DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking fea ures. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

G. JAGATHPATHI

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers ...	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services .	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.,* the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.,* fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of - Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.,* households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38, and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers

1 *Administrative, Executive and Managerial* Workers
- 0X3 Librarians, Archivists and Related

Workers:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations:*

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified:*

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

Service, Sports and Recreation Workers.

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

by

K. C. DUBEY

Deputy Superintendent of Census Operations, Madhya Pradesh

Raigarh district, which was constituted in 1948 after the merger of 4 feudatory states Raigarh, Sarangarh, Jashpur and Udaipur, is situated in the easternmost part of the state between latitudes 21°20′ and 23°15′ N and longitudes 82°55′ and 84°24′E. It is bounded on the north by Surguja district, on the south by Raipur district, on the west by Bilaspur district and on the east by Ranchi district of Bihar and Sundergarh and Sambalpur districts of Orissa. The district is the ninth biggest district in the State in respect of area and has an area of 5,064 Sq. miles, (13,116 Sq.kms.) according to the figures furnished by Surveyor General of India whereas according to the figures of State Survey Department, its area is 5,008sq. miles: there is thus a discrepancy between these two sets, the one furnished by Surveyor General being more by 1.1%. The district is bigger than the two districts on the westernmost part of the State Jhabua and Ratlam combined together [i. e. 4,342 sq. miles].

ADMINISTRATIVE CHANGES 1901—61:

Prior to merger in 1948, the area now constituting Raigarh district was under the jurisdiction of four feudatory states-Raigarh, Sarangarh, Jashpur and Udaipur. The last two of these were till 1905 under the Commissioner of Chhota Nagpur and were included in the erstwhile Bengal Province. In that year these states were transferred to the erstwhile Central Provinces as a result of territorial adjustments between Orissa and erstwhile Central Provinces. After merger in 1951, Raigarh district had 7 Tahsils-Jashpur, Udaipur, Gharghoda, Raigarh, Sarngarh, Sakti and Kharsia. Consequent on the reorganization of States in 1956 some inter district transfers were effected between Bilaspur and Raigarh districts: Sakti tahsil was transferred from Raigarh to Bilaspur with consequential *and* other internal changes. In Bilaspur district, the new Sakti tahsil was expanded by the addition of 286 villages and 52 villages (area 42.32 sq. miles) of Kharsia tahsil which was abolished. Udaipur, Jashpur and Gharghoda tahsils remained unchanged from 1951 but as a result of abolition of Kharsia tahsil, Raigarh tahsil has increased in size by the addition of 148 villages and one town (169.80 sq. miles) of Kharsia tahsil and 2 villages from Janjgir tahsil of Bilaspur district. Sarangarh tahsil also increased in area because of the transfer of 25 villages from Janjgir tahsil of Bilaspur district.

These changes are shown below:—

District/Tahsil	1951 Territorial unit	Details of gain in territories		Details of loss in territories		Net area gain (+) in sq. miles	Loss (−) in sq. kms.
		Brief description	Areas in sq. miles	Brief description	Area in sq. miles		
Raigarh District	Raigarh District	(i) 25 villages transferred from Janjgir tahsil of Bilaspur district to Sarangarh tahsil	38.9	(1) Sakti tahsil transferred to Bilaspur district	106.0		
		(ii) 2 villages transferred from Janjgir tahsil of Bilaspur district to Raigarh tahsil	1.9	(ii) 52 villages of Kharsia tahsil of 1951 (now abolished) transferred to Bilaspur district	49.2		
		Total	40.8	Total	155.2	−114.4	−296.2

District/Tahsil	1951 Territorial unit	Details of gain in territories		Details of loss in territories		Net area gain (+) in sq. miles	Loss (−) in sq. kms.
		Brief description	Area in sq. miles	Brief description	Area ins sq. miles		
Raigarh tahsil	Raigarh tahsil	(i) 148 villages and 1 town transferred from Kharsia tahsil of 1951 (now abolished)	169.8	..	..		
		(ii) 2 villages transferred from Janjgir tahsil of Bilaspur district	1.9	..	..		
		Total	171.7			+171.7	+444.7
Sarangarh tahsil	Sarangarh tahsil	25 villages transferred from Janjgir tahsil of Bilaspur district	38.9	..	..	+38.9	+100.8

The Name

The district is named after Raigarh, which was the most important of the merged feudatory states and the district headquarters now. As stated in the *Chhattisgarh Feudatory States Gazetteer* (1909), the name Raigarh is derived from *rai*, meaning a species of thorny tree, and *garh* a fort.

ADMINISTRATIVE DIVISIONS

The district is now divided into five tahsils-Jashpur, Udaipur, Gharghoda, Raigarh and Sarangarh. Except for the changes indicated above, these tahsils have the same jurisdiction as the erstwhile feudatory states. Erstwhile Raigarh state has however been constituted into Raigarh and Gharghoda tahsils.

For purposes of general administration, the district has been divided into 4 sub-divisions-Janjgir, Udaipur, Raigarh and Sarangarh and Jashpurnagar, Dharamjaigarh, Raigarh and Sarangarh are the headquarters of the Sub-divisional Officers (Civil). Jashpurnagar is also the headquarters of Sub-Divisional Officer [Police].

The Collector is assisted in revenue and general administration by 8 Deputy Collectors, 4 of whom are incharge of sub-divisions mentioned above. Raigarh is one of the districts where complete separation of judiciary has not been effected and one of the Deputy Collectors discharges the functions of Judge-Magistrate.

Some basic statistics of the district and the tahsils are given below:—

Name of Tahsil	Area in sq. miles	Area in sq. Kms.	Area in sq. rural	Area in Kms. urban	No. of villages Inhabited	No. of villages Uninhabited	Towns	POPULATION Total	Males	Females
1	2	3	4	5	6	7	8	9	10	11

Geology:—

The geological sequence in **Raigarh district may be** represented as below:-

Recent and sub-recent	...		Soil,Alluvium, Laterite
Deccan Trap	...		Basalt (Lower Flows)
Gondwanas	... Lower	...	Kamthi Barakar Talchirs
Cuddapah	... Upper	...	Shale intercalated with sandstone and Dolomitic limestone Conglomerate
	Lower	...	Shale interbedded with Limestone Quartzite.
Archaens		...	Crystallines, Granites, Schists, Talc-sericite Schist, Gneiss.

The Archaens, represented by granites, gneisses and schists, constitute the oldest geological formations and also are the most extensively developed. In their characteristic forms they are seen exposed in the areas below the Khuria plateau in Jashpur tahsil where the granites frequently rise into bare knolls. The most conspicuous of these features is called Burha from its fancied resemblance to an old man's bald head. Other areas where the archaens are exposed are between Sambalpuri Pahar and the hills near Uranda, in the Boridadar Reserve Forest areas, six miles south-east of Sarangarh town, near Rengalmuda and south of Andhiarchapar. The Archaen outcrops cover an area of approximately 1,663 sq. miles.

The Cuddapah formations of the district constitute the eastward extension of the Cuddapah basin of Chhattisgarh and here they are represented both by the Chandarpur Sandstone and Raipur shale and sandstone. The former builds up the hills south of Sarangarh town and is also exposed about 4 miles north-west of Sarangarh. The Raipur series is also exposed in the plain areas of Sarangarh tahsil. The shales of this series are generally red and purple but occasional grey bands may also be seen.

Conformably overlying the shales are the bedded limestone and dolomite and good expousures of these rocks are seen near Barekot, Pharaswany and in Bangon-nala. Fine to medium-grained dolomite is noticed near Dumarpara, Deragarh, Akolsara, Bhitiadih and other places. Dolomitic limestone is being quarried at various places like Dabra, Sakrali Jhanakpur, Ghugri, Chhapara, Baradwar etc. Its main use at present is being burnt for lime.

The Gondwanas are exposed in Raigarh and Udaipur tahsils. The Talchirs consist chiefly of a fine grained greenish sandstone containing boulders of granite and quartzite. In Udaipur tahsil a coarse carboniferous sandstone is the chief geological formation.

The Trap rock is found in the lofty plateau of the Khuria in Jashpur tahsil where its decomposition has resulted into a cap of laterite over the plateau.

MINERAL RESOURCES

Coal

There exist two coal fields in this district-the Mand river coal-field and the Raigarh coal-field. The Mand river coal deposit is connected with the Korba coal deposits of Bilaspur district to the west by a narrow strip of the Barakar rocks. The southern boundary of the coal deposit is a fault trending south east. This deposit easily covers an area of about 200 sq. miles. The Raigarh coal-field lies in the north-western corner of the district and a narrow strip extends from Kelo river near Laka to Bagadia near Borkhel.

Bauxite

Bauxite reserves of economic worth occur in Jashpur tahsil and are noticed in at least 12 localities-Pandrapat, Darilimpani, Raimi and Chicholi Murhi, Baighat, Thutapani, Patia, Garh Pahar, Kadosa Pahar, Jarhapat, Daunpat, Masol plateau and Deopani. It is estimated that there may be approximately 519,000 tons of this mineral in the district.

Laterite

Laterite occuring as a cap over the trap rock in the Khuria plateau is not of any economic worth and is only exploited by the Agaria Blacksmiths.

Limestone

Dolomite limestone is burnt for lime at various places and there are many limestone quarries such as 8 miles north-east of Dharamjaigarh and 4 miles south-east of Baradvar Railway Station.

Gold

Gold is found in very small quantities on the banks and the bed of the Ib river in Jashpur tahsil and the Sonjhari-Jhareka Gonds used to exploit it in former times.

Geography

Broadly speaking, latitude 22° 15′ N divides the district into two regions of district physiographic dissimilarities-the northern predominantly hilly region and the southern predominantly plain country. Above this latitude, the ground goes on increasing in a series of steps till one reaches the lofty plateaus of Mainpat and Khuria in the north. Looked at from another angle, it is the river Mahanadi which divides the district into two regions-the northern region having a general slope towards the south and the southern region having a general slope towards the north.

The northern part of Udaipur tahsil is walled in by the great plateau of Mainpat (Surguja district) which rises to a height of 3,781 feet above the sea. This plateau, as has been described in the note on Surguja district, forms the watershed of the rivers and streams running north and south. From the north and north-west highlands of Udaipur tahsil which border this plateau, there is a steep descent of more than 1,500 feet down to the fertile valley of the river Mand and the descent continues in a succession of terraces till one reaches the plains of Gharghoda and Raigarh.

The eastern half of the northern part i. e. Jashpur tahsil, contains more magnificent physiographic features. This tahsil consists of almost equal proportions of highland and lowland. On the Ranchi-side the prominent table ofland Upargha tattains an average elevation of 2,200 feet and is fringed by the hills which in places rise 1,000 feet higher. On the east the Uparghat blends with the plateau of Chhota Nagpur proper, while on the west it springs from the lowland region, known as the Hetghat, in a fortress-like wall buttressed here and there by projecting masses of rocks. The Uparghat is again divided by a slight depression from the still loftier plateau of Khuria which occupies the north-western corner of this tahsil and forms the watershed between the Ib and the Kanhar, a tributary of the river son. This high plateau land consists, as has been described before, of a Trap rock topped with volcanic laterite. The low land of the Hetghat and of Jashpur proper lie in successive steps descending towards the south, broken by ranges of hills isolated bluffs and bare masses of granites and metamorphic rocks like gneiss and schistosegneisses.

Below latitude 22°15′ N, the general nature of the country is that of a plain though the ideal condition is broken by a chain of hills which trends north-west-south-east from the north of Sakti to Banora about 10 miles to the south-east of Raigarh town. This hill system however, nowhere attains the height reached by the northern region already described above. Moreover, it is a broken chain consisting of Kukradama dongar, Chonda dongar, Bhari dongar, Chauwardhal range and the link starting from the east of Raigarh and running almost parallel to the Kelo river. Through this broken chain of hills flow the rivers Mand and Kelo. The ground then goes on falling till it reaches the Mahanadi flowing roughly at from 700 feet to 635 feet.

Below the Mahanadi in Sarangarh tahsil, the general nature of the country is that of the Chhattisgarh plain, the general slope being towards the north: the southern parts of Sarangarh tahsil are at varying heights from 1458 feet to 1,000 feet and these gently slope towards the Mahanadi. In Sarangarh tahsil, however, the southern part bordering Raipur district is hilly and the only purely plain country is in the south-east. From the hilly southern border, a chain of hills trends north-south dividing the tahsil into two parts i. e. Sarangarh tract and Saria tract.

The highest elevation in the district is attained in the extreme north in the Pandrapat plateau of Jashpur tahsil (3,670′). Other high points in the district are Ranijula (3,527′) Tendupat (3,405′), Kotwar (3,393′) and Bharamurio (3,390′) all in Jashpur tahsil; near Kamartha (3,229′) and Lotta (2,098′) in Udaipur tahsil. The highest elevation in Gharghoda tahsil is 2,138′ and this is a little south of Bahama.

Rivers

The rivers of the district come under two distinct drainage-systems- the Mahanadi and the Son. Of these, it is the Mahanadi that realy commands the drainage of this district, except the two rivers, the Geor and the Kanhar which rising in the tablelands in the north flow northwards to join the Son.

The two principal rivers of the district which come under the drainage of the Son are the Kanhar and the Geor. Both of these rivers and their feeders rise in the highlands in the north of the district and flow northwards into Surguja district. The Kanhar rises in the 3.000′ high plateau a little east of Tendupat, flows north for a short distance and then turns north-west running parallel to the northern boundary of the district for a little part of its length. Its main tributaries are the two Surias. One of these rises near Harradipa and joins the Kanhar at the boundary of the district above Champa. The western Suria rises in the Pandrapat plateau, receives the waters of its affluents as it flows north and then crossing the district joins the Kanhar near Dipadih in Surguja district. Another river of the Son drainage system, the Geor, rises in the plateau near Chichli at a height of some 3,550 feet and flows through a valley in the high plateau. Before debouching from this plateau on to the small plain of Dongari, it makes a 100′ high waterfall. Another feeder of the Geor, which rises west of it above Ghordega, makes a similiar but higher waterfall as it plunges down the high plateau to join the Geor near Dongari. The Macchli is another river of the Son drainage system. It rises near Gaibura north-west of Bagicha and flows first north and then north-west to get out of the district traversing only about first 16 miles or so of its lengtn in this district.

The Mahanadi, which commands most of the drainage of Raigarh district flows from west to east, through the soutnern part of the district forming the boundary between Sarangarh and Raigarh tahsils. It receives the waters of the other rivers from the north and the south. The Mahanadi flows through the area which is from about 700′ to 635′ in height and the northern and southern area of the district slope towards it.

The principal tributaries of the Mahanadi from the north are the Mand, the Kelo and the Ib. The Mand rises in the north of the Mainpat plateau in Surguja district and receiving the drainage of the southern face of the Mainpat enters the district 4 miles to the west of Susdega in Udaipur tahsil. It flows through the hilly sandstone country and its channel is deeply cut through this sandstone rock in a series of alternate rapids and pools. It then enters the plain country near about Dharamjaigarh, downstream of which place it receives the Koirja river. It then makes the boundary of the district for some distance and flows through the break between the Chonda Dongar and Bhari Dongar. In this break it receives the waters of the Kurket which rises near Reruma Khurd. The Kurket receives the Chini and the Tumba before itself joining the Mand.

The Kelo river rises in the northern hilly region of Gharghoda tahsil near Ludeg at about 2.400 feet an flows south past Raigarh town receiving its tributaries the Koledaga and the Razar. The Sapnai river rises above Dhelwakham in Raigarh tahsil near the eastern boundary of the district and flows south to merge in the Mahanadi a little downstream of Padampur.

Another principal tributary of the Mahanadi is the Ib which rises in the Pandrapat plateau in Jashpur tahsil and making an arc through the plateau turns to the south. Several waterfalls are found along its course, the finest being formed by the rush of its waters over a square mass of trap-rock, where it passes from the high tableland of the Uparghat into the flat countary of Jashpur proper. Its course above these falls consists of a series of rapids. Its tributaries the Sonmuth, the Bamhni, the Dorki, the Siri, the Maini, the Utial and the Khorung are mosty hill streams. The Ib passes out of the district south of Loakara. Out of its affluents, the important ones are the Khorung and the Maini.

The Mahanadi flows from west to east and has a wide sandy bed. Its principal tributaries in the district from the south are the Lilar, the Lath and the Kenkamdi. The Lilar rises in Raipur district and is strengthened by its feeder the Khundi before it joins the Mahanadi. The Lath river also rises in Raipur district near Bastipali in Mahasamund tahsil and flows straight north. During its onward journey to the Mahanadi, it is fed by the Manai and the Ghogra; the latter river flows past Sarangarh town. The Lath joins the Mahanadi opposite Chandarpur. The Kenkamdi rises in the hills in the extreme south-east of

the district and flows north-east, making the boundary of the district for a little distance and then loses its identity in the Mahanadi outside the district.

HISTORY AND ARCHAEOLOGY

The early history, if any, of Raigarh district is extremely obscure and it is curious that the plains area of the district being contiguous with Bilaspur and Raipur district where an influential dynasty under the great Haihayvanshis ruled for a long period, should have remained uneffected by the currents. Whereas in Raipur and Bilaspur districts there are a large number of archaeological remains and a rich history is preserved in various inscriptions, no such records have so far been discovered in this district on the basis of which even some surmises could be based. Absence of such remains and inscriptions in the northern areas of the district is easily understood because these areas continued to be wild and inaccessible even till the beginning of this century and in the earlier times must have been left to their fate by the invading armies and the ruling powers who changed hands in the plains of Chhattisgarh. These wild tracts, contiguous as they are with the plateau of Chhota Nagpur, must have returned a number of wild tribes, who probably never conglomerated into a kingdom and orderly rule. But we have no record even of what the state of affairs here was in the early days.

Though there is, more or less, complete obscurity about the historical past, there are indications that some parts of the district were the shelters of early man. These have left their record in Singanpur rock-paintings and some description of them may be given here. Singanpur is a small village about 3 miles away from Naharpali, a station on Bilaspur-Raigarh Railway line. Near this village, in the rock-shelters of the Chauwardhal hills are found numerous primitive paintings representing men, beasts, reptiles etc. In his *Race and History* Prof. Pittard mentions discovery of 'Chipped agates' from these caves and in the opinion of Sir Henry Hayden, these chipped agates belong to Palaeolithic or the Earlier stone Age.

The paintings and other discoveries made here surely carry us back to a very remote age. This view is supported by Percy Brown who has expressed in his Indian Paintings that 'the rock paintings at Singanpur may be of very remote antiquity'-and that they also apparently contain some hieroglyphics. Besides the palaeoliths in the caves and near about, a black haematite pestle was also found here by Anderson. the first discoverer of the paintings. As is well known a cylindrical piece of haematite was also discovered in Mohenjodaro.

In the paintings are represented little and big human figures, animals and various designs and diagrams which may be hieroglyphics or totemistic marks or even religious symbols. It is thus clear that though there is a void in the later periods of recorded history, the district was definitely the home of the early man in the stone age. The two other archaeological remains in the district are the temple of Pujaripali in the Sarangarh tahsil and the shrine of Khuria Rani in Jashpur tahsil.

Whereas no idea at all can be formed about the northern wild regions, historical researches have shown that the present Sarangarh tahsil was at first a dependency of the Ratanpur Haihayvanshi kingdom and afterwards became one of the eighteen Garhjat states subordinate to Sambalpur. The ruling family of the erstwhile Sarangarh State were Raj Gonds and according to their traditions had migrated to this part from Bhandara (now in Maharashtra) whereas the Raj Gond chiefs of the erstwhile Raigarh State have a tradition of migrating here from Wairagarh in Chanda (now in Maharashtra). This migration took place according to them, about the beginning of the eighteenth century when they came here and obtained some villages. Like Sarangarh, the erstwhile Raigarh State was also one of the Garhjat States under Sambalpur. About 1800, Jujhar Singh, the fifth Raja of Raigarh, concluded a subsidiary treaty of alliance with the East India Company on the annexation of Sambalpur by the Marathas. In 1833 Bagarh Pargana was granted to Raigarh in lieu of the services of Deonath Singh crushing a rebellion there. The Raigarh ruling family was sympathetic to the British during 1857 and in 1867 the Raja was made a Feudatory Chief.

