DONG - Place to welcome the first sun rays of the Millennium

It is a very attractive village under Walong Circle in Lohit District of Arunachal Pradesh wherefrom the first sunrise of this millennium was seen. The Government of Arunachal Pradesh has recognized this village as an important tourist spot. Thousands of people from various parts of the country and abroad use to come to see the beautiful scenery of the place. The village is located in a valley along the bank of the Lohit river on the right which is surrounded by picturesque mountains and beautiful landscape.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc..

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided, a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare

Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class **II** towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (Hi)marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N. K. Laskar, Director of Census Operations. Arunachal Pradesh . Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R. G. Mitra, Deputy Registrar General (C&T) and Dr. I. C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R. P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others Who have contributed to make this publication possible.

D. K. Sikri
Registrar General &
Census Commissioner, India

New Delhi,
17.10.2006

Preface

The District Census Handbook (DCHB) contains important census and non-census statistics pertaining to a particular District. This series constitute an important set of census publications brought out by the Census Organisation on behalf of the State government. The Census Directorate prepares the manuscripts of the District Census Handbooks out of the data collected from the field during Census Operations and also incorporate in its various other data originating from different Government Departments. The District Census Handbooks are widely made use of by the State Government and its district level and other lower level officials for proper planning, development and administrative purposes as well as by a large cross-section of data users like academicians scholars, researchers and many other Non-Governmental agencies.

The District Census Handbook has two parts-part-A and Part-B. The Village and Town Directories are included in part-A, whereas part-B contains the Primary Census Abstract. The Village Directory gives for each Village, the area, population, educational, medical, civic and other amenities as also its land use pattern. Similarly in the Town Directory, information on various civic amenities, the area figures, population characteristics, physical aspects, communications, municipal finance, trade and commerce, industry and banking facilities etc. pertaining to a town are incorporated as well as the Village and Town directories and also of Scheduled Castes and Tribes presents certain other basic data like number of residential houses and households, sex-wise break-up of the total population, literates, main workers by categories, marginal workers and non-workers, sex-wise break up of Scheduled Castes and Scheduled Tribes population etc. Besides, some brief notes on the administrative development, economic resources and social aspects of the District are also incorporated in this volume. Also it contains brief analytical notes on the village and town directories and are supported by a few inset tables based on the Primary Census Abstract as well as the Village and Town directories. Above all an overall attempt has been made here to present the basic statistical data on villages and towns which it is expected, would come handy and useful to all concerned.

The data presented under Village and Town directories were furnished from the field, village and town-wise by the district administration mainly through the Circle Officers in respect of the rural villages and by the Deputy Commissioner though the District Statistical Officer in respect of urban areas respectively. The data presented under Primary Census Abstract were collected during the Census Operations by the field functionaries of the Circle Officers and the Deputy Commissioner. My thanks are due to all these dedicated band of field officials who have provided the basic data required for compilation of this volume. The notes on different State and Central Govt. Departments are furnished by the respective departments. I am grateful to all these departments for their sincere co-operation.

While the collection, compilation and tabulation of data including designing and production of the District Census Handbook Volumes were under taken by the Census Department at its own expenses, in keeping with the past practice for 2001 Census. It is my sincere hope that all the data users will find the contents of the 2001 DCHB series quite convenient and useful.

The District Census Handbook will be centrally printed as decided by the Registrar General, India. The number of copies required by the State Govt. will be supplied to them on payment basis.

The Census Organisation is also grateful to Government of Arunachal Pradesh and to the Director of Economics and Statistics, Government of Arunachal Pradesh, Itanagar and his staff for taking necessary initiative in collection of data required for the preparation of the District Census Handbook.

Last but not least I cannot but express my gratefulness to Shri J.K. Banthia, Registrar General and Census Commissioner of India for his valuable instructions and guidance in bringing out the District Census Handbooks.

Lastly I must express my appreciation to the Officers and Officials of the office of the Registrar General, India for making necessary arrangement for printing of the publication in time.

District Highlights – 2001 Census

- The District is entirely rural except District H.Q. Tezu and Sub-Divisional H.Q. Namsai. There is no statutory town in the entire State.
- The district is famous for variety of timber and as such wood based industries and ply wood factories came up in the district. But due to the ban imposed by the Hon'ble Supreme Court's Order these industries had to be closed down subsequently.
- War memories of 1962 India vs China at Walong and Namti plan battle field is an important tourist spot.
- Dong village is an attractive tourist spot wherefrom first sunrise of this Millennium was seen from this village.
- Famous 'Agaru' is available at upper part of the district.
- Rare varieties of birds and animals are also seen in the forest of Lohit District.
- This district is the most populous district among all the districts of Arunachal Pradesh.

ANALYTICAL NOTE

Blank

Analytical Note

(i) History and Scope of District Census Handbook

The District Census Handbooks is an innovation of the 1951 census. Prior to 1951 census publications and report contained data up to Tehsil, Sub-division Town and District level. Micro level data in rural areas and enumerator block/wards in urban areas were not published in any census report. With the rapid development and socio-economic changes in the society, necessity of data at micro level was felt considerably by the government, economists, schools and various data using agencies. With a view to making available these statistics at micro level, selected census data was presented in the district census handbooks of 1951 Census and accordingly the Handbooks contained important census data as well as general information relating to history, physical aspects, geology, archeology, climate, rainfall administration, medical and public health, educational and literacy, agriculture and cooperatives, industries, local bodies, places of interest etc. relating to a particular district.

The District Census Handbooks of 1961 census, underwent complete transformation and attempts were made to make comprehensive and informative.

In 1971 Census, efforts were made to make available both census and non-census data in an uniform manner with an enlarged perspective. The District Census Handbooks of 1971 Census had been split up into three parts namely, Part A, Part B and Part C. Part A comprised of Town and village Directory while Part B contained Urban Block/Village wise Primary Census Abstract and Part C included Administrative Statistics and Report.

District Census Handbooks of Arunachal Pradesh was brought out for the first time in the 1971 Census, when the full fledged census was also taken in Arunachal Pradesh for the first time. Due to less volume of data Part A and Part B of the District Census Handbooks in 1971 Census were combined in one volume for convenience.

In the 1981 and 1991 Censuses the District Census Handbooks were divided into two parts only as follows:

Part A : Comprising Village and Town Directory as it was in the 1971 Census.

Part B : Consisting of (i) District Primary Census Abstract at circle level (ii) Circle wise Primary Census Abstract (a) Village level and (b) town level (within the town EB wise) and (c) Appendix to primary Census Abstract showing Urban Block wise total Scheduled Castes and Scheduled Tribes population and (iii) Primary Census Abstract for Scheduled Castes and Scheduled Tribes at circle level.

The District Census Handbooks are brought out on behalf of the State governments after each decennial census. The publication containing grass root level statistical data on demographic characteristics, civics and other amenities in villages and towns is an essential aid for district level planning and administration. The governments of respective states/ Union Territories have been meeting the cost of these publications. The data presented in this publication are compiled by the Census Directorates on behalf of the concerned States/Union Territory governments.

It is proposed to bring out the District Census Handbook (DCHB) of the 2001 census in two parts as follows:

Part A : Village and Town Directory.

Part B : Primary Census Abstract.

A-part from the concerned State/Union Territory governments which use the data available in DCHBs for planning and administration, number of other agencies which are engaged in different welfare and other activities make use of the DCHBs for different purposes.Part A and Part B of the District Census Handbook has been combined as it was done in 1971, 1981 and 1991 Censuses.

(ii) Brief History of the District

The name of the district is derived from the river Lohit that flows through the district. Prior to 1914, the district was a part of Lakhimpur district.By 1914 the North East Frontier Tract now Arunachal Pradesh was constituted with three political charges and the area covered by this become a part of the Central and Eastern section which falls under one of the said political charges. In the year 1919, the Central and Eastern section was renamed as the Sadiya Frontier Tract. In 1943, some area from both the Sadiya Frontier Tract and the Lakhimpur Frontier Tract were curved out and Tirap Frontier Tract was formed. In 1948, under the North-East Frontier Tracts (Internal Administration) Regulation, 1948, the remaining portion of the sadiya Frontier Tract was divided into two separate charges, namely the Abor Hills District and the Mishmi Hills District each in the charge of a political Officer with headquarters at pasighat and sadiya respectively. In 1951, the plains portion of the Mishmi Hills District was transferred from the administrative jurisdiction of the Government of Assam. In 1952, the headquarters of the Mishmi Hills District was shifted from sadiya to Tezu. According to the North-East Frontier, areas (Administration) regulation, 1954, the North East Frontier Tract came to be known as North–East Frontier Agency and the Mishmi Hills District was renamed as the Lohit Frontier Division. In 1956, the Dibang Valley was constituted as separate administrative unit within the division and placed under the charge of an Additional Political Officer with its headquarters at Roing which was subsequently shifted to Anini. In 1965, under the North-East Frontier Agency (Administration) Regulation, 1965 the Lohit Frontier Division came to be known by its present name the Lohit District and the political officer and Additional Political Officer were redesignated as the Deputy Commissioner and Additional Deputy Commissioner respectively. In June, 1980 under the Arunachal Pradesh (Re-organisation of district), Act 1980 the Lohit district was bifurcated into two independent districts namely Lohit District and Dibang Valley District.The District headquarters of the Lohit district is located at Tezu.

(iii) Administrative Set up

(i) Location : Lohit district is located in the North-Eastern extreme part of Arunachal Pradesh. The district is bounded in the North by the China and Myanmar on the East. On the south is Changlang District of Arunachal Pradesh and on the West by Assam and the Dibang Valley district of Arunachal Pradesh. The District is approximately 270 km from Itanagar, the state capital of Arunachal Pradesh.

(ii) Total No. of Circles : There are 14 Circles in Lohit district as per 2001 census out of which two Circles viz. Piyong and Manchal are newly created and are carved out from Namsai circle and Hayuliang circle respectively.

There is no external change in jurisdiction for Lohit district. However, internal changes has come up for creating two more new Circles. Viz. Manchal and Piyong in 2001 Census.

(iii) Total No. of Towns and Villages : There are two towns Viz. Tezu and Namsai in the district. No new Town has been created after 1991 census. There are altogether 493 inhabitated villages as per 2001 census as against 486 villages in 1991 census.

The present Administrative units of the District are given below :

Sub-Division	Circle
Tezu	Tezu
	Sunpura
Namsai	Namsai
	Chowkham
	Wakro
	Lekang
	Piyong (Opened during 1997)
Hayuliang	Hayuliang
	Chaglongam
	Goiliang
	Hawai
	Walong
	Kibithoo
	Manchal (Opened during 1998)

The Sub-Divisional Headqarters at Namsai and Hayuliang were subsequently upgraded from Extra Assistant Commissioner to Sub-divisional officer during 1990 and started functioning as full-fledged Headquarters since 1995 and 1996 respectively.

The Sub-divisional Officer Head quarters of Namsai has been further upgraded to that of Additional

Deputy Commissioner and functioning as such from the year, 2000.

The Circle is the lowest Administrative unit. Some villages together constitute a Circle. Each Circle is under the charge of a Circle Officer, Hayuliang circle is under the charge of a Sub-Divisional Officer while Namsai Sub-Division is under the charge of an Additional Deputy Commissioner. The entire District is under the over-all charge of a Deputy Commissioner.

The villages have their own customary administrative system in the form of traditional village council. The Assam Frontier (Administration of Justice) Regulation, 1945 authorised village councils to settle all civil matters and certain criminal matters. According to the nature and seriousness of the offence they impose fine or other punishment to the convict. General cases are settled by imposing fine. The amount of fine varies according to the seriousness of the crime. The cases which are beyond the power of the council are generally forwarded to the concerned Government Administrative Officer. The Council forward those cases also which they are unable to settle. The Deputy Commissioner holds the power of the session judge and some other administrative officers are vested with Magisterial power. The Assam High Court has jurisdiction over all the District Courts of Arunachal Pradesh. A bench of Guwahati High court is functioning at Naharlagun since 2001.

On 21st January 1972, Arunachal Pradesh attained the status of Union Territory. On 15th August, 1975, the Legislative Assembly was formed with the chief Minister and a Cabinet of four Ministers to assist the Lt. Governor who was appointed on the same date as the Administrator of the Union Territory. On March, 1977, the 1st General Election for both Parliamentary members and Legislative Assembly members was held.

The North-East Frontier Agency Panchayat Raj Regulation 1967(No. 3 of 1967) was Promulgated in the District to introduce Panchayat Raj. This Panchayat Raj system was continued till 1998. At present the system is not in operation.

(iv) Physical Features

The Lohit District lies in the eastern part of Arunachal Pradesh between 95° 15½ and 97° 24½ East Longitudes and 27° 22½ North Latitudes and its Geographical area is approximately 11402 sq. Km. It is bounded by China along the Machmohan line and part of Dibang Valley District in the North, Tirap District to the South, China and Burma to the East and Assam State and part of Dibang Valley District to West. The altitude of Tezu, Namsai and Hayuliang are 210, 150 and 590 meters respectively.

The District consists of continuous chains of hills and mountains the altitude of which varies from 500 ft. to 17,000 ft. The high mountainous region of the northern boundary is extremely cold, large tracts of which remain snow bound through most part of the year. The plain areas in the foot hill region are intersected by innumerable rivers and water courses and covered by dense tropical forest.

The Lohit is the principal river and after which the district is named, rises in the Eastern Tibet and enters the plain at PARASURAM KUND, a famous place of the pilgrimage for the Hindus. Kamlang and Noa-Dihing are other main rivers which flow over the Southern part of the District. These rivers are fed by numbers of turbulent tributaries running through wild mountains and gorges and ultimately join the mighty Brahmaputra in Assam. While flowing over the foot hill area, these rivers frequently change their courses resulting in heavy erosion and posing a serious challenge to the communication system. During monsoon sometimes the communication through land route with the rest of the country remain completely cut off and air communication also depends on the mercy of the weather.

The climate of the District varies from place to place. In the foot hills region such as Tezu, Chowkham, Namsai, it is extreme hot during summer and moderately cold during winter while at places in high altitude such as Kibithoo, Walong, Hawai, Changlagam etc. are extremely cold during winter and moderate in summer.

Forest

The forests found in the tract can be broadly classified into following types as per revised classification of the forest types of India.

(i) Northern tropical semi-evergreen forests, (Sub-Himalayan light alluvial semievergreen forest).

(ii) Northern Tropical Semi-evergreen forests (Eastern alluvial secondary Semi-evergreen forest.)

(iii) Northern India Moist Deciduous forests (Low Alluvial Savanarnah wood land Bombax, Albizia.

(iv) Northern India Moist Deciduous forests (Eastern Termination, Duabhanga forest)

(v) Assam Sub-tropical pine forest.

(vi) East Himalayan Sub-Allpine Birch-fir forest.

The percentage of Reserve forests to total forest area is 37.26%.

The Man and Forest

The population of this Division consists of the local tribal people belonging to Idu Mishmi (Chulikata). Digaru Mishmi, Miju Mishme and a limited member of Padam. The indigenous tribal inhabitants are allowed to collect minor forest produce like firewood, thatch, toko leave, jeng leaves, bamboos and other forest produce without paying royalty for their bonafied use only and not for sale. Besides, there is provision to extract timber by the local people for construction of dwelling house.

Afforestation and Soil conservation

During the decade under report plantations of various species under different schemes were implemented for the purpose of afforestation and soil conservation. The area of plantation created in different years are as stated below.

Year	Area in ha
1	2
1990-91	220.0 ha.
1991-92	285.0 ha.
1992-93	285.0 ha.
1993-94	170.0 ha.
1994-95	190.0 ha.
1995-96	185.0 ha.
1996-97	250.0 ha.
1997-98	250.0 ha.
1998-2000	100.0 ha.
2001-02	47.0 ha.
Total	**1982.0 ha.**

Source : Divisional Forest officer, Lohit District, Tezu.

Minerals and Mining

The following information on availability of Mineral resources in the district is as follows.

Sl. No.	Location	Name of Minerals
1.	Paya under Tezu Circle	Mica
2.	Dalai Valley under Changlagam Circle	Mica
3.	Tiding under Hayuliang Circle	Lime stone
4.	Tezu River	Marble stone
5.	Kibitho area and Walang Circle	Coal and coal products
6.	Khereng area under Hawai Circle	Some useful minerals

Besides, the items mentioned above some more units of coal, petroleum products, mud block, marble stone and other useful minerals, can also come up.

There is scope of development of mineral and mine based industries in this district but the communication problem is one of major hurdles for its development.

Source : Dy. Director of Industries, Lohit district, Tezu.

Education

The education department of this district aims at improvement of the discipline in the field of education. There are 493 inhabitated Villages, 14 Circles and 5 Community Development Blocks with two Towns namely Tezu and Namsai, where educational activities are going on in full swing from time to time as provided by the State government. There are many areas where road communication is not available. The educational activities are conducted in those areas by implementing Adult Educational Programme.

To eradicate illiteracy from the masses the following educational institutions as existed and functioning as on 2000 are stated below.

1.	Primary School	171
2.	Middle School	41
3.	Secondary School	16
4.	Higher Secondary School	5
5.	College at Tezu	1
6.	Adult Education Centre	34
7.	Training Centre at Kherem	1

Source : Dy. Director of School Education, Lohit District,

Medical

At present Lohit District is having Medical facilities, in general viz, Tuberculosis, Leprosy, Family Welfare, Expanded Programme of Immunization., Maternal and Child Health, Universal Immunization health, Health Education Bureau, Goitre Control Programme, Opium De-Addiction Centre and National Malaria Eradication Programme, which are covering all aspects of Comprehensive health care activities like curative preventive and promotive services. Moreover, there are newly introduced Programme on RCH, AIDS and RNTCP functioning in this District.

Since 1991, four sub-centers were upgraded to Primary Health Centre viz. New-Mohong, Wakro, Walong and Lathao. Similarly one Homoeo dispensary is opened at Mohadevpur. 9(nine) sub-centers are opened viz., Wamliang, Danglat, Empong,Winko, Nangtaw Khampti, Seit, Kalaikrong, Kibithoo and Kromna. Before 1991, there were 2(two) Community Health Cemtres viz., Namsai and Hayuliang, 3(three) Primary Health Centres viz. New Mohong, Tafragam and Amliang, Medo which are still functioning in the district.

A high altitude scheme is also operating for imparting primary training to local girls as Dai. 51 members of Dai are trained in the District Hospital at Tezu and Hayuliang community Health Centre to work in the Upper belt of the District.

Similarly, 43 Health guides (Medical) are working and covering upper as well as lower belt for giving presumptive treatment of fever cases viz., FTD and DDC.

Health Education Bureau in the District headquarter at Tezu started functioning since 1985. Villagers are educated with different aspects of Health subjects.

Source : District Medical officer, Lohit Distric, Tezu.

Co-operative

The Co-operative Movements in this district has a great potential for further development. by exploiting the geographical condition of the district specially in the field of consumer service and banking etc.

This district has a unique condition to flourish the Co-operative movement but due to lack of proper road communication, established business houses, resources etc. no private business enterprise is interested to exploit the potentials of this district. The Co-operative societies can only be able to tackle such difficulties in its favour by motivating the people of this district. Exactly this had happened since 1958, while the Co-operative Societies in this district has achieved a tremendous success which is unparallel in the Co-operative activities among the all districts of the state. This is possible due to hard work and motivation of the people and workers of the Co-operative organisation with able guidance and leadership from the Co-operative department and district administration.

Function of the Co-operative Societies in this district is mainly restricted to consumer and service activities. Consumer activities has reached its target during the last decades. Consumer activities have already spread from the Assam border to International border by replacing Central Purchasing Organisation with fair price shop. This sector, of Co-operative movements has reached so high that no other form of business activities can dream of to reach such heights in this district.

The consumer Co-operative in this district has taken even the leadership to handle the public distribution system for feeding the common people in all seasons and this task has so successfully implemented that the people's are really believing that the Co-operative Societies are alone responsible for procuring distributing, marketing of F.P.S. commodities throughout the district. People can not even dream of any Co-operative Societies without Fair Price Shop.

In service sector, the Co-operative Societies, has also played a vital role in overall economic growth of the district. The Co-operative Sector had pioneered the transport services in this district before being connected the various difficult places with motorable road.

The agricultural activities through the Co-operative Societies has done a tremendous job by improving in poverty eradication Programme and solving the malnutrition problems. Under Co-operative sector the problems of short term and long term loan for agricultural activities, marketing of Agricultural products are also done. The Co-operative Bank has also helped to solve the malnutrition problems of the common people as well as help to market the product

of the farmers. This is a great achievement inspite of poor communication, lack of working capital etc.

The Co-operative Societies of this district has been rendering tremendous service to the common people by catering to the needs of essential goods at reasonable rate regularly in spite of various natural calamities such as flood, road blockade etc. The most important and vital service rendered by the society is the controlling the price rise of consumer goods, grocery items etc. by preventing the artificial shortage, through regular supply charging minimum margin, smooth distribution of goods throughout the district, Same is the case in respect of milk, milk products, egg, meat etc. The above facts is proved as the perishable goods rate are fluctuated very frequently as because society does not deal with the perishable goods. The Co-operative Societies are also helping the farmers by providing short term agriculture loan at the time of actual cultivation season and helping in purchasing tractors etc. The co-operative Banks are also helping to grow the habit of thrift and saving among the common people.

