KIRTIMANDIR

Gandhiji was born at Porbandar in 1869 A.D. His father, Karamchand Gandhi was the minister of the Royal family of Porbandar, and his home was a mansion near the Darbargadh palace complex. Just next to Gandhiji's home is the Kirti Mandir commissioned to commemorate the birthplace of the Mahatma. Lacs of Indian tourists visit the house of the Mahatma Gandhi. Kirti Mandir has a Gandhian library, a prayer hall, and a steeple decorated with 79 lamps and episodes from Gandhiji's life. In the Sanctum sanctorum in place of an image, full-size portraits of Gandhiji and Kasturba are put up. This Kirti Mandir was built by Sheth Nanjibhai Kalidas Mehta who handed it over to the Government of India. The Archaeological Department, Government of India has declared it as a protected monument.

Annexure - VIII Distribution of different Mother Tongues returned in 2001 Census 283

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census of DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (C.D.Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluka/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums in instead of 'notified slums'. The information is given

in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of **Shri Jayant Parimal**, Director of Census Operations, Gujarat. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated : 17.10.2006

Preface

Census is being conducted in the country every ten years as per the programme laid down by the Government of India. In these day and age of information technology, an individual has access to a variety of information covering a Kaleidoscope of interest and fields. Availability of relevant information is very vital for planners, policy makers and researchers.

The Five Year Plans have come to stay in the country and whatever development is achieved as a result of implementation of planning from the bottom level such as development of infrastructure facilities as well as basic amenities, etc. is reflected in the District Census Handbooks and they give to the readers a searching eye whether the development over the years in villages/talukas/districts is lopsided or upto the mark. This is the basic requirement of this type publications and an attempt has been made to show whether the census handbooks reasonably fulfill these aspirations/requirements.

These district Handbooks are thus useful to planners in planning from bottom as well as to administrators, researchers, educational institutions including universities and other socio-economic research centres as well as students conducting research in demography, social and economic studies as well as to the local bodies like Panchayats, Municipalities and Municipal Corporation etc.

District Census Handbook of Gujarat is a joint venture of the Government of Gujarat and the census organization of the Government of India. In the preparation of the DCHB, the role played by the census organisation is that of Census data collection, scanning of collected information, analysis of PCA. DCHB Unit of the State Government collected the basic non-census information on availability of amenities relating to infrastructure in the villages of the district presented in the part A of this book. The cost of this publication is borned by the State Government. In accomplishing this task we had the ready and whole hearted co-operation of the staff at various levels of different department of the State Government. Most of the data supplied by the various departments have been cross-checked and an attempt has been made to reconcile the discrepancies as well.

I express my deep gratitude to the officers of Gujarat Government particularly Shri P.K.Laheri, Chief Secretary of Gujarat State, Smt. Netraben Shenoy, Additional Chief Secretary of General Administration Department (Planning), Shri George Joseph, Principal Secretary, General Administration Department (Personnel), Shri K.R.Vasava, Deputy Secretary, Kum.P.S. Mevada, Under Secretary and Shri P.D.Kulkarni, Section Officer of General Administration Department, Planning, Shri S.D.Mehta,Deputy Secretary and Shri I.M.Sheikh, Under Secretary, Shri Bipin Patel, Section Officer and Shri P.N.Christian, Deputy Section Officer of G.A.D. (Kh-3) for their valuable help and co-operation in fulfilling all administrative requirement in time for bringing out this publication. I am also thankful to Shri P.M. Patel, Director, Economics and Statistics helped this organisation not only by placing the competent personnel on disposal of census services on deputation but also provided valuable official statistics for this publication.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff members extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for this District Census Handbook.

I am deeply grateful to Shri J.K. Banthia, I.A.S., the Ex-Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri R.G. Mitra, Deputy Registrar General(C&T) Shri C. Chakravorty, Joint Director, Shri I.C. Agrawal,Senior Research Officer(SS), Shri S.L. Jain, Deputy Director(SS), Shri R.K. Mehta, Assistant Director(SS), Shri R.P. Singh,

Dy. Registrar General(Map), Shri Himakar, Addl. Director (EDP) and Shri Anil Kumar Arora, Deputy Director (EDP) for providing technical guidance in finalising this publication.I am extremely thankful to Shri D. K. Sikri, IAS, Registar General & Census Commissioner, India for his valuable guidance in finalizing of this publication.

Shri Jayant Parimal, I.A.S. who held the office of Director of Census Operations, Gujarat, had guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the able direction and guidance of Shri Parimal.Our sincere and grateful thanks for all the projects of census to him.

In state office Smt. B.B. Chauhan, Deputy Director, District Census Handbook Unit, Kum.S.B.Dabhi, Assistant Director, Shri S.B. Dalvi, Deputy Section Officer of District Census Handbook Unit, and their team of able assistants meticulously collected and scrutinized the non-census data from various sources and prepared draft of DCHB etc. with the help of Census section. The other officials of D.C.H.B. Unit, who scrutinised, edited and supervised the work of D.C.H.B. have been mentioned in the "Acknowledgement". The maps provided in the D.C.H.B. are prepared by the Map Section of the Census Directorate under the supervison of Shri J.P. Purohit, R.O(Map). I am thankful to all of them.I am thankful to the census section of the Directorate for scrutinizing the PCA data, specially Shri J.N.Pithadia, Investigator Grade-I and Kum.N.V.Shah, Investigator Grade-III who provided assistance to me in finalizing P.C.A. data at every stage. Smt. J.R.Sanghani, Investigator Grade-III of this Directorate assisted me for final scrutiny of D.C.H.B., I am thankful to her.

Lastly, I am thankful to the Government of Gujarat for having agreed readily to bear the cost of publication of the District Census Handbook volumes and for the special efforts of Shri R.B. Raval, Director, Printing and Stationary and his colleagues to print out the publication in a very nice fashion.

District Highlights – 2001 Census

Porbandar

(1) Porbandar district is the 23rd district in terms of population in the State.

(2) Porbandar is newly created district in 1997 with three talukas and 182 villages, where urban area is 0.8 per cent of the district area.

(3) In terms of Population per sqkm is 234 persons.

(4) Porbandar district is the 16th dense district in the State.

(5) Porbandar district is having 8th rank in sex ratio.

(6) Village Madhavpur is the most populated having 17,827 persons whereas Dhorivav Nes and Mota Ghed villages are least populated in the district with 10 and 13 persons respectively.

(7) The economy of the district is basically dependent on agriculture as 50.7 per cent workers are engaged in primary sector.

(8) Non-metallic mineral products, Basic chemicals and Chemical products (except product of petroleum) and Food products are the most important non-agricultural economic activities of the district.

(9) Mokal village has the largest area of 7,537.8 hectares and Navibandar village has the lowest area of 82.4 hectares among the villages of the district.

(10) In respect of villages the lowest 47 villages are in Kutiyana taluka while the highest 74 villages are in Porbandar taluka.

(11) District has a coastal area on the Arabian Sea from village Miyani to Madhavpur of Porbandar taluka.

(iv)	Other Workers	Persons	9,861,500	46.4	102,502	47.6
		Males	7,817,103	54.0	87,106	56.6
		Females	2,044,397	30.2	15,396	25.2

Note: Two villages are fully covered as out growths (OGs) and therefore not included under the item. "Number of Village"

Definition of Census Town : -

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

Ranking of Talukas in The District

District : Porbandar

Note: * These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

ANALYTICAL NOTE

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook :

Before the 1951 Census, the Census figures were published in a booklet known as 'Village Hand-book', which contained only village wise population figures. These books were prepared and published by the Directorate of Census Operations of the State.

The Directorates introduced the District Census Handbook for the first time in 1951 Census. It comprised the villagewise primary census abstract figures and information on available amenities. It also contained several tables relating to the district. It varied in content and size from State to State depending upon the resources offered by the respective State Governments.

In 1961 Census, a uniform pattern of District Census Handbook was adopted throughout the country. The Directorate of Census and the State Government jointly executed the project. In addition to the English version, it was published for the first time in Gujarati language also. The District Census Handbook 1961 was published in three parts. Part I related to Introductory Note i.e. general and economic information for the district and a brief gazetteer of place names. Part II pertained to census tables, villagewise list of industrial establishments, tables on handicrafts and departmental statistics. Part III consisted of village directory covering the amenities and primary census abstract data combined in one statement. It also covered district and taluka maps.

It is worthwhile here to note that the State Government created a separate unit for preparing and publishing the District Census Handbook since 1971 Census onwards. In the 1971 Census, the contents of District Census Handbook were modified. In the preceding censuses, the data on amenities and primary census abstract were covered in one statement whereas in 1971 Census, the data on amenities and primary census abstract were separated into two different parts. Thus, the coverage of amenities data was extended and the land use data were introduced for the first time since 1971 District Census Handbook. Moreover, a separate portion known as 'Town Directory' was also incorporated for the first time in the District Census Handbook. The 1971 District Census Handbook was published in three parts. Part A contained the village and town directory. Part B contained village and town wise primary census abstract data and Part C contained official statistics, besides full count census tables, urban census tables and analytical report on census and related statistics socio-economic and cultural tables (Rural areas) and housing tables. Part A and Part B were combined and published in one volume.

The District Census Handbook –1981 was brought out in two parts, Part-A and Part-B. Part-A contained the village and town directory whereas Part-B included the primary census abstract data, for both General Population and Scheduled Castes/Scheduled Tribes. Both parts were published in one volume. Part C brought out for 1971 Census was dropped in 1981 Census. However, official statistics and some portion of analytical notes of part C of 1971 Census were included in the 1981 District Census Handbook also.

For the 1991 Census, the District Census Handbooks were prepared more or less on the same lines of the preceding 1981 Census. In 2001, the scope of both Part A & B has been enlarged by giving several additional information which got possible because of large scale computerization.

The District Census Handbook has been prepared after scanning and processing of data collected through Houselist Schedule and Household Schedule. Several innovations have been introduced at almost all the stages of the Census of India, 2001, right from the preparatory efforts to the data processing and dissemination stage. This includes certain fundamental changes in the form and contents of the Houselist

and Household schedules, while maintaining the continuity and comparability of the basic housing and population characteristics with the earlier census. For the Census of India 2001, a system of Permanent Location Code Number (PLCN) has been adopted by assigning to each village within the State/UT a continuous series from I to N. Each village has been assigned an eight-digit code. The last two digits being '00' are kept for accommodating future changes in case of split of an existing village or creation of new villages etc. Since the permanent Location Codes have been assigned to each village, theoretically tracing the precise location of village on account of future jurisdictional changes in the boundaries of various administrative areas within the state should not pose a problem. It is imperative that under this scheme, the PLCN assigned to villages at the Census of India, 2001 are adopted for future censuses also to ensure the comparability of the data at the village and other administrative levels over a long time series.

At the 2001 Census age at marriage was collected for males also, while it was collected for only ever-married females until the 1991 Census.

The type of educational institution attended by a person was enlarged to include school, college, vocational institute.

The scope of the definition of 'work' was expanded in the Census of India, 2001, to includes production of milk for domestic consumption. In the 1991 Census, cultivator of certain crops even for self-consumption was treated as economic activity. The scope of the term 'Cultivation' was expanded in 2001 Census to include certain other crops such as tobacco, fruits, all types of flowers, roots and tubers, potatoes, chilies and turmeric, pepper, cardamom, all types of vegetables and fodder crops etc. This meant that activities related to production of all the above-mentioned crops for domestic consumption have been treated as work. Only five crops viz. tea, coffee, rubber, coconut and betel-nuts have been classified under 'Plantation' in the Census of India 2001.

- At the 1991 Census, the question on seeking/ available for work was canvassed for only non-workers. At the Census of India 2001, this question was asked from the Marginal Workers also. A question to elicit information on secondary work canvassed at the 1991 Census was dropped.
- From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired Persons and Rentiers' has been replaced by the category 'Pensioners'.
- A new response category 'Moved after birth' was included in the question on reason for migration to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in the 1991 Census was covered under category of 'Others'.
- Number of children born alive to currently married women during last one year was collected for male and female children separately.

Besides the above modifications, the following new questions were canvassed at the 2001 Census.

- A question on total disability was canvassed in the 1981 Census. In the 1991 Census, no question on disability was included. At the Census of India, 2001, a question to elicit information on total or partial disability was canvassed. The five types of disability on which information is collected are - in seeing, in hearing, in speech, in movement and mental.
- A new question on 'Travel to place of work' was canvassed mainly for workers engaged in non-agricultural activities.Information on distance from the residence to place of work and mode of travel to place of work was collected under this question.

The mode of presentation of DCHB in 2001 will by and large be same as that of 1991. The uniqueness of Census 2001 is that single record (Household Schedule) has been processed as against two records

viz. Individual Slip and Household Schedule in the previous Censuses. Apart from this some deviation has been made this time by incorporating analytical notes on migration, fertility & mortality, education, marital status, age structure etc. pertaining to 1991 Census of the respective district in the DCHB in the form of Annexure II to VIII. Similarly Tables based on Houselist data pertaining to Census 2001 have also been included in DCHB.

(ii) Brief History of the District :

Before independence the principal native State in the Sorath area was Porbandar, ruled by Jethwa Rajputs who traced their decent to Hanumanji. Upon independence it merged with the State of Saurashtra.

In November 1956 the states were reorganized and the bigger bilingual state of Bombay was formed. Lastly, the Bombay State was bifurcated on 1st May 1960 and separate states of Gujarat and Maharashtra were formed, Junagadh district became a part of the Gujarat State. The existence Porbandar district became a part of Junagadh district. From the day of Gandhi Jayanti, on 2nd October 1997, Government of Gujarat formed Porbandar as a new district from the Junagadh district. Porbandar district has three Talukas, which are Porbandar, Ranavav and Kutiyana.

Porbandar is well known throughout India and abroad as the Birthplace of the Father of the Nation, Mahatma Gandhi. It is mentioned in the Hindu scriptures as Sudamapuri.

Every year in the Porbandar district the festival for birth of Lord Krishna, "Janmasthami" is celebrated. Every year folk fair is arranged and people celebrate it with their family zealously.

Porbandar is also known as "Sudamapuri". Porbandar has been on the world map, mainly because it is the birthplace of 'Mohandas Karamchand Gandhi'. Gandhi family was closely associated with the State during the rule of King Vikramji. The last minister or treasurer of the State was Karamchand alias Kaba Gandhi. Coincidently, Kasturba was also born in the same street where Gandhi was born.

The place where Gandhi was born has been preserved as a monument. Nanjibhai Kalidas, the Local Industrialist constructed a splendid building adjacent to the original place and named it Kirtimandir.

He also constructed "Bharat Mandir" consisting idols and statues of great torchbearers from Rishi-Munis to the present day personalities and 'Tara Mandir' in memory of Pandit Jawaharlal Nehru. Nanjibhai Kalidas was also instrumental in establishing Science College, Ladies College, Aryakanya, Gurukul etc. Maharana Natwarsinhji and Nanjibhai Kalidas played a great role in the development of Porbandar of post independence era. The city can be proud of Pranlal Devkaran Nanji, the founder of Dena Bank, Morarji Gokuldas and Sumati Morarji of Scindia Steam & Navigation and laureate Gulabdas Broker.

Besides Sudama Temple, Porbandar is also famous for potteries, cement factories, mills and of course, its sea-shore.

(iii) Administrative Set-up :

With a view to run the administration of the State smoothly, it has been divided into Districts, which in turn have been further sub-divided into Talukas (Tahsils).In the State of Gujarat, the community development blocks are co-terminus with the Talukas. The Talukas contain large number of villages and possibly several towns. The villages have Village Panchayats to run the local administration. A Village Panchayat may constitute of one revenue village, several revenue villages or a part of a large village. Similarly, the Towns have Municipality or Municipal Corporation as the seat of local self-government.

In the State of Gujarat, as on December 1999 there were 25 districts and 226* Talukas, against 19 districts and 184 Talukas in 1991 Census. In 1997 by several notification(s), Government of Gujarat reconstituted some districts and talukas of the State. The present Porbandar district is a new district which has been bifurcated from Junagadh district. Government of Gujarat had reconstituted Junagadh district and created new district Porbandar vide the Government

* Vagdod taluka merged in Patan taluka on 3rd July, 2001.

Notification No.GHM-97-84-M-PFR-1097-L dated 24th September, 1997. Thus the new district Porbandar has three talukas namely (1) Porbandar(2) Ranavav and (3) Kutiyana which are transferred from Junagadh district.

The District Collector looks after the general administration, maintenance of collection of land revenue and settlement of law related disputes, civil supplies, district planning, mid-day meal scheme, etc at the district level. The functions of administration of law and order and control and investigation of crime are done by the Superintendent of Police of the district with the help of Police Stations working under him. For the purpose of maintaining law and order there are 8 police stations, 4 police Chowkies and 7 out posts as per the statement below:

Police Station in the District

Sl. No.	Particulars	1997	1998	1999
1.	Police Station	7	7	8
2.	Police Chowky	8	8	4
3.	Out post	4	4	7

Source : Director General of Police, Gandhinagar, 2000.

At the Taluka level, Mamlatdar looks after the land development and revenue collection and law and order.