The Marathas also exercised a nominal control over Udaipur and Jashpur States. These were ceded to the British Government by the provisional agree-

ment concluded between the British and Mudhoji Bhonsla in 1818. Both Udaipur and Jashpur were regarded as fiefs of Surguja and paid tribute through the State. Ever since the conquest of Surguja by the Raksal Rajputs, Udaipur formed an apanage of a younger branch of the reigning family in the State. During 1857, the Udaipur ruling family were hostile to the British but their hostility was very short-lived. Subsequent to 1860 the state was conferred on a brother of the Chief of erstwhile Surguja State.

All these 4 feudatory States Udaipur, Jashpur, Raigarh and Saranagarh merged in Madhya Pradesh in 1948 and were constituted into the present district.

CLIMATE AND RAINFALL

Endowed by such physiograpic characters as it has and with vegetational cover of widely varying magnitude the district ranges in climate from the high rainfall and cool climate of the uplands in the north to the warm one in the treeless southern plains where the summer months become rather oppressive. Because of physiography and thick vegetation, the Uparghat region in Jashpur receives a copious rainfall of about 65-67 inches and and this goes on decreasing towards the south till in Sarangarh only 40-50 inches of rain is received. Raigarh and Gharghoda tahsils receive more rain than Sarangarh but less than Jashpur and Udaipur. The frost clad region and the uplands are cool and frost is not uncommon in Khuria plateau. The summer temperature in the treeless plain in Raigarh and Sarangarh often touches 116° F. The rainfall and temperature records of the district are given elsewhere in this Handbook.

In all, the district has 1,094.83 Sq. miles or 700,690* acres of reserve forest area tahsilwise break-up of this is not available.

The district falls in the region of Sal forests and teak as a natural species is rather absent. However, due to improved silvicultural operations, teak plantations have been made at a number of places. The quality of forests also goes on deteriorating as one passes from the north to south-till in Sarangarh tahsil the forest is of an inferior mixed type. In this tahsil, forests are not extensive but occur only in patches. Sal (Shorea robusta) is present in Sarangarh tahsil but it is rare on the whole and the bulk of trees are either of inferior timber value or miscellaneous trees like *mahua (Bassia latifolia), Saja (Terminalia tomentosa) Bija (Pterocarpus marsupium), Char (Buchnania latifolia), Palas (Butea frondosa), Harra (T. Chebula)* and bamboo (*Dendrocalamus strictus).*

In Jashpur, Udaipur and north Gharghoda sal is the predominant tree. In Jashpur tahsil, all along the course of the Ib fine stretches of forest containing *sal, shisham (Dalbergia sissu)* and Ebony is found. In Udaipur tahsil, the predominant trees in addition to *sal* are *mahua, kusum (Schhichera trijuja)* and *tendu.* In these forests other usual accompaniments of *Sal* lik *saja, Bija,* or *Bijasal, Dhawra (Anogeissus latifolia), Harra Bahera (T. belarica), Kouha (T. arjuna), Char* are found. In Gharghoda and Raigarh *Sal, saja* and *bija* are the predominant timber species. *Mahua (Bassia latifolia)* is common everywhere except on the Khuria plateau.

The trees and plants in and about the village sites are too common to be mentioned. These are mango*(Manjifera indica), Imli (Tamarindus indica), Jamun (Engenia jambolana), Bar (Ficus bengalensis Pipal (F. religiosa)* and *Nim (Melia indica),* A variety of grasses is found in the district, the most important being the *Sabai* grass *(Ischaemum angustifolium)* found in Jashpur tahsil.

Fauna

Contiguous with Katghora tahsil of Bilaspur district and Surguja district as it is, northern parts of the district once used to have tha wild elephants and stray ones were reported as late as 1910 but these have since become extinct now. The bisons (Bos gaurus) and wild buffalos which formerly were numerous in Udaipur and Jashpur tahsils have almost become extinct and now are prohibited species for hunting. Tigers *(Felis tigris)* and panthers (*F. Pardus*) are found in the jungles, the latter animal being more commonly found. Bears are found chiefly in Jashpur tahsil. Other animals found in the forests are wild dog, *Sambhar (Cervus unicolor) Spotted deer (C. axis) nilgai (Bos elephas tragocamelus)* and some other varieties of deer.

The Population and the people

Though nineth biggest in area, Raigarh district is sixth biggest in respect of population and in den-

*Source- Director of land Records, M. P.

sity of population it is the seventeenth most densely populated district of the State. The district had a population of 428,761 persons in 1901. The percentage decade-wise variation of population is given below for comparison; State and Division figures have also been furnished:

Region	1901-1911	1911-1921	1921-1931	1931-1941	1941-1951	1951-1961
1	2	3	4	5	6	7
Madhya Pradesh	+15.30	−1.38	+11.39	+12.34	+8.67	+24.17
Bilaspur Division	+27.28	+3.48	+18.29	+13.15	+10.39	+19.83
Raigarh District	+29.48	+4.39	+19.27	+13.93	+8.32	+22.00

From the beginning of the present century i.e. during 1901-61, the district population has increased by 142.85% which is higher than the State (92.00%) and Division (133.20%) increases. In the six districts of eastern Madhya Pradesh comprising Raipur and Bilaspur divisions, Raigarh district shows the third largest increase during 1901-61, the two districts showing higher increases are Bastar (184.64%) and Surguja (155.56%).

The percentage decade variation of 29.48 during 1901-11 in the district population is 2.20% more than the increases for the Division. For a closer study of this it is necessary to have tahsil-wise figures but they are naturally not available. The percentage decade increases of the erstwhile feudatory states may therefore be taken into account:-Raigarh (25.1%), Sarangarh (27.7%) Udaipur (42.9%) Jashpur (32.1%). It is thus seen that the increase was less in the plains than in the hilly areas. For these hilly areas one of the reasons given was the increased accuracy of enumeration which exaggerated the real expansion of population due to immigration and natural growth.

In 1911-21 and 1921-31, the population of Raigarh district grew much fast than the State population as a whole though as compared to the increase in the Division population, the increase was only a little more. Here again, respective positions of the erstwhile feudatory States may be seen. In the decade 1911-21, the variation of population of these States was as below-Raigarh (+10.4%), Sarangarh (+15.5%), Udaipur (+9.7%), and Jashpur(—11.6%). This decrease in Jashpur and increase in the other three units is explained by the subsidiary table IV of 1921 census.

This is given below:—

	Population in 1921				Population in 1911				Variation% (1911—21)
	Actual population	Immigrants	Emigrants	Natural population	Actual population	Immigrants	Emigrants	Natural population	in natural population
1	2	3	4	5	6	7	8	9	10
Raigarh	241,634	24,381	23,479	240,732	218,860	30,805	41,779	229,834	+5
Sarangarh	117,781	22,712	12,428	107,497	102,071	20,013	16,326	98,384	+9
Udaipur	71,124	8,743	6,522	68,903	64,853	14,310	7,316	57,859	+19
Jashpur	154,156	12,443	9,205	150,918	174,458	16,663	8,073	165,868	+9

The number of births (B) and deaths (D) per cent of population of 1911 was as follows: Raigarh 24 (B), 18(D), Sarangarh 38 (B), 26(D),Udaipur 28 (B), 23 (D), Jashpur 17 (B), 16 (D). The excess of births over deaths was more marked in the plain areas than in the hilly terrains of Udaipur and Jashpur. These two features shown above account for an increase in the population of the district during a decade which was not favourable to population growth. That the increase was, to an appreciable extent, due to immigration is clear from the fact that during this period, Raipur and Bilaspur districts had more emigration than immigration (Raipur 87,978 immigrants, 184,781 emigrants; Bilaspur 100,095 immigrants, 138,024 emigrants).

Regarding the population trend during the decade 1921-31, the following mention is found in the Report of 1931 Census. ".....Raigarh and Sarangarh lie on the east of the Chhattisgarh plain .....The cultivated area occupies.....83% in Sarangarh and 68% in Raigarh..... The forest area is very limited..... the census of 1931 discloses a considerable rise in population and the people of the tract have the appearance of a contented rural community. The difference between the growth of population shown at the census and that deduced from the vital statistics is small in..... Sarangarh. In Raigarh it is over 10,600;the number is made up, it would apear from Subsidiary Table IV by an increase in the number of immigrants since 1921. If the number of emigrants had increased proportionately the effect of this factor upon the figures would be reduced".

Regarding the other two erstwhile feudatory states the Report states "For Udaipur and Jashpur it is interesting to notice the figures of immigrants for these decades:

	1911	1921	1931
Udaipur	14,310	8,743	22,094
Jashpur	16,663	12,443	18,852

The rise in 1931 appears to indicate little more in view of the increased population-than a return to normal after the adverse conditions prevalent during the latter part of the decade 1911-21 and a good deal of the immigration is undoubtedly casual. It must however be mentioned that large numbers of labourers emigrate from Jashpur, through Ranchi, which is easily accessible by road, to Assam. They generally return after a few years and probably bring with them numbers of children born in the other Province".

In the decade 1921-31 there was also substantial excess of births over deaths, the number percent of population of 1921 of births (B) and deaths (D) being-Raigarh 29(B), 19(D), Sarangarh 31(B), 20(D), Udaipur 32 (B), 16(D), Jashpur 24(B), 15(D).

During the decade 1931-41, the trend of population growth in Raigarh district corresponded more closely to the State and Division trend though even during this period the increase was greater than the State and Division figures. The tables seem to have turned after 1941 for during 1941-51 and 1951-61, Raigarh district registered less increase than the State figures though in 1951-61, the population of the district increased at a faster rate than the Division. In 1951-61, the district registered the high increase of 22.06%, the second highest inter-censal growth during this century: 1901-11 growth was 29.48%. This high increase is on the lines of the general pattern, though it is less than what it is for the State as a whole (24.17%). Apart from greater accuracy in enumeration, this high increase has been due to a cumulative effect of many factors. Various schemes like the Malaria Eradication Programme, increasing public health facilities, small-pox eradication programme, increase in means of communication, rural development schemes and tribal welfare programme have been undertaken. Death-rate has been brought down appreciably where as birth rate has remained the same or even increased a little. Then, the increase is to some extent also due to immigration: 50,778 persons born in Raigarh district were enumerated in the contiguous Raipur, Bilaspur and Surguja districts whereas 55,433 persons born in these districts were enumerated in Raigarh district. It is not possible to estimate the extent of emigration to the contiguous districts of other states. The figures of immigration show that 21,788 persons from the adjoining Sambalpur and Sundargarh districts of Orissa were enumerated in Raigarh district.

Density of population

As stated earlier, Raigarh district is the seventeenth most densely populated district of the State having a density of 210 per sq. mile as against 194 for the Division and 190 for the State. Since figures of density forthe tahsils as they are now constituted are not possible to be obtained, a direct comparability of population density during various periods is not possible. Leaving aside the minor area adjustments that have taken place the densities for respective erstwhile feudatory states may be regarded to be that pertaining to the tahsils.

This is shown below :

Tahsil	Density of Population per sq. mile.								
	1872	1881	1891	1901	1911	1921	1931	1951	1961
1	2	3	4	5	6	7	8	9	10
Udaipur	26	32	36	43	61	67	93	198	194
Jashpur	34	46	58	67	89	79	99	145	140
Gharghoda	43	87	113	118	147	163	187	208	183
Raigarh								145	379
Sarangarh	69	132	154	148	189	218	239	419	376

One point which immediately attracts notice is that as compared to 1951, the density of population per square mile has decreased. This therefore presents a paradox since the population has increased by 22.06%. However, there is no anomaly. What has actually happened is that the area figures given in 1951 are different from those now furnished by the D. L. R. and because they are less the density per sq. mile has increased. Following is given the figures of area reported in 1951 Census and those furnished at present. It may be remembered that the area transfers effected in 1956 and mentioned earlier have not been taken note of:-

Tahsil	Area in sq. miles reported in	
	1951	1961
1	2	3
Udaipur	677	914
Jashpur	1,764	2,190
Gharghoda	519	749
Raigarh	543	624
Sarangarh	341	492
Raigarh district	3,844	4,969

Rural-Urban population

The rural urban ratio in the district population in 1951 was 94:6 and even now this ratio is maintained in 94.6: 5.4. These figures are, however, not comparable since, as a result of area transfers after 1951 Sakti town went to Bilaspur district and Gharghoda town was declassified.

There are in all 2,185 inhabited villages now. The number of villages seem to show a tendency towards increase and this tendency is one of the indications of absence of urbanisation, because normally the tendency should be for the number of villages to decrease as a result of urbanisation. In the district, the reverse seems to be the rule: Gharghoda town of 1951 has been treated as a village in 1961. The number of inhabited villages in the district in 1941-61 is shown below.

No. of villages in		
1961	1951	1941
1	2	3
2,185	2,179	2,111

There are in all 57 uninhabited villages and the largest number of these 48 is in Sarangarh tahsil. This appears rather peculiar for the tendency to desert one habitaion and settle elsewher is commonly found among the tribals and as such the feature is not explanable here. This point requires some verification and no conclusion can be put forward here.

The percentage decadewise increase of rural and urban population during 1901-61 is shown below:

	1901-61	1951-61	1941-51	1931-41	1921-31	1911-21	1901-11
1	2	3	4	5	5	7	8
Rural	135.46	22.14	6.35	13.01	18.44	4.20	29.98
Urban	399.43	20.75	54.84	41.28	50.56	12.24	11.88

It is seen that the urban population grew very fast in 1921-31, 1931-41 and 1941-51. This seemingly high increase is, however, not an indication of high birth-rate in urban areas or immigration therein. It is due to the fact that the number of towns went on increasing or decreasing. During 1901-21 there were only 2 towns in the district and the population increase is just what it should be. The high increase

registered in the urban population in 1921-31 is because of the fact that the number of town became 3. In 1931-41, there is again seen a high increase though the number of towns continued to be 3. This may possibly be due to immigration of labour and other population. In 1951 the number of towns rose to 5 and that is the reason why the urban population registered an increase of 54.84%. The number again decreased to 4 because of declassification of Gharghoda. The following table shows the classification of the present towns during 1901-61:

Town	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
Jashpur	V	VI	..	..	..	..	..
Kharsia	V	V	VI	VI	..	..	..
Raigarh	III	III	III	IV	V	V	V
Sarangarh	V	V	V	V	V	V	V

(Class III—Population range 20,000—49,999; Class IV—10,000—19,999; Class V—5,000—9,999; Class VI Less than 5,000).

More than 65% of the villages in the district belong to what may be called 'small' village i. e. having a papulation of 500 and under and more than 90% of the villages have population of less than 1,000. Below is shown the variation in the number of villages in the various size-groups in 1951-61:

Class of villages according to size of population	Percentage of number of villages in this class to total number of villages in		Increase%in the proportion of the number of villages in the range
	1951	1961	
1	2	3	4
Less than 500	77.28	68.79	−10.9
500— 999	18.54	23.34	+25.8
1,000—1,999	3.76	6.86	+82.4
2,000—4,999	0.42	0.96	+128.5
5,000—9,999	..	0.05	+100

The figure shown above is what it is to be expected. As the rural population increases (the 1951-61 increase was 22.14%) it is to be expected that there will be normally a decrease in the proportion of small villages and many of these of the previous census will, at the succeeding census move into the next higher range.

Age and Sex-composition

The age and sex composition of the population is presented in the table below: for comparison the corresponding data for the State is also furnished:-

Distribution of 100 persons of all ages into age-groups by sex:-

Age-group	Percentage of population in the age-group					
	Raigarh district			M. P. State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0— 4	14.9	14.7	15.1	16.4	16.0	16.7
5— 9	15.4	15.4	15.4	14.3	14.2	14.4

A. N. S.	0.1	0.0	0.0	0.1	0.0	0.1

For a correct appreciation of the table given above, it is necessary to rememeber that it is based on ages actually returned at enumeration.

Actually speaking they are not returns at all for universal ignorance prevails in the rural areas about one's age. The common answer one is likely to get when asking the age of a villager in Chhattisgarh is "you form an idea how old I am". And more likely than not the 'age-returns' are the guesses made about the ages of persons by the enumerators concerned. Whereever ages are returned (and also in estimation) the tendency is to commonly round figures generally in digits ending in 0 and 5, or in even rather than odd digits. The age-data therefore,suffers from a digit bias, which will be apparent on drawing a graph of single-year age-returns. In order to minimise the distorting effects of age-misreporting, quinquennial groups have been adopted in the above table so as to include one preferred age in each group. This grouping does suppress to some extent the effects of age-heaping but it does not need an expert eye to be able to say that they are not entirely absent. Thus, if the age-returns were correct, frequency will go on decreasing in successive age-groups of equal width. But this is not always the case as the above table would show because of a disproportionately large return of some ages. In considering the above data therfore it would be safe to confine scrutiny to the broader age-groups 0-14, 15-34, 35-59 and 60+ which may conveniently be taken to correspond to children, young persons, middle-aged persons and old persons.

In its broad outline, the age-structure of the population of Raigarh district follows the same pattern as exhibited by the State populalion. As in the case of the state, in the district too, the proportion of children of 14 years and below is the maximum. In concrete terms roughly 2 out of every 5 persons in the district are infants or children below 14 years of age. The age-group 15-34 i. e. young persons, accounts for a little less than one third of the population of the district and almost is of the same proportion as in the State. Middle-aged persons i. e. age-group 35-59 form a little more than one-fifth of the population and here also the proportion is only a little higher than the corresponding State proportion. Persons in the age-group 60+ are a little more than what their proportion is in the State as a whole.

It will also be seen that at present there are 43.5 persons out of every 100 persons who are in the age-group 15-45 which is the reproductive age-group responsible for increase of population. Assuming that the age-pattern shown above holds good, the number of persons per 100 in this age-group at the next census (i. e. in 1971) would be 57.6. As such there is greater likelihood of increase of population during the next decade. It may also be seen that 72.5% of the population of the district is below 34 years of age and it can therefore easily be said to be youthful rather than old.

Though a little risky, comparison of smaller groups may be attempted. The district has a smaller proportion of children of 4 years and below as compared to the State. It appears that this may be a reflection of greater mortality in this age-group as compared to what it is in the State as a whole. Once this age is crossed, the chances of survival seem to be equal. In age-groups 60+, the district presents better picture of 5.6 against 5.1 for the State and this is especially so in the age-group 70+ relating particularly to females. There is a great deal of freedom to women and they enjoy a lot more of outdoor life than their sisters elsewhere. May be because of these factors, they seem to enjoy a greater longevity in the district than what their sex fares in the State as a whole.

Changes in Age-distribution since 1951

Changes in the age-composition of a population, if measured satisfactorily, provide indications of the likely trends of its growth. In the table-inset below is shown the percentage distribution of 100 persons in the district into four broad age-groups in 1951 and 1961. The data for 1951 is, however, based on a 10% sample and in making comparison with the 1961 data which is based on whole population, it has been assumed that the 1951 data represented the universe:-

Percentage Distribution of 100 persons in 1951 and 1961 into broad age-groups

Age-group	1951			1961		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0—14	39.5	39.5	39.5	40.4	41.0	39.9
15—34	30.8	31.7	29.9	32.1	31.6	32.6
35—64	26.3	25.3	27.2	24.4	24.9	23.9
65+	3.4	3.5	3.4	3.0	2.5	3.6
A. N. S.	..	..	..	0.1	0.0	0.0

Age- misreporting if any, becomes almost negligible in the broad age-group segments taken above. It is seen from the table that as compared to 1951, there has been increases in the first two segments i. e. children and young persons by 0.9 and 1.3 persons per 100 respectively whereas the proportion in the older groups has decreased. This decrease would, however, not necessarily mean that mortality in these segments has increased. The proportion has been probably brought down because of higher proportion in the first two groups.

