Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Gwalior is a historical place of Madhya Pradesh. The history of Gwalior is traced back to 8th century AD when a chief known as *Suraj Sen* was struck by a deadly disease and cured by a hermit-saint *Gwalipa*. As a gratitude, *Suraj Sen* founded the city by the name of the *saint.* The cradle of great dynasties ruled the city of Gwalior. With different dynasties, the city gained a new dimension from the warrior kings, poets, musicians and saints who contributed in making it renowned throughout the country. The city is also famous for the memorials of freedom fighters such as *Tatya Tope* and the indomitable *Rani* of Jhansi. The Gwalior is blessed with classical music maestro *Miya Tansen*.

This area was ruled by Nagvansi of Patliputra in the beginning of 600B.C. who had snatched it from Shishu-Nagas. Pawaya village nearby Dabra was the capital during that time. *Parvalekh* (script) found in Pawaya reveals that Swamini Shivnandi was the ruler of this place, in 3rd century. Nagas ruled this area. On the basis of coins found that Nag rulers were *Bhim, Sakand, Vasu, Grahspat, Vibhu, Bhavnam, Dev, Bayaghra*, *Ganpati etc.* Of them, the name of Ganpati figures in the script of pillar of *Sumadargupta* at Allahabad. A part of the script depicts that Miharkuls reign was upto Gwalior where *Matrachet* built *Surya Mandir* (sun temple). One stone carving reveals that amongst other famous rulers *Pritihar Bhoj* had occupied area around the Gwalior fort from year 836 to 882 AD. Mehmood Ghazani launched first attack on Gwalior fort in 1021-1022 AD and after four days, the *Rajput* ruler gifted 35 elephants to him and peace treaty was signed. In 1195-96 AD. *Mohd. Gori* attacked *Lahang Dev* of Gwalior and after treaty, he entrusted the job of annexing Gwalior to *Malik Bahaudin Tughlak* who after one and a half years in fierceful fight conquered Gwalior fort. Later on *Kutbudin Abek*, commander-in-chief of *Mohd. Gori* appointed *Illtutamish* as *Ameer* of this fort.

Tomars ruled Gwalior from the year 1486 to 1526. *Raja Man Singh* was the main ruler of this dynasty. He adorned the hilly fort with new buildings. He devised many irrigation channels; among them *Motijheel* is prominent. *Vikramaditya* was the last ruler of this dynasty who was killed in 1526 in the battle of *Panipat*. *Babar*, the first *Mughal* Emperor when he became the ruler at Delhi, visited Gwalior on 26th September 1528. He has beautifully described this place in his *'Babarnama'*. *Akbar* seized Gwalior and by mid 1754 Gwalior and its fort was part of the *Mugal* kingdom. As per *'Aine Akbri'*, there was an iron mine in Gwalior and this town was a taxal *(mint)* from where copper coins were produced and issued. This area came in the hands of *Scindias* and *Holkar* after the downfall of *Mughal* kingdom and till the independence it was ruled by the *Scindia* dynasty. Gwalior city was the capital of the princely state of Gwalior until 1948 and the summer capital of Madhya Bharat State from 1948 to 1956. Still the head quarter of the district is the city of Gwalior.

Administrative setup

Gwalior city is the district head quarter. It has two sub-divisions; Gwalior and Dabra, (BSF

headquarter is situated at Dabra), three tahsils; Gwalior, Dabra and Bhitarwar and four community development blocks, namely, Morar, Ghatigaon, Dabra and Bhitarwar. There are 5 Janpad panchayats, 298 Gram panchayats, 612 inhabited villages and 40 uninhabited villages in the district. The district has one parliamentary constituency i.e. Gwalior and six assembly constituencies viz. Gwalior, East Laskhar, West Laskhar, Morar, Gird and Dabra.

The administrative pattern of Gwalior district resembles the other districts of the state. The Collector is the chief revenue authority as well as the district magistrate are responsible for the maintenance of land and other revenue records, collection of the revenues and for the maintenance of law and order on behalf of the Government. Besides being the chief representative of the Government, he also exercises supervisory control over other departments in the district.

Physical features

Bounded by Morena in the north-west, Shivpuri in the south-west, Bhind in the north-east and Datia in the east respectively, the district extends from $25^0 34'$ to $26^0 21'$ north latitudes and from $77^0 42'$ to $78^0 54'$ east longitudes. The total geographical area of district is 4,560 square kilometers. It ranks 38^{th} position in respect of area of 4,560 sq.km which is 1.48% of the total area of the state. The district lies at a junction of Malwa plateau in south-west and the Gangetic plain in the north and east. The district consists of alluvial plain except for an outcrop of Vindhyan and sandstone near Gwalior city. The western portion of the district is mostly a plateau which brings the Malwa plateau to an end. Topographically, the district may be divided into four main divisions, the plateau division in the west, hilly tract in the centre, south-eastern and north-eastern plains.

