P A T O L A

Patan town filled with temples and monuments, the most important among them being the "Rani ki Vav" a stepwell dated to 1052 A.D. The Stepwell is a massive seven storeyed subterranean structure with flights of steps leading to the water level, string coursed by magnificent works of 11th century sculpture depicting voluptous women, Gods and Goddesses of the Hindu pantheon and the avtars of Lord Vishnu. Just above the water level are chambers, believed to have been reserved for queens and princesses to enjoy the coolness of the air wafting from the surface of the water and a stupendous sculpture of Lord Vishnu reclining on the coils of a serpent.

The town of Patan has always been well known for its ikkat technique of silk weaving. Ikkat weaving involves tie-dyeing the warp threads before weaving to create designs on the finished fabrics. The precise movement of coloured threads during weaving gives ikkat designs their richness. A type of ikkat weaving typical of Patan is the double ikkat, which is twice as complex as the single ikkat. Both the warp and the weft threads are tie-dyed before they are set on the loom. The technique requires amazing precision, specially at the intersection of the warp and weft threads, and in consequence it can take months to finish a single sari. The result is a richly patterned fabric, with both sides of the Sari being identical. The double ikkat method of weaving is exclusive to a few weavers of Patan, Indonesia and Japan and therefore the Patola is of considerable collectible value for textile connoisseurs. Believed to have been patronized by the Solanki Rajputs in the 12th century, when the first Salvi weavers were brought to Patan from Maharashtra, the Patola of Patan found its way to the shores of South East Asia and the nations of Europe by way of trade in medieval times.

Urban Primary Census Abstract

Annexure – I : Number of Villages under each Gram Panchayat

Annexure - II : Fertility and Mortality, 1991 Census

Annexure - III : Various measures of Fertility and Mean age at Marriage, 1991 Census

Annexure - IV : Percentage distribution of Migrants by place of Birth/ place of last Residence, 2001 Census

Annexure - V : Brief account of Main Religions in the District/ Taluka as per 1991-2001Censuses.

Annexure - VI : Marital status of population as per 2001 Census

Annexure - VII : Age, Sex and Education in the District, 2001 Census

Annexure - VIII : Distribution of different Mother Tongues returned in 2001 Census

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

2, The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census of DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (C.D.Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluka/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums in instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses.

The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of **Shri Jayant Parimal**, Director of Census Operations, Gujarat. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated : 17.10.2006.

Preface

Census is being conducted in the country every ten years as per the programme laid down by the Government of India. In these day and age of information technology, an individual has access to a variety of information covering a Kaleidoscope of interest and fields. Availability of relevant information is very vital for planners, policy makers and researchers.

The Five Year Plans have come to stay in the country and whatever development is achieved as a result of implementation of planning from the bottom level such as development of infrastructure facilities as well as basic amenities, etc. is reflected in the District Census Handbooks and they give to the readers a searching eye whether the development over the years in villages/talukas/districts is lopsided or upto the mark. This is the basic requirement of this type publications and an attempt has been made to show whether the census handbooks reasonably fulfill these aspirations/requirements.

These district Handbooks are thus useful to planners in planning from bottom as well as to administrators, researchers, educational institutions including universities and other socio-economic research centres as well as students conducting research in demography, social and economic studies as well as to the local bodies like Panchayats, Municipalities and Municipal Corporation etc.

District Census Handbook of Gujarat is a joint venture of the Government of Gujarat and the census organization of the Government of India. In the preparation of the DCHB, the role played by the census organisation is that of Census data collection, scanning of collected information, analysis of PCA. DCHB Unit of the State Government collected the basic non-census iniformation on availability of amenities relating to infrastructure in the villages of the district presented in the part A of this book. The cost of this publication is borned by the State Government. In accomplishing this task we had the ready and whole hearted co-operation of the staff at various levels of different department of the State Government. Most of the data supplied by the various departments have been cross-checked and an attempt has been made to reconcile the discrepancies as well.

I express my deep gratitude to the officers of Gujarat Government particularly Shri P.K.Laheri, Chief Secretary of Gujarat State, Smt. Netraben Shenoy, Additional Chief Secretary of General Administration Department (Planning), Shri George Joseph, Principal Secretary, General Administration Department (Personnel), Shri K.R.Vasava, Deputy Secretary, Kum.P.S. Mevada, Under Secretary and Shri P.D.Kulkarni, Section Officer of General Administration Department, Planning, Shri S.D.Mehta,Deputy Secretary and Shri I.M.Sheikh, Under Secretary, Shri Bipin Patel, Section Officer and Shri P.N.Christian, Deputy Section Officer of G.A.D. (Kh-3) for their valuable help and co-operation in fulfilling all administrative requirement in time for bringing out this publication. I am also thankful to Shri P.M. Patel, Director, Economics and Statistics helped this organisation not only by placing the competent personnel on disposal of census services on deputation but also provided valuable official statistics for this publication.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff members extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for this District Census Handbook.

I am deeply grateful to Shri J.K. Banthia, I.A.S., the Ex-Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri R.G. Mitra, Deputy Registrar General(C&T) Shri C. Chakravorty, Joint Director, Shri I.C. Agrawal,Senior Research Officer(SS), Shri S.L. Jain, Deputy Director(SS), Shri R.K. Mehta, Assistant Director(SS), Shri R.P. Singh, Dy. Registrar General(Map), Shri Himakar, Addl. Director (EDP) and Shri Anil Kumar Arora, Deputy Director (EDP) for providing technical guidance in finalising this publication.I am extremely thankful

to Shri D. K. Sikri, IAS, Registar General & Census Commissioner, India for his valuable guidance in finalizing of this publication.

Shri Jayant Parimal, I.A.S. who held the office of Director of Census Operations, Gujarat, had guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the able direction and guidance of Shri Parimal.Our sincere and grateful thanks for all the projects of census to him.

In state office Smt. B.B. Chauhan, Deputy Director, District Census Handbook Unit, Kum.S.B.Dabhi, Assistant Director, Shri S.B. Dalvi, Deputy Section Officer of District Census Handbook Unit, and their team of able assistants meticulously collected and scrutinized the non-census data from various sources and prepared draft of DCHB etc. with the help of Census section. The other officials of D.C.H.B. Unit, who scrutinised, edited and supervised the work of D.C.H.B. have been mentioned in the "Acknowledgement". The maps provided in the D.C.H.B. are prepared by the Map Section of the Census Directorate under the supervison of Shri J.P. Purohit, R.O(Map). I am thankful to all of them.I am thankful to the census section of the Directorate for scrutinizing the PCA data, specially Shri J.N.Pithadia, Investigator Grade-I and Kum.N.V.Shah, Investigator Grade-III who provided assistance to me in finalizing P.C.A. data at every stage. Smt. J.R.Sanghani, Investigator Grade-III of this Directorate assisted me for final scrutiny of D.C.H.B., I am thankful to her.

Lastly, I am thankful to the Government of Gujarat for having agreed readily to bear the cost of publication of the District Census Handbook volumes and for the special efforts of Shri R.B. Raval, Director, Printing and Stationary and his colleagues to print out the publcation in a very nice fashion.

District Highlights – 2001 census

Patan

(1) Patan district is the 22nd largest district in terms of population in the state.

(2) Patan is the 18th urbanized district in the state. Urban population of the district is 20.2 percent.

(3) In terms of density, population per sqkm. is 206 persons.

(4) Patan district is the 19th dense district in the state.

(5) Patan district is having 13th rank in sex ratio 932 as compared to that of the State 920 and there is a decreasing trend seen in the last decade.

(6) Village Sami of Sami taluka is the most populated having 11,607 persons and Bakaratpura village of Patan taluka is the least populated with only 63 persons.

(7) The economy of the district is basically dependent upon agriculture as 63.9 per cent workers are engaged in primary sector.

(8) Manufacture of basic chemical, chemical product (except products of petroleum and coal), transport equipment and parts are the most important non-agricultural economic activity of the district.

(9) Patan district is having 517 inhabited villages.

(10) Antarnes village of Santalpur Taluka has the largest area of 11,333.8 hectare and Multhaniya village of Chanasma Taluka has the smallest area of 74.4 hectare among the villages of the district.

(11) In respect of villages the lowest 39 villages are in Vagdod taluka and Harij taluka while the highest 99 villages are in Patan taluka.

(iv)	Other Workers	Persons	9,861,500	46.4	183,494	34.4
		Males	7,817,103	54.0	122,499	37.6
		Females	2,044,397	30.2	60,995	29.4

Note: One village is fully covered as outgrowth (OG) and therefore not included under the item, "Number of villages".

Definition of Census Town : -

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

Note: *These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

*Newly created District

ANALYTICAL NOTE

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook:

Before the 1951 Census, the Census figures were published in a booklet known as 'Village Hand-book', which contained only village wise population figures. These books were prepared and published by the Directorate of Census Operations of the State.

The Directorates introduced the District Census Handbook for the first time in 1951 Census. It comprised the villagewise primary census abstract figures and information on available amenities. It also contained several tables relating to the district. It varied in content and size from State to State depending upon the resources offered by the respective State Governments.

In 1961 Census, a uniform pattern of District Census Handbook was adopted throughout the country. The Directorate of Census and the State Government jointly executed the project. In addition to the English version, it was published for the first time in Gujarati language also. The District Census Handbook 1961 was published in three parts. Part I related to Introductory Note i.e. general and economic information for the district and a brief gazetteer of place names. Part II pertained to census tables, village -wise list of industrial establishments, tables on handicrafts and departmental statistics. Part III consisted of village directory covering the amenities and primary census abstract data combined in one statement. It also covered district and taluka maps.

It is worthwhile here to note that the State Government created a separate unit for preparing and publishing the District Census Handbook since 1971 Census onwards. In the 1971 Census, the contents of District Census Handbook were modified. In the preceding censuses, the data on amenities and primary census abstract were covered in one statement whereas in 1971 Census, the data on amenities and primary census abstract were separated into two different parts. Thus, the coverage of amenities data was extended and the land use data were introduced for the first time from 1971 District Census Handbook. Moreover, a separate portion known as 'Town Directory' was also incorporated for the first time in the District Census Handbook. The 1971 District Census Handbook was published in three parts. Part A contained the village and town directory. Part B contained village and town wise primary census abstract data and Part C contained official statistics, besides full count census tables, urban census tables and analytical report on census and related statistics socio-economic and cultural tables (Rural areas) and housing tables. Part A and Part B were combined and published in one volume.

The District Census Handbook –1981 was brought out in two parts, Part-A and Part-B. Part-A contained the village and town directory whereas Part-B included the primary census abstract data, for both General Population and Scheduled Castes/Scheduled Tribes. Both parts were published in one volume. Part C brought out for 1971 Census was dropped in 1981 Census. However, official statistics and some portion of analytical notes of part C of 1971 Census were included in the 1981 District Census Handbook also.

For the 1991 Census, the District Census Handbooks were prepared more or less on the same lines of the preceding 1981 Census. In 2001, the scope of both Part A & B has been enlarged by giving several additional information which got possible because of large scale computerization.

The District Census Handbook has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For

the Census of India 2001, a system of Permanent Location Code Number (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from I to N. Each village has been assigned an eight-digit code. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001 are adopted for future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

At the 2001 Census age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.

The type of educational institution attended by a person was enlarged to include school, college and vocational institute.

The scope of the definition of 'work' was expanded in the Census of India, 2001, to includes production of milk for domestic consumption. In the 1991 Census, cultivator of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in 2001 Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above-mentioned crops for domestic consumption have been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel-nuts have been classified under 'Plantation' in the Census of India 2001.

- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India 2001, this question was asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census was dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on reason for migration to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census is covered under category of 'Others'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.
- A new question on 'Travel to place of work' was canvassed mainly for workers engaged in non-agricultural activities. Information on distance from the residence to place of work and mode of travel to place of work was collected under this question.

The mode of presentation of DCHB in 2001 will by and large be same as that of 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexure II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 have also been included in DCHB.

(ii) Brief History of the District:

The history of the present Patan district can be distinctly traced from the end of the 7th Century onwards. At earlier Patan district known as *The Anhilwad Patan*. It was administratively important since earliest time as it was the capital of the Gujarat for over 600 years between the 8th and 14th Centuries and had attained prosperity under Chavda and Solanki period.

During the Solanki period, administratively Patan and nearby area assumed tremendous importance. Under the reign of Karandev and Siddharaj, Patan attained its greatest splendour and highest prosperity. Patan was the capital of Gujarat, where famous monuments like *"Sahastraling Talav", "Raniki Vav"* etc. were built. The prosperous rule of the Solanki dynasty cause to an end in the reign of Bhim Dev II which was succeeded by the Vaghelas. The Vaghelas were over powered in 1289 by Ulughkhan. The Muslims invaded Patan thrice during the last quarter of the 12th Century and came in temporary possession of this town. In 1304 Muslims captured power in Gujarat and Patan became the seat of the provincial Governor.

During the Sultanate period the administrative and political importance of Patan was reduced as Sultan Ahmad Shah founded the city of Amdavad. The Sultanate period came to an end in 1572. From 1572 to 1723 the district was ruled by the Viceroys appointed by *Mughal* Emperors. In Gujarat, the Mughal Empire was in the doldrums in the early part of the 18th Century and the Gaekwad who was one of chiefs constantly invading the plains of Gujarat got a foot hold. The former Radhanpur state is known as a Radhanpur taluka at present. The former Radhanpur state was the seat of the Babi ruler who was first class chief entitled to a guard of honor and a salute of 11 guns. The name of Radhanpur town, capital of the former state is said to have been derived from Radhankhan, a descendant of Fatehkhan Baloch, who was under the Sultan of Ahmedabad. After the independence all native states were merged in the Union of India and became part of Bombay state. In November, 1956 the bigger bilingual state of Bombay was formed Banas Kantha district being Part of it.

The Bombay state was bifurcated on 1st May, 1960 and separate state of Gujarat and Maharashtra were formed. Since that date the Mahesana district and the Banas Kantha district became a part of the Gujarat State.

Lastly, the Government of Gujarat has reconstituted the Mahesana and Banas Kantha districts and created a new district Patan, which was formed with 8 talukas namely (1) Santalpur (2) Radhanpur (3) Vagdod (4) Sidhpur (5) Patan (6) Harij (7) Sami and (8) Chansma. Out of which Santalpur and Radhanpur are transferred from Banas Kantha district and Sami, Harij, Chanasma, Sidhpur, Vagdod and Patan itself transferred from Mahesana district.

(iii) Administrative Set-up :

With a view to run the administration of the State smoothly, it has been divided into Districts, which in turn have been further sub-divided into Talukas (Tahsils) In the State of Gujarat, the community development blocks are co-terminus with the Talukas. The Talukas contain large number of villages and possibly several towns. The villages have Village Panchayats to run the local administration. A Village Panchayat may constitute of one revenue village, several revenue villages or a part of a large village. Similarly, the towns have Municipality or Municipal Corporation as the seat of local self-government.

In the State of Gujarat, as on December 1999 there were 25 districts and 226* Talukas, against 19 districts and 184 Talukas in 1991 Census. In 1997 by several notification(s), Government of Gujarat reconstituted some districts and talukas of the State. Several changes as described below were also made in Patan district. Under the Government Notification No. GHM-97-84-M-PFR-1097-L dated the 24th September, 1997 was constituted Mahesana, Patan and Banas Kantha district.

Patan district was constituted by including Chanasma, Harij, Patan, Sami, and Sidhpur talukas of Mahesana district and Santalpur and Radhanpur talukas of Banas Kantha district. By Government Resolution No. PFR-2097-2594-L dated 15-10-1997 Vagdod taluka was created by separating it from Patan taluka.

* Vagdod taluka merged in the Patan district on 3rd July, 2001.

By Government Resolution No. PFR-2097-2594-L dated 15-10-1997 Becharaji taluka was created by separating it from Chanasma taluka and Becharaji taluka was included as a taluka in Mahesana district under the Government Notification No. GHM-99-134-M-PFR-1099-3998-L dated 31-12-1997.

By Government Resolution No. PFR-2097-2595-L dated 15-10-1997 Unjha taluka was created by separating it from Sidhpur taluka and Unjha taluka was included as a taluka in Mahesana district under the Government Notification No.GHM/99-40-M-PFR-1099-UO-75-L dated 23-6-1999.

The District Collector looks after the general administration, maintenance of collection of land revenue and settlement of law related disputes,civil supplies, district planning, mid-day meal scheme etc. at the district level. At the Taluka level, Mamlatdar looks after the land development and revenue collection and law and order. The functions of administration of law and order and control and investigation of crime are done by the Superintendent of Police of the district with the help of Police Stations working under him. For the purpose of maintaining law and order, in the year 2000 there were 10 police stations, 11 police chowkies and 20 out-posts as per statement below.

Police Station in the District

Sl.No.	Particulars	1998	2000
1	2	3	4
1	Police Station	11	10
2	Police Chowky	10	11
3	Out Post	20	20

Source: Director General of Police, Gandhinagar, 2000

During the period 1998 to 2000, one police chowky was increased while one police station decreased and the out-post remained unchanged.

