DISTRICT CENSUS HANDBOOK
PART - A & B

BALAGHAT DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

COPPER PROJECT OF MALAZKHAND

Balaghat district situated in south of Jabalpur division of Madhya Pradesh is famous in Asia for the largest formation of manganese stones. There is also largest copper store in Malajkhand area of the district. In addition to this, district is also famous for existence of the natural beauty and wild animals.

According to earlier beliefs, there may be around 50 million ton minerals in Malazkhand area. At present, mining work is being carried on by the Hindusthan Copper Ltd. In addition to Malazkhand, there are a few small mines at Taregaon, Kundikasa, Ras Dongri, Kotbar Kona and Sarai Patera of the district.

(vii) CD Block Map of Paraswada showing Tahsil boundary 234

Alphabetical list of villages of Paraswada CD Block along with location code 1991 and 2001 235-238

Presentation of Village Directory data of Paraswada CD Block 240-267

(viii) CD Block Map of Baihar showing Tahsil boundary 268

Alphabetical list of villages of Baihar CD Block along with location code 1991 and 2001 269-273

Presentation of Village Directory data of Baihar CD Block 274-305

(ix) CD Block Map of Birsa showing Tahsil boundary 306

Alphabetical list of villages of Birsa CD Block along with location code 1991 and 2001 307-310

Presentation of Village Directory data of Birsa CD Block 312-337

(x) CD Block Map of Lanji showing Tahsil boundary 338

Alphabetical list of villages of Lanji CD Block along with location code 1991 and 2001 339-343

Presentation of Village Directory data of Lanji CD Block 344-369

(d) Appendices to Village Directory

Appendix-I : Abstract of Educational, Medical and other Amenities in Villages - CD Block level 370-373

Appendix-IA : Villages by number of Primary Schools 374

Apendix-IB : Villages by Primary, Middle and Secondary Schools 374

Appendix-IC : Villages with different sources of drinking water facilities available 375

Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 375

Appendix-IIA : Census Towns which do not have one or more amenities 376

Appendix-III : Land utilisation data in respect of Census Towns/non-municipal towns 376

Appendix-IV : CD blockwise list of inhabited villages where no amenity other than drinking water is available 377

Appendix-V : Summary showing number of villages not having Scheduled Castes Population 379

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 379

Appendix-VIIA : List of villages according to proportion of the Scheduled Castes to the total population by ranges 380-389

Pages

Appendix-VIIB : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 390-402

Appendix-VIII : Statement showing number of girl schools in the villages 403

Section II - Town Directory

(a) Note explaining the abbreviations used in Town Directory

Town Directory Statements (I to VII) 405-408

(b) Statement-I : Status and Growth History 410-411

(c) Statement-II : Physical aspects and location of Towns 412-413

(d) Statement-III : Municipal Finance 414-415

(e) Statement-IV : Civic and other amenities 414-415

(f) Statement-V : Medical, Educational, Recreational and Cultural facilities 416-417

(g) Statement-VI : Trade, Commerce, Industry and Banking 418-419

(h) Statement-VII : Civic and other amenities in slums 418-421

(i) Appendix to Town Directory : Towns showing their outgrowth with Population 422

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract 425-427

(b) District Primary Census Abstract (General) 428-439

(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population 440-447

Primary Census Abstract for Scheduled Castes 448-453

Primary Census Abstract for Scheduled Tribes 454-459

CD Block wise Village Primary Census Abstract 460-627

Urban Primary Census Abstract 628-645

Annexure-I : Number of villages under each Gram Panchayat (CD Blockwise) 646-702

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 703

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 704-706

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 2001 Census 707-709

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 710

Annexure-VI : Marital status of population as per 2001 Census 711

Annexure-VII : Age, Sex and Education in the district, 2001 Census 712

Annexure-VIII : Distribution of different mother tongues returned in 2001 Census 713

Annexure-IX : Statement of Five Main SC and ST in the District, 1991 census 714

Annexure-X : Hamletwise total population of villages, Census 2001 715-803

Annexure-XI : Statement of Disability in the District, Census 2001 804

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the “total” given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the “total” area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 17th place in the state according to population.

2. The district occupies 9th rank in the state in terms of area having 9,229 sq.km. which is 3.0 percent of the total area of state.

3. Literacy rate of Balaghat district is 68.7 percent and it occupies 11th position in the state. The female literacy rate of the district is 57.2 percent .

4. Density wise the rank of the district is 34th in the state.

5. Ranking of the district according to the sex-ratio is 2nd in the state.

6. Female work participation of the district is 46.4 percent of total female population. Rank of the district according to female work participation is 4th.

7. Population wise largest village is Lanji of Lanji tahsil L.C.No.05531000 with 11,306 population and there are 9 villages having population of just one person.

8. Population wise largest town is Balaghat(M+OG) having population 75,997 and smallest is Hirapur (NP) with 5,641 population.

9. Economy of the district is mainly dependent on agricultureand the district is famous for copper project of Malazkhand.

	Females	1,047,533	11	25,295	7

Note :—Three villages are fully covered as out growths (OGs) and therefore not included under the item, “Number of villages”.

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Balaghat district was constituted during the year 1867-1873 by amalgamation of parts of the Bhandara, Mandla, and Seoni districts. Its name signifies " above the ghats " and is due to the fact that the original purpose of Government in constitution of the district was in effect of the colonisation of the tracts above the ghats. The headquarters of the district was originally called Burha or Boora. Later, however, this name fell into disuse and was replaced by "Balaghat", which was originally the name of the district only.

Early history of the district is more or less obscure. According to District Gazetteer, the earliest authentic tradition relates to a race of Haihayas, ruling at Lanji or Lanjika; these belonged to the line of Haihaya kings who ruled at Ratanpur in Bilaspur district and at Tripura in Jabalpur district. Even at that time, the territories comprised in the district had a cosiderable Gond and other tribal population. Tradition says that Jadu Rai, (Yadu Rai) the traditional founder of the Garha Mandla Gond dynasty was in the employ of the Lanji kingdom before he migrated to Garha. In course of time, the Gonds established their sway over the territories now comprised in the district. Jarret's Ain -i-Akbari (ed. 1891, Vol II page 200) gives Lanji, Karola and Dungarola as three *mahals,* of the Sarkar of Kanauj, inhabited by Gonds. The Raigarh tract, the Baihar Paraswara Plateaus, the low country of the Hatta, Dhansua and Lanji east of Wainganga apparantly formed part of the Gond kingdom of Garha Mandla till the extinction of the dynasty in 1780, when the Sagar Marathas (under the Peshwa of Poona) occupied it. In 1798, this territory was ceded by the Sagar Marathas to the Bhonsla ruler of Nagpur in consideration of payment of Rs. 26 lacs . The western portion of the district consisting of the low-lands on the west of the Wainganga was under the sway of the Gond rulers of Deogarh (Chhindwara district) till its conquest in 1743 by the Bhonsla ruler of Nagpur.

In 1881, all the above ghat portion of the district ,the Mau taluk and the Karola and Katangi Parganas were ceded to the British . The remaining portion of the district remained with the Bhonsla ruler as British protectorate.

The present district of Balaghat was at first included in the Seoni and Bhandara districts; the former also including the present Mandla district. It was constituted a separate district subsequent to the tract. In 1867, a new district comprising most of the present Balaghat district was formed "consisting, to the north , of the plateau talukas of Paraswara, Bhimlat, Topla and a part of Raigarh -Bichhai, and to the south, of the *parganas* of Dhansu, Lanji and Hatta and some other Zamindaris." The talukas of Seoni district were made into a separate tahsil covering an area of 1,268 square miles with its headquarters first at Paraswara and then at Baihar. The Bhandara portion of the district headquarters being located at the village Burha (present Balaghat) in Dhansua *pargana*. In 1871, the formation of the district, as then constituted, was sanctioned . In 1873,the greater part of the Katangi tahsil of the Seoni district was transferred to Balaghat district and made part of the Burha tahsil, the Zamindaris of Salhtekri and Chauria on the extreme east of that tahsil being given over to

the Baihar tahsil . This composite district is consisting with an eye on the colonisation of the Baihar uplands .

(iii) Administrative set up

Balaghat is located in the extreme south-west of the state. The district is divided in to 6 tahsils viz. Katangi, Waraseoni, Balaghat, Kirnapur, Baihar, Lanji, and 10 community development blocks which are Katangi, Khairlanji, Lalbarra, Waraseoni, Balaghat, Kirnapur, Paraswada, Baihar, Birsa and Lanji. Tahsilwise number of villages as per Census 2001 are Katangi 133, Waraseoni 273, Balaghat 167, Kirnapur 149, Baihar 503 and Lanji 165. Thus the total number of villages in the district is 1390.The district contains 9 towns namely Katangi (NP), Tirodi (CT), Waraseoni (M), Hirapur (CT), Bharveli (CT), Balaghat (M), Baihar (NP), Malajkhand (M) and Ukwa (CT).

During the decade 1991-2001, Kirnapur has come up as a new tahsil in the district . It is formed by carving out 149 village earlier belonged to Balaghat tahsil. Three new towns have been added in the district during the decade. These are (i) Malajkhand (M), (ii) Hirapur (CT), and (iii) Bharveli (CT).

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of district administration is the key functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

He is the chief executive officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various departments, controls over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in time of emergencies like floods, famine and epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main functions, viz.(i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) Development.

The Collector is assisted by deputy Collectors, tahsildars, *naib* tahsildars, revenue inspectors and *patwaris*. The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under excise act, to implement the excise and prohibition policy of the Government Superintendent of Police is the head of police department at the district headquarters, In order to facilitate proper and smooth Judicial by and administration there are 21 police stations 16 outposts in the district.

The Judiciary is independent. At the district level, there is district court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges posted at tahsil level.

(iv) Physical features

Balaghat is one of the southern district of Jabalpur revenue division. The district spans in a rough quadrangle extending over a degree from 21°20' to 22°24'. North latitudes and measuring in length, about 170 km. south-west to north -east. Longitudinally the district lies between 79° 31' and 81° 03' East. The total area is 9,229 sq. km and the area wise rank of the district is 9th in the state .

