## BAIGA TRIBES

Dindori district is a tribal dominant area where many primitive tribes are living. Baiga tribe is one of them and it has its own identity. Baigachak is one of the many villages inhabited by the Baigas in the district. This area is about 60 km. wide and 300 km long. All Baigas are found to be inhabited in the thick forests on the bank of rivers.

Baigas are honest, truthful, faithful and have deep religious faith. They live in the forest as their right. They are satisfied with the fulfillment of their bare necessities.Some fruits and very little clothes are sufficient for their livelihood. So, Baigas move towards the cities very ocassionally.

# Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

# Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

# ANALYTICAL NOTE

# Analytical Note

**(i) History and Scope of District Census Handbook:**

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

**History :**

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

**Scope :**

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

**Publication of DCHB at the 1971 Census :**

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

**Strategy at the 1981 Census :**

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

**The 1991 DCHB Series :**

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

**Contents of the DCHB series 2001 :**

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

**Part A Village Directory :**

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

**Town Directory :**

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

**Primary Census Abstract**

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

**Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:**

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

**Publication of DCHB in Regional Language :**

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

**New Features of DCHB 2001 :**

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

**Town Directory :**

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

**Primary Census Abstract :**

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

**(ii) Brief history of the district :-**

The historiography of the district is same as Mandla district, since Dindori district was formed in 1998 after bifurcating Mandla. The original name of Dindori was said to be Ramgarh till 1951, a tahsil of Mandla. Later on, the name of Ramgarh rebaptised as Dindori. Maurya, Sunga and Kanva followed by the Chalukya and Chedis dynasties ruled over the central India. Later, the Haihayabansi's kingdom also reined Garha-Mandla from 875 A.D. to 1042 A.D. After Baghel Raja of Rewa, Jadhe Rao Gond, a servant of king assumed the dignity of royalty. The Gond Jadurai became the first King of Garha-Mandla.

There were no much details available about Raja Hirde Shah, the first Gond king. Sangram Shah built the great water reservoir near Garha called Sangram Sagar and on its bank, the temple Bajnamath, dedicated to Bhairon. He also built the fort of Chauragarh from its rocky steep hill frown over the vale of the Narmada near Gondwana. He resided in the palace of Madan Mahal but his son Dalpat Shah shifted his governance to Singaurgarh where he fell in love with Durgawati, the daughter of Mahoba Rajput king. Due to demise of Dalpat Shah, queen Durgawati assumed the reins of government on behalf of 3 years old son, Bir Narayan. During the fifteen glorious years of her regency, the emperor grew so prosperous that Rani Durgawati built Ranital, Cherital at Jabalpur and kept fourteen hundred elephants at Mandla for the security of her state. Asaf-Khan invaded her dominion. In a battle with Asaf Khan in 1564, she wounded badly and killed herself. Her eighteen years son Bir Narayan was also killed by Asaf Khan who carried away all the great wealth of the queen. Chandar Shah, the elder brother of Dalpat Shah enthroned for a short period and succeeded by his second son Madhukar Shah who could not success to rule over the kingdom. His son and grandson Prem Narayan and Hirde Shah were killed by Jhujhar Singh due to hereditary revenge. Due to death of Hirde Shah, the throne was disputed between his two sons, Chattar Shah and Hari Singh. Hari Singh obtained help of Bundelkhand and assassinated Kesari Shah, the son of Chattar Singh. Hari Singh had not left any successor to survive and ruled till the advent of Marathas who invaded the region and in course of time made as *Subah* of Nagpur and continued until Mandla was ceded to the British in 1818 at the end of the Maratha war.

Till 1835, Mandla was a tahsil of Seoni. In 1851, it was promoted to the status of district. There were 18 talukas when Britishers got the land of Ramgarh. Out of 2089 villages, 1039 villages were became part of the Sohagpur and 1050 villages remained in Ramgarh. With the help of Rewa king, Britishers got killed the brave queen of Ramgarh and suppressed the 1857 mutiny in Mandla. The Sohagpur area of Ramgarh was handed over to the king of Rewa. The remaining area annexed to Dindori tahsil which became new district on 22nd May 1998.

