DISTRICT CENSUS HANDBOOK
PART - A & B

HOSHANGABAD DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

QUEEN OF SATPURA - PACHMARHI

Pachmarhi - a natural gift in Hoshangabad is called the 'Queen of Satpura'. The long series of hills, covered with evergreen trees has made its beauty double and attractive. According to legend, there are five caves made by the five Pandavas and at present this place is "summer resort of M.P.".

Pachmarhi is the place of highest hill ranges and located at 1067 ft. high from mean sea level. In the ancient period, Pachmarhi was originally under the control of Korkoo Jagirdars. English captain James Forsyth gave important contribution to the development of the place.

Pachmarhi is full of uncountable natural beauties like water-falls, religious places, attractive hill ranges etc. Caves of five Pandavas, Priyadarshini point, Handi Khoh, Apsara Vihar, Rajat waterfall, Rajgiri, Lanjigiri, Duchess Fall, Sunder kund, Jata Shankar, Chhota Mahadev, Chauragarh and Dhoopgarh etc., are the important places of Pachmarhi.

(i) Appendix to Town Directory : Towns showing their outgrowth with Population 336

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract 339-341

(b) District Primary Census Abstract (General) 342-347

(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population 348-357

Primary Census Abstract for Scheduled Castes 358-363

Primary Census Abstract for Scheduled Tribes 364-369

CD Block wise Village Primary Census Abstract 370-489

Urban Primary Census Abstract 490-507

Annexure-I : Number of villages under each Gram Panchayat (CD Blockwise) 508-544

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 545

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 546-548

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence, 2001 Census 549-551

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 552

Annexure-VI : Marital status of population as per 2001 Census 553

Annexure-VII : Age, Sex and Education in the district, 2001 Census 554

Annexure-VIII : Distribution of different mother tongues returned in 2001 Census 555

Annexure-IX : Statement of Five Main SC and ST in the District, 1991 census 556

Annexure-X : Hamletwise total population of villages, Census 2001 557-609

Annexure-XI : Statement of Disability in the District, Census 2001 610

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area

shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 32nd place in the state according to population.

2. The district occupies 22nd rank in the state in terms of area having 6707 sq.kms. which is 2.2 percent of the total area of the state.

3. Literacy rate of Hoshangabad district is 70 percent and it occupies 10th position in the state. The female literacy rate of the district is 57.8 percent .

4. Density wise the rank of the district is 30th in the state.

5. Ranking of the district according to the sex-ratio is 32nd in the state.

6. Female work participation of the district is 20.5 percent of total female population.It occupies 42 nd rank according to female work participation.

7. Population wise largest village is Bankhedi of Bankhedi tahsil L.C.No.04478100 with 11,602 population and smallest village is Kaveli, Dattapura, Nimgaon of Itarsi, Hoshangabad, Pipariya tahsil L.C.No.04412400, 04420500, 04467600 with population of only one person.

8. Population wise largest town is Hoshangabad(M) having population 97,424 and smallest is Mehargaon(C.T.) with 4301 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for, Pachmarhi, the Queen of Satpuda.

	Females	1,047,533	10.9	61,841	26.6

Note : Five villages are fully covered as outgrowths (OGs) and therefore not included under the item, "Number of villages".

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief history of the district :-

Hoshangabad derived its name from Sultan Hoshang Shah Gori; the second king to Malwa of the Ghori line who conquered. Narmadapur was its erstwhile name. There is no proper account of ancient history of Hoshangabad district. Its name appeared first in the historical records during the reign of Sultan Hoshangshah Gori in 1405 A.D who built a small fort at Hoshangabad along with two others at Handia and Joga. In his expeditions against the king of Kherla near Betul, he always took the route through Harda and Hoshangabad. After the fall of Mandu in 1567, Malwa was annexed as a *subah* of Mughal Empire. Handia, 21 km. north to Harda was the seat of a *Sirkar* with capital *mahals* at Seoni-Malwa, Harda and Bichhola to the south of the Narmada. However, the fort of Ginnurgarh, north-west of Hoshangabad across the river Narmada continued to be under the Gond kingdom of Garha-Mandla.

