1981 CENSUS—PUBLICATION PLAN

(1981 Census Publications, Series 11 in All India Series will be published in the following parts)

GOVERNMENT OF INDIA PUBLICATIONS

Part I–A	Administration Report-Enumeration
Part I–B	Administration Report-Tabulation
Part II–A	General Population Tables
Part II–B	Primary Census Abstract
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on Houses and Disabled Population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes and Scheduled Tribes
Part X–A	Town Directory
Part X–B	Survey Reports on selected Towns
Part X–C	Survey Reports on selected Villages
Part XI	Ethnographic Notes and special studies on Scheduled Castes and Scheduled Tribes
Part XII	Census Atlas
Paper 1 of 1982	Primary Census Abstract for Scheduled Castes and Scheduled Tribes
Paper 1 of 1984	Household Population by Religion of Head of Household

STATE GOVERNMENT PUBLICATIONS

Part XIII–A&B District Census Handbook for each of the 45 districts in the State. (Village and Town Directory and Primary Census Abstract)

प्राक्कथन

जनगणना संगठन द्वारा राज्य सरकारों की ओर से संकलित जिला जनगणना पुस्तिका जनगणना की एक बहुमूल्य उपलब्धि है। जिला जनगणना पुस्तिका की योजना निर्माताओं, प्रशासकों, विद्वानों और अनुसंधान कर्त्ताओं को बार-बार आवश्यकता होती है। अन्य बातों के साथ-साथ इस पुस्तिका का उपयोग निर्वाचन क्षेत्रों के परिसीमन, स्थानीय स्तरों के निर्धारण और क्षेत्रीय योजनायें बनाने में भी किया जाता है। यह पुस्तिका जिला प्रशासन चलाने में भी सहायक होती है। जिला जनगणना पुस्तिका ही एक मात्र ऐसा प्रकाशन है जिससे ग्रामीण क्षेत्रों के ग्राम स्तर तक के एवं प्रत्येक नगरीय क्षेत्र के वार्ड वार प्राथमिक जनगणना सार के आंकड़े उपलब्ध होते हैं। इसमें ग्रामों और नगरों आदि में उपलब्ध आंतरिक सुविधाओं के बारे में भी जानकारी मिलती है।

जिला जनगणना पुस्तिका की शृंखलाओं का प्रारम्भ 1951 की जनगणना में किया गया था। इसमें जिले के प्रत्येक ग्राम और नगर का प्राथमिक जनगणना सार और जनगणना की महत्वपूर्ण सारणियां थीं। 1961 के दौरान जिला जनगणना पुस्तिका के विषय क्षेत्र का विस्तार किया गया। इसमें जिले का विस्तृत ब्यौरा, प्रशासनिक सांख्यिकी, जनगणना सारणियां और प्राथमिक जनगणना सार को मिलाकर ग्राम और नगर निर्देशिका भी शामिल की गई। 1971 की जिला जनगणना पुस्तिका की शृंखलाओं को तीन भागों में बांटा गया था। क-भाग में ग्राम और नगर निर्देशिका, ख-भाग में ग्राम और नगर का प्राथमिक जनगणना सार और ग-भाग में विश्लेषणात्मक रिपोर्ट, प्रशासनिक सांख्यिकी, जिला जनगणना सारणियां, प्राथमिक जनगणना सार पर आधारित कुछ विश्लेषणात्मक रिपोर्ट और ग्रामों के बारे में वहां उपलब्ध सुविधाओं के आंकड़े शामिल थे। तथापि, कुछ राज्यों में इसमें केवल जिला जनगणना सारणियां ही दी गई थी। कुछ ऐसे भी मामले थे जहां संकलन और मुद्रण में देरी होने से उक्त पुस्तिका प्रकाशित हो नहीं की गई।

1981 की जिला जनगणना पुस्तिका के फार्म तैयार करते समय ग्राम और नगर निर्देशिका के फार्मों में कुछ नए कालम जोड़कर उन्हें फिर से तैयार किया गया। उक्त फार्म बनाते समय 1971 के आंकड़ों की तुलनात्मकता को भी ध्यान में रखा गया है। ग्रामों में बिजली की आपूर्ति के अलावा बाकी उपलब्ध सभी सुविधाओं को ग्राम निर्देशिका में इस अनुदेश के साथ दिखाया गया है कि यदि कोई विशिष्ट सुविधा किसी ग्राम में उपलब्ध नहीं है तो जिस भी निकटतम ग्राम में उक्त सुविधा उपलब्ध है, तो उसकी दूरी भी बताएं। ग्राम निर्देशिका के फार्मों को पुनः तैयार करते समय ग्रामीण क्षेत्र में उपलब्ध समस्त आंतरिक सुविधाओं, विशेषकर सुविधाओं और भूमि उपयोग की किस्मों के बारे में और व्यापक आंकड़े समाविष्ट करने से यह आशा की जाती है कि इससे माइक्रोस्तरीय योजना की आवश्यकता और पूरी हो सकेगी। इससे न केवल स्थानीय क्षेत्रों में योजना तैयार करने में सहायता मिलेगी अपितु माल और सेवाओं को भी विनियमित करने और विकास प्रक्रिया में क्षेत्रीय असंतुलन को कम करने में भी सहायता मिलेगी। संशोधित न्यूनतम आवश्यकता कार्यक्रम की कुछ आवश्यकताओं की पूर्ति के लिये संबंधित जानकारी की कुछ नई मदें जोड़ी गई है। ये नई मदें है : प्रौढ़ शिक्षा केन्द्र, प्राथमिक स्वास्थ्य-उप केन्द्र ग्रामों में सामुदायिक स्वास्थ्य कार्यकर्त्ताओं संबंधित मदों को उक्त उद्देश्य को ध्यान में रखते हुए ग्राम निर्देशिका में जोड़ा गया है। किसी गाँव में आने-जाने के साधनों के बारे में जो नया मद जोड़ा गया है उसका अभिप्राय जिले के उन ग्रामों की जानकारी एकत्रित करनी है जिसमें आना जाना बहुत कठिन है अर्थात जो अगम्य है। एक नया कालम "कुल जनसंख्या और परिवारों की संख्या" को यह ज्ञात करने के लिये जोड़ा गया है कि उनके गांव की जनसंख्या और परिवार संख्या कितनी है और उनके अनुसार कितनी सुविधाएं उपलब्ध हैं। दो नये परिशिष्ट और जोड़े गए है जिनमें से एक उन ग्रामों के बारे में है जहां कोई सुविधा उपलब्ध नहीं है तथा दूसरी, कुल जनसंख्या के अनुपात में अनुसूचित जाति और अनुसूचित जनजाति की जनसंख्या से संबंधित है।

नगर निर्देशिका के फार्मों में भी कुछ संशोधन किए गए हैं जिससे कि कुछ मदों के बारे में जानकारी मिल सके और न्यूनतम आवश्यकता कार्यक्रम की आवश्यकताओं की पूर्ति हो सके। इसी उद्देश्य को ध्यान में रखते हुए श्रेणी-I श्रेणी-II के कस्बों की गन्दी बस्तियों में नागरिक और अन्य सुविधाओं के बारे में एक नया विवरण (विवरण-IV क) जोड़ा गया है। आशा की जाती है कि इससे प्राप्त जानकारी आयोजकों को गन्दी बस्तियों के सुधार के लिये कार्यक्रम तैयार करने में सहयोग देगी। इसी बात को ध्यान में रखते हुए नागरिक और अन्य सुविधाओं के बारे में विवरण IV में अनुसूचित जातियों और अनुसूचित जनजातियों से संबंधित कालम और विवरण-V में शैक्षिक सुविधाओं के अंतर्गत प्रौढ़ शिक्षा कक्षाएं / केन्द्रों के बारे में अन्य बातों के साथ-साथ

कालम जोड़े गए हैं । नगर निर्देशिका में एक महत्वपूर्ण परिवर्तन सभी सातों विवरणों में कस्बे की श्रेणी के बारे में है। देश के नगरीय क्षेत्रों, में उपलब्ध आंतरिक सुविधाओं की जानकारी का कस्बे की श्रेणी को ध्यान में रखते हुए सर्वोत्तम विश्लेषण किया जा सकता है। कुछ विवरणों में नागरिक प्रशासन की स्थिति और जनसंख्या के कालम जोड़ने से भी इस उद्देश्य की पूर्ति होती है।

1981 की जनगणना में भरी गई व्यक्तिगत पर्चियों के आर्थिक और अन्य प्रश्नों में जो भी परिवर्तन किए गए, उन्हीं परिवर्तनों को ध्यान में रखते हुए ग्रामों और नगरों के प्राथमिक जनगणना सार के फार्म तैयार किए गए हैं।

1981 की जिला जनगणना पुस्तिका के प्रकाशन में विलम्ब न हो, इस बात को ध्यान में रखते हुए उक्त खण्ड के भाग–क में ग्राम एवं नगर निर्देशिका तथा भाग–ख में ग्राम एवं नगर का प्राथमिक जनगणना सार और तहसील / कस्बा स्तरों तक जनगणना का प्राथमिक सारांश के साथ अनुसूचित जातियों और अनुसूचित जनजातियों के प्राथमिक जनगणना सार को भी सम्मिलित किया गया है। जिला जनगणना पुस्तिका के महत्व को संवर्धित करने के लिये उसके प्रारम्भ में एक विस्तृत विश्लेषणात्मक टिप्पणी दी गई है जिसमें विभिन्न इनसेट सारिणियां सम्मिलित हैं जो प्राथमिक जनगणना सार और अन्य सुविधाओं से संबंधित गैर जनगणना आंकड़ों पर आधारित है। प्रकाशन को पुनः और उपयोगी बनाने की दृष्टि से उपयुक्त स्थानों पर जिला और तहसील/पुलिस स्टेशन/सामुदायिक विकास खण्डों आदि के मानचित्रों को लगाया गया है। मानचित्रों में इनकी सीमाएं और अन्य महत्वपूर्ण विशेषताएं दिखाई गई हैं।

यह प्रकाशन राज्य सरकार और जनगणना संगठन के संयुक्त प्रयास का फल है। राज्य में आंकड़ों का संकलन श्री के. सी. दुबे *निदेशक, जनगणना परिचालन, मध्यप्रदेश के मार्गदर्शन पर* राज्य सरकार की ओर से किया गया है। राज्य सरकार ने ही इसके मुद्रण का खर्च वहन किया है। इस प्रकाशन की योजना, रूपरेखा और इसके समन्वय का कार्य मेरे कार्यालय में सामाजिक अध्ययन प्रभाग में उप महारजिस्ट्रार श्री एन. जी. नाग द्वारा किया गया। डा. बी. के रॉय, उप महारजिस्ट्रार(मानचित्र)ने मानचित्रों को तैयार करने में तकनीकी मार्गदर्शन किया। जनगणना निदेशालयों से प्राप्त आंकड़ों की संवीक्षा श्री एम. एम. दुआ, अनुसंधान अधिकारी के मार्गदर्शन में मुख्यालय के सामाजिक अध्ययन प्रभाग में की गई। इस परियोजना से संबंधित सभी कर्मचारियों को मैं धन्यवाद देता हूं।

FOREWORD

The district census handbook (DCH), compiled by the census organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables, village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter-alia* with this

view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/police station/C D Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K. C. Dubey, the Director of Census Operations, Madhya Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr.B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in the project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982.