The proportions in the age-group 0-14 in 1951 and 1961 show that there has been increase both in the proportions of males and females but the increse has been unequal: 1.5 in case of males and only 0.4 in case of females. This does not necessarily mean that there has been a shift towards increased births of males children. As the table of age-composition given earlier would show, there is greater proportion of females in the age-group 0-4 in 1961 and their proportion actually decreases in the age-group 10-14. Why this happens will be discussed later in connection with sex-ratio but it appears to be due to misreporting of age. In the age-group 15-34 also there has been an increase by 1.3 persons per 100 as compared to 1951 and here the reverse appears to be the case-there has not been increase of males but proportion of females has increased and this increase is due to the high females ratio in the age-group 20-24. This increased proportion of females in the age-group 15-34 which will be the reproductive age-group during the next 10 years indicates that the district can expect a greater increase in the natural population during the next 10 years than what it has been during the last 10 years. This table also suggests that there has been a shift in the population of the district towards youthfulness since 1951.

Sex-Ratio and Sex Distribution by age

Sex-ratio is the number of females per 1,000 males. The general picture emerging at the census is that the southern and eastern districts of the State have a higher sex-ratio, i. e. higher proportion of females. Below is given a table showing the changes in the proportion of sexes in Raigarh district for comparison, State and Division figures have also been furnished:-

Unit	Population	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8	9
M. P. State	T	953	967	970	973	974	986	990
	R	970	975	980	983	982	991	995
	U	856	907	882	872	878	913	937
Bilaspur Division	T	1,003	1,010	1,009	1,021	1,020	1,022	1,025
	R	1,012	1,012	1,011	1,022	1,020	1,022	1,025
	U	886	951	959	972	1,005	1,031	1,017
Raigarh district	T	1,010	1,015	1,011	1,020	1,017	1,014	1,013
	R	1,017	1,017	1,012	1,020	1,016	1,014	1,013
	U	901	980	990	1,013	1,071	1,026	1,003

Considering the total population, Raigarh distict occupies the third highest place in having large proportion of females (Raipur 1,037, Bilaspur 1,024) and in respect of rural population only, the district is preceded by Raipur (1,053), Durg (1,041) and Bilaspur (1,036). The above table also shows that in the State and the Division, the tendency has been towards decreasing sex-ratio in the State, this decrease has been consistent during 1901-61 and in the Division there was only a very minor increase registered in 1931 and 1951, ignoring which here also the tendancy towards decrease has been consistent. The district presents a different trend: the sex-ratio increased consistently during 1901-1931, there was a fall in 1941, an increase in 1951 and 1941 position being restored in 1961. The indication of this decrease in sex-ratio in 1941 is seen from the sex-ratio in urban area, which registered a decrease by 23 per 1,000 in 1941 as compared to 1931 and only made up the deficiency by 10 per 1,000 in 1951. It will also be seen that the number of towns remained the same in 1941 as in 1931 but the urban population during this period increased by 41.28%. It is, therefore, likely that during this period there was an influx of labour from outside in the industrial establishments which caused this decrease. The decrease of sex-ratio in 1941 in the rural areas however, still eludes explanation.

As indicated earlier, the district is divided into two distinct physiographic as well as ethnic divisions. The northern region comprising Jashpur and Udaipur tahsils is more similar to Chhota Nagpur plateau region and Surguja district than to the plain of Chhattisgarh. As against the Chhattsgarh plain where high sex-ratio is the rule, this northern region has been characterised by a low sex-ratio. Below is given a table showing the sex-ratio in these different regions, figures of erstwhile feudatory States have been taken here for the period 1881-1931 and in the figures of 1951, area transfers have not been taken into consideration:—

Unit	Number of females per 1,000 males							
	1881	1891	1901	1911	1921	1931	1951	1961
1	2	3	4	5	6	7	8	9
Udaipur	984	963	964	978	981	978	974	978
Jashpur	962	984	982	982	980	988	966	1,003
Raigarh	991	1,001	1,021	1,029	1,023	1,030	1,035	1,013
Gharghoda							1,084	1,014
Sarangarh	1,024	1,028	1,063	1,048	1,063	1,065	1,061	1,049

Even if the figures for the period earlier than 1901 are omitted, the picture of low sex-ratio in Udaipur and Jashpur (erstwhile States and present tahsils) and high sex-ratio in Gharghoda, Raigarh and Sarangarh is revealed. In other words, the general picture is that of low sex ratio in the uplands and higher sex-ratio in the plains. It may be of some interest here to reproduce the comments on low sex-ratio in the erstwhile Chhota Nagpur States (i. e. Udaipur and Jashpur region).

The report of 1911 Census States that none of the factors of infant marriage and enhanced dangers of child birth "serve to explain the comparative deficiency of women among the primitive aboriginal population of the Chhota Nagpur States. There are no vital statistics available for these States, but a scrutiny of proportions at different age periods makes it clear that while the proportion of females at birth is above that of other Divisions, the ratio declines from about the 15th year of life, so that in the later age-periods there is a marked depletion in the ranks of women. Beyond the fact that the extraordinary fertility of these people may be accompanied by a more than proportionate death- rate of women in child-birth" no other explanation appeared to be possible.

The following mention is found in the Census Report of 1921 "As at last census, the Chhota Nagpur States present statistics of sex which would appear to be abnormal. The population which inhabits these States consists largely of aborigines, and preponde-

rance of females might be expected. To judge by the proportion of female infants below one year of age, 992 to 1,000 males, the excess of males over females is the highest in the province except in the Narbudda Valley Division. If we exclude the period from 20 to 30, when the number of females is artificially swollen as in other divisions by incorrect statement as to age, it is not until the last age-period that the number of females is in excess. A similar phenomenon is to be observed in Bastar and unless there is something exceptional about the local tribes, who are ethnologically distinct from their neighbours, it is probable that omission to enumerate women in this wild and sparsely inhabited country are sufficiently numerous to affect the statistics in a manner that would be impossible in more settled tracts".

In the report of 1931, it was pointed out that areas registering high immigration figures generally have lower sex-ratio. The suggestion put forth in the 1931 Report was that the distribution of tribes has probably much effect upon the sex figures of backward tracts. "The principal tribes of the Chhota Nagpur plateau are Korwas, Bhuinhars, Oraons and Kawars.. .. a slight excess of females Korwas is balanced by a similar excess of males Bhuinhars. Kawars show a marked excess of females for the province but Oraons, the most numerous tribe in Jashpur show a deficit of 35 females to every thousand males among those following tribal religions and of 24 among Christians. Whether it is in the climate and situation of the tracts in which these tribes live or the physical characteristics of the tribes themselves which affects the figures is a matter which merits separate research".

Why the sex-ratio in Udaipur tahsil is so low whereas it has tended to be higher in Jashpur is a subject which requires study at more competent hands. Probably the sex-ratio of various tribes who inhabit these regions may be of some use in that respect:-

Tribe	Sex ratio
Bhuinhar	1,108
Binjhwar	1,050
Gond	1,043
Kharia	1,082
Bhaina	1,024
Nagesia	1,050
Nagwanshi	1,010
Sawara	1,070
Oraon	1,039
Dhanwar	966
Kalanga	993
Kanwar	996
Korwa	997
Majhwar	971
Munda	998

A discussion on sex-ratio would, however, remain incomplete without considering the sex ratio at various age-periods. For bringing out the picture in some better perspective, corresponding figures for the State and the two other districts of the Division are also given:—

Age-group	Sex-ratio (i. e. number of famales per 1,000 males).			
	Madhya Pradesh	Surguja	Bilaspur	Raigarh
1	2	3	4	6
0— 4	966	1,042	1,021	1,041
5— 9	966	1,000	1,038	1,014
10—14	847	846	858	869
0—14	*974*	*976*	*985*	*985*
15—19	929	1,000	984	948
20—24	1,069	1,168	1,209	1,241
25—29	939	898	989	1,004
30—34	897	843	978	990
15—34	*959*	*968*	*1,037*	*1,040*
35—39	878	817	927	881
40—44	950	877	1,069	946
45—49	886	857	993	1,013
50—54	908	862	981	920
55—59	903	907	1,091	1,139
35—59	*905*	*856*	*999*	*952*
60—64	1,080	1,016	1,253	1,157
65—69	1,159	1,173	1,326	1,384
70+	1,373	1,414	1,523	1,453
60+	*1,190*	*1,170*	*1,362*	*1,298*
Age-not stated	898	829	765	824
Sex-ratio all ages	953	955	1,024	1,010

It is seen from this that broadly the age-group wise sex - ratio pattern of the district corresponds more to Bilaspur district than to State. In the State the general pattern of sex-ratio in the broader age period 0-14, 15-34, 35-59 and 60+ is that the sex-ratio goes on decreasing from the first to the third segment and then rises in the fourth. In Raigarh district and also Bilaspur district the ratio rises from first to second segment, falls in the third and rises in the fourth. The pattern exhibited by Surguja is different in this respect and corresponds more to the State pattern.

The table also brings out the following features:—

(1) As compared to State and Bilaspur district there is an excess of females in the age-group 0-4 and it is also likely that there is a higher sex-ratio at birth.

(2) Whereas in State the sex-ratio maintains the same level in the next higher group i. e. 5-9 and in Bilaspur district the sex-ratio registered an increase, in Raigarh district there is a decrease.

(3) The sex-ratio in the age-group 10-14 is low as everywhere else in the State and this clearly appears to be due to mis-reporting in this age-group. What normally happens is that married girls in this age-group are reported to be over 14 years and unmarried ones are returned as below 10 years. Thus this groups suffers both ways.

(4) As compared to Bilaspur and Surguja districts, the sex-ratio in age group 15-19 is low but higher in the next two age-groups. The over all result is that sex-ratio in the broader group 15-34 is higher in the district than in Bilaspur district.

(5) Raigarh district registers a very low figure in the age-group 35-39 and 40-44 i. e. the period when females approach their safe period i. e. menopause at 45 years when the dangers of child-birth are removed. Why these age-groups 35-44 register low ratio can be any body's guess because in these ages the dangers of child births are comparatively minimised.

(6) It is the age-groups 35-59, 40-44 and 50-54 which are resposible for decreasing the sex-ratio in the district as comared to Bilaspur.

(7) In ages beyond 60 years, the females in Raigarh district do not seem to be doing as good as their sisters in Bilaspur district.

RELIGION-

Because of transfer of villages between Raigarh and Bilaspur and because of the non-availability of of figures of religion for the towns separately it is not possible to make a comparative study of 1961 figures of religion with those for 1951. A very crude study can however be made which, it must be remembered, does not prove to be of any statistical value because of the shortcoming mentioned above. In this estimate, the population of Sakti tahsil (rural only) have been omitted from the 1951 figures; it is not possible to find out the figures of various religions in Sakti town (also transferred to Bilaspur). The figures for Sakti town are therefore included in 1951 figures presented below:—

Percentage to total population of followers of religion in 1951—61

Year	Hindu	Muslim	Christian	Sikh	Jain	Others
1	2	3	4	5	6	7
1951	97.88	0.25	1.56	0.03	0.00	0.28
1961	90.56	0.61	8.68	0.06	0.03	0.05

It is seen from here that there has been a decrease in the followers of Hinduism in the district and it has been somewhat displaced from its position of having 97.88% followers to that of 90.56%. All other religions register increases the most noteworthy being the increase in the number of Christians. Expressed in absolute figures the number of Christians in Raigarh district in 1951 (subject to the limitation mentioned above) and 1961 are:—1951:13,558; 1961: 90,359; increase 76,801. This increase is evidently due to the impact of various Christian missions in

Jashpur and Udaipur tahsils. Out of the 1961 figures of Christian religion, 88,364 persons belong to Scheduled tribes and it is thus clear that it is they who have been more attracted by Christianity. It is further seen that it is the Oraons who have adopted Christianity in great bulk. Below are given tribe-wise figures of Christian religion:—

Oraon	87,516
Kharia	667
Munda	129
Korwa	31
Nagasia	8
Bhuinhar	5
Kanwar	4
Gond	2
Nagwanshi	2

MOTHER TONGUE

In 1961, 81 mother tongues have been returned from Raigarh district, the number thus being more than in Surguja (61) and Bilaspur (65) but less than that in Raipur (91). The percentage of speakers of the important mother-tongues/dialects to the total population is as below:—

Mother tongue	Total Speakers	% to total population
1	2	3
Hindi	625,420	60.07
Chhattisgarhi	54,127	5 20
Kurukh/Oraon	166,918	16.03
Oriya	96,878	9.30
Sadan/Sadri	56,038	5.38
Kharia	13,459	1.29
Korwa	5,012	0.48
Others	23,374	2.25

Actually speaking the proportion of persons speaking Chhattisgarhi dialect is much more than what is shown in the table above, and a good proportion of Chhattisgarhi speakers have returned Hindi as their mother - tongue. Since Chhattisgarhi ultimately is a dialect of Hindi, there is no question of figures being vitiated as a result of this tendency and the figures of Hindi and Chhattisgarhi may be taken together.

It may thus be seen that Raigarh district not only presents a 'water-shed' of ethnic groups but also as a 'water-shed' of languages and here we get represented languages and dialects belonging to the Munda Branch of Austro-Asiatic sub-family of Austric Family, Dravidian Family and Indo-European Family. The main speeches of Raigarh district may be classified on this basis:—

Korwa and Kharia	...	Munda Branch of Austro-Asiatic sub-family of Austric family.
Kurukh Oraon	...	Dravidian Family
Oriya	...	Indo-European Family-Aryan Sub-family - Indo Aryan Branch—Outer sub Branch - Eastern Group-Oriya.
Sadan-Sadri	...	Indo - Eropean Family-Aryan Sub - family - Indo Aryan Branch-Outer Sub-Branch - Eastern Group-Bihari.
Hindi and Chhattisgarhi	...	Indo - European - Family-Aryan Sub-family-Mediate sub-branch Mediate group-Hindi.

If the returns of languages are plotted village-wise on a map of the district it will readily be observed that Oriya is spoken in the eastern part of Sarangarh and Raigarh tahsils, Chhattisgarhi and Hindi are spoken in the rest of Sarangarh and Raigarh tahsils and Gharghoda tahsil, Kurukh/Oraon is spoken in the north - eastern part of the district mostly in Jashpur, Kastura and Bagicha R. I. circles of Jashpur tahsil and Sadan / Sadri, Kharia and Korwa are spoken in the northern parts of Gharghoda Jashpur and Udaipur tahsils. This is only a very crude division, a better perspective may be had by actually plotting the figures on a map and studying the distribution.

It may be seen that 3 of the above mother tongues i. e. Kurukh/Oraon, Korwa and Kharia are also the names of the tribes who inhabit parts of Raigarh district. Following is given the population of the tribe and the number of speakers of mother-tongue which is known after the name of that tribe:—

Name of the tribe	Population	Name of the Mother-tongue	No. of speakers	Difference between 2 and 4
1	2	3	4	5
Kharia	15,793	Kharia	13,459	2,334
Korwa including Kodaku	19,024	Korwa	5,012	14,012
Oraon including Dhangad	169,311	Kurukh/Oraon	166,918	2,393

It appears from the above that whereas Kharia and Kurukh/Oraon speeches are still able to hold ground, the Korwa speech is slowly being displaced by its more dominant neighbours and 14,012 of Korwas do not speak Korwa speech as their mother tongue. That the Korwa speech is being displaced is also indicated by the fact that in 1931 there were 4,821 speakers of Korwa speech only in the erstwhile Jashpur and Udaipur feudatory States and Grierson had estimated the number of speakers of this speech to be 5,358 in these two areas in 1891; the figure for the whole district in 1961 is only 5,012. Except the above general statement, it is outside the scope of the present note to discuss why Korwa speech is being displaced and how is the Kurukh/Oraon able to maintain its position as a distinct vernacular.

The Chhattisgarhi spoken in Raigarh district in the neighbourhood of predominantly Oriya-speaking areas is naturally somewhat different from the standard Chhattisgarhi spoken in Raipur and Bilaspur and in the western parts of Raigarh district. This Chhattisgarhi is sometimes also returned as Binjhwari ar Binjhwali and is actually nothing but a mechanical mixture of Chhattisgarhi and Oriya. Only a few of its special peculiarities may be mentioned: the letter *e* is often substituted for *i* e. g. *rahes* instead of *rahis* he was, and *dehes*, instead of *dihis*, he gave. He went is scmetimes spoken as *jayas*, sometimes *jais*,sometimes *jes* and sometimes *jeis*. The word for '*is*' is ahe. The word *apan* is used to mean '*we*'. The form of Chhattisgarhi spoken by the Korwas in Jashpur tract is sometimes referred to as Sadri Korwa. Sadan/Sadri, often referred to only as Sadan or Sadri is a form of the Bhojpuri dialect of Bihari.

In the Statement given below is shown percentage change in each decade (1911--1961) of population of Hindi in the district. In doing so the following figures relating to mother-tongues listed have been grouped with Hindi:—

Mother tongue	No. of Speakers
Awadhi	3
Binjhwari	3
Brajbhakha	2

Description	1961	1951	1931	1921	1911
Absolute figures	680,247	599,968	407,374	436,588	410,780
Percentage Variation	+13.38	+47.28	+16,69	+6.28	..
Percentage to total Population	65.33	70.33	58.93	75.33	73.99

It is difficult to make any comparison of the 1961 language returns with those obtained at 1951 census because of the transfers of areas effected between Raigarh and Bilaspur districts. It is not known as to what proportion of various languages was being spoken in Sakti town which has since been transferred to Bilaspur. Assuming that the number of speakers, if any, of mother - tongues like Kharia, Kurukh/Oraon, Sadan/Sadri and Korwa was negligible in Sakti town in 1951, a comparison may be attempted between 1951 and 1961 is respect of some of the mother-tongues.

Name of the mother tongue	No. of speakers in 1931	1951	1961
1	2	3	4
Kurukh/Oraon	94,140	30,561	166,918
Korwa	4,821	2,482	5,012
Sadan/Sadri	..	86,405	56,038
Kharia	7,830	16,754	13,459
Gondi	191	173	53
Oriya	73,514	86,498	96,878
Chhattisgarhi	405,680	..	54,127

In 1951 figures some adjustments have been made e. g. mother-tongue Dhangar has been merged with Oroan and Nagpuria with Sadri. Taking Korwa first, it is seen that in 1931 there were 4,821 speakers which dwindled to 2,482 in 1951 and increased again to 5,012 in 1961. Same feature is seen about Kurukh/Oraon whereas Kharia represents the other case-increasing from 1931 to 1951 and then again declining. On the other hand Gondi shows a continuous decline. These figures remind the present writer of the following observation made in this regard by Shri Asok Mitra, Census Commissioner for India: These "are evidence of strong and complex undercurrents of assertion, displacement, reassertion, erosion and insecurity as well as instability not always apparent on the surface. They leave no doubt in one's mind that the big fish make bids to gobble up the small fish, that for some time some small fish feel content to stay inside the belly of a big fish, but at other moments they kick back and get out of the bellies again, their strength diminished or increased for no apparent reason whatever. They also confirm what P. C. Tallents observed in the 1921 Census Report for Bihar and Orissa "that the smaller dialects are taking an unconscionable time over dying, and that the more important non-Aryan languages are still holding their own".