The plateau division is the extension of Malwa plateau. This area is mostly hilly and has some good forest. Its highest points are Tor hill (1,454') in Sirkoli forest and Din hill (1,420') in Rehat reserve forest. The northern part of the division is more dissected where river Sank has a dam at Tigra. The Gwalior hill fort stands further east of it. The general height of the central hilly tract is about 80 ft. above sea level. The tract is somewhat hilly but otherwise clearly marked from the plateau.

Drainage system

Sind is the largest river rising from the Sironj tahsil of Vidisha district and enterers the southern plains of the Gwalior district near $25^0 05'$ north latitude which alongwith its tributaries occupies a large part of the district in the south-eastern plain which has alluvial soil most suitable for agriculture. It is the main perennial river in the region. The soil being porous has caused the streams to erode their banks and thus all along the banks big and small ravines have been created. Rivers Sank, Sonrekha, Maran and Vaishali drain the north-eastern plain. Soil erosion is more rigorous in the northern plain especially along the upper streams of river Vaishali. The important rivers of the district are Sank, Sonrekha, Morar, Vaishali, Sind, Nun, Chachond and Asan. Originating from the Shivpuri district river Parbati flows in a south-eastern direction forming a natural boundary of the district upto village Khiria from where it flows through the southern part of the district till it meets river Sind at village Pawaya. A dam has been constructed at Harsi, which is the biggest dam in the division. The hill ranges are sandstone type and have withstood the erosion. In the western part the hill ranges are of Vindhyan type. The areas around Guna and Shivpuri districts are covered by the Deccan trap.

Climate

The district falls into the region of monsoon climate with the peculiarity of a marked rainy season during the late summer months. The mean monthly temperature rises gradually after January, usually reaching the maximum in May (48^0c). The temperature gradually falls after May but a secondary maximum account in September when the monsoon is weakening. The night temperature is highest in June and lowest in December. The year may be divided into four seasons. The cold season from December to February is followed by the summer from March to about mid of June. The period from mid June to the end of September is the south-west monsoon season. October and November may be termed the post monsoon season.

The average rainfall in the district is 900 mm without much spatial variations. Over 90% of rain is

received during the monsoon months. The climate of the district is generally dry. The mean humidity is as low as 15% in the summer afternoons. The humidity is highest in the monsoon months and in January. Increasing humidity combines with decreasing temperatures alongwith other factors give rise to occasional fogs in the months of December, January and July.

The Flora and Fauna

The vegetation of the district is of dry and deciduous. The soil in the forest areas is generally hard and shallow, while the average annual rainfall in the district is only about 30 inches. Therefore thick vegetation is not noticeable in the greater part of the district. *Dho* and *Kardhai* trees in the forest are of poor quality and their average girth is about 18 inches. *Tendu* (*Diosypyros melanoxylon*), *Khair* (*Acacia catechu*), *Salai* (*Boswellia serrata*), *Ber* (*Zizyphus mauritiana*), *Chhola* (*Butea monosperma*), *Jamrasi* (*Elaeodendronglaucum*) and *Reenjee* are the trees found in these jungles. The *Khair* trees are are of stunted growth and the quality of *Khair* found is not suitable for the manufacture of *Kattha*. Some areas are mostly devoid of vegetation and small sporadic plants of *Siari*, *Ber* or *Chhola* of stunted growth could be seen. The principle species of trees found in the district are *Semal* (*Salmalia Malabaricum*), *Kareh* (*Sterculia urens*), *Bhilwa* (*Semecarpus anacardium*), *Babool* (*Acacia arbica*), *Teak* (*Tectona grandis*) etc. whose growth is insignificant in some areas and as such urban areas are covered entirely lay grass, good fodder for the cattle.

The district contains variety of wild life especially in the area covered by forest, shrubs and grasses. There are varieties of birds in the district, prominent among them being the grey partridge (*Francolinus pondicarianus*), snipe (*Capella gullinage*), peafowl (*Pair cristatus*), apart from the usual varieties of birds found almost everywhere. Leopard, Cheetah, bears, Lakkarbagha, deer, *neelgai*, rabbit, monkey etc. are found in the forest area.

Land use

The net area sown in the district was 216.6 thousand hectares during 1998 whereas gross area sown was 258.6 thousand hectares. In the same period the net irrigated areas was found to be 156.8 thousand hectares.

