INTRODUCTION

In the 1961 census, all the cultural (C-Series) and migration (D-Series) tables were incorporated in only one volume, part II-C. At the 1971 census, because of some changes in the publication programme, social and cultural tables (C-Series) have been separated from migration tables (D-Series). While all the C-Series tables are being printed in part II-C, all the D-Series tables have been incorporated in part II-D.

Part II-C of the 1971 census has been further sub-divided into two parts, that is part II-C(i) and part II-C (*ii*). Keeping in view the urgency of the data users part II-C (*i*) report containing three main tables, that is C-V- mother tongue, C-VII -religion and C-VIII Part A and B and their appendices relating to scheduled castes and scheduled tribes has already been finalised and sent to the press. All the remaining C-Series tables and F-Series fertility tables, which are an innovation of the 1971 census are, being given in the present volume. C- Series tables included in this volume relate to household composition (Table C-I part A, C-1 part B (*i*) and C-I part (*ii*), age and marital status (Table C-II), literacy by age group (Table C-III part A & B), single year age data (Table C-IV) and Bilingualism Table C-VI, alongwith these C-Series tables, F-Series tables depicting fertility data on currently married women by religion, scheduled castes/ scheduled tribes and literacy have also been included in this report. Fertility data which has been collected for the first time at the 1971 census has been compiled with the help of data collected in response to question No. (a) and 9 (b) of the 1971 census individualship. Under these questions, information relating to slip. Under these and "Live birth among currently "age at marriage" during the last one year" was collected. Data so/ collected has been cross tabulated with relation to religion, age and literacy and presented in this volume in the form of fertility table F-I part A & B, Appendix to Table F-I, F-II part A'& B, F-III part A & B, appendix to tables F-III, F-IV part A & B and Table F-V. All these tables have been prepared on the basis of 100% manual sorting. The scope of each table included in this report has been explained in the fly-leaf to each table. The terms like household, head of household, mother tongue, literacy, age at marriage, etc, used in these tables have also been explained in the relevant fly-leaf.

Reference date: Some parts of Himachal Pradesh remain inaccessible during winter season due to snowfall. It was, therefore, decided to divide the state into two parts for the conduct of census operations as synchronous and non-synchronous areas Non sysnchronous areas consisted of entirely two districts of Kinnaur and Lahul and Spiti and all the villages of tahsil Pangi and sub-tahsil Brahmaur of Chamba district and Chaupal tahsil of Mahashu district. Some villages of tahsil Palampur of Kangra destrict, Joginder Nagar, Mandi Sadar, Chichot and Karsog tahsils of Mandi district; Kulu Tahsil, Banjar, Ani and Nirmand sub-tahsils, of Kulu district and Kumharsain, sub tahsil Rampur and Rohru tahsils of Mahasu district were also treated as non-synchronous areas.

The remaining areas were treated as synchronous (general) areas.

The reference date for the 1971 census in synchronous areas was the sunrise of 1 April, 1971 and 1 October, 1970 for non-synchronous areas.

TABLE C-I Part A

Fly-leaf

Scope and coverage :

This table shows composition of households by relationship to the head of household classified by three age groups, viz., less than 30, 30—49 and 50+, Data in respect of 'Age not Stated' are included in the total. The relationship to the head of household of Married persons is given separately for son, brother, father mother, other males and other females. In the case of never married, widowed and divorced or separated relations in addition to the relations mentioned in case of married persons sister and daughter are also included. Data in respect of unrelated persons and single member households are also provided separately.

Basically Table C-1 part A corresponds to the 1961 census Table C-1. In 1961 data on composition of households was not classified by age but it was classified by size of land cultivated and shown under five major groups relations consisting of heads of households; Spouses of head of households; Maried relations; Never married, widowed and divorsed or separated census,the groups consisting 'Married relations', 'Never married widowed and divorsed or separeated relaions' have been further bifurcated into defferent relations and a new column of relations; and unrelated persons in the present 'Single menber households' has been added.