The Panchayati Raj institutions are fairly strong and most of the development works have been transferred to the District Panchayats and its subordinate bodies. The District Panchayat has an elected President and District Development Officer appointed by the Government, works as its Secretary, who looks after day-to-day work related to the development. Similarly, at the Taluka level, Taluka Panchayats have been constituted which have an elected President. The Taluka Development Officer, placed by the Government as Secretary of the Taluka Panchayats and he conducts the regular administrative work.Like-wise, an elected President heads the Municipality and the Chief Officer works as the Secretary of the Municipality, who looks after the day-to-day work. In case of the large cities, the State Government has constituted Municipal Corporations, which are headed by an elected Mayor and the Municipal Commissioner, appointed by the Government, looks after the routine work. At the Village level, the Sarpanch is the elected Chief and the Talati (Village Mantri) works as the Secretary to the Village Panchayat and looks after the day-to-day work. In view of the expanding role of the public administration in a state like Gujarat, the Government has taken-up many activities and has set up several offices. Such offices which came into the existence are as under:

(1) Education
(Primary and Higher Education)
(2) Agricultural and Research
(3) Animal Husbandry and Poultry
(4) Forest and Environment
(5) Roads and Buildings, Bridges
(6) Co-operation and Co-operative Societies
(7) Industries, Small and Large as well as Cottage
(8) Health and Medical Services, Medical Education and Research, Family Welfare and Nutrition
(9) Information Department
(10) Irrigation Minor and Major
(11) Social Welfare and Social Defence

The functions of above offices are managed and controlled by concerned Head of Departments and in some cases also by District and Taluka Panchayats. The task of primary education in rural areas has been entrusted to district Panchayats and functions relating to Primary Education are assigned to Primary Education Officer. The secondary education is looked after by District Education Officer of Education Department. Primary education as well as higher secondary education of all types of institutions is governed by District Education Officer.

Agriculture activities have been delegated to District Panchayat to a large extent and District Agriculture Officer is in-charge of looking after agricultural produce including crops and vegetables. Similarly Animal Husbandry is also a Panchayat activity and routine work is controlled by the Deputy Director (Animal Husbandry) who sits in District Panchayat taking care of animals and poultry farms. Besides, district agriculture office in Panchayat Offices such as Deputy Director (Agriculture) and other officials look after various aspects of agriculture for developing the sector as well as to extend necessary assistance to farmers at district level.

Besides Director, Animal Husbandry Officer of Panchayat offices such as Deputy Director (Animal Husbandry) Special Officers at Veterinary Offices etc. in state government animal husbandry department also monitor activities of the sector at district level.

Public Health in rural area is assigned to the District Panchayat under the Chief District Health Officer who looks after epidemics, malaria control, water borne diseases and district level administration of Public Health Centres. District and Talukas Hospitals and Referral Hospitals are being looked after by the District Civil Surgeon of medical services in the State, while Medical Colleges and Research activities attached with the respective Civil Hospitals are controlled by Medical Education and Research Wing.

Family welfare activities are also monitored by the District Health Officer. Chief District Health Officer is also functioning as District Registrar of Birth and Death of the district and Talati cum Mantri is also Registrar of Birth and Death for the respective villages. Anaemic mothers and children upto to the age of 14 are looked after by Nutrition Officer under the Nutrition Programme.

District Ayurvedic Officer looks after the Ayurvedic dispensaries and hospitals. They also take care of the Ayurvedic plants and medicines and gardens. The District Food and Drugs Officer generally looks after the quality of the food and drugs in the district. Labourers and workers who are working in registered units are covered under the Employees State Insurance Scheme.

The rural roads have been transferred to the District Panchayats and their maintenance is done by the Executive Engineer, Roads and Buildings Department. Minor irrigation works are transferred to the District Panchayat and Executive Engineer (Panchayat) of the Panchayat's irrigation office looks after water harvesting and check dams.

The Roads and Buildings Department of State Government looks after the maintenance of roads, buildings, bridges and government multi-storey buildings etc. Besides Panchayat officials, major district roads and the state highways are looked after by the Executive Engineer (Roads & Buildings). The large multi-purpose irrigation projects are controlled by State Government directly through its Executive Engineers.

District Industry Centre is functioning to develop the small and village industries, handloom industries and the scope of industrial growth in the district. Besides, other departments are working for the rights of the industrial workers and rural labourers engaged in agriculture and others sectors.

Social welfare activities relating to the Scheduled Castes, Scheduled Tribes, Other Backward Castes and Other Backward Communities in the District are organized by the District Welfare Officer. Generally the schemes under Tribal Area Sub Plan and Special Component Plan are organized by the District Welfare Officer.

In each District Panchayat, District Statistical Officer of Directorate of Economics and Statistics looks after co-ordination of different development programmes. He is also Member-Secretary of District Planning Board. Similarly in every Collector Office, District Planning Officer looks after development work of various Government (State & Centre) sponsored programmes.

Co-operative Societies i.e. Co-operative Milk Societies, Agricultural Produce Market Societies, Co-operative banking and other Co-operative societies are controlled by the District Registrar, Co-operative Societies.

There are 96 group Gram Panchayats in 8 talukas in the district. The talukawise break up of towns and villages in the district are shown as following :-

Talukawise Number of Towns and Villages

Sl. No.	Name of Taluka	Number of Town	Number of Villages	
			Total	Inhabited
1	2	3	4	5

	Total :	**5**	**517**	**517**

Source : Village / Town Directory, 2001

The civic status of the 5 towns is as under.

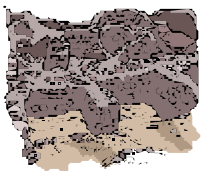

Municipality	:	5
Total	**:**	**5**

(iv) Physical Features:

Patan is one of the districts forming part of the north Gujarat region of the Gujarat State. It is situated between the north latitude $23^0.23'$ to $24^0.9'$ and between east longitude $71^0.2'$ to $72^0.29'$. Its east-west distance is 146.72 kms and north-south distance is 84.568 kms. It is bounded to the north and north-west by Banas Kantha district, to west and south-west by the Little Ran of Kachchh, to the south by the Surendranagar district and to the east by the Mahesana district. The total area of Patan district is 5,740.0 sq.km. It is the 14^{th} largest district in area in the State.

Physiography :

Patan district is a part of Gujarat plain and is sub-divided into three sub-micro regions, namely western sandy waste, central alluvial plain and Mahesana low land.

Western sandy waste region spreads over the western part coverings Sami, Harij talukas and some part of Chanasma taluka. It makes its boundaries with Banakskantha district in the north, central alluvial plain in the east and Surendranagar district in the south while Little Rann of Kachchh touches its western and south-western part.

The region is having low relief in comparison to other regions of the district. The maximum height of 57 metres above M.S.L. is found in Chanasma taluka of this region and it decreases towards west. Saraswati is the main river of the region, flows from north-east to south-west direction and ultimately sub-merges into the little Rann of Kachchh. Banas river also touches northern boundary of this region. The geology of the region is composed of Alluvium blown sand etc. The region has Orthids – Aquepts, Orthids – Psamments and Ochrepts Psamments types of soils.

Central alluvial plain region occupies the northern part of the district and covers Harij, Patan, Sidhpur and Chanasma talukas. It is surrounded by Banas Kantha district from north, by Western Sandy Waste from west, by Mahesana Aravalli from north-east, by Sabarmati basin from east, by Mahesana low land from south-east. The region is plain having a maximum elevation of 100 metres above M.S.L. The slope is towards west. Thus, all the rivers Banas, Saraswati, Rupen and their tributaries which form the drainage pattern of this region, flow towards westerly direction. The region has the geological structure of Alluvium, blown sand etc. The soils mainly found in the region are Orchrepts, Psamments and Usterts – Ochrepts. The Mahesana lowland occupies some parts of Chanasma taluka. The topography of this region is flat and of sandy plain. The elevation is generally varies between 68 metres and 99 metres above M.S.L. The geological structure of this region is composed of Alluvium, blown sand etc.

Hills :

In this district there is no significant hill feature. However, the only redeeming feature which diversify the general flat surface of the country and monotonous surface of the various parts of the district are hillocks and ridges of blown sandy loam which rise on an

average not more than 15.24 to 18.28 metres above the general level and only occasionally attain a height of 30.48 metres of little more. These blown loam hills are starting from Sidhpur and running about east by north with width of about 9.65 kms.

Drainage :

The entire district is drained by mainly following three rivers the Rupen, the Banas and the Sarswati. The river Rupen rises from the Taranga hills and flows through Chanasma and Sami talukas. After a course of 135 kms in this district, it disappears into Little Rann of Kachchh near village Taranagar of Sami taluka. Its main tributaries are the Pushmawati and the Khari the Pushmavati river passes through Sidhpur and Chanasma and Khari river originates near village Tandav of Sidhpur. The river Banas including its all tributaries and nalas has its origin in Rajasthan and enters the Gujarat state near Palanpur taluka of Banas Kantha district and its tributary Chekaria river near the Khareda village of Patan taluka. The river flows through Harij and Sami talukas. It flows for about 40 kms in this district and disappear in the Little Rann of Kachchh near Radhanpur taluka of this district. The river Saraswati including its tributaries and nalas draining into it rises from the hills of Menagar in Aravalli near Koteshwar and flows through Sidhpur, Patan, Harij and Sami talukas. It flows for about 114 kms. in the district and then disappear in the Little Rann of Kachchh near village Koddha of Sami taluka. This river is also called the Kumarika. Its main tributaries are the Wao, which flows in Harij taluka and the Moyan river, which passes through Sidhpur taluka.

Climate:

The climate of this district is characterized by a hot summer and general dryness in the major part of the year. Summer is very hot and winter is too cold. The cold season is from December to February. The hot season from March to the middle of June is followed by the southwest monsoon season, which continues up to about the end of September-October and November constitute the post-monsoon period.

a) Temperature :

After February there is rapid increase in the temperatures. May is the hottest month. The mean daily maximum temperature is about 41.7^0 C and the minimum is about 8^0 C in the year 1999. After October both the day and night temperature decrease at a rapid rate. January is the coldest month.

b)Winds:

Winds are generally light with some increase in speed during the latter part of summer and early part of the monsoon season. During the period from April to September, the winds blow mostly from directions between south and west, the south-westerlies predominating. The winds are light and variable in direction during October, the easterlies and north-easterlies being more common in the mornings and the westerlies and north-westerlies occasionally in the afternoons. During the period from November to March, while the morning winds are mostly between north and east, the afternoon winds are generally from directions between west and north.

c) Rainfall :

The annual rainfall in the district is 623.9 mm. in the year 1998. About 95 per cent of the annual rainfall in the district is received during the months of June to October. The distribution of rainfall over the district is uneven. The details of the rainfall for periods ranging from the years 1998 to 1999 are given below:

Monthly Rainfall (From 1998 to 1999)

(in mm.)

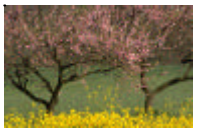

Sl. No.	Month	1998	1999
1	2	3	4
1	May	0.0	0.3
2	June	76.6	60. 9
3	July	128.6	39.7
4	August	92.7	9.1
5	Sept.	149.8	0.4
6	October	176.2	41.2
	Annual Rainfall	**623.9**	**151.6**

Source: Directorate of Agriculture, Gandhinagar. 1998, 1999

Economic Resources:

Economic resources are an important means of subsistence for the working people of the district. The details about economic resources of important sectors are given here under in brief.

(1) Forestry:

The forest area in the district is scattered and very limited. It is found in 5 talukas of the district. According to the Forest Department, there were 467.1 sq.km. forest in the district in the year of 1999-2000. Out of which 459.1 sq.km. were reserved, 5.7 sq.km. were protected and 2.3 sq.km. were unclassified forest. The total area under forest works out to 8.2 per cent of the total geographical area of the state. The main forest products are firewood, seasame wood etc. whereas gum, bamboos, honey, wax, Timru leaves, Awal bark, Lac, khajuri leaves, grass and fodder leaves are minor products of these forest. There are also wild fruits such as *bor, Karani, Kurmada, Khera* etc.

(2) Minerals and Minning:

The known mineral wealth of Patan district is substantial though less diversified than in few other mineral of the state. The important major economic minerals available in the district are white clay, China clay etc. While brick clay, sand, ordinary clay, sand stone and lime stone are minor minerals. The following statements gives the figures of mineral production for the different years.

Major and Minor Mining Products and Income

Sl. No.	Products	1999-2000		2000-01	
		Production (MT)	Income (RS.)	Production (MT)	Income (RS.)
1	2	3	4	5	6
	Major Products				
1	White Clay	8,859	98,046	7,430	179,952
2	Ochre	25	-	622	6,720
3	China Clay	2,166	26,523	-	148,430
	Total :	**11,050**	**124,569**	**8,052**	**335,102**
	Minor Products	**344,508**	**525,484**	**122,100**	**650,800**
	Grand Total :	**355,558**	**650,053**	**130,152**	**985,902**

Source: Commissinerate of Geology and Mining, 2001

(3) Soil and Cropping Pattern:

In the Patan district nearly 90 percent of soil is highly sandy. The alluvial soils are found in the talukas of Santalpur and Radhanpur. The type of soil is saline and can yield crops only under optimum rainfall conditions. Medium black soil is met with but only in patches in the low-lying portions of Harij and Chanasma. This type of soil is suitable for cultivation of paddy and cotton. In part of Sami, Patan and Harij talukas the soil is poor and saline and sub-soil water is brackish. The pattern of cropping has not changed much over the years except that cultivation of cash crops like groundnut, cotton etc. has now increased. The main Kharif crops in district are *Bajri, jowar, mug, math*, sesame, rapeseed etc. wheat is the main Rabi crop. The taluka of Radhanpur and Santalpur constitute the chief wheat growing area. In good rainy season potatoes are grown mainly in riverbeds.

(4) Land and Land use Pattern:

The rural areas in the district was 561,651.4 hectares during 1998-1999. The land classification for the same is given below on the basis of information collected for the Village Directory.

Land Classification of Rural Area

(In '00 Hectares)

Sl. No.	Classification	Area as on 31.3.99
1	2	3
1	Forest	431.2
2	Irrigated	1,341.2
3	Unirrigated	2,750.7
4	Cultivable waste (including Gauchar and Groves)	452.3
5	Area not available for cultivation.	641.1
	Total	**5,616.5**

Source: Village Directory, 2001

(5) Tenancy:

There was no separate Act on tenancy in the former Bombay State before 1939. There were provisions of Section 83 of Land Revenue Code and Mamlatdar Court law only. The tenant was not secured of his tenancy rights in the Act. This tenancy lease was considered yearly and had to pay tenancy

as per tradition or according to the agreement made with the land owner. In order to protect the tenants, the Bombay Tenancy Act, 1939 came into force in the erstwhile Bombay State.

The independence of the country, it was necessary that the country is self-sufficient in agricultural production. It can be done only when the tillers of the land should have some definite rights over the land. With a view to effect control on efficient utilization of agricultural land and also to protect the tenants further and also to accept a definite policy and view for the country on agricultural land, The Bombay Tenancy and Agricultural Land Act, 1948 was enacted and it was brought into force since then.

The Act of 1948 was amended five times. An important provision of 'Farmer Day' was inserted in the Act on 1-8-1956. According to this provision, if any person legally tilled the land of other person on 01-04-1957, he was entitled to purchase the said land. Even though Gujarat State was bifurcated from Bombay State in 1960, the said act applied to it also as well.

Tenant means the person who held land on lease viz.

(1) Tenant as per Section 4;

(2) Protected tenant

(3) Permanent tenant

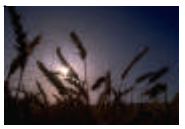

(4) The person who continued to possess the land with or without the consent of the land owner after appointed date and upto specified date or it is considered that he continued the possession of the land.

In Gujarat 1,049,056.4 hectares of land have been released and distributed to total 1,278,125 beneficiaries permanently under The Bombay Tenancy and Agricultural Land Act, 1948. Among the beneficiaries 177,171 were from Scheduled Castes, 258,132 from Scheduled Tribes and 842,822 from others category.

In the Patan district 51,142.1 hectares of land have been released and distributed to total 53,330 beneficiaries. Among the beneficiaries, 4,549 Scheduled Castes were allotted 6,398.5 hectares of land, 1,882 Scheduled Tribes were allotted 3,514.3 hectares of land and 46,899 beneficiaries under 'others' category were allotted 41,229.4 hectares of land in the District.

(6) Agriculture:

a) Area under Major Crops:

The area under major crops for the years 1993-94 and 1997-98 are indicated in the following statement.

Area under Major Crops

(in '00 Hectares)

Sl No.	Name of Crop	Area under Major Crops	
		1993-94	1997-98
1	2	3	4
1	Wheat	157	430
2	Bajri	775	607
3	Jowar	12	-
4	Gram	25	62
5	Other pulses	80	117
6	Sugarcane	13	8
7	Groundnut	4,753	3,943
8	Cotton	862	1,481

Source: Season and Crop Report, Directorate of Agriculture, 1999

The area under bajri, jowar and groundnut crops has decreased while the area under wheat, gram, other pulses and cotton has increased during the year 1997-98 as compared to the year 1993-94. It is noticed that a majority of the cropped area was under cotton, groundnut and bajri.

b) Average Yield per Hectare:

The average yield per hectare of the principal crops in the district during the year 1993-94 and 1997-98 is shown below.

