DISTRICT CENSUS HANDBOOK
PART - A & B

BETUL DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

Satpura Thermal Power Plant - Sarni

Sarni in Betul tehsil of Betul district is famous for Satpura Thermal Power Plant. This thermal power plant is situated on a 120 km. long coal range. Satpura Coal Basin supply fuel to Power Centre. There is a small independent lake at this place which serves as a source of water. The lake can supply water to a plant having capacity of 1000 m.w. Electricity generatred here is supplied to some districts of Madhya Pradesh and Rajasthan. It is the largest power centre in Madhya Pradesh and is one of the largest in India.

Part – A : Village and Town Directory

Section I – Village Directory

(a)		Note explaining the abbreviations used in Village Directory	69-72
(b)		List of villages merged in towns and outgrowths at 2001 Census	73
(c)		CD Block wise presentation of Village Directory Data	
	(i)	Map of Bhimpura CD Block showing Tahsil boundary	74
		Alphabetical list of villages of Bhimpura CD Block along with location code 1991 and 2001	75-78
		Presentation of Village Directory data of Bhimpura CD Block	80-107
	(ii)	CD Block Map of Bhainshdehi showing Tahsil boundary	108
		Alphabetical list of villages of Bhainshdehi CD Block along with location code 1991 and 2001	109-112
		Presentation of Village Directory data of Bhainshdehi CD Block	114-139
	(iii)	CD Block Map of Athner showing Tahsil boundary	140
		Alphabetical list of villages of Athner CD Block along with location code 1991 and 2001	141-143
		Presentation of Village Directory data of Athner CD Block	144-161
	(iv)	CD Block Map of Chicholi showing Tahsil boundary	162
		Alphabetical list of villages of Chicholi CD Block along with location code 1991 and 2001	163-164
		Presentation of Village Directory data of Chicholi CD Block	166-179
	(v)	CD Block Map of Betul showing Tahsil boundary	180
		Alphabetical list of villages of Betul CD Block along with location code 1991 and 2001	181-185

Pages

Presentation of Village Directory data of Betul CD Block 186-219

(vi) CD Block Map of Ghoda Dongari showing Tahsil boundary 220

Alphabetical list of villages of Ghoda Dongari CD Block along with location code 1991 and 2001 221-225

Presentation of Village Directory data of Ghoda Dongari CD Block 226-255

(vii) CD Block Map of Shahpur showing Tahsil boundary 256

Alphabetical list of villages of Shahpur CD Block along with location code 1991 and 2001 257-259

Presentation of Village Directory data of Shahpur CD Block 260-281

(viii) CD Block Map of Multai showing Tahsil boundary 282

Alphabetical list of villages of Multai CD Block along with location code 1991 and 2001 283-286

Presentation of Village Directory data of Multai CD Block 288-311

(ix) CD Block Map of Prabhatpattnam showing Tahsil boundary 312

Alphabetical list of villages of Prabhatpattnam CD Block along with location code 1991 and 2001 313-316

Presentation of Village Directory data of Prabhatpattnam CD Block 318-339

(x) CD Block Map of Amla showing Tahsil boundary 340

Alphabetical list of villages of Amla CD Block along with location code 1991 and 2001 341-344

Presentation of Village Directory data of Amla CD Block 346-373

(d) Appendices to Village Directory

Appendix-I : Abstract of Educational, Medical and other Amenities in Villages - CD Block level 374-377

Appendix-IA : Villages by number of Primary Schools 378

Apendix-IB : Villages by Primary, Middle and Secondary Schools 378

Appendix-IC : Villages with different sources of drinking water facilities available 379

Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 379

Appendix-IIA : Census Towns which do not have one or more amenities 380

Appendix-III : Land utilisation data in respect of Census Towns/non-municipal towns 380

Appendix-IV : CD blockwise list of inhabited villages where no amenity other than drinking water is available 380

Appendix-V : Summary showing number of villages not having Scheduled Castes Population 381

Pages

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 382

Appendix-VIIA : List of villages according to proportion of the Scheduled Castes to the total population by ranges 383-394

Appendix-VIIB : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 395-407

Appendix-VIII : Statement showing number of girl schools in the villages 408-409

Section II - Town Directory

(a) Note explaining the abbreviations used in Town Directory

Town Directory Statements (I to VII) 410-413

(b) Statement-I : Status and Growth History 414-415

(c) Statement-II : Physical aspects and location of Towns 416-417

(d) Statement-III : Municipal Finance 418-419

(e) Statement-IV : Civic and other amenities 418-419

(f) Statement-V : Medical, Educational, Recreational and Cultural facilities 420-421

(g) Statement-VI : Trade, Commerce, Industry and Banking 422-423

(h) Statement-VII : Civic and other amenities in slums 422-425

(i) Appendix to Town Directory : Towns showing their outgrowth with Population 426

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract 429-431

(b) District Primary Census Abstract (General) 432-437

(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population 438-447

Primary Census Abstract for Scheduled Castes 448-453

Primary Census Abstract for Scheduled Tribes 454-459

CD Block wise Village Primary Census Abstract 460-639

Urban Primary Census Abstract 640-657

Annexure-I : Number of villages under each Gram Panchayat(CD Blockwise) 658-710

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 710

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 711-713

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 2001 Census 714-716

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 717

			Pages
Annexure-VI	:	Marital status of population as per 2001 Census	718
Annexure-VII	:	Age, Sex and Education in the district, 2001 Census	719-720
Annexure-VIII	:	Distribution of different mother tongues returned in 2001 Census	720
Annexure-IX	:	Statement of Five Main SC and ST in the District, 1991 census	721
Annexure-X	:	Hamletwise total population of villages, Census 2001	722-795
Annexure-XI	:	Statement of Disability in the District, Census 2001	796

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the “total” given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the “total” area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 21st place in the state according to population.

2. The district occupies 7th rank in the state in terms of area having 10,043 sq.km. which is 3.3 percent of the total area of state.

3. Literacy rate of Betul district is 66.4 percent and it occupies 15th position in the state. The female literacy rate of the district is 55.6 percent .

4. Density wise the rank of the district is 39th in the state.

5. Ranking of the district according to the sex-ratio is 7th in the state.

6. Female work participation of the district is 37.0. percent of total female population. Rank of the district according to female work participation is 17th in the state.

7. Population wise largest village is Athner of Bhainsdehi tahsil L.C.No.04218600 with 10304 population and smallest village is Khanjanpur(Viran) of Betul tahsil L.C.No.04256100 with population of only one person.

8. Population wise largest town is Sarni (M) having population 95,012 and smallest is Shahpur (C.T.) with 3,997 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Satpura Thermal Power Plant, Sarni.

Note :-—One village is fully covered as out growths (OGs) and therefore not included under the item, “Number of villages”.

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991.

However, some improvement has been made in the data collection on slums of the towns having population 50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Betul was a district in the earstwhile state of Madhya Pradesh and continues as such in the new state of Madhya Pradesh which came into being on 1st Nov. 1956. The district derives its name from the former district headquarters town, Betul Bazaar. The present Betul town was formerly known as Badnur. Betul Bazar is about 5 km. south of the present Betul town. It was in 1822 that the district headquarters was shifted to the present Betul (then known as Badnur). In course of time the name of district headquarters town, Badnur, got super imposed by Betul.

The early history of the district is shrouded in the veil of obscurity. The earliest available inscriptional evidence takes us upto the year 631. A.D. only. This latter inscriptional evidence refers to the grant of lands in villages Tivere kheta (identified by Raibahadur Hiralal with village Tiwarkhed where the copper plates bearing the inscription were found) and Ghuikheta (unidentified) on the bank of the Ambeviaraka nada (identified with Ambhora river) by King Nannaraja of the well known Rashtrakuta dynasty whose capital was at Malkhed. According to Dr. Hiralal, the record established once for all that the Rashtrakufas dominated the Multai plateau, as the Multai plates themselves contained names of villages and places which were not identified. The supremacy of the Rashtrakutas of Malkhed lasted from 75 to 950 A.D. The states of the remaining portion of the territories now comprised in the district is not known, though it is likely that it might nominally have been under the sovereignity of the kings of Malwa who rules from Dhar.

Except to the extent stated above, the hisory of the district is again clouded in oblivion, till we find a mention of it in the Marathi religious work 'Vivek Sindhu', written by Mukund Raj Swamy who lived about the end of 13th century. The work refers to the name of Jaitpal, who was the king of Kherla near Betul, under whose patronage Mukund Raj passed the last years of his life. According to Vivek Sindhu, Jaipal was the last member of a Rajput dynasty, which has ruled in Kherla. Tradition has woven stories describing Mukundraj as having possessed miraculous powers, and that soon after his death, Kherla was besieged by General Rahman Shah Dullah of a Muhammadan king of Delhi in revenge for the death of a *fakir* at the hands of Jaitpal. Tradition further has it that the Raja of Kherla yielded only after a long siege of twelve year; that the victorious Mohammadan General cut off his head and offered it to the Devi for victory and that his headless corpse thereafter pushed the enemies beyond the banks of Tapti. This tradition apparently has been woven to account for the fact that whereas the head of the said Rahman Shah Dullah lies buried in village Umri, immediately below Kherla, his body was buried at Ellichpur in Berar. According to the Gazetteer, the local story really relates to the last Bahmani invasion of Kherla in 1467, when the victorious Nizamul Mulk of the Bahmani King was slain by two Rajputs.

Kherla fort, as ascertained from an inscription on

a stone on its eastern wall, is not older than 1363 A.D. The stone on which the inscription is recorded originally belonged to a *vapi* (step-well) and the date 1363 A.D. is the date of construction of the step-well to the north of Khetakpura, which Dr. Hiralal thinks was the old name of Kherla. The fort cannot be later than 1398 A.D. because in that year the existence of the fort is attested to by records of historian Farishta.

Farishta mentions one Narsingh Rai, King of Kherla, as a man of great wealth and power, being possessed of the hills of Gondwana and other countries. Farishta does not give any information regarding the race of this king, though he is usually believed to be Gond. Jaitpal, to whose dynasty he apparently belonged, is spoken of as a Rajput. The Gazetteer, therefore, suggests that Kherla, like Garha-Mandla, was ruled by a dynasty of Gond-Rajputs (or Rajgonds). In 1398, Narsinghrai invaded Berar, then under Bahmani kingdom, under inducement from the Mohammadan kings of Malwa and Khandesh, who according to Farishta were jealous of Kherla power and wanted its destruction. Owing to the pre-occupation of Bahmani King Firoz Shah in battles with Vijaynagar King, Narsinghrai met with some initial successes, but was finally defeated, and became a tributary of the Bahmani kingdom. After this, till about 1425, Kherla kingdom continued to rule in peace. But about 1425, Kherla King Narsingh Rai incurred the wrath of Hushangshah of Malwa, as he refused to help Hushangshah against Ahmadshah Bahmani. The enraged Hushangshah, therefore, attacked Kherla twice, but was repulsed. In the third attack in 1426, however, Narsinghrai had to petition to Ahmadshah Bahmani for aid. Hushangashah was repulsed this time also, but with Bahmani aid. In 1433, taking advantage of Ahmadshah's pre-occupation in war with Gujrat, Hushangshah again attacked Kherla and slew Narsinghrai. The Farukhi ruler of Khandesh intervened and brought rapproachment between Hushangshah Ghori and Ahmadshah Bahmani, under the stipulation that the fort of Kherla and the territory it commanded would belong to Malwa while Barar should continue to be in possession of Bahmanis. Thus ended the dynasty of the Rajput or Rajgond rulers of Kherla, which now became a part of the Malwa kingdom.

