Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

RANI ROOPMATI PALACE –MANDU

The famous fort of Mandav is situated at Mandav village of Dhar tehsil in Dhar district . It is 35 km. away from district headquarters in south.

Palace of Baaz Bahadur and the *Mandap* of Rani Roopmati are of very much importance. There are *Mandaps* on the bank in the south of the hill from where river Narmada can be seen. It is said that Rani Roopmati used to see Narmada river daily from this palace.

Part – A : Village and Town Directory

Section I – Village Directory

(a)	Note explaining the abbreviations used in Village Directory	73-76
(b)	List of villages merged in towns and outgrowths at 2001 Census	77
(c)	CD Block wise presentation of Village Directory Data	
(i)	Map of Badnawar CD Block showing Tahsil boundary	78
	Alphabetical list of villages of Badnawar CD Block along with location code 1991 and 2001	79-83
	Presentation of Village Directory data of Badnawar CD Block	84-115
(ii)	CD Block Map of Sardarpur showing Tahsil boundary	116
	Alphabetical list of villages of Sardarpur CD Block along with location code 1991 and 2001	117-121
	Presentation of Village Directory data of Sardarpur CD Block	122-159
(iii)	CD Block Map of Tirla showing Athner boundary	160
	Alphabetical list of villages of Tirla CD Block along with location code 1991 and 2001	161-165
	Presentation of Village Directory data of Tirla CD Block	166-193
(iv)	CD Block Map of Dhar showing Tahsil boundary	194
	Alphabetical list of villages of Dhar CD Block along with location code 1991 and 2001	195-197
	Presentation of Village Directory data of Dhar CD Block	198-217
(v)	CD Block Map of Nalchha showing Tahsil boundary	218
	Alphabetical list of villages of Nalchha CD Block along with location code 1991 and 2001	219-223

Pages

Presentation of Village Directory data of Nalchha CD Block 224-257

(vi) CD Block Map of Gandhwani showing Tahsil boundary 258

Alphabetical list of villages of Gandhwani CD Block along with location code 1991 and 2001 259-263

Presentation of Village Directory data of Gandhwani CD Block 264-291

(vii) CD Block Map of Bagh showing Tahsil boundary 292

Alphabetical list of villages of Bagh CD Block along with location code 1991 and 2001 293-295

Presentation of Village Directory data of Bagh CD Block 296-311

(viii) CD Block Map of Kukshi showing Tahsil boundary 312

Alphabetical list of villages of Kukshi CD Block along with location code 1991 and 2001 313

Presentation of Village Directory data of Kukshi CD Block 314-323

(ix) CD Block Map of Dahi showing Tahsil boundary 324

Alphabetical list of villages of Dahi CD Block along with location code 1991 and 2001 325-327

Presentation of Village Directory data of Dahi CD Block 328-339

(x) CD Block Map of Nisarpur showing Tahsil boundary 340

Alphabetical list of villages of Nisarpur CD Block along with location code 1991 and 2001 341-343

Presentation of Village Directory data of Nisarpur CD Block 344-355

(x) CD Block Map of Manawar showing Tahsil boundary 356

Alphabetical list of villages of Manawar CD Block along with location code 1991 and 2001 357-359

Presentation of Village Directory data of Manawar CD Block 360-377

(x) CD Block Map of Bankaner(Umarvan) showing Tahsil boundary 378

Alphabetical list of villages of Bankaner(Umarvan) CD Block along with location code 1991 and 2001 379-381

Presentation of Village Directory data of Bankaner(Umarvan) CD Block 382-401

(x) CD Block Map of Dharampuri showing Tahsil boundary 402

Alphabetical list of villages of Dharampuri CD Block along with location code 1991 and 2001 403-405

Presentation of Village Directory data of Dharampuri CD Block 406-425

(d) Appendices to Village Directory

Appendix-I : Abstract of Educational, Medical and other Amenities in Villages - CD Block level 426-430

Appendix-IA : Villages by number of Primary Schools 430

			Pages
Apendix-IB	:	Villages by Primary, Middle and Secondary Schools	431
Appendix-IC	:	Villages with different sources of drinking water facilities available	431
Appendix-II	:	Villages with 5,000 and above population which do not have one or more amenities available	432
Appendix-IIA	:	Census Towns which do not have one or more amenities	433
Appendix-III	:	Land utilisation data in respect of Census Towns/non-municipal towns	433
Appendix-IV	:	CD blockwise list of inhabited villages where no amenity other than drinking water is available	433-434
Appendix-V	:	Summary showing number of villages not having Scheduled Castes Population	434-435
Appendix-VI	:	Summary showing number of villages not having Scheduled Tribes population	435
Appendix-VIIA	:	List of villages according to proportion of the Scheduled Castes to the total population by ranges	436-444
Appendix-VIIB	:	List of villages according to the proportion of the Scheduled Tribes to the total population by ranges	445-459
Appendix-VIII	:	Statement showing number of girl schools in the villages	460

Section II - Town Directory

(a) Note explaining the abbreviations used in Town Directory			
Town Directory Statements (I to VII)			462-465
(b) Statement-I	:	Status and Growth History	466-467
(c) Statement-II	:	Physical aspects and location of Towns	468-469
(d) Statement-III	:	Municipal Finance	470-471
(e) Statement-IV	:	Civic and other amenities	470-471
(f) Statement-V	:	Medical, Educational, Recreational and Cultural facilities	472-473
(g) Statement-VI	:	Trade, Commerce, Industry and Banking	474-475
(h) Statement-VII	:	Civic and other amenities in slums	474-477
(i) Appendix to Town Directory : Towns showing their outgrowth with Population			478

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract	481-483
(b) District Primary Census Abstract (General)	484-489
(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population	490-499
Primary Census Abstract for Scheduled Castes	500-505

			Pages
Primary Census Abstract for Scheduled Tribes			506-511
CD Block wise Village Primary Census Abstract			512-703
Urban Primary Census Abstract			704-727
Annexure-I	:	Number of villages under each Gram Panchayat	728-789
Annexure-II	:	Note on Fertility, Mortality and Migration, 1991 Census	790
Annexure-III	:	Various measures of Fertility and mean age at marriage, 1991 Census	790-793
Annexure-IV	:	Percentage distribution of Migrants by place of birth/ place of last residence, 2001 Census	794-796
Annexure-V	:	Brief account of main religion in the district/tahsils as per 2001 Census	797
Annexure-VI	:	Marital status of population as per 2001 Census	798
Annexure-VII	:	Age, Sex and Education in the district, 2001 Census	799
Annexure-VIII	:	Distribution of different mother tongues returned in 2001 Census	800
Annexure-IX	:	Statement of Five Main SC and ST in the District, 1991 census	801
Annexure-X	:	Hamletwise total population of villages, Census 2001	802-896
Annexure-XI	:	Statement of Disability in the District, Census 2001	897

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

Ram Singh

District Highlights - 2001 Census

1. The district occupies 9th place in the state according to population.

2. The district occupies 13th rank in the state in terms of area having 8,153 sq.km. which is 2.6 percent of the total area of state.

3. Literacy rate of Dhar district is 52.5 percent and it occupies 38th position in the state. The female literacy rate of the district is 38.6 percent .

4. Density wise the rank of the district is 15th in the state.

5. Ranking of the district according to the sex-ratio is 11th in the state.

6. Female work participation of the district is 40.5 percent of total female population. Rank of the district according to female work participation is 11th .

7. Population wise largest village is Ringnod of Sardarpur tahsil L.C.No.03131600 with 9,758 population and smallest village is Khedikhurd of Manawar tahsil L.C.No.03122300 with population of only 2 persons.

8. Population wise largest town is Dhar(M) having population 75,374 and smallest is Sardarpur(NP) with 6,118 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Rani Roopmati Palace, Mandu.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Historically and culturally, Dhar district has occupied an important place throughout its epoch-ancient, mediaeval and modern-era. Dhar, known as Dhar Nagri in ancient period and Piran Dhar in mediaeval period, has had the privilege of being the capital city both in the ancient and in the early mediaeval periods.

Dhar district is named after its main town Dhar situated at 1908 feet above the mean sea level. The Mohammedans called it Piran Dhar after the many ancient tombs of Mohammedan *pirs* (saints) or *kila* Dhar after the old fort. Dhar is 54 kms. away from Mhow, its nearest railhead and is connected by an all weather road.

"It has been conjectured by Hassen that the town of Zersgersi mentioned by Ptolemy (A.D. 150) as lying one degree south-west of Ujjain is possibly Dhar, but Mandu would do as well. The first capital of dynasty was Ujjain but Vairsinoa II, the fifth prince of the line, at the end of ninth century moved to Dhar which become from this time actually it not nominally, the capital of Malwa and which is so intimately connected with the Paramara clan as to rise the saying.

"Where the Paramara is, there is Dhar, and where Dhar is, there is Paramara Without Dhar Paramara is nothing, so as without the Paramara, Dhar is nothing"

Dhar was referred to in the tenth century by Al-Baruni-lban-Batuta who visited India in 1333, some thirty years after it became a Mohammadan possession, stated that it was the chief town in Malwa. A reference to Dhar Nagri is also found in a Sanskrit drama of Arjun Verma Deva's time (1210-16). During the region of Paramara chief, Dhar remained an important seat of learning; some of the monarchs themselves possessing no mean literary skill. The Paramara ruled well and Dhar was prosperous.

The Paramars ruled over a vast territory around Malwa for 400 years from the 9th to the 13th centuries. Vakpati Munja and Bhojadeva were the most famous rulers of this dynasty. Munja was a great general, a poet of repute and a great patron of art and literature. His court was adorned by poets like Dhananjaya, Nalayudha, Dhanika Padmagubtam, the author of Navasahasanka Charita, Amitagati etc. He excavated the Munja Sagar at Dhar and Mandu and built beautiful temples at a number of places.

Bhojadeva, the most illustrious of the Paramars, was one of the greatest kings of ancient India. His name became a household word in India not only as a soldier but also as a builder, a scholar and a writer. Authorship of a large number of books on a variety of subjects like grammar, astronomy, poetry, architecture, and asceticism is ascribed to him, He shifted his capital form Ujjain to Dhar, where he established a university for Sanskrit studies. It is known as the Bhoj Shala in which was enshrined the image of Goddess Saraswati. He rebuilt temples, including the magnificent temple at Bhojpur. Bhojdeva also created a large lake near Bhojapur.

