PREFACE

The enumeration of population under the 1971-Census was conducted during the period 10th March, 1971 to 31st March, 1971 with the sunrise of 1st April, 1971 as reference date. The enormous data collected in the census during the above period of time were processed in the regional tabulation office and the coding and punching unit established in this office for the purpose.

The present volume which contains different census tables is split into two parts : (i) Part II-B and (ii) Part II-D. Part II-B contains all economic tables (B-Series) which provide the statistics on the characteristics of the economically active and inactive population of the territory. Part II-D contains all tables on migration of population (D-Series). Each table is based on a full count and is preceded by a fly-leaf which explains the lay-out and method of presentation of the table. A detailed analysis and interpretation of the economic as well as of migration data will be done in the chapters devoted to these tables in the General Report of the 1971-Census. An introductory note has, however, been provided at the beginning of each part, so as to give a general idea of the essential concepts and definitions used so that a reader can understand the tables without any difficulty.

My grateful thanks are due to Shri K. K. Chakravorty, Assistant Registrar General and his staff for arranging scrutiny of the tables and for offering some valuable suggestions.

In my office, the compilation of this volume has been made possible on account of the ungrudging co-operation and sustained hard work of a large group of young and enthusiastic workers. In particular, I should like to place on record my grateful appreciation of the useful services rendered by the following members of my staff in the preparation of this volume.

1. Shri D. P. Naik, Asstt. Director of Census Operations
2. Shri S. P. Desai, Tabulation Officer
3. Shri L. Rodrigues, Statistical Assistant
4. Shri A. Dias, Computor
5. Shri A. Barretto, Computor.

ECONOMIC TABLES

INTRODUCTORY NOTE TO ECONOMIC TABLES

General

Of the several enquiries made during a population Census, those relating to economic aspects of the life of the community are easily the most important, particularly so in a country like ours where the economy is still not in a fully developed state. In all the censuses prior to 1961, though some data relating to occupation of persons was collected, the main interest seemed to lie in demographic and social studies. So far as Goa, Daman & Diu is concerned, all the earlier censuses were conducted during the erstwhile Portuguese regime. The last census was completed in the year 1960, the reference date being zero hour of 15th December, 1960. The economic data thus collected by the Portuguese Government was found to be deficient in certain respects when recast on the lines of the Indian Census data. The 1971 Census which was conducted in this territory for the first time on a pattern identical to that of the rest of India perhaps afforded a unique opportunity for improving upon the 1960-Census data, making it more elaborate and comprehensive.

All the above tables are based on the individual slips canvassed by enumerators between the period 10th and 31st March 1971, the reference date for the data being the sunrise of 1st April, 1971.

The tables present the census material for 4 units i.e. the Union Territory of Goa, Daman & Diu and its 3 districts. None of the tables gives break-up below the district level except Table B-II where material is presented for each town/urban agglomeration separately. At the beginning of each table a fly-leaf is added to explain the layout and method of presentation of the table. The fly leaf does not contain any analysis or review of the material presented in the table. This will appear in Part-I General Report of 1971 Census. This introductory note simply describes the procedure, questionnaire and the scheme of economic classification adopted in 1971-Census.

Economic Question

Question 16 of the individual slip is intended to cover the economic characteristics of the persons enumerated. In 1961 Census the population was divided into workers and non-workers with emphasis on work and not on income or economic dependence as was done in earlier Censuses. The same practice was adopted in 1971-Census also but with a revision in the definition of the term worker. The concept of a 'worker' adopted in 1961-Census was according to the experts rather too liberal, so much so if a woman who is basically engaged in attending to household duties, went to her husband's field taking his lunch and for about an hour or so she tended the cattle, she was straightway treated as engaged in cultivation. Similarly, a full time student if he sat for a little time, however short the period might have been in his father's shop even on a single day in a fortnight, he was treated as an economically active worker and his basic characteristics as a whole-time student was ignored. This seems to have inflated the number of workers in 1961 Census. The concept of a 'worker' has undergone a change in 1971-Census and the following procedure was adopted to decide whether a person was a 'worker' or not.

Workers/Non-Workers

Every person was asked what his main activity was, that is, how he engaged himself mostly. For the purpose of this question all persons would have divided themselves into two broad streams of main activity, namely (1) worker and (2) non-worker, according as the type of main activity that the person returned himself as engaged in mostly.

'Worker' defined : a 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work also.

For the purpose of determining the working status of a person the reference period was one week prior to the date of enumeration in respect of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this had been returned as his main activity, the person was categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike, lockout etc. was also considered as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as working. A person who had merely been offered work but had not actually joined it, was not treated as engaged in work. Thus all persons engaged in any type of productive work were treated as workers. These workers are further classified under the following nine basic industrial categories formed in correspondence with the National Industrial classification, 1970.