In 1467, Kherla was the scene of yet another battle between the Bahmani and Malwa kings, when Mohammadshah Bahmani commanded Nizam-ul-Mulk (Governor) of Berar to attack Kherla. The later was ultimately successful in capturing the fort. but was deceitfully slain by two Rajput soldiers of Kherla. The Kherla territory was however, restored to Malwa as a result of negotiations between the two sides, and lasting peace then ensued. Under Malwa Kings, Kherla territory used to be incharge of a Mohammadan Governor stationed locally. The territories of the Multai plateau were probably in charge of local chiefs, as suggested by copper plates found (now lost) at village Banur in Multai tahsil.

Malwa was occupied by Akbar in 1560, and about 1596, Kherla is shown as included in the newly constituted Moghal *subah* of Berar Kherla itself was was the headquarters of a *sarkar* or district, which included central and the southern portions of Betul district and some tracts of Chhindwara.

On the decline of the Moghal empire, the Kherla *sarkar* was annexed, by the Gond ruler Bakht Buland of Deogarh. Subsequently, along with other Deogarh territory, Kherla passed on to Raghuji Bhonsla of Nagpur in 1743. The Marathas shifted the capital from Kherla to Betul and the fort at Kherla was destroyed. The district continued to be in possession of the Bhonsla ruler till 1818, when the district, along with the Bhonsla territories, south of Narbada was made over to the British after the battle of Sitabaldi. After the escape of Appa Sahib, the deposed Bhonsla ruler, from the custody of the British while he was being taken to Allahabad, the district witnessed actions between the supporters of Appa Sahib and the British detachments stationed at Betul. These lasted till July 1818. Betul district formally became part of the British dominions in 1826 under a treaty.

During the 1857 mutiny, the district did not witness any disturbance worth mentioning. After the mutiny, the administration of the district along with the rest of the country passed into the hands of the British Crown which continued till, in 1947, the British granted independence to the country.

(iii) Administrative Set up:

Betul district lies in the extreme south of the Bhopal division. The district comprises of five tahsils namely Bhainsdehi, Betul, Shahpur, Multai and Amla and ten community development blocks, which are Betul, Multai, Athner, Prabhat Pattam, Chicholi, Ghoda Dongri, Amla, Bhainsdehi, Bhimpur and Shahpur. Tahsilwise number of villages according to Census 2001 is Bhainsdehi 401, Betul 449, Shahpur 131, Multai 268 and Amla 158. The seven towns in the district are Bhainsdehi (NP), Sarni (M), Betul (M), Betul Bazaar (NP), Shahpur (CT), Multai (NP) and Amla (M). There are 1407 villages and 7 towns in the district according to Census 2001. Amla tahsil was created on 3.4.1997 out of 158 villages of earstwhile Amla CD block which earlier belonged to Multai tahsil.

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the lay functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

The collector is the chief executive officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various Departments, controls over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in time of emergencies like floods, famine and epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main functions viz.(i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) Development.

The Collector is assisted by deputy Collectors, tahsildars, *naib* tahsildars, revenue inspectors and *patwaris*. The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under excise act to implement the excise and prohibition policy of the Government. Superintendent of Police is the head of police department at the district headquarters, In order to facilitate proper and smooth functioning of Judiciary and administration there are 17 police station and 6 police out posts in the district.

The Judiciary is independent. At the district level, there is district court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges who are posted at tahsil level.

(iv) Physical Features:

Betul district is located to the south of Madhya Pradesh and lies between 21°22' and 22°23' north lattitudes and 77°0' and 78°33' east longitudes. The district is bounded on the north by Hoshangabad district, on the west by Harda, East Nimar district and Amravati district of Maharashtra; on the south by Amravati district; and on the east by Chhindwara district. The total area of the district is 10,043 sq.km. according to Census 2001. The district occupies 7th rank within the state in terms of area. The district extends to about 161 km. from east to west and 106 km. from north to south.

Physiography

With the exception of a few villages which lie below the ghats on the southern border of the district, practically the whole of the district lies on the Satpura plateau at an elevation of 365 metres and above from the mean sea level. The general elevation is about 609 metres. The Satpura plateau is high in the east, gradually lowering towards the west. It falls steeply towards the south in the Berar plain as well as to the north in the Narmada valley. Physiographically the district may be divided into four divisions: viz the Satpura hill ranges, the Tawa and Morand valleys, the Satpura Pleateau in the central and southern parts of the district and the Tapti valley.

The Satpura Range

The main chain of Satpura hill ranges highly dissected by the Tawa and other tributaries of the Narmada runs through the northern part of the district. Among the numerous peaks of this range several are marked with the remains of old forts. The western extension of the Mahadeo hills lies into the north-

eastern parts of the district. Interrupted by the wide valley of the Tawa and its tributaries the Daryakho and the Phopas, and rising again to the west of Shahpur, it runs to the west. East of the Tawa valley Kilendeo (110 metres), Jumbudip and Harrai peaks are exactly in line with the peaks of Bhanwargarh (893 metres) Jamgarh Rohnideo (626 metres) and Sauligarh (680 metres) west of the Tawa valley, Kilendeo and Bhanwargarh hills have scarping edges and stand above the Tawa valley. Other important peaks in the group of Kilendeo peak are Mundadeo (1068 metres), Shripahar (893 metres) and Asirgarh (823 metres). The the south of the course of Tawa another range of the Satpura runs towards the south-west upto Badnur (Betul) forming the main Satpura plateau and scarping in the Tawa valley.

The Tawa Valley

The Tansa valley lies at an elevation of about 396 metres above mean sea level between the peaks of Kilendeo and Bhanwargarh. The general slope of the valley is towards the north-west. The country is undulating with presence of a few residual hillocks and intersected by a large number of streams joining the Tawa. A large section of this valley is covered with forests. Only the northern part of the valley and the best soils elsewhere have been occupied for agriculture.

The Satpura Plateau

The high mass of the Satpura plateau in the district lies in the eastern part whereas the highest range of the Satpura either scarps the northern rim of the high plateau or stands dissected further north separated by the invervening valleys of the subsequent rivers joining the Narmada. The high plateau rises above 685 metres and spreads in a wide area from Betul-Bazar in the west to Dunawa in the east and from Pattan in the south to the foot of Sirikot peak in the north. The norther slope of the plateau is drained by the Bel which flows to the east while the southern slopes drain into the Tapti. Multai the celebrated source of the sacred Tapti is located to the south of a hill 791 metres high in this range. This hill marks the water partings amidst the waters of Wardha and the Tapti to the south-east and south-west, respectively, and Kharpura nala to the north. This part of the plateau is also mentioned as the Multai plateau. The northern extension of the plateau is marked by the low range of hills attending their maximum height at Dhabadeo peak (822 metres) beyond which falls abruptly into the.

Tawa valley.

The north-western extension around Chicholi settlements is sufficiently wide for cultivation but it rises into Tapaseri hills (821 metres) to the west and is dissected by the Betul nala in the south and the Bhangi and Naran nalas in the south whereby intermittent three ranges of Chipkona, Phoplia and Sauligarh are entirely covered with forests. The Betul plateau and the Chicholi plateau have a general elevation of 670 metres 640 metres, respectively.

Separated by the Tapti and its tributary streams to the north of Kheri and Jagdhar, a series of narrow dissected plateaus form the southern series of the high plateau which extend from east to west. The general elevation of the plateau is about 640 metres in the eastern part while it is about 701 metres in the west. The northern extension of the southern plateau is locally known as Bhainsdehi plateau. The important peaks are Jhallar (745 metres) and Nilgarh (772 metres). The more even or undulating parts of the southern plateau drain into the Tapti and are along the road connecting Masood, Athnair, Gudgaon and Bhainsdehi from east to west. This tract is good for agriculture. The southern slopes of the plateau are almost wholly covered with forests with small villages dotted here and there only by the side of streams. Khamla group of villages are known more for their cattle farming than for agriculture in the extreme south-west.

The Tapti Valley

In the western part of the district the Tapti valley projects in a oblong manner, Except in a small patch in the extreme west, level and undulating land is limited in a few villages on the southern bank of the river.

Drainage:

The drainage of the district forms part of the three major system viz. the Narmada, the Tapti and the Godawari. With the exception of Bel and Wardha rivers which eventually drain into the Bay of Bengal, by the Wainganga (which joins Godawari) other rivers drain the district into the Arabian sea through the Narmada and the Tapti.

The important rivers of the district are : The Tapti, Tawa, Wardha, Bel, Morand and Purna.

The Tapti

It is in important river of the Western India and is believed to rise in the tank of Multai but its real source is about 3 km. north of Multai. It flows through a westernly direction in the district.

Important tributaries of the Tapti within the district are Ambhara, and Khandu on the left bank and Betul, Bakti, Ganjal and Dhatrang on the right bank. In the dry season the upper course of the river is marked with the interesecting ridges of the traprocks and the pool of water. In rainy season the river carries a large volume of water and gets several spates of floods confined to the high banks in the upper parts but very damaging in the coastal plains.

The Tawa

Tawa river is the principal affluent of the Narmada flowing in the north eastern part of the district. The river rises in Chhindwara district. The course of the river in the district is about 72 km. Its affluents, Phophas and Daryakho rising in the hills a few kilometres north of Betul town flow through the fertile Ranipur tract. Another important affluent of Tawa is Machna which rises in the low hills to the east of Betul valley and flows west. A multipurpose dam has been constructed accross the Tawa in Hoshangabad district.

The Wardha

The river rises from the southern slopes of the Dahawadhana peak (811 metres) 11 km. north-east of Multai. It first flows east through a deep gorge in the hills and then south-east entering Nagpur district before it joins to Pranahita in Chandrapur district. The bed of the river is deep and rocky changing from a swift torrent in the monsoon months to a succession of nearly stagnant pool in the summer.

Climate:

The climate of the district is generally moderate, the temperature remains pleasant throughout the greater part of the year. The year may be divided broadly into three seasons. The cold season from November to March which is followed by the summer season from April to May. The south west monsoon season lasts from June to September. October, however, constitutes the retreating monsoon period. Later half of December and first half of January is the coldest part of the year. During this period the minimum temperature sometimes goes down to as low as 3^{o}C. 'May' happens to be the hottest month of the year though occassionally the nights are perhaps warmer in June than in May.

The district receives south-west monsoon with an average annual rainfall of 1109.01 mms during 1998-99. Winds are generally light to moderate with some strengthening in the later half of the summer season and during the south in the later half of the summer season and during the south-west monsoon months. The winds in the summer and south west monsoon seasons are from directions between south-west and north- west. In the rest of the year winds are north-easterly or easterly.

Flora

The flora of the district is comparatively less disturbed. The forests of the districts may be divided into the following types.

(1) Moist Deciduous Teak,

(2) Dry Deciduous Teak,

(3) Mixed

(4) Salai and

(5) Bamboo

1. Moist Deciduous Teak

This type occupies the southern part of Bhanwargarh range, mainly the Machna valley, almost the whole of Betul range, the middle part of Amla range, south eastern part of Saonligarh range and the area about Nanda and Gadhakhar in Tapti range.