In the year 1305, A.D. the whole of Malwa passed into the hands of Ala-Uddin Khilji when Dhar continued to be under Delhi sultans until the region of Muhamad-II. At that time, Dilawar Khan Gauri was the Governor

of Malwa. In 1401, A.D. he assumed royalty and established an independent kingdom of Malwa, with his capital at Dhar. His son and successor, Hoshang Shah moved the capital to Mandu. Hoshang Shah died in 1435 A.D. and was entomed in the splendid mausoleum, which still exists at Mandu. On Hoshang Shah's death his son, Ghazni Khan, succeeded him. He ordered his capital Mandu to be called Shadiabad (the city of joy). He however, had a very short reign, as he was poisoned to death by Mahmud Khilji in 1436 A.D. Mahmud Khan ascended the throne and inaugurated the reign of the Khilji sultans in Malwa. Khilji sultans continued to rule Malwa till 1531 A.D. Later Malwa was captured by Sher Shah and was placed under the charge of Sujat Khan; Sujat Khan was succeeded by his son Baz Bahadur. Mandu and its environs reverberated with the stories of romance of Rupmati and Baz Bahadur when Baz Bahadur was defeated and put to tight by the Mughal army, his beloved Rupmati took poison and put an end to her life to escape dishonour.

In the administrative organisation of Akbar, Dhar was the chief town of a *mahal* in Mandu *sarkar* of the *subah* of Malwa, Akbar stayed at Dhar for seven days, while directing the invasion of the Deccan. He also visited Mandu a number of times. Mandu was also a favourite resort of emperor Jahangir, who stayed here for over six months in 1616 A.D., in his memoirs Jahangir has paid glowing tributes to the pleasant climate and pretty scenery at Mandu. Noorjahan shot four tigers with six bullets, from the back of an elephant near Mandu.

When Baji Rao Peshwa divided Malwa among Sindhia, Holkar and the three Pawar chiefs in 1832 A.D., Dhar was bestowed on Anand Rao Pawar. The rulers of Dhar held away over this area till 1948, except for a brief period of three years following the great revolt of 1857.

Dhar was an important centre of revolt; during the first war of Independence in 1857. Freedom fighters captured the fort of Dhar, which remained in their possession from July to October 1857. The Bhils also took active part in the revolt. The rebels paralyzed the authority of the state and opposed the British. Consequently, a large British force under colonel Durand; just because three or four rounds were fired at the British troops by some hidden rebels, who escaped. Thereupon the British soldiers took a revenge on the local people. They dragged civilians from their houses, killed them and looted their property, ladies were dishonored. The rebels defended the fort, till 31St October 1857 when breach was caused; they therefore, escaped through an underground passage. As an after math of the revolt, Dhar state was annexed to the British territory. The British Government changed the decision of Govt. of India, and restored Dhar to Anand Roa III, on the Ist May 1860.

Mandu, clothed in green, with turbulent brooks and torrents rushing down in to the encircling ravines presents a magnificent spectacle. Thousands of tourists are drawn to Mandu, to have a glimpse of the splendid monuments there.

Another place of great national importance is Bagh, where the caves have been excavated on the rock face, of a lofty hill, on he bank of the Bagh river. The paintings at Bagh date back to a period between the 5th and 7th centuries A.D. the golden age of Indian art. Together with the Ajanta paintings, the Bagh paintings represent the finest traditions of Indian art, which had a far-reaching influence on the Buddist art, not only in India, but on the entire Buddhist art in Asia.

The Majority of the population in Dhar district belongs to the scheduled Tribes. The main tribes in the district are Bhils and Bhilalas. Their highest concentration is in Kukshi tahsil.

(iii) Administrative Setup:

The district is divided into 4 sub-divisions. These 4 sub-division are again divided into 13 blocks. The district is divided into 7 tahsils. Tahsilwise number of villages are, Badnawar (172), Sardarpur (198), Dhar (457), Gandhwani (150), Kukshi (263), Manawar (208), and Dharampur (104).There are total 1552 villages in the district, out of which 1473 villages are inhabited and 79 un-inhabited. The 11 towns in the district are Badnawarr (NP), Rajgarh (NP), Sardarpur (NP), Dhar (M), Pithampur(NP), Mandav(NP), Bagh(CT), Kukshi(NP), Manawar(M), Dhamnod(NP), Dharampuri(NP). District has 13 Janpad Panchayat and 669 Gram panchyats .

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the lay functionary of the Government, having vast

powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

He is the chief executive officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various Departments, controls over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in time of emergencies like floods, famine and epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main functionaries viz. (i) land revenue, land-records including consolidation of land and other allied matters. (ii) Law and order and (iii) Development.

Deputy collectors, tahsildars, *naib* tahsildars, revenue inspectors and *patwaris* assist the Collector. The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under excise act, to implement the excise and prohibition policy of the Government. Superintendent of police is the head of police department at the district headquarters. In order to facilitate proper and smooth judiciary and administration there are 20 police station in the district.

The Judiciary is independent. At the district level there is district court headed by district and session Judge. District and Session Judge is assisted by Civil Judges posted at tahsil level.

(iv) Physical Features:

The district is situated in the southwestern part of Madhya Pradesh and lies between $22^0.01'$ and $23^0.09'$ North latitudes and $74^0.29'$ and $75^0.42$ east longitudes. It forms a part of Indore division and is 61 km. west of Indore, in shape it resembles an irregular hexagon with a broad base at Kukshi, Manawar and Dharampuri, which tapers off in north at Badnawar. The district is bounded north by Ratlam and Ujjain districts, on the east by Indore, on the south by Khargone (west nimar) and on the west by Jhabua district. The district extends over three physiogrophic divisions, they are the Malwa in the north, the Vindhyachal range in central zone and the Narmada valley along the southern boundary, However, the valley is again closed up by the hills in the south western part. As per the Census 2001, it's geographical area is 8,153 sq.km. reported by Survey of India. It is the 13th largest district of the state in respect of area, which is 2.64% of the total area of state.

The Vindhychal Range

A part of the range extends in the district in a crescentic belt generally from south-east to north-west. A strip of hilly area represents the range 5 to 20 kilometres in width. It is about 5 km. wide near village Dhani, the southeastern boundary near Mograbav in the centre. It is about 10 km further widening to 20 km west of Tanda. To the west of Bagh and Kukshi, the Range stands disconnected by the valley of the Mahi and Hatni.

It restarts along the Narmada in the south-west. The northern spur (peak 543.76 metres) from the boundary between the Sardarpur tahsil and Jhabua district. It extends from the peak of Gomanpura (556.26 metres) to Bajrangarh in Jhabua. Another spur extends towards Jhabua in the north-west. The great Vindhyachal range extends generally from west to east and scarps at most of its length towards the south. In Dhar also the southward scarps are well marked the wall rising from 400 to 600 metres. However, in the western part their faces have been eroded back into long and deep rugged valleys of the tributary hills of the Narmada. In fact the strong currents of the small streams on the steep southern side have cut back at their heads. The numerous streams of the Narmada valley find their sources on the Malwa plateau. The main line of the highest peaks has been left to the south of their present courses.

In the eastern and central parts of the Vindhyachal in Dhar the main hill range is continuos but in the west deep channels of the rivulets dissect it. The range slopes towards the north and gradually meets the Malwa plateau. Numerous spurs also extend over the Malwa plateau in the north. But in the western half in the district one may also find a series of denuded ridges alternating with the parallel stream-channels and running for some kilometres from north to south. The phenomenon leads the marked excel of the Range into

a local confusion, unless one tries to trace the line of the main peaks. The highest peak of the district Mograba (751.03 metres) lies in the central part Nikanth (702.26 metres) lies further east and Shikarpura hill raises up to 698.91 metres. The famous historical fort of Mandugarh towers (the flat topped) about 600 metres, above the mean sea level.

The Malwa Plateau

The northern half of the district lies on the Malwa plateau. It covers the northern part of Dhar, Sardarpur and Badnawar tahsils. The average elevation of the pleateau is 500 metres above the mean sea level. The land is undulating with a few scattered flat-topped hills roughly aligned between the valleys from south to north. The general slope is towards the north. The valleys are covered with black cotton soil of varying thickness, mostly adapted for cultivation. The mounds may bear gravels or the underlying sandstone rocks may have been exposed. The plateau covers an area of about 466,196 hectares in this district. Below the Vindhyachal scarps lies the narrow valley of the Narmada. It occupies the southern part of the district in manawar tahsil and southern eastern part of kukshi tahsil. The width of the valley is 15 to 30 kilometres. The elavation varies from 275 metres in the northern part of Manawar tahsil to 150 metres in the low plain of Nisarpur in the southwest. To the east between Khalghat and Bakaner the valley is undulation wider, more open and fertile with alluvial cover proceeding westwards the valley is studded with hills alternatively cut up by numerous streams which join the Narmada along the southern boundary of the district. The result is that there are few stretches and pockets of alluvium along the streams.

Drainage

The southern part of the district lies in the catchment area of the Narmada, which forms the southern boundary. The Chambal and its tributaries drain the north eastern part, it forms the catchment area of the Ganga. The north western part drains into the Mahi. The water dividing line between the Narmada and the Chambal and the Mahi are separated by the off shoot range, which runs along the Sardarpur – Jhabua boundary.

(i)The Narmada

The Narmada river flows along the southern boundary of the district in a different valley from east to west with a southern inclination. It rises from the Amarkantak plateau (22^{o}40') of the Satpura range in Shahdol district. Flowing to the west it touches the district at Lasangaon (75^{o}31' East) at the confluence with the Karam. It forms the southern boundary of the district along with that of the West Nimar for about 107 kilometers. It receives Boad, Dob, Mahali and Crol on its left while Kamar, Man and Bagh join its right bank.

The river has been mentioned by Ptolemy and the author of the Periplus. The Ramayana, the Mahabharat and Purans refer to it frequently. The Rewa khand of Vayu puran and the Rewa khand of Skand Puran are entirely devoted to the story of the birth and the importance of the river. It's said to have originated from the body of Lord Shiva. It was created in the form of a lovely damsel who enamoured gods and hence named by the Lord as Narmada (delight giving). It is also said to have been in love with the Sonbhadra, another river flowing on the Chhota Nagpur plateau. According to the Puranas, the Narmada is also called the Rewa, from its leaping motion (from the root river) through its rocky bed.

To Shiva the river is especially sacred on account of its origin, and it is often called Shankari, i.e. daughter of Shankar. All the pebbles rolling on its bed are said to take the shape of his emblem with the saying, "Narmada ke kanker utte Sanker", These lingam (phallus) shabed stones called Banalinga is much sought after for daily worship by the Hindus.

In the central part of India the river is held to be for more sacred than any other stream in India. Even Ganga herself is obliged to come and dip in these water once a year. She comes in the form of a coal-black cow and returns home pure white free from all sins. A sighting of the Narmada is considered equivalent to a bath in Ganga. At numerous places along its course there are temples, and fair are held, piligrims perform *pradakshina*, i.e walking along the southern bank from its source to the mouth and going back along the northern bank. The performance is regarded to be of the highest religious efficacy.

(ii)The Chambal

The Chambal or the 'Charmavati' of the ancient times rises from the western slopes of Janapao hill (854.35 metre) in Indore district. It is the most important river of Malwa. The Chambal is joined by the Bageri nala and the Chambala nala on its left, which drain out most of Dhar and Badnawar tahsil.