Scheduled Castes and Scheduled Tribes

Raigarh is the seventh biggest district in the State in respect of the population of Scheduled tribes and twenty-sixth in respect of Scheduled castes population. This is just what is to be expected because generally the districts having a concentration of the scheduled tribes do not have the scheduled castes in equal number and *vice versa*. As stated earlier, the district can be divided into two ethnic divisions and the northern half of the district has more of scheduled tribes and less of scheduled castes; the southern half has greater cocentration of scheduled castes. It is difficult to hazard an explanation for this peculiar feature of mutual exclusion but it may be that the low economic level of the tribal population in the rural area does not provide adequate employment in the kinds of job that scheduled castes are used to. In Raigarh district the urban rural proportion is 6:94 and a great part of even this urban population is not truly urban. But it has to be conceded that the scheduled castes are to be found in relatively greater numbers in the larger villages and in the tahsil headquarters where the volume of employment apportunities available for scheduled castes is more.

According to the *Scheduled Castes and Scheduled Tribes Lists [Modification] Order, 1956*, there are 15 castes and 32 tribes which are 'scheduled' In Raigarh district. This number does not include the various synonymous groups which have been mentioned in the list. For example, Gond which in the aforesaid Order includes 40 synonymous groups or sub-tribes has been treated as one tribe and similarly Chamars which has eight more synonymous groups like Satnamis and Surjyavanshis has been treated to be one caste. The table-inset below shows the percentage of scheduled castes and scheduled tribes in the district in rural and urban areas separately: —

Population Rural/Urban	Percentage of Scheduled Castes		Scheduled Tribes	
	Males	Females	Males	Females
Rural	11.02	11.12	47.99	48.51
Urban	11.19	12.54	7.40	7.35

In the table below is shown the percentage of scheduled castes and scheduled tribes for tahsils, towns and Revenue Inspector Circles:—

District	Tahsil	Revenue Inspector Circle and Town	Percentage of Scheduled Castes	Percentage of Scheduled Tribes
1	2	3	4	6
Raigarh	..	..	11.11	45.90
	Raigarh	..	12.20	23.25
		1 Raigarh I	12.68	17.48
		(a) Raigarh Town	13.03	4.97
		(b) Rest	12.11	37.26
		2 Raigarh II	11.90	35.47
		3 Kharsia	11.17	34.82
		(a) Kharsia Town	7.74	2.49
		(b) Rest	11.72	40.04
		4 Bhupdeopur	12.76	21.20
		5 Pussour	12.24	18.36
	Gharghoda	..	8.47	53.02
		1 Gharghoda	7.80	51.79
		2 Lailunga	12.95	58.04
		3 Tamnar	10.10	48.40
	Udaipur	..	7.71	62.78
		1 Dharamjaigarh	5.37	62.27
		2 Kapu	7.40	63.19
		3 Pathalgaon	9.31	62.81
	Jashpur	..	6.60	67.31
		1 Jashpur	3.78	77.46
		(a) Jashpur Town	4.42	34.95
		(b) Rest	3.66	84.85
		2 Sanna	4.34	75.91
		3 Bagicha	5.89	70.35
		4 Kastura	5.02	58.91
		5 Kunkuri	9.11	63.65
		6 Tapkara	15.55	61.34
	Sarangarh	..	22.39	18.70
		1 Sarangarh	19.49	21.70
		(a) Sarangarh Town	14.99	3.91
		(b) Rest	20.53	25.81
		2 Hardi	34.00	12.07
		3 Saria	15.31	18.14
		4 Baramkela	14.31	22.93

It is thus seen that it is in the northern half of the district that the scheduled tribes preponderate and constitute more than 50% of the population. In the tahsils, Jashpur tahsil has the largest proportion of tribal population, this being more than 58% in all the R.I.Circles. The greatest concentration of tribal-population in Jashpur tahsil is in the rural areas of Jashpur tahsil (84.85%).

Some of the numerically important scheduled castes of the district are - Ganda (43,772), Chamar (34,772), Chikwa (16,252) and Ghasia (14,277). Among the synonymous groups of Chamars whose population is included under 'Chamar', those having a sizeable population are Satnami (25,540), Ramnami (3,071) and Chamar (6,094).

Some of the numerically important scheduled tribes are-Oraon (167,700), Kanwar (121,763), Gond (46,379), Sawara (23,629), Korwa (19,010), Nagasia (18,078), Nagwanshi (16,980), Kharia (15,793) and Bhuinhar (11,217). It may be remembered that in the above the population of synonymous groups has been shown separately whereas in the tables, the arrangement strictly follows the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956.*

Scheduled Castes and Scheduled Tribes Population 1951—61.

In making any attempt to compare 1951 population figures of the scheduled castes and scheduled tribes with 1961 figures, it is necessary to remember that not only has the constitution of Raigarh district undergone a drastic change but also the *Constitution Scheduled Castes and Scheduled Tribes Order 1950* which was the base of enumeration in 1951 census has undergone a more drastic change and there can be no comparability between the *1950 Order* and the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956* which has been strictly followed in the enumeration of the Scheduled Castes and Scheduled Tribes in 1961. Because of this second factor i. e. amendment in the lists of Scheduled Castes and Scheduled Tribes certain synonymous groups have been mentioned in the Order. Again, in the 1950 Order, tribes scheduled in Dharamjaigarh, Gharghoda, Jashpurnagar and Kharsia tahsil (since abolished) were not scheduled in Sarangarh tahsil. Thus there is a net adition of Sarangarh tahsil area in respect of scheduled tribes.

In attempting to compare 1951 and 1961 figures of scheduled castes and scheduled tribes Bilaspur and Raigarh districts must be taken toge—ther. The combined picture of Raigarh-Bilaspur in respect of scheduled castes is:- 1961:483, 282; 1951: 290,295; the increase is 66.5%. The new castes added since 1951 consist of (a) synonymous groups relating to (i) Basor, (ii) Chamar and (iii) Mang and (b) non-synonymous independent ones which are (i) Ganda or Gandi, (ii) Khatik, Chikwa or Chikvi and (iii) Sansi. As far as (b) is concerned, the population figures can be subtracted from the 1961 population but regarding the synonymous groups listed in (a) it is impossible to ascertain what proportion was included in the 1951 returns. It is thus impossible to arrive at comparable figures. But even if these figures are excluded from the 1961 scheduled castes population, the percentage inrcease works out to 8.5% for Bilaspur and Raigarh district together. This would, however, be incorrect assessment since a large proportion of synonymous groups are likely to be represented in the 1951 returns. Similar difficulty crops up in respect of the scheduled tribes. It may be seen that there has been a net addition of 33,357 in scheduled tribes population because of the addition of Sarangarh tahsil in the 1956 Order.

The Scheduled Area

As specified in the *Scheduled Areas (Part A States) Order, 1950- C. O. I.* the area under the erstwhile Khuria Zamindari in Jashpur tahsil is treated as Scheduled Area.

The People

Strict ethnic frontiers are no longer possible but as in physiography so in its ethnic characteristics, Raigarh district can be divided into two more or less well-marked divisions. Latitude 22° 15′ N which roughly marks the boundary between the northern hilly region and the southern plain region may also be visualised as forming what may be referred to as a 'water-shed of ethnic groups' North of this latitude one sees the ethnic types characteristic of the Chhota Nagpur plateau and represented in Oraon, Korwa, Kharia, Nagesia, Majhwar and Bhuinhar and south of the line are represented in the ethnic types characteristic of the Chhattisgarh plain and adjoining plain region of Orissa:Sawara, Binjhwar, Gond, Panka, Teli, Satnami and Kewat. Who the autochthones of these tracts are, is difficult to say unless sustained research is carried on, from which angle the district

appears to have been comparatively neglected in recent times. Some of the important castes and tribes may be described here:—

Oraon

Oraons are numerically the most important tribe of Raigarh District Constituting 35.4% of the total scheduled tribes population of the district. In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956* the tribe has two more synonymous groups-Dhangad and Dhanka. The latter group does not seem to be represented in the district. In addition to these synonyms given in the aforesaid Order, the other synonyms by which the tribe is commonly known are Orao, Uraon, Kurukh, Kuda and Kisan. All these terms in some way or the other mean farm servant: Oraon and its variant Orao means farm servant and so does Dhangar; Kuda means a digger and Kisan means a cultivator. The Oraons have no proper sub-castes, but the Kudas and Kisans, having a distinctive name and occupation sometimes regard themselves as separate bodies and decline intermarriage with other Oraons. Colonel Dalton has written about the Oraons as being "if not the most virtuous, are the most cheerful of the human race..... I believe they relish work if the task-master be not over-exacting .....The Oraon youths, though with features very far from being in accordance with the statutes of beauty, are of a singularly pleasing class, their faces beaming with animation and good humour".

As in case of some other tribes, the customs of the Oraons vary from place to place and that may be the reason why the God Dharmesha mentioned by Father Dehon, Roy and Russell is not universally known in Raigarh and is known only in some villages. Elsewhere Dulha Deo, Burra Deo, Mata Devi etc. are worshipped by the Hindu Oraons. Everywhere they have their own *dewars* who serve them in times of sickness and to lay evil spirits.

In 1931 there were 95,270 Oraons in the district. The tribe has thus increased by 77.7% during these 30 years. Again, in 1931, there were 47,517 Christian Oraons whereas now the number of Christian Oraons is 87,516: the increase thus is 84.1% and 51.6% of the Oraons in 1961 have returned christianity as their religion.

Kawars

The Kawars or Kanwars were the second most preponderant tribe in the district in 1931 and so they are now. During the period 1931-61, their population has increased by 30.3% only which is less than half the rate at which the Oraons have increased. One of the factors for their slower growth may be the low sex ratio (996 as against 1,039 of the Oraons). In the district the Kanwars are most numerous in Raigarh, Gharghoda and Udaipur tahsils and less numerous, though still appreciable in number, in Jashpur tahsil.

In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956,* the various synonymous groups of the tribes are Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar and Chattri. Of these only three i. e. Cherwa (544), Kaur (160) and Kanwar are represented in Raigarh district. The Kanwars trace their origin from the Kauravas of the Mahabharata. Actually speaking they have eight endogamous divisions-Tanwar, Kamalbanshi, Paikara, Dudh Kanwar, Rathia Chanti, Cherwa and Rautia. Of these the Tanwars regard themselves to be the highest but these are probably not represented in Raigarh district. The Kawars are a prosperous and well-to-do tribe and their main source of livelihood is cultivation. They have attempted to rise in the social hierachy and some of them do not like to be labelled as tribals. Child-marriage, an institution generally alien to the tribals, is in vogue among them.

Gond

In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956,* a long lists of 40 sub-tribes and synonymous groups have been given under Gonds and the population of Gonds shown in the tables is inclusive of the population of these sub-tribes also. In 1931 there were 48,821 Gonds in Raigarh district and if only the population of Gonds exclusive of the sub-tribes is taken, which is 46,379 it is seen that there is a decrease. But since the population of the sub-tribes mentioned in the present order, is not shown in the 1931 Tables, it is assumed that it included these and doing so now, an increase of 39.3% is seen during 1931-61. Some of the tribes like Nagwanshis of the district claim to be independent of Gonds; the discussion of this subject is, however, not relevant to the present note.

The Gonds are repersented mainly in Raigarh, Gharghoda and Udaipur tahsils and their number in Sarangarh and Jashpur tahsils is much less. They have two endogamous sections - the Raj Gond and the Dhur Gonds. It may be seen that the Gonds have more or less completely lost their language now.

Sawara

Sawaras are the next most preponderant tribe in the district and constitute 4.9% of the scheduled tribes population thereof. Between 1931 and 1961 the tribe has increased by some 30.3%. Practically all of them are concentrated in the plain areas below the latitude 22° 15′ in Sarangarh, Raigarh and Gharghoda tahsils. The Sawara have two sub-divisions-Lariya and Uriya. The Uriya Sawaras marry their girls before they attain puberty because failing this the girl can not be married in the formal manner.

Korwa

Korwa including Kodaku is the term by which this tribe is referred to in the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order. 1956.* Of these, the latter group, Kodaku, has a population of only 14 in the district, the rest being the Korwas. The Korwas are next to Sawaras in order of numerical strength and constitute 3.9% of the scheduled tribes population in Raigarh district. They have increased by 50.3% during 1931—61 and are all concentrated in Jashpur and Udaipur tahsils. "This people" writes Colonel Dalton in his *Descriptive Ethnology of Bengal*, "take up the dropped links of the Kolarian chain and carry it on west over the Surguja, Jashpur and Palamau highlands till it reaches another cognate tribe, the Kurus or Muasis of Rewa and the Central provinces". The Korwas inhabiting the Khudia tract of Jashpur tahsil are typical of the tribe. The Korwas of Raigarh district are divided in to two endogamous groups - the Paharia Korwas or the Hill Korwas and the Diharia Korwas or the Plains Korwas. There is no commensality of food and drink between these two sub-tribes but normally the Paharias have no objection in accepting food and drink from the Diharias, the Diharias do not reciprocate. On the Surguja border there is also a third group-that of Bhadiya Korwas who will not intermarry or eat with the Diharias.

Among the Paharia Korwas of this district, the following exogamous group are found - Hansdwar, Edigwar, Mudhiyar, Samat, Ginnur and Rehla. The members of the tribe do not seem to know anything about totem taboos in relation to these exogamous groups. The Hill Korwas of Jashpur practise ancestral worship and that constitutes their only religion but in other places signs of a regular pantheon may be met-for example at some places they pay homage to Barenda Bhut, Mudhkhuri, Khudia Rani and Mahadeo. During the regime of erstwhile feudatory States, attempts were made to bring down these Korwas from the hills and they were allotted land in plain villages and given cattle. prior to 1910, they had broken into an open revolt against the authorities. The Diharia Korwas are more advanced, live in settled villages and have more advanced religion. As mentioned by shoobert in 1931 and as also reflected in the 1961 returns, the Kodaku group is not represented in Raigarh.

Nagesia

The Nagesia constitute 3.7% of the Scheduled tribe population of the district but have decreased by 21.6% as compared to 1931. Why this should be so is not clear and some field study may be required before any explanation may be put forward. One of the causes of this decrease may be because the Nagesias refer to themselves as Kisan. It may be remembered that both the Oraons and Nagesias refer to themselves as Kisan which is probably regarded to be a honorific term. The Nagesias, however, say that they are the true Kisans whereas the Oraons are so only by occupation. The name of this tribe is derived from *Nag* or Cobra. The Nagesias are divided into three groups-Telha, Dhuria and Senduria. The Telhas and Dhurias intermarry but the Sendurias regard themselves as superior. One intersting feature about the Telha Nagesia is that they have no exogamous septs and in settling marriages prohibited degrees are the only consideration.

Bhuinhar

The Bhunihars are met with in Jashpur, Udaipur and northern parts of Gharghoda tahsils and Colonel Dalton described the Bhuinhars of his days (1872) as the lowest types of human beings he had come across. Hunter stated in his *A Statistical Account of Bengal 1872*, this that tribe was rapidly dying out. This does not appear to be so at least in Raigarh

district though their increase during 1931-61 has been extremely slow-by 14.4%. The Bhuinhars generally claim that they came to these parts from Garha Mandla. The Bhuinhars have totemistic exogamous septs like Dumen, Murhi, Sali, Nag, Sukra, Maji, Chitki, Raki and Ali. These are also different from region to region, for example, in Jashpur tahsil some of these sept-names are Ahind, Harhuria Kirketta, Goha, Beng, Thitho, Tope, Saras and Chorant.

Nagwanshi

In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956*,the Negwanshis have been shown as a sub-tribe of the Gonds and their population figures are merged with those of the Gonds in the tables. In 1931 also, Nagwanshis are not shown as an independent tribe and it is not possible to say what their number then was. In 1961, however, 16,980 Nagwanshis have been returned from the district (as stated earlier, these figures are merged with those of the Gonds in the tables). Though so grouped in the 1956 Order referred to above, the Nagwanshis claim to be independent of the Gonds. In 1931 also Shoobert had mentioned that the Nagwanshis of Raigarh repudiate any association with the Gonds. He had suggested on the other hand that they may merely be a division of the Senduria Nagesias or of Kharias. The Nagwanshis at present disclaim any such affiliation. The term Nagwanshi means'descendents of snake'and the tradition in the tribe is that they have migrated to these areas from Chhota Nagpur region and are the descendents of a dynasty that once ruled that area. The Nagwanshis put on a sacred thread after marriage and are quite an advanced tribe. Dalton classified them under 'Hinduized aborigines and Broken Tribes'. The exogamous septs of the Nagwanshis are Kumar, Baghin, Dudhkanra, Sukra, Manakhia, Baranga, Kherwar, Bagaria, Kansar, Lohra, Samrath, Kutuwan, Bhuinyan, Pradhan, Baiga, Manjhi and Rajpuria.

Kharia

The Kharias constitute 3.3% of the scheduled tribes population of the district. Since 1931, they have increased by 63.3% and are at present concentrated in Jashpur and Gharghoda tahsils with small numbers in Sarangarh and Raigarh tahsils. In the district two sub-tribes of the Kharias are met with-Dudh Kharia and Delki Kharia and the latter subtribe somtime return their mother tongue as Delki Kharia. Of these the Dudh Kharias are regarded to be higher and supposed to be of pure descent whereas the Delki Kharias are supposed to be of mixed origin. The principal deity of the tribe is Banda. It has already been seen earlier that as compared to the population of the tribe the number of speakers of Kharia mother-tongue is less by 14.8% and the number of speakers of Kharia has decreased as compared to 1951-

Binjhwar

The Binjhwars are actually an important civilized land - holding caste who have lost all tribal characteristics. In Raigarh district they are found mainly in Sarangarh tahsil with a smaller number in Raigarh tahsil. During 1931-61 they have increased only by 10.6% which appears to be very unlikely and the cause of this decrease or less return of their population in 1961 is a matter of field investigation. Writing about them in 1916 Russell and Hiralal stated : "A compartively civilized Dravidian tribe or caste formed from a tribe..." Contrary to popular notions the Binjhwars have a high level of social development so much so that in some areas one often wonders whether they should be scheduled at all.

Majhwar

As compared to 1931, the Majhwars have increased by 40.7%. In the district they are mainly concentrated in Udaipur tahsil with a small number also in the adjoining parts of Raigarh and Gharghoda tahsils. The tribe is said to have two synonymous groups - Manjhis and Manjhias though the Majhwars say that they have no connection with Manjhis or with any other tribe and among themselves they do not have any sub-tribe. Some of their exogamous septs are Sunwani, Khunta, Jhingri, Dhuma, Murhi,Sitar and Chhenga: Some of these are totemistic. The traditional occupation of the tribe is fishing.

Bhaina

The Bhainas are found distributed all over the district and as compared to 1931 have derceased in strength by 12.2%. The Bhainas are a comparatively

advanced tribe and are considered to be allied to the Baigas though they are also closely connected with the Kawars. The Bhainas are employed as village-priests (*Baiga*) and their principal deity is Nakti Devi. The tribe has adopted many Hindui customs and usages.

Dhanwar

This tribe is found principally in Raigarh, Gharghoda and Udaipur tahsils and their source of livelihood is cultivation, agricultural labour and making of big bamboo baskets (*dholgi*). The Dhanwars make only big-sized baskets for making small baskets is supposed to be derogatory being the profession of low castes like Basors. As compared to 1931, the tribe has decreased in number from 3,260 to 3181 i. e. by 2.4%. The Dhanwars are also known as Dhanuhar which term means a bowman and till recent times the tribe earned their livelihood by hunting. They are regarded to be an offshoot of the Gonds or Kanwars or from both but these tribes regard the Dhanwars to be lower than them.

Pando

It is curious to see the return of Pando population in 1964 which is only 4, for a greater number of them is found in the district in Udaipur tahsil. Why this should be so is not clear. In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956*, the Pandos have been grouped with Bhuinhars. In 1921 also they were so amalgamated. The Pandos are found in sompur, Kandro, Tejpur, Rairumakhurd and Guttri- Gogra villages of Udaipur tahsil and also near pathalgaon. They do not acknowledge any association with any other caste or tribe and have two sub-tribes known as Utarha and Surgujiha. Many of their exogamous septs are totemistic in nature. In former days they used to have bachelor's quarters known as *Bhangra* for boys and girls separately but this institution seems to have disappeared now. Hiralal suggested that the pandos may be akin to the Kawars. But Shoobert noticed a strong similarity between them and the Korwas.