The district is bounded by Mandla district in the north, Bhandara district of Maharashtra State in the south, Rajnandgaon district of Chhattisgarh State in the east and Seoni district in the west. The Wainganga separates the district from Seoni in the north-west while again the Wainganga and its tributaries, the Bawanthadi and the Bagh, define the inter-state boundary in the south. Tanda and Banjar streams flowing at the foot of the Chilpighat mark the eastern boundary.

Physiography

The conspicuous features of the configuration are the two high plateaus one above the other in the north-east which along with the third notable features, the Wainganga valley in the west explain the topography of the district . The Wainganga river, flows from north to south through the western part of the district. The higher plateau, i.e., the Raigarh plateau in the extreme north-east, is separated from the lower plateau, the Baihar plateau by the Bhaisghat ridge. The average hight of the Raigarh plateau is about 2300'-varying

between 2100' and 3000'. Many of the hills in it are flat topped, of Deccan trap formation. The ridge has steep scraps facing south, it extends along the southern edge of the Raigarh plateau. The Sonawani hills along the north western boundary may also be mentioned as a small separate block of hills.

The lowland country consist of the parts of the Balaghat and the Waraseoni tahsils, and varying between 16 to 48 km. in width runs almost parallel with the outer range of the Satpuras that forms the southern fall of the plateau. To the west of this lies the upland of the Seoni a portion of which justs into the north eastern part of Waraseoni. Roughly, one third of the district lies in the lowlands and about two-thirds on the plateau and the hills.

Rivers

The hills to the south of the plateau form a watershed between the Narmada river on the north and the Wainganga to the south . The principal river belonging to the Narmada system are Banjar, Halon. Jamunia, Tanner and Kanhar . The Banjar enters the district from Raipur district in the East, and flowing north and west through the main plateau into the Mandla district . The Jamunia and Tannar drains portion of the main plateau and fall into the Banjar in the district . The Halon with its tributaries the Rauni, Gordhauni, Kashmir and Gendla, flowing from south-east to north-west drain the Raigarh plateau . It joins the Burhner river in Mandla district.

Wainganga river entering the district at its north western corner from the Seoni district, forms the boundary between that district and Balaghat district; and flowing south through the lowlands enter the Bhandara district . The only river of any significance to the east of the Wainganga its tributary Surathi . The country to the east of the Wainganga is drained by Bagh, with its tributaries Deo, Son and Ghirsi, all of which have their sources in the hilly country to the south of the Baihar tableland. The Bagh enters the district from Bhandara, forms the south western boundary of the district from Bhandra hill to Waingana till it joins at Borinda . The Nahara and Uskal rivers drain the Dhansua forest and the open country around Charegaon and then join Wainganga near Chacheri .

Climate

The climate of the district shows variation owing to differences in its elevation. The lowland plains have a hot climate-which is oppressive throughout the months of April, May and June. The Baihar plateau is cooler than the lowlands and the still higher Raigarh plateau is even more cooler. The uplands are very cold in winter. The climate of the district is also chracterised by general dryness except during the monsoon months. The cold season from December to February is followed by the hot season which continues upto the beginning of June. The south-west monsoon season is from June to September, October and November constitute the post monsoon or retreating monsoon season. The average annual rainfall of the district recorded is 1602.8 mm. About 89 percent of the total annual rainfall occurs during the south-west monsoon season. July experiences the maximum rainfall. The temperature starts increasing gradually after February. May happens to be the hottest month of the year when the highest daily mean temperature is 40^0Celsius and the minimum mean temperature remains at 25^0Celsius. The temperature starts falling after October. During December the highest daily mean temperature happens to be 26^0Celsius and the minimum mean temperature remains at 10^0Celsius. Winds are generally light in the district. During the south-west monsoon season winds blow generally from the west or south-west. During the period from October to February winds blow mostly from direction between north and east. In the summer season ,while the winds are light and are from the north-east in the mornings, these are stronger in the afternoons being mostly from direction between west and north.

Forest

Balaghat district is rich in forest wealth.About 52 percent of the area is covered with forest. The north-east and the northern part of the district have very dense forests. Teak is the important species found in the forests of the district. Tinsa(Ougenia Dalbergoides) is an important associate of teak in teak forests. Other important species found in the forests of Balaghat district is *Sal*. The Sal forests are found mostly in the eastern part of Baihar tahsil. Other species found in the forests are : *Saja* (Terminalia Tomentosa), *tinsa*,

dhaura (Anogeissus Latifolia), *lendia* (Larger Stroemia Parviflora), *tendu* (Diosporus Melonoylon), *aonla* (Emblica Officinaes), *achar* (Buchanania Lanzan), *bija* (Pterocarpus Mursupium), haldu (Adina Cardifolia), *harra* (Terminalia Chebula), *baheda* (Terminalia Beterica), salai (Boswelia Serrata) *palas* (Butea Frondosa), *semal* (Saimalia Malaberica), etc. Bamboo is also found in most of the forests.

Wildlife

The thick forests in the district provide an ideal abode of wildlife and the north Balaghat division had once been a veritable paradise of wild game. With the promulgation of the M.P. Games Act 1962 shooting has been completely stopped but due to gradually increasing pressure of population and expantion of agriculture, the number of wildlife has been greatly reduced.

Among the carnivorous fauna, tiger (Fellistigris), panther (Felis pardus), wild dogs (Know rulilons), bear (Melinus is ursinus), wolf (canis pallipes), are found in the thick forests of the district. Jackal, fox, hyena and wild cats are also found in the forests. Hare, monkeys, mongoose, poracupine are among the herbivorous animals which are commonly met within the forest of the district. Chital, *sambhar*, *barasingha*, *hiren*, *chausingha*, *nilgai* etc. are also found but they are not numerous.

Along with the Kanha National Park in Mandla, a sanctuary of about 300 sq.km. was created in 1935 in the east of the Park around Supkhar in the Halon valley of the district. This sanctuary has also variety of fauna.

Mining and minerals

Balaghat district occupies a pride place on the mineral map of India . About 80% of the manganese production of the country comes from Balaghat . The recent discovery of copper deposit at Malajkhand is regarded as the largest deposit in the entire nation. Over and above this Bauxite, Kyanite and limestone are the other main minerals of the district . The main manganese mine of the district is located at village Bharveli which ranks first among all public sector underground mines in entire Asia . The production target of this mine is 1,50,000 tonnes of manganese ore and 10,000 tonnes of Ferro manganese every year. Similarly the Malajkhand Copper Project located at about 90 km from Balaghat is the largest open cast mines in Asia, the production capacity of which is 20 lakh tonnes of copper ore every year.

Soil

The most fertile soil in the district, though small in extent, are the alluvial lands on the banks of Sons and Deo rivers in the eastern part of the low-land is generally superior to the soil in the Baihar and Raigarh tablelands . In the low-lands the soil is of greater depth and fertile, while the mica particles in the tableland soil tend to reduce its fertility . Next to the Son and Deo alluvium referred to earlier the most fertile soils lie to the east of Wainganga in the lowlands extending to the south from Dhansua hills to the Bagh river . It is of good depth, and is rich in black and brown soil of superior quality. A part from this Dhansua and Hatta tract, brown soil of good quality is found in the north Karola tract to the west of the Wainganga and the ex-Bhadra Zamindari in the extreme south-east . Good rice soil, though of medium quality occurs in the Katangi, and south Karola track west of the Wainganga in Waraseoni tahsils and about Lanji and Kirnapur in Balaghat tahsil to the east of the Wainganga . In the lowlands, poorer soil are met with at the base of the hills.

In the plateau region consisting of the Baihar tahsil, and the eastern portion of Balaghat tahsil, the prevailing soil is from medium to poor in quality . There is hardly any black soil, while the better brown soil is found occasionally in the Mau-valley to the north-west, and as scattered plots in the depression or shallow valleys which form an important feature of the tableland . The proportion of good-brown soil is considerable in the Raigarh plateau to the extreme north-east .

Land Utilization

In the year 1998-99 the total reported area of the district was 9229sq.km. About 52% of the land is under forest in the district . It appears that Balaghat has less area under cultivation and its forest area is proportionately greater. During 1998-99 the land reported under different uses was forest 1,13,298 hectares, non-agricultural use 55745 hectares, barren and uncultivable land 33051 hectares, land under agricultural use 27839 hectares and fallow land 29108 hectares.

Irrigation

Canals and tanks are chief sources of irrigation . Canals are all owned by the Government, of these the main canal system in Waraseoni tahsil has the maximum irrigation potential. Tanks are mostly in the plains of the district . These were previously managed by the Revenue department . Now the smaller ones are transferred to the Gram panchayats for *nistar* purpose. Most of the tanks lies in the western plains and the largest ones along the foothills. Some of the prominent tanks are Sarrathi, Mahalesara, Gangulpara, Muramuda, Chanwarpani, Jamunia, Jalgaon and Kharadi tanks .

Animal husbandry

The principal categories of livestock found in the district comprise cattle, goats and buffaloes . Cattle are the most numerous category accounting for 574,033. Goat comes next with 179,177 and buffaloes occupy the third position accounting for 134,481 during 1997-98. Cattle of the district are of non- descript breed. They do not conform to any specific breed . Veterinary department is speeding up the cattle development work through cattle Breeding Farms and distribution of pedigree bulls to Gram panchayats .

Fishery

The district abounds in rich resources for the development of pisciculture comprising of several tanks, streams and rivers. Among the different varieties of fish found in the district are *Catla*, rohu, *mrigal* and *calbasu*, these belong to the Gangetic river system but they flourish in tanks as well. *Jhinga* is found in the Wainganga . It is caught in abundance in villages like Burhighat, Bhandara, Bhagori, Gogle and Piparia, situated on the bank of the rivers.

Industry

Balaghat has rich mineral deposits paticularly of manganese and copper. As such the district has industries based on these minerals. Among the most prominent Public sector large scale industry is Hindustan Copper Ltd, Malajkhand. This project was launched on 12th Nov. 1982, which now employs 1,295 workers. Yet another Public sector undertaking is Manganese Ore (India) Ltd, Bharveli which is the largest underground manganese mine of Asia. The project has annual production capacity of 150,000 tonnes of manganese ore and 10,000 tonnes of ferro manganese. A part from these 2 public undertakings the district has 5 medium scale industries. These are (1) M/S Narmada Plastic Pvt Ltd. Rajegaon, (2) M/S Rukmani Solvex Pvt Ltd Rajegaon,(3) M/S Choradia Edible oil Pvt. Ltd Katangi, (4) M/S Balaghat steel Pvt. Ltd - Rajegaon and (5) M/S Mok Fero Allies, Bharveli. The district has 85 rice mills, 130 *poha* mills, 42 units of Manglore pattern tiles, 9 units of store crushing and hume pipes . Other small scale Industries includes units of marble and granite tiles, herolling mill, steel furniture, mosaic tiles varnish, ceramic hollow blocks and furniture, plastic rope and other plastic goods, steel engineering work shop . The district has a suburban industrial estate, Balaghat spread in an area of 5.95 acres and 3 industrial sheds. Another industrial area is at village Garra spread in an area of 16.05 acres. It is about 4 km. from Balaghat town on the bank of river Wainganga.

