (0 - 6) :- The total number of children belonging to the age-group of 0-6 in the total population as also the number of males and females among them are reported under these three columns. This information is of considerable significance since all such children are regarded as illiterate at the 1991 Census.

COLUMNS 12 AND 13 : Scheduled Castes :- Number of males and females belonging to Scheduled Castes is indicated in these two columns. Whether a person belongs to a Scheduled Caste or not has been determined with reference to the List of Scheduled Castes in Karnataka according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No. 108 of 1976) (See Appendix). Scheduled Castes may belong to either the Hindu or the Sikh or the Buddhist religion.

COLUMNS 14 AND 15 : Scheduled Tribes :- Number of males and females belonging to Scheduled Tribes is reported under these columns. Whether a person belongs to a Scheduled Tribe or not has been determined with reference to the 'List of Scheduled Tribes in Karnataka' according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No.108 of 1976) (See Appendix for the list). Scheduled Tribes may belong to any religion.

COLUMNS 16 AND 17 : Literates :- Sex-wise break up of the total number of persons who are literate, irrespective of their levels of educational attainments is given in these two columns. By definition a literate is a person who can both read and write with understanding in any language. It is important to note that for purposes of the 1991 census by definition all children in the 0 - 6 age group are regarded as illiterate. Even if such a child is going to school and has picked up reading and writing a few odd words it is treated as illiterate.

COLUMNS 18 AND 19 : Total Main Workers:- A worker is a person who participates in economically productive work. The reference period for judging whether a person is a worker or not in the year preceding the day of enquiry. If a person had worked even for one day during this entire period he or she is entitled to be classified as a worker. If for any such worker the period of work is 183 days or more then that person is a main worker. On the other hand, if such period is less than 183 days then that worker is a marginal worker. In columns 18 and 19 the total number of main workers is furnished sex-wise and a sex-wise break up of these main workers according to the nine-fold 'industrial classification of workers' is presented in the next 20 columns i.e., from column 20 to column 39.

COLUMNS 20 AND 21 : Cultivators (Category-I) :- These two columns give out the number of male and female workers who satisfy the conditions laid down in the definition of a cultivator. A cultivator may be an employer, a single worker or an unpaid family worker. Participation in work may be by way of physical labour or by way of supervision and direction. The lands cultivated may be owned by the household or taken on lease for payment in money or kind or share in the produce. Cultivation, as already emphasised involves ploughing, sowing and harvesting and allied activities in the production of cereals and millet crops, pulses, raw jute and kindred fibres, sugarcane, tapioca and oil seeds.

COLUMNS 22 AND 23 : Agricultural Labourer (Category -II) :- A person who works in another person's land for wages in money or kind or share and does not have any lease or contract on the land on which he or she works is an agricultural labourer. In this case too, the crops grown on the lands are quite pertinent and the difference between a cultivator and an agricultural labourer lies in the fact that the former works on his own or leased in lands as an independent worker while the latter works for wages having no right whatsoever on the lands on which he works. The sex-wise break-up of such workers is given in these two columns.

COLUMNS 24 AND 25 : Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities (Category - III) :- A sex-wise break up of the workers who were mainly engaged in activities connected with livestock rearing, forestry

and logging, hunting, fishing, plantations, orchards etc., is given under these columns.

COLUMNS 26 AND 27 : Mining and Quarrying (Category - IV) :- A sex-wise break up of the workers mainly engaged in activities connected with mining and quarrying is given under these columns.

COLUMNS 28 AND 29 : Manufacturing, Processing, Servicing and Repairs - Household Industry (Category - V[a]) :- Household industry belongs to the broad category of 'manufacturing, processing, servicing and repairs' and represents a particular sector therein. Household industry is generally conducted by the head of household himself or herself and or mainly by the members of the household, at home or within the village in the case of those dwelling in rural areas and only within the residential premises occupied by the household in the case of those living in urban areas. A person may be a labourer or a petty employee in the household industry run by some other household. By and large the household industry is carried on by individuals on a small scale with or without the assistance of family members all of whom work as unpaid family workers and the entire earnings are treated as family income.