Ganda

The Ganda are a scheduled caste in the district dare mostly found in Sarangarh, Raigarh, Gharserving as village-musicians and working as village watchmen. In 1961, the returns of Gandas in the district is 43,772. As compared to 1931, when their population was some 46,653, there has been a decrease of 6.5%. Why this has happened is not possible to say except making the following indication. According to instructions the castes mentioned in the *Scheduled Castes List* are treated to be Scheduled only when they return their religion as Hindu or Sikhism. In other words a Ganda adopting christianity ceases to be regarded as scheduled. The decrease of 6.5% in this caste may thus be due to the spread of christianity. In 1931, there were 304 christian Gandas in Raigarh district; the number of converts is not possible to be ascertained now.

Satnami

In the *Scheduled Castes and Scheduled Tribes Lists (Modificat ian) Order, 1956*, the Satnamis have been shown as a synonymous group of Chamars and their population in the district in 1961 is 25,540. In the district they are mostly concentrated in the plains and the largest number is found in Sarangarh and southern parts of Raigarh tahsil. In 1931, there were no returns of Satnamis from the erstwhile States but it appears that they were included under Chamars. This is indicated by the following: In 1931, the population of Chamars in the erstwhile States Raigarh, Sarangarh, Udaipur and Jashpur was 23,665 whereas the population of Chamars exclusive of synonymous groups in 1961 is only 6,094 and inclusive of all synonymous groups it is 34,772. It therefore appears that in 1931 these synonymous groups were not counted separately. The population of the Chamars inclusive of the synonymous groups has thus increased by 46.9%.

Of the various synonymous groups of Chamars, numarically the most important are the Satnamis. It may be recalled that this caste started as a dissident religious tenet in about 1820 as a result of teachings of Ghasidas and by about 1927 emerged as an endogamous caste. The Satnamis, as a people, have fair complexion and sharp features. Another synonymous group Ramnami, whose population in 1961 is 3,071 are probably the same as Ramramiha Satnamis but this is only a tentative suggestion.

Chikwa

In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956*, Chakwa and Chikvi are shown as a synonymous group of the Khatik and their population in the district is Chikwa (16,252) and Khatik (4). In 1931, there were no returns of Chikwa in the earstwhile States and the return of Khatik was only 3,817 (Udaipur 3,795; Raigarh 22). Even if it is assumed that the returns of Khatik in 1931 relate to Chikwas the extraordinary increase of 325.8% is not understood and appears to be almost impossible. This is a point which would require field enquiries before any conclusive answer could be given and in this note only a tentative suggestion may be made. Chikwa or Chikba is a synonym of Khatik whereas there is a synonymous group of Gandas in Jashpur tahsil which is known as Chik Ganda or merely as Chik. Keeping note of the decrease of 6.5% during 1931-61 in the Gandas, it is likely that the Chik Gandas have been returned as Chikwa in this Census.

Ghasia

As a compared to 1931, the population of this scheduled caste has increased by 58.9%. They are found mainly in Sarangarh, Raigarh and Gharghoda tahsils and in smaller numbers in the other two tahsils. The traditional occupation of this caste is grass-cutting but they also work as weavers and their women serve as village mid-wives.

Caste has not been a basis of enumeration in the present census and in the last Census and as such it is not possible to say as to what the population of castes other than the scheduled castes and scheduled tribes is. Brief mention may however be made of some of the numerically important castes in Raigarh district.

Rawats

The Rawats are found distributed all over and their population in 1931 was 57,947. Rewats are a people from whom everybody accepts water and they were regarded to be indispensable in every village in the former times. Their traditional occupation is working as village-graziers and as household servants. As village-graziers, they are known as *bardiha* from *bardi* meaning herd. The Rawats or Ahirs belong to two groups-Laria or Chhattisgarhi and Uriya. In Jashpur tahsil, the Pandrapat and the Khuria tablelands provide excellent pasturage and many Rawats (Ahirs) have settled there. The Chhattisgarhi Rawats are divided into three endogamous groups-Kanojias, Jharias and Kosarias. Child marriage is prevalent among this caste.

Kewat

Kewat is the caste of traditional fishermen and in 1931, their strength in the district was 11,844. They are mostly concentrated in Raigarh, Sarangarh and Gharghoda tahsil in the plain villages generally by the side of rivers. They have, however, given up their traditional occupation of fishing to a great extent and earn their livelihood now from cultivation.

Panka

In 1931 there were 23,564 Pankas in the district. They are the followers of Kabirpanth tenet of religion founded by Kabir. By Profession they are weavers and village watchmen. It is said that Pankas were originally Gandas, who by taking to Kabirpanth, have made social climbing and formed themselves into a distinct caste.

Teli

In 1931, there were 19,738 Telis in the district. They genrally belong to Halia, Jharia and Ekbahiya endogamous groups and are mostly found in the plain areas of Gharghoda, Raigarh and Sarangarh tahsils. Their traditional occupation is oil-pressing, but this has mostly been given up.

In addition to these there are the Basors (Basket-makers), Kumhar (Potters), iron-smiths (Lohars) and other castes, the description of which is not considered necessary here. Mention may only be made of the Agharia caste of Sarangarh tahsil who should not be confused with Agarias, a tribe. These Agharias say that they came here from Agra, hence the name and that they are Rajputs by origin. Prepuberty marriage is in vogue among them.

Social and religious movements

Raigarh district can not claim to have been the seat of any social and religious movement like its western neighbours - Raipur and Bilaspur.

These latter districts have been the cradle of at least two, and possibly three, such movements which strived to retrieve members of scheduled castes. One of these was the movement founded by Kabir which, it appears,gave birth to a separate caste-the Pankas-who originally were probably Gandas as Sherring suggests in his *Hindu Tribes and Castes*. Then the biggest movement in the nineteenth century was the Satnami movement when Ghasidas, emerging from his seclusion, proclaimed his tenets not very far from the South-western part of this district. Added to these there has been a surjyabanshi movement in Bilaspur district. These movements have unsettled the population of the Chamar Community and other lower social hierarchies which are quite strong in these regions. Though not actually being the cradle of these various movements, Raigarh district has not been able to keep itself untouched from the waves arising out of these and the impact of the currents and cross- currents of these movements can easily be seen in this district also affecting the population statistics in various ways. One direct result of these bigger movements and other smaller ones which are not perceptible on the surface is the tendency among the various castes refering to themselves not by the name given for them in the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956* but by names which is supposed to confer on them an enhanced social status. For exemple, the Ghasies refer to themselves by various names such as Sarathi, Paikha and Sahis and the Gandas refer to themselves as Kshetrapal, Deodas, Dongi Chouhan, Bajania, Prabhua Moharia and Chik. The Surjyabanshis claim to be Savarna Hindus and the Binjhwars, Kawars and the Nagwanshis claim to be Rajputs.

In addition to these movements, the district has experienced the impact of various more recent Bhagsi movements like the Rajmohini Devi Movement, Birsa Bhagat movement, Mahua Dev movement and Gahira Guru movement. The last named one is a contemporary movement going on in the neighbouring areas of Kusmi tahsil of Surguja district and its overall impact on the district can only be observed after some passage of time.

Though acting only as a witness to these various movements which flourished on soils other than its own, Raigarh district has itself been the seat of vigourous Christian movement since the beginning of this century. The Roman Catholic and Lutheran Christian missions have mainly attracted members of Oraons and other tribes in Jashpur and Udaipur tahsils who have embraced this faith in substantial numbers. It appears that these missions have, instead of displacing the tribal pantheon and social customs, have added their own to them.

Social Life and Customs:

Among some of the tribes of the district, notably among the Oraons, the Birhors and the Pandos, the institution of 'bachelors dormitory' formerly prevailed. It can not be stated here if this institution still persists or not and it may be worth while to investigate it. Among the Pandos the boys used to live in *Bhangra* and the girls had separate *Bhangra* or *Derwa Kuria*. Dalton mentioned the existence of common dormitory system among the Oraons, which was known as *dhumkuria* but it is seen that by 1930-31 when Shoobert carried out investigation in the district, the boys and girls had separate *dhumkurias*.

A system of entering into ritual-friendship prevails among many of the tribes and castes of the district. By this, the ties of friendship are made almost as binding as those of marriage. Some of the names by which such friendship is known are *maha-prasad, jawara, keora, sakhi* and so on. Among the Oraons, offering of flowers by a boy to a girl is considered to be an expression of deep love and Dalton stated in this connection : "A young man makes a demonstration of his affection for a girl in a similar fashion. He sticks flowers in the mass of her back hair, and if she subsequently returns the compliment, it is concluded that she desires a continuance of his attention. The next step may be an offering to his lady-love of some nicely grilled field-mice,which the Oraon declare to be the most delicate of food. Tender looks and squeezes whilst both are engaged in the dance are not much thought of. They are regarded merely as the result of emotions naturally arising from contiguity and exciting strains; but when it comes to flowers and field mice, matters look serious". It can not be said as to how much these

customs have suffered decay as a result of various reforms and march towards sophistication.

Pre-puberty marriages are in vogue among many of the castes and some of the more sophisticated tribes. The Rawats, Satnamis, Telis, Sawaras and Kawars marry their girls before they attain puberty and among the Sawaras it is considered inauspicious if the girl attains puberty without getting married. In such cases, she has to suffer a disability throughout her life and can never be married in the formal manner. Among the Nagwanshis, a married girl cannot eat food cooked in vessels belonging to her parents. She may, however, partake of food cooked by her brother in metal and not earthen pots but she cannot eat the food cooked by her brother's wife.

Divorce and separation are freely permitted and so are remarriages and widow-remarriages. These remarriages are, however, not celebrated in the formal manner but are solemnised, in the plain areas, by the man offering bangles to the woman. The marriage is known by the name *Choori-bihav*. The tribes generally practise adult marriage. System of bride-price prevails almost in all the castes and tribes except the upper sections of the Hindus.

Very few villagers have any idea about the population of their villages, but all of them can tell the number of houses in the village and given time, almost the exact number of householes or families can be got. The simple rule to arrive at a fair estimate of the village population is to multiply the figure of the number of households by five.

Every caste and tribe has an institution where the authority is concentrated. These caste or tribe-panchayats are extremely effective in regulating the code of conduct in the tribe or caste concerned.

Belief in sorcery and witch-craft still persists and quite a number of murders still take place in Jashpur tahsil on this account. Every village has a village-priest or (*Baiga*) who acts as witch-doctor and as the custodian of villager's religious conscience.

Witch-craft and murder

Notwithstanding the progress and enlightenment that has been introduced in the wild interior by the Christian missioneries, social workers and the general opening of the area for increasing culture-contacts, belief in witch-craft still persists among the castes and tribes, and especially among the latter. Every ear there are some murders on this account. In 1959,3 murder cases were reported, one each from P. S. Jashpur, Kunkuri and Bagbahar where the motive of murder was to eliminate a suspected witch. In 1962, there was again one such case in P.S. Kunkuri and in 1960, one case was reported from P. S. kaku. Investigations into such cases are fraught with their special difficulties. It is difficult to collect evidence against the accused since he is respected for relieving the general population of an ever-present spectre in their midst. The difficulty is enhanced when the murder has been committed collectively by the entire village or where the suspected victim has been killed by the relatives.

Accidental deaths by causes in Jashpur tahsil

A proportionately larger number of accidental deaths take place every year in Jashpur tahsil. Because of thick forest and vegetation, deaths by snake-bite and carnivora are common. Other common causes are being drowned during the monsoons when the rivers are in flood and burning during winter when people sleep by the side of fire. The number of murders are comparatively less and whenever these take place the common causes are sex-intrigue, land dispute, witch-craft, excessive alcoholism. The table given below shows accidental deaths by causes and number of murders that took place between 1957-61 in Jashpur tahsil. It is observed from this that it is in Bagicha and Pharsabahar Police Stations of Jashpur tahsil where deaths by snake-bite, prey to wild animals or excessive alcoholism are more common:—

Police Stations of Jashpur tahsil	No. of accidental deaths by								
	Snake-bite	Drowning	Burning	Excessive alcoholism	Fallform tree	Prey to wild animals	Suicide	Murder	Miscellaneous
	2	3	4	5	6	7	8	9	10
Jashpur	18	39	16	7	7	1	8	11	23
Pharsabahar	82	42	38	14	14	7	21	14	31
Kunkuri	48	31	32	6	15	7	1	18	33
Sanna	33	18	35	13	6	4	4	8	19
Bagicha	80	40	30	24	13	19	7	15	21
Total	*261*	*170*	*151*	*64*	*55*	*38*	*41*	*66*	*127*

Marital Status

Some qualitative statements regarding age at marriage have been made in the foregoing account. It is interesting to look at table C-II in the light of social customs prevailing among different castes and tribes in the district. It is not considered within the scope of the present note to describe the marital status for each age-group and only 4 age-groups 10-14,15-19, 20-24 and 25-29 are being taken up for consideration because normally marriages take place during these ages. As will be clear from the explanatory note given earlier in this Handbook, in ages 0-4 and 5-9 all persons have been regarded as 'never married' irrespective of actual returns which in some cases showed married persons even in these age-periods.

In the table below is shown the marital status in the 4 age-periods mentioned above. In this table, the total population in each age-period has been reduced to 1,000 and calculation made on that basis:

Age-group	District and tahsil	Never married		Married		Widowed		Divorce or separated	
		M	F	M	F	M	F	M	F
1	2	3	4	5	6	7	8	9	10
10—14	Raigarh District	907	799	90	197	1	1	2	3
	Udaipur Tahsil	954	715	43	279	2	1	1	5
	Jashpur Tahsil	973	922	26	74	N	1	1	3
	Gharghoda Tahsil	976	921	23	75	1	1	N	3
	Raigarh Tahsil	842	733	153	263	1	1	4	3
	Sarangarh Tahsil	705	580	290	413	2	3	3	4
15—19	Raigarh District	644	240	331	727	7	7	18	26
	Udaipur tahsil	646	199	314	756	5	5	35	40
	Jashpur tahsil	771	448	213	521	6	8	10	23
	Gharghoda Tahsil	773	199	206	766	8	8	13	27
	Raigarh Tahsil	487	109	488	863	5	7	20	21
	Sarangarh Tahsil	406	80	562	887	14	5	18	28
20—24	Raigarh District	218	29	736	939	16	12	30	20
	Udaipur Tahsil	247	17	701	948	11	10	41	25
	Jashpur Tahsil	303	68	652	898	18	13	27	21
	Gharghoda Tahsil	221	28	723	944	21	10	35	18
	Raigarh Tahsil	127	9	825	962	17	13	31	16
	Sarangarh Tahsil	79	3	875	967	16	11	30	19
25—29	Raigarh District	70	9	876	952	25	25	29	14
	Udaipur Tahsil	109	7	823	955	31	23	37	15
	Jashpur Tahsil	76	20	873	941	27	25	24	14
	Gharghoda Tahsil	58	5	879	955	31	27	32	13
	Raigarh Tahsil	60	3	891	956	21	27	28	13
	Sarangarh Tahsil	27	2	926	958	17	26	30	14

This table is self explanatory and therfore only a very brief description may be given here. It is clear from the table that as one moves from Jashpur and Gharghoda to Raigarh and Sarangarh via Udaipur, the number of marriages taking place in the age-group 10-14 (which may be called pre-puberty marriages) increases, so much so, that whereas in Jashpur only 2.7% males and 7.8% of females in this age-group are married, the proportion rises to

29.5% males and 42.0% females in Sarangarh. It is evident that sueh a large proportion of married females cannot suddenly crop up in this age-group and marriages in earlier ages must be in vogue. The figures of such marriages (in ages earlier than 10 years) are, however, suppressed because of the fact that all persons in the age-period 0-9 years have been tabulated as 'never married' irrespective of actual returns. Of the northern tahsils, Udaipur shows the greatest proportions of married persons in this age-group.

The table also shows that the girls generally get married in the age-period 15-19 and of the total number of girls in the age-group 20-24, only 2.9% remain unmarried. The figures for tahsils, however, vary widely from 6.8% in Jashpur to 0.3% in Sarangarh. The average age at marriage of the boys seems to be 20-24 years and only 7% of them belonging to age group 25-29 still remain unmarried. Here also in Sarangarh more than 50% in the age-group 15-19 are already married. Tahsilwise details are not necessary to be discussed here.

The table given above thus substantiates the statements made earlier-in the tribal areas the adult marriages are in vogue whereas in the rural areas in Sarangarh and Raigarh and among some of the tribal groups like the Sawaras, pre-puberty marriages are practised. Though divorce and separation is quite a common feature, the exact quantum is not reflected in the tables because of remarriages.

Village Names

The study of village-names given below is admittedly casual and tentative. A study of these names provides a very interesting field and to do full justice to it quantitative (i. e. by number) basis should be followed. That is outside the scope of the presont note and so only a very sketchy description may be given here.

The district is bound on the one side by predominantly Hindi and Chhattisgarhi speaking districts and on the other by Predominantly oriya speaking areas. On the north and north east it extends into the tribal areas of Chhota Nagpur. This situation is reflected in the village-names of the district. The village-names in the district seem to be based on at least three bases-Hindi and Chhattisgarhi, Oriya and Tribal dialects and speeches. In the Hindi and Chhattisgarhi-based names a little difference may be seen eg. Chhattisgarhi based names end in *para, dih* and so on whereas Hindi based names end in *pur, nagar, garh* and so on.

Hindi-Chhattisgarhi names usually end in *garh* (Kandagarh, Azizgarh, Taragarh, Bargarh), *nagar* (Thakurnagar), *pur* (Bhagwanpur, Govardhan-pur, Khairpur, Gopalpur), gaon (Nawagaon, Deogaon, Gad-*gaon* Padigaon), *para* (Nawapara, Tilaipara, Raipara and so on) *puri* (Sambalpuri, Sahaspuri), *dih* (Baigindih, Katangdih, Deharidih, Daridih), *tara* or *tarai* (Dongitarai, Jogitarai, Sengitarai), *bhata* (Charbhata Tendubhata, Rambhata), *pani* (Bhuyapani) *kachhar*, (Barkachhar), *tikra* (Kandatikra), *khet* (Panikhet), *pathra* (Punjipathra) and so on. Of these, *garh, nagar pur, puri, para, gaon, dih* mean village or hamlet, *tara* or *tarai, pani*, refer to water and the rest like *khet, tikra bhata* and *kachhar* refer to the type of land.

Oriya names have a tendency to terminate in *pali* (Tarpali, Patrapali, Amapali), *pal* (Amapal), *guda* (Niriguda), *jor* (Karrajor, Bendjor), *munda* or *muda* (Baihamuda, Chirramuda, Bhedimuda, Bokramuda), *dand*(Kamsendand), *Kela* (Baramkela, Kudumkela, Jarkela, Naharkela), *bahal* (Kulaibahal, Adabahal) and *mal* (Taraimal, Kustimal). Of these, *guda* means hamlet; *jor* means brook, *muda* and *dand* mean field embankment and *bahal* means wet land. *Pal* and *pali* also mean village or hamlet. Sometimes some terminations like *jhar, pali* and *dongri* are common to both Hindi and Oriya.

A casual study of names shows that names based on Gondi language are rather rare obviously because Gondi was never a predominant language here. Village-names based on tribal languages generally have no terminations as in *Galo, Kodro, Lureg, Kida, Dhap, Kharra, Libra, Kura, Rede, Girsa* and so on.

Village names based on trees and animals like piparahi, Barkachhar, Limhi, Tulsidih, Amapal, and

Bhedimuda, Bokramuda, Bendrachoura) are also commonly met with. Sometimes onomatopaeic names may also be encountered as Charmar, Budbuda and so on. Quite a good many names in Udaipur tahsil end in *Kachhar* because of the hilly terrain being the rule and the fertile land being a rarity. It will also be seen that Hindi and Oriya influences are more noticeable in Raigarh, Sarangarh and Gharghoda tahsils but not so prominent in the other two tahsils.