The Panchayati Raj institutions are fairly strong and most of the development works have been transferred to the District Panchayats and its subordinate bodies. The District Panchayat has an elected President and District Development Officer appointed by the Government, works as its Secretary, who looks after day-to-day work related to the development. Similarly, at the Taluka level, Taluka Panchayats have been constituted which have an elected President. The Taluka Development Officer, placed by the Government as Secretary of the Taluka Panchayats and he conducts the regular administrative work. Like- wise, an elected President heads the Municipality and the Chief Officer works as the Secretary of the Municipality, who looks after the day-to-day work. In case of the large cities, the State Government has constituted Municipal Corporation, which are headed by an elected Mayor and the Municipal Commissioner, appointed by the Government, looks after the routine work. At the Village level, the Sarpanch is the elected Chief and the Talati (Village Mantri) works as the Secretary to the Village Panchayat and looks after the day-to-day work. In view of the expanding role of the public administration in a state like Gujarat, the Government has taken-up many activities and has set up several offices. Such offices which came into the existence are as under:

(1) Education (Primary and Higher Education)

(2) Agricultural and Research

(3) Animal Husbandry and Poultry

(4) Forest and Environment

(5) Roads and Buildings, Bridges

(6) Co-operation and Co-operative Societies

(7) Industries, Small and Large as well as Cottage

(8) Health and Medical Services, Medical Education and Research, Family Welfare and Nutrition

(9) Information Department

(10) Irrigation Minor and Major

(11) Social Welfare and Social Defence

The functions of above offices are managed and controlled by concerned Head of Departments and in some cases also by District and Taluka Panchayats. The task of primary education in rural areas has been entrusted to District Panchayats and functions relating to Government provided primary education who assigned by District Development Office are controlled by the District Primary Education Officer. The secondary education is looked after by District Education Officer of Education Department. Primary education as well as higher secondary education of all types of institutions is governed by District Education Officer.

Agriculture activities have been delegated to District Panchayat to a large extent and District Agriculture Officer is in-charge of looking after agricultural produce including crops and vegetables. Similarly Animal Husbandry is also a Panchayat activity and routine work is controlled by the Deputy

Director (Animal Husbandry) who sits in District Panchayat taking care of animals and poultry farms. Besides, district agriculture office in Panchayat offices such as Deputy Director (Agriculture) and other officials look after various aspects of agriculture for developing the sector as well as to extend necessary assistance to farmers at District level.

Besides Director, animal husbandry officer of Panchayat offices such as Deputy Director (Animal Husbandry) Special Officers at Veterinary offices etc. In state government animal husbandry department also monitor activities of the sector at district level.

Public Health in rural area is assigned to the District Panchayat under the Chief District Health Officer who looks after epidemics, malaria control, water borne diseases and district level administration of Public Health Centres. District and Talukas Hospitals and Referral Hospitals are being looked after by the District Civil Surgeon of medical services in the State, while Medical Colleges and Research activities attached with the respective Civil Hospitals are controlled by Medical Education and Research Wing.

Family welfare activities are also monitored by the District Health Officer. Chief District Health Officer is also functioning as District Registrar of Birth and Death of the district and Talati cum Mantri is also Registrar of Death and Birth for the respective villages. Anaemic mothers and children upto to the age of 14 are looked after by Nutrition Officer under the Nutrition Programme.

District Ayurvedic Officer looks after the Ayurvedic dispensaries and hospitals. They also take care of the Ayurvedic plants and medicines and gardens. The District Food and Drugs Officer generally looks after the quality of the food and drugs in the district. Labourers and workers who are working in registered units are covered under the Employees State Insurance Scheme.

The rural roads have been transferred to the District Panchayats and their maintenance is done by the Executive Engineer, Roads and Buildings Department. Minor irrigation works are transferred to the District Panchayat and Executive Engineer (Panchayat) of the Panchayat's irrigation office looks after water harvesting and check dams.

The Roads and Buildings Department of State Government looks after the maintenance of roads, buildings, bridges and government multi-storey buildings etc. Besides Panchayat Officials, major district roads and the state highways are looked after by the Executive Engineer (Roads & Buildings). The large multi-purpose irrigation projects are controlled by State Government directly through its Executive Engineer.

District Industries Centre is functioning to develop the small and village industries, handloom industries and the scope of industrial growth in the district. Besides, other departments are working for the rights of the industrial workers and rural labourers engaged in agriculture and others sectors.

Social welfare activities relating to the Scheduled Castes, Scheduled Tribes, Other Backward Castes and Other Backward Communities in the District are organized by the District Welfare Officer. Generally the schemes under Tribal Area Sub Plan and Special Component Plan are organized by the District Welfare Officer.

In each District Panchayat, District Statistical Officer of Directorate of Economics and Statistics looks after co-ordination of different development programmes. He is also Member-Secretary of District Planning Board. Similarly in every Collector Office, District Planning Officer looks after development work of various Government (State & Centre) sponsored programmes.

Co-operative societies i.e. Co-operative Milk Societies, Agricultural Produce Market Societies. Co-operative banking and other Co-operative societies are controlled by the District Registrar Co-operative Societies.

Out of 182 Villages there is one group Gram Panchyat in Porbandar Taluka of this district. Two villages having one group Gram Panchyat viz Sinhghar and Bavalvav. During the reorganization of the district Porbandar was formed a new district. This district has three talukas viz. Porbandar, Ranavav, Kutiyana.

The talukawise break up of towns and villages for the district is shown as following:

TALUKAWISE NUMBER OF TOWNS AND VILLAGES

Sl. No.	Name of Taluka	No. of Towns	No. of Villages	
			Total	Inhabited
1	Porbandar	2	74	74
2	Ranavav	2	61	61
3	Kutiyana	1	47	47
	Total	**5**	**182**	**182**

The civic status of the 5 towns is as under :

Census Town	:	1
Municipality	:	4
Total	**:**	**5**

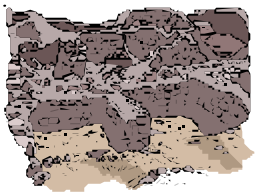

(iv) Physical Features :

The Porbandar district is situated between the parallels of latitude 21º 13' and 21º 58' and the meridians of longitude 69º 22' and 70º 08' .The length from north to south of this territory is about 83.6 kms and from east to west about 80.2 kms.It is bounded in the North and West by Jamnagar district and in east by Junagadh district and in the south by the Arabian Sea. The area covered by the district is 2,298 Sq.Kms. The rank of the district is 22th in area of the State.

Physiography :

This district can be considered as the region of hills in the north-east and in the south-east the river plain. This district region can be divided in the two main division's Forested Region

(1) Barda Hills Forested Region

(2) The River plain

(1) Barda Hills Forested Region :

The region lies in the north-western part of the district, occupying parts of Porbandar, Ranavav and Kutiyana talukas. It makes its boundaries with Jamnagar district in the north, Bhadar, Ojat and Harna River plain in the east and Junagadh Coastal plain in the south and west.

The terrain of this region is rugged and undulating with an altitude ranging from 200 meters to 630 meters above M.S.L. Among the hill ranges,Barda hill is a prominent one and attains the maximum elevation of 630 meters. The region is covered with reserved mixed forests. Minsor river flows in southerly direction. The geology of the region pertains to alluvium, blownsand, etc., Deccan Trap, Inter-Trappean Bed sand soils are orthids-Aquept sand orthents-ochrepts.

(2) The River plain :

The river plain known as a Bhadar, Ojat and Harana river plain. The region extends over the talukas of Kutiyana (Porbandar district) and other of the Junagadh district. This plain is enclosed by Rajkot from north, by Amreli district from east and by Junagadh coastal plain from south and west.

Hills :

There are minor hills in this district. Barda hill is situated in Ranavav taluka of Porbandar district. Except that some general hills left out the district is more and less plain area. Lower level part of Porbandar taluka is known as a Ghed area. Rivers takes manure with their water in this area in the monsoon season, so that the land is fertile.

Drainage :

Porbandar district land is slopy towards south and so most of the rivers flow north to south. The principal rivers, which traverse the district, are the Bhadar, the Ojat, the Kalindri and the Madhuvanti.

The river Bhadar has its origin in the hills above Jasdan. The most significant feature of the Bhadar is its annual flood, which swallows the districts for miles on either bank. It spreads far and wide the rich alluvial soil turning barren lands into fertile fields and with the mighty volume of its water. The river flows past Tapra and Kutiyana village of Kutiyana taluka. Thereafter it enters into the Porbandar taluka and it merges into the Arabian Sea near Navi-Bandar of the Porbandar taluka.

The River Ojat originates near the village Morwada of the Bhesan taluka. On its way, the river passes by the Bhesan, Visavadar and Vanthali taluka. Lastly, the river enters Porbandar taluka and flows past the villages of Amipur and Navi-Bandar. It merges into the Arabian Sea near Navi-Bandar of Porbandar taluka.

The Kalindri originates near the village Khageshri of the Kutiyana taluka of this district. It flows past the villages of Khageshri, Iswaria, Bavdavadar, Choliana, Mal, Erdu and Kasod of Kutiyana taluka. Thereafter, it enters into the Porbandar taluka and merges into the Arabian Sea near village. Gosa of the Porbandar taluka. Its approximate length is 46.5 kms.

The river Madhuvanti issues near village Kadwali Nes in the Visavadar taluka. It flows in the five taluka Visavadar, Mendarda, Vanthali, Keshod and Porbandar. Lastly, in Porbandar taluka it passes by Samdha village and near Pata village it merges into the Arabian Sea.

Climate:

The climate of the district is varied. The coastal areas enjoy a mild climate, The Plain and hilly areas are hot. It receives maximum rain fall during the monsoon period.

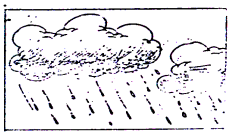

a) Temperature :

Porbandar has its own meteorological observatory in the district. The records of these observatories may be taken as representative of the meteorological conditions prevailing in the district as a whole. January month is the coldest in winter season. The temperature rises from the month of March to May and was the highest in month of May with 43.7^{0}C in the year 1997.Mean daily maximum temperature is about 42^{0}C in summer season and the minimum temperature is about 9^0 C. in winter season the details of the maximum and minimum temperatures for the period of ranging from 1996 to 1999 years are given below.

b) Winds:

Winds are light to moderate with some increase in force during the south-west monsoon season. The winds in the afternoon's blow mainly from directions between south-west and west throughout the year, winds from the west being most predominant. In the mornings, winds blow mainly from directions between north-west and north-east during the period October to March. In the latter half of the hot season and in the south-west monsoon winds are predominantly from the south-west or west.

c) Rainfall :

Records of rainfall in the district are available from the Directorate of Agriculture Generally rainfall is irregular in the district. Annually average rainfall of district is about 675 mm. Many times sea-cyclone affected the Porbandar district. Lastly in the year of 1975 and 1998 heavy cyclone affected this district. Porbandar district suffered by heavy flood in the year of 1983, while in the year of 1999 rainfall

Economic Resources :

Economic resources are an important means of subsistence for the working people of the district. The details about economic resources of important sectors are given here under in brief.

(1) Forestry :

According to the figures available from the Forest Department for the year 1998-99 and 1999-2000, an area of 0.09 square kilometers is covered by the forest.In this district there are mainly two forests (1) Barda forest and (2) Coastal forest. Barda forest and Coastal forests are respectively in Ranavav taluka and in Porbandar taluka.The Barda forest can be further classified under the following three local types on the basis of their composition which in its turn is dependent on soil depth and gradient of the ground (1) The hill forests (2) The foot-hill forest and (3) The plain forests. The main products of these forests are Rayan, Sajad, Gorud, Movedi, Antedi, Bawal, Kher, Timru, Shisham, Amla and Limdo. The coastal forests are mostly artificially raised on the thin coastal strip, there only natural mangrove forest and also a trees of coconut, Gando Bawal Sane etc. are the present products.

(2) Minerals and Mining :

Porbandar district has remarkable historical place in industry sector. Besides the Ghed area of Porbandar, the villages of Ratadi and Kadachh of Porbandar taluka originates white stone, which is very well known for the construction of house. Beside this from Porbandar district Bauxite, white chalk, soda-ash, Berings, Abrasives etc. mineral items are exported in the many states of India. The white chalk powder exported from here is used for manufacturing of rubber and paints. Porbandar district is well-known for its mineral production. The major minerals available in the district are Chalk, Limestone, Bauxite, Mari clay and Laterite while the minor products are Building limestone, Ordinary clay, Black stone, Ordinarysand,etc. The following statement shows the mineral production in brief ;

Major and Minor Mining Products and Income

Sl. No.	Products	1998-99		1999-2000		2000-01	
		Production (MT)	Income (RS.)	Production (MT)	Income (RS.)	Production (MT)	Income (RS.)

Source : Commissionarate of Geology and Mining, 2001.

(3) Soil and Cropping Pattern :

This district's land is more and less plain except some hills. The lower level area of Porbandar is known as a Ghed area that is fertile. The soil at many places is black, red and even full of multi-coloured patches on the coastal area.Total cultivable agricultural area is 131,767 hectares. In this area mainly grown crops are Groundnut, Cotton, Bajri and Gram.

(4) Land and Land use Pattern :

The total land in the district was 229,800 hectares during 1998-1999. The land classification according to the different uses for the rural areas of the district is given below on the basis of information collected for the Village Directory.

Land Classification of Rural Areas

(in '00 hectares)

Sl . No.	Classification of Area	Area as on 31.3.99
1	2	3
1	Forest	80.7
2	Irrigated cultivate land	248.4
3	Unirrigated cultivate land	1069.3
4	Cultivable waste (including Gauchar and Groves)	252.9
5	Area not available for cultivation.	336.1
	Total	**1987.4**

Source : Village Directory, 2001

(5) Tenancy:

There was no separate Act on tenancy in the former Bombay State before 1939. There were provisions of Section 83 of Land Revenue Code and Mamlatdar Court law only. The tenant was not secured of his tenancy rights in the Act. This tenancy lease was considered yearly and had to pay tenancy as per tradition or according to the agreement made with the land owner. In order to protect the tenants, the Bombay Tenancy Act, 1939 came into force in the erstwhile Bombay State.The independence of the country, it was necessary that the country is self-sufficient in agricultural production. It can be done only when the tillers of the land should have some definite rights over the land. With a view to effect control on efficient utilization of agricultural land and also to protect the tenants further and also to accept a definite policy and view for the country on agricultural land, The Bombay Tenancy and Agricultural Land Act, 1948 was enacted and it was brought into force since then.The Act of 1948 was amended five times. An important provision of 'Farmer Day' was inserted in the Act on 1-8-1956. According to this provision, if any person legally tilled the land of other person on 01-04-1957, he was entitled to purchase the said land. Even though Gujarat State was bifurcated from Bombay State in 1960, the said act applied to it also as well.

Tenant means the person who held land on lease viz.,

(1) Tenant as per Section 4;

(2) Protected tenant

(3) Permanent tenant

(4) The person who continued to possess the land with or without the consent of the land owner after appointed date and upto specified date or it is considered that he continued the possession of the land.

In all 1,049,056.4 hectares of land have been released and distributed to total 1,278,125 beneficiaries by now under The Bombay Tenancy and Agricultural Land Act,1948. Among the beneficiaries 177,171 were from Scheduled Castes, 258,132 from Scheduled Tribes and 842,822 from others. There is no beneficiary in the district under this act.

(6) Agriculture :

a) Area under Major Crops :

Area under major crops for the years 1993-94 and 1997-98 are indicated in the following staement.

Area under Major Crops

(in '00 hectares)

Sl.No.	Name of Crop	1993-94	1997-98
1	Paddy	-	1
2	Wheat	22	32
3	Bajri	92	55
4	Jowar	77	108
5	Other cereals	1	3
6	Gram	16	24
7	Other pulses	11	8
8	Total food grains	219	231
9	Sugarcane	4	-
10	Groundnut	598	695
11	Cotton	108	192

Source : Season and Crop Report, Directorate of Agriculture, 1999.

The area under cotton, wheat, gram, groundnut and jowar crops has increased while the area under Bajari and other pulses crops has decreased during 1997-98 as compared to the year 1993-94. It is noticed that a majority of the cropped area was under Groundnut and Cotton.

b) Average Yield per Hectare :

The average yield per hectare of the principal crops in the district during the year 1993-94 and 1997-98 is shown below.

Average Yield per Hectare

(In Kg)

Sl. No	Name of Crop	Average yield per hectare	
		1993-94	1997-98
1	Jowar	976	2,787
2	Paddy	1,922	4,954
3	Wheat	2,730	3,639
4	Bajri	2,795	4,118
5	Groundnut	343	1,838
6	Sugarcane	6,800	9,280
7	Cotton	335	517

Source : Season and Crop Report, Directorate of Agriculture, 1999

The average yield per hectare was higher in groundnut, jowar, bajri, paddy, wheat, sugarcane and cotton crops during the year 1997-98 than that recorded during the year 1993-94 while for jowar, groundnut and sugarcane big jumps are observed.

(7) Irrigation :

Source of Irrigation :

The area irrigated by different sources in the district are presented below during 1993-94 and 1997-98.

Area under Irrigation by Source

(In '00 hectares)

Sl . No.	Source of Irrigation	1993-94		1997-98	
		Net	Gross	Net	Gross
1	2	5	6	7	8
1	Govt. canals	N.A.	N.A.	N.A.	N.A.
2	Tanks	N.A.	N.A.	N.A.	N.A.
3	Wells	114	141	118	127
	Total	**114**	**141**	**118**	**127**

Source : Season and Crop Report, Directorate of Agriculture, 1999

The above figures indicate that wells are the main source of irrigation in the district .

(8) Animal Husbandry:

a) Livestock Population :

Cattle wealth occupies a pivotal place in the rural economy of the district. According to the livestock census of 1992 and 1997, the livestock population in the district is indicated below.