Data on achievement of Co-operative Societies in this District as on December, 2000 are follows :

Nos. of Co-operative Societies	22
Nos. of Agril. credit Societies	4
Nos. of Fair Price Shop	51
Total Turnover	800 lakhs.
Net Profit	5 lakhs.
Employment provided	200 Nos.
Area of Operation	Upto Kibithoo
Activities of the Society	Consumer, Transport, Agricultural, Livestock, Credit,Saw Mill, Farming
Income-Tax paid	2.00 lakhs
Essential goods distributed	6000 Qtls. P/Month through F.P.S.
Procurement of Milk in liters	3.00 lakhs
Coop Bank	3 Nos.

Source : Asstt. Registrar Co-operative Societies, Lohit District

Veterinary and Animal Husbandry

Lohit District is probably having maximum plain stretch of land in comparison to other districts of the state. Arunachal Pradesh is having better potential of livestock rearing, being temperate climate at the upper part in the hilly terrain of Himalayas and tropical humid in lower belt, that developed natural pastureland with varieties of species.

Practice of rearing, different live-stocks chiefly like cattle, buffalo, mithun, pigs, goat and poultry birds, etc. throughout the district and sheep at the upper belt viz., Wallong Kibithoo area by the local people, who are indulged into domesticating/rearing more than two or three of above mentioned species have taken up the livestock Production as a good source of their income.

Considering the interest of the people on the subject government has open several commercial breeding farms for further development of livestock/ poultry production in the district. The following farms are run by the department of Animal Husbandry and Veterinary for the welfare of the people.

Sl. No.	Name of Farm/Product	Location
1.	Regional Exotic Pig Breeding Farm	Loiliang
2.	Pig Farm (extension of Regional Exotic)	Nampong
3.	Pig Breeds Farm	Loiliang
4.	Bullock Rearing Centre	Loilang
5.	District Poultry Farm	Tezu
6.	Chick Rearing Centre	Tezu
7.	Broiler Farm	Namsai
8.	Rabbit Breeding Farm	Loiliang
9.	Sheep and wool extension center	Kibithoo

Besides above, under co-operative sector a composite farm comprising Dairy, poultry (both layer and Broiler) have been set up under the banner LIFCO (Lohit Livestock) Farmers co-operatives Society Ltd. at Tezu being technically assisted by the department, which also indulges in marketing livestock products/bi-product etc.

The performances of all aforesaid institutions seems to be quite satisfactory, which have proved the bright scope of livestock farming in the District.

The following are the list of veterinary institutions existing in the district.

Sl. No.	Name of Institutions	Number
1.	Veterinary Aid Centre	23
2.	Mobile Veterinary Unit	2
3.	Cattle Upgrading Centre	17

Due to lack of infrastructure facilities in setting up of Veterinary Vigilance units/Veterinary check post provisions have been made to make the cattle trespasser Act effective through liaison of local administration of the concerned area with the Veterinary Assistant Surgeon.

Also due to constraints of transportation of some large sick animals to the Veterinary Institutions, the field staffs of the department as well as the Vety. Asstt. Surgeons have been attending cases at the door steps of the owners as and when required.

The following statement showing the number of case Treated/Castrated/Vaccinated Artificially Inseminated in the District (from 1991-2001)

Year	Treatment	Castration	Vaccination
1991-1992	37,661	2,494	29,581
1992-1993	50,506	3,967	37,574
1993-1994	52,063	3,080	51,972
1994-1995	76,592	3,230	59,200
1995-1996	51,108	2,805	39,786
1996-1997	52,363	2,732	22,879
1997-1998	63,820	4,377	17,716
1998-1999	61,529	3,403	19,674
1999-2000	49,822	4,431	28,679
2000-2001	50,419	3,969	46,084

Source : District Animal Husbandary & Veterinary Officer, Tezu, Lohit District.

Dairy Development

There is ample scope for dairy development in the Lohit District. This district is having good number of cattle and buffalo production, out of which drainage of milk can easily be done. The only thing is that proper organisation of dairy farming is to be taken into consideration.

Further, the various kinds of nutrition's fodder grasses scattered every where in the district is a direct aid towards the management side of dairy herds. The available vast grazing land also contribute a lot in minimizing the cost of feeding.

Moreover, the Veterinary Department has created a genetic revolution among the cattle by taking up breed up- gradation Programme in each corner of the district by placing bulls of high proven value and thereby, enhancing the milk productive capacity of the cows. Efforts are also being made by establishing liquid semen stations of high quality pregnancy tested bulls which are maintained for successful implementation of A.1. Programme through Liquid Semen technology. Part played by the Animal Husbandry and Veterinary department in the health coverage and prevention has aided in keeping dairy cow.

To increase the productivity of cattle considerable quantum of work has been done by the scientists in past three decades. With the available technical "Know how" the Scientist, Central Government and State Governments have sponsored several livestock projects in the Country, such as key village scheme, IRDP, Artificial Insemination, Provency Testing Schemes etc.

The district is in a position to produce 226800 litres of milk per year by other private and co-operative Sector organisation.

Governments attitude towards fodder cultivation by means of providing seeds, grass roots, fencing materials etc. are also remarkable achievements in dairy developments.

Although it has been experienced since last three decades that through participation in the taking up dairy as a source of livelihood by the people is negligible but after continuous motivation they are seen to have come forward. At present, many local people own large number of cattle and buffaloes herd and have been selling milk to the co-operative organisation. Even government subsidized dairy units are also accepted by them and earning a lot out of these farms. However, to make the people conscious a drive to motivate them is still needed.

Source : District Animal Husbandary & Vetenary Officer, Lohit District, Tezu.

Transport and Communication

As far as transport and communication is concerned Lohit District of Arunachal Pradesh is the most affected district. Tezu is the Headquarters of this District. There is no separate independent station in Lohit District except at Tezu and Namsai. During summer months communication becomes extremely difficult there. The whole of the District including the District Headquarters remain cut-off from the rest of the world for a long period of 7-8 months. Swelling

water of Digaru, Lohit, Berang and Noa Dihing causes havoc to the life and property of the people of this district.

Generally, there is bus route from Tezu to Tinsukia via Namsai. During the long and difficult summer months using boats over swelling water is the only way out. This practice has often been proved to be risky. Also due to rapid erosion and heavy landslides, upper areas situated in the east like Hayuliang, Walong, Kibithoo and Hawai Circles remain cut off from Tezu for a considerable length of time of the year.

At present 9 (nine) buses with different seating capacity from Tezu to other areas are operating services as shown below :

1.	Tezu	-	Tinsukia
2.	Tezu	-	Roing
3.	Tezu	-	Walong
4.	Tezu	-	Hayuliang

It is agreed that 45% of routes are un-economical but plying of buses on these on routes can't be stopped because of requirement of commuters. Due to hilly-terrain coupled with bad road condition and frequent land slides, floods etc, operation of bus services has become un-profitable.

Moreover, besides the local passengers, there are number of State Govt., Central Govt., Para-military, Semi- Govt. Autonomous establishment and offices established in the District who hail from various parts of the country. Therefore, Govt. of Arunachal Pradesh has decided and taken necessary initiative for opening a Railway out-Agency at Tezu to facilitate long distance Railway reservation.

Source : Station Superintendent, Lohit District, Tezu.

Land use pattern and tenancy

As per the present system of the land use in this district the land within the township areas are allotted on lease to the interested Arunachalee individuals on payment of land premium and lease rent as per Govt. fixed rates after obtaining Govt. approval. The other land in village areas are under the traditional ownership of the villagers for which there is no records as cadastral survey has not been carried out. Further the land within the township areas are also being allotted to Govt. Deptt. on receipt of requisition from them for construction of Govt. Buildings etc. for which land value as per Govt. fixed rate is realized/ paid by the concerned Departments.

The people are by and large asking for land possession certificates against village land under their occupation with a view to get financial assistance from various financial Institutions/Banks etc. for starting re-plantation etc. The Govt. of Arunachal Pradesh has issued directive to issue land possession certificate which is very much time consuming and as a result there is inordinate delay in obtaining Govt. approval. It is difficult to establish the ownership of individual's land until and unless complete survey of village land is carried out and brought on records.

The people of this District are interested to get land possession certificate for the land under their traditional ownership in the villages. However, on submission of application as per Govt. directives the Land possession certificates is being issued to the interested Arunachalee individuals for the areas required by them for establishment of Tea plantations/ saw mills etc. after obtaining approval from the Government.

Fisheries

Lohit District has a rich genetic resource with wide varieties of fish fauna of both worm and cold water. The district has an estimated area of 2410 hectares suitable land for development of fish ponds. The Department of Fisheries has so far developed 247 hectares water area for pisciculture. It has 250 Kms river streches and 500 hactares water area which forms lake, beels and swamps etc. In general the people of the district depend on agriculture and the district has an approximate 3177 hactares water area under the Forest Department. The sports fishery sector has been awaiting for development.

At present, two schemes i.e. FFDA and Normal (State sponsored) are in operation. The unit cost per hectares has been increased during the year 2000-2001 to Rs.3.3 lakhs with a subsidy to twenty five percent to execute the scheme. There is one chineese hatchery at Lathao, which meets the fish seeds requirement of the district. The rivers and beels in the foot hills and Namsai plain are leased every year

for a period of six months and substantial amount is earned as revenue for the department since last 3-4 years. Few beels could not be leased due to poor response from the bidders.

In spite of the constant effort made by the department there is a gap between demand and supply. Fish from Andhra Pradesh are marketed on a regular basis at Tezu, Namsai and other places of Lohit District. Poly culture and composite fish culture are commercially viable in the District. However, the fund allotment is in a decline trend since past few years. Besides, there is short fall of technical manpower in the district. The district has no fishermen Co-operative society to harness the available natural resources. Though Lohit district is having potential for fisheries development, the department has not been able to exploit all these resources properly.

Source : District Fishery Offcer, Lohit District, Tezu.

Panchayati Raj

The North East Frontier Agency Panchayat Raj regulation 1967 (No.3 of 1967) was promulgated in the district to introduce Panchayat Raj. The Agency Council of NEFA. Administration was inaugurated on 3rd Dec'1969. The Panchayat Raj regulation provides for effective participation of the people in the administration of agency through the construction set up under Panchayati Raj. The regulation provides for effective participation of the people in the administration of agency through the institution under Panchayati Raj. Under this regulation three Tyre Panchayati Raj system was in operation in the district up to 13.9.97 only such as Gram Panchayat at initial stage, Anchal Samiti in the middle stage and Zilla Parisad in the last stage. The members in Gram Panchayat are elected by the people and Anchal Samity members are elected from among the members of the Gram Panchayat. Similarly the members of the Zilla Parisad are also elected from amongst the members of the Anchal Samity.

Before dissolving of Panchayati Raj up to 13.9.97. the position of Panchayati Raj in the district as existed is stated below :

(1)	Gram Panchayat	114
(2)	Gram Panchayat members	651
(3)	Anchal Samity	8
(4)	Anchal Samity members	117
(5)	Zila Parishad	1
(6)	Zula Parishad members	16

The Panchayati Raj has already been dissolved on14.9.97, hence the role of Panchayat members in developmental activities through the Panchayati Raj system does not arise. However, following achievement were made from January'91 to 13.9.97 in respect of Tezu Anchal Samity.

1.	Improvement of village road at Tafragam	Rs. 17,150/-
2.	Construction of 2 nos. Hum Pipe culvert at Tafragam	Rs. 24,400/-
3.	Construction of Log bridge over Mizu nallah	Rs. 20,206/-
4.	Construction of link road from yaliang to 20th mile	Rs. 48,670/-
5.	Construction of 3 nos. of C C culvert Drain at Jeko village	Rs. 8,373/-
6.	Construction of internal road at Jeko villlage	Rs. 37,500/-
7.	Construction of R L R from pomliang, Loiliang to Lohit pur	Rs. 78,000/-
8.	Construction of SPT 2 (two) rooms class room at Hatiduba	Rs. 79,844/-
9.	Construction of J R Y road at Mekailiang village	Rs. 35,000/-
10.	Construction of M I B.type Anganbadi Centre at Hatiduba	Rs. 40,000/-
11.	Construction of J R Y road at Changliang village	Rs. 86,451/-
12.	Improvement of JRY at Bhekuliang village	Rs. 13,200/-
13.	Construction of JRY road at Bhekuliang village	Rs. 28,600/-
14.	Construction of RLR from school to Bhekuliang village	Rs.106,500/-
15.	Construction of RLR at Khoroliang village	Rs. 60,000/-
16.	Construction of Irrigation channel at Mepo village	Rs. 22,400/-
		Total Rs. 7,06,294/-

Source : Deputy Commissioner, Lohit District, Tezu.

Tourism

Lohit district is having ample scope of Tourism to act as a media of publicity and public relations under the Govt. of Arunachal Pradesh. The important tourist interest places are summarized below.

Tezu

Tezu is the Head quarters of Lohit district which is about of 135 kilometers from Tinsukia Town of Assam.One can reach Tezu by availing Bus from Tinsukia.The different tourist interest places are craft center, museum, district Library, Mishmi Model village i.e. Loiliang and Tafragam. There are good accommodation facilities like, Circuit House, Inspection Bungalow, Hotel, Tourist Lodge etc.

Parshuram Kund

It is 21 kms to the North East of Tezu situated in lower reaches of Lohit district is a famous religious place for Hindus. It is an attractive place for pilgrimage. Every year thousands of people from different parts of the country including Nepal visit to kund for holy dip on the occasion of Makar Sankranti from 12th to 17th January every year. Accomodation facility is available at Dharamsala near the kund and PWD Inspection Bungalow at wakro.

Dong village

It is an attractive tourist spot wherefrom first sunrise of this Millennium was seen from this village. It is located at a valley along the Lohit river on the right and surrounded by picturesque mountains and beautiful land scape.

Namti plan

It was a Battle field where India vs. China in 1962 was faught. It is located at walong circle, and is an important tourist spot.

War Memorial

It is Located at Walong which was constructed by Army authority as a memory of solders those who lost their lives during Chinise aggression in 1962. It is about 200 Km. distance from district H.Q. Tezu.

Glaw Lake

It is situated at about 28 Km. distance from wakro H.Q. and is about 71 Km. from Tezu on the left bank of Lohit river. At 5,000 ft above sea level on eastern finge of Lohit district lies a 8 sq km natural lake endowed with a back ground of snow clad mountains which is surrounded by rich flora and fauna.

Walong

Walong is the circle H.Q. of Walong circle under Lohit district and is approximately 200 Km. distance from the district H.Q. of Tezu. One can see war memorial, hot water spring (Tilam), namti plan (1962 battle field) and trekking of Dong village which are very attractive.

Source : District Tourism Officer, Tezu, Lohit District

Agriculture

By and large Agriculture is the mainstay of the people of Lohit District in Arunachal Pradesh. It is vital source of their livelihood. Jhuming or shifting cultivation is common practice of most of the cultivators since time immemorial. Due to utmost efforts of the Govt. more and more areas are being developed every years. Following statement will give a birds eye view of development of last 10 years.

Consequent upon ban imposed by the Hon'ble Supreme Court on Timber operation, the people of, Lohit district more or less, depend on Agriculture.

Bearing in mind the development of hilly, saline, Waterlogged, Costal areas and desert eco systems, a centrally sponsored scheme, viz. National Watershed Development project for Rain fed Areas (NWDPRA) was launched by the Ministry of Agriculture in 1990-91 for its implementations during the Eight Five Year Plan. Some of the important Programmes measures have been taken for both quantitative and qualititative changes in the overall farming systems in the Indian Agriculture scene.

Some of the important programmes are taken up under NDPRA to stabilize and increase productivity in rain fed areas, including soil, and Water conservation, bio-mass production, integrated metrient and post management, mixed cropping in dry land/ rain fed Horticulture, animal husbandry, pisciculture, farm forestry/Agro forestry, silviculture, household production system and management of common property resources. Watershed Development projects, are being implemented since 1996-97. The following table will transpire achievements made in this district through watershed projects.

Sl. No.	Particulars	Achieved since 1996-97 to 1999-00	Unit
1	**Estt. of Nursery**		
	Baranichetra Kendra		1 No
	Composit Nursery		1 No
2	**Distribution of Plants**		
	Horti plants planted		1,30,000 Nos.
	Kissan Nursery		4 Nos.
3	**Soil Conservation Measures**		
	a) Contourveg heads		470 Hects
	b) Gully control measures		540 Nos.
4	**Production System**		
	Crop demonstration single/ Double/Inter crop		270 Nos.
	Agro forestry plants planted		22,000 Nos.
	Dry land Horti plants planted		18,000 Nos.
5	**House Hold Production Units**		
	Livestock unit		75 Units
	Service sector unit		315 Units

Statement showing area and production of crop of 1990 - 1991 to 1999 - 2000 in the district

Year	Area Hect.	Production MT
1990 – 91	36,406	48,966
1991 – 92	34,427	47,844
1992 – 93	29,096	43,520
1993 – 94	30,427	49,444
1994 – 95	27,660	49,883
1995 – 96	34,126	47,436
1996 – 97	29,571	44,903
1997 – 98	35,380	55,484
1998 – 99	32,971	54,895
1999 – 00	36,758	60,722

Horticulture

The District represents a unique Agroclimatic condition of Sub-tropical to temperate nature which provide scope of growing of large number of fruit crops. The climatic condition varies from place to place in the foothill belt such as in Sunpura, Tezu, Chowkham, Namsai, Lekang and Wakro where it is extremely hot during summer and moderately cold in winter. Place of high altitude such as Kibithoo, Walong, Hawai and Chaglagam are extremely cold in winter and moderate in summer. The place of middle belts like Hayuliang, Goiliang and Manchal are cold in winter and warm in summer.

The variation of Agro-climatic condition and fertile soil provides wide scope for plantation of subtropical and temperate fruit crops and spices. The fruit crops like Pine Apple, Orange, Jack fruit, Lemon, Papaya, Banana, Arecanut, Coconut, Litchi, Guava, Mango and Black pepper etc. are grown in the foothills areas of the District. The temperate fruit crops like Apple, Pears, Peach, Plum, Walnut and Cinnamom can be grown in high altitude. The fruit crops and spices like Orange, Kiwi, Banana, Pineapple, Cardamom and Cinnamom are grown in the middle belt of the District.

In the year 1992 many schemes have been taken up by the Department of Horticulture like Compact Area Garden (CAG), People Horticulture Garden (PHG) and control of shifting cultivation under state plan. Under this programe the farmers were provided hundred percent subsidy on planting materials, fencing materials and other inputs like manures, fertilizers, P.P. chemicals and garden tools and implements.

The central sector schemes like Integrated Development of fruit and Integrated Development of spices have been sanctioned where planting materials, P.P. Chemicals, fertilizers, Tools and implement were provided free of cost to the farmers and also has given cash incentive i.e. subsidy for labour costs. Due to efforts of the Department of Horticulture plantation has gained popularity and the people have accepted the programme whole heartedly.

Earlier, there was no systematic Horticulture plantation. After the inception of the Department of Horticulture, plantation were introduced in the District to provide additional income to each farmer to improve their economic condition. It has also got best employment generating scope because it needs proper care in every step right from planting to marketing and it is also established fact that the area where fruits plants are planted, soil erosion is reduced to bare minimum. By seeing the economic impact of Horticulture the people of the District are interested in establishing the fruit garden in their field. In this direction some of farmers of wakro circle has started earning from orange garden and people of Hayuliang circle are earning from Large cardamom garden and people of Lekang circle are earning from Orange and Black pepper.

Although all the fruit crops of Sub-tropical and temperate zone are having commercial viability in this

District, but much emphasis can be given to the Orange, Large cardamom, black pepper and ginger cultivation by which bulk quantity of produce can be marketed easily to the nearest market in the State of Assam where communication and transportation facility is easily available.

The District represent a unique Agro-climatic condition of Sub-tropical to temperate nature which provide scope of growing of large number of fruits crops. The need of the hours is to increase the area of production of fruit crop which fetch good return and can generate employment opportunity to the local people.

Publicity

Publicity has immense scope in a vast and under-developed district like Lohit where information, education and communication are required for effective implementation of all welfare and developmental programmes in the villages. Be it in any new agricultural project requiring latest know how or health, education or social welfare schemes, adequate sensitisation of details of the schemes are essential for motivating people.

Taking above factor into accounts, State government has set up a publicity department in the district with an objective of bringing the people closer to mainstream development process. Presently, there are five projection units located at Chowkham, Walong, Hayaliang and Chaglagam. Besides Tezu is well equipped with Projection and P.A. services.

In Lohit District the Publicity Department regularly renders the following services :

1. Field Publicity consisting of film shows in villages on various welfare and developmental subjects.
2. Distribution of Pamphlets, Posters, Calendars and diaries highlighting different social health and developmental schemes.
3. Arrangement of Photographic, audio-visual as well as press coverage of major events of the district through liaison with various media agencies like AIR, Print besides electronic organisation.
4. Installation of community listening sets in remote villages and community viewing sets (TV) in villages covered by Doordarshan signals.