**(iii) Administrative Set up**

Under the Fifth Scheduled of the Constitution of India, the whole of Dindori district has been declared as a Scheduled Area. It comes under the Jabalpur division. It has three assembly seats but two tahsils,

viz. Dindori and Shahpura and seven blocks viz., Dindori, Amarpur, Karanjia, Samnapur, Bajag, Mehandwani and Shahpura. Except Shahpura block, all the six blocks are in Dindori Tahsil. There are two towns, 926 villages and 170 *Patwari* and 349 village panchayats.

The Collector as the head of the district administration is the key functionary of the Government having vast powers and wide responsibilities. The district officers of almost all the departments assist the Collector in smooth administration of the district. For revenue administration, the Collector is assisted by Tahsildars, *naib tahsildars*, revenue inspectors and *Patwaris*.

Under the Excise Act-1915 amended in 1958, the Collector is vested with the statutory power to implement the policy with regard to Excise duty and prohibition. In the maintenance of law and order, the Collector as a District Magistrate is assisted by the Additional District Magistrate, Sub-Divisional Magistrates and Superintendent of Police. The district police force works under the Superintendent of Police. In addition to Sub-Divisional Officer (Police), there are ten police stations and one SC/ST police station in the district.

The Judiciary is separate and independent. At the district level, there is district court headed by District and Session Judge. To assist the District and Session Judge, there are Civil Judges posted at tahsil level.

**(iv) Physical Features**

Situated on the eastern part of Madhya Pradesh, Dindori district borders Chhattisgarh state. It has Shahdol in the east, Mandla in the west, Umaria in the north and Bilaspur and Kawardha districts of Chhattisgarh state in the south. It lies between latitudes $22^0$27' and $23^0$23' and longitudes $80^0$30' and $81^0$44'. The total area of the district is 7470 sq.kms. The holy river Narmada passes through the district and is surrounded by herbal rich Maikal mountain ranges situated at a height of 1100 meters above mean sea level. Maximum length from north to south is about 133 kms. There are some small and scattered patches and tracts of black soil but the greater part of the district is very rugged and mountainous.

*Kabar* or *Kanhar*, *morand* or *mund*, s*ahra* and *barra* are four general classes of soils. *Kabar* soil is bluish black, most fertile, soft and sticky when it is wet and very hard and heavy when it is dry. *Kanhar*, the second quality soil is little inferior to the preceding, more gritty, lighter in colour, less in depth and contains small black pebbles. *Morand* or *Mund* soil is again divided into two sub-types, the former is black and darkish, more gritty and friable than *Kabar* soil and breaking into small clods with a roughish surface. The second quality of *Mund* soil is an inferior variety, more sandy mixed with limestone which reduces productivity. The *Sahra* and B*arra* soils are pure sand, pale yellow, unfit for rabi or spring crops but rise rice with irrigation.

The eastern part of the district is plain area having black soil cultivated by Gonds, with a sprinkling of immigrant Muslims and Hindus. From this plain, a few narrow valleys of good black soil from south along tributaries of the Narmada into the deep *Sal* trees which separates the district from Bilaspur. As the Narmada runs west, the soil changes to undulating *Barra* or *morand* with small pocket of black soil. The Kharmer valley is of a similarly rich character but further west every kind of soil may be met, from the high-lying Mahadwani plateau to the embanked black soil fields of the Lodhis Niwas.

**Drainage System**

Situated on the bank of river Narmada, the district headquarter is 102 kms. from Mandla. Gaur, a tributary of the holy river Narmada, rises near Niwas in Dindori district and flows into the Narmada, close to Jabalpur district. Other small tributaries which flow towards south are Seoni, Chakrar, Machhrar, Kutrar, Khadmer and Silgi.

**Climate**

The climate of the district is moderate being $38^0$ c to be the maximum temperature and $15.2^0$c to be the minimum temperature on an average. July and August are rainy season. However, rain may also occur in the months of June to September. The average rainfall is 1252.4 millimeters. May and June could be called hot months and December and January as cold months.

**Economic Resources**

Agriculture is the main source of livelihood for the Gond dominated people of Dindori. Rice and wheat are the main crops grown year after year.