Average Yield per Hectare

(In Kgs.)

Sl. No.	Name of Crop	Average yield per Hectare	
		1993-94	1997-98
1	2	3	4
1	Bajri (Kharif)	762	1,971
2	Jowar(Kharif)	19	239
3	Jowar(Rabi)	-	875
4	Paddy	1,922	1,895
5	Wheat	2,138	2,263
6	Groundnut	420	971
7	Cotton	338	510
8	Sugarcane	6,200	9,000

Source: Season and Crop Report, Directorate of Agriculture, 1999.

The average yield per hectare was higher in bajri (kharif), jowar (kharif), jowar (Rabi), wheat, groundnut, cotton and sugarcane where as the average yield per hectare was lower only in paddy during the year 1997-98 than that recorded during the year 1993-94.

(7) Irrigation:

The area irrigated by different sources in the district are presented below during 1993-94 and 1997-98.

Area under Irrigation by Source

(In '00 hectares)

Sl. No.	Source of Irrigation	1993-94		1997-98	
		Net	Gross	Net	Gross
1	2	3	4	5	6
1	Govt. canals	198	224	228	230
2	Tanks	-	-	-	-
3	Wells	975	1,032	1,299	1,581
	Total	**1,173**	**1,256**	**1,527**	**1,811**

Source: Season and Crop Report, Directorate of Agriculture, 1993-94, 1997-98

The above figures indicate that wells are the main source of irrigation in the district. Next in order is the Government canals.

(8) Animal Husbandry:

a) Livestock

Cattle wealth occupies a pivotal place in the rural economy of the district. According to the livestock censuses of 1992 and 1997, the live stock population in the district is indicated below.

Livestock

Sl. No.	Livestock	Year	
		1992	1997
1	2	3	4
(A)	**Total Livestock**	**609,040**	**575,823**
1	Cattle (Cross breed)	2,164	3,526
	(a) Male over 2.5 years	190	279
	(b) Female over 2.5 years	1,201	2,155
	(c) Youngstock	773	1,092
2	Cattle (Indigenoues)	153,573	128,379
	(a) Male over 3 years	60,784	32,632
	(b) Female over 3 years	60,219	62,443
	(c) Youngstock	32,570	33,304
3	Buffaloes	211,493	260,659
	(a) Male over 3 years	2,082	2,039
	(b) Female over 3 years	135,854	173,829
	(c) Youngstock	73,557	84,791
4	Sheep	56,286	38,030
5	Goats	129,702	102,067
6	Horses and ponies	646	581
7	Camels	5,467	4,361
8	Pigs	2,311	3,782
9	Other livestock	47,398	34,438
(B)	**Poultry**	**11,580**	**7,093**

Source : (1) Directorate of Economics and Statistics, Livestock Census, 1992

(2) Directorate of Animal Husbandary, Livestock Census, 1997

The livestock population has decreased in 1997 as compared to the year 1992. Poultry birds have also decreased in 1997 as compared to the year 1992.

b) Agricultural Implements:

According to the livestock census conducted in the State, the comparative data for agricultural implements in the district for the years 1992 and 1997 are shown in the following statement.

Agricultural Implements

Sl. No.	Name of Agricultural Implements	Year	
		1992	1997
1	2	3	4
1	Plough	37,140	23,979
	(a) Wooden	23,154	14,246
	(b) Iron	13,986	9,733
2	Carts	16,887	9,322
3	Oil engines	2,294	2,493
4	Electric Motors and Pumps	1,853	1,045
5	Tractors	2,249	4,661
6	Wheat Thresher	270	-

Source : (1) Directorate of Economics and Statistics, Livestock Census, 1992

(2) Directorate of Animal Husbandry, Livestock Census, 1997

The use of oil engine and tractor as an agricultural implement is increased where as all the implements shown as above is decreased during 1997 as compared to 1992.

(9) Fisheries :

As Patan has no sea coast, fishing is mainly confined to the ponds and tanks. After the bifurcation of the district, as reported by the Commissioner of Fisheries, Gujarat State, there are no fisheries worth mention in the district.

(10) Industry:

The total numbers of registered factories and average number of daily workers employed by major groups of industries for the year 1998 and 1999 are shown in the following statement. Among registered factories the most important establishment from the point of employment is transport equipment and parts.

Among the registered establishments both in the year of 1998 and 1999 the first four most important establishments are manufacture of (1) Transport

Distribution of Important Industrial Establishments by Major Industrial Group

Sl. No.	Major Group of NIC (National Industrial classification)	Description of Manufacturer	As on 31.12.98		As on 31.12.99	
			Number of Establish-ment	Average Number of persons working per day	Number of Establish-ment	Average Number of persons working per day

Source : Chief Inspector of Factories, 2000.

equipment and parts (2) Basic Chemical and chemical products (except products of petroleum and coal) (3) Basic Metal and alloy industries and (4) Food products. Similarly, the first four most important establishments from the point of view of their employment in both years are (1) Transport equipment and parts (2) Basic Metal and alloy industries (3) Basic chemical and chemical products (except products of petroleum and coal) and (4) cotton textile. The above data indicate a decrease in the industrial activities in the district as on 31-12-99 as compared to the condition as on 31-12-98. The above data shows an increasing trend in cotton textile industries during 1999 as compared to the year 1998.

(11) Trade and Commerce :

The term includes wholesale and retail trade of all kinds and other commercial activities. At present imports in the district consist of the items like oil, cotton, jaggery, rice, sugar, cloth, kerosene, tea, ghee. Patan is famous for its silk cloth called *mashroo* and *patola*. It also makes cotton *mashroo*, an imitation of silk ones, which find large market. Wheat, bajri, cotton, jeera, castor seeds, tobacco etc. are main commodities which are traded in towns like Sidhpur, Chanasma, Harij etc. Wholesale trade is generally concentrated in towns of the district. Major commodities markets in the district are in almost all the taluka headquarter, which are well connected by roads as well as by railways to a greater extent. There is also a factory for processing Isabgul here. Unjha of Mahesana district, which is neighbouring district of Patan, is very famous for jeera, Isabgul and variali. Naturally Patan also gets benefit from trading of above items. Retail trade is carried on by large number of establishments located in towns and villages of the district. Those establishments cater to the needs of inhabitants of their respective localities. Retail marketing centres are situated in almost all the areas. As the population has increased and communications made easy, retail shops have also sprung up in rural

(Page 14 & 15 Corre. Dt. 21-5-07)

areas. The monopolistic position enjoyed by wholesale and retail traders has been subjected to a powerful challenge from the co-operative movement, which has taken up inter alia consumers activities in its stride.The most important commodities manufactured in the district are mustard seeds, castor seeds, cumin seeds, cottonbales, rapeseeds oil, isabgul, castor oil, cotton seeds oil, patola, mashroocloth, pulses, machinery spare parts and steel furniture. Most of the items described above are also exported out of the district. Besides these items other major commodities, which are exported out of the district are agricultural implements, iron, tobacco, and wheat.

The details of commercial and Co-operative bank in the rural areas of the district are as under :-

Villages Having Banking Facility

(12) Transport and Communication:

Transport and Communication facilities are considered as an administrative necessity as well as a public convenience. Moreover, a well-knit transportation system is a pre-requisite for the social and economic development of any district.

a) Road:

The linking of one place with other by road is very essential to provide good transport system. The information regarding road available in Patan district for the year 1999-2000 to 2000-01 are given in the Statement below. This statement includes the information of National highway, State highway, district and village roads. According to 2001 census, 478 villages and all towns are connected with Pucca roads and 39 villages are connected with Kuchcha roads. This shows deterioration in the net work of roads in the district. According to the classification of road, made by the Indian Roads congress, road length in the district by category is given below for the years 1999-2000 and 2000-2001.

b) Railway :

There are 16 villages having railway facilities in the Patan district.

c) Ports:-

Patan district has no sea-port or air port.

d) Posts and Telegraphs:

The following statement shows the number of villages in the district possessing post, telegraph and phone facilities**.** As regards rural areas of the district the facilities of post, telegraph and telephone are available in 314,10 and 426 villages respectively.

Road Length of Different Category

Sl. No.	Year	Type of Road (in km)										
		Highways				District Roads				Village Roads		Total
		National		State		Main		Other				
		GOVT. DN	PNCH. DN	GOVT DN	PNCH. DN	GOVT. DN.	PNCH DN	GOVT. DN	PNCH. DN	GOVT. DN	PNCH. DN

Communication Facilities

Sl. No.	Type of Communication Amenities	Number of Villages having Facilities
1	2	3
1	Postal Offices	314
2	Telagraph Offices	10
3	Telephone	426

Source: Village Directory, 2001

e) State Road Transport:

Out of 517 villages, 485 villages have bus facility.

(13) Electricity :

Electricity is the chief necessity for the economic development of the district. The main source for power supply in the district is Gujarat Electricity Board. All 517 inhabited villages are electrified in the district.

(14) Gram Panchayats, its Composition, Jurisdiction and Role in the Development of Village and its Economy:

The system of Panchayati Raj was introduced in the year 1963 in Gujarat State. Under this set up, the three tier system was introduced namely, The District Panchayat, The Taluka Panchayat and The Gram Panchayat.

Gram Panchayat is an important institution of self-government. The Gram Panchayat is formed for a village or a group of villages. The Gram Panchayat is constituted for a local area with the population of less than 10,000. Such local area may be revenue village or a group of revenue villages or hamlets forming part of a revenue village or such other administrative unit or part of thereof. The number of members of Gram Panchayat varies from 9 to 15. The tenure of Gram Panchayat is of five years. The people of village elect Sarpanch and Vice-Sarpanch (Up-Sarpanch) and other members of the Panchayat. Various Committees like, Social Justice Committee and Standing Committee are formed. In the year 1993 Government of India enacted 73rd Constitutional Amendment regarding provisions of Panchayati Raj and implementation of this act in Gujarat started from 15th April 1994. By this constitutional amendment, Panchayats are given constitutional status. Regular and timely election, participation of women and backward classes, formation of separate State Election Commission and rotation system in electing the heads of the various committees are other significant amendments in the act. Decentralised planning process and active participation of people is the soul of the Panchayati Raj Act. The powers for decentralised planning, implementation and development are delegated to the Panchayats.

The primary functions of the District/Taluka Panchayats are providing facilities for primary education, health, drinking water, electricity, constructions and maintenance of roads, bridges etc., maintenance of Gauchars, organising relief work at the time of scarcity and drought situation, sanitation and social welfare. Arrangements for housing facilities for below poverty line people and rural development schemes are implemented by Panchayats. Gram Panchayats also implement important programmes like, 'food for work' and other programmes beneficial for the local people. Thus, Panchayats play an important role in the development of village and its economy. There are 13,761 Gram Panchayats in Gujarat State. Out of 517 villages in Patan district, there are only 96 Group Panchayat and 421 independent Gram Panchayats.

(v) Census Concepts :

Building:

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate building.

Permanent Houses:

Houses, the walls and roof of which are made of permanent materials. The Material of wall can be anyone from the following namely Galvanized iron sheets or other metal sheets, Asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials namely tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either wall or roof is made of permanent materials and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of a 2 meters. A dwelling room would include living room, bedroom, dining room drawing room study room, servant's room and other habitable rooms. Kitchen, Bathroom, latrine, Store-room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office. etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servants household tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room which is shade by more than one household has not been counted for any of them. If two household have a dwelling room each but in addition also share a common dwelling room. Then the common room has not been counted for either or of the household.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of a different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of

their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data.

In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban Area:

The following areas are treated as towns/urban area :

(a) All places with a Municipality, Municipal Corporation, Cantonment board or notified Town Area Committee etc.

(b) All other places which Satisfy or are expected to satisfy the following criteria simultaneously.

(i) A minimum population of 5,000;

(ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

(iii) A density of population of at least 400 per square kilometer. (1,000 per square mile).

City :

Towns with population of 1, 00,000 and above are called cities.

Urban Agglomeration:

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban

outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household:

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Households:

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household:

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Household.

Scheduled Castes and Scheduled Tribes :

Article 341(1) of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342(1) similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they

professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State is given below

List of Scheduled Castes:

1. Ager
2. Bakad, Bant
3. Bawa-Dedh, Dedh Sadhu
4. Bhambi, Bhambhi, Asadaru Asodi, Chamadia, Chamar Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Nalia, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar.
5. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
6. Chalvadi, Channayya
7. Chenna Dasar, Holaya Desar
8. Dangashia
9. Dhor, Kakkayya, Kankayya
10. Garmatang
11. Garoda, Garo
12. Halleer
13. Halsar, Haslar, Hulasvar, Halasvar
14. Holar, Valhar
15. Holaya, Holer
16. Lingader
17. Mahar, Taral, Dhegu Megu
18. Mahyavansi, Dhed, Dhedh, Vankar, Maru Vankar, Antyaj
19. Mang, Matang, Minimadig
20. Mang-Garudi
21. Meghaval, Meghwal, Menghvar
22. Mukri
23. Nadia, Hadi
24. Pasi
25. Senva, Shenva, Chenva, Sedma, Rawat
26. Shemalia
27. Thori
28. Tirgar, Tirbanda
29. Turi
30. Turi Barot, Dedh Barot

List of Scheduled Tribes :

1. Barda
2. Bavacha, Bamcha
3. Bharwad (In the Nesses of the forests of Alech, Barada and Gir)*
4. Bhil, Bhil Garasia, Dholi-Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
5. Charan (In the Nesses of the forests of Alech, Barada and Gir) *
6. Chaudhri (In Surat and Valsad districts)
7. Chodhara
8. Dhanka, Tadvi, Tetaria, Valvi
9. Dhodia
10. Dubla, Talavia, Halpati
11. Gamit, Gamta, Gavit, Mavchi, Padvi
12. Gond, Rajgond
13. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
14. Kokna, Kokni, Kukna
15. Koli (In Kachchh district)
16. Koli Dhor, Tokre Koli, Kolcha, Kolgha
17. Kunbi (In The Dangs District)
18. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana, Nayaka
19. Padhar
20. Paradhi (In Kachchh district)
21. Pardhi, Advichincher, Phanse Pardhi (Excluding Amreli,Bhavnagar, Jamnagar, Junagadh, Kachchh, Rajkot and Surendranagar districts)
22. Patelia
23. Pomla
24. Rabari (In the Nesses of the forests of Alech, Barada and Gir) *

* The area comprised of Jamnagar and Junagadh districts.

25. Rathawa
26. Siddi (In Amreli, Bhavnagar, Jamnagar, Junagadh, Rajkot and Surendranagar Districts)
27. Vaghri (in Kachchh district)
28. Varli
29. Vitola, Kotwalia, Barodia

Language and Mother Tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as "Main worker".

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal- worker'

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator, if, he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in

exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural laborers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (area).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural laborer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural laborer or in Household Industry is termed as an 'Other-Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural laborers or household industrial workers, are 'Other Workers'.

Work Participation Rate:

Percentage of workers (main + marginal) to total population

Population Density:

Population density is the number of persons inhabited per square kilometer of the area.

Age:

Age is measured in terms of the completed number of years.

Sex Ratio:

Numbers of females per 1,000 males in a population.

(vi) Non Census Concepts :

Improved Drinking Water:

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

System of Sewerage:

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are, not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of Latrine and Method of Disposal of Night Soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility:

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially lives births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude Birth Rate (CBR) :

Ratio of the numbers of live births in a year to the mid year population. (normally expressed per 1,000 population).

$$CBR = \frac{\text{Numbers of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude Death Rate (CDR) :

Ratio of the numbers of deaths in a year to the mid year population, normally expressed per 1,000 population

$$CDR = \frac{\text{Numbers of deaths during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Natural Growth Rate (NGR) :

Natural Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

$$NGR = CBR - CDR$$

Age Specific Fertility Rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Numbers of live births in a particular age group}}{\text{Numbers female population of same specified age group}} \times 1{,}000$$

Age Specific Marital Fertility Rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1{,}000$$

General Fertility Rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General Marital Fertility Rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) years}} \times 1{,}000$$

Total Fertility Rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total Marital Fertility Rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-Specific Mortality Rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (q5MR)

Infant Mortality Rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal Mortality Rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early Neo-natal Mortality Rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late Neo-natal Mortality Rate (LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post Neo-natal Mortality Rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal Mortality Rate (PMR) :

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1,000$$

Stillbirth Rate (SBR) :

$$SBR = \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal Mortality Rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and childbirth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible Couple (Couples per 1,000 population):

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child Woman Ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child Woman Ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/ he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress

migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International Migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban Components of Migration :

Rural or Urban status in respect of migrants had been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of Urban Units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corpora-tion, Municipal Committee/Municipal council, Municipality etc.

Size Class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population is classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5(1,000,000-1,999,999) M4(500,000-999,999); M3(300,000-499,999), M2(200,000-299,999) & M1(100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(Vii) 2001 Census Findings- Population and its Distribution

(a) Distribution of population in rural-urban areas :

According to 2001 Census the total population of Patan district is 1,182,709 comprising 612,100 males and 570,609 females. The population of Patan district is 2.3 per cent of total population of Gujarat State and it ranks 22nd among 25 districts of the state. Rural population of the district is 944,281 comprising 487,266 males and 457,015 females, which is distributed among 517 inhabited villages in 8 talukas. There is no uninhabited village in the district. The urban population of the district is 238,428 comprising 124,834 males and 113,594 females and is spread over 5 towns. The population of Scheduled Castes is 116,879 (9.9 per cent) and Scheduled Tribes population is 12,637 (1.1 per cent) as per 2001 Census.

