Motif

War Cemetery

The World war II cemetery is located at Joirampur in Kovin and Hongkap villages of Changlang District of Arunachal Pradesh. The cemetery is situated along the historic Stillwell Road of World War II between Joirampur and Nampong and falls under Hongkap Reserve Forest. This Cemetery is of immense historical importance.

The cemetery consists of around 900 graves made of bricks of those soldiers who laid down their lives during World War II. Each grave measures 1.28 m x 2.20 metres. The arrangement of graves was done in such a way that the dead were buried according to their ranks/regiments or religions. There are visibly six to seven segments. The graves in most of the segments are lying in straight rows maintaining an uniformity although the graves in some segments are lying haphazardly. On some graves epitaphs bearing inscriptions in the Chinese Script were written.

d) Appendices to Village Directory 156-168

Appendix I : Abstract of Educational, Medical and other amenities in villages-C.D.Block level 172-175

Appendix IA : Villages by number of Primary Schools 176

Appendix IB : Villages by Primary, Middle and Secondary Schools 176

Appendix IC : Villages with different sources of drinking water facilities available 176

Appendix II : Villages with 5,000 and above population which do not have one or more amenities 177

Appendix IIA : Census towns which do not have one or more amenities 177

Appendix III : Land utilisation data in respect of Census towns/Non-municipal towns 177

Appendix IV : C.D. Block-wise list of inhabited villages where no amenity other than drinking water facility is available 178

Appendix V : Summary showing number of villages not having Scheduled Castes population 178

Appendix VI : Summary showing number of villages not having Scheduled Tribes population 179

Appendix VIIA : List of village according to the proportion of the Scheduled Castes to the total population by ranges 179

Appendix VIIB : List of village according to the proporton of the Scheduled Tribes to the total population by ranges 180-183

Appendix VIII : Number of villages under each Gram Panchayat (C.D. Blockwise) 184

Appendix IX : Statement showing numbers of girls school in the villages 184

Section II – Town Directory **185-193**

(a) Note explaining the abbreviations used in Town Directory 186-190

Town Directory Statement (I to VII)

(b) Statement I – Status and Growth History 190

(c) Statement II – Physical aspects and location of towns 190-191

(d) Statement III – Municipal finance 191

(e) Statement IV – Civic and other amenities 191

(f) Statement V – Medical, Educational, Recreational and cultural facilities 192-193

(g) Statement VI – Trade, commerce, Industry and banking 192-193

(h) Statement VII – Civic and other amenities in slums 192

(i) Appendix to Town Directory – Towns showing their outgrowth with population 193

PART-B : PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract 195-199

(b) District Primary Census Abstract (General) 200-205

(c) Appendix to District Primary Census Abstract i.e., Urban block wise figures of Total, SC and ST Population 207

Primary Census Abstract for Scheduled Castes 208-213

Primary Census Abstract for Scheduled Tribes 214-219

C. D. Block wise Village Primary Census Abstract 220-273

Urban Primary Census Abstract 274-279

Annexure-I : Number of Villages under each Gram Panchayat 280

Annexure-II : Note of Fertility and Mortality 1991 Census 280-283

Annexure-III : Various measures of fertility and mean age at marriage, 1991 Census 283

Annexure-IV : Percentage distribution of Migrants by place of birth/place of last residence, 2001 Census 283-284

Annexure-V : Brief account of main religions in the district/tehsil as per 2001 Census 284-286

Annexure-VI : Marital status of population as per 2001 Census 286-287

Annexure-VII : Age, Sex and Education in the district, 2001 Census 287-289

Annexure-VIII : Distribution of different mother tongues returned in 2001 Census 290-291

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc..

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided, a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare

Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class **II** towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (Hi)marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N. K. Laskar, Director of Census Operations. Arunachal Pradesh . Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R. G. Mitra, Deputy Registrar General (C&T) and Dr. I. C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R. P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others Who have contributed to make this publication possible.

D. K. Sikri
Registrar General &
Census Commissioner, India

New Delhi,

Preface

The District Census Handbook (DCHB) contains important census and non-census statistics pertaining to a particular District. This series constitute an important set of census publications brought out by the Census Organisation on behalf of the State government. The Census Directorate prepares the manuscripts of the District Census Handbooks out of the data collected from the field during Census Operations and also incorporate in its various other data originating from different Government Departments. The District Census Handbooks are widely made use of by the State Government and its district level and other lower level officials for proper planning, development and administrative purposes as well as by a large cross-section of data users like academicians scholars, researchers and many other Non-Governmental agencies.

The District Census Handbook has two parts-part-A and Part-B. The Village and Town Directories are included in part-A, whereas part-B contains the Primary Census Abstract. The Village Directory gives for each Village, the area, population, educational, medical, civic and other amenities as also its land use pattern. Similarly in the Town Directory, information on various civic amenities, the area figures, population characteristics, physical aspects, communications, municipal finance, trade and commerce, industry and banking facilities etc. pertaining to a town are incorporated as well as the Village and Town directories and also of Scheduled Castes and Tribes presents certain other basic data like number of residential houses and households, sex-wise break-up of the total population, literates, main workers by categories, marginal workers and non-workers, sex-wise break up of Scheduled Castes and Scheduled Tribes population etc. Besides, some brief notes on the administrative development, economic resources and social aspects of the District are also incorporated in this volume. Also it contains brief analytical notes on the village and town directories and are supported by a few inset tables based on the Primary Census Abstract as well as the Village and Town directories. Above all an overall attempt has been made here to present the basic statistical data on villages and towns which it is expected, would come handy and useful to all concerned.

The data presented under Village and Town directories were furnished from the field, village and town-wise by the district administration mainly through the Circle Officers in respect of the rural villages and by the Deputy Commissioner though the District Statistical Officer in respect of urban areas respectively. The data presented under Primary Census Abstract were collected during the Census Operations by the field functionaries of the Circle Officers and the Deputy Commissioner. My thanks are due to all these dedicated band of field officials who have provided the basic data required for compilation of this volume. The notes on different State and Central Govt. Departments are furnished by the respective departments. I am grateful to all these departments for their sincere co-operation.

While the collection, compilation and tabulation of data including designing and production of the District Census Handbook Volumes were under taken by the Census Department at its own expenses, in keeping with the past practice for 2001 Census. It is my sincere hope that all the data users will find the contents of the 2001 DCHB series quite convenient and useful.

The District Census Handbook will be centrally printed as decided by the Registrar General, India. The number of copies required by the State Govt. will be supplied to them on payment basis.

The Census Organisation is also grateful to Government of Arunachal Pradesh and to the Director of Economics and Statistics, Government of Arunachal Pradesh, Itanagar and his staff for taking necessary initiative in collection of data required for the preparation of the District Census Handbook.

Last but not least I cannot but express my gratefulness to Shri J.K. Banthia, Registrar General and Census Commissioner of India for his valuable instructions and guidance in bringing out the District Census Handbooks.

Lastly I must express my appreciation to the Officers and Officials of the office of the Registrar General, India for making necessary arrangement for printing of the publication in time.

District Highlights – 2001 Census

Changlang District was entirely rural till 1991 Census. But in 2001 Census two places namely, Changlang, the district headquarter of the district and Jairampur, the headquarter of Jairampur Circle have been declared as Census Town for the first time. There is no statutory town in the entire State.

The district is famous for variety of timber and as such wood based industries and ply wood factories came up in the district. But due to the ban imposed by the Hon'ble Supreme Court's Order these industries had to be closed down subsequently.

- War memories of the World War II at Jairampur area and the Namdapha National Park and Tiger Project attracts the tourist of both national and international level.
- Rare varieties of birds and animals are also seen in the forest of Changlang district.
- Famous 'Agaru' is available at Nampong area of the district.
- Mini oil refinery at Kharsang has come up in the early part of 1991.
- Stillwell road linking Myanmar passes through Changlang district starting from Lekhapani and ending at Lake of No-return located at Myanmar.
- Some areas of the district have the potential of coal reservoirs.

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns :

i) A minimum population of 5,000;

ii) At least 75 percent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Blank

Analytical Note

(i) History and Scope of District Census Handbook

The District Census Handbook is an innovation of 1951 Census. Prior to 1951, Census publications and reports contained data upto Tehsil, Sub-Tehsil, Town and District level. Statistical data for smaller territorial units i.e. village in rural areas and enumeration block/ward in town areas were not published in any census report. With the rapid development and socio-economic changes in the society, necessity of data at micro level was felt considerably by the Government, scholars and other data using agencies. With a view to making available these Statistical information at micro level, selected census data were published in the District Census Handbooks of 1951 Census and as such these handbooks contained important census as well as general information relating to history, physical aspects, geography, archaeology, climate, rainfall, administration, medical and public health, literacy and education, agriculture, co-operatives, industries, local bodies, places of interest etc. pertaining to a particular district.

The District Census Handbooks of 1961 Census underwent a complete transformation and attempts were, therefore, made to make more comprehensive and informative.

In 1971, efforts were further made to make available both census and non-census data in a uniform manner with an enlarged perspective. With this aim in view, the District Census Handbooks of 1971 Census had been split up into three parts i.e. – Part A, Part B and Part C. Part A comprised of Town and Village Directory while Part B contained Urban Block/Village-wise Primary Census Abstract and Part C included Administrative Statistics and Report.

The District Census Handbooks of Arunachal Pradesh were brought out for the first time in 1971 Census when the full – fledged census for the first time was conducted throughout the State. Arunachal Pradesh having a less volume of data, Part A and Part B of the District Census Handbooks were combined in a single volume for convenience.

In 1991 Census, the District Census Handbook was divided into two parts only as follows :

Part A – Comprising Town and Village Directory as it was in 1971 Census.

Part B – Consisting of District Primary Census Abstract upto Circle level, Circle- wise Primary Census Abstract

(a) Village level and

(b) Town level (within Town Ward-wise) and Appendix to Primary Census Abstract showing Urban Block wise total Scheduled Castes and Scheduled Tribes Population and Primary Census Abstracts for Scheduled Castes and Scheduled Tribes at Circle level only.

The District Census Handbooks are brought out on behalf of the State Government by the Director of Census Operations after each decennial Census. The publication containing grass-root level Statistical data on demographic characteristics, civic and other amenities in villages and towns is an essential aid for district level planning and for day-to-day administration. The Government of respective State/ Union Territory used to meet the cost of these publications as per practice. The data presented in the publications are collected, compiled and then tabulated and analyzed by the Directorate of Census Operations on behalf of the concerned States/Union Territories.

As in the previous years, it is also proposed to bring out the District Census Handbooks (DCHBs) of 2001 Census in two parts as follows :

Part A – Village and Town Directory.

Part B – Village and Town Primary Census Abstracts.

Apart from the concerned State/Union Territory Governments, which use the data available in the DCHBs for planning and administration, a number of other agencies that are engaged in different welfare and other activities make use of the DCHBs for different purposes. Part A and Part B of the District Census Handbooks have been combined in a single volume as was done in the previous censuses.

(ii) Brief History of the District

The Changlang District came into existence on the 14th November, 1987 covering an area of 4,662 Sq. Km. The district is situated in a unique geographical setting bounded in the East and South by Myanmar. The main river – Noa – Dihing rises in the Patkai Hills flows westernly and then a northernly course and meets the Lohit river.

Changlang Disrtict has reached the present stage in its present set – up through a gradual development of administration. Prior to 14th November, 1987, the district was a part of Tirap District.

Prior to 1914, Tirap was a part of Lakhimpur District of Assam. In 1914, North – East Frontier Tract and Lakhimpur Frontier Tract were formed from the Lakhimpur District. In 1919 the name of the central and eastern section of the North – East Frontier Tract was changed into Sadiya Frontier Tract. In 1943, the Tirap Frontier Tract was formed comprising of certain areas from Sadiya Frontier Tract and Lakhimpur Frontier Tract. In 1954, it was renamed as Tirap Frontier Division and later in 1965 changed into Tirap District. In 1972, the present Changlang District was placed under the charge of an Additional Deputy Commissioner with its headquarters at Changlang. The two sub-divisions i.e. Changlang and Miao of Tirap District were combined to form the new Changlang District in 1987 as per the District Reorganization Act, 1987.

The name "CHANGLANG" is derived from the local word 'CHANGLANGKAN' meaning a hill – top where people discovered the poisonous herb that is used for poisoning fish in the river.

The climate of the district varies from hot in Bordumsa area to severe cold in the hills of Vijoynagar area. The district is predominantly inhabited by the Tangsas, the Singphos and the Lichus.

(iii) Administrative Set up

The Changlang District is divided into four subdivisions i.e Changlang subdivision, Miao subdivision, Bordumsa subdivision and Jairampur subdivision for administrative purpose. The entire district is under the charge of the Deputy Commissioner, who happens to be the administrative and judicial head so far as the district is concerned. He is assisted by a number of Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and Circle Officers. The subdivisions are either headed by Additional Deputy Commissioner or Sub-divisional Officer, who are directly responsible to the Deputy Commissioner, Changlang.

The lowest unit of administration is a circle, which is looked after by a Circle Officer or an Extra Assistant Commissioner. A Circle can be defined as a group of villages and not as a territorial unit. The villages have their own customary administrative systems in the form of traditional village councils.

At the time of conducting the 2001 Census, following administrative set-up was in operation in the district:

Subdivision	Circle
Changlang Sub-division	Khimiyong
	Changlang
	Namtok
Jairampur Sub-division	Manmao
	Nampong
	Jairampur
Miao Sub-division	Vijoynagar
	Miao
	Kharsang
Bordumsa Sub-division	Diyun
	Bordumsa

There are altogether 342 villages with two towns i.e. Jairampur and Changlang in the district. There is no statutory town in the state. All are 'Census towns' only.

(iv) Physical Features

The eastern part of the Himalayan ranges extend prominently south wards towards Vijoynagar, when it meets the Patkai ranges. The major part of the district

falls under the Patkai Ranges but the south western part of the district is an extension of the Naga hills an offshoots of the Himalayas.

The district may be divided into the following regions of the fourth order on the basis of its Physiography.

(i) Noa-Dihing River Valley

The valley is bounded on the north by Lohit District, Myanmar and Nampong circle on the south, Myanmar on the east parts of Diyun and Miao circles on the west. It extends over the Vijoynagar circle and parts of Miao and Diyun circles.

The geology of the area are the Barail, Upper Siwaliks and Lower Siwaliks (surmas). The soils are of high base status, red loam, red sandy and alluvial, shallow black, brown and soils of northern regions, recently formed Soil. High base status soils of humid regions and high base status soils (Hydromorphic). The area is covered by dense tropical wet – evergreen forests. It is the remotest portion of the district and is badly dissected by the Noa-Dihing river. There is no communication facilities in the region. It is a 'v' shaped valley of the Noa-Dihing river.

(ii) Dihing River Plain

The region is a plain of the Noa-Dihing and the Buri Dihing rivers and is an extension of Assam plains. When compared to other regions of the district, this region seems to be densely populated. This is due to its accessibility and availability of communication and facility for trades. The region spreads over the Bordumsa circle and parts of Miao and Diyun circles. The region is bounded by the Lohit district on the north, Nompong circle and Namphuk river on the south, parts of Miao and Diyun circle on the east and the state of Assam on the west and south-west.

The geology of the region is still unsurveyed. The soils of the area are high base status soils of humid region, high base status soils (Hydromorphic) shallow black, brown and alluvial soils of northern regions, brown soils (Hydromorphic), high base status, red loamy, red sandy and alluvial soils and recently formed soils. One region as a whole is covered by dense tropical wet-evergreen forests. The entire region is a plain having good potentialities for growth.

(iii) Namphuk River valley

The valley is situated in the Patkai ranges located in the western portion of the region. The region extends over the Nampong circle and a portion of the Miao circle. The region makes its boundary with Miao circle and Namphuk river in the north, Myanmar in the south, Miao circle in the east and Manmao circle in the west.

Maximum area of this region is not surveyed. In eastern and western part of Nampong circle there are Barail, Disang/Rengging and lower Siwaliks(surmas). The soils are of high base status red loamy, red sandy and alluvial soils, shallow black, brown and alluvial soils of northern regions, recently formed. Soils, high base status soils of humid region, high base status soils(Hydromorphic), red and yellow forest soils and brown soils(Hydromorphic). The entire area is covered by dense tropical wet-evergreen forests. It is a well defined 'v' shaped valley of the river Namphuk. It runs parallel to the Patkai ranges in westwards direction.