PREFACE

One of the most important publications of the Census are the District Census Handbooks. This publication was begun in this caption since 1951 Census. But prior to this, a similar publication was released in the Census earlier than 1951. That publication was on the title of Village Statistics and it contains only village names and total population thereof. The 1951 Census could, therefore, be said to represent a significant step in the process of making detailed Census statistics available down upto the village level.

In fact the District Census Handbook is the most important publication at the Census and is also perhaps the most widely used. Also perhaps this is the only publication used at the micro-level down upto the tahsil and development block.

The form of the District Census Handbook has gone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view of making the basic statistics available with the data users as early as possible the District Census Handbooks have been split into 2 parts, Part-A contains the Introductory Note on the district and Town/Village Directory. This volume will be found useful to get almost all the non-Census statistics available at one place. Part—B contains the Primary Census Abstract.

One of the innovation of the present Census has been in terms of allotment of Location Code numbers to the villages. In the earlier Censuses the location code system was such that the villages of a Patwari Circle were found at different serial numbers. Since the Patwari Circle still remains an important administrative unit the location code numbers have been so given in the present Census that it may be possible to locate all the villages of a particular Patwari Circle at one place one below the other.

When the planning for the present census was started in 1979 the tahsils were still revivable as an important unit of the administration, the whole planning was, therefore, done taking tahsil as the unit. It was during the course of the census that some requests were informally received for making blockwise data available. Since these requests were received very late and were also received only in an informal manner, it has not been possible to disturb the original planning of villages arranged according to the location code numbers taking tahsil as one unit. However, additional exercise has been done and in addition to the tahsil figures blockwise figures have also been indicated. It is hoped that the availability of these blockwise data will enhance the utility of this publication.

It is hoped that this handbook will provide the basic statistical support to executive and developmental administration. It is needless to state that the proper implementation of policy depends on the ability of the administration authorities concerned.

It may be remembered that the villagewise area figures given in the Primary Census Abstract and the Village Directory are those based on the village papers while the tahsil totals given in PCA are obtained from the Land Records department which in many cases exclude forest area.

The statistics that are contained in the district census handbooks are the result of a massive and marathon exercise in the compilation and tabulation of voluminous statistics. The compilation of the statistics contained in this volume was carried out by 9 Regional Tabulation Offices each under a Regional Deputy Director of Census Operations. These Regional Offices were run with the help of purely temporary staff-roughly about 1,500 Tabulators, about 250 Checkers and about 80 Supervisors. I am grateful to my colleagues, the Regional Deputy Directors and those temporary staff for the speed and accuracy in the editing and basic compilation of more than nearly 522 lakh slips and nearly 1 lakh of household schedules. The compilation of village directory was taken up at the headquarters and I am equally grateful to the officers and staff who have worked whole heartedly on the job in a collective and co-operative venture. It is not possible nor fair to name in this. The maps contained in the handbook have been prepared in the Cartographic Section of my office. However, the analytical note has been prepared by Shri M. G. Mohril, Assistant Director of Census Operations.

I am thankful to all who have contributed to bring this publication possible. The census organisation is also grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these handbooks and to the Controller, Printing and Stationery, Madhya Pradesh, Bhopal and his staff for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri P. Padmanabha to whom we are all deeply grateful. Our thanks are also due to Shri N. G. Nag, Deputy Registrar General (Social Studies) for all the help that we received from him and his section.

K. C. DUBEY
Director of Census Operations,
Madhya Pradesh.

विश्लेषणात्मक टिप्पणी

ANALYTICAL NOTE

NOTES AND EXPLANATIONS

This note gives the meanings and explanation of terms and concepts used in this handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building,house, household, workers etc., it is not possible to appreciate the data presented in the handbook. Thus one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a bit less of a building than the Indian versions of the sky scrapers in one of the metropolitan cities, or that a central jail household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent.

Concepts and Definitions

Rural /Urban :

It has been the tradition of the Indian Census to present the census data for rural and urban areas separately. In fact, in all the Censuses throughout the world this classification of census data into rural and urban units is generally recognized. However, distinction between rural and urban is not yet amenable to a single definition which would be applicable to all countries.

The definition of an urban unit at the 1971 Census was as follows —

(a) All places with a municipality, corporation cantonment board or notified town area ;

(b) All other places which satisfied the following criteria.

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per sq. km. (1,000 per sq. miles).

The same criteria is retained at the 1981 census so that comparability with the previous census could be ensured and which would provide basis for analysing of figures and urbanisation in the country. But it has to be remembered that the urban criterion of 1961 and 1971 censuses is that the males working in activities such as fishing, logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 censuses, whereas in the 1981 census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Applying the criteria described above, a list of 327 towns was finalised and it is these 327 towns which are treated as urban areas for the purpose of 1981 census. The additional Secretary to the Govt. of India in the Ministry of Home Affairs sent a letter to the Chief Secretaries of the State Governments as back as 10th May, 1979, requesting them to ensure that no changes are made in jurisdiction and boundaries of municipalities and revenue villages, tahsils, sub-divisions and districts during the period from 1-1-1980 to 30-6-1981. However, subsequent to our finalization of rural and urban frame the State Government in the Local Government Department notified many places as notified areas and municipalities. Such places have not been treated as towns for the purpose of census and the secretary to Government in the Local Government Department had agreed to this arrangements. Similarly, the State Government raised the status of 6 municipal committees to that of municipal corporations. These new municipal corporations are also treated as municipal committees.

While dealing with the subject of rural and urban break up mention may be made of the area under the Special Area Development Authority. The Special Area Development Authority have been constituted under the Madhya Pradesh Nagar Tatha Gram Nivesh Adhiniyam, 1973 and they enjoy the power to function as a municipality so far as the municipal management of that area is concerned. The limits of these Special Areas include large portions of rural areas comprising number of villages

situated around the core town or village of such Special area. For example, Orchha is a SADA area in Tikamgarh district but there is no town in this area. Similarly, Malanjkhand in Balaghat district, Bheraghat in Jabalpur district, Mandav in Dhar district and similar other cases are SADA areas but there is no urban area within that. The objective of the SADA areas perhaps is to control the future development of these areas in a planned manner and that is all. It was, therefore, not considered desirable to treat such SADA areas at par with other urban bodies like municipal corporations, municipal committees etc., and only that part of it is treated as urban which is really so. As such in the Korba SADA area only Korba town has been treated as urban and rest of the area remains in the rural frame.

Urban Agglomeration:

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a contiguous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglomeration may constitute :—

(a) A city with continuous outgrowth, (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ;

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area :

A new concept of Standard Urban Area introduced in 1971 census will also be followed for the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are—

(i) it should have a core town of a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 197 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data have been presented for the Standard Urban Areas in 1981 also. The idea is to present basic data for those areas for four to five decades so that the urbanisation process in these areas can be studied. However, there have been minimum changes in the constituent units of the Standard Urban Areas of 1981 Census as compared to those of 1971, but the list of SUA remained unchanged.

Size Class of Towns :

The urban areas are classified into 6 classes referred to as towns of Class I to VI. The classification is shown below—

Class I towns	100,000 and above
Class II towns	50,000 to 99,999
Class III towns	20,000 to 49,999
Class IV towns	10,000 to 19,999
Class V towns	5,000 to 9,999
Class VI towns	Less than 5,000

It is customary to treat a town having a population of 1 lac and above as a city.

Census House :

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building had a number of flats or blocks which were independant of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they have been considered as separate census houses.

In some cases, however, it was difficult to apply the definition strictly. For example, in an urban area, a flat has five rooms each having direct

entrance to the common staircase or courtyard which by definition had to be treated as five census houses. If all these five rooms were found occupied by single household entire flat was treated as one census house. In such cases singleness of use was taken into consideration to avoid undue proliferation of the number of census houses.

An occupied residential census house means a census house which is actually used for residential purposes, either wholly or partly by one or more households.

Household :

The term household in census is defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any one of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messess, hostels, residential hotels, rescue homes, jails, "Ashrams" etc., These are called institutional households. There may be one member households two member households or multi - member households. For census purposes, each one of these types is regarded as a 'household'.

There are three types of households viz, normal, institutional and houseless households. A houseless household is that which is normally found to be residing on the road side, pavements, in hume pipes under staircases, or in open, temple, mandaps, platforms and the like. Institutional households have been explained above. Those households which do not fall in the category of institutional household and houseless household have been categorised as normal households, The enumerator was required to indicate in the Household Schedule whether the household belonged to 'Institutional household' or 'Houseless household'. For institutional 'I' was written against the question 'Type of household' and 'O' was indicated in the case of houseless household. For normal household, no entry was required to be made.

The enumeration of institutional households was done in the manner the normal households were enumerated during the enumeration period from 9th February to 28th February, 1981. The houseless households were enumerated on the night of 28th February, 1981.

Scheduled Castes and Scheduled Tribes

Scheduled Castes and Seheduled Tribes are those found in the Notification of Scheduled Castes/ Scheduled Tribes Order (Amendment) Act, 1976 (108 of 1976). By this amendment, area restrictions for most of the Scheduled Castes and Scheduled Tribes have been removed. However, the area restriction still remains in respect of Dhobi (in Bhopal, Raisen and Sehore districts) : Kotwal and Pardhi (in Bhind, Dhar Dewas, Guna, Gwalior, Indore, Jhabua, Khargone, Mandsaur, Morena, Raigarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha Districts) and Kumhar (in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi and Tikamgarh districts) Scheduled Castes. Likewise Keer and Pardhi Scheduled Tribes are still restricted only in Bhopal, Raisen and Sehore districts ; Mina in Sironj sub-division of Vidisha district ; Panika in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi, and Tikamgarh districts; Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phanse Pardhi, Shikari, Takankar, Takia in (1) Bastar, Chhindwara, Mandla, Raigarh, Seoni and Surguja districts, (2) Baihar tahsil of Balaghat district, (3) Betul and Bhainsdehi tahsils of Betul district, (4) Bilaspur and Katghora tahsils of Bilaspur district, (5) Durg and Balod tahsils of Durg district, (6) Chowki, Manpur and Mohala Revenue Inspector's Circles of Rajnandgaon district, (7) Murwara, Patan and Sihora tahsils of Jabalpur district, (8) Hoshangabad and Sohagpur tahsils of Hoshangabad and Narsimhpur district, (9) Harsud tahsil of Khandwa district, (10) Bindra-Nawagarh, Dhamtari and Mahasamund tahsils of Raipur district.

Persons belonging to the castes/tribes mentioned above found in the districts other than those where Scheduled have not been treated as scheduled castes or scheduled tribes as the case may be. It may be mentioned here that scheduled castes can belong to the Hindu or the Sikh religion only, while the scheduled tribes belong to any religion. The list of Scheduled Castes and Scheduled Tribes relating to Madhya Pradesh relevant to 1981 census has been given immediately after this note as Annexure—I.

Literates and Educated Persons :

A person who can both read and write with understanding in any language is treated as literate.

A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

The test for literacy was necessary only when the enumerator had any doubt about any person returning as 'literate'. The test for literacy was ability to read any portion of the Enumerator's Instruction Booklet and to write a simple letter. Ability merely to sign one's name was not considered adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not familiar, the respondent's word was taken as correct.