Agriculture

The soil is covered with alluvial soil with fair fertility. Total area under cultivation of crops for year 1998-99 was 1,34,043 hectares. Wheat and paddy(rice) are the major crops of the district. Three dams are the major source of irrigation in the area. The biggest irrigation project of the district is the Harsi dam, which impound the water of the river Parbati at a point where it leaves the hills. However, the construction of this dam in the pre-independent period and the Tigra dam situated to the south-west of Lashkar at a distance of about 17 kms was built across the river Sank near the village of Tigra. Other predominant crops are jowar and maize, gram, *tur*, *urad* and other pulses, sugarcane, *til*, groundnut, *alsi*, mustard, soyabean etc. The typical variety of rice *kali Moonch* is produced in the district.

Irrigation

57.22% of the total land is under irrigation in the district. Irrigation is done mainly by Government and private canals, tube-wells, wells, ponds and other water sources. During 1998-99 irrigation area was 156,814 hectares out of the total area of 258,598 hectares from all sources. There are three canals in the district and through this medium 63,734 hectares of land was irrigated, second source was 24,599 wells and through which 37,493 hectares of land was irrigated. There were 1,100 tube-wells which irrigated 16,687 hectares of land and other sources were ponds and rivers which irrigated 6,026 (151 + 5,875) hectares of land.

Animal husbandry

Cattle rearing play an important role in the source of cultivation and livelihood of people. In the year 1998-99 cattle census shows that cows 2,25,098 buffaloes 173,737 and goats, horse, donkey, camel and pig 622,625. Cow- dung manure, cow dung cake, gobar gas, hide and meat are produced from cattle. The number of poultry were 94,842 in the district. There were 14 Vetenary hospitals and 21 dispensaries in the district by which 105,630 animals were given treatment, 5,385 were castrated, 177,509 were vaccinated and 8,223 animals were artificially inseminated during 1998-99 in the district.

Fishery

Most commonly found fishes in the Gwalior district are *Mahseer*, *Labeo*, *Katla*, *Murels*, *Tengra*, fresh water shark, Mullets and the Indian trout. The *Mahseer* is found usually in rocky rivers also abounds in the Sank, Asan, Parbhati and Sind rivers. Among the *Labeo* group important fishes are *Rohu* and *Kalbasus* found in Sank and Asan rivers. *Murrel* is found in almost all rivers and tanks but fresh water shark abounds in Tigra and Pagara tanks. The *Mullet* is found in almost all running waters, while a variety of the Indian trout is found in the Morar river.

Industry

The existence of a variety of valuable raw material in and around the district was an advantage from quite early times. The area is rich in sandstone, clay, ochres and glass sand. There was sizeable deposit of iron ore in the past. Some of the main industrial units are cotton mills, sugar factory, Gwalior Engineering Works, the Government Regional Press etc. The main products are sandstones, clay, iron, *murram* and floor stones. There were 821 industrial units, out of which 780 small scale industries and 41 cottage industries were registered in the 1998-99 in the district.

Transport and communication

Agra-Mumbai national highway road started in 1840 runs 68.80 Kms. through Gwalior district. It enters near Banmor and leaves the district near Mohana village. All weather roads of state highway connect Jhansi, Etawah, Bhind, Bhander and Chirgaon and district roads connect the principal markets that is Mohanpur-Singhpur road, Singhpur-Behat road, Dabra-Jangipur road, Lashkar-Tigra road, Hansi-Bhitarwar road, Dabra-Bhitarwar road etc. The lengths of pucca road are 1,495 km. and kuchcha roads 739 Km. Gwalior junction is situated on the Delhi-Mumbai railwayline. All trains of southern, Mumbai and Delhi pass through this station. The district is fairly well connected by railways and the total length of rail line is 102 Km. Gwalior has been linked with all important places like, Bhopal, Bilaspur, Raipur, Kolkatta as well as with Guna, Shivpuri, Sheopur, Bhind etc of Madhya Pradesh. Gwalior came on the air map of India in 1937 and is now connected with Mumbai, Delhi, Indore, Bhopal and other places.

There were 141,933 registered Scooters/Motor cycles, 6,319 trucks, 4,669 taxis and three wheelers, 7,427 cars, 6,130 buses and 16,592 tractors and jeeps in the district. Posts, telegraphs and telephone system are also well in the district.

Electricity and power

There is no production of electricity in the district. The consumption for industrial units was 123,499 KW. domestic consumption was 126,792 K.W., trade 45,657 K.W., water supply 22,147 K.W., irrigation 154,326 K.W. and street light was 3,886 K.W. Altogether total consumption of electricity was 476,307 K.W. and number of consumers were 244,589 as such per head consumption was 0.368 K.W. 559, out of 652 villages were electrified which was 98.76 % of total villages.