Trade and commerce

Most of the exports of the district consist of wood, bamboo, rice and manganese. Iron, cement, sugar and oil are the main items of imports. Bulk of the trade and commerce activities in rural areas of the district takes place in periodical *bazaars* and also in urban areas of towns. All the tahsil headquarters, banking and *mandi* centre in the district have wholesale and retail markets. The important bussiness centre in the district are Balaghat, Waraseoni, Baihar, Katangi, Lalburra, Mohgaon, Langi, Changatola, Tirodi and Lamta. Manganese ore is the most important commodity which is exported from the district. As the district is rich in forest, number of saw mills are located in the towns of the district. Paddy is the most important crop grown in the district. The district produces some best quality rice and thus it is exported outside the district.

Transport

The district is well connected by bus, directly with important places such as Bhopal, Nagpur, Gondia, Jabalpur, Raipur etc. The district headquarters is situated on narrow gauge line of Jabalpur - Gondia section of the South Eastern Railway. The nearest broadgauge railway station is Gondia. The nearest airport is at Nagpur. The length of pucca road was 2,131.50 km.

and the length of kachcha road was 3,089 km. in the district during 1997-98.

Electricity

According to an estimate there were 130,990 consumers in the district in 1997. Out of the total consumers the domestic consumers were 77,338, Commercial consumers 6,983, C.T industrial consumers were 14,322 and H.T. Industrial consumers 66,875. The total number of electrified village were 1,166 as on March 1997.

Gram Panchayat

Panchayat is the basic institution of local administration and is the foundation of decentralized administration. Under the Directive Principles of State Policy, the Constitution of India provides the Panchayati Raj System. M.P. Government passed M.P. Panchayat Adhiniyam System. Under the 73rd Amendment of the Constitution, M.P. Government passed the panchayat Notification 1993 which provides Panchayat for villages, Janpad panchayats for blocks and district panchayat for district. As per M.P. Gram Sabha Notification, 2001, Gram Sabha is constitutionally approved unit which includes all the major persons and gives voting rights to elect Panch, Sarpanch, members of Janpad and members of district panchayat. The Gram Sabha has power to approve works under annual budget of the village. Constituted with the elected members, these institutions work for 5 years. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is 1/3 reservation. Village panchayat, Janpad panchayat and district panchayat have members 10-20, 10-25, 10-35 respectively.

Gram Panchayat within its area and within its budget, can take up work like cleanliness, water supply, public works(roads, buildings, well tanks) market rates, co-operation to Government works, community health and development works. Janpad panchayat within its budget take up works, like community development and village integration, agriculture, social, commerce, cattle-rearing, fish-breeding, adult-education, co-operatives, cottage industry, welfare and employment oriented programme. It is the duty of the district panchayat to have control over Janpad panchayats and village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works. All the development works of the villages are done by one district panchayat and 665 Gram Panchayats.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud,

plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together

were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States

Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra

7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil)Panna,Rewa,Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia
    (i) Chhindwara, Mandla, Dindori and Seoni districts
    (ii) Baihar tahsil of Balaghat district
    (iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
    (iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
    (v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
    (vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
    (vii) Narsimhapur district.
    (viii) Harsud tahsil of Khandwa district.
41. Parja
42. Sahariya, Saharia, Seharia, Sehria, Sosia, Sor
43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that

the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is

impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current

fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

  (a) Migration within the district of enumeration (intra district migration)

  (b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Balaghat district comprises of 1285 inhabited villages, 105 uninhabited vilages and total 1390 villages distributed among 6 tahsils and 10 number of CD blocks. The district has 9 towns. The average household size of the district is 5.3. Total population of the district is 1,497,968 comprising 740,749 males and 757,219 females. Thus the sex ratio of the district works out to 1022 which is higher than the sex-ratio of the state (919). Density of the district is 162 persons per sq.km. and is lower than the density of the state which is 196. Literacy rate of the district 68.72 per cent is also higher than the State literacy rate 63.74 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 7.75 per cent and 21.8 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census

2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/ urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Katangi	154,246	132,226	22,020	166,353	142,741	23,612	7.8	8.0	7.2	14.3	14.2
2	Waraseoni	412,248	391,491	20,757	443,845	419,088	24,757	7.7	7.0	19.3	5.0	5.6
3	Balaghat	207,808	140,657	67,151	236,605	145,798	90,807	13.9	3.7	35.2	32.3	38.4
4	Kirnapur	141,787	141,787	-	154,407	154,407	-	8.9	8.9	0.0	0.0	0.0
5	Baihar	302,119	282,260	19,859	337,182	282,386	54,796	11.6	0.0	6.6	6.6	16.3
6	Lanji	147,662	147,662	-	159,576	159,576	-	8.1	8.1	0.0	0.0	0.0
District Total:		1,365,870	1,236,083	129,787	1,497,968	1,303,996	193,972	9.7	5.5	9.5	9.5	12.9

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 9.7 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 5.5 per cent, while for urban areas it is 9.5 per cent. Among the tahsils, Balaghat has registered the highest decadal growth rate of 13.9 per cent. The growth rate in rural area is highest in Kirnapur tahsil and it is highest in Balaghat for urban area of the district. The percentage of urban population to total population of the district is 12.9 per cent in 2001 against 9.5 per cent in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Katangi	125	142,741	70,433	72,308	14 (11.2)	557	573

	Districts (Rural) Total:	146 (11.4)	195,231	200,381	5 (0.4)	14,089	13,661	1 (0.1)	5,703	5,603

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1285 inhabited villages, 172 (13.4 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 265 villages having 20.6 per cent villages of the district while in the size class of 500-999 population there are 333 villages constituting 25.9 per cent of total villages. 363 villages (28.2 per cent) are in the size class of 1000-1999 and 146 villages (11.4 per cent) are in the size class of 2000-4999. There are 5 villages (0.4 per cent) in the size class of 5000-9999 and only one village (0.1 per cent) falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town

1 Malaykhand(NP)

(ii) Census town

1 Bharveli

2 Hirapur

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

Nil

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

Nil

(iii) Census towns of 1991 census are notiified as statutory town in 2001 census

Nil

(c) Declassified

Nil

(d) Wholly merged with other town(s)

Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	47	3.7	2,977	0.2
11-20	18	1.4	3,480	0.3
21-50	81	6.3	25,237	1.9
51-100	144	11.2	57,415	4.4
101-200	301	23.4	197,921	15.2
201-300	279	21.7	308,207	23.6
301-500	332	25.8	524,392	40.2
501 +	83	6.5	184,367	14.1
Not known	-	-	-	-
District Total:	1,285	100.0	1,303,996	100.0
Population Density (Rural) of the district:			208.3	

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 332 accounting for 25.8 per cent of the total inhabited villages of the district fall in the density range of 301-500 persons having 40.2 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 65 villages (5.1 per cent). 83 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 47.5 per cent of the total inhabited villages having 63.8 per cent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 6.3 and 11.2 per cent of inhabited villages. Both these ranges claim 6.3 per cent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	1,065	1,066	1,036
1911	967	973	903	1,037	1,037	1,019
1921	949	959	863	1,032	1,033	927
1931	947	957	862	1,028	1,031	903
1941	946	957	869	1,021	1,023	964
1951	945	953	902	989	990	968
1961	932	947	860	1,009	1,016	904
1971	920	934	864	1,000	1,006	924
1981	921	934	878	1,006	1,015	917
1991	912	921	887	1,002	1,009	937
2001	919	927	898	1,022	1,030	970

As per 2001 Census, sex ratio of 1,022 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly higher , except in 1951 it is over thousand for concerning census years and much above the state average figures. The lowest sex ratio of 989 females per 1,000 males was recorded in the district in Census 1951.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Katangi	1,023	1,027	1,000
2	Waraseoni	1,027	1,030	976
3	Balaghat	994	1,023	948
4	Kirnapur	1,026	1,026	-
5	Baihar	1,028	1,035	991
6	Lanji	1,036	1,036	-
	District Total:	1,022	1,030	970

The table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 1,030 whereas it is 970 for the urban area. The sex ratio in rural area is highest (1,036) in Lanji tahsil whereas in urban area it is highest (1,000) in Katangi tahsil. The sex ratio of the district is 1,022 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Katangi	1,027
2	Khairlanji	1,034
3	Lalbarra	1,031
4	Waraseoni	1,025
5	Balaghat	1,023
6	Kirnapur	1,026
7	Paraswada	1,046
8	Baihar	1,032
9	Birsa	1,030
10	Lanji	1,036
	District (Rural) Total:	1,030

The table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 1,030 females per 1,000 males. Among the CD Blocks the highest sex ratio of 1,046 is found in Paraswada CD Block and the lowest of 1,023 is recorded in Balaghat CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	28	2.2	191	0.0
700-749	2	0.2	219	0.0
750-799	5	0.4	458	0.0
800-849	13	1.0	2,836	0.2
850-899	40	3.1	18,453	1.4
900-949	68	5.3	49,653	3.8
950-999	245	19.1	321,662	24.7
1000-1099	631	49.1	750,485	57.6
1100+	253	19.7	160,039	12.3
District Total:	1,285	100.0	1,303,996	100.0
Sex ratio (Rural) for District:			1,030	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 631 accounting for 49.1 per cent of the total villages having largest population of 57.6 per cent in the district fall in the sex ratio range of 1000-1099. It is followed by 253 villages constituting 19.7 per cent of total villages and 12.3 per cent population falling in the range of 1100 plus. It is seen that the percentage distribution of population in the adjoining ranges of the range having maximum sex ratio increases with the increasing range.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Baihar	NP	966
2	Balaghat	UA	940
	(i) Balaghat	M	940
3	Bharveli	CT	982
4	Hirapur	CT	1,000
5	Katangi	NP	986
6	Malajkhand	M	1,000
7	Tirodi	CT	1,023
8	Ukwa	CT	1,006
9	Waraseoni	UA	976
	(i) Waraseoni	M	977
	Sex ratio (Urban) for the district:		970