Category	National Industial classification-Industry Division No.
1	2
I Cultivator	000 to 006
II Agricultural Labourer	000 to 006
III Livestock, Forestry, Fishing, Hunting & Plantations, Orchards & Allied Activities.	Div. 0 (excluding 000 to 006)
IV Mininig & Quarrying	Div. 1
V(a) Manufacturing, Processing, Servicing and Repairs-Household Industry.	Div. 2 & 3
V(b) Manufacturing, Processing, Servicing and Repairs-Other than Household Industry.	Div. 2 & 3
VI Construction	Div. 5
VII Trade & Commerce	Div. 6 and 8
VIII Transport, Storage and Communications.	Div. 7
IX Other Services	Div. 4 and 9

Tables B-I Parts A & B, B-II, B-III Parts A & B present the distribution of workers by these nine broad industrial categories of economic activity.

All other persons who did not do any productive work (or those who are engaged in some productive activity but that activity was not reported as main activity) irrespective of whether they derived some income such as through pension, rent etc. or did not derive any income were classified under category X Non-Workers. These Non-workers were further sub-classified as follows :—

1. Students
2. Persons engaged in unpaid household duties.
3. Dependents and infants.
4. Retired persons, rentiers and persons of independent means.
5. Beggars and Vagrants.
6. Inmates of penal, mental and charitable institutions.
7. Other non-workers.

Tables B-VIII and B-IX Parts A & B present the classification of non-workers.

Definitions of the various terms used under the different categories of workers and non-workers are given below :—

Worker Categories

Category I includes both the owner cultivators as well as tenant cultivators. Alongwith the workers personally doing work on land are also included persons who are engaged in supervision or direction of cultivation.

Definition of Cultivator:—For purposes of the Census a cultivator is one who is engaged in cultivation by one-self or by supervision or direction in one's capacity as owner or lessee of land held from private person(s) or institution(s) for consideration of payment in cash, kind or share.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millets, such as wheat, paddy, jowar, bajra, ragi etc. and pulses, raw jute and kindred fibre crops, cotton etc. and other crops such as sugar-cane, groundnut, tapioca etc. but does not include fruit-growing, vegetable-growing or keeping orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, is not considered to be working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share is also not considered as cultivator.

Category II includes all other persons working on land as labourers on wages without holding any right in the land, and can be considered as agricultural labourers.

Definition of an Agricultural Labourer:—A person who works in another person's land for wages in money, kind or share is considered as agricultural labourer. He has no risk in the cultivation but merely works in another person's land for wages. The labour could have no right of lease or contract on land on which he works.

Category III includes workers in Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

Category IV includes workers in mining and quarrying.

Category V(a) includes persons enaged in any household industry involving manufacturing, processing, servicing and repairs.

This category includes that main activity which involves some production, processing, servicing or repair of articles of goods, such as say, handloom weaving, dyeing, carpentry, 'bidi' rolling, pottery manufacture, bicycle repairing, tailoring etc. provided it is treated as a Household Industry.

Definition of a Household Industry:—Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

The main criterion of a Household Industry is the participation of one or more members of a household, the role of hired workers, if any, being secondary. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the household industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of the house it will not be considered a household industry. It should be located within the precincts of the house where the members live.

A household industry should relate to production processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include profession such as a pleader or doctor or barber, musician, dancer, waterman, 'dhobi', astrologer etc. or merely trade or business, even if such profession, trade or services are run at home by members of household.

Category V(b) includes persons engaged in ndustries involving manufacturing, processing, servicing and repairs but which are not falling within the category of a household industry.

This category includes all types of production, processing, servicing or repairing of goods, but does not include production or processing which may be classified as household industry.

Category VI includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs etc.

Category VII includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, money-lending, banking etc.

Category VIII includes workers engaged in transport activities by air, rail, road or water, and also in services incidental to transport such as packing, carting, loading, unloading etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephone, Wireless, Signalling, Information and Broadcasting are also included in this category.

Category IX includes (i) Public utility services like electricity or gas or water supply, sanitary services (ii) Central, State or Municipal employees (iii) Professional services (iv) Trade or labour associations, recreation services etc. and other workers not included in categories I to VIII above.

Non-Worker Categories

The definition of each of the category of non-workers is given below :—

Household Duties:—This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. If a person whose main activity is attending to household duties is also engaged in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc. that economic activity will be covered as secondary work. On the other hand, a woman who works primarily as a factory worker or a plantation labourer

or an agricultural labourer or in some office or shop etc. and also attends to household duties, obviously her main activity will be the economic activity in which she is engaged in and should not be categorised under this category.

