CHAMPANER FORT

Champaner is an ancient fort located at the foothills of Pavagadh. The name is said to have come from Champraj, who founded the city during the reign of Vanraj of Anhilwad. At Champaner, one can see three fortifications – the base (Champaner), the top (Pavagadh) and the area connecting both of them (Manchi).

Mahmud Begda transferred his capital to the Champaner. Great buildings were erected and the fort wall was built around the city. He constructed the citadel or Rajgadh inside the city. It is about 4000 ft. long and 840 ft. broad with a 30 ft. high wall around it. Its gates are exquisitely carved. Other interesting places are Amir Manzil, Jami Masjid, Khapara Zaveri Palace, Kalika Temple, a shrine of Muslim saint Sadunshah, Lakulish temple, Chhashia Talav and some beautiful sculptures depicting various forms of Shiva Dakshinamurti, Ardhnarishvara and Kalyanasundaramurti.

Annexure – I : Number of Villages under each Gram Panchayat

Annexure – II : Fertility and Mortality, 1991 Census

Annexure – III : Various measures of Fertility and Mean age at Marriage, 1991 Census

Annexure – IV : Percentage distribution of Migrants by Place of Birth/ Place of Last Residence, 2001 Census

Annexure – V : Brief Account of Main Religions in the District/ Taluka as per 1991-2001 Censuses

Annexure - VI : Marital Status of Population as per 2001 Census

Annexure - VII : Age, Sex and Education in the District, 2001 Census

Annexure - VIII : Distribution of different Mother Tongues returned in 2001 Census

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census of DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (C.D.Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluka/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged

by including details on all slums in instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of **Shri Jayant Parimal**, Director of Census Operations, Gujarat. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi
Dated : 17.10.2006.

Registrar General &
Census Commissioner, India

Preface

Census is being conducted in the country every ten years as per the programme laid down by the Government of India. In these day and age of information technology, an individual has access to a variety of information covering a Kaleidoscope of interest and fields. Availability of relevant information is very vital for planners, policy makers and researchers.

The Five Year Plans have come to stay in the country and whatever development is achieved as a result of implementation of planning from the bottom level such as development of infrastructure facilities as well as basic amenities, etc. is reflected in the District Census Handbooks and they give to the readers a searching eye whether the development over the years in villages/talukas/districts is lopsided or upto the mark. This is the basic requirement of this type publications and an attempt has been made to show whether the census handbooks reasonably fulfill these aspirations/requirements.

These district Handbooks are thus useful to planners in planning from bottom as well as to administrators, researchers, educational institutions including universities and other socio-economic research centres as well as students conducting research in demography, social and economic studies as well as to the local bodies like Panchayats, Municipalities and Municipal Corporation etc.

District Census Handbook of Gujarat is a joint venture of the Government of Gujarat and the census organization of the Government of India. In the preparation of the DCHB, the role played by the census organisation is that of Census data collection, scanning of collected information, analysis of PCA. DCHB Unit of the State Government collected the basic non-census iniformation on availability of amenities relating to infrastructure in the villages of the district presented in the part A of this book. The cost of this publication is borned by the State Government. In accomplishing this task we had the ready and whole hearted co-operation of the staff at various levels of different department of the State Government. Most of the data supplied by the various departments have been cross-checked and an attempt has been made to reconcile the discrepancies as well.

I express my deep gratitude to the officers of Gujarat Government particularly Shri P.K.Laheri, Chief Secretary of Gujarat State, Smt. Netraben Shenoy, Additional Chief Secretary of General Administration Department (Planning), Shri George Joseph, Principal Secretary, General Administration Department (Personnel), Shri K.R.Vasava, Deputy Secretary, Kum.P.S. Mevada, Under Secretary and Shri P.D.Kulkarni, Section Officer of General Administration Department, Planning, Shri S.D.Mehta,Deputy Secretary and Shri I.M.Sheikh, Under Secretary, Shri Bipin Patel, Section Officer and Shri P.N.Christian, Deputy Section Officer of G.A.D. (Kh-3) for their valuable help and co-operation in fulfilling all administrative requirement in time for bringing out this publication. I am also thankful to Shri P.M. Patel, Director, Economics and Statistics helped this organisation not only by placing the competent personnel on disposal of census services on deputation but also provided valuable official statistics for this publication.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff members extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for this District Census Handbook.

I am deeply grateful to Shri J.K. Banthia, I.A.S., the Ex-Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri R.G. Mitra, Deputy Registrar General(C&T) Shri C. Chakravorty, Joint Director, Shri I.C. Agrawal,Senior

Research Officer(SS), Shri S.L. Jain, Deputy Director(SS), Shri R.K. Mehta, Assistant Director(SS), Shri R.P. Singh, Dy. Registrar General(Map), Shri Himakar, Addl. Director (EDP) and Shri Anil Kumar Arora, Deputy Director (EDP) for providing technical guidance in finalising this publication.I am extremely thankful to Shri D. K. Sikri, IAS, Registar General & Census Commissioner, India for his valuable guidance in finalizing of this publication.

Shri Jayant Parimal, I.A.S. who held the office of Director of Census Operations, Gujarat, had guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the able direction and guidance of Shri Parimal.Our sincere and grateful thanks for all the projects of census to him.

In state office Smt. B.B. Chauhan, Deputy Director, District Census Handbook Unit, Kum.S.B.Dabhi, Assistant Director, Shri S.B. Dalvi, Deputy Section Officer of District Census Handbook Unit, and their team of able assistants meticulously collected and scrutinized the non-census data from various sources and prepared draft of DCHB etc. with the help of Census section. The other officials of D.C.H.B. Unit, who scrutinised, edited and supervised the work of D.C.H.B. have been mentioned in the "Acknowledgement". The maps provided in the D.C.H.B. are prepared by the Map Section of the Census Directorate under the supervison of Shri J.P. Purohit, R.O(Map). I am thankful to all of them.I am thankful to the census section of the Directorate for scrutinizing the PCA data, specially Shri J.N.Pithadia, Investigator Grade-I and Kum.N.V.Shah, Investigator Grade-III who provided assistance to me in finalizing P.C.A. data at every stage. Smt. J.R.Sanghani, Investigator Grade-III of this Directorate assisted me for final scrutiny of D.C.H.B., I am thankful to her.

Lastly, I am thankful to the Government of Gujarat for having agreed readily to bear the cost of publication of the District Census Handbook volumes and for the special efforts of Shri R.B. Raval, Director, Printing and Stationary and his colleagues to print out the publcation in a very nice fashion.

	Females	2,044,397	30.2	57,519	13.7

Note : 1 village is fully covered as out growths (OGs) and therefore not included under the item, "Number of villages".

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometer (1,000 per square mile).

Note : *These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

ANALYTICAL NOTE

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook:

Before the 1951 Census, the Census figures were published in a booklet known as 'Village Hand-book', which contained only villagewise population figures. These books were prepared and published by the Directorate of Census Operations of the State.

The Directorates introduced the District Census Handbook for the first time in 1951 Census. It comprised the villagewise primary census abstract figures and information on available amenities. It also contained several tables relating to the district. It varied in content and size from State to State depending upon the resources offered by the respective State Governments.

In 1961 Census, an uniform pattern of District Census Handbook was adopted throughout the country. The Directorate of Census and the State Government jointly executed the project. In addition to the English version, it was published for the first time in Gujarati language also. The District Census Handbook 1961 was published in three parts viz. Part I, Part II and Part III. Part I related to Introductory Note i.e. general and economic information for the district and a brief gazetteer of place names. Part II pertained to census tables, villagewise list of industrial establishments, tables on handicrafts and departmental statistics. Part III consisted of village directory covering the amenities and primary census abstract data combined in one statement. It also covered district and taluka maps.

It is worthwhile here to note that the State Government has created a separate unit for preparing and publishing The District Census Handbook from 1971 Census onwards. In the 1971 Census, the contents of District Census Handbook were modified. In the preceding censuses the data on amenities and primary census abstract were covered in one statement whereas in 1971 Census, the data on amenities and primary census abstract were separated into two different parts. Thus, the coverage of amenities data was extended and the land use data were introduced for the first time since 1971 District Census Handbook. Moreover, a separate portion known as 'Town Directory' was also incorporated for the first time in the District Census Handbook. The 1971 District Census Handbooks were published in three parts viz. Part A, Part B and Part C. Part A contained the village and town directory. Part B contained village and townwise primary census abstract data and Part C contained official statistics, besides full count census tables, urban census tables and analytical report on census and related statistics socio-economic and cultural tables (Rural areas) and housing tables. Part A and Part B were combined and published in one volume.

The District Census Handbook –1981 was brought out in two parts, Part-A and Part-B. Part-A contained the village and town directory whereas Part-B included the primary census abstract data for both General population and Scheduled Castes/Scheduled Tribes. Both parts were published in one volume. Part C brought out for 1971 Census was dropped in 1981 Census. However, official statistics and some portion of analytical notes of part C of 1971 Census were included in the 1981 District Census Handbook also. For the 1991 Census, the District Census Handbooks were prepared more or less on the same lines of the preceding Census of 1961. In 2001, the scope of both Part A & Part B has been enlarged by giving several additional information due to possession of large scale computerization.

The District Census Handbook has been prepared after scanning and processing of data collected through House list Schedule and Household Schedule. Several innovations have been introduced mostly at all the stages of the Census of India, 2001, right from the preparatory efforts of data processing to data dissemination of stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing

and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Number (PLCN) has been adopted by assigning a population number to each village within the State/UT a continuous series from I to N. Each village has been assigned an eight-digit code. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001 are adopted in future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.At the 2001 census age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census,the type of educational institution attended by a person was enlarged to include school, college, vocational institute, other and literacy center. The scope of the definition of 'work' was expanded in the Census of India, 2001, this includes production of milk for domestic consumption. In the 1991 Census, cultivator of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in this Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above-mentioned crops for domestic consumption has been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel nuts have been classified under 'Plantation' in the Census of India 2001.

- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India 2001, this question is asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census was dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on reason for migration to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census is covered under category of 'Other'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census:-

- A question on total disability was canvassed in the 1981 Census but in 1991 Census there was no provision for question on disability. At the present Census of 2001, a question to elicit information on total or partial disability was canvassed. The five types of disabilities on which information was collected are - in seeing, in hearing, in speech, in movement and for mentally disorderness.
- A new question on 'Travel to place of work' is canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work was collected under this question.

The mode of presentation of DCHB in 2001 will by and large be same as that of 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexure II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 has also been included in DCHB.

(ii) Brief History of the District:

The district is called Panch Mahals because it originally consisted of 5 mahals viz. Godhra, Kalol, Halol, Dahod and Jhalod. During the Scindia's regime, the district was called Pavagadh Panch Mahals because the Pavagadh was the headquarters of Scindia's Suba who administered the mahals from 1761 A.D. to 1853 A.D. The medieval history of the Panch Mahals mostly centres round the town of Champaner and Pavagadh hill. In a copper plate inscription of Shiladitya V of Valabhi dated 404-441 Samvat, 348-385 A.D., reference is made to the camp of victory fixed at Godhra. Champaner, the well known ancient town in this district, was the capital of kingdom during the Chalukya period. It lies at the foot of Pavagadh hill in the south-west of this district. Champaner is said to have been founded in the Seventh century (647 A.D.) in the reign of Vanraj, the first ruler of Anhilvada. In the end of thirteenth century (1297 A.D.) the Chohans, retreating from Khichivada before the Musalmans under Ala-Ud-Din Khilji became lords of the country. Their sway lasted till the conquest of Champaner by Mahmud Begada in 1484 A.D. The author of Mirat-I-Sikandri (1611 A.D.) is eloquent in praise of fruits of the region viz. mangoes the best in the kingdom and sandalwood so plentiful as to be used in house building. Under the Moghul Emperors (1573-1727 A.D.) Godhra became the district headquarters. In the seventeenth century it was termed as a hunting ground for wild elephants in the forests of Dohad and Champaner.

In 1727, Krishnaji, foster son of Kaniaji Kadam Bande attacked Champaner, levied a regular tribute and seems to have held the country till about the middle of the century, when Chyampaner was seized and the Panch Mahals was taken by the British in 1803. The Citadel of Pavagadh was restored to Scindia in the next year (1804) and remained in his hands till 1853. In 1877, Panch Mahals Collectorate was set up and political charge of Rewa Kantha States was given to it. As a measure of economy, the Panch Mahals district was amalgamated with the Broach district in November, 1933. In 1945, Panch Mahals was restored to its original status of the Collectorate. The district was interspersed with States and Estates like Lunawada, Devgadh Baria, Jambughoda, Santrampur and Sanjeli. After Independence, Sardar Patel initiated a movement for integration of princely States, with the result that the jurisdictional and non jurisdictional States as mentioned above were merged in the district in 1948-49 A.D.

In November 1956, the States were reorganized and the bigger bilingual state of Bombay was formed with Vidarbha, Marathawada, Saurashtra and Kachchh regions and Panch Mahals district became a part of the bigger bilingual state. Lastly, the Bombay state was bifurcated on 1st May 1960 and separate states Gujarat and Maharashtra were formed. Since that date, the Panch Mahals district became a part of the Gujarat State. At the time of reorganisation and reconstitution of the districts and talukas of the state, Panch Mahals originally having 11 talukas has been divided into two districts viz. Panch Mahals and Dohad. The boundaries of the Panch Mahals have been changed from 2-10-1997. The district headquarter of the new Panch Mahals district has been kept at Godhra while that of Dohad district has been kept at Dohad. After reconstitution and subsequent bifurcations, the new Panch Mahals district is comprised of 11 talukas namely, Khanpur, Kadana, Santrampur, Lunawada , Shehera, Morwa (Hadaf), Godhra, Kalol, Ghoghamba, Halol and Jambughoda.

(iii) Administrative Set-up :

With a view to run the administration of the State smoothly, it has been divided into Districts, which in turn have been further sub-divided into Talukas (Tahsils). In the State of Gujarat, the community development blocks are co-terminus with the Talukas. The Talukas contain large number of villages and possibly several towns. The villages have Village Panchayats to run the local administration. A Village Panchayat may constitute of one revenue village, several revenue villages or a part of a large village. Similarly, the Towns have Municipality or Municipal Corporation as the seat of local self-government.

In the State of Gujarat, as on December 1999 there were 25 districts and 226* Talukas, against 19 districts and 184 Talukas in 1991 Census. In 1997 by

* Vagdod taluka merged in the Patan taluka of the Patan district on 3rd July 2001.

several notification (s), Government of Gujarat reconstituted some districts and talukas of the State. Several changes as described below were also made in Panch Mahals district. The present Panch Mahals district is bifurcated from old Panch Mahals district and new Dohad district is created from it by separating talukas vide the Government Notification No. GHM-97-85-M-PFR-1097-L dated 24-9-1997. By Notification No.GHM-97-120-M-PFR-2397-2593-L dated 15-10-1997 new taluka of Khanpur was created from Lunawada taluka of the same district. By Notification No. GHM-97-120-M-PFR-2397-2593-L dated 15-10-1997 Morwa(Hadaf) taluka was created by separating it from Godhara taluka.

The District Collector looks after the general administration, maintenance of collection of land revenue and settlement of law related disputes, civil supplies, district planning, mid-day meal scheme, etc at the district level. At the Taluka level, Mamlatdar looks after the land development and revenue collection and law and order. The functions of administration of law and order and control and investigation of crime are done by the Superintendent of Police of the district with the help of Police Stations working under him. For the purpose of maintaining law and order there are 16 police stations, 25 police chowkies and 11 out-posts as per statement below.

Police Stations in the District

Sl. No.	Particulars	1997	1998	1999

3.	Out post	24	25	11

Source: Director General of Police, Gandhinagar, 2000

The Panchayati Raj institutions are fairly strong and most of the development works have been transferred to the District Panchayats and its subordinate bodies. The District Panchayat has an elected President and District Development Officer appointed by the Government, works as its Secretary, who looks after day-to-day work related to the development. Similarly, at the Taluka level, Taluka Panchayats have been constituted which have an elected President. The Taluka Development Officer, placed by the Government as Secretary of the Taluka Panchayats and he conducts the regular administrative work. Like wise, an elected President heads the Municipality and the Chief Officer works as the Secretary of the Municipality, who looks after the day-to-day work. In case of the large cities, the State Government has constituted Municipal Corporation, which are headed by an elected Mayor and the Municipal Commissioner, appointed by the Government, looks after the routine work. At the Village level, the Sarpanch is the elected Chief and the Talati (Village Mantri) works as the Secretary to the Village Panchayat and looks after the day-to-day work. In view of the expanding role of the public administration in a state like Gujarat, the Government has taken-up many activities and has set up several offices. Such offices which came into the existence are as under:

(1) Education
(Primary and Higher Education)
(2) Agricultural and Research
(3) Animal Husbandry and Poultry
(4) Forest and Environment
(5) Roads and Building, Bridges
(6) Co-operation and Co-operative Societies
(7) Industries, Small and Large as well as Cottage
(8) Health and Medical Services, Medical Education and Research, Family Welfare and Nutrition
(9) Information Department,
(10) Irrigation Minor and Major
(11) Social Welfare and Social Defence

The functions of above offices are managed and controlled by concerned Head of Departments and in some cases also by District and Taluka Panchayats. The task of primary education in rural areas has been entrusted to District Panchayats. The functions relating to Government of providing primary education is assigned to District Primary Education Officer of District Panchayat who works under District Development Officer. The secondary education is looked after by District Education Officer of

Education Department. Primary education as well as higher secondary education of all types is governed by District Education Officer.