Gram Panchayat

Panchayat is the basic institution of local self-governance and foundation of local administration. Under the Directive Principles of State Policy, the Constitution of India provides the Panchayati Raj System. Madhya Pradesh Government passed M.P. Panchayat Adhiniyam 1993, which provides Panchayat for villages, Janpad Panchayat for blocks and district panchayat for the district. According to the M.P. Gram Sabha Adhiniyam 2001, Gram Sabha is constitutionally approved unit and confer all the major persons with voting rights to elect Panch, Sarpanch, and members of Janpad and members of district panchayat around 10-20 and 10-30 respectively. These institutions work for five years. Constituted with the elected members the Gram sabha has powers to approve works under annual budget of the village. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women one third of total seats are reserved.

Village panchayat executes the disposal of discriminating articles, water supply, public works (roads, buildings, wells, tanks) market, co-operation with governmental works, community health and development works. Janpad panchayat works for community development and integration, agriculture, social, trade, cattle breeding, fish breeding, adult-education, co-operatives, cottage industries, welfare and employment oriented programme. The district panchayat has the duty to supervise, co-ordinate and

exercise control over the Janpad and village panchayats. It also advise the state Government regarding development works.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by

different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities

and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member

households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption

are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total

population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of

children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual

place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance)

Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Gwalior district comprises of 612 inhabited villages, 40 uninhabited vilages and total 652 villages distributed among three tahsils and four number of CD blocks. The district has 8 towns. The average household size of the district is 6.0. Total population of the district is 1,632,109 comprising 883,317 males and 748,792 females. Thus the sex ratio of the district works out to 848 which is lower than the sex-ratio of the state (919). Density of the district is 358 persons per sq.km. and is higher than the density of the state which is 196. Literacy rate of the district 69.4 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 18.9 per cent and 3.5 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii)Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 26.2 percent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 35.4 percent, while for urban areas it is 20.8 percent. Among the tahsils, Pichhore has registered the highest decadal growth rate of 27.8 percent. The growth rate in rural area is highest in Gird tahsil and it is highest in Bhitarwar for urban area of the district. The percentage of urban population to total population of the district is 60.2 percent in 2001 against 62.9 percent in 1991.

Table 2 gives CD blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD block level in the district. Out of the 612 inhabited villages, 62 (10.1 percent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 133 villages having 21.7 percent villages of the district while in the size class of 500-999 population there are 203 villages constituting 33.2 percent of total villages. 137 villages (22.4 percent) are in the size class of 1000-1999 and 67 villages (10.9 percent) are in the size class of 2000-4999. There are 8 villages (1.3 percent) in the size class of 5000-9999 and 2 villages (0.3 percent) falls in the size class of population 10,000 and above.

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 222 accounting for 36.3 percent of the total inhabited villages of the district fall in the density range of 101-200 persons having 33.4 percent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 33 villages (5.4 percent). 26 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 38.0 percent of the total inhabited villages having 47.1 percent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 5.9 and 10.1 per cent of inhabited villages. Both these ranges claim 8.4 percent rural population.

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e.127(20.8 percent) having population (9.7 percent) in the district (rural) fall in the sex ratio range of less than 700. It is followed by the sex ratio range of 1100+ which claims 77 villages (12.6 percent) and 6.6 percent population. Next to it 75 villages (12.3 percent) and 15.4 percent population are in the range of 800-849. Minimum number of villages i.e. 39 (6.4 percent) and 10.5 percent population fall in the range of 950-999.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,632,109 total population of the district 18.9 percent belong to the Scheduled Castes and 3.5 percent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 22.0 percent in rural population and 16.9 percent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Pichhore tahsil (24.1) while the lowest is found in Gird tahsil (17.1). The proportion of Scheduled Tribes population is 6.4 and 1.5 percent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Bhitarwar tahsil (5.3 percent) and the lowest Scheduled Tribes population is recorded in Gird tahsil (3.0 percent).

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 141 villages accounting for 23.0 percent of total 612 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 percent in 64 villages (10.5 percent). In 56 villages it varies between 5-10 percent while the next range of 11-20 percent accounts for 118 villages. The range of 21-30 and 31-40 percent contains 85 and 60 villages respectively. There are 37 villages in the range of 41-50 and 43 villages in the range of 51-75. Only 8 villages are such where the proportion of Scheduled Castes is 76 and above.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 26.8 percent of the total workers (main + marginal), 13.5 percent of total workers are engaged as agricultural labourers, 3.0 percent as household industry workers and 56.8 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on other workers sector absorbing large number of workers. The proportion of cultivators varies between 17.1 percent in Gird tahsil and 53.7 percent in Bhitarwar tahsil. The percentage of male cultivators is 25.9 percent which is less as compared to 30.1 percent of female cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The highest proportion of 72.5 percent of other workers is recorded in Gird tahsil while the lowest proportion of 11.7 percent is found in Bhitarwar tahsil.

