1981 CENSUS—PUBLICATION PLAN

(1981 Census Publications, Series 11 in All India Series will be published in the following parts)

GOVERNMENT OF INDIA PUBLICATIONS

Part I-A	Administration Report-Enumeration
Part I-B	Administration Report-Tabulation
Part II-A	General Population Tables
Part II-B	Primary Census Abstract
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on Houses and Disabled Population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes and Scheduled Tribes
Part X-A	Town Directory
Part X-B	Survey Reports on selected Towns
Part X-C	Survey Reports on selected Villages
Part XI	Ethnographic Notes and special studies on Scheduled Castes and Scheduled Tribes
Part XII	Census Atlas
Paper 1 of 1982	Primary Census Abstract for Scheduled Castes and Scheduled Tribes
Paper 1 of 1984	Household Population by Religion of Head of Household

STATE GOVERNMENT PUBLICATIONS

Part XIII-A&B District Census Handbook for each of the 45 districts in the State.
(Village and Town Directory and Primary Census Abstract)

विषय सूची

व्याख्यात्मक टिप्पणी, अनुसूचित जाति और अनुसूचित जनजाति की सूची (संशोधन), विधेयक 1976, जिला जनगणना पुस्तिका का इतिहास और क्षेत्र। विश्लेषणात्मक टिप्पणी	Notes & Explanations; List of Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976, History and Scope of District Census Handbook, Analytical Note	
तहसीलों के नक्शे	Tahsil Maps	
6 खंड क — ग्राम निर्देशिका	Section I–VILLAGE DIRECTORY	1-286
(1) वर्णक्रमानुसार ग्रामों की सूची	Alphabetical list of Villages	
(i) लखनादौन तहसील		3–17
(ii) सिवनी तहसील		17–31
	(i) Lakhnadon Tahsil	32–45
	(ii) Seoni Tahsil	45–58
(2) ग्राम निर्देशिका में उपयोग किये गये "कोड" के संबंध में टिप्पणी	Notes Explaining the "Code" used in the Village Directory.	59–61
(3) ग्राम निर्देशिका	Village Directory	62-229
(i) लखनादौन तहसील	Lakhnadon Tahsil	62–147
(ii) सिवनी तहसील	Seoni Tahsil	148–229
(4) परिशिष्ट 1– शैक्षणिक, चिकित्सा एवं अन्य सुविधाओं का तहसीलवार सार	Appendix I — Tahsilwise Abstract of Educational, Medical and other amenities	230–233

पृष्ठ संख्या Pages

(5) परिशिष्ट 2– गैर-नगरपालिका नगरों (जनगणना नगर) में भूमि उपयोग संबंधी आंकड़े — Appendix II– Land utilisation data in respect of Non-Municipal Towns (Census Towns) — 234

(6) परिशिष्ट 3– ग्रामों की तहसीलवार सूची जहां शैक्षणिक, चिकित्सा, डाक व तार, बाजार/हाट के दिन या दिनों के नाम, संचार तथा बिजली की आपूर्ति की सुविधायें उपलब्ध नहीं है — Appendix III– Tahsilwise list of Villages where no Educational, Medical, Post & Telegraph, Day or Days of Market/Hat, Communications and Power supply facilities are available — 235–242

(7) परिशिष्ट 4– कुल जनसंख्या में अनुसूचित जातियों एवं अनुसूचित जन-जातियों के श्रेणीवार अनुपात के अनुसार ग्रामों की सूची — Appendix IV– List of Villages according to the proportion of Scheduled Castes and Scheduled Tribes to the Total Population by ranges — 243–286

7 खंड ख — नगर निर्देशिका — Section II–TOWN DIRECTORY — 287–306

(1) नगर निर्देशिका में उपयोग किये गये 'कोड' के संबंध में टिप्पणी — Notes explaining the "Codes" used in the Town Directory — 288–291

(2) विवरण–1 प्रस्थिति एवं वृद्धि इतिहास — Statement I– Status and Growth History — 292–293

(3) विवरण–2 प्राकृतिक स्वरूप तथा नगरों की प्रस्थिति, 1979 — Statement II– Physical Aspects and Location of Towns, 1979. — 294–295

(4) विवरण–3 नगरपालिका वित्त, 1978–79 — Statement III– Municipal Finance, 1978–79. — 296–297

(5) विवरण–4 नागरिक और अन्य सुविधायें, 1978–79 — Statement IV– Civic and other Amenities, 1978–79. — 298–299

(6) विवरण–4 क-अधिसूचित गन्दी बस्तियों में नागरिक और अन्य सुविधायें, 1979 — Statement IV-A–Civic and other amenities in Notified Slums 1979. — 300–301

(7) विवरण–5 चिकित्सा, शैक्षिक, मनोरंजन एवं सांस्कृतिक सुविधायें, 1979 — Statement V– Medical, Educational, Recreational and Cultural Facilities, 1979. — 302–303

(8) विवरण–6 व्यापार, वाणिज्य, उद्योग और बैंकिंग, 1979 — Statement VI– Trade, Commerce, Industry and Banking, 1979. — 304–305

8 परिशिष्ट–नगरों में बाह्यवृद्धि क्षेत्र के साथ जनसंख्या — Appendix–Towns showing their Outgrowths with population — 306

प्राक्कथन

जनगणना संगठन द्वारा राज्य सरकारों की ओर से संकलित जिला जनगणना पुस्तिका जनगणना की एक बहुमूल्य उपलब्धि है। जिला जनगणना पुस्तिका की योजना निर्माताओं, प्रशासकों, विद्वानों और अनुसधान कर्त्ताओं को बार-बार आवश्यकता होती है। अन्य बातों के साथ-साथ इस पुस्तिका का उपयोग निर्वाचन क्षेत्रों के परिसीमन, स्थानीय स्तरों के निर्धारण और क्षेत्रीय योजनायें बनाने में भी किया जाता है। यह पुस्तिका जिला प्रशासन चलाने में भी सहायक होती है। जिला जनगणना पुस्तिका ही एक मात्र ऐसा प्रकाशन है जिससे ग्रामीण क्षेत्रों के ग्राम स्तर तक के एवं प्रत्येक नगरीय क्षेत्र के वार्ड वार प्राथमिक जनगणना सार के आंकड़े उपलब्ध होते हैं। इसमें ग्रामों और नगरों आदि मे उपलब्ध आंतरिक सुविधाओं के बारे में भी जानकारी मिलती है।

जिला जनगणना पुस्तिका की शृंखलाओं का प्रारम्भ 1951 की जनगणना में किया गया था। इसमें जिले के प्रत्येक ग्राम और नगर का प्राथमिक जनगणना सार और जनगणना की महत्वपूर्ण सारणियां थीं। 1961 के दौरान जिला जनगणना पुस्तिका के विषय क्षेत्र का विस्तार किया गया। इसमें जिले का विस्तृत ब्यौरा, प्रशासनिक सांख्यिकी, जनगणना सारणियां और प्राथमिक जनगणना सार को मिलाकर ग्राम और नगर निर्देशिका भी शामिल की गई। 1971 की जिला जनगणना पुस्तिका की शृंखलाओं को तीन भागों में बांटा गया था। क-भाग में ग्राम और नगर निर्देशिका, ख-भाग में ग्राम और नगर का प्राथमिक जनगणना सार और ग-भाग में विश्लेषणात्मक रिपोर्ट, प्रशासनिक सांख्यिकी, जिला जनगणना सारणियां, प्राथमिक जनगणना सार पर आधारित कुछ विश्लेषणात्मक रिपोर्ट और ग्रामों के बारे में वहां उपलब्ध सुविधाओं के आंकड़े शामिल थे। तथापि, कुछ राज्यों में इसमें केवल जिला जनगणना सारणियां ही दी गई थी। कुछ ऐसे भी मामले थे जहां संकलन और मुद्रण में देरी होने से उक्त पुस्तिका प्रकाशित ही नहीं की गई।

1981 की जिला जनगणना पुस्तिका के फार्म तैयार करते समय ग्राम और नगर निर्देशिका के फार्मों में कुछ नए कालम जोड़कर उन्हें फिर से तैयार किया गया। उक्त फार्म बनाते समय 1971 के आंकड़ों की तुलनात्मकता को भी ध्यान में रखा गया है। ग्रामों में बिजली की आपूर्ति के अलावा बाकी उपलब्ध सभी सुविधाओं को ग्राम निर्देशिका में इस अनुदेश के साथ दिखाया गया है कि यदि कोई विशिष्ट सुविधा किसी ग्राम में उपलब्ध नहीं है तो जिस भी निकटतम ग्राम में उक्त सुविधा उपलब्ध है, तो उसकी दूरी भी बताएं। ग्राम निर्देशिका के फार्मों को पुन: तैयार करते समय ग्रामीण क्षेत्र में उपलब्ध समस्त आंतरिक सुविधाओं, विशेषकर सुविधाओं और भूमि उपयोग की किस्मों के बारे में और व्यापक आंकड़े समाविष्ट करने से यह आशा की जाती है कि इससे माइक्रोस्तरीय योजना की आवश्यकता और पूरी हो सकेगी। इससे न केवल स्थानीय क्षेत्रों में योजना तैयार करने में सहायता मिलेगी अपितु माल और सेवाओं को भी विनियमित करने और विकास प्रक्रिया में क्षेत्रीय असंतुलन को कम करने में भी सहायता मिलेगी। संशोधित न्यूनतम आवश्यकता कार्यक्रम की कुछ आवश्यकताओं की पूर्ति के लिये संबंधित जानकारी की कुछ नई मदें जोड़ी गई है। ये नई मदें है : प्रौढ़ शिक्षा केन्द्र, प्राथमिक स्वास्थ्य-उप केन्द्र ग्रामों में सामुदायिक स्वास्थ्य कार्यकर्त्ताओं संबंधित मदों को उक्त उद्देश्य को ध्यान मे रखते हुए ग्राम निर्देशिका में जोड़ा गया है। किसी गांव में आने-जाने के साधनों के बारे में जो नया मद जोड़ा गया है उसका अभिप्राय जिले के उन ग्रामों की जानकारी एकत्रित करनी है जिसमें आना जाना बहुत कठिन है अर्थात जो अगम्य है। एक नया कालम "कुल जनसंख्या और परिवारों की संख्या" को यह ज्ञात करने के लिये जोड़ा गया है कि उनके गांव की जनसंख्या और परिवार संख्या कितनी है और उनके अनुसार कितनी सुविधाएं उपलब्ध हैं। दो नये परिशिष्ट और जोड़े गए है जिनमे से एक उन ग्रामों के बारे में है जहां कोई सुविधा उपलब्ध नहीं है तथा दूसरी, कुल जनसंख्या के अनुपात में अनुसूचित जाति और अनुसूचित जनजाति की जनसंख्या से संबंधित है।