Village-Forms:-

Locational patterns of villages in the district also provides an interesting field of study. As is known the commonest locational pattern in the rural areas is shapeless cluster and this form is seen even in some of the tribal areas.In the thickly populated plain areas of the district the common village-form is the shapeless cluster sometimes tending towards a vague rectangular pattern. In the tribal areas the predominant form shifts from the shapeless cluster to dispersed clusters and isolated homesteads. In Sarangarh tahsil below the Mahanadi, the predominant village-form is linear type and this was remarked so in the 1909 Gazetteer. The common village-forms met with in the tahsils of the district in addition to shapeless clusters are as below:—

Jashpur:— Dispersed clusters and isolated homesteads

Udaipur:— Dispersed clusters

Gharghoda:— Rectangular

Sarangarh:— Linear

For determining the typical locational pattern described above, a random sample was drawn from the notional village maps prepared at the time of the house listing operations in 1960. This sample was in the nature of a stratified one for each Commissioner Division separately, the stratum being the different size-classes of villages excluding those having a population of 2,000 and above.

Houses and Living Conditions

There are now 203,370 residential houses (190,777 rural, 12,593 urban) and 211,736 households (198,143 rural, 13,593 urban) in the district. The district has thus more houses and households than those in Surguja district though it is smaller in area. In the two tables given below is shown the percentage distribution of houses in the district and the tahsils on the basis of wall and roof material:—

%distribution of houses by wall-material

District and Tahsils	Rural Urban	Grass, leaves, reeds, bamboo	Timber	Mud	Unburnt bricks	Burnt bricks	C. I. sheets or metal sheets	stone	Cement Concrete	All other material
1	2	3	4	5	6	7	8	9	10	11

	U	5.3	83.5	0.2	0.7	1.9	8.0	0.0

These tables help us in understanding some aspects of the material culture of the district viz. those related to housing but are in no sense a complete guide because other matters like design, lay-out, location etc; are not, and could not have been, dealt with in the kind of rapid survey that was made during house-listing. It is, therefore, necessary to study these statistics along with information from other sources relating to other vital aspects.

Throughout the district, both in the urban and rural areas, mud is the most commonly-used material for walls. The largest proportion of mud-walled houses is seen in the rural areas of Raigarh tahsil and the largest proportion of houses with walls of burnt and unburnt bricks is seen in Sarangarh tahsil. It is in Sarangarh tahsil again where in the rural areas, the largest proportion of stone-walled houses are seen. These factors speak of the relative prosperity of these areas because, in the rural areas in the region in which Raigarh district is situated, even mud-walls are an index of prosperity. In Jashpur, Udaipur and Gharghoda tahsils there is a perceptible proportion of timber-walled houses. These timber-walled houses are those constructed by the tribals by just pitching branches of *saja* or *sal* close together to give the semblance of a wall. The wall so made may or may not be plastered with mud. The timber-walled houses should not, therefore, be taken to mean nice sawn timber-walled houses. They are actually speaking very crude huts. Cement concrete and G. I. sheets as wall-materials are seen only in the urban areas. In the urban areas of Jashpur an Raigarh tahsils, houses with burnt brick-walls are quite substantial. The material used in the houses are governed more by the factor of easy availability than by climate, because had the latter factor been operative one would not expect wattle and timber-walled houses or even mud-walled houses in these areas of heavy rainfall. The house is pre-eminently a status-symbol in the district as in other areas of the State. As Biswas and Bahara observe: "If a man is rich, he may employ burnt brick or stone; but if he is poor he remains satisfied with either mud or wattle and daub or plain wickerwork walls set in wooden frames". (Memoir No. 8: 1961, Anthropological Survey of India). Thus, among the three factors which decisively influence the type of house one builds viz. the economic status of the person, the nature of locally available building material and the climate of the region,the latter two increase in importance as the economic status of the person becomes lower though, among these two, the former, i e. locally available material often settles the issue.

In the district, mud-walled houses deserve mention because normally one would have expected a larger proportion of grass and timber in the tribal areas. It appers that with increasing culture-contact and work of the Christian missions, a desire for better housing in the form of mud-walled houses is manifest. Stone for walls is not used in these areas though Udaipur, Jashpur and Gharghoda tahsils are

all very hilly. In Sarangarh, however, it becomes important. The reason for this is that the rock-formations in Jashpur and Gharghoda are mostly granites and Sneiss which require thorough dressing before they can be used whereas in Sarangarh the locally exposed rock formations of the Cuddapahs yield good building stones which can be used as such.

Whereas thatch, grass or reed walled-houses are only 2.3% in the rural areas and 1.0% in the urban, the proportion of houses with roofs of grass, leaves, thatch etc. is much larger and surprisingly the largest proportions are in Raigarh and Sarangarh tahsils. It is a matter of common observation that in the rural areas in Chhattisgarh a large proportion of houses have roofs of grass known as *Khadar* and the opinion of the people is that the grass roof is not only cheaper but cooler in summar. The following mention is found in the *Feudatory States Gazetteer (1909)* relating to Sarangarh State: "the houses are mud built with thatched roofs. These are cool and comfortable but dangerous in the event of fire".

Concrete or stone-slabs are important only in the urban areas of Raigarh and Sarangarh tahsils In Jashpur and Udaipur tahsils, it is in the former tahsil that there is a greater proportion of tiled roofs.

Working Force and Economy

Out of the total population of the district 592,009 persons are workers and 449,217 persons are non-workers. Comparing this characteristics of the district with Surguja district it may be seen that though the total population of Raigarh district is a little more than that of Surguja district, the total number of workers in the district are less than that in Surguja district. In general worker-non-worker pattern, Raigarh districs is more akin to Bilaspur district.

This feature is shown in the inset below:

%of Workers and Non-workers

State Division and districts	WORKERS			NON-WORKERS		
	Total	Males	Females	Total	Males	Females
1	2	3	4	5	6	7
Madhya Pradesh	52.3	60.2	44.0	47.7	39.8	56.0
Bilaspur Division	57.5	63.2	51.8	42.5	36.8	48.2
Raigarh district	56.9	63.0	50.7	43.1	37.0	49.3
Bilaspur district	56.7	61.6	52.0	43.3	38.4	48.0
Surguja district	59.6	66.3	52.7	40.4	33.7	47.3

On first sight looking to the less number of workers here than in Surguja district it may appear that the economy of Raigarh district is more backward than Surguja and a little ahead of that of Bilaspur district. But this is not the case for the participation rate in the present State of Country's economy means just the opposit. It is a matter of general observation that a higher participation rate, or what may also be called a lower dependency ratio, is more often than not, a fairly reliable index of economic backwardness rather than of a developad economy. It has been stated in part II-A(1961 Census). "It does not appear that the participation rate is in any sense a reliable index of the state of economy; in fact, as has already been observed in other studies, a higher participation rate is more often an index of backwardness..... the trouble is that this rate lacks all the necessary dimensions-the total time of participation and the earnings or productivity per unit of time. Two general conclusions, however, seem possible: first, the existence of a large working force in the more agricultural areas is at least an indication that unwillingness to work is less important and the productivity factor is more important; second, the dependency ratio seems to increase wiih development though whether this is due to lack of opportunities or greater social or other inhibitions is not clear".

From this point of view it would be useful to work at the participation-rate in the tahsils of the district:—

%of workers and Non-workers

Tahsils	Total Rural Urban	WORKERS Persons	WORKERS Males	WORKERS Females	NON-WORKERS Persons	NON-WORKERS Males	NON-WORKERS Females
1	2	3	4	5	6	7	8
Udaipur	R	54	62	46	46	38	54
Jashpur	T	60	61	59	40	39	41
	R	60	62	59	40	38	41
	U	37	48	23	63	52	77
Gharghoda	R	59	66	53	41	34	47
Raigarh	T	53	63	43	47	37	57
	R	56	65	48	44	35	52
	U	38	55	20	62	45	80
Sarangarh	T	58	65	51	42	35	49
	R	59	66	52	41	34	48
	U	43	54	31	57	46	69

This table generally confirms the conclusions already reached above. It is in Jashpur tahsil, which is probably the most backward economically that the highest participation rate is seen and as compared to Udaipur, the decrease by 1 in the male workers is evidently due to the urban area. In the rural area the male participation rate in Jashpur is the same as in Udaipur. A remark has been made in the Introductory Note on Surguja district that high participation rate appears to be a characteristic feature of paddy cultivation where large amount of labour force is required in the ancillary operations and in an area where the agricultural sector is limited by nature and where there is no employment avenue elsewhere, the participation rate decreases. This, though a very tentative suggestion, is seen to be in operation in the tahsils of this district: whereas the participation rate for total population is highest in Jashpur tahsil, the male participation rate here is equal (for rural areas) to that of Udaipur and less than the other tahsils. In Jashpur and Udaipur tahsils, the sector of agricultural labourers is very much restricted and it is therefore likely that this might be a reason of the less participation rate because in other areas, the surplus working force left out from cultivation is engaged by this sector. Again in Raigarh tahsil, Categories, V, VI, VII, VIII and IX employ a large proportion of males.

Distribution of Workers into Industrial Categories

The table inset below shows the percentage distribution of persons in the different industrial categories of workers: for comprison, corresponding figures for the State, Division and the other two districts of the Division are also furnished:-

State, Division and District	Workers M	Workers F	I M	I F	II M	II F	III M	III F	IV M	IV F
1	2	3	4	5	6	7	8	9	10	11
Madhya Pradesh	60.2	44.0	35.8	29.6	8.4	9.0	2.3	0.7	3.2	2.0
Bilaspur Division	63.2	51.8	43.3	38.5	8.5	8.8	2.7	0.7	2.5	1.9
Raigarh district	63.0	50.7	43.4	37.7	8.7	7.1	1.3	0.7	3.0	2.7
Bilaspur district	61.6	52.0	40.2	37.0	9.8	10.8	2.5	0.5	2.4	1.8
Surguja district	66.3	52.7	48.8	42.5	5.9	6.6	4.6	0,9	2.0	1.4

	V M	V F	VI M	VI F	VII M	VII F	VIII M	VIII F	IX M	IX F
1	12	13	14	15	16	17	18	19	20	21
Madhya Pradesh	1.8	0.2	0.9	0.2	2.1	0.3	0.9	N	4.8	2.0
Bilaspur Division	0.6	0.2	0.6	0.2	1.2	0.3	0.7	N	3.1	1.2
Raigarh district	0.7	0.2	0.3	0.1	1.1	0.3	0.4	N	4.1	1.9
Bilaspur district	0.7	0.3	0.5	0.1	1.5	0.4	1.0	N	3.0	1.1
Surguja district	0.3	0.1	1.0	0.3	0.9	0.2	0.5	N	2.3	0.7

This table shows that as for as the general participation - rate is concerned, Raigarh district occupies a place roughly midway between the two other districts of the Division as far as the agricultural sector is concerned. In category III, male participation rate is the least in the district as compared to the other two districts which have developed coal-mining industry. But in this category the proportion of females is more than what it is in Bilaspur. As may be seen Industrial Category III is a composite category consisting of mining, quarrying, hunting, livestock, forestry, collection of forest produce etc. and a larger proportion of females as compared to Bilaspur is not surprising. In category IV, Raigarh district has the greatest proportion of workers in both males and females and this shows that the household industry sector is most developed here in the division. Proportion of workers in category V is the same as in Bilaspur district but there is a shortfall in category VI i. e. Costruction. In categories VII and VIII, the district again occupies a midway position in the division but in category IX i. e. 'Other services' Raigarh district has the largest proportion in the Division and the proportion of workers in this category appro. aches nearer to the State figure. Scrutinising the figures more closely it is seen that it is because of a large pr portion in this category in Raigarh tahsil that the district figures record this increase. Larger employment in the various undertakings by the Kirorimal charitable Trust and the educational sector may be the cause of this.

Out of the total workers 85.2% are engaged only in agriculture (71.3% as cultivators,13.9 as agricultural labourers). The percentage distribution of workers in the other industrial categories in the district and the tahsils is as under:-

unit	I	II	III	IV	V	VI	VII	VIII	IX
I	2	3	4	5	6	7	8	9	10
Raigarh district	71.3	13.9	1.7	5.1	0.8	0.4	1.3	0.3	5.2
Udaipur Tahsil	76.8	10.3	1.7	5.0	0.0	0.1	0.7	0 1	5.3
Jashpur Tahsil	83.9	6.1	0.9	5.3	0.2	0 1	0.6	0.1	2.8
Gharghoda Tahsil	70.7	19.3	1.5	5.0	0.1	0.1	0.8	0.0	2.5
Raigarh Tasilh	55.2	17.5	2.4	5.8	3.1	1.3	3.1	1.3	10.3
Sarangarh Tahsil	63.8	22.1	2.7	4.2	0.3	0.2	1.1	0.1	5.5

From the above table the tahsilwise persons engaged in agriculture (i. e. as cultivators and agricultural labourers)works out as below:Udaipur(87.1), Jashpur (90.0), Gharghoda (90.0), Raigarh (72.7 and Sarangarh (85.9). The percentage for the district as a whole is 85.2. It is thus seen that except in Raigarh, everywhere else more than 80% of the workers are engaged only in agriculture and the largest proportion is seen in Jashpur and Gharghoda tahsils. There is, however, one significant difference in these two tahsils-in Gharghoda tahsil 19.3% of the workers are engaged as agricultural labourer as against 6.1% in Jashpur. Actually speaking, as one goes from the closely cultivated areas to the less closely and sparsely cultivated ones, the proportion of agricultural labourer goes on decreasing till in Jashpur 83.9% are engaged as cultivators and only 6.1 as agricultural labourers. This, while on the one hand means that the agricultural practices being primitive, do not necessiate operations like *sbiai* and *nindai*, which require agricultural labour; on the other, it also suggests that the holdings are so small that such labour is not required and everybody is a cultivator though a very poor one as far as size is concerned.

Though considered, as a whole Raigarh district has less pressure on agriculture than in Surguja and Bastar, the tahsilwise figures vary from 72.7 to 90. Scantiest diversification of economy is seen in Jashtahsil and the greatest diversification is noticeable in Raigarh tahsil. It is a well-known fact that scant diversification and overwhelming concentration in agriculture is again an index of economic backwardness and of poor industrialization and urbanization. This very scant diversification of economy in Jashpur tahsil becomes more pronounced when only the rural area is taken into consideration.

After agriculture the other economic activities in the district are 'Other services' (5.2%) and Household Industry (5.1%). Whereas, in 'Other services' i. e. Category IX, the proportion varies very much from 2.8 in Jashpur to 10.3 in Raigarh, the proportion of workers in Category IV i.e. Household Industry is consistent everywhere. This large proportion of workers in Household Industry is evidently engaged in the most important household industry of the district-weaving. Distribution of establishments engaged in weaving in the State shows that Raigarh district has the largest number of such establishments in the whole State. The following brings out this picture—

No. of establishments in minor group 235 (i. e. weaving on handlooms)

Gwalior Division	664
Rewa Division	701
Indore Division	486
Bhopal Division	884
Jabalpur Division	1,865
Raipur Division	6,682
Durg district	1,697
Raipur district	3,774
Bastar district	1,211
Bilaspur Division	8,685
Surguja district	1,101
Bilaspur district	3,533
Raigarh district	4,051

This statement shows why household industry is an important sector of economic activity in the district. In category V i. e. Manufacturing other than Household Industry, the only appreciable factor is seen in Raigarh tahsil and this is obviously to a great extent on account of the Jute mill in Raigarh town. The proportion of 'Other Services' in the district becomes some what swelled up because of the large proportion in this category in Raigarh tahsil.

Economy of Scheduled Tribes in the Rural Area:

Table SCT-I shows the livelihood pattern of the Scheduled tribes in the district. For the purpose of this Note only 7 of these may be taken up for cosideration. It is seen that a bulk of these tribes are solely dependent on agriculture and of this, cultivation is more important. In the southern areas, as has been indicated earlier, there is a larger proportion of agricultural labourers than what is found in the north and this is also reflected in the livelihood - pattern of the scheduled tribes. The Sawaras mostly inhabiting in Sarangarh tahsil, have larger proportion of agricultural labourers than other tribes and next to the Sawaras in this respect come the Kharias. The table given below shows the percentage of workers in the seven tribes in various Industrial Categories. The table is self-explanatory and needs no further elaboration:-

Percentage Distribution of workers into Industrial Categories for 7 Scheduled Tribes
(Rural Areas Only)

Name of the	Total Workers (I-IX)		I		II		III		IV	
Tribe	M	F	M	F	M	F	M	F	M	F
1	2	3	4	5	6	7	8	9	10	11

Household Economy

Tables B-X to B-XVII given in this Handbook present the economy of the district treating household, and not individual, as the unit. All these tables are prepared from a 20% sample which is big enough and the results deducible from them may be considered to be fairly representative of the total population.

Table B-X shows that 68.7% of the households (72.4% in rural, 15.7% in urban) are engaged in Household Cultivation only; 3.5% of the households (3.3% in rural, 5.4% in urban) are engaged in Household Industry only while 8.2% of the households (8.6% in rural, 1.9% in urban) are engaged both in Cultivation and household-industry. Thus, 76.9% of the households in the district are engaged in household cultivation and 11.7% are engaged in household industry. 19.6% of the households (15.7% in rural, 77.0% in urban) are engaged in some economic activity other than household cultivation and household industry.

Table B-XI shows the sample households engaged in cultivation classified by interest in land and size of land cultivate l in rural and urban areas separately. It is seen that 76.7% of the cultivating households practise their cultivation on lands belonging to them, 15.9% of them have their cultivation on lands partly belonging to them and partly held on lease etc. from others while 7.4% of the cultivating households cultivate on lands belonging to others. Of the cultivating households, 45.9% have their cultivation on lands which are below 5 acres in size while 63.1% of the cultivating households have their cultivation on lands measuring 7.4 acres and below. Only about 3.4% of the cultivating households have their cultivation on lands exceeding 30 acres. The great bulk of cultivation in the district is thus being carried on over what may be called uneconomic holdings.

An observation was made earlier that the absence of agricultural labourers in Jashpur tahsil may be due to the size of holdings there being so small that such labour is not required. Table B-XI, however, does not support that conclusion for the proportion of holdings of less than 5 acres in size for the tahsils is as below:-

Udaipur	40.1%
Jashpur	26.8%
Gharghoda	44.1%
Raigarh	61-5%
Sarangarh	65.3%

It appears from this that as we come from the more tribal areas to less tribal areas and then to the Chhattisgarhi rural areas (or in other words from the wild and thinly cultivated areas to the closely cultivated one) the size of holding goes on decreasing. Less proportion of agricultural labourers combined with this observation leads to one irresistible conclusion that in the tribal society there is still persisting joint family system and joint ownership whereas this type of family organization has disintegrated in the plains among the rural castes and there has been on the plains fragmentation of holdings on a wide scale. This conclusion would, however, require detailed field study for substantiation.

Agriculture

Soil Types

The local soil terminology in the district is the same as, in Bilaspur and Raipur districts and is as follows:-

Kanhar	*Bhata*
Dorsa	*Pal Kachhar*
Matasi	*Patpar Kachhar and Kap.*

The *Kanhar* is a black clay which is very retentive of moisture. As it is apt to suffer from water-logging, it is a good soil for wheat but not for paddy. It is, however, capable of growing a second crop and from that point of view, is certainly the most valuable soil in the district. The *Matasi* is a yellow soil, not retentive of moisture, but with heavy rainfall, giving a far better outturn of paddy than any other soil. The *Matasi* can not grow a second crop and when unembanked is fit for little more than *Kodon* and requires long resting fallows. There are several kinds of *Matasi* depending upon their genesis: the best is derived from sandstone and the worst is nothing but the washed-out portions

of the *Bhata*. The best *Matasi* is known as *Dudhiya* because of its milky appearance. The *Dorsa* is a mixture of *Kanhar* and *Matasi* as the name itself suggests (*Do* means two and *rasa* means extracts). It is a good soil for paddy but gives only a moderate outturn of wheat or second crop.