Livestock

Sl. No.	Livestock population	Year	
		1992	1997
1	2	3	4
(A)	**Total Livestock**	**211,072**	**245,150**
1	Cattle (cross breed)	63	57
	(a) Male over 2.5 years	3	-
	(b) Female over 2.5 years	27	39
	(c) Young stock	33	18
2	Cattle (Indigenoues)	76,125	76,206
	(a) Male over 3 years	33,902	33,270
	(b) Female over 3 years	23,066	25,507
	(c) Young stock	19,157	17,429
3	Buffaloes	69,633	78,786
	(a) Males over 3 years	439	537
	(b) Females over 3 years	42,035	52,373
	(c) Young stock	27,159	25,876
4	Sheep	37,540	41,522
5	Goats	26,480	28,939
6	Horses and ponies	256	220
7	Camels	321	370
8	Pigs	342	2,666
9	Other livestock	312	16,384
(B)	**Poultry**	**3,126**	**4,037**

Source : (1) Directorate of Economics and Statistics, 1992
(2) Directorate of Animal Husbandry, Livestock Census, 1997

The livestock population has increased in 1997 as compared to the year 1992. Poultry birds have also increased in 1997 as compared to the Year 1992.

b) Agricultural Implements :

According to the livestock censuses conducted in the State, the comparative data for agricultural implements in the district for the years 1992 and 1997 are shown in the below statement.

Agricultural Implements

Sl. No.	Name of Agricultural Implements	Year 1992	Year 1997
1	2	3	4
1	Plough	18,926	13,257
	(a)Wooden	18,918	3,852
	(b)Iron	8	9,405
2	Cart	5,036	13,574
3	Oil engine	906	6,474
4	Electric Motor & Pump	10	8,643
5	Tractor	7	988
6	Wheat Thresher	0	1,365
7	Rice Thresher	0	4

Source : (1) Directorate of Economics and Statistics, 1992
(2) Directorate of Animal Husbandry, Livestock Census, 1997

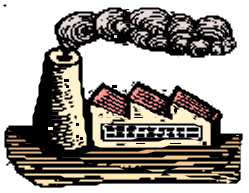

The number of agricultural implements except wooden plough has shown an increasing trend during the year 1997 as compared to the year 1992.

(9) Fisheries :

The major part of Porbandar district is located on the coastal area of Arabian sea. This coastel area is blessing for the small fishermen. Fish is also exported.The main fishes are Cear, Dhol Hilcia, Ribban, Crukar and Rok Ked. There is a coastal way from Miyani to Madhavpur on the boundary of Arabian Sea. This coastal way is more useful for fishing activity.

(10) Industry :

The total numbers of registered factories and average number of daily workers employed by major groups of industries for the year 1998 and 1999 are shown in the following statement. Among above registered factories the most important establishments from the point of employment belong to Non-metallic mineral products.

Distribution of Important, Industrial Establishments by Major Industrial Group

Sl. No.	Major Group of NIC	Description	As on 31.12.98 Number of Establish-ment	As on 31.12.98 Average number of persons working per day	As on 31.12.99 Number of Establish-ment	As on 31.12.99 Average number of persons working per day
1	2	3	4	5	6	7
1	20-21	Food products	19	1,119	16	1,276
2	23	Cotton textiles	9	253	7	182
3	26	Textile products (incl wearing apparel)	4	89	3	93
4	28	Paper and paper products and printing, publishing and allied industries	-	-	1	21

(11) Trade and Commerce :

This category includes wholesale and retail trade of all kinds and other commercial activities like financial, insurance, real estate and business services.The big industrial unit like A.C.C. is in Porbandar district. The district is well known for groundnut, groundnut oil, oil engine and its parts, limestone, Soda ash and bauxite and allied products are exported to abroad.Table No. 47 gives details of the most important commodities manufactured and exported out of towns as per 2001 Census. The commercial and co-operative banking facilities available in the district are shown in the following statement.

Villages Having Banking Facility

Sl No.	Name of Tahsil	Number of villages where banking facility is available	Number of Banking Institutions

(12) Transport and Communication :

Transport and Communication facilities are considered an administrative necessity as well as a public convenience Moreover; a well-knit transportation system is a pre-requisite for the social and economic development of any district. According to the classification of road, made by the Indian Roads Congress, road length in the district by category is given below for the years 1998-99 and 1999-2000.

a) Road :

The linking of one place with other by road is very essential to provide good transport system. The information regarding roads available in Porbandar district for the year 1998-99 to 2000-01 are given in the table below. This table includes the information of National and State highways, district roads and village roads.In Porbandar, according to 1991 census 114 villages and 5 towns were connected with pucca roads and 92 villages were connected with kachcha roads. In 2001 census, 132 villages and five towns are connected with pucca roads and 61 villages are connected with kachcha roads.

d) Posts and Telegraph :

The below table shows the number of villages in the district possessing post, telegraph and telephone facilities. As regards rural areas of the districts the facility of post, telegraph and telephone are available respectively in 92, 4 and 125 villages.

Communications Facilities

Sl .No.	Type of Communication amenities	No.of Villages having facilities
1	2	3
1	Post Offices	92
2	Telegraph Offices	4
3	Telephone	125
	Total	**221**

b) Railway:

In the Porbandar district there are 8 villages having railway facilities. Porbandar is also connected with broad gauge line of railway from Porbandar to Mumbai.

c) Ports:

There are five ports in this district viz. Porbandar, Navibandar, Rajpar, Miyani and Madhavpur. Of these ports, Porbandar is the most important port of this district. Porbandar is a flourishing intermediate sea-port on the south-west coast of the Saurashtra peninsula. It is an important port for passenger traffic from and to the African ports. The Middle-East countries has weekly services of the Scindia Stream Navigation Company plying between Bombay and Porbandar. Remaining four are minor ports. Fertilizer and coal are the main items of import at these ports whereas fish, lime, limestone and oil cake are the principal items of export through these ports.

e) State Road Transport :

All the villages of district were connected with bus facility in the year of 1998-1999.

13) Electricity :

Electricity is the chief necessity for the economic development of the district. The main source for power supply in the district is Gujarat Electricity Board. All the villages are electrified.

(14) Gram Panchayats, its composition, jurisdiction and role in the Development of Village and its Economy:

The system of Panchayati Raj was introduced in the year 1963 in Gujarat State. Under this set up, the 3 tier system was introduced namely, The District Panchayat, The Taluka Panchayat and The Gram Panchayat.

Gram Panchayat is an important institution of self-government. The Gram Panchayat is formed for a village or group of villages. The Gram Panchayat is constituted for a local area with the population of less than 10,000. Such local area may be revenue village or a group of revenue villages or hamlets forming part of a revenue village or such other administrative unit or part of thereof. The number of members of Gram Panchayat varies from 9 to 15. The tenure of Gram Panchayat is of five years. The people of village elect Sarpanch and Vice-Sarpanch (Up-Sarpanch) and other members of the Panchayat. Various Committees like; Social Justice Committee and Standing Committee are formed. In the year 1993 Government of India enacted an 73rd Constitutional Amendment regarding provisions of Panchayati Raj and in light of that constitutional amendment Government of Gujarat enacted amended Panchayati Raj Act from 15th April 1994. By this constitutional amendment, Panchayats are given constitutional status. Regular and timely election, participation of women and backward classes, formation of separate State Election Commission and rotation system in electing the heads of the various committees are other significant amendments in the act. Decentralised planning process and active participation of people is the soul of the Panchayati Raj Act. The powers for decentralised planning, implementation and development are delegated to the Panchayats.

The primary functions of the District/Taluka Panchayats are providing facilities for primary education, health, drinking water, electricity, constructions and maintenance of roads, bridges etc., maintenance of Gauchars, organising relief work at the time of scarcity and drought situation, sanitation and social welfare. Arrangements for housing facilities for below poverty line people and rural devlopment schemes are implemented by panchayats. Gram Panchayats also implement important programmes like, 'food for work' and other programmes beneficial for the local people. Thus, Panchayats play an important role in the development of village and its economy. There are 13761 Gram Panchayats in Gujarat State. Out of 182 villages in Porbandar district, there are only one group Gram Panchayat and 180 independent Gram Panchayats.

(v) Census Concepts :

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate building.

Permanent Houses :

Houses, the walls and roof of which are made of permanent materials. The Material of wall can be anyone from the following namely Galvanized iron sheets or other metal sheets, Asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials namely tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either wall or roof is made of permanent materials and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of a 2 meters. A dwelling room would include living room, bedroom, dining room drawing room study room, servant's room and other habitable rooms. Kitchen, Bathroom, latrine, Store-room, passage-way and verandah which are not normally usable for living are not considered as dwelling rooms. A room used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office. etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servants household tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room which is shade by more than one household has not been counted for any of them. If two household have a dwelling room each but in addition also share a common dwelling room. Then the common room has not been counted for either or of the household.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of a different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another

census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data.

In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban Area :

The following areas are treated as towns/urban areas :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-

meration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Households :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside pavements, in hume pipes, under flyovers and staircases or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Household.

Scheduled Castes and Scheduled Tribes :

Article 341(1) of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342(1) similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State is given below

List of Scheduled Castes :

1. Ager
2. Bakad, Bant
3. Bawa-Dedh, Dedh Sadhu

4. Bhambi, Bhambhi, Asadaru Asodi, Chamadia, Chamar Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Nalia, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar.
5. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
6. Chalvadi, Channayya
7. Chenna Dasar, Holaya Desar
8. Dangashia
9. Dhor, Kakkayya, Kankayya
10. Garmatang
11. Garoda, Garo
12. Halleer
13. Halsar, Haslar, Hulasvar, Halasvar
14. Holar, Valhar
15. Holaya, Holer
16. Lingader
17. Mahar, Taral, Dhegu Megu
18. Mahyavansi, Dhed, Dhedh, Vankar, Maru Vankar Antyaj
19. Mang, Matang, Minimadig
20. Mang-Garudi
21. Meghaval, Meghwal, Menghvar
22. Mukri
23. Nadia, Hadi
24. Pasi
25. Senva, Shenva, Chenva, Sedma, Rawat
26. Shemalia
27. Thori
28. Tirgar, Tirbanda
29. Turi
30. Turi Barot, Dedh Barot

Scheduled Tribes :

1. Barda
2. Bavacha, Bamcha
3. Bharwad (In the Nesses of the forests of Alech, Barada and Gir)*
4. Bhil, Bhil Garasia, Dholi-Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
5. Charan (In the Nesses of the forests of Alech, Barada and Gir) *
6. Chaudhri (In Surat and Valsad districts)
7. Chodhara
8. Dhanka, Tadvi, Tetaria, Valvi
9. Dhodia
10. Dubla, Talavia, Halpati
11. Gamit, Gamta, Gavit, Mavchi, Padvi
12. Gond, Rajgond
13. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
14. Kokna, Kokni, Kukna
15. Koli (In Kachchh district)
16. Koli Dhor, Tokre Koli, Kolcha, Kolgha
17. Kunbi (In The Dangs District)
18. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana, Nayaka
19. Padhar
20. Paradhi (In Kachchh district)
21. Pardhi, Advichincher, Phanse Pardhi (Excluding Amreli,Bhavnagar, Jamnagar, Junagadh, Kachchh, Rajkot and Surendranagar districts)
22. Patelia
23. Pomla
24. Rabari (In the Nesses of the forests of Alech, Barada and Gir)*
25. Rathawa
26. Siddi (In Amreli, Bhavnagar, Jamnagar, Junagadh, Rajkot and Surendranagar Districts)
27. Vaghri (in Kachchh district)
28. Varli
29. Vitola, Kotwalia, Barodia

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

* The area comprised of Jamnagar and Junagadh districts.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed .

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as "Main worker".

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal- worker'

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator, if, he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural laborers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (area).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural laborer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself

and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural laborer or in Household Industry is termed as an 'Other-Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural laborers or household industrial workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population Density :

Population density is the number of persons inhabited per square kilometer of the area.

Age :

Age is measured in terms of the completed number of years.

Sex Ratio :

Numbers of females per 1000 males in a population.

(vi) Non Census Concepts :

Improved Drinking Water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are, not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of Latrine and Method of Disposal of Night Soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faucal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially lives births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude Birth Rate (CBR) :

Ratio of the numbers of live births in a year to the mid year population. (normally expressed per 1,000 population).

$$CBR = \frac{\text{Numbers of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude Death Rate (CDR) :

Ratio of the numbers of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Numbers of deaths during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Natural Growth Rate (NGR) :

Natural Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

$$NGR = CBR - CDR$$

Age Specific Fertility Rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Numbers of live births in a particular age group}}{\text{Numbers female population of same specified age group}} \times 1{,}000$$

Age Specific Marital Fertility Rate (ASMFR):

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age group}}{\text{Mid-year married female population of the same age group}} \times 1{,}000$$

General Fertility Rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General Marital Fertility Rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) years}} \times 1{,}000$$

Total Fertility Rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming

that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total Marital Fertility Rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-Specific Mortality Rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (q5MR)

Infant Mortality Rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal Mortality Rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early Neo-natal Mortality Rate (ENMR):

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late Neo-natal Mortality Rate (LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post Neo-natal Mortality Rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal Mortality Rate (PMR) :

Number of stillbirths plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of stillbirths and infant deaths of less than 7 days during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Stillbirth Rate (SBR) :

$$SBR = \frac{\text{Number of stillbirths during the year}}{\text{Number of live births and stillbirths during the year}} \times 1{,}000$$

Maternal Mortality Rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and childbirth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible Couple (Couples per 1,000 population):

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child Woman Ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child Woman Ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'.The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International Migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban Components of Migration :

Rural or Urban status in respect of migrants had been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic Status of Urban Units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corpora-tion, Municipal Committee/Municipal council, Municipality etc.

Size Class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population is classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5(1,000,000-1,999,999) M4(500,000-999,999); M3(300,000-499,999), M2(200,000-299,999) & M1(100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrange-ment of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings- Population, its distribution :

(a) Distribution of population in rural-urban areas:

According to the 2001 Census, the total population of Porbandar district is 536,835 comprising 275,821 males and 261,014 females. This population of the district forms 1 percent of the state population and rank at 23rd place among the 25 districts of Gujarat state. Out of the total population of the district 51 percent lives in rural area while 49 percent lives in urban areas. Rural population of the district is distributed among 3 talukas and urban population is spread over in 5 towns. The total urban population in the district is 261,375 persons comprising 134,753 males and 126,622 females. The total rural population in this district comes to 275,460 persons and is composed of 141,068 males and 134,392 females as per 2001 Census. This rural population is distributed 182 villages in the district. All villages are inhabited.

(b) Size class & status of towns, Population growth, Density, Sex ratio, Work participation rate, Details of Literacy , availability of University education in the District :

The below statement gives the position and number of urban units in size class for 2001 Census.

Sl. No.	Name and Civic status of Town	Size class of Town	Population
1	2	3	4
1	Porbandar (M)*	I	158,856
2	Chhaya (M)	III	38,526
3	Adityana (CT)	IV	17,238
4	Ranavav (M)*	III	29,645
5	Kutiyana (M)	IV	17,110

* Towns having outgrowths

According to the 1991 Census the total population of the district was 469,472. There has been net addition of 67,363 persons during 1991-2001. The decadal growth rate of district is 14.3 per cent. The growth rates for the rural and urban areas of the district are 7.3 and 22.8 per cent respectively. The growth rate of urban population is very high in the district. The highest growth of urban population has taken place in Porbandar where populations has increased to 56.3 per cent during the decade.

The density of population in Porbandar district is 234 persons per Sq.km. against the state average of 258 persons.

There are 946 female for every thousand males in Porbandar district. The sex ratio figures for rural and urban areas of the district are 953 and 940 respectively. It is also observed that the proportion of female in rural area is higher than that of urban areas. Among the talukas, the highest sex-ratio of 957 females has been recorded in Porbandar taluka and lowest is recorded in Kutiyana taluka 946. The urban areas of Kutiyana have the highest sex-ratio of 950 and Porbandar has the lowest sex-ratio of 938. Sex-ratio in age-group 0-6 comes 898 females per 1000 males in the district, as a whole. In rural areas, this proportion is 905 females while in urban areas the sex-ratio of child population works out 889 females per 1000 males.

The work participation rate is defined as percentage of total workers to total population. In the same way it is defined for main workers and marginal workers. According to 2001 Census, the total workers including main and marginal workers constitute 40.1 percent of the total population of the district. Of the total workers the share of the main workers is 32.3 per cent and the marginal workers is 7.73 per cent. The remaining population belongs to the category of non-workers.

As per 2001 Census among the main workers male participation rate in the district is 52.4 and corresponding proportion of female is 11.1 per cent. Male and female marginal workers account for 3.4 and 12.3 per cent respectively. The proportion of female marginal workers is substantially higher than males, as the females are attending to one or more economic activities in addition to their house duties to improve the family income.

It is observed that in rural as well as in the urban areas of the district, the proportion of male main workers is higher than that of the female main workers.

A person who can read and write in any language with understanding is taken as literate in census. All children of age below 7 years are treated as illiterates.

As per 2001 census Porbandar district reported 316,172 persons as literates constituting 68.6 percent of the total population. The proportion of male and female literates in the district is 78.4 and 58.4 percent respectively. The literacy rate of males is much higher than that of females. The difference of male and female literacy rate is 20.0 per cent in the district.