As in 1961 census, this table has been prepared upto district level by Total, Rural and Urban, This table is based in 100 percent sorting whereas in 1961 census this table was prepared on 20 percent sample.

Definition and Explanation :

Census Household: A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A household can be either a one person household i. e,. a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multi-person household. It may be a multi-person household, that is, a group of two or more persons who make common provision for food or other essentials for living. They may be related or unrelated persons or a combination of both. Households usually occupy a whole or part of not more than one housing unit but they may also be found living in camps in boarding houses or hotels or other institutions or they may be houseless.

Head of the household :- The head of the household for census purposes is a person who is recognized as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The head of the household need not necessarily the eldest male member, but may even be a female or a younger member of either sex.

TABLE C-I PART B(*i*)

DISTRIBUTION OF HOUSEHOLDS WHERE THE HEAD IS A MALE BY RELATIONSHIP OF MEMBERS WITH HEAD

Fly-leaf

In this table an attempt has been made to depict the data relating to composition of households of those households where the head of the household is Male. This table has been introduced for the first time in this census.

Basically the relationship has been categorised into five groups. Three groups deal with 'single member households', 'households with spouse living therein', and 'households having unrelated members'. The other two groups deal with 'households having currently married relations' and 'households having members with other marital status like never married, widowed, divorced or separated'. Relationship of these two categories has been further classified into different relations like son, brother, son's wife, brother's wife, daughter, sister, sister's son, daughter's husband, sister's husband, father, mother, mother's brother, and other male and female relations.

This table has been compiled for state as well as for districts.

TABLE C-II

AGE AND MARITAL STATUS

Fly-leaf

Scope and Coverage :

The tabulation scheme adopted for this table has not undergone any change since 1961 Census. In both the Censuses this table was prepared on full count basis. However in 1951 Census this table was prepared on 10 per cent Sample.

The present table is one of the important demographic tables parepared during the various Censuses. This table presents sex-wise distribution of population classified by 'Total', 'Rural' and 'Urban' in the age groups 0—9, 10—14, 15—19, 20—24, 25—29, 30—34, 35—39, 40—44, 45—49, 50—54, 55—59, 60—64, 65—69, 70+ and 'age not stated' separately for 'Never married', 'Married', 'Widowed', 'Divorced or Separated' and 'Unspecified status'. The age group 0—9 was regarded as 'Never married'. The age group adopted for this table conforms to the international requirements.

Definition and Explanation :

Age:—Age in years completed on last birthday was recorded for every individual during the 1971 Census. In case of infants below the age of one year, the age was recorded as '0'.

The following instructions were given to enumerators for recording age of the persons enumerated:—

> "Record the age of the person in total years completed on last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded". "In respect of infants who might not have completed one year by the day of enumeration their age in completed years should be invariably shown as '0' as they have not yet completed one year of age and add 'Infant' in brackets".

Marital Status:—For a person who had never been married at any time before, 'Never married' status was recorded for him. For a person married, whether for the first or another time, the 'Married' status was recorded. The status 'Married' was also recorded for the persons who were recognised by custom or society as married and persons in stable de-facto union. Even if a marriage was disputed in the locality, the marital status was recorded as 'Married' if the person concerned responded as 'Married' or in stable de-facto union. For a widowed person whose husband or wife was dead, and who had not married again, 'Widowed' status was recorded for him. For a person who had been divorced in a lawful manner either by decree of a law court or by regular social or religious custom but who had not re-married, or a person who had been separated from wife or husband and was living apart with no apparent intention of living together again 'Divorced or Separated' status was recorded. For a prostitute marital status was recorded as declared by her.

TABLE C-III PART A

AGE, SEX AND EDUCATION IN ALL AREAS

Fly-leaf

Scope and Coverage :

The table deals with sex-wise distribution of population by age-groups cross-classified by educational levels. Its corresponding table in the 1961 census was table C-III Part A. It has been prepared on full count as was done in the 1961 census. In 1951, this table was prepared on 10 percent sample.

