PREFACE

The statistics for the scheduled castes and scheduled tribes at the 1971 census have been tabulated on a full count basis. The population of scheduled castes and scheduled tribes for certain units in the country such as districts, tehsils/police stations and towns were released through Series 1, Paper 1 of 1972—Final Population, and Part II-A(ii)—Primary Census Abstract.

This paper presents table C-VIII Parts A and B which classifies separately the scheduled castes and scheduled tribes population by literacy and industrial category of workers and non-workers according to their main activity. Part A relates to scheduled castes and Part B to scheduled tribes. In addition, castewise and tribewise population figures cross-classified by literacy have been presented in the appendix for each state and union territory.

The table is preceded by a flyleaf which gives the census questions relevant to the table along with instructions for filling up Question 11—Scheduled caste or scheduled tribe. The nature of the statistics presented in the table is also briefly described. Three derived tables of proportions at the national and sub-national levels are included in the flyleaf.

Table C-VIII Parts A and B will be published in the regular tables volume Part II-C(i) also along with the religion table.

My colleagues in the state offices took enormous pain to scrutinise the figures at their end. I am very grateful to them as also to the team of my colleagues at the headquarters (names overleaf) who worked under the able guidance of Shri O.P. Sharma and, later, of Shri Mahal Singh, Investigators. I thank Shri P. S. Ramachandran, Manager, Government of India Press, Ring Road, New Delhi, and his colleagues for expeditious printing of this volume.

C-VIII SCHEDULED CASTES AND SCHEDULED TRIBES

Part A—Classification by literacy and industrial categories of workers and non-workers according to main activity among scheduled castes

Part B—Classification by literacy and industrial categories of workers and non-workers according to main activity among scheduled tribes

FLYLEAF

This table corresponds to tables D-III of 1951 and C-VIII (Parts A and B) of 1961. The table gives the total population of scheduled castes and scheduled tribes and illiterates, literate and educated persons, workers and non-workers among scheduled castes and scheduled tribes. The workers are further classified into nine industrial categories. Part A relates to scheduled castes and Part B to scheduled tribes. In both parts, data are presented for total, rural and urban areas separately by sex for India, states, union territories and districts.

The table is followed by an appendix (one each for Parts A and B) which gives castewise/tribewise population cross-classified by literacy for each state and union territory.

The question adopted in the 1971 census to elicit information about members of scheduled castes and scheduled tribes was:

Question 11 : Scheduled caste or scheduled tribe

Instructions to enumerators to record answers to this question were as follows :

"You have been furnished with a list of scheduled castes and scheduled tribes notified for your state. Ascertain if the person enumerated belongs to a scheduled caste or scheduled tribe and if he does, then record the name of the scheduled caste or scheduled tribe which should find place in the list furnished to you. The answer should be recorded against the correct rectangle provided for the purpose against this question. For a person who is not a member of any scheduled caste or scheduled tribe write 'X' in both the rectangles.

If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe it should be entered only if it finds a place in the list furnished to you. Do not write the names of scheduled castes in general terms as 'Harijan'. or 'Achhut'. You should ascertain the name of the caste and when it is returned write it in the rectangle provided for recording the name. Similarly, do not write the names of scheduled tribes in general term as 'Adivasi'. You should ascertain the name of the tribe when it is returned and write it in the rectangle with broken lines provided for recording the same. If a person is negligent and insists on calling himself merely 'Harijan' or 'Achhut' or 'Adivasi' as the case may be, tell him that this description is not adequate for census purposes and persuad him to give out the actual name of the caste or tribe. Yo shqould make all efforts to ascertain the correct name of th scheduled caste or scheduled tribe as found in the notified list If the person merely claims to be a scheduled caste or schedu led tribe but says that he does not belong to any of the noti fied communities applicable to the area, he will not be enter ed as a scheduled caste or scheduled tribe.

Scheduled castes can belong only to the Hindu or Sikl religions. If a person belongs to scheduled caste, there wil be either 'H' or 'S' in the answer to question 10. Schedulec tribes may belong to any religion."

In the 1961 census, the enumerators had beer provided with a set of synonyms and generic name of the scheduled castes and scheduled tribes so tha a person who returned his caste or tribe by any syno nym or generic name was enumerated as schedule caste or scheduled tribe, irrespective of whethe such synonym or generic name found a place in th notified list. In the 1971 census, however, in vie of a Supreme Court Judgement on the subject, th notified list of scheduled castes and schedule tribes applicable to each state and union territory ha to be strictly followed and the synonyms or generi names of such communities could not be recognise for purpose of enumeration as scheduled caste scheduled tribe. There is, therefore, a possibilit that despite specific instructions to enumerators t make all efforts to elicit the correct name of the cast or tribe, some persons might have returned themselve by some synonym, local name or generic name an suffered omission from enumeration as a memb of a scheduled caste or a scheduled tribe.

Inspite of specific instructions on the subject, i was found that in some individual slips of schedule castes and scheduled tribes, the name of caste c tribe was not entered and returns in general terms i 'Harijan', 'Adivasi', 'Achhut', etc., were found There was, however, no doubt that the person so re turned did belong, in fact, to a scheduled caste scheduled tribe. Such returns were treated 'Unspecified' scheduled castes or scheduled tribes, the case might be.