(iii) The Mahi River

The Mahi river rises from the northern slopes of the Gomampur hills in Sardarpur tahsil. It flows due north and forms the north western boundary of Sardarpur tahsil.

Climate

The district enjoys a pleasant climate. It is generally dry except in the monsoon season. The year may be divided into four seasons. The hot season from March to about the middle of June is followed by the monsoon season lasting up to end of September. October and November may be termed the post-monsoon season. The period from December to February is the cold season. There is no meteorological observatory in the district. After February there is steady increase in temperatures. May is the hottest month with the mean daily maximum at about 40^{O}C. The days are very hot during the summer with the maximum temperature on individual days sometimes rising up to about 44^{0} C or 45^{0}C. With the onset of the south-west monsoon by the second week of June there is appreciable drop in temperature and the weather is cool and pleasant. In September, day temperature rises and in October, it reaches a secondary maximum. After October, day and night temperature decrease rapidly, January is generally the coldest month with the mean daily maximum at about 27^{O}C. and the mean daily minimum at about 10^{O}C. Cold waves affect the district in the area of passing western disturbances across northern India and the minimum temperature may drop down occasionally to about the freezing point of water. Winds are generally light in the post-monsoon and winter seasons and strengthen in the summer and monsoon seasons. Winds blow mostly from direction between southwest and north-west during the monsoon months. In the post- monsoon and winter seasons the winds are mainly north-eastern or eastern. By March winds form directions between south-west and north-west appear and by April these become predominant and continue in the rest of summer and the monsoon season. The average annual rainfall in the district is 833.1 mm. The southern and south eastern part of the district gets less rainfall than elsewhere but in the southern parts in the region of Mandu the rainfall is very much higher.

Forest

Flora

The following trees are easily found: *achar* (Buchanania latifolia), *amaltas* (Cassia fistula), *bans* (Dendrocalamus strictus), *mahua* (Madhuca indica), nim (Melia indica), *palas* (Butea frodosa), *shisham* (Dalbergia sissu) and *tendu* (Diosypyros melanoxylon). The edaphic sub-type I dry teak is found on the middle and lower slopes of the Vindhya scarp on the mixed black and sandy granite soil. It occurs extensively on the eastern and northern slopes of Bagh, Sardarpur, Dhamnod and Manawar ranges. They occupy about 331 sq.km in the alluivial parts of valleys of the Khuj, Man, Karam, Bagh and Keshawi.

Under very dry conditions, scanty cover of infertile and crystalline rock soils very poor quality of teak forests is found on the upper contours of the Vindhyan scarps. The percentage of teak decreases with the increase of dry deciduous species like, *salai*, *dhava*, *saja*, *aonla*, *reunjha*, *moyan*, etc. An increase in the shrubs, herbs, grasses and climbers is clearly marked. The Mixed forests vary from the general type. The admixture a large number of species to dry types like that of *salai* and the maltreated areas of scrubs and grasses, they occupy the south western part of the district and stray hills south of scarps. Mostly in degraded conditions of the over wood and underwood are hardly distinguishable. Among the associates *salai*, *anjun*, *rohan*, *dhaora*, *saj* and chloroxylon swieteniaq are most widespread. The edahic subtype of the dry decidous mixed forest is found over the dry hills and ridges of Ramgarh, Jamli, Neemkheda, Manasamal and Mian pahad forest block. *Salai* occurs to over 50 percent of the crop on the limestone coralline limestone, and quartz.Anjan forests are found in some of the maltreated areas of dry deciduous forests. They occupy the western portion of Vindhyan scarps and area between the Narmada and Bagh. The country is typified by poor soil on hard murram and laterite, aeration and drainage. Anjan is seen in green leaves all the year round. The scrub forests are confined to

the immediate slopes of Malwa plateau from Mandu to Bamanpuri and Panara blocks and compartments no.325 to 326 and 341 to 379. The denuded ground and dry and shallow soil under the stemmed and crooked stock of *babul*, *pilu chandar*, *bel*, *hingan*, *sindi*, etc. indicate that these have been converted to the present stage from Dry teak forests. Apart from domestic pets and beats of burden all the ordinary fauna is found in the district.

Fauna

Among the primate's langur (Semmopithecus-entellus), and common monkey (Macacus sinicus), among carnivera tiger called *bagh*, *sher* or *nahar* (felis tigris), panther (Felis pardus), hyena (Hyena stirata), among rodents the black buck (Anletope cervicapra) *sambhar* (Cervus unicolour) or wild bear (Sus cristatus), met with.

Among the birds, common migrating fowl along with many species of ducks and snipes partridge quails and sang grouse are easily met with. Crocodiles are found in the river Narmada and Chambal. Among the reptiles cobras, vipers and the poisonous snakes are commonly found. There, however, have not been any losses to human lives attributable to wild animal.

Minerals

Iron-ore was reported to be found in Nimanpur itself but was not worked. Other minerals were sandstone, red and yellow ochre's, potters, clay and lime. The iron-ore deposits in the district are found in irregular masses of breccias and important occurrence are at Bagh in Kukshi tahsil, But these deposits are not supposed to be large enough to make their exploitaion economical.

Agriculture

Dhar district the soils were classified into *kali* or black and bhuri or brown. Brown soils are the most valuable growing excellent crops of both kharif and rabi. Deep kali soil being more retentive of moisture than good bhuri in the same class is more suitable for rabi crops. A great part of the *Nimar* soil (where Narmada separates the former Dharampuri and Thikri) is characterized as bhuri pahoroti, i.e. brown stony which is a shallow soil used chiefly for kharif crops.The area of the district which mostly covers the old disjointed part of the farmer state of Dhar presents in its lower parts, a phenomenon of rising lands from Narmada valley into rugged and broken hills and valley with water sources and soil that is not too rich. The rest of it is an open and under taking plateau with the soil being black and of high fertility the farmer state as described by the old state Gazetteer had 65 percent of its population engaged in agriculture at the beginning of this century. The classes chiefly engaged are agriculture were Kombis, Malis, Lodhis, Ahirs.

Land use

The area under forest during 1999-2000 is reported to be 1,369.910 sq.km. Area under non-agriculture use is reported to be 115,206 hectares, Barren and uncultivable land 55,633 hectares and area cultivable 18,411 hectares during 1998-99.

Irrigation

The main sources of irrigation are privately owned wells and Government tanks. However, the Government canal systems fed by tanks have also come up as an important source of irrigation. Most of the irrigation is by means of wells in the district. As many 80,076 hectares is irrigated by wells in the district in 1999. Area irrigated by canals during 1998-99 was 9,956 hectares. An area of 106,731 hectares was irrigated by tube wells.

Animal Husbandry:

As at the end of 1998-99 cows counted for 547,386, buffaloes 189,523, goats 351,495, horses 1,988, donkey 4,004, sheeps 15,109, camels 54. The Nimari cow is larger in stature and either reddish, brown or black in colour but rarely pure white. Fine in appearance but less tracable, it yields more milk than Malwi cow. Among Malwi, Kalisingh and Jhalarpatan type are considered best.

Fisheries

Native fishes as well as other commercial varieties are available in plenty in the rivers streams and tanks, and available as much as local demand. The people have increased their fishing catching through large-scale of improved fishing equipments and are readily available through government assistance and guidance. The Narmada, Man, Mahi, Chambal, Bageri and Khaj among the rivers and Kunda Malcha and Machhava Sagar among the tanks were the major source of fish supply and also constituted the main potential for the further development of pisciculture.

Trade and Commerce

It was reported that the chief imports were rice, salt, metal,(gold, silver, copper, brass, iron, etc) coconuts, groceries, kerosine oil, glass, hardware, crockery, timber, stationery, books, paper, yarn twist and piece goods. Rice was imported from Rambhapur, Ranapur, Rajgarh, Jobat and Alirajpur. Salt were brought by pack bullocks from Gujrat and Ratlam; readymade vessels and drinking pots were brought from Poona, Nasik, Ratlam and Moradabad; iron, grociers, kerosene oil, glass lamps, buckets; tubes, etc. were brought from Mumbai, Pune, Lucknow and Kolkata.

Industries

The chief exports were wheat, gram, jowar and maize. These were exported from Mhow, Indore and Mumbai, spices, corriander, *ajwan*, chillies, etc., were exported to the neighboring states and oil seeds, *tilli*, *ramtilli*, linseed and poppy seeds were to Mumbai. The degree of decline in dependence for livelihood on industrial activity was quit marked in Dhar district. It was the household industry, which was engaging highest number of workers, as compared to all industrial activities. The industries like cloth weaving, printing of cotton fabrics, wood and ironwork, tanning, oil pressing, gur-making, etc., existed in the district from olden times. These industries exit even now in their pristine form generally in rural areas.

Electricity and Power

During the year 1998-99 the total number of industrial connections was 371392 and 67089 domestic connections. Beginning of electric power generation in the erstwhile Dhar State appears to have been made in the year 1915-16. It was fifteen years later in April, 1930 that the construction of electric installation for the supply of electric power to the whole city of Dhar was started. Huge expenditure was being incurred on the supply of power to places, to the King Edward Memorial Hospital and street-lighting by petrol gas lamps in Dhar city.

Gram Panchayat

Panchayat is the basic institution of local administration and is the foundation of decentralized administration. Under the Directive Principles of State policy, the Constitution of India provides the Panchayati Raj system. M.P. Government passed M.P. Panchayat Adhiniyam System. Under 73rd Amendment of the Constitution, M.P. Government passed the Panchayat Notification 1993, which provides panchayat for villages, janpad panchayats for blocks and district panchayat for district. Under M.P. Gram Sabha Notification 2001, Gram Sabha is constitutionally-approved unit which includes all the major persons, and gives voting rights to elect Panch, Sarpanch, and members of Janpad and members of district Panchayat. The Gram Sabha has power to approve works under annual budget of the village. Constituted with the elected members, these institutions work for 5 years. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is 1/3 reservation. Village panchayat, Janpad panchayat and district panchayat have members 10-20, 10-25, 10-35 respectively.