The species most commonly found associated with teak are. *Saj* (Terminalia tomentosa), *lendia* (Lagerstroemia parviflora), *dhaura* (Anogeissus latifolia), *haldu* (Adina Cardifolia), *aonla* (Emblica officinalia), *tinsa* (Ougeinia dalbergioides), *salai* (Boswellia serrata), *mahua* (Madhuca latifolia) and *kalam* (Mitragyna parvifolia), *kari* (Saccapetalam tomentosum) and *jamun* (Eugenia cumini) and abundant in the Tawa valley in Amla range.

In the Machna valley, *lendia* (Lager stroemia parviflora) and *tinsa* (Ougenia dalbergoides) are very common. *Salai* is found only on higher elevation.

2.Dry Deciduous Teak Forest

This type occupies about half the forest area in the district. It is found in northern part of Bhanwargarh range, the Saonligarh range, the northern and western parts of Tapti range, the eastern part and Chandu circle of Dabka range and forests of Kukru in Sawalmindha range. The teak forests on higher elevation in Betul and Amla ranges and on poor soils in Asir range also fall in this type. Bamboo (Dendrocalamus stricuts) forms the undergrowth every where except on flat plateau.

3.Mixed Forests

This type is distributed over the southern parts of Betul and Amla ranges, eastern part of Tapti range and almost whole of Asir range.

A very large number of species make up the growing stock. The common species found in these forests are : *Saj* (Terminalia tomentosa), *dhaura* (Anogeissus latifolia), *lendia* (Lagerstroemia parviflora), *tendu* (Diopyros melanoxylon), *mahua* (Logerstroemia parviflora) *behera* (Terminatia belerica) *kalam* (Mitragyna parviflora) *haldu* (Adina cordifolia) *semal* (Salmalia malabarica) *rohan* (Soyimida fabrifuga), *mokha* (Schebera swietenioides), *chichwa* (Albizzia odoratissima), phansi or dhobin (Dalbergia paniculata) *kusum* (Schleichera oleosa), *bija* (Pterocarpus marsium), *siris* (Albizzia lebbeck) *padar* (Stereospermum chelenoides), *moin* (Lannea grandis), *kekar* (Garuga pinnata) *siwan* (Gmelina arborea), *pangra* (Erythrina indica), *maharukh* (Ailanthus excelsa), *tinsa* (Ougeinia dalbergioides) *aonla* (Emblica officinalia), *achar* (Buchannaia Lanzan), *dhaman* (Grewia tilaefolia), *harra* (Terminalia chebula), *kari* (Miliusa tomentosa), *amaltas* (cassia fistula), *palas* (Butea monosperma) etc.

4.Salai Forests

Though scattered *Salai* occurs all over in small patches of *salai* are found on the ridges and flat tops covered under the teak type forests. Extensive *salai* forests occur in Dabka, Sawalmendha and Tapti ranges. Bamboo is not, as a rule, found in *salai* forests.

5.Bamboo Forests

Bamboo (Dendrocalamus strictus) is found scattered over various traets described above. The concentration of bamboo is found in Bakur and Lonia forests of Amba range. On ridges and flat top hills bamboo disappers.

Faunna

Wild fauna had been fairly numerous in the forests of the district during the recent past but still they are met with in small numbers. Among the bigger animals the most common are tiger (Pantherra tigers), panther (Panthera Pardus), *sambhar* (Carvus unicdor kerr), *chital*, *nilgai* (Boselaphus tragocamelus Pallus), black-buck (Antelope muntajac), barking deer, four-horned antelope (Teracerus guadricornis), wild pig (suscristatus,wenger), sloth bear, bison and wild dogs (Coundukhnnensis). The common monkey is seen throughout the district. It damages the trees and agriculture crops.

Tigers, the best known carnivora is found almost every where in the forest divisions. The best known places for tigers are Kantawari and Banka in Bhanwargarh range, Tanda and Panchhi in Saonligarh range, Arjungond in Betul range and Nada in Tapti range.

Variety of birds both permanent and migratery may be seen. Of the birds common sandgrouse is fairly plentiful all over the district. Red jungle fowl (Gallus ferraginels) and grey jungle founds (G. sonneratli Temminek) are found in denser forest. The grey partigornis(ortigornid pontieriana, Gmelin) is very common.

Minerals and Mining:

The district has large deposit of coal. Among the prominent coal mines are Dulhara fields which lies across the tawa river at Dalhara and Patharkheda which lies in the Ranipur forest, south of river Tawa. Akori, Bakhari, Chickalmau, Umardoh are some other important coal fields in the district. 270,529 metric ton of coal was excavated during 1999-2000. Apart from coal, the building stones such as granite, sandstones,

marbles and traps are also found in the district. 926 metric tons of Gitti, 28,328 tons of rock and 200 tons of Granite is reported to have been excavated during 1999-2000.

Soil:

According to the latest settlement, soils in the district have been classified into *kali*, *marand* I, *marand* II, marand III, matbarra I, matbarra II, *sihar* I, *sihar* II, *berdi* I, *berdi* II, *retari*, *bari* and *gair mumkin kali* soil which corresponds to the rich black soil is found in the cultivated tract round Betul town only. *Merand* is a friable loam varying in colour from black to brown. *Marand* II and III are distinguished from *Marand* I by want of depth, lightness of colour and larger proportion of stones, sand and lime. The soil grows all kinds of crops, the more valuable wheat and sugarcane, as well as the inferior millets, oilseeds and san hemp. *Mutbarra* is also called *bhabar* locally. This is infact black soil which is not more than a foot in depth and not capable of growing rabi but still better than Bardi soil. The best mutbarra can grow wheat in rotation withgram and masur. The second mutbarra grow Juar, oilseeds and Millets. Bardi is generally a red gravelly soil, thickly strewn with reddish stones of a fair size. This soil can grow juar and til in rotation with the minor millets. It is the poorest kind of soil in the trap plateau but is quite extensive in the district.

Sihar is a sandy loam found along the banks of small streams and at the edge of marand. Retari soil includes all sandy soils poorer than silhar. It is suitable only for growing the inferior millets Kodon kutki and the sturdy oilseed jagni.

Agriculture is the main stay of the districts economy. The district is mainly a kharif area. Paddy, Juar, Kodo-Kutki and oilseeds are the principal kharif crops. Wheat is the principal rafi crop. During 1999-2000, the area under different crops was wheat 93,774 hectares, Paddy 30,453 hectare, Juar 53,491 hectare, vegetables 2,650 hectare and fruits 452 hectare.

Land use:

Forests cover a considerable area of the district. The area under forest during 1999 is reported to be 3,939.12 sq.km. which is about 39 percent of the total area. Are under non-agriculture use is reported to be 27,327 hectare, Barren and uncultivable land 71,836 hectares and Area cultivable 92,183 hectares during 1998-99. Area under double crop is reported to be 124,759 hectares.

Irrigation:

Most of the irrigation is by means of wells in the district. As many as 64009 hectares is irrigated by wells in the district at the end of 1999. Area irrigated from government canals, mainly from Sampna Dam has increased since its inception in 1957-58. Area irrigated by canals during 1998-99 was 16882 hectares. An area of 6657 hectares was irrigated by tubewells. Land irrigated by lakes and ponds was only 291 hectares during 1998-99.

Animal Husbandry:

The total livestock number of the district by the end of 1998-99 was 718,053. Bulk of the livestock consists of cattles numbering 475,754 which is 66 percent of total livestock. Buffaloes constitute the next important category being 100,041 in number and about 14 percent of livestock. The cattle and buffaloes do not confirm to any recognised breed i.e. they are of non-descript type. Generally the cattle are medium in build. By the end of 1998-99 sheep counted for 8,747, goats 122,790, horses 2,282, donkeys 916 and pigs 7,523.

Fishery:

The Common varieties of fishes found in the natural waters of the district are L. bata, L. bogat, L. boga, B. Sarana, B ticto, B. Stigma, C. reba, Rasbora, M. armatus, W. attu, M. Singhal and ophicephalus. The fisheries department has taken up the pisciculture of the fest growing species, viz, C. catla, L. rohita, C. irrigala, L. calbosu and B. tor.

Industry:

Satpura Thermal station at village Sarni in Betul district is the biggest power project of the state and in the country. This project was completed in 1967 with the financial aid of U.S. Agency for International Development. Apart from this major project the district has weaving and dying, carpentry and blacksmith leather industries, brass and copper works industries. Gar is the chief article of export from the district. Gur manufacturing, saw-milling, oil-milling and manufacture of bricks and tiles are some other prominent small scale industries of the district.

Transport and Communication:

Betul district falls under the jurisdiction of Nagpur division of central railway. The length of railway line is about 132.80 km. in the district. This railway line forms a part of the Delhi-Chennai main railway line. The line enters the district from Itarsi side and Dhodra-Mohar is the first station in the district followed by Barbatpur, Ghoradongri, Dharakoh, Maramjhiri, Betul, Bursalie, Amla, Jheulkhera, Multai and Chichonda. A branch line of the broad Gauge line connects Amla railway station with Chhindwara, Amla, Jamboda and Bordehi are the main stations within the district on this line.

The roadway from Hoshangabad to Nagpur traverses the length of the district almost from end to end, passing Chichanda, Multai, Betul, Badnur and Shahpur. It is throughout metalled. The major state highways are North-West road (125.17 km.) Betul-Khandwa road (17.30 kms.) and Multai-Chhindwara road (31.83 kms.). The major district roads are Betul-Achalpur (71.03 kms.), Betul-Harda (66.00 kms.), Betul-Athner (34.60 kms.) and Multai-Athner-Chilkapur road (70.85 kms.). By the end of 1998-99 the total length of metalled road was 1,320.90 kms. and the length of unmetalled road was 232.65 kms. During 1998-99 the total number of registered trucks were 1009, taxis 118, jeeps-cars 1917 and buses numbered 240.

Electricity:

The "Satpura Thermal Power station" located in the district is among the largest power projects in the country. Power is supplied not only to the entire state but also to the neighbouring states from this plant.

During the year 1998-99 the total number of industrial connections were 5,760 and the industrial assumption of electricity was 199,687 kilowatts. There were 58,675 domestic connections and the consumption was 111,843 kws.

Gram Panchayat:

Panchayat is the basic institution of local administration and is the foundation of decentralized administration. Under the Directive Principles of State Policy, the Constitution of India provides the Panchayati Raj System. M.P. Government passed M.P. Panchayat Adhiniyam System. Under 73rd amendment of the Constitution, M.P. Government passed the Panchayat Notification 1993 which provides panchayat for villages, Janpad panchayats for blocks and district panchayat for districts. As per M.P. Gram Sabha Notification 2001, Gram Sabha is constitually approved unit, which includes all the major persons is and gives voting rights to elect Panch, Sarpanch, members of Janpad and members of district Panchayat. The Gram Sabha has power to approve works under annual budget of the village. Constituted with the elected members, these institutions work for 5 years. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is 1/3 reservation. Village panchayat, Janpad panchayat and district panchayat have members 10-20, 10-25, 10-35 respectively.