(iv) Namchik-Tirap River Valley

It is a combined valley of the Tirap and the Namchik rivers. The two rivers have their source at the top of the Patkai ranges.The region spreads over Laju, Changlang and Manmao circle.It also occupies small portions of Nampong and Khonsa circles. The region makes its boundary with Tirap river and Assam in the north, Myanmar in the south, parts of Nampong circle in the east, a part of Changlang circle in the north-west, Namsang circle in the west and wakka circle in the south-west. In the Patkai range of the region there is 'v' shaped combined valley of Tirap and Namchik rivers.

The geology of the area falls under the Disang/ Regging groups. The main soils of the region are high base status, red loamy,red sandy and alluvial soils, shallow black,brown and alluvial soils of northern regions, brown soils(Hydromorphic), recently formed soils and red and yellow forest soils. The entire area is covered by dense tropical wet-evergreen forest. Though the region is a part of the Patkai ranges, it has a good communication facilities with Assam.

Changlang District is situated between 26º 40' and 27º40' North Longitudes and 95º11' East Latitudes covering a total area of 4,662 Sq.Kms. The district comprises with eleven administrative Circles i.e., Miao, Jairampur, Bordumsa, Manmao, Nampong, Diyun, Vijoynagar, Namtok, Kharsang, Khimiyong and Changlang. The district is located on the South-eastern corner bordering Assam, the Republic of Myanmar on the South-east. Tirap and Lohit districts are on the west and south respectively. The district is full of fascinating and attractive picturesque sightseeing places, ancient historical places, colourful folklores – culture and custom of local inhabitants, virgin forests etc.

Altitude varies from 150 metre above sea level and 1746 ASL depending on different administrative Centres.

The climatic condition of the district ranges from hot and humid in the plain areas like Jairampur, Miao, Bordumsa, Kharsang, Diyun and cold in places like Vijoynagar, Pangsupass and Khimiyong in the hill areas. The climatic condition of the district headquarter Changlang is moderate and pleasant.

Natural and Administrative Development

The tribal communities have simple traditional customs and usages since time immemorial. They also have village head-man who is responsible for administration of the village. The Government gives due regard to these systems. All the disputes arising in the village are adjudicated in accordance with traditional customs by the village headman. Apart from settlement of disputes, at the village level the social and cultural affairs are handled freely by the traditional village authority. This system of village administration by the indigenous authority has been strengthened by the administration through appointment of Goan Burah's. The government express its policies to the people through G.B. On the other hand the villagers put forward their grievances to the govt. through the G.B's. But above the village level there is no traditional structure of administration to look after group of villages or communities. Therefore, administration of group of villages or communities is looked after by the government setup i.e. administrative officers. Though the administrative officers are vested with magisterial powers they use it only when the merits of the case demands trial by the regular court or when the local bodies decide to hand over the case to the magistrate.

Prior to Independence the tribes of this district were left to themselves. The British did not take any initiative to develop the area except sending some forces whenever situations demanded. There was inter-tribe fighting which disturbed the peace. But after independence when the Govt. established administrative centres in the interior places all these disturbances came to an end. The people are now becoming aware of manifold advantages of administration and they themselves show eagerness to cooperate with the administration for their development and security. Now people can go freely as their former enemies came closer to live in amity. The idea of inter-tribal and inter-village cooperation is also spreading. People are now aware that only through active cooperation with the administration they can maintain peace in the area which is essential for all round development.

In short, participation of the people for administrative development is quite encouraging. With the increase of population and complexity of local needs and situation there is a public demand for setting up of new administrative centres to maintain law and order and various development activities.

Medical and health services

The Health service primarily dwelt on General Health Care Services in District Hospitals, Community Health Centres, Primary Health Centres/Sub Centres/ Health Units. Medical Aid Centres in villages are managed by MEDIC (Bare footed Doctor) trained in Health Centres (At least six month's training imparted to them by the Medical Officer). Other services like District Health & Family Welfare society under reconstructive and Child Health Programme, District Blindness Control Society, Revised National Tuberculosis Control Programme, Expanded Programme of Immunisation, National Anti-Malaria Programme, National Leprosy Eradication Programme as MDT under District Leprosy Society, Intensified Pulse Polio Immunization Campaign, Family Planning (sterilisation) camps, eye camps, Training on Iodine Deficiency etc. are being implemented from time to time. Govt. patronisation by way of manpower,

materials, equipments, medicines, IEC materials are by and large adequate. Supply of general medicines, anti-malarial drugs, RCH Medicines & equipments, Dai kits, Laboratory articles, Anti T.B. drugs, Anti Leprosy drugs etc. are being received from the Govt. Also they use to receive some funds from the District Planning Board, MLA LAD funds to procure medicines. During the period MIAO PHC was upgraded to C.H.C. and Namtok, Kharsang SC upgraded to PHC.

Gains and extension services and people participation:

Primarily, there was no epidemic outbreak of any disease. Sporadic outbreak of Gastro-intestinal diseases and Malaria being controlled within reasonable time lag. People's participation is encouraging and increasing trend due to committed services and the employees closeness to the local people to comprehend the health problems.

Future Plans and prospects

(i) Miao CHC to be upgraded to Subdivisional Hospital and one Subdivisional Medical Health Officer be posted to look after the health problems of the people due to the vastness of the area already declared a Subdivision and one SDO has already been posted long back.

(ii) Bordumsa PHC to be upgraded to CHC

(iii) Diyun Sub-centre to be upgraded to PHC

(iv) Most of the Sub-Centres are without any building and Staff Quarters. Requirements have already been projected in the forthcoming A.O.P.

Infrastructure development like road and communication, construction of Health Centres Building, proper water supply, electrification of Health Centres building, adequate supply of materials, equipments, medicines and providing residential accommodation to staff for rendering better medical service to the people are in the priority list.

Agriculture and horticulture

Changlang district may be divided into two broad regions from agriculture/horticulture point of view, on the basis of physical features, physical intensity and other developmental activities.

(a) Area of intensive agriculture/horticulture activities include circles like Bordumsa, Diyun, Miao and lower parts of Changlang, Manmao and Nampong.

(b) Area of limited agriculture/horticulture activities include the circles of Khimiyong, Vijoynagar and upper belts of Changlang, Nampong and Manmao.

Efforts have been made to utilise the vast area of land available for intensive cropping with a view to uplifting economy of the region. Measures so far taken :

(1) Use of high yielding variety seeds in intensive areas

(2) Use of standard packages of practice in the areas of intensive agriculture/horticulture activities.

(3) Ensuring full protection of crops against pests and diseases.

(4) Introduction of Rabi cropping with cash crops.

(5) More coverage under horticulture activities with special emphasis on remote localities.

(6) Introduction of low volume high cost crops and species in suitable areas.

(7) Elementary mechanisation of farm practices to ensure better harvest.

(8) Evolving suitable cropping pattern for varied agro – climatic and topographic region.

(9) Emphasis on agro-based small scale industries.

The main agriculture/field crops of the district are paddy, maize, millet, vegetables, chilli, ginger, mustard, fruits, sugarcane.

The important horticulture crops are :-

(1) Fruits : Orange, Banana, Papaya, Guava and Litchi.

(2) Vegetables : Brinjal, Beans, Gourds, Pumpkin, Raddish, Cabbage and Cauli flower.

The district is famous for honey collection. Two types of cultivation are prevalent in the district. Jhum cultivation or shifting and wet rice cultivation or settled cultivation.

In 1990 the net area sown under Jhum and permanent cultivation were 4,250 and 12,400 hectare respectively which had increased to 4,285 and 15,825 hectares during 1995-1996. In the year 2000-01 the net area sown went upto 20,342 hectares out of which 3,442 hectares were under Jhum and 16,900 hectares under permanent cultivation.

Practically Kharif and Rabi are the two main seasons in the district. Kharif season starts from March and continues upto September. One principal crop grown in the season are paddy, maize, millets, tapioca, sugarcane, chilli, ginger, turmeric, arhar, soyabeans etc.

During Rabi season, a little area is brought under wheat cultivation in Miao, Diyun and Bordumsa Circles. The major areas are brought under mustard cultivation.

Distribution of net area sown under permanent and jhum cultivation since 1981 is shown below :

Sl. No.	Year	Total population Household No.	Net area sown in Hec. Permanent	Jhum	Total
1.	1981	7,410	8,984	3,688	12,642
2.	1985	7,496	10,004	3,800	13,804
3.	1990	8,000	12,400	4,250	16,650
4.	1995-96	9,205	15,825	4,285	20,110
5.	2000-01	9,836	16,900	3,442	20,342

Development programme of DRDA (District Rural Development Agency)

The DRDA, Changlang an autonomous body set up and registered under the Society registration Act, 1860 and started functioning from the 2nd day of October, 1983. It has an operational jurisdiction over four blocks, viz. Changlang, Khagam, Nampong – Manmao and Bordumsa-Diyun blocks covering 211 villages covering only ST population of 26,582 as per BPL(Below poverty line) census 1997-98.

Under the DRDA the following developmental programmes have been implemented through executing institutions, i.e. BDOs, Eos (A/S).

SGSY : Swarnajayanti Gram Swarozgaries Yojana is a holistic programme with a view to cover all aspects of self employment i.e. from organizing the rural poor into self help group, training, credit, infrastructure, technology and marketing etc. The programme has been launched all over the country w.e.f. 1.4.99 by replacing the self employment programmes such as IRDP, DWCRA, TRYSEM, SITRA, GKY AND MWS. Swarozgaries be able to cross the poverty line within a period of 3 years. Net income of minimum Rs.2,000/- p.m. is anticipated. It has a target to cover 30 per cent of BPL families in each block within 1999-2004. This programme is functioning in Changlang District smoothly and successfully and generate opportunity for the rural poor for upliftment of their economic status.

The Employment Assurance Scheme is a centrally sponsored scheme (E.A.S.) on cost-sharing basis between centre and state in the ratio of 75:25. This programme was introduced during 1993-94.

The primary objective of the EAS is the creation of additional wage employment opportunities during the period of acute shortage of wage employment through manual work for the rural poor living below poverty line.

The secondary objective is the creation of durable community, social and economic assets for sustained employment and development

EAS is open to all rural poor who are in need of wage employment. Since the programme is self targeting in nature and only the minimum wages are paid, it is expected that only the person below the poverty line would come for the unskilled work. Preference be given to SC/ST and parents of child labour withdrawn from hazardous occupation who are below the poverty line. This programme is also functioning successfully and generate employment for the weaker section of the society.

Jawahar Gram Samridhi Yojana is a new programme replacing JRY programme mainly intended to create durable assets at the village level based on the felt need of the villagers.

(i) Creation of durable assets/infrastructure at the village level.

(ii) Creation of productive assets for rural poor to increase the opportunities for sustained employment.

(iii) To generate supplementary employment for the unemployed poor in the rural areas of the district.

Indira Awas Yojana is centrally sponsored programme, 75 percent of fund from the Central Govt. and 25 percent of fund from the State Govt. The existing provision under this programme will continue with its objective of construction of dwelling houses by members of SC/ST, freed bonded labourers and non SC/ST rural poor below the poverty line providing with grant-in-aids.

As per guide lines IAY has two components :

1. Construction of new houses within the Govt. assistance of Rs.22,000/- per unit.
2. Conversion of existing kutcha houses into pucca/semi-pucca within Rs.10,000/- credit-linked as not required to above IAY houses.

Housing is one of the basic requirements for human survival. For a normal citizen owning a house provides significant economy security and status in society. Beneficiaries of this scheme have been benefited from IAY Scheme.

Pradhan Mantri Gramodaya Jojana (Gramin Awas) has been launched during 2000-01. The scheme, which is largely patterned on the Indira Awas Yojana seeks to supplement the efforts aimed at reducing the housing shortage faced by families below the poverty line. Apart from the construction of new houses and/or up-gradation of existing dwelling units, the scheme lays stress on all round improvement by assisting in the healthy development of the habitants in rural areas.

This scheme was successfully implemented in the district.

Relief and rehabilitation

Changlang District is the most resourceful district of Arunachal Pradesh. The richest deposit of OIL, COAL and NAMDAPHA wildlife, unlikely attracts the outsiders.

The major tribes inhabiting the district are the Tangsas, Singphos and Tutsas. Apart from the local tribes, the chunk of the population of this district are Chakma, Hajong, Tibetans and A.R. settlers in Vijoynagar Circle of the district.

During the year 1964 – 70, 2146 families of Chakma consisting of 11,813 persons and 150 families of Hajong consisting of 750 persons were settled at Miao, Deban and Diyun circles of the erstwhile Tirap District which is a part of the present Changlang District. They have now spread over to Miao, Bordumsa and Diyun circles of the district. Their present population as per record is as follows :

Chakma - 5141 families with 32,048 persons.

Hajong - 396 families with 2,093 persons.

In order to rehabilitate the victims of flood, fire and other natural calamities, the following amount were distributed/paid towards relief/rehabilitation during the last three years in the district.

Relief	-	Rs. 13,98,754/-
Ex-Gratia payment	-	Rs. 4,65,000/-

Animal husbandary & veterinary

The Animal Husbandry and Veterinary department is the nodal agency for development of livestock and poultry birds in the district. The main role of the department is to provide appropriate and adequate veterinary aid to the livestock and poultry population. To keep the animal and birds healthy, vaccination against all fatal diseases are done periodically and necessary health coverage are done through treatment.

To develop the local animals through breeding programmes the cattle upgrading centres are functioning.

Scope of dairy/livestock development

The vast green forest with abundant grazing land in this district gives the unlimited scope for Dairy/ Livestock development.

The increasing number of population and people awareness, the importance of milk consumption in this district, the demand for milk is increasing gradually during the last decade. Through the Government Cattle Breeding Farm, Changlang is producing about 16,244 litres of milk annually, it is insufficient to meet even the half of the total milk demand of the town.

To improve the local cattle breed, the Government has set up the cattle upgrading centres in many rural areas besides providing a better and improved breed through the departmental subsidy scheme.

Future plan

The department has sent the proposal for setting up of Integrated Dairy Development Project (IDDP) at Miao area where all the milk will be collected from Jairampur, Kharsang, Diyun, Bordumsa and Miao area and processed milk at Miao which will be available for sale at market.

Though there are many people who are interested in dairy farming, but due to poverty they cannot afford to purchase the animals. On the other hand the departmental scheme sanctioned during the year is insufficient to meet the public demand. In the last decade Government has allotted only 16 nos. of small dairy units for the entire district, for which the department cannot make a desired impact in the dairy development through the departmental subsidy schemes.

There are vast scope for livestock development including poultry in this district due to its suitable climatic condition and its geographical location. Due to absence of organised farms, almost all the livestock are brought from outside the state to meet the local demand.

To render the veterinary services there are Veterinary Dispensaries, Veterinary Aid Centres and Cattle up-grading centres available in the district, which are shown below :

1. Veterinary Dispensary	- 8 Nos.	at Changlang, Miao, Diyun, Nampong, Manmao, Kharsang, Bordumsa and Khimiyong.
2. Veterinary Aid Centres	- 11 Nos.	at Yangkang, Rangkatu, Yanman, Kongsa, Jairampur, Borkhet, Sangking, Manmao, Innao, Vijoynagar and Kharsang.
3. Cattle upgrading Centre	- 8 Nos.	at Namphai, Lowang, Makantang, Diyun, Nampong, Miao, Kharsang and Bordumsa.
4. District Diagnostic Laboratory	- 1 No.	at Changlang
5. Cattle Breeding Centre	- 1 No.	at Changlang
6. District Poultry Centre	- 1 No.	at Changlang
7. Fodder Bank/Farm	- 1 No.	at Changlang
8. Mobile Veterinary Unit	- 1 No.	at Changlang

The veterinary activities like treatment, vaccination and castration etc. are done in the various centres of the district.

The department is doing its level best for the overall development of livestock and poultry in the district and help the poor and needy people through timely mass vaccination and treatment of ailing animals. But the major constraint the department is facing today is acute financial problem for which sometime the mass vaccination cannot be carried out due to non-availability of vaccines and medicines. Nevertheless, the department is successful in conducting the mass vaccination and treatment every year and could prevent spreading of the highly contagious diseases from further spreading, thereby saving the valuable livestock of the poor people.

Forest

The total Forest area under Changlang Social Forestry Division is 1145 Sq.Km.(approx.). There are two reserve forests – Rangran – Ranglom Village Reserve Forest and Namdang Reserve Forest. The reserve forest area of Rangran – Ranglom Reserve Forest is 13.5 Sq. Km. and Namdang Reserve Forest is 42.77 Sq.Km. Total area under reserve forest in the district comes to 56.27 Sq.Km. and is 4.9 percent of the total forest division.