**Flora and Fauna**

Dindori district has dense forest area covering 74,763 hectares which is 8.44% of total geographical area. The quality of timber trees par excellence grown in the district. The *Sal* trees are also grown most luxuriantly in Sandi soil, especially in Dindori tahsil. The *Sal* grows straight and rises to a height of 90 feet with a girth of 14 or 15 feet. In the mixed forest there are *Saj, amla* and other yellow grass which takes place in open areas. The other timber trees are teak, *tendu, tinsa* etc. grown all over the district. In addition of this, *Dhawda, Bija, Lencha, Hardu* and *Koha* are common trees found throughout the district. The most beautiful flowering trees are *Kachnar*, *Amaltas*, *Choila* or *Palas* commonly spread every where on the scene of the district. The main fruit trees of the district included *Harra, Bahera, Mahua, Khamar, Jamun, Char or Achar, Fig, Pipar, Nim, Imli, Tendu,* Mango, *Ber* and plum. Bamboo is rarely available in the district.

Dindori district has dense forest and excellent grazing fields where herbivorous species are available in plenty and consequently carnivorous species are also available and that's why the district is known as one of the best shooting regions in India. Tiger, panther species(*chita, chitwa, tendua or gulbag*), wild dogs (bankutta) and bear are common and spread all over the district. Peacocks, partridge quail and squirrels are mostly killed by animals like, wolf, jackal, fox, hyena, jungle-cat etc.

The bison (*banboda, banbhaisa or pagari*), deer and antelope (*Barasingha, Lal Sambhar, Sambhar*), *Chittal* (sprotted deer), *Sambhar*, barking deer (*gutri, Kotri*) the *nilgai* (*blue-bull)*, Langoors, red mouth monkey etc. are herbivore's species found in plenty in the district forest.

**Agriculture**

51.42 % of the population of the district depends on agriculture. Wheat, paddy, maize, *kodo-kutki*, *ramtil*, mustard, *masoor*, *matar*, gram, *alsi*, soyabean, etc; are the main crops in which wheat 325,69 hectares, paddy 736,76 hectares, maize 180,65 hectares, *Kodo-Kutki* 467,92 hectares, *ramtil* 270,11 hectares, mustard 165,78 hectares, *masoo*r 157,34 hectares, *matar* 7,121 hectares, gram 6,028 hectares, *alsi* 4,860 hectares, soyabean 3,641 hectares were sown in the district. During the year 2003, the total crop sown area was 252,065 hectares i.e. 41.13 %.

Among the crops rice was sown in 82,743 hectares from which 40.87 thousand metric tonnes of rice was produced, wheat in 42,056 hectares, jowar in 185 hectares, maize in 20,214 hectares were sown from which 5.01, 0.42, 18.61 thousand metric tonnes grain were produced. In addition to pulses, gram in 8,387 hectares, *tuar* in 2,319 hectares, *urad* 5,423 hectares and other pulses in 15,715 hectares from which 0.40, 2.02, 0.92 and 1.96 thousand metric tonnes of pulses were produced. Total oil seeds of all types sown in 66,695 hectares from where 9.38 thousand metric tonnes oil seeds were produced. Among vegetables and fruits sown in 290 hectares, sugarcane in 04 hectares, chilly and spices in 458 hectares from which the total production was recorded 0.51, 0.03 and 0.45 thousand metric tonnes respectively.

**Irrigation**

Wells, tanks and embankments made by the cultivators are the other sources. Sandy rice lands and the black soil of the district are suitable for wheat. Cultivation of the district fully depends upon the rain. As per village papers only 1027 hectares of land was irrigated which was 0.28 % of the total lands of the district. More area will be irrigated after work in ten tanks i.e. Gwara, Bargi, Ramnagar, Kachhari, Pakhatola, Gorakhpur, Rachcho Shurra Kalinger and Chatua are completed.

**Animal Husbandary**

A cattle rearing plays an important role in the source of livelihood. It is the back bone of the cultivators. The bullocks are *bred* and sold by the Gonds due to ampleness of unlimited grazing available in a large part of the district. As per 1998 cattle census, 319,990 cows, 63,996 buffaloes, 369 sheeps, 59,747 goats, 4,999 horses and ponies and 17,977 pigs. Milk, Curd, butter, and ghee are prepared and sold from cattle.