(b) Size class and status of towns, Population Growth, Density, Sex ratio, Work participation rate, Literacy , availability of University education in the District

The statement stated below gives the position and number of urban units in size class for 2001 Census.

Sl. No.	Name and Civic status of Town	Size class of town	Population
1	2	3	4
1	Chanasma (M)	IV	15,822
2	Harij (M)	IV	18,472
3	Patan (M)*	I	113,749
4	Radhanpur (M)	III	32,191
5	Sidhpur (M)*	II	58,194

Note: * Towns having outgrowths

Patan district was formed after 1991 Census by separating 6 talukas from Mahesana and two talukas from Banas Kantha districts. According to 1991 Census population of these 8 talukas was 1,036,019 which increased by 14.2 per cent resulting a population of 1,182,709 in 2001 census. The growth rate for rural and urban areas of the district are13.7 per cent and 15.9 per cent respectively. The population density of Patan district is 206 against the state density of 258 persons per sq.km.

There are 932 females for every 1,000 males in Patan district. The sex ratio of rural and urban areas for the district is 938 and 910 respectively. It is also observed that the proportion of female in rural areas is higher than that of urban areas. The sex ratio for age group of 0-6 years is 865 in Patan district.

The work participation rate is defined as a percentage of total workers to total population. In the same way it is defined for main workers and marginal workers. According to 2001 Census total workers (main + marginal) are 45.1 per cent of total population in the district. The proportion of main workers is 33.4 per cent and that of marginal workers is 11.6 per cent. The remaining 54.9 per cent belongs to category of non-workers.

As per 2001 Census among the main workers male participation rate is 48.7 per cent and corresponding proportion of female is 17.0 per cent. Male and female marginal workers account for 4.5 per cent and 19.3 per cent respectively. The proportion of female marginal workers is higher than that of males as females are attending one or more economic activities in addition to their usual household duties to improve their family income.

It is also observed that in rural and urban areas both the proportion of male main workers is higher than that of females, whereas the proportion of male marginal workers is lower than that of females in rural as well as urban areas.

A person who can read and write in any language with understanding is supposed to be literate in Census. All children of age below 7 years are treated as illiterates. As per 2001 Census Patan district has reported 599,082 persons as literates consisting 60.4 per cent of total population. The literacy rate of male is 73.6 per cent which is significantly higher as compared to female literates of 46.3 per cent. The gap in male-female literacy is thus comes at 27.3 percentage points.

Patan is a newly created district. The town of Patan has one Arts College, Commerce and one Science College and one Polytechnic. Besides Patan, Sidhpur has one Arts and Commerce college. Palasar has one Arts College, Radhanpur has one Arts and Commerce College, Giliya (Chana sma) and Samoda (Sidhpur) both have Gram Vidhyapith.

Religion :

Religion forms an integral part of Indian Social system. For an Indian, it is a way of life rather presenting the same in its reports. In the pre-Independence census reports, the data on religion was being presented for 9 major religion viz. Hindu, Muslim, Tribal Christian, Sikh, Jain, Buddhist, Parsi, Jewish and Others. Since the 1951 census the data on religion has been presented for 6 major religion viz. Hindu, Muslim, Christian, Sikh, Jain and Buddhist. Besides, the minor religions have been classified under the category of 'Other'. The data on religion collected and presented by the Indian Census is the basic data of intense use for the 'researchers', anthropologists, Sociologists, demographers, administrators, planners and even for a common man.

In 2001 the Indian Census collected the religion data in question No. 7 of the household scheduled and recorded the same under the six major religions, other religions were recorded in actual as returned by the respondent and classified under the category of 'Others'. Religion not stated has been added for those persons who have not stated their religion at the time of canvasing the status of religion.

Percentage Distribution of Population by Major Religions in Gujarat State and Patan district, 2001.

Sl. No.	Religion	Gujarat State		Patan District	
		Population	Percentage	Population	Percentage
1	2	3	4	5	6
1	Hindu	45,143,074	89.1	1,057,013	89.4
2	Muslim	4,592,854	9.1	119,748	10.1
3	Christian	284,092	0.5	189	0.0
4	Sikh	45,587	0.1	201	0.0
5	Buddhist	17,829	0.0	7	0.0
6	Jain	525,305	1.0	5,136	0.4
7	Others	28,698	0.1	7	0.0
8	Religion not stated	33,578	0.1	408	0.1

It can be seen from the above statement that proportion of Hindu population in the district is 89.4 per cent against the state average of 89.1 per cent. In case of Muslims, the proportion is 10.1 per cent in the district against the state average of 9.1 per cent. Jains are recorded at 0.4 per cent of district population. The proportion of remaining religions is negligible in the state as well as in Patan as compared to Hindus and Muslims.

The pattern of distribution of the population of major religious communities between rural and urban areas of Patan is as under according to 2001 Census:

Religion	Number of Followers	Population	
		Rural	Urban
1	2	3	4
Hindu	1,057,013	856,189	200,824
		(81.0)	(19.0)
Muslim	119,748	85,882	33,866
		(71.7)	(28.3)
Christian	189	90	99
		(47.6)	(52.4)
Sikh	201	81	120
		(40.3)	(59.7)
Buddhist	7	-	7
		(0.0)	(100.0)
Jain	5,136	1,811	3,325
		(35.3)	(64.7)
Other	7	6	1
		(85.7)	(14.3)
Religion not stated	408	222	186
		(54.4)	(45.6)

Note: Percentages are given in bracket

TABLE 1

DECADAL CHANGE IN POPULATION OF TALUKAS BY RESIDENCE, 1991-2001

Sl. No.	Name of Taluka	Population						Percentage Decadal Variation 1991-2001			Percentage Urban Population	
		1991*			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

4	Sidhpur	173,390	121,596	51,794	190,937	132,743	58,194	10.1	9.2	12.4	29.9	30.5
5	Patan	271,350	174,325	97,025	295,621	181,872	113,749	8.9	4.3	17.2	35.8	38.5
6	Harij	73,297	56,661	16,636	84,813	66,341	18,472	15.7	17.1	11.0	22.7	21.8
7	Sami	132,211	132,211	0	164,705	164,705	0	24.6	24.6	0.0	0.0	0
8	Chanasma	126,793	110,577	16,216	128,629	112,807	15,822	1.4	2.0	-2.4	12.8	12.3
	District Total :	**1,036,019**	**830,247**	**205,772**	**1,182,709**	**944,281**	**238,428**	**14.2**	**13.7**	**15.9**	**19,9**	**20.2**

Note : * Recasted Population

Table 1 gives talukawise details pertaining to the decadal changes in the population during the last decade of 1991-2001 along with the percentage of urban population for last two Censuses. The decadal growth rate of the district is 14.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 13.7 per cent and 15.9 per cent. The growth rate of urban areas is higher for all other talukas except for Harij and Chanasma talukas. It can be seen that percentage proportion of urban population is reported to be 20.2 per cent in 2001 Census which was 19.9 per cent in 1991 Census. Thus as per 2001 Census 79.8 per cent of population lives in rural areas of the district. The highest decadal growth rate of 26.9 per cent is seen in Radhanpur taluka while Chanasma taluka has reported the lowest decadal growth of only 1.4 per cent. Chanasma has also reported negative urban growth rate of 2.4 per cent.

TABLE 2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Table 2 gives the details of absolute number and percentage of inhabited villages falling in each range of population size of villages and number of male and female in each population range for the rural areas of the district. Out of 517 inhabited villages only 5 (1 per cent) villages have population of less than 200 while 36 (7 per cent) villages are in population range of 200-499. There are 119 (23 per cent) villages in the range of 500-999 and 182 (35.2 per cent) villages have population between 1,000 and 1,999 persons. 156 (30.2 per cent) and 17 (3.3 per cent) villages are in the ranges of 2,000-4,999 and 5,000-9,999 respectively. There are only 2 (0.4 per cent) villages whose population is 10,000 or more.

TABLE 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	NAME OF TOWN
(a) New	
(i) Statutory town	Nil
(ii) Census town	Nil
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census	Nil
(c) Declassified	Nil
(d) Wholly merged with other town (s)	Nil

Declassified means the census towns of 1991census which failed to satisfy the demographic & economic criteria of Town in Census 2001.

Table 3 is a self-explanatory and needs no elaboration.

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of Population Density (per Square Kilometer)	Total Number of Villages in each Population Density Range	Percentage of Villages in each Population Density Range	Population	Percentage Distribution of Population
1	2	3	4	5
0-10	1	0.2	79	0.0
11-20	4	0.8	2,882	0.3
21-50	20	3.9	17,413	1.8
51-100	74	14.3	105,893	11.2
101-200	190	36.8	296,005	31.3
201-300	116	22.4	234,663	24.9
301-500	85	16.4	208,009	22.0
501 +	27	5.2	79,337	8.4
Not known	0	0.0	0	0.0
District Total:	**517**	**100.0**	**944,281**	**100.0**

Population Density (Rural) of the district: 168

Table 4 shows the distribution of villages by population density. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 190 accounting for 36.8 per cent of villages with 31.3 per cent of total rural population are having the density range of 101-200. This is followed by 116 (22.4 per cent) villages with 24.9 per cent population in range of 201-300 and 85 (16.4 per cent) villages having 22 per cent of rural population in range of 301-500. There are 74 (14.3 per cent) villages having 11.2 per cent of population in the range of 51-100 and 27 (5.2 per cent) villages having 8.4 per cent of rural population have density of 501 and more. As much as 20, 4 and one village with combined population proportion of 2.1 per cent are in the range of 21-50, 11-20 and 0-10 respectively. There is no village in the range titled 'Not known'.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Sl. No.	Census Year	Gujarat State			Patan District		
			Total	RuralUrban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	1901	954	951	965	951	935	1,007
2	1911	946	943	960	944	922	1,030
3	1921	944	947	931	949	938	999
4	1931	945	948	934	967	957	1,006
5	1941	941	954	898	968	965	981
6	1951	952	964	920	971	964	995

9	1981	942	959	905	963	966	952
10	1991	934	949	907	944	946	936
11	2001	920	945	880	932	938	910

Table 5 gives the details of sex ratio of State and Patan district for 11 Census years starting from 1901 to 2001. As per 2001 Census the district sex ratio comes at 932 against the State sex ratio of 920. For rural areas the same is 938 while in urban areas there are 910 females for every 1,000 males. It can be seen that State urban sex ratio is lower than the district urban sex ratio while state rural sex ratio is higher than that of Patan.

TABLE 6

SEX RATIO BY TALUKAS, 2001

Sl. No.	Name of Taluka	Sex Ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Santalpur	935	935	-
2	Radhanpur	935	940	920
3	Vagdod	946	946	-
4	Sidhpur	947	954	931
5	Patan	914	925	897
6	Harij	910	913	899
7	Sami	947	947	-
8	Chanasma	935	937	919
	District Total:	**932**	**938**	**910**

Table 6 gives the details of sex ratio for total, rural and urban areas at taluka level in the district as per 2001 Census. There are 932 females for every 1,000 males in the district. The rural sex ratio of 938 is higher than that of urban sex ratio of 910 in the district. In all the urban areas of the talukas same trend is visible. Among talukas Sidhpur and Sami have reported the highest sex ratio of 947 while the lowest of 910 is reported in Harij. In rural areas the highest sex ratio of 954 is reported in Sidhpur and the lowest of 913 is reported in Harij. For urban areas the highest sex ratio of 931 is reported in Sidhpur while the lowest sex ratio of 897 is registered in Patan.

TABLE 7

SEX RATIO BY TALUKAS / C.D. BLOCKS, 2001

Sl.No.	Name of Taluka/C. D. Block	Sex Ratio
1	2	3
1	Santalpur	935
2	Radhanpur	940
3	Vagdod	946
4	Sidhpur	954
5	Patan	925
6	Harij	913
7	Sami	947
8	Chanasma	937
	District (Rural) Total:	**938**

Table 7 gives the details of C.D. Blockwise sex ratio for rural population in the district. As the table reveals the district (rural) sex ratio is 938. Among C.D. Blocks the highest proportion of 954 females per 1,000 males is reported in Sidhpur while the lower sex ratio of 913 is in Harij.

TABLE 8

SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of Sex Ratio for Villages	Number of Inhabited Villages	Percentage of Villages in each Range	Population 2001	Percentage Distribution of Population
1	2	3	4	5
Less than 700	1	0.2	649	0.1
700-749	3	0.6	2,399	0.3
750-799	6	1.2	6,886	0.7
800-849	25	4.8	22,631	2.4
850-899	92	17.8	154,284	16.3
900-949	175	33.8	373,247	39.5
950-999	148	28.6	289,050	30.6
1000-1099	64	12.4	92,402	9.8
1100+	3	0.6	2,733	0.3
District Total:	**517**	**100.0**	**944,281**	**100.0**

Sex ratio (Rural) for District: 938

Table 8 shows sex ratio of rural population by 9 ranges based on 2001 Census. The maximum number of 175 (33.8 per cent) villages with maximum population proportion of 39.5 per cent is in the sex ratio range of 900-949 followed by 148 (28.6 per cent) villages in range of 950-999 with population of 30.6 per cent. 92 (17.8 per cent) villages are in the range of 850-899 having 16.3 per cent population and 64 (12.4 per cent) villages are in range of 1,000-1,099 with population coverage of 9.8 per cent. 3 (0.6 per cent) villages who have 0.3 per cent of total population are in the range of 1,100 and more. As much as 1,3 and 6 villages accounting together for 2 per cent of villages and 1.1 per cent of population are in the range of less than 700, 700-749 and 750-799 respectively. As many as 25 (4.8 per cent) villages, with 2.4 per cent of population are in the sex ratio range of 800-849.

TABLE 9

SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of UA / Town	Urban Status of Town	Sex Ratio
1	2	3	4

		Urban	**30,697**	**17,121**	**13,576**	**793**

Table 10 shows the sex ratio of population in the age group 0-6 years for total, rural and urban areas in respect of each taluka of the district. Total population in age group of 0-6 is 190,192 which include 101,968 males and 88,224 females. The sex ratio in this age group is 865. For rural areas the sex ratio of 0-6 years is 880 while for urban areas the same is 793. Among talukas the sex ratio varies from 803 in Chanasma to 919 in Santalpur. In rural areas the highest sex ratio of 921 is recorded in Radhanpur and the lowest of 809 in Chanasma. As regards urban areas the highest and the lowest sex ratio of 880 and 749 are recorded in Radhanpur and Chanasma respectively.

TABLE 11

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKAS / C.D. BLOCKS, 2001

Sl. No.	Name of Taluka / C.D. Block	Total Population in 0-6 Age Group			Sex Ratio for 0-6 Age Group

Sex ratio (Rural) for District: 880

Table 12 gives the details about distribution of villages in nine different ranges of sex ratio in the age group of 0-6 years as well as percentage of villages, total population and percentage distribution of population falling in each range of sex ratio in the district. The maximum number of villages i.e. 84 is in the range of 850-899 with the largest population of 18.8 per cent followed by 79 villages with 15 per cent population in the range of 900-949. There are 51, 68 and 35 villages with population proportion of 12.3 per cent, 11.1 per cent and 3.7 per cent in the range of 950-999, 1,000-1,099 and 1,100 and more respectively. 37 villages are in the range of less than 700 and 30 villages are in the range of 700-749. The population covered by each of these ranges are 4.4 per cent. There are 60 villages in the range of 750-799 with population of 12.7 per cent and 73 villages in the range of 800-849 having population proportion of 17.7 per cent.

Table 14 reveals the absolute numbers and percentage of Scheduled Castes and Scheduled Tribes population in talukas of the district. The total population of the district is 1,182,709 and 9.9 per cent (116,879) of this population belong to Scheduled Castes. The Scheduled Tribes population of the district is 12,637 which is 1.1 per cent of total population. In rural areas the proportion of Scheduled Castes and Scheduled Tribes population to total rural population is 9.7 per cent and 0.7 per cent respectively. In urban areas Scheduled Castes population is 10.5 per cent of urban population and the Scheduled Tribes population is 2.5 per cent of population. Among talukas the highest proportion of Scheduled Castes population of 11.7 per cent is found in Sidhpur and the lowest of 6.7 per cent is recorded in Santalpur. As regards Scheduled Tribes population in Radhanpur Scheduled Tribes population is 2.7 per cent of total population which the highest among talukas while the lowest proportion of Scheduled Tribes population i.e. 0.3 per cent is recorded in Sami taluka.