नगर निर्देशिका के फार्मों में भी कुछ संशोधन किए गए हैं जिससे कि कुछ मदों के बारे में जानकारी मिल सके और न्यूनतम आवश्यकता कार्यक्रम की आवश्यकताओं की पूर्ति हो सके। इसी उद्देश्य को ध्यान में रखते हुए श्रेणी-I श्रेणी-II के कस्बों की गन्दी बस्तियों में नागरिक और अन्य सुविधाओं के बारे में एक नया विवरण (विवरण-IV क) जोड़ा गया है। आशा की जाती है कि इससे प्राप्त जानकारी आयोजकों को गन्दी बस्तियों के सुधार के लिये कार्यक्रम तैयार करने में सहयोग देगी। इसी बात को ध्यान में रखते हुए नागरिक और अन्य सुविधाओं के बारे में विवरण IV में अनुसूचित जातियों और अनुसूचित जनजातियों से संबंधित कालम और विवरण-V में शैक्षिक सुविधाओं के अंतर्गत प्रौढ़ शिक्षा कक्षाएं / केन्द्रों के बारे में अन्य बातों के साथ-साथ

कालम जोड़े गए हैं। नगर निर्देशिका में एक महत्वपूर्ण परिवर्तन सभी सातों विवरणों में कस्बे की श्रेणी के बारे में है। देश के नगरीय क्षेत्रों, में उपलब्ध आंतरिक सुविधाओं की जानकारी का कस्बे की श्रेणी को ध्यान में रखते हुए सर्वोत्तम विश्लेषण किया जा सकता है। कुछ विवरणों में नागरिक प्रशासन की स्थिति और जनसंख्या के कालम जोड़ने से भी इस उद्देश्य की पूर्ति होती है।

1981 की जनगणना में भरी गई व्यक्तिगत पर्चियों के आर्थिक और अन्य प्रश्नों में जो भी परिवर्तन किए गए, उन्हीं परिवर्तनों को ध्यान में रखते हुए ग्रामों और नगरों के प्राथमिक जनगणना सार के फार्म तैयार किए गए हैं।

1981 की जिला जनगणना पुस्तिका के प्रकाशन में विलम्ब न हो, इस बात को ध्यान में रखते हुए उक्त खण्ड के भाग-क में ग्राम एवं नगर निर्देशिका तथा भाग-ख में ग्राम एवं नगर का प्राथमिक जनगणना सार और तहसील / कस्बा स्तरों तक जनगणना का प्राथमिक सारांश के साथ अनुसूचित जातियों और अनुसूचित जनजातियों के प्राथमिक जनगणना सार को भी सम्मिलित किया गया है। जिला जनगणना पुस्तिका के महत्व को संवर्धित करने के लिये उसके प्रारम्भ में एक विस्तृत विश्लेषणात्मक टिप्पणी दी गई है जिसमें विभिन्न इनसेट सारिणियां सम्मिलित हैं जो प्राथमिक जनगणना सार और अन्य सुविधाओं से संबंधित गैर जनगणना आंकड़ों पर आधारित है। प्रकाशन को पुनः और उपयोगी बनाने की दृष्टि से उपयुक्त स्थानों पर जिला और तहसील/पुलिस स्टेशन/सामुदायिक विकास खण्डों आदि के मानचित्रों को लगाया गया है। मानचित्रों में इनकी सीमाएं और अन्य महत्वपूर्ण विशेषताएं दिखाई गई हैं।

यह प्रकाशन राज्य सरकार और जनगणना संगठन के संयुक्त प्रयास का फल है। राज्य में आंकड़ों का संकलन श्री के. सी. दुबे निदेशक, जनगणना परिचालन, मध्यप्रदेश के मार्गदर्शन पर राज्य सरकार की ओर से किया गया है। राज्य सरकार ने ही इसके मुद्रण का खर्च वहन किया है। इस प्रकाशन की योजना, रूपरेखा और इसके समन्वय का कार्य मेरे कार्यालय में सामाजिक अध्ययन प्रभाग में उप महारजिस्ट्रार श्री एन. जी. नाग द्वारा किया गया। डा. बी. के रॉय, उप महारजिस्ट्रार (मानचित्र) ने मानचित्रों को तैयार करने में तकनीकी मार्गदर्शन किया। जनगणना निदेशालयों से प्राप्त आंकड़ों की संवीक्षा श्री एम. एम. दुग्गा, अनुसंधान अधिकारी के मार्गदर्शन में मुख्यालय के सामाजिक अध्ययन प्रभाग में की गई। इस परियोजना से संबंधित सभी कर्मचारियों को मैं धन्यवाद देता हूं।

FOREWORD

The district census handbook (DCH), compiled by the census organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables, and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter-alia* with this

view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/police station/C D Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K. C. Dubey, the Director of Census Operations, Madhya Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in the project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982.

PREFACE

One of the most important publications of the Census are the District Census Handbooks. This publication was begun in this caption since 1951 Census. But prior to this, a similar publication was released in the Census earlier than 1951. That publication was on the title of Village Statistics and it contains only village names and total population thereof. The 1951 Census could, therefore, be said to represent a significant step in the process of making detailed Census statistics available down upto the village level.

In fact the District Census Handbook is the most important publication at the Census and it also perhaps the most widely used. Also perhaps this is the only publication used at the micro-level down upto the tahsil and development block.

The form of the District Census Handbook has gone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view of making the basic statistics available with the data users as early as possible the District Census Handbooks have been split into 2 parts, Part-A contains the Introductory Note on the district and Town/Village Directory. This volume will be found useful to get almost all the non-Census statistics available at one place. Part—B also contains an introductory note and the Primary Census Abstract.

One of the innovation of the present Census has been in terms of allotment of Location Code numbers to the villages. In the earlier Censuses the location code system was such that the villages of a Patwari Circle were found at different serial numbers. Since the Patwari Circle still remains an important administrative unit, the location code numbers have been so given in the present Census that it may be possible to locate all the villages of a particular Patwari Circle at one place one below the other.

When the planning for the present census was started in 1979 the tahsils were still revivable as an important unit of the administration, the whole planning was, therefore, done taking tahsil as the unit. It was during the course of the census that some requests were informally received for making blockwise data available. Since these requests were received very late and were also received only in an informal manner, it has not been possible to disturb the original planning of villages arranged according to the location code numbers taking tahsil as one unit. However, additional exercise has been done and in addition to the tahsil figures blockwise figures have also been indicated. It is hoped that the availability of these blockwise data will enhance the utility of this publication.

It is hoped that this handbook will provide the basic statistical support to executive and developmental administration. It is needless to state that the proper implementation of policy depends on the ability of the administration authorities concerned.

It may be remembered that the villagewise area figures given in the Primary Census Abstract and the Village Directory are those based on the village papers while the tahsil totals given in PCA are obtained from the Land Records department, which in many cases exclude forest area.

The statistics that are contained in the district census handbooks are the result of a massive and marathon exercise in the compilation and tabulation of voluminous statistics. The compilation of the statistics contained in this volume was carried out by 9 Regional Tabulation Offices each under a Regional Deputy Director of Census Operations. These Regional Offices were run with the help of purely temporary staff-roughly about 1,500 Tabulators, about 250 Checkers and about 80 Supervisors. I am grateful to my colleagues, the Regional Deputy Directors and those temporary staff for the speed and accuracy in the editing and basic compilation of more than nearly 522 lakh slips and nearly 1 lakh of household schedules. The compilation of village directory was taken up at the headquarters and I am equally grateful to the officers and staff who have worked whole heartedly on the job in a collective and co-operative venture. It is not possible nor fair to name in this. The maps contained in the handbook have been prepared in the Cartographic Section of my office. However, the analytical note has been prepared by Shri M. L. Sharma, Deputy Director of Census Operations.

I am thankful to all who have contributed to bring this publication possible. The census organisation is also grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these handbooks and to the Controller, Printing and Stationery, Madhya Pradesh, Bhopal and his staff for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri P. Padmanabha to whom we are all deeply grateful. Our thanks are also due to Shri N. G. Nag, Deputy Registrar General (Social Studies) for all the help that we received from him and his section.

K. C. DUBEY
Director of Census Operations,
Madhya Pradesh.

		Females	14.04	10.43
Percentage of Scheduled Tribes population to total population		Persons	22.97	36.35
		Males	22.33	35.70
		Females	23.66	37.01
Number of occupied residential houses			8,929,190	141,701
Number of Villages		Total	76,603	1,663
		Inhabited	71,429*	1,606
		Uninhabited	5,174 **	57
Number of Towns			327	2

* Includes 77 inhabited villages which have been treated wholly as urban outgrowth of nearby City/Town.

** Includes 58 uninhabited villages of which Abadi Area have been merged in nearby City/Town.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, workers etc., it is not possible to appreciate the data presented in the handbook. Thus one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a bit less of a building than the Indian versions of the sky scrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent.

Concepts and Definitions

Rural/Urban :

It has been the tradition of the Indian Census to present the census data for rural and urban areas separately. In fact, in all the Censuses throughout the world this classification of census data into rural and urban units is generally recognized. However, distinction between rural and urban is not yet amenable to a single definition which would be applicable to all countries.

The definition of an urban unit at the 1971 Census was as follows —

(a) All places with a municipality, corporation, cantonment board or notified town area ;

(b) All other places which satisfied the following criteria.