Student:—This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending any school, college or any other educational institutions. Even if such persons participated in some work but not to the same extent as a full time work, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity.

Retired Person or a Rentier:—A person who has retired from services and is doing no other work i.e. not employed again in some full-time work or does not engage himself in other work as cultivation, in business, trade etc. or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category.

Dependents:—This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under household duties for her main activity rather than treated as a dependent. Dependents will include all non-workers even if able bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either.

Beggars and Vagrants:—This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

Institutions:—This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc. in such institutions. An undertrial prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he has apprehended.

Other non-workers:—This willh include all non-workers who may not come under any of the categories given above but are seeking work. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'Dependent' rather than "Other non-workers". A person irrespective of age, whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

Industrial and Occupational Classification:— The basic economic classification adopted in census is by the kind of industry in which the worker is engaged. Industry for a worker is the branch or sector of economy in which he performs his work. In other words, industry is the type of goods produced or services rendered by the employer's establishment. The concept of industry should not be confused with that of occupation. For a clerk working in a cement factory the industry is manufacturing of cement and the occupation is clerk. For a person working as a driver on a bank's vehicle, the industry is banking and the occupation is driver. Thus occupation is dependent on the nature of function or duties performed while industry relates to the kind of product(s) manufactured or service(s) rendered.

Thus the two concepts of 'industry' and 'occupation' have been used with specific meanings distinct from each other and tables have been prepared with very elaborate classification of the working population both by

industry and occupation. Tables B-IV Part A, B and D presented in this part of the volume show the distribution of workers by industry classified according to the National Industrial classification scheme. Tables B-V Parts A & B and B-VI Parts A and B classify the data on workers according to National occupational classification scheme.

In 1961 Census the Standard Industrial classification 1960, was made use of to classify the working population by industry. A statement showing the comparative chart of National Industrial classification and Standard Industrial classification 1960 adopted in 1961 census is reproduced as Annexure A to this note. This will be useful for analysis and comparison of a economic data between the two decennial Censuses.

Secondary Work:—In case a worker is engaged in two or more kinds of work, the one which consumed the largest portion of his time (not necessarily yielding the largest incomes was treated as is main activity, and the one consuming the second largest portion of his time was treated as his secondary work. The particulars of the secondary work was collected under Q. 17 which also covered. cases like persons who were basically performing household duties or students etc. for the purpose of their main activity, still participated in some other economic activity, but not to the extent as a full-time worker. Such participation was considered as secondary work of those persons.

Table B-VII presents statistics of main activity by secondary work in respect of workers and non-workers.

TABLE B-I PART A

WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

TABLE B-I PART-A

WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

FLY-LEAF

This is the basic economic table and it corresponds to Table B-I of 1961. It gives for the Union Territory of Goa, Daman & Diu and its three districts the Primary economic classification of the population. The entire population is distributed into broad classes of 'Workers' and 'Non-Workers'. Workers have been classified further into nine categories according to the sectors of economy in which they are engaged. These sectors relate to persons working—

I As cultivator;

II As Agicultural Labourer;

III In livestock, Forestry, Fishing, Hunting and Plantations, orchards and Allied activities;

IV In mining and Quarrying;

V In manufcturing, Processing, Servicing and Repairs (a) At Household Industry (b) Other than Household Industry.

VI In construction;

VII In Trade and Commerce;

VIII In Transport, Storage and Communications;

IX In other services.

Category X relates to non-workers. A break up of non-workers by sex,broad age-group and type of activity is given in Table B-VIII appearing in this Part of the volume.

A special feature of this table is the break up of each category of workers and non-workers into 8 age-groups viz; 0-14, 15-19, 20-24, 25-29, 30-39,40-49, 50-59, 60+ and Age not stated. In 1961 Census—only 4 age groups viz., 0-14, 15-34, 35-59, 60+ and age not stated were adopted. Spreading of the two age-groups of 15-34 and 35-59 will certainly enhance the utility of the data to researchers—undertaking different demographic studies.

The table is based on full count and the figures are given separately for total, rural and urban population.

TABLE B-I PART B

FEMALE WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY MARITAL STATUS AND AGE-GROUPS

TABLE B-I PART-B

FEMALE WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY MARITAL STATUS AND AGE-GROUPS.

FLY-LEAF

This table is an innovation of 1971-Census which presents data of female workers and non-workers according to the main activity classified by marital status and eight age-groups viz; 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and Age not stated. The data have been presented for the territory of Goa, Daman & Diu separately for total, rural and urban areas.