**Land Use**

Out of total land of 612,800 hectares, 13,083 hectares were agriculture land where paddy, wheat, maize, *Kodo-Kutki*, *Ramtil*, mustard *masoor mater*, gram, *alsi* and soyabean are cultivated. Total irrigated land was only 1,027 hectares which was 0.28% and un-irrigated land is 273,082 hectares which was 73.53% of total land of the district. The forest land is 34,826 hectares (9.38%) barren land was 66,756

hectares (16.20%) and non-agricultural land 42845 hectares which was 10.40% in 1998.

**Mines**

In Dindori district, the main mines are bauxite, coal, okras, white ash, high iron laterite, lime stone and laterite which are found at Kurkuri dadar; (Balco)Dullopur; Amnipiparia, Lodajhir mal, Amni pipariya Ryt; Mudki mal; Padariya mal; Padariya Kala mal, Nayegaon mal; Bari Deori, Kanhari; and Niwsa mal respectively. The main mine of the district is lime stone and 12,653 metric tonnes was extracted during 1998-99.

**Fishery**

Dindori district is not rich in water resources, rivers are also not perennial. The *Khusha*, *saur*, *rohu*, *nain*, *karot, bam, gegra* and *kalia* fishes are fairly common and available in good quantity especially in the month of June-July and October-November during the beginning of rain and during month of cold when Narmada floods and comes down in spate. Innumerable fish of all sizes and types comes through water current and as soon as the flood begins to subside the fishes are obtained by local Baigas and Dhimers communities of the district.

**Industry and Trade**

Dindori district is back-ward from the point of view of industry. There is a neither major nor medium industry in the district. Registered Small scale industries were 198 while District industry center established 140 industries and 58 cottage industries under the Rural Development Programmes. The main exported items from district are wheat, rice, gram, *ramtil*, soyabean and fire wood, while main products are iron-works bell, metal, ghee and fire-wood. Common importing items are kerosene oil, turmeric, cloth, salt, sugar, spices, coconuts and iron.

**Transport and Communication**

No part of the district is connected with rail line. To reach-state capital, it is necessary to reach divisional headquarter Jabalpur by covering 144 kms. on state highway No. 21. The tahsil headquarters of the district are connected by pucca road. Pucca roads are 1206 kms. and kachha roads 1875 kms.. Some parts are still having herds of pack-bullocks used by Banjaras. Dindori is 104 kms. from Mandla, the old district headquarters and 88 kms. from holy place Amarkantak.

Among post and telegraph facilities, there are 5 post offices, 103 sub-post offices, 2 telegraph offices, 106 public call offices.

**Electricity and Power**

There is no production of electricity in the district. The consumption of industrial units was 1572270 kwh in 324 industries. The domestic connections were 46973 and the consumption was 9589152 kwh. Out of 924 villages, 842 villages are electrified, which forms 91.13% in the year 2000 in the district.

**Gram Panchayat**

Panchayat is the basic institute and foundation of decentralized administration of the local self government. Under the Directive Principles of the State Policy of the Constitution, Madhya Pradesh Government passed Madhya Pradesh Panchayat Adhiniyam 1962, in which, three tier panchayat system was introduced. Under 73$^{rd}$ amendment of the Constitution, Madhya Pradesh Government altered and passed the Madhya Pradesh Panchayat Raj Adhiniyam 1993, in which, a panchayat for village, Janpad panchayat for a block and a district panchayat for district were constituted. Under Madhya Pradesh Gram Sabha Adhiniyam – 2001, Gram Sabha, in which, all adults are included and recognized as a separate constitutional unit directly elect Panch, Sarpanch, members of Janpad and members of district panchayat through adult franchise. These institutions work for five years. At all levels, there are reservations for Scheduled Castes and Scheduled Tribes according to proportion of population.

Gram Panchayat from its budget take up the disposal of waste products, water supply, public construction (roads, buildings, well, ponds) marketing, community health and development works. Janpad panchayat from its budget and within its powers, will be responsible for implementing community development, rural, agricultural, social, forestry, cattle rearing, fisheries, adult education, cooperatives, cottage industries, welfare and employment oriented programmes. It is the duty of the district panchayat to control Janpad panchayats and village panchayats and bring about coordination between them and advise the state Government in their development work.