All children of the age of 4 years or less were treated as illiterate even if they might be going to school and had picked up reading and writing a few words.

Classification of workers by Industrial Category :

At the 1981 Census, the questions which were canvassed in the Individual slip to elicit information on economic characteristics of the population were as follows :—

(i) Q. 14A Worked any time at all last Year ?

Yes

(H/ST/D/R/B/I/O) No.

Q. 14B If yes in 14A, did you work for major part of last year ? Yes(1)/No (2)

ii Q. 15A Main activity last year ?

Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

15B Q. 15B Yes–Any other work any time last year ?
Q. 14B No—Work done any time last year ?

Yes (C/AL/HHI/OW)/No

C/AL/HHI/OW

iii Q. 16–If No in 14A or 14B, seeking/available for work ? Yes (1)/No (2).

The above questions were formulated after detailed discussion at the Data User's Conference and technical group. At the 1961 and 1971 Censuses, the economic questions were based on different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work, respectively. Current status approach was thought to be irrelevant in the context of our country where usual status of a worker is considered to be more appropriate.

The above questions are in three parts and have been designed in such a way that first of all it attempts to divide the population into two broad groups viz.,

(1) those who have worked any time at all during the last year, (2) those who have not worked at all.

The latter group consist of the non-workers. This information is obtained in Q. 14-A. Having classified the population into two groups, the next attempt has been to classify those who have worked any time into Main workers and Marginal workers, on the basis of time spent on work as well as secondary work, if any, of the Main workers. If a person had worked for six months or more (180 days or more) he was treated as Main worker and and if the period of work was less than six months he was regarded as a Marginal worker. In Q. 15B details of secondary work or marginal work are obtained. Finally an attempt has been made to determine whether those who are non-workers or marginal workers are seeking or are available for work.

It will thus be seen that these questions on economic aspects have been so designed as to identify all workers, full time workers or seasonal workers or marginal workers and non-workers with reference to the activities during the last one year period prior to the date of enumeration.

The various terms and definitions used in collecting the economic data have been explained briefly in the following paragraphs.

Definition of work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

For persons on regular employment or engaged in regular type of work, temporary absence during the reference period on account of illness, holiday, temporary closure, strike etc., was not a disqualification for treating them as workers.

Persons under training, such as apprentices, with or without stipends or wages were also treated as workers. In the case of a person who had been offered work but had not actually joined, he was not treated as a worker. Rent receivers, pensioners etc., were not treated as economically active unless they also engaged themselves in some economic activity.

In all these questions, the reference period is *the one year ; preceding the date of enumeration.* Certain types of work such as agriculture, household industry like *gur* making etc., carried on either throughout the year or only during certain seasons or part of the year, depending on the local circumstance. In all such cases the reference period has been the broad time span of the agricultural seasons preceeding the enumeration.

Main Workers :

The main workers are those who have worked for a major part of the year preceding the enumeration. Main activity was reckoned in terms of time disposition. For example, if a person had worked as daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months, he was treated as a Main worker on the basis of total time spent on work and his main activity have been reckoned as Daily Wage Labourer since he spent major part of his time on work in this activity than as cultivator or agricultural labourer.

Marginal Workers :

Marginal workers are those who have worked any time at all in the year preceeding the enumeration but have not worked for a major part of the year. For example, if a person who is mostly doing household duties, or is mainly a student, or a rentier or a beggar and the like who is basically a non-worker had done some work at some time during the reference period, he was treated as a marginal worker.

Non-Workers :

Non-workers constitute of householders, students, dependents, retired persons or rentiers, beggars, inmates of institutions, unemployed persons etc. They are persons who have not worked any time at all in the year preceding the enumeration.

Main activity of workers :

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work in the PCA at the 1981 census. A significant departure has, therefore, been made while presenting the data on economic activity which relate to only four broad categories indicated above as against nine industrial categories of the 1961 and the 1971 censuses. The nine categories of the 1971 census were—(i) Cultivator, (ii) Agricultural labourer, (iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, (iv) Mining, (v) Manufacturing, Processing and servicing with sub-categories—(a) At Household Industry and (b) Other than Household Industry, (vi) Construction, (vii) Trade and Commerce, (viii) Transport, Storage and Communications, and (ix) Other services. The correspondence between the categories of 1981 and 1971 are as under—

1981 Category	1971 Category
I	I
II	II
III	V(a)
IV	III,IV,V(b),VI,VII,VIII & IX

Cultivator :

For purposes of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnuts tapioca, etc. and pulses, raw jute and kindered fibre crop, cotton etc., and 'does not' include fruit growing, vegetable growing or keeping orchards or groves or working of plantation like tea, coffee, rubber, cinchona, opium and other medicinal plantations.

Agricultural Labourer :

Persons working in another person's land for wages in money, kind or share have been treated as agricultural labourers. An agricultural labourer has no risk in the cultivation and he has no right of lease or contract on land on which he works.

Household Industry :

Household Industry is defined as an industry conducted by the head of the household himself/ herself and or by the members of the households at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify and has to be registered under the Indian Factories Act.

Household Industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithing, tailoring etc. It does not include professions such as a pleader or doctor or barber or 'dhobi' even if such professions are run at home by members of the household.

Other workers :

All workers, i.e. those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry are 'other workers'. The type of workers that come under this category include factory workers, plantation workers, trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc.

ANNEXURE I

MADHYA PRADESH

[The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976]

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The History of the District Census Handbook could be traced from the 'Village lists' brought out for every district in 1901 and 'village statistics' for every district 1911. But this was discontinued in 1921 and 1931. In 1941, however 'village statistics' were brought out by then Central Provinces and Berar Government. It was for the first time in 1951 the practice of bringing out a single volume known as the District Census Handbook, giving villagewise statistics and other census tables for the district at the cost of the State Government was initiated and is continuing since then.

The District Census Handbook, compiled by the Census Organisation on behalf of the State Government is one of the most important publications of the census and is widely used by planners, administrators, academicians and researchers.

The scope of the District Census Handbook has gone considerable change since 1951. In 1951 the District Census Handbook contained only the Primary Census Abstract and the Census tables. In view of the usefulness of this publication, improvements were made in 1961 by including non-census data like climate, agriculture, co-operation industry, education, health etc., as also an 'Introductory Note' for each district. Unfortunately, the desire to make the district census handbook more comprehensive delayed its publication. Therefore, in 1971, it was decided to publish the district census handbook in three parts in order to release the maximum data as and when finalised. Part A contained the Village Directory which gives villagewise non-census statistics of land use, area and amenities available within the village. Part B contained the villagewise Primary Census Abstract and Part C contained various administrative statistics. Part A and B were, however, published in one volume since it was economical to do so as data for both the parts became available early. Parts A and B were published separately in Hindi and English versions. Collection of data for Part C was cumbursome and it took unduly long time in its finalisation, and ultimately this publication had to be abondoned in view of the enormous delay in its printing.

In 1981 census, with a view to avoid delay in bringing out of DCH series, the part containing the administrative statistics has been dropped.

Thus the present series of District Census Handbook consists of two volumes viz., DCHB Part A and DCHB Part B. Part A contains the village/Town Directory and Part B contains the Town/Villagewise Primary Census Abstract of the concerned district.

Part A–Village Directory contains information about the name of village, total area of village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food, laud use, places of religious, historical and archaeological interest etc.

In addition there are four appendices to the Village Directory as under—

(1) Tahsilwise abstract of educational, medical and other amenities.

(2) Land utilization data in respect of census towns.

(3) Tahsilwise list of villages where no amenities are available, and

(4) Tahsilwise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population by ranges.

The last two appendices have been included for the first time in 1981 census. Appendix III will be helpful for planning input in areas/villages where basic infrastructure is lacking and Appendix IV will be helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to area development orientation programmes.

Similarly the Town Directory contains seven statements as below—

Statement I—Status and growth history.

Statement II—Physical aspects and location of towns.

Statement III—Municipal Finance.

Statement IV—Civic and other amenities.

Statement IVA—Civic and other Amenities in Notified Slums.

Statement V—Medical, educational, recreational and cultural facilities.

Statement VI–Trade, Commerce & Industry and Banking.

An additional statement IV-A is meant only for Class-I and Class-II towns giving the civic and other amenities in notified slums. This statement has been introduced for the first time in 1981 census.

Part B—The town/villagewise Primary Census Abstract gives the basic data like area of the village, occupied residential houses, total number of households, population by sex, as also the sexwise population of Scheduled Castes and Scheduled Tribes, literacy and population by sex into four broad industrial categories viz., cultivators, agricultural labourers, household industry and other workers, marginal workers and non-workers.

The inclusion of Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level is another important feature of the DCHB series of 1981 census.

An appendix containing Development Block-wise—'Vikas Khandwar' totals of PCA figures has also been included.

ANALYTICAL NOTE

Satna district is situated between 23°.58 and 25°.12′ north latitudes and 80°.21′ and 81°.23′ east longitudes. The district takes it name from Satna, the headquarters town, which in turn takes it from Satna river, a tributory of Tons which flows near the town. In the north the district boundary marches with that of Banda district of Uttar Pradesh. It is bounded by Rewa district and a very small portion of Sidhi district in the east. The entire western boundary of the district is made by Panna district. While southern boundary abuts on the Murwara tahsil of Jabalpur district in the west, and Bandhogarh and Beohari tahsils of Shahdol district in the east.

Administratively the district is formed by four tahsils:- Raghurajnagar tahsil in the north (formed out of part of Raghurajnagar tahsil of erstwhile north Rewa district of erstwhile Rewa state and sanad states of Sohawal, Barondha, Paldeo, Pahra, Kamata Rajaula) Nagod tahsil (former Nagod and Jaso states) in the west, Maihar tahsil (consisting of erstwhile Maihar state) in the south-west and Amarpatan tahsil (consisting of major part of Raghurajnagar tahsil of North Rewa district of erstwhile Rewa state and of sanad state of Kothi) in the south-east.

The district has 7,502 sq. km of area and constitute 1.69 per cent of the state's area and ranks 27th among the districts of the state. The average area of a district in the state works out to 2·22 per cent. In other words the average area per district in the states comes to 9,854.35 sq. kms. The district falls short by 2,352 sq. kms of the average area of the district in the state.

The district is 3.6 times bigger than the Datia district, the smallest district of the state whereas it has about 1/5 of the area of the biggest district-Bastar in the state. The district is slightly bigger in area than Damoh (7,306 sq. kms), Vidisha (7,371 sq. kms), Panna (7,135 sq. kms), and Dewas (7,020 sq. kms), Amongst the districts of the division, it is 1.2 times bigger than the Rewa and almost half of Shahdol district. Sidhi district is 1.4 thimes bigger than the Satna district. Satna ranks third in respect of area among the districts of the Rewa division, first and second being Shahdol and Sidhi districts, respectively.

As regards population the district has 11,53,387 persons, and ranks 18th among the districts of the state constituting 2.21 per cent of the state's population. Ujjain, East Nimar and Balaghat districts has population comparable with that of Satna district. Among the districts of the Rewa division Satna district ranks third in population as in case of area. Shahdol and Rewa districts rank first and second respectively. The fourth district of the division-Sidhi has only 990, 467 population. Raipur the biggest district in the state is 2.6 times larger than the Satna district while it is more than 3.6 times bigger than the smallest district, Datia.