Figures on the marital status were compiled from the returns of Question 5 of the individual slip and have been shown under 4 heads viz; (i) Never married, (ii) Married, (iii) Widowed; and (iv) Divorced or separated. All females of age-group 0—9 were treated as never-married.

This table will be of great interest to the planners, particularly because of the increasing participation of female workers in the country's economy.

The table is based on full count.

WORKERS AND NON-WORKERS IN CITIES AND NON-CITY URBAN AREAS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

TABLE B-II

WORKERS AND NON-WORKERS IN CITIES AND NON-CITY URBAN AREAS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

FLY-LEAF

This table shows for each town/urban Agglomeration the distribution of workers classified by sex and broad age-groups. The material presented in this table is exactly similar to that of table B-I Part A and is in fact a further break-up of the data by age presented for urban areas of the districts in Table B-I Part A.

Towns/Urban Agglomerations are presented separately under the district in which they are situated and they are arranged according to their size of population along with their status. In respect of urban agglomerations, figures for each of the constituent units constituting the urban agglomeration are also presented. Panaji and Marga are the only two urban Agglomerations in the Goa District.

The local bodies (Municipal Councils)governing the urban units may find this table particularly useful as it furnishes the figures of employment in each town/urban Agglomeration under the different categories of workers of different age-groups.

The table is based on full count.

TABLE B-III

CLASSIFICATION OF WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY BY EDUCATIONAL LEVELS

TABLE B-III

CLASSIFICATION OF WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY BY EDUCATIONAL LEVELS.

FLY-LEAF

This is an important table which shows the distribution of persons in different industrial categories by their educational levels. Each of the nine categories of workers and also the non-workers have been cross-tabulated by educational levels.

This table is prepared in two parts. Part A relates to urban areas while Part B to rural areas only. In Part A, the range of information furnished by different educational levels is elaborate viz.;

(i) Primary.

(ii) Middle.

(iii) Matriculation or Higher Secondary.

(iv) Non-technical diploma or certificate not equal to degree.

(v) Technical diploma or certificate not equal to degree.

(vi) Graduate degree other than technical degree.

(vii) Post graduate degree other than technical degree.

(viii) Technical degree or diploma equal to degree or post graduate degree.

Engineering and Technology

Medicine

Agriculture, Veterinary and Dairying

Teaching

Others.

For Part B pertaining to rural areas where there is less diversification of the economy and occupations, the educational levels are confined to six categories only viz.;

(i) Primary;

(ii) Middle;

(iii) Matriculation or Higher Secondary;

(iv) Non-technical diploma or certificate not equal to degree;

(v) Technical diploma or certificate not equal to degree;

(vi) Graduate and above.

Persons who could read and write knowledgeably are treated as literates. Children of less than 5 years of age are automatically treated as illiterates.

Material in this table is presented separately for the territory and its three districts. This table which is prepared on full count corresponds to Table B-III of 1961 with slight changes.

Information given in this table should be of much use in assessment of educational qualifications of available man-power.

TABLE B-IV PART A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS

TABLE B-IV PART A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS

FLY-LEAF

This is one of the most important tables of the 1971. Census as it gives details of workers in the various sectors of economy. The table shows the distribution of workers other than Cultivators (category I) and Agricultural Labourers (category II) by Industry Divisions, Major Groups and Minor Groups according to the National Industrial Classification 1970 (N.I.C. 1970).

Break up for Industry Divisions (one digit), major Groups (two digits) and minor groups (three digits) is shown by vertical spread under column 1. After the total for All Industry Divisions, the entries start with Division 'O' Major Group '00' followed with its Minor Groups. Then Major Group '01' and its minor groups and so on. Then Industry Division '1' with major groups, then Industry Division '2 & 3' and so on.

For each Industry Division, Major Group and Minor Group the table shows the total number of workers engaged, males and females separately for total and urban areas. The figures for rural areas can be derived from the figures for total and urban. The table is prepared on full count and presented down to the district level.

The National Industrial Classification 1970 which has been adopted for classification of Industries in the 1971-Census is reproduced at the end of the fly-leaf. It consists of 10 Divisions, 66 Major Groups and 385 Minor-Groups. For the purpose of this table seven minor groups (000 to 006) have been wholly excluded. These groups relate to workers in cultivation, which are covered under categories I & II and do not figure in this table.

This table is supplemented with an Appendix which gives information relating to workers engaged in manufacturing, Processing, Repairs (Division 2 & 3). The workers are further classified by Household Industry, and Non-household Industry, separately for 'All Areas' and urban Areas.