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 970 females per 1,000 males as a whole. Among the 9 towns of the district the sex ratio varies between 940 to 1023. Tirodi (CT) has the highest sex ratio 1023 while Balaghat (UA) has the lowest sex ratio of 940 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Katangi	Total	24,874	12,710	12,164	957
		Rural	21,565	10,958	10,607	968
		Urban	3,309	1,752	1,557	889
2	Waraseoni	Total	65,881	33,607	32,274	960
		Rural	62,867	32,051	30,816	961
		Urban	3,014	1,556	1,458	937
3	Balaghat	Total	33,603	16,987	16,616	978
		Rural	22,485	11,241	11,244	1,000
		Urban	11,118	5,746	5,372	935
4	Kirnapur	Total	23,886	12,177	11,709	962
		Rural	23,886	12,177	11,709	962
		Urban	-	-	-	-
5	Baihar	Total	58,286	29,475	28,811	977
		Rural	50,536	25,553	24,983	978
		Urban	7,750	3,922	3,828	976
6	Lanji	Total	24,378	12,398	11,980	966
		Rural	24,378	12,398	11,980	966
		Urban	-	-	-	-
	District Total:	Total	230,908	117,354	113,554	968
		Rural	205,717	104,378	101,339	971
		Urban	25,191	12,976	12,215	941

The table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 968 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 971 and 941 respectively. The rural sex ratio in tahsil varies between 961 in Warseoni tahsil to 1000 in Balaghat tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Katangi	21,565	10,958	10,607	968
2	Khairlanji	20,383	10,435	9,948	953
3	Lalbarra	22,724	11,596	11,128	960

District (Rural) Total:		205,717	104,378	101,339	971

Table 11 gives CD Blockwise sex ratio of rural population in the age group of 0-6 years in the district. The sex ratio is 971 for the district (rural). The sex ratio of CD Block varies between 953 to 1000. It is highest in Balaghat CD Block and lowest in Khairlanji CD Block.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distri-bution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	104	8.1	3,529	1.7
700-749	58	4.5	6,058	2.9
750-799	66	5.1	8,591	4.2
800-849	104	8.1	18,011	8.8
850-899	129	10.0	28,469	13.8
900-949	129	10.0	26,149	12.7
950-999	115	8.9	27,539	13.4
1000-1099	246	19.1	46,611	22.7
1100+	334	26.0	40,760	19.8
District (Rural) Total	1285	100.0	205,717	100.0
Sex ratio (Rural) for District:			971	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e.334 (26.0 per cent) having largest population (19.8 per cent) in the district (rural) fall in the sex ratio range of 1,100 and above. It is followed by the sex ratio range of 1,000-1,099 which claims 246 villages (19.1 per cent) and 22.7 per cent population. Next to it 129 villages (10.0 per cent) in the range 850-899 and 1.7 per cent population is in the range of less than 700. Minimum number of villages i.e. 58 (4.5 per cent) and 2.9 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Balaghat	UA	8,845	4,576	4,269	933
	(i) Balaghat	M	8,702	4,503	4,199	932

6	Lanji	Total	159,576	10,757	28,991	6.7	18.2
		Rural	159,576	10,757	28,991	6.7	18.2
		Urban	-	-	-	-	-
	District Total:	Total	1,497,968	116,070	326,540	7.7	21.8
		Rural	1,303,996	96,741	297,906	7.4	22.8
		Urban	193,972	19,329	28,634	10.0	14.8

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 149,7968 total population of the district 7.7 per cent belong to the Scheduled Castes and 21.8 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 7.4 per cent in rural population and 10.0 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Katangi tahsil (11.0) while the lowest is found in Baihar tahsil (3.6). The proportion of Scheduled Tribes population is 22.8 and 14.8 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Baihar tahsil (53.7 per cent) and the lowest Scheduled Tribes population is recorded in Kirnapur tahsil (7.7 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Katangi	142,741	15,171	19,894	10.6	13.9
2	Khairlanji	133,749	13,637	9,691	10.2	7.2
3	Lalbarra	152,107	10,508	20,514	6.9	13.5
4	Waraseoni	133,232	14,824	16,064	11.1	12.1
5	Balaghat	145,798	10,694	27,182	7.3	18.6
6	Kirnapur	154,407	13,404	11,933	8.7	7.7
7	Paraswada	83,607	2,999	43,144	3.6	51.6

9	Birsa	106,168	2,728	57,256	2.6	53.9
10	Lanji	159,576	10,757	28,991	6.7	18.2
District (Rural) Total:		1,303,996	96,741	297,906	7.4	22.8

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 7.4 per cent of rural population of the district belongs to Scheduled Castes and 22.8 per cent to Scheduled Tribes. Scheduled Castes population is highest (11.1 per cent) in Waraseoni CD Block whereas it is lowest(2.2 per cent) in Baihar CD Block. Scheduled Tribes population is highest (68.3 per cent) in Baihar CD Block and it is lowest (7.2 per cent) in Khairlanji CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	362	28.2	-	0.0
Less than 5	385	30.0	11,287	11.7
5-10	316	24.6	38,489	39.8
11-20	178	13.9	37,009	38.3
21-30	33	2.6	7,064	7.3
31-40	6	0.5	1,989	2.1
41-50	4	0.3	894	0.9
51-75	1	0.1	9	0.0
76 and above	-	0.0	-	0.0
District Total	1,285	100.0	96,741	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 362 villages accounting for 28.2 per cent of total 1285 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 385 villages (30.0 per cent). In 316 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 178 villages. The range of 21-30 and 31-40 per cent contains 33 and 6 villages respectively. There are 4 villages in the range of 41-50 and only one villages in the range of 51-75. None of the village where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	68	5.3	-	0.0
Less than 5	187	14.6	6,421	2.2
5-10	161	12.5	19,522	6.6
11-20	157	12.2	34,469	11.6
21-30	98	7.6	27,094	9.1
31-40	85	6.6	28,644	9.6
41-50	63	4.9	21,563	7.2
51-75	134	10.4	54,419	18.3
76 and above	332	25.8	105,774	35.5
District Total	1,285	100.0	297,906	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 68 villages accounting for 5.3 per cent of total 1285 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 187 villages (14.6 per cent). In 161 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 157 villages. The range of 21-30 and 31- 40 per cent contains 98 and 85 villages respectively. There are 63 villages in the range of 41-50 and 134 villages in the range of 51-75. There are a whopping number of villages amount to 332 are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Balaghat UA	75,997	6,946	3,856	9.1	5.1
	(i) Balaghat (M)	75,091	6,648	3,818	8.9	5.1

10	Lanji	1,035	1,066
	District (Rural) Total	1,046	1,053

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district. The Scheduled Castes sex ratio is 1046 for district (rural). Among the CD Blocks, the highest sex ratio of 1062 is found in Khairlanji CD Block and lowest of 965 is recorded in Birsa CD Block.

Sex ratio of Scheduled Tribes population in Balaghat district rural is 1053. Among the CD Blocks, the highest sex ratio of 1077 is found in Paraswada CD Block and lowest of 1039 is recorded in Birsa CD Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Balaghat UA	987	939
	(i) Balaghat (M)	992	937
2	Baihar (NP)	993	960
3	Bharveli (CT)	934	969
4	Hirapur (CT)	980	1,027
5	Katangi (NP)	1,006	926
6	Malajkhand (M)	971	1,055
7	Tirodi (CT)	1,031	1,114
8	Ukwa (CT)	1,066	1,071
9	Waraseoni UA	1,049	1,027
	(i) Waraseoni (M)	1,054	1,030
Sex ratio (Urban) for the district:		999	1019

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is slightly lower (999) among Scheduled Castes compared to Scheduled Tribes (1019).

Among the 9 towns of the district, in Ukwa (CT) the Scheduled Caste and in Tirodi the Scheduled Tribe sex ratio is above one thousand i.e. 1,066 and 1114 respectively being highest. In the remaining towns sex ratio for Scheduled Castes, the lowest being 934 in Bharveli (C.T). Scheduled Tribes, sex ratio varies from 926 for Katangi (N.P) and 1114 for Triodi (CT).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsils	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District and Tahsilwise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 68.7 per cent in the district. This proportion in rural area is 66.7 per cent and 82.1 per cent in urban areas. In the district the literacy rate of males 80.6 per cent is much higher than that of females which is 57.2 per cent.

Among the tahsils, Balaghat tahsil tops with 76.0 per cent literates and the lowest literacy rate 59.1 per cent is recorded for Baihar tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		73,2048	425,639	306,409	571,948	216,646	355,302	66.7	79.1	54.7	24.4

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 66.7 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 79.1 and 54.7 per cent respectively. At CD Block level Waraseoni CD Block has the highest rural literacy rate of 70.5 per cent while the lowest literacy rate of 52.5 per cent is recorded for Birsa CD Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.3	34	0.0
1-10	18	1.4	3,346	0.3
11-20	17	1.3	4,627	0.4
21-30	42	3.3	13,790	1.1
31-40	67	5.2	26,547	2.0
41-50	145	11.3	75,501	5.8
51-60	203	15.8	158,403	12.1
61-70	372	28.9	471,830	36.2
71-80	361	28.1	495,966	38.0
81-90	36	2.8	53,915	4.1
91-99	0	0.0	0	0.0
100	20	1.6	37	0.0
District Total:	1285	100.0	1,303,996	100.0
Literacy rate for District:			68.7	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 4villages (0.3 per cent) of the district and population of these villages is only 34. There are 20 villages constituting 1.6 per cent of total villages having 100 per cent literacy. Highest number of villages i.e. 372 villages fall in the literacy range of 61-70 per cent. This accounts for 28.9 per cent of total villages and 36.2 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 88.3 per cent is recorded in Balaghat (UA) whereas the lowest literacy rate 71.9 is recorded in Malajkhand (M). Sex wise highest percentage of male literacy rate is observed in Balaghat (M) and it is lowest in Malajkhand (M). Gap in male female literacy rate is maximum in Tirodi (CT). The total literacy rate of the district (urban) comes to 82.1 per cent. It is 90.1 per cent for males and 74.0 per cent for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