Gram Panchayat within its area and within its budget can take up work like cleanliness, water supply, public works(roads, buildings, well tanks) market rates, co-operation to Government works, community health and development works. Janpad panchayat within its budget take up works, like Community development and village integration, agriculture, social, commerce, cattle-rearing, fish-breeding, adult-education, co-operatives, cottage industry, welfare and employment oriented programme. It is the duty of the district Panchayat to have control over Janpad Panchayats and village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works. All the development works of the villages are done by one district panchayat, 10 janapad panchayats, and 555 Gram Panchayats and 10 Development Blocks.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed

compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify

to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in

the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani,

Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)

33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)

33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil) Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia
    (i) Chhindwara, Mandla, Dindori and Seoni districts
    (ii) Baihar tahsil of Balaghat district
    (iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
    (iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
    (v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
    (vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
    (vii) Narsimhapur district.

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption

are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span(15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few

months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or

for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country,

state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt.

defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Betul district comprises of 1,343 inhabited villages, 64 uninhabited vilages and total 1,407 villages distributed among five tahsils and ten CD blocks. The district has 7 towns. Among these only Betul (M) has one urban outgrowth (OGs). The average household size of the district is 5.6. Total population of the district is 1,395,175 comprising 709,956 males and 685,219 females. Thus the sex ratio of the district works out to 965 which is higher than the sex-ratio of the state (919). Density of the district is 139 persons per sq.km. and is lower than the density of the state which is 196. Literacy rate of the district 66.4 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 10.6 per cent and 39.4 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/ urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhainsdehi	278,180	264,106	14,074	331,943	316,177	15,766	19.3	19.7	12	5.1	4.7
2	Betul	440,691	282,849	157,842	539,328	350,948	188,380	22.4	24.1	19.3	35.8	34.9
3	Shahpur	78,416	78,416	-	95,909	91,912	3,997	22.3	17.2	-	-	4.2
4	Multai	243,435	223,646	19,789	266,395	244,972	21,423	9.4	9.5	8.3	8.1	8.0
5	Amla	140,779	112,534	28,245	161,600	132,047	29,553	14.8	17.3	4.6	20.1	18.3
	District Total:	1,181,501	961,551	219,950	1,395,175	1136,056	259,119	18.1	18.2	17.8	18.6	18.6

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 18.1 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 18.2 per cent, while for urban areas it is 17.8 per cent. Among the tahsils, Betul has registered the highest decadal growth rate of 22.4 per cent. The growth rate in rural and urban area is highest in Betul tahsil of the district. The percentage of urban population to total population of the district is 18.6 per cent in 2001 and also in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Bhimpura	151	122,313	61,720	60,593	9 (6.0)	409	398

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1343 inhabited villages, 138 (10.3 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 349 villages having 26.0 per cent villages of the district while in the size class of 500-999 population there are 493 villages constituting 36.7 per cent of total villages. 281 villages (20.9 per cent) are in the size class of 1000-1999 and 75 villages (5.6 per cent) are in the size class of 2000-4999. There are 6 villages (0.4 per cent) in the size class of 5000-9999 and only one village (0.1 per cent) falls in the size class of population 10,000 and above.

(a) New

(i) Statutory town

Nil

(ii) Census town

1. Shahpur

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

Nil

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

Nil

(iii) Census towns of 1991 census are notiified as statutory town in 2001 census

Nil

(c) Declassified

Nil

(d) Wholly merged with other town(s)

Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	30	2.2	2,217	0.2
11-20	16	1.2	2,941	0.3
21-50	48	3.6	9,310	0.8
51-100	273	20.3	141,454	12.5
101-200	618	46.0	515,766	45.4
201-300	214	15.9	237,845	20.9
301-500	109	8.1	129,233	11.4
501 +	35	2.6	97,290	8.6
Not known	-	-	-	-
District Total:	1,343	100.0	1,136,056	100.0
Population Density (Rural) of the district:			155	

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 618 accounting for 46.0 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 45.4 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 46 villages (3.4 per cent). 35 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 24.0 per cent of the total inhabited villages having 32.3 per cent population of the district. Medium density ranges of 21-50 and 51-100 persons account for 3.6 and 20.3 per cent of inhabited villages. Both these ranges collectively claim 13.3 per cent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901			930	1,040	1,038	1,070
1911	967	973	903	1,011	1,011	1,001
1921	949	959	863	1,025	1,026	1,004
1931	947	957	862	1,020	1,024	926
1941	946	957	869	1,003	1,005	967
1951	945	953	902	997	1,005	904
1961	932	947	860	994	1,004	887
1971	920	934	864	982	992	888
1981	921	934	878	973	996	855
1991	912	921	887	966	981	903
2001	919	927	898	965	977	916

As per 2001 Census, sex ratio of 965 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly higher beginning from 1911 till 2001 Census years over the state average. It was highest with 1040 in 1901 . The lowest sex ratio of 965 females per 1,000 males was recorded in the district in Census 2001.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhainsdehi	972	973	949
2	Betul	953	975	912
3	Shahpur	976	980	893
4	Multai	976	981	929
5	Amla	968	980	918
	District Total:	965	977	916

Table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 977 whereas it is 916 for the urban area. The sex ratio in rural is highest with 981 in Multai tahsil and in urban areas it is highest with 949 in Bhainsdehi. The sex ratio of the district is 965 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Bhimpura	982
2	Bhainshdehi	972
3	Athner	964

8	Multai	988
9	Prabhatpattnam	973
10	Amla	980
	District (Rural) Total:	977

Table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 977 females per 1,000 males. Among the CD Blocks the highest sex ratio of 988 is found in Multai CD Block and the lowest of 963 is recorded in Betul CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	12	0.9	1,134	0.1
700-749	6	0.4	407	0.0
750-799	11	0.8	2,018	0.2
800-849	36	2.7	13,258	1.2
850-899	118	8.8	75,462	6.6
900-949	282	21.0	281,561	24.8
950-999	369	27.5	369,256	32.5
1000-1099	414	30.8	355,378	31.3
1100+	95	7.1	37,582	3.3
District Total:	1,343	100.0	1,136,056	100.0
Sex ratio (Rural) for District:			977	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 414 accounting for 30.8 per cent of the total villages having largest population of 31.3 per cent in the district fall in the sex ratio range of 1000-1099. It is followed by 369 villages constituting 27.5 per cent of total villages and 32.5 per cent population falling in the range of 950-999. It is followed by 282 villages constituting 21.0 per cent of total villages and 24.8 per cent population falling in the range of 900-949.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Amla	M	918
2	Bhainsdehi	NP	949
3	Betul Bazar	NP	943

District Total:		Total	234,885	119,278	115,607	969
		Rural	202,560	102,462	100,098	977
		Urban	32,325	16,816	15,509	922

Table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 969 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that in urban areas. The sex ratio in rural and urban areas comes to 977 and 922 respectively. The rural sex ratio in tahsil varies between 969 in Bhainsdehi tahsil to 995 in Multai tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group

District (Rural) Total	1343	100.0	202560	100.0
Sex ratio (Rural) for District:			977	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e. 343 (25.5 per cent) having population (20.4 per cent) in the district (rural) fall in the sex ratio range of 1100+. It is followed by the sex ratio range of 1000-1099 which claims 273 villages (20.3 per cent) and 23.9 per cent population. Next to it 142 villages (10.6 per cent) and 11.5 per cent population are in the range of 850-849. Minimum number of villages i.e. 41 (3.1 per cent) and 2.2 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Urban	259,119	44,233	18,917	17.1	7.3

This table depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,395,175 total population of the district 10.6 per cent belong to the Scheduled Castes and 39.4 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 9.1 per cent in rural population and 17.1 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Amla tahsil (15.5) while the lowest is found in Bhainsdehi tahsil (6.6). The proportion of Scheduled Tribes population is 46.7 and 7.3 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Shahpur tahsil (64.4 per cent) and the lowest Scheduled Tribes population is recorded in Multai tahsil (17.1 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

	District (Rural) Total:	1,136,056	103,371	530,990	9.1	46.7

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 9.1 per cent of rural population of the district belongs to Scheduled Castes and 46.7 per cent to Scheduled Tribes. Scheduled Castes population is highest (15.6 per cent) in Prabhatpattnam CD Block whereas it is lowest (3.8 per cent) in Bhimpura CD Block. Scheduled Tribes population is highest (84.7per cent) in Bhimpura CD Block and it is lowest (11.4 per cent) in Multai CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

76 and above	9	0.7	2,132	2.1
District Total	1,343	100.0	103,371	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 286 villages accounting for 21.3 per cent do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 406 villages (30.2 per cent). In 309 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 218 villages. The range of 21-30 and 31-40 per cent contains 60 and 26 villages respectively. There are 15 villages in the range of 41-50 and 14 villages in the range of 51-75. 9 village are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	75	5.6	0	0.0
Less than 5	131	9.8	3,998	0.8
5-10	78	5.8	8,057	1.5
11-20	82	6.1	14,205	2.7
21-30	57	4.2	14,137	2.7
31-40	56	4.2	20,057	3.8
41-50	52	3.9	21,425	4.0
51-75	225	16.8	122,122	23.0
76 and above	587	43.7	326,989	61.6
District Total	1,343	100.0	530,990	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 75 villages accounting for 5.6 per cent of total 1,343 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 131 villages (9.8 per cent). In 78 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 82 villages. The range of 21-30 and 31- 40 per cent contains 57 and 56 villages respectively. There are 52 villages in the range of 41-50 and 225 villages in the range of 51-75. 587 villages are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Amla (M)	29,553	6,923	1,338	23.4	4.5
2	Betul Bazar (NP)	9,646	643	185	6.7	1.9
3	Betul (UA)	83,722	9,202	6,604	11.0	7.9
	(i) Betul (M)	83,524	9,189	6,558	11.0	7.9
5	Bhainsdehi (NP)	15,766	1,644	966	10.4	6.1
6	Multai (NP)	21,423	2,548	592	11.9	2.8
7	Sarni (M)	95,012	22,870	8,982	24.1	9.5
8	Shahpur (CT)	3,997	403	250	10.1	6.3
	District(Urban) Total	259,119	44,233	18,917	17.1	7.3

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/towns of the district. Out of the 7 towns the highest proportion (24.1 per cent) of Scheduled Castes is found in Sarni (M) and lowest proportion (6.7 per cent) in Betul Bazar (NP). For Scheduled Tribes the highest proportion (9.5 per cent) is found in Sarni (M) and lowest (1.9 per cent) in Betul Bazar (NP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bhimpura	949	991
2	Bhainshdehi	977	984
3	Athner	958	971
4	Chicholi	978	1,010
5	Betul	917	989
6	Ghoda Dongari	953	1,015
7	Shahpur	962	999
8	Multai	958	1,018
9	Prabhatpattnam	944	989
10	Amla	954	1,025
District (Rural) Total		951	997

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district. The Scheduled Castes sex ratio is 951 for district (rural). Among the CD Blocks, the highest sex ratio of 978 is found in Chicoli CD Block and lowest of 917 is recorded in Betul CD Block.

Sex ratio of Scheduled Tribes population in Betul district rural is 997. Among the CD Blocks, the highest sex ratio of 1025 is found in Amla CD Block and lowest of 971 is recorded in Athner CD Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amla (M)	988	931
2	Betul Bazar (NP)	948	1,033
3	Betul (UA)	967	920
	(i) Betul (M)	967	923
4	Bhainsdehi (NP)	907	879
5	Multai (NP)	909	810
6	Sarni (M)	918	915
7	Shahpur (CT)	975	359
Sex ratio (Urban) for the district:		939	903

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is higher (939) among Scheduled Castes compared to Scheduled Tribes (903).