Gram panchayat within its area and within its budget, can take up work like cleanliness, water supply, public works(roads, buildings, well tanks) market rates, co-operation to Government works, community health and development works. Janpad panchayat within its budget take up works, like community development and village integration, agriculture, social, commerce, cattle-rearing, fish-breeding, adult-education, co-operatives, cottage industry, welfare and employment oriented programme. It is the duty of the district panchayat to have control over Janpad panchayats and village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works. 13 Janapad Panchayats, and 669 Gram Panchayats and Development Blocks do all the development works of the villages.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently

appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard

is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

   i) a city or town with one or more contiguous outgrowths;

   ii) two or more adjoining towns with their outgrowths; and

   iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher

22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor

43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or

social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi)Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual

place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or

for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country,

state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Dhar district comprises of 1,473 inhabited villages, 79 uninhabited vilages and total 1552 villages distributed among seven tahsils and 13 number of CD blocks. The district has 11 towns. The average household size of the district is 5.7. Total population of the district is 1,740,329 comprising 890,416 males and 849,913 females. Thus the sex ratio of the district works out to 995 which is higher than the sex-ratio of the state (919). Density of the district is 213 persons per sq.km. and is higher than the density of the state which is 196. Literacy rate of the district 52.5 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 6.49 per cent and 54.5 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Badnawar	154,121	138,978	15,143	193,688	175,942	17,746	25.7	26.6	17.2	9.8	9.2
2	Sardarpur	184,943	168,050	16,893	230,251	208,516	21,735	24.5	24.1	28.7	9.1	9.4
3	Dhar	312,411	241,185	71,226	431,636	279,638	151,998	38.2	15.9	113.4	22.8	35.2
4	Gandhwani	98,568	98,568	-	122,172	122,172	-	23.9	23.9	-	-	-
5	Kukshi	293,380	267,022	26,358	356,206	324,478	31,728	21.4	21.5	20.4	9.0	8.9
6	Manawar	205,532	185,209	20,323	254,924	229,457	25,467	24.0	23.9	25.3	9.9	10.0
7	Dharampuri	118,457	88,690	29,767	151,452	111,942	39,510	27.9	26.2	32.7	25.1	26.1
	District Total:	1,367,412	1,187,702	179,710	1,740,329	1,452,145	288,184	27.3	22.3	60.36	13.1	16.6

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 27.3 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 22.3 per cent. Among the tahsils, Dhar has registered the highest decadal growth rate of 38.2 per cent. The growth rate is highest in Badnawar tahsil for rural area of the district. The percentage of urban population to total population of the district is 16.6 per cent in 2001 against 13.1 per cent in 1991.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Badnawar	165	175,942	89,306	86,636	16 (9.7)	1,112	1,091
2	Sardarpur	190	208,516	106,132	102,384	27 (14.2)	1,533	1,452

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1,473 inhabited villages, 166 (11.3 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 362 villages having 24.6 per cent villages of the district while in the size class of 500-999 population there are 438 villages constituting 29.7 per cent of total villages. 365 villages (24.8 per cent) are in the size class of 1000-1999 and 121 villages (8.2 per cent) are in the size class of 2000-4999. There are 21 villages (1.4 per cent) in the size class of 5000-9999. There is no village (0.0 per cent) falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town

1. Mandav(NP)
2. Rajgarh(NP)
3. Sardarpur(NP)

(ii) Census town

1. Nil

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

Nil

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

Nil

(iii) Census towns of 1991 census are notiified as statutory town in 2001 census

1. Pithampur(NP)

(c) Declassified

Nil

(d) Wholly merged with other town(s)

Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	8	0.5	254	0.0
11-20	6	0.4	478	0.0
21-50	46	3.1	7,720	0.5
51-100	196	13.3	88,249	6.1
101-200	696	47.3	639,425	44.0
201-300	341	23.2	397,191	27.4
301-500	134	9.1	215,093	14.8
501 +	46	3.1	103,735	7.1
Not known	-	-	-	-
District Total:	1,473	100.0	1,452,145	100.0
Population Density (Rural) of the district:		182		

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 696 accounting for 47.3 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 44.0 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 14 villages (0.9 per cent). 46 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-300 is 23.2 percent of the total inhabited villages having 27.4 percent population of the district. In the medium density ranges of 21-50, 51-100, and 101-200 persons account for 3.1, 13.3 and 47.3 per cent of inhabited villages.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	-	-	974
1911	967	973	903	1,004	1,006	975
1921	949	959	863	987	989	954
1931	947	957	862	979	986	921
1941	946	957	869	971	977	925
1951	945	953	902	963	965	938
1961	932	947	860	962	969	901
1971	920	934	864	962	969	908
1981	921	934	878	966	974	915
1991	912	921	887	951	960	892
2001	919	927	898	955	971	875

As per 2001 Census, sex ratio of 955 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly higher in all Census years over the state average figures. The lowest sex ratio of 951 females per 1,000 males was recorded in the district in Census 1991.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Badnawar	964	970	904
2	Sardarpur	962	965	940
3	Dhar	902	948	825
4	Gandhwani	989	989	-
5	Kukshi	983	985	961
6	Manawar	977	982	937
7	Dharampuri	952	963	922
	District Total:	955	971	875

Table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 971 whereas it is 875 for the urban area. The sex ratio in rural area is highest (989) in Gandhwani tahsil whereas in urban area it is highest (961) in Kukshi tahsil. The sex ratio of the district is 955 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Badnawar	970
2	Sardarpur	965
3	Tirla	960
4	Dhar	939
5	Nalchha	947
6	Gandhwani	989
7	Bagh	994
8	Kukshi	989
9	Dahi	976
10	Nisarpur	983
11	Manawar	983
12	Bankaner (Umarvan)	980
13	Dharampuri	963
	District (Rural) Total:	971

Table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 971 females per 1,000 males. Among the CD Blocks the highest sex ratio of 994 is found in Bagh CD Block and the lowest of 939 is recorded in Dhar CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	0.7	2,136	0.1
700-749	7	0.5	3,105	0.2
750-799	13	0.9	2,486	0.2
800-849	45	3.1	22,756	1.6
850-899	113	7.7	76,179	5.2
900-949	310	21.0	369,007	25.4
950-999	451	30.6	558,075	38.4
1000-1099	428	29.1	383,374	26.4
1100+	96	6.5	35,027	2.4
District Total:	1,473	100.0	1,452,145	100.0
Sex ratio (Rural) for District:			971	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 451 accounting for 30.6 per cent of the total villages having largest population of 38.4 per cent in the district fall in the sex ratio range of 950-999. It is followed by 428 villages constituting 29.1 per cent of total villages and 26.4 per cent population falling in the range of 1000-1099.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Badnawar	NP	904
2	Bagh	CT	969
3	Dhamnod	NP	914
4	Dhar	M	923
5	Dharampuri	NP	940
6	Kukshi	NP	959
7	Manawar	M	937
8	Mandav	NP	955
9	Pithampur	NP	714
10	Rajgarh	NP	950
11	Sardarpur	NP	915
	Sex ratio (Urban) for the district:		875

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 875 females per 1,000 males as a whole. Among the 11 towns of the district the sex ratio varies between 714 to 969. Bagh(CT) has the highest sex ratio 969 while Pithampur(NP) has the lowest sex ratio of 714 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Rural	291,153	149,273	141,880	950
		Urban	47,470	24,968	22,502	901

Table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 943 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 950 and 901 respectively. The rural sex ratio in tahsil varies between 930 in Badnawar to 977 in Gandhwani tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

District (Rural) Total:		291,153	149,273	141,880	950

Table 11 gives CD Blockwise sex ratio of rural population in the age group of 0-6 years in the district. The sex ratio is 950 for the district (rural). The sex ratio of CD Block varies between 916 to 1,005. It is highest in Bagh CD Block and lowest in Dhar CD Block.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distri-bution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	100	6.8	5,697	2.0
700-749	59	4.0	7,433	2.6
750-799	93	6.3	14,939	5.1
800-849	132	9.0	25,254	8.7
850-899	156	10.6	42,320	14.5
900-949	183	12.4	50,169	17.2
950-999	163	11.1	44,070	15.1
1000-1099	295	20.0	61,355	21.1
1100+	292	19.8	39,916	13.7
District (Rural) Total	1,473	100.0	291,153	100.0
Sex ratio (Rural) for District:			950	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e. 295 (20.0 per cent) having population (21.1 per cent) in the district (rural) fall in the sex ratio range of 1,000-1099. It is followed by the sex ratio range of 1,100 and above which claims 292 villages (19.8 per cent) and 13.7 per cent population. Next to it 183 villages (12.4 per cent) and 17.2 per cent population are in the range of 900-949. Minimum number of villages i.e. 59 (4.0 per cent) and 2.6 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,740,329 total population of the district 6.5 per cent belong to the Scheduled Castes and 54.5 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 6.2 per cent in rural population and 8.0 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Badnawar tahsil (9.7 percent) while the lowest is found in Gandhwani tahsil (1.7 percent). The proportion of Scheduled Tribes population is 61.8 and 17.5 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Gandhwani tahsil (90.4 per cent) and the lowest Scheduled Tribes population is recorded in Dhar tahsil (34.6 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total:	1,452,145	89,924	898,012	6.2	61.8

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 6.2 per cent of rural population of the district belongs to Scheduled Castes and 61.8 per cent to Scheduled Tribes. Scheduled Castes population is highest (16.3 per cent) in Dhar CD Block whereas it is lowest (1.6 per cent) in Bagh CD Block. Scheduled Tribes population is highest (96.1 per cent) in Bagh CD Block and it is lowest (13.4 per cent) in Dhar CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	683	46.4	0	0.0
Less than 5	350	23.8	11,705	13.0
5-10	179	12.2	25,000	27.8
11-20	155	10.5	27,925	31.1
21-30	66	4.5	15,377	17.1
31-40	30	2.0	8,193	9.1
41-50	3	0.2	619	0.7
51-75	7	0.5	1,105	1.2
76 and above	0	0.0	0	0.0
District Total	1,473	100.0	89,924	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 683 villages accounting for 46.4 per cent of total 1,473 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 350 villages (23.8 per cent). In 179 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 155 villages. The range of 21-30 and 31-40 per cent contains 66 and 30 villages respectively. There are 3 villages in the range of 41-50 and 7 villages in the range of 51-75. There is no such village such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	19	1.3	0	0.0
Less than 5	52	3.5	1,316	0.1
5-10	60	4.1	6,999	0.8
11-20	93	6.3	20,111	2.2
21-30	91	6.2	29,396	3.3
31-40	82	5.6	41,264	4.6
41-50	56	3.8	33,019	3.7
51-75	117	7.9	97,506	10.9
76 and above	903	61.3	668,401	74.4
District Total	1,473	100.0	898,012	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 19 villages accounting for 1.3 per cent of total 1,473 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 52 villages (3.5 per cent). In 60 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 93 villages. The range of 21-30 and 31- 40 per cent contains 91 and 82 villages respectively. There are 56 villages in the range of 41-50 and 117 villages in the range of 51-75. 903 villages are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

7	Manawar (M)	25,467	2,168	4,576	8.5	18.0
8	Mandav (NP)	8,544	181	6,968	2.1	81.6
9	Pithampur (NP)	68,080	6,585	8,608	9.7	12.6
10	Rajgarh (NP)	15,617	1,063	2,835	6.8	18.2
11	Sardarpur (NP)	6,118	335	1,768	5.5	28.9
	District(Urban) Total	288,184	23,052	50,422	8.0	17.5

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/towns of the district. Out of the 11 towns the highest proportion (10.5 per cent) of Scheduled Castes is found in Dhamnod (NP) and lowest proportion (2.1 per cent) in Mandav (NP). For Scheduled Tribes the highest proportion (81.6 per cent) is found in Mandav (NP) and lowest (6.5 per cent) in Dharmapuri (NP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Badnawar	972	984
2	Sardarpur	985	977
3	Tirla	899	972
4	Dhar	953	939
5	Nalchha	947	952
6	Gandhwani	972	996
7	Bagh	1,028	996
8	Kukshi	990	997
9	Dahi	936	978
10	Nisarpur	983	1,000
11	Manawar	963	995
12	Bankaner (Umarvan)	925	991
13	Dharampuri	964	981
	District (Rural) Total	962	984

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district. The Scheduled Castes sex ratio is 962 for district (rural). Among the CD Blocks, the highest sex ratio of 1028 is found in Bagh CD Block and lowest of 899 is recorded in Tirla CD Block.