The bonafide local people enjoy the rights and privileges to collect forest produce for their needs and uses like construction of houses, fire wood, fodder, canes, bamboos and other NTFP free of cost. However, felling of trees, collection of timber from Reserve Forest areas are prohibited. The commercial extraction of forest produce like cane, bamboo, boulder and other NTFP are being regulated through licence system in vogue. However, timber operation has been stopped as per Hon'ble Supreme Court's ban order.

Total areas of plantations covered under the Social Forestry Division comes to 1174.5 hectares.

Revenue collected during the year 1991-92 till 2000-01 is shown below :

Year	Rs.
1991 – 92	6,253,846/-
1992 – 93	117,707,369/-
1993 – 94	17,792,392/-
1994 – 95	17,477,410/-
1995 – 96	31,678,168/-

Year	Rs.
1996 – 97	6,393,924/-
1997 – 98	918,397/-
1998 – 99	270,096/-
1999 – 00	2,707,096/-
2000 – 01	903,716/-

Timber operation has been suspended as per Hon'ble Supreme Court order w.e.f. December, 1996 till date.

Forest based industries are essential for all round development of the people.

The Govt. has taken action in this regard and W.B.I. have been reopened with certain rules and regulations to be followed by the mill owners.

There are 5 nos. of W.B.I. in existence upto December, 2001.

1. Changlang Plywood (P) Ltd., 9th Mile.
2. Namdang Veneer Saw Industries - 13 mile.
3. Tohi Veneer Products (P) Ltd., Phinbiro.
4. Rang-frah Wood Industries - Longpha.
5. Konica Plywood Industries (P) Ltd., Loha Dullong 23 Km.

Functioning of all Forest based industries under the Division are suspended as per Hon'ble Supreme Court Order till December, 2001. Out of 5 nos. of W.B.I. M/S Changlang Plywood (P) Ltd. was allowed to run as this mill is situated within the industrial area.

The development of Changlang under the jurisdiction of Changlang Social Forestry Division was fully based on timber operation. The local people of the area were totally involved in the timber operation work.

Since imposition of ban on timber operation, the economic and commercial pressure created on local people had retarded the development process in this Division. Intensive efforts are going on through Joint Forest Management Scheme to fulfil the biomass needs of the people and to ensure sustainable development of the forest and its produce.

Customary law and statutory laws

In the last decade the district has witnessed a scene of gradual rise in crime rates such as murder, robbery, extortion, insurgency, theft, assultation etc. The basic reason for rise in crimes were influx of outsiders into the district, growth of population, unemployment, poverty, socio-economic disparity and to some extent due to the effect of modern way of living.

Consequently, volume of cases in various level of courts enormously increased but the speed of disposal did not follow proportionately for want of infra-structure facility in judiciary system.

In village level judicial system, traditional customary laws played in matters of marriage and land dispute cases only. But trial of offence cases such as - theft, assaultation, mischief, etc. were found often reported to nearest police station and tried by courts as per statutory laws. Hence, gradual declines of village judicial institutions under the head of gaonburaship were noticed. This might be that new generation of GBs had no experience in qualitative handling of cases or development of legal awareness among village folk or effect of modern party politics in village, etc.

Whatever might be the cases, the district saw distinct change of attitude towards customary laws and increasing awareness in legal matters among new generation of educated youths which in a sense indicate healthy development.

Fishery

Due to meagre infrastructure facilities, the scope for the development of Fishery industries for processing and preservation units has be come limited. This district have 60 percent hilly terrain, with a tremendous scope for the running water fish – culture facilities for the culture of varieties of fishes. To market these fishes, it becomes incon-venient due to the lack of transportation facilities, though the yearly production of fish varies from 250 – 280 MT. The department has raised the production from 90 MT to 280 MT from 1991 – 2001, but still it is below our requirement.

The department has created altogether 122.9 ha. of water area in constructing ponds/farms but due to the natural calamities about 63.351 ha. of water area are lying abandoned. The department has never received any fund from the Central Government nor from the State Govt. for its restoration.

	Fishery Resources	Approx. area/length
(i)	River and Stream	100 km.
(ii)	Beels and lake, Swamps, Pip, creaks, Canal and marshy lands	250 Hect.

The main objective to develop the fishery is to produce the quality fish seeds. Though it is easily available in the neighbouring State of Assam, but the department has established 2 nos. of fish seed farm at Diyun and Bordumsa. The ingredient fish seeds are locally available.

By utilizing the existing resources and adopting the scientific way, the department has established 2 fish seed farms and 4 transit nursery and 1 running water Fish Culture project in the district. But due to stoppage of funding by the NEC the Running water Fish culture scheme could not be implemented.

The establishment of Fishery industries like processing and preservation units, manufacture of gear and tackle units are highly profitable and need to be developed and encouraged. Besides these, the Fishery By laws are to be imposed immediately for proper utilization of all the water bodies and other water areas too.

Even with the meagre infrastructure facilities the department is trying its best to tap the natural resources for the benefit of the local mass. The local inhabitants are coming forward to accept the pisciculture as an art of farming and also as an entrepreneurship way for creating more infrastructure facilities.

District Industries Centre

District Industries Centre, Changlang started functioning since 1984 with its headquarter at Changlang and headed by the Dy. Director of Industries. This DIC branch plays a significant role for industrial development of small scale industries, tiny cottage and village industries in the district extend all possible help and guidance to needy/prospective entrepreneurs for taking up of various industrial ventures in the districts. DIC also offers all facilities, concessions and incentives to entrepreners made available by the govt. from time to time. Further, this department provides assistance under PRMY, SJGSY in identifying ventures, prepartion of schemes and guidance to the entrepreneurs etc. In addition to above, the DIC also took active part in maintaining close liaison with all departments and financial institutions in providing various technical and financial assistance to prospective entrepreneurs and artisans.

In Changlang District, there is not a large scale industry developed so far. There are four medium scale industries based on wood and timeber plywood etc. Now all the wood based industries are closed since December, 1996 due to ban imposed by the Hon'ble Supreme Court. Small and tiny industries mainly concentrated at Miao, Jairampur, Bordumsa and Changlang Circles. The slow growth in the district is mainly due to the absence of adequate infrastructure facilities, lack of skill workers, shortage of capital entrepreneurship talent. At present, 70 SSY units are functioning in the district.

Incentives to industries under Central and State Government

1. All Industrial units established from 1997 are entitled to get a capital investment subsidy to the terms of 15% and maximum 30 lakhs.
2. Central Transport Subsidy : The industrial units of the district are entitled to receive 90% Central Transport Subsidy on to and from transportation charges of raw materials and finished products.
3. Central Interest Subsidy.
4. Comprehensive Insurance Scheme etc. : In addition a price preference to Industries situated in the state on the purchase made by the govt. departments are given in respect of items which they produce as below :
   (i) Price preference to registered cottage industries = 17½ percent
   (ii) Price prefernce to registered SSI units = 15 percent
   (iii) Price preference to registered other industries = 7½ percent

Other facilities

(i) Free registration

(ii) Arrangement of getting source of raw materials by SSI units

(iii) Free technical/managerial guidance to local entrepreneurs

(iv) Assistant on prepreaton of project report/ Scheme etc. to the local entrepreneurs

(v) Arrangement of management training, entrepreneurship development programme, publicity campaign on free of cost with stipend.

(vi) Render marketing facilities of finished products of SSI units.

(vii) Providing of industrial loan upto 1 lakh and arrange of seat of margin money.

Mines on minerals

Coal : Changlang district is rich in coal. There is a very rich coal belt in NAMCHIK, NAMPHUK coal fields under Miao sub-division. The survey has already been completed. Consideration by the Govt. is under progress for extraction of coal.

Oil : Oil has been discovered by Oil India Limited way back in the year 1976 at KHARSANG in the foot hills region of the district. The Kharsang Oil fields is now operated by M/S. GEO-EXPO PETROLEUM Ltd.

Another oil field namely NINGRU ML area (KUMCHAI FIELD) under Diyun Circle. The crude oil is extracted from both the fields and transported to the nearest oil refineries of Assam.

The scope for development of mineral and mines-based industries is bright in near future.

Integrated Infracstructure Development Centre (IIDC)

The Govt. of India has approved the proposal for establishement of an IIDC at BALINONG village under Kharsang Circle in Changlang District. The funding of the project will be 80:20 ratio. The Director of industries has assigned NEITCO, Guwahati to undertake techno-economic survey of the project. The first phase of the field survey for preparation of contour map, plan layout and facilibility report is completed and the second phase of the work is undertaken by the NITCO, Guwahati.

Industry Training Centre (ITI)

Establishment of one new ITI at Balinong under Kharsang Circle is approved by the Govt. of India on cent percent assistant grant. Foundation Stone has also been laid down by hon''ble Chief Minister.

Industrial management training

Industrial management training conducted yearly from 1995-96 to 2000-01 and imparted training to 255 entrepreneurs for setting up industries. Besides, publicity campaign and industrial awareness programme was also conducted.

Prime Ministers Rozgar Yojna (PMRY)

Prime Ministers Rozgar Yojna for providing employment to educated unemployed youths was announced on 15th August 1993. The earlier scheme for educated unemployed youths (SEEUY) was merged with PMRY.

Since then the entrepreneurs assistance are as follows:

Application recommended to the Bank – 118 nos. for Rs.110.05 lacs

Amounts sanctioned by the Bank–98 nos. for Rs. 69.2 lacs

Cash disbursed by Bank–89 nos for Rs. 55.75 lacs

Industrial Estate

Four shade of industrial estate at Changlang and 2 shade of industrial estates at Miao were established in order to establish SSI units at nominal rents.

Trade and commerce

Allotment of FCI items like issue of levy sugar, wheat etc. is made by the Director of Civil Supply, Govt. of Arunachal Pradesh on receipt of the allocation from Government of India. The Director of Civil Supplies also intimate the Senior Regional Manager, Guwahati to release the allotted quantity to different districts. On receipt of SRM order, the District Manager released the essential commodities from its FCI godown of Dibrugarh/Tinsukia/Kharsang to the different wholesale nominee viz. M/S RS. Trading Company for Bordumsa, Kharsang, Diyun, Miao, Jairampur, Nampong, Manmao circle. M/S P. Khimiyong and Changlang Circle. Carrying of the essential commodities are also done by the three wholesale nominees. Transport subsidy is reimbursed by FCI.

Allotment of iodised salt is made to the wholesale nominee to draw M/S DDH Salt, from the godown at Borgurigaon,Tinsukia, Assam and accordingly distribution is made to different FPS of the district and FPS distribute to the bonafied consumers through ration card.

Two new schemes have been implemented during 2001-2002. These are annapurna and antyodaya Anna Yojna. In Annapurna 10kg of rice free of cost are given to the persons aged 65 years and above who are not benefited by the national old age pension scheme.

On the other hand Antyodaya Annayojona scheme is being implemented to create hunger free India in sixth five years. Rice and wheat are @ Rs.3/ and Rs. 2/- per kg. respectively per family. 25 kg are issued to those who are poorest of the poor.

There are three L.P.G. Agencies available at present in the district. These are M/S Rang Frah Gas Agency, Changlang, M/S Bordumsa Gas Agency, Bordumsa M/S Miao Gas Agency, Miao.

At present, there are three Petrol, Oil and Lubricant (POL) outlets in the district. These are M/S Arunachal Auto Agency, Kharsang, M/S Tikhak Auto Agency, Jairampur and M/S Changlang Oil Traders at Changlang.

There are two Superior Kerosene Oil outlets (SKO) wholesaler at Jairampur and Changlang. Besides, there are eight number of retailers and one hawker. The wholesaler draw the quota from IOC, Tinsukia and retailers distribute to the bonafied consumers.

Ration items to the air-fed area consist of Vijoynagar circle only within the district. The Public Distribution Center has been extended up to Vijoynagar during the year 2001-2002 and the commodities are lifted by ration sortie and by head loads depending upon the weather condition. There is only one C.P.O. Center at Vijoynagar but now four more FPS have been sanctioned during 2001-2002.

The trading of the essential commodities is very much difficult for Vijoynagar Circle due to lack of motorable road.

Co-operative societies

There is ample scope for functioning of Co-operative Societies as well as Co-operative Apex Banks towards the Socio-economic development of the people of the district.At present there are 4 Large size Multi Purpose Co-operative Society (LAMPS) and 3 Co-operative Apex Bank in the district. Besides, there are one School Co-operative, one multipurpose Co-operative functionary. One MPCs and one C.G.S. Co-operative at Vijoynagar stopped functioning due to ban on free airlifting of Co-operative stores.

During the decade, the LAMPS and Co-operative General Stores (C.G.S) catered to the needs of the people of this district by supplying essential commodities at cheaper rate. Apex Bank also issued different types of loans to the members for their economic upliftment.

Co-operative Societies besides supplying essential commodities to the people at cheaper rate, arranged marketing the products of the local people. Banks provided short – term and mid-term loan to the people through the LAMPS.

NCDC has sponsored a scheme for diversification of activities of the Co-operative towards viable projects like pigggery, fishery, small forest-based industry etc.

The societies are running short of capital due to shifting of public distribution system in the hands of the private. Further, indiscriminate issue of licence for the private FPS, the Co-operative Societies suffered serious setback because the main source of income of the society in this district was P.D.S. business. This has in turn affected the Apex Banks very badly because a major portion of the income of the Banks in the form of interest received from the societies against cash-credit loan has comedown drastically.

If the Co-operative Societies are given back their quota of PDS, these existing societies will be able to run effectively.

Publicity

The Information and Public Relation department covers the information and Publicity services in the district in close touch and co-operation with the district administration as well as various Govt. departments, agencies and socio-cultural organisation in the district. The department issues press notes, handout, dispatches, news, press messages relating to Socio-cultural and economic developmental activities to various news agencies like local newspapers, national news papers and other media like Doordarshan and AIR station etc. With a view to making the people living in the remote villages aware of the developments and to bring them to the national main stream in the

recent past, the IPR department used to issue Radio and TV sets to the people of the respective villages. The department has already issued 29 TV sets and 122 Radio sets to the villages of the district. The department has two projection units – one at Changlang Hq. and other at Miao which have projectors for screening feature and documentary films for imparting information and education to the people. Both the projection units have equipments of PA system which are provided and used during the VIP and other departmental meetings and developmental activities within the district. In addition to the original charter of duties, the IPR department also looks after the activities relating to Doordarshan, A.I.R, since these Central departments do not have their officials in the district. It also looks after the Cinema and Video Hall activities in the district. The district has 2 VLPTs, one at Changlang and other at Khimiyong and one LPT at Miao. Besides doing all these functions the IPR also acts as a liaisoning department having close touch with the Central Publicity Department which is known as Field Publicity Department located at Nampong. In totality the IPR department is not termed exactly as Publicity Department but it is popularly known as the spokesmen or mouthpiece of the Govt.'s policies and programmes.

Tourism

Tourism as an industry has great potential in the district. It can be developed as a major economic activity. For this, the Govt. needs to develop strategies and policies. There is also the need of publicity and creation of awareness about tourism potential in the district. We need to encourage private investment in this sector to exploit the natural advantages of the place. In fact the district has natural advantages for the following tourism activities :

i) Eco. Tourism.

ii) Adventure tourism like river rafting, angling, tracking etc.

iii) Religion and cultural tourism.

iv) Village tourism : (Some villages can be selected for both domestic and foreign tourists where accommodation is made available so that the tourist can live in the daily routine life of the tribals.In this way the tourist can have the test of tribal life. Various aspects of the tribal life can be experienced by the tourist in such villages with modern amenities)

v) Scope for encouraging Private tour/Transport operation.

vi) Scope for developing Hotel, Lodges, and Paid Guest accommodation.

vii) Scope for developing 'View Point'.

The following is the places of Tourist interest in the district with potential and existing infrastructure facilities :

Name of Circle	Name of place	Potential
1. Changlang Circle	1. Rangulm Village (Crash Air Craft Debries of world war – II and natural Salt water spring)	World War –II Memories, Tracking, view of Myanmar Territory and Patkai Hill.
	2. Kengkho Village	Village tourism.
	3. Chingsa Village (Natural Salt Water spring)	View point wild life etc.
	4. Tirap River	Rafting, Angling , River valley sight seeing etc.
2. Yatdam Circle (New)	1. Jongphohate (Shivlinga)	Religious place and virgin natural valley.
3. Khimiyong Circle	1. Thamlom Village (Rain bearing stone)	Traditional belief and Religious place.
	2. Panloom Village (Natural salt water spring)	Sight seeing and place of Zoological interest.
4. Miao Circle	1. Namdapha National and Tiger project, Sulphurous Point.	Wild life, Typical Flora and Park fauna orchid.