In the rural areas of the district total workers (main + marginal) constitutes 38.3 percent of total population. Among these workers cultivators constitute 53.7 percent, agricultural labourers 26.8 percent, household industry 1.5 percent and other workers constitute 18.0 percent. The proportion of cultivators is highest 63.0 percent in Morar CD block and is lowest 42.8 percent in Ghatigaon (Barai) CD block. Proportion of agricultural labour is highest 34.6 percent in Bitharwar CD block and lowest 19.1 percent in Morar CD block. It is also seen that the proportion of female workers is more than male workers under the category of agricultural labour and household industry workers.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 28..7 percent of total workers, cultivators constitute 3.0 percent, agricultural labourers 1.7 percent, household industry 4.3 percent and the highest proportion is covered by other workers which is 91.0 percent. It is also found that proportion of female workers under cultivation is same but in case of agricultural labour and household industry workers are more than the male workers proportion whereas proportion of male workers under other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 43.9 percent in Bilaua (NP), agricultural labourer is highest 25.1 percent in Bhitarwar(NP), household industry workers is highest 13.7 percent in Pichhore(NP) and other workers is highest 96.5 percent in Morar cantt(CB).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 612 inhabited villages in the district 560 villages or 91.5 percent have been provided with the education facilities of one type or the other. Similarly 246 villages in the district constituting 40.2 percent have medical facilities of one type or the other. Improved drinking water facility is available in 590 or 96.4 percent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 129 villages constituting 21.1 percent of villages have been provided with post office facility within the villages. 419 or 68.5 percent villages have been provided with the telephone facility, 203 or 33.2 percent with transport facility, 36 or 5.9 percent villages with bank facility and 48 or 7.8 percent with agricultural credit societies. Similarly there are 355 or 58.0 percent villages which are linked with the pucca road. Total 594 or 97.1 percent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Morar CD block has the highest 93.5 percent villages where educational facility is

available and lowest 89.4 percent is found in Ghatigaon(Barai) CD block. Medical facility is highest in Bhitarwar (61.4 percent) and lowest 32.0 percent in Morar CD block. Improved drinking water facility is highest in Morar CD block (98.2 percent) and it is lowest in Ghatigaron(Barai) (94.7 percent). In the field of power supply all villages have been covered except 18 villages in the district.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 649,101 persons in the district, 641,261 or 98.8 percent have educational facility of one or the other type. Similarly 405,133 or 62.4 percent population has medical facilities while 642,908 or 99.0 percent have improved drinking water facility. Post office facilities are available to 291,851 or 45.0 percent population. Telephone facility is available to 529,783 or 81.6 percent. Transport communications facility is available to 331,823 or 51.1 percent. Bank facility is available to 124,205 or 19.1 percent. 139,591 or 21.5 percent have been provided with the facility of agricultural credit societies. 479,191 or 73.8 percent have been provided with the facility of approach by pucca road. Power supply is available to 645,827 or 99.5 percent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 54 villages do not have primary school and out of these villages, children of 42 villages have to travel less than 5 kms. for schooling. Out of 612 inhabited villages as many as 389 are deprived of middle school and 610 of degree college. Of these 275 avail the facility of middle school at a distance of less than 5 kms., 84 at a distance 5-10 kms. and the remaining 30 at a distance of 10+ kms. In respect of degree college 25 avail this facility at a distance of less than 5 kms., 74 between 5 to 10 kms. and rest 511 villages at a distance of 10+ kms.

Similarly there are 605 villages in the district which have been devoid of Hospital facility and 599 villages which are deprived of PHC facilities. Of these 31 villages have the facility of Hospital available within 5 kms. while in respect of 136 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 438 villages have this facility at a distance of 10+ kms. As regards PHC 58 avail this facility at a distance of less than 5 kms., 171 at a distance of 5-10 kms. and the remaining 370 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 483 villages do not have this facility in the village itself. Of these majority i.e. 263 have this facility at a distance of less than 5 kms., another 149 villages avail it at a distance of 5-10 kms. In the remaining 71 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 193 villages in the district which are without telephone facilitiy. Of these 67 avail this facility at a distance of less than 5 kms., 36 at a distance of 5-10 kms. and remaining 90 have to traverse a distance of 10+ kms.