Among the 7 towns of the district, there is no such town where the sex ratio of Scheduled castes is above one thousand. In case of Scheduled Tribes sex ratio is above one thousand in only one town i.e. Betul Bazar (NP) (1,033). Sex ratio of Scheduled Castes is lowest 907 in Bhiansdehi (NP). Sex ratio of Scheduled Castes is highest 988 in Amla (M). Sex ratio of Scheduled Tribes is lowest 359 in Shahpur (CT).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsilwise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 66.4 per cent

in the district. This proportion in rural area is 62.0 per cent and 84.5 per cent in urban areas. In the district the literacy rate of males 76.8 per cent is much higher than that of females which is 55.6 per cent.

Among the tahsils, Multai tahsil tops with 75.5 per cent literates and the lowest literacy rate 50.0 per cent is recorded for Shahpur tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		578,560	345,824	232,736	557,496	228,880	328,616	62.0	73.2	50.5	22.8

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 62.0 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 73.2 and 50.5 per cent respectively. At CD Block level Multai CD Block has the highest rural literacy rate of 74.9 per cent while the lowest literacy rate of 47.3 per cent is recorded for Bhimpura CD Block. The gap in male-female literacy rate is 22.8 in the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	6	0.4	27	0.0
1-10	4	0.3	1,485	0.1
11-20	45	3.4	17,248	1.5
21-30	85	6.3	51,957	4.6
31-40	158	11.8	115,776	10.2
41-50	204	15.2	139,930	12.3
51-60	200	14.9	148,079	13.0
61-70	228	17.0	200,062	17.6
71-80	283	21.1	325,651	28.7
81-90	119	8.9	129,627	11.4
91-99	11	0.8	6,214	0.5
100	0	0.0	0	0.0
District Total:	1343	100.0	1,136,056	100.0
Literacy rate for District:			66.4	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 6 villages (0.4 per cent) of the district and population of these villages is only 27. There is no village with 100 per cent literacy. Highest number of villages i.e. 283 fall in the literacy range of 71-80 per cent. This accounts for 21.1 per cent of total villages and 28.7 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 90.2 per cent is recorded in Shahpur (CT) whereas the lowest literacy rate 80.8 is recorded in Bhainsdehi (NP). Sex wise highest percentage of male literacy rate is observed in Shahpur (CT) and it is lowest in Bhainsdehi (NP). Gap in male female literacy rate is maximum in Bhainsdehi (NP) 16.5 per cent. The total literacy rate of the district (urban) comes to 84.5 per cent. It is 91.1 per cent for males and 77.4 per cent for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

Table 25 presents the CD Blockwise number and percentage of Scheduled Castes, literates and illiterates by sex. It is seen that literacy rate of Scheduled Caste population of the district is 71.9 per cent. It is highest 75.5 per cent in Multai CD block and lowest 64.1 per cent in Shahpur CD block. The gap in male/ female literacy rate is highest (27.5 per cent) in Shahpur CD block. The overall male literacy rate of the district (rural) works out to 83.2 per cent and it is 60.0 per cent for females.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	16	1.5	64	0.1
1-10	0	0.0	0	0.0
11-20	7	0.7	116	0.1

81-90	187	17.7	19,468	18.8
91-99	33	3.1	1,978	1.9
100	53	5.0	291	0.3
District Total:	1057	100.0	103,371	100.0
Literacy rate for District (Rural):			71.9	

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 71.9 per cent. Highest number of villages i.e. 315 villages fall in the literacy range of 71-80 per cent. There are only 53 villages which have 100 per cent literacy rate of Scheduled Caste population. 16 villages are such where the literacy rate of Scheduled Caste population is zero per cent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 27.2 percent of the total population of the district (urban) and the proportion of non-workers is 72.8 percent. Among the total workers male workers constitute 44.3 percent whereas female workers are only 8.5 percent.

Among males, 40.2 % are main workers and 4.1% are marginal workers whereas among females, corresponding figures are 6.2% and 2.4% respectively.

				(37.0)	(38.3)	(53.2)	(1.5)	(7.0)

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 41.8 per cent of the total workers (main + marginal), 37.7 per cent of total workers are engaged as agricultural labourers, 1.8 per cent as household industry workers and 18.7 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows high dependence of population on agricultural sector absorbing large number of workers. The proportion of cultivators varies between 33.3 per cent in Betul tahsil and 49.0 per cent in Bhainsdehi tahsil. The proportion of agriculural labourers varies beween 33.7

per cent in Betul and 42.0 in Bhainsdehi tahsil. The proportion of female agricultural labourers is high as compared to that of male agricultural labourers in the district. The percentage of household industry workers is very low in the district as stated above. The highest proportion of 30.9 per cent of other workers is recorded in Betul tahsil while the lowest proportion of 7.8 per cent is found in Bhainsdehi tahsil.The proportion of male workers under the category of cultivators, house hold industry workers and other workers is more than that of female workers.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 48.0 per cent of total population. Among these workers cultivators constitute 46.6 per cent, agricultural labourers 41.8 per cent, household industry 1.7 per cent and other workers constitute 10.0 per cent. The proportion of cultivators is highest 53.6 per cent in Multai CD Block and is lowest 40.5 per cent in Ghoda Dongari CD Block. Proportion of agricultural labour is highest 46.5 per cent in Bhiansdehi CD Block and lowest 33.3 per cent in Multai CD Block. It is also seen that the proportion of female workers is more than that of male workers under the category of agricultural labourers.

				(8.5)	(8.5)	(19.1)	(5.8)	(66.5)

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 27.2 per cent of total workers, cultivators constitute 5.3 per cent, agricultural labourers 5.9 per cent, household industry 3.1 per cent and the highest proportion is covered by other workers which is 85.7 per cent. It is also found that proportion of female workers under cultivators, agricultural labourer and household industry workers is more than that of the male workers proportion, whereas proportion of male workers under other workers is more than that of the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 29.8 per cent in Bhainsdehi (NP).Proportion of agricultural labourers is highest 36.7 per cent in Betul Bazar (NP). household industry workers is highest 7.0 per cent in Shahpur (CT) and other workers is highest 97.9 per cent in Sarni (M).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,343 inhabited villages in the district 1,268 villages or 94.4 per cent have been provided with the education facilities of one type or the other. Similarly 399 villages in the district constituting 29.7 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,295 or 96.4 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 232 villages constituting 17.3 per cent of villages have been provided with post office facility within the villages. 351 or 26.1 per cent villages have been provided with the telephone facility, 223 or 16.6 per cent with transport facility, 57 or 4.2 per cent villages with bank facility and 62 or 4.6 per cent with agricultural credit societies. Similarly there are 391 or 29.1 per cent villages which are linked with the pucca road. Total 1,298 or 96.6 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Bhainsdehi CD block has the highest 97.8 per cent villages where educational

facility is available and lowest 91.4 per cent is found in Betul CD Block. Medical facility is highest in Multai CD Block (56.1 per cent) and lowest 11.2 per cent each in Bhainsdehi and Athner CD block. Telephone facility is highest in Multai CD Block (56.8 per cent) and it is lowest in Bhimpura CD Block (3.3 per cent). In the field of power supply all villages have been covered except 45 villages in the district.

TABLE 38 : NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,136,056 persons in the district, 1,128,489 or 99.3 per cent have educational facility of one or the other type. Similarly 501,226 or 44.1 per cent population has medical facilities while 1,110,059 or 97.7 per cent have improved drinking water facility. Post office facilities are available to 409,123 or 36.0 per cent population. Telephone facility is available to 438,364 or 38.6 per cent. Transport communications facility is available to 351,174 or 30.9 per cent. Bank facility is available to 154,679 or 13.6 per cent. 159,195 or 14.0 per cent have been provided with the facility of agricultural credit societies. 478,474 or 42.1 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,119,739 or 98.6 per cent of rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

6. Banks				
(a) Commercial Bank	240	408	650	1,298
(b) Cooperative Bank	296	376	641	1,313
7. Agricultural Credit Societies	307	411	563	1,281

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 80 villages do not have primary school and out of these villages, children of 68 villages have to travel less than 5 kms. for schooling Out of 1,343 inhabited villages as many as 962 are deprived of middle school and 1,338 of degree college. Of these 532 avail the facility of middle school at a distance of less than 5 kms., 311 at a distance 5-10 kms. and the remaining 119 at a distance of 10+ kms. In respect of degree college 54 avail this facility at a distance of less than 5 kms., 148 between 5 to 10 kms. and rest 1,136 villages at a distance of 10+ kms.

Similarly there are 1,337 villages in the district which have been devoid of hospital facility and 1,301 villages which are deprived of PHC facilities. Of these 183 villages have the facility of hospital available within 5 kms. while in respect of 277 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming

number i.e. 877 villages have this facility at a distance of 10+ kms. As regards PHC 126 avail this facility at a distance of less than 5 kms., 220 at a distance of 5-10 kms. and the remaining 955 have to travel a distance of more than 10 kms. to avail this facility.

Regarding post office, 1,111 villages do not have this facility in the village itself. Of these majority i.e. 505 have this facility at a distance of less than 5 kms., another 369 villages avail it at a distance of 5-10 kms. In the remaining 237 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 991 villages in the district which are without telephone facilitiy. Of these 253 avail this facility at a distance of less than 5 kms., 247 at a distance of 5-10 kms. and remaining 491 have to traverse a distance of 10+ kms.

For Bus service out of 1,121 villages which do not have facility, 379 villages avail this facility at a distance of less than 5 kms., 398 at a distance between 5-10 kms. and 344 at a distance of 10+ kms.

In the entire district 1,298 villages are deprived of commercial bank and 1,313 of co-operative bank. Of these 1,298 villages which are deprived of commercial banks 240 villages avail this facility at a distance of less than 5 kms., 408 between 5-10 kms. and the remaining 650 at a distance of 10+ kms. Regarding co-operative banks out of 1,313 villages 296 villages avail this facility at a distance of less than 5 kms., 376 at a distance of 5-10 kms. and remaining 641 at a distance of 10+ kms. 1,281 villages do not have agricultural credit societies. This facility to 307 villages is available at a distance of less than 5 kms., 411 at a distance of 5-10 kms. and the remaining 563 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road

District total	1,343	1,268	399	232	351	223	57	62	391
	(100.0)	(94.4)	(29.7)	(17.3)	(26.1)	(16.6)	(4.2)	(4.6)	(29.1)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,343 inhabited villages in the district, there are 39 villages which have nearest towns upto a distance of 5 kms. Of these only 37 villages forming 94.9 per cent of total villages, are having the educational facilities atleast one type and 9 villages constituting 23.1 per cent, have the medical facilities within the Range of 5 km., 7 villages forming 17.9 per cent have the facility of post office within the range of 5 km and 16 or 41.0 per cent have the facility of telephone under the distance of 5 km. 6 villages constituting 15.4 per cent have been linked by transport service. One village comprising 2.6 per cent have been provided bank. No village has been provided with agricultural credit society facilities. 15 villages comprising 38.5 per cent have been provided with pucca road within the distance of 5 km.

There are 329 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 301 villages constituting 91.5 per cent have been provided with the educational facilities. 102 villages comprising 31.0 per cent have been provided with medical facilities. 65 villages constituting 19.8 per cent enjoy the post office facility. 112 villages comprising 34.0 per cent have been provided the telephone facility. 57 villages constituting 17.3 per cent have been linked with transport communications. 14 villages comprising 4.3 per cent have bank facility. 18 villages constituting 5.5 per cent are having agricultural credit societies, while 116 villages or 35.3 per cent are approachable by pucca road.

715 villages fall in the distance range of 16-50 kms. Of these, 95.7 per cent villages have educational facility, 30.8 per cent with medical, 19.4 per cent with post office, 27.0 per cent with telephone and transport and communications available to 19.0 per cent villages. Banks and agricultural credit societies facilities are available to 4.8 and 5.5 per cent of villages. 29.8 per cent are approachable by pucca road.

255 villages fall in the distance range of 51+ kms. Of these, 94.5 percent villages have educational facility, 25.5 per cent with medical, 6.7 per cent with post office and 7.8 per cent with transport communications, 10.2 per cent with telephone, 2.0 per cent with banks, 1.6 per cent with agricultural credit societies and 17.3 per cent with approachable by pucca road.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Betul district out of a total 1,343 inhabited villages, overwhelming 487 have a population of less than 500 persons. Of these, 413 villages (84.8 per cent) have education facility, 76 (15.6 per cent) have medical facility, 457 (93.8 per cent) have improved drinking water facility. 19 villages (3.9 per cent) have post office facility. 70 (14.4 per cent) have telephone facility. 27 (5.5 per cent) have been linked by bus service. 7 (1.4 per cent) have bank facility. 4 villages (0.8 per cent) have been provided with the agricultural credit societies, 86 villages (17.7 per cent) have been linked with pucca road. 451 villages (92.6 per cent) have been provided with electricity.

Out of 493 villages, which fall in the population range of 500-999 persons, 492 villages (99.8 per cent) have been provided with the education facility, 135 (27.4 per cent) with medical facility, 482 (97.8 per cent) villages have improved drinking water facility. 38 villages (7.7 per cent) have been provided with post office facilities, 121 villages (24.5 per cent) with telephone facility, 60 villages (12.2 per cent) with transport facilities, 6 villages (1.2 per cent) with bank facility, 4 villages (0.8 per cent) with agricultural credit societies, 132 villages (26.8 per cent) have approach by pucca road and 485 villages (98.4 per cent) have electricity facility.

281 villages fall in population range of 1,000-1,999 persons. Of these all the villages have been provided with the education facility, 125 (44.5 per cent) with medical facility, 275 (97.9 per cent) villages have improved drinking water facility. 103 villages (36.7 per cent) have been provided with post office facility, 106 villages (37.7 per cent) with telephone facility, 82 villages (29.2 per cent) with transport facilities, 9 villages (3.2 per cent) with bank facility, 21 villages (7.5 per cent) with agricultural credit societies and 113 villages (40.2 per cent) have approach by pucca road. 280 (99.6 per cent) villages have electricity facility.

There are 75 villages in the district which are covered under 2,000-4,999 population range. Of these, all villages have been provided with the education and power supply facility. 57 villages (76.0 per cent) have been provided with medical facility. 74 villages (98.7 per cent) have been provided with improved drinking water facility, 66 villages (88.0 per cent) have been provided with post office and 48 villages (64.0 per cent) have been provided with telephone facilities, 47 villages (62.7 per cent) with transport facilities, 28 villages (37.3 per cent) with bank facility, 27 villages (36.0 per cent) with agricultural credit societies and 53 villages (70.7 per cent) have approach by pucca road.

There are 6 villages in the district which are covered under 5,000-9,999 population range and all the villages are provided with education, improved drinking water, transport communication, banks, approach by pucca road and power supply facilities. 5 villages each are having medical, post office, telephone and agricultural credit society facilities. There is only one village in the population range of above 10,000, and it is being provided with all types of facilities.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Bhimpura	151	93,495	43.1	10.6
2	Bhainshdehi	134	74,222	62.0	18.1
3	Athner	98	67,625	65.1	20.0
4	Chicholi	80	43,415	60.6	25.8
5	Betul	185	94,912	63.8	39.5
6	Ghoda Dongari	165	72,071	41.9	29.3
7	Shahpur	125	57,845	45.5	19.1
8	Multai	132	79,734	69.4	22.2
9	Prabhatpattnam	120	83,247	62.3	12.2
10	Amla	153	66,093	72.3	38.5
	District Total:	1,343	732,659	58.5	24.0

Table 42 presents CD blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,343 inhabited villages in the district having a total area of 732,659 hectares. Of this, 58.5 per cent is cultivable and 24.0 per cent of total cultivable area has got the irrigation facility.

It is seen that percentage of cultivable area to total area is highest 72.3 per cent in Amla CD Block. It is lowest 41.9 per cent in Ghora Dongari CD Block. The percentage of irrigated area to cultivable area is highest 39.5 per cent in Betul and lowest 10.6 in Bhimpura CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Amla (M)	156	104	52	238	35	92	57	1	53
2	II Betul (M)	353	174	179	344	37	99	104	8	96
3	V Betul Bazar (NP)	296	119	177	264	40	22	83	39	81
4	IV Bhainsdehi (NP)	166	50	116	148	49	64	9	1	24
5	III Multai (NP)	569	63	506	209	74	68	12	5	51
6	II Sarni (M)	89	41	49	71	12	33	13	1	14
	District Total	236	97	139	204	31	66	50	5	51

Note: The difference in various totals is due to rounding off the related figures.

Table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Betul works out to Rs.236 of which Rs.97 are derived through local taxes and the remaining Rs.139 is received from all other sources. The average of total expenditure incurred per capita is Rs.204. Out of this Rs.31 are spent on general administration, Rs.66 on public health and conveniences, Rs.50 on public works, Rs.5 on public institutions and Rs.51 is spent other items.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amla (M)	7.1	2.4	2.0	2.0	0.3
2	Betul (M)	5.9	3.5	2.6	1.9	0.4
3	Betul Bazar (NP)	5.2	2.1	2.1	2.1	0.0
4	Bhainsdehi (NP)	6.3	2.5	1.3	1.3	0.6
5	Multai (NP)	6.5	3.7	2.3	1.4	0.5
6	Sarni (M)	0.9	0.8	0.5	0.5	0.1
	District Total	4.2	2.3	1.6	1.3	0.3

In urban areas of Betul district the average number of primary school per 10,000 population comes to 4.2 schools, 2.3 junior secondary/middle schools, 1.6 secondary/matriculation schools, 1.3 senior secondary schools and the ratio of colleges is only 0.3 college per 10,000 population. Among the towns, the ratio of primary is highest in Amla(M) while lowest is Sarni (M).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amla(M)	32
2	Betul(M)	19
3	Betul Bazar(NP)	0
4	Bhainsdehi(NP)	19
5	Multai(NP)	9
6	Sarni(M)	15
7	Shahpur(CT)	50
	Distrct Total	18

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Betul district. On an average there are 18 beds per 10,000 population in urban areas of the district. Whereas it is the highest 50 in Shahpur (CT) while there is no beds in Betul Bazar (NP).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Amla	29,553	9,238	31.3
2	Betul	83,722	45,452	54.3
3	Betul Bazar	9,646	3,887	40.3
4	Bhainsdehi	15,766	7,313	46.4
5	Multai	21,423	9,161	42.8
6	Sarni	95,012	51,731	54.4
	District Total	255,122	126,782	49.7

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 255,122 urban population 126,782 persons constitute slum population which is 49.7 per cent of total urban population. Sarni town has the highest (54.4 per cent) of slum population. Amla town has lowest (31.3 per cent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amla (M)	Bross Utensils	Wheat
		Bricks	Gur
		Wooden Furniture	Soyabean
2	Betul (M)	Wooden Articles	Wooden Articles
		Edible Oil	Edible Oil
		Milk Product	Milk Product
3	Betul Bazar (NP)	Gur	Soyabean
		Chironji	Wheat
		Printed Cloth	Gur
4	Bhainsdehi (NP)	Gur	Soyabean
		-	Wheat
		-	Pulses
5	Multai (NP)	Iron Box	Soyabean
		Edible Oil	Wheat
		Soyabean Khali	Bricks And Gitti
6	Sarni (M)	Bricks	Stone Coal
		Wooden Furniture	Wood
		-	-
7	Shahpur (CT)	Furniture	Tendu Leaves
		Earthern Pots	Teak Wood
		Bricks	Bamboo

Table 47 indicates most important articles manufactured and exported out of each town in the district. Commodities manufactured are bricks, wooden furniture, earthen pots, edible oil, milk product, *gur*, *chironji*, printed cloth, iron box, soyabean *khali* and brass utensils etc. Soyabean, *gur*, wheat, brick and *gitti*, pulses, stone coal, *tendu* leaves, *sagon*, milk product and bamboo etc.are the other important commodities which are exported by different towns.

(x)Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52.

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 248,131 consisting of 199,707 rural and 48,424 urban households. 30,617 households belong to Scheduled Castes 91,892 to Scheduled Tribes. 206,044 households are living in their own houses constituting 83.0 per cent of total households. Of these households, the largest number of households 65,375 have occupied double room accommodation and is followed by three room accommodation numbering to 59,585 households. Next position is claimed by households 47,288 occupying single room accommodation. Number of households in owned accommodation occupying more than three rooms rank at fourth place with 28,802 households while 4,994 households are without any exclusive room.

21,622 households living in rented accommodation account for 8.7 per cent of total number of households in the district. The largest number of 8,673 households are living in three room accommodation followed by 6,913 households in double room accommodation. Next position is claimed by households 3,730 occupying single room accomodation. Number of households in rented accommodation occupying more than three rooms rank at fourth place with 2,043 households while 263 households are without any exclusive room.

'Other' households numbering to 20,465 forming only 8.2 per cent of total households are distributed in single room accommodation numbering 5,253, double room (6,430) and in three room (6,504) accommodation.Number of households in 'others' category occupying more than three rooms rank at fourth place with 1,735 households while households without any exclusive room are 543 in numbers.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Bhainsdehi	15.0	83.4	1.5	13.7	84.7	1.6	39.6	59.9	0.5
2	Betul	40.9	55.9	3.2	26.5	70.4	3.1	65.2	31.6	3.3
3	Shahpur	28.8	69.9	1.3	27.0	71.7	1.4	66.8	33.0	0.1
4	Multai	24.2	75.3	0.5	20.6	78.8	0.5	64.6	34.9	0.5
5	Amla	25.4	72.9	1.7	16.3	82.1	1.6	69.4	28.3	2.3
	District Total:	29.1	68.9	2.0	20.6	77.6	1.8	64.1	33.2	2.7

The data presented in Table 49 reveals that 29.1 per cent of household of the district are living in houses made of pucca materials, residences of 68.9 per cent households are semi permanent houses and 2.0 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 64.1 per cent are living in houses constructed of pucca materials, 33.2 per cent in semi-permanent structure and percentage of households in temporary houses is 2.7 constructed of kachcha materials. At rural level, the lowest percentage of 13.7 households occupying permanent structure is found in Bhainsdehi while highest percentage of 27.0 is seen in Shahpur tahsil. The proportion of semi-permanent houses is high in Bhainsdehi (84.7) and lowest in Betul (70.4) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 3.1 per cent in Betul followed by Bhainsdehi and Amla both (1.6) tahsil, Shahpur (1.4) and Multai (0.5) tahsils.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

				(78.5)	(94.6)	(65.4)	(61.3)	(74.2)

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 50 indicates that 55.0 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well and electriciy also. The bathroom facility is available to only 21.7 per cent households within their premises. As regards rural areas, 11.1 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 65.4 per cent. The facility of electricity is available 74.8 per cent households in the district. 70.0 per cent rural households have facility of electricity against 94.6 per cent in urban areas. Toilet and drainage facilities in the district are available to 20.2 per cent and 26.1 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil level almost conforms to the district pattern analysed.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that fire wood is used as the most predominant fuel used for cooking by 79.5 per cent households in the district. In the tahsils, this proportion varies between 67.2 per cent in Betul and 95.8 per cent in Shahpur tahsil. In rural areas use of fire wood for cooking is very high while in urban areas it is used by a smaller number of population. The next most common cooking fuel is L.P.G which is used by 8.4 per cent households in the district. This proportion in urban and rural areas is 37.1 and 1.4 per cent respectively. In district level use of kerosene is 3.7 per cent, in rural areas it is 1.3 per cent and in urban areas it is 13.6 per cent. There are

3.4 per cent households using cowdung cake in the district. Use of cowdung cake for cooking by urban households comes to 0.2 per cent while in rural areas its proportion is only 4.2 per cent, as a whole. There are 3.3 per cent households using coal/lignite in the district. Use of coal/lignite for cooking by urban households comes to 16.1 per cent while in rural areas its proportion is only 0.1 per cent, as a whole. The percentage of households using other types of fuel is insignificant. In rural and urban areas fire wood is main fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

This table 52 presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 248,131 households in the district and among them, 82,521 households have been availing banking services. 39,415 households have radio/transistor. Television is possessed by 63,411 households. Telephone is available in 11,012 households. Bicycle is the most common means of transportation and is available in 94,944 households. Scooter, motor cycle, moped (two wheelers) and car, jeep, van (four wheelers) are used by 26,792 and 3,383 households respectively. The number of households without any of the specified assets is 121,591.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

Amla was constituted a new tahsil on 3.4.1997 having 158 villages of erstwhile Amla CD block which earlier belonged to Multai tahsil of the district. Thus the number of tahsils which was 4 in Census 1991, has increased to 5 in Census 2001.

Police firing of 12 January 97 at Multai (NP) on farmers protesting for the compensation of crop destroyed due to very heavy rain is one of the major events reported to have occurred during the decade 1991-2001.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places or tourist interest in the town of the district.

Places of Tourism :

Amla

Amla town is the tahsil headquarter of the district. It is a railway junction station on the Itarsi-Nagpur line of central railway and from here a railway line branches off and links the town with Chhindwara. The town owns a few old tombs which are attributed to the Gonds.

Asirgarh

This old fort in ruins is in Betul tahsil. It is situated nearly 64 km. north-east of Betul and about 24 km. east of Shahpur, an important large village of Betul tahsil. The fort can be reached by Bhaura-Rampur forest road. Only an entrance gate can be seen as the walls have collapsed.

Athnair

An important large village of Bhainsdehi tahsil, Athnair lies to the south-east of the tahsil headquarters at a distance of about 35 km. by road. Outside the village there are two springs called **Tapti-Jhins**. It is the popular belief, that the river Tapti, flowing at a distance of nearly 13 kms, from here, appeared here in the form of these *Jhiras* (springs) to enable a sage, residing at Athnair, to have his daily bath in the water of that river. Just near these *Jhiras* there are remains of some old temple. Carved images of duties there are worshipped.

Betul Bazaar

This town of Betul tahsil is situated at a distance of about 5 km. to the south-east of the Betul town, the headquarter of the district. The Sampna river flows close to the town. The town contains an old fort. Recently a very attractive temple of Tirupati Balaji has been constructed here by NRI Industrialist Sri. Sen Verma on National Highway No. 69 in an area of about $4^{1/2}$ acres land. This temple has become a major tourist attraction of the district.

Bhainsdehi

This town is situated to the south-west of Betul town near the river Purna. It is also the tahsil headquarter as well as community development block headquarter. The town contains in its north-east corner an old temple built of finely carved stones. It is in dilapidated condition. Carvings on many of the stones are clearly visible. In front of the temple just near the steps there is a *kund* (pool), water of which is supposed to be of the Tapti flowing under ground. The construction of the temple can be attributed probably to the 15^{th} or 16^{th} Century A.D.

The village has also an old fort, said to have been built by Thakur Samman Singh, the ancestor of the Kiledar Rajput family of the place. The fort is partly in rains.

Bhanwargarh

This hill fort of Betul tahsil is situated to the west of Shahpur from where by forest road via Pawar Jhanda it is about 16 kms. away. The fort is in ruins

now. The Gonds and Korkus of the region worship the tutelary deity of the hill under the name Bhanwar.

Bhopali

This small village of Betul tahsil, lying to the north-east of Betul, the district headquarters, is a little above 14 km. from Ghoradongri railway station on the Itarsi-Nagpur section of the central railway. There are three natural caves in a hill near Bhopali. Image of Shiva is installed in one of these caves while the other caves contains an image of Parvati. The third one is locally known as *Gowadi* or *Gaikothla* (cow house). A large fair, attracting about 10,000 to 15,000 persons and lasting for a week, commences near *Gowadi* during Shivratri days.

Kherla

This hill fort of the mediaeval fame stands in the village of the same name in Betul tahsil. It is nearly 7 km. north-east of the tahsil headquarters. It is believed that the fort was constructed sometime during 14th A.D. The fort was taken by the Bahmani army in 1400 A.D. According to Firishta. The fort is in ruins, only portions of its front and side walls attract the visitors.

The fort contains a *samadhi* (graveyard) popularly believed to be of Mukund Raj Swami, author of the first Marathi book Vivek Sindha. The *samadhi* is enclosed within the temple, in which a Shivlinga has been installed. The fort is now a protected monument.

Muktagiri:

It is in Bhainsedhi tahsil lying to the south of the tahsil headquarters at a distance of about 50 km. The importance of the place lies in the collection of temples constructed there by the Diggambar Jains from time to time. Out of the 52 temples containing over hundred images of various Jain *Tirthankaras*, two are quite ancient, one of them is a cave temple. The second cave has been renovated and it contains three to four small temples. In one of the modern temples, a huge image of Bahubali or Gammateshwara has been installed.

The place is regarded as one of the most sacred places by the Digambar Jains and it is referred to in an old Jain Prakrit work as one of the Nirvankshetras. An annual fair, largely attended by the Digambar Jains is held on the 15th bright day of Kartik.

Sarni

Situated near Tawa river to the north-east of Betul, to tahsil and district headquarter and at a distance of about 27 km. from Ghoradongri railway station; Sarni is known for one of the biggest thermal power station of the nation i.e. Satpura Thermal Plant.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Quiet and somnolent, Betul district has been running an even tenor of idyllic existence in an atmosphere of beautific rusticity. It is among those few districts of Madhya Pradesh which an account of their bracing climate and wild beauty create conditions for peace and harmony.

Though disowning all claims for a special niche in the Hall of Fame, Betul district is not without its own points of interest. Thermal Power Station at Sarni situated in the fastnesses of the Satpura forests, is among the largest centres in the country generating thermal power. The holy Tapti of the hoary *puranic* renown finds its origin near Multai. The first-ever known Marathi work Vivek Sindhu was written by Mukund Raj Swami of this area. The jaggery of Betul district is considered to be of a high quality as regards its flavour and sweetness.

(xiv)Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

Source :

1. Gazetteer of India, Betul district, 1971
2. District Statistical Book, 1997-98, 2000
3. Census of India, District Census Handbook, 1991.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic,

agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio

from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/ type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
Betul	Sarni (M)	Ghogri	Fully Merged
		Mordongri	Fully Merged
		Vikrampur	Fully Merged

(c) CD blockwise presentation of Village Directory Data

(i) CD Block Maps showing Tahsil Boundary :

	District Total:	1,343	80	1,083	126	33	21

Appendix I-A deals with CD Block-wise villages by number of primary schools. There are 80 villages in the district which are devoid of primary school facilities. 1083 villages in the district have one primary school each . In case of villages having at least 2 schools each, there are 126 villages. In case of villages having 3 schools each, there are 33 such villages in this category. Lastly in case of villages having four + schools, there are 21 villages in this category.

APPENDIX I B - VILLAGE DIRECTORY
VILLAGES BY PRIMARY, MIDDLE AND SECONDARY SCHOOLS

Name of the District : Betul

Serial number	Name of C. D. block	Total number of inhabited villages	Type of educational institutions available			
			No School	At least one primary school and no middle school	At least one primary school and one middle school	At least one middle school and one secondary school
1	2	3	4	5	6	7
1	Bhimpura	151	9	117	25	8
2	Bhainshdehi	134	3	104	27	14
3	Athner	98	4	61	33	8
4	Chicholi	80	5	55	20	6
5	Betul	185	16	93	76	24
6	Ghoda Dongari	165	9	123	33	5
7	Shahpur	125	9	89	27	6
8	Multai	132	4	75	53	17
9	Prabhatpattnam	120	8	64	48	17
10	Amla	153	13	101	39	10
	Total:	1,343	80	882	381	115

Appendix I-B depicts information regarding different type of educational institutions. There are 80 villages in the district which do not have any type of school facilities. 882 villages are having atleast one primary school and no middle school. 381 villages are having atleast one primary school alongwith one middle school. Similarly 115 villages are having atleast one middle school alongwith one secondary school.

APPENDIX IC - VILLAGE DIRECTORY
VILLAGES WITH DIFFERENT SOURCE OF DRINKING WATER FACILITIES AVAILABLE

Name of the District: Betul

Serial number	Name of C. D. block	Number of villages with different sources of drinking water available				
		Only tap	Only well	Only tube well	Only handpump	More than one source only from tap, well, tube- well, handpump
1	2	3	4	5	6	7
1	Bhimpura	0	1	0	8	134
2	Bhainshdehi	0	4	0	5	117
3	Athner	0	1	0	1	87
4	Chicholi	0	1	0	4	75
5	Betul	0	4	0	3	170
6	Ghoda Dongari	0	1	0	4	152
7	Shahpur	0	0	0	0	123
8	Multai	0	1	0	2	129
9	Prabhatpattnam	1	5	0	3	110
10	Amla	0	3	0	2	147
	District Total:	1	21	0	32	1,244

Appendix I-C deals with the villages with different sources of drinking water facilities. There are 54 villages in the entire district which are having single source of drinking water i.e. 21 have only well. 32 have only handpump and one village has only tap as the source of drinking water. 1244 villages in the district are having more than one source of drinking water.

APPENDIX II - VILLAGE DIRECTORY
VILLAGES WITH 5,000 AND ABOVE POPULATION WHICH DONOT HAVE ONE OR MORE AMENITIES

Name of the District: Betul

Serial number	Name of village	Location code number	Name of C. D. block	Popula-tion	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Comm-ercial Bank
1	2	3	4	5	6	7	8	9	10	11	12
1	Athner	04218600	Athner	10,304	Available	Available	N.A.	Available	Available	Available	Available
2	Chicholi	04230400	Chicholi	8,460	Available	N.A.	N.A.	Available	Available	Available	Available
3	Khedi Sawligarh	04235000	Betul	5,144	Available	N.A.	N.A.	Available	Available	Available	Available
4	Ghoda Dongri Ryt	04248000	Ghoda Dongari	8,632	Available	N.A.	N.A.	Available	Available	Available	Available
5	Dhodaramohar Alias Bhoura	04277500	Shahpur	5,395	Available	N.A.	Available	Available	Available	Available	Available
6	Birul Bazar	04287100	Prabhat pattnam	5,182	Available	N.A.	N.A.	Available	Available	Available	Available
7	Prabhat Pattam	04301100	Prabhat pattnam	6,901	Available	Available	N.A.	Available	Available	Available	Available

Appendix II A shows the details of availability or non-availability of certain amenities in the Census towns of the district. It is seen that there is only one Census town named Shahpur(43501000) in the district.Senior secondary school, college and bus facility is not available in this town whereas this census town does have approach by pucca road, health centre, tap drinking water and bank facilities.

APPENDIX II - A VILLAGE DIRECTORY
CENSUS TOWNS WHICH DO NOT HAVE ONE OR MORE AMENITIES

Name of the District: Betul

Serial number	Name of census town	Location code number	Name of C. D. block	Population	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12
1	Shahpur	43501000		3,997	N.A.	N.A.	Available	Available	N.A.	Available	Available

Appendix II A shows the details of availability or non-availability of certain amenities in the Census towns of the district. It is seen that there is only one Census town named Shahpur(43501000) in the district.Senior secondary school, college and bus facility is not available in this town whereas this census town does have approach by pucca road, health centre, tap drinking water and bank facilities.

APPENDIX III - VILLAGE DIRECTORY
LAND UTILISATION DATA IN RESPECT OF CENSUS TOWNS / NON-MUNICIPAL TOWNS

Serial number	Name of Census town and CD block within brackets	Land use (i.e., area under different types of land use in hectare)					
		Total area	Forest	Irrigated by source	Unirrigated	Culturable waste (including gauchar & groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
1	Shahpur	106		Not Available			

Appendix III is meant to show the land utilizations data of Census Towns are listed as revenue villages with the District/Revenue administration. The district has one Census Town as shown in the appendix having total area 106 hectares.

APPENDIX IV - VILLAGE DIRECTORY
C.D. BLOCKWISE LIST OF INHABITED VILLAGES WHERE NO AMNETY OTHER THAN DRINKING WATER FACILITY IS AVAILABLE

Name of the District : Umaria

Serial number	Location code number	Name of village

Name of CD Block: Shahpur		
	Nil	
Name of CD Block: Multai		
	Nil	
Name of CD Block: Prabhatpattnam		
	Nil	
Name of CD Block: Amla		

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there are 9 villages which fall under this category. 2 villages namely Ghana Raipur(04199200) and Behda(04221800) in Bhimpura CD Block, 2 villages Dewdhan(04265700)and Mohanpura(04265800) in Chicholi, 2 villages Pahawadi(04269900) and Sajpur(04270000) in Betul and 3 villages namely Sitalkhedi(04266800), Suiyaguddi(Viran),(04267600)and Dagdaga(Viran)(04268600) in Ghoda Dongari CD Block. There is no village of Bhainsdehi, Athner, Shahpur, Multai, Prabhatpattnam and Amla CD Blocks which fall under this category.

APPENDIX V - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Bhimpura	155	4	151	56
2	Bhainshdehi	146	12	134	33
3	Athner	100	2	98	11
4	Chicholi	81	1	80	20
5	Betul	192	7	185	16
6	Ghoda Dongari	176	11	165	67
7	Shahpur	131	6	125	41
8	Multai	140	8	132	8
9	Prabhatpattnam	128	8	120	14
10	Amla	158	5	153	20
	District Total:	1,407	64	1,343	286

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 1407 villages in the district, 64 villages are uninhabited and remaining 1343 villages are inhabited. Out of 1343 inhabited villages 286 villages have no Scheduled Castes Population and 1057 inhabited villages have Scheduled Castes population in the district. Ghoda Dongari CD Block has highest 67 such villages and is followed by Bhimpura(56), Shahpur(41), Bhainsdehi(33),20 each in Chicholi and Amla,Betul(16),Prabhatpattnam(14),Athner(11) and 8 in Multai CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Bhimpura	155	4	151	1
2	Bhainshdehi	146	12	134	4
3	Athner	100	2	98	4
4	Chicholi	81	1	80	0
5	Betul	192	7	185	4
6	Ghoda Dongari	176	11	165	21
7	Shahpur	131	6	125	3
8	Multai	140	8	132	23
9	Prabhatpattnam	128	8	120	7
10	Amla	158	5	153	8
	District Total:	1,407	64	1,343	75

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 1343 inhabited villages, 75 villages have no Scheduled Tribes population and the remaining 1268 inhabited villages are such which are having some Scheduled Tribes population. Multai has highest 23 villages with no Scheduled tribe population while in other CD Blocks, there are Ghoda Dongari(21),Amla(8),Prabhatpattnam(7), 4 each in Bhainsdehi, Athner and Betul,Shahpur(3) and one in Bhimpura CD Block which do not have any Scheduled Tribe population.There is no such village in Chicholi CD Block, which is devoid of Scheduled Tribe population

APPENDIX VII A

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District : Betul**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Betul	1991	146	158	168	180	150	161	168	171	141	154	168	181
	1981	158	170	177	207	161	177	177	206	155	163	176	208

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district in 1991 for all ages is higher than the state average. The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also. However some inconsistencies are observed in male-female classification. The female child mortality rate in 1991 is higher for q(5), is equal for q(3) and is lower for q(1) and q(2) than that of the male child mortality rate respectively.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Betul**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	351,229 (89.3)	88,288 (25.1)	262,941 (74.9)
(A)Within the district but outside Enumeration place	308,673 (78.5)	73,337 (23.8)	235,336 (76.2)
(B)Birth place in other district of State	42,556 (10.8)	14,951 (35.1)	27,605 (64.9)
(ii) Place of Birth in other states of India than the state of Enumeration	34,842 (8.9)	12,958 (37.2)	21,884 (62.8)
(iii) Birth place in Foreign	7,068 (1.8)	3,694 (52.3)	3,374 (47.7)
(iv) Unclassified	2 (0.0)	0 (0.0)	2 (100.0)
Total Immigrants	393,141	104,940	288,201
Persons born in the place of enumeration	1,002,034	605,016	397,018
Total population	1,395,175	709,956	685,219

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.It is observed that the migration by birth from within the state is maximum 89.3 per cent of total migration. The migration from within the district but outside the enumeration place is 78.5 per cent whereas migration from other districts of the state is 10.8 per cent. Migration from other states is 8.9 per cent and the migration from outside India is 1.8 per cent of the total migration. Migration of 2 persons i.e.0.0 per cent which could not be classified in first three classifications has been shown as unclassified in first three classifications has been shown as unclassified in the table. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Betul**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	359,587	91,110	268,477
	(90.0)	(25.3)	(74.7)
(A)Within the district but outside Enumeration place	315,947	75,548	240,399
	(79.1)	(23.9)	(76.1)
(B)From other district of State	43,640	15,562	28,078
	(10.9)	(35.7)	(64.3)
(ii) From other states of India outside enumeration state	34,548	12,945	21,603
	(8.6)	(37.5)	(62.5)
(iii) Place of residence outside India	5,366	2,829	2,537
	(1.3)	(52.7)	(47.3)
(iv) Unclassified	2	0	2
	(0.0)	(0.0)	(100.0)
Total Immigrants	399,503	106,884	292,619
Population of Non-inmigrants	995,672	603,072	392,600
Total population	1,395,175	709,956	685,219

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 90.0 per cent of total migrated population. Within this classification, the migration from within the district is 79.1 per cent and only 10.9 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 8.6 per cent of total migration and it is only 1.3 per cent from outside India.Migration of 2 persons constituting almost negligible per cent of total migration which could not be placed in the first three classification has been shown as unclassified in the table.Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES-AS PER CENSUS 2001

State : Madhya Pradesh **District : Betul**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Maharashtra	18,279	52.5
Uttar Pradesh	5,794	16.6
Bihar	2,467	7.1
Chhattisgarh	2,419	6.9
Jharkhand	1,336	3.8
West Bengal	876	2.5
Total of 6 States	31,171	89.5
Total of other States	3,671	10.5
Total	34,842	100.0

Source:Migration Table D-1

Inmigration from other states is classified in this table. 89.5 per cent of total inmigrants are from Maharashtra, Uttar Pradesh, Bihar, Chhatisgargh, Jharkhand and West Bengal whereas the remaining inmigrants from all other states together constitute only 10.5 per cent. Total 18,279 persons have migrated from Maharashtra which alone accounts for 52.5 per cent of total inmigrants. Betul is located at the neighbouring state border of Maharashtra as such the migration from Maharashtra is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Betul**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10
Madhya Pradesh 1991	48,566,242	44,595,604	2,983,127	447,111	123,961	168,016	110,506	45,087	92,830
		(91.8)	(6.1)	(0.9)	(0.3)	(0.3)	(0.2)	(0.1)	(0.2)
Madhya Pradesh 2001	60,348,023	55,004,675	3,841,449	545,446	170,381	209,322	150,772	409,285	16,693
		(91.1)	(6.4)	(0.9)	(0.3)	(0.3)	(0.2)	(0.7)	(0.0)

Betul 2001	1,395,175	1,340,631	32,554	3,765	3,402	12,957	1,343	171	352
		(96.1)	(2.3)	(0.3)	(0.2)	(0.9)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu and Buddhist population in the district is comparatively higher than that of state. Contrary to this, the proportion of Muslim, Jain, Christian and Sikh population is lower in the district as compared to state average. The proportionate distribution of population belonging to 'other' religions is lower in the district than the corresponding state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Betul**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Betul							
	Total	1,395,175	747,354	585,635	56,208	5,978	0
			(53.6)	(42.0)	(4.0)	(0.4)	(0.0)
	Rural	1,136,056	605,894	478,250	46,852	5,060	0
			(53.3)	(42.1)	(4.1)	(0.4)	(0.0)
	Urban	259,119	141,460	107,385	9,356	918	0
			(54.6)	(41.4)	(3.6)	(0.4)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (53.6%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is higher than that of the state. Contrary to this the percentage of married population of the district is less than that of the state. The state average is same in case of district in respect of widowed and it is marginally lower in case of divorced population. The proportion of unmarried persons is higher in urban areas than in rural areas but married persons are lower in the urban areas as compared to the rural areas of the district.

(Source- Migration Table C-8)

Note: Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately. It is seen that out of 1,160,290 persons belonging to the age 7 and above 770,252 are literates and thus, the literacy rate of the district works out to 66.4 per cent. Similarly the male

and female literacy works out to 76.8 and 55.6 per cent respectively. 232,261 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 77.9 per cent of population in this age group. In the age group 15-34; 72,742 persons (16.1 per cent) are found educated up to middle, 85,856 person (19.0 per cent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech. and 22,695 persons (5.0 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.
