PRELIMINARY NOTE

Introduction

B Series Tables presented in this part relate to the economic data collected during 1961 Census. Economic questions have been included in every census and with every succeeding census, the importance of economic questions and the scope of data relating to the economic factors has increased. However, the emphasis during the past censuses has generally been on income or economic independence. In 1961 Census, a major departure in the concept of the collection of economic data was made and stress was laid on work, irrespective of income. This change in concept will help to obtain a realistic picture of the economic activity of those important sections of household workers in agriculture as well as in non-agricultural pursuits, who were left out of account in the past, as they had no income, though working.

Economic Concepts (1881—1921)

A brief account of the economic classifications adopted and the economic questions included in the various censuses will enable a better appreciation of the change in concepts introduced in 1961. In 1881 Census, no distinction was made between earners or dependents, workers or non-workers. The occupation of every male who was of age to do work and the chief source of income in the case of persons not having any occupation were recorded. Boys studying at school, girls, children and women who did not do any regular work were excluded. No particulars were collected regarding the means of livelihood of the persons who did not come under the category of workers. Domestic occupation was not included unless the produce of labour was brought to the market. In 1891, a distinction was made between dependents and non-dependents. Any person who got income by work or through property like rent or pension, was not a dependent and one who earned nothing by independent labour, but was supported by another, was treated as a dependent. In 1901 Census, actual workers were distinguished from mere dependents. A worker was defined as one who actually does work, whether personally or by means of servants, or carries on business or has an occupation or private property which brings him or her any income like house rent, pension, even if the income from that work, occupation or property, is not enough to support him or her entirely. The absolutely idle persons were classified as dependents. In 1911 and 1921, no change was made in the definition of workers and dependents. However, in 1921 Census, children and women were also treated as workers, if any work was done by them to augment the family income.

In 1931 Census, a person was classified as earner or dependent for the first time in the history of Census. An earner was defined as one who had a distinct individual means or partial means of livelihood. An intermediate category of working dependents was also introduced in 1931. A person who contributed anything in cash or in kind towards support of himself or the family, was classified as a working dependent. This was introduced to meet the prevalence of joint family system in India, in which various members of the household are deemed to depend upon the labours or earnings of one, even though they do make some kind of contribution towards family maintenance as a whole. By the introduction of this category of working dependent, the extent of this practice and total number of people supported indirectly, were ascertained. All the persons who did not have a distinct individual means or partial means of livelihood were classified as dependents.

In 1941 Census, the term 'earner' was omitted. The concepts of 'fully dependent' and 'partly dependent' were introduced. The effect of the change could not be studied as the Economic Tables of the census were not published in most parts of the country. In 1951, the concepts of 'self-supporting persons' and 'earning dependents' were introduced. A self-supporting person was defined as one who earned sufficient income to maintain himself, while an earning dependent was defined as one whose earning was not sufficient to maintain himself.

In 1961, the entire population has been divided into workers and non-workers. A person working in seasonal occupations like cultivation, livestock rearing and seasonal household industry was treated as a worker, if the person had some regular work for more than an hour per day, throughout the greater part of the working season. In the case of a person regularly employed in any trade, profession, service or business or commerce, the person was considered as a worker, if he or she was employed during any of the 15 days preceding the day on which the Enumerator

enumerated the particular household. But a regularly working person who was absent from work during 15 days preceding the day on which he was enumerated, due to illness or other causes, was included in the category of workers. Work included not only actual manual labour, but also effective supervision and direction. The workers enumerated in 1961 are shown under nine livelihood categories—two agricultural and seven non-agricultural. All persons who were not working *i.e.*, who did not come under the definition of workers, are shown as non-workers.

For the first time in the Census history, information has been collected and tabulated on the various categories of non-workers. The details of these categories can be found in the Fly-Leaf to Table B-IX.