For Bus service out of 415 villages which do not have facility, 238 villages avail this facility at a distance of less than 5 kms., 130 at a distance between 5-10 kms. and 47 at a distance of 10+ kms.

In the entire district 580 villages are deprived of Commercial Bank and 603 of Co-operative Bank. Of these 110 villages which are deprived of Commercial Banks 214 villages avail this facility at a distance

of less than 5 kms., 256 between 5-10 kms. and the remaining 256 at a distance of 10+ kms. Regarding Co-operative Banks out of 603 villages, 84 villages avail this facility at a distance of less than 5 kms., 201 at a distance of 5-10 kms. and remaining 318 at a distance of 10+ kms. 564 villages do not have agricultural credit societies. This facility to 147 villages is available at a distance of less than 5 kms., 167 at a distance of 5-10 kms. and the remaining 250 at a distance of 10+ kms.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 612 inhabited villages in the district, there are 27 villages which have nearest towns upto a distance of 5 kms. Of these only 25 villages forming 92.6 percent of total villages, are having the educational facilities atleast one type and 11 villages constituting 40.7 percent, have the medical facilities within the range of 5 km., 7 villages forming 25.9 percent have the facility of post office and 25 villagae forming 92.6 percent have facility of telephone within the range of 5 km. 7 villages constituting 25.9 percent have been linked by transport service. There is only one village constituting (3.7 percent) having facility of banks. 5 villages constituting only 18.5 percent have been provided by agricultural credit societies. 22 villages comprising 81.5 percent have been provided with pucca road within the distance of 5 km.

There are 284 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 265 villages constituting 93.3 percent have been provided with the educational facilities. 121 villages comprising 42.6 percent have been provided with medical facilities. 60 villages constituting 21.1 percent enjoy the post office facility. 213 villages comprising 75.0 percent have been provided the telephone facility. 118 villages constituting 41.5 percent have been linked with transport communications. 16 villages comprising 5.6 percent have bank facility. 22 villages constituting 7.7 percent are having agricultural credit societies, while 178 villages or 62.7 percent are approachable by pucca road.

249 villages fall in the distance range of 16-50 kms. Of these, 93.6 percent villages have educational facility, 43.0 percent with medical, 22.9 percent with post office, 64.3 percent with telephone, transport and communications available to 35.3 percent villages. Banks and agricultural credit societies facilities are

available to 7.2 and 6.8 percent of villages. Approach by pucca road facilities are available to 53.4 percent of villages.

There are 43 villages in the district which are covered under the range of 51+ kms. and 36 villages are provided with education facility. Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that L.P.G is used as the most predominant fuel used for cooking by 34.7 percent households in the district. In the tahsils, this proportion varies between 3.0 percent in Bhitarwar and 43.5 percent in Gird tahsil. In rural it is 2.5 percent and in urban areas it is 55.6 percent. The next most common cooking fuel is fire wood which is used by 30.1 percent households in the district. This proportion in rural & urban areas is 41.8 and 22.6 percent respectively. In rural areas use of fire wood for cooking is high as compared to urban areas at tahsil level. There are 21.9 percent households using cowdung cake in the district. Use of cowdung cake for cooking by rural households comes to 49.0 percent while in urban areas its proportion is only 4.3 percent. There are 9.6 percent households using kerosene in the district. Use of kerosene for cooking by rural households comes to 1.2 percent while in urban areas its proportion is 15.1 percent, as a whole. The percentage of households using other types of fuel is insignificant.

This table 52 presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 263,601 households in the district and among them, 108,806 households have been availing banking services. 63,026 households have Radio/Transistor. Television is possessed by 156,045 households. Telephone is available in 47,143 households. Bicycle is the most common means of transportation and is available in 153,698 households. Scooter, Motor cycle, Moped and Car, Jeep, Van are used by 64,691 and 8,798 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

Entire Bhander tahsil of Gwalior district with an area of 654.43 Sq. Kms. and population 140,411 was transferred to Datia district vide Notification No. 1011-F-20-8-92-vii-5-8 dt. 22.5.1998.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the town of the district.

Places of interests at Gwalior city

1. The Fort : Standing on a steep mass of sandstone, Gwalior fort dominates the city and is the most significant monument. It has been the scene of momentous events, imprisonment, battles, etc. A steep road leads to the fort, flanked by statues of the Jain *tirthankaras*. Constructed by Suraj Sen, the fortress of Gwalior stands on a long and narrow rocky hill of sandstone. The magnificent outer walls of the fort still stand, two miles in length and 35 feet height, bearing witness to its reputation for being one of the most

invincible forts of India. Gwalior was a part of the kingdom of Kanauj. The fort possesses numerous tanks like Johar Tal, Suraj-Kund, Mansarover, Gangola Tal, Ekkhamba Tal, Katora Tal, Rani Tal and Chedi Tal. This imposing structure inspired Emperor Babur to describe it as " the pearl amongst the fortresses of Hind ".