Sex ratio of Scheduled Tribes population in Dhar district rural is 984. Among the CD Blocks, the highest sex ratio of 1,000 is found in Nisarpur CD Block and lowest of 939 is recorded in Dhar CD Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Badnawar (NP)	876	920
2	Bagh (CT)	839	982
3	Dhamnod (NP)	967	852
4	Dhar (M)	939	916
5	Dharampuri (NP)	985	1,204
6	Kukshi (NP)	980	1,004
7	Manawar (M)	936	1,062
8	Mandav (NP)	905	970
9	Pithampur (NP)	860	810
10	Rajgarh (NP)	958	995
11	Sardarpur (NP)	1,081	777
Sex ratio (Urban) for the district:		921	925

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is lower (921) among Scheduled Castes compared to Scheduled Tribes (925).

Among the 11 towns of the district, there is one town in the Scheduled Caste i.e. Sardarpur (NP) (1,081) and three towns in Scheduled Tribes i.e. Kukshi (NP) (1,004), Manawar (M) (1,062) and Dharampuri (NP) (1,204) where the sex ratio is above one thousand. In the remaining towns sex ratio for Scheduled Castes is below one thousand, the lowest being 839 in Bagh (CT). Sex ratio of Scheduled Tribes for the remaining towns is below the line of equality, lowest being 777 in Sardarpur (NP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and Tahsilwise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 52.5 per cent

in the district. This proportion in rural area is 47.8 per cent and 75.0 per cent in urban areas. In the district the literacy rate of males 65.8 per cent is much higher than that of females which is 38.6 per cent.

Among the tahsils, Dharampuri tahsil tops with 61.4 per cent literates and the lowest literacy rate 40.3 per cent is recorded for Kukshi tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total:		554,804	362,106	192,698	897,341	374,604	522,737	47.8	61.6	33.6	28.0

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 47.8 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 61.6 and 33.6 per cent respectively. At CD Block level Dhar CD Block has the highest rural literacy rate of 60.3 per cent while the lowest literacy rate of 23.7 per cent is recorded for Bagh CD Block. The gap in male-female literacy rate is 28.0 in the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	12	0.8	644	0.0
1-10	73	5.0	27,349	1.9
11-20	172	11.7	102,400	7.1
21-30	210	14.3	172,542	11.9
31-40	203	13.8	181,319	12.5
41-50	257	17.4	262,550	18.1
51-60	263	17.9	315,147	21.7
61-70	199	13.5	289,008	19.9
71-80	61	4.1	82,271	5.7
81-90	17	1.2	16,848	1.2
91-99	5	0.3	2,064	0.1
100	1	0.1	3	0.0
District Total:	1473	100.0	1,452,145	100.0
Literacy rate for District:			52.5	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 12 villages (0.8 per cent) of the district as that population of these villages is 644. There is one village constituting 0.1 per cent of total villages having 100 per cent literacy. Highest number of villages i.e. 263 villages fall in the literacy range of 51-60 per cent. This accounts for 17.9 per cent of total villages and 21.7 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 46.6 percent of the total population in the district. The total workers comprises of 34.2 percent of main workers and 12.4 percent of marginal workers and the remaining 53.4 percent are non-workers.

Among males, 45.6% are main workers and 6.8% are marginal workers whereas among females, corresponding figures are 22.3% and 18.2% respectively.

		Females	73,880	26,557	7,844	16,331	388	1,994
				(35.9)	(29.5)	(61.5)	(1.5)	(7.5)
	District Total:	Persons	1,740,329	811,415	423,072	239,670	10,616	138,057
				(46.6)	(52.1)	(29.5)	(1.3)	(17.0)
		Males	890,416	467,321	236,888	106,155	6,984	117,294
				(52.5)	(50.7)	(22.7)	(1.5)	(25.1)
		Females	84,9913	344,094	186,184	133,515	3,632	20,763
				(40.5)	(54.1)	(38.8)	(1.1)	(6.0)

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 52.1 per cent of the total workers (main + marginal), 29.5 per cent of total workers are engaged as agricultural labourers, 1.3 per cent as household industry workers and 17.0 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on cultivators sector absorbing large number of workers. The proportion of cultivators varies between 31.1 per cent in Dharampuri tahsil and 80.2 per cent in Gandhwani tahsil. The proportion of female cultivators is 54.1 per cent which is slightly higher as compared to 50.7 per cent proportion of male cultivators in the district. In district the proportion of agricultural labourers is 29.5 per cent. It is 38.8 per cent for females which is very high as compared to males (22.7 per cent). The percentage of household industry workers is very low in the district as stated above. The highest proportion of 34.0 per cent of other workers is recorded in Dhar tahsil while the lowest proportion of 5.6 per cent is found in Gandhawani tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 49.2 per cent of total population. Among these workers cultivators constitute 58.1 per cent, agricultural labourers 32.1 per cent, household industry 1.1 per cent and other workers constitute 8.6 per cent. The proportion of cultivators is highest 80.2 per cent in Gandhwani CD Block and is lowest 36.4 per cent in Dharampuri CD Block. Proportion of agricultural labour is highest 49.1 per cent in Dharampuri CD Block and lowest 13.7 per cent in Gandhwani CD Block. It is also seen that the proportion of male workers is more than female workers under the category of cultivators.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/Towns of the district. It is seen that out of the 33.8 per cent of total workers, cultivators constitute 8.2 per cent, agricultural labourers 10.8 per cent, household industry 2.5 per cent and the highest proportion is covered by other workers which is 78.5 per cent. It is also found that proportion of female workers under cultivators, agricultural labourers and household industry workers is more than that of the male workers proportion whereas proportion of male workers under other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 60.4 per cent in Mandav (NP), agricultural labourer is highest 24.0 per cent in Manawar (M), household industry workers is highest 6.4 per cent in Bagh (CT) and other workers is highest 89.0 per cent in Dhar (M).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,473 inhabited villages in the district 1,312 villages or 89.1 per cent have been provided with the education facilities of one type or the other. Similarly 752 villages in the district

constituting 51.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,439 or 97.7 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 219 villages constituting 14.9 per cent of villages have been provided with post office facility within the villages. 481 or 32.7 per cent villages have been provided with the telephone facility, 438 or 29.7 per cent with transport facility, 88 or 6.0 per cent villages with both the facilities of bank and agricultural credit societies. Similarly there are 615 or 41.8 per cent villages which are linked with the pucca road. Total 1,434 or 97.4 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Bagh and Dahi CD block have cent percent villages where educational facility is available and lowest 73.0 per cent is found in Tirla CD Block. Medical facility is highest in Dahi (83.9 per cent) and lowest (31.0 per cent) in Dharampuri CD block. Telephone facility is highest in Dhar CD Block (77.6 per cent) and lowest in Bagh CD Block (2.2 per cent) . In the field of power supply all villages have been covered except 39 villages in the district.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,452,145 persons in the district, 1,424,469 or 98.1 per cent have educational facility of one or the other type. Similarly 1,010,072 or 69.6 per cent population has medical facilities while 1,437,100 or 99.0 per cent have improved drinking water facility. Post office facilities are available to 531,781 or 36.6 per cent population. Telephone facility is available to 719,602 or 49.6 per cent. Transport communications facility is available to 727,947 or 50.1 per cent. Bank facility is available to 291,570 or 20.1 per cent. 281,188 or 19.4 per cent have been provided with the facility of agricultural credit societies. 863,484 or 59.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,441,976 or 99.3 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	146	15	0	161
(b) Middle School	683	313	65	1,061

3. Post Office	625	443	186	1,254
4. Telephone	341	297	354	992
5. Bus Service	616	338	81	1,035
6. Banks				
(a) Commercial Bank	390	495	517	1,402
(b) Cooperative Bank	238	292	892	1,422
7. Agricultural Credit Societies	474	529	382	1,385

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 161 villages do not have primary school and out of these villages, children of 146 villages have to travel less than 5 kms. for schooling. Out of 1,473 inhabited villages as many as 1,061 are deprived of middle school and 1,469 of degree college. Of these 683 avail the facility of middle school at a distance of less than 5 kms., 313 at a distance 5-10 kms. and the remaining 65 at a distance of 10+ kms. In respect of degree college 55 avail this facility at a distance of less than 5 kms., 203 between 5 to 10 kms. and rest 1,211 villages at a distance of 10+ kms.

Similarly there are 1,446 villages in the district which have been devoid of hospital facility and 1,425 villages which are deprived of PHC facilities. Of these 203 villages have the facility of Hospital available within 5 kms. while in respect of 329 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 914 villages have this facility at a distance of 10+ kms. As regards PHC 246 avail this facility at a distance of less than 5 kms., 433 at a distance of 5-10 kms. and the remaining 746 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,254 villages do not have this facility in the village itself. Of these majority i.e. 625 have this facility at a distance of less than 5 kms., another 443 villages avail it at a distance of 5-10 kms. In the remaining 186 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 992 villages in the district which are without telephone facilitiy. Of these 341 avail this facility at a distance of less than 5 kms., 297 at a distance of 5-10 kms. and remaining 354 have to traverse a distance of 10+ kms.

For bus service out of 1,035 villages which do not have facility, 616 villages avail this facility at a distance of less than 5 kms., 338 at a distance between 5-10 kms. and 81 at a distance of 10+ kms.

In the entire district 1,402 villages are deprived of Commercial Bank and 1,422 of Co-operative Bank. Of these 1,402 villages which are deprived of Commercial Banks 390 villages avail this facility at a distance of less than 5 kms., 495 between 5-10 kms. and the remaining 517 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,422 villages 238 villages avail this facility at a distance of less than 5 kms., 292 at a distance of 5-10 kms. and remaining 892 at a distance of 10+ kms. 1,385 villages do not have agricultural credit societies. This facility to 474 villages is available at a distance of less than 5 kms., 529 at a distance of 5-10 kms.and the remaining 382 at a distance of 10+ kms

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road

District total	1,473	1,312	752	219	481	438	88	88	615
	(100.0)	(89.1)	(51.1)	(14.9)	(32.7)	(29.7)	(6.0)	(6.0)	(41.8)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,473 inhabited villages in the district, there are 45 villages which have nearest towns upto a distance of 5 kms. Of these only 39 villages forming 86.7 per cent of total villages, are having the educational facilities atleast one type and 22 villages constituting 48.9 per cent, have the medical facilities within the range of 5 km., 6 villages forming 13.3 per cent have the facility of post office within the range of 5 km and 16 or 35.6 per cent have the facility of telephone under the distance of 5 km. 20 villages constituting 44.4 per cent have been linked by transport service. There are 3 villages constituting 6.7 per cent have the facility of banks. One village constituting only 2.2 per cent has been provided with agricultural credit societies. 24 villages comprising 53.3 per cent have been provided with pucca road within the distance of 5 km.