## (v) Census Concepts

### Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

### Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

### Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

### Temporary houses

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village :**

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City :**

Towns with population of 1,00,000 and above are called cities.

**Urban Agglomeration :**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban

outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional Household**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household :**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Caste and Scheduled Tribe :**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion.

Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

**Language and Mother tongue :**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language

mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate :**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate :**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational level :**

The highest level of education a person has completed.

**Work :**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker :**

A person who has worked for major part of the reference period ( i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal worker :**

A person who worked for less than six months of the reference period ( i.e. in the last one year preceding the date of enumeration ) in any economic activity is termed as 'Marginal worker'.

**Non worker :**

A person who has not worked at all in any economically productive activity during the reference period ( i.e. last one year preceding the date of enumeration ) is termed as 'Non worker'.

**Cultivator :**

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

**Agricultural labourer :**

A person who works on another person's land for wages in money or kind or share is regarded as

an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker :**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other Worker :**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work Participation Rate :**

Percentage of workers (main + marginal) to total population

**Population density :**

Population density is the number of persons inhabited per square kilometre of the area.

**Age :**

Age is measured in terms of the completed number of years

**Sex-Ratio :**

Number of females per 1000 males in a population.

### (vi) Non Census Concepts

**Improved drinking water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

**System of sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

**Type of latrine and Method of disposal of night soil :**

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a

septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate(CBR) :**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

**Crude death rate(CDR) :**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

**Natural growth rate :**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR) :**

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

**Age specific marital fertility rate (ASMFR) :**

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

**General fertility rate (GFR) :**

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

**General marital fertility rate (GMFR) :**

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

**Total fertility rate (TFR) :**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

**Total marital fertility rate (TMFR) :**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

**Age-specific mortality rate (ASMR) :**

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

**q1 :**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2 :**

Probability of dying between birth and age 2.

**q5 :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

**Infant mortality rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR) :**

Number of infants dying within the first month of life (28 days or under ) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

**Early neo- natal mortality rate :**

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

**Late neo-natal mortality rate :**

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

**Post neo-natal mortality rate (PNMR) :**

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

**Peri-natal mortality rate (PMR) :**

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Still birth rate(SBR) :**

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

**Maternal mortality rate(MMR) :**

Number of deaths of women in the age group

15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

**Eligible couple (Couples per 1000 population) :**

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

**Child woman ratio (0-4) :**

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

**Child woman ratio (5-9) :**

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

**Migration :**

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/ migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or

for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration :**

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country ( inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country,

state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural - Urban components of migration :**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units :**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

**Size class of UA/town :**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

**Slum area :**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

## (vii) 2001 Census findings – Population, its distribution

According to Census 2001, Dindori district comprises of 902 inhabited villages, 32 uninhabited vilages and total 924 villages distributed among two tahsils and seven number of CD blocks. The district has 2 towns. The average household size of the district is 5.0. Total population of the district is

580,730 comprising 291,716 males and 289,014 females. Thus the sex ratio of the district works out to 991 which is higher than the sex-ratio of the state (919). Density of the district is 78 persons per sq.km. and is lower than the density of the state which is 196. Literacy rate of the district 54.2 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 5.8 per cent and 64.5 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

**(a) Brief analysis of the PCA data(Table 1-36)**

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

**TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001**

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 13.5 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 13.3 per cent, while for urban areas it is 16.3 per cent. Among the tahsils, Shahpura has registered the highest decadal growth rate of 14.8 per cent. The growth rate in rural area is highest in Shahpura tahsil and it is highest in Dindori for urban area of the district. The percentage of urban population to total population of the district is 4.6 per cent in 2001 against 4.5 per cent in 1991.

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 902 inhabited villages, 89 (9.9 percent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 332 villages having 36.8 percent villages of the district while in the size class of 500-999 population there are 375 villages constituting 41.6 percent of total villages. 93 villages (10.3 percent) are in the size class of 1000-1999 and 12 villages (1.3 percent) are in the size class of 2000-4999. There is one village (0.1 percent) in the size class of 5000-9999 and no village (0.0 percent) falls in the size class of population 10,000 and above.