In the early 18th century the district was divided into seven political divisions. The northern parts of Seoni and Harda tahsils were under the Mohammadan *Faujdar's* capital of Handia, while the Rajwara in the eastern part was held by four *Rajas (*feudatories) to the Gond kingdom of Garha-Mandla. Even Hoshangabad was then under the control of Ginnore ruler. The Bagra Haveli including Babai belong to the Raja of Bagra fort in Sohagpur tahsil and was under the king of Deogarh (now in Chhindwara district) whose subordinates officers were stationed at Taron. The Raja of Saonligarh (now in Betul district) ruled over some portion of Seoni and Harda tahsils. The subordinate officer of the Raja was posted at Rahatgaon. The Raja of Kalibhit (who had already shifted to Makrai) held the Kalibhit hills of East Nimar, greater part of Charwa *pargana* of Harda tahsil and the earstwhile Makrai state.

In A.D 1722 the territories of Ginnurgarh including the fort of Hoshangabad fell to Dost Mohammad Khan, the Nawab of Islamnagar and founder of Bhopal dynasty. The Peshwa Balaji Bajirao captured the Handia capital *Sirkar*, west of the Ganjal river in A.D 1742 and displaced the Mohammadan Governor with his own. Later on in A.D. 1750 the Raja of Kalibhit (Makrai) was forced to cede half the number of his villages to the Peshwa by a treaty in 1750. By the close of the 18th century the tract was handed over to Sindhia. The remaining principalities falling in Seoni Malwa, Hoshangabad and Sohagpur tahsils, east of the Ganjal, gradually came under the occupation of the Bhonsla Raja of Nagpur between A.D. 1740 and 1775. Benisingh, his *Subhedar* at Bhanwargarh captured Hoshangabad fort in 1796. From 1802 to 1808 Hoshangabad and Seoni were captured by Bhopal Nawab but were ultimately regained by the Bhonsla Raja of Nagpur in 1808.

In the last Anglo-Maratha war of 1817, Hoshangabad was occupied by the British and was held under the Provisional Agreement made by Appa Sahib Bhonsla for its cession in 1818. In 1820 the districts ceded by the Bhonsla and the Peshwa were consolidated under the title Sagar and Narmada Territories and placed under an Agent to the Governor General, residing at Jabalpur. Hoshangabad district at this time included the territory from Shagpur to the Ganjal river, while Harda and Handia remaned with

Scindia. From 1835 to 1842 the districts of Hoshangabad, Betul and Narsimhapur were kept amalgamated into one with headquarters at Hoshangabad. As a consequence of the Bundela rising in 1842, they were again separated into three districts as before and the designation of the officers holding general charge was changed to Deputy Commissioner from that of Assistant to the Agent. In 1844 the Harda-Handia tract was also made over to the British by the Scindia as part of the territory assigned for the support of Gwalior contingent and was attached to Hoshangabad district, being finally ceded in 1860. Nemawar pargana, north of the Narmada which also made over in 1844 was returned to Scindia in 1860. The Kalibhit tract of Harda tahsil was transferred to Harsud tahsil of East Nimar in 1905.

Prior to 1865, the district was divided into 42 taluks for administrative purpose. To avoid such minute subordinate sub-divisions, the talukas were distributed into six *parganas*, which extents from east to west, were named Rajwara, Sohagpur, Hoshangabad, Seoni, Harda and Charwa. This, however, was soon superseded by the present division of four tahsils, viz. Sohagpur, Hoshangabad, Seoni and Harda. In about 1951, Pachmarhi was formed as a tahsil but was reduced to a sub-tahsil, as before with an additional tahsildar posted there subsequently.