COLUMNS 30 AND 31 : Manufacturing, Processing, Servicing and Repairs - Non-household Industry (Category - V[b]) :- A sex-wise break up of the workers who were engaged in manufacturing, processing, servicing and repair activities in establishments which do not qualify to be classified as household industry as defined above {category V(a)} is given here.

COLUMNS 32 AND 33 : Construction (Category-VI) :- Workers engaged in construction, maintenance, upkeep, repair and similar activities of buildings, roads, railways, bridges, dams, canals, electrical and water supply installations, communication systems etc., are shown under this category.

COLUMNS 34 AND 35 : Trade and Commerce (Category - VII) :- In these two columns the number of male and female workers engaged in wholesale or retail trade in goods or engaged in dealing with insurance, stocks and shares, banking and financial institutions etc., either as proprietors or in any other capacity are indicated.

COLUMNS 36 AND 37 : Transport, Storage and Communications (Category - VIII) :- A sex-wise breakup of the workers in establishments such as railways, road transport, transportation by water-ways or by air, postal and telegraphs, telecommunications etc., which are engaged in transport, storage and communication activities is given in these columns.

COLUMNS 38 AND 39 : Other Services (Category - IX) :- This residuary category includes employees of the Central and State Governments, local bodies and other organisations and institutions engaged in educational, scientific, medical and health services, religious and welfare services, community services, recreational services, personal services and other miscellaneous activities not covered in the 8 categories specified above.

COLUMNS 40 AND 41 : Marginal Workers :- Males and females who are workers but have worked for less than 183 days during the reference year are reported under these two columns. Such workers, irrespective of the economic sector in which they work, are considered together and reported here.

COLUMN 42 AND 43 : Non-workers :- Irrespective of age and sex, all those who are not economically active are non-workers and a sex-wise break-up of such persons is given in these two columns. The aggregate of the main workers, marginal workers and non-workers would be equal to the total population of that unit.

NOTE 1 : The area figure for the district given under column No.4 against "Total" represents "Geographical Area" and has been furnished by the Surveryor General, India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D.Blocks/Taluks in the district will not tally with the district figures (except urban), because the area figures for C.D.Blocks/Taluks represent the land-use area based on village wise area figures as reported by the Local Officers. The total area of the taluk includes the area of the statutory as well as non statutory towns within the jurisdiction of the concerned taluk. The total area of the C.D.Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2 : Outgrowths of towns in urban agglomerations are denoted by letter "OG".

3 : The following abbreviations have been used to indicate the Civic Administration Status of Town.

MC : Municipal Corporation
CMC : City Municipal Council
TMC : Town Municipal Council
NAC : Notified Area Committee
CB : Cantonment Board
SB : Sanitary Board
MP : Mandal Panchayat
NMCT : Non-Municipal Census Town

23. Bhovi
24. Bindla
25. Byagara
26. Chakkiliyan
27. Chalavadi, Chalvadi, Channayya
28. Chandala
29. Chenna Dasar, Holaya Dasar
30. Dakkal, Dokkalwar
31. Dakkaliga
32. Dhor, Kakkayya, Kankayya
33. Dom, Dombara, Paidi, Pano
34. Ellamalwar, Yellammalawandlu
35. Ganti Chores
36. Garoda, Garo
37. Godda
38. Gosangi
39. Halleer
40. Halsar, Haslar, Hulasvar, Halasvar
41. Handi Jogis
42. Hasla
43. Holar, Valhar
44. Holaya, Holer, Holeya
45. Holeya Dasari
46. Jaggali
47. Jambuvulu
48. Kadaiyan
49. Kalladi
50. Kepmaris
51. Kolupulvandlu
52. Koosa
53. Koracha
54. Korama
55. Kotegar, Metri
56. Kudumban
57. Kuravan
58. Lingader
59. Machala
60. Madari
61. Madiga
62. Mahar, Tarat, Dhegu Megu
63. Mahyavanshi, Dhed, Vankar, Maru Vankar
64. Maila
65. Mala
66. Mala Dasari
67. Mala Hannai
68. Mala Jangam
69. Mala Masti
70. Mala Sale, Netkani
71. Mala Sanyasi
72. Mang, Matang, Minimadig
73. Mang Garudi, Mang Garodi
74. Manne