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 532 accounting for 59.0 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 60.1 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 15 villages (1.7 per cent). 8 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 14.9 per cent of the total inhabited villages having 22.1 per cent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 2.2 and 21.4 per cent of inhabited villages. Both these ranges claim 14.5 per cent rural population.

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e.289(32.0 per cent) having largest population (28.1 per cent) in

the district (rural) fall in the sex ratio range of 1,100 and above. It is followed by the sex ratio range of 1,000-1,099 which claims 163 villages (18.1 per cent) and 21.5 per cent population. Next to it 86 villages (9.5 per cent) and 11.4 per cent population are in the range of 900-949. Further in the range of less than 700 about 79 villages are there constituting 8.8 per cent with 4.6 per cent distribution of population. Minimum number of villages i.e. 35 (3.9 per cent) and 3.1 per cent population fall in the range of 700-749.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 58.2 per cent of total population. Among these workers cultivators constitute 62.4 per cent, agricultural labourers 29.9 per cent, household industry 1.8 per cent and other workers constitute 5.9 per cent. The proportion of cultivators is highest 72.8 per cent in Menhadwani CD Block and is lowest 52.5 per cent in Shahpura CD Block. Proportion of agricultural labour is highest 39.9 per cent in Shahpura CD Block and lowest 21.2 per cent in Karanjiya CD Block. It is also seen that the proportion of female workers is less than male workers under the category of cultivators.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 31.9 per cent of total workers, cultivators constitute 5.4 per cent, agricultural labourers 9.2 per cent, household industry 5.6 per cent and the highest proportion is covered by other workers which is 79.8 per cent. It is also found that proportion of male workers under cultivation and other workers are more than the female workers proportion whereas proportion of female workers under agricultural labourer and household industry is more than the proportion of males. Townwise analysis shows that the proportion of cultivators is highest 7.4 per cent in Shahpura (NP), agricultural labourer is highest 9.2 per cent in Shahpura (NP), household industry workers is highest 10.8 per cent in Shahpura (NP) and other workers is highest 83.7 per cent in Dindori (NP).

**(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)**

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 902 inhabited villages in the district 802 villages or 88.9 per cent have been provided with the education facilities of one type or the other. Similarly 197 villages in the district constituting 21.8 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 813 or 90.1 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 93 villages constituting 10.3 per cent of villages have been provided with post office facility within the villages. 28 or 3.1 per cent villages have been provided with the telephone facility, 174 or 19.3 per cent with transport facility, 32 or 3.5 per cent villages with bank facility and 25 or 2.8 per cent with agricultural credit societies. Similarly there are 194 or 21.5 per cent villages which are linked with the pucca road. Out of 902 villages 775 or 85.9 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. The percentage distribution of telephone facility in Dindori CD Block is non-present than the other amenities of this CD Blocks. Bajang CD block has the highest 94.6 per cent villages where educational facility is available and lowest 80.1 per cent is found in Shahpura CD Block. Medical facility is highest in Karanjiya (30.8 per cent) and lowest 16.8 per cent) in Shahpura CD block. Telephone facility is highest in Shahpura CD Block (6.3 per cent) and it is non-existent in Dindori. In the field of power supply 775 villages have been covered out of 902 villages in the district.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 553,860 persons in the district, 533,675 or 96.4 per cent have educational facility of one or the other type. Similarly 181527 or 32.8 per cent population has medical facilities while 524,359 or 94.7 per cent have improved drinking water facility. Post office facilities are available to 110,556 or 20.0 per cent population. Telephone facility is available to 43,177 or 7.8 per cent. Transport communications facility is available to 159,706 or 28.8 per cent. Bank facility is available to 47,336 or 8.5 per cent. 32,541 or 5.9 per cent have been provided with the facility of agricultural credit societies. 165,257 or 29.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 501,573 or 90.6 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 103 villages do not have primary school and out of these villages, children of 95 villages have to travel less than 5 kms. for schooling Out of 902 inhabited villages as many as 718 are deprived of middle school and 901 of degree college. Of these 485 avail the facility of middle school at a distance of less than 5 kms., 195 at a distance 5-10 kms. and the remaining 38 at a distance of 10+ kms. In respect of degree college 22avail this facility at a distance of less than 5 kms., 77 between 5 to 10 kms. and rest 802 villages at a distance of 10+ kms.