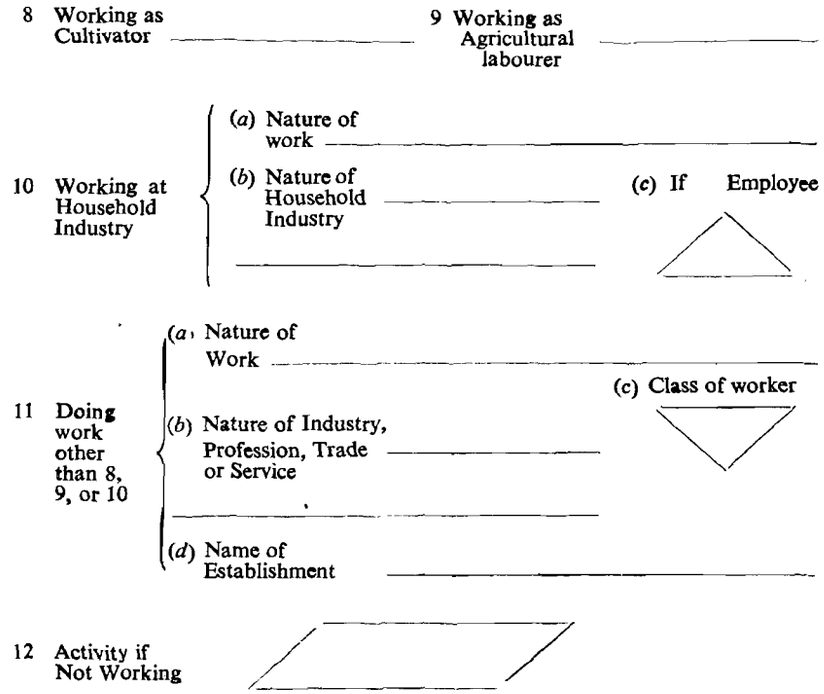
It may appear at first sight that in view of the change of concepts introduced in 1961, the data presented in this Part cannot be compared with the data of earlier censuses. But this impression is not quite correct. Within certain limitations it is possible to recast the data of workers at the earlier censuses, to the categories adopted in 1961. A note prepared by Shri Kalra, Research Officer of the Registrar General's Office, reproduced as Appendix II explains how comparability has been maintained.

General Economic Tables

According to the Tabulation Plan for the 1961 Census, ther are 17 Economic Tables in 'B' Series. This series is divided into two parts *viz.* (*i*) General Economic Tables (B-I to B-IX) prepared from individual enumeration slips and (*ii*) Household Economic Tables (B-X to B-XVII) prepared from Household Schedules. According to the scheme of Census Publications, Tables B-I to B-IX (General Economic Tables) are printed in Part II-B in two sub-parts. The present publication which is sub-part II-B(i) contains the Tables B-I to B-IV-C and Tables B-V to B-IX will be printed in sub-part II-B(ii). The Household Economic Tables are published in Part III. These tables are entirely a new feature of the 1961 Census. They are prepared from household schedules by mechanical tabulation on the basis of 20 per cent sample and give all possible data relating to the extent of land under cultivation and household industry.

Questions 8 to 12 on the individual slip covered the economic activity of the person enumerated. The portion of the enumeration slip containing these questions is reproduced below. Extracts from the manual of 'Instructions to Enumerators' pertaining to economic questions are given in Appendix I.

Economic Questions of 1961 Census as given in the Individual slip



APPENDIX I

Extract from Census of India 1961—*Enumeration Manual*

Qs. 8 to 11. Working—These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household industry or may be doing any other work. You have to record the answer in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and a Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an under-trial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggers, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded *i.e.*, more than one of the questions 8, 9, 10 or 11 has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round, the number of the questions 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11 *i.e.*, more than two of the questions 8 to 11 would have been filled up by some work. In such cases you should first ascertain the principal work *i.e.*, the one which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the right hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Q. 8. Working as Cultivator—For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (*a*) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (*b*) Cultivation of lands or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit-growing or keeping orchards of groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit-growing or or chardor plantations like tea, coffee, rubber, cinchona and other medical plantations should be entered in Q. 10 or 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risk of cultivating and is paid wages in cash, kind or share such as share of produce (Agricultural Labourre) will not be treated as Cultivator in this question.

Q. 9. Working as Agricultural Labourer—Write AL for a person working as agricultural labourer, *i.e.*, a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right to lease or contract on land on which he works, nor should he be responsible for taking the decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(a) and 10(b). Household Industry—If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10(*a*) and (2) the nature of the Household Industry against question 10(*b*). Otherwise put X in both questions 10(*a*) and (*b*). A Household Industry is defined as an industry conducted by the Head of the Household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definitions of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(*a*) and the nature of the Household Industry against 10 (*b*).

Q. 10(c). If Employee in Household Industry—This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E.E. For all others put X.

The following examples will illustrate how questions 10(*a*) to 10(*c*) should be filled up for persons working at household Industry.

Q. 10. Working at Household Industry

	(*a*) NATURE OF WORK	(*b*) NATURE OF HOUSEHOLD INDUSTRY	(*c*) IF EMPLOYEE
1.	Spinning yarn	Spinning yarn in Ambar Charkha	X
2.	Dyeing and printing yarn	Handloom weaving	X
3.	Threshing and cleaning grain	Flour making *chakki*	X
4.	Labourer employed for crushing oil	Oil ghani	E.E.
5.	Tempering and polishing implements	Blacksmithy; making agricultural implements	X
6.	Labourer employed for making and firing kiln	Earthenware pottery	E.E.
7.	Throwing and Turning pottery	Earthenware pottery	X
8.	Making wooden doors and windows	Carpentry	X
9.	Filling gold ornaments with lac	Goldsmithy	X
10.	Labourer working hosiery machine	Hosiery	E.E.
11.	Keeping Accounts	Hosiery	X
12.	Polishing and Scrapping metal	Electroplating	X
13.	Labourer employed for putting iron hoop on cartwheels	Cartwheelwright	E.E.
14.	Repairing of guns	Gunsmithy	X
15.	Bee Keeping	Production of honey	X
16.	Tending cattle	Livestock raising	X

Q. 11. Doing Work other than 8, 9 or 10.—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work in which he devotes more time.