The age group pattern and education level pattern have undergone some changes since 1961. The age-group pattern upto age group 20--24 remains the same in the 1971 census but the subsequent age groups have been clubbed into two age-groups, namely, 25—34 and 35+. The detail of different age-groups adopted in this table in the two censuses is given below:

1961 Census	1971 Census
All Ages	All Ages
0—4	0—4
5—9	5—9
11—14	10—14
15—19	15—19
20—24	20—24
25—29	25—34
30—34	35+
35—44	Age not stated
45—59	
60+	
Age not stated	

The other important departure in 1971 is the detailed tabulation of data on different educational levels. The educational level of Matriculation and above of the 1961 census has further been divided into 3 educational standards, namely, 'Non-technical diploma or certificate not equal to degree', 'Technical diploma or certificate not equal to degree' and 'Graduate and above'. A new standard 'Middle' has also been introduced in this table during this census. In the 1961 census, persons who had attained educational level of Middle were grouped in the educational level of Primary or Junior Basic. The educational levels adopted during the two censuses are as under:

1961 Census	1971 Census
1. Illiterate	1. Illiterate
2. Literate (without educational level)	2. Literate (without educational level)
3. Primary or Junior Basic	3. Primary
4. Matriculate or above	4. Middle
	5. Matriculation or Higher Secondary
	6. Non-Technical diploma or certificate not equal to degree.
	7. Technical diploma or certificate not equal to degree.
	8. Graduate and above.

As in 1961, this table has been prepared upto district level.

Definition and Explanation :

Literate:—A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less are treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Definition and Explanation :

Urban Area In the 1961 and 1971 Censuses, an urban area was either a place with a Municipal Administration or a Notified Town Area or a Cantonment In addition, all other places which satisfied the following criteria were treated as urban—(*i*) a minimum population of 5 ,000 (*ii*) at least 75 percent of male working population engaged in non-agricultural pursuits, and (*iii*) a density of population of at least 400 per Km (*i.e.* 1000 per mile).

The directors were, however, given some discretion in respect of some marginal cases in consultation with the state government, to include some places that had other distinct urban characteristics and to exclude undeserving cases.

The names of the places treated as urban areas at the 1971 census are given in the introduction.

TABLE C-IV

SINGLE YEAR AGE RETURNS

Scope and Coverage :

The table shows single year age data for each sex for total, rural and urban areas separately. The data has, however, been presented upto the state level only. The practice of preparing the present table down to the district level has been dispensed with. But for comparison purposes an appendix to this table has been added wherein the data has been presented in the 5 year age groups upto the district level. Its corresponding table of 1961 is table C-IV which was prepared down to the district level. In the 1961 census, all ages above hundred were combined into one group of Over 100,' whereas in the 1971 census, even after age 100, data have been compiled for each age separately.

It has been prepared on 100 percent count in 1961 and 1971 censuses. Similar table of the 1951 census was, however, prepared on 10 percent sample.

It is an important demographic table which is used by Census Actuary for compiling the mortality rates from the age data of the earlier censuses and for the preparation of life tables. It also provides help in carrying out analysis with regard to bias in age reporting such as preference for units like 0,5 and 2 etc.

TABLE C-VI—BILINGUALISM

Fly-leaf

This table corresponds to table D-I Part II of the 1951 and C-VI of the 1961 censuses.

The question on bilingualism at the 1971 census was :

Question 15 : Other Languages

"After recording the mother-tongue in question 14, enquire whether the person knows any other language(s), Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue, put 'X' against this question.

The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding."

In this table, data on bilingualism are presented only for selected languages/mother-tongues (L/MTs). The selection of these L/MTs has been done on the basis of all India table C-VI Bilingualism of 1961 and a list of L/MTs was devised for all India. This list formed the basis for preparing the table on bilingualism. The figures are based on cent percent count. Processing of rural data was done manually while the urban data were processed on the computer.