Both the state as well as the central government have taken up certain schemes in the district viz: setting up of 10KW AIR Station, LPT Station at Tezu. Besides VLPT centers at Hayuliang, Namsai and Hawai are also installed. But because of its inaccessibility owing to poor communication facilities and illiteracy of a large section of the masses, proper publicity drive in the district is a big challenge for the department.

Frequent break down of VLPT centres and apathy of concerned Doordarshan maintenance organisation in monitoring and repairing them leads to long break down and closure of centres frequently.

Following is a brief summary of various publicity schemes undertaken by both state and central government in Lohit district.

1.	Projection Unit	5
2.	Community Listening set	200
3.	DRS set	2
4.	Radio Station	1
5.	LPT Station	1
6.	VLPT	3
7.	Community Viewing Sets	63

Trade and Commerce

District is still lagging behind in Trade and commerce due to bottle neck of surface communication. The entire district is surrounded by many rivers channels and its tributaries. The course of rivers change its direction every year in different way. The District is rich in raw materials but development of industrialization in the District is not feasible due to worse condition of surface communication. This District was rich, in Wood based industries like Plywood, sawn timber, scants etc. up to 1993 but due to ban of further felling of standing trees, all Plywood industries, saw mills are closed down which has adversely affected the employment problem and economic condition in the district.

Small scale industries like Rice mill, oil mill, cane and bamboo carving, black smithy etc. are industrially growing and on the other hand in Namsai, Wakro, Piyong and Chowkham Circles cultivation of tea leaf is developing rapidly.

A cement factory namely Porshuram Mini cement plant at Tezu at a distance of 7 Km. from Tezu which was established before 1991 has been closed down its function due to lack of technically qualified persons and problems of surface communication.

Govt. rationing system and Air lifting etc

There is only one CPO (Central purchasing organisation) centre located at Chaglagam. This CPO Centre is air fed by air-base depot of Mohunbari/ Pasighat. Procurement of food items are arranged by Director of Supply and Transport, Naharlagun from FCI depot located in Assam at Lahowal/Dibrugarh and Pasighat in Arunachal Pradesh. CPO Centre of Kibithoo has been closed down in the year 1993 after completion of motorable road constructed by BRTF from Walong to Kibithoo. Food items of CPO are issued to Govt. servant only. Food items to general public of Chaglagam are issued from RPDS scheme by air-lifting and this scheme is also now discontinued due to heavy expenditure.

Supply of ration items in motorable locations are covered by Land route under RPDS scheme. District Authority appoints District nominee who arrange collection of PDS items from FCI on receipt of sub-allotment order from District authority. There are 52 FPS through which PDS items are sold to the consumers on the basis of ration card. PDS items contain 'A' grade rice (APL), wheat, levy sugar and I/salt.

There are four SKO (Super Kerosene Oil)out let at Tezu, Namsai, Sunpura and Hayuliang and three POL outlet i.e. at Tezu, Namsai and Chowkham. Fuel of kitchen are supplied by 2. LPG Agencies viz., M/ S Manpoong Gas Agency and M/S Namsai Indane.

Air lifting and Air-dropping of essential food articles, building materials etc. are materialized to the remote hilly outpost where surface communication is not available. There is only one Central Purchase Organisation Centre at Chaglagam in Lohit District. The Central Purchase Organisation Centre is Air-fed by Mohanbari Deputy Director, Supply and Transport and Deputy Commissioner, Pasighat.

The Lohit District is facing difficulties for Trade due to bottle neck of surface communication. There are so many rivers/channels where bridges are to be to constructed and in summer season the HQ., Tezu and upper valley (from Hayuliang onward to Kibothoo) are totally cut off from the rest of neighbouring state either due to flood in various rivers/ channel or due to land slides in upper valley. Even some times essential food staff are to be air-lifted in upper valley at Hayuliang, Walong, Kibithoo and Hawai due to disruption of road communication for flood and land slide.

The per capita income of this district is very poor due to worse condition of surface communication for which trade and commerce are not developing. On the other hand due to lack of know-how of technically qualified persons the resources of raw materials of the district could not be taken out for exploitation for the better development of the district. Proper survey need to be carried out by technically qualified persons.

Textiles and Handicrafts

The Department of Textiles and Handicrafts was established only during 2000-2001 bifurcating from the Department of Industries. Due emphasis has been given for the development of Textiles and Handicrafts sectors in the State. Since the spectrum is wide open, as such there are vivid Art, Crafts, Tribal design and motifs prevalent amongst the tribal society. Industries based on Handloom products, Wood carving, Cane, Bamboo and basketry works have tremendous prospects in the state with locally available raw-materials and human skills.

State Government participation with the Central Government Schemes for the development of Textiles and Handicrafts Sectors by way of different schemes such as Identification of weavers and artisans, work shed-cum-Housing Schemes for Weavers and artisans, project package schemes for primary co-operative engaged in cottage Industries, have been increased many fold activities when the new department took initiatives for the development of cottage Industry in the State.

For the promotion of arts and crafts, two crafts centers one each at Tezu and Hawai and 3(three) Weaving Training Centres, one each at Nongkhon,

Wakro and Hawai are functioning in the District. In these crafts Training Centres, the local boys and girls are imparted training on carpentry, wood-carving, cane-bamboo and basketry, blacksmithy, silversmithy, tailoring, wool knitting, carpet-making, painting, handlooms etc. with improved tools and methods. These centres are equipped with expert Instructors/ Demonstrators with tool-room facilities. In order to promote these sectors the government is providing free hostel facilities, stipends etc. to the trainees. Besides, there is one HDC (Handloom Development Centre) in Co-operative field at Sangapather and Namsai with their individual work shed and emporium. Apart from these basic infrastructure, the Department. of Textiles and Handicrafts has been instrumental for the exposure of Tribal Art and Crafts through organising Handloom Expos, Brahmaputra Darshan Mela, Arunachal festival participation in Surajkund Mela, International trade fair, etc. In addition to this their are emporia's in Delhi, Calcutta and efforts are on to establish another sales outlet at Guwahati.

In the Sericulture Sector, the Government of India, Ministry of Rural Areas Employment with the technical support of the Central Silk Board(CSB), has launched a new Programme of Muga Development. Altogether 120 beneficiaries of B.P.L. group has been selected under this programme for plantation of 120 Acres of Muga food plants. These beneficiaries are imparted batch wise training on Muga spinning and reeling and provided with reeling and spinning machines through Bank loans and subsidies. In addition to this particular Programme, there are two Sericulture farm located in the district. These farms are catering the need of basic training on Muga, Eri and Mulberry developments and the need of seed stocks to the local people of the district.

Khadi and Gram Udyog Sector

Till recently the K.V.I.B (Khadi Village and Industries Board) of Arunachal Pradesh has declared all District Textiles and Handicrafts officers as the nodal officers for Khadi and Gram Udyog Scheme. In Lohit district, a workshop on this particular Scheme is being organised to popularise and to apprise the local people about the scope of this sector in the district

Public Works

Public Works Department is one of the leading agencies for construction of Roads, Bridges and Building, It implements various infrastructure development in the District, by uplifting the socio-economic status of the people. The various achievement made in construction of building, road and bridges during the 1991-2000 is stated below:

Building

Sl. No.	Type of Building	Plinth area
1	Type-I-17 Nos	613.53 sq.mt
2	Type -II-32 Nos	1383.00 sq.mt
3	Type -III-12 Nos	630.00 sq.mt
4	Type -IV-8 Nos	690.08 sq.mt
5	Type -V-1 No	136.16 sq.mt
6	Bachlor Barrack 55 Nos	1671.31 sq.mt
7	Office Buildings - 5 Nos	527.07 sq.mt
8	Store-1 N0	198.57 sq.mt
9	School Buildings – 2 Nos	1364.18 sq.mt
10	Science Laboratory – 1 No	69.18 sq.mt
11	Admn. Cum Academic Block – 1 No	2005.68 sq.mt

Road

Sl. No.	Earth work	SBC	WBM	B/T
1	50.40 Km	34.68 Km	34.68 Km	24.03

Bridge

Sl. No.	Culvert	Bridge	Causeway
1	39 Nos	1 Nos (R.C.C.)	2 Nos

The following works will be taken up as a planned programme to be implemented in near future:

Road

Sl.No	Earth work	SBC	WBM	B/T
1	29.687 Km	29.687 Km	29.687 Km	38.857 Km

Bridge

Sl.No	Bridge	Number	Estimated cost
1	Steel Bridges	3 Nos	Rs. 230.00 lakhs
2	R.C.C. Bridge (30 Mtr, span)	1 No	Rs. 60.00 lakhs
3	Causeway(200 mtrs)	1 Nos	Rs. 30.00 Lakhs

Relif and Rehablitation

The District Administration is the focal point for field level Organisation and Implementation of all

Government Contigency Plans. Considerable powers have, therefore, been wrested upon the Deputy Commissioner to carryout operations in the shortest possible time. Accordingly, the District Administration is preparing an advance contigency plan depending on the type of disaster likely to affect the district specially flood and land slides etc. as a routine manner. Contigency plans are to follow a fram-work as laid down nationally which comprises type of prepardness, the relief material required to be mobilised and the concerned departments are already instructed to work together and to provide efficient feedback and monitoring system. During actual operation for disaster mitigation or relief of the field level local defence forces cooperation and help will also be available. Therefore, our contigency plans lay down all specific action points, key personnel and contact points in relation to all aspects. Besides, District Level Disaster Management Committee has already formed downlink grass root level committee upto village level for effective functi-oning.There is a District Level Relief Committee to review the relief measures and deal with the relief payment.

Scope & Functions for Ex-Servicemen

There is no any separate scheme/plan for Settlement of Ex-servicemen. We are completely guided depending on the scope and functions of welfare schemes for Ex-Servicemen implemented by the Indian defence services.

Rs.43,14,075/- being the Government Financial relief assistance was already provided to 6813 people affected by Natural calamities from the year 1991 to 2000. Besides, a number of Developmental activities taken on Relief and Rehabilitation like providing CGI sheets under RHS Programme and assistance under IAY etc.

Proper Plan would not only minimise the loss of lives and property, but would get converted into a nation building exercise, which will always keep the entire district in a State of preparedness to face any eventuality.

Source : Circle Officer (Dev.), Lohit District, Tezu

Planning

The Planning Department has been newly set up in this district which function for allotment of funds for various developmental works of the district The united Fund has been discontinued and now MLALADS and Decentralised District Planning Schemes are implemented in the District by the Dy. Commissioner through District Planning Officer, Tezu. Under Decentralised District Planning schemes, an amount of Rs. 100 lacs is yearly allocated to the district for taking up development schemes.

MLALADS fund are now allocated to the district at the rate of Rs.20,00,000/- only to each MLA of the district. Schemes are taken up on the recommendation of the MLAs only.

Under MPLADS scheme an amount of Rs.200 lacs is allocated to the Dy. Commissioner, Tezu for entire 2 Arunachal East Parliamentary constituency in the name of the sitting HMP(LS). Schemes are taken up on the recommendation of the HMP.

Under BADP scheme, the planning commission had allocated huge amount on instalments basis to the Dy. Commissioner, Lohit for development the border blocks of Indo-China and Indo-Myanmar i.e. for Hayuliang and Hawai blocks.

The following tables gives details on expenditure for developmental works in the district

Sl. No.	Name of Scheme	Year	Total Amount sanction	No. Scheme of achieved
1	United fund	1995-96	Rs.29,85,000/-	14 Nos
2	United fund	1996-97	Rs.25,53,846/-	22 Nos
3	United fund	1997-98	Rs.29,76,900/-	16 Nos
4	United fund	1998-99	Rs.32,06,000/-	15 Nos
5	United fund	1999-00	Rs.50,00,000/-	28 Nos

Crime, Punishment, customary laws and statutory laws

With the advent of legal system of trial and punishment, most of the major criminal cases have started registering. However, customary laws still play a vital role in solving many cases of criminal and civil

nature. In some instances, unsolved 'Kebang decisions' are re-tried in Magisterial and session courts.

Because of non-separating the judiciary from the Executive, Administrattion deals both the parts.

The Deputy Commissioner being the head of Executive or Administration is also the District and session Judge for both criminal and civil cases. Further, the Dy.Commissioner is also the presiding officer for Motor Accident Claims Tribunal (MACT). Cases come to MACT are meant for compensation in vehicular accidental cases. The MACT, cases can be negotiated among the parties with due permission/ order of the Tribunal.

As per Administrative pattern in Judicial matters is concerned, other administrative officers, like Addl.Dy.Commissioner, Sub-Divisional Officer, Extra Asstt. Commissioner and Circle Officer are all enpowered to try criminal cases as per their capacity of Judicial Magistrate First Class and Judicial Megistrate Second Class.

Customary laws were in practice long before introduction of legal system. In older days disputes were tried and settled in village level. But as there was no proper Administrative set-up, these were not recorded or come into knowledge.

Later on, with the introduction of the Assam Frontier (Administrative of Justice) 1945, this system of village councils, Gaon burahship had been regularised.

Many decades have been passed since this regulation of the Assam Frontier (Administration of Justice) 1945 came into force. Though it is still in existance but not adequite to the present days crimes and punishment. For example, as per the Assam Frontier (Administration of Justice) 1945, a Gaon burah is empowered to levy fine to the tune of Rs. 50/- only. But in practice, village Kebang sometimes impose fine to the tune of Rs. 20,000/- and above or in kinds like mithuns,cows,pigs, etc.

Research - People and Custom

Mishmis

Ethnographically, the Mishmis of Lohit District (Taraon and Kaman) belong to Indo-Mongoloid stock. Their language belongs to North-Assam group of Tibato-Burman speech family.

Mishmi society is divided into a number of exegamous clans. The society has neither class nor caste system and chieftainship. A Mishmi village consists of a solitary house to many houses. The smallest unit of the society is family consisting of a father, mother, children and some times lineally related kinsmen living together. Father is the head of the family and inheritance is in the male line.

Clan exogamy is the fundamental rule of merriage. Monogamy is the common practice, yet polygamy is also sanctioned. Polyndry is not prevalant. Marriage with affinal relation is prefered and crosscousin marriage is popular. Levirate, sororate and marriage with issuless step mother is not very uncommon. Marriage by negotiation is generally the accepted form, nevertheless, marriage by capture or forceful marriage, elopment and love marriage are also common. Marriage is always settled by paying bride price in the form of cash or kind by the groom to the parents or relatives of the bride.

They believe that precreation is attributed to the will of gods and barenness as well. Some taboo is observed by an expecting mother. In case of male baby, toboo is observed for 10(ten) days and in case of female issue it is for 9(nine) days. Taboo is observed after the delivery. Name is given to the baby by grand parents or elderly persons of the family.

Mishmis have their own concept of death. The dead baby is generally cremated. But in case of child, it is buried. Dead baby in case of accidental or unnatural death, is either buried or cremated depending upon the situation. The cremation site is located outside the village perimeter and normally is in the lower side of the village. Disposal of dead is followed by rituals and observation of the taboo.

A number of festivals are celebrated by Mishmi people, out of which Tamla or Takka and Duiya or Thung are considered to be the main festival. Such festival are agriculture related and are celebrated for bumper crops and general well being of the village community and for the individual family as well.

Under oath and ordeal, Mishmis have some of the most severest forms of oath and ordeal in the form of dipping hands in boiling water and taking out the stones placed there, placing molten lead on the palms, keeping red-hot iron axe simultenously on both the palms etc.

There is functional village council, named Kabeya among the Taraon and Pharai among the Kaman, is in existence. Men of wealth, wisdom and elderliness are influencial and arbitrate disputes, solve cases and award punishment by imposing fines.

Religious beliefs and practices

The faith of Mishmi people is magico-religious and animistic. They have the concept of a supreme god who is believed to be the creator of the universe and regulates the birth of human being in this earth. In addition, they worship family deities, personel deities and a host of spirits, both malevolent and benovolent, who are propitiated by animal and bird secrifices.

Singpoh's

The Singphos are a kin to the Ka-Khiyens of Burma and belong to Indo-Mongoloid stock (Gaint and Dalton). Their language belongs to the Kachin-lolo group of Tibeto-Burman speech family. Their long association with the khampt is reflected through socio-cultural and socio-religious life.

A Singpho village is a cluster of houses without any definite plan. The smallest unit of Singpho Society is the family, which normally consists of parents and children, and sometimes kins living together. Father is the central and dominating person in the family and thus the society is patriarchial in nature. Society is broadly divided into three classes viz., the chiefs, the commoners and the slaves. Chieftainship is in vogue which is hereditory. Chief is the head of village and holds legal administrative power over the village. The plebeians or the commoners are the next who have relationship based on mutual help and assistance with the chief. The third are the slaves, who are discendents of non-singpho progenitors and have adopted the language, culture and clan-names of their master.

Monogamy is the general rule, but polygamy is also practised. Clan exogamy is strictly followed. Marriage is settled by negotiation and the mediator is usually the maternal uncle. The groom is to pay bride price in the form of cash and kind to the family of the bride. Levirate, serrorate and cousin marriage is permitted. One may also marry a widowed step-mother at her consent

Motherhood is considered as gift of god and barrenness is ascribed to some evil spirits. An expectant mother's husband observes some taboo. Name giving is done on the day of delivery or one or two days later accoompanied by pig sacrificing ceremony.

The Singphos dispose the dead by cremation. In case of accidental or unnatural death, the body is buried, small boys and girls and pregnant women as well as their husbands are also buried. If a child dies within one or two days of its birth then it is packed in a bamboo container and left under a tree away from the village.

The Singphos follow Hinayana sect. of Budhism and therefore all the festivals and ceremonies related to this sect is pious to them and are observed accordingly. However, chung kiyan, related to the Buddhist cult is the main festival and from the period their new year begins.

The Singphos had strong and well organized village councils headed and presided by the chiefs, who had authoritative power to arbitrate and decide cases of disputes. But with the passage of time, the previous system has changed into a sort of village panchayat with sitting of old members of village, known as Siphong Tra Tungdai. But Punishment given is in the form of fine. Physical punishment is also given sometime.

Religious beliefs and practices

Long association with the Khamptis had resulted in embracing Budhism of Theraveda sect. Besides Budhism, they have faith in the existence of spirits called Nats who are belived to be responsible for different diseases. The spirits are to be propitiated by appropriate sacrifices and offering of food items. They also believe in black magic. They do not have the concept of a supreme god.

Khampti

The Khampies of the state are living within the Namsai Sub-Division of Lohit district. According to 1971 census the population of the Khampti is reported to be 3953 out of which 2017 are males and 1936 are females.They are a kin to the Ahoms of Assam and belongs to the great Tai race. They are known by various names but they call themselves Tai or Tai-

Khamptis. In Tai language, Khampti has got its meaning as 'Land of Gold' Kham means 'Gold' and 'Ti' means Place.

Clan exogamy and tribe endogamy are observed in marriage. Monogamy is the general rule of marriage. Marriage is settled by the parents with the consent of the girl. Love marriage is permitted. There is no great fuss over seeking divorce. It is an easy process to have divorce on mutual consent of husband and wife, otherwise the party that desires divorce without socially sanctioned causes must pay compensation to the other party in the witness of village council.

The bride price in kinds and cash money is prevailing in the society. Normally one or two buffaloes and cash money from Rs.12/- to Rs.1200/- are given in marriage.

The Khampti male dress consists of a tight fitting jackets of cotton, white turban and deep coloured Lungi PHANOI. The women dress consists of skirt and blouse. In addition to that a scarf is put on round the waist.

The staple food of the Khamptis is rice, Vegetables, fishes and meat are supplemented in their meals. The rice-beer is a favorite beverage among them.

The Khampti houses are spacious than the houses of their neighbouring Mishmis, Singphos, Deoris etc. The houses are built on raised floors with thatched roofs. There are rooms in the houses alongwith balcony.

The Khamptis have different dances and dance-dramas and are staged during the merry-making occasions and different religious festivals.

According to Khampti man may die in two ways-natural and unnatural. If a man dies in old-age or after illness then it is considered to be natural death, otherwise in case of accident, epidemic etc. the death is considered to be unnatural. The rites in connection with the natural death is a bit longer or elaborate one then the unnatural death. Whatever the causes of death, they consult with a holy text entitled 'LAGE-SAMUKTIYA' and buried or cremated the body. The burial as well as cremation ground of the Khamtis lies outside the village.

Religious belief and practices

The Khamptis belong to the Hinayana sect of Buddhism. The religious practices of the common people rather conform to a little more than poly-theism under a thin veil of Buddhist Panthaism, except the monk. The monks are very influential persons, commanding high respect next to the chief in the society. They are well verse in the Buddhist religion

The Khamiyang (Khamjangs)

The Khamiyangs are a small tribe having social and cultural similarity with that of the Khamptis. Their original language is Tai and their script is Shan. But owing to their close contact with the Assamese speaking people for long time and cultural intercourse, they have taken up Assamese as their language.

The Khamiyangs are Buddhist tribe of the theraveda sect. Their religious beliefs, practices and ceremonies are virtually the same as those of the Khamptis and the Singphos.

Meyor

Meyor or Mamyer (Which means paddy cultivator) is the name of little known ethnic group inhabiting in Lohit district. Their number is about 376 as per 1971 census is a homogenous ethnic group exclusively occupies an area of Kibithoo and Walong circle of Lohit district.