Agricultural activities have been delegated to District Panchayat to a large extent and District Agriculture Officer is in-charge of looking after agricultural produce including crops and vegetables. Similarly Animal Husbandry is also a Panchayat activity and routine work is controlled by the Deputy Director (Animal Husbandry) who sits in District Panchayat taking care of animals and poultry farms. Besides, district agriculture office in Panchayat Offices such as Deputy Director (Agriculture) and other officials look after various aspects of agriculture for developing the sector as well as to extend necessary assistance to farmers at district level.

Besides Director, Animal Husbandry Officer of Panchayat offices such as Deputy Director (Animal Husbandry) Special Officers at Veterinary offices etc. In state government animal husbandry department also monitor activities of the sector at district level.

Public Health in rural area is assigned to the District Panchayat under the Chief District Health Officer who looks after epidemics, malaria control, water borne diseases and district level administration of Public Health Centres. District and Talukas Hospitals and Referral Hospitals are being looked after by the District Civil Surgeon of medical services in the State, while Medical Colleges and Research activities attached with the respective Civil Hospitals are controlled by Medical Education and Research Wing.

Family welfare activities are also monitored by the District Health Officer. Chief District Health Officer is also functioning as District Registrar of Birth and Death of the district and Talati cum Mantri is also Registrar of Death and Birth for the respective villages. Anaemic mothers and children upto to the age of 14 are looked after by Nutrition Officer under the Nutrition Programme.

District Ayurvedic Officer looks after the Ayurvedic dispensaries and hospitals. They also take care of the Ayurvedic plants and medicines and gardens. The District Food and Drugs Officer generally looks after the quality of the food and drugs in the district. Labourers and workers who are working in registered units are covered under the Employees State Insurance Scheme.

The rural roads have been transferred to the District Panchayats and their maintenance is done by the Executive Engineer, Roads and Buildings Department. Minor irrigation works are transferred to the District Panchayat and Executive Engineer (Panchayat) of the Panchayat's irrigation office looks after water harvesting and check dams.

The Roads and Buildings Department of State Government looks after the maintenance of roads, buildings, bridges and government multi-storey buildings etc. Besides Panchayat officials, major district roads and the state highways are looked after by the Executive Engineer (Roads & Buildings). The large multi-purpose irrigation projects are controlled by State Government directly through its Executive Engineers.

District Industries Centre is functioning to develop the small and village industries, handloom industries and the scope of industrial growth in the district. Besides, other departments are working for the rights of the industrial workers and rural labourers engaged in agriculture and others sectors.

Social welfare activities relating to the Scheduled Castes, Scheduled Tribes, Other Backward Castes and Other Backward Communities in the district are organized by the District Welfare Officer. Generally the schemes under Tribal Area Sub Plan and Special Component Plan are organized by the District Welfare Officer.

In each District Panchayat, District Statistical Officer of Directorate of Economics and Statistics looks after co-ordination of different development programmes. He is also Member-Secretary of District Planning Board. Similarly in every Collector Office, District Planning Officer looks after development work of various Government (State & Centre) sponsored programmes.

Co-operative Societies i.e. Co-operative Milk Societies, Agricultural Produce Market Societies, Co-operative banking and other Co-operative societies are controlled by the District Registrar Co-operative Societies.

(iv) Physical Features:

Panchmahal district is situated in the eastern part of the State. It lies between the parallels of latitude 22^0 17' and 23^0 26' and the meridians of longitude 73^0 20' and 74^0 2'. The length from north to south of the district is about 128.7 km and from east to west about 68.1 km. It is bounded on the north by the Sabarkantha district, on the east by Dohad district, on the south by Vadodara district and on the west by Kheda and Anand districts. The area covered by the district is 5,210.0 sq.km. and its rank is 15^{th} in terms of area among the districts of the state.

Physiography:

The district Panch Mahals is a part of Eastern Hilly Region and is sub-divided into two sub-micro regions namely, Mahi plain and Forested and scrub zone on the basis of topography, climate, geology, soils and natural vegetation.

Mahi plain :

The region covers the western part of the district and includes Lunawada, Santrampur, Godhra, Kalol, Shehera and Halol talukas. It is enclosed by Forested and scrub zone from north and east while Kheda and Vadodara districts surround it from south and west.

The general slope of the region is from south and the general elevation is 100 metres above M.S.L. The region receives sufficient rainfall in the rainy season and supports a healthy growth of trees. Summers are hot and dry. Geologically, the rocks found in this region are alluvium, blown sand, etc., Deccan trap, Erinpurru Granite, Gneiss Aravalli and associated rocks. The soils of this region are medium black in the north and grey blown in the south.

Forested and scrub zone:

The region spreads over Halol, Godhra, Shehera, Lunawada, Santrampur and Jambughoda talukas of the district. It makes its boundaries with Rajasthan state in the north and north-east. Dohad Upland in the east, Vadodara district in the south and Mahi plain in the west.

Topographically, this region is relatively higher in elevation than Mahi plain. The general elevation of this region is 150 metres above M.S.L. During monsoon season it receives good amount of rainfall while summers are generally hot and dry. The higher areas of this region are covered with forests. Geologically this region consists mainly of Aravally with associated rocks and Deccan Traps formations.

Hills:

There are several low steep ridges in Halol taluka and there are some granite rocks in Godhra taluka. Pavagadh and Ratanmal are the main hills in the district.

Drainage:

The district is rich in water resources. It is drained by several rivers like Mahi, Goma, Kun, Panam, Karad, Kali and Meshri. Mahi is the longest river. Mahi rises in Malwa hills and passes through Lunawada, Shehera and Godhara talukas. Panam rises in Madhya Pradesh and passes through Godhra, Shehera, Santrampur and Lunawada talukas.

Climate:

The climate of this district is characterised by a hot summer and dryness in the non rainy seasons. The year may be divided into four seasons. The cold season from December to February is followed by the hot season from March to May. The south-west monsoon season is from June to September and October and November form the post monsoon season.

a) Temperature:

Panch Mahals has a Meteorological observatory in the district. The records of this observatory are taken as the Meteorological conditions prevailing in the district as a whole. The period from March to May is one of the continuous rise in temperatures. May is the hottest month with high mean daily maximum temperature. The temperature in June is a little higher than in May. After mid-November both day and night temperature drop rapidly till January, which is the coldest month with the mean daily minimum temperature.

b) Winds:

Winds are generally light and moderate in summer and the south-west monsoon season. They become stronger westerly to south-westerly winds prevailed in the south-west monsoon season. In October winds are from directions between west and north east. In November and December winds are mainly from directions between north and east. In January and February winds are again from direction between west and north-east. In the summer season the winds are pre-dominantly from directions between south-west

and north-west.

c) Rainfall:

The annual rainfall in the district is received during the south-west monsoon season from June to September, July being the month with the highest rainfall. The variation in the annual rainfall from year to year is large.The annual rainfall of this district is 331.0 mm. in the year of 1999. Details of the monthly average rainfall of this district are given below.

Monthly Rainfall, (from 1995 to 1999)

(In mm.)

Economic Resources:

Economic resources are an important means for the subsistence of the working people of the district. The details about economic resources of important sectors are given here under in brief.

(1) Forestry:

According to the figures available from the Forest Department for the year 1999-2000, out of the total area of 5,210 Sq. Kms. of the district, an area of 907.2 sq, kms. is covered by forest. It accounts for 4.8 per cent of the total forest area of the state. The forest area of the district constitutes 17.4 per cent of total geographical area of the district. Out of it 885.4 sq. km. is reserved forest and 21.8 sq. km. forest is unclassified forest. Forest worth are found only in hillock. The important forest trees in the district are mahuda, teak and khakhra. The main products of these forests are timru leaves, mahuda flowers and fruits, awal bark, grass, bamboos, gums, lac, honey, etc.

(2) Minerals and Mining:

The known mineral wealth of Panch Mahals district is substantial though less diversified than few other minerals in the districts of the state. The pattern of mineral production is, therefore, simple. Various type of major and minor minerals like Gravel, Granite, Building stone, Lime stone, Brick clay, Ordinary Sand, Ordinary clay, Road metal and Marble are available

Source: Commissionerate of Geology and Mining, 2000.

in the district. The details are given in the Statement.

It is seen from the above statement that Quartz is the major mineral product of the district, followed by Manganese ore. The income from the major mineral products shows an increasing trend during the years 1998-99 to 2000-01. The income from minor mineral products is substantial.

(3) Soil and Cropping Pattern:

Except the western part comprising Kalol and parts of Halol , Godhra and Lunawada, which constitute a plain country, the district is a hilly tract. Lunawada, Santrampur and Jambughoda talukas are covered by hills and forests interspersed by plain cultivated lands in villages situated in the river valley. The western part of the district is mostly flat. The lands in Godhra are in parts rich and well tilled. Some parts of the district have goradu soil also. The western part of the district consisting of the parts of Lunawada, Shehera, Godhra, Kalol and Halol talukas is somewhat cut up by rivers. It is generally flat.

(4) Land and Land use Pattern:

The total area of the district is 5,210 sq.km during 1998-1999. The land classification for the rural area is given below on the basis of information collected for the Village Directory.

Land Classification of Rural Areas

(in '00 hectares)

Sl. No.	Classification	Area as on 31.3.99
1	2	3
1	Forest	1,147.0
2	Irrigated	683.3
3	Unirrigated	2,228.5
4	Cultivable waste (including Gauchar and Groves)	441.7
5	Area not available for cultivation.	590.8
	Total	**5,091.3**

Source: Village Directory, 2001.

(5) Tenancy:

There was no separate Act on tenancy in the former Bombay State before 1939. There were provisions of Section 83 of Land Revenue Code and Mamlatdar Court law only. The tenant was not secured of his tenancy rights in the Act. This tenancy lease was considered yearly and had to pay tenancy as per tradition or according to the agreement made with the land owner. In order to protect the tenants, the Bombay Tenancy Act, 1939 came into force in the erstwhile Bombay State.

After the independence of the country, it was necessary that the country is self-sufficient in agricultural production. It can be done only when the tillers of the land should have some definite rights over the land. With a view to effect control on efficient utilization of agricultural land and also to protect the tenants further and also to accept a definite policy and view for the country on agricultural land, The Bombay Tenancy and Agricultural Land Act, 1948 was enacted and it was brought into force since then.

The Act of 1948 was amended five times. An important provision of 'Farmer Day' was inserted in the Act on 1-8-1956. According to this provision, if any person legally tilled the land of other person on 01-04-1957, he was entitled to purchase the said land. Even though after bifurcation of Gujarat State from Bombay State in 1960, the said act is also applied to it as well.

Tenant means the person who held land on lease viz.

(1) Tenant as per Section 4;

(2) Protected tenant

(3) Permanent tenant

(4) The person who continued to possess the land with or without the consent of the land owner after appointed date and upto specified date or it is considered that he continued the possession of the land.

In all 1,049,056.4 hectares of land have been released and distributed to total of 1,278,125 beneficiaries under The Bombay Tenancy and Agricultural Lands Act, 1948 in entire Gujarat State. Among the beneficiaries 177,171 were from Scheduled Castes, 258,132 from Scheduled Tribes and 842,822 were under 'Others' category. In Panch Mahals district, in all 24,798.3 hectares of land have

been released and distributed to total 74,074 beneficiaries. Among these 7,327 belongs to Scheduled Castes who were allotted 3,691.1 hectares of land, 4,447 who belong to Scheduled Tribes were allotted 2,538.6 hectares and 62,300 beneficiaries who were under 'Others' category were allotted 18,568.8 hectares of land.

(6) Agriculture:

a) Area under Major Crops:

The areas under major crops for the years 1993-94 and 1997-98 are indicated in the following table.

Area under Major Crops

(in '00 hectares)

Sl. No.	Name of Crop	Area under Major Crops	
		1993-94	1997-98
1	2	3	4
1	Paddy	815	847
2	Wheat	187	215
3	Bajri	242	188
4	Jowar	61	48
5	Ragi	9	5
6	Other cereals	988	1,047
7	Gram	119	126
8	Other pulses	388	357
9	Sugarcane	1	1
10	Groundnut	132	72
11	Cotton	95	56

Source: Season and Crop Report, Directorate of Agriculture, 1999

The area under bajri, jowar, groundnut, cotton and other pulses has decreased in the district while the area under paddy, wheat, other cereals and gram has increased during the year 1997-98 as compared to the year of 1993-94. It can be observed that, in both the referent years, a majority of the cropped area of the district was under paddy, wheat, bajri, other cereals and other pulses.

b) Average Yield per Hectare:

The average yield per hectare of the principal crops in the district during the years 1993-94 and 1997-98 are shown below:

Average Yield per Hectare

(In kg.)

Sl. No.	Name of Crop	Average yield per hectare	
		1993-94	1997-98
1	2	3	4
1	Bajri (Kharif)	282	996
2	Bajri (Summer)	1,157	1,398
3	Jowar (Kharif)	276	743
4	Jowar (Rabi)	532	646
5	Paddy (Summer)	3,046	3,059
6	Paddy	411	1,184
7	Wheat	1,713	1,865
8	Groundnut	1,328	1,057
9	Cotton	209	307
10	Sugarcane	6,800	7,200
11	Ragi	304	542

Source: Season and Crop Report, Directorate of Agriculture, 1999

The average yield per hectare was higher for bajri (kharif), bajri(summer), jowar (kharif), jowar (Rabi), paddy, wheat, cotton, sugarcane. Average yield per hectare for ragi has increased during the year 1997-98 to 1993-94, whereas the average yield per hectare of groundnut has decreased during the year 1997-98 compare to year 1993-94.

(7) Irrigation:

a) Source of Irrigation:

The area irrigated by different sources in the district during the years 1993-94 and 1997-98 are presented below:

Area under Irrigation by Source

(In '00 hectares)

Sl. No.	Source of irrigation	1993-94		1997-98	
		Net	Gross	Net	Gross
1	2	3	4	5	6
1	Govt.Canals	213	443	282	461
2	Tanks	45	56	25	25
3	Wells	232	356	335	485
	Total	**490**	**855**	**642**	**971**

Source: Season and Crop Report Directorate of Agriculture, 1999

The above figures indicate that government canals and wells are the main source of irrigation in the district.

(8) Animal Husbandry:

a) Livestock :

Cattle wealth plays a pivotal role in the rural economy of the district. According to the livestock censuses of 1992 and 1997, the live stock population in the district is indicated below.

Livestock

Sl. No.	Livestock	Year 1992	Year 1997
1	2	3	4
(A)	**Total Livestock**	**1,089,163**	**1,092,648**
1	Cattle (cross breed)	4,163	5,161
(a)	Male over 2.5 years	303	1,309
(b)	Female over 2.5 years	2,268	2,289
(c)	Youngstock	1,592	1,563
2	Cattle (Indigenoues)	460,892	397,677
(a)	Males over 3 years	294,193	240,545
(b)	Female over 3 years	88,126	95,475
(c)	Youngstock	78,573	61,657
3	Buffaloes	312,358	344,738
(a)	Male over 3 years	1,328	1,962
(b)	Female over 3 years	184,462	218,946
(c)	Youngstock	126,568	123,830
4	Sheep	6,652	1,715
5	Goats	299,151	287,291
6	Horses and ponies	113	48
7	Camels	743	884
8	Pigs	1,661	8,432
9	Other livestock	3,430	46,702
(B)	**Poultry**	**352,010**	**343,310**

Source: (1) Directorate of Economics and Statistics, Livestock Census, 1992
(2) Directorate of Animal Husbandry, Livestock Census, 1997

The livestock population has marginally increased from 1,089,163 in 1992 to 1,092,648 in 1997. Poultry birds have decreased to 343,310 in 1997 as compared to 352,010 in the year 1992.

b) Agricultural Implements:

According to the livestock census conducted in the State, the comparative data for agricultural implements in the district for the years 1992 and 1997 are shown in the following statement.

Agricultural Implements

Sl. No.	Name of Agricultural Implements	Year 1992	Year 1997
1	2	3	4
1	**Plough**	202,417	177,860
	(a) Wooden	174,550	144,723
	(b) Iron	27,867	33,137
2	Carts	17,610	10,657
3	Oil engines	20,287	12,152
4	Electric Motors & Pumps	3,674	2,017
5	Tractors	899	1,615
6	Wheat Thresher	89	—
7	Rice Thresher	—	—

Source: (1) Directorate of Economics and Statistics, Livestock Census, 1992
(2) Directorate of Animal Husbandry, Livestock Census, 1997

The number of agriculture implements except iron plough and Tractors have shown a decreasing trend during 1997 as compared to the year 1992.