Similarly there are 899 villages in the district which have been devoid of hospital facility and 874 villages which are deprived of PHC facilities. Of these 59 villages have the facility of hospital available within 5 kms. while in respect of 132 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 708 villages have this facility at a distance of 10+ kms. As regards PHC 95 avail this facility at a distance of less than 5 kms., 172 at a distance of 5-10 kms. and the remaining 607 have to travel a distance of more than 10 kms. to avail this facility.

Regarding post Office, 809 villages do not have this facility in the village itself. Of these majority i.e. 438 have this facility at a distance of less than 5 kms., another 253 villages avail it at a distance of 5-10 kms. In the remaining 118 villages habitants have to travel a distance of 10+ kms.

As regards telephone, there are 874 villages in the district which are without telephone facility. Of these 475 avail this facility at a distance of less than 5 kms., 181at a distance of 5-10 kms. and remaining 218 have to traverse a distance of 10+ kms.

For bus service out of 728 villages which do not have facility, 285 villages avail this facility at a distance of less than 5 kms., 263 at a distance between 5-10 kms. and 180 at a distance of 10+ kms.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that wood is used as the most predominant fuel used for cooking by 96.2 per cent households in the district. In the tahsils, this proportion varies between 96.2 per cent in Dindori and 96.0 per cent in Shahpura tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller amount of population due to availability of L.P.G. The next most common cooking fuel is crop residue which is used by 1.2 per cent households in the district. This proportion in urban and rural areas is 1.2 and 0.9 per cent respectively. In rural areas use of gas for cooking is very low (0.1 per cent) as compared to urban areas (14.4 per cent) at tahsil level. There are 1.0 per cent households using kerosene in the district. Use of kerosene for cooking by urban households comes to 15.2 per cent while in rural areas its proportion is only 0.3 per cent, as a whole. The percentage of households using other types of fuel is insignificant. In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel.

**(xiv) Scope of Village Directory and Town Directory**

**Village Directory :**

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

**The details of each column of village directory are explained as below :**

Column-1 Serial number of the village is indicated in this column.

**Sources**

**(i)** Gazetteer of India, Madhya Pradesh, Mandla district,1997

**(ii)** District Statistics Handbook, 1998-99

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash ( - ) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

**Town Directory :**

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

**Statement-I Status and Growth History :**

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from

1981 to 2001 Census.

**Statement-II Physical Aspects and Location of Towns, 1991**

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

**Statement-III Municipal Finance, 1998-99**

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

**Statement IV Civic and Other Amenities, 1999**

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

**Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999**

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

**Statement-VI Trade, Commerce, Industry and Banking, 1999**

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

**Statement-VII Civic and other amenities in Slums, 1999**

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

# PART A - VILLAGE AND TOWN DIRECTORY

# Section I - Village Directory

# PART B - PRIMARY CENSUS ABSTRACT

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks:**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/CD Block/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/CD Block/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/CD Block/Town |
| 4. | Village Primary Census Abstract | CD Block/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

## ANNEXURE-II

### NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

**Fertility Levels :**

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for all ages is lower than the state average. The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also.However some inconsistencies are observed in male-female classification. The table also reflects that in 1991 the female child mortality is less than the male child mortality in this district.

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 97.6 per cent of total migration. The migration from within the district but outside the enumeration place is 78.2 per cent whereas migration from other districts of the state is 19.5 per cent. Migration from other states is 2.3 per cent and the migration from outside India is 0.0 per cent of the total migration. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

(Source- Migration Table C-8)

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 483,224 persons belonging to the age 7 and above 261,764 are literates and thus, the literacy rate of the district works out to 54.2 per cent. Similarly the male and female literacy works out to 70.0 and 38.2 per cent respectively.

79,439 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 69.3 per cent of population in this age group. In the age group 15-34; 29,443 persons (15.5 per cent) are found educated up to middle, 19,992 person (10.5 per cent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech. and 4,059 persons (2.1 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.