Physical Features

The district lies on the Vindhyan plateau with an average altitude of 1000 to 1100. Several hills rises from this plateau belonging to the vindhyan system. The southern portion of Nagod tahsil is a hilly country consisting of tangled mass of low hills enclosing considerable streches of level ground. The general height of the hills is 1700 to 1800′ but some of the hills occasionally rise to more than 800′ in the southern portion of the tahsil.

The general slope of the country in the tahsil is towards east. The Kaimur ridge, rises suddenly about twelve kilometers north of Son river in Amarpatan tahsil. A line of hills run along the north bank of the river, which gets split into various separate hills in the east of Amarpatan tahsil. In the extreme south-

east of the tahsil there are three more or less parallel such hills. The main scarp rises to more than 2000' at many points. North of Ramnagar an isolated small hill rises to 2,354. Rest of the area of the tahsil is an alluvial plain drained by Behar river.

Sandstones of Bhander series concealed by alluvium are found in south-western part of Maihar tahsil. Kaimur ridge runs through the broader eastern portion of the Maihar tahsil dividing the Mahanadi basin from that of Tons.

The southern portion of the Raghurajnagar tahsil consists of alluvial plain watered by tons and its tributories, Satna and Simarawal. A small hill with north-south strike in the southern portion of the tahsil encloses the narrow plateau. In the north of the tahsil the country is hilly. The Panna hills cross the narrowest portion of the tahsil in the west-east direction and separate the valley of the Paisuni from the plateau to the south-further north is the vindhyachal range running from west to east almost parallel to the Panna hills, through the former sanad states of Baraundha, Pathar kachhar and the Chaube jagirs. Between these two parallel ranges the country consists of a plateau interspered by hills.

In the north of the vindhyachal range lies the narrow strip of plain country.

The Kaimurs, the Panna hills, and the vindhyachal ranges of the vindhya system together with their spurs constitute the principal hill system of the district. The Kaimur range enters Maihar tahsil at village Jhukehi and runs through the entire length of Maihar and Amarpatan tahsils in an easterly direction. The Panna hills enter northern portion of the district and traverse the Raghurajnagar tahsil in a west-east direction. The vindhyachal range is in the extreme north of the district cutting across in a west-east direction.

Satna the important tributory of Tons rises from the Panna hills and flows east as long as in Nagod tahsil. It is joined by Amran river near village Kathkone in Nagod tahsil and then flows towards south making the boundary of Raghurajnagar and Nagod tahsils till it meet Tons river a few miles to the south east of Satna town. Tons, Son, and Paisuni are the important rivers of the district draining into the Bay of Bengal through the Ganga. Most of the rivers flow towards the east with an inclination towards north. Tons the principal river of the district, rises in the Kaimur hills in Maihar tahsil. Its source called the Tamasa Kund is 2,0001 above sea level on Kaimur hills. It follows the general north easterly course traversing the rough hilly country around Maihar, fertile country of Amarpatan and Raghurajnagar tahsils and then enters the Rewa district. Simrawal another affluent of Tons flows south of Kothi in Raghurajnagar tahsil till it joins Tons near village Atarhar. The Son river to the south of the Kaimur does not actually flow in the district but makes the the southern boundary of Amarpatan tahsil with Beohari tahsil of Shahdol district.

History

The early rulers of Baghelkhand are believed to be the Haihaya, Kalchuri or Chedi clan. They had acquired the fort of Kalinjar and with this as base, they extended their dominions over Baghelkhand. The Kalchuries received their first blow at the hands of Chandel chief Yashoverma who seized the fort of Kalinjar and the tract surrounding it. The Kalchuris were still a powerful tribe and continued to hold most of their possessions until the 12 th century. The chief of Rewah were Baghel Rajputs descended from the solanki clan which ruled over Gujarat from the tenth to the thirteenth century. About the middle of thirteenth century Vyaghra Deo made his way into northern India and obtained the fort of Marpha. His son Karandeo married a Kalchuri princess of Mandla and received in dowry the fort of Bandhogarh which until destruction in 1597 was the Baghel capital. Until 15 th Century the Baghels of Bandhogarh were engaged in extending their possessions and escaped the attention of Delhi rulers. The Baghel King Ramchandra was a contemporary of Akbar. Tansen, the great musician, was in the court of Ramchandra and from there he was summoned by Akbar to his court. Accession of Vikramaditya to the throne of Bandhogarh gave rise to the disturbances Akbar intervened and captured and dismantled the Bandhogarh fort in 1597 after a seize of eight months. It is after this the Rewa town started gaining importance. During the time of Raja Jaisingh a treaty was signed with the British and acknowledged the protection of British Government and agreed to arbitration of all disputes with neighbouring chiefs. At the time of

uprising of 1857 Maharaja Raghurajsingh helped the British in quelling the uprising in neighbouring Mandla and Jabalpur districts and in Nagod which is now part of Satna district. For this the king was rewarded by restoration of Sohagpur and Amarkantak parganas which were seized by the Marathas in the begining of the century. Most of the Raghurajnagar and entire Amarpatan tahsil of the present Satna district were part of the Rewa state prior to the formation of Vindhya Pradesh.

The chiefs of Nagod were Parihar Rajputs. In the seventh century they drove out the Gaharwar rulers and established themselves in the country between Mohaba and Mau. They were repulsed eastward by Chandels. In 1478 Raja Bhoja obtained Unchahara and made it the capital which remained so until 1720 when the capital was moved to Nagod by Raja Chainsingh. Later on the parihars lost all their territories to the Baghels and Bundelas. When the British became paramount after the treaty of Bassein was held to be a tributory to Panna and was included in the sanad granted to that state in 1807.

The Chiefs of Maihar state claimed descent from Kachwaha Rajput clan. Thakur Bhim Singh later entered the service of Chhatrasal of Panna. His grandson Beni Singh became Minister to Raja Hindupat, who granted him the territory which now forms most of the Maihar tahsil. Originally it has been a part of Rewa. Beni Singh constructed many tanks and and numerous buildings. He was killed in 1788. His son Rajdhar was conquered by Ali Bahadur of Banda who, however restored the state to Durjan Singh, a younger son of Beni Singh.

On his death in 1826 the state was divided between his two sons, Bishan Singh, the elder, succeeding to Maihar, while Pragdas, the younger obtained Bijai Raghogarh (now in Murwara tahsil of Jabalpur district).

Kothi now a part of Raghurajnagar tahsil of Satna district was small sanad state of about 169 square miles. The state was formerly ruled by chiefs of Bhar tribe but Jagat Rai Singh Baghel drove out the original Bhar chief and founded the Jagir. On the establishment of British supremacy Kothi was held to be subordinate to Panna. Thereafter, however, during the domination of Ali Bahadur of Banda and afterwards, the Kothi Chiefs maintained their independence. The British granted sanad in 1810 to Rais Lal Duniyapati Singh.

Sohawal was small sanad state. Its founder Fateh Singh was one of the two sons of Maharaja Amar Singh of Rewa. On the rise of Panna under Chhatrasal, Sohawal became a tributary but retained its independence. Later on Jagatrai, and Hirdeshah, sons of Chhatrasal actually seized much of its territory. On the establishment of British supremacy in nineteenth century, Sohawal was first held to be subordinate to Panna. The state was merged in Raghurajnagar tahsil in 1958.

During the Bundela supremacy Baraundha or Patharkachhar appears to have been held on a sanad from Hirdeshah of Panna. On the accession of British to paramount power Raja Mohansingh was recognised and confirmed in territory by a sanad granted in 1807.

The holders of the five petty sanad states were jijhotia Brahmins and bore the applellation of chaube. Their aptitude for military service brought them to notice and they rose to high rank under Raja Chhatrasal of Panna. The jagir now form part of Raghurajnagar tahsil.

Rainfall & climate

The district receives its rainfall from the Arabian mansoons. June to September are the months when most of the rainfall of the district is received. Maximum rainfall is received in the months of July and August. The average rainfall for the district is 1,137.1 m.m.

The seasons are clearly demarcated in the district. The hot season extends roughly from middle of February to middle of June: rainy season from middle of June to September and winter from November to middle of February. October witnesses the transition from rainy to cold season. January and December are the coldest months of the year. May and June are the hottst months in the year. Temparature rises 42°C to 45°C during the season.

Flora and fauna

Forests of the district are mixed type mostly spread over Kaimur and Panna plateau. The forest of Satna district is divided into four ranges with headquarters at Satna. These are Satna, Majhgawan Nagod and Maihar. Teak is found in Satna and Nagod range. Sal is uncommon in the forests of Satna district, Bamboo occures in almost all the forest ranges. Saja (Terminalia tomentosa), Salai (Boswellia serrata), Tendu (Diospyros tomentosa) and Khair, (Acacia catechu) are the common trees that occur in the district.

Fauna--Common animals found in the district are tiger, panthar, Sambhar, Chital and wild bear.

Villages and population

There are 2,067 villages in the district of which 1,764 are inhabited and 303 uninhabited. Among the tahsils the largest percentage of inhabited villages is in Raghurajnagar tahsil. It contains 41.2 per cent inhabited villags of the district. Nagod with 24.3 per cent inhabited villages ranks second followed by Amarpatan and Maihar with 21.3 and 13.1 per cent, respectively. Incidentally the largest percentage of uninhabited villages is also in Raghurajnagar tahsil. The district has an area of 7,502 sq. kms. The average area per inhabited village thus works out to 4.25 sq. kms. There were 2,114 villages in the district in 1971 census. In 1981 Census the total number of villages is 2,067. Thus there has been a decrease of 47 villages in 1981 census. The reasons for the decrease is due to declaration of new towns and merger of one village in Satna Town, and two each in Nagod and Unchahara towns. Details of the villages now constituting the towns and merged villages are as below :--

Name of town	Name of constituant village	Remarks
1	2	3
Amarpatan		
	1 Amarpatan	Vide notification

Besides this two villages of 1971 census bearing location code numbers 117 & 118 have besn merged in Nagod notified area committee. vide Govt. notification No. 684/XVIII/नगर/1/72 Dt. 26 Jan. 73. Two villages of Nagod tahsil bearing 1971 location Code numbers 482 and 483 have been merged with Unchahara town vide notification No. 732/XVIII/नगर/1 dated 26-1-73. One village with 1971 L. C, No. 691 was already merged in Satna Municipal town hence has not been included in the General Village register of 1981 census.

The district has a population of 1,153,387 persons of which 966,650 constitutes the rural population and the remaining 186,737 is urban, of the total population of 1,153,387 the male population is 595,753 and female population is 557, 634. There are 1764 inhabited villages in the district. Thus the average population per village works out to 554 persons. Distribution of villages and population in the district is as below :—

District/Tahsil	No. of villages (inhabited)	Toral Rural Urban	Persons	Males	Females
1	2	3	4	5	6
Satna District	1,764	T	1,153,337	595,753	557, 634
		R	966,650	494,982	471,668
		U	186,737	100,771	85,966
Raghurajnagar Tahsil	727	T	531,841	277,876	253,965
		R	399,628	205,749	193,879
		U	132,213	72,127	60,086
Nagod Tahsil	430	T	225,863	116,458	109,405
		R	203,053	104,418	98,635
		U	22,810	12,040	10,770
Amarpat an Tahsil	376	T	216,960	109,419	107,541
		R	205,507	103,426	102,081
		U	11,453	5,993	5,460
Maihar Tahsil	231	T	178,723	92,000	86,723
		R	158,462	81,389	77,073
		U	20,261	10,611	9,650

The distribution of population over the tahsils is uneven. More than two fifth of the population of of the distict is concentrated in Raghurajnagar tahsil. About 46 per cent population of the district is in Raghurajnagar tahsil. Nagod the second biggest tahsil contains roughly 1/5 of the district population. In terms of prcentage it has 19.59 per cent of district population. Amarpatan with 18.81 per cent and Maihar with 15.45 per cent population rank third and fourth in order of population.

Density

The above description gives only a broad indication of the relative populousness of each tahsil. Population density i.e. the number of persons per sq. kms. gives the clearer picture. The density of population in the district an a whole works out to 154 persons. per sq. kms, which is higher than the state figure of 118. Tahsilwise, Amarpatan is the most densely populated tahsil in the district. Maihar (159) and Raghurajnagar respectively second and third in rank have comparable population density and are nearer the district average of 154. Nagod tahsil has the lowest density (124) in the district. The lowest population density in the Nagod may be attributed to its extensive forest and comparatively poorer soils. Considering rural areas alone Satna district has 132 persons per sq. km. and the rankins of tahsils as per rural density the picture remains the same, as it is in total density. Amarpatan with 168 persons per sq. km. ranks on top followed by Maihar. Raghurajnagar and Nagod with 142, 129, and 113 persons per sq. km. in rural areas, respectively.

The different kinds of amenities available in the villages of the district are shown in the inset table below:—

TABLE 1

Distribution of Villages According to the Availability of Different Amenities

Sl. No.	Name of Tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Raghurajnagar	727	411 (56.53)	38 (5.23)	727 (100.00)	90 (12.38)	5 (0.69)	30 (4.13)	131 (18.02)	221 (30.40)
2	Nagod	430	214 (49.77)	22 (5.12)	430 (100.00)	42 (9.77)	4 (0.93)	58 (13.49)	147 (34.19)	174 (40.47)
3	Amarpatan	376	236 (62.77)	18 (4.79)	376 (100.00)	45 (11.97)	1 (0.27)	74 (19.68)	165 (43.88)	87 (23.14)
4	Maihar	231	169 (73.16)	13 (5.63)	231 (100.00)	27 (11.69)	6 (2.60)	18 (7.79)	82 (35.50)	84 (36.36)
Total District		**1,764**	**1,030 (58.39)**	**91 (5.16)**	**1,764 (100.00)**	**204 (11.56)**	**16 (0.91)**	**180 (10.20)**	**525 (29.76)**	**566 (32.09)**

There are 1,764 inhabited villages in the district. These are unevenly distributed in the four tahsils of the district. The northern tahsil, Raghurajnagar shares the largest number of villages amongst the tahsils. 41.22 per cent (727) villages of the district are in Raghurajnagar tahsil followed by Nagod tahsil which contains 24.37 per cent (430) villages of the district. Amarpatan with 21.31 per cent (376) villages of the district ranks third whereas Maihar tahsil with only 13.09 per cent (231) villages comes last.

Drinking water amenity is available in all the villages of the district. Next important amenity after drinking water comes education. Out of 1,764 inhabited villages in the district 1,030 (58.39) per cent. villages have some kind of educational amenity available in them. Next amenity in order of percentage coverage is power supply. Out of 1,764 villages in the district 566 or 32.09 per cent villages are covered by this amenity. The district seems to have made rapid progress in the field of electrification. The district gets its power supply from the Amarkantak Thermal Station in Shahdol district. This has accelerated the pace of electrification in the district particularly in rural areas. Approach by pucca road follow power supply in terms of percentage coverage. 29.76 per cent villages (525) are connected by pucca road. N. H. 7 and S. H. 6 and 11 passes through Satna district. All the tahsil headquarters are connected by fair weather road.

Post and telegraph facility is avilable in 204 villages of the district which accounts for 11.56 per cent of the total inhabited villages in the district.

Incidentally the first post office in Satna town was established in the year 1875 and since then the postal facilities in the district seems to have made steady headway. Communication amenity is available in10.20 per cent (180) villages of the district. Medical amenity is available in only 91 villages of the district which comes to meagre 5.16 per cent villages of the total villages of the district. Market/Hat amenity is available in only 16 (0.91) villages of the district. It is rather curious that market/hat amenity which is very crucial for the village economy is available in very unsingnificant percentage of villages. Tahsilwise the position of different amenities is more or less of the same pattern. Raghurajnagar which is the biggest tahsil in terms of number of villages and also in population has 56.53 per cent (411) villages where some kind of educational amenity is available. Maihar, the smallest tahsil in respect of number of villages and population content has the highest percentage of villages (73.16 per cent) having educational amenties available. Amarpatan follow Maihar tahsil with 62.77 per cent villages having educational amenity. Nagod tahsil with 214 villages having educational amenity comes last in terms of percentage coverage. Maihar tahsil ranks first in Medical amenity with 5.63 per cent of its villages having this amenity. Raghurajnagar with 5.23 per cent (38) villages comes next. Nagod tahsil with 5.12 per cent (22) villages having medical amenity ranks third while Amarpatan tahsil with 4.79 per cent of villages (18) ranks last. It would be apparent from the inset table above that medical facility in the villages of the district is very meagre and much emphasis is required to be given to improve the public health of the rural masses.

Highest number of villages (90) in Raghurajnagar tahsil have Post & Telegraph facility. It comes. to 12.38 per cent of the total number of villages in the tahsil. Amarpatan tahsil with 11.97 per cent villages (45) of the tahsil have post and telegraph amenity. Maihar tahsil with 11.69 per cent villages having this amenity follow Amarpatan tahsil. Nagod tahsil lacks in post and telegraph facility with only 42 villages out of 430 villages of the tahsil having this amenity. Market/hat is rural phenomena and it is very surprising that only 16 villages in the district have this amenity available. Even all big villages having 2,000-4,999 population do not have market amenity. Only 14 29 per cent big villages have market/hat amenity. Highest percentage of villages having market/hat amenity is in Maihar tahsil. 37.5 per cent of the villages having market and hat facility in the district are located in the Maihar tahsil alone. 2.60 per cent villages of Maihar tahsil have market/hat facility. Amarpatan has only one village having market/hat amenity. Raghurajnagar and Nagod tahsils have 5 and 4 villages, respectively having this amenity.

Amarpatan tahsil has highest number of villages among the tahsils of the district having communication amenity available in them. 19.68 per cent villages of the tahsil out of 376 villages have this amenity available. Next in terms of percentages comes the Nagod tahsil where 13.49 per cent villages of the tahsil have communication amenity. Maihar tahsil with 7.79 per cent of its villages having communication amenity ranks third among the tahsils of the district. Raghurajnagar the biggest tahsil in the district has the lowest percentage of villages having communication amenity in the district.

43.88 per cent villages (165) of Amarpatan tahsil have approach by pucca road while Maihar tahsil with 35.50 of its villages having this amenity follow next. Nagod tahsil with 34.19 per cent of its villages having approach by pucca road amenity comes next. Raghurajnagar tahsil with only 18.02 per cent of its villages having approach by pucca road comes last.

Nagod tahsil has highest percentage of villages having power supply. 40.47 per cent villages (174) of the 430 villages in the tahsil have power supply. Maihar tahsil with 36.36 per cent of its villages (84) having power supply comes next. Raghurajnagar tahsil with 30.40 per cent villages (221) having power supply ranks third among the tahsils of the district and Amarpatan with 23.14 of its villages (87) having power supply facility stands fourth in the district.

It would thus be seen that Raghurajnagar tahsil ranks first in Post & Telegraph, second in Medical, third in power supply, education and market/hat and fourth in communication and approach by pucca road. Nagod tahsil ranks first in power supply, second in market/hat, communication, third in medical, approach by pucca road, and fourth in education and post & telegraph.

Amarpatan tahsil ranks first in communication, approach by pucca road, second in Post & Telegraph & education, third and fourth in Medical, market/hat and power supply. Maihar tahsil ranks first in Education, medical & market/hat, second in approach by pucca road & power supply and third in post and telegraph and communications. Ranking of tahsils by different amenities is shown in the table below :—

Amenity	Rank of Tahsils by different amenities			
	Raghurajnagar	Nagod	Amarpatan	Maihar
1	2	3	4	5
Education	3	4	2	1
Medical	2	3	4	1
Post & Telegraph	1	4	2	3
Market/Hat	3	2	4	1
Communication	4	2	1	3
Approach by pucca road	4	3	1	2
Power supply	3	1	4	2

It would be seen from above that Raghurajnagar ranks first in post & telegraph, Nagod in power supply, Amarpatan in communications and approach by pucca road while Maihar tahsil in education, medical and market & hat. Maihar tahsil though smallest in area, number of villages and population ranks first in education, medical and market/hat. On the contrary Raghurajnagar tahsil though biggest tahsil in area, number of villages and population ranks first in post and telegraph amenity. Nagod tahsil second in area and number of villages and third in population ranks first in in power supply while Amarpatan tahsil ranking third in area and number of villages and second in population ranks first in communication and approach by pucca road. It would thus be seen that there is no corelation between population, area and the number of villages with that of amenities available. Larger tahsils like Raghurajnagar and Nagod stand lower in the ranking in basic amenities like education medical, approach by pucca road and communications.

Proportion of rural population served by different amenities is shown in the table below :—

TABLE 2

Proportion of Rural Population Served by Different Amenities

Sl. No.	Name of Tahsil	Total Population of inhabited villages in the tahsil	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Raghurajnagar	399,628	348,630	72,232	399,628	136,752	11,847	35,805	128.442	215,666
			87.24	18.07	100.00	34.22	2.96	8.96	32.14	53.97
2	Nagod	203,053	169,924	38,549	203,053	66,347	13,953	69,966	105,759	113,690
			83.68	18.98	100 00	32.67	6.87	34.46	52.08	55.99
3	Amarpatan	205,507	185,373	38,230	205,507	62,199	222	63,371	102,796	87,313
			90.20	18.60	100.00	30.27	0.11	30.84	50.02	42.49
4	Maihar	158,462	144,842	21,859	158,462	36,084	13,051	19,692	71,089	80,991
			91.40	13.79	100.00	22.77	8.24	12.43	44.86	51.11
	Total District	966,650	**848,769**	**170,870**	**966,650**	**301,382**	**39,073**	**188,834**	**408,086**	**497,660**
			(87.81)	**(17.68)**	**(100.00)**	**(31.18)**	**(4.04)**	**(19.53)**	**(42.22)**	**(51.48)**

It would be seen from the above table that 87.81 per cent rural population inhabiting in 58.39 per cent villages of the district is served by education amenity 51.48 per cent population of the district is served by power supply whereas 42.22 per cent rural population enjoys the facility of approach by pucca road. Next important amenity in population coverage is post and telegraph. 31.18 per cent of the district rural population avail the post and telegraph facility. Communication amenity is available to 19.53 per cent population of the district. Only 17.68 per cent rural population of the district avail medical amenity. It is really a matter of great concern that more than 80 per cent of rural population of the district is not served by medical amenity. Medical amenity is a primary need of the masses and more attention is required to be paid to fulfill this basic need of the rural population. Only 4 04 per cent rural population of the district is served by market/hat amenity. Out of 1764 inhabited villages in the district only 16 villages have the market/hat facility available in them. Most of the rural economy depends on the availability of market/hat facility in the village. In the absence of this facility the rural population has to trek the long distances for selling their produce and also to procure the goods of their day to day requirements, which adversely affect their economy. Tahsilwise the position is more or less in confirmity with the district. Maihar tahsil with 91.40 per cent of its population served by educational amenity ranks first in the district closely followed by Amarpatan tahsil with 90.20 per cent of its population served by this amenity. Raghurajnagar with 87.24 per cent population served by this amenity ranks third whereas Nagod tahsil with 83.68 per cent comes last in ranking of tahsils by percentage coverage. Higher percentage coverage of rural population in respect of medical amenity is in Nagod tahsil (18.98), Amarpatan (18.60) Raghurajnagar (18.07) and Maihar (13.79) follow in that order.