The district of Narsinghpur was amalgamated into Hoshangabad in the year 1932 as a sub-division. It was again separated on 1st October, 1956. The State of Makrai was merged into Hoshangabad as a part of Harsud tahsil in 1948. Thereafter in 1948, the merger of states in Indian Union took place and Hoshagabad district too was incorporated to Indian Union consequent to the reorganizations of states on the basis of language on 1st November 1956.

Hoshangabad had been the seat of Narbada Commissioner's divison earlier. After the formation of the new state of Madhya Pradesh, it was included in Bhopal Commissioner's Division in 1956. In 1972 it was declared as a single District Commissioner with headquarters at Bhopal in order to expedite the Tawa River Project.

(iii) Administrative set up

According to Census 2001, the total numbers of villages are 976, out of which 929 villages under 391 Gram panchayats are inhabited and 47 villages are uninhabited. There are seven tahsils as well as seven CD blocks, Janpad panchayat and 391 Gram panchayat in the district.. Tahsilwise numbers of villages are (1) Seoni Malwa (203), (2) Itarsi (157), (3) Hoshangabad (70), (4) Babai (106), (5) Sohagpur (167), (6) Pipariya (148) and (7) Bankhedi (125). Keshla is the only tribal block in the district. As per urban classification, ordnance factory Itarsi, Bhilakhedi and Mehargaon are Census Towns., whereas Seoni-Malwa, Itarsi, Hoshangabad and Pipariya are municipalities; Babai and Sohagpur are Nagar Panchayats.

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the key functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order as well as the pivot of local administration.

Being is the chief executive officer of the district, he exercises general supervision and coordinates various departments, controls over local-self governing, executes Government schemes and miscellaneous functions, such as Panchayats, Census, Election and Relief measures during natural calamities, viz, floods, famine, epidemics, etc.

The organisational set-up of the collectorate may be divided into three main functionaries, viz, (i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) development.

Under the revenue administration the Collector is assisted by deputy collectors, tahsildars, *naib* (deputy)tahsildars, revenue inspectors and *patwaris*. The Collector is associated with a number of other committees including the district advisory committee. The collector is also vested with statutory powers under excise act to implement the excise and prohibition policy of the Government. Superintendent of Police is the head of police department at the district headquarters. In order to facilitate proper and smooth functioning of the judiciary and administration there are 14 police stations, and one SC/ST police station and 7 police *chowkies* (outpost)in the district.

The Judiciary is independent. At the district level, there is district court headed by district and session

judge. District and session judge is assisted by civil judges posted at tahsil headquarters.

(iv) Physical Features

Hoshangabad district lies in the central Narmada valley and on the northern fringe of Satpura plateau. It lies between 21°54' and 22°59' north latitude and 76°46' and 78°42' east longitudes. In shape, it is an irregular strip elongated along the southern banks of Narmada river. Its greatest length from south-east to north-east is 160 kms. Northern boundary of the district is river Narmada. Across this, the district of Raisen and Sehore lies. The district of Betul lies in the south, whereas the Harda district faces with the western and south-western boundaries and Narsinghpur and Chhindwara districts close to the north-eastern and south-eastern sides of the district respectively. As per the 2001Census, its geographical area is 6,707 sq.kms. as reported by the Surveyor General of India. It is the 22nd largest district of the state in respect of area of 6707 sq.kms which is 2.18% of the total area 3,08,245 sq.km. of the Madhya Pradesh. Physiographically the district may be divided under two natural divisions, viz., Satpura plateau and the Narmada valley.

The Satpura Range

The range of hills running from east to west between the Narmada and the Tapti was originally styled, either *satpura* (the seven sons) of the Vindhyachal mountain or *satpuda*(the seven folds), referring to the numerous parallel ridges in Nimar, thousand kilometres, with homogenous nature, led to the term applied for the whole range commencing from Amarkantak in the east to the proximity of the western coast. Many of the hill chains were mapped and recognized later even in Europe and other continents. Customarily the term is applied to the whole range, the major sections of which are known as the Raj Pipla, Kalibhit, Asirgarh, Satpura proper, Mahadeo, Maikal and Saletekri. The ranges between the Mahadeo and the Maikal are generally referred by the names of local features of importance.