***2. Gujari Mahal*:** Within the fort, the 15th century *Gujari Mahal* is a monument to the love of *Raja Mansingh Tomar* for his Gujar Queen, *Mrignayani*. The outer structure of *Gujarat Mahal* has survived in an almost total state of preservation; the interior has been converted into Archaeological Museum housing rare antiques, some of them dating back to the 1st century A.D. Even though many of these have been defaced by the iconoclastic *Mughals*, their perfection of form had survived the ravages of time. Particularly worth seeing is the statue of *Shalbhanjika* from *Gyraspur*, the tree goddess, the epitome of perfection in miniature. The statue is kept in the custody of the museum's curator and can be seen on request.

*3.**Man Mandir Palace* :** Built by Raja Mansingh between 1486 and 1517, within the palace rooms stand bare, stripped of their former glory, testifying to the passing of the centuries, vast chambers with fine stone screens were once the music halls, and behind these screens, the royal ladies would have learned music from the great masters of the day. Below, circular dungeons housed the state prisoners of the *Mughals*. Emperor *Aurangzeb* had his brother, Murad imprisoned and later executed here. Close by is Jauhar pond, wherein the Rajput tradition, the *Ranis* committed mass *sati* (to burn self with dead husband) after their consorts had been defeated in battle. At *Man Mandir Palace*, a poignant ambience of those days of chivalry and heroism still lingers in the silent chambers. A superbly mounted Son-et-Lumiere here brings it all alive every evening.

*4. **Ghaus Mohammed's Tomb* :** The sandstone mausoleum of the Afghan prince, Ghaus Mohammed is designed on early *Mughal* lines. Particularly exquisite are the screens, which use the pierced stone technique as delicate as lace. It is on the way to Gwalior fort near *Hazira* from railway station.

***5.Gurudwara Data Bandhi Chhod* :** Built in the memory of *Guru Hargobind Saheb*, the 6th Sikh Guru who was imprisoned here by Emperor *Jehangir* for over two years.

6. Gopachal Parvat* :** Situated on the Mountain area at slopes of Gwalior fort carries unique ***statue of Jain Tirthankars built between 1398 to 1536 by Tomar Kings these **Jain *Tirthankars* statues** are a species of architecture and a treasure of old Indian heritage and culture. The largest Idol *of Bhagwan Parshwanath* (in single stone piece) on lotus is the largest statue in the world, being 47 feet height and 30 feet in width. 26 Jain statues in a series give a beautiful and attractive picturesque, sight.

***7. Sun temple* :** Located near the Residency at Morar, the newly constructed Sun temple takes its inspiration from the famous *Konark* Sun temple in Orissa.

8. Sarod Ghar : This museum of music was set up in the old ancestral house of the legendary *Ustad Hafiz Ali Khan*. It houses impressive collection of photographs, documents as well as ancient instruments of the great Indian Masters of yester years. *Sarod Ghar* is a unique institution devoted to promoting Indian classical music, heritage and culture, through which, music lovers can understand the evolution and history of our classical music and a deeper perspective and insight into the context of the art as it exists today.

9. Jai Vilas Palace and Museum : Current residence of the *Scindia* family, *Jai Vilas* is an Italianate structure which combines the Tuscan and Corinthian architectural modes. Some 25 rooms have been turned into the *Jivaji Rao Scindia Museum.* The imposing Darbar Hall has two central chandeliers weighing a couple of tones, and hung only after ten elephants had tested the strength of the roof. Ceilings picked out in gilt, heavy draperies and tapestries, fine Persian carpets and antique furniture from France and Italy are the features of these spacious rooms. Eye catching treasures include the wall of the dining hall pasted with gold; a silver train with cut glass wagons which served guests as it chugged around the table on miniature rails; a glass cradle from Italy used for the baby Krishna every *Janmashtami*, silver dinner sets and swords that belonged to Aurangzeb and Shah Jahan. There are

personal momentous of erstwhile members of the Scindia family, the jeweled slippers that belonged to Chinkoo Rani, four-poster beds, gifts from every country in the world, hunting trophies, portraits etc. The *Scindia Museum* offers an unparallel glimpse into the rich culture and lifestyle of princely India.

10. ***Bada:*** Looks fantastic in the night, the place called Bada in the heart of the city and is the main market place. It houses Town Hall, Municipal Corporation, Collectorate and Government printing press.