There are 462 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 431 villages constituting 93.3 per cent have been provided with the educational facilities. 259 villages comprising 56.1 per cent have been provided with medical facilities. 108 villages constituting 23.4 per cent enjoy the post office facility. 201 villages comprising 43.5 per cent have been provided the telephone facility. 164 villages constituting 35.5 per cent have been linked with transport communications. 43 villages comprising 9.3 per cent have bank facility. 39 villages constituting 8.4 per cent are having agricultural credit societies, while 238 villages or 51.5 per cent are approachable by pucca road. 949 villages fall in the distance range of 16-50 kms. Of these, 87.1 per cent villages have educational facility, 49.2 per cent with medical, 11.0 per cent with post office, 27.6 per cent with telephone, 26.7 per cent with transport and communications. 4.3 per cent and 4.8 per cent villages with banks and agricultural credit societies facilities respectively are available. 352 (37.1 percent) villages have approach by pucca road facility.There are 14 inhabited villages in the district which fall in the distance range of 51+ kms.Of these 13 villages constituting 92.9 per cent have been provided with the educational facilities. 3 villages comprising 21.4 per cent have been provided with medical facilities. One village constituting 7.1 per cent each enjoy the facilities of post office, transport communications, bank and approachable by pucca road facility. 2 villages comprising 14.3 per cent have been provided with the facilities of telephone and agricultural credit societies.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Dhar district out of a total 1,473 inhabited villages, overwhelming 528 have a population of less than 500 persons. Of these, 370 villages (70.1 per cent) have education facility, 168 (31.8 per cent) have medical facility, 505 (95.6 per cent) have improved drinking water facility. 11 villages (2.1 per cent) have post office facility. 94 (17.8 per cent) have telephone facility. 64 (12.1 per cent) have been linked by bus service. One (0.2 per cent) have bank facility. There is no village having the facility of agricultural credit societies. 126 villages (23.9 per cent) have been linked with pucca road. 495 villages (93.8 per cent) have been provided with electricity.

Out of 438 villages, which fall in the population range of 500-999 persons, 435 villages (99.3 per cent) have been provided with the education facility, 194 (44.3 per cent) with medical facility, 430 (98.2 per cent) villages have improved drinking water facility. 23 villages (5.3 per cent) have been provided with post office facilities, 140 villages (32.0 per cent) with telephone facility, 105 villages (24.0 per cent) with transport facilities, 9 villages (2.1 per cent) with bank facility and agricultural credit societies and 168 villages (38.4 per cent) have approach by pucca road. 432 villages (98.6 per cent) have electricity facility.

365 villages fall in population range of 1,000-1,999 persons. Of these all villages have been provided with the education and power supply facility, 261 (71.5 per cent) with medical facility, 362 (99.2 per cent) villages have improved drinking water facility. 79 villages (21.6 per cent) have been provided with post office facilities, 143 villages (39.2 per cent) with telephone facility,

158 villages (43.3 per cent) with transport facilities, 22 villages (6.0 per cent) with bank facility, 24 villages (6.6 per cent) with agricultural credit societies and 210 villages (57.5 per cent) have approach by pucca road.

There are 121 villages in the district which are covered under 2,000-4,999 population range. Of these, cent percent villages have been provided with the education, improved drinking water and power supply facility, 108 (89.3 per cent) with medical facility. 85 villages (70.2 per cent) have been provided with post office facilities, 83 villages (68.6 per cent) with telephone facility, 90 villages (74.4 per cent) with transport facilities, 36 villages (29.8 per cent) with bank facility, 35 villages (28.9 per cent) with agricultural credit societies and 90 villages (74.4 per cent) have approach by pucca road.

There are 21 villages in the district which are covered under 5,000-9,999 population range. All villages have facilities of education, medical, improved drinking water, post office, telephone, transport communimcaton, approach by pucca road and power supply. While the facility of bank and agricultural credit societies is available in 20 villages. There is no village in the population range of more than 10,000.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Badnawar	165	103,543	74.4	54.3
2	Sardarpur	190	123,585	60.6	37.2
3	Tirla	141	51,214	52.0	44.8
4	Dhar	98	55,382	84.6	61.9
5	Nalchha	180	67,124	59.2	44.4
6	Gandhwani	144	79,859	51.1	21.4
7	Bagh	90	52,347	49.0	15.1
8	Kukshi	47	34,087	67.3	27.7
9	Dahi	62	48,211	42.4	27.4
10	Nisarpur	58	34,306	73.6	41.6
11	Manawar	95	57,238	78.9	41.2
12	Bankaner (Umarvan)	103	49,761	75.3	38.9
13	Dharampuri	100	41,347	60.3	66.8
	District Total:	1,473	798,004	63.6	42.0

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents CD blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,473 inhabited villages in the district having a total area of 798,004 hectares. Of this, 63.6 per cent is cultivable and 42.0 per cent of total cultivable area has got the irrigation facility.

It is seen that percentage of cultivable area to total area is highest 84.6per cent in Dhar CD Block. It is lowest 42.4 per cent in Dahi CD Block. The percentage of irrigated area to cultivable area is highest 66.8 per cent in Dharampuri and lowest 15.1 in Bagh CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Badnawar (NP)	285	136	149	237	163	0	23	1	51
2	III Dhamnod (NP)	372	190	182	372	54	127	138	0	52
3	II Dhar (M)	278	155	123	254	48	136	18	1	50
4	IV Dharampuri (NP)	226	118	108	213	45	93	23	1	52

6	III Manawar (M)	321	160	160	300	63	115	42	0	80
7	V Mandav (NP)	263	3	260	245	32	51	6	7	149
8	II Pithampur (NP)	17	11	6	11	11	0	0	0	0
9	IV Rajgarh (NP)	446	281	165	446	60	151	97	9	128
10	V Sardarpur (NP)	360	71	289	312	149	20	66	3	74
	District Total	242	123	120	227	53	86	32	1	54

Note: The difference in various totals is due to rounding off the related figures.

Table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Dhar works out to Rs.242 of which Rs.123 are derived through local taxes and the remaining Rs.120 is received from all other sources. The average of total expenditure incurred per capita is Rs.227. Out of this Rs.53 are spent on general administration, Rs.86 on public health and conveniences, Rs.32 on public works.There is only Rs.1 expenditure on public institutions. Rs.54 is spent on others.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Badnawar (NP)	9.0	3.9	2.3	1.1	0.6
2	Dhamnod (NP)	5.7	2.3	1.5	0.8	0.4
3	Dhar (M)	5.8	1.9	0.5	0.5	0.3
4	Dharampuri (NP)	6.8	1.5	1.5	1.5	0.8
5	Kukshi (NP)	4.9	2.1	1.2	1.2	0.4
6	Manawar (M)	5.5	2.7	2.0	0.8	0.4
7	Mandav (NP)	10.5	1.2	1.2	1.2	0.0
8	Pithampur (NP)	0.3	0.1	0.1	0.1	0.0
9	Rajgarh (NP)	5.1	1.9	1.9	1.3	0.6
10	Sardarpur (NP)	11.4	3.3	3.3	3.3	1.6
	District Total	4.8	1.7	1.0	0.7	0.3

In urban areas of Dhar district the average number of primary school per 10,000 population comes to 4.8 schools, 1.7 junior secondary/middle schools, 1.0 secondary/matriculation schools, 0.7 senior secondary schools and the ratio of colleges is only 0.3 college per 10,000 population. Among the towns, the ratio of primary is highest in Sardarpur (NP) while lowest is in Pithampur (NP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Badnawar(NP)	17
2	Bagh (CT)	27
3	Dhamnod(NP)	6
4	Dhar(M)	75
5	Dharampuri(NP)	23
6	Kukshi(NP)	20
7	Manawar(M)	12
8	Mandav (NP)	5
9	Pithampur(NP)	7
10	Rajgarh(NP)	6
11	Sardarpur(NP)	49
	Distrct Total	29

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Dhar district. On an average there are 29 beds per 10,000 population in urban areas of the district. Whereas it is the highest 75 in Dhar (M) while lowest number of 5 beds are recorded in Mandav (NP).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Badnawar	17,746	2,194	12.4
2	Dhamnod	26,273	5,100	19.4
3	Dhar	75,374	31,653	42.0
4	Dharampuri	13,237	4,365	33.0
5	Kukshi	24,313	10,747	44.2
6	Manawar	25,467	5,705	22.4
7	Rajgarh	15,617	6,321	40.5
8	Sardarpur	6,118	2,136	34.9
	District Total	204,145	68,221	33.4

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 204,145 urban population 68,221 persons constitute slum population which is 33.4 per cent of total urban population. Kukshi town has the highest 44.2 per cent of slum population whereas, Badnawar town has lowest (12.4 per cent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Badnawar (NP)	Bricks	Wheat
		Earthern Pots	Soyabean
		Agricultural Equip.	Cotton
2	Bagh (CT)	Hand Printed Cloth	Urad
		Cement	Handprinted Cloth
		Earthern Pots	Cement
3	Dhamnod (NP)	Cotton	Cotton
		Bricks	Chillies
		Furniture	Soyabean
4	Dhar (M)	P.V.C. Pipe	Wheat
		Steel Furniture	Soyabean
		Transformer	-
5	Dharampuri (NP)	Bricks	Cotton
		Shoes	Bricks
		Baskets	Wheat
6	Kukshi (NP)	Handloom Cloth	Cotton
		Oil	Chillies
		-	Handloom Cloth
7	Manawar (M)	Cotton	Cotton
		Bricks	Edible Oil
		Kakda	Bamboo Basket
8	Mandav (NP)	Paper Board	Paper Board
		-	Wheat
		-	Soyabean
9	Pithampur (NP)	Scooter	Scooter
		Railway Equipment	Railway Equipment
		Cycle Parts	Cycle Parts
10	Rajgarh (NP)	Bricks	Cotton
		Plastic Pipes	Soyabean
		Cement Pole	Wheat
11	Sardarpur (NP)	Dairy Items	Dairy Items
		-	Soyabean
		-	Wheat

Table 47 indicates most important articles manufactured and exported out of each town in the district. Commodities manufactured are bricks, wooden furniture, earthen pots, edible oil, milk product, *gur*, *chironji*, printed cloth, iron box, soyabean *khali* and brass utensils etc. Soyabean, gur, wheat, brick and *gitti*, pulses, stone coal, tendu leaves, *sagon*, milk product and bamboo etc.are the other important commodities which are exported by different towns.