Q. 11(a). Nature of Work—In the case of a person not working or who works *only* as cultivator or as agricultural labourer or at Household Industry put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble had been caused by inadequate answers and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q 11(b). Industry, Business, Trade, Profession or Service—In the case of a person who is working and the nature of whose own work has been recorded in Question 11(*a*), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(*a*), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person of whom an X is put in Question 11(*a*) put an X in this question also.

Important points to remember in Questions 11(a) and 11(b)—

1. Women or children who help with work, such as ricepounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the works mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.*

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves:—

   Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machininst, assistant contractor, polisher.

5. **Labourers**—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, *e.g.*, railway porter, market or bazaar porter, labourer employed on road-digging, brick-layer's labourer. If accustomed to work on various jobs, write general labourer.

6. **Machine Operators**—Always state the kind of machine giving its recognized name, if any.

7. **Shop-keepers, Retail Dealers, Shop Assistants**—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, Shop Assistant or Salesman (if assisting) and state whether the business is wholesale or retail or both. For Shop Assistants and Salesmen in stores with several departments, state the particular department in which engaged (*e.g.*,, Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. **Transport Workers**—Describe fully the nature of the transport, *e.g.*, air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. **Services**—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department, branch wherever applicable, *e.g.*, Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:—

    Manufacturer, merchant, agent, broker, refractor, dealer, engineer, and iron works, etc.

11. **Domestic Services**—In the case of any private servant, *e.g.*, a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case, but in the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of firms carrying on two or more businesses if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (*i.e.*, they have seperate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. **Commerce**—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q 11(c). Class of Worker—

For a person who is :—

1.	an *Employer*, that is who hires one or more persons in his work described in Q. 11(*a*) . .	write	MR
2.	an *Employee*, that is, who does his work described in Q. 11(*a*) under others for wages or salary in cash or kind	write	EE
3.	a *Single Worker*, that is, who is doing his work described in Q. 11(*a*) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives	write	SW
4.	a *Family Worker*, that is who is doing his work described in Q.11(*a*) in own family without wages or salary in cash or kind.	write	FW

For a person for whom an 'X' is put in Qs. 11(*a*) and 11(*b*) put an X in this question also.

Explanation:

(*i*) An Employer is a person who has to employ other persons in order to perform the work entered in Q. 11(*a*). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(*a*). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(*ii*) An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(*iii*) A Single Worker for the purposes of Q. 11(*c*) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operative should be recorded as 'Single Worker'.

(*iv*) A Family Worker is a member who works without receiving wages in cash or kind in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint-stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work if the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d). Name of Establishment—Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place or work write 'No fixed place of work'.

APPENDIX II

A NOTE ON WORKING FORCE ESTIMATES, 1901–61

B. R. KALRA,
Research Officer,
Office of the Registrar General, India.

Workers and Non-workers:

An attempt has been made in this note to work out estimates relating to working force in India in 1901—1961 (except 1941), based on Census Reports, so as to make them comparable with 1961 Census data. As the tripartite division of the economic status has been done away with in 1961, the changes in 1951 and 1931 data have been made in order to conform to the new division of the population into workers and non-workers. For earlier censuses, while 'actual workers' have been generally treated as workers, the 'dependants' have been shown among non-workers. Among 'actual workers', those pursuing unproductive occupations have been transferred to non-working population.

1951 *Census:*

Workers in 1951 comprised of:

(*i*) All self-supporting persons with productive principal means of livelihood *i.e.*, all self-supporting persons other than (*a*) agricultural rent-receivers belonging to livelihood Class IV and (*b*) self-supporting persons deriving their means of livelihood from non-agricultural, non-productive occupations, like beggars, pensioners, etc., belonging to livelihood Class VIII.

(*ii*) Self-supporting persons belonging to livelihood Class IV (agricultural rent receivers) but deriving secondary means of livelihood from productive occupations *i.e.*, other than Class IV.

(*iii*) All earning dependants in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from:

(*a*) receipt of agricultural rent under Class IV, and

(*b*) non-agricultural non-productive occupations. (For calculating working force, no account has been made of the self-supporting persons, whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood, as unlike rent-receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood.)

Non-workers in 1951 were equal to:

(*i*) All non-earning dependants.

(*ii*) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood;

(*iii*) The following groups of self-supporting persons included in non-agricultural Class VIII:
(*a*) Persons living principally on income from non-agricultural property;
(*b*) Pensioners and remittance holders;
(*c*) Inmates of jails, asylums, alms houses and recipients of doles, beggars and vagrants, and
(*d*) Other persons living principally on income derived from non-productive activity.