Ethnographically, the Meyor are placed under the Indo-Mongolid stock and linguistically they belong to Tibeto-Burmese of Sub-Kachin group of language. These people, in the average are five feet or slightly more in height, except a few exceptional case. Both the men and women are physically stocky and have yellowish to fair skin complexion. They possessa broad and flat nose with prominent cheek bones. Their eyes are oblique with epicanthic fold. Hair is black, straight and thick.

Village

The Meyor live in the houses constructed out of pine wood. The roof, floor and side walls are made of wooden planks and bims. These planks and bims of walls are secured by self locking system. The structure of houses, is supported by stone stabs placed under each posts. The village are generally situated on a flat land available in the area. A village consists

of number of house. A Meyor house has only one door with three to four windows maximum with one hearth. The position of the hearth is always towards the wall that facing the hill or mountains.

Social Life

Family is the smallest unit of a Mayer society consisting of father, mother and their children. In the family, the father is the head and is considered to be the authoritative head in all matters concerning the family. The decent is part lineal and the right of inheritance of property is transmitted through the male members only. If a man dies without any son, then his property passes to his daughter. The ancestral ornaments which kept reserved are given to the girls at the time of their marriage.

The Mayer society has no class, caste or clan distinction. The existence of a strong political organisation is not prominent. Men of wealth wisdom, repute and influence are asked to arbitrate in case of dispute. The arbitrators of Meyor are called Gempo. The village council is constituted on a purely temporary basis.

Monogamy is the common form of marriage in the Meyor society. The Polygamy is strictly prohibited. Marriage is generally negotiated through a mediator, (Driupm Driyok) and bridegroom is to pay bride price to the family of bride in form of cow, pig and articles. Marriage by elopement and love marriage is also practiced.

The Meyor society prefers cross cousin marriage. Direct parallel cousins marriage with one's father brothers son or daughters are strictly avoided. The levirate and sororate form of marriage is also practised by the Meyors.

Meyors are primarily agriculturist. They extensively practise permanent wet rice cultivation. Rice and Wheat are the main food grains. They also eat maize, millet and barley. A large variety wild leafy vegetables, roots, tubers are the parts of their diet. They consume a high quantity of meat of cow, mithun, goat, pig and fowl. They also drink a high quantity of local beer and butter salt tea.

The Meyors believe that the conception is not only the biological cause but also the blessing of god, which is also essential for becoming a mother. As soon as a couple has confirmed that she is pregnant, both the wife and husband observe some taboos for safe delivery. The name of child was given by his father or grandfather at any day. For this purpose, the village Lama is called upon to choose the name of a child.

Death is taken inevitable truth by the Meyor. But they believe that the premature death is attributed to the evil actions of some spirits. The dead is generally cremated. But in case of stillborn or newborn child the dead body is disposed off into the river. The cremation site is located outside the village parameter. The charred bones and ashes are collected on 2nd day of the cremation and mingled the ashes with clay and make several numbers of conical shapes to keep in the small hut constructed in the entrance of the village.

Like any other tribes of Arunachal Pradesh, the Meyors have some oath and ordeals in the forms of placing heated dao on a palm, taking out a stone from boiling water etc. The ordeal is conducted under the supervision of the local high priest.

'SONGKHNU' and 'LOSSER' are the main festivals celebrated by the Meyor people. Those festivals are celebrated with traditional daiety in the month of September.

Religious beliefs and practices

The Meyor religion is a blended of Local beliefs of aminism and Buddhism. They venerate the Buddhist spiritual leaders and worship in the Gompa, which have images of Lord Buddha, Dalai Lama and his disciples. They also worship family deity, village deity, the deity of hills and water, both benevolent and malevolent nature. All these deities are propitiated with fowls and animals sacrifices. The performance of sacrifice is conducted by a shamonistic priest Kahu. Sacrifices and offering of fowls and animals are made to deities/spirits after testing an omen from chicken liver, egg and measuring of land.

The Deories

The Deories in Lohit district are mainly concentrated in the Mahadevpur area of the Namsai Sub-division. They belong to Indo-Mongoloid stock and their language belongs to the Bodo speech family of the Tibeto-Burma group, and has affinity with the

language of Ahom-chutiya, a Semi-Hinduised Tribe. The Chutiyas were said to be divided into four section viz., the Hindu, Ahom, Deori and Bhorali.

A Deori village has several houses. Family is the smallest unit of the society, which includes father, mother, children relatives living together, some times with separate fire places. Society is patriarchal. Earlier, the Deories were the priestly class of the chutiyas, a Tibeto-Mongolian tribe of Assam. They were further divided into four groups (khels) viz., the Dibongiyas, the Borgonyas, the Tengapaniyas and the Patargonyas. The Patargonyas has reportedly become almost extinct. The Deori society has no class and caste system.

Group exogamy is maintained in marriage rules. Monogamy is the general practice, however polygamy is also permitted. Polyandry does not exist. Marriage with affinal relation and cross-cousin marriage is not favoured. Levirate, sorrirate marriage do exist in the society, but marriage with issueless step-mother and daughter-in law is not permitted.

Marriage by negotiation is the accepted form of union between a man and women. Nevertheless, the frequency of love marriage is more. The lovers, usually after falling in love, seek the permission of their respective parents and then the negotiation is started. Marriage by capture or forceful marriage is not in vogue.

Procreation is attributed to the will of God. Taboo is observed by expecting mother and her husband during the period of pregnancy. After delivery also some taboo is observed in the 9 family. There is no difference in the kind of taboo or the number of days it is to be observed for the male issue and female issue.

There is no specific day for name giving ceremony. Generally Tuesdays and Saturday are avoided. The ceremony is performed as and when the remains of umbilical cord fall off. Elderly women of the village are invited to the house and they decide the name to be given and the baby is christened in this way.

Death is accepted as inevitable truth by the Deori people. Unnatural or accidental and premature death is not ascribed to any god. In case of adolescent, the body is generally buried, other-wise dead are cremated. Pregnant woman and stillborn baby are also buried. After disposal of the dead, one weeks taboo is observed by the nearest kins of the deceased. The village people who went with the dead body or attended the rites related with disposal of the dead baby, are cleansed of the taboo on the same day after they return from the cremation or burial ground after performing ritual with a pig sacrifice and feast.

Offering of oblation to the soul of the dead depends upon the financial capability of the nearest kin of the deceased. No fixed period is prescribed for that. It may be performed on the day of the disposal of the dead or may be performed whenever desired at the convenience of the performer.

The Deori people celebrate two main festivals. One falls in the month of April which is called Bee-chhu. The festival is celebrated to welcome the new year of their almanac and asking boon for the good health and well being of the community and also protection from epidemic, natural calamities etc. Animal and bird sacrifice forms the important part of this festival. A kind of rhyme is sung narrating genealogy and praising and welcoming the presiding deity Balia Baba by the Tengaponiya Khel. After invoking the deity, a ritual dance is performed. The Shama (Priest) who has come under the spell of the deity forecasts the coming events of the year and suggests solutions for the various problems.

Another festival which falls in the month of January is also called Bee-chhu. This mainly is celebrated for merry making and entertainment. These festivals are celebrated on community basis. Religious rituals are performed in the temple.

Besides these, there are other festival-like rituals observed by the Deori people. Among these, Hogg-medi, which falls in the month of May and Chiba-medi which falls in the month of August are important ones. The former is agriculture related ritual performed for the protection of crops from insects and pests and asking boon for a bumper yield. In the ritual, rain god is invoked and propitiated by making offerings. The spirits of ancestors are also invocated and offerings are made to them. In the later ritual offerings of newly harvested crops are made to the spirits of ancestors before being taken by the Deori people. The offerings are made in the temple. Animal

and bird sacrifice is the important part of the ritual. Boon is asked for good yield in the coming year and also from the still standing crop. In addition, there are several other rituals observed and performed individually or house wise, which are obligatory. These are performed once in a year or once in three years period.

Under oath and ordeal in Deori society, an accused person has to prove his innocence by swearing in the name of god that if he or she has lied then some untoward incident would surely happen to him or her within a specified period. A goat or a duck or cock is sacrificed in his or her name in the temple by the priest.

Religious belief and practices

The religion of the Deori people can be said Hinduised form of tribal faith. Different groups of Deori society worship different gods and goddesses. Bura-buri (Girasi-gira) also known as Kundi Mama is worshipped by Dibogiyas. Pesa-dewa, son of Bura-buri is worshipped by Tengaponyas and Tamreswari (pishasi) who is believed to be the daughter of Bura-buri, is worshipped by Borgonyas and Patargonyas.

The Miris

The Miris or Mishings are a matley tribe living very scatteredly in the lower recesses of Lohit district. They belong to Mongolian stock and are a kin to their cognate tribes like the Bodos, Garos, Rabhas etc. Linguistically, they belong to Tibeto Burman speech family. They are divided into two main sects viz. the Borogams and the Dohgams, which are again divided into a number of small groups.

A Miri village consists of several houses, which are quite big and some time shelter twenty to thirty inmates. Earlier family was matriarchal, but changed to patriarchal in course of time.

Marriages are costly affairs. Expenditure on food and drink is borne by both the families of boy and girl. Traces of polyandry are also found.

They usually bury the dead. The funeral ceremony includes a substantial feast.

Religious beliefs and practices

Their religion is animistic type. They propitiate malignant spirit. They believe in the immortality of souls.

Adi Somuwas

The Somua-Miris or the so called Adi-Somuwa is a small group of tribal people living in 13 villages of Namsai Sub-division. In what way they had written their surname was not known, but at present they are writing their surnames as Tayang, Ratan, Paleng, Dai, Payum, Pakduk, Paren etc.

Their villages are small to medium. Four to five clans live in a village. Houses are not hurdled in clusters. Unlike the houses of the neighbouring tribes, their houses have floor directly on the ground except few which have ‘chang’ type.

Family is the unit of their society which consists of father, mother and children, both married and unmarried. Nuclear family is more prevalent than joint family. Father is the authoritative head and so descent is patrilineal.

Marriage is the accepted form of union between man and women, exogamy is maintained. Polyandry is not in vogue, however, polygamy is occasionally seen. Monogamy is the general rule. Marriage with affinal relation is preferred and cross-cousin marriage is practised. The Adi-Somuwas practise all forms of marriage like the marriage by negotiation love and elopement, marriage by service and sometimes by capture also. Levirate, sorrorate and widow remarriage is also prevalent. Bride price is to be paid by the boy in cash and kind.

Death at the old age is taken as a natural thing and premature or accidental death is considered as unnatural death. Death of pregnant woman, stillborn babies and prenatal death are attributed to evil spirits. Dead body is disposed off by burial for all type of death. Cremation is not in practice. The burial ground is outside the village boundary. The soul of the dead is appeased by performing rites by the priest in the system of Nriguna Dharma where no animal or bird sacrifices are made.

In Adi-Somuwa society there is no organized village council. In each village, there is a headman who is responsible for the welfare and other matters of the village. Now a days, a system of local self government is functioning by three tier structure viz. Gram Panchayat, Anchal Samity and Zilla Parishad. Decisions on cases and disputes are taken by the

village elders. Oath and ordeals are also practiced by the Adi-Samuwas to prove the innocence and to detect the actual culprit.

Religious beliefs & practices

In earlier days, they were animist, but now they are followers of Nriguna Dharma, since around 1956 under the influence of a Guru who was invited to Joypur village. The Guru belonged to Ahom community of Assam. The doctrine of their religion cannot be explained, however it seems to be of Vaishnavite cult, for earlier they had Namghar (Vaishknavite Temples).

In a nutshell it can be said that much changes have come during the last ten years in the socio-cultural life as well as the religious beliefs and practises of the tribal people, especially among the educated population in the urban areas. There has been deviation from traditional joint family to nuclear family. More and more couples have started adopting small family norms. Marriage by own choice has began to be preferred and likings for educated, modern and earning life partner in place of orthodox type has been growing. Marriage with people from outside the state and inter-tribal marriages are commonly seen.

Modern songs and dances have been compared to suit the modern taste. In case of bride price also, much flexibility is seen in the matter of quantity or amount by keeping the traditional custom in tact. More and more people have deviated from traditional occupation like agriculture to government jobs and other professions and are more depending on it.

In the method of celebration of festivals also changes have began to be seen, except that of the Deori people. In religious beliefs, some have embraced other form of religion. People, in addition to their own traditional methods of treatment, have now opted for modern methods of treatment. Of course, some are exceptions in the matter of such changes.

Almost all the tribes and sub-tribes living in the district have come under the impact of modernization due to various factors like modern education, interaction with people of other states, influence of electronic media etc. There has been change in their food habits. Change is also seen in their personal adornment and dress ups, change in entertainment is also noticed from traditional to modern. Modern luxury items have found dominating place in their houses. Construction of houses has also deviated from traditional to modern with all amenities. Their social manners and etiquette have also shown conspicuous changes during the last ten years.

Archaeology

Tamreswari Temple

It is a small temple of nearly ten square feet constructed out of sand stone and granite with copper roof was first located by Hamilton Votch in 1846. The site was said to be situated at a place some thirteen kilometres north of Paya and about ten kilometres south of Bhismaknagar (Dibang Valley). According to Debala Mitra (1956) the temple was originally caturayatana (having four shrines) built of sandstone and granite and located in the South-east section of the rectangular brick enclosure Prakara roughly measuring 208 x 130 square feet. The compound wall was four feet wide and eight feet high and had as stone gateway on the eastern side according to the inscription at the side, the wall was constructed in 1441 A.D. probably because of the great earthquake of 1950, the temple site is untraceable till today.

Shiva Linga Temple

A Shiva Linga and base of a temple was discovered about two kilometres south-west of the Tamreswari temple site. The temple has two brick-built edifices, one is a solid cube of 0.915 metre side on which a huge Shiva Linga of 1.06 metre height and made of granite was enshrine. The other was a cylindrical base of 1.20 metre in diameter. The Shiva Linga was unearthed in 1965-66 and installed in a temple at Tezu. The bricks found at the site were of abnormally large size, some measuring 38.10 x 38.10 x 7.6 cubic centimetre, well burnt and having metallic sound. Nothing more about the site is known. The temple site could be ascribed to the 15th century.

Mud Fort

An old mud fort enclosed by earthen rampart of size 365.75 x 350.52 square metre with square size in shape was explored near Tin Dolong nallah, nearly six kilometres south-west of Tezu. The earthen rampart was 2.44 metre high and equally broad at the top. The sides were sloping. On its inner and

outer sides ran the two ditches about 6 metres wide and were protected by smaller bounds of 1.22-metre height on their either sides. There was no entrance. In the centre of the enclosure was a prominent mound. Some potsherds were also seen. The mound was circular in shape with approximate diameter of 30 metres and had height of almost 4.5 metres. The mound had an earthen platform of about 16.50 x 10.40 x 1.5 cubic metre protruded towards the south. The mud fort could be ascribed to 14 - 15th centuries A.D. and was probably meant for defence. Nothing much is known about the site.

Temples

There are nine temples, excluding smaller ones, in and around Tezu Sadar area, which have different Hindu Gods and Goddesses as presiding deities. The Shiva temple and the Hanuman temple located nearby the daily bazar area are the largest ones. Both are constructed in RCC and are cuboidal in shape with doomed roof. The Shiva temple has a plinth area of 12x10.5 m2 and was constructed under the patronage of late Shri Tangkakso Chai, a very prominent and influential Mishmi personality of Tezu at that time. The temple lies in east-west direction. The main door faces east direction and the Centre-sanctum in a small structure, almost square in measurement around which is the veranda. Bordering the veranda is raised concrete railing. The Shiva: Linga installed in the sanctum was found nearby Haju area in 1965-66.

The Hanuman temple, which stands in parallel to the Shiva temple, is newly established. It also lies in east-west direction. The main door faces east direction. The sanctum is a small structure around which is specious veranda with raised railing.

There is good response from the devotees and a large number congregate on various occasions like Shiva Ratri, Ram Navami etc and on Mondays and Tuesdays.

Nearby the Shiva temple, is the Durga temple, attached to which is a small kali temple. The temple is a hall-like structure facing east-west direction. The portion towards west has a provision for installation of statue of Goddess Durga, Lakshmi, Saraswati, God Kartikey and Ganesh at the time of celebration of Durga Puja. The structure is cuboidal with CGI sheet roofing and has no architectural design.

The Kali temple is a small round structure joined with the Durga temple with CGI sheet roofing. At the centre is installed a small statue of Goddess kali. The entrance is towards south directions and opens into the Durga temple. The number of devotees vary from time to time, however, there is good congregation on the occasion of Kali Puja.

Gurudwara

There is one Gurudwara nearby the daily bazar in Tezu sadar area. The structure is SP-type with plinth area of 18 x 9 m2 (central hall) excluding the stairs. The land was allotted in 1978-79 and the foundation stone was laid by Mrs. P. M. Singh, IAS (Dy. Commissioner, Lohit District from Dec'78 to July'81). The structure has CGI roofing. The main door opens in east direction. Almost at the Centre in a raised platform is kept the Holy guru Granth Sahib around which is an open space for devotees. On the backside of the Gurudwara is the Guru Ka Langar, a SP-type structure and towards north is the residence of the Panthi, the caretaker of the Gurudwara. The average daily devotees who come to bow in the Gurudwara are about 25, which excludes the rush on the occasions like Gurus birthday and Langars.

Budha Vihar

There is one Buddha Vihar nearby the daily bazar in tezu Sadar area. The Vihar has a plinth area of 30 x 30 m2 and was constructed in 1964. The structure is RCC with CGI sheet roofing. The simple architectural design is of Mahayana style. Before taking over of the Vihar by the Khamptis, who are followers of Hinayana sect of Buddhism, the Tibetans rehabilitated in Tezu who are the followers of Mahayana Sect of Buddhism, use to maintain and look after the Vihar and perform religious rites. Nearby the Vihar, an Assam type residential structure for the monks is constructed. It is customary for the Khampti and Singpho people living in and around Tezu sadar area to supply food for the monks on rotation basis. Reasonable number of devotees and also other visitors visit the Vihar. In winter season and on the occasion of Sangken festival, a good number of them gather in the vihar.

Churches

There are three churches of different denomination in Tezu Sadar area, i.e., one Baptist, one catholic and one Revival.

The Baptist church is the oldest one in Tezu. The church was established in 1963. The land allotted is 2 hectares for church as well as graveyard. Earlier, the structure was a temporary one. Later on a SP-type building with plinth area of 25 x 8 m2 was constructed with CGI sheet roof. The structure is a hall type and lies in the east-west direction. The entrance is towards west. Towards the eastern end of the building is a pyramidal shaped dome in the top off the roof, below which is the pulpit for giving sermon by pastor. The church is on the left side of the road leading to Telluliang village across the Dening stream. The average devotees on Sabbath day are around 400, except the large gathering on the occasions like Easter, Christmas and Good Friday.

The Roman Catholic and Revival churches were built later on. The R. C. Church is a temporary structure and is located at considerable distance from behind the daily bazar. The Revival church is also a temporary structure located nearby the Tezu Nallah beyond the residential complex of Reserve Battalion. In these churches also the congregation is large on the occasions like Easter, Christmas and Good Friday.

Namghars

There is one Namghar in Tezu Sadar area. It is located near the Dharmshala opposite to the Tezu police station. The Namghar was established in 1974. The structure lies in North-south direction and the entrance to it is towards north direction. However, the main gate is in the east direction. The land with an area of 2703.20 m2 was formally allotted in 1978.

The Namghar is a semi-permanent structure with a plinth area 195.75m2 with CGI roof and is almost cuboidal in shape. It has no significant architectural design, but only the traditional shape related with the Vaisnavbite cult initiated by Sri Sri Shankara Deva in Assam. At the one end of the building towards south is a dome shaped raised structure over the roof, below which is the Manikut (sanctum sanetorum). In the Manikut is the Thapana, where Chandra-tap, Guru ashana, Banti, Bhagwat Gita and Kirtan are kept. The numbers of daily visitors who pay visit to the Namghar are about 40-50. However, on the occasions like Bohag Bihu, Bhavana, Kati Bihu and Magh bihu, there is good gathering.

Maszid

There is one Maszid in Tezu Sadar area, which is located in the outskirts of the town towards south direction nearby the bank of the river Lohit. The land area occupied by the Maszid is 60 x 50 m2. The Maszid was established in the year 1973. At present, there are two buildings; one Assam type in RCC and the other is OB type. The total plinth area is 13 x 5.70 m2 out of which 12 x 03 m2 is covered by the OB type structure. The structures have no architectural design of significance but simply Assam type building with some scriptures from the Holy Quran in motifs. The average number of devotees visiting the Maszid on Friday (Juma) is about 200. However, on occasions like Id-ul-Zoha, Moharram, Id-E-Milad and Id-ul-Fitr, the congregation is high.

Electricity and Power

Energy being the basic input for industrial growth and economic development of a country, Arunachal Pradesh can play a vital role as it is estimated to have more than 30,000 MW. of hydro electric power potential for economic development of the state. It is felt necessary to frame a comprehensive plan for development of power in the state and with this consideration a perspective plan covering 10th & 11th Five year plan in respect of Arunachal Pradesh including generation, transmission and distribution network and rural electrification Programme has been prepared. Due consideration have been given on demand of power, availability of power potential in the state and the major centrally sponsored power project in the state under execution/consideration.