TABLE 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKAS / C.D. BLOCKS, 2001

	District (Rural) Total:	**944,281**	**91,956**	**6,679**	**9.7**	**0.7**

Table 15 shows number and percentage of Scheduled Castes and Scheduled Tribes population in rural areas of the district. The district (rural) Scheduled Castes population is 91,956 which is 9.7 per cent of rural population and the Scheduled Tribes population in rural areas is 6,679 which is 0.7 per cent of population. Among talukas (rural) each taluka of Sidhpur and Patan has 11.7 per cent of Scheduled Castes population which is the highest against the lowest proportion of 6.7 per cent of Scheduled Castes population recorded in Santalpur. In Radhanpur Scheduled Tribes population is 2.6 per cent of population which is the highest and the lowest proportion of 0.3 per cent Scheduled Tribes population is registered in Sami .

TABLE 16

	(a) Sidhpur (M+OG)	58,194	6,851	998	11.8	1.7
	(i) Sidhpur (M)	53,858	6,248	889	11.6	1.7
	District(Urban) Total :	**238,428**	**24,923**	**5,958**	**10.5**	**2.5**

Note : UA = Urban Agglomeration.

Table 18 gives the details about the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population in UA/ Towns as per 2001 Census. As the table reveals 10.5 per cent of total population of 238,428 belongs to Scheduled Castes and 2.5 per cent of population belongs to Scheduled Tribes. The highest and the lowest proportion of 12.1 per cent and 8.7 per cent of Scheduled Castes population to total population are recorded in Chanasma (M) and Harij (M) respectively. As regards Scheduled Tribes population Harij (M) has the highest proportion of Scheduled Tribes population i.e. 3.4 per cent whereas the lowest of 0.4 per cent is recorded in Chanasma (M).

TABLE 19

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN TALUKAS/C. D. BLOCKS, 2001

Sl. No.	Name of Taluka/ C.D.Block	Scheduled Castes Sex Ratio	Scheduled Tribes Sex Ratio
1	2	3	4
1	Santalpur	925	885
2	Radhanpur	961	998
3	Vagdod	888	838
4	Sidhpur	904	902
5	Patan	899	876
6	Harij	933	682
7	Sami	942	811
8	Chanasma	897	780
	District (Rural) Total :	**915**	**893**

Table 19 shows sex ratio among Scheduled Castes and Scheduled Tribes in rural areas of the district. The sex ratio for Scheduled Castes is 915 and for Scheduled Tribes it is 893. Among C.D. Blocks the highest sex ratio of 961 for Scheduled Castes is recorded in Radhanpur and the lowest of 888 in Vagdod. The highest Scheduled Tribes sex ratio of 998 is registered in Radhanpur while the lowest of 682 in Harij.

TABLE 20

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

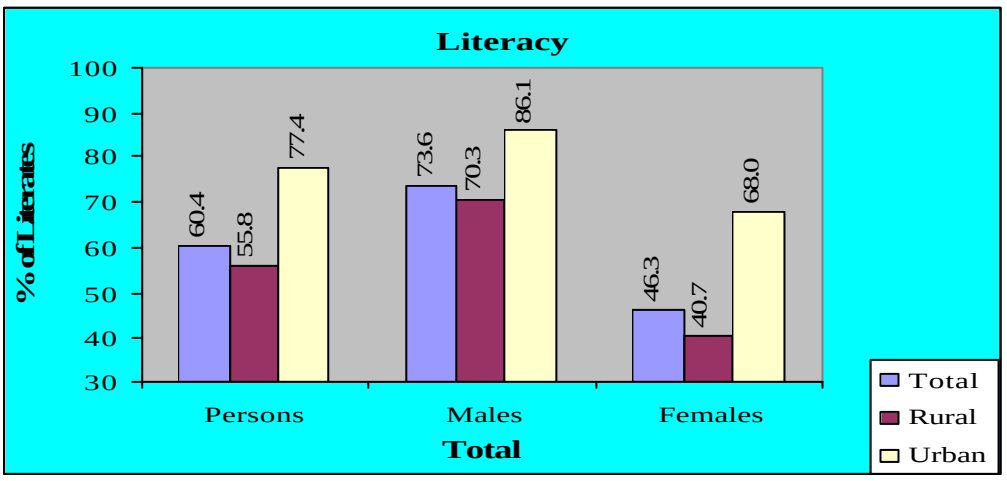

Sl.No.	Name of UA / Town	Scheduled Castes Sex Ratio	Scheduled Tribes Sex Ratio
1	2	3	4
1	Chanasma (M)	915	535
2	Harij (M)	839	739
3	Patan (M)		(See Patan Urban Agglomeration)
	Patan UA	909	874
	(a) Patan (M+OG)	909	874
	(i) Patan (M)	914	874
4	Radhanpur (M)	955	1,011
5	Sidhpur (M)		(See Sidhpur Urban Agglomeration)
	Sidhpur UA	927	824
	(a) Sidhpur (M+OG)	927	824
	(i) Sidhpur (M)	924	785
	Sex ratio (Urban) for the district:	**915**	**865**

Note : UA = Urban Agglomeration.

Table 20 indicates the sex ratio among Scheduled Castes and Scheduled Tribes in UA/Towns of the district. In urban areas the sex ratio of Scheduled Castes is 915 for the district. Among UA/Towns the highest and the lowest sex ratio of 955 and 839 are found in Radhanpur (M) and Harij (M) respectively. The highest sex ratio of Scheduled Tribes population is recorded at 1,011 female per 1,000 males in Radhanpur (M) and the lowest of 535 is recorded in Chanasma (M).

Table 21 shows talukaswise literacy rate with the absolute number of literates and illiterates for total, rural and urban areas separately for the population above the age of six. As per 2001 Census the proportion of effective literates to total population is 60.4 per cent in the district. This proportion in rural areas is 55.8 per cent against 77.4 per cent in urban areas. In the district the male literacy rate of 73.6 per cent is much higher than the female literacy rate of 46.3 per cent leaving a wide gap of 27.3 percentage points in male-female literacy rate. Among talukas Chanasma tops with 73.6 per cent literates followed by Sidhpur with 72.2 per cent and Patan with 69.4 per cent. The lowest literacy rate of 37.4 per cent is recorded in Santalpur. As regards male-female literacy rate gap the highest gap of 33.5 percentage points is found in Sami taluka while the lowest gap of 23.4 percentage points is recorded in Patan. It is interesting to note that the gap in male-female rate in urban area is significantly lower at 18.1 percentage points as compare to gap of 29.6 percentage points recorded in rural areas.

TABLE 22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN TALUKAS/ C. D. BLOCKS, 2001

Sl. No.	Name of Taluka/ C.D.Block	Number of Literates and Illiterates						Percentage of Literates			Gap in Male-Female Literacy Rate
		Number of Literates			Number of Illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

7	Sami	64,494	44,296	20,198	100,211	40,310	59,901	47.7	64.1	30.6	33.5
8	Chanasma	70,044	42,265	27,779	42,763	15,975	26,788	72.4	85.6	58.6	27
	District (Rural) Total:	**438,278**	**282,835**	**155,443**	**506,003**	**204,431**	**301,572**	**55.8**	**70.3**	**40.7**	**29.6**

Table 22 reveals the effective literacy rate along with absolute number of literates and illiterates for the rural population of the district. It can be seen that 55.8 per cent of rural population is literate. The rural male literacy rate is 70.3 per cent and that of female is 40.7 per cent leaving a wide gap of 29.6 percentage points in male-female literacy rate.

Among C.D. Blocks the highest literacy rate of 72.4 per cent is recorded in Chanasma and the lowest of 37.4 per cent is registered in Santalpur. As regards gap in male-female literacy rate it varies from 26.8 percentage points in Sidhpur to 33.5 percentage points in Sami taluka.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of Literacy Rate for Villages	Number of Inhabited Villages	Percentage Distribution of Villages	Population	Percentage Distribution of Population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	1	0.2	179	0.0
11-20	8	1.5	7,454	0.8
21-30	42	8.1	57,216	6.1
31-40	75	14.5	104,307	11.0
41-50	134	25.9	242,294	25.7
51-60	105	20.3	196,449	20.8
61-70	62	12.0	122,333	13.0
71-80	56	10.8	142,614	15.1
81-90	32	6.2	69,110	7.3
91-99	2	0.4	2,325	0.2
100	0	0.0	0	0.0
District Total:	**517**	**100.0**	**944,281**	**100.0**

Literacy Rate for District: 60.4

Table 23 gives the distribution of villages in 12 different ranges of literacy rates. There is no village in the literacy rate range of '0' and in range of 100 per cent. This suggests that no village has either 100 per cent literacy or 100 per cent illiteracy. There are 134 villages accounting for 25.9 per cent of total villages with 25.7 per cent of total population in the range of 41-50 per cent. 105 (20.3 per cent) villages having 20.8 per cent of population are in the range of 51-60 and 75 (14.5 per cent) villages with 11 per cent of population are in the range of 31-40 per cent. The lower literacy rate of 1 to 30 per cent is observed in total of 51 (9.8 per cent) villages with population proportion of 6.9 per cent. Literacy rate of 61 to 99 per cent is observed in 152 (29.4 per cent) villages having 35.6 per cent of total population.

TABLE 24

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATION / TOWNS, 2001

Sl. No.	Name and Urban Status of UA/Town	Number of Literates and Illiterates						Percentage of Literates			Gap in Male-Female Literacy Rate

	District(Urban) Total :	**160,804**	**92,753**	**68,051**	**77,624**	**32,081**	**45,543**	**77.4**	**86.1**	**68**	**18.1**

Note : UA = Urban Agglomeration.

Table 24 shows the absolute number of literates, illiterates and literacy rate by sex in UA/Towns of the district. The population covered for calculating literacy rates does not include population of age of 0-6 years as population of age group of 0 to 6 years is supposed to be illiterate. In Patan district 77.4 per cent of urban population is literate. The male and female literacy rates are 86.1 per cent and 68 per cent respectively. The gap in male-female literacy rate thus comes at 18.1 percentage points. At UA/Towns level the highest literacy rate of 81.9 per cent is recorded in Chanasma (M) whereas the lowest rate of 65.5 per cent is recorded in Harij (M). The gap in male-female literacy rate varies from 15.9 percentage points in Sidhpur (M) to 24.4 percentage points in Radhanpur (M).

Table 25 gives data of literacy rates of Scheduled Castes population in rural areas of the district. The literacy rate for Scheduled Castes is 64.8 per cent for district (rural). The Scheduled Castes male and female literacy rates are 78.9 per cent and 49.7 per cent respectively. The gap in male-female literacy rate is significantly higher at 29.2 percentage points. The highest of 76.8 per cent and the lowest of 50.7 per cent literacy rates for Scheduled Castes are recorded in Chanasma and Santalpur respectively. The gap in male-female literacy rates is the highest in Sami having 36.5 percentage points while the lowest gap of 24.8 percentage points is recorded in Chanasma.

TABLE 26

District Total:	**439**	**100.0**	**91,956**	**100.0**

Literacy rate for District (Rural) : 64.8

Table 26 reveals the distribution of villages in 12 different ranges of literacy rates for Scheduled Castes population in rural areas of the district. There is no literate in 2 villages. The Scheduled Castes population of these 2 villages are only 6. There is no village in literacy rate range of 1-10 per cent and 3 villages having proportion of Scheduled Castes population of only 0.1 per cent are in the literacy range of 11-20 per cent. 9 and 26 villages with Scheduled Castes population of 0.7 per cent and 3 per cent are in the literacy range of 21-30 and 31-40 respectively. 53 (12.1 per cent) villages having Scheduled Castes population of 7.9 per cent are in the literacy range of 41-50 per cent. There are 118 (26.9 per cent) villages with Scheduled Castes population of 22.7 per cent in the range of 51-60 and maximum number of villages i.e. 120 (27.3 per cent) in which maximum Scheduled Castes population of 32.2 per cent is reported in the literacy range of 61-70 per cent. 79 (18 per cent) villages have literacy between 71-80 per cent and Scheduled Castes population in these villages is found to be 25.3 per cent of rural Scheduled Castes population. There are 3 (0.7 per cent) villages with only 0.4 per cent Scheduled Castes population in the literacy range of 91-99 per cent. 6 (1.4 per cent) villages with entire population of 39 persons is reported to be literate indicating 100 per cent literacy.

TABLE 27
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Number of Literates and Illiterates						Percentage of Literates			Gap in Male-Female Literacy Rate

Table 27 gives the details about absolute number of literates and illiterates and percentage of literates (except age group of 0-6 years) for Scheduled Castes by sex in urban areas of Patan district. The literacy rate in urban area for Scheduled Castes is 80.8 per cent. The Scheduled Castes male literacy rate is 90.7 per cent and female literacy rate is 70.2 per cent. Among towns the highest rate of 83.8 per cent is recorded in Patan (M) and the lowest rate of 69.4 per cent is recorded in Radhanpur (M). The gap in male-female literacy rate is 20.5 percentage points for Scheduled Castes population in urban areas of the district. This gap is found to be the highest in Radhanpur (M) at 30.3 percentage points while the lowest gap of 16.6 percentage points is recorded in Harij (M).

Table 28 gives the details about number and percentage of Scheduled Tribes literates, illiterates and literacy rate by sex in rural areas of the district. 46.4 per cent of Scheduled Tribes population (excluding population of 0-6 years) are literates in the district. The literacy rate for males in Scheduled Tribes is 61.3 per cent and for females it is 29.9 per cent. The gap in male-female literacy rate is 31.4 percentage points. Among rural areas of the district Chanasma taluka/C. D. Block has reported the highest Scheduled Tribes literacy rate of 60.5 per cent against the lowest rate of 27.8 per cent recorded in Harij taluka. The male literacy rate is higher than that of female in all C. D. Blocks. The highest and the lowest gap in male-female literacy is recorded at 37.9 percentage points in Radhanpur and 23.8 percentage points in Harij respectively.

Note : * Towns having outgrowths

Table 30 shows absolute number of literates and illiterates with per centage of literacy by sex in towns of the district. The district urban literacy rate for Scheduled Tribes is 58.3 per cent. The Scheduled Tribes male and female literacy rates are recorded at 73.4 per cent and 41.3 per cent respectively leaving a gap of 32.1 per centage points in male-female literacy in towns of the district. The highest literacy rate of 93.1 per cent is found in Chanasma (M) and the lowest rate of 43.2 per cent in Harij (M). The highest gap of 41.9 per centage points in male-female literacy rate is in Harij (M) against the lowest gap of 21.1 per centage points recorded in Chanasma (M). It will be interesting to note that in Chanasma (M) male literacy rate is found to be 100 per cent where entire population of 39 males is reported as literate.

Table 31 details absolute number and percentage of main workers, marginal workers and non workers by sex at taluka level in the district. It can be seen that 45.1 per cent of total population is total workers constituting 33.4 per cent main workers and 11.6 per cent marginal workers. The remaining 54.9 per cent are non workers. The sex wise workers show that 53.2 per cent of male and 36.3 per cent of females are workers. 48.7 per cent of males and 17 per cent of females are main workers while 4.5 per cent of males and 19.3 per cent of females are marginal workers. As females are attending in other economic activities their proportion is higher than that of males. 46.8 per cent of males and 63.7 per cent of females are non workers. Among talukas the highest and the lowest proportion of female marginal workers are recorded in Vagdod (27.4 per cent) and Sidhpur (13.2 per cent) respectively. The highest percentages of 50.8 of the total workers are recorded in Chanasma and the lowest of 39.6 per cent in Sidhpur.

Table 32 gives the number and percentage of main workers, marginal workers and non workers by sex for rural population of the district. Total workers to total population is 48.3 per cent comprising 34.5 per cent main workers and 13.8 per cent marginal workers. Sex wise break up shows that there are 48.8 per cent of male main workers against 19.2 per cent of female main workers. The female percentage for marginal workers is 23.1 per cent which is significantly higher than the male proportion of 5.2 per cent. The proportion of non workers to total population is 51.7 per cent, the male and female percentages for non workers are 46.1 per cent and 57.7 per cent respectively. The percentages of female marginal workers and non workers are higher than that of male marginal workers and non worker in all the talukas of the district. Among talukas Harij has the highest proportion of total workers, i.e. 53 per cent while the lowest of 44.2 per cent is recorded in Sidhpur.

UA=Urban Agglomeration

Table 33 shows the absolute number with percentages of main workers, marginal workers, total workers and non workers by sex in UA/Towns of the district. The total urban population of the district is 238,428 having 32.3 per cent workers.Out of which 29.4 per cent is main workers and 2.9 per cent is marginal workers. A very high proportion of 67.7 per cent of total population is reported to be non workers. The sexwise break up shows that proportion of male main workers is 48.7 per cent which is remarkably higher than the females main workers of 8.1 per cent. Among marginal workers the scene is quite reversed where female proportion of 4 per cent is almost double in comparison to male marginal workers of 1.9 per cent. At district level total male workers are 50.6 per cent and female workers are only 12.2 per cent. Male non workers are 49.4 per cent of male population which is significantly lower than female non workers of 87.8 per cent. Among towns Chanasma has the highest proportion of 39.9 per cent of total workers and the lowest of 28.6 per cent for the same is reported in Sidhpur (M). The highest and the lowest percentage of marginal workers are recorded at 8.9 per cent in Chanasma (M) and at 1.9 per cent in Sidhpur (M) respectively.