The Mahadeo

Originally applied to include the wider mass of sandstone hills encircled by the Denwa and the Sonbhadra rivers, the name 'Mahadeo' especially denotes a single peak, 1,336 metres high at the southern edge of the small but raised land of Pachmarhi, at the botton of which are the sacred cave and the shrine of Mahadeo.

The main range of the Satpura mountains or Mahadeo hills extends from east to west in part of the district. The upstreams of the Sonbhadra and the Denwa mark its southern limits. Further at the east the range reappears as Nandkot and Chauragarh across the Dudhi in Gadarwara and Amarwara tahsils. The hills to the west of the Sonbhadra extending along the Malni river are known as Malni hills. These are washed by the Denwa in the north which separates the low outer (northern most) range of hills of Satpura. The Mahadeo massif contains the Pachmarhi plateau and a complex of hills around including Dhupgarh 1,352 metres, the highest point between the Nilgiris and the Himalayas except Mount Abu. Other important peaks are Chauragarh 1,316 metres and Belkandhar 1,152 metres which are the finest hills in the entire Satpura range. At places the superficial stratum on the top of the hills is trappean but at Pachmarhi hills sandstones are uncovered. The plateau is most dissected, traversed in all directions by narrow deep ravines, hollowed out by the action of streams and rivers, and covered throughout their extent with forest. The northern face of the plateau is also distinct from the plain by the sudden up lift.

The outer range is the northern most line of low hills. It extends from the Dudhi in the east to the Morand in the west. This range is separated from the main range by the narrow valley along the east-west courses of the tributary streams, viz, the Denwa, the Suk Tawa and the Morand. The outer range distinctly falls away from the main range in the centre, where it is crossed by the Tawa river which has carved a flat basin behind on the plateau itself. The outer range gradually rises in the east and merges with the main range beyond the Dudhi. Dorla Pahar (885 metres) is the highest peak on south-eastern boundary.

The Narmada Valley

The northern half of the district is almost a long narrow plain covered under the black cotton soil and old sandy alluvium. It is the first in sequence among the three valleys along the course of the Narmada. Below the foot hills of the Satpura the country is flat with even surface in its centre. The country is

monotonous to the horizon, except where the Vindhyan hills outcrop as knolls in the valley to the south of the river. The undulation increases towards Sohagpur in the east and the Charwa tract in the west. The Charwa tract is stony and forested but Bairi is nothing but a hilly country. The Vindhyan rocks across the Narmada are represented in low narrow ranges and denuded hillocks. The resultant soil is also light in addition to its gravelly nature and shallow depth. The Sohagpur tahsil is more undulating due to a multitude of streams flowing down the Satpuras, creating ravines and washing away the finer constituents of the soil. However, these undulations break the view of the wider plains and relieve the monotony of the scenery. The grand Mahadeo hills are full in sight. The plain is narrowest at the section of Semri in Sohagpur tahsil.

Rivers

Except a very small area in the extreme south of Harda tahsil near village Ratamati, entire district drains into the Narmada.

Narmada

The Narmada finds its place in almost all the old books of references except in *Rig Veda* and *Sutras of Panini*. The river was known to Ptolemy and the author of Periplus as the Nommados or Nammadius. It is considered to be one of the seven sacred rivers of India, since Manu. The Rewa khand of the Skandapuran is a chapter devoted to the Narmada. In one of the many legends described therein, Narmada, the damsel, sprang from the body of Lord Shiva and was named so, meaning delighting since all the Gods were captivated by her beauty. In central India the river is held to be far more sacred than the Ganga.. Even sighting of the Narmada is equal in removing sins of a person as a dip in the Ganga. The *Pradakshina* (clockwise marching) of Narmada from Broach/Handia is considered to be a performance of highest religious efficacy.