In spite of good potential the Lohit district is still having deficit in the supply of power. Three Micro-hydel projects have been commissioned at Ampani, Durahnallah and Tafragam with an Installed capacity of 500 KW, 400 KW, 250 KW, respectively. Besides, there are 12(twelve) more power stations having Diesel generating set. Work of one Micro Hydel project of 2 x 250 KW is in progress in Dos Nallah.

The power position of the district is stated below:

A. Power position as on 2000

Firm	Power	Available (MW)	Requirement	Shortfall
HYDEL	DIESEL	A.S.E.B	Power (MW)	(MW)
1.150	2.099	6.00	12.00	2.75

B. Position of existing micro Hydel as on 2000

Sl. No.	Name of scheme	Firm Capacity	Installed Capacity
1	Ampani	2 x 250 Kw = 500 Kw	250 Kw
2	Tafragam	1 x 250 Kw = 250 Kw	250 Kw
3	Durrah Nallah	4 x 100 Kw = 400 Kw	300 Kw

C. Position of Diesel generating station as on 2000

Sl. No.	Name of station	Installed Capacity	Firm Capacity
1	Hayuliang	200 Kw	200 Kw
2	Walong	2 x 48 Kw	48 Kw
3	Changlagam	15 Kw	15 Kw
4	Hawai	2 x 48 Kw	48 Kw
5	Kibitho	5 x 1 Kw	5 Kw
6	Tezu	800 Kw	800 Kw
7	Sunpura	200 Kw	200 Kw
8	Wakro	48 Kw	48 Kw
9	Chowkham	96 Kw	96 Kw
10	Namsai	125 Kw	125 Kw

District Rural Development Agency

The integrated rural development Programme (IRDP) was introduced in the year 1978-79 and it was extended to the whole of the country from 2nd Oct'1980. The main function of IRDP is to uplift the rural poor people residing below the poverty line by providing them income-generating assets through bank credit and government subsidy. But from 1st April'1999 IRDP was discontinued and in place of IRDP/TRYSEM/DWERCA/GKY, another scheme came into being as Swaran Jayanti Gram Swarozgar Yojna (SGSY).

Development activities are stated below :

a. IRDP Integrated Rural Development Programme.

b. TRYSEM Training of Rural Youth for Self-Employment.

c. DWCRA Development of Women and Children in Rural Area.

d. SITRA Supply of Improved Tool kits in Rural Areas.

e. GKY Ganga Kalyan Yojna.

Jawahar Rozgar Yojna (JRY)

Jawahar Rozgar Yojna was re-named as Jawahar Gram Samridhi Yojna from 1.4.99 with improved/ reformed objectives. But with the merger of employment assurance scheme, Jawahar Gram Samridhi Yojna was again changed to a new scheme viz, Sampoorna Gramin Rozgar Yojna which was lunched on 25th Sept'2001.

IAY

Indira Awas Yojna was a component of JRY prior to 1996-97, but from 1996-97 IAY is treated as a separate scheme and accordingly fund was made available by the Central/State Government on 60:40 ratio. The main objectives of this scheme is to provide dwelling houses for the rural poor people residing in the remote part of the country.

Under integrated rural development (SGSY) individual and self Help Group schemes will be taken up on the basis of preference/demand received from the concerned Self help group/individual Swarozgaris by which the level of income from the agriculture and other allied sector will be uplifted by providing them sustainable income generating assests/ Infrastructure in the rural areas by utilising the locally available raw material and imparting timely training through resource personnels on the line in the department working in the district.

The main bottleneck while implementing the integrated development programme like SGSY are as follow :

a. Due to ill literacy of selected benefeciaries.

b. Social and economic constrains/problem by virtue of their poorness.

c. Lack of motivation

d. Interferance of politicians for selection of right beneficiaries.

e. Low percentage of recovery derived from bank and other field officers

f. Active role played by the intermediators.

(v) Census Concepts

Building

A "Building" is generally a single structure on the ground. Sometimes it is made up of more than one Component Units, which are used or likely to be used as dwellings (residence) or establishment such as shops, business houses, offices, factories, work-shops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have Component Units may be used for contribution of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Permanent houses

Houses in which both wall and roof are made of permanent materials. Materials of wall can be burnt bricks, GI/metal/Asbestos sheets, stone with lime or cement or cement concrete. Roof may be made of tiles, slate, shingle, corrugated/galvanized iron or zinc/ other metal or asbestos sheets, bricks, lime and stone, stone, RBC/RCC or concrete.

Semi-permanent houses

Houses in which either wall or roof is made of permanent materials and the other is made of temporary materials.

Temporary houses

Houses in which both wall and roof are made of materials which have to be replaced frequently. Wall may be made of grass, thatch, leaves, reeds, bamboo, mud, plastic/polythene, un-burnt bricks or wood. Roof may be made from grass, leaves, bamboo, thatch, mud, un-burnt bricks or wood.

Room

A room should have four walls with a doorway and a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and breath of at least 1½ metres and 2 metres in height. An enclosure which is used in common for sleeping, sitting, dining, storing and cooking etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Census house

A Census House is a building or a part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Village

The basic unit for rural area is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognised boundaries is treated as one village.

Town/Urban areas

The following areas are treated as towns/urban area.

a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of the village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 201, following criteria are taken as pre-requisites :

(a) The core town or at least one of the consti--tuents towns of an urban agglomeration should necessarily be a statutory town : and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted :

(i) a city or town with one or more contiguous outgrowths;

(ii) two or more adjoining towns with their outgrowths; and

(iii) a city and one or more adjoining towns with their outgrowths all of which form a contiguous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household may consist of related to each other, unrelated or both. Examples of unrelated household are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, orphanages, etc. These are called 'Institutional Households'. There may be one member household, two member households or multi member households. For census purposes each one of these types is regarded as a 'Household'

If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would be treated as a separate household. The important link in finding out whether it is a household or not is a common kitchen. In a few situations, it may become difficult to apply the definition of household strictly. For example, a person living alone in a census house, whether cooking or not cooking meals, will have to treated as a household. Similarly, if husband and wife or a group of related persons are living together in a census house but not cooking their meals, will also constitute a normal household.

For this purpose of census there are three type of Households i.e., Normal Household, Institutional Household and the Houseless Household.

Institutional household

A group of unrelated persons who live in a institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places like worship, mandaps, railways platforms etc., are treated as Houseless households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in Arunachal Pradesh are given below :

Scheduled Castes

The castes which are scheduled in Assam under "The Scheduled Castes and Scheduled Tribes Lists (Modification) order, 1956", (part II of Scheduled I) are to be treated as Scheduled CASTES IN Arunachal Pradesh. The following are the Scheduled Castes in Assam which are also to be treated as Scheduled Castes in Arunachal Pradesh for 2001 census.

1 Bansphor
2 Bhuinmali or Mali
3 Brittial-Bania or Bania
4 Dhupi or Dhobi
5 Dugla or Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo or Jhalo-Malo
9 Kaibartta or Jaliya
10 Lalbegi
11 Mahara
12 Mehtar or Bhangi
13 Muchi or Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes

In the Presidential Order of 1956, mentioned above, it is said that all the tribes of the Agency are to be treated as Scheduled Tribes. At paragraph 2 of Part II of Schedule III of the order an illustrative list of the tribes of Arunachal Pradesh is provided. It has been mentioned that the Presidential Order is illustrative and not exhaustive with respect to the tribes of Arunachal Pradesh. The names of the following tribes were returned during 1971,1981,1991 and 2001 censuses.

1 Abor
2 Aka
3 Apatani
4 Dafla
5 Galong
6 Khampti
7 Khowa
8 Mishmi
9 Momba
10 Any Naga Tribe

11 Sherdukpen

12 Singpho

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have as script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop,

cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system means a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in those towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrine from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \text{x1000}$$

Crude death rate (CDR)

Ratio of the number of live deaths in a year to the mid year population, normally expressed per 1000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid –year Population}} \text{ x 1000}$$

Natural growth rate

Growth rate is obtained as the different between crude birth and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \text{ x 1000}$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \text{ x 1000}$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \text{ x 1000}$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \text{ x 1000}$$

Total Fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of woman till the completion of reproductive period.

$$TFR = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital Fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of woman till the completion of reproductive period.

$$TMFR = \frac{5 \times \text{S ASMFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age specific mortality rate (ASMFR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infant dying within the first month of life (28 days or under) in a tear per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Late Neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$SBR = \frac{\text{Number of still birth during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of woman in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any related to pregnancy and child births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to woman in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 woman in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 woman in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than his/her place of his/her birth.

Similarly a person is considered as migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational courses that lasted for only few months of a year, she/ he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides she/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relative's houses is in a place where the hospital or parents/relative's house is the place of last residence of the child but not the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of the education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another state of the country (inter-state migration), (iii) Migration from one country to another country. The

first two streams together constitute internal migration, while the last type of movement is called international migration. This present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz., rural to rural, rural to urban, Urban to rural and urban to urban.

Civic status of urban units

Civic status of town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Committee/Municipal Council, Municipality etc.

Size-class of UA/Town

Size–class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ Towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000 to 1,999,999); M4 (500,000 to 999,999); M3 (300,000 to 499,999); M2 (200,000 to 299,999) and M1 (100,000 to 199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,000 population are Class III towns, population with 10,000 – 19,999 are Class IV towns, population with 5000 and 9999 are Class V and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) area by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or family arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are determined to safety, health or morals.

Mega city

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastucture Development in Mega Cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega Cities.

(vii) 2001 Census finding—
Population, its distribution

According to 2001 Census the total population of Lohit District is 143527 with 77314 Males and 66213 Females constituting 13.07% of State population. Out of 14 (fourteen) Circles, Tezu Circle (31304) is the most populous while Kibithoo Circle (953) is least populated. Other Circles in order of their population size are Namsai Circle (28570) Mahadevpur Circle (24447) Chowkham Circle (20086) Piyong Circle (9055) Wakro Circle (6809) Hayuliang Circle (5202) Sunpura Circle (4815) Hawai Circle (3954) Manchal Circle (3032) Chaglagam Circle (2359) Goiliang Circle (1662) Walong Circle (1279).

Out of Total 143527 population of the district 116765 persons (81.4%) are residing in Rural area and 26762 persons (18.6%) are residing in Urban area. Against State's position 79.2 percent population are residing in Rural area and 20.8 percent are in Urban area.

There are 2 (two) Towns in the district. One is Tezu and other is Namsai. The class, status, population in 2001 Census, growth rate, density, Sex ratio, Work participation rate, Literacy rate are given below in a tabular form of both the Towns.

Sl. No.	Size	Name	Class	Status	Population in 2001 Census	Growth rate	Density	Sex ratio	Work participation rate			Literacy rate		
									P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	10 Sq. Kms.	Tezu	IV	CT	15015	(-) 1.7	1501.5	818	31.9	48.8	11.4	80.5	86.3	73.3
2	5 Sq. Kms.	Namsai	V	CT	11747	(+) 47.3	2349.4	811	30.7	47.9	9.6	72.9	79.8	64.1

In general the urban population of the district constitute Hindu, Buddhist, Mahamadan, Sikh, Jain, Christian and others (some local people belong to "Doney Polo," the local religion)

For higher education no separate University is available in the towns as well as in the district. The nearest University is located in Dibrugarh (Assam).

TABLE 1 : DECADAL CHANGE IN POPULATION OF CIRCLES BY RESIDENCE, 1991-2001

Sl. No.	Circle	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Sunpura	4,160	4,160	-	4,815	4,815	-	15.7	15.7	0.0	0.0	0
2	Tezu	26,033	10,762	15,271	31,304	16,289	15,015	20.2	51.4	-1.7	58.7	48.0
3	Hayuliang	7,336	7,336	-	5,202	5,202	-	-29.1	-29.1	0.0	0.0	0

The Table 1 gives the Decadal change in population of Circles by residence in the district. The population of 1991 was 1,09,706 which has increased to 1,43,527 in 2001. In case of Rural and Urban popoulation also almost similar trend of increase of population is noticed. While looking into the popula

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

This Table shows the population size ranges in the inhabited villages. The number and percentage of inhabited villages in specified population size ranges have been worked out at C.D. block level of the district. It can be seen from the table that majority of the villages (70.2 percent) come under lowest population size range of less than 200. It is further observed that at the district level the number and percentage of inhabited villages have been declined considerably in the higher population size ranges and infact there is no villages beyond the population size range of 2000 - 4999.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town
1
2 — Not Available
3
(ii) Census town
1
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns
1
2 — Not Available
3
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria
1
2 — Not Available
3
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
1
2 — Not Available
3
(c) Declassified
1
2 — Not Available
3
(d) Wholly merged with other town(s)
1
2 — Not Available
3

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

This table gives an idea of new towns added in 2001 Census and towns notified\declassified after 1991 Census. It can be seen from the table that no new town has been added in 2001 Census and no town has been declassified in the district after 1991 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	493	100.0	116,765	100.0
11-20	0	0.0	0	0.0
21-50	0	0.0	0	0.0
51-100	0	0.0	0	0.0
101-200	0	0.0	0	0.0
201-300	0	0.0	0	0.0
301-500	0	0.0	0	0.0
501 +	0	0.0	0	0.0
Not known	0	0.0	0	0.0
District Total :	**493**	**100.0**	**116,765**	**100.0**

Population Density (Rural) of the district : 0

In Census the density of population works out as population per Sq. Km. In the vast area of 83743 Sq. Km.of Arunachal Pradesh there are altogether 1097968 people accounted for 2001 Census. So, the density of population of the State is very low in comparison to national average density. The density of India comes around 324 during 2001 Census whereas density of Arunachal Pradesh is 13 only. The same is the case of Lohit district where density of population is 12.6. In the absence of cadastral survey the area figure below district level is not available and as such the village level density of population could not be worked out.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	Data not available					
1911						
1921						
1931						
1941						
1951						
1961	894	894	-	854	854	-
1971	861	881	457	773	795	508
1981	862	881	629	781	794	656
1991	859	880	728	797	834	672
2001	893	914	819	856	866	815

Note : Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the Sex ratio of State and District 1901-2001. It is noticed from the table that the highest Sex ratio 894 was found in 1961 in the State fol-

TABLE 6 : SEX RATIO BY CIRCLES, 2001

Sl. No.	Name of Circle	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sunpura	894	894	-
2	Tezu	820	822	818
3	Hayuliang	675	675	-
4	Manchal	1,005	1,005	-
5	Goiliang	902	902	-
6	Chaglagam	946	946	-
7	Kibithoo	324	324	-
8	Walong	719	719	-
9	Hawai	981	981	-
10	Wakro	863	863	-
11	Chowkham	866	866	-
12	Namsai	849	877	811
13	Piyong	892	892	-
14	Lekang	917	917	-
	District Total:	**856**	**866**	**815**

This table gives the Circle wise Sex ratio of Rural and Urban population as calculated during the 2001 Census. The average Sex ratio of the district is 856. The average Sex ratio for Total Rural area works to 866 whereas it is 815 for Urban area.

lowed by 893 in 2001 Census. In case of Rural area highest Sex ratio (913) is found in 2001 Census. So far as Sex ratio for 1961-2001 in the district is concerned the highest is 856 in 2001 Census followed by 854 in 1961 Census. The lowest Sex ratio in the district is 773. In the Urban areas the lowest Sex ratio is 508 which is also the lowest Sex ratio for last five decades i.e. from 1961-2001 Census.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Tezu	838
2	Hayuliang	828
3	Hawai	788
4	Wakro	863
5	Namsai	889
	District (Rural) Total :	**866**

This Table presents data on Sex ratio by C.D. blocks. It can be seen from the table that the highest Sex ratio (889) has been registered against Namsai C.D. block among five C.D. blocks of the district. The average Rural Sex ratio of the district is 866 only.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. Town	Urban status of town	Sex ratio
1	2	3	4
1	Tezu	(CT)	818
2	Namsai	(CT)	811
	Sex ratio (Urban) for the district :		**815**

The table 9 gives the Sex ratio of Urban Agglomerations (including constituent units)/Towns, 2001. It is noticed that there is little variation of Sex ratio in both the Towns. The Sex ratio of Tezu being 818 is found to be highest (818) while the average district Sex ratio is 815

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	69	14.0	14,878	12.7
700-749	15	3.0	2,627	2.2
750-799	23	4.7	5,574	4.8
800-849	50	10.1	16,553	14.2
850-899	57	11.6	20,752	17.8
900-949	51	10.3	22,892	19.6
950-999	28	5.7	11,943	10.2
1000-1099	75	15.2	11,452	9.8
1100+	125	25.4	10,094	8.6
District Total :	**493**	**100.0**	**116,765**	**100.0**
Sex ratio (Rural) for District :		**866**		

The table 8 shows the Sex ratio of Rural population by ranges. Out of 493 villages maximum of 125 villages (25.4%) fall within 1100+ range of Sex ratio with 10094 population. On the other hand the highest percentage distribution of populationis found to be 19.6% with 22892 population in 51 villages under 900-949 range of Sex ratio. The second highest percentage distribution is 17.8 comes under 850-899 range of Sex ratio with 57 villages. The lowest number is 15 (3.0%) with 2627 population (2.2%) under 700-749 range of Sex ratio.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CIRCLES, 2001

Serial Number	Name of Circle	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Urban	0	0	0	0

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CIRCLES, 2001

Serial Number	Name of Circle	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
14	Lekang Circle	Total	5,082	2,665	2,417	907
		Rural	5,082	2,665	2,417	907
		Urban	0	0	0	0
	District Total :	**Total**	**28,596**	**14,792**	**13,804**	**933**
		Rural	**24,234**	**12,573**	**11,661**	**927**
		Urban	**4,362**	**2,219**	**2,143**	**966**

A Circle wise Sex ratio of population in the age group 0-6 both for the Rural and Urban area of the district is presented in this table. The table shows that the Sex ratio for 0-6 age group in the district is 933 which is almost same with little variation of 6 when compared to Rural Sex ratio. The Sex ratio of district urban areas is found to be little high which is 966. Whle looking into the Circle wise Sex ratio the Walong Circle with 1168 Sex ratio ranks first followed by Kibithoo Circle with 1148. Goiliang Circle is having the lowest Sex ratio 682.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Tezu	3,979	2,073	1,906	919
2	Hayuliang	2,187	1,140	1,047	918
3	Hawai	1,354	694	660	951
4	Wakro	1,397	713	684	959
5	Namsai	15,317	7,953	7,364	926
	District (Rural) Total :	**24,234**	**12,573**	**11,661**	**927**

This table shows the Sex ratio of population in the age group 0-6 for C.D. Blocks. Among the 5 C.D. Blocks of the district Wakro C.D. Block has dominated the Sex ratio with 959. However, in the age group 0-6 years there is no significant difference in Sex ratios among the C.D. Blocks of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	162	32.9	2387	9.8
700-749	17	3.4	1691	7.0
750-799	18	3.7	1659	6.8
800-849	26	5.3	2010	8.3
850-899	23	4.7	2818	11.6
900-949	17	3.4	1860	7.7
950-999	17	3.4	3306	13.6
1000-1099	76	15.4	3798	15.7
1100+	137	27.8	4705	19.4
District (Rural) Total	**493**	**100.0**	**24234**	**100.0**
Sex ratio (Rural) for District :		**927**		

This Table provides the Sex ratio of Rural population in the age group 0-6 years by ranges. It can be seen from the table that as many as 162 villages (32.9 percent) with the Total population 2387 (9.8 percent) fall within the range of Sex ratio below 700. The highest range of Sex ratio 1100+ is found in as many as 137 (27.8) villages where Total population is 4705 (19.4 percent).