TABLE B-IV PART B

INDUSTRIAL CLASSIFICATION OF WORKERS IN MANUFACTURING, PROCESSING, SERVICING AND REPAIRS ON HOUSEHOLD INDUSTRY BASIS AS MAIN ACTIVITIY BY SEX AND CLASS OF WORKERS.

FLY LEAF

This table provides the break up of workers in Household Industry by sex, into different Industrial Major Groups of Division 2 and 3 of the National Industrial classification 1970 adopted in 1971-Census. The workers are further classified by class of workers *i.e.* Employers and single workers. Figures are presented for the total, rural and urban population.

A 'Household Industry' is defined as an industry conducted by the Head of the household himself herself and/or mainly by the members of the household at home or within the village in rural areas, and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

The Household industry had been given special congnizance for the first time in 1961 Census, in view of the significant role it played in the economy of the country. The earlier census of this territory was taken by the Portuguese Government. Data were not collected for Household Industry and therefore no figures for Household Industry were available, for Goa, Daman & Diu. It is for the first time in 1971 Census this data have been collected and compiled.

In view of the fact that the Household Industry is mainly carried on a household basis by members of the household participating in it, the employment status of workers as a family worker is not important. The workers are therefore classified for two classes of workers, namely employees and single workers. The number of family workers can be derived from the table itself by subtraction.

TABLE B-IV PART C

CLASSIFICATION OF WORKERS IN NON-HOUSEHOLD INDUSTRY TRADE, BUSINESS, PROFESSION OR SERVICE AS MAIN ACTIVITY BY CLASS OF WORKERS, AGE AND SEX

FLY-LEAF

This table gives age composition of each class of workers engaged in activities in non-household industries, trade, business, profession or services (categories III, IV, V(b) and VI to IX of the N.I.C. 1970). Figures have been given separately for each sex for total and urban population. While the total population is given in columns 4, 5 and 6, the numbers of working males and females are given in columns 7 and 8. Break up into status or class of worker is given in columns 9 to 16. The status or class of worker was defined as follows :

(i) an Employer, is one who hires one or more persons in his work.

(ii) an Employee is one who does his work under others for wages or salary in cash or kind.

(iii) a single worker is one who is doing his work without employing others except casually, and without the help of other members of the family except casually and a participant in work as members of co-operatives.

(iv) a family worker is one who is doing his work in a family enterprise alongwith other members of the family without wages or salary in cash or kind.

This table is an innovation of the 1971-Census and is based on full count.

TABLE B-V PART A

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION

TABLE B-V PART A

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION

FLY-LEAF

This table corresponds to Table B-V of 1961. In this table the economic data have been tabulated separately under 'Industrial' and 'Occupational' classification in respect of workers other than those engaged in cultivation. The term 'Industry' denotes the sector of economic activity, in which the worker is engaged; while occupation connotes the exact function or work that an individual performs in that sector.

The occupational distribution of workers is given according to the three digit code structure of National Classification of Occupations (N.C.O.) According to this code structure all occupations are classified into 8 Occupational Divisions (one-digit code numbers), 95 occupational Groups (two-digit code numbers) and 463 occupational Families (three-digit code numbers). The N.C.O. code structure which gives the description of each Division, group and family is reproduced below for ready reference.

Occupation data presented in this table is cross-classified with the following broad industrial categories of workers.

Category III—Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

Category IV—Mining and Quarrying.

Category V(a)—Household Industry.

Category V(b)—Manufacturing other than Household Industry.

Category VI—Construction.

Category VII—Trade and Commerce.

Category VIII—Transport, Storage & Communications.

Category IX—Other Services.

Categories I and II which relate to cultivators and Agricultural Labourers respectively are excluded from this table as it covers workers other than in cultivation.

Data are presented for 'Persons' 'Males' and 'Females' separately for Total and Urban areas. Figures for rural areas could be had by substracting the figures of urban areas from the 'Total' figures.

The table is prepared on full count and is given for Goa, Daman & Diu only.

TABLE B VI

OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION CLASSIFIED BY SEX

TABLE B-VI

OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION CLASSIFIED BY SEX

FLY-LEAF

This table will have two main parts viz; Part A and Part B. Each part is further divided into two sub-parts viz, Part A(i) and A(ii) which will furnish data for urban areas only while part B(i) and B(ii) will furnish data for rural areas.

B-VI part A(i) gives the occupational classification of workers in non-agricultural activities by sex and broad age-groups viz., 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+, and Age not stated. The occupational distribution of workers is given according to each occupational Division and occupational Group of N.C.O.