(9) Fisheries:

The important fisheries statistics for the district are given as under for the years 1997-98 and 1998-99.

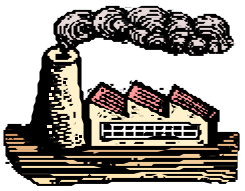

Fisheries Activities

Sl. No.	Item	Year 1997-98	Year 1998-99
1	2	5	6
1	Total Number of Fishing boats	1,040	1,040
2	Total Number of Fishing nets	4,945	4,945
3	Fish production (In tonnes)	2,733	2,974
4	Number of active fishermen	774	774
5	Fishermen primary Co-operative Societies (Number.)	17	17
6	Membership of fishermen's primary Co-operative Societies	34.01	34.01
7	Paid up share capital of fishermen's Co-operative societies (In'00 Rs.)	1,575.71	1,575.71

Source: Commissionerate of Fisheries, 2000

The above data indicates a rising trend in the fish production in the district during 1998-99 as compared to the year 1997-98

10) Industry:

The total number of registered factories and average number of daily workers employed by major groups of

Distribution of Important, Industrial Establishments by Major Industrial Group

Sl. No.	Major Group of NIC (National Industrial Classification)	Description of Manufacture	As on 31.12.98		As on 31.12.99	
			Number of Establish-ments	Average Number of persons working per day	Number of Establish-ments	Average Number of persons working per day
1	2	3	4	5	6	7
1	20-21	Food products	16	839	13	826
2	22	Beverages tobacco and related products	1	23	1	33
3	23	Cotton textiles	3	181	3	166

10	30	Basic chemical and chemical products (except products of petroleum and coal)	67	2,885	65	2,826
11	31	Rubber, plastic petroleum and coal products processing and nuclear fuels.	58	3,236	53	2,790
12	32	Non metallic mineral products	44	2,282	44	1,125
13	33	Basic metal and alloy industries	32	2,522	27	2,374
14	34	Metal products and parts except machinery and equipments.	36	1,667	35	1,782
15	35-36	Machinery and equipment other than transport equipment (scientific equipment,photographic/ cinematographic equipment and watches and clocks is classified in division 38)	36	1,984	32	2,784
16	37	Transport equipment and parts	13	1,928	13	2,258
17	38	Other manufacturing industries	2	62	2	60
18	39	Repairs of capital goods	3	327	3	98
19	40-43	Electricity, Gas and water, Generation transmission, distribution water works supply etc	-	-	0	0
20		Other Industries	9	426	11	422
		Total :	**344**	**19,652**	**327**	**18,526**

Source: Department of Industries Commissioner, 2000.

industries for the year 1998 and 1999 are shown in the following statement.

There are 327 registered factories in the district in the year 1999. The leading industry groups in the district in terms of number of factories are (1) Basic Chemical and chemical products (except products of petroleum and coal), (2) Rubber, Plastic, Petroleum and coal products processing and nuclear fuels, (3) Non-metallic mineral products, (4) Metal products and parts except machinery and equipments and (5) Machinery and equipment other than transport equipment. Similarly, the first four most important establishments from the point of employment of average number of persons working per day in 1999

are (1) Basic chemical and chemical products (except products of petroleum and coal) (2) Rubber, Plastic, Petroleum and coal products processing and nuclear fuels, (3) Machinery and equipment other than transport equipment (4) Basic Metal and alloy industries and (5) Transport equipment and parts.

(11) Trade and Commerce :

This category includes wholesale and retail trade of all kinds and other commercial activities like financial, insurance, real estate and business services, cement, iron bars, plastic, medicines, steel, handloom cloths etc. The important commodities manufactured and exported out from various towns of the district are mentioned in Table 47. Statement below gives data on availability of banking facilities in talukas of the district. It is observed that 80 villages of the Panch Mahals district are having banking facilities. There are 62 commercial and 52 Co-operative banking institutions in the district.

Villages Having Banking Facility

Sl. No.	Name of Taluka	Number of Villages where Banking facility is Available	Number of Banking Institutions	
			Commercial	Co-operative
1	2	3	4	5
1	Khanpur	6	5	4

Source: Banking Statistics, Basic Statistical Returns, Volume 28, March, 1999.

(12) Transport and Communication:

Transport and Communication facilities are necessary for administrative purposes and public convenience. A well-knit public transportation system is a pre-requisite for social and economic development of the district.

a) Road:

The linking of one place with other by road is very essential to provide good transport system. The information regarding roads available in Panch Mahals district for the year 1998-99 to 2000-01 are given in the statement below. This statement includes the information of National and State highways, district roads and village roads. According to 2001 census, 963 villages are connected with pucca roads and 995 villages are connected with kachcha roads.

b) Railway:

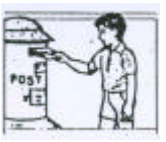

There are 25 railway stations in Panch Mahals district.

c) Ports :

There is no sea or air port in the district.

d) Post and Telegraph:

The following table shows the number of villages in the district possessing post, telegraph and phone facilities. As regards rural areas of the district the facility of post, telegraph and telephone are available in 411, 16 and 423 villages respectively.

Road Length of Different Categories

Sl. No	Year	Type of Road (in Kms.)										Total
		Highways				District Roads				Village Roads		
		National		State		Main		Other				
		GOVT DN	PNCH DN	GOVT DN	PNCH DN	GOVT. DN	PNCH DN	GOVT DN	PNCH DN	GOVT DN	PNCH DN	
1	2	3	4	5	6	7	8	9	10	11	12	13
1	1998-1999	0	0	729	0	222	855	90	142	146	239	2,423
2	1999-2000	0	0	729	0	222	856	90	142	146	239	2,424

Communication Facilities

Sl. No.	Type of Communication Amenities	Number of Villages having facilities
1	2	3
1	Post Offices	411
2	Telegraph Offices	16
3	Telephone	423

Source: Village Directory, 2001

e) State Road Transport :

Out of 1,201 inhabited villages of the district, 1,003 villages are connected with bus facilities up to 1998-99.

(13) Electricity:

Electricity is the chief necessity for the economic development of the district. The main source for power supply in the district is Gujarat Electricity Board. All villages are electrified in the district.

(14) Gram Panchayats, its composition, jurisdiction and role in the development of Village and its Economy :

The system of Panchayati Raj was introduced in the year 1963 in Gujarat State. Under this set up, the three tier system was introduced namely, The District Panchayat, The Taluka Panchayat and The Gram Panchayat.

Gram Panchayat is an important institution of self-government. The Gram Panchayat is formed for a village or a group of villages. The Gram Panchayat is constituted for a local area with the population of

less than 10,000. Such local area may be revenue village or a group of revenue villages or hamlets forming part of a revenue village or such other administrative unit or part of thereof. The number of members of Gram Panchayat varies from 9 to 15. The tenure of Gram Panchayat is of five years. The people of village elect Sarpanch and Vice-Sarpanch (Up-Sarpanch) and other members of the Panchayat. Various Committees like; Social Justice Committee and Standing Committee are formed. In the year 1993 Government of India enacted 73rd Constitutional Amendment regarding provisions of Panchayati Raj and implementation of this Act in Gujarat started from 15th April 1994. By this constitutional amendment, Panchayats are given constitutional status. Regular and timely election, participation of women and backward classes, formation of separate State Election Commission and rotation system in electing the heads of the various committees are other significant amendments in the act. Decentralised planning process and active participation of people is the soul of the Panchayati Raj Act. The powers for decentralised planning, implementation and development are delegated to the Panchayats.The primary functions of the District/Taluka Panchayats are providing facilities for primary education, health, drinking water, electricity, constructions and maintenance of roads, bridges etc., maintenance of Gauchars, organising relief work at the time of scarcity and drought situation, sanitation and social welfare. Arrangements for housing facilities for below poverty line people and rural development schemes are implemented by Panchayats. Gram Panchayats also implement important programmes like, 'food for work' and other programmes beneficial for the local people. Thus, Panchayats play an important role in the development of village and its economy. There are 13,761 Gram Panchayats in Gujarat State. Out of 1,215 villages in Panch Mahals district there are 230 group Gram Panchayats and 426 independent Gram Panchayats.

(v) Census Concepts :

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate building.

Permanent Houses :

Houses, the walls and roof of which are made of permanent materials. The Material of wall can be anyone from the following namely Galvanized iron sheets or other metal sheets, Asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials namely tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either wall or roof is made of permanent materials and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of a 2 meters. A dwelling room would include living room, bedroom, dining room drawing room study room, servant's room and other habitable rooms. Kitchen, Bathroom, latrine, Store-room, passage-way and verandah which are

not normally usable for living are not considered as dwelling rooms. A room used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office. etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servants household tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room which is shade by more than one household has not been counted for any of them. If two household have a dwelling room each but in addition also share a common dwelling room. Then the common room has not been counted for either or of the household.

Census House:

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of a different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts,

located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village:

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data.

In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town /Urban Area :

The following areas are treated as towns/urban areas :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of

both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Households :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Household.

Scheduled Castes and Scheduled Tribes :

Article 341(1) of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342(1) similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State is given below

List of Scheduled Castes :

1. Ager
2. Bakad, Bant
3. Bawa-Dedh, Dedh Sadhu
4. Bhambi, Bhambhi, Asadaru Asodi, Chamadia, Chamar Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Nalia, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar.
5. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
6. Chalvadi, Channayya
7. Chenna Dasar, Holaya Desar
8. Dangashia
9. Dhor, Kakkayya, Kankayya
10. Garmatang
11. Garoda, Garo
12. Halleer
13. Halsar, Haslar, Hulasvar, Halasvar
14. Holar, Valhar
15. Holaya, Holer
16. Lingader
17. Mahar, Taral, Dhegu Megu
18. Mahyavansi, Dhed, Dhedh, Vankar, Maru

Vankar, Antyaj

19. Mang, Matang, Minimadig
20. Mang-Garudi
21. Meghaval, Meghwal, Menghvar
22. Mukri
23. Nadia, Hadi
24. Pasi
25. Senva, Shenva, Chenva, Sedma, Rawat
26. Shemalia
27. Thori
28. Tirgar, Tirbanda
29. Turi
30. Turi Barot, Dedh Barot

List of Scheduled Tribes :

1. Barda
2. Bavacha, Bamcha
3. Bharwad (In the Nesses of the forests of Alech, Barada and Gir)*
4. Bhil, Bhil Garasia, Dholi-Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
5. Charan (In the Nesses of the forests of Alech, Barada and Gir) *
6. Chaudhri (In Surat and Valsad districts)
7. Chodhara
8. Dhanka, Tadvi, Tetaria, Valvi
9. Dhodia
10. Dubla, Talavia, Halpati
11. Gamit, Gamta, Gavit, Mavchi, Padvi
12. Gond, Rajgond
13. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
14. Kokna, Kokni, Kukna
15. Koli (In Kachchh district)
16. Koli Dhor, Tokre Koli, Kolcha, Kolgha
17. Kunbi (In The Dangs District)
18. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
19. Padhar
20. Paradhi (In Kachchh district)
21. Pardhi, Advichincher, Phanse Pardhi (Excluding Amreli,Bhavnagar, Jamnagar, Junagadh, Kachchh, Rajkot and Surendranagar districts)
22. Patelia
23. Pomla
24. Rabari (In the Nesses of the forests of Alech, Barada and Gir)*
25. Rathawa
26. Siddi (In Amreli, Bhavnagar, Jamnagar, Junagadh, Rajkot and Surendranagar Districts)
27. Vaghri (in Kachchh district)
28. Varli
29. Vitola, Kotwalia, Barodia

* The area comprised of Jamnagar and Junagadh districts.

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum

educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as "Main worker".

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal- worker'

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator, if, he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural laborers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (area).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural laborer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian

Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural laborer or in Household Industry is termed as an 'Other-Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural laborers or household industrial workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population Density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex Ratio :

Numbers of females per 1,000 males in a population.

(vi) Non Census Concepts :

Improved Drinking Water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are, not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of Latrine and Method of Disposal of Night Soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or

tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially lives births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude Birth Rate (CBR) :

Ratio of the numbers of live births in a year to the mid year population. (normally expressed per 1,000 population).

$$CBR = \frac{\text{Numbers of live births during the year}}{\text{Mid –year Population}} \times 1,000$$

Crude Death Rate (CDR) :

Ratio of the numbers of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Numbers of deaths during the year}}{\text{Mid –year Population}} \times 1,000$$

Natural Growth Rate (NGR):

Natural Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

$$NGR = CBR - CDR$$

Age Specific Fertility Rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Numbers of live births in a particular age group}}{\text{female population of same specified age group}} \times 1,000$$

Age Specific Marital Fertility Rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1,000$$

General Fertility Rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General Marital Fertilit Rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) years}} \times 1,000$$

Total Fertility Rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total Marital Fertility Rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \sum_{15-19}^{45-49} ASMFR$$

1,000

Age-Specific Mortality Rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1,000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (q5MR)

Infant Mortality Rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal Mortality Rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days under during the year}}{\text{Number of live births during the year}} \times 1,000$$

Early Neo-natal Mortality Rate (ENMR):

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late Neo-natal Mortality Rate (LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post Neo-natal Mortality Rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal Mortality Rate (PMR) :

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

StillBirth Rate (SBR) :

$$SBR = \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal Mortality Rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and childbirth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible Couple (Couples per 1,000 population):

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child Woman Ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child Woman Ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/ his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International Migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (inter district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban Components of Migration :

Rural or Urban status in respect of migrants had been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of Urban Units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size Class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population is classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5(1,000,000-1,999,999) M4(500,000-999,999); M3(300,000-499,999), M2(200,000-299,999) & M1(100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(Vii) 2001 Census finding- Population, its distribution

(a) Distribution of population in rural-urban areas:

According to 2001 Census, the total population of Panch Mahals district is 2,025,277 comprising 1,044,937 males and 980,340 females. The population is 4.0 per cent of the state population and it ranks 9th in the state. Rural population of the district is 1,771,915 and urban population of the district is 253,362 persons. There are 1,201 inhabited villages and 6 towns in the district. Out of the total population of the district 87.5 per cent lives in rural areas while 12.5 per cent lives in urban areas. There are11 talukas in the district.

(b) Size, class & status of towns, Population growth, Density, Sex ratio, Work participation rate, Literacy, availability of University education in the District.

The below statement gives the position and number of urban units in size class for 2001 Census.

Sl. No.	Name and Civic status of town	Size class of town	population
1	2	3	4
1	Godhra (M)	I	131,172
2	Halol (M)	III	44,473
3	Kalol (M)	III	27,903
4	Kalol INA	VI	668
5	Lunawada (M)	III	33,369
6	Santrampur (M)	IV	15,777

According to the 1991 Census the total population of the district was 1,682,333. There has been net addition of 342,944 persons during 1991-2001. The decadal growth rate of district comes to 20.4 per cent. The decadal growth rates for the rural and urban areas of the district are 19.5 and 27.1 per cent respectively. The growth rate of rural population is less than that of urban population. The highest growth of urban population in terms of percentage has taken place in Kalol taluka where 34.3 per cent of growth is witnessed. Kalol INA, town of Kalol taluka has been classified as Statutory town in 2001 census and Shivrajpur town of Halol taluka of 1991 Census has been declassified as village in 2001 Census.

The density of population in Panch Mahals district is 389 persons per sq.km. against the State average of 258 persons. At taluka level the density of population varies from 260 persons per sq. km. in Kadana taluka to 520 persons per sq. km. in Godhra taluka. In rural areas the density of population works out 346 persons per sq. km..

There are 938 females for every 1,000 males in Panch Mahals district. The sex ratio for rural and urban areas of the district is 941 and 919 respectively. The sex ratio in rural areas is higher as compared to that in urban areas in the district. Among the talukas the highest sex ratio of 966 females per 1,000 males has been recorded in Morwa (Hadaf) taluka and the lowest sex ratio of 914 is recorded in Halol taluka. The sex ratio for the children of age group 0-6 years is 935 for the district. In rural areas this sex ratio is 944 while in urban areas this sex ratio is 861 females per 1,000 males for the age group 0-6 years.

The proportion of Scheduled Castes population in the district is 4.6 per cent and that of Scheduled Tribes population is 27.5. The percentage of Scheduled Castes population is 4.4 per cent in rural areas and 5.8 per cent in urban areas of the district. The highest percentage of Scheduled Castes population to total population is recorded in Lunawada taluka (6.8 per cent) while the lowest percentage is recorded in Jambughoda taluka (1.8 per cent). The proportion of Scheduled Tribes population is 30.6 in rural areas and 5.8 per cent in urban areas of the district. The proportion of Scheduled Tribes population to total population is the highest in Kadana taluka (73.2 per cent) while it is the lowest in Lunawada taluka at 5.3 per cent.The percentage of Scheduled Tribes population is more than 70 per cent in Kadana and Santrampur talukas.The percentage of Scheduled Tribes population is more than 50 per cent in 339 villages accounted for 28.2 per cent of villages. The sex ratio in rural areas is 955 for Scheduled Castes and 956 for Scheduled Tribes.