As regards post & telegraph, 34.22 per cent rural population of Raghurajnagar tahsil is served by this amenity which is the highest percentage in the district. Nagod with 32.67 per cent follow Raghurajnagar. Amarpatan and Maihar tahsils have percentage coverage of rural population 30.27 and 22.77 respectively. There are only 16 villages in the district which are having market/hat amenity. Of these 6 villages are in Maihar tahsil which incidentally has the highest percentage of rural population served by this amenity. Nagod tahsil with 6.87 per cent rural population comes next. 2.96 per cent rural population of Raghurajnagar tahsil ranks next. Amarpatan with only 0.11 per cent coverage of rural population ranks last. Nagod tahsil with 34.46 per cent of its population covered by communication amenity ranks first while Amarpatan with 30.84 per cent coverage of rural population comes next.12.43 per cent rural population of Maihar tahsil is served by communication amenity. Raghurajnagar tahsil with only 8.96 per cent of its rural population comes last in respect of communication amenity. 52.09 per cent rural population of Nagod tahsil is served by approach by pucca road whereas Amarpatan tahsil has 50.02 per cent of its rural population enjoy this facility. Maihar tahsil with 44.86 per cent of its population coverage ranks third in this amenity. Raghurajnagar with 32.14 per cent of its population served by approach by pucca road ranks last in the tahsils of the district.

Highest percentage of rural population in respect of power supply is covered by Nagod tahsil. 40.47 per cent of rural population of Nagod tahsil avail the facility of power supply. Maihar tahsil with 36.36 comes next. Percentage coverage of population in Raghurajnagar tahsil comes to 30.40 per cent, in Amarpatan tahsil it is 23.14 per cent. Amarpatan has lowest percentage coverage among the tahsils of the district. Distribution of villages not having certain amenities arranged by distance ranges

from the places where they are available are shown in the inset table below :—

TABLE 3

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Sl. No.	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		-5 Kms.	5-10 Kms.	10+Kms	Total (Col. 3-5)
1	2	3	4	5	6
1	Education	695	36	3	734
2	Medical	824	576	273	1,673
3	Drinking Water	..	..	..	..
4	Post and Telegraph	1,242	259	59	1,560
5	Market/Hat	450	546	752	1,748
6	Communications	963	395	226	1,584

It would be seen that out of 734 villages not having education amenity in the district 94.6 per cent villages have this amenity at a distance less than 5 kms. and 4.9 per cent villages have this amenity available at a distance range 5-10 kms. Very negligible percentage of villages have education amenity available beyond 10 kms. Out of 1673 villages in the district not having medical amenity 49.25 per cent villages avail this amenity at a distance less then 5 kms whereas 34.45 per cent villages have this amenity at a distance range 5-10 kms. 16.30 per cent villages have this amenity available at a distance of 10+ kms. About 80 per cent of the villages in the district not having post and telegraph amenity have this amenity available at a distance of less than 5 kms. While about 17 per cent villages have this amenity available at 5-10 kms. away. Only 3 per cent villages have this amenity available beyond 10 kms from the villages. Larger number of villages, i. e., 43 per cent avail the market/hat facility at a distance of 10 kms and above whereas 31 per cent villages have this amenity in the distance range 5-10 kms. 26 per cent villages have this amenity available within 5 kms. Communication amenity is available to the 60.80 per cent villages not having this amenity at a distance of less than 5 kms while 24.83 per cent villages have this amenity available at a distance 5-10 kms. 14.27 per cent villages have this amenity available at 10 kms. It would thus be seen that except market/hat other amenities are available either at a distance of less than 5 kms or between 5-10 kms away from the village for larger number of villages. Very few villages have to cover more than 10 km distance to avail these amenities. Among the tahsils villages not having amenity larger number of villages are situated in Raghurajnagar tahsil followed by Nagod tahsil. Amarpatan and Maihar tahsils follow in that order.

Distribution of villages according to the distance from nearest town and availability of different amenities is shown in the inset table below;—

TABLE 4

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
0–5	233	134 (57.51)	5 (2.15)	233 (100.00)	13 (5.58)	1 (0.43)	22 (9.44)	82 (35.19)	94 (40.34)
6–15	690	430 (62.32)	38 (5.51)	690 (100.00)	93 (13.48)	3 (0.43)	70 (10.14)	194 (28.12)	276 (40.00)
16–50	734	414 (56.40)	44 (5.99)	734 (100.00)	87 (11.85)	12 (1.63)	76 (10.35)	219 (29.84)	190 (25.87)
51+	107	52 (48.60)	4 (3.74)	107 (100.00)	11 (10.28)	.. ..	12 (11.21)	30 (28.04)	6 (5.61)
Unspecified	..	..	..	..	..	..	..	..	..
Total	**1,764**	**1,030 (58.39)**	**91 (5.16)**	**1,764 (100.00)**	**204 (11.56)**	**16 (0.91)**	**180 (10.20)**	**525 (29.76)**	**566 (32.09)**

It would be seen from the above table that 13.20 per cent inhabited villages of the district are located at a distance of 0-5 kms from the nearest town while 39.11 per cent villages of the district are in the distance range 6-15 kms from the nearest town. 41.61 per cent villages of the district lie 16-50 kms away from the nearest town and 6.66 per cent villages are in the distance range 51+ from the nearest town.

Highest percentage of villages having educational amenity fall in the distance range 6-15 kms from the nearest town followed by distance range 16-50 kms. Out of 1,030 villages having educational amenity in the district 41.75 per cent villages fall in the distance range 6-15. Another 40.19 per cent villages having educational amenity of any kind are located in the distance range 16-50 kms from the nearest town. Thus it would be seen that about 82 per cent villages having any kind of educational amenity fall within 6-50 kms from the nearest town. Of the remaining 18 per cent villages having any kind of educational amenity 13 per cent villages are situated 0-5 kms away from the nearest town while only 5 per cent village are in the distance range beyond 50 kms.

Medical amenity is poor in the district. Out of 1674 inhabited villages in the district only 91 villages have this amenity. Of these 91 villages having medical amenitiy in them 44 villages (48. 35 per cent) fall in the distance range 16. 50 kms from the nearest town while 38 villages (41. 75 per cent) are situated in the distance range 6-15 kms which constitute 5.8 and 5.5 per cent of the total villages in the respective distance ranges.

Like medical amenity post and telegraph amenity is also available in the villages located far away from the nearest town. Of the 204 villages having post and telegraph amenity bulk of them (88. 23 per cent) are in the distance ranges 6-50 kms. 5. 39 per cent villages are situated above 50 kms from the nearest town while 6. 32 per cent villages are in the distance range 0-5 kms.

Market/hat facility is very meagre in the district. Out of 1764 inhabited villages in the district only 16 villages have market amenity in them. Of these 12 villages (75 per cent) are located at a distance range 16–50 kms from the nearest town.

Communications facility is available in only 10.20 per cent villages of the district. 42. 22 per cent villages having communication amenity fall in the distance range 16–50 kms and 38.88 per cent villages are situated in the distance range 6–15 kms from nearest town. Only 6. 66 per cent villages lie in the distance range 51+kms while 12. 22 per cent villages are located in the distance range 0-5 kms from the nearest town.

Approach by pucca road is available in 525 villages of the district. Thus only 29.76 per cent villages of the district are served by this amenity. Those having approach by pucca road are mostly situated at a distance of 6-50 kms from nearest town. 41. 71 per cent villages having approach by pucca road are at a distance of 16-50 kms and 36. 95 per cent villages are situated at 6-15 kms from nearest town. Only 15.62 per cent villages are situated at a distance of 0-5 kms whereas 5.71 per cent villages fall in the distance range 51+kms from nearest town. 32. 08 per cent villages of the district have power supply facility available with them and they are situated at the various distance ranges from 0 to 51 and above kms. 48.76 per cent of these villages are located at distance range 6-15 kms while 33. 56 per cent villages are 16. 50 kms away from the nearest town. 17. 90 per cent villages having power supply are located at the distance range 0-5 kms. Only 1.14 per cent (6 villages) are situated beyond 51+ kms from the nearest town. It may be observed that most of villages having certain amenities are located between distance ranges 6-15 and 16-50 kms from the nearest town. Very few villages having certain amenities are located at a distance of 0-5 and 51+kms. Bulk of the villages (1,424) lie in the distance ranges 6-50 kms. which constitute about 81 per cent of the total villages in the district. Similar picture emerges in the tahsils of the district.

Distribution of villages according to population range and amenities available is shown in the inset table below :—

TABLE 5

Distribution of villages according to the distance range from the nearest town and availability of different amenities

Distance range from the nearest town (in-kilometres)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
-499	1,081	371 (34.32)	9 (0.83)	1,081 (100.00)	23 (2.13)	1 (0.09)	52 (4.81)	246 (22.76)	219 (20.26)
500-1,999	620	596 (96.13)	47 (7.58)	620 (100.00)	129 (20.81)	6 (0.97)	99 (15.97)	236 (38.06)	291 (46.94)
2,000-4,999	63	63 (100.00)	35 (55.56)	63 (100.00)	52 (82.54)	9 (14.29)	29 (46.03)	43 (68.25)	56 (88.89)
5,000+	63	-	-	-	-	-	-	-	-
Total	**1,764**	**1,030 (58.39)**	**91 (5.16)**	**1,764 (100.00)**	**204 (11.56)**	**16 (0.91)**	**180 (10.20)**	**525 (29.76)**	**566 (32.09**

It may be observed from the above inset that larger the population size of the village better is the educational and other amenities in the villages. About 61 per cent villages of the district are small sized villages with population less than 500. 35.14 per cent villages are in the population range 500-1,999. Only 3.57 per cent villages are in the population range 2,000-4,999. All the 63 villages having more than 2000 population in the district have educational amenity in it. As regards medical, post and telegraph and power supply 55.56, 82.54 and 88.89 per cent villages in the population range 2,000-4,999 have these amenities, respectively. Only 34.32 per cent villages in the population range -499 have education amenity. Approach by pucca road and power supply have 22.76 and 20.26 per cent villages of this range have these amenities respectively. Very small percentage of villages of this range have medical, post and telegraph, market/hat and communication facilities. 96.13 per cent villages of population range 500-1.999 have educational amenity in them. Next amenity which possess the higher percentage of villages of this population range is power supply. 46.94 (291) per cent villages have power supply amenity in them. Similar position emerges in the tahsils of the district. Villages of all the tahsils falling in the population range 2,000-4999 have educational amenity. Power supply and approach by pucca road, post and telegraph and medical amenities are also available in majority of villages of this range.

The following table shows the main staple food in the majority of villages in each tahsil:—

TABLE 6

Main staple food in the majority of villages in each Tahsil

Sl. No.	Name of Tahsil	Main staple food
1	2	3
1	Raghurajnagar	Wheat, Rice
2	Nagod	Wheat, Rice
3	Amarpatan	Wheat, Rice
4	Maihar	Wheat, Rice

Wheat and rice is the main staple food in the villages of all the tahsils of the district.

Inset table 7 below shows the distribution of villages according to land use in the district.

TABLE 7

Distribution of Villages According to Land use

Sl. No.	Name of Tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total Cultivable area
1	2	3	4	5	6
1	Raghurajnagar	727	284,955.78	196,212.59 (68.86)	5,948.33 (3.03)
2	Nagod	430	168,002.54	100,938.66 (60.08)	3,667.42 (3.63)
3	Amarpatan	376	112,932.20	78,249.88 (69.29)	1,996.63 (2.55)
4	Maihar	231	111,000.00	71,421.00 (64.34)	1,405.00 (1.97)
Total District		**1,764**	**676,890.52**	**446,822.13 (66.01)**	**13,017.38 (2.91)**

According to the village papers the total area of the district is 676,890 heatares, Raghurajnagar with 42.09 per cent of the district area ranks first followed by Nagod with 24.81 per cent area. Amarpatan and Maihar share the identical percentage of area (about 16 per cent). To be very precise Amarpatan occupies 16.68 whereas Maihar with 16.39 per cent comes last. 66.01 per cent of the total area is cultivable area. Amarpatan tahsil with 69.29 per cent of its area being under cultivation ranks first followed by Raghurajnagar tahsil with 68.86 per cent of its area under cultivation. Maihar tahsil ranks third with 64. 34 per cent, while Nagod tahsil has the lowest percentage (60. 08).

Irrigation facility in the district is very inadequate. Only 2.91 per cent of the cultivated area is irrigated. Nagod tahsil with its 3.63 per cent cultivable area being irrigated ranks first followed by Raghurajnagar, Amarpatan and Maihar in that other.

Growth, density and sex-ratio of urban population in the district is shown in the table below :—

TABLE 8

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

	District						State					
Census year	Total Population	Urban Population	%Urban Population	Decadal Percentage variation in urban population	Density (Population per sq. kms.)	Sex-ratio(No. of females per 1,000 males)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (population per sq. kms.)	Sex-ratio(No of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	554,529	61,365	11.07	+99.60	564	937	26,071,637	3,132,937	12.02	+33.16	2,034	907
1961	694,370	63,454	9.14	+ 3.40	2,689	836	32,372,408	4,627,234	14.29	+47.70	2,482	856
1971	913,531	94,673	10.36	+49.20	1,817	837	41,654,119	6,784,767	16.29	+46.63	2,378	868
1981	1,153,387	186,737	16.19	+97.24	1,048	853	52,178,844	10,586,459	20.29	+56.03	2,171	884

The table above would show that there has been a phenomenal growth of urban population in the district as compared to the state urban growth in 1951. This was largelv because of addition of as many as 10 new towns in 1951. In 1951 the district had as many as fourteen towns, But in the 1961 Census these towns were declassified and hence there has been very low growth of urban population though there has been substantial growth in the state urban population. In 1971 there has been 49.20 per cent growth in urban population of the district which is in confirmity with the state urban growth. In 1981 the state urban growth has been 56.03 per cent but the district registered 97.24 per cent urban growth. This again is due to inclusion of five places as urban in 1981 Census. The new towns included in the 1981 frame are Amarpatan, Birsinghpur, Jaitwara, Madhogarh and Rampur-Baghelan, which possess the combined population of 46,999 persons.

In respect of density of urban population, but for 1961 the density of urban population has been on lower side than the state urban density. Except in 1951 the sex-ratio of urban population in the district has been less than the state urban sex-ratio.

The table below shows the new town/towns declassified in 1981 Census :--

TABLE 9

New Towns/Towns declassified in 1981 Census

Name of Town	Population 1981 Census
1	2
(a) Added	
(i) Amarpatan	11,453
(ii) Birsinghpur	7,553
(iii) Jaitwara	9,241
(iv) Madhogarh	8,845
(v) Rampur-Baghelan	9,907
(b) Declassified	Nil

Amarpatan, Birsinghpur, Jaitwara, Madhogarh and Rampur-Baghelan have been added as new towns in the 1981 Census. However, no town was declassified in this Census.

Table No. 10 below shows the per capita receipt and expenditure in towns of the district.

TABLE 10

Per capita receipt and expenditure in towns

Class, Name and civic status of the town	Per capita								
	Receipt			Expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and convenience	Public works	Expenditure on public institutions	Others specify
1	2	3	4	5	6	7	8	9	10
IV Amarpatan (N.A.C.)	32.23	9.90	22.33	31.28	4.01	20.41	-	0.04	6.82
V Birsinghpur (M.)	52.24	29.72	22.52	50.91	12.54	11.14	18.14	-	8.99
V Jaitwara (N.A.C.)	Not available								
V Madhogarh (N.A.C.)	9.37	1.03	8.34	12.58	5.86	-	0.20	-	6.52
III Maihar (M.)	65.04	33.64	31.40	66.23	12.47	37.59	4.99	0.49	10.69
IV Nagod (N.A.C.)	54.54	41.85	12.69	54.13	5.67	7.87	14.23	0.04	26.32

IV Unchahara (N.A.C.)	19.46	2.00	17.46	19.83	5.34	1.89	1.25	-	11.37
All Towns	**52.09**	**10.86**	**41.23**	**50.11**	**12.50**	**7.09**	**17.91**	**0.27**	**12.34**

Note—Total per capita for the District has been computed for those towns of which data have been received.

Data in respect of two towns, i.e., Jaitwara and Rampur-Baghelan was not available. A close perusal of the data would show that barring Madhogarh and Unchahara towns the expenditure of all other towns is well within the total receipts of urban body. However, the margin between total receipts and expenditure in respect of Unchahara town is very fine. In Madhogarh town there is wide gap of 3.21 over total receipts of the urban body. There appears to be substantial expenditure on general administration in Birsinghpur, Maihar, Satna and Unchahara towns. More than half of the total expenditure is on public health and convenience in Amarpatan and Maihar towns. About half of the total expenditure in Satna town is on public works whereas about 1/3 of its expenditure in Birsinghpur and Unchahara towns is on public works. About fifty per cent of its total expenditure of Nagod town is on other aspects.

Inset table 11 shows the number of schools per ten thousand population in tows.

TABLE 11

Schools per ten thousand population in towns

Class, Name and civic status of town		No. per ten thousand population			
		Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1		2	3	4	5
IV	Amarpatan (N.A.C.)	2	..	3	5
V	Birsinghpur (M)	1	..	3	5
V	Jaitwara (N.A.C.)	1	..	3	6
V	Madhogarh (N.A.C.)	1	..	2	7
III	Maihar (M.)	1	..	1	6
IV	Nagod (N A.C.)	2	..	4	6
V	Rampur-Baghelan (N.A.C.)	1	..	2	9
II	Satna (M)	1	..	4	5
IV	Unchahara (N.A.C.)	1	..	2	5
	All Towns	**1**	**..**	**3**	**5**

There are two higher secondary schools per ten thousand population in Amarpatan and Nagod towns. In rest of the towns there is only one higher secondary school per ten thousand population. There is only one middle school per ten thousand population in Maihar town whereas there are four middle schools each in Satna and Nagod towns. Amarpatan, Birsinghpur, Jaitwara towns each have 3 middle schools, while Madhogrrh, Rampur-Baghelan and Unchahara towns have 2 middle schools each. There are as many as 9 primary schools per ten thousand population in Rampur-Baghelan town while there are 7 primary schools in Madhogarh town. Jaitwara, Maihar and Nagod towns each have 6 primary schools while Amarpatan, Birsinghpur, Satna and Unchahara have 5 schools each.

Number of beds in Medical institutions in towns is shown in the following table :—

TABLE 12

Number of Beds in Medical Institutions in Towns

IV	Nagod (N A.C.)	2
V	Rampur-Baghelan (N.A.C.)	1
II	Satna (M)	2
IV	Unchahara (N.A.C.)	1
	All Towns	2

Curiously enough Amarpatan town has highest number (3) of beds per 1,000 population whereas Satna the district headquarters town has only 2 beds per 1000 population. Maihar and Nagod are the other towns of the district having 2 beds per 1000 population.

Information regarding slums in respect of class I and II towns has been collected. Satna is the only Class II town in the district. Proportion of slum population in towns is shown in the table below :—

TABLE 13

Proportion of Slums Population in Towns.

Class, name and civic status of the town		Proportion of the slums population to total population of the town	Density in slums (per sq.kms.)
1		2	3
II	Satna (M)	5.34	1,611

5.34 per cent of the Satna town live in slum areas of the town and the density of population in the slum areas is 1,611 persons.

Table No. 14 below shows the most important commodity manufactured, imported and exported in the towns of the district. Bidi is the most important commodity manufactured in Amarpatan, Jaitwara, Nagod and Rampur-Baghelan towns. Lime and bricks are manufactured in Madhogarh and Maihar towns respectively. Cement is the most important commodity manufactured in Satna town. Metal pot is most important commodity in Unchahara town. Unchahara town is famous for its *Phool Thali* indigenous cottage industry. Wheat is exported from Amarpatan, Birsinghpur, Nagod and Rampur-Baghelan and Bidi is important commodity of export from Jaitwara and Unchahara towns. Lime stone and cement are exported from Maihar and Satna towns, respectively. Cloth, medicines, coal and kirana articles are items of imports in the towns.

TABLE 14

Most important commodity, manufactured, imported and exported in towns.

Class, name and civic status of the towns		Most important commodity		
		Manufactured	Exported	Imported
1		2	3	4
IV	Amarpatan (N.A.C.)	*Bidi*	Wheat	Cloth
V	Birsinghpur (M.)	Edible Oil	Wheat	*Kirana*
V	Jaitwara (N.A.C.)	*Bidi*	*Bidi*	Medicines
V	Madhogarh (N.A.C.)	Bricks	Sand	Salt
III	Maihar (M.)	Lime	Lime Stone	Coal
IV	Nagod (N.A.C.)	*Bidi*	Wheat	Rice
V	Rampur-Baghelan (N.A.C.)	*Bidi*	Wheat	Cloth
II	Satna (M.)	Cement	Cement	Drug
IV	Unchahara (N.A.C.)	Metal pots	*Bidi*	Metal

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The Village Directory contains information about the name of village, total area of village, total population and the number of households in the villages, amenities like education, medical, drinking water, post and telegraph, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc. This is further supplemented by information on copies of newspapers coming in the village, number of motor cycles/scooters/cars/jeeps and tractors available in the village.

Every village in a tahsil has been assigned a serial number which is the location code of the village to facilitate identification. Apart from the revenue villages, forest villages have also been listed. Villages that have been treated wholly or partly as urban outgrowths because of their being contiguous to an urban area have also been listed and a note indicating "included wholly or partly as urban outgrowth of such and such town" has also been given against each such village.

Information about the amenities available has been given in columns 5 to 10 of the Village Directory with the abbreviations used in different columns as indicated below: –

Where there are more than one institution of a type the number of such institutions has also been shown within brackets. If no facility or amenity is available within the village, a 'dash' is shown and next to it in brackets the distance in broad ranges viz., 5 km., 5-10 km. etc. of the nearest place where the facility/amenity is available has been indicated.

Column 5 : Educational facilities have been shown by adopting the following abbreviations :

P — Primary School
M — Junior Secondary or Middle School
H — Matriculation or Secondary School
PUC — Higher Secondary / Intermediate/Pre-University/Junior College
C — College (graduate level and above) like Arts, Science, Commerce etc.
I — Industrial School
Tr. — Training School
AC — Adult Literacy class/centre
O — Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur these denote that the village has three Primary, two Middle and one Higher Secondary School.

If there are composite schools like Middle school with Primary classes or Higher Secondary schools with Middle classes, these have been included in the number of Primary Schools and Middle schools as the case may be.

Column 6 : Medical facilities have been shown by the use of the following abbreviations:

H — Hospital
MCW — Maternity and Child Welfare Centre
MH — Maternity Home
CWC — Child Welfare Centre
HC — Health Centre
PHC — Primary Health Centre
PHS — Primary Health Sub-Centre
D — Dispensary
FPC — Family Planning Centre
TB — TB Clinic

NH — Nursing Home

RP — Registered Private Practitioner

SMP — Subsidised Medical Practitioner

CHW — Community Health Worker

O — Others

Column 7 : The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :

T — Tap Water

W — Well Water

TK — Tank Water

TW — Tubewell Water

HP — Hand Pump

R — River Water

F — Fountain

C — Canal

L — Lake

S — Spring

N — Nullah

O — Others

NA — Information not available

Column 8 : Post and Telegraph facilities have been shown by adopting the following abbreviations :

PO — Post Office

TO — Telegraph Office

PTO — Post and Telegraph Office

Phone — Telephone connection

Column 10 : Communication facilities have been indicated by the following codes ;

BS — Bus Stop

RS — Railway Station

NW — Navigable Waterway (including river, canal, backwaters, etc.)

Only public transport like Bus, rail and waterway have been considered for this purpose.

Column 11 : Approach to village – This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR — Pucca Road

KR — Kachha Road

FP — Foot Path

Column 12 : Nearest town and distance – The distance in km of the nearest town (whether located in the state or in another state) has been given in brackets under this column.

Column 13 : Power supply : For this purpose, the following codes have been used under this column.

ED — Electricity for Domestic Purpose

EAg — Electricity for Agriculture

EO — Electricity for other purposes like industrial, commercial, etc.

EA — Electricity for all purposes listed above.

Column 15–19 : Land use : Break-up of area under different type of land use viz., forest, irrigated area, unirrigated area, culturable waste and area not available for cultivation has been furnished under columns 15–19.

(a) Forest – This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land.

(b) Irrigated and unirrigated (land use) – The two columns (cols. 16 and 17)cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. These columns do not include gross area sown or gross cropped area.

(c) Culturable waste – It includes lands fit for cultivation whether or not taken up for cultivation or once taken up for

cultivation but not cultivated for more than 5 years. Grazing land and land under groves have been included under culturable waste but this does not include 'orchards'. To be more precise culturable waste includes :

(a) Permanent pastures and other grazing lands,

(b) Land under miscellaneous trees, crops and groves,

(c) and cultivable lands not put to agriculture.

(d) Area not available for cultivation – This column gives the area of barren and uncultivable lands and lands put to non-agricultural uses like village sites, roads, water, rocks and hills etc.

Column 20 : This is a remark column but it has been used to indicate some important information relating to the village, For example, if there is any famous religious, historical or archaeological place in the village it has been indicated in this column. Some useful information like number of copies of news-papers coming in the village, number of motor cycles, scooters, jeeps, cars, tractors, etc., are available in the village has been given. The abbreviations used to indicate the above information relating to the village are as below:—

N – Copies of the news papers coming in the village.

M – Motor cycles/scooters available in the village.

C – Cars/Jeeps available in the village.

T – Tractors available in the village.

In case there is 'Nil' information for a village a 'dash' has been shown.

खंड II - नगर निर्देशिका

SECTION II - TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The details of statement presented in the Town Directory, 1981 are given below :—

Statement 1—Status and Growth History

This statement provides some basic data based on the Primary Census Abstract (PCA). In column 2 of the statement the class of the town has been indicated according to 1981 Census population of the core town as follows :—

Population	*Class*
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

The civic administration status of the town as in 1980 has been indicated. Where there is no civic body in the town it has been treated as *Census Town*. The following abbreviations have been used to denote the civic status of the town—

Municipal Corporation	M Corp.
Municipal Committee/Municipality	MC
Cantonment Board	CB
Notified Area Committee	NAC
Gram Panchayat	GP
Special Area Development Authority	SADA
Census Town	CT

Column 5 : Area (Sq. Km.) as supplied by the local bodies.

Statement II—Physical Aspects and Location of Towns

This statement gives for each town, physical aspect and location of towns. In colums 6 to 12 the name of and road distance in Kms. shown within brackets, from the State headquarters, District headquarters, Tahsil headquarters, nearest city with population 1 lac and above, Railway Station, Bus route, Navigable river Canal (if within 10 Km.) have been presented. If the name mentioned in these columns are the same as the referrent town itself the distance has been recorded as '0' (Zero). In case the railway station (Col. 10) or bus route (Col. 11) is not available in the referrent town, the name of nearest town where the facility is available with distance in Kms. from the referrent town has been presented. If navigable river/canal is passing within a distance of 10 Km. from the town the name of river / canal with distance has been presented in column 12. The abbreviation R and C stand for the River and Canal respectively.

Statement III—Municipal Finance, 1978-79

The data for this statement is collected from local administrative bodies and has been presented not only in respect of statutory bodies but also in respect of non-statutory bodies managing the civic administration of the town, if they have separate budgets and accounts of their own pertaining to the town.

Under column 12, the expenditure incurred by the civic authority on 'public safety' includes such items as fire fighting service, rescue operations during floods and fairs etc. Likewise, column 15 includes expenditures incurred on maintenance of schools, colleges and other institutions like public libraries, museum etc. The exact items covered, may however, vary from town to town, which would depend on the practice followed in this regard by each local authority.

Statement IV—Civic and other Amenities, 1979

The information given under columns 2 to 6

are new additions. Information under column 6 represents Pucca and Kachha roads for which abbreviations used are PR and KR respectively. In column 7 the various types of sewearge/drainage systems have been presented as given below—

Sewer	S
Open Surface Drains	OSD
Box Surface Drains	BSD
Sylk Drains	SD
Cesspool Method	CD
Pit System	PT

In Columns 8, 9 and 10 information collected from respective local bodies on different types of latrines has been presented. It includes public as well as private latrines.

In Column 11, the abbreviations used for the various prevailent methods of disposal of night soil are given below. Where more than one method is used, the information given upto two methods.

Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrine	ST
Sewerage	S

In Columns 12 and 13 the sources of protected water supply and the system of storage with capacity therein within brackets have been presented with the following abbreviations. Where more than one source or more than one system of storage exist, the information is restricted to two major sources of systems.

Column 12

Tube well water/Hand pump	TW
Tap water	TA
Well water	W
Tank water	TK

Column 13

Overhead Tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell pumping system	BWP
Pressure tank	PT

In case of availability of fire- fighting service in a town 'Yes' has been indicated, otherwise the name of the nearest place where available and the distance in Km. within brackets, have been shown.

Statement IV (A)– Civic and other amenities in Notified Slums, 1979.

Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.

In columns 4 and 5, the information collected from the State Health Department has been presented. The institutions run by private doctors have not been included. The information is limited for those institutions as are run by or aided by Government / Semi Government / Local bodies and charitable institutions or social service agencies like the missionaries. Where the family planning centres are attached to hospital or maternity and child welfare centres or primary health centres, those have been treated as independent unit and presented separately. The maternity and child welfare centres, veneral disease clinic, chest clinic leprosy clinic have not been given separately. These have been indicated alongwith other medical institutions in column 4. The following abbreviations have been used.

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	PC
T.B. Clinic	TB
Nursing Home	NB
Others	O

If there are more than one institutions of any type the number of such institutions have been

indicated within brackets e. g. dispensaries (2) nursing homes (4) etc.

All types of hospitals/dispensaries etc. whether allopathic or ayurvedic or unani or homeopathic have been covered in column 4. These institutions have been indicated with the following abbreviations :—

Ayurvedic	A
Unani	U
Homeopathic	Hom

In case of allopathic, no abbreviation is given.

If no medical facility is available in the referrent town the name of the nearest town with distance there of has been given. The information on numbers of beds has not been given as it was not provided by the authorities concerned. In Columns 6 and 9, the information collected from the Education Department has been presented with the following abbreviations.

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all Categories Arts, Science and Commerce	ASC
Law	L

If there are more than one institutions of a type the number has been given against each in brackets.

Column 10—The information has been collected from the Education Department. Where the institutions are found to be located just beyond the boundaries of the town but near the referrent town and for all purpose are considered as belonging to the referrent town only, Such marginal cases have been included in the town directory. If there are more than one institutions of such type the number has been given against each in brackets. The following abbreviations have been used—

Shorthand	SH
Typewriting	Type
Shorthand & Typewriting	SH Type
Others	O

The vocational institutions like Applied Art/ painting College, Pharmacy College, B.Ed. College Teacher's Training Institutions, Music / Dancing School, Nursing School, etc. have been covered under 'Others'. However the type of institutions included under, Others' have been described in the introductory note.

Columns 11 & 14—The information has been collected from the district Education Officers. The following abbreviations have been used—

Primary	P
Junior Secondary or Middle School	M
Matriculation or Secondary	Such type of institution does not exit in Madhya Pradesh
Higher Secondary/Intermediate/Pre-University/ Junior College / (10+2) System whether held in Schools or Colleges.	PUC

If there are composite schools like Middle schools with Primary classes, or Higher Secondary Schools with Middle classes, these have been included in the number of Primary and Middle schools respectively. For example, if in a town, there are two primary schools and one middle school with primary classes, the number of primary schools in the town have been given as three and that of middle schools as one even though there may be only three educational institutions. This also applies in the case of higher secondary schools.

If there are more institutions of a type in the town, these have been indicated with numbers within brackets against the abbreviations e.g. D(3), M (2), H (2), etc.

Column 15—The number of Adult literacy classes has been shown.

If an educational facility is not availablel in the town, the name of the nearest place where the facility is available, have been given with distance in Km from the referrent town.

Column 17-19:-The information has been collected from the Excise Department and concerned local bodies. Touring Cinema talkies have not been taken into account. Community halls have been included in Column (19).

Column 20:-The information has been collected from Education Department and the local bodies who maintain public libraries and reading rooms and the following abbreviations have been used in presenting them.

Public Library	PL
Reading Room	RR

Statement VI — Trade,. Commerce, Industry and Banking, 1979.

The Statement depicts information relating to three most important commodities imported, exported and manufactured. The commodities have been mentioned in order of volume. Besides, information relating to the number of banks, number of agricultural and non-agricultural societies has also been furnished.