Note: Percentages are given in brackets

Table 34 gives the details of distribution of workers by sex in four categories of economic activity in the district. It can be seen from the data that total workers are 45.1 per cent of total population. 28.5 per cent of total workers are cultivators. 35.4 per cent are Agricultural labourers. 1.7 per cent are Household Industry workers and 34.4 per cent are other workers. Thus the data indicates that agricultural sector plays a major role in providing employment to the working force of the district. It can be seen that 63.9 per cent of population is engaged in cultivation and agricultural labour. The proportion of agricultural labourers varies from 50 per cent in Sami to 24.9 per cent in Sidhpur while the highest proportion of 37.4 per cent of cultivators is recorded in Vagdod and the lowest of 21.8 per cent in Sidhpur. The highest proportion of 52 per cent of other workers is recorded in Sidhpur while the lowest of 17.6 per cent in Sami taluka.

The proportion of Household Industry workers is not so significant in all the talukas. As regards male and female participation it is observed that male workers of 33.9 per cent in cultivation and 37.6 per cent in other work is higher than that of female workers of 20 per cent in cultivation and 29.4 per cent in other work. In case of agricultural labourers and Household Industry workers males' participation in these two categories are lower in comparison to females' participation.

				(42.3)	**(20.9)**	**(50.7)**	**(1.6)**	**(26.8)**

Table 35 gives the details about distribution of workers by sex in four categories of economic activity in rural areas (taluka/ C.D. Block). 48.3 per cent of rural population of 944,281 are workers. Among these workers 32.6 per cent are cultivators, 40.3 per cent are agriculture labourers, 1.4 per cent are Household Industry workers and 25.8 per cent are other workers. It can be seen that in rural areas 72.9 per cent of workers are engaged in agriculture sector as cultivators and agriculture labourers. While only 1.4 per cent of workers are Household Industry workers. Thus agriculture plays a major role in providing employment to working force as compared to Household Industry sector which does not provide major employment.

Among cultivators male workers is 41.2 per cent which is higher than that of female workers of 20.9 per cent. In the case of agricultural labourers the scene is quite reversed where the participation of females in agricultural labourers is 50.7 per cent against the male participation of 32.6 per cent. Among C.D. Blocks the proportion of cultivators varies from 27.6 per cent in Sidhpur to 38.2 per cent in Radhanpur. The highest of 50 per cent of agricultural labourers is recorded in Sami while the lowest of 31.2 per cent agricultural labourers is recorded in Sidhpur. Household Industry workers are significantly comparatively low in all C.D. Blocks in comparison to other categories of workers.

UA = Urban Agglomeration

Table 36 shows the distribution of workers by sex in four categories of economic activity in UA/ Towns of the district. In the urban areas of the district total workers are 32.3 per cent of total population. Among these workers 4.2 per cent are cultivators 6.4 per cent are agriculture labour, 3.7 per cent are Household Industry workers and 85.7 per cent are other workers. Thus it is very much clear that other sector plays a major role in providing employment to working force of urban areas. Among UA/Towns Radhanpur (M) has the highest percentage of 93.5 per cent of other workers followed by Sidhpur (M) 95.8 per cent while the lowest of 52.4 per cent is recorded in Chanasma (M). As many as 43.9 per cent of workers in Chanasma are working as cultivators and agriculture labourers while 3.6 per cent workers are engaged in Household Industry workers.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 gives the details the distribution of villages according to availability of different amenities. Out of 517 inhabited villages, 514 (99.4 per cent) have at least one primary school while all the villages have Power Supply. 510 (98.6 per cent) villages have Improved drinking water facility either of a tap, well, tank, tubewell, river or canal etc. 485 (93.8 per cent) have Transport communication and 478 (92.5 per cent) villages have Approach by pucca road. 426 (82.4 per cent) villages have Telephone facility, 384 (74.3 per cent) have Agricultural Credit Societies, 314 (60.7 per cent) have Post Office, 265 (51.3 per cent) have medical facility of one or another kind and only 39 (7.5 per cent) villages have banking facilities. Except 1 village of Santalpur and 2 villages of Patan all the villages have education facilities. It can be observed that basic necessary amenities like medical are not adequately available to majority of the villages of the district.

TABLE 38

NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 gives the details about the number and percentage of rural population of 944,281. 99.9 per cent population have education facility of one or another type. For other facilities, 69.8 per cent of population has medical facilities and 98.9 per cent have Improved drinking water facility. Post Office facilities are available to 78.5 per cent population and Telephone is available to 90.9 per cent of population. 97.1 per cent of population has Transport and communication facility, 18.8 per cent have banking facilities, 85.2 per cent have Agricultural Credit societies and 95.5 per cent of population enjoy facilities of approach by pucca road. 100 per cent population i.e. all 944,281 persons have power supply facility. It can be observed that in rural areas necessary medical facilities are not available to 30.2 per cent of population. Banking facilities are not available to 81.2 per cent of population. Post Office facility is also not available to 21.5 per cent of population.

TABLE 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the Amenity of	Distance Range of Place from the Villages where the Amenity is Available			
	Less than 5 Kilometres	5-10 Kilometres	10+ Kilometres	Total (Col. 2 - 4)

7. Agricultural Credit Societies			90		28		15		133

Note : * In Gujarat State the levels of education are classified as under :

(i) Primary School (From Std. I to VII passed)

(ii) Secondary/Matriculation (From Std. VIII to X passed)

(iii) Higher Secondary (From Std. XI to XII passed). Hence details under 1(b) are not shown.

Table 39 shows distribution of villages, who do not have certain amenities arranged by distance ranges from the places where these amenities are available. It can be seen that 3 villages have primary school and 49 villages have Degree College within 5 km. while 74 and 388 villages have Degree College within 5-10 km. and at a distance of 10 or more km. respectively. 40 villages have hospital and 147 have Primary Health Centre within 5 km. 111 and 134 villages have hospital and Primary Health Centre within 5-10 km. while 357 villages have hospital and 208 villages have Primary Health Centre at a distance of 10 or more km. Post Office are available within 5 km. to 149 villages and 40 villages have Post Office within 5-10 km.14 villages have Post Office at a distance of 10 or more km. As regards Telephone, 48 villages have Telephone within a distance of less than 5 km., 31 villages have Telephone within 5-10 km. and 12 villages have Telephone facility at a distance of 10 or more km. Bus facilities are available within 5 km. to 26 villages. 4 and 2 villages have bus facilities within 5-10 km. and at a distance of 10 or more km. respectively. Commercial bank/Co-operative bank facilities are available to 146 and 99 villages within 5 km. 154 and 187 villages have commercial banks within 5-10 km. and at a distance of 10 or more km. respectively. Co-operative banks are within 5-10 km. to 161 villages. As many as 236 villages have Co-operative banks at a distance of 10 or more km. 90 villages have Agricultural Credit societies within 5-10 km. and 28 villages have this facility within 5-10 km. 15 villages have Agricultural Credit societies at a distance of 10 or more km.

$ Transport communication includes bus service, rail facility and navigable waterways

In table No. 40, villages are distributed according to the distance from the nearest statutory town and availability of different amenities. The villages are distributed in 4 different ranges for this purpose. Out of 517 inhabited villages 33 are at a distance of less than 5 km. from the nearest statutory town. Out of these 33 villages 31 have Education facilities, 19 have Medical, 18 have Post Office, 29 have Telephone, 27 have Transport Communication, 2 have banks, 24 have Agricultural Credit Society and 32 villages in this range have approach by pucca road. Out of total villages 247 have nearest statutory town at a distance of 5 to 15 kms and all these 247 villages have education facility. 237, 233 and 210 villages in this range have facilities of Transport Communication, Approach by pucca road and Telephone respectively. As many as 188 villages have the facilities of Agricultural Credit Society, 155 have Post Office, 130 have Medical and 18 have banks in this range. There are 222 villages situated at a distance of 16-50 km. from the nearest statutory town. In this range 221 villages have education facility, 110 have Medical, 131 have Post Office, 177 have Telephone, 208 have Transport Communication, 18 have banks, 164 have Agricultural Credit Society and 198 have Approach by pucca road. 15 villages have nearest town at a distance of 51 or more kilomtres and all these 15 villages have facilities of education and Approach by pucca road. As many as 13 have Transport Communication, 6 have Medical, 10 have Post Office and Telephone, 8 have Agricultural Credit Society and only one village has banking facility. There is no village in the range 'Unspecified'.

Note : # Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Percentage are given in brackets.

Table 41 shows distribution of villages according to 6 different types of population ranges and amenities available. Out of total of 517 inhabited villages of the district 2 villages are in the population range of 10,000 and more and all the amenities are available to these 2 villages. There are 17 villages in the population range of 5,000-9,999. All these villages have amenities of education, Improved Drinking water facilities, Post Office, Telephone, Transport Communication, Approach by pucca road and Power Supply. 16 villages in this range have amenities of Medical and Agricultural Credit Society while 11 have banking facilities. There are 156 villages in the population range of 2,000-4,999. Only Education and Power Supply facilities are available to all 156 villages. Only 23 villages in this range are having banking facilites. There are 182 villages in the population range of 1,000-1,999. Power Supply facility is available to all these 182 villages while other facilities are available to 3 to 181 villages. There are 119 villages in the population range of 500-999. In this range only education and Power Supply facilities are available to these 119 villages. In this range no village has banking facilities and 118 have Improved drinking water facility. There are 41 villages in population range of 1-499. Power Supply facility is available to these villages. In this range no village has banking facility while 40 have Improved drinking water facilities.

It can be observed that villages in the higher population range are proportionately enjoying more amenities as compared to villages in the lower population range.

TABLE 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Taluka/ C. D. Block	Number of Inhabited Villages	Total Area (in Hectares)	Percentage of Cultivable Area to Total Area	Percentage of Irrigated Area to Total Cultivable Area
1	2	3	4	5	6
1	Santalpur	73	135,026.0	58.5	4.1
2	Radhanpur	56	57,188.3	75.6	21.9
3	Vagdod	39	28,017.8	83.0	64.0
4	Sidhpur	54	35,732.9	78.7	58.6
5	Patan	99	72,844.9	81.0	73.5
6	Harij	39	37,703.5	81.2	35.6
7	Sami	98	151,465.0	72.7	12.4
8	Chanasma	59	43,673.1	82.0	61.6
District Total:		**517**	**561,651.5**	**72.9**	**32.8**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 gives the distribution of villages according to land use. As the table reveals the total area of 517 inhabited villages of the district is 561,651.5 hectares. The cultivable area is reported to be 72.9 per cent of total area and irrigated area is 32.8 per cent of total cultivable area. A look at the land use pattern shows that Sami has the total area of 151,465 hectares distributed in 98 villages which is the highest among C.D. Blocks while Vagdod has total area of 28,017.8 hectares spread in 39 villages which is the lowest.

The highest proportion of 83 per cent of cultivable area is reported in Vagdod and the lowest of 58.5 per cent in Santalpur. In Santalpur only 4.1 per cent of cultivable area is irrigated which is the lowest among C.D. Blocks whereas Patan has 73.5 per cent of cultivable area as irrigated which is the highest.

TABLE 43

PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS (IN Rs.)

Sl. No.	Class, Name & Urban Status of the Town	Per Capita Receipt			Per Capita Expenditure					
		Total	Through Taxes	From all Other Sources	Total	General Administration	Public Health and Conveniences	Public Works	Public Institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Chanasma (M)	599.5	220.5	379	569.2	133.6	4.7	85.1	0	345.8
2	IV Harij (M)	339.4	170.4	169	356.3	89.5	25	96.9	0	145
3	I Patan (M)*	491.9	243.8	248.1	461.1	106	216.7	117.3	0	21.2
4	III Radhanpur (M)	432.3	257.6	174.7	329.9	44.1	124.3	41.2	0	120.3
5	II Sidhpur (M)*	361.3	290.8	70.5	398	127.8	0.1	10.6	11	248.5
	District Total :	**447.3**	**249.9**	**197.4**	**427.1**	**103.5**	**122.4**	**77.2**	**2.7**	**121.2**

Note :- * Towns having outgrowths.

Table 43 shows per capita receipt and expenditure in statutory towns of the district. The per capita receipt of the district is Rs. 447.3 which is made by contribution of Rs. 249.9 through taxes and Rs. 197.4 from all other sources.

The per capita expenditure of the district is Rs. 427.1. Out of these expenditure Rs. 103.5 are spent on General Administration, Rs. 122.4 on Public Health and Conveniences, Rs. 77.2 on Public works, Rs. 2.7 on Public Institutions and Rs. 121.2 are spent on others(s) items.

Among towns the highest per capita receipt of Rs. 599.5 is recorded in Chanasma (M) and the lowest of Rs. 339.4 in Harij (M). The highest per capita expenditure of Rs. 569.2 is recorded in Chanasma (M) and the lowest of Rs. 329.9 in Radhanpur (M).

TABLE 44

SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Type of Educational Institution				
		Primary	Junior Secondary/ Middle*	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chanasma (M)	4.4	0	1.9	1.9	0.6
2	Harij (M)	3.8	0	1.6	1.6	0
3	Patan (M)	3.8	0	1.3	1.4	0.6
4	Radhanpur (M)	2.2	0	0.9	0.9	0.3
5	Sidhpur (M)	2.9	0	2.4	2.4	0.2
District Total :		**3.4**	**0**	**1.6**	**1.6**	**0.3**

Note: * In Gujarat State, the levels of education are classified as under

(i) Primary School (From Std. I to VII passed)
(ii) Secondary/ Matriculation (From Std. VIII to X passed)
(iii) Higher Secondary (From Std. XI to XII passed). Hence, details under Col.4.are not shown

Table 44 gives the details of availability of schools/colleges per 10,000 populations in urban areas of the district. There are 3.4 primary schools, 1.6 secondary schools, 1.6 senior secondary schools and 0.3 colleges per 10,000 of population in towns of the district. The highest number of primary schools i.e. 4.4 per 10,000 population is in Chanasma (M) while the lowest of 2.2 is in Radhanpur (M). The highest number of secondary schools and senior secondary schools having 2.4 each is reported in Sidhpur (M) while the lowest number of secondary schools and senior secondary schools having 0.9 each is reported in Radhanpur (M).

Chanasma (M) and Patan (M) have 0.6 colleges per 10,000 population which is the highest among towns while the lowest of 0.2 colleges is reported in Sidhpur (M).

TABLE 45

NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and Urban Status of the Town	Number of Beds in Medical Institutions per 10,000 Population
1	2	3
1	Chanasma(M)	62
2	Harij(M)	24
3	Patan(M)*	58
4	Radhanpur(M)	132
5	Sidhpur(M)*	40
	District Total :	**61**

Note : * Towns having outgrowths.

Table 45 shows number of beds in medical institutions in towns of the district. As the data shows there are 61 beds in medical institution of towns per 10,000 of population. In Radhanpur there are 132 beds in medical institutions per 10,000 population which is the highest among towns while the lowest of 24 is reported in Harij (M).

TABLE 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total Population	Slum Population	Percentage of Slum Population to Total Population
1	2	3	4	5
1	Harij	18,472	3,450	18.7
2	Patan	113,749	14,133	12.4
3	Radhanpur	32,191	6,278	19.5
4	Sidhpur	58,194	10,000	17.2
	District Total :	**222,606**	**33,861**	**15.2**

Table 46 gives the details of the proportion of slum population in towns in Patan district. It can be seen that slum population is reported in 4 towns of the district. Out of total population of 222,606 in these towns 15.2 per cent i.e. population of 33,861 is slum population. Among towns Radhanpur has slum population of 6,278 which is 19.5 per cent of its population. In number terms Patan has the highest slum population of 14,133 and Harij has the lowest slum population of 3,450 persons.

TABLE 47

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Most Important Commodity	
		Manufactured	Exported
1	2	3	4
1	Chanasma (M)	Mustard Seeds	Steel Furniture
		Steel Furniture	Agricultural Implements (Iron)
		Castor Seeds	Tobacco
2	Harij (M)	Cotton Bales	Cotton Bales
		Castor Oil	Wheat
		Cotton Seed Oil	Cummin & Suva Seeds

Sl. No.	Name and Urban Status of Town	Most Important Commodity	
		Manufactured	Exported
1	2	3	4
3	Patan (M)*	Machinery Spareparts	Machinery Spareparts
		Mustard Seeds	Oil Seeds,Food Grain
		Patola, Mashroo Cloth	Patola, Mashroo Cloth
4	Radhanpur (M)	Cotton bales	Food Grains
		Pulses	Cotton and Cotton pods
			Pulses
5	Sidhpur (M)*	Isabgul	Isabgul
		Rapeseeds Oil	Rapeseeds Oil
		Cumin Seeds	Cummin Seeds

Note : * Towns having outgrowths.

Table 47 details the most important commodities exported and manufactured in towns of the district. The most important commodities manufactured in the towns of the district are Mustard seeds, Isabgul, cummin seeds, Rapeseeds oil, cotton, pulses, cotton seeds oil, castor oil, caster seeds, cotton bales, machinery spare parts, steel furniture, mushroo cloth and patola. Patan is very famous for its patola weaving.

All the commodities manufactured are also exported from town. Besides these commodities agricultural equipments (iron), tobacco, wheat, food grain, suva seeds, cotton seeds are also exported out of the towns of the district.