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of UA Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Tezu	CT	2,367	1,192	1,175	986
2	Namsai	CT	1,995	1,027	968	943
	District (Urban) Total	**CT**	**4,362**	**2,219**	**2,143**	**966**

This table gives the Sex ratio of population in the age group 0-6 years of Towns. In this age group the average Urban Sex ratio works out to 966. The Sex ratio of both the Towns of this district in the same age group has been recorded as 986 and 943 respectively.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CIRCLE, 2001

Sl. No.	Name of Circle	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

		Urban	**26,762**	**626**	**5,295**	**2.3**	**19.8**

The table 14 shows that the number of Scheduled Castes population in the district is very negligible which is only 1815 (1.3%). The majority of Scheduled Castes population 873 are found in the Chowkham circle. The total Scheduled Tribes population in the district is 54801 (38.2%). Goiliang circle claims highest (98.4%) while it is lowest in the Tezu circle (24.4%).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Tezu	21,104	150	6,447	0.7	30.5
2	Hayuliang	12,255	17	9,799	0.1	80.0
3	Hawai	6,186	2	4,450	0.0	71.9
4	Wakro	6,809	49	3,199	0.7	47.0
5	Namsai	70,411	971	25,611	1.4	36.4
District (Rural) Total :		**116,765**	**1,189**	**49,506**	**1.0**	**42.4**

This table provides number and percentage of Scheduled Castes and Scheduled Tribes population in C.D. Blocks. It will be seen from the table that the number and percentage of Scheduled Castes population are in fact very negligible in all the C.D. Blocks of the district. The highest (80.0 percent) Scheduled Tribes population has been reported from Hayuliang C.D. Block, whereas Scheduled Castes population has been recorded 0.1 percent in this C.D. Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	457	92.7	0	0.0
Less than 5	30	6.1	226	19.0
5-10	3	0.6	83	7.0
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	2	0.4	185	15.6
76 and above	1	0.2	695	58.5
District Total :	**493**	**100.0**	**1,189**	**100.0**

The table represents data on proportion of Scheduled Caste population to Total population in villages. It will be seen from the table that out of total 493 villages in the district there is no Scheduled Caste population in 457 villages. The maximum population of Scheduled Castes fall in the range of 76 and above percent in 1 village. Less than 5 percent Scheduled Caste population has been reported in 30 villages. Altogether Scheduled Caste population has been reported from 36 villages out of total 493 villages of the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	40	8.1	0	0.0
Less than 5	19	3.9	161	0.3
5-10	11	2.2	425	0.9
11-20	11	2.2	1,254	2.5
21-30	19	3.9	3,876	7.8
31-40	18	3.7	3,443	7.0
41-50	13	2.6	2,151	4.3
51-75	44	8.9	10,102	20.4
76 and above	318	64.5	28,094	56.7
District Total :	**493**	**100.0**	**49,506**	**100.0**

The table 17 gives the proportion of Scheduled Tribes population to Total population in the villages. It is observed from the table that highest proportion of Scheduled Tribes population 28,094 (56.7%) is found within the 76 and above range. Besides out of 493 villages in the district maximum villages 318 (64.5%) also come within this range. The lowest number of villages are 11 (2.2%) which fall within 5-10 range while the lowest Scheduled Tribe population is 161 (0.3%) that belongs to less than 5 range.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Tezu (CT)	15,015	96	3,044	0.6	20.3
2	Namsai (CT)	11,747	530	2,251	4.5	19.2
District (Urban) Total :		**26,762**	**626**	**5,295**	**2.3**	**19.8**

Out of 26,762 population in two Urban centres in the district. Tezu Town claim the highest SC population (96). There is 96 SC population in Tezu Town and 530 SC population are found in the Namsai Town (4.5%). So far as ST population is concerned it is 5,295 in the urban areas of which 3,044 are in Tezu Township (20.3%) and 2251 in Namsai township (19.2%).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Tezu	705	1,095
2	Hayuliang	417	949
3	Hawai	0	1,017
4	Wakro	960	1,047
5	Namsai	900	941
District (Rural) Total :		**864**	**975**

The table presents data on Sex ratio among Scheduled Castes and Scheduled Tribes in C.D. Blocks. From the table it can be seen that Sex ratio among ST population is much higher than among SC population in all the C.D. Blocks of the district. In the Rural areas of the district Sex ratio among SC works out to 864, whereas Sex ratio among ST works out to 975.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of U.A. Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Tezu (CT)	655	1,001
2	Namsai (CT)	821	912
Sex ratio (Urban) for the district:		**794**	**963**

It is seen from the above table that the Sex ratio of Namsai (CT) for Scheduled Castes is 821 which is higher than the district Sex ratio. On the contrary the Sex ratio of Scheduled Tribes for the same town is 912 which is lower than the district Urban Sex ratio.

In case of Tezu town it is seen that the Sex ratio of Scheduled Caste is 655 which is lower than the district Urban Sex ratio. On the contrary Sex ratio of Scheduled Tribes for the same is 1001 which is quite higher than the district Urban Sex ratio.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY CIRCLES, 2001

The table 21 shows the number and percentage distribution of Literates and Illeterates by Circles. It is noticed from the table that out of 64,445 Literate persons in the district 41,102 are Males and 23,343 are Females. The highest Literacy rate is found in Kibitho Circle (74.5%), followed by Tezu Circle (70.9%). The lowest Literacy rate is found in Chaglagam Circle (15.8%). In case of Urban i.e. Tezu and Namsai Towns the Literacy rate is 80.5% and 72.9% respectively. Also it is seen that overall district Literacy rate is 56.1% which is moderate and good enough for this remote and difficult region.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu	10,198	6,549	3,649	10,906	4,934	5,972	59.6	69.6	47.3	22.3
2	Hayuliang	3,675	2,716	959	8,580	3,988	4,592	36.5	48.8	21.3	27.5

District (Rural) Total :		**47,153**	**30,651**	**16,502**	**69,612**	**31,918**	**37,694**	**51**	**61.3**	**38.8**	**22.5**

C. D. block level Literacy rate by Sex has been worked out in this table. Among the Males the highest (69.6%) Literacy rate has been registered against Tezu C.D. block and among Females also highest (47.3%) Literacy rate is recorded against the same C.D. Block. The highest gap (35.1%) among Male and Female Literacy rate is found in Hawai C.D. Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	41	8.3	1,024	0.9
1-10	66	13.4	3,267	2.8
11-20	70	14.2	5,201	4.5
21-30	63	12.8	11,228	9.6
31-40	69	14.0	18,723	16.0
41-50	60	12.2	21,044	18.0
51-60	45	9.1	17,607	15.1
61-70	41	8.3	18,239	15.6
71-80	23	4.7	10,247	8.8
81-90	13	2.6	10,135	8.7
91-99	2	0.4	50	0.0
100	0	0.0	0	0.0
District Total :	**493**	**100.0**	**116,765**	**100.0**

Literacy rate for District : 56.1

The table 23 gives the distribution of villages by Literacy rate range. It is seen from the table that highest (70) number of villages come under 11-20 range of Literacy rate followed by 69 villages the second highest number of villages in 31 - 40 range. In case of population the highest is 21,044 (18.0%) fall within the range of 31-40. Only 2 villages (0.4%) fall within the highest range of Literacy rate 91-99 percent. Literacy rate for the district works out to be 56.1 percent.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name and urban status of UA Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu (CT)	10,184	6,096	4,088	4,831	2,163	2,668	80.5	86.3	73.2	13
2	Namsai (CT)	7,108	4,355	2,753	4,639	2,131	2,508	72.9	79.8	64.1	15.6
District (Urban) Total :		**17,292**	**10,451**	**6,841**	**9,470**	**4,294**	**5,176**	**77.2**	**83.4**	**69.3**	**14.2**

The table 24 depicts the number and percentage of Literates by Sex in Towns. The percentage of Literates works out to 80.5 percent and 72.9 percent respectively in Tezu and Namsai Towns of the district. Literacy rate is found more in Tezu Town than Namsai Town. In Tezu Town Literacy rate has been recorded as 80.5% with Male and Female breakup of 86.3% and 73.2% respectively where as Literacy rate is 72.9% with Male and Female breakup of 79.8% and 64.1% respectively in Namsai Town. The highest gap (15.6%) in Male and Female Literacy rate has been recorded in Namsai Town.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu	102	65	37	48	23	25	82.9	90.3	72.5	17.7

4	Wakro	13	8	5	36	17	19	40.6	47.1	33.3	13.7
5	Namsai	534	319	215	437	192	245	69.9	79.9	58.9	21
District (Rural) Total :		**661**	**401**	**260**	**528**	**237**	**291**	**70.5**	**80**	**59.6**	**20.4**

The table provides C. D. Block wise Literates and Illiterates by Sex among Scheduled Castes population of the district. The table shows that in the Rural areas of the district the percentage of Literate is 70.5 percent whereas Literates among Males are 80.0 percent and among Females it is 59.6 percent. Tezu C. D. Block has registered highest percentage of Literates in terms of Female only. The highest (100.0 percent) Literacy rate among Males has been recorded in Hawai C. D. Block. The gap in Male/female Literacy rate of the district is 20.4 percent for Scheduled Castes population.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

91-99	1	2.8	52	4.4
100	12	33.3	46	3.9
District Total :	**36**	**100.0**	**1,189**	**100.0**
Literacy rate for District (Rural) :		**70.5**		

From the distribution of villages by Literacy rate range for Scheduled Castes population it is seen that out of 36 villages where Scheduled Castes population are available in the district as many as 12 villages (33.3 percent) have cent percent Literacy rate and 6 villages fall under '0' Literacy range.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu (CT)	80	49	31	16	9	7	92	96.1	86.1	10
2	Namsai (CT)	230	156	74	300	135	165	53.9	65.3	39.4	25.9
	Lohit (Urban) :	**310**	**205**	**105**	**316**	**144**	**172**	**60.3**	**70.7**	**46.9**	**23.8**

The table depicts number and percentage of Scheduled Castes Literates and Illiterates by Sex in Towns of the district. In the Urban area of the district Literacy works out to 60.3 percent with Male and Female distribution of 70.7 and 46.9 percent respectively. Among the two Towns of the district Tezu Town has registered very high percentage of Literacy among Scheduled Castes population.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu	2,994	1,686	1,308	3,453	1,392	2,061	58	70	47.5	22.5
2	Hayuliang	2,031	1,468	563	7,768	3,559	4,209	25.6	36.3	14.5	21.8
3	Hawai	1,009	689	320	3,441	1,517	1,924	29.9	42.2	18.4	23.7
4	Wakro	1,141	720	421	2,058	843	1,215	45.7	59.4	32.8	26.5
5	Namsai	13,028	7,776	5,252	12,583	5,417	7,166	64.3	74.8	53.3	21.5
District (Rural) Total:		**20,203**	**12,339**	**7,864**	**29,303**	**12,728**	**16,575**	**51.5**	**62.6**	**40.3**	**22.3**

The table shows number and percentage of Literates and Illiterates by Sex in C.D.blocks among Scheduled Tribes population of the district. A C.D. Block wise analysis of this table shows that Namsai C.D.block has the highest (64.3 %) percentage of Literate among Scheduled Tribes population. The highest percentage of Literates among Male and Female are also found in this C.D. block. In the Rural areas of the district the percentage of Literates among Scheduled Tribes population is 51.5 % with Male and Female distribution of 62.6 and 40.3 percent respectively and gap in Male and Female Literacy rate is 22.3%.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	45	9.9	1,062	2.1
1-10	62	13.7	2,908	5.9
11-20	66	14.6	3,585	7.2
21-30	45	9.9	3,086	6.2
31-40	42	9.3	5,663	11.4
41-50	52	11.5	5,648	11.4
51-60	34	7.5	6,035	12.2
61-70	41	9.1	9,366	18.9
71-80	37	8.2	8,289	16.7
81-90	13	2.9	2,833	5.7
91-99	7	1.5	959	1.9
100	9	2.0	72	0.1
District Total :	**453**	**100.0**	**49,506**	**100.0**
Literacy rate for District (Rural) :		**51.5**		

Table 29 shows the Distribution of villages by Literacy rate range it is seen that among 453 Inhabited villages where Scheduled Tribes population reside, only 9 villages have 100.0 percent Literacy and as many as 45 villages have reported '0' Literacy rate. The highest number of villages (66 villages) fall under Literacy rate range of 11-20. The table suggests moderate Literacy rate because in the Literacy rate range in between 41 to 90 about 39.0 percent villages exist.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Tezu (CT)	2,097	1,177	920	947	344	603	84	93.1	74.7	18.4
2	Namsai (CT)	1,657	912	745	594	265	329	89.2	94.6	83.3	11.3
	Lohit (Urban) :	**3,754**	**2,089**	**1,665**	**1,541**	**609**	**932**	**86.2**	**93.8**	**78.3**	**15.4**

The table shows number and percentage of Scheduled Tribes Literates and Illiterates by Sex in Towns. In the Urban area Literacy rate works out to 86.2 percent with Male and Female distribution of 93.1 and 74.7 percent respectively. The gap in Male and Female Literacy rate is significant particularly in Tezu Town, while we compare Male Literacy rate of 2 Towns it is insignificant but it is significant while we compare Female Literacy rate of both the Towns.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN CIRCLES, 2001

Table 31 shows the number and percentage of Main workers, Marginal workers and Non workers by Sex in Circles. It is noticed from the table that out of 1,43,527 Population 51049 (35.6%) are Main workers, 9302 (6.5%) are Marginal workers and 83,176 (57.9%) are Non workers in the district. It shows that the percentage of Non workers are considerably more than the Workers. While looking in to the Circle wise distribution of Main workers it is noticed that Kibitho Circle ranks first with 68.3% followed by Walong (49.1%) and Chaglagam (48.1%). Lekang Circle shows the lowest percentage (26.4%) of Main workers. The highest number of Marginal workers is found in Lekang Circle (15%) followed by Goiliang Circle (10.2%). While Kibithoo Circle with 0.7 % Marginal workers ranks the lowest. As regards the Circlewise distribution of Non workers it is seen that Tezu Circle with 63.4 % ranks first of all the Circles followed by Namsai Circle (61.4%). The lowest number of Non worker is found in the Kibithoo Circle (31.0%).

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

This table gives C.D. Block level data on Main workers, Marginal workers and Non-workers by Sex. Among C.D. Blocks of the district Hawai C.D. Block claims highest work participation rate with 51.5 percent as Main workers. The highest Marginal workers with 10.1% are recorded against Namsai C.D. Block. It is noticed that Female Marginal workers are much more than its Male counterpart.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name and urban status of UA Town	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

				(51.3)	**(48.7)**	**(5.7)**	**(0.9)**	**(44.8)**
		Females	**66,213**	**20,660**	**15,246**	**1,714**	**204**	**3,496**
				(31.2)	**(73.8)**	**(8.3)**	**(1.0)**	**(16.9)**

Note : Percent of Worker to total worker are given in brackets.

This table shows that 57.3 percent of Total workers are Cultivators, 6.6 percent are Agricultural labourers. 0.9 percent are Household Industry workers and 35.3 percent are Other workers. While looking into the Circle wise distribution of Workers, Manchal Circle is having highest numbers of Cultivators (93.2%). Piyong Circle is having highest number of Agricultural labourers (25.1%). A very low percentage of households are engaged in Household Industries. The highest of which is only 1.4 percent claimed by Namsai Circle. It is seen that Kibithoo Circle claims highest percent of Other workers (83.9%).

It is evident from the table that the economy of the district is primarily dependent on agriculture which is supported by the fact that Cultivator and Agricultural labourers together constitutes 64% of the Total workers. The Female work participation rate in the field of Agriculture is something very remarkable. In the district the Female work participation rate as Cultivators is 73.8%.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

				(35.8)	**(77.8)**	**(8.5)**	**(0.9)**	**(12.7)**

Note : Percent of Worker to total worker are given in brackets

The table 35 shows the distribution of Total workers by Sex according to four fold industrial categories in C.D.Blocks is highlighted in this table. In terms of percentage Namsai C.D.Block claims highest percentage of Cultivators with 70.5 percent. Tezu C.D. Block with 52.8 percent Cultivators ranks last among the C.D.Blocks of the district. The percentage of Agricultural labourers and Household Industry workers is found to be very insignificant in all the C.D.Blocks of the districts.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
				Number (Percentage)				
1	Tezu (CT)	Persons	15,015	4,797	297	145	93	4,262
				(31.9)	(6.2)	(3.0)	(1.9)	(88.8)
		Males	8,259	4,028	164	91	79	3,694
				(48.8)	(4.1)	(2.3)	(2.0)	(91.7)
		Females	6,756	769	133	54	14	568
				(11.4)	(17.3)	(7.0)	(1.8)	(73.9)
2	Namsai (CT)	Persons	11,747	3,610	119	70	54	3,367
				(30.7)	(3.3)	(1.9)	(1.5)	(93.3)
		Males	6,486	3,107	95	60	46	2,906
				(47.9)	(3.1)	(1.9)	(1.5)	(93.5)
		Females	5,261	503	24	10	8	461
				(9.6)	(4.8)	(2.0)	(1.6)	(91.7)
District (Urban) Total :		**Persons**	**26,762**	**8,407**	**416**	**215**	**147**	**7,629**
				(31.4)	**(4.9)**	**(2.6)**	**(1.7)**	**(90.7)**
		Males	**14,745**	**7,135**	**259**	**151**	**125**	**6,600**
				(48.4)	**(3.6)**	**(2.1)**	**(1.8)**	**(92.5)**
		Females	**12,017**	**1,272**	**157**	**64**	**22**	**1,029**
				(10.6)	**(12.3)**	**(5.0)**	**(1.7)**	**(80.9)**

This table presents data of Workers by Sex in four categories of Economic activity of Towns. In the Towns most of the working force belongs to the category of Other workers. It is evident from the fact that in average 90.7 percent of Workers categorised as Other workers whereas 4.9 percent Cultivators, 2.6 percent Agricultural Labourers and 1.7 percent Household Industry workers.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available			
			Education	Medical	Improved drinking water	Post Office
1	2	3	4	5	6	7
1	Tezu	41	18	5	37	10
		(100)	(43.9)	(12.2)	(90.2)	(24.4)

		(100)	(26.2)	(4.8)	(95.2)	(7.1)
5	Namsai	140	81	14	138	18
		(100)	(57.9)	(10.0)	(98.6)	(12.9)
	District Total :	**493**	**167**	**40**	**475**	**39**
		(100)	**(33.9)**	**(8.1)**	**(96.3)**	**(7.9)**

Serial number	Name of C. D. block	Type of amenity available					
		Telephone	Transport communications	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	8	9	10	11	12	13
1	Tezu	9	21	0	1	30	32
		(22.0)	(51.2)	(0.0)	(2.4)	(73.2)	(78.0)
2	Hayuliang	1	20	1	1	49	25
		(0.5)	(10.5)	(0.5)	(0.5)	(25.8)	(13.2)
3	Hawai	0	21	0	0	25	8
		(0.0)	(26.3)	(0.0)	(0.0)	(31.3)	(10.0)
4	Wakro	7	9	1	0	32	24
		(16.7)	(21.4)	(2.4)	(0.0)	(76.2)	(57.1)
5	Namsai	11	34	2	1	61	95
		(7.9)	(24.3)	(1.4)	(0.7)	(43.6)	(67.9)
	District Total :	**28**	**105**	**4**	**3**	**197**	**184**
		(5.7)	**(21.3)**	**(0.8)**	**(0.6)**	**(40.0)**	**(37.3)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table reveals the brief analysis of various amenities which are available in each C.D. Block of the district. It is seen from the table only that 33.9 percent of Inhabited villages have the Educational facilities, 8.1 percent villages have Medical facilities and 96.3 percent villages have improved Drinking Water facilities. Out of 493 villages only 39 villages have the Post Office facility and 28 villages have the Telephone connection. Transport Communication facility is available in 105 villages and Power Supply is available in as many as 184 villages which is about 37.3 percent of Total Inhabited villages.

A C.D. Blockwise analysis shows that the Education facilities is highest in Namsai C.D. Block where 57.9 percent of the villages have Educational Institutions. The position of Medical facilities is in general low in every C.D. Block. The position of Medical facility is remarkably low in Hayuliang, Hawai and Wakro C.D. Blocks. The facility of improved Drinking Water is best in Hayuliang C.D. Block where it is available in 99.5 percent of the villages. The availability of approach by Pucca Road and availability of Power Supply is fairly good in all the C.D. Blocks. It is highest 78.0 percent in Tezu C.D. Blocks in respect of Power Supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available			
			Education	Medical	Improved drinking water	Post Offoce

	District Total:	**22,564**	**48,255**	**5,993**	**5,799**	**70,096**	**88,139**
		(19.3)	**(41.3)**	**(5.1)**	**(5.0)**	**(60.0)**	**(75.5)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the house hold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is con sidered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

A C.D. Blockwise distribution of Rural population served by different amenities can be seen from the table. This table depicts that 66.7% of Rural population is served by Educational Institution while 98.9 percent of Rural population have Drinking Water facility. Only 24.1 percent of population have Medical facility and 33.7 percent of Rural population served with Post Office facility. Telephone facility is available to 19.3 percent people, Transport and Communication is available to 41.3 percent people whereas availability of Banks and Agricultural Credit Societies are as low as about 5 percent and on the contrary 60 percent people are enjoying the facility of Pucca Road and Power Supply is available to 75.5 percent of the Rural population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :				
(a) Primary School	148	134	51	333

6. Banks :				
(a) Commercial Bank	39	75	375	489
(b) Cooperative Bank	19	37	436	492
7. Agricultural Credit Societies	10	35	445	490

The table 39 shows the distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available. The table reveals the fact that the villages where Education facilities are not available but they are mostly available within the maximum range of 10 Kms. But the picture is different in case of other amenities like Medical, Post Office, Telephone, Bus Service, Bank, Agricultural Credit Societies, etc. In these cases these amenities are mostly available beyond the range of 10+ Kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communi-cations	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

There is no Statutory Town in Arunachal Pradesh. All the 17 Towns of the State are in the status of Census Towns. The nearest Statutory Town are located in the neighbouring State Assam. As such, the distance range from the nearest Statutory Town is mostly 51+ Kms from the Inhabited villages where different amenities are available.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water	Post Office	Telephone	Transport communi-cations	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table shows the distribution of villages according to Population Range and Amenities available. This district is very thinly populated area where Density of population is 12.6 only and it is evident from the fact that out of Total 493 Villages of the district 424 Villages fall under Population Range of 1-499.