10	Lanji	7,142	4,136	3,006	3,615	1,149	2,466	76.0	90.6	62.3	28.3
	District (Rural) Total:	63,203	35,967	27,236	33,538	11,319	22,219	75.5	88.5	63.2	25.3

Table 25 presents the CD Blockwise number and percentage of Scheduled Castes, literates and illiterates by Sex. It is seen that literacy rate of Scheduled Caste population of the district is 75.5 per cent. It is highest 79.6 per cent in Paraswada CD block and lowest 68.3 per cent in Birsa CD block. The gap in male/female literacy rate is highest (28.3 per cent) in Lanji CD block. The overall male literacy rate of the district (rural) works out to 88.5 per cent and it is 63.2 per cent for females.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	14	1.5	43	0.0
1-10	0	0.0	0	0.0

100	48	5.2	214	0.2
District Total:	923	100.0	96,741	100.0
Literacy rate for District (Rural):			75.5	

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 75.5 per cent. Highest number of villages i.e. 390 villages fall in the literacy range of 71-80 per cent. There are 48 villages which have 100 per cent literacy rate of Scheduled Caste population. 14 villages are such where the literacy rate of Scheduled Caste population is zero per cent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 28 presents the CD Blockwise number and percentage of Scheduled Tribes, literates and illiterates by sex of the district. The literacy rate of Scheduled Tribe population of the district (rural) comes to 52.2 . Waraseoni CD Block has the highest literacy rate 61.0 percent and Birsa CD Block has the lowest literacy rate 46.4 percent. The gap in male/female literacy rate varies from 24.3 percent to 29.3 percent. It is 26.1 percent for the district (rural)

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population

Literacy rate for District (Rural) 52.2

Distribution of villages by literacy rate range for Scheduled Tribes population of the district (rural) is presented in table 29. The literacy rate of Scheduled Tribes population for district (rural) is 52.2 percent. Accordingly the highest number of villages 352 fall in the literacy rate range of 51-60 percent constituting 28.9 percent of villages having Scheduled Tribe population and 35.4 percent of total Scheduled Tribe population. There are 9 villages which fall in the literacy range of zero percent and 28 villages have 100 percent literacy rate of the Scheduled Tribe population.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 50.3 percent of the total population in the district. The total workers comprises of 32.9 percent of main workers and 17.4 percent of marginal workers and the remaining 49.7 percent are non-workers.

Among males, 43.1 % are main workers and 11.2% are marginal workers whereas among females, corresponding figures are 22.9% and 23.4% respectively.

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 33.0 per cent of the total population of the district (urban) and the proportion of non-workers is 67.0 per cent. Total workers constitute of main workers 26.8 per cent and marginal workers 6.3 per cent.

Among males, 41.9 % are main workers and 5.8% are marginal workers whereas among females, corresponding figures are 11.2% and 6.8% respectively.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 39.5 per cent of the total workers (main + marginal), 39.1 per cent of total workers are engaged as agricultural labourers, 4.5 per cent as household industry workers and 17.0 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 24.7 per cent in Balaghat tahsil and 45.1 per cent in Baihar tahsil. The proportion of cultivators is almost equal for both male and female which is 39.6 and 39.4 per cent respectively.

The percentage of household industry workers is very low in the district as stated above. The highest proportion of 38.5 per cent of other workers is recorded in Balaghat tahsil while the lowest proportion of 11.0 per cent is found in Lanji tahsil.

				(50.4)	(40.5)	(49.4)	(5.2)	(4.9)

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 52.9 per cent of total population. Among these workers cultivators constitute 42.2 per cent, agricultural labourers 41.5 per cent, household industry 4.6 per cent and other workers constitute 11.7 per cent. The proportion of cultivators is highest 51.1 per cent in Baihar CD Block and is lowest 33.0 per cent in Balaghat CD Block. Proportion of agricultural labour is highest 45.3 per cent in Balaghat CD Block and lowest 38.4 per cent in Katangi CD Block. It is also seen that the proportion of female workers is more than male workers under the category of agricultural labourers and household industry.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

				(18.0)	(16.4)	(25.6)	(5.2)	(52.7)

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 33.0 per cent of total workers, cultivators constitute 10.3 per cent, agricultural labourers 12.5 per cent, household industry 3.1 per cent and the highest proportion is covered by other workers which is 74.1 per cent. It is also found that proportion of male workers under cultivation, agricultural labour and household industry worker is lower while for other workers it is higher than that of the proportion of female workers. Townwise analysis shows that the proportion of cultivators is highest 29.6 per cent in Malajkhand (M), agricultural labourer is highest 28.0 per cent in Malajkhand (M), household industry workers is highest 7.6 per cent in Waraseoni (M) and other workers is highest 92.5 per cent in Balaghat (UA).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1285 inhabited villages in the district 1165 villages or 90.7 per cent have been provided with the education facilities of one type or the other. Similarly 457 villages in the district constituting 35.6 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1128 or 87.8 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 230 villages constituting 17.9 per cent of villages have been provided with post office facility within the villages. 258 or 20.1 per cent villages have been provided with the telephone facility, 318 or 24.7 per cent with transport facility, 50 or 3.9 per cent villages with bank facility and 101 or 7.9 per cent with agricultural credit societies. Similarly there are 550 or 42.8 per cent villages which are linked with the pucca road. Total 1169 or 91.0 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Waraseoni CD block has the cent per cent villages where educational facility is available and lowest 77.2 per cent is found in Baihar CD Block. Medical facility is highest in Waraseoni (85.5 per cent) and lowest (21.2 per cent) in Baihar CD block. Telephone facility is highest in Khairlanji CD Block (51.9 per cent) and it is lowest in Birsa (2.1 per cent). In the field of power supply 1169 villages have been covered out of 1285 villages in the district i.e 91.0 per cent.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 130,3996 persons in the district, 128,8881 or 98.8 per cent have educational facility of one or the other type. Similarly 740013 or 56.7 per cent population has medical facilities while 121,9152 or 93.5 per cent have improved drinking water facility. Post office facilities are available to 486,662 or 37.3 per cent population. Telephone facility is available to 463,652 or 35.6 per cent. Transport communications facility is available to 524665 or 40.2 per cent. Bank facility is available to 156,255 or 12.0 per cent. 232,464 or 17.8 per cent have been provided with the facility of agricultural credit societies. 795,013 or 61.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 126,8957 or 97.3 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

4. Telephone	255	330	442	1,027
5. Bus Service	467	287	218	972
6. Banks				
(a) Commercial Bank	244	327	672	1,243
(b) Cooperative Bank	316	332	616	1,264
7. Agricultural Credit Societies	396	299	489	1,184

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 120 villages do not have primary school and out of these villages, children of 91 villages have to travel less than 5 kms. for schooling Out of 1285 inhabited villages as many as 907 are deprived of middle school and 1279 of degree college. Of these 647 avail the facility of middle school at a distance of less than 5 kms., 200 at a distance 5-10 kms. and the remaining 60 at a distance of 10+ kms. In respect of degree college 75 avail this facility at a distance of less than 5 kms., 277 between 5 to 10 kms. and rest 927 villages at a distance of 10+ kms.

Similarly there are 1269 villages in the district which have been devoid of Hospital facility and 1245 villages which are deprived of PHC facilities. Of these 136 villages have the facility of Hospital available within 5 kms. while in respect of 272 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 861 villages have this facility at a distance of 10+ kms. As regards PHC 110 avail this facility at a distance of less than 5 kms., 305 at a distance of 5-10 kms. and the remaining 830 have to travel a distance of more than 10 kms. to avail this facility.Regarding Post Office, 1055 villages do not havethis facility in the village itself. Of these majority i.e. 675 have this facility at a distance of less than 5 kms., another 212 villages avail it at a distance of 5-10 kms. In the remaining 168 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1027 villages in the district which are without telephone facilitiy. Of these 255 avail this facility at a distance of less than 5 kms., 330 at a distance of 5-10 kms. and remaining 442 have to traverse a distance of 10+ kms.

For Bus service out of 972 villages which do not have facility, 467 villages avail this facility at a distance of less than 5 kms., 287 at a distance between 5-10 kms. and 218 at a distance of 10+ kms.

In the entire district 1243 villages are deprived of Commercial Bank and 1264 of Co-operative Bank. Of these 1243 villages which are deprived of Commercial Banks 244 villages avail this facility at a distance of less than 5 kms., 327 between 5-10 kms. and the remaining 672 at a distance of 10+ kms. Regarding Co-operative Banks out of 1264 villages 316 villages avail this facility at a distance of less than 5 kms., 332 at a distance of 5-10 kms. and remaining 616 at a distance of 10+ kms. 1184 villages do not have agricultural credit societies. This facility to 396 villages is available at a distance of less than 5 kms., 299 at a distance of 5-10 kms. and the remaining 489 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

District total	1285	1165	457	230	258	318	50	101	550
	(100.0)	(90.7)	(35.6)	(17.9)	(20.1)	(24.7)	(3.9)	(7.9)	(42.8)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1285 inhabited villages in the district, there are 38 villages which have nearest towns upto a distance of 5 kms. Of these only 37 villages forming 97.4 per cent of total villages, are having the educational facilities atleast one type and 20 villages constituting 52.6 per cent, have the medical facilities within the Range of 5 km., 8 villages forming 21.1 per cent have the facility of post office within the range of 5 km and 14 or 36.8 per cent have the facility of telephone under the distance of 5 km. 16 villages constituting 42.1 per cent have been linked by transport service. 2 villages comprising 5.3 per cent have been provided bank facilities, while 2 villages constituting only 5.3 per cent have been provided by agricultural credit societies. 29 villages comprising 76.3 per cent have been provided with pucca road within the distance of 5 km.