A person who can read and write in any language with understanding is taken as literate in census. All children of age below 7 years are treated as illiterates.

As per 2001 Census, Panch Mahals district reported 1,025,835 persons as literate constituting 60.9 per cent of the total population. The proportion of male and female literates in the district is 75.9 per cent and 44.9 per cent respectively. The literacy rate of males is higher than that of females. The gap between male and female literacy rates is 31.0 percentage points in the district.

The literacy rates of rural and urban areas are 57.5 per cent and 83.7 per cent respectively. The proportion of male and female literates in rural area is 73.7 and 40.3 per cent. In urban areas this proportion is 90.8 and 76.1 per cent. The gap between male and female literacy rates in urban areas is 14.7 percentage points against 33.3 percentage points in rural areas. Among the talukas, the total literacy rate is higher between 67 to 68 percent in Lunawada, Godhra and Kalol talukas and their rate is the lowest of 44.1 per cent in Ghoghamba taluka.

The work participation rate is defined as percentage of total workers to the population. Only 48.2 per cent in the total population has been reported as workers in the district. In total population, 30.5 per cent is main worker while 17.8 per cent is marginal worker. Percentage of non- worker in the population in the district is 51.8 per cent. Among the males, 53.4 per cent is worker while among females 42.7 per cent are worker. Among males, 46.1 per cent is main worker, while among females, 13.8 per cent is main worker. In case of marginal workers, among males, 7.3 per cent is marginal worker, while among females, 28.9 per cent is marginal worker. The proportion of main workers in males is higher than that in females while marginal worker in females is higher than that in males. The highest proportion of workers to total population is observed in Ghoghamba taluka, (53.9 per cent) while the lowest proportion of workers to total population has been reported in Godhra taluka (42.2 per cent. In rural areas, 50.9 per cent of the population is worker, comprising 30.9 per cent main workers and 20 per cent marginal workers. In urban areas, 29.3 per cent of the population is worker, comprising 27.1 per cent main workers and 2.2 per cent marginal workers.

Of the total workers in the district, 53.7 per cent is engaged in cultivation, 23.9 per cent in agricultural labour, 1.3 per cent in household industry and 21.1 per cent in other work. The proportion of female cultivators in total female worker is 48.9 per cent, which is lower as compared to male cultivator (57.4 per cent) in the district. The proportion of females in

other work is 13.7 per cent, which is lower as compared to that of male (26.6 per cent) in the district. The proportion of cultivators varies between 69.0 per cent in Shehera taluka to 33.9 per cent in Kalol taluka. The proportion of agricultural labourers varies between 36.8 per cent in Kalol taluka to 17.8 per cent in Lunawada taluka. The proportion of other workers varies between 34.7 per cent in Godhra taluka to 8.0 per cent in Morwa (Hadaf) taluka.

Religion:

Religion forms an integral part of Indian Social system. In the pre-Independence census reports, the data on religion was being presented for 9 major religion viz. Hindu, Muslim, Tribal, Christian, Sikh, Jain, Buddhist, Parsi, Jewish and Others. However, since the 1951 census the data on religion has been presented for 6 major religion viz. Hindu, Muslim Christian, Sikh, Jain and Buddhist. Besides, the minor religions have been classified under the category of 'Other'. The data on religion collected and presented by the Indian Census is the basic data of intense use for the 'researchers', anthropologists, sociologists, demographers, administrators, planners and even for a common man.

In 2001 the Indian Census collected the religion data in question No. 7 of the household scheduled and recorded the same under the six major religions. Other religions were recorded in actual as returned by the respondent and classified under the category of 'Others'. Religion not stated has been added for those persons who have not stated their religion at the time of canvassing the status of religion.

It is observed that at State level 89.1 per cent of population is Hindus, whereas in Panch Mahals district Hindus constitute 93.7 per cent of population. In Gujarat State 9.1 per cent of population follows Muslim religion against 6 per cent are Muslims in Panch Mahals. The population of other major religious communities is very low as compared to Hindu and Muslim either in the state or in the district.

The distribution of population for major religious communities between rural and urban areas of Panch Mahals is as under according to 2001 Census.

Religion	Number of followers	Population	
		Rural	Urban
1	2	3	4
Hindu	1,897,034	1,736,092	160,952
		(91.5)	(8.5)
Muslim	120,676	33,838	86,838
		(28.0)	(72.0)
Christian	2,195	547	1,648
		(24.9)	(75.1)
Sikh	493	140	353

* Recasted Population

Table 1 gives the talukawise details pertaining to the decadal changes in rural and urban areas for the population by residence during 1991-2001. The decadal growth rate of the district is 20.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 19.5 and 27.1 per cent respectively. The growth rate of urban area in the district is higher than that of the rural area during the decade. Out of the total population of the district, 87.5 per cent population is registered in rural areas and 12.5 per cent in urban areas as per 2001 Census. The highest decadal growth rate is seen in Morwa (Hadaf) taluka (25.0 per cent) and the lowest growth rate is seen in Jambughoda taluka (11.8). Among the talukas having urban population as per 2001 Census, Godhra taluka has recorded the highest urban population of 33.3 per cent, while Santrampur taluka has recorded the lowest urban population of 7.2 per cent of total population.

Table 2 gives the details of absolute number and percentages of inhabited villages in specified population of size class of villages. There are 1,201 villages in the district. Out of 1,201 inhabited villages, Lunawada taluka has the highest number of villages i.e. 236, followed by Santrampur with 152 villages and Morwa (Hadaf) taluka has the lowest number of 51 villages. Out of 1,201 inhabited villages, 88 villages (7.3 per cent) have the population below 200 persons. The size class of 200-499 accounts for 256 villages (21.3 per cent) of the district while the size class of 500-999 populations is having 287 villages (23.9) of the district. As many as 270 villages (22.5 per cent) are recorded in the size class of 1,000-1,999 and 253 villages (21.1 per cent) in the size class of 2,000-4,999 while 43 villages (3.6 per cent) are netted in the size class of 5,000-9,999 persons. Only four villages of the district are having population of 10,000 and more persons.

TABLE 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

		Name of Town
(a)	**New**

District Total:	**1,201**	**100.0**	**1,771,915**	**100.0**

Population Density (Rural) of the district : 351

Table 4 gives the details of the distribution of villages by range of population density (per sq. km.). The inhabited villages of the district have been grouped under eight different ranges of population density. The maximum number of villages i.e. 474 accounting for 39.5 per cent of the total villages of the district fall in the population density range of 301-500 persons having 45.6 per cent population. The population density ranges of 0-10 and 11-20 have 1 village (0.1 per cent) each having negligible per cent of population. There are 13 villages (1.1 percent) with 0.1 percent of population in the population density range of less than 50. There are 277 villages (23.1 per cent) with 18.5 per cent of population in the density range of 201-300. As many as 245 villages (20.4 per cent) with 28.7 per cent of population have very high density of more than 501 persons per sq. km. The density of population of the rural areas of the district is 351 per sq.km.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Sl. No.	Census Year	Gujarat State			Panch Mahals District		
		Total	Rural	Urban	Total	Rural	Urban

11	2001	920	945	880	938	941	919

Table 5 gives the details about the sex ratio of state and district from 1901 to 2001 Censuses. As per 2001 Census sex ratio of 938 females per 1,000 males has been recorded in the district against 920 of the state. The sex ratio of the district was higher as compared to the state figures from 1901 to 1921 Censuses. It was lower than that of the State from 1931 to 1971 and was same as that for the state in 1981 and 1991 Censuses. The highest sex ratio of 975 females per 1,000 males was recorded in the district during 1901 Census while the lowest sex ratio of 922 was recorded in the district during 1951.

TABLE 6

SEX RATIO BY TALUKAS, 2001

Sl. No.	Name of Taluka	Sex Ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Khanpur	946	946	-
2	Kadana	949	949	-
3	Santrampur	958	961	918
4	Lunawada	933	937	908
5	Shehera	943	943	-
6	Morwa (Hadaf)	966	966	-
7	Godhra	933	935	930
8	Kalol	916	916	918
9	Ghoghamba	938	938	-
10	Halol	914	919	897
11	Jambughoda	959	959	-
	District Total:	**938**	**941**	**919**

Table 6 gives the details of sex ratio for total, rural and urban areas at taluka level as per 2001 Census. There are 938 females per 1,000 males in the district. The sex ratio is the highest of 966 in Morwa (Hadaf) taluka and the lowest of 914 in Halol taluka. The sex ratio is 941 females per 1,000 males in the district. In rural areas, the sex ratio is the highest i.e. 966 in rural areas of Morwa (Hadaf) taluka while it is the lowest of 916 in Kalol taluka. The sex ratio of 919 in urban areas is lower as compared to the sex ratio of rural areas in the district.

TABLE-7
SEX RATIO BY TALUKAS / C.D. BLOCKS, 2001

Sl.No.	Name of Taluka/C. D. Block	Sex Ratio
1	2	3
1	Khanpur	946
2	Kadana	949
3	Santrampur	961
4	Lunawada	937
5	Shehera	943
6	Morwa (Hadaf)	966

District Total:	**1,201**	**100.0**	**1,771,915**	**100.0**

Sex ratio (Rural) for District: 941

Table 8 gives the details of the distribution of villages by 9 different ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 375 accounting 31.2 per cent of the total villages and having 37.7 per cent population of the district have been registered in the sex ratio range of 900-949, followed by 323 villages(26.9 per cent) with population of 31.5 per cent in the sex ratio range of 950-999. The highest sex ratio range of 1,100 and more claims 23 villages having the share of 0.4 per cent of rural population in the district. The sex ratio range of 1,000-1,099 claims 211 villages (17.6 per cent) with 11.9 cent of population.

TABLE 9

SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of UA / Town	Urban Status of Town	Sex Ratio

Table 10 gives the details about population of age group 0-6 years and sex ratio for the age-group for total, rural and urban areas in each taluka of the district. Total population in age group 0-6 years is 341,284 persons comprising 176,376 males and 164,908 females. The sex ratio in this age group works out 935 females per 1,000 males in the district. The sex ratio in this age group in rural and urban areas comes to 944 and 861 females per 1,000 males respectively. The sex ratio at taluka level varies between 972 in Jambughoda taluka to 882 in Lunawada taluka.

Sex ratio (Rural) for District: 944

Table 12 gives the details of the distribution of villages in 9 different ranges of sex ratio in the age group 0-6 years as well as percentage of villages and percentage of population falling in each range of sex ratio in the district. The maximum number of 226 villages have sex ratio of between 1,000-1,099, followed by 202 villages having sex ratio of more than 1,100 each and 188 villages having sex ratio of between 900-949. The range of 700-749 has minimum number of villages (51) accounting for 2.0 per cent population of the district. The maximum population of 25.1 per cent in the district is seen in the sex ratio range of 900-949, followed by 22.2 per cent in the sex ratio range of 1,000-1,099.

Table 14 shows the details of the distribution of Scheduled Castes and Scheduled Tribes population with their percentages to total population at taluka level for rural and urban areas of the district. It can be seen that out of total district population of 2,025,277, only 4.6 per cent belongs to Scheduled Castes and 27.5 per cent belongs to Scheduled Tribes. The percentage of Scheduled Castes population to total population constitutes 4.4 per cent in rural areas and 5.8 per cent in urban areas in the district. The highest percentage of Scheduled Castes population to total population is recorded in Lunawada taluka (6.8 per cent) while the lowest percentage is recorded in Jambughoda taluka (1.8 per cent). The proportion of Scheduled Tribes population is 30.6 per cent in rural areas and 5.8 per cent in urban areas of the district. The proportion of Scheduled Tribes population to total population is the highest in Kadana taluka (73.2 per cent) while it is the lowest in Lunawada taluka at (5.3 per cent).

TABLE 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKAS / C.D. BLOCKS, 2001

Sl. No.	Name of Taluka / C.D. Block	Total Population	Total Scheduled Castes Population	Total Scheduled Tribes Population	Percentage of Scheduled Castes Population to Total Population	Percentage of Scheduled Tribes Population to Total Population

	District (Rural) Total:	**1,771,915**	**77,767**	**541,406**	**4.4**	**30.6**

Table 15 gives the details of the distribution of Scheduled Castes and Scheduled Tribes population for rural areas in each taluka of the district. Out of the rural population of the district, 4.4 per cent population is recorded as Scheduled Castes and 30.6 per cent as Scheduled Tribes. The highest 7.1 per cent of Scheduled Castes population to total population is recorded in Lunawada taluka and the lowest of 1.8 per cent in Jambughoda taluka. The highest of 76.8 per cent Scheduled Tribes population to total population is recorded in Santrampur taluka and the lowest of 5.8 per cent in Lunawada taluka.

TABLE 16

District Total :	**1,201**	**100.0**	**77,767**	**100.0**

Table 16 gives the details of the number of villages of the district according to the proportion of Scheduled Castes population to their total population in 9 different percentage ranges of Scheduled Castes population at district level. As many as 532 villages (44.3 per cent) in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 374 villages constituting 31.1 per cent of total villages. The percentage of Scheduled Castes population varies between 5 to 10 per cent in 162 villages, while it varies between 11 to 20 per cent in 85 villages. As low as 20 villages of the district have more than 30 per cent of population of Scheduled Castes.

TABLE 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes Population to Total Population	Number of Villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	265	22.1	0	0.0
Less than 5	140	11.7	5,485	1.0
5-10	114	9.5	18,303	3.4
11-20	138	11.5	37,405	6.9
21-30	96	8.0	31,762	5.9
31-40	68	5.7	31,964	5.9

51-75	114	9.5	113,478	21.0
76 and above	225	18.7	278,137	51.4
District Total :	**1,201**	**100.0**	**541,406**	**100.0**

Table 17 gives the details of the number of villages of the district according to the proportion of Scheduled Tribes population to their total population in 9 different percentage ranges at district level. It is significant that 225 villages constituting 18.7 per cent of total villages in the district have more than 75 per cent of population of Scheduled Tribes, while 114 villages (9.5 per cent) have Scheduled Tribes population between the percentage ranges of 51-75. As many as 265 villages of the district have no Scheduled Tribes population, 140 villages are having Scheduled Tribes population less than 5 per cent and 114 villages are having Scheduled Tribes population between 5 to 10 percent. Scheduled Tribes population percentage ranges of 11-20, 21-30, 31-40 and 41-50 are accounted for 138, 96, 68 and 41 villages respectively.

	District (Urban) Total :	**253,362**	**14,725**	**14,594**	**5.8**	**5.8**

UA = Urban Agglomeration

Table 18 gives the details of the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at UA/towns as per 2001 Census. Of 253,362 population in UA /Towns of the district, 5.8 per cent population belongs to Scheduled Castes and 5.8 per cent population belongs to Scheduled Tribes. The highest of 6.9 per cent Scheduled Castes population is recorded in Godhra UA, their percentage in Kalol INA (INA) is negligible. The proportion of Scheduled Tribes population to total population is the highest of 10.8 percent in Halol UA whereas their population is the lowest of 2.3 per cent in Lunawada (M).

TABLE 19

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN TALUKAS/C. D. BLOCKS, 2001

Sl. No.	Name of Taluka/ C.D.Block	Scheduled Castes Sex Ratio	Scheduled Tribes Sex Ratio
1	2	3	4
1	Khanpur	979	924
2	Kadana	987	952
3	Santrampur	988	967
4	Lunawada	959	960
5	Shehera	964	960
6	Morwa (Hadaf)	993	969
7	Godhra	916	965
8	Kalol	952	943
9	Ghoghamba	916	939
10	Halol	974	935
11	Jambughoda	913	962
	District (Rural) Total :	**955**	**956**

Table 19 shows the sex ratio among Scheduled Castes and Scheduled Tribes for rural areas in each taluka in the district. The sex ratio in Scheduled Castes is 955 for the district. Among the talukas, the highest sex ratio of 993 among Scheduled Castes is found in Morwa (Hadaf) and the lowest sex ratio of 913 is found in Jambughoda taluka. Sex ratio in Scheduled Tribes population is 956 for the district. The highest sex ratio of 969 among Scheduled Tribes is recorded in Morwa (Hadaf) taluka and the lowest of 924 is recorded in Khanpur taluka.