The table further reveals the fact that bigger villages are having higher proportion of different amenities in comparison to smaller villages in terms of population.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Tezu	41	0	0	0
2	Hayuliang	190	0	0	0
3	Hawai	80	0	0	0
4	Wakro	42	0	0	0
5	Namsai	140	0	0	0
	District Total :	**493**	**0**	**0**	**0**

Note : Cultivable area = irrigated area + unirrigated area

The Area figure below district level is not available. As such, the information to be incorporated against column number 4, 5 and 6 may be treated as N.A.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

There is no Statutory Town in the district. So information to be incorporated in the town may be treated as NIL

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

There is no Statutory Towns in the district. So information to be in corporated in the town may be treated as NIL.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 1,0000 population
1	2	3
1	Namsai (CT)	2
2	Tezu (CT)	6
	Distrct Total :	**5**

The number of Beds in Medical Institutions per 1,000 population in Urban areas of the district is 5 only whweras it is 2 and 6 respectively in Namsai and Tezu Towns.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

There is no Slum Area in the District.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Namsai (CT)	Plywood Furniture Sown Timber	Ginger Muster Seed Wooden Furniture
2	Tezu (CT)	Wooden Cane & Furniture Handloom Product	Ginger Milk & Milk Product Cane

There are Two Towns in the district, Furniture and Sown Timber are manufactured in Namsai (CT) while Cane, Wooden furniture and Handloom product are manufacftured in Tezu (CT). The important export items are Ginger, Cane and Milk products.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes

	3+ rooms	320	128	192	2	1	1	79	21	58
	Median number of rooms	2	2	2	2	2	2	2	2	2
	District Total :	**27,289**	**21,300**	**5,989**	**493**	**237**	**256**	**8,630**	**7,616**	**1,014**

Living status/condition of households has been reflected in the table.

The table-48 gives the distribution of Households by tenure status and number of Rooms occupied by Total population, Rural and Urban Scheduled Castes and Scheduled Tribes population in the district. The tenure status used in this table are Owned, Rented and Others with no exclusive room, one room, two rooms, three rooms , 3+ rooms and madian rooms. It is found from the table among the Total Household the highest number of two rooms households i.e. 5986 is found in the household with Owned category followed by one room category i.e. 4702 while the lowest is the Median number of rooms i.e. only 2. In the rented category majority of households (1509) use to occupy one room followed by two rooms i.e. 1205.

The lowest number of Households among the rented category is only 2 in the median number of rooms.

In case of others category majority of households use to occupy two rooms i.e. 3082 followed by one room i.e. 2054. The lowest number of households use to occupy median number of rooms (4) in the others category.

In case of Rural in the Owned category majority of households use to occupy two rooms (5501) followed by one room (4404) while in the rented category proportionately one room is occupied by the majority of households (646) followed by two room (593). In the others category of households in the rural areas it is seen that maximum households (1837) use to occupy two rooms followed by one room (1492). In urban areas under owned category maximum number of households (485) use to occupy two rooms followed by three rooms (298). In rented catewgory majority of households (1245) use to live

in two rooms followed by three rooms (817) Among the Scheduled Castes and Scheduled Tribes maximm households i.e. 49 and 2259 use to occupy two rooms in the owned category while in the rented category maximum number households (69) and (94) use to live in one room. In the others category among the Scheduled Caste maximum of 104 households use to live in two room while 465 households among the Scheduled Tribes population also use to live in two rooms.

It is significant to note that in all the three categories Owned, Rented and Others, Households including Schedules Castes, Scheduled Tribes and for Total population the Households proportionately use to occupy either one room, two rooms or three rooms. Number of Household occupying more than three rooms are comperatively found to be less which is a singificant characteristic of the households.

TABLE 49 : NUMBER AND PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source : Census of India 2001, H series: "Tables on Houses, Household amenities and Assets."

Note:

Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent : 2 Semipermanent houses refer to those houses made of other types of materials

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Percentage distribution of Households living in Permanent, Semipermanent and Temporary houses in the above table shows that in the Rural areas 80 percent Households live in the Temporary houses mainly made of Bamboo and Leaves reeds. Only 10 percent Households live in the Permanent houses and these houses are mostly Govt. quarters located in different Circle Hqs. Permanent houses are infact not available other than Circle Hqs. The table further shows that in Urban area 38.3 percent of the Household live in the Permanent houses and these Permanent houses are mostly Govt. quarters. However, during the last decade the scenario has been changed little. Some Private Permanent houses have come up particularly in Urban areas. The housing condition of the interior villages almost remained same.

TABLE 50 : NUMBER AND PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

The table 50 gives the percentage of Households having improved Drinking Water source, Electricity, Bathroom, Toilet and Drainage facility available in the district. While observing the improved Drinking Water facility of the Total Households, Lekang Circle with 93% ranks first and Hawai Circle with 29% ranks lowest. In case of Rural also Mahadevpur comes first with 93% while Hawai Circle with 29% ranks lowest. Out of the two Urban certres Tezu being the highest with 92% ranks first. In case of supply of Electricity Hayuliang Circle ranks first with 70% while Chaglagam with 2% of supply of Electricity comes last. In case of Tezu Town with 78% ranks first Bathroom facility of Households appears to be negligible which is only 19% for Total Households, 10% for Rural and 48% in two Urban areas. Toilet facility of the households in the district is 49%. In Rural areas it is 38% and in case of Urban it is 88%. As such the Inhabitants of Urban areas mostly having the Toilet facility.

Drainage system is found to be very poor in most of the Circles except in Walong Circle. The percentage of which is 72%. In average 20% of Total Households are having the Drainage facility.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table-51 shows the number and percent age of Households by type of Fuel used for Cooking 2001. It is noticed from the table that as many as 81.6% of Households in the district use Firewood for Cooking and its proportion is quite high (90.1%) in the Rural areas. So far as use of Firewood for Cooking

by the Circles, Goiliang and Chaglagam Circles ranks first (99.7%), followed by Manchal (99.4%), 61.3% of Household of Tezu Circle using Firewood for Cooking purpose comes last. Only 15.3 percent Households using the Cooking Gas (LPG) in the district. A negligible percentage of households use other types of Fuel for Cooking purpose.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table-52 shows that out of 14 Circles majority of members of households of Tezu Circle (3108) avail the Banking Service facility followd by Namsai Circle. Lekang (666) and Chowkham (648) are also another two Circles which rank second and third position in availing of Banking facility. The facility of Telephone (947), Bicycle (3675), Scooter, Motorcycle (641), Car, Jeep, Van etc.(135) are also mostly availed by majority of households of Tezu Circle. Next to Tezu the households of Lekang Circle avail the facility of Bicycle (2363) follwed by Namsai Circle (2362). In Chowkham Circle also facilities of Telephone, Bicycle, Scooter, Motor cycle, Car, Jeep are available. In three Circles namely Chaglagam, Kibitho and Walong Circles Telephone facility is not available.

Major social and cultural events, natural and administrative development and significant activities during the decade

The major tribe inhabiting in the Lohit District are the Mishmis, the Khamptis and the Singphos. The Mishmis worship supernatural objects while the Khamptis and the Singphos are Buddhist of Theravada section.

The Mishmis have customary practices to wear costumes during the performance of festival and particularly dances. While the Buiya is a dance performed for entertainment, but Nuiya is a ritual dance performed by priest to appease different spirits. The male dancer wears a loincloth, a sleeveless jacket, a Turbon and earring. The female dancers a blouse, a long skirt reaching down to the ankle with a short one wrapped over it and side bag on the left side, necklaces large silver ear plugs and silver fillet with its strap studded with coins land couries. During the performance of ritual dance the priest put on a forehead band decorated with a few of couries on extra sword and a necklace studded with tiger's teeth and fitted with a few metal bells in addition to usual dress ceremonies and festivals have special impact on the life of the Mishmis. The Mishmis believe that

accident, natural calamities and good and bad happenings are influenced by the act of evil and good spirit. So they perform ritual dances and ceremonies to propitiate the spirit responsible for it.

The Khamptis and Singphos are Buddhist and have many dance drama bearing ethical lesson. They also do not have special costumes for performing ceremonies. The dancer wears masks for dance drama.

The Khamptis and Singphos observed some religious rites and practices called 'HAWAN' for three months during rainy season. During this period they abstain from taking intoxicating drinks, do not kill any living being and join in any entertainment. The older people engage themselves in prayers and reading the scriptures.

Festivals

The Mishmis

The Kaman & Taraon (Ta-Wrah) Mishmis traditional festivals are Tano, Changrang or Tajangpu, Namsang, Nu or Thung. These festivals are performed individually by the members of each family for peace, prosperity, life longivity, good health, communal harmony etc. Out of these festival Duiya or Thung is the most important and main festival of the community. As such, now a day, Tamladu festival is observed on a community basis by Kaman and Taraon. The importance of the festival is to bless for welfare of the community as a whole, ward off evils from the society and for abundant crops etc. Other ceremonies like Matai/Jab-Malu are celebrated to appease the creator of the universe. It is propitiated for good birth and longivity of life. Broh-Hutung/Jium Dumay festival is celebrated for peace & prosperity, of each family. Bro/Dumaypersonal deity saveguards from evil spirit who cause harm to health and ward off accident, Kambi rituals are performed for the relief from diarrhoea.

The Khamptis

Sangken is the important Budhist festival of the Khamptis celebrated every year in the month of April. The image of Lord Budha kept in the temple is brought out and washed ceremoniously with great devotion. The people also observe seven other festival ceremonies. These are, (1) Nawasang (Naw-wa) Sitang, (2) Sare-Sitang, (3) Mebi Sitang, (4) Wa-Sitang, (5) Chowmoon Kandow Poi, (6) Kathia Poi, and (7) Wah-lu poi . Poi-lung-lung is another important religious festival for observance of the mortuary rites of the Buddhist monks. The Khamptis are not free from the influence of their ancient animistic beliefs and faiths. Therefore, even today many of the members and families of the community observe certain ritual to appease the village deity (phi-moung) and worship once in a year to ensure prosperity of the village.

The Singpho

The Singphos also celebrate sangken festival like that of the Khamtis. The main festival of the Singpho is the Shapawng –Yawng. Besides, they believe in a number of spirits called Nat, who are appeased by sacrificing of domestic animals for the general welfare of the community as a whole. The district Administration helps the society/community by giving man and machinery to organize the festivals.

In the early time Mishmi people used black and Maroon colour dress for males and white & yellow colour for the females. Now a day they use multiple coloured dress with design. Unnecessary restriction/ taboos have been minimized. Some changes have taken place in Khamti & Singpho society and traditional customs in terms of dress is not strictly followed. The people are interested to wear modern dresses which are available in the local market in cheaper rate instead of the age-old traditional dress. However, few people are still in the habit of using their traditional dress.

The concept of tribe endogamy is changing fast in the Mishmi society. Orthodox and superstitios do no exist and the people have developed progressive attitude. The cultural literary society has played a major role in smooth functioning of the society. Certain modification is noticed in terms of dressmaking. The Mishmi women garment is unique .In olden days they preferred to live in joint family but at present they mostly prefer nuclear family. The people also adopt permanent/wet rice cultivation instead of age-old jhuming method of cultivation. They have also taken up the use of plough, bullock, tractor etc. in cultivation. They have also started in growing of cash crops like mustard, ginger, cardamom etc. The growing of tea

and orange is also an important occupation change of the people. The Khamti and Singphos are having cultural societies of their own which extend help and cooperation to needy people of the societies. The Khamtis are one of the advance tribes in Arunachal Pradesh. They have their own script too.

Natural and Administrative Development

Lohit District is one of the largest district in Arunachal Pradesh, even after constitution of the Dibang Valley as a separate district. This area was known as the land of Parsuram the great Saint of India since very long time. The disrict is sparsely populated by different tribes mainly Miju Mishmis, Digaru Mishmis, Khamptis, Singphos, Meyors etc. However, the Deories, the Miris, Adivasis, Morans are permanently found settlement in the area bordering the State of Assam. The district is strategically bordering with Tibet (China) and 2 (Two) circle administrative headquarters namely Kibithoo, Chaglagam are at a stone throw distance away from the International border.

For the Administrative convenience, the district is divided into 14 Administrative Circles (including 2 Circles namely piyong and Manchal are created during 1997 and 1998 respectively with two full-fledged sub-Division, one is Hayuliang and the other is Namsai. Namsai has been further upgraded from SDO to ADC's HQ. Since 2000. Constitution of the district with several-Circles has brought the Administration closer to the people for accelerating the developmental process.

Deputy Commissioner is the Administrative Head who supervise, control and coordinate all administrative and developmental works of different departments. The Deputy commissioner is also the head of the judiciary in the district who exercise the powers of district magistrate and session judge.

With the introduction of Panchayat Raj system in the states, various developmental activities are being initiated and implemented through the Panchayat Raj level. As far as Lohit District is concernd there are 8. Anchal Samities and 114 Gram Panchayat which cover the entire population. The power and function of the Panchayat Raj are well defined on the Panchayat Regulations. The Panchayat Raj system is, however, discontinued in 1997 and at present not in operations.

The local people who were hither to averse to the administration and its activities have off late realised the importance of the administration. The people have become more political conscious since Panchayat Raj came into existence and more so after Arunachal Pradesh attained full statehood with Legislative Assembly of its own. Participation of the people during earlier elections has been very promising. This certainly indicates their maturity and consciousness in the political sphere.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest of the distruict

The important religious and historical places are

(a) Parasuram Kund

It is 21 Km. distances to the North East of Tezu situated in lower reaches of River Lohit. It is a famous religious place for the Hindus. Every year thousands of people from different parts of the country visit the kund for holy dip on the occasion of Makar Sankranti. It is also a tourist interest place.

(b) Dharam Sanghni Temple

It is an important religious place of Buddhist located at Phanneng village under Piyong circle and about 16 Km. from Namsai Town. Thousands of people visit the temple for prayer to Holy Script on the occasion of Sangken Festival and other religious important occasion.

(c) Era Sutong Kongmu

This holy Buddhist pragoda is situated at Empong village, about 14 Km. from Chowkham. Thousands of people visit the Pragoda to offer prayers to the 'Era Sutonge' on the occasion of Sangken festival and other occasions of religious importance.

Places of Tourist interest

Parasuram Kund

It is 21 Km. away from Tezu, situated in the bank of the Lohit river endowed with excellent scenic beauty surrounded by mountains ranges and wonderful network of streams and brooks, Parasuram kund finds its name mentioned in the Kalika- Purana and is of great religious importance. A common belief of the people is that holy dip on the occasion of Makar Sankranti at Parasuram kund is sufficient to wash away one's sin.

Since the establishment of the Department of tourism in the district, the development of this area has been taken up with the initiative of the state government. The matter was taken up with the Department of tourism, Government of India and an amount of 13.8 lacs was sanctioned by the Government of India, for construction of Tourist Complex at Parasuram kund.

Glow Lake

At 5,000 ft. above sea level on eastern fringe of Lohit District lies 8 Sq. Km. of natural lake endowed with a back ground of snow clad mountains surrounded by rich flora and fauna.

Since 1985, proposal from the concerned department was initiated to develop a tourist centre at Glaw with proposals for construction of barrack type accommodation at the lakeside and development of the eating facilities.

The maintenance of tourist interest places particularly Parasuram kund is being done by the Government, off late Parasuram Kund improvement Society has taken initiative to mobilize resources towards the maintenance of Parasuram Kund.

Dong Village

Millennium First Sunrise was seen in this village. It is located in a valley along the Lohit river on the right and surrounded by picturesque mountains and beautiful landscape.

Namti Plan

It was a Battle Field of India VS China in 1962, which was located at Walong.

War Memorial

It is located at Walong, which was constructed by Army authority.

Scope of Village Directory and Town Directory

The Village Directory and the Town Directory present data on amenities available to the people in each village and town. The village Directory also indicates the land use statistics in respect of each village.

The data included in the village and Town Directory are one of the most important compilation of Census, as the data presented are considered most useful by the scholars, the planners, the Administrators and other data users.

The Village Directory gives for each village particulars about Total Population and number of Households, Amenities available such as Educational and Medical Institutions, Drinking Water supply, Post, Telegraph and Telephone, Communication, Banks, Agricultural Credit Societies non Agricultural Credit Societies, Cooperative Societies, Recreational and Cultural facilities, Approach to Village, nearest Town and Distance, Power Supply, News Paper/Magazine, Income Expenditure, Important commodities, Land and Land use pattern etc. Village Directory data were collected on the basis of the position as existed to link villages with CD (Community Development) Block during 2001 Census.

The format of village Directory is basically on the pattern canvassed in 1991 Census except modification and addition of a few more columns. In column 9 the facilities on Telephone is newly added to know the present day need of such facilities in villages. Village Directory information for the amenities on Education, Medical, Drinking water, Post Telegraph, Telephone and communication has been furnished in such a manner that in case an amenity is not available within the village a dash (-) is shown in the column and next to it in brackets the distance in broad ranges Viz., >5 kms, 5 – 10 kms and 10 + Km. of the nearest, place where the facility is available is given in order to gauge how far the amenity naturally serve the purpose in the village under reference.

While ascertaining a number of schools in a village under column 6 of the village Directory format the following methods have been adopted.

If there are composite schools like middle schools with primary classes or secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with Primary classes, the number of Primary Schools in the village is given as three and that of Middle Schools as one even though there may be only three educational institutions. So also in case of Secondary Schools. Like wise in case of Medical

amenities in column 7 of Village Directory format, if in a Hospital there is Maternity Home and Child Welfare center Family Welfare center and T.B. clinic center etc. all these have been counted separately.

Town Directory Statement

The Town Directory consist of seven Statements (Statement I – VII). All these are almost similar to those adopted in 1991. In the Town Directory the data on amenities and other aspects are presented in codes for want of space. The infrastructure of amenities and facilities available in urban area is analyzed by taking the class of town into consideration. The data on municipal finance by civic status in the Statement III in respect of town in Arunachal Pradesh are not available. There is no statutory or non statutory bodies managing the civic administration of the town in Arunachal Pradesh. The roads, buildings and other civic amenities are maintained by the Public Works Department (State) and the Central Public Works Department. There is no slum area in Lohit district. The column for Adult literacy classes/centers in Statement – V is introduced in relation to a particular level of education in view of the minimum needs Programme of the Planning Commission.

If there are more than one Medical or Educational institutions of any type the number of such institutions have been indicated within brackets against the respective codes.

PART A
VILLAGE AND TOWN DIRECTORY

Blank

SECTION I

Village Directory

(a) Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

.The Village Directory format has 25 columns and the details given under each column are for the village are as follows:

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes:

(i)	AllopathicHospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for

different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VIIA List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VIIB List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates C D Block wise number of villages under each

Gram Panchayat.