There are 339 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 319 villages constituting 94.1 per cent have been provided with the educational facilities. 162 villages comprising 47.8 per cent have been provided with medical facilities. 67 villages constituting 19.8 per cent enjoy the post office facility. 80 villages comprising 23.6 per cent have been provided the telephone facility. 105 villages constituting 31.0 per cent have been linked with transport communications. 13 villages comprising 3.8 per cent have bank facility. 37 villages constituting 10.9 per cent are having agricultural credit societies, while 153 villages or 45.1 per cent are approachable by pucca road. 789 villages fall in the distance range of 16-50 kms. Of these, 88.8 per cent villages have educational facility, 32.2 per cent with medical, 17.6 per cent with post office, 19.1 per cent with telephone and transport and communications available to 24.0 per cent villages. Banks and agricultural credit societies facilities are available to 4.2 and 7.4 per cent of villages. Villages situated at distance of above 51 kms. there are 112 out of which 101 (90.2 per cent)village have educational facility available to them, 17.0 villages avail the medical facility , 11.6(per cent) villages have the facility of post office, 9.8(per cent) villages have telephone connectivity, 7.1(per cent) villages have transport linkages, 1.8 (per cent) villages have banking facility available to them, 2.7(per cent) villages are such where agricultural and credit societies available to them, while 21.4 (per cent) villages are approachable with pucca road.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Balaghat district out of a total 1285 inhabited villages, overwhelming 437 have a population of less than 500 persons. Of these, 322 villages (73.7 per cent) have education facility, 41 (9.4 per cent) have medical facility, 342 (78.3 per cent) have improved drinking water facility. 3 villages (0.7 per cent) have post office facility. 17(3.9 per cent) have telephone facility. 33 (7.6 per cent) have been linked by bus service. 1 (0.2 per cent) have Bank facility. 2 villages (0.5 per cent) have been provided with the agricultural credit societies, 71 villages (16.2 per cent) have been linked with pucca road. 342 villages (78.3 per cent) have been provided with electricity.

Out of 333 villages, which fall in the population range of 500-999 persons, 328 villages (98.5 per cent) have been provided with the education facility, 96 (28.8 per cent) with medical facility, 296 (88.9 per cent) villages have improved drinking water facility. 27 villages (8.1 per cent) have been provided with post office facilities, 53 villages (15.9 per cent) with telephone facility, 73 villages (21.9 per cent) with transport facilities, one village (0.3 per cent) with bank facility, 6 villages (1.8 per cent) with agricultural credit societies and 136 villages (40.8 per cent) have approach by pucca road. 318 (95.5 per cent) villages in this range have electricity.

363 villages fall in population range of 1,000-1,999 persons. Of these 363 villages (100 per cent) have been provided with the education facility, 197 (54.3 per cent) with medical facility, 346 (95.3 per cent) villages have improved drinking water facility. 99 villages (27.3 per cent) each have been provided with post office facilities, and telephone facilities, 125 villages (34.4 per cent) with transport facilities, 11villages (3.0 per cent) with bank facility, 38 villages (10.5 per cent) with agricultural credit societies and 221 villages (60.9 per cent) have approach by pucca road. Except for 3 villages in this range all have electricity i.e (99.2 per cent).

There are 146 villages in the district which are covered under 2,000-4,999 population range. Of these, 146 villages (100 per cent) have been provided with the education facility, 117 (80.1 per cent) with medical facility, 138 (94.5 per cent) villages have improved drinking water facility. 95 villages (65.1 per cent) have been provided with post office facilities, 84 villages (57.5 per cent) with telephone facility, 81 villages (55.5 per cent) with transport facilities, 32 villages (21.9 per cent) with bank facility, 51 villages (34.9 per cent) with agricultural credit societies and 117 villages (80.1 per cent) have approach by pucca road. 143 (97.9 per cent) villages in this range have electricity.

There are 5 villages in the district which are covered under 5,000-9,999 population range and all the villages are provided with all types of amenities except telephone, bank, agricultural credit societies. There is only one approach by pucca road village in the population range of more than 10,000 and it has all the amenities except agricultural credit societies.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Katangi	125	55,447	50.3	59.7
2	Khairlanji	81	45,346	71.1	40.3
3	Lalbarra	108	47,641	64.5	76.8
4	Waraseoni	76	45,188	60.4	76.7
5	Balaghat	155	59,077	44.6	40.9
6	Kirnapur	134	65,227	49.3	32.4
7	Paraswada	148	55,020	41.5	13.1
8	Baihar	184	90,175	27.3	9.5
9	Birsa	142	99,486	28.7	10.5
10	Lanji	132	63,319	44.0	63.1
	District Total:	1285	625,926	44.8	43.2

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents CD blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as un irrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1285 inhabited villages in the district having a total area of 625926 hectares. Of this, 44.8 per cent is cultivable and 43.2 per cent of total cultivable area has got the irrigation facility.

It is seen that percentage of cultivable area to total area is highest 71.1per cent in Khairlanji CD Block. It is lowest 27.3 per cent in Baihar CD Block. The percentage of irrigated area to cultivable area is highest 76.8 per cent in Lalbarra and lowest 9.5 in Baihar CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Baihar (NP)	179	14	166	119	48	12	22	26	11
2	II Balaghat (M)	263	85	178	310	59	136	30	21	64
3	IV Kantangi (NP)	459	111	348	431	164	1	29	10	227
4	III Malajkhand (M)	505	353	153	503	86	111	196	15	96
5	III Waraseoni (M)	313	162	151	300	41	143	10	0	106
District Total		328	145	183	340	70	108	59	16	86

Note: The difference in various totals is due to rounding off the related figures.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Balaghat works out to Rs.328 of which Rs.145 are derived through local taxes and the remaining Rs.183 is received from all other sources. The average of total expenditure incurred per capita is Rs.340. Out of this Rs.70 are spent on general administration, Rs.108 on public health and conveniences, Rs.59 on public works, Rs.16 on public institutions and Rs.86 is spent other items.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Baihar (NP)	11.8	5.2	1.9	1.3	0.6
2	Balaghat (M)	2.9	2.5	1.3	1.3	0.4
3	Kantangi (NP)	7.5	3.4	3.4	3.4	0.7
4	Malajkhand (M)	9.6	4.0	1.2	0.9	0.0
5	Waraseoni (M)	6.1	4.8	2.4	0.8	0.8
	District Total	5.9	3.5	1.7	1.3	0.4

In urban areas of Balaghat district the average number of primary school per 10,000 population comes 5.9 schools, 3.5 junior secondary/middle, 1.7 secondary/matriculation, 1.3 senior secondary schools and the ratio of colleges is only 0.4 college per 10,000 population. Among the towns, the ratio of primary is highest in Baihar (NP) while lowest is Balaghat (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Baihar(NP)	19
2	Balaghat(M)	33
3	Bharveli(CT)	0
4	Hirapur(CT)	89
5	Kantangi(NP)	20
6	Malajkhand(M)	11
7	Tirodi(CT)	11
8	Ukwa(CT)	18
9	Waraseoni(M)	19
	Distrct Total	24

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Balaghat district. On an average there are 24 beds per 10,000 population in urban areas of the district. Whereas it is the highest 89 in Hirapur (CT) while lowest number as none bed is recorded in Bharveli (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Baihar	15,390	4,440	28.8
2	Balaghat	75,997	1,510	2.0
3	Katangi	14,763	7,194	48.7
4	Malajkhand	32,296	9,490	29.4
5	Ukwa	7,110	1,038	14.6
6	Waraseoni	24,757	12,852	51.9
	District Total	170,313	36,524	21.4

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 170,313 urban population 36,524 persons constitute slum population which is 21.4 per cent of total urban population. Waraseoni town has the highest 51.9 per cent of slum population whereas, Balaghat town has lowest (2.0 per cent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Baihar (NP)	Bechandi	Tendu Leaves
		Bamboo Basket	Bamboo
		Dona Pattal	Mahua
2	Balaghat (M)	Tiles.	Rice
		Furniture	Magnese Ore
		Rice	Tiles
3	Bharveli (CT)	Tiles	Rice
		Bricks	Magnese
		Earthen Pots	Wheat Gram
4	Hirapur (CT)	Tiles	Rice
		Bricks	Wheat
		Earthen Pots	Fruit
5	Kantangi (NP)	Rice	Rice
		Gur	Gur
		Oil	Bricks
6	Malajkhand (M)	Bamboo Material	Copper
		Earthen Pots	Paddy
		Bricks Tiles	Tendu Leaves
7	Tirodi (CT)	Poha	Manganse Stone
		-	Poha
		-	Rice
8	Ukwa (CT)	Bamboo Material	Tendu Leaves
		Wooden Furniture	Bamboo
		Broom	Raw Magnese
9	Waraseoni (M)	Handloom Saree	Rice
		Rice	Mahua
		Poha	Poha

Table 47 indicates most important articles manufactured and exported out of each town in the district. The other commodities manufactured are tiles, bricks, earthen pots, bamboo materials etc. rice, *tendu* leaves are the other important commodities which are exported by different towns.

(x)Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52.

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	1	1	2	1	1	2	1	1	2
	District Total	316,470	277,316	39,154	30,023	25,635	4,388	71,049	64,774	6,275

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 316,470 consisting of 277,316 rural and 39,154 urban households. 30,023 households belong to Scheduled Castes 71,049 to Scheduled Tribes. 287,389 households are living in their own houses constituting 90.8 per cent of total households. Of these households, the largest number of households (123,665) have occupied single room accommodation and is followed by double room accommodation numbering to 90,017 households. Next position is claimed by households (38,505) occupying three room accommodation. Number of households in owned accommodation occupying more than three rooms rank at fourth place with 29,871 households while 5,331 households are without any exclusive room.

18,584 households living in rented accommodation accounts for 5.9 per cent of total number of households in the district. The largest number of 5,876 households are living in three room accommodation followed by 5,247 households in double room accommodation. Next position is claimed by households (4,712) occupying one room accommodation. Households with three plus are 2,489 and with no exclusive room are 260 in numbers.