(x)Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52.

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 304,910 consisting of 251,447 rural and 53,463 urban households. 24,516 households belong to Scheduled Castes 158,398 to Scheduled Tribes. 271,684 households are living in their own houses constituting 89.1 per cent of total households. Of these households, the largest number of households (132,844) have occupied single room accommodation and is followed by two room accommodation numbering to 77,940 households. Next position is claimed by households (25,309) occupying three room accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 22,205 households while 13,386 households are without any exclusive room.

25,144 households living in rented accommodation account for 8.2 per cent of total number of households in the district. The largest number of 13,522 households are living in single room accommodation followed by 6,956 households in two room accommodation. Next position is claimed by households (3,065) occupying three room accomodation. Households with three plus are 1,189 in numbers and 412 housheols are without any exclusive room.

Other households numbering to 8,082 forming only 2.7 per cent of total households are distributed in single room accommodation numbering 4,243 households 1,937 in double room 1,072 in three room, 500 households are in three plus rooms and 330 households are without any exclusive room.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Badnawar	30.7	67.1	2.2	28.2	69.7	2.1	55.8	41.1	3.1
2	Sardarpur	41.9	57.1	1.1	40.0	58.8	1.1	60.0	39.7	0.3
3	Dhar	45.3	52.1	2.6	28.2	69.1	2.7	72.1	25.4	2.5
4	Gandhwani	41.4	56.9	1.7	41.4	56.9	1.7	0.0	0.0	0.0
5	Kukshi	45.8	53.0	1.3	44.2	54.7	1.2	62.2	35.7	2.1
6	Manawar	32.2	66.3	1.6	28.3	70.4	1.3	66.7	29.4	3.9
7	Dharampuri	37.1	61.4	1.5	28.5	69.9	1.6	63.2	35.4	1.4
	District Total:	40.3	57.9	1.8	34.5	63.8	1.7	67.7	30.0	2.3

The data presented in Table 49 reveals that 40.3 per cent of household of the district are living in houses made of pucca materials, residences of 57.9 per cent households are semi permanent houses and 1.8 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 67.7 per cent are living in houses constructed of pucca materials, 30.0 per cent in semi-permanent structure and percentage of households in temporary houses is 2.3 constructed of kutcha materials. At rural level, the lowest percentage of 28.2 households occupying permanent structure is found in Badnawar and Dhar tahsils each while highest percentage of 44.2 is seen in Kukshi tahsil. The proportion of semi-permanent houses is high in Manawar (70.4) and lowest in Kukshi (54.7) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 2.7 per cent in Dhar tahsils followed by 2.1 percent in Badnawar tahsil, 1.7 percent in Gandhwani, 1.6 percent in Dharampuri , 1.3 percent in Manawar, 1.2 percent in Kukshi and 1.1 percent in Sardarpur.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Table 50 indicates that 65.3 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/tube-well, 82.8 per cent households have provision of electricity in their houses. 80.4 per cent rural households have facility of electricity against 94.3 per cent in urban areas.The bathroom facility is available to only 24.4 per cent households within their premises . As regards rural areas, 16.3 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 62.6 per cent. Toilet and drainage facilities in the district are available to 23.0 per cent and 29.5 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that fire wood is used as the most predominant fuel used for cooking by 49.3 per cent households in the district. In the tahsils, this proportion varies between 69.4 per cent in Kukshi and 34.0 per cent in Manawar tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller number of population due to availability of L.P.G. The next cooking fuel is crop residue which is used by 21.7 per cent households in the district. This proportion in rural and urban areas is 25.8 and 2.4 per cent respectively. Next fuel is L.P.G. and used by 12.0 percent in district.Use of L.P.G. in rural area for cooking is 5.7 percent as compared to urban areas(41.6) at district level. There are 10.5 per cent households using cowdung cake in the district. Use of cowdung cake for cooking by rural households comes to 12.2 per cent while in urban areas its proportion is only 2.5 per cent. There are 5.1 per cent households using kerosene in the district. Use of kerosene for cooking by urban households comes to 21.2 per cent while in rural areas its proportion is only 1.7 per cent, as a whole. The percentage of households using other types of fuel is insignificant. In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel.

		Urban	53,463	21,158	15,773	32,450	7,672	22,799	12,340	1,921	13,391

This table presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households.There are 304,910 households in the district and among them, 96,522 households have been availing banking services. 55,774 households have radio/transistor. Television is possessed by 85,441 households. Telephone is available in 17,412 households. Bicycle is the most common means of transportation and is available in 109,190 households. Scooter, motor cycle, moped (two wheelers) and car, jeep, van (four wheelers) are used by 38,724 and 5,582 households respectively. None of the specified assets is available in 140,510 households.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

For handicapped/disabled children special learning and enriching educational facilities have been created in the district. SOPAN, a school for deaf, mute and blind children was set up in the year1997-98 in Dhar town District Planinig committee, Dhar unanimously decided in May'99 to state 54 Community Delivery Rooms (CDR's) in 544 villages on pilot basis

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the town of the district.

Places of Tourism :

Mandu- 100km. away from Indore airport connected to Delhi, Bombay, Gwalior and Bhopal nearest rail head is Ratlam, 124 km. and Indore (94 km.) on the Delhi-Bombay main line. Regular bus service connect Mandu and Indore. Dhar, Mhow, Ratlam, Ujjain and Bhopal. Mandu is a celebration in stone of life and joy, of the love of the poet-prince Baz Bahadur for his beautiful

wife, Rani Roopmati. High up on the crest of a hill, Roopmati's pavilion still gazes down at Baz's palace, a magnificent expression of Afghan architecture. Towards the end of 13th century, it came under the Sultans of Malwa, first of whom renamed it Shadiabad - the city of joy. Its rulers built exquisite palaces like the Jahaz and Hindola Mahals, ornamental canals, baths and pavilions. Each of Mandu's structure is an architectural gem. Some are outstanding like Jama Masjid, and Hoshang Shah's Tomb, which provided inspiration for the master builders of world famous Taj Mahal centuries later. The glory of Mandu lives on, in its palaces and mosques, in legends and songs.

(a) The Darwazas

The 45 km. parapet of walls that encircle Mandu are punctuated by 12 gateways. Most notable of these is Delhi Darwaza, the main entrance to the fortress city, for which the approach is through a series of gateways well fortified with walled enclosures and strengthened by bastions such as the Alamgir and Bhangi Darwaza, through which the present road passes. Rompol Darwaza, Jehangir Gate and Tarapur Gate are some of the other main gateways.

(b) The Royal Enclave (Jahaj Mahal)

This 120 mt long 'ship palace' built between the two-artificial lakes, Munj Talab and Kapur Talab is an elegant two storeyed palace. Probably Sultan Ghiyas-uddin-Khilji built it for his large *harem*. With its open pavilions, balconies overhanging the water and open terrace, Jahaz Mahal is an imaginative recreation in stone of a royal pleasure craft. Viewed on moonlit nights from the adjoining Taveli Mahal, the silhouette of the building, with the tiny domes and turrets of the pavilion gracefully perched on the terrace, presents an unforgettable spectacle

(c) Hindola Mahal

An audience hall, also belonging to Ghiyas-ud-din's reign, it derives its name of swinging palace from its sloping sidewalls. Superb and innovative techniques are also evident in its ornamental facade, delicate trellis work in sandstone and beautifully moulded columns. To the West of Hindola Mahal there are several unidentified buildings which still bear traces of their past grandeur. Amidst these is an elaborately constructed well called Champa Baoli, which is connected with underground vaulted rooms where arrangements for cold and hot water were made. Other places of interest in this enclave are Dilawar Khan's Mosque, the Nahar Jharokha (tiger balcony), Taveli Mahal, the two large wells called the Ujali (bright), and Andheri (dark), Baolis and Gada Shah's Shop and House, all worth a visit.

(d) Hoshang Shah's Tomb

India's first marble edifice, it is one of the most refined examples of Afghan architecture. Its unique features are the magnificently proportioned dome, marble lattice work of remarkable delicacy and porticoted courts and towers to mark the four corners of the rectangle.

Shah Jehan sent four of his great architects to study the design of and draw inspiration from the tomb. Among them was Ustad Hamid, who was also associated with the construction of Taj Mahal.

(e) Jami Masjid

Inspired by the great mosque of Damascus, the Jami Masjid was conceived on a grand scale, with a high plinth and a huge domedporch projection in the centre, the background dominated by similar imposing domes with the intervening space filled up by innumerable domes. The huge proportions and the stern simplicity of its construction strike one. The great court of the mosque is enclosed on all sides by huge colonnades with a rich and pleasing variety in the arrangement of arches, pillars, number of bays, and in the rows of domes above.

(f) Mohankheda - Jain Tirth

Mohankheda-Holi Jain *Tirth* is situated 47 km. from Dhar on Indore-Ahemadabad Highway. Poojya Gurudev Shri Rajendra Surishwarji Maharaj Sahab established this *Tirth* around 1940. This *Tirth* was given new and artistic look by Acharya Dev Shri Vidhyachandra Surishwarji Maharaj Sahab. This *Tirth* have Shodh Shikhari Jinalaya, 16 feet heighted Bhagwan Shri Adinathji's Pratima and Samadhi Mandir of Shri Rajendra Surishwarji, Shri Yatindra Surishwarji and Shri Vidhyachandra Surishwarji Maharaj Sahab.

(g) Amjhera

The village appears to have been of some importance in old days as it has a number of temples

of Shaiva and Vaishnava sects, tanks, *chhatris*, satistones, wells, a mosque and a fort with palaces inside. As many as five Shaiva temples dedicated to Mahadeva, Chamunda and Ambika and two Vaishnava temples of Lakshmi-Narayana and Chhturbhujanatha are in the village.

(h) Badnawar

The place is evidently an old one as it has yielded old monuments, the earliest of which is of the 11-12th century A.D. and it has a magnificent Shaiva temple repaired later on. Besides this, there are three other temples of a later period including one called Udanya temple. A few images have been found here bearing dates Vikram Samvat 1219,1229 and 1336 corresponding to A.D. 1162, 1172 and 1279, respectively. The town has an old mosque constructed in A.D. 1688 and the remains of the fortress or *garhi* mentioned by Abul Fazl.

Bagh Caves

These caves belong to the Budhist faith and it is not certain as to how and when these caves began to be called Bagh Gupha. In modern times these caves were first discovered in 1818. The village situated at a distance of about 8 km. and the river flowing nearby the cave came to be known as Bagh village and Bagh river. It believed that either the name of the river or of the village has given its name to others.

These are about 192 km. by road from the nearest railway station Mhow, on Ajmer-Khandwa narrow guage section of the western Railway.