The *Bhata* is a poor detritus of laterite, red in colour and containing numerous little pebbles. It does not have much consistency and hardly retains any moisture. With a heavy rainfall, a crop of *Kodon* can be grown over this but otherwise it is the poorest soil in the district. The *Pal Kachhar* is a rich brown silt found on the banks of rivers and large streams and is an excellent soil for garden crops. Another alluvial soil is *Patpar Kachhar*: the land by the side of big streams and rivers which has been partly spoilt by sand. It is a good soil for garden crops if facilities for irrigation are available. *Kap* is the name of silt in the backwaters of the Mahanadi and is a very fertile soil. When *Kanhar* and *Dorsa* contain limestone, they are known as *Ghurri* the soil containing a lot of pebbles and stones is known as *Gotarri*.

The prevailing soil-type in Sarangarh, Raigarh, Gharghoda and Udaipur is *Matasi* and the name for this type of soil in Jashpur tahsil is *Kariharmati*. The best *matasi* is found in the valley of the Mahanadi and the Mand. Black soil (*Kanhar*) is on the whole rare and is found only in some of the western villages of Udaipur and Raigarh tahsils and in the villages at the foot of hill ranges of Jashpur tahsil.

In Jashpur tahsil, the cultivation is divided broadly into *dhoin* or rice land and *tanr* or dry land. The soil on the elevated plateaus (*pats*) is a grey clay only two to three feet deep above rock. The *tanr* lands are often red laterite and require very long fallows. The position classes are known by different names in different parts of the district. In Sarangarh tahsil the terminology is *bahal, berua mal* or *at*. *Bahal* is a low-lying land which receives the drainage of a considerable area and thus corresponds to what is known as *bahara* elsewhere in Chhattisgarh. *Berua* is a low-lying land of small area: the corresponding term elsewhere in Chhattisgarh is *nar*; *mal* is the level land embanked on all sides and *at* is a high-lying land without an embankment corresponding to *tikra* land. In Raigarh the terms for different positions are *bahara*, *dhondhi*, *Khar* and *tikra*. Of these *bahara* and *tikra* do not need any classification. *Dhondhi* is the land situated lower down on a slope and *Khar* is the land higher up on the slope. For rice cultivation, the *matasi* or *Kariharmati* soil and *bahal* or *bahara* position class are regarded to be most suitable.

Agricultural Implements

As one crosses the closely cultivated areas in the south, which is an extension of the Chhattisgarh plain, to the hilly country of Udaipur and Jashpur, the general pattern of plough changes in the sense that in the hilly areas of the north, the plough is lighter. The term for this light variety of plough is *churia hal* in Udaipur tahsil. The plough in the north is made of *sal* wood and bamboo is not used in its making. Another characteristic feature is that the stock and the handle are in one piece. Another significant difference in the plough used in the south and in the northern areas is that the shape of the share in the northern parts resembles a spearhead fitting into a correspondingly-shaped slot in the head of the plough stock. At the point of entrance an iron band passes over the slot in the stock and keeps the share in place. The position of the share which is exposed measures eight to nine inches. The plough in the southern areas is not in one piece and the share is larger, the general charater being the same as an ordinary chhattisgarhi plough. Other agricultural implements-the *Kopar* and the *datri* etc. are the same as in Chhattisgarh.

Cultivation and crops

Raigarh district has the lergest area under fallow lands in the whole Bilaspur division. The general trend during the last 10 years, however, has been towards reduction in this area under fallows both old and current-and the current fallow area in 1960-61 is seen to be less than half of what it was in 1951-52. Side by side with this tendency, the general trend during the last ten years has been towards increase in the net sown area. There has, however, been no increase in the double-cropped area except some spurt in some years as in 1952-54, 1955-57. The gross cropped area figures have not registered any significant increase during the last ten years.

The proportion of area under wheat to the net area sown is about 0.1%. Gram is also not an important crop in the district and Raigarh district has the least area under gram in Raipur and Bilaspur Divisions. Pulses occupy about 16% of the area and groundnut is an important crop. It is seen that the district has the largest area under groundnut in Bilaspur Division, the area under this crop in the district being a little more than what it is in Raipur district. Of the oilseeds, Til, Rape and mustard are important, *til* being the most important of all. The area under *til* in the district is the largest in the whole Division and is almost equal to the area under this crop in Bilaspur and Surguja districts combined. Sugarcane is grown mostly in the plains in the south in Raigarh and Sarangarh tahsils.

Double Cropping

Area under double cropping shows considerable fluctuation from year to year. The double cropped area depends entirely on the rainfall of the last half of September and beginning of October and therefore when the September rain is copious the area sown is large. The system of double cropping is known as *utera* in Sarangarh and Raigarh. In *utera* system, the rice-land is not reploughed in order to sow spring crops but the seed is scattered in the slush of the paddy fields while paddy is still standing. After the harvesting of paddy, these seeds come up. Thus, the only expense to be incurred is the cost of the seed. The outturn of *utera* crops is about half of that of similar crops sown in properly prepared fields. *Urad, tiwra, lakhdi, alsi* and *batra* are the common *utera* crops.

Methods of Paddy Cultivation

The most prevalent form of paddy sowing is by broadcast method. Transplantation is practised mostly by the Uriya cultivators. Broadly speaking, there are three methods of sowing paddy locally known as *khurra, batar* or *batai* and *lehi* or *lei*. *Khurra* consists in sowing in land which has been ploughed once or twice before the monsoon breaks. The seed is thus sown in June and allowed to lie until the monsoon makes it sprout. *Batar* or *batai* is sowing in land which is ploughed for the first time when the monsoon breaks. The seed is sown broadcast after the first rain and ploughed in. The third method is called *lehi* or *lei*. It is adopted for late sowing when the ground has been well saturated by the first fall of the monsoon. The method consists in ploughing up the wet ground with an inch or two of water standing on it into thick mud until all the water is absorbed in the soil. Then the seed which has been made to germinate artificially by being soaked for twenty four hours in a vessel full of water and then covered over inside the house with a heap of straw to exclude light and produce warmth, is sown broadcast. In this case the seed is not ploughed in. In Sarangarh tahsil there is also a fourth method—that of transplantation. Here the seed is sown in a nursery in June. The field is well-ploughed and kept full of water for a month. It is then drained and ploughed again and the seedlings from the nursery are planted out. This system does not require thinning and weeding and yields the best results.

All methods of broadcast sowing require thinning and weeding operations known respectively as *biasi* and *nindai*. In the *biasi* the paddy plants, about four or five weeks after sowing, are thinned by driving a plough through the field at right angles to the lines which have been made by the ploughing prior to sowing. *Biasi* operations require a fairly large quantity of water in the field and are therefore usally carried on just after the second heavy fall of rain at the end of July or the beginning of August. The carrying on of *biasi* at the proper time is of critical importance to the paddy crop and its postponement owing to unseasonal want of rain is very detrimental. A few days after *biasi* when the plants are beginning to revive from uprooting, an implement known as kopar is dragged across the field to press back the roots exposed by *biasi* as well as to level the irregularities of the ground. After this a certain amount of water is allowed to run off and the field sluices are blocked for the reception of the mid-August fall. These are not reopened, except in case of heavy rain, till the last half of October. During this time paddy fields are weeded twice or even oftener. For this manual labour is required and usually women do the job. The term for weeding

operations is *nindai*.

A good rainfall at the beginning of October is very essential for paddy-and many a times a bumper looking crop is spoilt for want of this October rain. The critical periods in paddy cultivation are end of July, the later half of August and from the middle of September to the middle of October. At all these periods good rain is absolutely necessary and any diminution of the supply of water at once results in a diminished outturn.

Varieties of Paddy

Broadly speaking, two main varieties of paddy are recognised - *Harauna* or the paddy grown on light soils and *Garhuna* or the paddy grown in heavier soils. A number of different varieties of paddy are grown and, as is mentioned in the *Feudatory States Gazetteer* (1909), the people in Jashpur recognised about one hundred and fifteen different varieties. Some of the good varieties of rice are *Laksmibhog, Raghubar Makarkam, Doobraj, Jhiliparagi, Ramkajar, Kanakejar, Meghai, Jhili*, and so on. Other important varieties are *Parewa, Kantha, Sela, Haslo, Baikoni, Bhurkud* and *Jhili*. Of these the commonest variety found in the western areas adjoining Bilaspur district is *Parewa*. Cultivation of fine varieties of paddy has registered a set back during the last 20 years or so because in the opinion of cultivators their cultivation is more fraught with risks of failure.

Irrigation

Irrigation has so far not made any headway in the district and whatever area is irrigated is mostly from tanks. These irrigation tanks, of which there is a large number in the plains, have undergone decay and 5,115 irrigation tanks in 1960-61 only irrigated an area of 5,588 acres i. e. a little over one acre per tank. Only 0.5% of paddy was found to be irrigated in 1960-61. Irrigation of sugarcane crop is more common. The following figures are found in *Statistical Abstract of Madhya Pradesh 1961-62:*

No. of irrigation wells	6,269
Area irrigated from wells	1,683 acres
No. of irrigation tanks	5,115
Area irrigated from tanks	5,588 acres
Area irrigated from other sources	4,782 acres
Total area irrigated from all sources	12, 053 acres.

The 1909 Gazetteer mentions that on the Khuria plateau of Jashpur tahsil, the plough cultivation is often irrigated from pools formed in depressions in the hill-sides, which in favourable seasons yield a supply of water even in the hot weather.

Two irrigation projects have been surveyed in this district out of which work on Kedar nala project in Sarangarh tahsil commenced in 1956. When completed this project is estimated to bring 11,500 acres under irrigation. The other project is Putka nala project near village Amakoni in Sarangarh tahsil. This work, when complete, is estimated to bring 4,800 acres under irrigation. There is no major project in this district.

Communications

In all the district has some 619 miles and 2 furlongs of roads maintained by the Public Works Department (322 miles 3/4 furlong class I,155 miles 2 furlongs class II and 142 miles class III). Details of these roads are given elsewhere in this Hand book. The main line of the Bombay-Howrah railway line runs across the district from west to east.

Road traffic between Sarangarh and Raigarh is interrupted by tne Mand and the Mahanadi during rainy months. Raigarh is not joined with Bilaspur by road. Communications are difficult in the hilly areas in the north. Distances between some important places in and outside the district are as below:-

Raigarh-Ambikapur	125 miles
Raigarh-Gharghoda	21 miles 4 furlongs
Raigarh-Dharamjaigarh	47 miles
Raigarh-Jashpur	132 miles 3/2 furlongs
Raigarh-Sarangarh	31 miles 7 ,,
Raigarh-Lailunga	49 miles

The distance by rail between Raigarh and Bilaspur is 83 miles whereas between Raigarh and Bhopal, the State capital, it is 547 miles.

Medical And Public Health

As everywhere else in the State, there has been a considerable progress in the district in respect of medical and public-health facilities. Malaria Eradication Programme and B. C. G. Campaign have helped to practically root out the evils of Malaria and T. B., the former of which was formerly very rampant in the district especially in the forest-

clad-northern region. The district is more fortunate than many of its counterparts in the State in the respect that apart from the efforts made by the Government in this direction, there are many charitable and missionery institutions also. In Raigarh town the medical institutions run by the benevolent Kirodimal Trust and in the tribal areas in the north the Christian Missions are doing commendable service in the sphere of public health.

There are at present 9 primary Health Centres (52 beds) in the district. In addition, there are 18 Government dispensaries now as against 4 in 1951. There are 1 V. D. clinic, 1 T. B. clinic and 7 family Planning Clinics in the district. Because of the concerted efforts of the various Governmental and non-governmental agencies, incidence of malaria has very much gone down from 12.6 per 1,000 in 1952 to 0.84 in 1957 and thus figure must have gone down further. The incidence of malaria has also come down from 27,005 in 1951 to 15,298 in 1957. In respect of propogation of family planning, the district does not seem to have made any headway though the first Family Planning Clinic was started here in 1958. There have been no sterlization operations and the number of persons to whom contraceptives have been issued is also negligible. It appears that a large ground still remains to be covered in this regard.

Table B-V shows the occupational classification of workers and of this groups 03 and 04 relate to physicians, surgeons and dentists and nurses midwives etc. Some similar informaion in 1951 is available in table B-III and Index of non-agricultural occupations. However, a comparison between 1951 and 1961 figures is not possible because even if the figures for Sakti tahsil (rural) are taken out of consideration from the 1951 figures, the figures for Sakti town are not possible to be separated. In 1951 the number of persons engaged in public health and medical occupations were (Sakti town included)-285 as against 455 now. A more detailed comparison may be made by referring to the Handbook of 1951 and the present one.

Table B-V also shows that in the district there are now 33 Allopathic surgeons and physicians, 56 Ayurvedic physicians, 8 Homoeopathic physicians and 30 other physicians not classifiable and that there are 69 nurses and 39 midwives. As said earlier, there are many non-government medical institutions in the district and therefore it is table B-V and not the statistics supplied by the Civil Surgeon which brings out the medical and public health facilities in the district in clearer prespective.

Though there has been commendable progress in the district in respect of providing medical relief to the people, the district yet remains backward as compared to many other districts. Taking the total population, there is one Allopathic physician for every 28,141 persons in the district, the corresponding figure for the State is one physician for every 10,110 persons. Out of 37 Allopathic physicians, 31 are only in the urban areas. In other words, in the urban areas, there is 1 Allopathic physician for every 1,931 persons whereas in the rural areas there is 1 Allopathic physician for every 163,556 persons. The people in the rural areas of the district have, therefore, still to depend on Ayurvedic physicians (40 in rural areas, 16 in urban areas), Homoeopathic physicians (5 in rural areas, 3 in urban areas) and various sorts of quacks,*baigas* and *gunias* (25 in rural areas and 1 in urban area). Taking, all sorts of physicians to-gather (except those who are not classifiable according to National Classification of Occupations), there is one qualified, physician (in Allopathy,Ayurved, Homoeopathy or other systems of medicine) for 9,916 persons in the district. The figures for rural areas and urban areas separately are 1:19,241 for rural and 1:1,109 for urban. It is thus clear that a long way remains to be covered in the district in this respect.

Vital Statistics

Vital Statistics are maintained in accordance with the instructions contained in Chapter II of the Health Manual. The procedure in which the vital statistics are compiled is too well-known to be described here. The figures of births and deaths are not available for 1951. Assuming that the figures of births and deaths in 1951 were not very different from the average of next nine years, the number of births in 1951-60 is 291,843 and the number of deaths for the corresponding period is 173,294. The increase in the population that one would thus expect as a result of this is 118,549 and 1961 population (counted on the sun-rise of 1st March 1961) would, on this

basis, be 971,616. This figure is short by 69,610 from the actual population. As stated earlier, one of the factors of increase of population in the district appears to be larger immigration than emigration e. g. in respect of contiguous districts of the State only there were 5,000 more persons from these districts enumerated in Raigarh than the number of persons born in this district and enumerated there. It is not possible to work out a correct balance-sheet in this regard but the figure of 69,610 appears to be rather high and it is likely that this may be due to incomplete and inaccurate registration.

Nevertheless, we may have some idea about the correctness or otherwise of these figures of births from Census tables. Taking the 0 year age-returns as the number of children born between March, 60-March' 61, the birth-rate comes to be about 29 per thousand. This is only a very crude estimate for the actual rate is bound to be more than this because the age-returns relate to surviving children only and also because the population at the end of the year and, not the mid-term population, has been taken into consideration. The figure so arrived at thus differs from the birth-rate worked on the basis of vital statistics. This may be taken to tentatively indicate the extent of under-registration.

Literacy

In respect of percentage of literacy in the rural areas, Raigarh district is the twentieth most literate district in the State with 13.24% of its rural population returned as literates in 1961. The percentage of literacy in rural and urban areas in the State, Division and the district are shown below:-

Area	Rural / Urban	% of Literates and educated		
		Total	Males	Females
Madhya Pradesh	R	12.73	21.81	3.36
	U	43.52	56.51	28.35
Bilaspur Division	R	13.02	22.61	3.55
	U	43.92	58.89	27.01
Raigarh District	R	13.24	22.78	3.85
	U	41.35	57.11	23.85

It is seen from this that whereas in the rural areas, the proportion of literacy in Raigarh district is higher, both for males and females, as compared to the State and Division averages, the picture in the urban areas is not so good as this and here the proportion of literates is below, both for males and females, as compared to the State and Division averages.

Strict comparability is not possible between the figures of 1951 and 1961 because of the factor pointed out earlier i. e. the figures of Sakti town not being separately available. Subject to this reservation the progress of literacy in Raigarh district during the decade can be seen from the following statement. It may also be remembered that the 1951 proportion is based on a 10% sample and in making this comparison it has been assumed that the sample represents the total population.

Year	Population dealt with			
		Persons	Males	Females
1	2	3	4	5
1951	T	6.5	11.2	1.2
	R	5.6	10.1	1.0
	U	13.1	15.8	6.3
1961	T	14.8	24.8	4.9
	R	13.2	22.78	3.85
	U	41.3	57.11	23.85

The general picture that emerges from the above table is that as compared to 1951, literacy has made fast progress on the whole but the pace has been much fast in the urban areas. But in spite of the great strides made the overall position regarding literacy among women continues to be bad. The extent of literacy in the rural and urban areas of tahsils is shown below:

Tahsil	Rural / Urban	% of literates and educated		
		Total	Males	Females
1	2	3	4	5
Udaipur Tahsil	R	9.9	17.6	2.0
Jashpur Tahsil	R	11.4	18.9	4.0
	U	44.5	58.5	27.3
Gharghoda Tahsil	R	11.9	20.7	3.2
Raigarh Tahsil	R	18.1	31.1	5.5
	U	41.7	57.4	24.3
Sarangarh Tahsil	R	15.3	27.3	3.8
	U	37.3	54.6	19.7

It is seen from this that Udaipur tahsil is the most backward one in respect of literacy. Jashpur tahsil has fared much better and the extent of literacy among females in the rural areas is the highest in Jashpur tahsil in the district excepting Raigarh tahsil. In the Urban areas, Jashpur tahsil has the largest proportion of literates, both for males and females, in the whole district.

As may be expected, the extent of literacy is most perceptible in the younger section of the population and the proportion is highest in the age-group 10-14. The percentage goes on decreasing whith advancing age but even in the age-group 20-24, 20 persons per 100 of population are literate. Over 45 years, fewer persons are literate till in the ages over 60 years, there are only 9 persons per 100 persons who are literates. The trend is common for both males and females and is represented in the table below.

Age-group	Population			No. of literates		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0- 4	100.00	100.00	100.00	..	..	..
5- 9	100.00	100.00	100.00	13.78	20.22	7.44
10-14	100.00	100.00	100.00	28.94	42.33	13.53
15-19	100.00	100.00	100.00	25.54	40.48	9.77
20-24	100.00	100.00	100.00	20.48	35.99	6.55
25-29	100.00	100.00	100.00	17.78	31.04	4.56
30-34	100.00	100.00	100.00	15.92	28.29	3.43
35-44	100.00	100.00	100.00	14.89	25.84	2.84
45-59	100.00	100.00	100.00	12.23	22.49	2.01
60+	100.00	100.00	100.00	8.87	18.85	1.18
Age not stated	100.00	100.00	100.00	3.72	5.42	1.65
All ages	**100.00**	**100.00**	**100.00**	**14.85**	**24.87**	**5 09**

It, however, appears that though there has been progress in the speed of literacy, the district has yet to register progress in respect of higher education. Among males, 67.8% of the literates are those who are just literates without possessing any educational standard. Among females literates and educated the proportion of this group is 72.6%. 29.5% of the total male literates and 25.6% of the total female literates have passed primary school certificate and-or have studied upto matriculation but not passed the matriculation certificate. Only 2.7% of the male literates and 1.4% of the female literates have passed matriculation certificate examination or higher degrees. Thus among the literates and educated persons 2.5% have matriculation or higher standard: the corresponding figure for the State as a whole is 6.2%.