TABLE 20

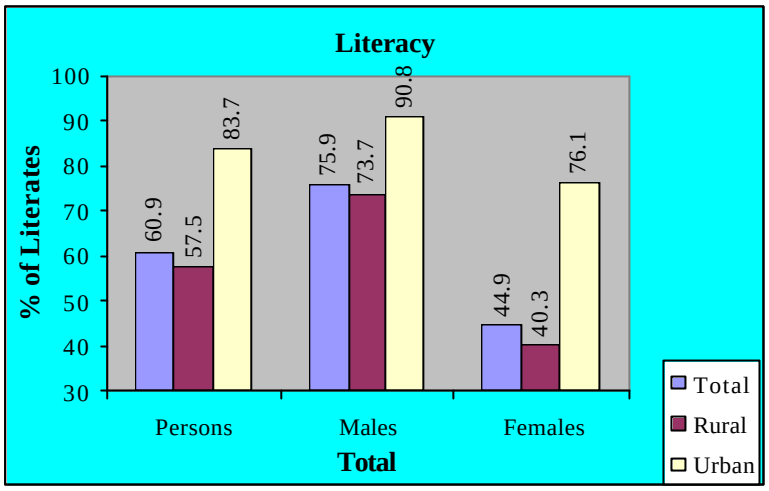

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of UA / Town	Scheduled Castes Sex Ratio	Scheduled Tribes Sex Ratio

	Sex ratio (Urban) for the district:	**935**	**937**

UA = Urban Agglomeration

Table 20 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each Urban Agglomerations/towns of the district. In urban areas, the sex ratio in Scheduled Castes is 935 for the district. The highest sex ratio of 1,087 in Scheduled Castes is recorded in Santrampur (M) and the lowest of 869 is recorded in Halol UA, Halol (M+OG) and Halol (M). The highest sex ratio in Scheduled Tribes population is recorded at 1,083 in Kalol INA (INA) and the lowest of 837 in Santrampur (M). It may be noted that there was no Scheduled Castes population recorded in Kalol INA (INA).

Table 21 shows the number and percentage of literates and illiterates by talukas, 2001. As per 2001 Census, the proportion of effective literates to total population is 60.9 per cent in the district, while this proportion in rural areas is 57.5 per cent and in urban areas 83.7 per cent. In the district as a whole, the literacy rate of males is 75.9 per cent which is higher than 44.9 per cent literates in females. Among the talukas, the total literacy rate is comparatively higher and it lies between 67 and 68 per cent in Lunawada, Godhra and Kalol talukas and this rate is the lowest of 44.1 per cent in Ghoghamba taluka. The gap between male and female literacy rate in the district is 31.0 percentage points. At taluka level, the highest literacy gap of 36.6 percentage points between males and females is observed in Morwa (Hadaf) taluka, while the lowest literacy gap of 28.4 percentage points between males and females is seen in Godhra taluka. The gap between male and female literacy rates is 33.3 percentage points in rural areas and is 14.7 percentage points in urban areas of the district.

TABLE 22

	District (Rural) Total:	**843,375**	**556,741**	**286,634**	**928,540**	**356,164**	**572,376**	**57.5**	**73.7**	**40.3**	**33.3**

Table 22 reveals the effective literacy rates along with absolute number of literates and illiterates for the rural population at taluka level in the district. It is seen that as much as 57.5 per cent of the total rural population in the district is literate. A significant gap of 33.3 percentage points in literacy rates between males and females has been registered. Kalol has returned the highest literacy rate of 64.3 per cent while Ghoghamba taluka has shown the lowest literacy rate of 44.1 per cent among the talukas of the district. In regard to literacy rates for males, the maximum literacy rate of 79.3 per cent is reported in Kalol taluka and the lowest literacy rate of 59.7 per cent has been reported in Ghoghamba taluka. Similarly, highest female literacy rate of 47.8 per cent is recorded in Lunawada and Kalol talukas, while the lowest female literacy rate of 27.4 per cent is recorded in Ghoghamba taluka. A gap of more than 35 percentage points in male and female literacy rates have been observed in Shehera, Morwa (Hadaf) and Godhra talukas.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of Literacy Rate for Villages	Number of Inhabited Villages	Percentage Distribution of Villages	Population	Percentage Distribution of Population
1	2	3	4	5
0	1	0.1	17	0.0
1-10	0	0.0	0	0.0

UA = Urban Agglomeration.

Table 24 shows the absolute number of literates and illiterate along with literacy rates in urban and areas at UA/Town level in the district. As much as 83.7 per cent of the urban population, excluding the population of age group of 0-6 years is literate in urban areas of the district. As much as 90.8 per cent of the urban male population is literate while corresponding figure for females is 76.1. Lunawada (M) shows the highest literacy rate of 84.7 per cent while Kalol INA (INA) has the lowest literacy rate of 78.7 per cent in urban areas of the district.

Table 25 gives the details about number and percentage of literates and illiterates for Scheduled Castes at taluka level in the district. As much as 65.6 per cent of the total Scheduled Castes population excluding the population of age group of 0-6 years is literate in the district. As much as 80.4 per cent of male Scheduled Castes is literate while the corresponding figure for female population is only

50.4 per cent. There is a wide gap of 29.9 percentage points between the literacy rates of males and females. Jambughoda taluka has the highest literacy rate of 71.2 per cent while the lowest literacy rate of 57 per cent is recorded in Kadana taluka. Wide difference of 34.1 percentage points in literacy rates between males and females is seen in Lunawada taluka of the district, while this difference is the lowest of 23.6 percentage points in Jambughoda taluka.

TABLE 26

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Literacy rate for District (Rural): 65.6

Table 26 reveals the distribution of villages in 12 different ranges of literacy rates for the population of Scheduled Castes in rural areas of the district. No Scheduled Caste literate is reported in 12 villages of the district. As many as 246 villages accounting for 36.8 per cent of the total villages show the literacy rates ranging from 61-70 per cent and 141 villages (21.1 per cent) show the literacy rates ranging from 71-80 per cent As many as 122 villages having 8.2 per cent of the total population of Scheduled Castes have registered the literacy rate below 50 per cent. The higher literacy rates ranging from 91 to 99 per cent has been recorded in 16 villages. It may be noted that the Scheduled Castes population in 15 villages has been reported as totally literate in the district.

TABLE 27

Literacy rate for District (Rural) : 43.9

Table 29 details the distribution of villages by 12 different ranges of literacy rates for Scheduled Tribes population in the district. A total of 13 villages have all the Scheduled Tribes population as literate. The literacy rate of less than 30 per cent is observed in 301 villages (32.1 per cent) of the district. The Scheduled Tribe literacy rate in between 41 to 50 percent is observed in 168 villages (17.9 per cent) whereas literacy rate between 51 to 60 per cent is observed in 185 villages (19.8 per cent). The literacy rate of more than 90 per cent and less than 100 per cent has been observed in 17 villages (1.8 per cent). 13 villages (1.4 per cent) are having the cent per cent literacy in Scheduled Tribes population of only 93.

Table 31 shows absolute number and percentage of main workers, marginal workers and non workers by sex at taluka level in the district as per 2001 Census. 48.2 per cent in the total population has been reported as workers in the district. In total population, 30.5 per cent are main workers while 17.8 per cent are marginal workers. Percentage of non- workers in the population in the district is 51.8 per cent. Among the males, 53.4 per cent is worker while among the females, 48.7 per cent is worker. As far as marginal workers are concerned, among males, 7.3 per cent is marginal worker, while among females, 28.9 per cent is marginal worker. The highest proportion of workers to total population is observed in Ghoghamba taluka, (53.9 per cent) while the lowest proportion of workers has been reported in Godhra taluka (42.2 per cent).

Table 32 gives the details of absolute number and percentage of main workers, marginal workers and non workers by sex in Talukas/ C.D. Blocks of the district. As much as 30.9 per cent of the rural population has been categorized as main workers whereas the marginal workers constitute 20 per cent of the total population. As high as 49.1 per cent of population is non-worker. Main workers among males and females are 46 and 14.9 per cent respectively. The proportion of marginal worker for male and female is 8.1 and 32.7 per cent respectively. The percentage of marginal workers to total population in females is higher than that in males. Similar trend is also seen at taluka level also. At the taluka level, Lunawada taluka has the highest proportion of total workers forming 54.6 per cent of the total population whereas the lowest percentage of total workers to total population is reported for 46.2 per cent in Kalol taluka.

Note : UA = Urban Agglomeration.

Table 33 shows the absolute number with percentage of main workers, marginal workers and non-workers for urban population at UA/Town level in the district. Of the 253,362 total urban population of the district, 27.1 per cent has been categorized as main workers whereas only 2.2 per cent has been categorized as marginal workers. A high percentage i.e. 70.7 per cent of the population is reported to be non-workers. Sex-wise break up at the district level shows that 46.5 per cent among males and 5.9 per cent among females are main workers. Marginal workers among males are 2.0 per cent and among females are 2.6 per cent. The highest proportion of total workers forming 37.0 per cent of the total population is seen in Kalol INA (INA) and the lowest proportion of 27.6 per cent is seen in Godhra UA..

Note: Percentage of Worker to total worker are given in brackets

Table 34 reveals the economic activities in the talukas of the district. From the table it is evident that total workers including main and marginal workers are 48.2 per cent of the total population. As many as 53.7 per cent of total workers are engaged in cultivation, 23.9 per cent in agricultural labour, 1.3 per cent in household industry and 21.1 in other work. The proportion of cultivators varies between 69.0 per cent in Shehera taluka to 33.9 per cent in Kalol taluka. The proportion of agricultural labourers varies between 36.8 per cent in Kalol taluka to 17.8 per cent in Lunawada taluka. The proportion of other workers varies between 28.1 per cent in Kalol taluka to 8.0 per cent in Morwa (Hadaf) taluka. The proportion of female cultivators in total female workers is 48.9 per cent which is lower as compared to male cultivator of 57.4 per cent in the district. The proportion of female agricultural labourers in total workers is 36.1 per cent which is higher as compared to male of 14.8 per cent in the district. The proportion of female in other work in total female workers is 13.7 per cent which is lower as compared to male of 26.6 per cent in the district.

Note: Percentage of Worker to total worker are given in brackets

Table 35 gives the details of distribution of workers by sex in four categories of economic activity in Talukas/ C.D. Blocks of the district. It can be seen that workers are 50.9 per cent of total population. Among workers, cultivators account for 57.9 per cent, agricultural labourers for 25.6 per cent, household industry workers for 1.3 per cent and other workers for 15.2 per cent in the rural areas of the district. Agricultural sector plays a major role in providing employment to the working force for the rural population. The percentage of workers in household industries is remarkably low of 1.3 per cent of the total workers in rural areas. The percentage of workers in cultivation are more in male workers as compared to female workers. The percentage of female workers in agricultural labour is more than double as compared to males in agricultural labour. The cultivators constitute 69.0 per cent of workers in Shehera taluka, while they constitute only 37.2 per cent of workers in Kalol taluka. Agricultural labourers constitute 40.6 per cent of workers in Kalol taluka, while they constitute only 19.1 per cent in Shehera taluka. Persons engaged as other work have the highest percentage of 21.3 per cent in Halol taluka and the lowest percentage of 8.0 per cent in Morwa (Hadaf) taluka.

UA = Urban Agglomeration

Table 36 details the distribution of workers by sex in four categories of economic activity in urban areas of the district. In the urban areas of the district, total workers (Main + Marginal) constitute 29.3 per cent of total population. Among these workers, cultivators constitute 2.8 per cent, agricultural labourers 2.9 per cent, household industry workers 2.1 per cent and other workers 92.1 per cent. Proportion of females in cultivators, agricultural labourers and household industry workers to total female workers is higher than males. In case of other work, participation of males is comparatively higher in comparison to females in other works.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 given above shows the distribution of villages according to the availability of different amenities such as education, medical, improved drinking water, post office, telephone, transport communication, banks, agricultural credit societies, approach to village by pucca road and power supply. Out of 1,201 inhabited villages in the district, 1,182 villages have at least some educational facility. There is no educational facility in 19 villages. Medical facilities of one kind or other are available in 781 villages of the total inhabited villages. The remaining 420 villages are devoid of any medical facility within the village. In 1,178 inhabited villages of the district have drinking water facility like tap, well, hand pump, tube well, etc. 23 villages have no drinking water facility. As many as 412 villages are equipped with one or more facilities of post and telegraph. Telephone facility has reached to 35.2 per cent of villages in district. 1,008 villages of the district are well connected with the transport facility. Agricultural Credit Societies are available in 276 villages. Only 80 villages have banking facility. As many as 963 villages are linked by pucca roads. As far as power supply is concerned, all villages of the district have power supply.

TABLE 38

NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of Taluka/ C. D. Block	Total Population of Inhabited Villages	Type of Amenity available									
			Education	Medical	Improved Drinking Water*	Post Office#	Telephone	Transport Communi-cations $	Banks	Agricultural Credit Societies	Approach by Pucca Road	Power Supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 gives the details about the number and percentage of rural population served by different amenities. Out of total population of 1,771,915 persons in the district, 99.7 per cent have educational facility of one or other type. Similarly, 79.4 per cent population has medical facilities of one type or the other and 98.8 per cent have the facilities of improved drinking water. Post office facilities are available to 60.7 per cent population. Telephone facility is available to 53.3 per cent population. Transport communication facility is available to 93.7 per cent of the population. Banking facilities are available to 16.8 per cent of population in the district. As much as 37.5 per cent of the population has the facility of agricultural credit societies. As much as 90.2 per cent have been provided with the facility of approach by pucca roads. Power supply is available to 100 per cent of rural population in the district. 100 percent rural population of Khanpur, Morwa (Hadaf) and Godhra talukas have educational facility.

TABLE 39
DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the Amenity of	Distance Range of Place from the Villages where the Amenity is Available			
	Less than 5 Kilometres	5-10 Kilometres	10+ Kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1 Education :-				
(a) Primary School	16	3	0	19
(b) Middle School *	0	0	0	0
(c) Degree College	164	176	853	1,193

6. Banks				
(a) Commercial Bank	439	263	442	1,144
(b) Co-operative Bank	388	273	492	1,153
7. Agricultural Credit Societies	589	201	135	925

Note :* In Gujarat State the levels of education are classified as under
(i) Primary School(From Std. I to VII passed)
(ii) Secondary/Matriculation(From Std. VIII to X passed)
(iii) Higher Secondary (From Std. XI to XII passed). Hence details under 1(b) are not shown.

Table 39 shows that out of 19 villages having no facility of primary education, 16 villages of the district are having such facilities within a distance of 5 km, 164 villages have college facility available at a distance of less than 5 km. As many as 137 villages have hospital facility available within a distance of 5 km., while 381 villages have primary health facility available within a distance of 5 km, Telephone facility is available in 389 villages within a distance of 5 km whereas 163 villages have this facility at a distance between 5 km to 10 km. Out of 198 villages having no bus services within the village, 171 villages have bus facility available within the distance of 5 kms.

Note: Percentages are given in brackets.
Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

In Table 40 the villages are distributed according to four ranges of the distance from the nearest statutory town along with number of villages and availability of different amenities. Out of 1,201 inhabited villages, 57 villages are at a distance of 5 km. from the nearest town, and each of these villages has some educational facility. Further, out of these 57 villages, 32 villages are having medical facility, 9 villages have post office, 22 villages have telephone, 38 villages have transport communications and 47 villages have approach by pucca road facilities. Banking facilities are not available to the 54 villages situated at a distance of less than 5 km. from statutory town. Out of total 1,201 villages, 397 villages are situated at the distance of 5 km. to 15 km. from the statutory towns. Of these 397 villages, 393 villages are having educational facilities, 282 villages are having medical facility, 131 villages are having post office, 147 villages are having telephone, 343 villages have transport and communication, 32 villages have bank, 95 villages have agricultural credit society and 335 villages have approach by pucca road. Only 13 villages are located at a distance of more than 50 km from the nearest town. Out of these 13 villages, 12 villages are having educational facilities, 7 villages are having medical facility, 7 villages are having post office, 3 villages are having telephone, 10 villages have transport and communication, 1 village have bank, 3 villages have agricultural credit society and 10 villages have approach by pucca road..

TABLE 41

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 41 gives the distribution of villages according to different population ranges and amenities available. Out of 4 villages having population of 10,000 and more, one village each does not have a bank and an agricultural credit society. There are 43 villages in the population range between 5,000 and 9,999, all of which are having the facilities of education, transport and communication and power supply. Out of these villages, there is one village which does not have facilities of medical, improved

drinking water, post office and approach by pucca road while 37 villages have telephone, 16 villages have bank and 24 villages are having agricultural credit societies. Out of 344 villages, having the population range of 1-499 less than 10 per cent village is availing the facilities like Post Office, banks and agricultural credit societies. 2.1 per cent villages having the population range of 500-999 are enjoying the facilities of Banks. It may be seen that with the rise of population range of the village percentage of the facilities indicated in the table is gradually increased.

TABLE 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Taluka/ C. D. Block	Number of Inhabited Villages	Total Area (in Hectares)	Percentage of Cultivable Area to Total Area	Percentage of Irrigated Area to Total Cultivable Area
1	2	3	4	5	6
1	Khanpur	86	32,245.4	57.1	17.5
2	Kadana	132	41,100.8	41.1	27.2
3	Santrampur	152	56,257.2	52.0	24.6
4	Lunawada	236	59,198.8	64.9	41.8
5	Shehera	91	60,583.4	51.5	18.8
6	Morwa (Hadaf)	51	31,926.0	59.6	7.7
7	Godhra	116	73,392.3	62.9	25.6
8	Kalol	67	38,981.7	70.2	32.8
9	Ghoghamba	95	49,987.0	54.7	6.6
10	Halol	120	49,105.4	59.9	9.1
11	Jambughoda	55	12,126.6	55.1	66.9
	District Total:	**1,201**	**504,904.5**	**57.5**	**23.5**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 gives the details about talukawise distribution of villages according to land use. It also details the total area and cultivable area available in the inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. There are 1,201 inhabited villages in the district having a total area of 504,904.5 hectares. Of this 57.5 per cent is cultivable 23.5 per cent of total cultivable area has irrigation facilities. Among the talukas, it is seen that Lunawada, Morwa (Hadaf), Godhra, Kalol and Halol have more than 59 per cent of their area as cultivable. Kadana has only 41.1 per cent of its area as cultivable. Jambughoda taluka has irrigation facilities in nearly two-thirds of its cultivable area, Kalol has irrigation facilities in nearly one - third of its cultivable area and Morwa (Hadaf), Ghoghamba and Halol talukas have irrigation facilities in less than 10 percent of their cultivable area.