  (i) A minimum population of 5,000 ;

  (ii) At least 75 per cent of male working population engaged in non-agricultural pursuits ; and

  (iii) A density of population of at least 400 per sq. km. (1,000 per sq. miles).

The same criteria is retained at the 1981 census also that comparability with the previous census could be ensured and which should provide basis for analysing of figures and urbanization in the country. But it has to be remembered that the urban criterion of 1981 varies slightly from that of 1961 and 1971 censuses is that the males working in activities such as fishing, logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 censuses, whereas in the 1981 census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Applying the criteria described above, a list of 327 towns was finalised and it is these 327 towns which are treated as urban areas for the purpose of 1981 census. The additional Secretary to the Govt. of India in the Ministry of Home Affairs sent a letter to the Chief Secretaries of the State Governments as back as 10th May, 1979, requesting them to ensure that no changes are made in jurisdiction and boundaries of municipalities and revenue villages, tahsils, sub-divisions and districts during the period from 1-1-1980 to 30-6-1981. However, subsequent to our finalization of rural and urban frame the State Government in the Local Government Department notified many places as notified areas and municipalities. Such places have not been treated as towns for the purpose of census and the secretary to Government in the Local Government Department had agreed to this arrangements. Similarly, the State Government raised the status of 6 municipal committees to that of municipal corporations. These new municipal corporations are also treated as municipal committees.

While dealing with the subject of rural and urban break up mention may be made of the area under the Special Area Development Authority. The Special Area Development Authority have been constituted under the Madhya Pradesh Nagar Tatha Gram Nivesh Adhiniyam, 1973 and they enjoy the power to function as a municipality so far as the municipal management of that area is concerned. The limits of these Special Areas include large portions of rural areas comprising number of villages

situated around the core town or village of such Special area. For example, Orchha is a SADA area in Tikamgarh district but there is no town in this area. Similarly, Malanjkhand in Balaghat district, Bhedaghat in Jabalpur district, Mandav in Dhar district and similar other cases are SADA areas but there is no urban area within that. The objective of the SADA areas perhaps is to control the future development of these areas in a planned manner and that is all. It was, therefore, not considered desirable to treat such SADA areas at par with other urban bodies like municipal corporations, municipal committees etc., and only that part of it is treated as urban which is really so. As such in the Korba SADA area only Korba town has been treated as urban and rest of the area remains in the rural frame.

Urban Agglomeration:

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a contiguous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglomeration may constitute :—

(a) A city with continuous outgrowth, (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ; or

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area :

A new concept of Standard Urban Area introduced in 1971 census will also be followed for the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are—

(i) it should have a core town of a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data have been presented for the Standard Urban Areas in 1981 also. The idea is to present basic data for those areas for four to five decades so that the urbanisation process in those areas can be studied. However, there have been minimum changes in the constituent units of the Standard Urban Areas of 1981 Census as compared to those of 1971, but the list of SUA remaines unchanged.

Size Class of Towns :

The urban areas are classified into 6 classes referred to as towns of Class I to VI. The classification is shown below—

Class I	100,000 and above
Class II	50,000 to 99,999
Class III	20,000 to 49,999
Class IV	10,000 to 19,999
Class V	5,000 to 9,999
Class VI	Less than 5,000

It is customary to treat a town having a population of 1 lac and above as a city.

Census House :

A Census House is a building or part of a building having a separete main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building had a number of flats or blocks which were independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they have been considered as separate census houses.

In some cases, however, it was difficult to apply the definition strictly. For example, in an urban area, a flat has five rooms, each having direct

entrance to common staircase the or courtyard which by definition had to be treated as five census houses. If all these five rooms were found occupied by single household entire flat was treated as one census house. In such cases singleness of use was taken into consideration to avoid undue proliferation of the number of census houses.

An occupied residential census house means a census house which is actually used for residential purposes, either wholly or partly by one or more households.

Household :

The term household in census is defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any one of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messess, hostels, residential hotels, rescue homes, jails, "Ashrams" etc., These are called institutional households. There may be one member households two member households or multi - member households. For census purposes, each one of these types is regarded as a 'household'.

There are three types of households viz, normal, institutional and houseless households. A houseless household is that which is normally found to be residing on the road side, pavements, in hume pipes under staircases, or in open, temple, mandaps, platforms and the like. Institutional households have been explained above. Those households which do not fall in the category of institutional household and houseless household have been categorised as normal households, The enumerator was required to indicate in the Household Scheduled whether the household belonged to 'Institutional household' or 'Houseless household'. For institutional 'I' was written against the question 'Type of household' and 'O' was indicated in the case of houseless household. For normal household, no entry was required to be made.

The enumeration of institutional households was done in the manner the normal households were enumerated during the enumeration period from 9th February to 28th February, 1981. The houseless households were enumerated on the night of 28th February, 1981.

Scheduled Castes and Scheduled Tribes

Scheduled Castes and Scheduled Tribes are those found in the Notification of Scheduled Castes/ Scheduled Tribes Order (Amendment) Act, 1976 (108 of 1976). By this amendment, area restrictions for most of the Scheduled Castes and Scheduled Tribes have been removed. However, the area restriction still remains in respect of Dhobi (in Bhopal, Raisen and Sehore districts) : Kotwal and Pardhi (in Bhind, Dhar Dewas, Guna, Gwalior, Indore, Jhabua, Khargone, Mandsaur, Morena, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha Districts) and Kumhar (in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi and Tikamgarh districts) Scheduled Castes. Likewise Keer and Pardhi Scheduled Tribes are still restricted only in Bhopal, Raisen and Sehore districts; Mina in Sironj sub-division of Vidisha district; Panika in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi, and Tikamgarh districts; Pardhi. Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi. Phanse Pardhi, Shikari, Takankar, Takia [in (1) Bastar, Chhindwara, Mandla, Raigarh, Seoni and Surguja districts, (2) Baihar tahsil of Balaghat district, (3) Betul and Bhainsdehi tahsils of Betul district, (4) Bilaspur and Katghora tahsils of Bilaspur district, (5) Durg and Balod tahsils of Durg district, (6) Chowki, Manpur and Mohala Revenue Inspector's Circles of Rajnandgaon district, (7) Murwara, Patan and Sihora tahsils of Jabalpur district, (8) Hoshangabad and Sohagpur tahsils of Hoshangabad and Narsimhpur districts, (9) Harsud tahsil of Khandwa district, (10) Bindra-Nawagarh, Dhamtari and Mahasamund tahsils of Raipur district.]

Persons belonging to the castes/tribes mentioned above found in the districts other than those where Scheduled have not been treated as scheduled castes or scheduled tribes as the case may be. It may be mentioned here that scheduled castes can be belong to the Hindu or the Sikh religion only, while the scheduled tribes belong to any religion. The list of Scheduled Castes and Scheduled Tribes relating to Madhya Pradesh relevant to 1981 census has been given immediately after this note as Annexure—1.

Literates and Educated Persons :

A person who can both read and write with understanding in any language is treated as literate.

A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

The test for literacy was necessary only when the enumerator had any doubt about any person returning as 'literate'. The test for literacy was ability to read any portion of the Enumerator's Instruction Booklet and to write a simple letter. Ability merely to sign one's name was not considered adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not familiar, the respondent's word was taken as correct.

All children of the age of 4 years or less were treated as illiterate even if they might be going to school and had picked up reading and writing a few words.

Classification of workers by Industrial Category :

At the 1981 Census, the questions which were canvassed in the Individual slip to elicit information on economic characteristics of the population were as follows :—

(i) Q. 14A Worked any time at all last Year ?

Yes

No (H/ST/D/R/B/I/O)

Q. 14B If yes in 14A, did you work for major part of last year ? Yes(1)/No (2)

ii Q. 15A Main activity last year ?

Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

Q. 14B Yes–Any other work any time last year ?

15B Yes (C/AL/HHI/OW)/No

Q. 14B No—Work done any time last year ? (C/AL/HHI/OW)

iii Q. 16–If No in 14A or 14B, seeking/available for work ? Yes (1)/No (2).

The above questions were formulated after detailed discussion at the Data User's Conference and technical groups. At the 1961 and 1971 Censuses, the economic questions were based on different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work, respectively. Current status approach was thought to be irrelevant in the context of our country where usual status of a worker is considered to be more appropriate.

The above questions are in three parts and have been designed in such a way that first of all it attempts to divide the population into two broad groups viz.,

(1) those who have worked any time at all during the last year, and (2) those who have not worked at all.

The latter group consists of the non-workers. This information is obtained in Q. 14-A. Having classified the population into two groups, the next attempt has been to classify those who have worked any time into Main workers and Marginal workers, on the basis of time spent on work as well as secondary work, if any, of the Main workers. If a person had worked for six months or more (180 days or more) he was treated as Main worker and if the period of work was less than six months he was regarded as a Marginal worker. In Q. 15B details of secondary work or marginal work are obtained. Finally an attempt has been made to determine whether those who are non-workers or marginal workers are seeking or are available for work.

It will thus be seen that these questions on economic aspects have been so designed as to identify all workers, full time workers or seasonal workers or marginal workers and non-workers with reference to the activities during the last one year period prior to the date of enumeration.

The various terms and definitions used in collecting the economic data have been explained briefly in the following paragraphs.

Definition of work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

For persons on regular employment or engaged in regular type of work, temporary absence during the reference period on account of illness, holiday, temporary closure, strike etc., was not a disqualification for treating them as workers.

Persons under training, such as apprentices, with or without stipends or wages were also treated as workers. In the case of a person who had been offered work but had not actually joined, he was not treated as a worker. Rent receivers, pensioners etc., were not treated as economically active unless they also engaged themselves in some economic activity.

In all these questions, the reference period is the one year ; preceding the date of enumeration. Certain types of work such as agriculture, household industry like *gur* making etc., carried on either throughout the year or only during certain seasons or part of the year, depending on the local circumstance. In all such cases the reference period has been the broad time span of the agricultural seasons preceding the enumeration.

Main Workers :

The main workers are those who have worked for a major part of the year preceding the enumeration. Main activity of a person who was engaged in more than one activity was reckoned in terms of time disposition. For example, if a person had worked as daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months, he was treated as a Main worker on the basis of total time spent on work and his main activity have been reckoned as Daily Wage Labourer since he spent major part of his time on work in this activity than as cultivator or agricultural labourer.

Marginal Workers :

Marginal workers are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of the year. For example, if a person who is mostly doing household duties, or is mainly a student, or mainly a dependent or a rentier or a beggar and the like who is basically a non-worker had done some work at some time during the reference period, he was treated as a marginal worker.

Non-Workers :

Non-workers constitute of householders, students, dependents, retired persons or rentiers, beggars, inmates of institutions, unemployed persons etc. They are persons who have not worked any time at all in the year preceding the enumeration.

Main activity of workers :

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work in the PCA at the 1981 census. A significant departure has, therefore, been made this time while presenting the data on economic activity which relate to only four broad categories indicated above as against nine industrial categories of the 1961 and the 1971 censuses. The nine categories of the 1971 census were—(i) Cultivator, (ii) Agricultural labourers, (iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, (iv) Mining, (v) Manufacturing, Processing and servicing with sub-categories—(a) At Household Industry and (b) Other than Household Industry, (vi) Construction, (vii) Trade and Commerce, (viii) Transport, Storage and Communications, and (ix) Other Services. The correspondence between the categories of 1981 and 1971 are as under—

1981 Category	1971 Category
I	I
II	II
III	V(a)
IV	III,IV,V(b),VI,VII,VIII & IX

Cultivator :

For purposes of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnuts tapioca, etc. and pulses, raw jute and kindered fibre crop, cotton etc., and 'does not' include fruit growing, vegetable growing or keeping orchards or groves or working of plantation like tea, coffee, rubber, cinchona, opium and other medicinal plantations.

Agricultural Labourer :

Persons working in another person's land for wages in money, kind or share have been treated as agricultural labourers. An agricultural labourers has no risk in the cultivation and he has no right of lease or contract on land on which he works.

Household Industry :

Household Industry is defined as an industry conducted by the head of the household himself/ herself and or by the members of the households at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify and has to be registered under the Indian Factories Act.

Household Industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithing, tailoring etc. It does not include professions such as a pleader or doctor or barber or 'dhobi' even if such professions are run at home by members of the household.

Other workers :

All workers, i.e. those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry are 'other workers'. The type of workers that come under this category include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc.

ANNEXURE I

MADHYA PRADESH

[The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976]

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The History of the District Census Handbook could be traced from the 'Village lists' brought out for every district in 1901 and 'village statistics' for every district 1911. But this was discontinued in 1921 and 1931. In 1941, however 'village statistics' were brought out by then Central Provinces and Berar Government. It was for the first time in 1951 the practice of bringing out a single volume known as the District Census Handbook, giving villagewise statistics and other census tables for the district at the cost of the State Government was initiated and is continuing since then.

The District Census Handbook, compiled by the Census Organisation on behalf of the State Government is one of the most important publications of the census and is widely used by planners, administrators, academicians and researchers.

The scope of the District Census Handbook has gone considerable change since 1951. In 1951, the District Census Handbooks contained only the Primary Census Abstract and the Census tables. In view of the usefulness of this publication, improvements were made in 1961 by including non-census data like climate, agriculture, co-operation industry, education, health etc., as also an 'Introductory Note' for each district. Unfortunately, the desire to make the district census handbook more comprehensive delayed its publication. Therefore, in 1971, it was decided to publish the district census handbook in three parts in order to release the maximum data as and when finalised. Part A contained the Village Directory which gives villagewise non-census statistics of land use, area and amenities available within the village. Part B contained the villagewise Primary Census Abstract and Part C contained varlous administrative statistics. Part A and B were, however, published in one volume since it was economical to do so as data for both the parts became available early. Parts A and B were published separately in Hindi and English versions. Collection of data for Part C was cumbursome and it took unduly long time in its finalisation, and ultimately this publication had to be abondoned in view of the enormous delay in its printing.

In 1981 census, with a view to avoid delay in bringing out of DCH series, the part containing the administrative statistics has been dropped. Thus the present series of District Census Handbook consists of two volumes viz., DCHB Part A and DCHB Part B. Part A contains the village/Town Directory and Part B contains the Town/Villagewise Primary Census Abstract of the concerned district.

Part A–Village Directory contains information about the name of village, total area of village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc.

In addition there are four appendices to the Village Directory as under—

(1) Tahsilwise abstract of educational, medical and other amenities.

(2) Land utilization data in respect of census towns.

(3) Tahsilwise list of villages where no amenities are available, and

(4) Tahsilwise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population by ranges.

The last two appendices have been included for the first time in 1981 Census. Appendix III will be helpful for planning input in areas/villages where basic infrastructure is lacking and Appendix IV will be helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to area development orientation programmes.

Similarly the Town Directory contains seven statements as below—

Statement I—Status and growth history.

Statement II—Physical aspects and location of towns.

Statement III—Municipal Finance.

Statement IV—Civic and other amenities.

Statement IV-A—Civic and other Amenities in Notified Slums.

Statement V—Medical, educational, recreational and cultural facilities.

Statement VI–Trade, Commerce & Industry and Banking.

An additional statement IV-A is meant only for Class-I and Class II towns giving the civic and other amenities in notified slums. This statement has been introduced for the first time in 1981 census.

Part B—The town/villagewise Primary Census Abstract gives the basic data like area of the village, occupied residential houses, total number of households, population by sex, as also the sexwise population of Scheduled Castes and Scheduled Tribes, literacy and population by sex into four broad industrial categories viz, cultivators, agricultural labourers, household industry and other workers, marginal workers and non-workers.

The inclusion of primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level is another important feature of the DCHB series of 1981 census.

An appendix containing Development Block-wise—'Vikas Khandwar' totals of PCA figures has also been included.

ANALYTICAL NOTE

Seoni was formed as a separate district after the annexation of this tract to the British territory in 1818. Later in December 1931, Seoni district was abolished and annexed to Chhindwara district. With the formation of the new State of Madhya Pradesh on lst November, 1956, Seoni was reborn as a separate district. The district is situated on a narrow, north-south section of the Satpura plateau in the south of Jabalpur Commissioner's Division. It lies between latitude 21°36′ and 22°57′ North and longitude 79°19′ and 80°17′ East. The district is bounded by Jabalpur district in the north, Nagpur district of Maharashtra State in the south, Chhindwara district in the west and Narsimhapur district in the north-west.

The district gets its name from the headquarters town, Seoni. The name Seoni has the origin from the word 'Seona' (*or Gudina arborea*) a specie of tree belonging to the verbenaleal family which was commonly found in this area. The wood of this tree is specially used for making *Dholak* (Trumpet).

No jurisdictional change has taken place in the boundary of the district during the decade 1971-81. The district is divided into 2 tahsils viz. Lakhnadon and Seoni of which the former is situated in the north and the latter in the south. Both the tahsils have the headquarters of the same name. Seoni is connected by both Varanasi-Nagpur National Highway No 7 and Jabalpur-Nagpur narrow gauge railway line, while Lakhnadon is connected only by road and lies on the above mentioned National Highway. Both the headquarters are also connected by State and district roads. NH 26 starting from the junction point with NH 25 at Jhansi in Uttar Pradesh passing through Lalitpur, Sagar and Narsimhapur and terminates at the junction point with NH 7 at Lakhnadon.

Physical Aspects :

The district is situated on a narrow, north-south section of Satpura Plateau and may be divided into five natural divisions *viz* (1) The Lakhnadon Plateau, (2) Upper Wainganga Valley also known as Seoni *Haveli*, (3) The Valley of Sagar and Hirri rivers, (4) The Lower Wainganga Valley (also known as the Ugri tract) and (5) The Southern Lowlands.

The Lakhnadon Plateau is a rolling country of alternating ridges and depression. It lies towards south of the northen ranges of Satpura which more or less forms the boundary line with Narsimhapur district on the north-west and with Jabalpur district on the north. The southern part of the Lakhnadon Plateau is covered with hills and thick forests. The average height of this plateau ranges from 450 metres to 610 metres above mean sea level.

The Upper Wainganga Valley is of the same height as the Lakhnadon Plateau and is separated from it by Thel and Wainganga rivers. It lies on the west of the line of hills running north-south slightly towards east of Seoni town and extending upto the border of Chhindwara district. This is rather a plain country which contains the most fertile soil and is watered by Thel and Wainganga rivers. This tract is more commonly known as the Seoni *Haveli*.

The Valley of Sagar and Hirri rivers lies on the east of the line of hills running north-south to the east of Seoni town and extending upto the eastern border of the district. This tract is watered by the Sagar and Hirri rivers. Its average height is about 500 metres above the mean sea level. The soil varies from black cotton type on the north suitable for wheat to yellow and sandy on the south suitable for rice and millets.

The Lower Valley of Wainganga is a narrow belt of rice-producing country to the west of Wainganga which makes the boundary for some distance with Balaghat district. It is separated from the Valley of Sagar and Hirri rivers by forest clad ridges running in a north-south direction.

The southern lowlands is the submontane land in the extreme south of the district. This tract is largely covered with forests and is at a lower height than the uplands of Seoni and Lakhnadon.

Rivers :

The principal river system of the district is Wainganga which takes its rise from the south of the Seoni Haveli near a village called Chhitapar (1981 Census L.C. No. 653) and flows north till its junction with river Thel, coming from Chhindwara district. After flowing a few kilometres further north, the river takes an easterly course. The Valley of Wainganga in the beginning is stony and confined by hills, but later on when it assumes its easterly course, it is an alternation of rich alluvial basins and narrow gorges. Just before reaching the eastern border of the district with Balaghat, it starts the descent to the lowlands, passing over a series of rapids and deep stony channels, overhung by walls of granite. Hirri and Sagar are the important tributaries of Wainganga. These rivers water the Valley of the same name. The Thanwar river meets Wainganga from the west.

Though Narmada runs along the north-eastern border of the district but it does not form the principal river system of the district. The Thel, Sher, Soner and Temur rivers of the Narmada system, however, take their rise in Lakhnadon tahsil. Pench river flowing from Chhindwara district forms the south-western border of Seoni district.

Flora and Fauna :

Flora : Seoni district is known for its timber resources. It has 32.46 per cent of the total geographical area under forests. The forests in this district are divided into two forest divisions *viz* North Seoni and South Seoni. Some of the important facts about forests in the district are given below.

Sl.	Particulars	Seoni District	North Seoni Division	South Seoni Division
1	2	3	4	5
1	Total Geographical Area	8,752	4,471	4,281
2	Total Forest Area	2,841	1,541	1,300
	(i) Reserve Forest	2,027	1,101	926
	(ii) Protected Forest	633	319	314
	(iii) Unclassified	121	121	..
3	Forest composition (Area)			
	(i) Teak	1,219	781	438
	(ii) Sal	..	..	..
	(iii) Misc.	1,622	760	862
4	Bamboo overlapping	138	138	..

Note ; Area figures given above are in sq.km.

It is evident that the district is covered extensively by forests. The forests in this district have been classified as Dry Deciduous type. Teak (*Tectona grandis*) is the most important timber tree growing in the forests of the district. The teak of Kurai and Khawasa is the finest. Bamboo (*Dendocalamus strictus*) grow in most forests but more dense in the forests to the north-east. Other species common in the forests of the district are *Saj (Terminalia Tomentosa)*, Dhawra (*Anogeissus latifolia*), *Tendu* (*Diospyros tomentosa*), *Lendia (Lagerstroemia parviflora)*, aonla (*phyllanthus emblica*) and *achar (Buchanania latifolia)*, *Tinsa* (*ougeinia oojeinesis*) also grows in most of the forests but it is more plentiful in the nothern forests. Salai (*Boswellia Serrata*), *Khair* (*Acacia Katechu*) are also commonly grown.

The other varieties of trees like *haldu* (*Adina Cordifolia*), dhaman (*Grewia tileaefotion*), *Shisham* (*Dalbergia latifolia*), *rohan* (*Soymida febrifuga*), *Semar* (*Bombox malabaricum*), *amaltas* (*cassia fistula*), *Kusum* (*Schleichera trijuga*), kachnar (*Bauhinia variegata*), *Koha* (*Terminalia arjuna*), are also found in the forests but they are not common.

The table given above indicates that *Sal* (*Shorea robusta*) is totally absent from the forests of this district.

Fauna : Wild life in the district is fairly good. Among the carnivorous fauna, tiger (*Felis tigris*), panther (*Felis pardus*), though not very common, are found in the district. Chital (*cerevis axis*), *Sambhar*, deer etc are also met in the forests of the district.

Climate : The climate of the district is salubrious, generally free from extreme variation of heat and cold. The year may be divided into four seasons. The cold season from December to February is followed by the summer season from March-April to May-June. the rainy season from about the third week of June to end of September. October and November constitute the retreating monsoon or post-monsoon season. December and January are the coldest months in the year when the mean minimum temperature touches 11°C and the mean maximum at 26°C. During peak summer months the mercury rises to 41°C but *loo* is not a common phenomenon here. The district* receives rainfall from the precipitation of Arabian sea monsoon. The rainy season starts from about the third week of June. July and August are the peak rainy months. The average annual rainfall of the district is 1101 mm, as recorded in 1980-81.

History* :

No authentic history of the district is available prior to the 16th century, when major portions of the district were included in the kingdom of the Gond dynasty of Garha-Mandla. Prior to that, it is believed on the doubtful strength of local legendary accounts that Seoni formed part of the kingdom of the powerful dynasty of Kalchuri kings of Tripuri, whose reign started earlier about the sixth or seven century A.D. but whose power was at its peak from the 9th to 12th centuries. The Gazetteer of Seoni district has also hinted at the possibility of the Chedi kings being ousted by the Chandelas of Mahoba, and it has even given a translation of a portion of by Dr. Grierson, suggesting a possible raid of the Chandelas into Seoni. It may be remarked that the place Guraiyaghat referred to in the translation may not be Gwariyaghat as suggested, becuase Guraiyaghat itself is the name of a village on river Gaur on the Jabalpur-Mandla road. From available inscriptional evidence, it appears that a dynasty famous as Vakataka ruled the Satpura plateau from the third century and Seoni may have formed part of their kingdom.

The authentic history of the district starts when Sangramshah, in 1530 included Ghansor, Chaurai and Dongartal in his dominions, these included a greater portion of the territory comprised in the present Seoni district. Apparently these garhs continued to be included in the kingdom of the Garha-Mandla dynasty till 1700 A. D. when the Gond king Narharshah of Mandla was obliged to cede them to Bukht Buland, the Raja of Deogarh as a price for the help rendered by him in suppressing the revolt of two Pathan feudatories-Azim Khan of Barha (in Gadarwara tahsil) and Lunde Khan of Chaurai. Bukht Buland is stated to have appointed one Ram Singh as the local governor of the district. At that time, the seat of local administration was Chaurai, but Ram Singh, on the direction of his king,

* 1961 District Census Hand Book of Seoni.

selected the site near Chhapara on the banks of the Wainganga and constructing a fort transferred the seat of administration there.

The governorship of the Dongartal garh was bestowed by Bukht Buland on one Raj Khan, a Rohilla Pathan adventurer, who had impressed the Deogarh king with his soldierly courage. He reduced the jagirdar of Pertabgarh on behalf of the Deogarh king and also added Sangarhi in Bhandara district to his possessions. Raj Khan died at Sangarhi in 1743 and was succeeded by his son Muhammad Khan.

According to the Settlement Report of 1867 of the district, it was during the administration of Ram Singh that most of the Muslim and Hindu families immigrated into the district. Ram Singh is said to have administered the territories on behalf of the Deogarh king till 1742 A. D. There is no written account of his successor, but according to the Settlement Report of 1867 he was succeeded by his relative Paharsingh who had come from Chaurai. The rule of Deogarh kings in Seoni district ended in 1743 A. D., when Raghoji Bhonsla defeated and captured Boodhan Shah, king of Deogarh. Thereafter, Seoni passed on to the kingdom of the Marathas, but Mohammed Khan continued to hold Sangarhi for three years in the name of his old master of Deogarh. Struck with this sense of loyalty Raghoji appointed him governor of Chhapara under the title of Diwan. At his death in 1789 he is said to have left the country populous and well cultivated. He was succeeded by his son Majeed Khan who in his turn was succeeded by his son Mohammad Amir Khan in 1775. It is during the administration of this Mohammad Amir Khan that the headquarters were shifted to Seoni, which till then was a small village. Mohammad Amir Khan died in 1798 and was succeeded by his son Zaman Khan. He was a very incapable ruler, and during his time, Chhapara, which was then a considerable town with 40,000 population was sacked twice by the Pindaris. At the same period, the district was troubled by bands of Gond robbers. Probably on account of his incompetence Zaman Khan was removed from the post of Diwan and in his place one Bengaji Batonea was appointed governor of the district. The period of the rule after Zaman Khan, particularly the time of one Kharak Bharti Gosai, a money lender who became governor by promising a revenue of three lakhs a year to the Bhonsla, is said to have been very bad for the people, who were subjected to very heavy taxes. After the defeat of the Marathas in the battle of Sitabuldi in 1818, Seoni became a British territory. At the time of the take-over by the British the district was much pestered by the Thugh and bands of Gond robbers, but the two menaces were gradually eliminated when the British consolidated their administration.

The war of independence of 1857 does not appear to have affected Seoni district and only one Lodhi landholder of the district in Lakhnadon tahsil joined the rebels of Jabalpur and Narsimhapur. The district continued under British administration till 1947 when the country gained its freedom.

Distribution of Area and Population.

With an area of 8,785 sq. km. according to the figures supplied by the Surveyor General of India, Seoni district contains 1.98 per cent of the total geographical area of the State. In terms of area, Seoni district is 22nd in rank among the 45 districts in the State and occupies about 10 per cent less than the average area of a district (9,854 sq. km.). It is slightly more than four times bigger in size as compared to Datia, the smallest district in the State and is about four and a half times smaller than Bastar, the biggest district.

According to 1981 Census, 809,713 persons with 408,441 males and 401,272 females have been enumerated in the district. Of these 747,009 persons are found living in 1,606 inhabited villages and another 62,704 persons living in 2 towns of the district. There are a total of 1,663 villages of which 1,606 are inhabited and 57 uninhabited. The average population per village in the district works out to 465 as against the State average of 582. It follows that the district is characterised with small sized villages. The percentage of urban population to total population of the district works out to mere 7.74 per cent while for the State as a whole it is 20.29 per cent. The district is therefore peponderantly rural in character.

The following table gives the area, population and density in the district, tahsils and towns.

Area, population and density in tahsils and towns, 1981,

District/Tahsil/Town	Total Rural Urban	Area in sq. km.	Population			Density
			Persons	Males	Females	
1	2	3	4	5	6	7
Seoni district	T	8,758.0	809,713	408,441	401,272	92
	R	8,730.7	747,009	375,415	371,594	86
	U	27.3	62,704	33,026	29,678	2,300
1 Lakhnadon Tahsil	T	3,084.1	316,816	160,508	156,308	103
	R	3,065.3	308,129	155,971	152,158	101
	U	18.8	8,687	4,537	4,150	462
Lakhnadon (NA)	U	18.79	8,687	4,537	4,150	462
2 Seoni Tahsil	T	3,522.8	492,897	247,933	244,964	140
	R	3,514.3	438,880	219,444	219,436	125
	U	8.5	54,017	28,489	25,528	6,377
Seoni (M)	U	8.47	54,017	28,489	25,528	6,377

The area figures for the district total is according to the Surveyor General of India while those of the tahsils are based on the State Survey Department which do not include the forest area as tahsilwise forest area is not available.

The density of population in the district works out to 92 persons per sq km. which is much below the State average of 118 persons per sq. km. The district is covered extensively by forests and hence it is sparsely populated. The variation in the density of population between the two tahsils is also very wide which is ascribeable to variation in forest and hilly areas among the two. Lakhnadon tahsil lies entirely on the Satpura plateau and has relatively more forests as compared to Seoni tahsil and is also does not have as fertile a soil as the later so as to contain more population.

The following table gives the distribution of villages according to the availability of different amenities.

TABLE 1

Distribution of Villages According to the Availability of Different Amenities

Sl. No.	Name of Tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Lakhnadon	815	417 (51.17)	42 (5.15)	815 (100.00)	59 (7.24)	25 (3.07)	25 (3.07)	139 (17.06)	197 (24.17)
2	Seoni	791	519 (65.61)	63 (7.96)	791 (100.00)	114 (14.41)	34 (4.30)	63 (7.96)	232 (29.33)	407 (51.45)
	Total : District	1,606	936 (58.28)	105 (6 54)	1,606 (100.00)	173 (10.77)	59 (3.67)	88 (5.48)	371 (23.10)	604 (37.61)

It is heartening to note that drinking water facility is available in almost all the villages of the district.

The district does not seem to be lagging behind so far as the spread of literacy is concerned as more than half the number of villages in the district have one or more educational institution, though mostly of primary level. Seoni tahsil is better placed with 65.61 per cent of villages having educational amenity.

So far as medical amenity is concerned there are only 105 out of a total of 1,606 villages where it is available. This accounts for only 6.54 per cent of the villages and can not be regarded as adequate.

Amenities of post & telegraph market or *hat*, communications are too meagre. Such amenities are available mostly in big villages. Thus the residents of smaller villages have to depend on nearby bigger villages to avail of these amenities.

The district does not appear to have good link of roads. There are hardly 23 per cent of the villages which are having approach by pucca roads. This is why the pace of economic development is slow.

A little more than 1/3rd of the total number of villages in the district have been provided with electric connections either for domestic purposes or for agriculture or for both.

Among the tahsils, Seoni tahsil is relatively better placed in respect of availability of various amenities as compared to Lakhnadon tahsil.

The following table gives the proportion of rural population served by different amenities.

TABLE 2

Proportion of Rural Population Served by Different Amenities

Sl. No.	Name of Tahsil	Total Population of inhabited villages in the tahsil	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Lakhnadon	308,129	226,220 (73.42)	52,955 (17.19)	308,129 (100.00)	62,865 (20.40)	41,348 (13.42)	38,360 (12.45)	80,695 (26.19)	115,822 (37.59)
2	Seoni	438,880	381,998 (87.04)	86,693 (19.75)	438,880 (100.00)	137,354 (31.30)	57,378 (13.07)	76,290 (17.38)	183,837 (41.89)	290,002 (66.08)
Total : District		747,009	608,218 (81.42)	139,648 (18.69)	747,009 (100.00)	200,219 (26.80)	98,726 (13.22)	114,650 (15.35)	264,532 (35.41)	405,824 (54.33)

Almost all the villages in the district have some or the other source of drinking water and thus the entire rural population of the district is better served with this amenity. Well is the main source of drinking water in the district.

As regards educational facilities in villages, about 81 per cent of the population is directly served. That is to say that the children in majority of the villages in the district can avail of this amenity within the village itself.

Although the district has made good progress in the field of medical and public health during the last 20 years, yet the number of medical institutions being far and few in the district, they hardly serve directly even one-fifth of the total rural population. Thus majority of the rural population has still to depend on other nearby villages where such facilities exist to avail of this amenity.

The percentage of population directly served by the amenity like post & telegraph works out to 26.80. Seoni tahsil is relatively better placed with 31.30 per cent of its population directly served by this amenity.

Villages having the amenity of market or *hat* cover 13.22 per cent of the rural population. Village market or *hat* is an essential feature of the village economy but it is intriguing to note that this amenity is insignificant in the district.

Majority of the villages are not linked with pucca roads and as such the district lacks in communication facilities. This is one of the greatest bottleneck in speedy economic development of the area.

Amenity of power supply is available in 604 out of a total of 1,606 villages covering a little more than 50 per cent of rural population of the district. It is obvious that the beneficiaries may not be to this extent.

TABLE 3

Distribution of villages not having certain amenities arranged by distance ranges from the places where they are available

Sl. No.	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		-5 Kms.	5-10 Kms.	10+Kms.	Total (Cols 3-5)
1	2	3	4	5	6
1	Education	642	26	2	670
2	Medical	636	619	246	1,501
3	Drinking Water	..	..	..	..
4	Post and Telegraph	932	402	99	1,433
5	Market/Hat	582	662	303	1,547
6	Communications	518	603	397	1,518

Although there are 670 out of a total of 1,606 villages where educational institutions of any kind is not available but the school going children in about 96 per cent of such villages can avail of this facility in nearby villages situated within a distance of 5 kms where such facility exists. There are only 28 villages where the distance factor is meaningful. On the whole the situation is not bad.

About 93 per cent of the villages in the district do not have any kind of medical institution and thus 81 per cent of the rural population has to depend on other nearby towns or villages where such facility exists. Of the non-medical institution villages the residents of 42.37 per cent such villages can avail of it by covering a distance of 5 kms. ; still there are a large number of villages where the residents will have to cover more that 5 kms to avail this amenity which is not a happy situation.

In respect of the other remaining amenities, the situation is not really happy.

The following table gives the distribution of villages which are having one or more amenities according to distance range from nearest town.

TABLE 4

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
0–5	42	33 (78.57)	.. ..	42 (100.00)	8 (19.05)	.. ..	3 (7.14)	30 (71.43)	24 (57.14)
6–15	215	127 (59.07)	13 (6.05)	215 (100.00)	22 (10.23)	5 (2.33)	15 (6.98)	75 (34.88)	103 (47.91)
16–50	1,179	681 (57.76)	80 (6.79)	1,179 (100.00)	124 (10.52)	47 (3.99)	61 (5.17)	241 (20.44)	435 (36.90)
51+	170	95 (55.88)	12 (7.06)	170 (100.00)	19 (11.18)	7 (4.12)	9 (5.29)	25 (14.71)	42 (24.71)
Unspecified	..	..	..	..	..	..	..	..	..
Total	**1,606**	**936 (58.28)**	**105 (6.54)**	**1,606 (100.00)**	**173 (10.77)**	**59 (3.67)**	**88 (5.48)**	**371 (23.10)**	**604 (37.61)**

Majority of the villages (73.41 per cent) are situated at a distance range of 16-50 kms. from an urban centre which is an indication of the fact that not many villages in the district are exposed to urban influence. There are 42 villages which are within a distance range of 0-5 km from an urban centre which are having maximum number of amenities. Generally speaking various amenities become avaliable in bigger villages but the figures given in the above table reveal that availability of certain amenities in villages depends on its proximity from an urban centre.

The following table gives the distribution of villages according to population range and amenities available.

TABLE 5

Distribution of villages according to population range and amenities available

Range of Population	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
Less than 499	1,118	459 (41.06)	18 (1.61)	1,118 (100.00)	24 (2.15)	8 (0.72)	18 (1.61)	192 (17.17)	300 (26.83)
500–1,999	466	456 (97.85)	69 (14.81)	466 (100.00)	128 (27.47)	33 (7.08)	54 (11.59)	158 (33.91)	283 (60.73)
2,000–4,999	19	18 (94.74)	15 (78.95)	19 (100.00)	18 (94.74)	15 (78.95)	13 (68.42)	18 (94.74)	19 (100.00)
5,000+	3	3 (100.00)	3 (100.00)	3 (100 00)	3 (100.00)	3 (100.00)	3 (100.00)	3 (100.00)	2 (66.67)
Total	**1,606**	**936 (58.28)**	**105 (6.54)**	**1,606 (100.00)**	**173 (10.77)**	**59 (3.67)**	**88 (5.48)**	**371 (23.10)**	**604 (37.61)**

Majority of the villages in the district are small sized. It may be noticed that the villages having population more than 5000 are having all types of amenities except one such village is without power supply. It is also evident from the above figures that more amenities are available in bigger villages.

The following table gives the main staple food in majority of the villages in each tahsil of the district.

TABLE 6

Main staple Food in The Majority of villages in each taluk.

No	Name of Tahsil	Main Staple food
1	2	3
1	Lakhnadon	Wheat, Rice
2	Seoni	Rice, Wheat

Wheat is the most important staple food of majority of the population in Lakhnadon tahsil. The next important staple food is rice in this tahsil. This is because this tahsil has rich wheat growing tract. While in Seoni tahsil rice forms the main staple food and wheat being the next important staple food of the population. This is again due to the fact that the low lying tract with yellow and sandy soil suitable for rice or millets is situated in this tahsil.

The following table gives the distribution of villages according to land use.

TABLE 7

Distribution of Villages According to Land use

Sl. No.	Name of Tahsil	No. of inhabited Villages	Total area (in hectare)	Percentage of cultivable area to total area	Percentage of irrigated area to total Cultivable area
1	2	3	4	5	6
1	Lakhnadon Tahsil	815	304,909.00	234,947.00 (77.05)	2,202.00 (0.94)
2	Seoni Tahsil	791	354,063.00	260,590.00 (73.60)	23,304.00 (8.94)
	Total : District	**1,606**	**658,972.00**	**495 537.00 (75,20)**	**25,506.00 (5 15)**

According to village papers 75.20 per cent of the total geographical area (leaving out area under the 2 urban units which is not significant) of the district is available for cultivation. Lakhnadon tahsil has relatively large (77.05 per cent) proportion of its total area which is cultivable. The corresponding State average stands at 42.38 per cent. The percentage of irrigated area to total cultivable area of the district is 5.15 which is insignificant. It is only in Seoni tahsil that 8.94 per cent of the cultivable land is irrigated. Canal is the major source of irrigation. The district is therefore far behind in exploiting the irrigation potential available there. The table below gives the cropping pattern of the district.

Table 7.1

Cropping Pettern, 1980-81

Crop	Area in hectares	Per cent to total cropped area
1	2	3
Cereals		
Rice	91,331	23.41
Wheat	77,564	19.88
Jowar	20,671	5.30
Maize	7,663	1.96
Barley	29	0.01
Other Cereals & Millets	64,566	16.55
Pulses		
Gram	25,436	6.52
Urad	9,384	2.41
Masur	9,355	2.40
Tur	4,640	1.19
Other pulses	22,442	5,75
Oilseeds		
Til	7,118	1.82
Alsi	16,789	4.30
Groundnut	2,829	0.07
Soyabin	1,100	0.00
Others	21,024	66.30
Sugarcane	612	0.18
Condiment and spices	897	0.23
Vegetables	1,556	0.40
Fibre	2,142	0.55
Others	2,873	0.74

Rice is the most important crop grown in the district followed by wheat crop. The soil type of the district is so varied that the Lakhnadon plateau is good for wheat while the low lying tract of the valley of Sagar and Hirri is mainly rice growing. Bajra is not common to this area.

The following table gives the growth, density and sex-ratio of urban population in the district.

TABLE 8

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

	Seoni District						Madhya Pradesh					
Census year	Total Population	Urban Population	%Urban Population	Decadal Percentage variation in urban population	Density (Population per sq. km.) Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	434,061	25,024	5.77	+21.65	4,830	901	26,071,637	3,132,937	12.02	+33.16	2,034	907
1961	523,741	30,274	5.78	+20.98	3,562	926	32,372,408	4,627,234	14.29	+47.70	2,482	856
1971	668,352	43,576	6.52	+43.94	3,128	919	41,654,119	6,784,767	16.29	+46 63	2,378	868
1981	809,713	62,704	7.74	+43.90	2,300	899	52,178,844	10,586,459	20.29	+56.03	2,170	884

The proportion of urban population in the district has increased from 5.77 per cent in 1951 to 7.74 per cent in 1981 while for the State as a whole it has gone up from 12.02 per cent to 20.29 per cent during this period. It follows that the pace of urbanisation in the district has been very slow. It had the only town, Seoni till 1971 Census. The new town added for the first time in 1981 is Lakhnadon with a population of 8,687 which can be regarded as a grown up village.

Density :

It is ridiculous to note that the density of urban population in the district has gone down from 4,830 persons per sq. km in 1951 to 2,300 persons per sq. km. in 1981 while the population has more than doubled during this period. This is mainly on account of the fact that increase in the municipal limits and addition of new town have led to the inclusion of large chunk of uninhabited area mostly farm land which has resulted in the reduction of density figures in 1981.

Sex-ratio :

The sex-ratio i. e. the number of females per 1,000 males of the urban population has always been adverse to females both in the case of the district as well as for the State as a whole. It is however, noticeable that the position has further deteriorated in 1981 over that of 1971 in the district whereas it has improved in the State.

The following table gives the details of new towns/towns declassified in 1981 Census.

TABLE 9

New Towns/Towns declassified in 1981 Census

Name of Town	Population 1981 Census
1	2
(a) Added	
Lakhnadon	8,687
(b) Declassified	
Dungaria Chhapara	7,950

Lakhnadon being the tahsil headquarters of the same name has been added as a new town for the first time in 1981 Census. There are, however three more places in the district, Dungaria Chhapara (pop 7,950, 1981 L. C.No. 695 in Lakhnadon tahsil and Kalari (pop. 5,576), 1981 L. C. No. 166) and Barghat (pop. 5878, 1981 L. C. No. 562) in Seoni tahsil who fulfill the population criterion of more than 5,000 for being declared as a town but they failed in the other tests laid down for the purpose. Of these, Dungaria Chhapara was town in 1971 but got declassified.

The following table gives the per capita receipt and expenditure in towns.

TABLE 10

Per capita receipt and expenditure in towns

Class, Name and civic status of the town	Per capita								
	Receipt			Expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expen-diture	General adminis-tration	Expenditure on public health and convenience	Public works	Expen-diture on public institutions-	Other aspect
1	2	3	4	5	6	7	8	9	10
V Lakhnadon (NAC)	18.42	13.07	5.35	18.42	3.34	7.83	1.15	0.34	5.76
II Seoni (M.C.)	43.77	9.56	37.21	48.98	8.25	25.35	3.88	6.71	4.79
Total : District	**42.85**	**10.05**	**32.80**	**44.75**	**7.57**	**22.93**	**3.50**	**5.83**	**4.92**

In Lakhnadon the per capita expenditure is well within the limits of the per capita receipt, while Seoni municipality has spent more than what it has earned during the year under report.

As regards financial standing in these towns, Lakhnadon is very poor as it is in its infancy but the main source of earning has been through taxes whereas Seoni municipality with its long standing depends upon other sources, possibly government grants. It is heartering to note that Seoni municpality spents bulk of its resources on public health and conveniences and reasonably good on other welfare activities.

The following table gives the number of schools per 1000 population in towns.

TABLE 11

Schools per ten thousand population in towns

Class, Name and civic status of town		No. per ten thousand population			
		Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1		2	3	4	5
V	Lakhnadon (NAC)	2.30	...	2.30	2.30
II	Seoni (M.C.)	0.56	..	1 30	2.96
All Towns		**0.80**	..	**1.44**	**2.87**

In terms of the number of institutions per one thousand population, Seoni has relatively higher average of 2.96 in respect of primary level institution whereas Lakhnadon has higher average in respect of Middle and Higher level institutions. The low average in Seoni town should not be taken to have a lower coverage since the institutions in this town are relatively bigger with wide coverage. The literacy rate in Seoni town is also high (62.28 per cent) as compared to that of Lakhnadon (56.65 per cent).

The following table gives the number of beds in medical institutions.

TABLE 12

Number of Beds in Medical Institutions in Towns.

Class, name and civic status of the towns		No. of beds in medical institutions per 1,000 population.
1		2
V	Lakhnadon (NAC)	3.57
II	Seoni (MC)	2.26
All Towns		**2.44**

Although Seoni is the district headquarters town but the number of the beds per 10,0 0 population is less (2.26) as compared to the small town Lakhnadon with an average of 3.57. But the nature of medical facility in the former may be certainly better because of its having the District Hospital with Civil Surgeon as its head.

The following table gives the proportion of slum population in towns.

TABLE 13

Proportion of Slums population in towns

Class, Name and civic Status of the town		Proportion of Slum population to total population	Density in slums (per sq. km)
1		2	3
II	Seoni (M.C.)	8.30	2,242
Total		**8.30**	**2,242**

The above table is meant for presenting data regarding slums in respect of class I & class II towns. Since, Seoni is the only town under the second category, the data have been presented for Seoni. The proportion of slum population is only 8.30 per cent which is not alarming as is found in many industrial towns. The density of population is also not high.

The following table gives the most important commodity manufacturred, imported and exported in towns.

TABLE 14

Most Important commodity manufactured, imported and exported in towns

Class, Name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
V Lakhnadon (NAC)	Khowa	Tendu leaf	Cement
II Seoni (MC)	Oxygen, Acid	Tendu leaf	Rice

Lakhnadon is just a grown up village with rural economic set up. Rearing of cattle and production of milk and milk product is important economic activity in this town and as such *Khowa* is manufactured in this town. There is a chemical industry in Seoni town which manufactures Oxygen and Acid.

Tendu leaf is the commodity of export in both the towns which is evident from the fact that the district has rich forests and thus this forest produce gives an important business to the people in these towns.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The Village Directory contains information about the name of village, total area of village, total population and the number of households in the village, amenities like education, medical, drinking water, post and telegraph, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc. This is further supplemented by information on copies of newspapers coming in the village, number of motor cycles/scooters/cars/jeeps and tractors available in the village.

Every village in a tahsil has been assigned a serial number which is the location code of the village to facilitate identification. Apart from the revenue villages, forest villages have also been listed. Villages that have been treated wholly or partly as urban outgrowths because of their being contiguous to an urban area have also been listed and a note indicating "included wholly or partly as urban outgrowth of such and such town" has also been given against each such village.

Information about the amenities available has been given in columns 5 to 10 of the Village Directory with the abbreviations used in different columns as indicated below: –

Where there are more than one institution of a type the number of such institutions has also been shown within brackets. If no facility or amenity is available within the village, a 'dash' is shown and next to it in brackets the distance in broad ranges viz., 5 km., 5-10 km. etc. of the nearest place where the facility/amenity is available has been indicated.

Column 5 : Educational facilities have been shown by adopting the following abbreviations :-

P — Primary School
M — Junior Secondary or Middle School
H — Matriculation or Secondary School
PUC — Higher Secondary / Intermediate/Pre-University/Junior College
C — College (graduate level and above) like Arts, Science, Commerce etc.
I — Industrial School
Tr. — Training School
AC — Adult Literacy class/centre
O — Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur these denote that the village has three Primary, two Middle and one Higher Secondary School.

If there are composite schools like Middle school with Primary classes or Higher Secondary schools with Middle classes, these have been included in the number of Primary Schools and Middle schools as the case may be.

Column 6 : Medical facilities have been shown by the use of the following abbreviations:-

H — Hospital
MCW — Maternity and Child Welfare Centre
MH — Maternity Home
CWC — Child Welfare Centre
HC — Health Centre
PHC — Primary Health Centre
PHS — Primary Health Sub-Centre
D — Dispensary
FPC — Family Planning Centre
TB — TB Clinic

NH — Nursing Home
RP — Registered Private Practitioner
SMP — Subsidised Medical Practitioner
CHW — Community Health Worker
O — Others

Column 7 : The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :—

T — Tap Water
W — Well Water
TK — Tank Water
TW — Tubewell Water
HP — Hand Pump
R — River Water
F — Fountain
C — Canal
L — Lake
S — Spring
N — Nullah
O — Others

NA — Information not available

Column 8 : Post and Telegraph facilities have been shown by adopting the following abbreviations :

PO — Post Office
TO — Telegraph Office
PTO — Post and Telegraph Office
Phone — Telephone connection

Column 10 : Communication facilities have been indicated by the following codes :—

BS — Bus Stop
RS — Railway Station
NW — Navigable Waterway (including river, canal, backwaters, etc.)

Only public transport like Bus, rail and waterway have been considered for this purpose.

Column 11 : Approach to village – This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :—

PR — Pucca Road
KR — Kaccha Road
FP — Foot Path

Column 12 : Nearest town and distance – The distance in km of the nearest town (whether located in the state or in another state) has been given in brackets under this column.

Column 13 : Power supply : For this purpose, the following codes have been used under this column.

ED — Electricity for Domestic Purpose
EAg — Electricity for Agriculture
EO — Electricity for other purposes like industrial, commercial, etc.
EA — Electricity for all purposes listed above.

Column 15–19 : Land use : Break-up of area under different type of land use viz., forest, irrigated area, unirrigated area, culturable waste and area not available for cultivation has been furnished under columns 15–19.

(a) Forest – This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land.

(b) Irrigated and unirrigated (land use) – The two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. These columns do not include gross area sown or gross cropped area.

(c) Culturable waste – It includes land fit for cultivation whether or not taken up for cultivation or once taken up for

cultivation but not cultivated for more than 5 years. Grazing land and land under groves have been included under culturable waste but this does not include 'orchards'. To be more precise culturable waste includes :

a Permanent pastures and other grazing lands,

b Land under miscellaneous trees, crops and groves,

c and cultivable lands not put to agriculture.

(d) Area not available for cultivation – This column gives the area of barren and uncultivable lands and lands put to non-agricultural uses like village sites, roads, water, rocks and hills etc.

Column 20 : This is a remark column but it has been used to indicate some important information relating to the village, For example, if there is any famous religious, historical or archaeological place in the village it has been indicated in this column. Some useful information like number of copies of news-papers coming in the village, number of motor cycles, scooters, jeeps, cars, tractors, etc., are available in the village has been given. The abbreviations used to indicate the above information relating to the village are as below:—

N – Copies of the news papers coming in the village.

M – Motor cycles/scooters available in the village.

C – Cars/Jeeps available in the village.

T – Tractors available in the village.

In case there is 'Nil' information for a village a 'dash' has been shown.

स्थानीय कोड क्रमांक	ग्राम का नाम	ग्राम का कुल क्षेत्रफल (हेक्टेयर में)	कुल जनसंख्या एवं परिवारों की संख्या	उपलब्ध जन-सुविधाएं (यदि ग्राम में सुविधाएं उपलब्ध नहीं है तो कालम में (–) डैश लगाया गया है और उसके बाद ही कोष्ठक में ग्राम से जितनी दूरी पर सुविधाएं उपलब्ध है मोटे तौर पर वह दूरी इस प्रकार दर्ज की गई है -5 कि.मी., 5-10 कि.मी. या 10+कि.मी. Amenities available(if not available within the village, a dash (–) is shown in the column and next to it in brackets, the d stance in broad ranges viz -5kms,5-10kms and 10+kms of the nearest place where the facility is available is given).

खंड ख - नगर निर्देशिका

SECTION II - TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The details of statement presented in the Town Directory, 1981 are given below :—

Statement I—Status and Growth History

This statement provides some basic data based on the Primary Census Abstract (PCA). In column 2 of the statement the class of the town has been indicated according to 1981 Census population of the core town as follows :—

Population	*Class*
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

The civic administration status of the town as in 1980 has been indicated. Where there is no civic body in the town it has been treated as *Census Town*. The following abbreviations have been used to denote the civic status of the town—

Municipal Corporation	M.Corp.
Municipal Committee/Municipality	MC
Cantonment Board	CB
Notified Area Committee	NAC
Gram Panchayat	GP
Special Area Development Authority	SADA
Census Town	CT

Column 5 : Area (Sq. Km.) as supplied by the local bodies.

Statement II—Physical Aspects and Location of Towns

This statement gives for each town, physical aspect and location of towns. In colums 6 to 12 the name of and road distance in Kms. shown within brackets, from the State headquarters,' District headquarters, Tahsil headquarters, nearest city with population 1 lac and above, Railway Station, Bus route, Navigable river Canal (if within 10 Km.) have been presented. If the name mentioned in these columns are the same as the referrent town itself the distance has been recorded as '0' (Zero). In case the railway station (Col. 10) or bus route (Col. 11) is not available in the referrent town, the name of nearest town where the facility is available with distance in Kms. from the referrent town has been presented. If navigable river/canal is passing within a distance of 10 Km. from the town the name of river / canal with distance has been presented in column 12. The abbreviation R and C stand for the River and Canal respectively.

Statement III—Municipal Finance, 1978-79

The data for this statement is collected from local administrative bodies and has been presented not only in respect of statutory bodies but also in respect of non-statutory bodies managing the civic administration of the town, if they have separate budgets and accounts of their own pertaining to the town.

Under column 12, the expenditure incurred by the civic authority on 'public safety' includes su items as fire fighting service, rescue operations during floods and fairs, etc. Likewise, column 15 includes expenditures incurred on maintenance of schools, colleges and other institutions like public libraries, museum etc. The exact items covered, may however, vary from town to town, which would depend on the practice followed in this regard by each local authority.

Statement IV—Civic and other Amenities, 1979

The information given under columns 2 to 6

indicated within brackets e. g. dispensaries (2) nursing homes (4) etc.

All types of hospitals/dispensaries etc. whether allopathic or ayurvedic or unani or homeopathic have been covered in column 4. These institutions have been indicated with the following abbreviations :—

Ayurvedic	A
Unani	U
Homeopathic	Hom

In case of allopathic, no abbreviation is given.

If no medical facility is available in the referrent town the name of the nearest town with distance there of has been given. The information on numbers of beds has not been given as it was not provided by the authorities concerned. In Columns 6 and 9, the information collected from the Education Department has been presented with the following abbreviations.

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all Categories Arts, Science and Commerce	ASC
Law	L

If there are more than one institutions of a type the number has been given against each in brackets.

Column 10—The information has been collected from the Education Department. Where the institutions are found to be located just beyond the boundaries of the town but near the referrent town and for all purpose are considered as belonging to the referrent town only, such marginal cases have been included in the town directory. If there are more than one institutions of such type the number has been given against each in brackets. The following abbreviations have been used—

Shorthand	SH
Typewriting	Type
Shorthand & Typewriting	SH Type
Others	O

The vocational institutions like Applied Art / painting College, Pharmacy College, B.Ed. College Teacher's Training Institutions, Music / Dancing School, Nursing School, etc. have been covered under 'Others'. However the type of institutions included under, Others' have been described in the introductory note.

Columns 11 & 14—The information has been collected from the district Education Officers. The following abbreviations have been used—

Primary	P
Junior Secondary or Middle School	M
Matriculation or Secondary	Such type of institution does not exit in Madhya Pradesh
Higher Secondary/Intermediate/Pre-University/ Junior College / (10+2) System whether held in Schools or Colleges.	PUC

If there are composite schools like Middle schools with Primary classes, or Higher Secondary Schools with Middle classes, these have been included in the number of Primary and Middle schools respectively. For example, if in a town, there are two primary schools and one middle school with primary classes, the number of primary schools in the town have been given as three and that of middle schools as one even though there may be only three educational institutions. This also applies in the case of higher secondary schools.

If there are more institutions of a type in the town, these have been indicated with numbers within brackets against the abbreviations e.g. D(3), M (2), H (2), etc.

Column 15—The number of Adult literacy classes has been shown.

are new additions. Information under column 6 represents Pucca and Kachha roads for which abbreviations used are PR and KR respectively. In column 7 the various types of sewearge/drainage systems have been presented as given below—

Sewer	S
Open Surface Drains	OSD
Box Surface Drains	BSD
Sylk Drains	SD
Cesspool Method	CD
Pit System	PT

In **Columns 8, 9 and 10** information collected from respective local bodies on different types of latrines has been presented. It includes public as well as private latrines.

In **Column 11**, the abbreviations used for the various prevailent methods of disposal of night soil are given below. Where more than one method is used, the information given upto two methods.

Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrine	ST
Sewerage	S

In Columns 12 and 13 the sources of protected water supply and the system of storage with capacity therein within brackets have been presented with the following abbreviations. Where more than one source or more than one system of storage exist, the information is restricted to two major sources of systems.

Column 12

Tube well water/Hand pump	TW
Tap water	TA
Well water	W
Tank water	TK

Column 13

Overhead Tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell pumping system	BWP
Pressure tank	PT

In case of availability of fire- fighting service in a town 'Yes' has been indicated, otherwise the name of the nearest place where available and the distance in Km. within brackets, have been shown.

Statement IV (A)– Civic and other amenities in Notified Slums, 1979.

Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.

In columns 4 and 5, the information collected from the State Health Department has been presented. The institutions run by private doctors have not been included. The information is limited for those institutions as are run by or aided by Government / Semi Government / Local bodies and Charitable institutions or social service agencies like the missionaries. Where the family planning centres are attached to hospital or maternity and child welfare centres or primary health centres, those have been treated as independent unit and presented separately. The maternity and child welfare centres, veneral disease clinic, chest clinic leprosy clinic have not been given separately. These have been indicated alongwith other medical institutions in column 4. The following abbreviations have been used.

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	PC
T.B. Clinic	TB
Nursing Home	NB
Others	O

If there are more than one institutions of any type the number of such institutions have been

If an educational facility is not available in the town, the name of the nearest place where the facility is available, have been given with distance in Km from the referrent town.

Column 17-19:-The information has been collected from the Excise Department and concerned local bodies. Touring Cinema talkies have not been taken into account. Community halls have been included in Column (19).

Column 20:-The information has been collected from Education Department and the local bodies who maintain public libraries and reading rooms and the following abbreviations have been used in presenting them.

Public Library	PL
Reading Room	RR

Statement VI — Trade, Commerce, Industry and Banking, 1979.

The Statement depicts information relating to three most important commodities imported, exported and manufactured. The commodities have been mentioned in order of volume. Besides, information relating to the number of banks, number of agricultural and non-agricultural societies has also been furnished.