B-VI Part A(ii) which is also prepared for urban areas gives the occupational distribution of workers who are engaged in non-agricultural occupations by Division and Groups of N.C.O. The workers under each occupational Division and Group are further classified according to different educational levels viz;

(i) Primary,

(ii) Middle,

(iii) Matriculation or Higher Secondary,

(iv) Non-technical diploma or certificate not equal to degree,

(v) Technical diploma or certificate not equal to degree,

(vi) Graduate degree other than technical degree,

(vii) Post Graduate degree other than technical degree,

(viii) Professional degree or diploma equal to degree or post graduate degree,

Engineering and Technology

Medicine

Agricultural,Veterinary or Dairying

Teaching

Others.

The classification by different educational levels in the table is based on the return in Question 13 of the individual slip which indicates the educational level actually attained by the worker. This table gives useful information about those occupations which attract educated personnel.

In 1961 Census the above information was furnished in one table, but the data was presented only at occupational Division level.

The tables B-VI Part B(i) and B(ii) are the new additions and relate to rural areas only. These tables are similar to Table B-VI Part A(i) and A(ii) except that in Table B-VI Part B(ii) the educational levels adopted are limited viz. :

(i) Primary

(ii) Middle

(iii) Matriculation or Higher Secondary and

(iv) Graduate and above.

The tables are prepared on full count and data in these tables are presented for Goa, Daman & Diu and its three districts.

It is prepared for the persons whose main activity is returned as cultivators, agricultural labourers or working at household industry or non-household industry, trade, business or service and whose secondary work is any of these categories. This table is supplemented by an Appendix which gives detailed distribution of persons under Division 2 and 3 whose secondary work is a non-household industry classified by two digit code of N. I. Details of persons whose main activity is a housewife or a student but who also participate in some work as a secondary work are also shown in this appendix. Here also the figures are given for total/rural/urban.

PART II-D

MIGRATION TABLES

INTRODUCTORY NOTE TO MIGRATION TABLES

General :

Migration is an important factor in the study of social, economic and demographic trends of population. It brings to light the fresh avenues of employment which attract persons to particular areas. Besides, it is also useful in distinguishing the two factors which are mainly responsible in the growth of population of a particular state/union territory—natural increase and geographical shift in population.

The union territory of Goa, Daman, and Diu was liberated on 19th December, 61 from the erstwhile portuguese regime. Since the liberation of this territory, a heavy influx of population to this area from different parts of the country has taken place. This had helped to increase abnormally the growth rate of population during the last decade.

Although the tables on migration presented in this part of the volume do not give any material on the causes of migration, yet the same can be estimated from the study of classification of migrant population by sex, marital status, age, duration of residence and economic activity.

In the censuses prior to 1961, a question on birth-place was only asked which ascertained the district of the place of birth and the data presented related to the number of migrants by sex break-up. These did not furnish information on other essential demographic and economic characteristics of the migrant population, nor did they reflect the intra-district movements or movements from rural to urban areas and the vice versa. It was only in 1961, that a significant departure was made in the instructions for recording birth place so that the lowest unit, which applied to the non-migrant population, was the village or town of enumeration. This had helped to know the intra-district movement of population. Besides, the classification of birth place into rural and urban enabled an assessment of the trends of migration between rural and urban areas.

In 1971 Census the scope of the inquiry on migration was considerably widened by introducing altogether a separate question on the place of last residence prior to coming to the place of enumeration. This had helped to get a correct picture on migration which got inflated artificially in earlier censuses.

Concept of Migration.—Upto the 1961 Census, migration was determined solely by the concept of place of birth. Thus, if a person was born at a place other than the place of enumeration he would figure as a migrant in census returns whatever be the cause of his movement to the place of enumeration or period of residence there. On the other hand, a person wandering all over the world ever since birth would not be considered as migrant only for the fact that during the period of enumeration, he was found to have returned to the place of his birth. This data on migration had its own limitations since migration in some cases would be artificially inflated and re-migration to places of birth would be concealed. This anomaly, was however removed whilst collecting data on migration in 1971-Census by using the concept of last place of residence.

Census questionnaire on migration :

At the time of last census which was conducted by the Portuguese Govt. in December, 1960, the following questions were asked to each individual :

Q. 3. Place where he resided during the major part of year.

Q. 4. Place where he resided on 15th December 1960, the reference date of 1960-Census.

Q. 16. What was his nationality.

Q. 18. name of the taluka he was born, in case the was born in national territory or the country of his birth in case he was born onside national territory.

Q. 19. Name of the birth country, in case of a foreigner and name of the taluka in case the foreigner was born in Portuguese territory.