Name of Circle	Name of place	Potential
	2. Deban	Angling, rafting, Picnic Spot, Orchid House.
	3. Miao	Tibetan Carpet making Industries, Mini Zoo and Sight seeing.
	4. Khamlong	Newly discovered Ancient Temple, Religious places.
5. Jairampur Cirlce	1. Jairampur (Graveyard of second world war.)	Historical place, World War-II Memories and Sight Seeing.
6. Nampong Circle	1. Pangsupass	Stillwell road constructed during second World War, International Border, View of Lake of No-return and Sight Seeing.
	2. Hell-gate (Nampong circle H.Q.)	Historical importance of Second World War, Sight Seeing.

In addition to above, many tea gardens have come up on beautiful hillock overlooking Changlang Township. As a matter of fact, no infrastructure available in all the places of Tourist Interest except 10 room Tourist Lodge at Miao and 4 room Tourist Lodge at Deban. At present there is no ongoing infrastructure Project both in private and Govt. sector for development of Tourism in the district. Some private individuals are trying to invest in these sector with least success due to lack of awareness and also publicity about tourism potential in the district.

Area for private investment

There is scope for private investment for developing holiday homes, Eco-Tourism, Adventure Tourism like River Rafting, Angling, Gliding etc. Hotels, Lodges and other paid accommodation can be developed for both Domestic and Foreign Tourists by the Govt. and private investor in areas having tremendous potential for Tourism. The private Tour/ transport operators can be encouraged to attract both Domestic and Foreign Tourists. The thrust area for private investment can be identified after a proper survey of the potential area of the district.

Restaurants, good Hotels and wayside amenities are required to attract tourist. The Govt. should give required thrust to develop this sector and private investors should be encouraged to invest.

There are also some locations which are really beautiful from the point of sights and scenes. If these places are developed, these places will be able to attract seasonal visitors, which may definitely get the chance of exposing the culture and traditions of the local people of this district.

Miao is the subdivisional headquarters of Miao subdivision. There are things of interest like Mini Zoo, Tibetan refugee settlement, where colourful woolen carpets of various designs are produced. Also at Kharsang and Manabhum, the oil drilling activities could be seen.

Deban has a beautiful forest camp situated on the bank of the river Noa-Dihing, Namdapha National Park falls within its boundary. This park was declared as a Tiger Reserved by the Governmnent in 1983. The main attraction of this park is the tiger, leopard, snow-leapard, clouded leopard and many other animals and birds. The Forest Inspection Bungalow is surrounded by the evergreen forest over looking the river Noa Dihing, which is worth seeing and north staying. This is alos an ideal place for trekking, hiking and angling on the river Noa-Dihing.

Jairampur is the headquarter of Jairampur Sub-division. Here one can see the recently unearthed large number of graveyards of Taiwanese soldiers who died heroic deaths in the second world war. The heroic “Still well Road”, which was constructed by the Americans during the second world war starting from Lekhapani in Assam to Yang On (Rangoon), the capital of Myanmar also passes through Jairampur, Nampong and Pangchau Pass – the international border between India and Myanmar. The famous lake known as Lake of no return (in Myanmar side) which can be viewed from Pangchau Pass is 12 Kms away from Nampong.

Changlang, apart from being the district headquarter, it is also well known for two premier institutes i.e. State Institute of Education (SIE) and

District Institute of Education and Training (DIET) where in service training is provided to the teachers. The visitors can also see the typical Tangsa and Tutcha village as well as the houses and also interact with the local people. One can also enjoy fishing in the Tirap river, which passes through the heart of Changlang Town.

Education

There are 7 Higher Secondary Schools (HSS), 10 Secondary Schools (SS), 25 Middle Schools(MS), 136 Primary Schools and 37 community Schools available in the district.

Year wise extension of different institutions from 1991-2001 for Changlang District is given below:

Year	HSS	SS	MDL	PRY	AEC	JSN	C/Schools
1991	3	6	21	119	134	18	18
1992	4	8	22	121	141	31	18
1993	5	9	22	121	47	29	18
1994	5	9	22	121	131	29	18
1995	7	8	24	123	62	29	20
1996	7	8	24	123	107	20	35
1997	7	8	24	123	65	20	35
1998	7	8	26	132	63	20	35
1999	7	8	26	136	62	20	37
2000	7	8	26	136	-	-	37
2001	7	10	25	136	-	-	37

Sufficient gains are quite visible in the field of education since 1991. Number of literates have also increased considerably. Youths are able to secure jobs in various departments after being adequately qualified themselves in various fields.

All the educational institutions are solely patronized by the State Government. After the opening of a college in the district, the local students could prosecute their studies up to graduation. This has facilitated the student to study in the local college, which was a long-standing demand of the students community. A vocational institute of the standard of certificate or diploma course is needed in the district, which will definitely fulfil the desires of the students aspiring for such type of training. Moreover, in the present age of science and Technology technical and vocational institutes will play a bigger role in fulfilling the desires of the student communities of the district.

(v) Census Concepts

Building

A "Building" is generally a single structure on the ground. Sometimes it is made up of more than one Component Units, which are used or likely to be used as dwellings (residence) or establishment such as shops, business houses, offices, factories, work-shops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have Component Units may be used for contribution of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Permanent houses

Houses in which both wall and roof are made of permanent materials. Materials of wall can be burnt bricks, GI/metal/Asbestos sheets, stone with lime or cement or cement concrete. Roof may be made of tiles, slate, shingle, corrugated/galvanized iron or zinc/ other metal or asbestos sheets, bricks, lime and stone, stone, RBC/RCC or concrete.

Semi-permanent houses

Houses in which either wall or roof is made of permanent materials and the other is made of temporary materials.

Temporary houses

Houses in which both wall and roof are made of materials which have to be replaced frequently. Wall may be made of grass, thatch, leaves, reeds, bamboo, mud, plastic/polythene, un-burnt bricks or wood. Roof may be made from grass, leaves, bamboo, thatch, mud, un-burnt bricks or wood.

Room

A room should have four walls with a doorway and a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and breath of at least 1½ metres and 2 metres in height. An enclosure which is used in common for sleeping, sitting, dining, storing and cooking etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded

from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Census house

A Census House is a building or a part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Village

The basic unit for rural area is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognised boundaries is treated as one village.

Town/Urban areas

The following areas are treated as towns/urban area.

a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

   i) A minimum population of 5,000 ;

   ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and

   iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of the village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 201, following criteria are taken as pre-requisites :

(a) The core town or at least one of the constituents towns of an urban agglomeration should necessarily be a statutory town : and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted :

(i) a city or town with one or more contiguous outgrowths;

(ii) two or more adjoining towns with their outgrowths ; and

(iii) a city and one or more adjoining towns with their outgrowths all of which form a contiguous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household may consist of related to each other, unrelated or both. Examples of unrelated household are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, orphanages, etc. These are called 'Institutional Households'. There may be one member household, two member households or multi member households. For census purposes each one of these types is regarded as a 'Household'

If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would be treated as a separate household. The important link in finding out whether it is a household or not is a common kitchen. In a few situations, it may become difficult to apply the definition of household strictly. For example, a person living alone in a census house, whether cooking or not cooking meals, will have to treated as a household. Similarly, if husband and wife or a group of related persons are living together in a census house but not cooking their meals, will also constitute a normal household.

For this purpose of census there are three type of Households i.e., Normal Household, Institutional Household and the Houseless Household.

Institutional household

A group of unrelated persons who live in a institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places like worship, mandaps, railways platforms etc., are treated as Houseless households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in Arunachal Pradesh are given below :

Scheduled Castes

The Scheduled Castes and Scheduled Tribes Lists (Modification) order, 1956 as inserted by Act 69 of 1986 the following Castes are to be treated as Scheduled Castes in Arunachal Pradesh for 2001 Census.

1 Bansphor
2 Bhuinmali or Mali
3 Brittial-Bania or Bania
4 Dhupi or Dhobi
5 Dugla or Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo or Jhalo-Malo
9 Kaibartta or Jaliya
10 Lalbegi
11 Mahara
12 Mehtar or Bhangi
13 Muchi or Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes

In the Presidential Order of 1956, mentioned above, the following Tribes are treated as Scheduled Tribes in Arunachal Pradesh for 2001 Census.

1 Abor
2 Aka
3 Apatani
4 Dafla
5 Galong
6 Khampti
7 Khowa
8 Mishmi
9 Momba
10 Any Naga Tribe
11 Sherdukpen
12 Singpho

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have as script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are

workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her / his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system means a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in those towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrine from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \text{ x1000}$$

Crude death rate (CDR)

Ratio of the number of live deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid –year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the different between crude birth and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

Total Fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of woman till the completion of reproductive period.

$$TFR = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital Fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of woman till the completion of reproductive period.

$$TMFR = \frac{5 \times \text{S ASMFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age specific mortality rate (ASMFR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infant dying within the first month of life (28 days or under) in a tear per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Late Neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$SBR = \frac{\text{Number of still birth during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of woman in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any related to pregnancy and child births per 1,00,000 live birth in a given year.

$$MMR = \frac{\text{Number of maternal deaths to woman in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 woman in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 woman in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than his/her place of his/her birth.

Similarly a person is considered as migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again

to their usual place residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational courses that lasted for only few months of a year, she/ he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides she/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relative's houses is in a place where the hospital or parents/relative's house is the place of last residence of the child but not the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of the education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. This present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz., rural to rural, rural to urban, Urban to rural and urban to urban.

Civic status of urban units

Civic status of town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Committee/Municipal Council, Municipality etc.

Size-class of UA/Town

Size–class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ Towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000 to 1,999,999); M4 (500,000 to 999,999); M3 (300,000 to 499,999); M2 (200,000 to 299,999) and M1 (100,000 to 199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,000 population are Class III towns, population with 10,000 – 19,999 are Class IV towns, population with 5000 and 9999 are Class V and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) area by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or family arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are determined to safety, health or morals.

Mega city

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastucture Development in Mega Cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega Cities.

2001 Census–finding population, its distribution

According to the 2001 Census, the total population of the district is 125422 comprising 65,821males and 59601 females and constituting 11.5percent of the state population spread over 4662 Sq.Km. area of the district. Among the circles of the district Diyun circle is the most populous circle having a population of 28907 while Namtok circle is the smallest one with a population of 3085 in the district. Other circles in order of their population size are (1) Bordumsa (2) Miao (3) Changlang (4) Kharsang (5) Jairampur (6) Nampong (7) Vijoynagar (8) Manmao (9) Khimiyong.

Out of the total population of the district 90.1 percent lives in rural areas 9.9 percent lives in urban areas. The corresponding proportion in rural and urban areas of the state are 79.2 percent and 20.8 percent respectively. The average number of towns per hundred inhabited villages is often considered as an index of urbanization. In this district there are 0.6 percent town for every hundred villages, indicating that the district is one of the less urbanized district in the state. Only two circle of the district has urban population.

Out of total 342 villages in the district 336 are inhabitated. In terms of rural population Diyun circle is the most populated circle with 25.6 percent of rural population of the district, while Namtok circle with 2.7 percent of the rural population of the district stands lowest in rural population. In terms of number of villages Changlang circle leads with 65 inhabited villages, while Vijoynagar Circle with only 13 inhabited villages holds the last rank.

Urban population of the district is distributed among 2 (two) Urban units and no urban unit has municipal status. The average size of an urban centre in the district worksout to 6194 persons.

There are two towns in the district. One is Changlang and other is Jairampur. The class, status, population in 2001 census growth rate, density, sex ratio, work participation, literacy rate are given below in a tabular form of both the towns.

					Population in 2001				Work participation rate			Literacy rate		
Sl. No.	Size	Name	Class	Status	Census	Growth rate	Density	Sex ratio	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	NA	Changlang	V	C.T	6,496	NA	NA	780	35.9	52.0	15.3	82.7	88.8	74.6
2	NA	Jairampur	V	C.T.	5,919	NA	NA	765	36.7	54.4	13.4	83.7	89.2	76.3

In general the Urban population of the district are mixed with Hindu, Buddhist, Mahamadan, Sikh, Jain, Christian and Others (some local people belong to "Doney Polo" the local religion). For higher education no separate University is available in the Town as well as in the district. The nearest University is located in Dibrugarh (Assam)

TABLE 1 : DECADAL CHANGE IN POPULATION OF CIRCLES BY RESIDENCE, 1991-2001

Sl. No.	Circle	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001

10	Diyun Circle	22,594	22,594	0	28,907	28,907	0	27.9	27.9	0.0	0	0
11	Bordumsa Circle	17,221	17,221	0	25,369	25,369	0	47.3	47.3	0.0	0	0
	District Total :	**95,485**	**95,485**	**0**	**125,422**	**113,034**	**12,388**	**31.3**	**18.4**	**0.0**	**0**	**9.9**

Table 1 reveals the Circle wise growth of the district in terms of population for last 10 years from 1991 – 2001

The population of the district recorded in 2001 Census stands to 125,422 as against 95,485 in 1991 indicating a net addition to 29,937 persons during the decade.

The Decadal growth rate of the district works out to 31.3 percent and is higher as compared to State average 27.0 percent. Among the 11 Circles of the district Bordumsa Circle ranks 1st in the growth rate (47.3) percent and last rank goes to Nampong Circle where growth rate retarded to the extend of (-) 51.2 percent. It is also significant to note that the growth rate retarded in Maio Circle and Rural areas of Changlang Circle due to creation of new Towns, Changlang and Jairampur and due to distribution of population in the newly created administrative circles at Namtok, Jairampur and Kharsang after 1991 Census.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Changlang	99	14,840	7,692	7,148	74 (74.7)	3592	3,303

	District (Rural) Total :	**85 (25.3)**	**14,048**	**12,855**	**28 (8.3)**	**9,821**	**9,194**	**21 (6.3)**	**15,435**	**14,177**

Serial number	District / C.D. block	Number and percentage of villages	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females		Males	Females
1	2	19	20	21	22	23	24	25	26	27
1	Changlang	0 (0.0)	0	0	0 (0.0)	0	0	0 (0.0)	0	0
2	Nampong-Manmao	0 (0.0)	0	0	0 (0.0)	0	0	0 (0.0)	0	0
3	Khagam-Miao	2 (2.4)	4,316	3,773	0 (0.0)	0	0	0 (0.0)	0	0
4	Bordumsa-Diyun	4 (5.5)	4,934	4,628	0 (0.0)	0	0	0 (0.0)	0	0
	District (Rural) Total :	**6 (1.8)**	**9,250**	**8,401**	**0 (0.0)**	**0**	**0**	**0 (0.0)**	**0**	**0**

This table shows the population size ranges in the Inhabited villages. The number and percentage of Inhabited villages in specified population size ranges have been worked out at C.D.Block level of the district. It can be seen from the table that majority of the villages (58.3%) come under lowest population size range of less than 200. It is further observed that at the district level the number and percentage of Inhabited villages have been declined considerably in the higher population size ranges and infact there is no village beyond the population size ranges of 2000-4999. A C.D.Block level analysis also shows the similar trend.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town
1 NIL
2
3
(ii) Census town
1 Changlang
2 Jairampur
3 ---
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns
1 NIL
2
3
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria
1 NIL
2
3
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
1 NIL
2
3
(c) Declassified
1 NIL
2
3
(d) Wholly merged with other town(s)
1 NIL
2
3

This table gives an idea of new Towns added in 2001 Census and Towns denotified/classified after 1991 Census. It can be seen from the table that two new Towns have been created in 2001 Census and no Town has been declassified in the district after 1991 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	336	100.0	113,034	100.0
11-20	0	0.0	0	0.0
21-50	0	0.0	0	0.0
51-100	0	0.0	0	0.0
101-200	0	0.0	0	0.0
201-300	0	0.0	0	0.0
301-500	0	0.0	0	0.0
501 +	0	0.0	0	0.0
Not known	0	0.0	0	0.0
District Total:	**336**	**100.0**	**113,034**	**100.0**

Population Density (Rural) of the district: 0

In Census the Density of poopulation works out as population per Sq. Km. In the vast area of 83743 Sq. Km. Of Arunachal Pradesh there are altogether 1097968 people accounted for 2001 Census. So, the density of population of the State is very low in comprarison to National average density. The density of India comes around 324 during 2001whereas density of Arunachal Pradesh is 13 only. The same is the case of Changlang District where density of population is 27 only. In the absence of cadastral survey the area figure below district level is not available and as such the village level density of population could not be worked out.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	Data Not Available					
1911						
1921						
1931						
1941						
1951						
1961	894	894	-	918	918	-
1971	861	881	457	855	855	-
1981	862	881	629	833	833	-
1991	859	880	728	863	863	-
2001	893	914	819	906	921	773

Note : Sex ratio has been defined here as the number of females per 1000 males.

The average Sex ratio of the State always reported below 900 mark throughout the period from 1961 till 2001 Census. This position of Sex ratio is obviously below the moderate Sex ratio. If we look into District Sex ratio it will be seen that it is better

TABLE 6 : SEX RATIO BY CIRCLES, 2001

Sl. No.	Name of Circle	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Khimiyong Circle	916	916	
2	Changlang Circle	865	937	780
3	Namtok Circle	925	925	
4	Manmao Circle	913	913	
5	Nampong Circle	830	830	
6	Jairampur Circle	803	929	765
7	Vijoynagar Circle	977	977	
8	Miao Circle	939	939	
9	Kharsang Circle	907	907	
10	Diyun Circle	921	921	
11	Bordumsa Circle	917	917	
	District Total:	**905**	**921**	**773**

The Sex ratio in Indian Censuses is defined as Female per 1000 Males in the population. It will be seen in the table that Bijoynagar circle registered the

than States average Sex ratio particularly during the Census years 1961, 1991 and 2001. The average Urban Sex ratio of the district is 773 only whereas Urban Sex ratio of the State is 819.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Khagam-Miao	934
2	Bordumsa-Diyun	919
3	Nampong-Manmao	879
4	Changlang	929
	District (Rural) Total:	**921**

This table presents data on Sex ratio by C. D. Blocks. It can be seen from the table that the highest Sex ratio (934) has been registered against Khagam-Miao C. D. Block among the 4 C. D. Blocks of the district. The average Rural Sex ratio of the district is 921 only.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	36	10.7	3,562	3.2
700-749	11	3.3	2,656	2.3
750-799	16	4.8	3,382	3.0
800-849	32	9.5	11,289	10.0
850-899	43	12.8	24,069	21.3
900-949	42	12.5	18,973	16.8
950-999	42	12.5	24,423	21.6
1000-1099	64	19.0	17,486	15.5
1100+	50	14.9	7,194	6.4
District Total :	**336**	**100.0**	**113,034**	**100.0**

Table No.8 presents data on Sex ratio of Rural population by ranges. The very high Sex ratio of 1100+ recorded in 50 villages which constitute 6.4% population of the district. The next high Sex ratio of 1000-1099 reported in 64 village with population share of 15.5%. The lowest range of Sex ratio of less than 700 reported in as many as 36 villages with percentage distribution of population 3.2. percent.

highest Sex ratio with 977, closely followed by Miao circle with 939 among the 11 Circles of the district. As many as 10 Circles recorded 900+ Sex ratio which is considered to be moderate.

If we look into Urban Sex ratio of the district it is very disappointing. The average Urban Sex ratio of the district is 773 only against 921 in rural areas. The fact remains that major portion of urban population are inmigrants from neighobouring states and they usually keep their family in the places of their origin where better education facilities and medical facilities are available.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A. Town	Urban status of town	Sex ratio
1	2	3	4
1	Changlang	CT	780
2	Jairampur	CT	765
Sex ratio (Urban) for the district:			**773**

There is no Urban Agglomerations in the district. As such information to be incorporated in the table may be treated as NIL. However, Sex ratio of the two Census Towns of the district has been recorded as 780 and 765 respectively against Changlang and Jairampur Census Towns.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CIRCLES, 2001

Serial Number	Name of Circle	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	**1,878**	**982**	**896**	**912**

This table depicts the picture on Sex ratio of population in the age group 0-6 for Circles. Khimiyong Circle has registered lowest Sex ratio with 844 and the highet Sex ratio has been recorded against Namtok Circle with 1035 Female child among 1000 Male child in the population of 0-6 years age group. There is no remarkable difference in Sex ratio among the rest of the Circles except Nampong Circle where Sex ratio has been recorded as 900. In the age group 0-6 years, the average Sex ratio of the district is 954 with the Rural and Urban breakup of 958 and 912 respectively.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Khagam-Miao	6,733	3,447	3,286	953
2	Bordumsa-Diyun	11,912	6,090	5,822	956
3	Nampong-Manmao	1,989	1,015	974	960
4	Changlang	2,974	1,508	1,466	972
	District (Rural) Total:	**23,608**	**12,060**	**11,548**	**958**

This table shows the Sex ratio of population in the age group 0-6 for C.D. Blocks. Among the C.D. Blocks of the district Changlang C.D. Block has dominated the Sex ratio with 972 and Khagam-Miao has recorded lowest Sex ratio with 953. However, in the age-group 0-6 years there is no significant difference in Sex ratios among the C.D. Blocks of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	69	20.5	1,568	6.6
700-749	16	4.8	703	3.0
750-799	13	3.9	745	3.2
800-849	32	9.5	4,070	17.2
850-899	22	6.5	2,677	11.3
900-949	26	7.7	3,636	15.4
950-999	12	3.6	2,627	11.1
1000-1099	33	9.8	1,880	8.0
1100+	113	33.6	5,702	24.2
District (Rural) Total	**336**	**100.0**	**23,608**	**100.0**
Sex ratio (Rural) for District:	**958**			

This table provides the Sex ratio of rural population in the age group 0-6 by ranges. It can be seen from the table that as many as 69 villages (20.5 percent) with the total population 1568 (6.6 percent) fall within the range of Sex ratio below 700. The highest range of Sex ratio 1100 + is found in as many as 113 (33.6) villages where total population is 5702 (24.2 percent)

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of UA Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Tezu	CT	2,367	1,192	1,175	986
2	Namsai	CT	1,995	1,027	968	943
	District (Urban) Total :		**4,362**	**2,219**	**2,143**	**966**

There is no Urban Agglomerations in the district. As such information to be incorporated in the Table may be treated as NIL. However, Sex ratio in the age group 0-6 years has been recorded against two Census Towns of the district. The Sex ratio has been workedout 899 against Changlang and 926 against Jairampur.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CIRCLES, 2001

Sl. No.	Name of Tahsil	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

		Rural	20,266	41	5,780	0.2	28.5
		Urban	0	0	0	0.0	0.0
9	Kharsang Circle	Total	9,509	71	6,700	0.7	70.5
		Rural	9,509	71	6,700	0.7	70.5
		Urban	0	0	0	0.0	0.0
10	Diyun Circle	Total	28,907	18	2,751	0.1	9.5
		Rural	28,907	18	2,751	0.1	9.5
		Urban	0	0	0	0.0	0.0
11	Bordumsa Circle	Total	25,369	145	5,390	0.6	21.2
		Rural	25,369	145	5,390	0.6	21.2
		Urban	0	0	0	0.0	0.0
	District Total:	**Total**	**125,422**	**372**	**45,351**	**0.3**	**36.2**
		Rural	**113,034**	**310**	**42,085**	**0.3**	**37.2**
		Urban	**12,388**	**62**	**3,266**	**0.5**	**26.4**

In this table, number and percentage of SC & ST population have been depicted for Circles. It is observed from the Table that the highest percentage of ST population reported in Khimiyong Circles (94.7%) and lowest percentage (9.5%) recorded in Diyun Circle among the 11 Circles of the district.

It is remarkable to point out that Chakma/Hajong population dominated the population composition of some circles i.e., Diyun, Kharsang, Bordumsa, Miao circles etc. and they are not treated as ST population which caused to low percentage (36.2%) of ST population of the district. This district recorded lowest

percentage of ST population among the 13 district of Arunachal Pradesh.

The SC population is quite insignificant in the district because there is no indigenous SC population of Arunachal Pradesh.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Khagam-Miao	33,763	116	14,560	0.3	43.1
2	Bordumsa-Diyun	54,276	163	8,141	0.3	15.0
3	Nampong-Manmao	10,155	30	7,350	0.3	72.4
4	Changlang	14,840	1	12,034	0.0	81.1
	District (Rural) Total:	**113,034**	**310**	**42,085**	**0.3**	**37.2**

This table provides number and percentage of Scheduled Castes and Scheduled Tribes population in C.D. Blocks. It will be seen from the table that the number and percentage of Scheduled Castes population are infact very insignificant in all the C.D. Blocks of the district. The highest (81.1 percent) Scheduled Tribe has been reported from Changlang C.D. Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	316	94.0	0	0.0
Less than 5	19	5.7	181	58.4
5-10	0	0.0	0	0.0
11-20	1	0.3	129	41.6
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**336**	**100.0**	**310**	**100.0**

The Table presents data on proportion of Scheduled Castes population to total population in villages. It will be seen from the table that out of total 336 villages in the district there is no SC population in 316 villages. Less than 5 percent SC population reported against 19 villages and only 1 village recorded SC population in the percentage range of 11 - 20. The maximum population of Scheduled Castes fall in the range of less than 5 percent.

The fact remains that there is no indigenous SC population of Arunachal Pradesh. As such all the SC population, however small in number, are inmigrants from the other States of India for the purpose of Job mainly and for the specific period. There is not much scope left with to increase the number of SC population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	64	19.0	0	0.0
Less than 5	14	4.2	70	0.2
5-10	3	0.9	17	0.0
11-20	17	5.1	1,622	3.9
21-30	11	3.3	1,959	4.7
31-40	17	5.1	4,071	9.7
41-50	10	3.0	1,237	2.9
51-75	23	6.8	3,595	8.5
76 and above	177	52.7	29,514	70.1
District Total	**336**	**100.0**	**42,085**	**100.0**

The Table shows proportion of Scheduled Tribes population to total population in villages. It is seen that as many as 177 villages out of total 336 villages of the district are having Scheduled Tribes population of very high percentage range with 76 and above. In other percentage ranges the number of villages found quite small. It is something very special and unusual event in this district of Arunachal Pradesh that as many as 64 villages do not have any Scheduled Tribes population. The fact remains that inhabitants, mainly Chakmas/hajong of these villages are not treated as Scheduled Tribes.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Changlang	6,469	50	2,358	0.8	36.5
2	Jairampur	5,919	12	908	0.2	15.3
	District (Urban) Total	**12,388**	**62**	**3,266**	**0.5**	**26.4**

There is no Urban - Agglomerations in the district. As such information to be incorported in the table may be treated as NIL. However, the percentage of SCs and STs population has been worked out for the two Towns of the district. It can be seen from the table that Changlang Town has registered 0.8 percent of SCs population and 36.5 percent STs population whereas Jairampur Town has recorded 0.2 percent SCs and 15.3 percent STs population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Khagam-Miao	785	990
2	Bordumsa-Diyun	1,012	957
3	Nampong-Manmao	765	985
4	Changlang	0	972
	District (Rural) Total	**890**	**977**

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of U.A. Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Changlang	1,000	906
2	Jairampur	1,400	920
	Sex ratio (Urban) for the district:	**1,067**	**910**

C.D. Block Level Sex ratio among Scheduled Castes and Scheduled Tribes have been depicted in table 19 and 20. From the tables it can be seen that Sex ratio among Scheduled Tribes is much higher than among Scheduled Castes population in all the C.D. Blocks except Bordumsa-Diyum C.D. Block where Sex ratio has been reported higher among Scheduled Castes population than Scheduled Tribes population. In the Rural areas of the district Sex ratio among Scheduled Castes population works out to 890, whereas Sex ratio among Scheduled Tribes works out to 977.

There is no Urban - Agglomerations in the district. As such information to be incorporated in the table may be treated as NIL. However, Sex ratio among Scheduled Castes and Scheduled Tribes of the two towns of the districts has been recorded. The table 20 shows higher Sex ratio among Scheduled Castes than Scheduled Tribes population of the Towns.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY CIRCLES, 2001

The moderate percentage of Literacy, 51.3% has been recorded in the district. The highest percenrtage, 76.9% of Literacy is found in Jairampur circle among the 11 Circles of the district. The Urban Literacy of that Circle is as high as 83.7% which appears to be highest among two Towns of the district. The other

Town of the district is Changlang where percenrtage of Literacy is recorded as 82.7%. Among the Circles the lowest Literacy rate 35.8% is recorded in Khimiyong circle, the Geo-locational disadvantage is the cause of lower Literacy rate. The districts total Literacy rate works out to 51.3 percent. It is 62.1 percent for Males and 39.2 percent for Females. The gap in Male/Female Literacy rate is highest (26.6 percent) in rural sector of Diyun Circle.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

C.D. Block level literacy rate by sex has been worked out in this table. Among the males the highest (68.5 percent) literacy rate has been registered against Nampong-Manmao C.D. Block and among females also highest (47.1 percent) literacy rate is recorded against the same C.D. Block. The highest gap (24.9 percent) among male/female literacy rate is found in Changlang C.D. Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.3	3	0.0
1-10	5	1.5	1,714	1.5
11-20	13	3.9	4,841	4.3
21-30	39	11.6	19,001	16.8
31-40	54	16.1	24,026	21.3
41-50	73	21.7	18,731	16.6
51-60	53	15.8	16,883	14.9
61-70	58	17.3	13,136	11.6
71-80	18	5.4	5,159	4.6
81-90	11	3.3	7,621	6.7
91-99	6	1.8	1,880	1.7
100	5	1.5	39	0.0
District Total:	**336**	**100.0**	**113,034**	**100.0**
Literacy rate for District:		**51.3**		

The table presents data on distribution of villages by literacy rate range.

From the distribution of villages by Literacy rate range it is seen that 73 (21.7%) villages come under Literacy rate range of 41 - 50 with percentage distribution of population 16.6 percent. The cent percent Literacy rate is found against 5 villages with percentage distribution of population 1.5 percent. The next highest Literacy rate range 91 - 99 recorded against 6 villages. It is remarkable to pointout that only 1 village having very small population of 3 only comes under '0' Literacy range. This indicates that this district is in the forefront in case of Literacy drive.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name and urban status of UA Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Changlang (CT)	4,554	2,778	1,776	1,915	856	1,059	82.7	88.8	74.6	14.2
2	Jairampur (CT)	4,187	2,566	1,621	1,732	787	945	83.7	89.2	76.3	12.9
District (Urban) Total		**8,741**	**5,344**	**3,397**	**3,647**	**1,643**	**2,004**	**83.2**	**89.0**	**75.4**	**13.6**

There is no Urban Agglomerations in the district. As such information to be incorporated in the table may be treated as NIL. However, the percentage of Literate works out to 82.7 percent and 83.7 percent respectively in Changlang and Jairampur towns of the district. The Male/Female Literacy rate of these two Towns is found to be closed to each other. The gap in Male/Female Literacy rate is 14.2 percent and 12.9 percent in these two Towns of this district.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Changlang	1	1	0	0	0	0	100.0	100.0	0.0	100.0
2	Nampong-Manmao	17	13	4	13	4	9	70.8	92.9	40.0	52.9
3	Khagam-Miao	76	48	28	40	17	23	75.2	84.2	63.6	20.6
4	Bordumsa-Diyun	26	22	4	137	59	78	24.1	37.3	8.2	29.1
District (Rural) Total :		**120**	**84**	**36**	**190**	**80**	**110**	**51.3**	**64.1**	**35.0**	**29.2**

The table provides number and percentage of Schedules Castes Literates and Illiterates by Sex in C.D. blocks of the district. In the Rural areas of the district 51.3 percent of Scheduled Castes population are found Literates and among them 64.1 percent are Males and 35.0 percent are Females. Among the C.D. block Changlang has registered 100.0 percent Literates among males and Females Literacy is Nil

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	4	20.0	15	4.8
1-10	0	0.0	0	0.0
11-20	1	5.0	10	3.2
21-30	2	10.0	134	43.2
31-40	0	0.0	0	0.0
41-50	2	10.0	16	5.2
51-60	1	5.0	7	2.3
61-70	3	15.0	55	17.7
71-80	2	10.0	26	8.4
81-90	0	0.0	0	0.0
91-99	1	5.0	25	8.1
100	4	20.0	22	7.1
District Total:	**20**	**100.0**	**310**	**100.0**
Literacy rate for District (Rural) :		**51.3**		

From the distribution of villages by literacy rate range for Scheduled Castes population it is seen that out of 20 villages where scheduled castes population are available in the district 4 villages have cent percent literacy rate and other 4 villages fall under '0' literacy rate range.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Changlang (CT)	26	17	9	24	8	16	63.4	77.3	47.4	29.9
2	Jairampur (CT)	7	2	5	5	3	2	70.0	50.0	83.3	-33.3
	Changlang (Urban)	**33**	**19**	**14**	**29**	**11**	**18**	**64.7**	**73.1**	**56**	**17.1**

From the table it is observed that the percentage of literate among Scheduled Castes population in the urban area of the district is 64.7 percent with male-female distribution of 73.1 and 56.0 percent respectively. The gap in male/female literacy rate is 17.1 percent.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Changlang	4,109	2,660	1,449	7,925	3,442	4,483	43.0	54.9	30.8	24.1
2	Nampong-Manmao	3,178	1,895	1,283	4,172	1,808	2,364	54.4	64.4	44.2	20.3
3	Khagam-Miao	7,322	4,328	2,994	7,238	2,989	4,249	62.3	73.2	51.2	22.0
4	Bordumsa-Diyun	4,692	2,737	1,955	3,449	1,424	2,025	70.8	81.2	60.0	21.1
District (Rural) Total:		**19,301**	**11,620**	**7,681**	**22,784**	**9,663**	**13,121**	**57.1**	**68.1**	**46.0**	**22.1**

A C.D. Block wise analysis of this table depicts that Bordumsa-Diyung C.D. block has the highest (70.8 percent) percentage of literates among Scheduled Tribes population. The literacy rate among males and females are also found to be highest in this block. In the rural areas of the district percentage of literates among Scheduled Tribes population is 57.1 percent with male-female distribution of 68.1 and 46.0 percent respectively and gap in male /female literacy rate is 22.1 percent.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	4	1.5	14	0.0
1-10	0	0.0	0	0.0
11-20	8	2.9	1,222	2.9
21-30	20	7.4	2,295	5.5
31-40	33	12.1	4,585	10.9
41-50	48	17.6	6,584	15.6
51-60	44	16.2	9,008	21.4
61-70	52	19.1	8,380	19.9
71-80	36	13.2	6,855	16.3
81-90	12	4.4	2,257	5.4
91-99	7	2.6	850	2.0
100	8	2.9	35	0.1
District Total:	**272**	**100.0**	**42,085**	**100.0**
Literacy rate for District (Rural) :		**57.1**		

From the distribution of villages by Literacy rate range it is observed that among 272 villages where Scheduled Tribes population are available 8 villages have cent percent Literacy and only 4 villages have reported '0' Literacy rate. The highest number of villages (52 villages) fall under Literacy rate range of 61-70. This indicates that in the Rural areas of the districts also Literacy rate among Scheduled Tribes population is quite high.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Changlang (CT)	1,658	954	704	700	283	417	83.9	91.6	75.3	16.3
2	Jairampur (CT)	692	390	302	216	83	133	87.7	95.1	79.7	15.4
Changlang (Urban)		**2,350**	**1,344**	**1,006**	**916**	**366**	**550**	**85**	**92.6**	**76.6**	**16.1**

From the table it is observed that the percentage of Literate among Scheduled Tribes population in the Urban areas of the district is 85.0 percent with Male/ Female distribution of 92.6 percent and 76.6 percent respectively. The gap in Male/Female Literacy rate is 16.1 percent.

This table provides Sex-wise distribution of main workers marginal workers and non-workers for each Circle of the district.

The Table gives the vital information like number and percentage of main workers, Marginal workers and Non workers by Sex in Circles. In the district the percentage of Main workers is 39.2 percent, where Male work particiation rate is 47.3 percent and Female participation is 30.2 percent. Among the Circles of the district Khimiyong Circle has recorded highest percentage of Main workers with 50.7 percent and obviously Non worker 43.3 percent recorded against this Circle is the lowest one. The lowest percentage (31.4 percent) of Main workers found in Vijoynagar Circle. The average Marginal workers of the district is 8.7 percent with Male/Female distribution of 5.5 and 12.1 percent respectively. Female Marginal workers found more in comparison to Male Marginal workers in all the Circles without any exception.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

The table 32 gives C.D. block level data on Main workers, Marginal workers and Non-workers by Sex, Among C.D. block of the district Bordumsa -Diyum C.D. block claims highest work participation rate as Main workers and second rank in Marginal workers and obviously as Total workers (Main + Marginal) and correspondingly last in rank as Non-workers. Ofcourse no significant difference has been noticed in between the C.D. blocks so far as work participation rate is concerned in both the Sexes. The Female Marginal workers are much more than its Male counterpart.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name and urban status of UA Town	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

		Males	3,634	1,821	50.1	69	1.9	1,890	52.0	1,744	48.0
		Females	2,835	372	13.1	61	2.2	433	15.3	2,402	84.7
2	Jairampur (CT)	Persons	5,919	2,016	34.1	154	2.6	2,170	36.7	3,749	63.3
		Males	3,353	1,724	51.4	101	3.0	1,825	54.4	1,528	45.6
		Females	2,566	292	11.4	53	2.1	345	13.4	2,221	86.6
	District Total: (Urban)	**Persons**	**12,388**	**4,209**	**34.0**	**284**	**2.3**	**4,493**	**36.3**	**7,895**	**63.7**
		Males	**6,987**	**3,545**	**50.7**	**170**	**2.4**	**3,715**	**53.2**	**3,272**	**46.8**
		Females	**5,401**	**664**	**12.3**	**114**	**2.1**	**778**	**14.4**	**4,623**	**85.6**

There is no Urban - Agglomerations in the district. As such information to be incorported in the table may be treated as NIL. However, information about number and percentage of Main workers, Marginal workers and Non-workers of the two Census towns of the district are given here. Though there is no significant difference is noticed in between the two Towns in the area of work-participation rate yet there is a little edge of Jairampur town over Changlang town.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN CIRCLES, 2001

Serial number	Name of Circle	Persons / Males / Females	Total Population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers

				(42.4)	**(80.7)**	**(5.9)**	**(1.4)**	**(11.9)**

Note: Percent of Worker to total worker are given in brackets

The table shows distribution of workers by Sex in four categories of Economic activity in Circles. In the district the percentage of workers worked out as 47.9 percent with Male-Female distribution of 52.9 and 42.4 percent respectively. In terms of percentage Khimiyong Circle recorded highest percentage of workers (Main+Marginal) with 56.7 percent among the 11 Circles of the district. In order of percentage of worker the position of Jairampur Circle (39.9 percent) is the last among the Circles of the district. Male and Female are almost in equal footing in the matter of work participation. In some Circles particulary in Khimiyong and Vijoynagar Circles percentage of Female workers is even more than its Male counterpart.

It is evident from the table that the Economic activity of the district is primarily dependent on Agriculture which is supported by the fact that the Cultivator and Agricultural Labourers together constitute 75.1 percent of Total Workers.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

				(52.8)	**(68.7)**	**(5.6)**	**(1.1)**	**(24.6)**
		Females	**54200**	**24478**	**20346**	**1488**	**301**	**2343**
				(45.2)	**(83.1)**	**(6.1)**	**(1.2)**	**(9.6)**

The distribution of Total workers by Sex according to four fold Industrial categories in C.D. blocks is highlighted in this table. In terms of percentage Bordumsa-Diyum C.D. block claims highest percentage of Cultivators with 77.9 percent which is of course closely followed by other C.D. blocks. The percentage of Agricultural Labourers and Household Industry Workers is found to be very insignificant in all the C.D. blocks of the district.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers

			(13.4)	(8.1)	(1.4)	(0.6)	(89.9)	
	District (Urban) Total:	**Persons**	**12,388**	**4,493**	**103**	**61**	**79**	**4,250**
				(36.3)	**(2.3)**	**(1.4)**	**(1.8)**	**(94.6)**
		Males	**6,987**	**3,715**	**55**	**48**	**34**	**3,578**
				(53.2)	**(1.5)**	**(1.3)**	**(0.9)**	**(96.3)**
		Females	**5,401**	**778**	**48**	**13**	**45**	**672**
				(14.4)	**(6.2)**	**(1.7)**	**(5.8)**	**(86.4)**

This table presents data of Workers by Sex in four categories of Economic activity of Towns. In the Towns most of the working force belong to the category of Other workers. It is evident from the fact that in average 94.6 percent of Workers categorised as Other workers whereas 1.8 percent Household Industry Workers, 1.4 percent Agricultural labourers and 2.3 percent Cultivators.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available			
			Education	Medical	Improved drinking water	Post Office
1	2	3	4	5	6	7
1	Changlang	99	59	17	97	2
		(100)	(59.6)	(17.2)	(98.0)	(2.0)
2	Nampong-Manmao	80	57	12	71	5
		(100)	(71.3)	(15.0)	(88.8)	(6.3)
3	Khagam-Miao	84	65	17	63	12
		(100)	(77.4)	(20.2)	(75.0)	(14.3)
4	Bordumsa-Diyun	73	39	18	73	7
		(100)	(53.4)	(24.7)	(100.0)	(9.6)
	District Total:	**336**	**220**	**64**	**304**	**26**
		(100)	**(65.5)**	**(19.0)**	**(90.5)**	**(7.7)**

Note : Percentages are given in brackets.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Type of amenity available					
		Telephone	Transport communications	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	8	9	10	11	12	13
1	Changlang	6	16	2	0	62	92
		(6.1)	(16.2)	(2.0)	(0.0)	(62.6)	(92.9)
2	Nampong-Manmao	9	20	0	0	41	71
		(11.3)	(25.0)	(0.0)	(0.0)	(51.3)	(88.8)
3	Khagam-Miao	14	15	2	0	37	55
		(16.7)	(17.9)	(2.4)	(0.0)	(44.0)	(65.5)
4	Bordumsa-Diyun	6	14	1	0	55	65
		(8.2)	(19.2)	(1.4)	(0.0)	(75.3)	(89.0)
	District Total:	**35**	**65**	**5**	**0**	**195**	**283**
		(10.4)	**(19.3)**	**(1.5)**	**(0.0)**	**(58.0)**	**(84.2)**

The table reveals a brief analysis of various amenities which are available in each C.D. block of the district. It is seen from the table that 65.5 percent of inhabited villages have the educational facility, 19.0 percent of inhabited villages have medical facility and 90.5 percent villages have the improved drinking water facility. Out of 336 villages only 26 villages have the post office facility and only 35 villages have the telephone facility. Transport Communication facility is available in 65 villages and power supply is available in as many as 283 villages which is about 84.2 percent of total inhabited villages.

A C. D. blockwise analysis of this table shows that the educational facility is highest in Khagam-Miao C. D. block where 77.4 percent of the villages have educational institution. The position of medical facility is in general low in every C. D. block. The services of improved drinking water is best in Bordumsa-Diyun C. D. block where it is available in 100.0 percent of villages. The availability of power supply is fairly good in all the C. D. blocks. It is highest 92.9 percent in Changlang C. D. block.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available			
			Education	Medical	Improved drinking water	Post Offoce
1	2	3	4	5	6	7
1	Changlang	14,840	11,013	3,783	14,721	312
		(100)	(74.2)	(25.5)	(99.2)	(2.1)
2	Nampong-Manmao	10,155	9,035	3,429	9,393	2,346
		(100)	(89.0)	(33.8)	(92.5)	(23.1)

		(100)	**(77.3)**	**(30.6)**	**(94.3)**	**(14.2)**

Note : Percentages are given in brackets.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Type of amenity available					
		Telephone	Transport communications	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	8	9	10	11	12	13
1	Changlang	1,032	1,450	373	0	9,537	13,958
		(7.0)	(9.8)	(2.5)	(0.0)	(64.3)	(94.1)
2	Nampong-Manmao	2,443	3,602	0	0	5,434	9,438
		(24.1)	(35.5)	(0.0)	(0.0)	(53.5)	(92.9)
3	Khagam-Miao	7,740	10,885	5,124	0	16,570	24,342
		(22.9)	(32.2)	(15.2)	(0.0)	(49.1)	(72.1)
4	Bordumsa-Diyun	4,124	11,729	1,038	0	34,941	42,934
		(7.6)	(21.6)	(1.9)	(0.0)	(64.4)	(79.1)
	District Total:	**15,339**	**27,666**	**6,535**	**0**	**66,482**	**90,672**
		(13.6)	**(24.5)**	**(5.8)**	**(0.0)**	**(58.8)**	**(80.2)**

A C.D. blockwise distribution of rural population served by different amenities can be seen from the table. This table depicts that 77.3 percent of rural population is served by educational institutions while 94.3 percent of rural population have drinking water facility. Only 30.6 percent of population have medical facility and as low as 14.2 percent of rural population is served with post office facility. Telephone facility is available to 13.6 percent of the rural population, 24.5 percent of the rural population is served with transport and communication facility, Bank facility is available to only 5.8 percent. 58.8 percent and 80.2 percent of the rural population are provided with the facility of approach by pucca road and power supply respectively.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	104	37	16	157
(b) Middle School	115	83	91	289
(c) Degree College	4	16	315	335
2. Medical :-				
(a) Hospital	30	55	251	336
(b) PHC	58	89	182	329
3. Post Office	97	83	130	310
4. Telephone	57	52	192	301
5. Bus Service	83	61	128	272
6. Banks				
(a) Commercial Bank	24	46	262	332
(b) Cooperative Bank	24	45	263	332
7. Agricultural Credit Societies	3	0	333	336

The table shows the distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available. The table reveals the fact that the villages where education facilities are not available, but they are mostly available within less than 5 kilometres. But the picture is different in case of other amenities like medical, post office, telephone, bus service, banks, agricultural credit societies etc. In these cases these amenities are mostly available beyond the range of 10 + kilometres.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communi-cations	Banks	Agricultural Credit Societies	Approach by pucca road

There is no Statutory Town in Arunachal Pradesh. All the 17 Towns of the State are in the status of Census Town. The nearest Statutory Towns are located in the neighbouring State Assam. As such, the distance range from the nearest Statutory Town is mostly 51+ Kms. from the inhabited villages where different amenities are available.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water	Post Office	Telephone	Transport communi-cations	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table shows the distribution of villages according to population range and amenities available. This district is thinly populated area where density of population is 27 only and it is evident from the fact that out of 336 villages of the district 281 villages fall under population range of 1-499. The Table further reveals the fact that bigger villages are having higher proportion of different amenities in comparison to smaller villages in terms of population.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Changlang	99	0	0	0
2	Nampong-Manmao	80	0	0	0
3	Khagam-Miao	84	0	0	0
4	Bordumsa-Diyun	73	0	0	0
	District Total:	**336**	**0**	**0**	**0**

The area figure below district level is not available. As such, the information to be incorporated against column 4, 5 and 6 may be treated as N.A.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

There is no statutory towns in the district. So information to be incorporated in the town may be treated as NIL.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

There is no statutory towns in the district. So information to be incorporated in the town may be treated as NIL.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 1,0000 population
1	2	3
1	Changlang (CT)	9
2	Jairampur (CT)	0
	Distrct Total :	**5**

The table reveals that the Urban areas of district the average number of beds in medical institutions per 1,0000 population is 5 only whereas number beds in Changlang town is 9. Through the standard of medical institution interms of infrastructure is not up to the mark yet the availability of beds per 1,0000 population is not depolorably low.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

There is no slum population in towns of this district. So, the information to be incorporated may be treated as NIL.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Changlang (CT)	Wood, Cane & Bamboo	—
		Handloom Products	—
		Local Artisan Prods.	—
2	Jairampur (CT)	Plywood	Plywood
			Green Tea

The above statement shows that Changlang town manufacture some items which are meant for local consumption but Jairampur town export very important items like Plywood and Green Tea.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

	Dist. Total Changlang	**23,661**	**21,015**	**2,646**	**281**	**227**	**54**	**7,906**	**7,259**	**647**

Living status/condition of households has been reflected in the table.

In Rural areas of Arunachal Pradesh the concept of one composite room or multipurpose one room is dominent and figure is quite high against, “No exclusive room”. One remarkable feature of the district is that nobody reside under the tree or open space and it is difficult also in the high altitude area surrounded by forest. Majority of the Households live in their owned house. Rented house in the village area is very few. The entire SC population of Arunachal Pradesh is inmigrants for job purpose and mostly represents employee class. They either stay in the camp or Govt. Quarter. So, their comparison with ST population of Arunachal Pradesh does not carry much significance. Same is the case with other population (Non ST) who are temporary settlers and usually stay in the Govt. quarters. Therefore, for socio-economic analysis purpose it is insignificant.

TABLE 49 : NUMBER AND PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H series: "Tables on Houses, Household amenities and Assets."