11.***Tansen's tomb:*** A pillar of Hindustani classical music, the great Tansen, one of the 'nine jewels' of Akbar's court lies buried in Gwalior. The memorial to this great musician has a pristine simplicity about it and was built as per Mughal architectural style. More than a monument, the tomb is the part of Gwalior's living cultural heritage, it is the venue of music festival on a national scale held annually in November-December.

12. ***Memorials :*** The earliest freedom fighters, Tatya Tope and the indomitable Rani of Jhansi, Laxmi Bai are commemorated in memorials in Gwalior. There are cenotaphs at major public place crossing, memorials of Scindhia kings and queens. Throughout the city, there are these reminders of a proud past, of the great men and women of Gwalior who have their place in the nation's role of honour.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Gwalior district is historically associated with its picturesque, surroundings and its importance as a great cultural, industrial and political centre in Madhya Pradesh. Gwalior was the metropolitan town of the former state and continued to be winter capital of Madhya Bharat till 1956. It is the headquarters of the revenue division. It was a part of the Gurjara Parthihara empire. The Jama Masjid built of fine red stone erected during the reign of Jahangir. To the east of the town stands the mausoleum of Mohammad Ghaus a very fine example of early Mughal architecture. It is built in the form of a square with hexagonal towers at its corners surmounted by small domes. Close to this there is the great musician Tansen's tomb where annual *Urs* is held in honour of Tansen at which renounced musicians from all parts of the country come and play their respect. The cradle of great dynasties ruled the city of Gwalior with different dynasty, the city joined a new dimension from the sarcasms, literalists, warrior kings, poets, musicians, sportsmen, politicians, rewarded freedom fighters, immortal martyrs and saints who contributed in making it known through out the country. Cotton, yarn, paints, ceramics, chemicals and leather products are produced at Gwalior.

Districtwise renowned politicians and personnel are Shri Atal Bihari Bajpai, Shri Vijaya Raje Scindia, Madav Rao Scindia, Shri Shashi Bhushan Bajpai, Bhagwat Sahay, Sardar Shambhajee Rao Angre, Shri N.K. Sejwalkar, Justice Chachindra Dewedi, Shri Shitala Sahay, Pradeep Choubey, Shrimati Chandrakala Sahay etc.

At Gwalior, there are some national level educational institutions i.e., Indian Institute of Information Technology and Management (IIITM), Laxmi Bai National Institution of Physical Education (LNIPE), Indian Institute of Tourism and Travel Management (IITTM) and Madhav Institute of Techonology and Science(MITS). Headquarter of the Revenue Board, Excise Department and Bench of High Court are also located at Gwalior. A month long and famous Gwalior Trade Fair is organized in every year in the month of December/January.

Important fairs

Several fairs including religious are held in the district. A large fair is held at Koteshwar Mahadeo temple and at Bhuteshwar Mahadeo temple at Aukhana on the eve of *Shivaratri.* An annual *Urs* takes place at the tomb of Mohammad Ghaus, the most important Muslim saint of the state. Commemoratively recently started cultural festival commemorating Tansen called "Tansen Festival" for three days is celebrated

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances,

civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued

and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district for all ages has decreased considerably from 1981 to 1991. On comparison it is seen that the district mortality rate for almost all ages is lower than state rates. However some inconsistencies are observed in male-female classification. Male child mortality for q(5) of the district (121) is less than the state average (142).The table also reflects that the female child mortality is marginally higher than the male child mortality.

Note:Percentages are given in brackets.

This table presents the number of inmigrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 71.8 per cent of total migration. The migration from within the district but outside the enumeration place is 33.9 per cent whereas migration from other districts of the state is 37.9 per cent. Migration from other states is 27.1 per cent and the migration from outside India is 1.1 per cent of the total migration. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 73.1 per cent of total migrated population. Within this classification, the migration from within the district is 34.8 per cent and only 38.4 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 26.0 per cent of total migration and it is only 0.9 per cent from outside India. Migration of one person constituting almost negligible per cent of total migration which could not be placed in the first three classification but shown as unclassified in the table.Sexwise analysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

(Source- Migration Table C-8)

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,377,033 persons belonging to the age 7 and above 955,356 are literates and thus, the literacy rate of the district works out to 69.4 per cent. Similarly the male and female literacy works out to 80.4 and 56.4 per cent respectively.

254,191 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 74.7 percent of population in this age group. In the age group 15-34; 97,347 persons (16.9 percent) are found educated up to middle, 144,318 person (25.1 percent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech. and 60,134 persons (10.5 percent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.