Other households numbering to 10,497 forming only 3.3 per cent of total households are distributed in single room accommodation numbering 4914, followed by double room (2,567), three rooms (1,204), with no exclusive room (967) and remaining 845 in three plus room accommodation.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Katangi	12.4	87.2	0.4	7.2	92.4	0.4	43.9	55.8	0.3
2	Waraseoni	8.2	91.2	0.6	6.0	93.5	0.5	50.3	48.4	1.4
3	Balaghat	26.7	72.2	1.1	7.3	91.2	1.5	60.8	38.6	0.6
4	Kirnapur	3.8	94.1	2.1	3.8	94.1	2.1	0.0	0.0	0.0
5	Baihar	5.7	88.8	5.5	1.7	92.0	6.3	26.4	72.5	1.1
6	Lanji	5.5	92.2	2.3	5.5	92.2	2.3	0.0	0.0	0.0
	District Total:	10.3	87.7	2.1	5.0	92.7	2.3	47.2	52.0	0.8

The data presented in Table 49 reveals that 10.3 per cent of household of the district are living in houses made of pucca materials, residences of 87.7 per cent households are semi permanent houses and 2.1 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 47.2 per cent are living in houses constructed of pucca materials, 52.0 per cent in semi-permanent structure and percentage of households in temporary houses is 0.8 constructed of kachcha materials. At rural level, the lowest percentage of 1.7 households occupying permanent structure is found in Baihar while highest percentage of 7.3 is seen in Balaghat tahsil. The proportion of semi-permanent houses is high in Kirnapur (94.1) and low in Balaghat (91.2) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 6.3 per cent in Baihar followed by Lanji (2.3) tahsil and Kirnapur tahsil (2.1) while 0.4 and 0.5 in Katangi and Waraseoni tahsil respectively.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

				(53.2)	(82.8)	(51.9)	(52.3)	(51.1)

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 50 indicates that 39.7 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well, 58.3 per cent households have provision of electricity in their houses, 54.8 per cent rural households have facility of electricity against 82.8 per cent in urban areas. The bathroom facility is available to only 12.7 per cent households within their premises. As regards rural areas, 7.1 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 51.9 per cent. Toilet and drainage facilities in the district are available to 13.2 per cent and 18.2 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil level almost conforms to the district pattern analysed.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that wood is used as the most predominant fuel used for cooking by 90.4 per cent households in the district. In the tahsils, this proportion varies between 96.8 per cent in Lanji and 75.5 per cent in Balaghat tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller amount of population due to availability of L.P.G. The next most common cooking fuel is gas which is used by 3.6 per cent households in the district. This proportion in urban and rural areas is 25.4 and 0.6 per cent respectively. In rural areas use of gas for cooking is very low as compared to urban areas at tahsil level. There are 2.8 per cent households using kerosene oil in the district. Use of kerosene oil for cooking by rural households comes to 0.8 per cent while in urban areas its proportion is high i.e. 17.2 per cent. There are 1.9 per cent households using bio-gas as fuel for cooking in the district. Use of bio-gas for cooking by urban households comes to 1.2 per cent while in rural areas its proportion is 2.0 per cent which is quite high, as a whole. The percentage of households using other types of fuel is insignificant. In rural areas wood is main fuel and in urban areas LPG gas is used as predominant fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

		Urban	39,154	17,183	11,603	20,658	5,055	2,4676	10,098	966	9,455

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Table 52 presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 316,470 households in the district and among them, 57,213 households have been availing banking services. 56,638 households have Radio/Transistor. Television is possessed by 46,460 households. Telephone is available in 8,686 households. Bicycle is the most common means of transportation and is available in 169,711 households. Scooter, motor cycle, moped (two wheelrs) and car, jeep, van (four wheelers) are used by 21,966 and 2,843 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

During the decade 1991-2001, Kirnapur has come up as a new tahsil in the district . It is formed by carving out 149 villages which earlier belonged to Balaghat tahsil. Three new towns have been added in the district during the decade . These are (i) Malajkhand (M), (ii) Hirapur (CT), and (iii) Bharveli (CT).

(xii) Brief description of places of religious, historical or archaeological importance in villages and places or tourist interest in the town of the district.

Kanha National Park

Kanha National Park falls in the Balaghat and Mandla districts. Located in the Maikal ranges of the Satpuras, the Park is internationally renowned for its rich floral and faunal attributes .

The National Park has distinguished itself in saving, the endangered hard ground barasingha (cervus, duvaceli, branderi) from extinction and has the unique distinction of harbouring the last world population of this dear species. Barasingha is State Animal of Madhya Pradesh.

Park area encompasses two important valleys viz the Banjar and the Halon. The Halon valley falls in Balaghat district. The total area of the park is 940 sq.km. Of which 530 sq.km fall in Balaghat district comprising the three ranges viz Mukki, Bhaisanghat and Supkhar.

The National Park has two entry points- Kisli and Mukki, Mukki is 82 km. away from Balaghat .

Lanji Temple and Fort

The fort is located at Lanji tahsil of the district. It was made by Kulchury Rajwansh located in dense forest area The temple and its statues art are of Khajuraho style. The Lanji Fort is related with Gond dynasty. There are also many temples within fort with lot of statues like Mahadev, Mahamaya, Lanjkaidevi etc.

Rampaily Temple

It is a historical place located 30 km away from district headquarters. The temple is built on the bank of Chandan river, in which big statues of Shree Ram, Hanuman and Balanji's are there .

Hatta Bawali (Well)

The village Hatta is located about 30 km away from district headquarters. The village Hatta is famous for its history. During British Government Hatta was centre of a powerful Zamindari. It has *Bawadi* and old temple. The *Bawadi* was built by king Gond of Devgad in 17th century. Bath-room built in the Bawadi was for king and queen.

Nahlesara Dam

The dam is built on Chandan river. It's length 1.5 km, built some where around 1960-1965. It is 58 km. away from Balaghat, the district headquarters. The dam is used for irrigation purpose. Behind dam and about one km. away famous temple of Amma Mai is there.

Gangulpara Tank and Water Fall

From district headquarters Balaghat around 14km away on Baihar road the Gangulpara tank and water fall is located. The natural beauty surrounding the tank and water fall looks nice. People from Balaghat used to go there for picnic. The tank stores the water of Ghysri Nala and it is used for irrigation purpose.

Dhuti Dam

The dam was built on Wainganga river near Lamta and it is around 65km. away from Balaghat The dam

is the quite oldest, it was constructed during year 1911-23. The dam height is 26.6ft and it's length is 4,040 ft and width 881ft. Maximum water level of dam is 1,077.5 ft. The dam mainly serves the irrigation purpose of the villages.

(xiii)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Balaghat has got a few unique distinctions. Its rich manganese deposits account for eighty percent of the country's total manganese production . It houses Asia's biggest manganese mine at Balaghat . The district also has the country's largest copper deposits at Malajkhand. This unusual gift of nature has secured a coveted place for Balaghat in the mineral map of not only in Madhya Pradesh, but also in the country. It has another plenty to its credit in terms of small tanks, numbering 2000, some of which contributed to the irrigation potential of the district.

The 11th century Koteshwar Mahadev Temple nestled in a bamboo jungle at Lanji is of immense archaeological importance.

(xiv)Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned

Source:
1. Gazetteer of India, Balaghat district, 1992
2. Census of India, District Census Handbook, 1991
3. District Statistical Book, 1997-98.

village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and

meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-

agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
Balaghat	Malajkhand (NP)	Karah	Fully Merged
		Pindkapar Tola	Fully Merged
		Mehgaon	Fully Merged
		Pindkapar Raiyat	Fully Merged
		Rahengi	Fully Merged
		Bhimjori	Fully Merged
		Lora	Fully Merged
		Khursipar	Fully Merged
		Karamsara	Fully Merged
		Dudhi	Fully Merged
		Pauni	Fully Merged
		Matlai	Fully Merged
		Nevargaon	Fully Merged
		Birsa	Fully Merged
		Chartola	Fully Merged
		Jagta tola	Fully Merged

(c) CD blockwise presentation of Village Directory Data

As regards the availability of recreational facility, 18 villages in the district have cinema/video hall and there is one village each having sports club and stadium/auditorium/community hall facility. News paper is available in 314 villages in the district. Facility of magazine is available in 145 villages. 129 are such villages where news paper & magazine facilities are available.by number of primary schools.

APPENDIX 1A - VILLAGE DIRECTORY
VILLAGES BY NUMBER OF PRIMARY SCHOOL

Name of the District: Balalghat

Serial number	Name of C. D. block	Total number of inhabited villages	Number of primary schools				
			None	One	Two	Three	Four +
1	2	3	4	5	6	7	8
1	Katangi	125	10	78	30	6	1
2	Khairlanji	81	1	45	23	6	6
3	Lalbarra	108	1	73	21	7	6
4	Waraseoni	76	0	43	19	11	3
5	Balaghat	155	20	108	22	1	4
6	Kirnapur	134	7	92	19	8	8
7	Paraswada	148	19	114	13	2	0
8	Baihar	184	42	121	17	3	1
9	Birsa	142	9	109	18	4	2
10	Lanji	132	11	82	22	10	7
	District Total:	1,285	120	865	204	58	38

Appendix I-A deals with CD Block-wise villages by number of primary schools. There are 120 villages in the district which are devoid of primary school facilities. 865 villages in the district have one primary school each . In case of villages having at least 2 schools each, there are 204 villages. In case of villages having 3 schools each, there are 58 such villages in this category. Lastly in case of villages having four + schools, there are 38 villages in this category.

APPENDIX I B - VILLAGE DIRECTORY
VILLAGES BY PRIMARY, MIDDLE AND SECONDARY SCHOOLS

Name of the District : Balaghat

Serial number	Name of C. D. block	Total number of inhabited villages	Type of educational institutions available			
			No School	At least one primary school and no middle school	At least one primary school and one middle school	At least one middle school and one secondary school
1	2	3	4	5	6	7
1	Katangi	125	10	80	35	10
2	Khairlanji	81	1	45	35	14
3	Lalbarra	108	1	65	42	14
4	Waraseoni	76	0	37	39	16
5	Balaghat	155	20	97	38	13
6	Kirnapur	134	7	81	46	11
7	Paraswada	148	19	88	41	9
8	Baihar	184	42	107	35	7
9	Birsa	142	9	103	30	7
10	Lanji	132	11	84	37	12
	Total:	1,285	120	787	378	113

Appendix I-B depicts information regarding different type of educational institutions. There are 120 villages in the district which do not have any type of school facilities. 787 villages are having atleast one primary school and no middle school. 378 villages are having atleast one primary school alongwith one middle school. Similarly 113 villages are having atleast one middle school alongwith one secondary school.