Note:

Permanent : 1 — Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent : 2 — Semi permanent houses refer to those houses made of other types of materials.

Temporary : 3 — Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Percentage distribution of Households living in Permanent, Semi - Permanent and Temporary Houses in the above table shows that in the Rural areas 79.4 percent households live in the temporary houses mainly made of bamboo and leaves reeds. Only 10.5 percent household live in the permanent houses and these houses are mostly Govt. Qtrs. located in different circle Hqs. Permanent houses are infact not available other than circle Hqs. The table further shows that in urban area 50.3 percent of the household live in the permanent houses and these permanent houses are mostly Govt. Qtrs. However, during the last decade the scenario has been changed little. Some private permanent houses have come up particularly in the urban areas. The housing condition of interior villages almost remained same.

TABLE 50 : NUMBER AND PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

The Table presents data on the percentage of households having improved drinking water source, Electricity, Bathroom, Toilet and Drainage facility. The highest percentage (96.4%) of households having improved drinking water facility recorded against Khimiyong Circle, closely followed by Changlang Circle with 91.7 percent, Manmao Circle with 88.9 percent and Bordumsa Circle with 84.7 percent. The two urban centres of the district registered higher percentage of households having this facility with 96.7 and 84.4 percent respectively in comparison to their rural counterpart. Changlang Circle stands first in the matter of households (70.6%) having electricity facility but there is a big gap in between rural (50.9%) and urban (90.7%). Percentage of households having this facility. The last rank goes to Vijoynagar Circle where only 0.9 percent of households are having electricity facility. So far as Bathroom, Toilet and Drainage facilities are concerned it is deplorably low in most of the circles.

Percentage in brackets

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The Table presents data on number and percent of Households by the type of Fuel used for Cooking. It will be seen from the table that majority of the Households (90 to 99 % households) particularly in the Rural areas used fire Wood for cooking. The Fire Wood is the easily and cheaply available item of Atrunachal Pradesh. So, the practice of using the other types of Fuel is not at all popular or demanding either. If we look in to district figure it will be seen that 82.3 percent Households used Fire Wood and rest 18 percent Households used Other items like Gas and Kerosene mainly. The use of Cooking Gas (LPG) in this district is the history of recent past.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

In the table 52 the availability of Banking Services particularly in the remote areas of the district is the remarkable achivement of the last decade. It will be seen from the table that all the Circles are provided with Banking facility. The extension of Telephone Services in the difficult areas of the distance is the other landmark achivement. It is seen in the table that baring 3 Circles, Khimiyong, Namtok and Manmao all the Circles have the facility of Telephone. The availability of Other Household Assets like Bicycle, Scooter, Motor Cycle, Car, Jeep, Van etc. is not very significant.

Major Social and Cultural events

Changlang district has three major tribes, the Tangsas, the Tutsas and the Singphos. They have different traditional ways of cultural celebrations. But in general the celebrations in all these societies signifies a prayer for a bumper crop, healthy & peaceful life and a final food offering to the dead.

Although traditional customs and cultural functions were performed & celebrated by these tribes from time immemorial, they were celebrated in the villages individually and hence was uncompetitive and the cultural values were declining. Outsiders were taking advantage and introducing foreign religion. To counteract this, a section of the educated youths decided to organize a common festival which can be celebrated by all tribes together.

Now a days the Tangsas are celebrating the 'Kuh' festival, Tutsas the 'Pongtu' festivals and Singphos the 'Sipown-Yown-Poi ' every year. To retain their traditional and cultural heritage, every tribe of the district have their own registered cultural society like, Tangsa Cultural & Literary Society, Tutsa Cultural Society, the Buddhist Cultural Society, Miao. These societies organize dist. level, inter dist. level and state level indigenous & modernized cultural competitions annually.

To bring unity and integrity as well as for the upliftment of the local traditional customs and culture, the administration provides financial assistance by way of grants-in-aid every year. Construction of SPT Cultural halls, celebrations of festivals centrally, procurement of musical instruments/ornaments/ garments, exchange of inter state cultural programm.

Scope of Village Directory and Town Directory

The Village Directory and the Town Directory present data on amenities available to the people in each village and town. The village Directory also indicates the land use statistics in respect of each village.

The data included in the village and Town Directory are one of the most important compilation of Census, as the data presented are considered most useful by the scholars, the planners, the Administrators and other data users.

The Village Directory gives for each village particulars about Total Population and number of Households, Amenities available such as Educational and Medical Institutions, Drinking Water supply, Post, Telegraph and Telephone, Communication, Banks, Agricultural Credit Societies non Agricultural Credit Societies, Cooperative Societies, Recreational and Cultural facilities, Approach to Village, nearest Town and Distance, Power Supply, News Paper/Magazine, Income Expenditure, Important commodities, Land and Land use pattern etc. Village Directory data were collected on the basis of the position as existed to link villages with CD (Community Development) Block during 2001 Census.

The format of village Directory is basically on the pattern canvassed in 1991 Census except modification and addition of a few more columns. In column 9 the facilities on Telephone is newly added to know the present day need of such facilities in villages. Village Directory information for the amenities on Education, Medical, Drinking water, Post Telegraph, Telephone and communication has been furnished in such a manner that in case an amenity is not available within the village a dash (-) is shown in the column and next to it in brackets the distance in broad ranges Viz., >5 kms, 5 – 10 kms and 10 + Km. of the nearest, place where the facility is available is given in order to gauge how far the amenity naturally serve the purpose in the village under reference.

While ascertaining a number of schools in a village under column 6 of the village Directory format the following methods have been adopted.

If there are composite schools like middle schools with primary classes or secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with Primary classes, the number of Primary Schools in the village is given as three and that of Middle Schools as one even though there may be only three educational institutions. So also in case of Secondary Schools. Like wise in case of Medical amenities in column 7 of Village Directory format, if in a Hospital there is Maternity Home and Child Welfare center Family Welfare center and T.B. clinic center etc. all these have been counted separately.

Town Directory Statement

The Town Directory consist of seven statements (Statement I – VII). All these are almost similar to those adopted in 1991. In the Town Directory the data on amenities and other aspects are presented in codes for want of space. The infrastructure of amenities and facilities available in urban area is analyzed by taking the class of town into consideration. The data on municipal finance by civic status in the Statement III in respect of town in Arunachal Pradesh are not available. There is no statutory or non statutory bodies managing the civic administration of the town in Arunachal Pradesh. The roads, buildings and other civic amenities are maintained by the Public Works Department (State) and the Central Public Works Department. There is no slum area in Lohit district. The column for Adult literacy classes/centers in statement –V is introduced in relation to a particular level of education in view of the minimum needs Programme of the Planning Commission.

If there are more than one Medical or Educational institutions of any type the number of such institutions have been indicated within brackets against the respective codes.

PART A
VILLAGE AND TOWN DIRECTORY

Blank

SECTION I

Village Directory

(a) Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

.The Village Directory format has 25 columns and the details given under each column are for the village are as follows:

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes:

(i)	AllopathicHospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for

different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VIIA List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VIIB List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates C D Block wise number of villages under each

Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

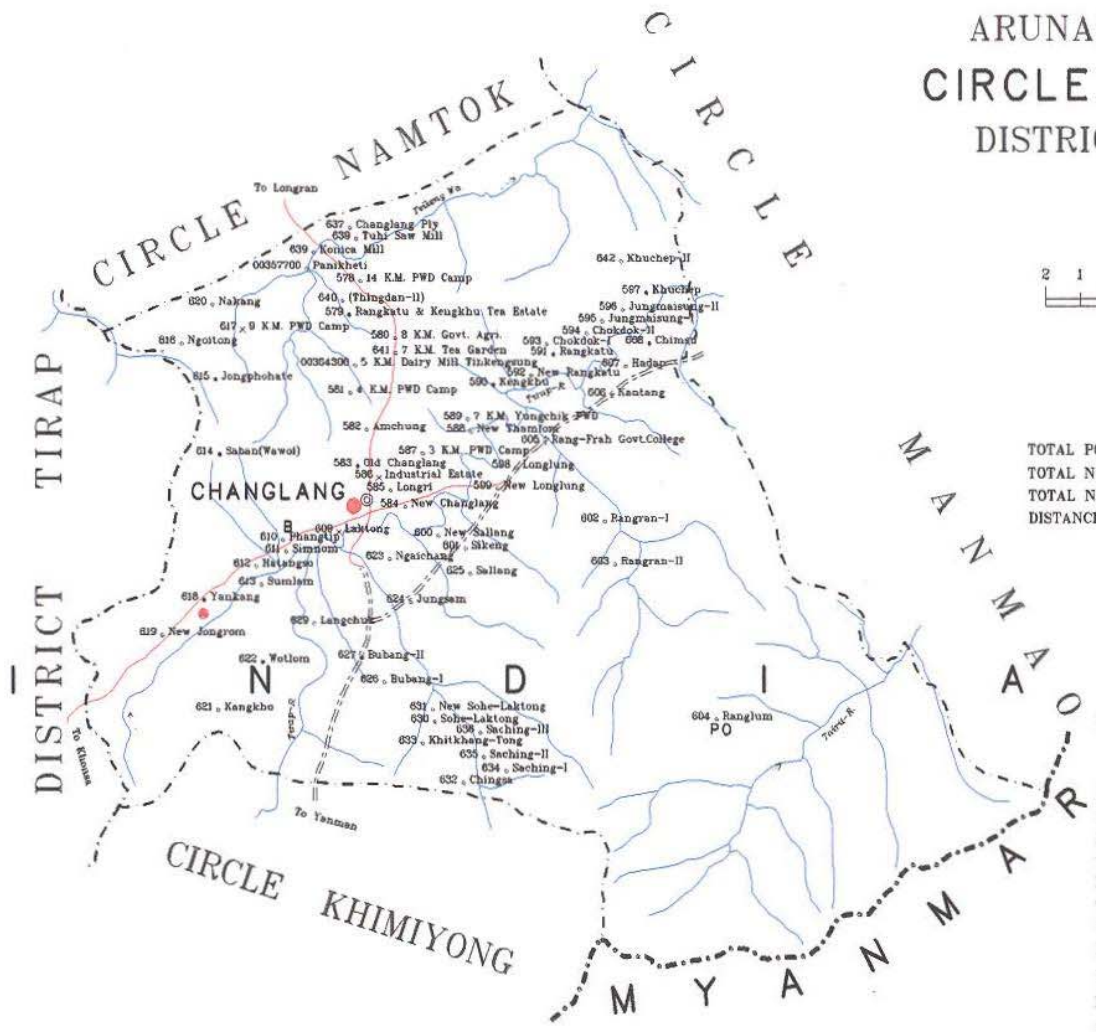

(b) List of villages merged in towns and out-growths at 2001 Census

Not a single village has been merged in towns and outgrowth at 2001 Census in the district.

APPENDIX VIII - VILLAGE DIRECTORY
NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

There is no Gram Panchayat in the district.

APPENDIX IX - VILLAGE DIRECTORY
STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

There is no separate girls school in the district.

The table is optional subject to availability of information

SECTION II

Town Directory

The town directory is presented for each town covering different aspects of urban life. As like 1991 census seven statements have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

As in the case of Village Directory, the Town Directory is also a compiled presentation of various amenities and other basic information in respect of the urban areas (Towns) as per various formats adopted for this purpose. The Town Directory includes the following statements.

Statement I	Status and Growth History.
Statement II	Physical Aspects and Location of Towns.
Statement III	Municipal Finance.
Statement IV	Civic and Other Amenities.
Statement V	Medical, Educational,
Statement VI	Trade, Commerce, Industry and banking.
Statement VII	Civic and other amenities in Slums.

Appendix to Town Directory – Towns showing their outgrowth with population could not be compiled as there is no Slum areas/population available anywhere in Arunachal Pradesh and there is no outgrowth areas of any town in the State.

The criteria for any area considered as urban in 2001 Census was initially formulated in 1991 Census which continued to be the same in the Census of 1981, 1991 and 2001 as briefly indicated below :

a) All areas within Municipality Municipal Corporation, Cantonment Board or Notified Town Area/Urban Local Body.

b) Any other place which satisfied all of the following criteria :

   i) A minimum population of 5000.

   ii) At least 75% of the male working population should be engaged in non-agricultural pursuits and

   iii) A minimum density of population of 400 persons per square kilometer or 1000 per square kilometer.

In Arunachal during Census of India 2001, 17 Towns were existing and all 17 of them were Notified Towns. In the year 1991 the total number of Notified Towns were 10 as notified by the State Government from time to time.

As in the case of Urban Areas/ Units (Towns/ Cities), the concept of Urban Agglomeration (UA) remained unchanged from 1971 Census. In Census an Urban Agglomeration (UA) denotes a continuous urban spread and normally consists of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with contiguous well recongnised outgrowths if any, of such towns. No Urban Agglomeration watch detected in the district during 2001 Census and hence corresponding information in this regard be taken as nil. A brief note on various abbreviation used in the Town Directory is also given.

A gist of data contain in the Statement I to VI as mentioned below may be of benefit of data users:

Statement-I

It contains details of Class, Name and Civic Status of Town (col. 2), Location Code Number (col. 3), Name of the Police Station (col. 4), Name of the

C. D. Block (col. 5), Area in sq. km. of each Town (col. 6), Number of Households in 2001 Census (col. 7), Population and Growth Rate (in brackets) of the Town at the Census of 1901, 1911, 1921, 1931, 1941, 1951, 1961, 1971, 1981, 1991 and 2001 (col. 8 to col. 22).

Statement-II

This statement gives Physical Aspects and Location of Towns and contains information on Class and Name of Town (col. 2), Rainfall in mm. (col. 3), Temperature in o Celsius (col. 4 and col. 5), Road distance in kilometer from State Hqtrs. (col. 6) and District Hqtrs. (col. 7), Distance between the Town and nearest city with 1 Lakh or more Population (col. 9), 5 Lakh or more Population (col. 10), Railway Station (col. 11) and Bus Facility (col. 12), Column 13 has been left blank as no data is available since no such system is in existence.

Statement-III

It is proposed to contain data in respect of Municipal Finance. As not a single municipality or similar body has been functioning in Arunachal Nil report has been shown in this Statement (col. 4-17).

Statement-IV

This statement incorporated information in respect of Class and Name of the Town, Civic Administration Status (col. 2), 2001 Census Population (col. 3), Scheduled Caste (col. 4), Scheduled Tribe (col. 5), Road Length (col. 6), System of Sewerage (col. 7), Number of Latrines (col. 8-11), Method of Disposal of Night Soil (col. 12), Source of Water Supply (col. 13), System of Storage with Capacity (col. 14) Fire Fighting Service (col. 15), Electrification (col. 16-20).

Statement-V

It contains details of Class and name of the Town (col. 2), Population in 2001 Census (col. 3), Medical Facilities (col. 4 and col. 5), Educational Facilities (col. 6-15), Number of Recreational and Cultural Facilities (col. 16-20).

Statement-VI

In this statement information on Trade Commerce, Industry and Banking have been incorporated. Thus information on Class and Name of the Towns (col. 2), Names of the most important commodities manufactured (col. 6, 7, 8), Number of Banks (col. 9), Number of Credit and other Societies (col. 10 and col. 11) are given.

Statement-VII

It has been provided for incorporation of data on Civic and other amenities in Slums in respect of Class and Name of the Town where the Slum exists (col. 2), Name of Slum (col. 3), whether Notified (col. 4), Number of Households (col. 5), Population (col. 6), Paved Roads (col. 7), System of Sewerage (col. 8), Number of Latrines (col. 9, 10, 11), Community (col. 12), Method of Disposal of Night Soil (col. 13), Drinking Water Supply (col. 14) and Supply of Electricity (col. 15, 16, 17).

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation Corp.	Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl

(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town; the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, each of them may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SHType
(v)	Others	O

The vocational institutions like-Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I
STATUS AND GROWTH HISTORY

APPENDIX TO TOWN DIRECTORY
TOWN SHOWING THEIR OUTGROWTH WITH POPULATION.

There is no outgrowth in the towns.