The Narmada rises from Amarkantak at an elevation of about 1057m. and flows through the district of Shahdol, Mandla, Seoni (boundary) and Jabalpur. The fall at Kapildhara and Dhuandhar below Amarkantak and Bheraghat respectively are worth mention. The river enters a narrow plain here and flows through the northern boundaries of Narsinghpur, Hoshangabad, East Nimar and West Nimar on the left and the southern boundaries of Raisen, Sehore, Dewas, Dhar and Jhabua on the right. The long narrow valley (350 km) is closed by the hills approaching from both sides near Handia. Along the course of the river are several important crossing ghats and ferries, which join the Uttar Bharat(North) with the Deccan and several *paurani/pouranic* and religious sites especially devoted to Lord Shiva, providing historical, religious and cultural links. The hill-temple of Mandhata located on a river-island is one such link. It is also the starting point of the central basin, wider than the first and about 150 m. long, the Mandleshwar plain. The ancient capital of the Haihaya king Shahastrarjuna, Mahismati is now identified with the town of Maheshwar located in this plain. The total length of the river is estimated 1,290 km.

The Narmada touches the northern boundary of Hoshangabad district at Khara village near its confluences with the Dudhi, a tributary on the left bank. The width of the river channel in this part is about one kilometre. About 8 km. north-west of Hoshangabad, the Tawa joins it on the left bank. The Hather, the Ganjal and the Machak also join the left bank one after the other draining the northern parts of the Satpura plateau first, and then southern side of the Narmada valley. As the Dudhi in the north-east and Machak in the south-west from the district boundary of Hoshangabad, the Hather and the Ganjal mark the western boundaries of Hoshangabad and Seoni-Malwa tahsils respectively.

The Dudhi

Dudhi(the milky) is the eastern most tributary of the Narmada in the Hoshangabad district. The entire boundary separating Narsimhapur is aligned by this river. It rises at Satalba on the north-eastern flank of the Mahadeo hills in Chhindwara. Some of its streams also wash the southern face of the scarp above Patalkot. It flows to the north among the hills but meanders in a north-westerly direction in the valley, joining the Narmada at Kharia after meandering of 106 km.

The Tawa

The Tawa is the largest tributary (about 185 km)to river Narmada of which about 70 km. lies in Hoshangabad district. The Tawa rises from the Chhinddhana hill and has a westerly course between

the two hill ranges in Chhindwara and Betul districts. The river takes to the north near Ghoradongri and is broadened considerably after receiving the Phopas, the Machna and the Sukh Tawa on the left bank and the Malini and the Denwa on the right bank. It is heard that its wide sandy bed is responsible for the name *Tawa* (wide baking pot). It also marks the central part of the boundary between Hoshangabad and Sohagpur tahsils and joins the Narmada.

The Denwa

Joining the Tawa near Bagra, the Denwa is an important stream. Among the complex of hills around Pachmari plateau a line of hills extends from Dhupgarh (1350 metres) to Burimal (1088 metres) located about 15 km. in the south. The Denwa rises at Denwa Khud south of the plateau and circuits it flowing to the south, east, north and the west. The circle is completed by the course of the Sonbhadra which joins the Denwa after flowing first to the west and then to the north. The Denwa carves a narrow valley extending east to west between the two northern ranges of the Mahadeo hills. The Denwa valley is separated from the Narmada valley.

Tanks

There are only few artificial tanks in the district as the ground is unsuitable for construction. Small tanks like Billakhori and Sontalai in Hoshangabad apart from the dams were constructed for irrigation across the rivers.

Springs

Springs appearing on the rock cuts and foothills are numerous in the Satpura hills. At and around Pachamrhi, one may mark perennial springs near the circuit house, Rorighat, Mahadeo caves, Kiwarkar *pahar* and Mankideo *Pahar*. There is a spring at the bottom of Guttideo hill near Kesla-Bori road.