The total literacy rates of rural and urban areas are 60.1 and 77.4 per cent respectively. The proportion of male and female literates in rural area are 71.3 and 48.5 per cent respectively. In urban areas this proportion is 85.6 and 68.7 per cent respectively. The difference between male and female literacy rates in urban areas is about 16.8 per cent as against 22.9 per cent in rural areas. It is thus clear that females are better educated in urban areas than their counter parts in rural areas.

There are 7 colleges in the district. Among them 5 colleges are situated in Porbandar, one in Chhaya and one in Kutiyana respectively.

Religion:

Religion forms an integral part of Indian Social system. In the pre-Independence census reports, the data on religions was being presented for 9 major religions viz. Hindu, Muslim, Tribals, Christian, Sikh, Jain, Buddhist, Parsi, Jew and others. However, since the 1951 census the data on religion has been presented for 6 major religions viz. Hindu, Muslim, Christian, Sikh, Jain and Buddhist. Besides, the minor religions have been classified under the category of 'other'. The data on religion collected and presented by the Indian Census is the basic data of intense use for the 'researchers', anthropologists, sociologists, demographers, administrators, planners and even for a common man.

In 2001 the Indian Census collected the religion data in question No.7 of the Household Schedule and recorded the same under the six major religions. Other religions were recorded in actual as returned by the respondent and classified under the category of 'others'. Religion not stated has been added for those persons who have not stated their religion at the time of canvassing the status of religion.

Percentage distribution of population by major religions in Gujarat State and Porbandar district in 2001 Census.

Sl. No.	Religion	Gujarat State		Porbandar District	
		Population	Percentage	Population	Percentage
1	2	3	4	5	6
1	Hindu	45,143,074	89.1	507,176	94.5
2	Muslim	4,592,854	9.1	28,404	5.3
3	Christian	284,092	0.5	306	0.06
4	Sikh	45,587	0.1	119	0.02
5	Buddhist	17,829	0.0	43	0.01
6	Jain	525,305	1.0	589	0.1
7	Other	28,698	0.1	25	0.01
8	Religion not stated	33,578	0.1	173	0.03

Source : Census of India,2001

The comparative data of Gujarat State and Porbandar district is given in above. It is observed that at State level 89.1 percentage of population is of Hindus, whereas in Porbandar district. Hindu religion followers are recorded at 94.5 per cent of population. In Gujarat State 9.1 per cent of population follows Muslim religion against the 5.3 per cent of Muslims recorded in Porbandar. The population of other major religious community is very low compared to figure of Gujarat State.

The pattern of distribution of the population of major religious communities between rural and urban areas of Porbandar is as under according to 2001 Census.

Religion	Number of followers	Population	
		Rural	Urban
1	2	3	4
Hindu	507,176	270,105 (53.3)	237,071 (46.7)
Muslim	28,404	5,219 (18.4)	23,185 (81.6)
Christian	306	26 (8.5)	280 (91.5)
Sikh	119	6 (5.0)	113 (95.0)
Buddhist	43	2 (4.7)	41 (95.3)
Jain	589	31 (5.3)	558 (94.7)
Others	25	1 (4.0)	24 (96.0)
Religion not stated	173	70 (40.5)	103 (59.5)

Note: Percentages are in bracket.

1	Porbandar	16.7	9.3	23.2	53.4	56.3
2	Ranavav	18.2	8.3	33.0	40.2	45.2
3	Kutiyana	1.4	2.3	-1.9	21.4	20.7
	District Total:	**14.3**	**7.3**	**22.8**	**45.3**	**48.7**

Note : * Recasted population

Table 1 gives the talukawise detail pertaining to the decadal changes in the population during the last decade of 1991-2001 along with the percentage of urban population for last two censuses. The decadal growth rate of the district is 14.3 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 7.3 and 22.8 per cent respectively. Overall the growth rate of urban area is higher than the rural area during the decade 1991-2001.Out of the total population of the district 51.3 per cent lives in rural areas while 48.7 per cent lives in urban areas in the district. The highest decadal growth rate has been shown in Ranavav taluka with 18.2 per cent and the lowest in Kutiyana with 1.4 per cent. Porbandar taluka has recorded the highest urban population of 56.3 per cent whereas, Kutiyana has the lowest urban population of 20.7 per cent of total population.

TABLE 2

Table 2 gives the details of absolute number and percentages of inhabited villages falling in each range of population size of villages and number of males and females for each population range at taluka level in the district. Out of 182 inhabited villages, 31 villages (17.0 per cent) have the population below 200 persons. The size class of 200-499 persons claims 13 villages having 7.1 per cent villages of the district while the size class of 500-999 population is having 36 villages with 19.8 per cent of the total villages. As many as 64 villages with 35.2 per cent of all villages are in the size class of 1000-1999 and 33 villages (18.1 per cent) are in size class of 2000-4999 while 4 villages (2.2 per cent) are falling in the range of 5000-9999. Only one village of Porbandar taluka in the district is having population of 17,827 persons. Porbandar taluka has the highest number of villages i.e. 74 followed by Ranavav with 61 villages and Kutiyana with the lowest of 47 villages.

TABLE 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New		
	(i) Statutory town	Nil
	(ii) Census town	Nil
(b) Denotified		
	(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
	(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
	(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified		Nil
(d) Wholly merged with other town(s)		Nil

Declassified means the census towns of 1991census which failed to satisfy the demographic and economic criteria.

Table 3 is self-explanatory and needs no elaboration.

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of Population Density (per Square Kilometre)	Total Number of Villages in each Population Density Range	Percentage of Villages in each Population Density Range	Population	Percentage Distribution of Population
1	2	3	4	5
0-10	36	19.8	5,907	2.1
11-20	0	0.0	0	0.0
21-50	6	3.3	7,053	2.6
51-100	32	17.6	42,599	15.5
101-200	77	42.3	141,529	51.4
201-300	22	12.1	47,399	17.2
301-500	7	3.8	12,147	4.4
501 +	2	1.1	18,826	6.8
Not known	0	0.0	0	0.0
District Total:	**182**	**100.0**	**275,460**	**100.0**

Population Density (Rural) of the district: 138

Table 4 gives the detail of the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 77 accounting for 42.3 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 51.4 per cent population. The lowest range of 0-10 persons per sq.km. covers 36 villages (19.8 per cent) with 2.1 per cent of population only 2 villages (1.1 per cent) with 6.8 per cent of population have very high density of more than 501. Not a single village is recorded in range of population density of 11-20. There are 29 villages (15.9 per cent) with 21.6 per cent population in the density range of 201-500. The density ranges of 21-50 and 51-100 account for 3.3 and 17.6 per cent of inhabited villages respectively. Both these ranges together claim 18.1 per cent population. The density of population of the rural areas of the district is 138 per sq.km.

TABLE 5

SEX RATIO OF STATE AND DISTRICT, 1901-2001

Sl. No.	Census Year	State			District		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
1	1901	954	951	965	956	933	1,004
2	1911	946	943	960	964	932	1,039
3	1921	944	947	931	962	920	1,058
4	1931	945	948	934	960	933	1,019
5	1941	941	954	898	962	917	1,037
6	1951	952	964	920	1,001	985	1,028
7	1961	940	956	896	962	970	948
8	1971	934	951	893	952	960	941
9	1981	942	959	905	967	976	955
10	1991	934	949	907	960	963	956
11	2001	920	945	880	946	953	940

Table 5 gives the detail about the sex ratio of state and district according to 1901 to 2001 Censuses. As per 2001 Census sex ratio of 946 females per 1000 males has been recorded in the district against 920 of the state. The sex ratio of the district was significantly high as compared to the state figures from 1901 to 2001 Censuses. The highest sex ratio of 1,001 females was recorded in the district during 1951 census while the lowest sex ratio of 946 females was recorded in the district during 2001, which is also found to be the lowest throughout the Censuses from 1901 to 2001.

TABLE 6

SEX RATIO BY TALUKAS, 2001

Sl.No.	Name of Taluka	Sex Ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Porbandar	947	957	938
2	Ranavav	945	949	941
3	Kutiyana	947	946	950
District Total:		**946**	**953**	**940**

Table 6 gives the detail of sex ratio for total, rural and urban areas at taluka level as per 2001 Census. There are 946 females per 1000 males in Porbandar district. The sex ratios in Porbandar and Kutiyana is 947 each which are slightly higher in comparison to that of Ranavav. Sex ratio in rural areas of Porbandar is the highest i.e. 957 while it is lower in the rural areas of Ranavav and Kutiyana.

TABLE 7

SEX RATIO BY TALUKAS / C.D.BLOCKS, 2001

Sl.No.	Name of Taluka / C. D. Block	Sex Ratio
1	2	3
1	Porbandar	957
2	Ranavav	949
3	Kutiyana	946
	District (Rural) Total:	**953**

Table 7 gives the detail of Taluka/C.D. Blockwise sex ratio for rural population in the district. The sex ratio in rural areas of the district is 953 females per 1,000 males as a whole. The highest sex ratio of 957 females is found in Porbandar taluka while the lowest of 946 is recorded in Kutiyana. The sex ratio of Porbandar taluka is also higher than district rural figure of 953.

TABLE 8

SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of Sex Ratio for Villages	Number of Inhabited Villages	Percentage of Villages in each Range	Population 2001	Percentage Distribution of Population
1	2	3	4	5
Less than 700	3	1.6	157	0.1
700-749	4	2.2	367	0.1
750-799	3	1.6	284	0.1
800-849	13	7.1	3,548	1.3
850-899	16	8.8	21,644	7.9
900-949	55	30.2	97,553	35.4
950-999	51	28.0	117,883	42.8
1000-1099	28	15.4	33,295	12.1
1100+	9	4.9	729	0.3
District Total:	**182**	**100.0**	**275,460**	**100.0**
Sex ratio (Rural) for District:		**953**		

Table 8 gives the detail of the distribution of villages by 9 different sex ratio ranges based on 2001 Census. The maximum number of villages i.e. 55 accounting for 30.2 per cent of the total villages having 35.4 per cent population of the district, fall in the sex ratio range of 900-949, followed by the sex ratio range of 950-999 which claims 51 villages (28.0 per cent) and having largest population of 42.8 per cent. The highest sex ratio range of 1100 and more claims 9 villages having the shares of 0.3 per cent rural population in the district. The sex ratio range of 1000-1099 claims 28 villages (15.4 per cent) with 12.1 per cent of population.

TABLE 9

SEX RATIO OF URBAN AGGLOMERATIONS (INCLUDING CONSTITUENT UNITS) / TOWNS, 2001

Sl.No.	Name of U.A. / Town	Urban Status of Town	Sex Ratio
1	2	3	4

		Urban	2,318	1,184	1,134	958
	District Total:	**Total**	**76,099**	**40,102**	**35,997**	**898**
		Rural	**41,886**	**21,992**	**19,894**	**905**
		Urban	**34,213**	**18,110**	**16,103**	**889**

Table 10 gives the detail about population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each taluka of the district. Total population in age group 0-6 years is 76,099 persons comprising 40,102 males and 35,997 females. The total sex ratio in this age group works out 898 females per 1000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 905 and 889 females per 1000 males in this age group respectively. The rural sex ratio in taluka varies between 877 and 926.

TABLE 11

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TALUKAS/C.D. BLOCKS, 2001

Sl.No.	Name of Taluka / C.D. Block	Total Population in 0-6 Age Group			Sex Ratio for 0-6 Age Group
		Persons	Males	Females	
1	2	3	4	5	6

Sex ratio (Rural) for District:		**905**		

Table 12 gives the detail about the distribution of villages in 9 different ranges of sex ratio in the age group 0-6 years as well as percentage of villages and percentage of population falling in each range of sex ratio in the district. The maximum number of 26 villages each fall in 3 different ranges of 850-899, 800-849 and less than 700. The minimum number of 6 villages fall in range of 700-749 having minimum population of 2.6 per cent in the district. The maximum population of 20 per cent in the district is seen in the sex ratio range of 950-999. As many as 24 villages with 5.9 per cent to the total population fall in the largest range of 1100 and more. The remaining ranges of 750-799, 900-949 and 1000-1099 comparatively show less number of villages having percentages of 6.6, 10.4 and 13.2 respectively.

TABLE 13

	District(Urban) Total :		**34,213**	**18,110**	**16,103**	**889**

UA= Urban Agglomeration.

Table 13 gives the detail of population in age group 0-6 years as well as sex ratio in the urban areas of the district. Total urban population of district is 34,213 persons comprising 18,110 males and 16,103 females. Sex ratio in the district for urban areas as a whole is 889. Among UA and Towns it is the highest in Kutiyana (M) at 958 and the lowest in Adityana (CT) at 872. The sex ratioes of Chhaya (M), and Kutiyana (M) are higher than district urban sex ratio of 889.

TABLE 14

NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKAS, 2001

		Urban	**261,375**	**21,560**	**1,323**	**8.2**	**0.5**

Table 14 shows the detail about the distribution of Scheduled Castes and Scheduled Tribes with their percentage distribution to total population at taluka level with rural and urban areas of the district. It can be seen that out of total district population of 536,835 as much as 9 per cent belongs to Scheduled Castes and only 1.2 per cent belongs to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 9.7 per cent in rural area and 8.2 per cent in urban area in the district. The highest percentage of Scheduled Castes population is recorded in Kutiyana taluka (12.3 per cent) while the lowest is in Porbandar (8 per cent). The proportion of Scheduled Tribes population is 1.9 and 0.5 per cent in rural and urban areas respectively. The highest Scheduled Tribes population in this district is concentrated mainly in Ranavav (4.1 per cent) while the lowest population percentage of Scheduled Tribes is recorded in Kutiyana at 0.1 per cent.

TABLE 15

NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TALUKAS/C.D.BLOCKS, 2001

Sl. No.	Name of Taluka / C.D. Block	Total Population	Total Scheduled Castes Population	Total Scheduled Tribes Population	Percentage of Scheduled Castes Population to Total Population	Percentage of Scheduled Tribes Population to Total Population
1	2	3	4	5	6	7

District (Rural) Total:		**275,460**	**26,673**	**5,133**	**9.7**	**1.9**

Table 15 gives the detail about the distribution of Scheduled Castes and Scheduled Tribes population for rural areas in each taluka of the district. Out of the rural population of the district, 9.7 per cent population is recorded as Scheduled Castes and 1.9 per cent as Scheduled Tribes. The highest population of 13 per cent of Scheduled Castes population as recorded in Kutiyana taluka and the lowest of 7.1 per cent in Ranavav taluka. At taluka level, the highest Scheduled Tribes population is recorded in Ranavav taluka with 7.4 per cent and the lowest in Kutiyana taluka with 0.1 per cent.

TABLE 16

PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes Population to Total Population	Number of Villages	Percentage	Scheduled Castes Population	Percentage

76 and above	0	0.0	0	0.0
District Total	**182**	**100.0**	**26,673**	**100.0**

Table 16 details about the number of villages according to the proportion of Scheduled Castes population to their total population in 9 different ranges of percentage at district level. As much as 48 villages accounted for 26.4 per cent of 182 villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 30 villages constituting 16.5 per cent of the total villages. In 49 villages percentage range of Scheduled Castes varies between 5 to 10 per cent while the next range of 11-20 accounts for 38 villages constituting 20.9 per cent of the total villages, 7.7 per cent of the villages are having the percentage range of 21-30, while the ranges of 31-40, 41-50 and 51-75 are accounted for only 1 village each. There is no Scheduled Castes population in the percentage range of 76 and above. The maximum of 38.1 per cent of the Scheduled Castes population is covered by range of 5-10 per cent and minimum of 0.4 per cent in the range of 41-50 per cent.

TABLE 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes Population to Total Population	Number of Villages	Percentage	Scheduled Tribes Population	Percentage

51-75	0	0.0	0	0.0
76 and above	33	18.1	3,661	71.3
District Total	**182**	**100.0**	**5,133**	**100.0**

Table 17 gives the detail about the number of villages according to the proportion of Scheduled Tribes population to their total population in 9 different percentage ranges at district level. It is significant that 96 villages constituting 52.7 per cent of total villages in the district do not have any population of Scheduled Tribes. As much as 47 villages accounting for 25.8 per cent of the villages are having Scheduled Tribes population of less than 5 per cent while percentage range of 5 to 10 is seen for 3 villages only, which constitute 1.6 per cent of the total villages in the district. Percentages range of 11-20, 21-30 and 31-40 are accounting for 1 village each constituting 0.5 per cent of the villages. Significantly it is seen that 33 villages out of 182 in each range are having percentage range of Scheduled Tribes population of 76 and more constituting 18.1 per cent of the total villages. No village is accounted for the percentage ranges of 41-50 and 51-75 for Scheduled Tribes population. Only 2.3 percent of Scheduled tribes population is covered under the percentage range of 21-30.

UA = Urban Agglomeration.

Table 18 gives the details about the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at UA and Towns as per 2001 Census. Of 261,375 total population of UA and Towns of the district, 8.2 per cent population belongs to the Scheduled Castes and 0.5 per cent to Scheduled Tribes. The highest proportion of 16.1 per cent of Scheduled Castes population is recorded in Adityana (CT) and the lowest of 5.8 per cent in Porbandar (M). At UA and Towns level, the highest Scheduled Tribes population of 1 per cent is recorded in Chhaya (M) and the lowest of 0.1 is recorded in Adityana (CT).