Blank

PART B
PRIMARY CENSUS ABSTRACT

Blank

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality

and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - I
C. D. BLOCK/CIRCLE WISE VILLAGE

Sl. No.	Name of C.D. Block	Name of Circle	Number of villages
1	2	3	4
1	Changlang C.D. Block	(1) Khimiyong Circle	20
		(2) Changlang Circle	67
		(3) Namtok Circle	14
		Total	**101**
2	Nampong - Manmao C.D. Block	(1) Manmao Circle	34
		(2) Nampong Circle	37
		(3) Jairampur Circle	13
		Total	**84**
3	Khagam - Miao C.D. Block	(1) Vijoynagar Circle	13
		(2) Miao Circle	43
		(3) Kharsang Circle	28
		Total	**84**
4	Bordumsa – Diyun C.D. Block	(1) Diyun Circle	31
		(2) Bordumsa Circle	42
		Total	**73**
		Grand Total	**342**

In view of non-functioning of Panchayatiraj System in the State, number of Gram Panchayats could not be furnished. Hence in place of that the number of C.D. Blocks, Circles and villages have been shown in this Annexure.

There were two C.D. Blocks functioned in the district as per 1991 Census. These were Changlang and Khagam (Miao) C.D. Blocks. Two new C.D. Blocks have been formed and the number increased to four. The new C.D. Blocks are Nampong-Manmao and Bordumsa-Diyun. Subsequently, the number of villages in the district also increased to 342 in 2001 from 285 in 1991 Census, thereby showing an increase of 57 villages or 20 percent in terms of percentage. The total number of circles in Changlang District in 1991 were 8 in number which have increased to 11 in 2001 Census.

ANNEXURE – II

NOTE ON FERTILITY, MORTALITY AND MIGRATION, 1991 & 2001 CENSUSES

Fertility levels

Fertility is the most important aspect in the field of population studies. In 1991 Census, two main questions were asked, one to all the ever-married women and second to all currently married women only. Questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year was also asked. The first three questions were asked to all ever married women and the last question related to currently married women. The measure of fertility worked out are based on the F-series tables of 1991 Census of Arunachal Pradesh. The following definitions are used in this series :

Age specific Fertility rate (ASFR) :

The average number of children born alive during the last year per woman of a particular age group.

Age specific Marital Fertility rate (ASMFR) :

The average number of children born alive during the last year per married woman of a particular age group.

General Fertility Rate (GFR) :

The number of children born alive during the last year per 1,000 women in the age-group 15-49.

General Marital Fertility Rates (GMFR) :

The number of children born alive during the last year per 1,000 married women in the age-group 15-49.

Total Fertility Rate (TFR) :

Total number of children that would have born alive per woman, had the current schedule of age specific fertility rates been applicable for the entire reproductive period.

Total Marital Fertility Rate (TMFR) :

Total number of children that would have born alive per married woman, had the current schedule of age specific marital fertility rates been applicable for the entire reproductive period.

Child Woman Ratio :

Number of children in age-group 0-4 per 100 women in the age-group 15-49.

	F	103	96	111	137	78	75	95	108
1981	P	126	152	181	220	112	131	150	173
	M	141	164	192	227	126	144	157	179
	F	111	139	169	213	97	118	141	165

Movement of People :

Migration :

Migration is the third component of population change, the other two are mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and international migration : The migrational movements are of three types :

(i) Migration within the state itself with its components –

(a) Migration within the district of enumeration (intradistrict migration)

(b) Migration from one district of the state to another district of the state (interdistrict migration)

(ii) Migration from one state to another state of the country (Inter-state migration)

and

(iii) Migration from one country to another country.

The first two types of migration are internal migration while the last one is called international migration.

Why the people migrate :

The reasons for migration were categorised as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. (7) others. The reasons of migration have been elicited only with reference to movement from place of last residence.

Impact of migration :

The growth of population of a particular place depends upon the factors such as fertility, mortality and migration. The knowledge of trend in migration helps in future planning of a particular place.

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001

Place of birth	Arunachal Pradesh			Changlang District		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the State of enumeration	209,454 (51.6)	95,109 (44.8)	114,345 (59.2)	19,634 (39.3)	9,778 (36.4)	9,856 (42.6)

Born in other districts of the State	52,411 (12.9)	26,997 (12.7)	25,414 (13.2)	4,866 (9.7)	2,582 (9.6)	2,284 (9.9)
Born in the State	209,454 (51.6)	95,109 (44.8)	114,345 (59.2)	19,634 (39.3)	9,778 (36.4)	9,856 (42.6)
Born in other States	170,626 (42.1)	102,161 (48.1)	68,465 (35.4)	21,111 (42.2)	12,123 (45.2)	8,988 (38.8)
Born in other Countries	25,468 (6.3)	14,966 (7.1)	10,502 (5.4)	9,229 (18.5)	4,931 (18.4)	4,298 (18.6)

It is seen from the above Annexure, that 39.3 percent of population of Changlang district were born within the State as against 51.6 percent for the State as a whole. 9.7 percent of the district population were born in other districts of the State as against 12.9 percent of the population at State level and this may prove that inter district migration in this district is lower side. In case of Inter State Migration Changlang district has shown little higher percentage of 42.2 as against 42.1 percent in case of the State. So far International Migration is concerned, the district has registered a percentage of 18.5 percent which is much higher than the State percentage of 6.3.

COMPARISON OF PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH FOR 1991 AND 2001

Birth Place	Changlang District	
Total Migrants	1991 (100%)	2001 (100%)
1	2	3
Born in the District of Enumeratoion	13.5	29.6
Born in Other Districts of the State	59.4	9.7
Born in the State	72.9	39.3
Born in other States	17.8	42.2
Born in Other Countries	9.3	18.5

While compare the particular distribution of Migrants by place of Birth between 1991 and 2001 Census in respect of Changlang district, it is seen that the migrants born in the State is 39.3% in 2001 as against 72.9% in 1991 of which 29.6% and 13.5% respectively in 2001 and 1991 recorded against migrants born in the district of enumeration and 9.7% and 59.4% in 2001 and 1991 respectively against migrants born in other districts of the State. As regards migrants born in other States are 42.2% and 17.8 % in 2001 and 1991 respectively, where as it is 18.5% and 9.3% inrespect of migrants born in other countries.

	Males	13,231	6,909	4,127	1,829	84	6	1	275	0
	Females	12,138	6,087	3,960	1,736	73	2	0	280	0

It may be seen from the Annexure V that Hindus constitute 40.0 percent (50,183 persons) of Total Population of Changlang District followed by Buddhists 34.1 percent (42,744 persons), Christians 17.5 percent (21,931 persons), Other Religions and Persuasions 7.3 percent (9,161 persons). The followers of Muslim, Sikh, and Jain religion are very negligible. Out of Eleven Circles in the district, Diyun Circle is the biggest Circle with a population of 28,907 persons (23.0 percent) and the smallest being Namtok Circle with 3,085 persons (2.5 percent). From the above Annexure it will also be seen that the followers of Hindu religion is found to be majority in Bordumsa, Changlang, Khimiyang, Namtok, Jairampur and Kharsang Circles. Major Christian followers are found in Manmao and Vijoynagar Circles. The followers of Buddhist religion are more in Diyun and Maio Circles in the district.

COMPARISON OF MAIN RELIGIONS BETWEEN 1991 AND 2001

Religion		1991	Religion		2001
Hindu	–	41.9	Hindu	–	40.0
Buddhist	–	35.2	Buddhist	–	34.1
Christian	–	10.9	Christian	–	17.5
Religion not Stated	–	9.8	Religion not Stated	–	7.3
Other Religion and Persuasions	–	1.5	Other Religion and Persuasions	–	0.9
Muslims	–	0.7	Muslims	–	0.2
Sikhs	–	(N)	Sikhs	–	(N)
Jains	–	NA	Jains	–	(N)

While drawing a comparison of main religions of Changlang district between 1991 and 2001, it is seen that the Hindu and Buddhist religions constitute majority of population and placed number one and two in 1991, followed by Christians, Religion not Stated, Other Religion and Persuasions, Muslims and Sikhs respectively. Again in 2001 also Hindu and Buddhist religions constitute majority of population and placed

number one and two, followed by Christians, Religion not Stated, Other Religions and Persuasions, Muslims, Sikhs and Jains. In 1991 there was not a single person of Jains religion.

In 1991 Hindu religion is a major religion in Manmao, Nampong, Miao, Bordumsa, Vijoynagar and Changlang Circles, where as Buddhist and Religion not stated seems majority in Diyun and Khimiyong Circles. On the other hand during 2001 Hindu religion seems to be majority in six Circles, Christian in three Circles, Buddhist and other religions and persuasions one Circle each in the disrtict.

COMPARISON OF MAIN RELIGIONS BETWEEN 1991 AND 2001

Religion		1991	Religion		2001
Hindu	–	41.9	Hindu	–	40.0
Buddhist	–	35.2	Buddhist	–	34.1
Christian	–	10.9	Christian	–	17.5
Religion not Stated	–	9.8	Religion not Stated	–	7.3
Other Religion and Persuasions	–	1.5	Other Religion and Persuasions	–	0.9
Muslims	–	0.7	Muslims	–	0.2
Sikhs	–	(N)	Sikhs	–	(N)
Jains	–	NA	Jains	–	(N)

While drawing a comparison of main religions of Changlang district between 1991 and 2001, it is seen that the Hindu and Buddhist religions constitute majority of population and placed number one and two in 1991, followed by Christians, Religion not Stated, Other Religion and Persuasions, Muslims and Sikhs respectively. Again in 2001 also Hindu and Buddhist religion constitute majority of population and placed number one and two, followed by Christians, Religion not Stated, Other Religions and Persuasions, Muslims, Sikhs and Jains. In 1991 there was not a single person of Jains religion.

It is also seen that Hindu religion is a major religion in Manmao, Nampong, Miao, Bordumsa, Vijoynagar and Changlang Circles, where as Buddhist and Religion not stated seems majority in Diyun and Khimiyong Circles. On the other hand during 2001, Hindu religion seems to be majority in six Circles, Christian in three Circles, Buddhist and other religions and persuasions one Circle each in the disrtict.

ANNEXURE - VI
MARITAL STATUS OF POPULATION AS PER 2001 CENSUS

Marital status	Total population			Percentage		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All marital status	125,422	65,821	59,601	100.00	100.00	100.00
(i) Never Married	72,501	39,596	32,905	57.8	60.1	55.2
(ii) Married	48,925	25,075	23,850	39.0	38.1	40.0
(iii) Widowed	3,613	966	2,647	2.9	1.5	4.5
(iv) Divorsed or Separated	383	184	199	0.3	0.3	0.3
(v) Unspecified Status	-	-	-	0.0	0.0	0.0

From the above Annexure VI it has been found that out of 125,422 population, 72,501 or 57.8 percent reported to be Never Married as against 56.4 percent at State level. 48,925 or 39.0 percent population are Married, 3,613 or 2.9 percent are Widowed, 383 or 0.3 percent Divorced or Separated.

COMPARISON OF MARITAL STATUS BETWEEN 1991 AND 2001

			1991	2001
	All Marital Status	–	100%	100%
1	Never Married	–	58.9	57.8
2	Married	–	38.5	39.0
3	Widow	–	2.4	2.9
4	Divorced or Separated	–	0.2	0.3
5	Unspecified	–	0.0	NA

It is seen from the Annexure that the percentage of Marital Status of Population inrespect of Changlang district stands a (1) Never Married 58.9%, (2) Married 38.5%, (3) Widowed 2.4%, (4) Divorced or Separated 0.2% and (5) Unspecified Status 0.0% in 1991. On the other hand during 2001 this serial stands good. But with a little insignificant variation which is (1) Never Married 57.8%, (2) Married 39.0%, (3) Widowed 2.9% and (4) Divorced or Separated 0.3% and Unspecified status is not available in the district.

From the Annexure VII above, the percentage of Literates out of Total Population (excluding 0-6 Years population) have been work out to be 51.3 percent as against 62.1 percent Males and 39.2 percent Females. Percentage for the State as a whole stands at 54.3 percent. According to level of Education the percentage of Literate out of Total Population (excluding 0-6 years population) have been work out as follows : Literate without Education level is 1.3 percent, below Primary is 18.5 percent, Primary is 13.7 percent, Middle 8.2 percent, Matriculation/Secondary 5.3 percent, Higher Secondary Intermediate/Preuniversity/Senior Secondary is 2.2 percent, Non-Technical Diploma or Certificate not equal to Degree 0.0 percent, Technical Diploma or Certificate not equal to Degree 0.2 percent Graduate and above is 1.9 percent in the district.

COMPARISON OF LITERATES BETWEEN 1991 AND 2001

Literates	1991	2001
Total Literates	43.2	51.3
Males	54.4	62.1
Females	29.6	39.2

While drawing a comparison from the Annexure VII, it is seen that the percentage of literates excluding (0-6) years population accounts for 43.2%, for Males 54.4% and for Females 29.6% in 1991, where as it is 51.3% as against 62.1% for Males and 39.2% for Females during 2001 in Changlang district, for the State as a whole the percentage of literates is 41.6% in 1991 and 54.3% in 2001.

COMPARISON OF EDUCATION LEVEL BETWEEN 1991 AND 2001

Level of Education	1991	2001
Below Primary	14.9	18.5
Primary	12.3	13.7
Middle	8.5	8.2
Matric/Secondary	3.9	5.3
Higher Secondary/Intermediate/Pre-University/Sr. Secondary	1.6	2.2
Non-Technical Diploma or Certificate not equal to Degree	0.0	0.0
Technical Diploma or Certificate not equal to Degree	0.2	0.2
Graduate and Above	1.6	1.9

According to level of Education for the district for 1991 and 2001, the percentage of Literates below Primary 14.9% and 18.5% respectively, for Primary 12.3% and 13.7%, Middle 8.5% and 8.2%, Matric/ Secondary 3.9% and 5.3%, Sr. Secondary/Higher Secondary/Intermediate/Pre-University 1.6% and 2.2%, Non-Technical Diploma or Certificate not equal to Degree 0.0% and 0.0%, Technical Diploma or Certificate not equal to Degree 0.2% and 0.2% respectively. Graduate and above 1.6% and 1.9% in the district.

It has been seen from the above that the percentage of literates has been increasing during the decade.

ANNEXURE - VIII
DISTRIBUTION OF DIFFERENT MOTHER TONGUES OF ARUNACHAL PRADESH COMPARED WITH CHANGLANG DISTRICT RETURNS, 2001

Sl. No.	Name of Mother Tongues	Number of persons who returned the Mother Tongues in	
		Arunachal Pradesh	Changlang
1	2	3	4
1	Chakma	39,953	32,977
2	Nepali	94,895	11,337
3	Tangsa	10,843	10,074
4	Assamese	51,422	5,810
5	Hindi	53,663	5,310
6	Bengali	54,521	4,417
7	Hajong	2,454	2,413
8	Tibetan	4,751	1,634
9	Bhojpuri	19,526	1,558
10	Nocte	27,400	1,364
11	Deori	4,504	1,253
12	Munda	3,004	1,106
13	Mundari	1,471	985
14	Maithili	2,836	589
15	Adi	93,517	559
16	Oriya	7,770	501
17	Sadans	2,296	442
18	Wancho	48,544	404
19	Apatani	27,792	364

It has been seen from the Annexure VIII that Changlang District has returned Chakma (32,977) as the major mother tongues speakers followed by Nepali (11,337), Tangsa (10,074), Assemese (5,810), Hindi (5,310), Bengali (4,417) and Hajong (2,413) as compared to Nissi (117,124) the highest, followed by Nepali (94,895), Adi (93,517), Adi Gallong (61,674), Bengali (54,521), Hindi (53,663) and Assemese (51,422) at State level. This proves that every district has languages of its own. Unlike other States, there is no predominant language in Arunachal Pradesh.

COMPARISON OF MOTHER TONGUE BETWEEN 2001 AND 1991

Sl. No.	Name of Mother Tongues	2001	1991
1	Chakma	32,977	–
2	Nepali	11,337	–
3	Tangsa	10,074	22,622
4	Assamese	5,810	–
5	Hindi	5,310	–
6	Bengali	4,417	–
7	Hajong	2,413	–
8	Tibetan	1,634	1,909
9	Bhojpuri	1,558	–
10	Nocte	1,364	3,258
11	Deori	1,253	89
12	Munda	1,106	1,188
13	Mundari	985	342
14	Maithili	589	–
15	Adi	559	1,224
16	Oriya	501	–
17	Sadans	442	–
18	Wancho	404	258
19	Apatani	364	–

While drawing a comparison between 2001 and 1991 inrespect of Mother Tongues for Changlang district, it is seen that Chakma is the major Mother Tongue with the highest number of population 32,977 (26.3%) in 2001 and Tangsa is the major Mother tongue with the highest number of population 32,977 (23.9%) in 1991. Regarding other mother tongues the comparison cannot be drwan due to the floating nature of population.