The figures presented in this table have been obtained by a cross tabulation of the above question with the following questions which related to social and economic data :

Question 3—Sex

Question 12—Literacy

Question 16—Main activity

The nine broad industrial categories of workers adopted at the 1971 census were:

I—Cultivators

II—Agricultural labourers

III—Livestock, forestry, fishing, hunting & plantations, orchards & allied activities

IV—Mining & quarrying

V—Manufacturing, processing, servicing and repairs—(a) at household industry and (b) other than household industry

VI—Construction

VII—Trade and commerce

VIII—Transport, storage and communications

IX—Other services

"Worker" Defined

The definition of a "worker" in the 1971 census is different from that of 1961. In the 1961 census, a person was considered as a "worker" according to his participation in any economically productive work. In the case of regular employment in any trade, profession, service, business or commerce, a person was taken as a worker if he was employed during any of the 15 days preceding the day on which he was enumerated. An exception to the 15 days' period to reckon one as a worker had been made in 1961 in the case of seasonal work like cultivation, livestock, dairying, household industry, etc. In such cases if a person had put in an hour's regular work a day throughout the greater part of the working season, he was considered as a worker. "Work" included not only actual work but also effective supervision and direction of work. A person might be working as a cultivator or as an agricultural labourer or at a household industry or might be doing any other work. He might be engaged either in one or more than one of the above. A full-time student who spent some time in his father's shop for even a day during the reference period of a fortnight was considered as a "worker". Similarly, if a woman who was basically engaged in household duties also engaged herself in work such as pounding rice for sale or wages, or in domestic services for wages for others, or minding cattle, or selling firewood, or making and selling dung cakes, grass, or any such work, she was also treated as a "worker". Thus in the 1961 census a person was categorised basically as a "worker" even if such a person's contribution to work was extremely marginal.

Main Activity

In the 1971 census, every individual was asked to declare what according to him was his "main activity", i.e., how he engaged himself mostly. Accordingly, all persons were divided into two broad streams of main activity as 'workers' and 'non-workers'. A "worker" was defined clearly as a person whose "main activity" was participation in any economically productive work by his physical or mental activity. "Work" involved not only actual work but effective supervision or direction of work. The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration and this had been returned as his "main activity", the person was classified as a worker and categorised accordingly. A person who normally worked but had been absent from work during the reference period on account of illness or travel, holiday, temporary breakdown, strike, etc., was treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as working. A person who was offered work but did not actually join it, was not treated as engaged in work. In respect of seasonal work like cultivation, livestock keeping, plantation, some types of household industry, etc., which are not carried on throughout the year, a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration.

Secondary Work

In 1971, a person was treated basically as a "non-worker" if he or she did not come under any of the categories of "worker" mentioned above. Thus a person engaged primarily in household duties such as cooking for one's own household, or performing one's own household duties, or student attending an institution, or a rent receiver, was classified as such

for his main activity and was treated as "non-worker". If he was also engaged in some economic activity, obviously not to the same extent as a full-time worker that activity was mentioned under the head of "secondary work". The secondary work, if any, of those who were basically classified as "workers" was also ascertained.

No castes were scheduled by the President of India for Nagaland, A.&N. Islands and Laccadive, Minicoy & Amindivi Islands, and no tribes were scheduled in the Presidential order for Haryana, Jammu & Kashmir, Punjab, Chandigarh, Delhi and Pondicherry. Three castes, viz., Kami, Damai and Sarki were scheduled in Sikkim by the Representation of Sikkim Subjects Regulation, 1966 and they have been reckoned as such in these tables. However, no tribes were scheduled in Sikkim.

The figures for India and Andaman & Nicobar Islands are however exclusive of the Jarawas and Sentinelese tribes of those Islands. These tribesmen could not be contacted and hence no information pertaining to them could be collected at the 1971 census.

It came to light at an advanced stage that some slips got mixed up with the scheduled caste slips of village Sanghi (Code No. 83) of district Rohtak in Haryana as a result of which the population of scheduled castes got counted as 2,081 as against the actual population of 804 (males 425, females 379). By then the tables had been finalised and some had even been published. It has not been possible to correct the printed tables in this volume either. The error is regretted.

Three statements are presented giving proportions at national and sub-national levels :

(1) Literacy rate among scheduled castes and scheduled tribes population, 1971.

(2) Distribution per 1,000 of scheduled caste and scheduled tribe workers of each sex into industrial categories in India, states and union territories, 1971.

(3) Distribution per 1,000 of scheduled castes and scheduled tribes population among the workers and non-workers of each sex and for each category of workers in India, states and union territories, 1971.

Figures shown against Sikkim relate to the castes declared as scheduled castes under the Representation of Sikkim Subjects Regulation (1966) and, accordingly, these figures are included in the all-India totals. No caste or tribe has been scheduled under the Constitution in relation to Sikkim.

Proportions shown against Sikkim relate to the castes declared as scheduled castes under the Representation of Sikkim Subjects Regulation (1966) and, accordingly, proportions worked out for all-India are inclusive of scheduled castes pertaining to Sikkim. No caste or tribe has been scheduled under the Constitution in relation to Sikkim.