(*iv*) Earning dependants whose own means of livelihood (Secondary means of livelihood) was agricultural rent-receiving under Class IV, and

(*v*) Earning dependants whose secondary means of livelihood was non-agricultural non-productive. The number of this group have been estimated at 455,792 (106,771 males and 349,021 females). This estimate has been worked out on the basis of proportion of non-productive self-supporting persons to all self-supporting persons in the non-agricultural classes. These earning dependants were deducted from Class VIII and placed among non-workers.

1931 *Census:*

I. Workers:

(*i*) All earners following productive occupations; and
(*ii*) All working dependants following productive occupations.

II. Non-workers:
(*i*) All non-working dependants;
(*ii*) Earners and working dependants following non-productive occupations.
(*a*) Non-cultivating proprietors taking rent in money or kind;
(*b*) Proprietors (other than agricultural land), fund, scholarship holders and pensioners;
(*c*) Inmates of jails, asylums and alm-houses;
(*d*) Beggars and vagrants;
(*e*) Procurers and prostitutes;
(*f*) Other unclassified non-productive industries.

68 lakhs females in Madras and Travancore-Cochin who were returned as working dependants in domestic services have been subtracted from the working forces and put under non-workers.

1921 *and* 1911 *Censuses*:
I. Workers:
All "Actual workers" having productive occupations;

II. Non-workers
(*i*) All "dependants"; and
(*ii*) All "Actual workers" in non-productive occupations as stated in case of 1931 Census.

1901 *Census*:
I. Workers:
(*i*) All "actual workers" having productive occupations;

II. Non-workers:
(*i*) All "dependants"; and
(*ii*) "Actual workers" in non-productive occupations;
(*a*) Rent-receivers;
(*b*) Prostitues, procurers, pimps etc.;
(*c*) Receivers of stolen goods;
(*d*) Witches, wizards, cow-poisoners etc.;
(*e*) House-rent, share and other property not being land;
(*f*) Allowances for patrons or relatives;
(*g*) Educational or other endowments, scholarships etc.;
(*h*) Mendicancy (not in connection with a religious order);
(*i*) Pensioners, inmates of asylums, prisoners etc.

In the States of Assam, Punjab, Cochin, Rajputana, Central-India, Kashmir, Berar, Madras, Mysore and Coorg, owner cultivators, tenant cultivators and lessees numbering 13,979,244 were shown under "rent-receivers". These have now been grouped under industrial categoty I of 1961 (Cultivators).

No sex-wise break-up of dependants was available in the Censuses of 1921, 1911 and 1901. After subtracting from the male population all male workers of productive and un-productive occupations,the remainder gave an estimate of the male component of dependants. Similar procedure was adopted in the case of female dependants.

Industrial Classification of Workers:

Table-I indicates the re-classification of groups and sub-divisions in earlier censuses onthe basis of 1961 broad industiral classificati on. For this purpose, the groups in earlier censuses were first related to the groups in the Indian Standard Industrial Classification (I.S.I.C.), adopted in 1961 and then consolidated into nine broad industrial categories of workers. The following have been the main re-adjustments.

Owner cultivators, tenant cultivators, estate agents and managers and shifting cultivators have been shown against category I of 1961 (Cultivators). Toddy drawers who were included under food industries in previous censuses have been included in industrial category III. This could not be done in the case of 1951 since toddy drawers were included with other workers in processing and manufacture of beverages. No estimate could be made for persons working in industrial category IV (Household Industry). Persons working in Household Industry are included in industrial categories III and V.

Workers in generation and transmission of electric energy and gas works have been included in category V of 1961 (Manufacturing other than Household Industry). In the case of 1901 Census, "makers and sellers" have in all cases been listed under category V. Wherever possible, persons employed on construction and maintenance of roads, railways, bridges, harbours, canals, rivers, aerodromes etc., have been shown under category VI (Construction). Workers who operated such transport works were shown under category VIII (Transport, Storage and Communications).

Rent Collectors, clerks etc., of ex-zamindars and jagirdars have been transferred to category IX (Other Services). This category also includes washing, cleaning, and dyeing, barbers, hair-dressers and scavenging which were listed in earlier censuses in industry and

hotel-keeping which was shown in earlier censuses under Trade. Private motor-drivers and cleaners have been included in category IX and not under Transport.

In 1951 Census, classification of population into divisions and sub-divisions was done only in respect of self-supporting persons and that also with regard to their principal means of livelihood. Thus, no divisionwise break-up of earning dependants and self-supporting persons with regard to their secondary means of livelihood was available. In these Tables earning dependants have been divided into their respective divisions and sub-divisions of the livelihood class to which they belonged in the proportion of self-supporting persons in those divisions and sub-divisions as available in Economic Table III. Self-supporing persons belonging to livelihood Class IV who had a productive secondary means of livelihood have also been distributed in similar manner. However, while distributing earning dependants, it was assumed that their number in the following sub-divisions was insignificant as observed in the States of West Bengal and Uttar Pradesh where detailed classification of earning dependants into divisions and sub-divisions was made.

7.4	Railway Transport
7.6	Postal Services
7.7	Telegraph Services
7.8	Telephone Services
7.9	Wireless Services
8.1	Medical and other Health Services
8.4	Police (other than village watchman)
8.6	Employees of Local Boards and Municipalities (but not including persons classifiable under any other division or sub-division)
8.7	Employees of State Governments (but not including persons classifiable under any other division or sub-division)
8.8	Employees of Union Government (but not including persons classifiable under any other division or sub-division)
8.9	Employees of non-Indian Governments

No allocation of earning dependants was, therefore, made in respect of these sub-divisions.

General Labour:

During 1901 to 1931 Censuses, the following workers were returned under the head "General Labour".

Year	Groups	Persons	Males	Females
1	2	3	4	5
1901	(504)	8,216,412	4,530,856	3,685,556
1911	(167)	4,034,446	2,149,313	1,885,133
1921	(187)	4,555,194	2,429,943	2,125,251
1931	(191)	6,450,338	3,376,576	3,073,762

These have now been apportioned among industrial categories I—IX on a *pro-rata* basis in the proportion in which the rest of the working force exclusive of general labour is distributed.

"Unspecified" or "Insufficiently" described occupations:

From 1911 to 1931 Censuses, the following groups were returned as "unspecified":

1. Manufacturers, businessmen and contractors otherwise unspecified;
2. Cashiers, accountants, booking-clerks, clerks, and other employees in unspecified offices, ware-houses and shops;
3. Mechanics otherwise unspecified;

Workers under the 1st group have been distributed between the industrial categories V and VII in the proportion of rest of the workers in the two categories. Workers in 2nd and 3rd groups have been distributed among industrial categories V—IX of 1961 according to the proportion of workers in these categories.

In 1901, the following groups were returned as "insufficiently described":

(*i*) Uncertain or not returned;
(*ii*) Services unspecified (Chakari).

While the workers in the first group have been distributed on a proportionate basis in all the industrial categories I—IX, those in the second group have been apportioned proportionately among non-agricultural categories V—IX of 1961.

PART II-B (i)

GENERAL ECONOMIC TABLES

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table presents the data relating to the entire population divided into two broad categories workers and non-workers. The workers have been further divided into the following 9 livelihood classes based on their work:

(i) CULTIVATORS: For Census purposes, a cultivator is a person who is engaged either as employer, single worker or family worker in (*a*) cultivation of land or supervision or direction of cultivation of land owned or held from Government or (*b*) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

(ii) AGRICULTURAL LABOURERS: An agricultural labourer is a person who works in another person's land only as a labourer without exercising any direction or supervision in cultivation.

(iii) Workers engaged in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

(iv) WORKERS IN HOUSEHOLD INDUSTRY: For Census purposes, a Household Industry is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Household industries relate to production, processing, servicing, repairing or making and selling of goods. They do not cover such professions as Pleader, Doctor, Barber, Washerman or Astrologer, etc. All persons engaged in household industries have been brought under this category.

(v) WORKERS IN MANUFACTURING OTHER THAN HOUSEHOLD INDUSTRY: Persons who are working as employers, employees, single workers, or family workers in activities connected with the production, processing, servicing or repairing of goods in factories, workshops or other similar establishments, which do not qualify to be included under household industries as defined in the previous paragraph have been brought under this category.

(vi) WORKERS IN CONSTRUCTION: Persons who are engaged in construction, maintenance, upkeep, repairs and similar occupations of buildings, roads, bridges, dams, canals and construction of electrical, water supply and sanitary installations, etc., are brought under this category.

(vii) WORKERS IN TRADE AND COMMERCE: Persons engaged in wholesale or retail trade in goods, or dealing with Insurance, Stocks, Shares or employed in Banking and Financial Institutions have been classified as workers in trade and commerce.

(viii) WORKERS IN TRANSPORT, STORAGE AND COMMUNICATION ACTIVITIES: Persons employed in Railway, Road Transport, Post and Telegraph and other agencies have been brought under this category.

(ix) WORKERS IN OTHER SERVICES: This is the last category of workers which comprises employees of Central and State Governments, Local Bodies, Quasi-Governmental Bodies and those engaged in Educational and Scientific Services, Medical and Health Services, Religious and Welfare Services, Legal Services, Business Services, Community Services and Trade and Labour Associations, Recreation Services, Personal Services and other miscellaneous activities not covered by any of the categories listed above.

The Table shows the distribution of the workers in each category and the non-workers in four broad age-groups, males and females being shown separately. The classification of workers and non-workers by broad age-groups is the special feature of 1961 Census. The broad age-groups 0—14, 15—34, 35—59, 60+ correspond to the different stages of life which have a special significance to the capacity to work, namely, children, young persons, middle aged persons and elderly persons. In an ideal society no person in the age-group 0—14 should be working as this age-group comprises only infants and young children who should be receiving education. Similarly no person above 60 should be compelled to work for his livelihood and social security measures should take care of the aged and infirm. Presence of some non-workers in age-group 15—34 is to be expected as persons receiving higher education would be in this age-group but the presence of a high proportion of non-workers in age-group 15—34 and of any non-worker in age-group 35—59 indicates unemployment and non-utilization of man-power. The data have been furnished separately for Total (T), Rural (R), and Urban (U).

Upto 1941, the classification of occupied population was based on occupation. In 1951, the unit of classification was the individual. All employers and all independant workers were classified with reference to the commodity produced or service rendered and employees engaged in production, commerce or transport excluding domestic servants were also classified with reference to their own activity. Domestic servants were classified into sub-divisions without reference to the nature of their work. All other employees were classified with reference to the commodity produced or service rendered by their employers. This scheme was known as Indian Census Economic Classifications (I. C. E. C.) which was an adaptation of the International Standard Industrial Classification. In this Census, the establishment has been the unit of classification. Classification of establishment was based on the products made or services provided by that establishment.

Self employed persons have been grouped under the classified industry to which their activity relates. Other workers have been grouped under the 'Industry' in which they are employed. This scheme of division known as Indian Standard Industrial Classification (I. S. I. C.) is based on and closely related to the International Standard Industrial Classification. Detailed classification of non-workers is given in Table B-IX.

TABLE B-II

WORKERS AND NON-WORKERS IN CITIES, TOWN-GROUPS AND TOWNS ARRANGED TERRITORIALLY CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table furnishes the same data as Table B-I but for different units. While the district is the unit for which figures are furnished separately in Table B-I, Table B-II furnishes the information for each City, Town or Town-Group. Consolidated figures are also furnished for the State and also for each district. The figures for each district in Table B-II are the same as those for the urban portion of that district as per Table B-I.

For the first time in the 1961 Census, uniform and somewhat rigid tests were sought to be applied throughout the country for an area to be recognised as an Urban unit. The criteria prescribed are:

(1) All Municipalities, Cantonments, Notified Areas and other places enjoying recognised local administration like civil lines will be treated automatically as towns;

(2) For other areas the eligibility yardsticks applied are:

(a) a population of not less than 5,000;

(b) a density of not less than 1,000 persons per square mile; and

(c) at least three-fourths of the adult male population should be employed in pursuits other than agriculture.

The Superintendents of Census Operations were empowered to treat as towns any other place which while not fulfilling any of the conditions mentioned above possessed pronounced urban characteristics and amenities.

Towns and cities have been grouped into six classes on the basis of the population of each town or city. Class I comprises all towns (technically called cities) with a population of 100,000 and above, Class II, those with a population of 50,000 or more but not exceeding 99,999, Class III, those with a population of 20,000 or more but not exceeding 49,999, Class IV, those with a population of 10,000 or more but not exceeding 19,999, Class V, those with a population of 5,000 or more but not exceeding 9,999 and Class VI, those with a population less than 5,000.

Town-Groups have been formed in recognition of the fact that certain places treated as separate 'Towns', on account of their being under different administrative and civic units do actually constitute one demographic unit. The area included in each town-group has a certain demographic, economic, industrial and geographical unity, the study of which will be faciliated by presenting Census statistics for the group of towns as a whole in addition to the data for each constituent unit.

In all, there are eight town-groups in the State. The constituent towns of each town-group are listed below:

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This table is prepared in two parts, Part-A for urban areas and Part-B for rural areas. It corresponds to Table D-VII introduced for the first time in 1951, when the entire literate and educated population was classified into educational standards and eight livelihood classes. In 1961 the nine industrial categories of workers and also the non-workers are cross tabulated by literacy and educational levels. This information will be useful for assessing the educational qualifications of available man-power. In 1951, illiterate persons were not classified according to their economic activity, whereas this table shows the figures of illiterates in each of the nine categories of workers and among non-workers.

In 1951 all degrees and diplomas—technical as well as non-technical—were given under one heading *viz.* degree or diploma, while in 1961 non-technical diplomas and degrees are clearly distinguished from technical diplomas and degrees, separate information being furnished regarding the number of persons with technical degree or diploma equal to degree or post-graduate degree in Engineering. Medicine, Agriculture, Veterinary or Dairying, Technology and Teaching.

Educational levels shown in Part-A are (i) Illiterate, (ii)Literate, (iii) Primary or Junior Basic, (iv) Matriculation or Higher Secondary, (v) Technical diploma not equal to degree, (vi) Non-technical diploma not equal to degree, (vii) University degree or post graduate degree other than technical degree and (viii) Technical degree or diploma equal to degree or post-graduate degree with the break up of (1) Engineering, (2) Medicine, (3) Agriculture, (4) Veterinary or Dairying, (5) Technology, (6) Teaching, and (7) Others. And educational levels shown in Part-B are (i) Illiterate, (ii) Literate (without educational level), (iii) Primary or Junior Basic, (iv) Matriculation and above.

The definition of the concept of 'Literacy' adopted for census purposes will be relevant in studying this table. All persons who are able to read and understand any simple letter in any language, either in print or in manuscript, and to write a simple letter are considered literate for census purposes. If in addition to being able to read and write any person has passed an examination or examinations as proof of an educational level attained, the highest examination passed was recorded. The person who does not satisfy this test of literacy is an 'Illiterate.' Thus literates consist of mere literates who just satisfy the definition of literacy without possessing any educational qualification, as well as those who have passed some examinations. From 1901 to 1941, a separate question was also asked to find out the ability to read and write English. This separate question on English was abolished from 1951 Census. In 1951, data relating to persons who know only to read was also collected and they were treated as 'partly literates'. Detailed notes on the definitions of the concepts of 'Literacy', questions asked on literacy and the tables prepared on literacy have been given in the notes relating to 'C' series (Social and Cultural Tables).

The literates who have not passed any examination and the literates who have passed examination below that of primary or junior basic examination, which includes even the persons who have failed in primary or junior basic examination, have been included in the category of 'Literates without educational level'. All the other literates who have passed primary or junior basic examination or higher examination have been included in the respective categories

Many persons posses technical diplomas or non-technical diplomas which are not equivalent to degrees. These diploma holders are generally employed in posts equivalent to those of Foremen and information about the availability of trained persons at this level would be quite useful. Hence, new classifcations 'Technical Diploma not equal to Degree', and 'Non-technical Diploma not equal to Degree' have been introduced. Six important branches of Science which can be classified as 'Technical' have been also separately listed under the major heading 'Technical Degree' or 'Diploma equal to Degree or post-graduate Degree'. Provision has also been made to record under 'Others' technical personnel, *i.e.* persons possessing technical degree or diploma equal to degree in the technical branches of Science other than those separately listed.

This table shows that there is not a single person with a degree in technology in Bellary, Bidar, Bijapur, Chikmagalur, Coorg, Dharwar and Hassan Districts. It is very difficult to draw a distinction between the degree (or post-graduate degree) in Engineering and that in Technology. No uniform pattern is followed by the universities and other institutions awarding degrees in the country regarding the degrees awarded in the subjects of Engineering and Technology. While some universities and institutions award B.E. degrees even in Technology, others award B. Tech. degrees even in Engineering subjects. Each of these seven districts has a good number of persons with a degree in Engineering. The following statement shows the total number of persons with degrees in Engineering or Technology in the several districts and it would be seen that all districts have a fair share of persons qualified in Engineering or Technology:

Sl. No.	District	No. of persons with degrees in Engineering or Technology
	MYSORE STATE	**4,701**
1.	BANGALORE	2,566
2.	BELGAUM	122
3.	BELLARY	151
4.	BIDAR	10

15.	NORTH KANARA	75
16.	RAICHUR	120
17.	SHIMOGA	352
18.	SOUTH KANARA	116
19.	TUMKUR	131

South Kanara District has no person with a degree in Veterniary or Dairying and the number of such persons is small in most of the other districts. The University degree in Veterinary Science is of recent origin in the State and even in other States Diplomas equivalent to degree such as G.B.V.C., G.M.V.C., etc., were being awarded by the Veterinary Colleges themselves to persons trained in the Veterinary Science and persons with these qualifications rose to the highest positions in the department. Many persons with such qualifications are still in service. They are not treated as graduates as they do not possess any degree of a university or an institution declared equivalent to a university. The absence of university degrees in Veterinary Science does not therefore mean that there are no qualified Veterinarians.

This table will be of much use for assessment of the educational qualifications of available man power, as this provides data relating to the employment of persons of different educational standards among the various categories of workers. The extent of literacy among the population as a whole in different age-groups and in both sexes, without reference to the category of workers, can be obtained from Table C-III.

Among the non-workers, the unemployed aged above 15 alone have been classified by broad age-groups and educational standards, separately in the Table B-VIII, prepared in two parts, Part-A dealing with urban areas and Part-B dealing with rural areas, with the same educational standards as given in the two parts of this table (B-IIIA and B).

TABLE B-IV

INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN AT CULTIVATION

This table is prepared in three parts on the basis of the principal work of the persons. Part A relates to persons at work in Household Industry, classified by branch of industry (Division and Major Group) and class of workers (Employee and others). The figures are given for total/rural/urban. Part B relates to persons at work in non-household industry, trade, business, profession or service classified by branch of industry (Division and Major Group) and class of workers (Employer, Employee, Single Worker and Family Worker). The figures are given for total/urban. Part C relates to persons at work in household as well as in non-household industry classified by branch of industry (Divisions, Major Groups and Minor Groups). It gives industrial classification of workers in both the types of industries upto Minor Group without the class to which workers belong. The figures are given for total/urban.