Source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 details the number of Households by tenure status and number of rooms occupied in the district. The total number of households is 228,583. Out of this 182,092 households are in rural areas and 46,491 are in urban areas. Out of total households in the district, 22,952 households belong to Scheduled Castes and 3,419 belong to Scheduled Tribes.

It can be seen from the table that 91.2 per cent of total households i.e. 208,535 are living in their owned house, 7.3 per cent of households i.e. 16,734 are living in rented house and 1.5 per cent (3,314) of households have other type of house.

Out of total households majority of households i.e. 142,758 have only one room accommodation, 51,958 households have two room houses, 19,203 households have accommodation of three rooms, and 8,594 households have three or more accommodation while 6,070 households are living without any exclusive room.

The data also reveals that 90 per cent of Scheduled Castes households and 81 per cent of Scheduled Tribes households are living in their own house. In rural areas 171,201 households (94.0 per cent) are living in owned house whereas in urban areas 37,334 (80.3 per cent) household are living in their owned house. The median number of rooms is found to be greater i.e. two in urban areas in comparison to rural areas for the district.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Source : Census of India 2001, H - series : "Tables on Houses, Household amenities and Assets."

Note :

Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent : Semi-permanent houses refer to those houses made of other types of materials

Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, mud, unburnt bricks, wood etc. are used for roofs. reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch.

Table 49 gives the details about percentage distribution of Households living in permanent, semi permanent and temporary houses in the district. It can be seen that 63.7 per cent of the households have permanent houses i.e. houses made of pucca material. 29.3 per cent households have semi permanent houses i.e. houses made of other type of materials while the remaining 7 per cent of households have temporary houses i.e. houses made of kachcha materials.

In rural areas 58.6 per cent households have permanent houses, 33.4 per cent have semi permanent. 8.1 per cent households are living in temporary houses. In urban areas 83.8 per cent households are living in permanent houses, 13.3 per cent are living in semi permanent houses and 3 per cent are living in temporary houses.

79.9 per cent of Households in Chanasma having permanent houses, is the highest among talukas. The lowest proportion of 41.3 per cent for the same is found in Sami. The highest and the lowest proportion of semi permanent houses is found in Sami (52.8 per cent) and in Chanasma (15.7 per cent) respectively. 19.3 per cent of Households in Radhanpur and 2.5 per cent of Households in Sidhpur are living in temporary houses, which are the highest and the lowest proportion recorded for the district.

Source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note : * Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

@ Bathroom means bathroom within the house.

$ Toilet means toilet within the house.

Drainage means closed and open drainag

Percentages are given in brackets.

Table 50 indicates percentage of households having Improved drinking water source, electricity, bathroom, toilet and drainage facility as per 2001 Census.

It can be seen that 89.3 per cent of total households have Improved drinking water facility and 68.5 per cent have electricity facility. 40.2 per cent households have bathroom facility within the house and 30.7 per cent households have toilet within the house. As regards the drainage facility 26.3 per cent of households have close or open drainage. In rural areas 87.3 per cent households have Improved drinking water facility, 63.2 per cent have electricity, 31.9 per cent have bathroom, 20.5 per cent have toilet and 15.6 per cent have drainage facility. In urban areas 97.3 per cent have Improved drinking water facility, 89 per cent have electricity, 72.7 per cent have bathroom, 70.7 per cent have toilet and 68.1 per cent have drainage facility. The data indicates that proportionately urban households are better equipped with all the facilities as compared to rural areas.

It can be seen from the data that the highest and the lowest proportion of Households having Improved drinking water facility are recorded in Radhanpur at 97.7 per cent and in Santalpur at 59.1 per cent respectively. The proportion of Households having electricity facility varies from 82.1 per cent in Sidhpur to 58.1 per cent in Radhanpur.

Bathroom facility is available to 52.6 per cent Households in Chanasma which is the highest proportion among talukas while the lowest proportion of 16.5 per cent for the same is found in Santalpur. The highest and the lowest proportion of Households having toilet facility is recorded at 47.3 per cent in Sidhpur and at 14.1 per cent in Santalpur respectively. Drainage facility is available to 42.2 per cent Households in Patan and to 5.6 per cent Households in Sami, which are the highest and the lowest proportion respectively in the district.

Note : Percentages are in brackets

Source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 details about the percentage distribution of households by type of fuel used for cooking purpose.

There are nine types of fuel used for which data is presented in this table. Firewood is widely used as fuel as 67 per cent of households used in the district. In rural areas 77.4 per cent households and in urban areas 26.5 per cent households use firewood. In the talukas of the district percentage variation of households using firewood for cooking is in between 51 per cent in Patan and 84.9 per cent in Vagdod. Firewood, as a fuel, is used more in rural areas in comparison to urban areas. Use of LPG is next to firewood as it is used by 15.7 per cent of households in the district. In rural area 6.3 per cent of households and in urban areas 52.3 per cent of households have LPG for cooking. LPG is used more in urban areas as compared to rural area. Crop residue, at district level is used as fuel by 9.7 per cent of households. 11.1 per cent of rural households and 4.3 per cent of urban households use crop residue. Kerosene is used by 5.52 per cent of households in district. 3.3 per cent of rural households and 14.3 per cent of urban households use kerosene. Cow dung cake is used by 1.1 per cent of households in district. In rural areas 1.1 per cent households and in urban areas only 0.9 per cent households use cow dung cake as fuel for cooking. The usage of other fuel such as electricity, coal, bio-gas and other items is comparatively insignificant.

Source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 52 gives number of households availing banking services and number of households having each of the specified assets. There are 228,583 households in the district. Out of these only 25.0 per cent households are availing banking services. 21.9 per cent of households in the district have Radio/ Transistor, 23.4 per cent have TV, 8.5 per cent have Telephone, 18.2 per cent have Bicycle, 6.9 per cent have Scooter-Moped-Motorcycle, 1.5 per cent has Car, Jeep-Van and remaining 58.7 per cent of households do not have any of the specified assets.

In rural areas 65.9 per cent of households and in urban areas 30.5 per cent of households do not possess any of the specified assets. 18.9 per cent of rural households and 48.6 per cent of urban households are availing banking services.

In rural areas 19.0 per cent households have Radio, 15.3 per cent have TV, 5.3 per cent have Telephone, 12.3 per cent have Bicycle, 3.8 per cent have Scooter etc. and 1.1 per cent have car etc.

In urban areas 32.9 per cent households have Radio, 55 per cent have TV, 21.2 per cent have Telephone, 41.6 per cent have Bicycle, 19.0 per cent have scooter etc. and 2.8 per cent have car etc.

In Patan taluka 47.8 per cent of households do not have any of specified assets which suggest that 52.2 per cent households possess one or more of such assets. In taluka of Vagdod 77.4 per cent households do not have any of assets which means only 22.6 per cent have one or more of such assets.

(viii) Major social & cultural events natural & administrative developments and significant activities during decade.

The district is rich heritage of culture and history. *Kartiki Purnima* fair is about 800 years old and is held on the bank of the river Saraswati of Sidhpur. Apart from, many *Sadhu*, people of all castes and communities attend the fair. Especially members of the *Thakarda, Rabari, Bharwad* and the *Harijan* castes are found in a large number.

Sidhpur is on the bank of Saraswati near Patan. This ancient holy place is also known by the name '*Matrugaya'*. Some ritual rights are performed by Hinidus after the death of their loved ones. The ritual rights are known as '*Shraaddha'*. *Gaya* is the place where normally the *Shraaddha* of the father is performed and Siddhpur is the place where Shraaddha of the mother is performed. There is a story that Lord Parshuram performed the *Shraaddha* of his mother by taking a holy dip into the Bindu Lake at Sidhpur. In Unava a fair called 'Urs' is held near the famous Dargah of '*Mira Datar'* in '*Moharram'*.

Jaag is played in villages during *'navratri'* with *Jwara of Mataji's "Ghat"* in jaag. This traditional custom is also seen among Koli women of Radhanpur. Folk dance called *garba* or *rasda* is very interesting and an important form of cultural activity. In Rasda of Koli and *Bharwad* community, both men and women participate.

(ix) Brief description of places of religious historical or archaeological importance in villages and places of tourist interest in the town of the district.

The historical town of Patan is situated on the bank of river Saraswati. It is a railway station connected by the Mahesana-Kakoshi railway line and also connected by the State Transport Services with other district of the State.

Patan was the capital of Gujarat for over 600 years between the 8th and 14th century and had attained prosperity under the Solanki rule. Patan was ahead of all in respect of its glory and beauty, trade and prosperity, bravery and education as well as art and culture. It was founded in 746 A.D. by Vanraj Chavda who made it the Capital. The Chavda dynasty was succeeded by the Solankis and afterwards by the Vaghelas. Patan is also known for its traditional work of Patola, Ranki Vav and Sahastraling Lake.

Name of Taluka : Patan
Name of Town : Patan
Location Code : 40303000

(Rani ki Vav)

(Sahastraling Lake)

The Sahastraling Lake was big and splendid. It is spread over an area of about 5 kms. There were 1,000 shrines of Shiva around the lake. The constructioin of various artificial lakes or reservoirs in Gujarat are ascribed to the great Jayasimha Siddharaj (1093-1143 A.D.). One of the largest of these was the Sahastraling talav or tank of the thousand Shiv shrines at Patan, the remains of which are still found in the town. Many temples and schools were also built near the lake. The archaeologists have found the banks of the lake and an inlet of water from the river Saraswati opening into the lake. These constructions are simply amazing to see.

Another great monument being excavated now is the step-well Rani ki Vav. The sculptures inside the step-well are also beyond imagination. Ran ki vav is also known as Rani ni Vav.

Name of Taluka : Patan
Name of Town : Patan
Location Code : 40303000
(Tomb of Shaikh Farid)

It is situated two kilometers north-west from Patan on the left bank of the river Saraswati, and not far from the north side of the *Sahastraling Talav*, stands the *Dargah* or shrine of Shaikh Farid. Though now the tomb is of a Muslim saint, this was originally believed to have been a Hindu or Jain temple of considerable architectural merit.

Name of Taluka : Sidhpur

Name of Town : Sidhpur

Location Code : 40302000

(Rudra Mahalaya)

Sidhpur, situated on the bank of river Saraswati, is taluka headquarters and a railway station on Ahmadabad-Delhi railway line of the Western Railway. It is on the highway to Palanpur and Delhi. It is a place of pilgrimage of the Hindus as the holy river Saraswati and the Bindu Sarovar, one of the four holy lakes in India, are situated here, but it has lost its old charm.

There is an ancient Shiv temple, well-known as the *Rudra Mahalaya,* founded by King Mularaj. The king Mulraj Solanki started its construction and Siddharaj Jayasimha completed it. The entire structure of the temple rested on 1600 pillars with 12 entrance doors and covered almost half of the total area of Sidhpur. The descriptions say that thousands of Brahmins used to come here and chant the *Shlokas* and *Mantra*. The Rudra Mahalaya which was once the glory of Sidhpur is now reduced to massive ruins. It is declared as a protected monument.

Name of Taluka : Sami

Name of Village : Shankheshvar

Location Code : 00264100

(Shankheshvar)

Shankheshvar is 22 km. south of Sami, the taluka headquarters. It is a very ancient place of the Jain pilgrimage antedating V.S. 802. According to the *firman* of Mughal Emperor Shah Jahan the village was granted on lease (*ijara)* to Sheth Shantidas, the Nagar Sheth of Ahmadabad in the year 1656-57. The old Jain temple was destroyed by Allauddin Khilji. The old temple itself has now disappeared and the image of Parswanath that belonged to old temple appreas to have been transferred to a modern temple which has been built closely. In point of religious importance Shankheshvar comes next to Palitana and is visited by lakhs of people from all over India.

(X) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Patan district is endowed with economic resources viz. agriculture and oil seeds. The important oil seeds grown in this district are groundnut, mustard, rape and sesame among edibles and castor among non-edibles.

Cotton is another important cash crop grown all over the district but more extensively in Sami, Harij, and Chanasma. *Bajri*, cotton and *Jowar* are the main crops of the district. Sidhpur is well known for *Isabagul* and Jeera. This place is one of the main marketing centre for these two commodities.

Patan was not only the center of power in the history of Gujarat; it was also the center for art, literature, culture and education. Patan can be proud of 15th Century poet Bhalan who translated *"Kadambari"* in old Gujarati poetry.

The libraries of Patan deserve a special mention. The books as old as 800 to 1,000 years have been preserved there with great care. There are several such books brought from all over the world. In one of the libraries, there are moré than 15,000 books. Some of the books are rich with colourful pictures drawn from the golden and silver colours. There are eleven such libraries in Patan.The libraries have preserved thousands of old and antiquated manuscripts with them. Shri K.M. Munshi took initiative and some donors also come forward. As a result, the memorial to Hemchandracharya could be erected in Patan. Numbers of manuscripts have been deposited to this memorial, which is of great help to students and scholars. Patan has now become the headquarters of North Gujarat University. It will certainly boost the original image of Patan.

The world famous *Patola* weaving is also almost on extinction. It is preserved only by a single family. Some of the industries have lately developed near Patan and now it is the headquarters of North Gujarat University too that arouses some fresh hopes of Patan's revival as a center of art, culture and education. There are oil mills and ginning press and

a seed multiplication farm and an agricultural produce market yards in Radhanpur taluka of Patan district.

There is a sizeable population of *Vohra* community residing in Sidhpur. Vohras have made this town a bit prosperous by their trading abilities and hard work. The Patidars are found all over the district but are concentrated in Patan, Chanasma and Sidhpur talukas of this district. They are primarily agriculturists but do business also. By social customs they do not differ much from the rest of the Hindus.

(1) SHRI BHOGILAL JAICHANDBHAI SANDESARA (1915)

Shri Bhogilal Sandesara, a well-known scholar of the Sanskrit Prakrit and Gujarati literature hails from the Sander village of the Patan taluka. He is primarily known as a scholar of the Jain literature. In 1956, the Government of Bombay awarded a Prize of Rs. 2,000/- for his book *"Jaina Agama Sahityman Gujarat"*. He was awarded the *'Ranjitram Gold Medal'* by the Gujarat Sahitya Sabha, Ahmadabad for conspicuous work in the field of humanistic research and textual criticism. He was also awarded the 'Narmad Gold Medal' by the Narmada Sahitya Sabha, Surat for the best historical research in Gujarati published during the year 1955-60.

He presided over the Prakrit and Jainism Section of the 20th Session of the All India Oriental Conference held at Bhuvaneshwar in 1959. In the year 1966, he presided over the History and culture section, Gujarat Research works conference, Vallabh Vidyanagar. He was also the President of the Gujarat Itihas Parishad (1962-1964). He is a member of the General Council of the Sahitya Akademi, New Delhi.

He was invited by the University of Bombay to deliver the Thakkar Vassonji Madhavji Lectures and also invited by the Rockefeller Foundation of New York, as a special fellow for a study tour round the world and visited a number of Asian and Western countries.

He has published 36 books on history, religion. In addition, he has published moré than 250 papers (in English, Gujarati and Hindi) in various journals.

(2) SHRI PITAMBAR NARSIBHAI PATEL

Shri Pitambar Narsibhai Patel, a famous short story-writer of Gujarat, was born at Shelavi village of the Chanasma taluka. He was a journalist from 1956 to 1959. He served as an artist in All India Radio at Ahmadabad. He also served on the Editorial Board of the 'Sandesh' a well-known daily newspaper of Ahmadabad.

Most of his works are in the form of short stories and novels. His first novel *'Rasio Jeev'* written in the year 1942 depicts the life of the North Gujarat. He has published about a dozen novels and short-stories are translated and published in Hindi also. *'Khetar ne Khole'* is his popular novel.

The Government of India has given awards for his novels and Government of Gujarat has given him awards for seven of his books. He has depicted the life and conditions particularly of the people of North Gujarat in his work. He is the Secretary of the 'Gujarati Sahitya Parishad' and the 'Gujarat Lekhak Milan'. He is an active member of the Gujarat Vidyasabha.

(xi) Scope of Village Directory and Town Directory :

As mentioned earlier, the District Cen-sus Handbook is brought out in two parts-Part A and Part B. Part A covers the non-census data of village directory and town directory whereas part B covers the primary census abstract data of 2001 Census. The scope of village directory and town directory is discussed below.

Scope of Village Directory

For the census work, the villages in the district have been arranged taluka wise and within the taluka they are shown location code wise. Each village is assigned a location code number for the purpose of identification. In 2001 Census, all the villages have been given unique 8-digit code number, which will remain constant across the census, and shall make it easy to do comparative study. Eight digit code's last two digits are especially provided to take into account exigencies arising due to jurisdictional changes of villages by partition, amalgamation etc. This time it has been kept '00'. Prior to the village directory information, a map and alphabetical list of villages for each taluka is given in Part A. Village directory contains the non-census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere

of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition, it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the co-relation of amenities with the number of households and population they serve. If an amenity is not in existence in the referent village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given. The broad range are (-5 kms), (5-10 kms.) and (10+ kms.). Some additional information has been added viz.(1) Number of Banks, (2) Credit Societies, (3) recreational and cultural facilities, (4) Receipt of Newspaper / Magazine, (5) Income & Expen-diture of the village and (6) Name of the three most important commodities imported, manufactured/ produced & exported. One information has been deleted this time, i.e., Market & Hat facility.