Climate

The district has a dry climate except during the south-west monsoon. The winter is from December to February followed by the summer from March to about second week of June. Two observatories, each at Hoshangabad and Pachmarhi; raingauge stations at Hoshangabad, Seoni-Malwa, Sohagpur, Makrai and Pachmarhi are located. In general, the temperature begins to increase rapidly till May, which is generally the hottest month with the mean daily maximum temperature at 45^0 c. and the mean daily minimum at 20.3^0c. The heat in summer is intense in the plain and on individual days the day temperature may go up above 45^0c. At Pachmarhi, being a hill station the summer is pleasant although the day temperature in the summer season may sometimes go up above 40^0c with relative humidity (about 20-25%). The humidity decreases during the post-monsoon season. July is the rainest month. On an average there are 53 rainy days in the district. With the withdrawal of the monsoon during the end of September there is a slight increase in day temperatures in October but the nights become cooler. From about mid-November both day and night temperature decreases rapidly. December and January form the coldest part of the year.

Special Weather Phenomena

In the summer season occasionally dust storms and dust raising winds occur. Occasional depressions originating in Bay of Bengal in the southwest monsoon passing through the district or its neighbourhood cause widespread heavy rain and gusty winds also affect the weather in the district. Many thunderstorms occur in the summer season in comparison to the cold season. Rain during the monsoon is also often associated with thunder. Fogs occur occasionally during the cold season especially at the hill station.

Seismically towards earthquakes

Hoshangabad district forms a part of the Narmada-Son lineament with east north-east to west south-west trend which being replete with faults, fractures and igneous intrusives seismically active zone. It experienced fringe effects of earthquakes originating in the great Himalayan faultzone, Rann of Kutch and Narmada riftzone. Recent earthquake occurred in May, 1997 in the district.

Flora and Fauna

Forest play a vital role in the economy of the district in addition to maintain ecological balance, conservation of soil erosion and forest based industries. The district has mixed forests, Teaks, *Sal* and *Bija* are in abundance, followed by *Tendu, Dhaura, Shisham* and *Kakai*. *Mahua, Khair, Achar,* Mango*, tendu, jamun* and *Sitaphal (*custard apple) are the some of the fruit bearing trees. Divergence in the floral around Pachmarhi is of Botanical interest. The total forest

area of the district is 257,350 hectares, out of which, 173,232 hectares is unclassified forest area. Main wild animals are tiger, panther, deer, *Sambhar*, blackbuck, wolf, bison, monkey, bear, chital, chinkara and *Nilgai*.

A Wild life sanctuary known as Bori-Sanctuary was set-up in an area of 1,193 sq.km. comprising Bori, Sakhtawa, Bagra, Sohagpur, Piparia and Pachmarhi forest areas of Hoshangabad district.

Land Use

Famed for its fertility, the prevailing soil of the Narmada valley is black alluvial loam, commonly known as "black-cotton" is highly argillaceous and remarkable for its great porosity and consequent retentiveness of moisture. The total geographical area of the district is 670,700 hectares, out of which, forest area was 257,350 hectares i.e 38.37% of total area. The non-agricultural land was 19,124 hectares, uncultivable and baron land was 25,792 hectares, cultivable land was 23,316 hectares and waste land was 6,354 hectares. In the hilly tracts the soil is sandy and generally unsuited for the cultivation of spring crops.

Minerals

In the district mainly lime-stone, clay, *gitti, murum* and sand are found. During 1998-99, 9,605 metric tonnes stone in Seoni-Malwa, 20944 metric tonnes *gitti* in Itarsi, Babai and Hoshangabad tahsils, 610847 mt. tones of sand were extracted from Narmada and Tawa rivers.

Agriculture

Traversed by the sacred Narmada river and its tributaries, Hoshangabad district represents rich agricultural land and has been a predominantly rabi producing area. Locally rabi crops are known as *Unhari*. Rabi crops dominate the rural economy to such an extent that the the Kharif crops known as *Sihari* were despised in the past. Rabi cultivation is almost synonymous with agriculture. Among rabi crops wheat is the main crop followed by gram, *masoor*, pea and linseed. In the year 1999-2000 total sown area was 459,149 hectares, out of which, Rabi crops sown in 229,979 hectares. Among the Kharif crops, paddy, jowar, maize, *kodo kutki*, tur and soyabean are the major crops sown in 299,170 hectares. Double cropping area was 179,557 hectares as reported.