In the Census upto 1941,the status or class of workers was not covered by any question or part of a question in the Census. In 1941 Census schedule, a question was asked as to whether one employs paid assistants or members of the household and if so, to indicate the number employed. In 1951 Census, a question on the economic status of an individual was asked and in that the Enumerator was asked to denote whether a self supporting person earned his principal means of livelihood as an employer or as an employee or as an independent worker by assigning number 1 for employer, 2 for employee and 3 for independent worker. In the case of other self-supporting persons who did not come under these three classes, the enumerator was asked to write 0.

In this Census a part of the question relating to the household industry was intended to record whether the worker in the household industry is an employee or not, and a part of the question relating to other work, namely other than cultivation, agricultural labourer and household industry, was put with a view to record whether the worker is an employer, employee, a single worker or a family worker. The answers to these questions were recorded by the authorised abbreviations as MR for Employer, EE for Employee, SW for Single Worker and FW for Family Worker.

An employer is one who employs other persons for wages or salary to get any work done, who thus, will not only be responsible for his own work but also for the work done by others. However, a person who employs domestic servants for household duties or employs subordinates under him in an office where he himslef is employed by others, does not come under the category of an employer, even when the power of appointing any other person is delegated to him. An employee is a person who usually works under any person for salary or wages, irrespective of the powers. Even the unpaid worker in a household industry, if he is not a member of that household will be only an employee. Apprentices who do not form part of the household will also be employees whether they get stipend or not. The person who works by himself neither employing persons under him for the work, nor being an employee under any other person, except casually, is termed as 'Single worker'. The head of the household in a household industry will not be classified as a single worker. But the definition of single worker includes a person who works in joint partnership with one or several persons, hiring no employees. Each member of a Producers' Co-operative Society will also come under the category of 'Single worker'.

A person who works in any business or trade conducted mainly by the members of the family, ordinarily at least for one hour everyday during the working season, without receiving any wages in cash or kind is a 'Family worker'. This definition does not include the members of the household who help in performing mere household duties.

Thus in B-IV Part A, data on the class of workers in household industry are presented for employees and others separately and in B-IV Part B, the data relating to the class of workers in non-household industry, trade, business, profession or service, etc., are presented separately for the four classes *viz.* employer, employee, single worker and family worker. The class of workers is not presented in the Table B-IV Part C.

In Table B-IV Part C minor groups having less than 1 %of workers of the respective divisions (less than 0.5 % in case of Division 2 and 3) have not been shown in the table. The divisions thus affected are marked with an asterisk(*). Such minor groups are shown run on in Appendix to this table. It may be further noted that lines with nil entries have been omitted from these tables. The standard industrial classification has been reproduced as Annexure I.

It would, however, be necessary to emphasise at this stage that the scope of Tables B-IV Part A, B-IV Part B and B-IV Part C rules out the appearance of certain minor groups in each of these tables.

B-IV Part A relates only to household industry. As workers in cultivation appear seperately under Industrial Category I (Cultivator) in the Primary Census Abstract and as Table B-IV Part A gives the industrial classification of only persons appearing under Industrial Category IV (Household Industry) in Primary Census Abstract, Major Group 00 (Field Produce and Plantation Crops) in Table B-IV Part A does not cover Minor Groups 000 [Production of cereal crops (including bengalgram) such as rice, wheat, jowar, bajra, maize], 001 (Production of pulses such as arhar, moong, masur, urd, khesari, other grams), 002 (Production of raw jute and kindred fibre crops), 003 (Production of raw cotton and kindred fibre crops) and 004 (Production of oilseeds, sugarcane and other cash crops), workers under which are shown under cultivation. Major Group 00 (Field Produce and Plantation Crops) in Table B-IV Part A is thus confined to the raising of crops other than those coming under Minor Groups 000 to 004. Also major groups beyond 39 (Miscellaneous Manufacturing Industries) do not appear in Table B-IV Part A, because the activities covered by them do not come under industry.

B-IV Part B covers only persons appearing in Industrial Categories V (In Manufacturing other than Household Industry), VI (In Construction), VII (In Trade and Commerce), VIII (In Transport, Storage and Communications) and IX (In Other Services) and the figures against the several major groups do not include those working in household industry and also those shown under cultivation.

As its title itself indicates, Table B-IV Part C is concerned with persons at work other than cultivation and hence Minor Groups 000 to 004 (both inclusive) of the I. S. I. C. whose activities are covered by cultivation do not appear in this table.

Tables B-IV Part B and B-IV Part C do not also include figures of persons coming under Minor Group 999 (Fresh entrants to the Labour Market) of the I. S. I. C. These persons who have been treated as non-workers are covered by Tables B-VIII and B-IX.

In the instructions issued to enumerators, Household Industry was defined as an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the limits of the village in rural areas and only at home in urban areas. Thus certain outdoor activities such as production of fruits and vegetables, mining and quarrying, fishing, collection of forest produce and rearing of sheep or cattle, appear under household industry in rural areas.