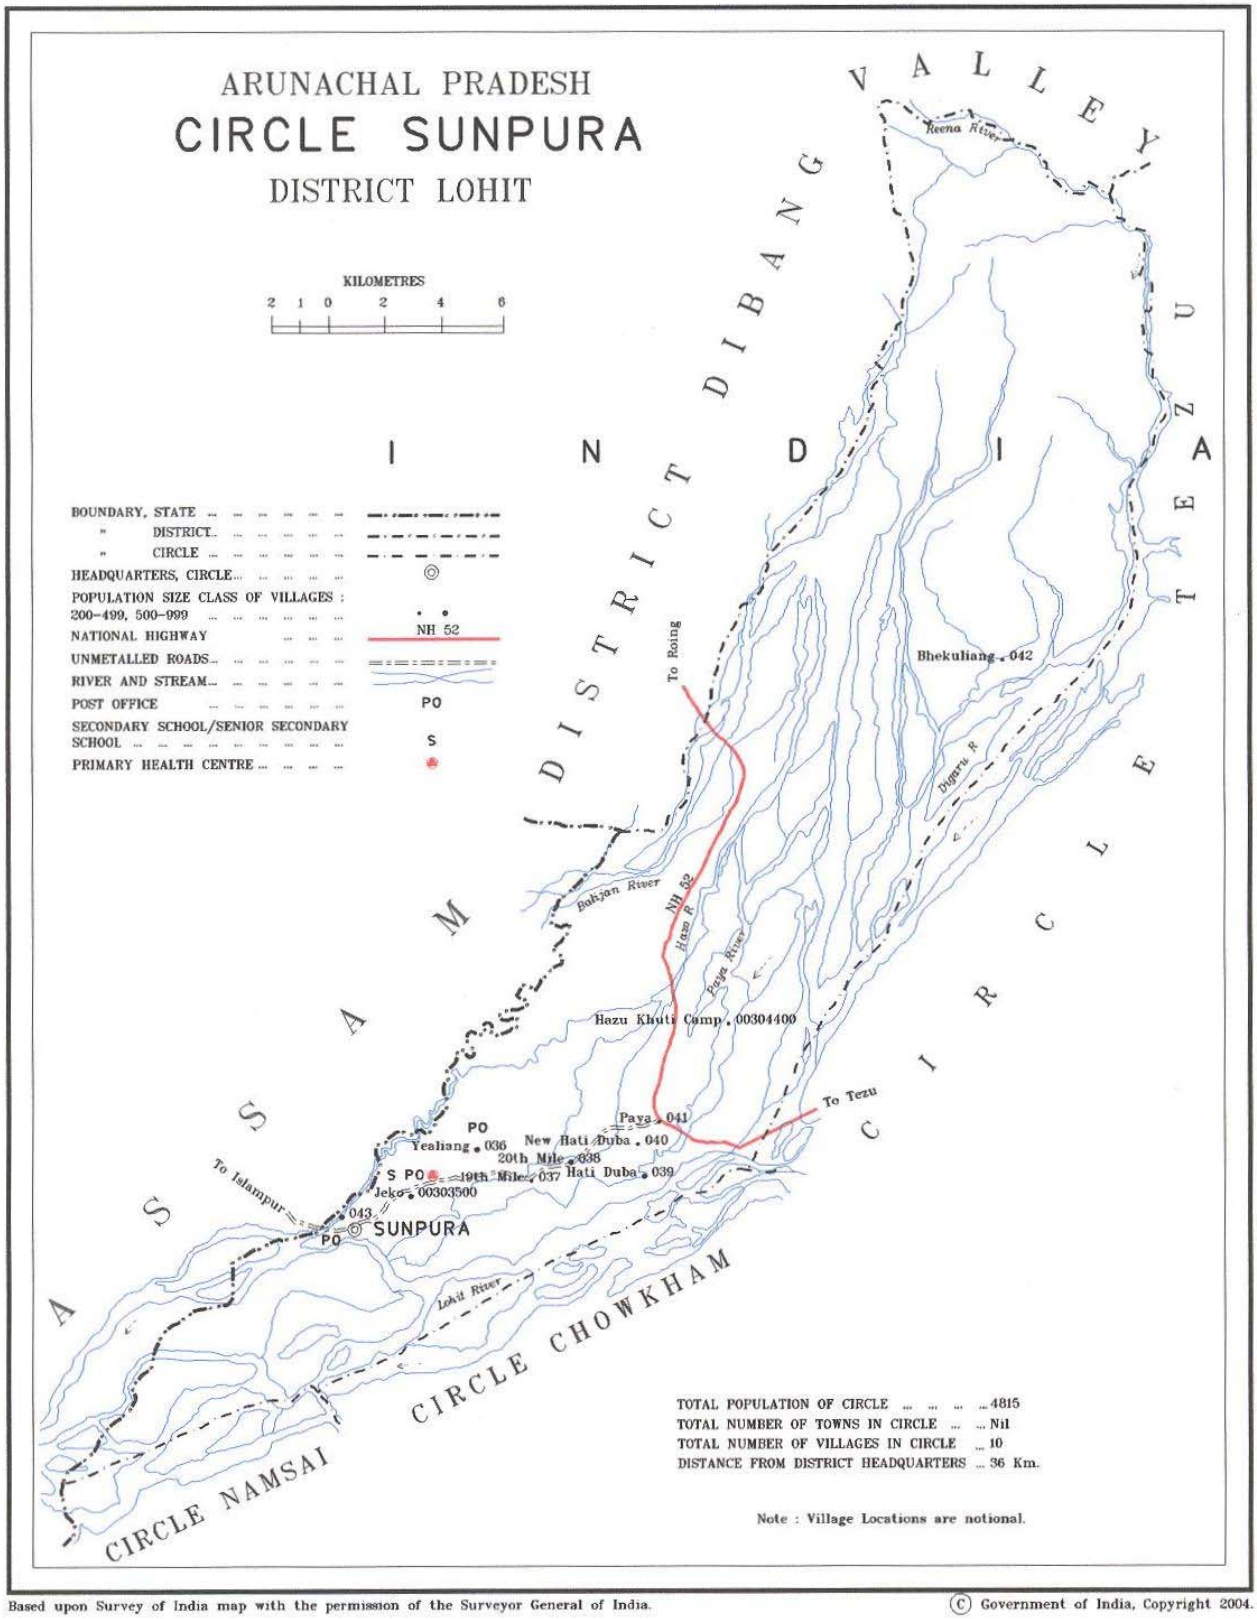

Appendix-IX Shows number of different types of girls school in a village.

(b) List of villages merged in towns and out-growths at 2001 Census

Not a single village has been merged in towns and outgrowth at 2001 Census in the district.

APPENDIX VIII - VILLAGE DIRECTORY
NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

There is no Gram Panchayat in the district.

APPENDIX IX - VILLAGE DIRECTORY
STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

There is no separate girls school in the district.

The table is optional subject to availability of information

Blank

SECTION II

Town Directory

The town directory is presented for each town covering different aspects of urban life. As like 1991 census seven statements have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

As in the case of Village Directory, the Town Directory is also a compiled presentation of various amenities and other basic information in respect of the urban areas (Towns) as per various formats adopted for this purpose. The Town Directory includes the following statements.

Statement I	Status and Growth History.
Statement II	Physical Aspects and Location of Towns.
Statement III	Municipal Finance.
Statement IV	Civic and Other Amenities.
Statement V	Medical, Educational,
Statement VI	Trade, Commerce, Industry and banking.
Statement VII	Civic and other amenities in Slums.

Appendix to Town Directory – Towns showing their outgrowth with population could not be compiled as there is no Slum areas/population available anywhere in Arunachal Pradesh and there is no outgrowth areas of any town in the State.

The criteria for any area considered as urban in 2001 Census was initially formulated in 1991 Census which continued to be the same in the Census of 1981, 1991 and 2001 as briefly indicated below :

a) All areas within Municipality Municipal Corporation, Cantonment Board or Notified Town Area/Urban Local Body.

b) Any other place which satisfied all of the following criteria :

   i) A minimum population of 5000.

   ii) At least 75% of the male working population should be engaged in non-agricultural pursuits and

   iii) A minimum density of population of 400 persons per square kilometer or 1000 per square kilometer.

In Arunachal during Census of India 2001, 17 Towns were existing and all 17 of them were Notified Towns. In the year 1991 the total number of Notified Towns were 10 as notified by the State Government from time to time.

As in the case of Urban Areas/Units (Towns/ Cities), the concept of Urban Agglomeration (UA) remained unchanged from 1971 Census. In Census an Urban Agglomeration (UA) denotes a continuous urban spread and normally consists of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with contiguous well recongnised outgrowths if any, of such towns. No Urban Agglomeration watch detected in the district during 2001 Census and hence corresponding information in this regard be taken as nil. A brief note on various abbreviation used in the Town Directory is also given.

A gist of data contain in the Statement I to VI as mentioned below may be of benefit of data users:

Statement-I

It contains details of Class, Name and Civic Status of Town (col. 2), Location Code Number (col. 3), Name of the Police Station (col. 4), Name of the

R.D. Block (col. 5), Area in sq. km. of each Town (col. 6), Number of Households in 2001 Census (col. 7), Population and Growth Rate (in brackets) of the Town at the Census of 1901, 1911, 1921, 1931, 1941, 1951, 1961, 1971, 1981, 1991 and 2001 (col. 8 to col. 22).

Statement-II

This statement gives Physical Aspects and Location of Towns and contains information on Class and Name of Town (col. 2), Rainfall in mm. (col. 3), Temperature in o Celsius (col. 4 and col. 5), Road distance in kilometer from State Hqtrs. (col. 6) and District Hqtrs. (col. 7), Distance between the Town and nearest city with 1 Lakh or more Population (col. 9), 5 Lakh or more Population (col. 10), Railway Station (col. 11) and Bus Facility (col. 12), Column 13 has been left blank as no data is available since no such system is in existence.

Statement-III

It is proposed to contain data in respect of Municipal Finance. As not a single municipality or similar body has been functioning in Arunachal Nil report has been shown in this Statement (col. 4-17).

Statement-IV

This statement incorporated information in respect of Class and Name of the Town, Civic Administration Status (col. 2), 2001 Census Population (col. 3), Scheduled Caste (col. 4), Scheduled Tribe (col. 5), Road Length (col. 6), System of Sewerage (col. 7), Number of Latrines (col. 8-11), Method of Disposal of Night Soil (col. 12), Source of Water Supply (col. 13), System of Storage with Capacity (col. 14) Fire Fighting Service (col. 15), Electrification (col. 16-20).

Statement-V

It contains details of Class and name of the Town (col. 2), Population in 2001 Census (col. 3), Medical Facilities (col. 4 and col. 5), Educational Facilities (col. 6-15), Number of Recreational and Cultural Facilities (col. 16-20).

Statement-VI

In this statement information on Trade Commerce, Industry and Banking have been incorporated. Thus information on Class and Name of the Towns (col. 2), Names of the most important commodities manufactured (col. 6, 7, 8), Number of Banks (col. 9), Number of Credit and other Societies (col. 10 and col. 11) are given.

Statement-VII

It has been provided for incorporation of data on Civic and other amenities in Slums in respect of Class and Name of the Town where the Slum exists (col. 2), Name of Slum (col. 3), whether Notified (col. 4), Number of Households (col. 5), Population (col. 6), Paved Roads (col. 7), System of Sewerage (col. 8), Number of Latrines (col. 9, 10, 11), Community (col. 12), Method of Disposal of Night Soil (col. 13), Drinking Water Supply (col. 14) and Supply of Electricity (col. 15, 16, 17).

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation Corp.	Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl

(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/ pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS

(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SHType
(v)	Others	O

The vocational institutions like-Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I
STATUS AND GROWTH HISTORY

PART B
PRIMARY CENSUS ABSTRACT

Blank

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality

and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE – II

NOTE ON FERTILITY, MORTALITY AND MIGRATION, 1991 & 2001 CENSUSES

Fertility levels

Fertility is the most important aspect in the field of population studies. In 1991 Census, two main questions were asked, one to all the ever-married women and second to all currently married women only. Questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year was also asked. The first three questions were asked to all ever married women and the last question related to currently married women. The measure of fertility worked out are based on the F-series tables of 1991 Census of Arunachal Pradesh. The following definitions are used in this series :

Age specific Fertility rate (ASFR)

The average number of children born alive during the last year per woman of a particular age group.

Age specific Marital Fertility rate (ASMFR)

The average number of children born alive during the last year per married woman of a particular age group.

General Fertility Rate (GFR)

The number of children born alive during the last year per 1,000 women in the age-group 15-49.

General Marital Fertility Rates (GMFR)

The number of children born alive during the last year per 1,000 married women in the age-group 15-49.

Total Fertility Rate (TFR)

Total number of children that would have born alive per woman, had the current schedule of age specific fertility rates been applicable for the entire reproductive period.

Total Marital Fertility Rate (TMFR)

Total number of children that would have been born alive per married woman, had the current schedule of age specific marital fertility rates been applicable for the entire reproductive period.

Child Woman Ratio

Number of children in age-group 0-4 per 100 women in the age-group 15-49.

Mortality levels

Information on the questions on children ever born and children surviving canvassed for all ever married women has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using Brass technique.

Movement of People

Migration

Migration is the third component of population change; the other two are mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly, a person is considered as a migrant by place of last residence if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and international migration: The migrational movements are of three types :

(i) Migration within the state itself with its components –

(a) Migration within the district of enumeration (inter district migration)

(b) Migration from one district of the state to another district of the state (inter district migration)

(ii) Migration from one state to another state of the country (Inter-state migration) and

(iii) Migration from one country to another country.

The first two types of migration are internal migration while the last one is called international migration.

Why the people migrate

The reasons for migration were categorised as (1) employment (2) business (3) education (4) family moved (5) marriage (6) natural calamities like drought, floods etc. (7) others. The reasons of migration have been elicited only with reference to movement from place of last residence.

Impact of migration

The growth of population of a particular place depends upon the factors such as fertility, mortality and migration. The knowledge of trend in migration helps in future planning of a particular place.

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001

Place of birth	Arunachal Pradesh			Lohit District		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(A) Migrants born within the State of enumeration	209,454 (51.6)	95,109 (44.8)	114,345 (59.2)	24,818 (40.6)	11,388 (35.6)	13,430 (46.0)
(i) Migrants born elsewhere in the district of enumeration	157,043 (38.7)	68,112 (32.1)	88,931 (46.0)	19,488 (31.9)	8,667 (27.1)	10,821 (37.1)
(ii) Migrants born in other districts of the State	52,411 (12.9)	26,997 (12.7)	25,414 (13.2)	5,330 (8.7)	2,721 (8.5)	2,609 (8.9)
(B) Migrants born in other States of India	170,626 (42.1)	102,161 (48.1)	68,465 (35.4)	32,022 (52.4)	18,037 (56.5)	13,985 (48.0)
(C) Migrants born in other Countries	25,468 (6.3)	14,966 (7.1)	10,502 (5.4)	4,263 (7.0)	2,515 (7.9)	1,748 (6.0)
Total Migrants :	**405,548 (100.00)**	**212,236 (100.00)**	**193,312 (100.00)**	**61,103 (100.00)**	**31,940 (100.00)**	**29,163 (100.00)**

ANNEXURE - III

Data Not Available

ANNEXURE - IV

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001

Place of birth	Arunachal Pradesh			Lohit District		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Migrants	**405,548 (100.00)**	**212,236 (100.00)**	**193,312 (100.00)**	**61,103 (100.00)**	**31,940 (100.00)**	**29,163 (100.00)**
Born elsewhere in the district of enumeration	157,043 (38.7)	68,112 (32.1)	88,931 (46.0)	19,488 (31.9)	8,667 (27.1)	10,821 (37.1)
Born in other districts of the State	52,411 (12.9)	26,997 (12.7)	25,414 (13.2)	5,330 (8.7)	2,721 (8.5)	2,609 (8.9)
Born in the State	209,454 (51.6)	95,109 (44.8)	114,345 (59.2)	24,818 (40.6)	11,388 (35.6)	13,430 (46.0)
Born in other States of India	170,626 (42.1)	102,161 (48.1)	68,465 (35.4)	32,022 (52.4)	18,037 (56.5)	13,985 (48.0)
Born in other Countries	25,468 (6.3)	14,966 (7.1)	10,502 (5.4)	4,263 (7.0)	2,515 (7.9)	1,748 (6.0)

It is seen from the above Annexure, that 40.6 percent of population of Lohit district were born within the State as against 51.6 percent for the State as a whole. 8.7 percent of the district population were born in other districts of the State as against 12.9 percent of the population at State level, and this may prove that in the inter district migration in this district is on lower side. In case of interstate migration Lohit dis-

trict has shown higher percent 52.4 percent as against 42.1 percent in case of the State. So far international migration is cocnerned, the district has registered a percentage of 7.0 percent which is higher side than the State percentage of 6.3.

COMPARISON OF PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH FOR 1991 AND 2001

Birth Place	Lohit District	
Total Migrants	1991 (100%)	2001 (100%)
1	2	3
Born in the District of Enumeration	29.3	31.9
Born in Other Districts of the State	7.2	8.7
Born in the State	36.5	40.6
Born in Other States	56.1	52.4
Born in Other Countries	7.4	7.0

While compare the particular distribution of migrants by place of birth between 1991 and 2001 Censuses in respect of Lohit district, it is seen that the migrants born in the State is 40.6% in 2001 as against 36.5% in 1991 of which 31.9% and 29.3% respectively in 2001 and 1991 recorded against migrants born in the district of enumeration and 8.7% and 7.2% in 2001 and 1991 respectively against migrants born on other districts of the State. As regards migrants born in other States are 52.4% and 56.1% in 2001 and 1991 respectively, whereas it is 7.0% and 7.4% inrespect of migrants born in other countries.

	Females	11,694	10,400	249	924	69	13	0	26	13

It is seen from the Annexure V that Hindu constitute 71.9 percent (103,151 persons), Buddhist 16.0 percent (22,935 persons), Christian 5.8 percent (8,253 persons), Other Religion and Pressuations 3.6 percent (5,178 persons), Muslim 2.1 percent (3,071 persons). Religion not Stated 0.5 percent (708 persons), Sikh 0.1 percent (215 persons) and Jain (N) percent (16 persons). Out of 14 Circles of the district, Tezu Circle is the biggest Circle with a population of 31,304 persons (21.8 percent) and the smallest being Kibithoo Circle with 953 presons (0.7 percent). From the above Annexure it will also be seen that the followers of Hindu religion is found to be majority in all the Circles of the district.

COMPARISON OF MAIN RELIGIONS BETWEEN 1991 AND 2001

1991			2001		
Hindu	–	76.7	Hindu	–	71.9
Buddhist	–	14.2	Buddhist	–	16.0
Christian	–	4.8	Christian	–	5.7
Muslims	–	1.8	Other Religion and Persuasion	–	3.6
Other Religion and Persuasions	–	1.7	Muslims	–	2.1
Religion not Stated	–	0.6	Religion not Stated	–	0.5
Sikhs	–	0.2	Sikhs	–	0.2
Jains	–	0.0	Jains	–	0.0

While drawing a comparison of main religions of Lohit district between 1991 and 2001, it is seen that Hindu and Buddhist religions constitute majority of population and placed number one and two in 1991, followed by Christian, Muslims, Other Religion and Persuasions respectively. But in 2001 also Hindu and Buddhist constitute majority of populaiton and placed number one and two followed by Christian, Other Religion and Persuasions, Muslim, Religion not Stated respecitvely.

It is also seen that Hindu religion is a majority religion in all the Circles of the district in 1991. On the other hand Buddhist religion seems to the major of population in Piyong Circle only in the district in 2001

ANNEXURE - VI
MARITAL STATUS OF POPULATION AS PER 2001 CENSUS

Marital status	Total population			Percentage		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All marital status	103,918	54,349	49,569	100.00	100.00	100.00
(i) Never Married	59,929	32,262	27,667	57.7	59.4	55.8
(ii) Married	40,739	21,278	19,461	39.2	39.1	39.2
(iii) Widowed	2,884	673	2,211	2.8	1.2	4.5
(iv) Divorsed or Separated	366	136	230	0.3	0.3	0.5
(v) Unspecified Status	0	0	0	0.0	0.0	0.0

From the above Annexure VI it has been found that out of 103,918 Population, 59,929 or 57.7 percent are reported to be Never Married as against 56.4 percent at State level. 40,739 or 39.2 percent are Married, 2,884 or 2.8 percent are Widowed, 366 or 0.3 percent Divorsed or Separated.

COMPARISON OF MARITAL STATUS BETWEEN 1991 AND 2001

			1991	2001
	All Marital Status	–	100%	100%
1	Never Married	–	56.7	57.7
2	Married	–	40.8	39.2
3	Widow	–	2.3	2.8
4	Divorced or Separated	–	0.2	0.3
5	Unspecified	–	0.0	0.0

It is seen from the Annexure that the percentage of Marital Status of Population inrespect of Lohit district stands (1) Never Married 56.7%, (2) Married 40.8%, (3) Widowed 2.3%, (4) Divorced or Separated 0.2% and (5) Unspecified Status 0.0 in 1991. On the other hand during 2001 this serial stands good. But with a little insignificant variation which is (1) Never Married 57.7%, (2) Married 39.2%, (3) Widowed 2.8% and (4) Divorced or Separated 0.3% and Unspecified status is NIL in the district.

It has been seen from the Annexure that the education in some level little increased and some level little decreased during the decade in the district.

ANNEXURE - VIII
DISTRIBUTION OF DIFFERENT MOTHER TONGUES OF ARUNACHAL PRADESH COMPARED WITH LOHIT DISTRICT RETURNS, 2001

Sl. No.	Name of Languages	Number of persons who returned the language in	
		Arunachal Pradesh	Lohit
1	2	3	4
1	Nepali	94,895	22,200
2	Mishmi	17,257	17,013
3	Assamese	51,422	16,320
4	Hindi	53,663	8,286
5	Bengali	54,521	7,425
6	Miri/Mishing	33,343	6,707
7	Chakma	39,953	5,381
8	Bhojpuri	19,526	3,981
9	Adi	93,517	3,479
10	Deori	4,504	2,735
11	Oriya	7,770	2,151
12	Sadan/Sadri	2,296	1,074
13	Munda	3,004	804
14	Lushai.Mizo	1,142	792
15	Tibetan	4,751	771
16	Santali	2,031	722
17	Malayalam	5,537	641
18	Apatani	27,792	513
19	Others	581,044	425,32

It has been seen from the Annexure VIII that Lohit district has return Nepali (22,200) as the major language speaker, followed by Mishmi (17,013), Assamese (16,320), Hindi (8,286), Bengali (7,425), Miri/Mishing (6,707) and Chakma (5,381) as compared to Nishi (117,124) the highest, followed by Nepali (94,895, Adi (93517), Adi Gallong (61,674), Bengali (54,521), Hindi (53,663) and Assamese (51,422) at State level. This prove that every district has language of its own unlike other State there is no pre-dominant language in Arunachal Pradesh.

COMPARISON OF MOTHER TONGUE BETWEEN 2001 AND 1991

Sl. No.	Name of Mother Tongues	2001	1991
1	Nepali	22,200	-
2	Mishmi	17,013	19,106
3	Assamese	16,320	-
4	Hindi	8,286	-
5	Bengali	7,425	-
6	Miri/Mishing	6,707	3,852
7	Chakma	5,381	-
8	Bhojpuri	3,981	-
9	Adi	3,479	2,865
10	Deori	2,735	1,386
11	Oriya	2,151	-
12	Sadan/Sadri	1,074	-
13	Munda	804	-
14	Lushai.Mizo	792	-
15	Tibetan	771	1,427
16	Santali	722	421
17	Malayalam	641	-
18	Apatani	513	-

While drawing a comparison between 2001 and 1991 inrespect of Mother Tongues for Lohit district, it is seen that Nepali is the major mother tongue with highest number 22,200 (15.5%) in 2001 and Mishmi is the major mother tongue with highest number 19,106 (17.4%). This variation is very much significant. Regarding other mother tongues, the comparison cannot be drawn due to floating nature of population.