In about 1909, there were only 75 schools in the areas now comprising Raigarh district. The number of educational institutions from 1951 to 1961 are given elsewhere in this Handbook. This shows that the number of primary shools in 1951 was 361 rising to 803 in 1961. The number of middle schools rose from 28 in 1951 to 63 in 1961 and the number of higher secondary schools increased from 6 in 1951 to 13 in 1961. Among institutions of higher education, the district has one polytechnic institute and 1 Degree College, 3 Basic Training Schools/Colleges. In 1909 the number of students getting education was 8,041. This figure rose to 32,898 in 1951 and and to 64,516 in 1961. The numbers in 1951 and 1961 relate to students in all categories of educational institutions.

Community Development and National Extension Service

The Community Development Programme was launched in Raigarh district in 1953 with the inauguration of Sarialendhra Block on the 2nd October, 1953. The district is now divided into 14 Blocks which are distributed as below:

Raigarh (3), Sarangarh (2), Gharghoda (2), Udaipur (2), and Jashpur (5)

The yearwise growth of Community Development is shown below

Date of Establishment	No. of Blocks opened.
1	2
2.10.1953	1
1.4.1954	2
1.4.1956	1
2.10.1956	2
2.10.1957	1
1.4.1959	2
2.10.1960	1
2.10.1961	1
2.10.1962	2
2.10.1963	1
	14

6 of the Development Blocks are the T. D. Blocks and 1 i. e. Bagicha in Jashpur tahsil is the special Multipurpose Tribal (SMPT) Block. As on 30th September 1964, there were 4 stage I Blocks, 2 Stage II Blocks, 1 Stage III Block, 4 Stage I T. D. Blocks, 2 Stage II T. D. Blocks and 1 Stage II S. M. P. T. Block. The details regarding coverage etc. by these blocks is given elsewhere in the Handbook.

Religion, Fairs and Festivals

As elsewhere in this part of the State, the religious beliefs and practices of the people in the rural and tribal areas are a curious mixture of the primitive tribal beliefs and the greater Hindu and Christian Traditions. These greater traditions have been operative in the district for a long time but they have only partially succeeded in uprooting the entrenched primitive beliefs and what one really finds in the interior areas of the district is a co-existence of the primitive beliefs and the religion of the Great Traditions. Ancestral worship which may probably be said to be the most primitive form of religion is still in vogue and belief in supernatural spirits and witch-craft is still rampant. As stated earlier, some murders take place even now on account of suspected witch-craft. In old days sterner measures were adopted and there is a place called *Dain-therha* in Jashpur tahsil on the Ranchi border where persons convicted of the practice of witch-craft were hurled down from a rock to be killed. The power of the village *Gunia* and *Baiga*, though comparatively decreased, is still substantial. Various godlings and deities worshipped in the rural and tribal areas are Thakur Deo, Mata, Anna Kunwari, Kotrapat, Murgapat, Dulha Deo, Burha Deo, Khuria Rani.

In all there are 31 fairs in the district of which the Dashara celebrations of Sarangarh and Raigarh are the most important. Of these, the celebration at Sarangarh deserves special mention. A list of fairs held in the district has been given elsewere in this Handbook. In addition to these regular fairs, annual *jatras* are *Yatras* are held in many villages of Jashpur tahsil during December to February. There is no fixed date for these *Yatras* and these are held on a weekly market day.

Some of the important festivals observed in the rural areas are *Hareli*, *Chherchhera* or *Chhachera* and *Karma*. *Hareli* is the most important festival in the rural areas and is a gala day for the cultivators and blacksmiths. It comes off on the 15 *Shrawan Badi* (July-August). It is probably an agricultural festival in its origin. *Chherchhera* is observed by boys on the 13th *Pus* (December-January) and on this day they go begging for paddy from house to house. *Chherchhera* used to be an important festival in the old days but its observance has fallen into decay.

The *Karma* festival is celebrated when the time arrives for planting out the rice grown in seed beds and is observed by many tribes and particularly by the Oraons. At the *Kamra* festival a party of young people of both sexes proceed to the forest and cut a young *Karma* tree (*Nauclea parisflora*) or the branch of one; they then plant this in the centre of the *akhara* or the dancing arena in front of the *dhumkuria*. Young people dance around this tree or branch as the case may be. Dalton in his *Discriptive Ethnology of Bengal* (I872) states that the authority for observing it is contained in the *Bhavishya Purana*. If that is so, the celebration of the festival in

the manner it is done in the district is an example of the parochialisation of the great traditions. Be as it may, the *Karma* festival is celebrated even in Bilaspur district by some castes, and the belief is that the festival is a fertility-imparting one both to crops and human beings. For example, in Bilaspur town some people, who do not have issues, celebrate this festival.

At the *Surhul* festival the marriage of the Sun-God and earth-mother is celebrated and this can not be done till the *Sal* (*Shorea robusta*) tree gives flowers for the ceremony. As such, the festival is celebrated about the begining of April. On this day the people go to the *Sarna* or the sacred grove where *Sarnaburhi* is belived to be residing From there flowers of *sal* tree are collected. After some ceremonies during the day, young people of both sexes assemble for the all-night dance.

Some of the important dances in the tribal areas of the district are the *Karma*, the *domkach* and the *Jethwali*. Though there has been considerable decay and disintegration because of the introduction of sophistication, still these tribal dances can be seen persisting in some of the tribal areas.

Important places

Bagicha: Situated on an elevated plateau land known as Pandrapat, Bagicha is now the headquarters of a S.M.P.T. Block.

Bataikela

A large village in Jashpur tahsil was the estate of the heir-apparent in the days of erstwhile feudatory State who had a granary here. Bataikela was formerly one of the gold collecting centres.

Bene

Bene had its own days of glory when it was the capital of Jashpur State in the time of the Dom chiefs. There is a fine waterfall here known as Beneghag on the Ib river. This waterfall is formed by the rush of the waters of the Ib over a square mass of Trap rock, where the river passes from the heights of the Uparghat into the flat country of the Hetghat.

Bharamurio

A high peak in Jaspur tahsil situated on 23° 55′ N latitude and 83° 32′ E longitude. The altitude attained is 3,390 feet.

Charratnagar

A big village in the plains; there is a big tank here which is fed by a spring.

Dharamjaigarh

It is situated on 22° 29′ N and 83° 14′ E and is the head quarters of Udaipur tahsil. It has a picturesque setting on the bend of the Mand river.

Dokra

A well-situated village in Jashpur tahsil, was formerly one of the gold-washing centres which industry has largely fallen into decay.

Gharghoda

Situated 17 miles from Raigarh on Raigarh-Ambikapur road, is the headquarters of the tahsil of the same name. Gharghoda was treated as a town in 1951 census but has been declassified in the present census.

Jashpurnagar

Another name for this place is Jagdishnagar; situated on 22° 53′ N and 84° 8′ E. It is the headquarters of the tahsil of the same name and also the headquarters of S. D. O. (Civil) and S.D.O. (Police).

Kharsia

A town in Raigarh tahsil, was in 1951 the headquarters of the tahsil by the same name which has since been abolished. Kharsia is a railway station on Bombay-Howrah railway line and it is one of the stations to go to Dharamjaigarh and Ambikapur.

Konpara

This is one of the former gold-collecting centres and is situated near the border of Udaipur and Jashpur tahsils.

Kotwar

A peak in Jashpur tahsil, situated about 9 miles from Sanna and rising to a height of 3,393 feet. It is the source of the Lawa river.

Lailunga

One of the important villages in Gharghoda tahsil, is the headquarters of a Development Block.

Lodam

Also known as Garh Lodam, is an important village in Jashpur tahsil, situated only 3 miles from Ranchi border and about 16 miles east of Jashpurnagar. There are signs that once there was a *garh* or residence of a king here but the dynasty to which this king belonged is not known with any certainty.

Pandrapat

An elevated plateau in Jashpur tahsil, is probably the highest plateau in the district. The climate is very cool and pleasant in winter and summer months are extremely cool.

Pathalgaon

A big village on Raigarh-Ambikapur road, is the headquarters of a Development Block. The road to Jashpurnagar branches off from here.

Pusaur

A large village in Raigarh tahsil, is the headquarters of a Development Block and Revenue Inspector. There are many tanks here and a temple dedicated to Jagannath.

Ranijhula

The highest peak in the district rising to 3,527 feet is situated on 23° 0′ N and 83° 36′ E. It is the source of the river Ib which rises from a perennial spring in village Kawai close to the peak.

Sarangarh

The headquarters town of Sarangarh tahsil and the seat of the erstwhile Sarangarh State, is situated on 21° 35′ N and 83° 5′ E, 32 miles from Raigarh. The name of this place signifies a bamboo fort (*Sarang*-meaning bamboo and *garh* meaning fort). Former to its occupation by the Gonds, its name was Sarangpur. Within the town there is a tank with many temples on its bank, the oldest being that of Somaleshwari Devi.

Saria

An important village in Sarangarh tahsil and the headquarters of the Revenue Inspector.

Tapkara

A big village in the Hetghat region in Jashpur tahsil, is the headquarters of a Develop-ment Block and of the Revenue Inspector It was one of the gold collecting centres in former days.

Summing up

Raigarh, the ninth largest district in the State and the smallest district of Bilaspur Division, is situated in the easternmost part of the State flanked on the west by the two districts of the Division and Raipur district and on the east by Bihar and Orissa States. It is one of the 'new' districts of the State in the sense that it was created in the post-independence period as a result of merger of ex-Feudatory States. Geologically, the district has not been blessed by Nature as the two other districts of the Division but there are some mineral deposits which may be exploited in some future time. Physiography of the district varies from the lofty forest-clad plateau of Pandrapat and Khuria in the north to the treeless dreary, dusty plains of Raigarh and Sarangarh. From the lofty peaks of Ranijhula and Kotwar one comes down through a series of physiographic steps down to the banks of the Mahanadi and in so doing not only comes in contact with Nature in its varying forms but also peoples who vary in culture and habitat from the ever-smiling, cheerful and fresh Oraon, through the Kawars and Sawaras to the sun-burnt Oriya cultivator and the Satnami in the south.

The history of the district beyond the periods of its occupation by the ruling chiefs of the erstwhile feudatory states is extremely obscure though there are traces that some earlier dynasties were in possession of this area before the more civilized and powerful occupants came here. In the rock-paintings at Singanpur are preserved the traces of Palaeolithic civilization but, by and large, during the period of recorded history, the district remained out of the route of armies marching to and from Nagpur to Bengal and was only under the nominal control of the Haihayvanshis and Marathas. In the wild, inaccessible hill-fastnesses, the various tribes eked out their existence to the best of their material genius and nurtured their own special culture and tradition.

The ninth biggest in area, the district moves up in the scale in respect of the size of its popu-

lation: it is the sixth biggest district in regard to population. Notwithstanding, various set-backs which the population of the State had to suffer elsewhere, the population in the district, registered continuous increase since the beginning of the present century and during 1901-61, increased by 142.85% being substantially higher than the State (92.00%) and Division (133.20%) increase. Being the sixth largest in population and the ninth largest in area, the district ranks seventeenth most thickly populated district. the density of population is 210persons to a squre mile, the tahsilwise-density varying from 140 in Jashpur to 379 in Raigarh and Sarangarh. The ratio of rural : urban population has remained more or less static during the last 10 years and now, as in 1951, 94% of the population of the district is rural in nature.

The age-composition of the population in the district is more or less the same as in the State. As compared to 1951, the proportion in the age-group 0-14 has increased. Also, the proportion of females in the age group 15-34 has increased now as compared to 1951 and everything else remaining equal, the district may well expect a larger increase in the natural population during the next ten years than what it has been during the last ten years. The district is situated in an area where high sex-ratio is the characteristic feature of the general population and in respect of sex-ratio, the district occupies the third highest place in the State. The sex-ratio increases from the plateau region to the plains, but what it may be due to, is something which deserves to be investigated by sustained research. Notwithstanding the higher proportion of females in the plain regions of the south one comes across an enigmatic position-prevalence of pre-puberty marriages and bride-price. Inspite of being in higher proportion, women are sought after in marriage and they have great freedom for separation and remarriage.

In respect of its people, the district provides an 'ethnic watershed'-castes and tribes charateritstic of the Chhota Nagpur plateau in the north and representative of the Chhattisgarh and Orissa plain in the south. The speeches of the people also range from the Munda Branch of Austric family through the Dravidian family to the speeches of the Indo-European family. In respect of some of the tribal speeches one notices rise and fall during various periods and there is no doubt that the tribal dialects have so far been able to hold their ground.

The district has a higher participation rate than the State as a whole and only just a little higher than Bilaspur district but less than that in Surguja district. Though, the participation rate is not, a reliable index of the state of economy, it appears that the economy of the district is better than that of Surguja district. The economy of the district is agriculture-Centered (85.2% of the workers engaged in agriculture). There is a little more diversification than in Surguja district but even then it is not of such a nature as could indicate a developed and broad-based economy. In the tahsils, the greatest diversification is seen in Raigarh tahsil, obviously because of Raigarh town, and the scantiest diversification is seen in Jashpur tahsil. The sector of Household Industry is an important one in the district and this largely comprises weaving on handlooms.

Agricultural practices and implements have yet a very large scope for improvement and irrigation has still to register a headway. Communication facilities are, generally speeking, poor and some areas are accessible with difficulty. There has been significant success here, as elsewhere in the State, in respect of Malaria Eradication Programme andB.C.G. Campaign, but family planning programme has yet to affect a break-through. In spite of increase in medical facilities the district yet remains backward and has 1 Allopathic physician for 1,931 persons in urban and 163,556 persons in rural areas. Taking the total population, there is 1 Allopathic physician for 28,141 persons: in the State as a whole there is 1 Allopathic physician for 10,110 persons. Taking all kinds of qualified physicians, there is 1 physician for 1,109 persons in urban areas and for 19,241 persons in the rural areas. It thus appears that a long way remains to be covered in the district in this respect.

In respect of literacy, Raigarh is the twentieth most literate district in the State. The proportion of literacy in the rural areas of the district is higher

than the proportion in the State and the Division but the picture is not so rosy in the urban areas. Literacy has made great progress since 1951 but the overall position regarding literacy among women continues to be bad inspite of long strides taken. The overall proporrion of literacy, of course, does not show the extent of higher education and 67.8% of males and 72.6%of the females literates are those who have not even passed the Primary School Certificate and are just 'literates without any educational standard' Only 2.7% of the males and 1.4% of the females have gone up to the standard of Matriculation and above. With the growth of institutions of higher education, this position is likely to improve during the next decade.

The face of the district is definitely being changed under the impact of various government and non-government agencies-and it no longer remains to be what it was. From the backwaters it has come to the main currents and the next and the succeeding decades are sure to take it ahead on the path of development, urbanisation and industrialisation.

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise, that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of estiblishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of estblishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above note clear:—

Raigarh District total 200 (1,702) signifies that there are 1,702 establishments in Raigarh District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains."

Udaipur Tahsil total 207 (66) signifies that there are 66 establishments in Udaipur Tahsil pertaining to Minor Group 207, which stands for "Production of edible fats and oils" (other than hydrogenated oil.)

Village 1 Kanchira 369 (2) signifies that in village Kanchira, which has 1 as its location code number there is one establishment pertaining to Minor Group 369, which stands for "Manufacrure of Sundry hardwares such as G. I. pipe, wirenet, bolt, screw, bucket, cutlery."

In Raigarh Tahsil, Kharsia Town, Ward No. 1. 284 (2) signifies that there are two establishments locacated in Ward No. 1 of Kharsia Town pertaining to Minor Group 284, which stands for "Manufacture of other wooden products such as Utensils, toys, artwares."

RAIGARH DISTRICT:

Urban

Nil

Rural

Location Code number and name of Village:—

50 Kaya (C.C.S.), 58 Mohanpur (M.P.S.), 92 Kosamghat (M.P.S.), 93 Pusalda (M. P. S.), 106 Ghoghara (M.P.S.), 114 Baraud (M.P.S.), 117 Kudumkela (M.P.S.), 129 Porda (M.P.S.), 151 Faguram (M.P.S.), 153 Rumkera (C.C.S.), 158 Jorkat (M. P. S.), 160 Karichhapar (M.P.S.), 164 Ghargodi (C.C.S.), 172 Baronakunda (C,C.S.), 184 Nawagarh (C. C. S.), 194 Chhote Gumda (C. C. S.), 195 Bade Gumda (C.C.S.), 196 Gharghoda (C.C.S.), 203 Tenda (C.C.S.), 217 Katangdihi (C.C.S.), 221 Baihamuda (C.C.S.),

3 GHARGHODA TAHSIL (Rural)—*Concld.*

230 Deogarh (O), 240 Jarekela (C. C. S.), 243 Salihabhartha (C. C. S.), 252 Basanpali (C. C. S.), 254 Kachkaba (C.C.S.), 255 Tamnar (M.P.S.), 265 Chharratangar (C.C.S.), 269 Godi (C.C.S.), 273 Kasdol (C.C.S.), 274 Mahaloi (C.C.S.), 279 Bagchaba (C.C.S.), 287 Amapali (M.P.S.), 297 Harradihi (M.P.S.), 298 Jamdabri(M.P.S.), 307 Gourmudi (M.P.S.).

4 RAIGARH TAHSIL

Urban

Location Code number and name of town:—

II KHARSIA

Ward No. 4 (O), Ward No. 5 (O).

III RAIGARH

Ward No. 15 (C C.S.), Ward No. 18 (C.C.S).

Rural

Location Code number and name af Village:—

272 Gorra (C.C.S.), 278 Loing (M.P.S.), 296 Raitarai (C.C.S.), 305 Kauwatal (C.C.S.), 327 Kensara (M.P.S.), 377 Sarwani (C.C.S.), 379 Pusore (C.C.S., I.C.S., M.P.S.), 383 Bhander Chhote (C.C.S.), 411 Kathali (C.C.S.), 412 Taparda (C.C.S.).

5 SARANGARH TAHSIL

Urban

Location Code nnmber and name of town:—

IV SARANGARH

Ward No. 1 (O), Ward No. 3 (C.C.S.).

Rural

Location Code number and name of Village:—

229 Godihari (C.C.S.).

PART II

OTHER DISTRICT STATISTICS

This part contains some useful offical statistics pertaining to the district collected and compiled from various agencies [the agency or source is indicated below each Table or Statement] and from offical publications. These are presented under the following heads:—

1 Rainfall and Temperature

2 Economic Statistics:—

- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics—

- (a) Health and Medical
- (b) Vital Statistics

7 Communication Statistics

8 Miscellaneous

MAJOR AND MEDIUM IRRIGATION PROJECTS

RAIGARH DISTRICT

S. No.	Name of Project	Tahsil and Village	Year of commencement or when like by to start	Stage of progress	Estimate of Costs involved by stages	Gross area irrigated upto the latest year (in acres)	Future irrigation Potential (in acres)	Area under Principal commercial crops (the area affected by theproject) (in acres)
1	2	3	4	5	6	7	8	9
	I MAJOR IRRIGATION PROJECT							
	NIL							
	II MEDIUM IRRIGATION PROJECT							
1	**Kedar Nalla Project**	Sarangarh Tahsil, Kedar village	Started in october 1956	Flanks nearly completed and pitching in progress. Sluice and waste weir completed. Nalla closure under progress. 50% canal is nearly completed.	Revised estimated cost Rs. 53.78 lakhs	Project still under construction	11,500	

Note:—Major Projects cost more than Rs. 5 crores.
Medium Projects are those costing between Rs. 10 Lakhs and 5 crores.