The village directory also carries the following appendices.

Appendix-I	It gives the taluka wise abstract of educational, medical and other amenities available in the villages of the district.
Appendix-I-A	Indicates number of villages Taluka wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix-IV	Taluka wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates Taluka wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

Scope of Town Directory

Town Directory covers the non-census data for each town. It presents important and useful information like civic and other amenities available in all the towns of the district. The information in town directory is covered in following seven statements, viz. statements I to VII.

Statement-I	Town wise class, name, civic administrative status of the town, its area, growth rates, density and sex ratio.
Statement-II	Physical aspects of each town.
Statement-III	Income and expenditure of each town.
Statement-IV	Civic and other amenities in respect of each town.
Statement-V	Availability of medical, educational, recreational and cultural facilities in each town.
Statement-VI	Trade, commerce, industry and banking activities in each town.
Statement-VII	Civic and other amenities in slum areas of each town.

In all the Statement except VII the towns are arranged in the alphabetical order within the district. The details of these statements are given in the analytical portion of the town directory. In addition to the above statements, an appendix showing the towns with their outgrowths with population , is also given after the town directory statements.

PART – A

VILLAGE AND TOWN DIRECTORY

SECTION - I VILLAGE DIRECTORY

Village Directory

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the Taluka/CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C

(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note : * - There is no Middle school in the Gujarat State.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, o-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud Road	MR
(iii)	Foot Path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable Water waysother than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Cultivable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh - is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages Taluka/ C.D. Block wise of the district.
Appendix-I-A	Indicates number of villages Taluka/ C.D. Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka/ C.D. Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka/ C.D. Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities available.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	Taluka/C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII- A, VII-B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates Taluka/C.D. Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in the village.

(b) LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS :

Note : * In Gujarat State the levels of education are classified as under

(i) Primary School (From Std. I to VII passed)

(ii) Secondary/Matriculation (From Std. VIII to X passed)

(iii) Higher Secondary (From Std. XI to XII passed). Hence details under column 6 is not shown.

SECTION – II – TOWN DIRECTORY

Town Directory

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one lakh (100,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local

bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify)e.g. Sanskrit Pathshala,Senior basic school, Navodaya Vidyalaya,Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note : * - There is no Middle school in the Gujarat State.

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART-B

PRIMARY CENSUS ABSTRACT

Primary Census Abstract

Brief note on Primary Census Abstract :

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-district, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Household, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely (i) Cultivators, (ii) Agricultural labourers (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely India, State/ Union Territories, Districts and Cities, Urban Agglomerations (Population 100,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made

available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the talukas/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The following Abbreviations have been used in the Primary Census Abstract for facility of presentations:

1	Municipal Corporation/ Corporation	M. Corp.
2	Municipality	M
3	Municipal Council	MCI
4	Cantonment Board/ Cantonment	CB
5	Notified Area/Notified Area Committee/Notified Committee	NAC
6	Industrial Notified Area	INA
7	Gram Panchayat/ Village Panchayat	VP
8	Nagar Panchayat/ Town Panchayat	NP
9	Census Town	CT
10	Total	T
11	Rural	R
12	Urban	U

The following conversion factor has been used for converting areas into hectares and hectares into km^2

Acres x 0.40467 = hectares

100 Hectares = 1 Km^2

(1) * These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records. Area of (i)Matarvadi (part)(OG),(ii) Hansapur (Part) (OG) and (iii) Gungadipati (Part) (OG) are not included.

Source: Village Directory 2001 (As on 31st March ,1999)

Note: { Represents Group Gram Panchayat.

Note: The present Patan district is a new district which has been created by separating several talukas from the districts of Banaskantha and Mahesana. Government of Gujarat had reconstituted Mahesana and Banaskantha district and created new district of Patan vide Notification No. GHM- 97-84- M-PFR-1997-L dated 24th September 1997.

As the data of reconstituted Patan district, having eight talukas namely (1) Santalpur (2) Radhanpur (3) Vagdod (4) Sidhpur (5) Patan (6) Harij (7) Sami and (8) Chanasma, is not available separately, the details of undivided Mahesana districts have been discussed in Annexure II and III. The details of 2001 census data of Patan district have been discussed in Annexure IV, VI, VII and VIII, while Annexure V provides the recast data of 1991 census and separate data of 2001 census of Patan district.

ANNEXURE – II

FERTILITY AND MORTALITY-1991 CENSUS

Fertility Level:

Population is a dynamic variable and keeps on changing. Increase due to birth and decrease due to death affect the population size of an area. Thus the birth and death are the two most important vital events. Natural increase is the excess of population by births over decrease of population by deaths at a given point of time. The births have direct correlation with the fertility.

The data on fertility levels and trends as revealed by the fertility indices of the 1991 Census like Crude Birth Rate (CBR), Age Specific Fertility Rate (ASFR) and Total Fertility Rate (TFR) are presented and analyzed below. The Definitions and concepts of fertility indices frequently used have already been explained in Analytical Note.

Death Rate:

Death process in demographical terminology is called as mortality. The rate at which death events occur reveals about the standard of living and State of health. Statistical data on causes of death help us in controlling the spread of diseases and suggests new curative methods to medical authorities.

Child Mortality:

Information about questions on children ever born and children surviving canvassed for all ever married women was tabulated by age of the mother. From this, estimate of child mortality have been worked out by using Brass technique.

Source: Occasional Paper No 1 of 1997.

The annexure III shows various fertility indicators of all the districts and the State as per 1991 Census. It can be seen that in Patan (Mahesana) district Crude Birth Rate (CBR) of 34.3 and General Fertility rate (GFR) of 137 are higher than the state CBR of 33.6 and GFR of 136. Total Fertility rate of Patan (Mahesana) district is 4.1, Total Marital Fertility Rate is 4.8 and General Marital Fertility rate is 168 as per 1991 Census all these rates are lower than the State TFR of 4.2, TMFR of 5.4 and GMFR of 175.

As per 1991 Census in Patan (Mahesana) district Child-Woman ratio in the age group of 0-4 and 5-9 was 458 and 528 respectively, which were found to be lower than the respective Child-Woman ratio of 467 and 571 recorded for Gujarat State.

Mean age at marriage means age (in completed years) at which the woman was married. In case a woman was married more than once, the age at which she was married first, was recorded. The rate of mean age at marriage in Patan (Mahesana) district as per 1991 Census was 18.2, which was lower than the mean age at marriage of 19.0 years in Gujarat State.

NUMBER OF CHILDREN EVER BORN AND SURVIVING PER EVER MARRIED WOMAN IN AGE GROUP 45-49, 1991 CENSUS

	STATE	**4.2**	**4.4**	**3.8**	**3.8**	**4.0**	**3.6**

Source: Gujarat State District Profile 1991.

There were 4.5 children ever born per ever married woman in the age group of 45-49 with 3.9 ever surviving children per ever married woman in Patan (Mahesana) district. Both of these indicators are higher than those of the State.

ANNEXURE – IV

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH/ PLACE OF LAST RESIDENCE, 2001 CENSUS

Migration

Migration is a factor in changing the size and structure of the population. The migration process affects the areas to which migrants have moved and areas which they have left. Migration is a form of geographical mobility between one geographical unit to another, involving a change of residence from the place of origin/birth to the place of destination or place of new settlement from the last residence. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

Internal and International Migration

The migration movements are of four types –

1. Migration within the district of enumeration (intra-district migration)
2. Migration from one district to another but within the State
3. Migration from one state to another state of the country (inter-state migration) and
4. Migration from one country to another country.

The first three together constitute internal migration while the last type of movement is called international migration.

Migration by place of birth:

As Patan district is created from Mahesana district the separate data of Patan district is not available for 1991 Census however the absolute number and percentage distribution of migrants by place of birth in total population at 2001 Census are shown as below:-

ANNEXURE

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH-2001 CENSUS

Source: Gujarat State-D-Series Tables-2001

As per 2001 census there were 18,810,592 migrants in Gujarat whose place of birth was different than the place of enumeration. Out of such migrants, 56.9 per cent were born elsewhere in the district of enumeration, 29.2 per cent were born in other districts of the state, 13.4 per cent were born in other States of India and 0.4 per cent were born in other countries.

As per 2001 census in Patan district, out of total of 367,736 migrants, 62.5 per cent were born elsewhere in the district of enumeration, 34.5 per cent were born in other districts of the state, 2.6 per cent were born in other states of India and only 0.4 per cent migrants were born in other countries. No migrant was reported under the category of "Unclassified" in State as well as in Patan district as per 2001 Census.

INTER STATE IN-MIGRANTS TO GUJARAT STATE AS PER 2001 CENSUS BY PLACE OF BIRTH

Place of Birth	Gujarat		Patan	
	Migrants	Percentage to Total Migrants	Migrants	Percentage to Total Migrants
1	2	3	4	5
Total Migrants	**2,520,676**	**100.0**	**9,579**	**100.0**
Madhya Pradesh	159,055	6.3	450	4.7
Maharashtra	734,945	29.2	1,499	15.6
Rajasthan	471,109	18.7	3,374	35.2
Uttar Pradesh	520,094	20.6	978	10.2
Other States	635,473	25.2	3,278	34.2

Source: Gujarat State-D-Series Tables-2001

The above Statements show migration in Gujarat and in Patan district from other States as per 2001 Censuses. It can be seen that as per 2001 Census there were 2,520,676 persons in the State who were born in other States of India.Out of such persons 29.2 per cent were born in Maharashtra, whereas the proportion of inter State migrants born in Uttar Pradesh, Rajasthan and Madhya Pradesh was 20.6, 18.7 and 6.3 per cent respectively. The remaining 25.2 per cent were born in other States of India.

As regards Patan district it can be seen that there were 9,579 migrants in this category in 2001.The State-wise distribution reveals that as per 2001 Census out of these 35.2 per cent were born in Rajasthan, followed by 15.6 per cent born in Maharashtra, 10.2 per cent born in Uttar Pradesh and 4.7 per cent of such migrants were born in Madhya Pradesh. The remaining 34.2 per cent were born in other States of India.

Migration by place of last residence:

Distribution of migrants by place of last residence in Gujarat and Patan as per 2001 Census and percentage distribution of in-migrants from other States to Gujarat by place of last residence are presented below.

DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE IN GUJARAT - 2001 CENSUS

Migration By Place of Last Residence	Gujarat			Patan		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Migrants	**19,221,602 (100.0)**	**6,694,122 (100.0)**	**12,527,480 (100.0)**	**375,641 (100.0)**	**83,431 (100.0)**	**292,210 (100.0)**
Last residence elsewhere in the district of enumeration	12,248,452 (63.7)	3,506,051 (52.4)	8,742,401 (69.8)	261,263 (69.6)	53,569 (64.2)	207,694 (71.1)
Last residence in other districts of the State	4,731,665 (24.6)	1,892,862 (28.3)	2,838,803 (22.7)	104,880 (27.9)	25,146 (30.1)	79,734 (27.3)
Last residence in other States of India	2,182,741 (11.4)	1,262,884 (18.9)	919,857 (7.3)	8,789 (2.3)	4,317 (5.2)	4,472 (1.5)
Last residence in other countries	58,744 (0.3)	32,325 (0.5)	26,419 (0.2)	709 (0.2)	399 (0.5)	310 (0.1)
Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)

Source: Gujarat State-D-Series Tables-2001

There were 19,221,602 migrants by place of last residence in Gujarat according to 2001 Census. The proportion of male and female migrants whose place of last residence elsewhere in the district of enumeration was 52.4 per cent and 69.8 per cent respectively.The reason for higher proportion of female migration is marriage. In Gujarat, out of total migrants, 63.7 per cent of migrants were residing elsewhere in the district of enumeration, 24.6 per cent were those whose last residence was in other districts of the State while last residence of 11.4 per cent migrants was in other States of India and only 0.3 per cent were such whose last residence was in other countries. There were no migrants in the category titled “Unclassified “.

In the district, as per 2001 Census, there were 375,641 migrants by place of last residence. Out of total migrants, 69.6 per cent of migrants were such whose place of last residence was elsewhere in the district of enumeration, 27.9 per cent were such whose last residence was in other districts of the State while last residence of 2.3 per cent migrants was in other States of India and only 0.2 per cent migrants’ last residence was in other countries. There were no migrants in the category titled “Unclassified”.

Migration by reason:

The following Statement gives distribution of migrants by reasons of migration from other States of India.

MIGRATION FROM OTHER STATES OF INDIA BY PLACE OF LAST RESIDENCE IN GUJARAT 2001

States	Total Migrants	Reasons						
		Work/ Employment	Business	Education	Marriage	Moved after Birth	Moved with Household	Others

		(41.7)	(7.8)	(1.0)	(11.5)	(4.5)	(24.1)	(9.4)

Source: Gujarat State-D-Series Tables-2001

It can be seen form the data given above that the main reason for the migration was “Work/ Employment”. As much as 30.3 per cent of migrants moved due to work or Employment as per 2001 Census, this was followed by 26.5 per cent of migration which was due to the reason of “Moved with household”. In 2001, the proportion of migration due to marriage was 17.0 per cent. The reason for 9.4 per cent of migration was Business, and 6.2 per cent of migration was due to the reason titled “Moved after birth” and only 0.6 per cent of migration was for Education. The remaining 10.2 per cent of migration was due to other reasons.

ANNEXURE – V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991 AND 2001 CENSUSES

Religion is the basic cultural characteristics of the population. In secular country like India several religions have thrived and every decennial Census provides an interesting picture of the religious persuasions of the people. The data on religion yielded by the Census are of immense use for the Anthropologists, Sociologists, Demographers, Administrators, Planners and also for laymen.

The six main religions are i) Hindu, ii) Muslim, iii) Christian, iv) Sikh, v) Buddhist, and vi) Jain were recorded. In respect of 'Others', the actual religion returned was recorded. If a person said that he has no religion, it was recorded accordingly and if any person refused to state his religion it was recorded as 'religion not stated'.

Source: Gujarat State -C- Series Tables-2001

As per 2001 Census the number of married persons was 24,222,087 (47.8 per cent) in Gujarat and 558,566 (47.2 per cent) in Patan. The proportion of never married persons was 47.6 per cent in Gujarat State and 48.0 per cent in Patan. The proportion of widowed was 4.2 per cent in the State and 4.5 per cent in the district, while the proportion of Divorced/Separated was 0.4 in the State as well as in the district.

DISTRIBUTION OF RURAL URBAN POPULATION BY MARITAL STATUS-2001

Sl.No	Marital Status	Gujarat			Patan		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	Never married	24,132,905 (47.6)	15,144,193 (47.7)	8,988,712 (47.5)	567,343 (48.0)	453,202 (48.0)	114,141 (47.9)
2	Married	24,222,087 (47.8)	15,058,801 (47.4)	9,163,286 (48.4)	558,566 (47.2)	447,088 (47.4)	111,478 (46.8)
3	Widowed	2,111,678 (4.2)	1,403,972 (4.4)	707,706 (3.7)	52,675 (4.5)	41,054 (4.4)	11,621 (4.9)
4	Divorced/Separated	204,347 (0.4)	133,801 (0.4)	70,546 (0.4)	4,125 (0.4)	2,937 (0.3)	1,188 (0.5)
5	Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)
	Total	**50,671,017 (100.0)**	**31,740,767 (100.0)**	**18,930,250 (100.0)**	**1,182,709 (100.0)**	**944,281 (100.0)**	**238,428 (100.0)**

Source: Gujarat State -C- Series Tables-2001

It can be seen that proportion of never married persons was higher at 48.0 per cent in the district as compared to 47.6 per cent recorded in Gujarat State as per 2001 Census. In rural areas the proportion of never married persons was 47.7 per cent in State and 48.0 per cent in the district. In urban areas the proportion of never married persons was at 47.5 per cent in State and 47.9 per cent in the district. As per 2001 Census the proportion of married persons was 47.8 per cent in the State, 47.4 per cent in rural areas of the State and 48.4 per cent for the urban areas of the State. In the district, the proportion of married persons was 47.2 per cent, 47.4 per cent and 46.8 per cent for district, for rural areas and for urban areas respectively. The proportion of widowed was 4.4 per cent in rural areas of the State as well as of the district. The same for urban areas was 3.7 per cent in the State and 4.9 per cent in the district. The proportion of divorced/separated was 0.4 per cent in the State as well as in the district. There was no population reported under the category titled "Unclassified".

ANNEXURE – VII

AGE, SEX AND EDUCATION IN THE DISTRICT AT THE 2001 CENSUS

Literacy has occupied an important position in Indian Census in one form or the other from the very beginning. The definition of literates as adopted is "A person who can both read and write with understanding in any language is to be taken as literate". A person who can merely read but can not write was not treated as literate. It is not necessary that a person who was literate should have received any formal education or should have passed any minimum educational standard. All children below the age 7 are treated as illiterate. While processing the literacy data population of age group 0-6 is excluded.

The following statement gives the distribution of literates and illiterates by broad age groups and sex in the district as well as the State at the time of 2001 Census:-

LITERACY BY AGE -GROUP AND BY SEX -2001

Age Group	Particular	Gujarat			Patan		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
7-14	Population	9,091,764	4,814,440	4,277,324	218,649	117,970	100,679