Q. 20. Whether his parents were the natives of this state.

Q. 21. Whether his paternal grand-fathers were the natives of this state.

Q. 22. Whether his maternal grand-fathers were the natives of this state.

Q. 23. How long he was in this state, in case he was a foreigner.

The data collected through above questions was recast on the lines of Indian Census data of 1961 and migration tables were presented. However, for want of specific information particularly regarding the duration of residence at the place of enumeration, all the tables could not be presented for Goa, Daman & Diu.

The individual slip which was canvassed at the 1971 Census contained the following questions to elicit migration data.

Q. 7. (a) Place of birth
(b) Rural/Urban
(c) District
(d) State/Country

Q. 8. (a) Place of last residence
(b) Rural/Urban
(c) District
(d) State/Country

Q. 9. Duration of Residence at the village or town of enumeration.

The instructions to the enumerators in the mode of recording answers to the above special questions on migration was well as on the general questions on economic activity etc. can be had by referring to Part II-A of 1971 Census publications.

The only new question added in 1971 was relating to the place of last residence which had to be filled in in respect of every person if he had another place of normal residence irrespective of his place of birth before he came to the present place where he was enumerated. Even if a person were born at the place of enumeration, by the nature of his work or for studies etc. he might have shifted subsequently to another village or town and have come back again to the place of enumeration, he should be deemed to have had another place of residence prior to his enumeration at the place of birth.

The last residence was relevant only if a person had been outside the village or town of enumeration. Where a person had merely gone out to another place or had been shifting from place to place purely on tour or pilgrimage or for temporary business purposes, he was not deemed to have had another residence different from the place where he or his family normally resided.

For a person who had previously resided outside the place of enumeration, its rural or urban status was ascertained. In case the place happened to be outside the state of enumeration, the name of the district and the state was written. For a person whose last residence was outside the country the name of that country was ascertained in that case.

Kinds of Migration Tables :

According to the tabulation plan for the 1971-Census, there are in all 6 tables on migration which are listed below :

Table D-I Population classified by place of birth.

Table D-II Migrants classified by place of last residence and duration of residence in place of enumeration.

Table D-III Migrants to cities classified by sex, broad age-groups, educational level & in case of workers by occupational divisions.

Table D-IV Population of cities classified by place of last residence and duration of residence.

Table D-V. Workers and non-workers according to main activity classified by place of last residence.

Table D-VI. Migrants classified by place of last residence, age-groups, duration of residence and marital status.

Tables D-III and D-IV are to be presented for towns & cities with a population of 1 lakh and above. Since no town of Goa, Daman & Diu is classified as a city with population of 1 lakh and above, these two tables are not prepared. Figures in the remaining tables *viz;* D-I, D-II, D-V and D-VI have been presented for the union territory and its three districts. The mode of presentation, layout and special features of each table have been explained in the fly-leaf preceding the table. These fly-leaves are not, however, intended to present analysis or review of the material presented for which part I-A of the Census Report exclusively reserved.

Limitations of data collected.—Migration covered all types of movements - temporary, seasonal, long-term or permanent resulting from social, economic and other factors such as education, marriage, employment etc.

Like 1961 census, the enumeration was done on the basis of normal residence of a person. But a person who was out of their normal residence throughout the enumeration period (10th to 31st March, 1971) was not enumerated at the place of his normal residence and was instead enumerated at a place where he was found during that period. He would figure as a migrant in the census return, through actually he was not.

Another type of migration results from the local custom of married daughters usually returning to their parents for the first confinement. The child even when enumerated at its normal residence is considered as a migrant since its last place of residence becomes different to that of normal residence.

All the tables in this part of the volume present material only for immigrants in the territory and its 3 districts. It has not been possible to collect information about the persons who went out of the country. The reader will do well to keep the above limitations in mind while interpreting the data on migration.

TABLE D-1

POPULATION CLASSIFIED BY PLACE OF BIRTH

TABLE D-I

POPULATION CLASSIFIED BY PLACE OF BIRTH

FLY-LEAF

This table gives the distribution of population by birth place further cross-classified by rural, urban & unclassifiable (where the rural or urban character of the birth place is not ascertainable) in the case of persons born in India.

Data are presented separately for total, rural and urban areas for Goa, Daman & Diu and its 3 districts.

The place of birth has been broadly classified in column 1 of the table under the following groups :

A : Born in India
B : Born in countries in Asia beyond India (incl. U.S.S.R.)

D : Born in countries in Africa.
E : Born in countries in two Americas
F : Born in countries in Oceania
G : Unclassifiable.

Under Group A, there are two sub-groups, *viz;* I-Born within the state of Enumeration and II-Born in a state in India beyond the state of enumeration. The sub-group I is further divided into 3 sub-headings *viz*; (a). Born in place of enumeration, (b) Born elsewhere in the district of enumeration and (c) Born in other districts of the state.