TABLE 43

PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

(in Rs.)

Sl. No.	Class, Name & Urban Status of the Town	Per Capita Receipt			Per Capita Expenditure

6	IV Santrampur (M)	451.5	265.8	185.7	356.8	81.5	152.6	105.1	0	17.6
	District Total :	**412.3**	**238.1**	**174.2**	**438**	**145.2**	**35.1**	**127.3**	**0**	**130.4**

* Towns having outgrowths.

Table 43 shows the details of per capita receipt and expenditure in statutory towns of the district. The per capita receipt in statutory towns of the district is Rs. 412.3 of which Rs.238.1 is realised through taxes and Rs.174.2 from all other sources. The per capita expenditure in statutory towns of the district is Rs. 438. This expenditure is incurred on General Administration for Rs. 145.2, Rs. 35.1 on Public Health and Conveniences, Rs. 127.3 on Public Works and Rs. 130.4 on other items.

Among towns, Lunawada (M) has reported the highest per capita receipt of Rs. 579, followed by Kalol (M) with per capita receipt of Rs. 472.6. The lowest per capita receipt of Rs. 136.5 is reported by Kalol INA (INA). The highest per capita expenditure of Rs. 814.4 is reported by Kalol (M), followed by Rs. 530.6 by Lunawada (M) while lowest per capita expenditure of Rs. 342.5 is reported by Halol (M).

TABLE 44

SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Type of Educational Institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College

	District Total :	**3.1**	**0**	**1.1**	**0.7**	**0.3**

Note : * Towns having outgrowths.

 # Note : In Gujarat State, the levels of education are classified as under

(i) Primary School (From Std. I to VII passed)
(ii) Secondary/Matriculation (From Std. VIII to X passed)
(iii) Higher Secondary (From Std. XI to XII passed). Hence, the middle school is 0.

Table 44 shows the availability of schools/college per 10,000 populations in statutory towns. The data reveals that in urban areas of the district, the average number of primary schools per 10,000 populations is 3.1, secondary/matriculation schools is 1.1, senior secondary schools is 0.7 and colleges is 0.3. Among the towns, the ratio of primary, secondary/ matriculation and senior secondary schools and colleges per 10,000 populations are the highest in Santrampur (M). There is none of these facilities in Kalol INA (INA) per 10,000 populations.

TABLE 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and Urban Status of the Town	Number of Beds in Medical Institutions per 10,000 Population
1	2	3
1	Godhra(M)*	41
2	Halol(M)*	23
3	Kalol(M)*	47
4	Kalol INA (INA)	150
5	Lunawada(M)	29
6	Santrampur(M)	53
	District Total :	**38**

Note : * Towns having outgrowth.

Table 45 gives the details about the number of beds in medical institutions per 10,000 populations in each town of the district. Halol (M) has the lowest 23 beds per 10,000 populations whereas Kalol INA (INA) has the highest number of beds.

TABLE 46

PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total Population	Slum Population	Percentage of Slum Population to Total Population
1	2	3	4	5
1	Godhra	131,172	40,550	30.9
	District Total :	**131,172**	**40,550**	**30.9**

Table 46 gives the details about the proportion of slum population in towns. It reveals that only Godhra town has slum population. Godhra has 30.9 percent of its population as slum population.

TABLE 47

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Most Important Commodity	
		Manufactured	Exported
1	2	3	4
1	Godhra (M)*	Cement	Wood
		Washing Powder, Soap	Building Materials
		Iron Bars, Plastic	St. Utensils
2	Halol (M)*	Plastic Articles	Plastic Articles
		Medicines	Medicines
		Stationery Articles	Stationery Articles
3	Kalol (M)*	Steel	Steel
		Cotton Yarn	Gur
		Leather Products	Iron Products
4	Kalol INA (INA)	Iron Products	Steel
		Copper Products	Copper Products
		Insecticide, Medicine	Insecticide, Medicine
5	Lunawada (M)	PVC Pipes	Amchur Powder
		Handloom Cloth	Chillies, Garlic
		Sesame Oil	Pulses
6	Santrampur (M)	Timru leaves	Pulses
		Maize	Timber
		Pulses	Maize

Note: * Towns having outgrowth.

Table 47 indicates the important commodities manufactured and exported out of the each town in the district. The district is well known for Cotton yarn, Metal products, Plastic products, PVC products, Medicines etc. The main export items of the district are Wood, Building materials, Metal products, Timber etc. This table lists main items produced in each town of the district and main items exported from the town.

Source : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 48 details the number of households by tenure status and number of rooms occupied in the district. The total number of households in the district is 362,908 of which 314,881 households are in rural areas and 48,027 are in urban areas. Out of total households, 20,403 households belong to Scheduled Castes and 97,053 households belong to Scheduled Tribes. Out of these total households of the district, 94.7 per cent households are living in their own houses, 3.8 per cent households are living in rented house and 1.5 per cent households are living in other houses. Of these total households, the largest number of households i.e.179,729 (49.5 per cent) have single room accommodation, followed by 120,727 (33.3 per cent) households having two room accommodation. Three room accommodations are occupied by 44,160 (12.2 per cent) households. More than 3 room accommodations are occupied by 12,107 (3.3 per cent)

households while 6,185 (1.7 per cent) households are living without any exclusive room in the district. Median number of rooms is found to be 1 in the rural and 2 in the urban areas of the district. The proportion of households having 1 room accommodation is 52.8 in rural areas and is 28.2 per cent in urban areas. The proportion of households having 3 room accommodations is 10.6 in rural areas and is 22.3 per cent in urban areas. The proportion of households having more than room 3 accommodations is 1.9 per cent in rural areas and 12.9 per cent in urban areas. The proportion of households having 1 room accommodation in Scheduled Castes is 46.6 per cent and is 59.5 per cent in Scheduled Tribes. The proportion of households having 2 room accommodations is 37.0 for Scheduled castes and is 28.5 for Scheduled Tribes. The proportion of households having 3 room accommodations in Scheduled Castes is 11.4 percent and is 8.4 per cent in Scheduled Tribes.

Source: Census of India 2001, H - series : "Tables on Houses, Household Amenities and Assets."

Note: Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where burnt bricks, G.I. Sheets or other metal sheets, stone, cement concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, mud, unburnt bricks, wood etc.are used for roofs. reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch.

Table 49 gives the details about the percentage distribution of households living in permanent, semi-permanent and temporary houses in the district. As many as 32.0 per cent of households of the district are living in houses made of pucca materials, 59.6 per cent households are living in houses of semi-permanent nature and houses of 8.5 per cent households are made of temporary materials. In rural areas 23.8 per cent households are living in permanent houses, 66.7 per cent households are living in semi-permanent houses and 9.5 per cent households are living in temporary houses. As far as urban areas of the district are concerned, 85.7 per cent of households are living in permanent houses, only 12.8 per cent of households are living in semi-permanent houses and 1.5 per cent households are living in temporary houses. Comparatively percentage of houses of permanent nature is found to be more in urban areas as compared to those in rural areas. Among talukas households of Godhra taluka have the highest proportion of permanent houses (48.4 per cent) while households of Morwa (Hadaf) taluka have the lowest proportion of permanent houses (13.3 per cent). The highest proportion of 80.7 per cent semi permanent houses of household is recorded in Shehera taluka, while the lowest of 36.2 per cent proportion is recorded in Jambughoda taluka.

Source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note : * Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

@ Bathroom means bathroom within the house.

$ Toilet means toilet within the house.

Drainage means closed and open drainage.

Percentages are given in brackets.

Table 50 indicates that 63.5 per cent households in the district have been provided with drinking water supplied either from a tap or a hand pump/tube-well, 57.5 per cent households have the provision of electricity in their houses. The bathroom facility is available to only 23.9 per cent households within their premises. Only 14.9 per cent households are having bathroom facility in rural areas whereas in urban areas bathroom facility is available to 82.8 per cent of the households. Toilet and drainage facilities in the district are available to 19.1 and 13.2 per cent of households respectively. Facilities like drainage and toilet are available to more households in urban areas as compared to rural areas.

Among talukas, 83.2 per cent of households of Khanpur taluka have facility of Improved drinking water while 31.7 per cent of households in Morwa (Hadaf) have this facility. 75.1 per cent of households in Lunawada taluka have electricity while 40.0 per cent households in Morwa (Hadaf) have electricity. As regards bathroom facility 40.6 per cent households in Godhra and 10.6 per cent households in Kadana and 10.8 per cent in Morwa (Hadaf) have such facility within the premises. As many as 36.1 per cent households in Godhra taluka and only 6.0. per cent households in Morwa (Hadaf) taluka have toilet facilities within their premises. Drainage facility is available to the highest of 28.9 per cent households in Godhra taluka and the lowest of 3.3 per cent households in Shehera taluka.

Note : Percentage in brackets

Source : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 51 gives the details about the percentage distribution of households by type of fuel used for cooking purposes. There are nine type of fuel used for which data is presented in the table. It is observed that fire wood is the dominant fuel used for cooking and it is used by 75.8 per cent of households. Percentage of households using fire wood for cooking varies between 62.1 per cent in Godhra taluka to about 89.8 per cent in Kadana and Morwa (Hadaf) talukas. Fire wood for cooking is used by 84.2 per cent households in rural areas and by 21.2 per cent households in urban areas. Use of Cooking Gas (LPG) for cooking is next to fire wood as it is used by 9.4 per cent of the households in the district. Cooking Gas (LPG) is used by 53.5 per cent of the urban households while in rural areas only 2.7 per cent of the households use LPG for cooking. Thus the use of LPG in urban areas is comparatively more prevalent. Only 7.4 per cent of households in the district use crop residue as fuel. As much as 4.7 per cent of households are using kerosene as a fuel in the district. Kerosene as a fuel is used by 21.4 per cent households in urban areas while in rural areas this fuel is used by only 2.2 per cent of households.

Source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 52 details the number of households availing banking services and number of households having possession of assets such as radio/transistor, telephone, bicycle, scooter and car etc. There are 362,908 households in the district. Out of these households, 29.9 per cent households are availing banking services. As many as 15.8 per cent households have radio/transistor. Television is possessed by 12.0 per cent households. Telephone is available in 4.5 per cent households. Bicycle is available to 26.3 per cent households. Scooter/ motorcycle/moped and car/jeep/van are used by 8.4 and 1.1 per cent of households respectively in the district.

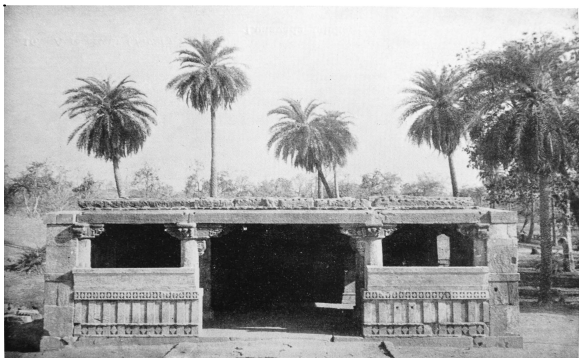

(viii) Major social & cultural events, natural & administrative development and significant activities during decade.

No significant development, social or cultural, worth mentioning occurred during the decade. During British rule and after the independence of the country Panch Mahals district was constituting of Five Mahals namely Godhra, Halol, Kalol, Jhalod and Dohad. The state Government reconstituted erstwhile Panch Mahals district and two separate district Panch Mahals and Dohad came into existence from 2nd October,1997. New Panch Mahals district has 11 talukas.

Physical geography of the district is mostly stony, also the agriculture in the district is mostly dependent on the rain water, which lead to wide scale migration. After concerted efforts of the government agencies lift irrigation and farm pond schemes and check dams have proved beneficial to cultivators.Though Panch Mahals is not among the foremost industrial districts, Halol and Kalol towns have developed as industrial centers of the district. Various industries have developed in and around these towns.

(ix) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district.

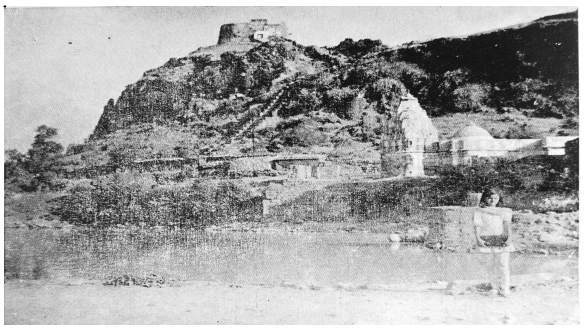

Name of Taluka : Lunawada
Name of Village : Lavana
Location Code : 01144300

(Temple of Kaleshwari Mata)

Lavana is situated 20 kms. North of Lunawada on the Lunawada- Pandarwada road. There is an ancient site known as Kaleshri-ni—nal with an old temple of Kaleshwari or Kaleshri Mata. The place is called so because of the nal or valley formed in the range of hills within which the Mata temple is situated. The temple appears to have been built between 10th and 11th century under the Chalukyas or Parmars of the Solanki period. There are two structures of five-storeyed step-wells, now in ruins. They were constructed in the 13th or 14th century and are popularly known as Sasuni Vav (mother-in-law's step-well) and Vahuni Vav (daughter-in-law's step-well). The temple, in its present form bears a worn-out inscription on one of the balconies of the eastern window. The inscription records the date of the repairs carried out in Samvat 1605 (A.D.1549) by the Rajput ruler of Lunawada. In the Kaleshwari Mata temple, the image of Mata is not there, but recently, an image of Shiv Natraj is installed. There is also an image of Goddess Mardasur Nandini installed in one wall in the sanctum sanctorum.

Name of Taluka : Halol
Name of Village : Champaner
Location Code : 01247300

(The Pavagadh Hill)

The Pavagadh hill is a famous place of pilgrimage situated in the Halol taluka of the district. Pavagadh is well-known as the strongest hill fortress of the ancient Gujarat. The fifth plateau is crowned by the famous Maha Kali temple. The Pavagadh hill covers about 42 kms in circumference. The distance from the foot of the hill to the Kalika Mata's temple on its highest peak is about 5 kms. Behind the gate on top of the slope above the cliffs, there follows a fortification line, ending on the west side in a building known as Sat Mahal. The Pavagadh is a holy place where pilgrims from all over Gujarat come in large numbers everyday.

Name of Taluka : Godhra
Name of Village : Tuwa
Location Code : 01221400

(Hot-water Springs)

It is known for the natural hot water springs containing sulphur. Many people visit the place for taking bath in the hot water. Near the spring there is an ancient Shiv temple. It is constructed according to the Orissa style in such a way that a part of the constructed portion can be replaced and readjusted without disturbing the other parts of the structure. It

is believed that the saint Sharbhang had lived here in an Ashram. Lord Ramchandraji is also said to have stayed in this Ashram during his exile. The scattered ruins of the old construction are found near this place. The construction of the old ruined fort is distinguishable from the typically Gujarat pattern.

Name of Taluka : Santrampur
Name of Town: Santrampur
Location Code :41701000

(The Panchayatan Temple)

Santrampur is situated on the bank of the river Chibot. There are several temples among which may be mentioned Harsiddhi Mata temple of the titular Goddess of the ex-rulers, a Swaminarayan temple, a Gokul Nathji temple, a Ramji Mandir and a Pranami Mandir. There are two old mosques one of which was built early in the 19 th century.

Sources : (1) District Gazetteer. (Panch Mahals District)
(2) Gujarat tourism.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The Panch Mahals district has large population of Bhils. They have come out of the forests and now they can be seen near the village area. Their expertise in bow and arrow is still unchallenged. Most Bhils are black in complexion as they reside in jungles. The Bhils are basically a gentle community. The Bhil men and women are not timid in nature like some other tribes. They sing their folk songs of bravery and spirit. Living in hills and forests has brought considerable poverty to them. The Bhils use roots, maize and other similar type of corns in their food. Some Bhils live on chicken and duck too.

Traditional Bhil males wear a loin cloth in the form of a knickers. Put a piece of cloth on the shoulder and tie a turban. Some keep long hair tide in the turbans where they keep a comb, a piece of glass and a flint stone. Bhil women put on a petticoat with a cut from the front, which is tied at the back. The blouse has strings at the back side instead of buttons.

Adivasi women of Panch Mahals wear chhid of beads. Toraniya, hansadi, sanklu around neck; nickel silver or silver Lodiyu, vedla and medli in ears; patdi of kanthi, zeal, Godiva, Karwandi on wrists and fore arms. Whereas Gamit and Chaudhari Adivasi men wear silver chudiya or kandiyo in ears. Gamit women wear SER made of white stone around neck.

Ornaments enumerated above are traditionally inherited by folk people and even today with some modifications here or there in shape or size, they are in vogue in folklife thereby traditions have been maintained.

Adivasi men of Panch Mahals district with white turban on head and black blouse for torso and Bokani on face, dance with naked sword in their hand supported by Tal of Dhol. During Holi festival, Adivasis of Panch Mahals dance with a big Dhol.

Some strange customs are interwined with the folk fairs and bear the peculiar names. For instance, Chaadiya melo is held by Adivasis of Panch Mahals. In the fair, held soon after Holi, a wooden Chaadiyo is prepared with coconut head, eyes of clay dishes, and a turban over the head and clad in new clothes. The chaadiyo is tied on the top of a tree and Adivasi women dance beneath the tree.

The person who climbs the tree is brought back to the ground by throwing stone on him by adivasi women but the one who successfully climbs the tree amid all these tortures is held victorious and dresses put on the Chaadiya are presented to that man and then women dance gayfully with play of dhol in praise of the victory.

On the second day of Holi, Chul melo (fair) is held in Panch Mahals. A rectangular ditch is made in which fire is lighted by burning babul tree wood. Advasi men and women with coconut and pot of water in their hands would walk over the fire barefooted seven times. Thereafter, with hails to the fire they

break coconut. It is the fact that they do not get burnt even though barefooted. Advasis also take vows for this fire God for protection and welfare of their children and domestic animals.

Pavagadh is the gateway of Panch Mahals. It is the area of the tribals and the backward people. The government has taken special care for the development of the area. It has granted many concessions and offered subsidies to the new industries coming up in this area. As a result of it, Halol and Kalol near Pavagah have turned into a virtual industrial estate. Dhabadungari, a nearby place has a very nice temple. The locations of hilly areas around Halol provide a very good sight. A film studio at Halol has this added advantage. On the eastern side, the Rangpur Ashram, run by Mr. Harivallabh Parikh is busy with the activities for the upliftment of the local tribes.

It is well known as the strongest hill fortress of ancient Gujarat. The hill covers about 42 km. in circumference. The distance from the foot of the hill to the Kalika Mata's temple on its higher peek, is about 5 km. On top of the slope above the cliffs, there follows a fortification line, ending in a building known as Sat Mahal. Among the other places worth visiting are the Makai Kothar Navlakha Kothar, the Maulia or the Muslim citadel on the top plateau, the palace of Khapra Zaveri, the Masjid in ruins near Machi, the three tanks, namely, Dudhia, Chhasia and the Telia tanks. An added attraction at the Pavagadh Hill is the ropeway or a cable car system between Machi village and the final climb.

CHANDRAKANT SHETH (1938):

Chandrakant Sheth has contributed to the field of poetry, literary essays, drama, translation and criticism. He was born at Kalol in Panch Mahals district. He obtained his B.A. in 1959 and M.A. in 1961. He did his Ph.D. in 1979 from Gujarat Vidyapith. The subject of his thesis was "Umashanker, the creative laureate and critic".

He has been teaching in College and at Post Graduate level since 1961. He has also been the guide for the students of M.Phil and Ph.D. He joined Mahadev Desai Samaj Vidyalaya at Gujarat Vidyapith as a Professor of Gujarati in 1985. He is active in almost all the activities in the field of literature.

His poetic creations include *'Pavan Ruperi' 'Ughadati Diwalo' 'Chandaliyani Gadi' 'Padghan' 'Pele Par' 'Shabda Surilo'* etc. *'Swapna Pinjar'* drama collection of essays *'Nand Samvedi'* and *'Chahera Bhitar Chahera'* and memoirs titled *'Dhoolmani Pagalio'*. He has also given some good volumes of research and criticism. He has been awarded Ranjitram Chandrak and prize from Sahitya Academy of Delhi.

SHRI RAMANLAL VASANTLAL DESAI (1892-1954)

Shri Ramanlal Vasantlal Desai, (1892-1954) the eminent and popular novelist of Gujarat, was born in 1892 at Sinor in the Baroda district. He was a native of Kalol of Panch Mahals district. He got his M.A. degree in 1916 with Gujarati. Literature and Sociology were his favourite subjects. After completion of his studies, he joined the Baroda State service. Since 1917, he started writing articles in journals. His first drama *'Sanyukta'* was published in 1920. Thereafter he wrote a social drama *'Shankit Hrudava'* in 1925. His first novel *' Jayant'* was published in 1925, and thereafter, his *'Shirish', 'Kokila', 'Purnima', 'Bansari', 'Gram Laxmi', 'Bharelo Agni'* and other novels and short stories were published. A Raibahadur Hargovinddas Kantawala prize was awarded to him for his novel *'Divya Chakshu'*. In 1932 *'Gujarat Sahitya Sabha'* awarded him Ranjitram Gold Medal for his works, which gave him a prominent and permanent place in the literary world of Gujarat. He was President of *'Pragatishil Sahitya Mandal'* and also of the 'Baroda Sahitya Sabha' in 1937. His novels *'Kokila'* and *'Divya Chakshu'* and some other books were translated in Hindi, Marathi and in other Indian languages. Films based on his famous novels *'Kokila'* and *'Purnima'* were produced in Gujarati. Seventy books were published during the during his lifetime. A number of his books were also published posthumously.

(xi) Scope of Village Directory and Town Directory :

As mentioned earlier, the District Census Handbook is brought out in two parts-Part A and Part B. Part A covers the non-census data of village directory and town directory whereas part B covers the primary

census abstract data of 2001 Census. The scope of village directory and town directory is discussed below.

Scope of Village Directory

For the census work, the villages in the district have been arranged taluka wise and within the taluka they are shown location code wise. Each village is assigned a location code number for the purpose of identification. In 2001 Census, all the villages have been given unique 8-digit code number, which will remain constant across the census, and shall make it easy to do comparative study. Eight digit code's last two digits are especially provided to take into account exigencies arising due to jurisdictional changes of villages by partition, amalgamation etc. This time it has been kept '00'. Prior to the village directory information, a map and alphabetical list of villages for each taluka is given in Part A. Village directory contains the non-census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition, it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the co-relation of amenities with the number of households and population they serve. If an amenity is not in existence in the referent village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given. The broad range are (-5 km), (5-10 km.) and (10+ km.). Some additional information has been added viz.(1) Number of Banks, (2) Credit Societies, (3) recreational and cultural facilities, (4) Receipt of Newspaper / Magazine, (5) Income & Expenditure of the village and (6) Name of the three most important commodities imported, manufactured/ produced & exported. This time information regarding Market & Hat facility has been deleted.

The village directory also carries the following appendices.

Appendix-I	It gives the taluka wise abstract of educational, medical and other amenities available in the villages of the district.
Appendix-I-A	Indicates number of villages Taluka wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix-IV	Taluka wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates Taluka wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

Scope of Town Directory

Town Directory covers the non-census data for each town. It presents important and useful

information like civic and other amenities available in all the towns of the district. The information in town directory is covered in following seven statements, viz. statements I to VII.

Statement-I Town wise class, name, civic administrative status of the town, its area, growth rates, density and sex ratio.

Statement-II Physical aspects of each town.

Statement-III Income and expenditure of each town.

Statement-IV Civic and other amenities in respect of each town.

Statement-V Availability of medical, educational, recreational and cultural facilities in each town.

Statement-VI Trade, commerce, industry and banking activities in each town.

Statement-VII Civic and other amenities in slum areas of each town.

In all the Statement except VII the towns are arranged in the alphabetical order within the district. The details of these statements are given in the analytical portion of the town directory. In addition to the above statements, an appendix showing the towns with their outgrowths with population, is also given after the town directory statements.

PART – A

VILLAGE AND TOWN DIRECTORY

SECTION - I VILLAGE DIRECTORY

Section – I Village Directory

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory.All the villages within the Taluka/CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C

(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note :*-There is no Middle school in the Gujarat State.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathi Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, o-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud Road	MR
(iii)	Foot Path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable Waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Cultivable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Taluka/C.D. Block wise of the district.

Appendix-I-A Indicates number of villages Taluka/ C.D. Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages Taluka/ C.D. Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages Taluka/ C.D. Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities available

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV Taluka/C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII-A, VII-B The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Taluka/C.D. Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

(b) List of Villages Merged in Towns and Outgrowths at 2001 Census :

Sl. No.	Name of Taluka	Name of Village	Location Code Number	Merged in which Town or UA
1	2	3	4	5
1	Kalol	Derol Station	50310102	Kalol UA
2	Halol	Duniya	50320102	Halol UA

TALUKA/C.D. BLOCK

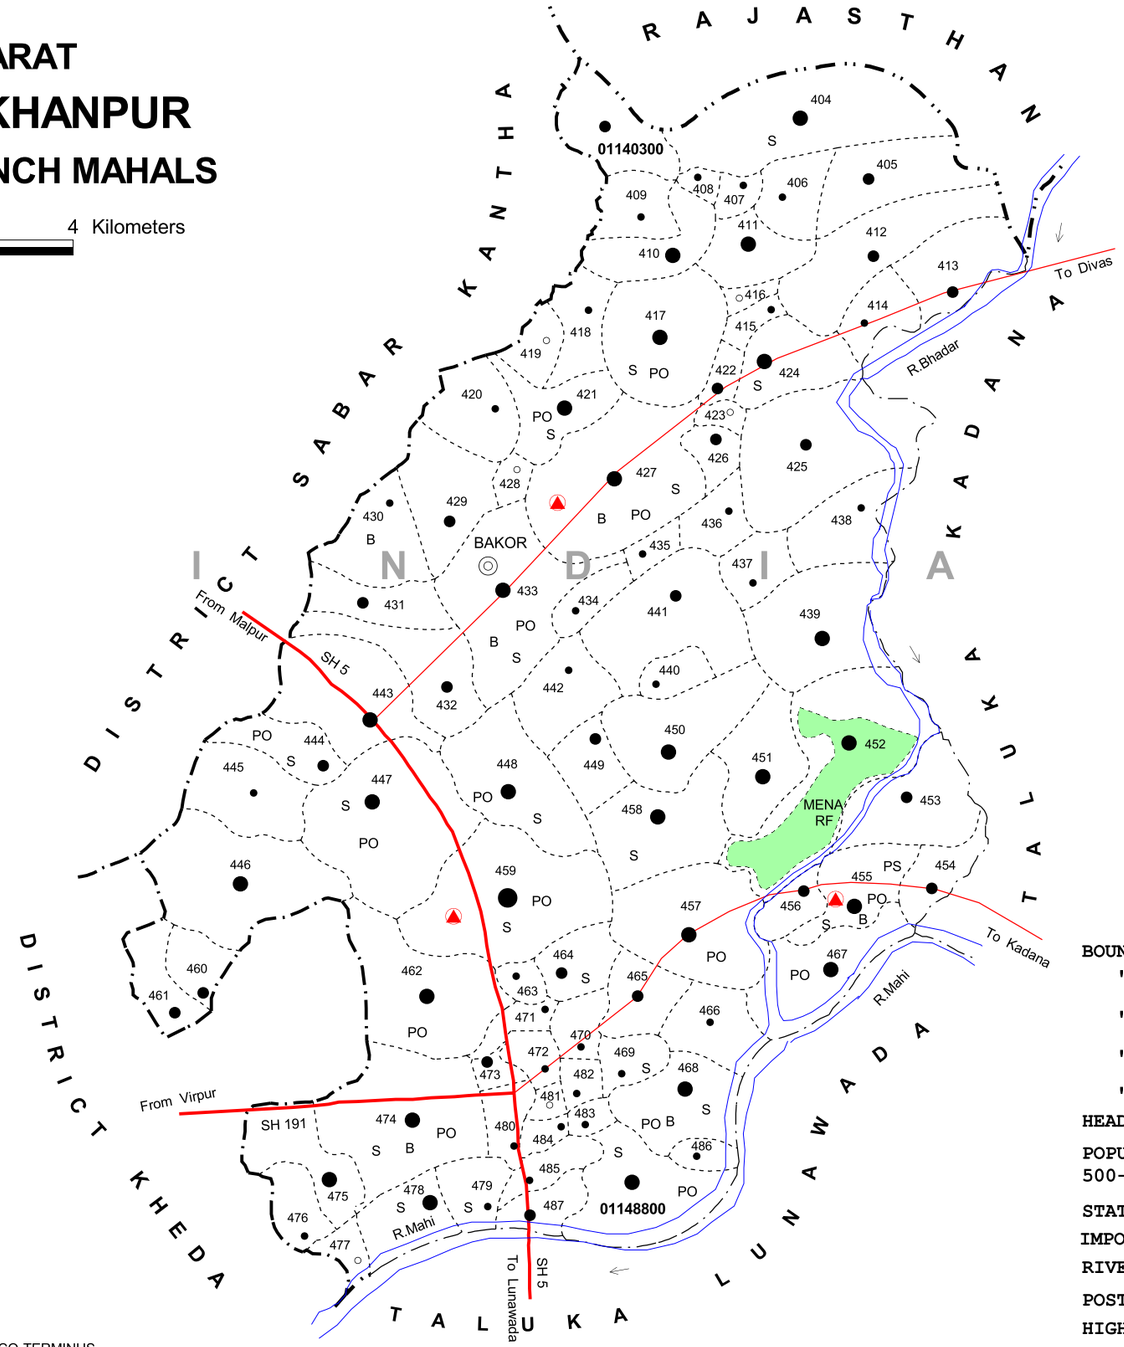

KHANPUR

GUJARAT

TALUKA KHANPUR

DISTRICT PANCH MAHALS

2 0 2 4 Kilometers

C.D. BLOCK BOUNDARY OF KHANPUR IS CO-TERMINUS WITH TALUKA BOUNDARY.

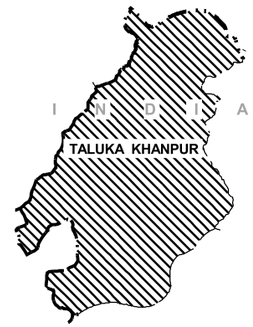

R.F. WHICH COMES UNDER THE VILLAGE , THAT VILLAGE NAME ITSELF IS A RESERVED FOREST NAME.

TOTAL AREA	322.72 Km^2
TOTAL POPULATION	85 047
TOTAL NUMBER OF VILLAGES	86
DISTANCE FROM DISTRICT HEADQUARTERS TO TALUKA	61 Kms

TALUKA KHANPUR

Note : * In Gujarat State the levels of education are classified as under

(i) Primary School (From Std. I to VII passed)

(ii) Secondary/Matriculation (From Std. VIII to X passed)

(iii) Higher Secondary (From Std. XI to XII passed). Hence details under column 6 is not shown.

SECTION – II – TOWN DIRECTORY

Town Directory

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one lakh (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory.

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies

like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify)e.g. Sanskrit Pathshala,Senior basic school,Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note: *There is no Middle school in the Gujarat State.

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART-B

PRIMARY CENSUS ABSTRACT

Primary Census Abstract

Brief note on Primary Census Abstract :

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-district, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the

Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Household, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely (i) Cultivators, (ii) Agricultural labourers (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely India, State/Union Territories, Districts and Cities, Urban Agglomerations (Population 100,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made

available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The following Abbreviations have been used in the Primary Census Abstract for facility of presentations:

1	Municipal Corporation/ Corporation	M. Corp.
2	Municipality	M

9	Census Town	CT
10	Total	T
11	Rural	R
12	Urban	U

The following conversion factor has been used for converting areas into hectares and hectares into km2

Acres x 0.40467 = hectares

100 Hectares = 1 Km^2

DISTRICT
PRIMARY CENSUS ABSTRACT
(GENERAL)

Note: *These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

Note: The present Panch Mahals district is bifurcated from old Panch Mahals district and new Dohad district is created from it by separating 7 talukas vide the Government Notification No. GHM-97-167-M-PFR-2197-2589-L dated 24-9-1997. By Notification No.GHM-97-120-M-PFR-2397-2593-L dated 15-10-1997 new taluka of Khanpur was created from Lunawada taluka of the same district.By Notification No. GHM-97-120-M-PFR-2397-2593-L dated 15-10-1997 Morwa(Hadaf) taluka was created by separating it from Godhara taluka. The Present Panch Mahals district has 11 talukas.

The details of undivided Panch Mahals have been discussed in Annexure II and III. The details of 2001 census data of Panch Mahals district have been discussed in Annexure IV, VI, VII and VIII, while Annexure V provides the recast data of 1991 census and separate data of 2001 census of Panch Mahals district.

ANNEXURE – II

FERTILITY AND MORTALITY-1991 CENSUS

Fertility Level:

Population is a dynamic variable and keeps on changing. Increase due to birth and decrease due to death affect the population size of an area. Thus the birth and death are the two most important vital events. Natural increase is the excess of population by births over decrease of population by deaths at a given point of time. The births have direct correlation with the fertility.

The data on fertility levels and trends as revealed by the fertility indices of the 1991 Census like Crude Birth Rate (CBR), Age Specific Fertility Rate (ASFR) and Total Fertility Rate (TFR) are presented and analyzed below. The Definitions and concepts of fertility indices frequently used have already been explained in Analytical Note.

Death Rate:

Death process in demographical terminology is called as mortality. The rate at which death events occur reveals about the standard of living and state of health. Statistical data on causes of death help us in controlling the spread of diseases and suggests new curative methods to medical authorities.

Child Mortality:

Information about questions on children ever born and children surviving canvassed for all ever married women was tabulated by age of the mother. From this estimate of child mortality have been worked out by using Brass technique.

	STATE	**33.6**	**4.2**	**5.4**	**136**	**175**	**467**	**571**	**19.0**

Source: Occasional Paper No 1 of 1997.

The Annexure III shows various fertility indicators of all the districts and State as per 1991 Census. It can be observed that Panch Mahals district had Crude Birth Rate (CBR) of 34.4, which is lower than that of 33.6 for the State. Total Fertility Rate (TFR) of 4.7 was lower than that of 4.2 for the State while Total Marital Fertility Rate (TMFR) of 5.6 was close to that of 5.4 for the State. General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) of the district were 150 and 179 respectively, which were higher than those for the State having GFR of 136 and GMFR of 175.

Ratio of the number of births of children in the age group 0-4 and 5-9 years per 1,000 women of the age group 45-49 (CWR) are given above. It was seen that CWR (0-4) of Panch Mahals district was 604, which was higher than the state CWR of 467 and CWR (5-9) of the district was 655 which was also lower than the State CWR (5-9) of 571.

Mean age at marriage means age (in completed years) at which the woman was married. In case a woman was married more than once, the age at which she was married first, was recorded. The mean age at marriage in the district in 1991 Census was 18.8 and the same for Gujarat State was 19.0. Thus the mean age at marriage of Panch Mahals district was slightly lower than that of the State.

NUMBER OF CHILDREN EVER BORN AND SURVIVING PER EVER MARRIED WOMAN IN AGE GROUP 45-49, 1991 CENSUS

	STATE	**4.2**	**4.4**	**3.8**	**3.8**	**4.0**	**3.6**

Source: Gujarat State District Profile 1991.

As per above table there were 4.4 children born per ever married woman in the age group of 45-49 with 4.0 surviving children per woman in Panch Mahals district which were marginally higher as compared to the State having 4.2 children born per ever married woman and 3.8 children surviving per woman.

ANNEXURE – IV

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH/ PLACE OF LAST RESIDENCE, 1991 CENSUS

Migration

Migration is a factor in changing the size and structure of the population. The migration process affects the areas to which migrants have moved and areas which they have left. Migration is a form of geographical mobility between one geographical unit to another, involving a change of residence from the place of origin/birth to the place of destination or place of new settlement from the last residence. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

Internal and International Migration

The migration movements are of four types –

1. Migration within the district of enumeration (intra-district migration)
2. Migration from one district to another but within the State
3. Migration from one state to another state of the country (inter-state migration) and
4. Migration from one country to another country.

The first three together constitute internal migration while the last type of movement is called international migration.

Migration by place of birth:

The absolute number and percentage distribution of Migrants by place of birth in total population of Panch Mahals district and the State at 2001 Census are as following.

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH-1991 CENSUS

Migration By Place of Birth	Gujarat			Panch Mahal		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7

	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)

Source: Gujarat State-D-Series Tables-1991

As per 2001 census there were 18,810,592 migrants in Gujarat whose place of birth was different than the place of enumeration. Out of such migrants, 56.9 per cent were born elsewhere in the district of enumeration, 29.2 per cent were born in other districts of the state, 13.4 per cent were born in other states of India and 0.4 per cent were born in other countries.

As per 2001 census in Panch mahals district, out of total of 602,743 migrants, 82.3 per cent were born elsewhere in the district of enumeration, 14.1 per cent were born in other districts of the state, 3.4 per cent were born in other states of India and only 0.1 per cent migrants were born in other countries. No migrant was reported under the category of "Unclassified" in state as well as in Panch mahals district as per 2001 census.

INTER STATE IN-MIGRANTS TO GUJARAT STATE AS PER 2001 CENSUS BY PLACE OF BIRTH

Place of Birth	Gujarat		Panch Mahal	
	Migrants	Percentage to Total Migrants	Migrants	Percentage to Total Migrants
1	2	3	4	5
Total Migrants	**2,520,676**	**100.0**	**20,609**	**100.0**
Madhya Pradesh	159,055	6.3	3,562	17.3
Maharashtra	734,945	29.2	1,938	9.4
Rajasthan	471,109	18.7	7,315	35.5
Uttar Pradesh	520,094	20.6	3,368	16.3
Other States	635,473	25.2	4,426	21.5

Source: Gujarat State-D-Series Tables-2001

The above statements show migration in Gujarat and in Panch mahals district from other states as per 2001 census. It can be seen that as per 2001 census there were 2,520,676 persons in the state who were born in other states of India. Out of such persons 29.2 per cent were born in Maharashtra, whereas the proportion of inter state migrants born in Uttar Pradesh, Rajasthan and Madhya Pradesh was 20.6, 18.7 and 6.3 per cent respectively. The remaining 25.2 per cent were born in other states of India.

As regards Panch mahals district it can be seen that there were 20,609 migrants in this category in 2001.The state-wise distribution reveals that as per 2001 census out of these 35.5 per cent were born in Rajasthan, followed by 16.3 per cent born in Uttar Pradesh, 17.3 per cent were born in Madhya Pradesh and 9.4 per cent of such migrants were born in Maharashtra.The remaining 21.5 per cent were born in other states of India.

Migration by place of last residence:

Distribution of migrants by place of last residence and percentage distribution of in-migrants from other States to Gujarat by place of last residence are presented below.

DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE IN GUJARAT 2001 CENSUS

Place of Last Residence	Gujarat			Panch Mahal		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Migrants	**19,221,602 (100.0)**	**6,694,122 (100.0)**	**12,527,480 (100.0)**	**618,435 (100.0)**	**110,901 (100.0)**	**507,534 (100.0)**
Last residence elsewhere in the district of enumeration	12,248,452 (63.7)	3,506,051 (52.4)	8,742,401 (69.8)	536,577 (86.8)	85,629 (77.2)	450,948 (88.9)

Source : Gujarat State-D-Series Tables-2001

There were 19,221,602 migrants by place of last residence in Gujarat according to 2001 census. The proportion of male and female migrants whose place of last residence was elsewhere within the district of enumeration was 52.4 per cent and 69.8 per cent respectively in 2001.The reason for higher proportion of female migration is marriage. In Gujarat as per 2001 census, out of total migrants, 63.7 per cent of migrants were residing elsewhere in the district of enumeration, 24.6 per cent were those whose last residence was in other districts of the state while last residence of 11.4 per cent migrants was in other states of India and only 0.3 per cent were such whose last residence was in other countries. There were no migrants in the category titled "Unclassified ".

In the district, as per 2001 census, there were 618,435 migrants by place of last residence. Out of total migrants, 86.8 per cent of migrants were such whose place of last residence was elsewhere in the district of enumeration, 10.7 per cent were such whose last residence was in other districts of the state while last residence of 2.4 per cent migrants was in other states of India and only 0.1 per cent migrants last residence was in other countries. There were no migrants in the category titled "Unclassified".

Migration by reason:

The following statement gives distribution of migrants by reasons of migration from other States of India.

MIGRATION FROM OTHER STATES OF INDIA BY PLACE OF LAST RESIDENCE IN GUJARAT 2001

States	Total Migrants	Reasons						
		Work/ Employment	Business	Education	Marriage after birth	Family Moved	Moved with household	Others
1	2	3	4	5	6	7	8	9

Source: Gujarat State-D-Series Tables-2001

It can be seen form the data given above that the main reason for the migration was "Work/ employment". As much as 30.3 per cent of migrants moved due to work or employment as per 2001 census, this was followed by 26.5 per cent of migration which was due to the reason of "Moved with household". In 2001, the proportion of migration due to marriage was 17.0 per cent. The reason for 9.4 per cent of migration was Business, and 6.2 per cent of migration was due to the reason titled "Moved after birth" and only 0.6 per cent of migration was for Education. The remaining 10.2 per cent of migration was due to other reasons.

ANNEXURE – V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991 AND 2001 CENSUSES

Religion is the basic cultural characteristics of the population. In secular country like India several religions have thrived and every decennial Census provides an interesting picture of the religious persuasions of the people. The data on religion yielded by the Census are of immense use for the Anthropologists, Sociologists, Demographers, Administrators, Planners and also for laymen.

The six main religions are i) Hindu, ii) Muslim, iii) Christian, iv) Sikh, v) Buddhist, and vi) Jain were recorded. In respect of 'Others', the actual religion returned was recorded. If a person said that he has no religion, it was recorded accordingly and if any person refused to state his religion it was recorded as 'religion not stated'.

Source: Gujarat State-C-Series Tables-2001

The statement above gives the details of distribution of population for Gujarat state and Panch mahals district by six major religions as per 2001 census. The 2001 census data reveals that the proportion of Hindus was 89.1 per cent in the state of Gujarat against 93.7 per cent recorded in Panch mahals. The comparison of the same with 1991 data shows that the proportion of Hindu was 89.5 per cent at state level while in the district the proportion of Hindu was 94.1 per cent.

The proportion of Muslims has 8.7 per cent at state level and 5.4 per cent at district level in 1991 census whereas in 2001 census at state level this proportion was 9.1 per cent and in the district it has increased by 0.6 per cent to 6.0 per cent.As per 1991 Census, the proportion of Christians was 0.4 per cent in total population of the state which in 2001 Census has increased to 0.6 per cent. At district level the proportion of Christians has remained same at 0.1 per cent in both the censuses. As per 1991 census the proportion of Jain was 1.2 per cent and 0.3 per cent in the state and in the district respectively, while in 2001 the propotion of Jain is found at 1.0 per cent in the state and at 0.2 per cent in the district. In number terms the population of Jain has decreased in district while it has shown an increase at state level. The population proportion of Christian, Sikh, Buddhists, and people following other religions had not shown any significant changes in 2001 as compared to 1991. As per 1991 census there were 6,478 persons in the state in the category of “Religion not stated” and in 2001 there were 33,578 persons in this category. In the district only one person was reported in the

category of "Religion not stated" in 1991 while 398 persons were reported under this category in 2001.

The population proporion of Sikh and Buddhist was not so significant in the district in 1991 as well as in 2001 census. In Gujarat there were 14,213 persons in 1991 in the category of "Other Religions" while there were 28,698 persons in this category in 2001.In Panch mahals district there were 44 persons in 1991 in the category of "Other Religions" while in 2001 there were 76 persons in this category.

ANNEXURE-VI

MARITAL STATUS OF POPULATION AS PER 2001 CENSUS

The details of sex-wise marital status for Gujarat State and Panch Mahals District as 2001 Census is given below:-

MARITAL STATUS BY SEX-2001 CENSUS

Sl.No.	Marital Status	Gujarat			Panch mahals		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
1	Never married	24,132,905 (47.6)	13,647,899 (51.7)	10,485,006 (43.2)	970,747 (47.9)	537,927 (51.5)	432,820 (44.2)

Source: Gujarat State -C- Series Tables-2001

As per 2001 census the number of married persons was 24,222,087 (47.8 per cent) in Gujarat and 956,307 (47.2per cent) in Panch mahals. The proportion of never married persons was 47.6 per cent in Gujarat State and 47.9 per cent in Panch mahals. The proportion of widowed was 4.2 per cent in the state and 4.4 per cent in the district, while the proportion of Divorced/Separated was 0.4 in the state as well as in the district.

DISTRIBUTION OF RURAL URBAN POPULATION BY MARITAL STATUS-2001

Sl.No	Marital Status	Gujarat			Panch mahals		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	Never married	24,132,905 (47.6)	15,144,193 (47.7)	8,988,712 (47.5)	970,747 (47.9)	844,748 (47.7)	125,999 (49.7)
2	Married	24,222,087 (47.8)	15,058,801 (47.4)	9,163,286 (48.4)	956,307 (47.2)	839,875 (47.4)	116,432 (46.0)
3	Widowed	2,111,678 (4.2)	1,403,972 (4.4)	707,706 (3.7)	89,607 (4.4)	79,701 (4.5)	9,906 (3.9)
4	Divorced/Separated	204,347 (0.4)	133,801 (0.4)	70,546 (0.4)	8,616 (0.4)	7,591 (0.4)	1,025 (0.4)
5	Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)
	Total	**50,671,017 (100.0)**	**31,740,767 (100.0)**	**18,930,250 (100.0)**	**2,025,277 (100.0)**	**1,771,915 (100.0)**	**253,362 (100.0)**

Source: Gujarat State -C- Series Tables-2001

It can be seen that proportion of never married persons was higher at 47.9 per cent in the district as compared to 47.6 per cent recorded in Gujarat state as per 2001 census. In rural areas the proportion of never married persons was 47.7 per cent in the state as well as in the district. In urban areas the proportion of never married persons was at 47.5 per cent in state and 49.7 per cent in the district. As per 2001 census the proportion of married persons, in rural areas, was 47.4 per cent, in both, the state as well as in the district. In 2001 census, in urban areas the proportion of married persons was 48.4 per cent in Gujarat and 46.0 per cent in Panchmahals. The proportion of widowed in rural areas, was 4.4 per cent in the state and 4.5 per cent in the district. The same for urban areas was 3.7 per cent in the state and 3.9 per cent in the district. The proportion of divorced/separated was 0.4 per cent in the state as well as in the district. There was no population reported under the category titled "Unclassified".

ANNEXURE – VII

AGE, SEX AND EDUCATION IN THE DISTRICT AT THE 1991 CENSUS

Literacy has occupied an important position in Indian Census in one form or the other from the very beginning. The definition of literates as adopted is "A person who can both read and write with understanding in any language is to be taken as literate". A person who can merely read but can not write was not treated as literate. It is not necessary that a person who was literate should have received any formal education or should have passed any minimum educational standard. All children below the age 7 are treated as illiterate. While processing the literacy data population of age group 0-6 is excluded.

The following statement gives the distribution of literates and illiterates by broad age groups and sex in Panch mahals district as well as the state at 2001 census:-

LITERACY BY AGE -GROUP AND BY SEX-2001

Age Group	Particular	Gujarat			Panch Mahals		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
7-14	Population	9,091,764	4,814,440	4,277,324	391,566	204,771	186,795
	Literates	7,599,713	4,206,428	3,393,285	324,857	180,625	144,232
	Literacy rate	(83.6)	(87.4)	(79.3)	(83.0)	(88.2)	(77.2)
15-29	Population	14,247,890	7,477,081	6,770,809	525,375	275,191	250,184
	Literates	11,060,357	6,435,890	4,624,467	371,793	234,068	137,725
	Literacy rate	(77.6)	(86.1)	(68.3)	(70.8)	(85.1)	(55.0)
30-44	Population	10,629,518	5,514,675	5,114,843	399,014	203,102	195,912
	Literates	6,709,301	4,203,305	2,505,996	198,220	142,348	55,872
	Literacy rate	(63.1)	(76.2)	(49.0)	(49.7)	(70.1)	(28.5)
45-59	Population	5,623,141	2,924,019	2,699,122	223,422	115,117	108,305
	Literates	3,056,151	2,050,778	1,005,373	92,179	71,490	20,689
	Literacy rate	(54.3)	(70.1)	(37.2)	(41.3)	(62.1)	(19.1)
60+	Population	3,499,063	1,628,474	1,870,589	142,649	69,241	73,408
	Literates	1,381,194	923,513	457,681	38,104	30,320	7,784
	Literacy rate	(39.5)	(56.7)	(24.5)	(26.7)	(43.8)	(10.6)
Age not stated	Population	47,237	26,740	20,497	1,967	1,139	828
	Literates	21,034	13,359	7,675	682	495	187
	Literacy rate	(44.5)	(50.0)	(37.4)	(34.7)	(43.5)	(22.6)

Source: Census of India -C- Series Tables-2001

It can be seen from the statement that the highest proportion of 83.6 per cent literacy rate in Gujarat state is registered in age group of 7-14 years followed by 77.6 per cent in 15-29 years age group in 2001. The same trend can be observed in Panch mahals district where the highest proportion of 83.0 per cent is registered in the age group of 7-14 years followed by 70.8 per cent in the age group of 15-29 years. The lowest proportion of 39.5 per cent in state and 26.7 per cent in Panch mahals district is found in the age group of 60 + years. As per 2001 census the female literacy rate was lower than that of males in each and every age group in the state as well as in Panch mahals District.

LITERACY BY EDUCATION LEVEL-2001 CENSUS

Sl No.	Education level	Gujarat			Panch mahals		
		Persons	Males	Females	Persons	Males	Females