APPENDIX 1C - VILLAGE DIRECTORY
VILLAGES WITH DIFFERENT SOURCE OF DRINKING WATER FACILITIES AVAILABLE

Name of the District: Balaghat

Serial number	Name of C. D. block	Number of villages with different sources of drinking water available				
		Only tap	Only well	Only tube well	Only handpump	More than one source only from tap, well, tube- well, handpump
1	2	3	4	5	6	7
1	Katangi	0	16	0	1	107
2	Khairlanji	0	0	0	0	81
3	Lalbarra	0	0	0	0	108
4	Waraseoni	0	1	0	0	75
5	Balaghat	0	6	0	2	141
6	Kirnapur	0	2	0	0	125
7	Paraswada	0	9	0	0	136
8	Baihar	0	97	0	12	69
9	Birsa	0	0	0	1	140
10	Lanji	0	2	0	2	124
	District Total:	0	133	0	18	1,106

Appendix I-C deals with the villages with different sources of drinking water facilities. There are 151 villages in the entire district which are having single source of drinking water i.e. 133 have only well and 18 have only handpump as the source of drinking water. 1106 villages in the district are having more than one source of drinking water.

APPENDIX II - VILLAGE DIRECTORY
VILLAGES WITH 5,000 AND ABOVE POPULATION WHICH DONOT HAVE ONE OR MORE AMENITIES

Name of the District:Balaghat

Serial number	Name of village	Location code number	Name of C. D. block	Popula-tion	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Comm-ercial Bank
1	2	3	4	5	6	7	8	9	10	11	12
1	Pandharwani	05418200	Lalbarra	5789	Available	Available	Available	N.A.	Available	N.A.	Available
2	Rampayli	05430100	Waraseoni	5117	Available	N.A.	Available	Available	Available	Available	Available
3	Kosmi	05453500	Balaghat	6177	N.A.	N.A.	Available	Available	Available	Available	N.A.
4	Hatta	05455300	Balaghat	5100	Available	Available	Available	Available	Available	Available	Available
5	Kirnapur	05466800	Kirnapur	5567	Available	Available	Available	Available	Available	Available	Available
6	Lanji	05531000	Lanji	11306	Available	Available	Available	Available	Available	Available	Available

Appendix II deals with the villages having 5,000 & above population which do not have one or more amenities in the district. In all 6 villages of Balaghat district have population above 5,000 of which one village each is in Lalbarra CD Block, Waraseoni, 2 in Balaghat, one each in Kirnapur and Lanji CD Block. Senior secondary school is available in most of these villages except in Kosmi village . College facility is available in most of the villages except in Rampayali and Kosmi villages. Primary health sub centres is available in all these villages. Tap drinking water facility is available in most of these villages except in Pandharwani.Approach by pucca road is available in most of these villages except in Pandharwani. Commercial bank facility is available in most of these villages except in Kosmi.However bus service is available in all these villages.

APPENDIX II - A VILLAGE DIRECTORY
CENSUS TOWNS WHICH DO NOT HAVE ONE OR MORE AMENITIES

Name of the District: Balaghat

Serial number	Name of census town	Location code number	Name of C. D. block	Population	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12
1	Ukwa	44503000		7110	Available	N.A.	Available	Available	N.A.	Available	Available
2	Hirapur	44504000		5641	N.A.	N.A.	N.A.	Available	N.A.	Available	N.A.
3	Tirodi	44509000		8849	Available	N.A.	Available	N.A.	N.A.	Available	Available
4	Bharveli	44505000		9169	N.A.	N.A.	N.A.	Available	N.A.	Available	Available

Appendix II A shows the details of availability or non-availability of certain amenities in the Census towns of the district. It is seen that there are 4 Census towns namely Ukwa(44503000), Hirapur(44504000), Tirodi(44509000) and Bharveli(44505000) in the district.Senior secondary school and Health centre is available in Ukwa and Tirodi and not available in Hirapur and Bharveli towns. 35	00497200	Jera

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there are 44 villages which fall under this category. 1 village is in Katangi, 4 in Balaghat, 2 in kirnapur, 3 in Paraswada, 27 in Baihar,1 in Birsa and 6 in Lanji CD Block. There is no village of Khairlanji, Lalbarra and Waraseoni CD Blocks which fall under this category.

APPENDIX V - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Katangi	133	8	125	15
2	Khairlanji	84	3	81	2
3	Lalbarra	111	3	108	8
4	Waraseoni	78	2	76	1
5	Balaghat	167	12	155	37
6	Kirnapur	149	15	134	26
7	Paraswada	154	6	148	54
8	Baihar	196	12	184	126
9	Birsa	153	11	142	61
10	Lanji	165	33	132	32
	District Total:	1,390	105	1,285	362

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 1390 villages in the district, 105 villages are uninhabited and remaining 1285 villages are inhabited. Out of 1285 inhabited villages 362 villages have no Scheduled Castes Population and 923 inhabited villages have Scheduled Castes population in the district. Baihar CD Block has highest 126 such villages and is followed by Birsa(61), Paraswada(54), Balaghat(37), Lanji(32), Kirnapur(26),Katangi(15), Lalbarra(8), Khairlanji(2) and 1 in Waraseoni CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Katangi	133	8	125	8
2	Khairlanji	84	3	81	6
3	Lalbarra	111	3	108	8
4	Waraseoni	78	2	76	4
5	Balaghat	167	12	155	4
6	Kirnapur	149	15	134	17
7	Paraswada	154	6	148	2
8	Baihar	196	12	184	5
9	Birsa	153	11	142	3
10	Lanji	165	33	132	11
	District Total:	1,390	105	1,285	68

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 1,285 inhabited villages, 68 villages have no Scheduled Tribes population and the remaining 1,217 inhabited villages are such which are having some Scheduled Tribes population. Kirnapur has highest 17 villages with no Scheduled tribe population followed by Lanji(11),8 each in Katangi and Lalbarra, Khairlanji(6), Baihar(5), 4 each in Waraseoni and Balaghat, Birsa (3) and 2 in Paraswada CD Block has no inhabited village having no Scheduled Tribe population.

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 2001 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 2001.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 2001 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, CENSUS 1981-1991

	1981	193	163	167	185	205	180	175	194	177	145	158	176

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991except for q(2) in the district which has actually increased. The child mortality of the district for ages 1,2,3 and 5 is shown as q(1), q(2), q(3) and q(5) respectively. The district mortality rate in 1991 for all the ages is higher than the state average. However some inconsistencies are observed in male-female classification.The table also reflects that in 1991 the female child mortality in the district is more than that of the male child mortality,except for q(3), which is actually equal for both male and female child.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Balaghat**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	402,585 (85.4)	87,062 (21.6)	315,523 (78.4)
(A)Within the district but outside Enumeration place	365,292 (77.5)	74,383 (20.4)	290,909 (79.6)
(B)Birth place in other district of State	37,293 (7.9)	12,679 (34.0)	24,614 (66.0)
(ii) Place of Birth in other states of India than the state of Enumeration	68,231 (14.5)	15,131 (22.2)	53,100 (77.8)
(iii) Birth place in Foreign	673 (0.1)	345 (51.3)	328 (48.7)
(iv) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)
Total Immigrants	471,489	102,538	368,951
Persons born in the place of enumeration	1,026,479	638,211	388,268
Total population	1,497,968	740,749	757,219

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.It is observed that the migration by birth from within the state is maximum 85.4 per cent of total migration. The migration from within the district but outside the enumeration place is 77.5 per cent whereas migration from other districts of the state is 7.9 per cent. Migration from other states is 14.5 per cent and the migration from outside India is 0.1 per cent of the total migration. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Balaghat**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	413,970 (86.2)	89,927 (21.7)	324,043 (78.3)
(A)Within the district but outside Enumeration place	377,239 (78.6)	77,245 (20.5)	299,994 (79.5)
(B)From other district of State	36,731 (7.6)	12,682 (34.5)	24,049 (65.5)
(ii) From other states of India outside enumeration state	65,752 (13.7)	14,647 (22.3)	51,105 (77.7)
(iii) Place of residence outside India	466 (0.1)	246 (52.8)	220 (47.2)
(iv) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)
Total Immigrants	480,188	104,820	375,368
Population of Non-inmigrants	1,017,780	635,929	381,851
Total population	1,497,968	740,749	757,219

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 86.2 per cent of total migrated population. Within this classification, the migration from within the district is 78.6 per cent and only 7.6 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 13.7 per cent of total migration and it is only 0.1 per cent from outside India. Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)

POSITION OF INMIGRANTS FROM OTHER STATES-AS PER CENSUS 2001

State : Madhya Pradesh **District : Balaghat**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Maharashtra	49,483	72.5
Chhattisgarh	11,469	16.8
Uttar Pradesh	2,420	3.5
Orissa	772	1.1
Bihar	740	1.1
Rajasthan	711	1.0
Total of 6 States	65,595	96.1
Total of other States	2,636	3.9
Total	68,231	100.0

Source:Migration Table D-1

Inmigration from other states is classified in this table. 96.1 per cent of total inmigrants are from Maharashtra, Chhatisgargh, Uttar Pradesh, Orissa, Bihar and Rajasthan whereas the remaining inmigrants from all other states together constitute only 3.9 per cent. Total 49,483 persons have migrated from Maharashtra which alone accounts for 72.5 per cent of total inmigrants. Balaghat is located at the neighbouring state border of Maharashtra as such the migration from Maharashtra is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Balaghat**

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu population in the district has decreased in comparison to the state level figures. Similarly, the proportion of Muslim, Jain and Sikh population is also lower in the district as compared to state average. It is equal in case of Christian but is more than that the state average in case of Budhist religion. The proportionate distribution of population belonging to 'other' religions in the district is considerably higher as compared to the state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Balaghat**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)

			(49.2)	(44.8)	(5.5)	(0.5)	(0.0)
	Urban	193,972	100,864	82,656	9,508	944	0
			(52.0)	(42.6)	(4.9)	(0.5)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (49.5%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is lower than that of the state. Similarly the percentage of married population of the district is marginally less than that of the state. The state average is lower than that of the district in respect of widowed and divorced population. The proportion of unmarried persons is higher in urban areas than in rural areas but married persons are lower in the urban areas as compared to the rural areas of the district.

ANNEXURE - VII

(Source- Migration Table C-8)

Note: Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of Literates, it has been shown separately.It is seen that out of 1,267,060 persons belonging to the age 7 and above 870,688 are literates and thus, the literacy rate of the district works out to 68.7 per cent. Similarly the male

and female literacy works out to 80.6 and 57.2 per cent respectively. 240,386 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 82.5 per cent of population in this age group. In the age group 15-34; 97,659 persons (19.6 per cent) are found educated up to middle, 88,163 person (17.7 per cent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech. and 21,420 persons (4.3 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII
