PREFACE

Contrary to expectations, there has been delay in bringing out this volume relating to Economic Tables giving data of workers and non-workers according to main activity cross-classified with marital status, educational levels and sex. All the same, the information available in the various tables is immensely useful and research scholars would find a vast fund of valuable data for further analysis. Those incharge of employment planning would also benefit greatly from the contents of this volume.

I would like to place on record my grateful thanks to Shri M. L. Sharma, Assistant Director of Census Operations, Shri A. G. Oak, S. T. A., and members of their team for the pains taken in finalising the tables and going through the proofs.

INTRODUCTORY NOTE

Collection of economic data has been a part of the Census enquiry ever since the first regular Census was conducted in India in 1872. A beginning was thus made a century ago to collect data about occupation of each person. The very next Census in 1881 saw a slight modification and occupation in respect of only such persons was recorded who actually did work and contributed to the family income. During the Censuses from 1891 to 1921, the main economic questions related to livelihood or occupation or means of subsistence of each worker. Persons deriving income from land, property, etc., although not working, were also treated as economically active. The concept of income was introduced in the Census of 1931 and was followed in 1941 and 1951. In 1931, the population was divided into three classes, *viz.*, 'earner', 'working dependent' and 'non-working dependent'. An 'earner' was defined as a person with permanent and regular work for which return was obtained in cash or in kind which helped to augment the family income. A 'working dependent' was classified as a person who assisted in the work of the family and contributed to its maintenance without actually earning any wages. In 1941 the classification was 'wholly dependent', 'partly dependent' and 'others'. A person who had no income in cash or kind was treated as 'wholly dependent' and one who contributed in cash or in kind towards the substenance of the household without being definitely capable of supporting himself was classified as 'partly dependent'. In 1951 there was a further change and the classification was 'self-supporting', 'earning dependent' and 'non-earning dependent'. A 'self-supporting person' was one who was in receipt of an income which was sufficient at least for his own maintenance. A person who earned income but which was not sufficient for his own maintenance was classified as 'earning dependent'. This income approach had the effect of excluding largely the 'unpaid family workers', *i.e.*, persons who took part along with the earning members of the family in carrying on cultivation or a home industry as a family enterprise. Stress was, therefore, laid on 'work' rather than 'income' for considering a person as economically active and as a result of exploratory Conferences and pre-tests in 1958 and 1959, the economic data in the 1961 Census was collected on the basis of 'work' according to which the population was divided into two classes, *viz.*, 'workers' and 'non-wokers'. The work approach counted such family workers also who were not in receipt of any income and working children who could not earn enough for their maintenance as 'workers'. Thus in the 1961 Census, the basis of 'work' in the case of "seasonal" workers was that the person should have had some regular work of more than one hour a day throughout the greater part of the current or previous "working season". In the case of regular workers, work for at least a day during the previous fortnight was adequate and absence owing to illness or other causes was not a bar to being treated as worker. A person who was offered work but had not actually joined was treated as a non-worker. A public or social service worker who was actively engaged in public service activity or a political worker who was engaged in furthering the political activity of his party was also regarded as worker. *Work included not only actual work but effective supervision and direction also.*

2. The concept of worker at the 1961 Census unfortunately proved to be too liberal and tended to inflate the number of workers. Persons who were basically non-workers like house-wives, students, etc., were included in the category of workers even though their participation was very marginal. This deficiency in the 1961 Census concept of 'worker' was sought to be removed this time by adopting a different approach which emerged as a result of the special meeting of the Planning Commission held on May 24, 1969. In the 1971 Census, every person has been categorised as 'worker' or 'non-worker' with respect to the main activity reported by him. The main activity of a person was ascertained on the basis of activity in which he was engaged mostly. For regular work in any industry, trade or service, the reference period was the week prior to the enumeration and for seasonal work such as manufacturer of sugar, gur, etc., the last one year.

3. The classification of a person as worker or non-worker on the basis of main activity has resulted in a steep fall in the percentage of workers to total population in this Census—from 52.30% in 1961 to 36.72% in 1971. This is primarily on account of persons spending major part of their time on household duties or as students being returned as non-worker this time in answer to the question on main activity, their economically active work for some part of their time being covered in answer to the question on secondary work. While at the 1961 Census these persons were categorised as workers even though their contribution to the economic activity was marginal. Another result of conceptual change has been shift of category from cultivation to agricultural labour—especially among females. This seems to be due to change in the manner of putting economic questions to the respondents in the 1961 and 1971 Censuses. A detailed reference to the above two phenomena would be made in the General Report Part I-A after data in respect of secondary work and results of the re-survey of economic questions on the basis of the 1961 and 1971 concepts are available.

4. The following economic questions were put to every individual in the 1971 Census in the order in which they are presented below:—

Q. 16. *Main Activity*

(a) Broad Category—

(i) Worker (Cultivator or Agricultural labourer or in Household industry or other worker), or

(ii) Non-worker (in Household duties or student or retired person or dependent beggar or vagrant or inmate of a charitable or penal institution or other non-worker),

(b) Place of work (Name of village/town)

(c) Name of establishment

(d) Nature of industry, trade, profession or service

(e) Description of work

(f) Class of worker.

Q. 17. *Secondary work*—

(a) Broad Category (Cultivator or Agricultural labourer or Household industry or other worker)

(b) Place of work (Name of village/town)

(c) Name of establishment

(d) Nature of industry, trade, profession or service

(e) Description of work

(f) Class of worker.

The relevant portions of the instructions to the enumerator for filling the individual slip have been given in Annexure-I. Economic questions asked in the Census from 1901 to 1961 have been given in Annexure-II.

Occupational and Industrial classification of workers

5. It was for the first time in the 1961 Census that distinct questions were asked in order to classify the working population into two-fold divisions, *viz.*, (i) according to occupation of each individual and (ii) according to industry in which he or she was working. A similar approach has been followed in this Census also. Thus, except for those who have returned their main activity as cultivator or agricultural labourer against Q. 16 (a) (i) in the individual slip, information collected against Q. 16(d) and Q. 16(e), respectively, has enabled classification according to 'industry' and 'occupation' of the working population. The word 'industry' used in the 1961 Census as also in 1971 has a wider meaning and covers not only the organised or manufacturing industry but also all other sectors of economic activity including livestock, forestry, fishing, hunting, mining and quarrying, trade, commerce, transport services, other services, etc.

6. For the two-fold 'occupational' and 'industrial' classification of the working population, National Classification of Occupations (NCO), 1958, and Indian Standard Industrial Classification (ISIC), 1958, respectively, were used in the 1961 Census. This time the occupational classification of the working population has been done as per National Classification of Occupations, 1968, and the industrial classification has been done as per National Industrial Classification (NIC), 1970 as adopted by the Office of the Registrar General, India. Both these classifications are based on a three digit code system. In the case of the occupational classification, the first digit represents the 'occupational division', the second represents an 'occupational group' and the third represents an 'occupational family', while in the case of industrial classification one, two and three digit code numbers represent, respectively, a 'Division', a 'Major Group' and a 'Minor Group'. The occupational and industrial three-digit code lists referred to above are reproduced as Annexures III and IV.

7. On the basis of industry, workers have been divided into nine categories in which they are reported to be working; these are (I) as cultivators, (II) as agricultural labourer; (III) in livestock forestry, fishing, hunting and plantations, orchards and allied activities; (IV) mining and quarrying; (V) in manufacturing processing, servicing and repair; (VI) in construction; (VII) in trade and commerce; (VIII) in transport, storage and communications, and (IX) in other services, Category V, *i.e.*, manufacturing processing, servicing and repair, has been further sub-divided into two sub-categories, *viz.*, V(a) at house-hold industry and V(b) in manufacturing other than household industry. The correspondence between the nine industrial categories mentioned above and the National Industrial Classification (NIC), 1970, adopted for the economic tables in this Census is given below :—

Category	*Industrial Division of NIC, 1970*
I, II	These have not been separately coded for industrial classification as they formed distinct categories in themselves.
III	Industrial Division 0
IV	Industrial Division 1
V(a), V(b)	Industrial Divisions 2 & 3
VI	Industrial Division 5
VII	Industrial Divisions 6 and 8
VIII	Industrial Division 7
IX	Industrial Divisions 4, 9 and X.

General Economic Tables

8. For the first time in the 1971 Census sampling has been used to a considerable extent in the processing of data. Thus most of the general economic tables are estimated, based on the data generated by processing 10% sample slips in respect of rural areas and 20% sample slips pertaining to urban areas. There are in all 19 Economic Tables with 2 Appendices as shown below:—

9. Of the above 19 tables, only B-I Part A and B-II have been prepared on full count, *i.e.*, by processing 100% slips and the remaining are based on sample. In addition to the General Economic Tables, Household Economic Tables were prepared in 1961 based on data collected by canvassing a separate Household Schedule which was given up at the 1971 Census because a separate Agricultural Census was contemplated and has since been taken.

ANNEXURE I

(Extract from the Instructions to Enumerators for filling up the Individual Slip, Census, 1971)

Question 16: Main Activity

78. Every person will be asked what his main activity is, that is how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

79. *'Worker' defined:* A 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work includes not actual work but effective supervision and direction of work.

80. *Reference periods:* The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages should be considered as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

81. There are certain types of works which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugar-cane factory labourer or as a road cooly. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

82. A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker should *not* be treated as a worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc., he or she should be treated basically as a worker for the main activity and categorised accordingly.

83. A person who merely receives an income such as a rent receiver or a pensioner who does not have to work for receiving the income will not be treated as economically active unless the person is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

Q. 16(a) Broad Category (i) Workers (C, AL, HHI, OW) (ii) Non-workers (H, ST, R, D, B, I, O)

84. The main activity returned by the person will entitle him to be categorised either as a worker in 16 (a) (i) or as a non-worker under 16 (a) (ii).

16(a)(i) Worker (C, AL, HHI, OW)

85. Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity and 'X' should be noted in the box. The abbreviations to be used for workers are explained below:

C: CULTIVATOR

86. For a person who returns his main activity as working as a cultivator, the abbreviation 'C' should be used.

87. *Definition of Cultivator:* For purposes of the census a person is working as Cultivator if he or she is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share.

88. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and kindred fibre crop cotton etc., and other crops such as sugar-cane, ground-nuts, tapioca, etc., and does not include fruit growing, vegetable-growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medical plantations.

89. A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share (Agricultural labourer) will not be treated as cultivator in this question.

AL : AGRICULTURAL LABOURER

90. A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

91. *Definition of an Agricultural Labourer:* A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

H.H.I.: HOUSEHOLD INDUSTRY

92. For a person who returns his main activity as engaged in some production, processing, servicing or repair of goods such as, say, handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc., it has to be ascertained if it is household industry, and if so, it should be indicated by the abbreviation, 'HHI' in the box.

93. *Definition of a Household Industry*

A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

94. The main criterion of a Household Industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even, if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

95. A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor, or barber, musician, dancer, waterman, *dhobi*, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household. A list of a few typical Household Industries is appended to these instructions at Appendix III.

96. Sometimes it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry as an employee and record as per instructions given above.

OW : OTHER WORKERS

97. If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all Government servants, municipal employees, teachers, mining workers, political or social workers, building, labourers etc. etc. In effect all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricultural labourers but as 'Other Workers'.

98. Further details pertaining to this 'Other' category of workers, as also those engaged in household industry will be recorded in the subsequent sub-parts (b) to (f) of question 16.

16(a) (ii) Non-worker (H, ST, R, D, B, I, O)

99. As was stated earlier, question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16 (a) (i) helps to broadly categorise all those who have returned some work as their main activity. 16 (a) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviation will have to be entered in the box provided. The abbreviations are explained below :

H : HOUSEHOLD DUTIES

100. This covers all those person basically engaged in unpaid home duties doing no other work, even

if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc. and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16 (a) (i).

ST: STUDENT

101. This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : RETIRED PERSON OR A RENTIER

102. A person who has retired from service and is doing no other work *i.e.* not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or divided or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box a person coming under this category.

D : DEPENDENT

103. This category will include all dependants such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even if ablebodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B: BEGGARS, ETC.

104. This will cover beggars; vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I: INSTITUTIONS

105. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O: OTHER NON-WORKERS

106. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

107. If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16 (a) (i) and an 'X' has been put in the box against that question, then he must necessarily be categorised under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16 (a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16 (a) (i), then question 16 (a) (ii) will not apply to the person and an 'X' should be put in the box against question 16 (a) (ii). Thus 16 (a) (i) and 16 (a) (ii) are mutually exclusive.

Q. 16(b) to 16(f)

108. These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16 (a) (i). If the main activity has been shown as 'C' or 'AL' against 16 (a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections.

109. Similarly, if the main activity of an individual has been returned as a non-worker against 16 (a) (ii), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

Q. 16(b): Place of work (Name of village/town)

110. Ascertain from each person who is already taken as a worker other than in cultivation or agricultural labour *i.e.*, question 16 (a) (i) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration write 'PL.'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor of vegetables or a pedlar or a rickshaw puller who may go from one village or town to another, note 'No fixed place of work'. If he works in one particular town or village that should be noted.

Q. 16(c): Name of Establishment

111. This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question (16) (a) (i).

Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc., and in respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, etc. If the establishment does not have any definite name such as, say in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy, etc., note 'No particular name'.

Q. 16(d): Nature of Industry, Trade Profession or Service

112. The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) Plantation, Forestry, Fishing, Livestock etc., (ii) Mining and/or Quarrying (iii) Manufacturing (iv) Construction (v) Electricity, Gas or Water Supply (vi) Transport and Communications (vii) Trade and Commerce (viii) Professions and Services. Full details of the type of industry, trade, profession or service in which the person is engaged will have to be recorded here. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, substantial description of various economic activities are furnished in Appendix IV, categorised under certain broad classifications. The list in Appendix IV is not exhaustive. You shall have to describe the nature of Industry, Profession, Trade or Service whatever it is, in as precise a detail as possible.

Q. 16(e) Description of work

113. This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or 'OW' in question 16 (a) (i) and for whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16 (d). His actual work should also be given in sufficient detail. If for example a person is merely recorded as say, clerk with no other details, it will be impossible to properly categories him as to the type of work he does. He may be a clerk attending to correspondence or book-keeping or accounting. Similarly if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic—electrical mechanic, or a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

114. To guide you in answering question 16 (e), the types of particulars that need to be ascertained in respect of a few typical occupations are given in Appendix V.

Appendix V is by no means exhaustive. This just illustrates the need to ascertain the full details of the particulars of work performed by an individual for being recorded against question 16 (e).

115. It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say, a road coolie, a loader or unloader at a market, a construction labourer, etc.

116. For those in Military service it is enough if it is merely noted as in the service of the Central Government. Other details need not be given.

General

117. There need be no confusion as to the scope of 16 (d) and 16 (e). 16 (d) would represent the nature of industry, trade, profession or service *i.e.*, the field of economic activity in which a person is engaged in work and 16 (e) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the answer to question 16 (d) may be say, Cotton Textile manufacture and the answer to question 16 (e) may be Chemical Engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly in question 16 (d) the nature of service may be some department of the State Government Service and in question 16 (e) the description of work may be a clerk or an accountant, a Director of the Deptt., jeep driver in the Deptt. etc., etc. Again say, against question 16 (d) the answer may be private medical practice and in 16 (e) may cover orthopaedic surgeon, or nurse or a sweeper etc., working in that private medical practitioner's nursing house. The sample answers furnished in the specimens (Appendix VI) at the end of this book, the Industrial and Occupational lists in

Appendices IV & V and the instructions given by your superior Census Officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to Nature of Industry, Trade, Profession or Service covered by question 16 (d) and the description of actual work of the individual enumerated covered by question 16 (e).

Q. 16(f): Class of Worker

118. For a person who is;

(i) an Employer, that is, who hires one or more persons in his work described in question 16 (e), write . . . . . ER

(ii) an Employee, that is, who does his work described in question 16 (e) under others for wages or salary in cash or kind, write EE

(iii) a Single Worker, that is, who is doing his work described in question 16 (e) without employing others except casually, and without the help of other members of the family except casually and a participant in work as members of co-operatives, write . . . . . SW

(iv) a Family Worker, that is, who is doing his work described in question 16(e) in a family enterprise alongwith other members of the family without wages or salary in cash or kind write . . . . FW

For a person for whom an 'X' is put in questions 16(d) and 16(e) put an 'X' in this question also.

Explanation

119. An Employer is a person who has to employ other persons in order to perform the work entered in question 16 (e). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16 (e). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

120. An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

121. A Single Worker for the purpose of question 16 (f) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producer's co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

122. A family Worker is a member who works without receiving wages in cash or kind, in an industry, business, trade or service. For example, the working members in a family of *Dhobies* where they all participate and each does not receive wages separately will be family workers. There may be family workers in industry, trade or professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

123. Members of the household who help solely in household duties should not be treated as family workers.

124. In the case of persons engaged in household industry *i.e.*, in the case of persons for whom the answer to question 16 (a) (i) is 'HHI' there will be three classes of workers *viz.*, Family Worker, Single Worker and Employee. There will be no Employer. Household industry by its very definition is conducted by the head of the household himself or/ and other members of the household, the role of hired workers being secondary. If the head alongwith the members of the household is working in a household industry employing hired workers, the head and other members who are working should be treated as 'Family workers'. If the head alone is working with the assistance of hired worker(s) whose role would be secondary as indicated above, he would be treated as a 'single worker'.

Some illustrations for filling the questions 16 or 17 are given in Appendix VI.

Q. 17: Secondary Work

125. This question should be asked of every person whether he has returned some work as his main activity against 16 (a) (i) or had returned himself under any of the basically non-working categories against question 16 (a) (ii). As was noted earlier, 16 (a) (ii) will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation or in household industry or in looking after the cattle, in attending to family business etc., but not to the extent as a full-time worker. Such participation will be considered as secondary work of these persons.

126. Ask of each person if, besides what he had already returned as his/her main activity against questions 16 (a) (i) or 16 (a) (ii), he/she participated in any secondary work. A number of unpaid family workers participating in the household enterprises, who might have returned themselves mainly as 'H' or

'ST' or 'R' under question 16 (a) (ii) for their main activity will be netted here for their economic activity which is subsidiary. Mere rendering of service for ones own home or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife, even if she may work much more than a paid servant, in having to cook for the family or looking after the household will not be treated as economically active for the purpose of this classification. Similarly, women who may produce cloth on a loin loom at home for domestic consumption will not be treated as ecnomically active unless the products are sold and the household derives an income. Participation in work that goes to augment the income of the household will only be treated as economic activity. A boy whose main activity is shown as a student under 16 (a) (ii), can have the secondary work of say, cultivation if he helped the head of the household in the family cultivation during some parts of the season. But if a girl student, whose main activity is shown as 'ST' under 16 (a) (ii), also helped in weaving cloth purely for domestic consumption on a loin loom at home, or helped in attending to household chores, she will not be treated as having any secondary work. Secondary work will be reckoned only if the person is engaged in some economic activity even if marginal in addition to whatever is the main activity under question 16. A person whose main activity is shown as, say, a clerk in a Government Office or a teacher under question 16, also attends to some cultivation by his direct supervision or undertakes some tuition, this will be shown as secondary work under question 17. A person's main activity may be cultivation in question 16 and his subsidiary activity money lending in question 17. Again main activity may be agricultural labourer and subsidiary work sugar factory labourer and so on and so forth.

127. The instructions for the usage of abbreviations in categorising workers under 16 (a) (i) and filling in the details under 16 (b) to (f) will apply *mutatis mutandis* to question 17 (a) to (f), except that while question 16 (a) (i) will cover the main work. Q. 17 (a) is intended to cover secondary work which may be possibly part-time. It may also be noted that the non-working categories of activity will not be reported as secondary work under quesion 17.

TABLE B—I PART B

FEMALE WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY MARITAL STATUS AND AGE-GROUPS

FLY LEAF

Table B-I Part B

This table is an innovation of the 1971 Census. With the increasing participation of females in the economic activity of the country, it is intended to show the social and economic conditions of females in this table. The table gives the distribution of female population into two broad classes of 'Workers' and 'Non-Workers' according to their marital status cross-classified in eight age groups viz 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59 & 60+with age not stated.

2. Figures have been presented in this table separately for Total, Rural and Urban areas for the State as a whole.

3. A reference may be made to the Introductory Note preceding this table, wherein the concepts and definition of the terms 'Work', 'Workers' Working as cultivators' etc. have been explained in detail.

4. Marital status has been classified as Never Married (NM), Married (M), Widowed (W), Divorced or Separated (S) and Unspecified status. The relevant instructions for recording the marital status of a person are reproduced below :—

> "For a person who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by a decree of a law court or by an accepted social or religious-custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her".

TABLE B—III
PARTS A & B

B-III PARTS A & B

As in 1961, the table B-III has been prepared in two parts viz. Part A and Part B. B-III Part A gives the cross-classification of each industrial category of workers and non-workers by literacy and education levels in Urban Areas only, while Part B gives similar information for Rural Area only with broad educational levels.

2. There is a departure from the 1961 Census as regards presentation of data into nine industrial categories in this table. Mining and quarrying have been assigned a separate category, *i.e.* Category IV, as against the combined category III in 1961, viz. mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchard and allied activities. The 1961 category IV of household industry is included in Category V (manufacturing, processing, servicing or repairing) treating it as sub-category V (a). At the 1961 Census "household industry" also covered establishments falling under division '0' and '1' of the Indian Standard Industrial Classification such as cattle rearing, bee keeping, orchardry plantations, etc., apart from those falling under division 2 & 3. At the 1971 Census, "household industry" is confined to Division 2 & 3, i.e., it covers only manufacturing processing, servicing and repairing".

3. The data in both the parts have been presented for the State and District level only. The educational levels adopted in the table for urban areas are more elaborate than those for rural areas as indicated below:—

Table B-III Part A (Urban areas)

1. Primary.
2. Middle.
3. Matriculation or Higher Secondary.
4. Non-technical diploma or certificate not equal to degree.
5. Technical diploma or certificate not equal to degree.
6. Graduate degree other than technical degree.
7. Post-graduate degree other than technical degree ; and
8. Technical degree or diploma equal to degree or post-graduate degree :
   (i) Engineering and Technology.
   (ii) Medicine.
   (iii) Agriculture, veterinary and dairying,
   (iv) Teaching, and
   (v) Others.

Table B-III Part B (Rural Areas)

1. Primary,
2. Middle,
3. Matriculation or Higher Secondary,
4. Non-technical diploma or certificate not equal to degree,
5. Technical diploma or certificate not equal to degree, and
6. Graduate and above.

4. A person who could neither read nor write or one who could read but could not write in any language was treated as illiterate. Ability merely to sign ones own name was not considered adequate to qualify a person as being able to write. All children of age 4 years or less were treated as illiterate even when in some cases school going children who had picked up reading and writing were returned as literate.

5. *Literate.*—A person was treated as literate who could both read and write in any language with understanding.

6. *Education Level.*—For a person returned as 'Literate', the highest educational level attained by him/her was ascertained and recorded. Highest examination passed by the person was taken as the highest level attained.

B—IV PART A INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS

B-IV Part A

This is a very important economic table which gives the employment position in different sectors of economy. The distribution of population at work other than cultivation by Divisions, Major Groups and Minor Groups of the National Industrial Classification, 1970 (NIC 1970) has been presented in this table. The National Industrial Classification, 1970 has been adopted in this Census which contains suitable modification over the Indian Standard Industrial Classification, 1958 (ISIC, 1958) which was adopted in the 1961 Census.

2. The data in this table has been presented at the State and District level for 'Total' and 'Urban'. 'Rural' figures can be worked out by subtracting the figures of 'Urban' from that of 'Total'.

3. The discription of the Industrial Division (i.e. one digit code), Major Group (i.e. two digit code) and Minor Group (i.e. three digit code) may be seen in Annexure-IV of the Introductory Note given elsewhere in this volume.

Appendix to Table B-IV Part A.

Table B-IV Part A has been supplemented by this Appendix which gives the distribution of workers in Manufacturing, Processing, Servicing and Repairs by Household Industry and Non-household Industry. This Appendix corresponds to Table B-IV Part C of 1961 Census.

2. Data in this Appendix has been presented for State and District level. Figures have been shown for 'Total' and 'Urban' like that in Table B-IV Part A.

B—IV PART C

CLASSIFICATION OF WORKERS IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE AS MAIN ACTIVITY BY CLASS OF WORKERS, AGE AND SEX

49—1 Cens. Bhopal/76

B-IV Part C

This table is also an innovation of the 1971 Census. In this table workers engaged in activities in non-household industries, business, trade, profession or services have been classified by class of workers *viz.* Employers, Employees, Single Workers and Family Workers. Each class of worker has further been classified into eight age-groups *viz.,* 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and Age not stated.

2. Figures have been presented for Total and Urban areas for the State as a whole. Figures pertaining to Rural areas have not been presented separately and can be worked out from the table itself by subtracting Urban figures from Total.

3. The class of workers have been defined in para 119 to 122 of the Instructions to Enumerators for filling up the individual slips given in Annexure I to Introductory Note appearing elsewhere in this volume.

ANNEXURE

A NOTE ON THE SAMPLING PROCEDURE ADOPTED IN THE 1971 CENSUS

ANNEXURE

A note on the Sampling Procedure adopted in the 1971 Census

Sample Size: From the individual slips relating to the rural parts of a Tehsil/Anchal/Police Station, 10% sample of the slips was selected linear systematically with a random start. In the urban part of the district a 20% systematic sample of the individual slips was selected with separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure: The sample design adopted in 1971 census was stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions as follows :—

1. Tehsil/Anchal/Police Station (Rural).
2. Non-city Urban district.
3. City (Urban unit with 100,000 & above population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was divided into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form as "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection maintaining at the same time stability in the sampling fraction within the tabulated areas. The procedure adopted has ensured effective control over sample selection within each bolck, as also in the entire operational units.

For the purpose of the Primary Census Abstract (PCA) the individual slips were sorted out according to ten broad industrial categories and nine broad age-groups for each of the sexes. The ten industrial categories of workers were as follows:—

Category	
I	Cultivators
II	Agricultural Labourers
III	Livestock, forestry, fishing, hunting and plantations, orchards and allied activities.
IV	Mining and quarrying.
V(a)	Manufacturing, processing, servicing and repairs in *household industry.*
V(b)	Manufacturing processing, servicing and repairs in *other than household industry.*
VI	Construction
VII	Trade and Commerce
VIII	Transport, Storage and Communications.
IX	Other Services
X	Non-Workers.

The nine age-groups with which the slips belonging to each industrial category were sorted, were 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+and 'age not stated'. Thus, the individual slips of a particular operational unit were sorted out in $11 \times 9 = 99$ cells separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon holes for Rural (Urban) samples and one pigeon hole was selected at random, the slips falling in the selected pigeon holes constituting the sample. For the operational details of the sampling procedure and instructions, 'Manual of instructions on sorting, compilation (manual processing & sampling procedures' may be consulted.

Estimation procedure: The tables prepared for each of the Districts/States from the 10% rural and 20% urban sample slips have been inflated to give the final estimated tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A.

In order to ensure maximum possible inter-table consistency, it became necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

This way of estimating the cell frequencies ensured marginal totals of estimated tables tally with that of the-count tables. This is convenient to the user, because after adjustment, the identical marginal totals are found in tables having the same marginal specifiction. "The adjustment diminishes the sampling variance to some extent; the more the controls the smaller the sampling variance of the adjusted frequencies".[1] Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full count frequency of some characteristics from PCA or Table B-I Part A (or some estimated frequency from some already estimated table) and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later.

Reliability of the estimates: No exact formula can be given for the provision of the estimates in view of the systematic sampling design adopted. A very rough estimate of the relative standard error on the basis of simple random sample may be estimated as

$$(1\text{-}f)\sqrt{\frac{1-6}{np}},$$

where 'f' is the proportion sampled (0.10 in case of rural areas and 0.20 in case of urban areas) and 'p' is the estimated proportion in any cell and 'N' the sample size being equal to 10% of individual slips in rural areas and 20% in urban areas. The size of the universe for the various values of the proportion from 0,000001 to 0.9 by percentage relative standard error shown in table I and II will help in deriving quickly an idea of the level of precision of any cell. Since in the present census, slips were sorted by sex, industrial catgory and age-group before sampling, it is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling specially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census.[2] Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable. Hence the standard error indicated by the table should be treated as an upper limit.