Until recently these caves were roughly assigned to the seventh century from the style of architecture and painting but a copper-plate grant inscription since discovered pushes back the date of at least some of them to the 4th or 5th century A.D.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Dhar was an important centre of revolt; during the first war of independence in 1857 freedom fighters captured the fort of Dhar, which remained in their possession from July to October 1857.

The majority of the population in Dhar district belongs to the Scheduled Tribes. The main tribes in the district are Bhils and Bhilalas. Their highest concentration is in Kukshi tahsil.

Great national importance is Bagh, where the caves have been excavated on the rock face, of a lofty hill, on he bank of the Bagh river.

Dhar is the only place other than major metropolies, which has residential integrated education facilities for the deaf, mute, blind as well as the mentally disabled. For a small town with population less than a lack, this is no mean achievement.

The CDR is the center where safe deliveries are conducted at the village/panchayat level. There was a demand from most of Gram panchayats and village health committees to support them in starting a CDR, which would be run by a trained village *dai*/trained TBAs. This demand was stressed during "Gram Sampark Abhiyan" conducted during 6-12th April'99, when teams of officials visited all the villages of the district. This Community Delivery Rooms (CDR) was locally termed as "Samudayik Prasuti Kaksh".

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Source :

1. Gazetteer of India, Dhar district, 1993
2. Census of India, District Census Handbook, 1991.
3. District Statistical Book, 1997-98

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/ type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
Dhar	Pithampur(NP)	Bondia	Fully Merged
		Mandlavad	Fully Merged
		Agrakhedi	Fully Merged
		Bagdun	Fully Merged
		Sagaur	Fully Merged
		Pithampur	Fully Merged
		Akolia	Fully Merged
		Jamodi	Fully Merged
		Kheda	Fully Merged
		Bardari	Fully Merged
		Gawla	Fully Merged
		BannadKhurd	Fully Merged
		Tarpura	Fully Merged
		Silotiya	Fully Merged
	Mandav(NP)	Mandav	Fully Merged
		Sagar	Fully Merged
		Songarh	Fully Merged
		Nandlalpur	Fully Merged
		Jamanya	Fully Merged
		Kandipura	Fully Merged
		Jhabri	Fully Merged

(c) CD blockwise presentation of Village Directory Data

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there are 11 villages which fall under this category. 2 villages namely Tikhipada (03005000) and Pipal Khunta (03005200) in Badnawar CD Block, one village Sunariya (03028300)in Sardarpur, 4 villages Kundali (03070200), Bilyadeh (03070300), Chorbardi (03070600) and Bherughatpura (03076300) in Nalchha and 4 village namely Guwal Bardi (03083600), Bharuda(03084100), Gunjyara (03094000) and Badkhodra (03094200) in Gandhwani. CD Block. There is no village of Tirla, Dhar, Bagh, Kukshi, Dahi, Nisarpur, Manawar, Bankaner(Umarvan) and Dharampuri CD Block which falls under this category.

APPENDIX V - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Badnawar	172	7	165	50
2	Sardarpur	198	8	190	100
3	Tirla	157	16	141	105
4	Dhar	108	10	98	5
5	Nalchha	192	12	180	112
6	Gandhwani	150	6	144	109
7	Bagh	90	0	90	65
8	Kukshi	48	1	47	9

1	2	3	4	5	6
9	Dahi	62	0	62	21
10	Nisarpur	63	5	58	15
11	Manawar	100	5	95	22
12	Bankaner (Umarvan)	108	5	103	39
13	Dharampuri	104	4	100	31
	District Total:	1,552	79	1,473	683

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 1,552 villages in the district, 79 villages are uninhabited and remaining 1,473 villages are inhabited. Out of 1,473 inhabited villages 683 villages have no Scheduled Castes population and 790 inhabited villages have Scheduled Castes population in the district. Nalchha has highest 112 villages with no Scheduled Castes population while in other CD Blocks there are 109 such villages in Gandhwani, 105 in Tirla, 100 in Sardarpur, 65 in Bagh, 50 in Badnawar, 39 in Bankaner(Umarvan), 31 in Dharampuri, 22 in Manawar, 21 in Dahi, 15 in Nisarpur, 9 in Kukshi and 5 in Dhar CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Badnawar	172	7	165	4
2	Sardarpur	198	8	190	1
3	Tirla	157	16	141	0
4	Dhar	108	10	98	10
5	Nalchha	192	12	180	1
6	Gandhwani	150	6	144	0
7	Bagh	90	0	90	0
8	Kukshi	48	1	47	0
9	Dahi	62	0	62	0
10	Nisarpur	63	5	58	1
11	Manawar	100	5	95	0
12	Bankaner (Umarvan)	108	5	103	0
13	Dharampuri	104	4	100	2
	District Total:	1,552	79	1,473	19

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 1,473 inhabited villages, 19 villages have no Scheduled Tribes population and the remaining 1,454 inhabited villages are such which are having some Scheduled Tribes population. Dhar has highest 10 villages with no Scheduled tribe population while in other CD Blocks, there are 4 such villages in Badnawar, 2 in Dharampuri and one each in Sardarpur, Nalchha, and Nisarpur which do not have Scheduled Tribe population.

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District :Dhar**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Dhar	1991	99	111	113	122	95	108	112	117	102	115	114	127
	1981	116	138	150	171	120	140	152	174	111	136	148	168

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for ages 1,2,3, and 5 is shown as q(1), q(2),q(3) and q(5) respectively. The child mortality q(1),q(2),q(3) and q(5) for the district in 1991 is lower than the state level figures.

However some inconsistencies are observed in male-female classification.

The table also reflects that in 1991 the female child mortality rate is higher than that of the male child mortality in this district, for all ages.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Dhar**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	515,173 (94.9)	104,743 (20.3)	410,430 (79.7)
(A)Within the district but outside Enumeration place	360,623 (66.4)	60,179 (16.7)	300,444 (83.3)
(B)Birth place in other district of State	154,550 (28.5)	44,564 (28.8)	109,986 (71.2)
(ii) Place of Birth in other states of India than the state of Enumeration	27,439 (5.1)	15,851 (57.8)	11,588 (42.2)
(iii) Birth place in Foreign	452 (0.1)	309 (68.4)	143 (31.6)
(iv) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)
Total Immigrants	543,064	120,903	422,161
Persons born in the place of enumeration	1,197,265	769,513	427,752
Total population	1,740,329	890,416	849,913

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 94.9 per cent of total migration. The migration from within the district but outside the enumeration place is 66.4 per cent whereas migration from other districts of the state is 28.5 per cent. Migration from other states is 5.1 per cent and the migration from outside India is 0.1 per cent of the total migration.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Dhar**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	525,255	108,068	417,187
	(95.3)	(20.6)	(79.4)
(A)Within the district but outside Enumeration place	373,770	64,178	309,592
	(67.8)	(17.2)	(82.8)
(B)From other district of State	151,485	43,890	107,595
	(27.5)	(29.0)	(71.0)
(ii) From other states of India outside enumeration state	25,318	14,770	10,548
	(4.6)	(58.3)	(41.7)
(iii) Place of residence outside India	391	275	116
	(0.1)	(70.3)	(29.7)
(iv) Unclassified	0	0	0
	(0.0)	(0.0)	(0.0)
Total Immigrants	550,964	123,113	427,851
Population of Non-inmigrants	1,189,365	767,303	422,062
Total population	1,740,329	890,416	849,913

Source: Migration Table D-2
Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 95.3 per cent of total migrated population. Within this classification, the migration from within the district is 67.8 per cent and only 27.5 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 4.6 per cent of total migration and it is only 0.1 per cent from outside India.Mostly,sexwise analysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES- AS PER CENSUS 2001

State : Madhya Pradesh **District : Dhar**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Uttar Pradesh	8,231	30.0
Bihar	4,279	15.6
Maharashtra	4,173	15.2
Rajasthan	3,604	13.1
Chhatisgarh	1,482	5.4
Gujarat	1,333	4.9
Total of 6 States	23,102	84.2
Total of other States	4,337	15.8
Total	27,439	100.0

Source:Migration Table D-1

Inmigration from other states is classified in this table. 84.2 per cent of total inmigrants are from Uttar Pradesh, Bihar, Maharashtra, Rajasthan, Chhatisgargh and Gujarat whereas the remaining inmigrants from all other states together constitute only 15.8 per cent.

The inmigration from the abovementioned states is quite higher due to the recent industrialisation of the district and due to its proximity to the industrial city of Indore.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Dhar**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10

		(91.8)	(6.1)	(0.9)	(0.3)	(0.3)	(0.2)	(0.1)	(0.2)
Madhya Pradesh 2001	60,348,023	55,004,675	3,841,449	545,446	170,381	209,322	150,772	409,285	16,693
		(91.1)	(6.4)	(0.9)	(0.3)	(0.3)	(0.2)	(0.7)	(0.0)
Dhar 1991	1,367,412	12,81,022	71,589	11,474	1,175	107	975	240	830
		(93.7)	(5.2)	(0.8)	(0.1)	(0.0)	(0.1)	(0.0)	(0.1)
Dhar 2001	1,740,329	1,632,299	91,485	12,397	1,611	260	1545	47	685
		(93.8)	(5.3)	(0.7)	(0.1)	(0.0)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu population in the district is comparatively higher than that of state. As against this the proportion of Muslim, Jain, Christian, Buddhist and Sikh population is lower in the district as compared to state average. The proportionate distribution of population belonging to 'other' religions in the district is lower than the corresponding state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Dhar**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Dhar							
	Total	1,740,329	878,879	790,985	64,649	5,816	0
			(50.5)	(45.5)	(3.7)	(0.3)	(0.0)
	Rural	1,452,145	732,930	659,428	54,912	4,875	0
			(50.5)	(45.4)	(3.8)	(0.3)	(0.0)
	Urban	288,184	145,949	131,557	9,737	941	0
			(50.6)	(45.7)	(3.4)	(0.3)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (50.5%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is higher than that of the state. Contrary to this the percentage of married population of the district is marginally less than that of the state. The state average is higher than that of the district in respect of widowed and it is same in case of divorced population. The proportion of married and unmarried persons is more in urban areas than in rural areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Dhar**

Age Group	Total Population			Total Literates			Literates (Without educational level) and below primary			Primary

(Source- Migration Table C-8)

Note: Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,401,706 persons belonging to the age 7 and above 735,243 are literates and thus, the literacy rate of the district works out to 52.5 per cent. Similarly the male and female literacy works out to 65.8 and 38.6 per cent respectively.

221,859 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 60.8 per cent of population in this age group. In the age group 15-34; 70,339 persons (12.4 per cent) are found educated up to middle, 75,968 person (13.4 per cent) upto the level of matriculate/ higher secondary/ intermediate/ diploma tech. and 18,557 persons (3.3 per cent) upto graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII

DETAILS OF VARIOUS MOTHER TONGUES PREVALENT IN THE DISTRICT : CENSUS 2001

State- Madhya Pradesh **District - Dhar**