75. Masthi
76. Mavilan
77. Meghval, Menghvar
78. Moger
79. Mukri
80. Mundala
81. Nadia, Hadi
82. Nalkadaya
83. Nalakeyava
84. Nayadi
85. Pale
86. Pallan
87. Pambada
88. Panchama
89. Panniandi
90. Paraiyan, Paraya
91. Paravan
92. Rancyar
93. Samagara
94. Samban
95. Sapari
96. Sillekyathas
97. Sindhollu, Chindollu
98. Sudugadu Siddha
99. Thoti
100. Tirgar, Tirbanda
101. Valluvan

SCHEDULED TRIBES

1. Adiyan
2. Barda
3. Bavacha, Bamcha
4. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5. Chenchu, Chenchwar
6. Chodhara
7. Dubla, Talavia, Halpati
8. Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9. Gond, Naikpod, Rajgond
10. Gowdalu
11. Hakkipikki
12. Hasalaru
13. Irular
14. Iruliga
15. Jenu Kuruba
16. Kadu Kuruba
17. Kammara (in South Kanara District and Kollegal Taluk of Mysore District)
18. Kaniyan, Kanyan (in Kollegal Taluk of Mysore District)
19. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20. Kattunayakan
21. Kokna, Kokni, Kukna
22. Koli Dhor, Tokre Koli, Kolcha, Kolgha
23. Konda Kapus
24. Koraga
25. Kota
26. Koya, Bhine Koya, Rajkoya
27. Kudiya, Melakudi
28. Kuruba (in Coorg District)
29. Kurumans
30. Maha Malasar
31. Malaikudi
32. Malasar
33. Malayekandi
34. Maleru
35. Maratha (in Coorg District)
36. Marati (in South Kanara District)
37. Meda
38. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
39. Palliyan
40. Paniyan
41. Pardhi, Advichincher, Phanse Pardhi
42. Patelia
43. Rathawa
44. Sholaga
45. Soligaru
46. Toda
47. Varli
48. Vitolia, Kotwalia, Barodia
49. Yerava

Appendix III - PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All - India and for each State and Union Territory The publication series is as follows

Series No

1 India

In each of these series (for all - India and each State/Union Territory) the different series of tables (A Series - General Population Tables, B - Series - General Economic Tables, etc.,) will be brought out as different Parts Apart from these, District Census Handbooks will be published for each district in the country These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all - India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan

Part No and subject covered	Sub-part No if any, and the topics covered
1	2
Part I - Administration Report (for Office use only)	Part I-A Administration Report Enumeration
	Part I B Administration Report Tabulation
Part II - General Population Tables	Part II-A - General Population Tables - A-Series
	Part II-B - Primary Census Abstract
Part III - General Economic Tables	Part III-A B-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories
	Part III-B - B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers seeking/available for work will be entered on full count basis
Part IV - Social and Cultural Tables	Part IV-A - C-Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism
	Part IV-B - C-Series tables covering mother tongue, religion of population and household composition

Part V - Migration Tables	Part V-A - D-Series tables of first stage covering tables based on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories. Part V-B - D-Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.
Part VI - Fertility Tables	F-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
Part VII - Tables on Houses and Household Amenities	H - Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on Scheduled Castes and Scheduled Tribes. This volume will contain analytical notes also.
Part VIII - Special Tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for Scheduled Castes and Scheduled Tribes respectively. The data relating to Scheduled Castes and Scheduled Tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each Scheduled Caste/Tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of Scheduled Castes and Scheduled Tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part IX - Town Directory, Survey Report on Towns and Villages	Part IX - A - Town Directory Part IX - B - Survey Report on selected Towns Part IX - C - Survey Report on selected Villages
Part X	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes

Part XI - Census Atla

Part XII - District Ce

.....and Town wise Primary Census

The following special pap..... planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Areas

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1981-1991life tables and age data

(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with othe organisations and the results of such studies will be published as occasional papers of the 1991 Census

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks will be available for sale at the Government Central Press, Bangalore and the other publications at the Office of the Director of Census Operations, Karnataka, Bangalore and the Manager of Publications, Civil Lines, New Delhi - 6.