Under Groups B, C, D, E and F, the following countries of each continent have been presented. The total of the remaining countries is given against elsewhere in the table

B. Countries in Asia beyond India (incl. U.S.S.R.)
1. Afghanistan
2. Burma
3. Ceylon
4. China
5. Nepal
6. Pakistan

G. Un-classifiable

In this table, the place of birth is Classified by rural and urban areas for those individuals whose birth place happened to be within the country. Similarly the place of enumeration is also classified separately by rural and urban area. This gives an indication of the rural/urban migration based on the place of birth.

This table corresponds to Table D-II of 1961-Census.

TABLE D-II

MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

TABLE D-II

MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE & DURATION OF RESIDENCE IN PLACE OF ENUMERATION.

FLY-LEAF

This table give the distribution of migrants by place of last residence classified by rural, urban and unclassifiable in the case of persons whose last residences are elsewhere in India. This data is further cross-classified by duration of residence in the place of enumeration under six categories viz;

Less than 1 year

1 to 4 years

5 to 9 years

10 to 19 years

20 + years

Period not stated.

Data are presented separately for rural and urban areas for Goa, Daman & Diu and its 3 districts.

The last place of residence has been broadly classified under the following groups.

A. Elsewhere in India

B. Countries in Asia beyond India(including U.S.S.R.)

C. Countries in Europe (excl. U.S.S.R.)

D. Countries in Africa

E. Countries in two Americas

F. Countries in Oceania

G. Unclassifiable

Further classification of places of last residence under different sub-headings is made in the same manner as in Table D-I.

Figures in this table have been compiled from the answers to Questions 8(a), 8(b), 8(c), 8(d) and 9 of the individual slip.

This table corresponds to Table D-III of 1961 Census which was prepared with reference to the place of birth as against place of last residence in 1971-Census. The categories of the duration of residence have been slightly changed in 1971-Census.

The table is also provided with an appendix relating to migrants by state of last residence and age for duration of residence of 0-9 years by sex.

This table will yield valuable data on the short term migration specially on rural/urban migration which has taken place as a result of the country's developmental planning.

TABLE D-V

MIGRANT WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITIES CLASSIFIED BY PLACE OF LAST RESIDENCE

TABLE D-V

MIGRANT WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITIES CLASSIFIED BY PLACE OF LAST RESIDENCE

FLY-LEAF

This table gives the distribution of population by last residence rural, urban and unclassifiable (where rural/urban is unclassifiable) in the case of persons with last residence in India, cross classified by workers and non-workers. Workers are further classified into nine categories of economic activity *viz;*

I As cultivator

II As Agricultural Labourers

III In livestock, Forestry, Fisbing, Hunting and Plantations, Orchards and Allied activities.

IV In Mining and Quarrying.

V Inmanufacturing, Processing, Servicing and Repairs (a) At Household Industry
(b) Other than Household Industry.

VI In construction

VII In trade and commerce

VIII In Transport, Storage and communications.

IX In other services.

The table is presented down to district for total and urban population.

The last residence under column 1 has been classified in the same manner as in Table D-II.

This table corresponds to Table D-VI in 1961 Census which was prepared with reference to the birth place instead of the place of last residence which is adopted at the 1971 Census. This change is considered to be more relevat for studying migration.

This table will give very useful information indicating the industrial categories attracting migrants and whether in a particular catagories flow of migrants is from the rural to urban or vice-versa.

MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE, AGE-GROUP, DURATION OF RESIDENCE AND MARITAL STATUS

TABLE D-VI

MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE, AGE-GROUP, DURATION OF RESIDENCE AND MARITAL STATUS

FLY-LEAF

This table is an innovation of 1971 Census. It gives the distribution of migrants by place of last residence cross classified by age-groups 0-14, 15-19, 20-24, 25-49, 50+ and marital status. The data is further cross classified for each sex within the age-group by duration of residence in the place of enumeration under 3 categories viz;

Less than 1 year

1–9 years

10 years and above.

Data are presented separately for rural and urban areas, for Goa, Daman and Diu and its 3 districts.

The place of last residence has been broadly classified in column 1 of the table under 2 groups.

A : Last Residence in India

B : Last Residence outside India.

Under Group A, there are two sub-groups, viz; I-last residence within the state of enumeration but outside the place of enumeration and II-last residence in states of India beyond the state of enumeration. The subgroup I is further divided under 2 sub-headings, viz. last residence (a) elsewhere in the district of enumeration and (b) in other district of state of enumeration.

Tde table gives a very useful information and reflects an important sociological factor viz; Marital Status of migrants by age.