TABLE 19

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN TALUKAS / C. D. BLOCKS, 2001

Sl. No.	Name of Taluka / C. D. Block	Scheduled Castes Sex Ratio	Scheduled Tribes Sex Ratio

		Rural	55,182	35,477	19,705	49,908	19,274	30,634	62.5	77.5	46.4	31.1
	District Total:	**Total**	**316,172**	**184,717**	**131,455**	**220,663**	**91,104**	**129,559**	**68.6**	**78.4**	**58.4**	**19.9**
		Rural	**140,399**	**84,919**	**55,480**	**135,061**	**56,149**	**78,912**	**60.1**	**71.3**	**48.4**	**22.9**
		Urban	**175,773**	**99,798**	**75,975**	**85,602**	**34,955**	**50,647**	**77.4**	**85.6**	**68.7**	**16.8**

The Table 21 shows talukawise literacy rates with the absolute number of literates and illiterates for the total of rural and urban areas separately. As per 2001 Census, the proportion of effective literates to total population is 68.6 per cent in the district, while this proportion in rural areas is 60.1 per cent against 77.4 per cent in urban areas. In the district the literacy rate of males is 78.4 per cent which is higher than that of females at 58.4 per cent. Among the talukas Porbandar tops with 71.3 per cent literates followed by Ranavav with 64.1 per cent. Kutiyana taluka shows the lowest literacy rate of 62.7 per cent in the district. Literacy rate of Porbandar is higher than that of district literacy rate. The gap between male and female literacy is high which comes to 19.9 percentage point in the district as a whole. The situation at taluka level is not much different. However, such gap in urban literacy is significantly low at 16.8 percentage points whereas the gap between male and female literacy is 22.9 percentage points in rural areas.

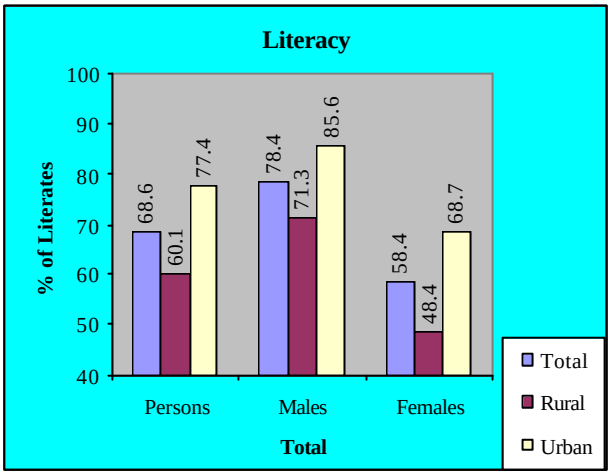

TABLE 22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN TALUKAS/C.D.BLOCKS, 2001

Sl. No.	Name of Taluka/ C.D.Block	Number of Literates and Illiterates						Percentage of Literates			Gap in Male/ Female Literacy Rate
		Number of Literates			Number of Illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Porbandar	77,146	46,810	30,336	75,794	31,339	44,455	59.6	71	47.8	23.2
2	Ranavav	29,303	17,348	11,955	27,584	11,844	15,740	61.1	71	50.8	20.1
3	Kutiyana	33,950	20,761	13,189	31,683	12,966	18,717	60.4	72.4	48	24.4
	District (Rural) Total :	**140,399**	**84,919**	**55,480**	**135,061**	**56,149**	**78,912**	**60.1**	**71.3**	**48.5**	**22.9**

Table 22 reveals the effective literacy and illiteracy rates along with absolute number of literates and illiterates for the rural population at taluka level in the district. As much as 60.1 per cent for the total population in the district is literate. Significantly a wide gap of 22.9 percentage points in literacy rates between male and females has been registered. Among three talukas of the district taluka Ranavav shows the maximum literacy rate of 61.1 per cent while Porbandar has shown the lowest Literacy rate of 59.6 per cent followed by 60.4 per cent seen in Kutiyana taluka. Kutiyana has the maximum literacy rate among male population i.e. 72.4 per cent in the district. While the highest female literacy rate of 50.8 per cent is recorded in Ranavav. A significant gap in male and female literacy can easily be seen in each taluka of the district.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of Literacy Rate for Villages	Number of Inhabited Villages	Percentage Distribution of Villages	Population	Percentage Distribution of Population
1	2	3	4	5
0	13	7.1	753	0.3
1-10	6	3.3	410	0.1
11-20	9	4.9	1,453	0.5
21-30	1	0.5	92	0.0
31-40	7	3.8	4,223	1.5
41-50	9	4.9	11,717	4.3
51-60	57	31.3	124,010	45.0
61-70	69	37.9	113,869	41.3
71-80	10	5.5	16,693	6.1
81-90	1	0.5	2,240	0.8
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**182**	**100.0**	**275,460**	**100.0**

Literacy rate for District : 68.6

Table 23 gives the distribution of villages in different ranges of literacy rate in the district. No literates are found in 13 villages constituting 7.1 per cent of total villages, having the total population of 753. As many as 57 villages accounting for 31.3 per cent of the total villages show literacy rate ranging from 51 to 60 per cent, while maximum number of 69 villages constituting 37.9 per cent of total villages has been registered in the literacy rate range between 61 to 70 per cent. It can easily be seen that the

maximum number of villages (126 villages) has registered the literacy rates ranging between 51 to 70 per cent. Only one village having 0.8 per cent of total population shows the highest range (81-90) of literacy rate. No village has 100 per cent literacy rate in the district.

TABLE 24

Table 24 shows the absolute number of literates and illiterate along with literacy rates in urban areas at U.A and Town level in the district. As much as 77.4 per cent of the urban population excluding the population of age group of 0-6 years is literates in the district. As higher as 85.6 per cent of the male population is literate while corresponding figure for female is only 68.7 per cent. Porbandar Municipality shows the highest literacy rate of 82.1 per cent while Adityana (CT) has the lowest literacy rate of 61.7 per cent in the district.

TABLE 25

NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TALUKAS / C.D. BLOCKS, 2001

Table 25 gives the detail about number and percentage of literate and illiterate for Scheduled Castes at taluka level in the district. As high as 59.2 per cent of the total Scheduled Castes population excluding the population of age group of 0-6 years is literates in the district. As much as 73.4 per cent of male Scheduled Castes is literate while corresponding figure for female is only 44.1 per cent. There is a wide gap of 29.3 percentage points between the literacy rate of male and female. Ranavav taluka has the highest literacy rate of 62 per cent while the lowest literacy rate of 57.3 per cent is recorded in Porbandar. Wide variations in literacy rates between males and females may be seen in all talukas of the district. The maximum difference of 30.7 percentage points is seen in Porbandar taluka of the district.

TABLE 26

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of Literacy Rate for Villages	Number of Inhabited Villages	Percentage Distribution of Villages	Scheduled Castes Population	Percentage Distribution of Population

District Total:	**134**	**100.0**	**26,673**	**100.0**

Literacy rate for District (Rural) : 59.2

Table 26 reveals the distribution of villages in 12 different ranges of literacy rates for the population of Scheduled Castes in rural areas of the district. No literate is reported in one village comprising 0.7 per cent of the total villages in the district and having population of only 8 persons of this community. As many as 41 villages accounting for 30.6 per cent of the total villages show the literacy rates ranging from 61-70 per cent. As much as 32 villages having 16.8 per cent of the total population of Scheduled Castes registered the literacy rate below 50 per cent. The higher literacy rates ranging from 71 to 100 per cent cover 15 villages (11.2 per cent). The range between 51 to 60 per cent has the maximum number of villages i.e. 45 forming 33.6 per cent of the total villages with the largest population percentage of Scheduled Castes i.e. 43.1 per cent in the district. It is to be noted that the Scheduled Castes in one village has been reported as totally literate in the district.

TABLE 27

Table 28 gives the detail about number and percentage of Scheduled Tribes literates and illiterates by sex at taluka level in the district. As much as 22.9 per cent of the total Scheduled Tribes in the rural areas population excluding the age group of 0-6 years is literates in the district. The corresponding proportion of male and female literates comes to 27.7 and 17.7 per cent respectively which shows a gap of 10 percentage points in male and female literacy. Among the talukas of the district, Porbandar taluka has the highest Scheduled Tribes rural literacy rate of 32.9 per cent while the lowest rate of 17.6 per cent is recorded in Kutiyana. The maximum gap of 14.4 percentage points in male/female literacy rate is recorded in Porbandar.

Literacy rate for District (Rural) : 22.9

Table 29 gives the detail about the distribution of villages by 12 different literacy rate ranges for Scheduled Tribes population in the district. There are no literate in 17 villages (19.8 per cent) of the district and population of these villages is 823 persons. A total of 18 villages (20.9 per cent) have all the population literate. The lower literacy rate of 1 to 50 per cent is observed in 40 villages (46.5 per cent) of the district. The medium literacy rate of 51 to 70 per cent is observed in 7 villages (8.2 per cent) of the district. The higher literacy ranges of 71 to 99 per cent cover 4 villages (4.6 per cent). The range of 100 per cent has the maximum number of 18 villages forming 20.9 per cent of the total inhabited villages having scheduled tribes population.

*=Towns having Outgrowths.

Table 30 gives the detail about number and percentage of Scheduled Tribes literate, illiterates and the literacy rates in towns of the district. As much as 61 per cent of the total urban population excluding the age group of 0-6 years is literate in the district. The corresponding proportion of male and female literates comes to 72.2 and 48.6 per cent respectively which shows wide gap of 23.6 per cent in male and female literacy. Among the 5 towns of the district, Adityana (CT) has the highest urban literacy rate of 73.7 per cent and the lowest of 38.6 percent is in Chhaya (M). There are wide variations in male and female literacy in all the towns of the district. The maximum difference of 36.4 per cent is found in Kutiyana (M) and minimum of 7.8 per cent in Adityana (CT).

Table 31 shows absolute number and percentage of main workers, marginal workers and non workers by sex at taluka level in the district as per 2001 Census. Only 40.1 per cent in the total population have been registered as workers in the district. In total population 32.3 per cent is main workers while 7.7 per cent is marginal workers. Percentage of non-workers in the district is accounted for 59.9 per cent of total population. Among the main workers male participation rate in the district is 52.4 per cent while corresponding rate for females is 11.1 per cent. As far as marginal workers are concerned the participation rate i.e. 12.3 percent for female is higher as compared to male's participation rate which is accounting for only 3.4 per cent.

Table 32 gives the detail about talukawise absolute number and percentage of main workers, marginal workers and non workers for rural population of the district. As much as 35.1 per cent of the population has been categorized as main workers whereas the marginal workers constitute only 12.6 per cent. As high as 52.2 per cent of population is non-worker. Sex-wise break up shows that participation in main work for male and female is 53.9 and 15.4 per cent respectively. Marginal worker for male and female is accounted for 4.7 and 21 per cent respectively. The percentage of marginal workers in females is higher than that in males. Similar trend may also be seen at taluka level also. The percentage of total rural workers of the district comes to 35.1 per cent. At the taluka level Kutiyana has the highest proportion of total workers forming 53.1 per cent of the total population whereas the lowest percentage of 46 per cent is recorded in Porbandar taluka.

UA=Urban Agglomeration.

Table 33 shows the absolute number with percentage of main workers, marginal workers and non-workers for urban population at U.A/Town level in the district. Of the 261,375 total urban population of the district, 29.4 per cent has been categorized as main workers whereas the category of marginal workers stands only for 2.6 per cent. A high percentage i.e., 68.1 per cent of the population is reported to be non-workers. Sex-wise break up at the district shows that 50.8 per cent males and 6.5 per cent females are in the category of main workers. Marginal work for males and females is accounted for 2.1 per cent and 3.1 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. The highest proportion of total workers forming 37.6 per cent of the total population is shown in Adityana (CT) and the lowest in Chhaya (M) i.e., 30 per cent.

Note: Percentage of Worker to total worker are given in brackets

Table 34 reveals economic activity in the district. From the table it is evident that total workers including main and marginal workers are 40.1 per cent of the total population. As much as 32 per cent of total workers are engaged in cultivation, followed by 18.7 per cent in agricultural labour, 1.7 per cent in household industry and 47.6 in other work. The proportion of cultivators varies between 45.8 per cent in Kutiyana to 28.5 per cent in Porbandar taluka. The proportion of female cultivators is 40.9 per cent which is higher as compared to that of male i.e., 28.4 per cent in the district. The percentages of agricultural labourers and household industry workers are comparatively low in the district. The highest proportion of 56.3 per cent of other workers is recorded in Porbandar taluka whereas the lowest proportion of 21.3 per cent is in Kutiyana taluka.

Note: Percentage of Worker to total worker are given in brackets

Table 35 gives the details of talukawise distribution of worker by sex in four categories of economic activity in rural areas of the district.. It can be seen that total workers are 47.8 per cent of total population. Among workers cultivators have the share for 49.4 per cent followed by Agricultural labourers 27.4 per cent, household industry workers for 1.5 per cent and other workers for 21.7 per cent in the rural areas of the district. Agricultural sector plays a major role in providing employment to the working force for the rural population. The percentage of workers in household industries is remarkably low at 1.5 per cent of the total workers in rural areas as reflected from the data. Thus, working force has to depend on agriculture sector in rural areas. Percentage of male workers in cultivation is higher than that of female. A considerable difference between the percentage of cultivators and other workers throughout all the talukas in the district may be seen in the table. The maximum variation of 11.8 percentage points of cultivators is seen between the talukas of Kutiyana and Ranavav. It is clearly seen that persons engaged as other workers have the highest percentage of 30.5 per cent in Ranavav and the lowest percentage of 12.3 per cent in Kutiyana. The percentage of agricultural labourers is the highest in Kutiyana with 34.3 per cent and the lowest in Ranavav with 28.3 per cent.

UA = Urban Agglomeration

Table 36 details the distribution of workers by sex in four categories of economic activities in urban areas of the district. In the urban areas of the district total workers (Main + Marginal) constitute 31.9 per cent of total population. Among these workers, cultivators constitute 4.5 per cent, agricultural labourers 5 per cent, household industry workers 2 per cent and other workers 88.5 per cent. The other workers which are commercially viable plays a major role in providing employment to the working force in urban areas. Participation of females in cultivation, i.e. 9.9 per cent is higher than males in urban areas of the district.

Note : Percentage are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water sources.' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 given above shows the talukawise distribution according to the availability of different amenities such as education, medical, improved drinking water, post office, telephone, transport communication, banks, agricultural credit societies, approach to village by pucca road and power supply. Out of 182 inhabited villages in the district, 156 villages have at least some educational facility. There is no educational facility in 26 villages. Medical facilities of one kind or other are available in 130 villages of the total inhabited villages. The remaining 52 villages are devoid of any medical facility within the village. In all 132 inhabited villages of the district avail the drinking water facility like tap, well, a hand pump, a tube well, etc. Though the main source of drinking water is well in the most of the villages 50 villages have no drinking water facility. As many as 92 villages are equipped with one or more facilities of post and telegraph. Telephone facility has reached about 68.7 per cent of villages in district. Out of 182 villages, 141 villages are well connected with the transport facility. Agricultural Credit Societies are available in 114 villages. Only 17 villages have banking facility. As much as 132 villages are linked by approach pucca roads. As far as power supply is concerned 155 villages have power supply which is accounted for 85.2 per cent of the total villages.

Note : - Percentage are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source.' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 gives the detail about the number and percentage of rural population served by different amenities. Out of total population of 275,460 persons in the district 273,541 or 99.3 per cent have educational facility of one or other type. Similarly 249,988 or 90.8 per cent population has medical facilities while 214,894 or 78 per cent have the facilities of improved drinking water. Post office facilities are available to 218,923 or 79.5 per cent population. Telephone facility is available to 251,128 or 91.2 per cent population. Transport communication facility is available to 265,847 or 96.5 per cent. Banking facilities are available to the least of the population which is 76,333 or 27.7 per cent of population in the district. As much as 233,253 or 84.7 per cent have been provided with the facility of agricultural credit societies. As much as 252,468 or 91.7 per cent have been provided with the facility of approach by pucca roads. Power supply is available to 273,448 a population of or 99.3 per cent of rural population in the district. Out of three talukas in the district Porbandar and Kutiyana enjoy 100 per cent educational facilities.

TABLE 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village Not Having the Amenity of	Distance Range of Place from The Villages Where the Amenity is Available			
	Less Than 5 Kilometres	5-10 Kilometres	10+ Kilometres	Total (Col..2- 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	21	5	0	26
(b) Middle School*	0	0	0	0
(c) Degree College	20	15	146	181
2. Medical:-

(a) Commercial Bank	53	48	64	165
(b) Co-operative Bank	27	25	126	178
7. Agricultural Credit Societies	52	10	6	68

Note : * In Gujarat State the levels of education are classified as under
(i) Primary School (From Std. I to VII passed)
(ii) Secondary/Matriculation (From Std. VIII to X passed)
(iii) Higher Secondary (From Std. XI to XII passed). Hence details under 1(b) are not shown.

Table 39 shows that only 21 villages of the district are having the facilities of basic primary education within a radius of 5 kms, 20 villages has college facility available at a distance of less than 5 km. Telephone facility is available for 38 villages within a radius of 5 kms whereas 14 villages have this facility at the distance of more than 5 km but less than 10 km. Further 41 villages do not have bus services within their respective jurisdiction.

$ Transport communication includes bus service, rail facility and navigable waterways
Percentages are given in brackets.