Column 2, 3 and 4 of the table give the total number of speakers of L/MT inclusive of MTs grouped under it. Columns 5, 6 and 7 give figures of such of the speakers who returned a second language, that is to say, any other L/MT not accounted for in columns 2, 3 and 4. Column 8 contains in 'run on' fashion the names of subsidiary L/MTs inclusive of L/MTs wherever grouped by number of male and female speakers within brackets.

Table F-1 Part A—DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, PRESENT AGE AND AGE AT MARRIAGE

(RURAL)

Fly-leaf

Scope and Coverage :

The table presents distribution of currently married women and the related births during the last one year by Religion, age at marriage and present age of the mother. Age at marriage has been displayed in age ranges of less than 13, 13—17, 18—22, 23—27 and 28+ while the present age of currently married women has been shown under age groups starting from less than 13, 13—17, 18—22 23—27, 28—32, 33—37, 38—42 43—47, and 48+. Under each of these age groups number of women and the related births have been shown. Since data have been displayed for each religion sepaarately, it will help in the calculation of differentials in fertility.

This table presents data for rural areas only. Since all the F-Series Tables have been prepared upto state level only, the table shows data for the rural areas of Himachal State as a whole

Definition and Explanation :

Age at Marriage : Age at marriage of the currently married women was ascertained in completed years. In case of the currently married women who had been married more than once, the age at which she got married for the first time was recorded.

Currently Married Women : Under this category only those women were considered which were presently leading a married life. Any live child born during the last one year to the currently married woman was considered. It was ensured that all the live births which had taken place during the last one year were considered even if the child died immediately after the birth. The condition for such consideration was that it should have been a live birth. Still births were not recorded. If more than one child were born, the total of such births was taken into consideration.

APPENDIX TO TABLE F-I

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY SCHEDULED CASTES/SCHEDULED TRIBES, PRESENT AGE AND AGE AT MARRIAGE (RURAL/URBAN)

Fly-Leaf

The Appendix to table F-I deals with the distribution of currently married women and the related births during the last one year by present age and age at marriage of the mother amongst the scheduled castes/scheduled tribes of Himachal Pradesh. It has been prepared on the same lines as Tables F-I Part A and F-I Part B except that it exclusively deals with scheduled castes/scheduled tribes population

It has been prepared at the state level and shows data for Rural/Urban areas. From this appendix, one can derive the fertility rates of scheduled castes and scheduled tribes.

Scheduled Castes and Scheduled Tribes Population:

The castes and tribes listed as scheduled castes/scheduled tribes in Himachal Pradesh under the Government of India, scheduled castes and scheduled tribes list modification order, 1956, constitute the scheduled castes/scheduled tribes population. It is relevant to note here that, in fact, two different lists have been adopted in different areas of Himachal Pradesh. Such a course was necessitated owing to the annexation of certain areas from the erstwhile composite state of Punjab to Himachal Pradesh on 1st November, 1966, when the three states of Punjab, Haryana, Himachal Pradesh and Union Territory of Chandigarh were reorganised. The lists pertaining to the composite state of Punjab (list II given below) were utilized in the newly merged areas as far as these were applicable whereas the lists pertaining to Himachal Pradesh were utilized in old areas of the state. These lists are given hereunder :

Fly-leaf

In this table, the duration of married life of the currently married women and the related births during the last one year has been presented by age at marriage and education levels for rural areas of the state. The educational levels adopted for this table are the same as adopted in Table No. F-II Part A. The age groups devised for showing data relating to age at marriage and duration of marriage are the same as used in Table F-III. The table has been prepared on full count basis for state only.

TABLE F-V

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, EDUCATION GROUPS, PRESENT AGE AND AGE AT MARRIAGE (RURAL/URBAN)

Fly-leaf

This table provides the distribution of currently married women and related births by religion-cum-education, present age and age at marriage. The age-groups adopted for grouping the data relating to age at marriage and present age are the same as adopted in Table F-I and F-II. It is expected to be very useful in deriving differentials by religion-cum-education in median age at marriage and in the calculation of age specific fertility rate, total fertility rate and general fertility rate for various ages at marriage.

Table F-V has been prepared on full count upto state level, both for rural and urban areas.