In the Table 40 the villages are distributed according to four ranges of the distance from the nearest statutory town along with number of villages and availability of different amenities. Out of 182 inhabited villages, 8 villages that are at a distance of 5 km. from the nearest town every village have some educational facilities. Out of these 8 villages 6 villages are having Medical, Telephone, Transport communications and Approch by pucca road facilities followed by 5 villages having the facilities Agricultural Credit Societies. Only 3 villages are having facilities of post office. Banking facilities are not available to the villages situated at a distance of less than 5 km. from statutory town. Out of total of 182 villages, 88 villages are situated at the distance of 5 km. to 15 km. from the statutory towns. Of these 88 villages 67 villages are having Educational facilities followed by 61 villages having Transport communication, 58 villages having Approach by pucca road, 56 villages having Medical facility, 50 villages having Agricultural credit societies, 47 villages having Telephone, 39 villages having Post office while only 4 villages having banking facilities. As many as 86 villages are located at distance of 16 km. and above but less than 51 km. from the nearest town. Out of these 86 villages 81 villages are having the Educational facilities followed by 74 villages having Transport communication, 72 villages having Telephone facilities and 68 villages are having the facilities of Medical and Approach by pucca road. Out of these villages only 13 villages are having Banking facilities.

Note : # Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source.' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Percentages are given in brackets.

Table 41 reveals the distribution of villages according to different population ranges and amenities available. Villages having population above and equal to 10,000 have all the facilities. Population range between 5,000 and 9,999 covers only 4 villages which have maximum facilities. Education and power supply facilities are available in all villages of various ranges except in the population range 1-499.Telephone and Transport communication facilities are available in all villages in the range having a population greater than 1,999.

TABLE 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of Taluka/ C.D.Block	Number of Inhabited Villages	Total area (In Hectares)	Percentage of Cultivable area to Total area	Percentage of Irrigated area to Total Cultivable area
1	2	3	4	5	6
1	Porbandar	74	106988.5	67.1	18.8
2	Ranavav	61	38740.3	55.3	13.0
3	Kutiyana	47	53014.5	72.7	22.3
District Total :		**182**	**198743.3**	**66.3**	**18.9**

Note: - Cultivable area = irrigated area + unirrigated area

Table 42 gives the detail about talukawise distribution of villages according to land use. It also gives detail of total area and cultivable area available to the inhabited villages in the district. Cultivated area includes irrigated as well as un-irrigated area.There are 182 inhabited villages in the district having a total area of 198,743.3 hectares. Of this 66.3 per cent is cultivable and 18.9 per cent of total cultivable area has got the irrigation facilities. Looking at the land use pattern at taluka level shows that Porbandar taluka with 74 villages have a total area of 106,988.5 hectares. In Porbandar out of total area 67.1 per cent is cultivable having 18.8 per cent irrigated area. All the 61 villages of Ranavav taluka have a total area of 38,740.3 hectares. Out of this 55.3 per cent of land is cultivable having 13 per cent irrigated area. In Kutiyana all 47 villages have a total area of 53,014.5 hectares. Of this 72.7 per cent is cultivable having 22.3 per cent irrigated area. From the above table it is clear that Kutiyana has the highest percentage of irrigated area followed by Porbandar while only 13.0 per cent of the cultivable area in Ranavav is irrigated.

TABLE 43

PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS (in Rs.)

Sl. No.	Class, Name & Urban Status of the Town	Per capita Receipt			Per Capita Expenditure					
		Total	Through Taxes	From All Other Sources	Total	General Administration	Public Health and Conveniences	Public Works	Public Institutions	Other(S)
1	2	3	4	5	6	7	8	9	10	11
1	III Chhaya (M)	192.5	68.2	124.3	244.4	36.3	60.9	123.3	0	23.8
2	IV Kutiyana (M)	839.1	363.5	475.6	636.1	241.2	150.5	160.7	4.7	79.1
3	I Porbandar (M)*	450.1	296.3	153.7	398.1	100.6	145.7	10.3	35.4	106.1
4	III Ranavav (M)*	163.2	101.2	62	190.4	27.7	37.1	70.8	42.4	12.4
District Total :		**401.9**	**241.4**	**160.5**	**365.3**	**91.5**	**119.5**	**46**	**28.5**	**79.8**

*Towns having Outgrowths.

Table 43 shows detail of per capita receipt and expenditure in statutory towns of the district. The per capita receipt in district is Rs. 401.9 which is made by contribution of Rs. 241.4 through taxes and Rs. 160.5 from all other sources. The per capita expenditure in district is Rs. 365.3. This expenditure is made by spending Rs. 91.5 on General Administration, Rs. 119.5 on Public Health and

conveniences, Rs. 46 on Public Works, Rs. 28.5 on Public Institutions and Rs. 79.8 are spent on other items. Among towns, Kutiyana has reported highest per capita receipt of Rs. 839.1 as well as highest per capita expenditure of Rs. 636.1. It is followed by Porbandar (M) with per capita receipt of Rs. 450.1 and per capita expenditure of Rs. 398.1. Other towns have reported lower per capita receipt and per capita expenditure compared to district figures. The lowest per capita receipt of Rs. 163.2 and per capita expenditure of Rs. 190.4 are reported in Ranavav (M).

TABLE 44

SCHOOLS/COLLEGES PER 10,000 POPULATIONS IN STATUTORY TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Type of Educational Institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chhaya (M)	2.6	0	1.0	0.8	0.3
2	Kutiyana (M)	4.7	0	1.8	1.8	0.6
3	Porbandar (M)*	1.6	0	0.6	0.6	0.4
4	Ranavav (M)*	2.7	0	1.0	1.0	0.0
	District Total :	**2.1**	**0**	**0.8**	**0.7**	**0.3**

Note : In Gujarat State, the levels of education are classified as under

(i) Primary School (From Std. I to VII passed)

(ii) Secondary/Matriculation (From Std. VIII to X passed)

(iii) Higher Secondary (From Std. XI to XII passed). Hence,the middle school is 0.

* = Towns having Outgrowths.

Table 44 shows the availability of schools/college per 10,000 population in statutory town. The data reveals that in urban area of Porbandar district the average number of primary school per 10,000 population is 2.1, followed by secondary/matriculation schools at 0.8, senior secondary schools at 0.7 and the ratio of colleges is only 0.3 colleges per 10,000 population. Among the towns, the ratio of primary, secondary/matriculation and senior secondary schools is highest in Kutiyana and the lowest in Porbandar town except in case of colleges. As regards college, Kutiyana has 0.6 colleges per 10,000 population, which are the highest while the lowest number of colleges per 10,000 population, i.e. 0.3 is found in Chhaya (M).

TABLE 45

NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name And Urban Status of the Town	Number of Beds in Medical Institutions Per 10,000 Population
1	2	3
1	Adityana(CT)	0
2	Chhaya(M)	0
3	Kutiyana(M)	18
4	Porbandar(M)*	29
5	Ranavav(M)*	24
	District Total :	**22**

* = Towns having Outgrowths.

Table 45 gives the detail about the number of beds in medical institutions per 10,000 population in each town of Porbandar district. On an average there are 22 beds per 10,000 populations in urban areas of the district. The highest numbers of beds i.e., 29 beds per 10,000 population in Porbandar town and the lowest numbers of nil beds are in Chhaya and Adityana town.

TABLE 46

PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of The Town	Total Population	Slum Population	Percentage of Slum Population to Total Population
1	2	3	4	5
1	Kutiyana	17,110	11,440	66.9
2	Porbandar	158,856	20,510	12.9
	District Total :	**175,966**	**31,950**	**18.2**

Table 46 gives the detail about the proportion of slum population in towns. It reveals that only Kutiyana and Porbandar towns have slum population. Kutiyana town has about 70 per cent slum population in total population which is the highest in this district.

TABLE 47

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and Urban Status of Town	Most Important Commodity	
		Manufactured	Exported
1	2	3	4
1	Adityana (CT)	Cement	Cement White Clay, Stone Groundnut
2	Chhaya (M)	Soda Ash Cement	Soda Ash Cement Building stone
3	Kutiyana (M)	Ghee	Groundnut Oil Cotton Bales Ghee
4	Porbandar (M)*	Soda Ash Edible Oil	Fish Soda Ash Edible Oil
5	Ranavav (M)*	---	Lime stones Metal Stone

* Towns having outgrowths.

Table 47 indicates the most important commodities manufactured and exported out of the each town in the district. The district is well known for Groundnut, Soda Ash, Cement and Fish. The chief export items of the district are Cement, White Clay, Soda Ash, Lime Stone, Metal, Stone and Groundnut Oil. Soda Ash and edible oil are the main items which are manufactured in Porbandar town and these are mainly exported to other places.

Table 48 details the number of households by tenure status and number of rooms occupied in the district. The total number of households in the district is 105,317 having 54,185 households in rural areas and 51,132 in urban areas. Out of total households, 10,803 households belong to Scheduled Castes and 2,442 belong to Scheduled Tribes. Out of these total households of the district 86,156 (81.8 per cent) households are living in their own houses. 15,521 (14.7 per cent) households are living in rented house and 3,640 (3.5 per cent) households are living in other houses. Of these households, the largest number of households i.e., 52,961 have occupied single room accommodation and are followed by 34,962 household, having two room accommodations. Three room accommodations are occupied by 9,825 households. More than 3 room accommodations are occupied by 6,128 households while 1,441 households are living without any exclusive room in the district. Median number of rooms is found to be greater i.e. 2 in urban areas in comparison to rural areas of the district.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Source: Census of India 2001, H - series : "Tables on Houses, Household amenities and Assets."

Note: Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

Temporary : Temporary houses refers to houses having wall and roofs made of kutcha materials i.e. where grass, leaves, mud, unbrunt bricks, wood etc are used for roofs, reeds, bamboo mud, unburnt bricks are used for construction of walls

Percentages are given in brackets.

Table 49 gives the detail about the percentage distribution of households living in permanent, semi-permanent and temporary houses in the district. As high as 95.2 per cent of households of the district are living in houses made of pucca materials, residences of 3.8 per cent houses are of semi-permanent nature and houses of only one per cent households are made of temporary materials. In rural areas 92.3 per cent households are living in permanent houses followed by 6.4 per cent households living in semi-permanent houses and only 1.4 per cent households are living in temporary houses. As far as urban areas of the district are concerned, 98.3 per cent of households are living in permanent houses and only one per cent of households are living in semi-permanent houses. Comparatively in urban areas houses of permanent nature are found to be more. Only 0.6 per cent of households of urban area are living in the houses of temporary nature.

Among talukas Porbandar has recorded the highest proportion of permanent houses (96.6 per cent) while in Ranavav and Kutiyana the highest of 6.3 per cent of semi permanent houses is recorded. As regards houses of temporary nature Kutiyana has recorded the highest proportion at 1.2 percent.

Source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note: * Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

@ Bathroom means bathroom within the house.

$ Toilet means toilet within the house.

Drainage means closed and open drainage.

Percentages are given in brackets.

Table 50 indicates that 68.4 per cent households in the district have been provided with drinking water supplied either from a tap or a hand pump/tube-well, 92.8 per cent households have the provision of electricity in their houses. The bathroom facility is available to only 50.5 per cent households within their premises. As much as 31.1 per cent households are having bathroom facility in rural areas whereas in urban areas bathroom facility is available to 71 per cent of the household. As high as 90.4 per cent of rural households and 95.4 per cent of urban households have facility of electricity. Toilet and drainage facilities in the district are available to 40 and 34.9 per cent of households respectively. Drainage and Toilet facilities are available to more households in urban areas as compared to rural areas.

Among talukas 78.8 per cent households of Kutiyana taluka have facility of Improved drinking water while 65.5 per cent of households in Porbandar have this facility. 94.7 per cent of households in

Kutiyana and 87.2 per cent households in Ranavav have electricity. As regards bathroom facility 57.1 per cent households in Probandar and 36.1 per cent in Kutiyana has such facility within the premises while 44.8 per cent households in Probandar and 28.5 per cent households in Kutiyana have toilet facilities within their premises.Drainage facility is available to 45.9 per cent of households in Porbandar while only 13.3 per cent households in Ranavav have such facility.

Source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."
Note : Percentage are given in brackets.

The Table 51 gives the detail about the percentage distribution of households by type of fuel used for cooking purposes. There are nine type of fuels used for which data is presented in the table. It is observed that fire wood is the dominant fuel used for cooking and it is used by 31.8 per cent of households. Percentage variation of households using fire wood for cooking is in between 23.9 per cent in Porbandar to 47.5 per cent in Kutiyana. Use of fire wood for cooking is more prevalent in rural areas in comparison to urban areas. Use of Cooking Gas (LPG) is next to fire wood as it is used by 28 per cent of the households in the district. Cooking Gas (LPG) is used by 52.3 per cent of the urban households while in rural areas only 5.1 per cent of the households use LPG for cooking. Thus the use of LPG in urban areas is comparatively more prevalent. As much as 13.4 per cent of households are using kerosene as a fuel in the district. Kerosene as a fuel is used by 20.6 per cent households in the urban areas while in rural areas this fuel is used by only 6.6 per cent of households.

Source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 52 gives the detail about number of households availing banking services and number of households having possession of assets such as radio/ transistor, telephone, bicycle, scooter and car etc. There are 105,317 households in the district. Out of these households 44 per cent households are availing banking services while 39.1 per cent have radio/ transistor. Television is possessed by 44.1 per cent households. Telephone is available in 11.6 per cent households. Bicycle is available to 39.1 per cent households. Scooter/motorcycle/moped and car/jeep/ van are used by 19.7 and 2.4 per cent of households respectively. Considering the talukas in the district, banking services and possession of assets are enjoyed by the highest households in Porbandar and the lowest in Kutiyana.

(viii) Major social and cultural events natural and administrative developments and significant activities during decade :

From the day of Gandhi Jayanti on 2nd October 1997 Government of Gujarat decided to form new districts in the state. Junagadh district was bifurcated and Porbandar was formed as a new district. Porbandar district has three Talukas viz. Porbandar Ranavav and Kutiyana.

Porbandar is known as a useful port for a pretty long time. The lime stone deposits are in abundance at Barda near Ranavav. That has paved way for a big cement factory at Ranavav. There are Soda ash and chemical factories at Porbandar and a thermal power station is also in operation.

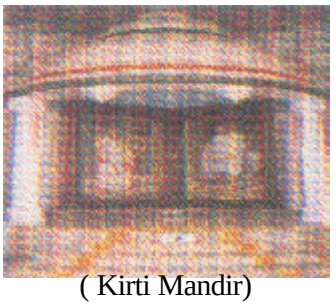

(1) Cyclone in the district

In 1998 Porbandar district was severely affected by the cyclonic storm accompanied by unseasonable rains. The cyclone caused extensive damage to human lives live stock and standing crops. A large number of houses had collapsed or were badly damaged. Extensive damage has also occurred to roads communications industries etc. In order to help the people affected by the cyclone the rescue operations were started by the State Government and NGOs by providing food clothes medicines and other necessary materials. The Government also provided financial assistance to the people in the cyclone hit areas.

(ix) Brief description of places of religious historical or archaeological importance in villages and places of tourist interest in the town of the district:

Name of Taluka : Porbandar
Name of Town : Porbandar
Location Code : 41101000

Porbandar is situated on the shore of Arabian Sea. It is well known throughout India and abroad as the birthplace of the father of the Nation Mahatma Gandhi. It is mentioned in the Hindu scriptures as Sudamapuri because of the friendship of Shree Krishna with Sudama. The town still has a temple dedicated to Sudama. The Kirti Mandir is an imposing

(Kirti Mandir)

structure built 79 feet high to commemorate the birthplace of Gandhiji. The Archaeological Department Government of India has declared it as a protected monument. To perpetuate the memory of Jawaharlal Nehru a planetarium is built here which is the first of its type in Gujarat. Tourism Corporation of the State has considered this place for eligible growth center for tourists.

Name of Taluka : Porbandar
Name of village : Miyani
Location Code : 00781200

(Temple  of Brahmaji)

Miyani is a border village of Porbandar taluka at a distance of 36 kms. north-west of Porbandar. The village was originally known as Milanpur from which it was derivated into Miyani. King Prabhatsingh Chavda who ruled here in the 13th century was fond of building step-wells & temples. The remains of this place are now known as jain temples. There are many old temples of archaeological interest at the village. On one side of the creek is a unique temple of Brahmaji and on its opposite side is the famous temple of Harisiddhi Mataji. The Bhrahmaji's temple is visited by many people from various parts of the country. There is a group of five temples on the north-west besides an old Dargah of Kokan Shah Pir to the north of the village. There are the salt works of the Birlas at the village. The government granted 150 acres of land in 1956 to the Birlas for Salt production. Out of this area salt cultivation is made in about 80 acres at present.

Name of Taluka : Porbandar

Name of village : Visavada
Location Code : 00782900
(Mul Dwarka's Temple)

Visavada is a beautiful village on the sea-shore at a distance of 20 kms. from west of Porbandar. It is known also as Mul Dwarka where Vinzat Bhagat a very devoted worshipper of Lord Krishna once lived. He built an unique temple of Lord Krishna with idols of Shri Ranchchodraiji and Lord Shiva. The place is since then known as Mul Dwarka. A large number of devotees particularly from Rajasthan visit this temple and get the pictures of Lord Krishna embossed on their arms as a token of blessings. The people are fond of horse-breeding. Horse races take place twice in a year. As Mul Dwarka is situated between Dwarka and Somnath all pilgrims who visit these two places usually come here also.

Name of Taluka : Porbandar
Name of Village : Odar
Location Code : 00785500

(Temple of Gorakhnath)

Odar is on the state highway from Porbandar to Veraval about 11 km from Porbandar. It is pilgrim center of the Rabari community who worship Mamai Mata on the outskirts of the village, there is a cluster of old temples mostly in ruins. The Gorakhnath temple is renovated and a regular puja is performed.

Name of Taluka : Porbandar
Name of Village : Balej
Location Code : 00786900

(Pithai Temple)

(Pithai Temple)

Balej is situated at a distance of 42 kms. south of Porbandar the taluka headquarters, the village falls in the Ghed area. It has places of archaeological interest such as Pithai temple dating back to the 11th Century A.D. a stone festoon of pre-Solanki period Mamai Mataji temple (popularly known as Hindolo) of the 17th Century A.D., and the Jain Baleja Parswanathji temple of the 17th Century A.D. The image of Parswanath which is made of sand has emerged from the sea near the village. At a short distance from here is village Bhansare known for its ancient temples of Pandavas believed to have been constructed during the Maitraka period. These temples are declared as protected monuments by the Archaeological Department. There is a temple of Goddess Shakti.

Name of Taluka :Porbandar
Name of Village : Pata
Location Code : 00787500

(Brahm Kund)

The village is situated on the coastal highway nearly 54 kms. south of Porbandar. It has an ancient Surya Mandir or Sun Temple. It is on the bank of the Madhuvanti river at a distance of 5 kms. south of Madhavpur. On the bank of the river Madhuvanti there is a Kund known as Brahma Kund. There is an ancient Ashram of Sage Dadhichi and a step-well known as Gnan Vav. The water in this tank generally does not dry up. Inside a well in the village, there are seats of Sapta Maitrikas. These Maitrikas are family deity of the Sompura brahmins. Two small temples or dehris dating back to the pre-Solanki period are also in the village.

Name of Taluka : Porbandar
Name of Village : Madhavpur
Location Code : 00787600

(Temple of Lord Krishna)

Madhuavpur is situated on the coast of the Arabian sea at a distance of 60 kms. south-west of Porbandar. It is an ancient town with an old temple of Lord Madhavraiji and Trikamraiji. It was named Madhavpur as Lord Krishna after carrying off Rukmini from Kundanpur (Vidarbha) married her at this village. An old Nilkanth Mahadev temple of the 14th century A.D. has been declared as a protected monument. The temple of Madhavraiji built during the 13th Century is about 200 feet above the sea level. On Chaitra Sud-9 Ramnavami a fair with a large congregation mainly of Mer community is held at the temple of Madhavraiji. The place is famous for sandy beaches dotted with coconut plantations. It has thus lovely atmosphere and scenic beauty Tourism Corporation of the State has considered this place for eligible growth center for tourists.

Name of Taluka : Porbandar
Name of Town : Adityana
Location Code : 41103000

(Barda hills)

Adityana is about 5 kms.north-west of Ranavav. It is a Railway Station on the Porbandar-Dhola meter gauge section of the Western Railway founded in the year 1748 A.D. It is surrounded by the forest areas and is quite close to the famous *Barda* hills. In the hills there is a large cave where king – Jambuvan whose daughter Jambuvati had married Lord Krishna is believed to have stayed. The village is known for its quarries of white clay, building stones and lime-stone known as *Makhaniyo Patthar* (butter stone). These limestone quarries are considered best and are very deep which serv three cement factories and one soda ash factory at Porbandar in addition to their supplying limestone to the Tata Chemicals, Mithapur and the Dhrangadhra Chemicals, Dhrangadhra.

Name of Taluka : Porbandar
Name of Village : Bileshwar
Location Code : 00789600

(Bileshwar Mahadev)

Bileshwar is a small village to the east of the Barda hills on the banks of the river Bilva Ganga. It is 5 kms from Sakhpur, the nearest railway station on the Porbandar-Dhola metre gauge section of the Western Railway. The taluka headquarters Ranavav

is 15 kms. north-east of the village. According to a legend Lord Krishna performed *ling puja* with *bili* leaves for seven months. The *ling* on which Lord Krishna used to place *bili* leaves came to be called Bileshwar Mahadev. The Bileshwar temple, belong to therefore, the Maitraka period and is, declared as a protected ancient monument. A fair is held at this place on Shravan Vad 30 (Amas). The village has developed because of the Bileshwar temple. Near Bileshwar there was Fodara Nes, which was acquired for building up a dam over the river Bilwa Ganga or Bileshwari.

Name of Taluka : Porbandar
Name of Town : Kutiyana
Location Code : 41105000

(Temple of Kshetrapa)

Kutiyana the taluka headquarters is situated on the banks of Bhadar river 12 kms. south-east of Saradiya. It was once famous for its bards and poets. The image of Kshetrapal and the Juma Masjid inscription have been declared as protected monuments. The annual Urs, which is held on the 13th 14th and 15th day of the Hijri month of Sabaan the lamps are burnt not with oil but with the water of the step-well. Kutiyana was formerly known as Kuntanpur from the name of Kunti the mother of the five Pandavas.

Name of Taluka : Porbandar
Name of Village : Gokaran
Location Code : 00795400

(Gokarneshwar Mahadev)

Gokaran is a small village about 10 kms. north of Saradiva. The village derives its name from Gokaran the son of a Rishi who read Shrimad Bhagwat at this place for a week for propitiation of his forefathers. On the river bank near the village there is a Shiv temple dedicated to Gokaran which is known as the Gokarneshwar Mahadev temple. Every year on the Bhadarvi Amas. A fair is held at the Gokarneshwar Mahadev temple.

Barda Lion Sanctuary

(Barda Lion Sanctuary)

Gujarat has 22 Sanctuary and national parks. Besides there are three wildlife centers/nature education centers etc. totaling 25 places of wildlife interest. In the Porbandar district there are two important sanctuaries

(1) Barda Lion Sanctuary and

(2) Porbandar Bird Sanctuary.

Barda Lion Sanctuary:

The Barda Lion Sanctuary is about 15 kms away from Porbandar. The sanctuary which is adjacent to Ranavav village is spread over an area of 190 sqkm It has panthers, Neelgais, spotted deers, sambars and other mammals. At present there are few lions in the sanctuary. The best season to visit is November to February.

Porbandar bird sanctuary:

Porbandar town is situated on the sea shore. Inside the city there is a small water spot where bird resides through out the year. Flamingos, ducks, black winged stilts, curlews, teals, white Ibis are found. There are also a number of migratory birds in this one square kilometer water spot.

Source : (1) District Gazetteer, Junagadh.
(2) Tourism Corporation of Gujarat Ltd.,

(x) Major characteristics of the district contribution of the district in the form of any historical figure associated with the district :

Porbandar district is endowed with three economic resources viz. agricultural land fisheries and product of minerals. The district is famous for its groundnut cash crops. Alongwith these other crops such as cotton, bajari, gram, vegetables and other crops are also produced in this district. This district has a 106 kilometer long coastline and has considerable fishing activities of fresh and dry fishes. In addition to minerals productions a major portion of the working class i.e. skilled and unskilled workers are engaged in industries.Minor portion of this district is covered with forests. More than 0.09 of the total geographical area is under forest. The chief forest products are Rayan, Sajad, Gorud Movedi, Timru, Shisham, Amla and Limdo. In this district generally the main community is the Mer. They are mainly engaged in agriculture and cattle-breeding. They intermarry and allow widow marriage, but in other respects conform to Rajput customs. It is very interesting to note that the Mer is only community in Saurashtra among which the women do not keep veils. They are generally vegetarian but occasionally take non-vegetarian food also. The meal includes mainly loaf of bajari, ghee, milk, dal, vegetables, hotch-potch and curry etc. The males put on *Chorni* and *Kediyun,* while the females put on black coloured Odhanu and dark red coloured dhansiyo but at her parent's house they put on white coloured *Dhansiyo,* so that the distinction can be made between daughters and daughter-in-laws of the village. Generally the unmarried girls put on white coloured dhansiyo or ghansiyo. In the matter of ornaments their women put on zumna davasar mohanmala and Pavlarkhi in neck *Vedhla Shisoriya Kioriya* and Pandadiyu in ears. *Saraliya Karandiya* and Chud in hands and Silver *Kadlakari Vinchchiya* on feet. Their male members occasionally put on *Kanthali Fuldi, Champva and Toda or bedi on feet*. The *dandiya-ras* is always associated with the celebration of festivals. In the matter of religion they follow the Shaivism. Gujarati and Kathiyawadi are the local language of the district.

The famous fair of Madhavpur fair of Porbandar region is held on the *sud ninth day* of *Chaitra.* It is held in the memory of the wedding of Lord Krishna with Rukmini. The first day of the fair is devoted to Shri Ganesh. For the marriage ceremony invitation cards are distributed among the people. Fuleka procession is taken out. People recite popular duhas and wedding songs to express their joy. At Madhavpur the fair of camel and horse running competition are held. Owners of the wining camel or wining horse get prizes. Many huts, merry-go-rounds and different games are installed in the fair to entertain the people. One can see the rural people in traditional costumes enjoying the fair.

Contribution of the district in the form of any historical figure associated with the district.

Mohandas Karamchand Gandhi (1869-1948)

Gandhiji was born at Porbandar in 1869 AD. His father Karamchand Gandhi was the minister of the royal family of Porbandar and his home was a mansion near the Darbargadh palace complex. Just next to Gandhiji's home is the Kirti Mandir commissioned to commemorate the birthplace of Mahatma Gandhiji.

Gandhiji went to school at Rajkot where his childhood home is now memorial and to university at Bhavnagar. A plaque outside the Shamaldas Arts College and Sir PP Science institute campus reminds students that Gandhiji was alumni of this 1885 AD university and the Gandhi Smriti in the Barton museum building has copies of his mark sheets.

After spending some time overseas Gandhiji returned to India and soon after that established his Kocharb Ashram at Ahmadabad from where he moved to a new site on the banks of the river Sabarmati in 1917 AD. The Sabarmati Ashram was the launching pad of Gandhiji's many movements including the struggle for freedom from British rule the fight against caste discrimination in India and the swadeshi movement. The Hriday kunj where he stayed has is simple belongings, while Charles Correa has designed a suitable memorial keeping in mind Gandhiji's policy of simplicity and non-possession. In 1921 Gandhiji inaugurated Gujarat Vidyapith which is working on tribal welfare research even today.

Gandhi Ashram was the staging post for Gandhiji's march to Dandi in 1930 AD. The march protesting against the salt act that prevented Indians from earning from salt trade ended at Dandi with Mahatma picking salt from the coastal marshes an act that broke the back of the British Empire in India by inspiring various patriotic uprisings. A memorial and a picture gallery mark the spot where Gandhiji's disobedience act was committed. Gandhiji left Gujarat after the Dandi march and settled in Mumbai Delhi and other cities of India but the Satyagarha self government and village up gradation movements he had installed with the help of Sardar Patel starting with south Gujarat remained alive after his death. In 1942 Ahmadabad was one of the focal points for the Quit India Movement. Gujarat has many Gandhian institutions and ashrams based on his principles today.

Kasturba Gandhi (1869-1944)

Kasturba was the symbol of traditional Indian woman who merged her very existence into the great doing of her husband. The people of India have always regarded her with love and reverence.

Kasturba was born in Porbandar and in the same street where Gandhiji was born. She was six months older to Gandhiji. Those were the days when the girls were hardly imparted education. Kasturba was also deprived of education. She was engaged to Gandhiji only at an age of six and a half years. The marriage took place when she was thirteen.

She went to Africa with Gandhiji in 1896. Gandhiji's life took a great turn in Africa Kasturba also adopted revolutionary changes in her life. It was a tremendous task for her to mend her ways with Gandhiji as the transformation was from the base and also very fast.

Kasturba was imprisoned in Africa in 1983 while resisting the unjust orders of the British. The itinerary of Gandhiji was always full with different obligations. Kasturba took every care of him. She was like a soldier in his crusade. She died during imprisonment on 22nd February 1944.

Shri Kashiram Karasanji Shastri (1882-1963)

Shri Kashiram Karsanji Shastri (Bhambhniya) (1882-1963 A.D.) belonged to Pashvali village of the Kutiyana taluka and hailed from the Bardai Brahmin. He studied in state Pathshala in the year 1901. He was a scholar of the religious scriptures of the Vallabha Sampradaya. He was also a *Kirtankar.* He had published a number of booklet in Sanskrit and Gujarati. Following are some of his published works: (1) Prem Sangeeta and (2) Ras Panchadhyai.

(xi) Scope of Village Directory and Town Directory :

As mentioned earlier, the District Census Handbook is brought out in two parts-Part A and Part B. Part A covers the non-census data of village directory and town directory whereas part B covers the primary census abstract data of 2001 Census. The scope of village directory and town directory is discu-ssed below.

Scope of Village Directory

For the census work, the villages in the district have been arranged taluka wise and within the taluka they are shown location code wise. Each village is

assigned a location code number for the purpose of identification. In 2001 Census, all the villages have been given unique 8 digit code number, which will remain constant across the census, and shall make it easy to do comparative study. Eight digit code's last two digits are especially provided to take into account exigencies arising due to ju-ri-sdictional changes of villages by partition, amalgamation etc. This time it has been kept '00'. Prior to the village directory information, a map and alphabetical list of villages for each taluka is given in Part A. Village directory contains the non-census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition, it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the co-relation of amenities with the number of households and population they serve. If an amenity is not in existence in the referent village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given. The broad range are (-5 kms), (5-10 kms.) and (10+ kms.). Some additional information has been added viz.(1) Number of Banks, (2) Credit Societies, (3) recreational and cultural facilities, (4) Receipt of Newspaper / Magazine, (5) Income & Expen-diture of the village and (6) Name of the three most important commodities imported, manufactured/ produced & exported. One information has been deleted this time, i.e., Market & Hat facility.

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages Taluka wise of the district.
Appendix-I-A	Indicates number of villages Taluka wise having one or more primary schools.
Appendix-I-B	Indicates number of villages Taluka wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages Taluka wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix-IV	Taluka wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates Taluka wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

Scope of Town Directory

Town Directory covers the non-census data for each town. It presents important and useful information like civic and other amenities available in all the towns of the district. The information in town directory is covered in following seven statements, viz. statements I to VII.

Statement-I	Town wise class, name, civic administrative status of the town, its area, growth rates, density and sex ratio.
Statement-II	Physical aspects of each town.
Statement-III	Income and expenditure of each town.
Statement-IV	Civic and other amenities in respect of each town.
Statement-V	Availability of medical, educational, recreational and cultural facilities in each town.
Statement-V	Trade, commerce, industry and banking activities in each town.
Statement-VII	Civic and other amenities in slum areas of each town.

In all the Statement except VII the towns are arranged in the alphabetical order within the district. The details of these statements are given in the analytical portion of the town directory. In addition to the above statements, an appendix showing the towns with their outgrowths with population , is also given after the town directory statements.

PART – A
VILLAGE AND TOWN DIRECTORY

SECTION – I VILLAGE DIRECTORY

Village Directory

(a) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the Taluka / CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school. Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr

(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note : *-There is no Middle school in the Gujarat State.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Cultivable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for

different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages Taluka / C.D. Block wise of the district.

Appendix-I A Indicates number of villages Taluka / C.D. Block wise having one or more primary schools.

Appendix-I B Indicates number of villages Taluka / C.D. Block wise having primary, middle and secondary schools.

Appendix-I C Shows number of villages Taluka / C.D. Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV Taluka / C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII-A VII-B The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates Taluka /C.D. Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village.

		00797600	Devda	1	0	N.A.	N.A.
		00797800	Khageshri	1	0	N.A.	N.A.
		00801400	Maiyari	1	0	N.A.	N.A.
	Total			**4**	0	**N.A.**	**N.A.**
	Grant Total			**13**	0	**N.A.**	**N.A.**

Note : * In Gujarat State, the levels of education are classified as under

(i) Primary (from Std. I to VII passed)

(ii) Secondary/Matriculation(From Std. VIII to X passed)

(iii) Higher Secondary (From Std. XI to XII passed). Hence, details of Col.6 is not shown. So, Middle School is 0.

N.A. : Not Available

SECTION - II TOWN DIRECTORY

Town Directory

(a) Note Explaining The Abbreviations Used In The Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

.**Column 6 to 9 :**

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Classes upto class VII included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class VII.

Classes from VIII to X included in Higher secondary school. Classes XI and XII are included in senior secondary school.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M*
(iii)	Higher Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC

(ix)	Others (specify) e.g. SanskritPathshala, Senior basic school, Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Note : * - There is no Middle school in the Gujarat State.

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

Part – B

PRIMARY CENSUS ABSTRACT

Primary Census Abstract

Brief note on Primary Census Abstract :

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-district, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this

purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Household, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely (i) Cultivators, (ii) Agricultural labourers (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely India, State/Union Territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-

6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town. Tribes Population for each town.

The following Abbreviations have been used in the Primary Census Abstract for facility of presentations:

1	Municipal Corporation/ Corporation	M. Corp.
2	Municipality	M
3	Municipal Council	MCI
4	Cantonment Board/Cantonment	CB
5	Notified Area/Notified Area Committee/Notified Committee	NAC
6	Industrial Notified Area	INA
7	Gram Panchayat/ Village Panchayat	V P
8	Nagar Panchayat/ Town Panchayat	NP
9	Census Town	CT
10	Total	T
11	Rural	R
12	Urban	U

The following conversion factor has been used for converting areas into hectares and hectares into km^2

Acres x 0.40467 = hectares

100 Hectares = 1 Km^2

(1): *These figures represent 'Geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local Bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of talukas will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

(2):# Area of Zavar (part)(OG) is not included.

Source : Village Directory 2001 (As on 31st March ,1999)

Note : { Represents Group Gram Panchayat.

Note: The present Porbandar district is a new district which has been bifurcated from Junagadh District. Government of Gujarat has constituted Junagadh District and created new district Porbandar vide the Government Notification No. GHM-97-84-M-PIR-1097-L dated 24th September, 1997. Thus the new district Porbandar has three talukas namely (1) Porbandar (2) Ranavav and (3) Kutiyana which are transferred from Junagadh District.

The details of undivided Junagadh have been discussed in Annexure II and III. The details of 2001 Census data of Porbandar District have been discussed in Annexure IV, VI, VII and VIII, while Annexure V provides the recast data of 1991 Census and separate data of 2001 Census.

ANNEXURE – II

FERTILITY AND MORTALITY-1991 CENSUS

Fertility Level:

Population is a dynamic variable and keeps on changing. Increase due to birth and decrease due to death affect the population size of an area. Thus the birth and death are the two most important vital events. Natural increase is the excess of population by births over decrease of population by deaths at a given point of time. The births have direct correlation with the fertility.

The data on fertility levels and trends as revealed by the fertility indices of the 1991 Census like Crude Birth Rate (CBR), Age Specific Fertility Rate (ASFR) and Total Fertility Rate (TFR) are presented and analyzed below. The Definitions and concepts of fertility indices frequently used have already been explained in Analytical Note.

Death Rate:

Death process in demographical terminology is called as mortality. The rate at which death events occur reveal about the standard of living and state of health. Statistical data on causes of death help us in controlling the spread of diseases and suggests new curative methods to medical authorities.

Child Mortality:

Information about questions on children ever born and children surviving canvassed for all ever married women was tabulated by age of the mother. From this estimate of child mortality have been worked out by using Brass technique.

	STATE	**33.6**	**4.2**	**5.4**	**136**	**175**	**467**	**571**	**19.0**

Source: Occasional Paper No 1 of 1997.

The Annexure III shows various fertility indicators of all the Districts and State as per 1991 Census. It can be observed that Porbandar (Junagadh) district has Crude Birth Rate (CBR) of 30.9 and Total Fertility Rate (TFR) of 4.0, both of these rates are lower than the State CBR and TFR of 33.6 and 4.2 respectively. Total Marital Fertility Rate (TMFR) General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) of Porbandar (Junagadh) District were 5.7, 124 and 178 respectively, while TMFR, GFR and GMFR of Gujarat State were 5.4, 136 and 175 respectively.

Ratio of the number of births of children in the age group 0-4 and 5-9 years per 1,000 women given above. It can be seen that C.W.R. (0-4) of Porbandar (Junagadh) District was 436, which was lower than the state CWR of 467 whereas C.W.R. (5-9) of the District was 590, which was higher than the State CWR (5-9) of 571.

Mean age at marriage means age (in completed years) at which the woman was married. In case a woman was married more than once, the age at which she was married first, was recorded. The rate of mean age at marriage in Junagadh District in 1991 Census was 19.6 and the same for Gujarat State was 19.0. Thus the rate of mean age at marriage of Junagadh District was higher than that of State.

NUMBER OF CHILDREN EVER BORN AND SURVIVING PER EVER MARRIED WOMAN IN AGE GROUP 45-49, 1991 CENSUS

	STATE	**4.2**	**4.4**	**3.8**	**3.8**	**4.0**	**3.6**

Source: Gujarat State District Profile 1991.

As per above statement there were 4.6 children born per ever married woman in the age group of 45-49 with 4.2 surviving children per woman in Porbandar (Junagadh) District.

ANNEXURE – IV

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH/ PLACE OF LAST RESIDENCE, 2001 CENSUS

Migration

Migration is a factor in changing the size and structure of the population. The migration process affects the areas to which migrants have moved and areas which they have left. Migration is a form of geographical mobility between one geographical unit to another, involving a change of residence from the place of origin/birth to the place of destination or place of new settlement from the last residence. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of birth. Similarly a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence.

Internal and International Migration

The migration movements are of four types –

1. Migration within the district of enumeration (intra-district migration)
2. Migration from one district to another but within the State
3. Migration from one state to another state of the country (inter-state migration) and
4. Migration from one country to another country.

The first three together constitute internal migration while the last type of movement is called international migration.

Migration by place of birth:

As Porbandar District is created from Junagadgh District, the separate data of Porbandar district is not available for 1991 census however the absolute number and percentage distribution of migrants by place of birth in total population at 2001 Census are shown as below:-

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH-2001 CENSUS

Migration By Place of Birth	Gujarat			Porbandar		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Migrants	**18,810,592**	**6,472,393**	**12,338,199**	**159,007**	**47,604**	**111,403**
(A) Migrants born in Gujarat	16,207,961	4,984,992	11,222,969	151,280	43,614	107,666
(I) Migrants born elsewhere in district of enumeration	10,706,177 (56.9)	2,867,391 (44.3)	7,838,786 (63.5)	91,750 (57.7)	26,924 (56.6)	64,826 (58.2)
(II) Migrants born in other districts of the State	5,501,784 (29.2)	2,117,601 (32.7)	3,384,183 (27.4)	59,530 (37.4)	16,690 (35.1)	42,840 (38.5)
(B) Migrants born in other States of India	2,520,676 (13.4)	1,443,465 (22.3)	1,077,211 (8.7)	6,905 (4.3)	3,624 (7.6)	3,281 (2.9)
(C) Migrants born in other countries	81,955 (0.4)	43,936 (0.7)	38,019 (0.3)	822 (0.5)	366 (0.8)	456 (0.4)
(D) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)

Source: Gujarat State-D-Series Tables-2001.

As per 2001 Census there were 18,810,592 migrants in Gujarat whose place of birth was different than the place of enumeration. Out of such migrants, 56.9 per cent were born elsewhere in the District of enumeration, 29.2 per cent were born in other Districts of the state, 13.4 per cent were born in other states of India and 0.4 per cent were born in other countries. As per 2001 Census in Porbandar District, out of total of 159,007 migrants, 57.7 per cent were born elsewhere in the District of enumeration, 37.4 per cent were born in other Districts of the State, 4.3 per cent were born in other states of India and only 0.5 per cent migrants were born in other countries. No migrant was reported under the category of "Unclassified" in state as well as in Porbandar District as per 2001 Census.

INTER STATE IN-MIGRANTS TO GUJARAT STATE AS PER 2001 CENSUS BY PLACE OF BIRTH

Place of Birth	Gujarat		Porbandar	
	Migrants	Percentage to total migrants	Migrants	Percentage to total migrants
1	2	3	4	5
Total Migrants	**2,520,676**	**100.0**	**6,905**	**100.0**
Madhya Pradesh	159,055	6.3	1,011	14.6
Maharashtra	734,945	29.2	1,178	17.1
Rajasthan	471,109	18.7	1,850	26.8
Uttar Pradesh	520,094	20.6	600	8.7
Other States	635,473	25.2	2,266	32.8

Source: Gujarat State-D-Series Tables-2001.

The above statements show migration in Gujarat and in Porbandar District from other states as per 2001 Censuses. It can be seen that as per 2001 census there were 2,520,676 persons in the state who were born in other states of India. Out of such persons 29.2 per cent were born in Maharashtra, whereas the proportion of inter state migrants born in Uttar Pradesh, Rajasthan and Madhya Pradesh was 20.6, 18.7 and 6.3 per cent respectively. The remaining 25.2 per cent were born in other States of India.

As regards Porbandar District, it can be seen that there were 6,905 migrants in this category in 2001.The state-wise distribution reveals that as per 2001 Census out of these 26.8 per cent were born in Rajasthan, followed by 17.1 per cent born in Maharashtra, 14.6 per cent born in Madhya Pradesh and 8.7 per cent of such migrants were born in Uttar Pradesh. The remaining 32.8 per cent were born in other States of India

Migration by place of last residence:

Distribution of migrants by place of last residence in Gujarat and Porbandar as per 2001 Census and percentage distribution of in-migrants from other States to Gujarat by place of last residence are presented below.

ANNEXURE

DISTRIBUTION OF MIGRANTS BY PLACE OF LAST RESIDENCE IN GUJARAT - 2001 CENSUS

Place of last residence	Gujarat			Porbandar (Junagadh)		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total Migrants	**19,221,602**	**6,694,122**	**12,527,480**	**161,516**	**48,668**	**112,848**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**
Last residence elsewhere in the district of enumeration	12,248,452 (63.7)	3,506,051 (52.4)	8,742,401 (69.8)	104,293 (64.6)	30,308 (62.3)	73,985 (65.6)
Last residence in other districts of the State	4,731,665 (24.6)	1,892,862 (28.3)	2,838,803 (22.7)	51,015 (31.6)	15,084 (31.0)	35,931 (31.8)
Last residence in other States of India	2,182,741 (11.4)	1,262,884 (18.9)	919,857 (7.3)	5,628 (3.5)	2,986 (6.1)	2,642 (2.3)
Last residence in other countries	58,744 (0.3)	32,325 (0.5)	26,419 (0.2)	580 (0.4)	290 (0.6)	290 (0.3)
Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)

Source: Gujarat State-D-Series Tables-2001.

There were 19,221,602 migrants by place of last residence in Gujarat according to 2001 Census. The proportion of male and female migrants whose place of last residence was elsewhere within the District of enumeration was 52.4 per cent and 69.8 per cent respectively in 2001.The reason for higher proportion of female migration is marriage. In Gujarat as per 2001 census, out of total migrants, 63.7 per cent of migrants were residing elsewhere in the District of enumeration, 24.6 per cent were those whose last residence was in other districts of the state while last residence of 11.4 per cent migrants was in other States of India and only 0.3 per cent were such whose last residence was in other countries. There were no migrants in the category titled "Unclassified".

In Porbandar District, as per 2001 Census, there were 161,516 migrants by place of last residence. Out of total migrants, 64.6 per cent of migrants were residing such whose place of last residence was elsewhere in the district of enumeration, 31.6 per cent were such whose last residence was in other Districts of the state while last residence of 3.5 per cent migrants was in other States of India and only 0.4 per cent migrants' last residence was in other countries. There were no migrants in the category titled "Unclassified".

Migration by reason:

The following statement gives distribution of migrants by reasons of migration from other States of India.

MIGRATION FROM OTHER STATES OF INDIA BY PLACE OF LAST RESIDENCE IN GUJARAT 2001

States	Total migrants	Reason						
		Work/ employment	Business	Education	Marriage	Moved after birth	Moved with household	Others
1	2	3	4	5	6	7	8	9
Total	**2,182,741**	**660,767**	**204,905**	**12,624**	**370,546**	**134,751**	**577,599**	**221,549**
		(30.3)	**(9.4)**	**(0.6)**	**(17.0)**	**(6.2)**	**(26.5)**	**(10.2)**
Madhya Pradesh	131,745	29,363 (22.3)	11,867 (9.0)	794 (0.6)	27,722 (21.0)	7,221 (5.5)	40,843 (31.0)	13,935 (10.6)
Maharashtra	655,080	139,701 (21.3)	42,719 (6.5)	2,932 (0.4)	142,939 (21.8)	62,145 (9.5)	191,630 (29.3)	73,014 (11.1)
Rajasthan	391,649	80,234 (20.5)	59,938 (15.3)	1,555 (0.4)	82,251 (21.0)	23,145 (5.9)	103,923 (26.5)	40,603 (10.4)
Uttar Pradesh	447,325	179,313 (40.1)	47,179 (10.5)	1,712 (0.4)	53,419 (11.9)	17,296 (3.9)	106,884 (23.9)	41,522 (9.3)
Other States of India	556,942	232,156 (41.7)	43,202 (7.8)	5,631 (1.0)	64,215 (11.5)	24,944 (4.5)	134,319 (24.1)	52,475 (9.4)

Source: Gujarat State-D-Series Tables-2001.

It can be seen form the data given above that the main reason for the migration was "Work/ employment". As much as 30.3 per cent of migrants moved due to work or employment as per 2001 census, this was followed by 26.5 per cent of migration which was due to the reason of "Moved with household". In 2001, the proportion of migration due to marriage was 17.0 per cent. The reason for 9.4 per cent of migration was Business, and 6.2 per cent of migration was due to the reason titled "Moved after birth" and only 0.6 per cent of migration was for Education. The remaining 10.2 per cent of migration was due to other reasons.

ANNEXURE – V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE DISTRICT AS PER 1991 AND 2001 CENSUSES

Religion is the basic cultural characteristics of the population. In secular country like India several religions have thrived and every decennial Census provides an interesting picture of the religious persuasions of the people. The data on religion yielded by the Census are of immense use for the Anthropologists, Sociologists, Demographers, Administrators, and Planners and also for laymen.

The six main religions are i) Hindu, ii) Muslim, iii) Christian, iv) Sikh, v) Buddhist, and vi) Jain were recorded. In respect of 'Others', the actual religion returned was recorded. If a person said that he has no religion, it was recorded accordingly and if any person refused to state his religion it was recorded as 'religion not stated'.

Source: Gujarat State -C-Series Tables-2001.

The above statements show marital status by sex in the state as well as in the district. As per 2001 Census the number of married persons was 24,222,087 (47.8 per cent) in Gujarat and 248,358 (46.3 per cent) in Porbandar. The proportion of never married persons was 47.6 per cent in Gujarat State and 48.9 per cent in Porbandar. The proportion of widowed was 4.2 per cent in the state and 4.3 per cent in the district, while the proportion of Divorced/ Separated was 0.4 per cent in the state and 0.5 per cent in the District.

DISTRIBUTION OF RURAL URBAN POPULATION BY MARITAL STATUS-2001

Sl.No.	Marital Status	Gujarat			Porbandar		
		Persons	Rural	Urban	Persons	Rural	Urban
1	2	3	4	5	6	7	8
1	Never married	24,132,905 (47.6)	15,144,193 (47.7)	8,988,712 (47.5)	262,701 (48.9)	133,258 (48.4)	129,443 (49.5)
2	Married	24,222,087 (47.8)	15,058,801 (47.4)	9,163,286 (48.4)	248,358 (46.3)	128,975 (46.8)	119,383 (45.7)
3	Widowed	2,111,678 (4.2)	1,403,972 (4.4)	707,706 (3.7)	23,213 (4.3)	11,666 (4.2)	11,547 (4.4)
4	Divorced/Separated	204,347 (0.4)	133,801 (0.4)	70,546 (0.4)	2,563 (0.5)	1,561 (0.6)	1,002 (0.4)
5	Unclassified	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)	0 (0.0)
	Total	**50,671,017 (100.0)**	**31,740,767 (100.0)**	**18,930,250 (100.0)**	**536,835 (100.0)**	**275,460 (100.0)**	**261,375 (100.0)**

Source: Gujarat State-C- Series Tables-2001

It can be seen that proportion of never married persons was lower at 47.6 per cent in the state as compared to 48.9 per cent recorded in the District as per 2001 Census. In rural areas the proportion of never married persons was 47.7 per cent in state and 48.4 per cent in the District. In urban areas the proportion of never married persons was at 47.5 per cent in state and 49.5 per cent in the district. As per 2001 Census the proportion of married persons, in rural areas, was 47.4 per cent in Gujarat and 46.8 per cent in Porbandar. In 2001 Census, in urban areas the proportion of married persons was 48.4 per cent in Gujarat and 45.7 per cent in Porbandar. The proportion of widowed was 4.4 per cent in rural areas of the state and 4.2 per cent in the district. The same for urban areas was 3.7 per cent in the State and 4.4 per cent in the district. The proportion of divorced/ separated was 0.4 percent in the State and 0.5 per cent in the Distrcit. There was no population reported under the category titled “Unclassified”.

ANNEXURE – VII

AGE, SEX AND EDUCATION IN THE DISTRICT AT THE 2001 CENSUS

Literacy has occupied an important position in Indian Census in one form or the other from the very beginning. The definition of literates as adopted is "A person who can both read and write with understanding in any language is to be taken as literate". A person who can merely read but can not write was not treated as literate. It is not necessary that a person who was literate should have received any formal education or should have passed any minimum educational standard. All children below the age 7 are treated as illiterate. While processing the literacy data population of age group 0-6 is excluded.

The following statement gives the distribution of literates and illiterates by broad age groups and sex in the district as well as the State at the time of 2001 Census:-

LITERACY BY AGE-GROUP AND BY SEX - 2001

Age Group	Particular	Gujarat			Porbandar		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
7-14	Population	9,091,764	4,814,440	4,277,324	91,942	48,051	43,891

	Literacy rate	(44.5)	(50.0)	(37.4)	(48.8)	(55.3)	(40.4)

Source: All India -C- Series Tables-2001.

It can be seen from the statement that in 2001 the highest proportion of 83.6 per cent literacy rate in Gujarat State is registered in age group of 7-14 years followed by 77.6 per cent in 15-29 years age group. The same trend can be observed in Porbandar District where the highest proportion of 87.0 per cent is registered in the age group of 7-14 years followed by 80.9 per cent in the age group of 15-29 years. The lowest proportion of 39.5 per cent in state and 32.1 per cent in Porbandar District is found in the age group of 60 + years. As per 2001 Census the female literacy rate was lower than that of males in each and every age group in the state as well as in Porbandar District.

LITERACY BY EDUCATION LEVEL-2001 CENSUS

Sl.No.	Education level	Gujarat			Porbandar