Irrigation

Alike a vast majority of the districts, Hoshangabad district is too dominated by agriculture. The total geographical area of the district is 6,70,700 hectares, out of which 2,29,724 hectares area were irrigated i.e. 34.25%. Main source of the irrigation was canals. Irrigation by canals was 1,38,207 hectares; by tanks 1,016 hectares; by tubewells 33,463 hectares; by wells 45,787 hectares and by other sources was 11,251 hectares.

Started in 1956, Tawa project located in the district is one of the biggest irrigation projects of the state which contributes to the prosperity resulting an increase in agriculture production.

Animal Husbandry

In the district the entire live-stock population consisted of 499,327 heads. Out of which 322,882 belongs to cows, 108,548 buffaloes and rest of the other animals were 67,897 as per Animal census conducted in the year 1997. To provide medical aid and assistance there were veterinary hospitals, dispensaries in the district, for protection from diseases like vinderpest, hemorrhagic, septicemia infections, anthrax and foot-mouth diseases.

Fishery

Narmada and Tawa are important rivers with a number of streams in which various fish species and crabs were found.

The villagers catch large number of fish with fish traps of numerous descriptions. Throughout the dried months of the year they catch fishes by poisoning them with barks, leaves and seeds of various trees.

Industries

Though Hoshangabad is predominantly an agriculture district, yet it promises adequate industrial growth-potential. Out of 265 industries, a majority revolves around the cottage or household industries, mostly run on proprietary basis. A few industries appeared on the industrial horizon of the district are Ice factory (Itarsi), Plywood factory, Security Paper Mill (Hoshangabad), Narmada wood products (Hoshangabad) Kabra Agro Industry Ltd, Soya Plant, Oil manufacturing plant, and The Propel Lout Factory run by the Defense Department of the Government of India and Diesel Shed.

The main trades in the district are handicraft, silk, leather, pulses, sand, tiles etc.

Transport

Hoshangabad is well connected by road and rail from Bhopal, the state capital, and it is about 70 kms. away from it. Itarsi town is a main railway junction of the central railway which joins all the four corners of the country e.g. Delhi, Mumbai, Kolkatta and Chennai. Bhopal, Indore, Khargoon, Khandwa, Burhanpur, Raipur, Nagpur, Betul, Multai and Pachmarhi are also connected with pucca-road. The length of the pucca road was 1,015 kms, whereas the length of kachcha-road was 1,738 kms.

Electricity and Power

Basic infrastructure is important for all round development. During the year 1998-99, total number of consumers were 125,216 as reported. In the district, categorywise electricity consumer consumption was 101,524(kwh) domestic, 12,476(kwh)non-domestic, 130,313(kwh) household industries, 4,812(kwh) water-works, 175,489 kwh, agriculture and irrigation and 1,898 kwh street lighting. Total consumption of the power was 462,512 kwh. Pachmarhi, Itarsi and Piparia are the power stations. Pathrota village near Itarsi is now having 220 kv sub-centre from where transmission lines from Amarkantak, Sarni and Gandhi Sagar power houses were covered.

Gram Panchayat

Panchayat is the basic institute and foundation of decentralized administration of the local self government. Under the Directive principles of the state policy of the constitution, Madhya Pradesh Government passed Madhya Pradesh Panchayat Adhiniyam 1962 in which three tier panchayat system was introduced. Under 73rd amendment of the constitution, Madhya Pradesh Government altered and passed the Madhya Pradesh Panchayat Raj Adhiniyam 1993, in which, a panchayat for village, Janpad panchayat for a block a district panchayat for a district was constituted. Under Madhya Pradesh Gram Sabha Adhiniyam – 2001, Gram Sabha is a constitutional unit directly elect Panch, Sarpanch, members of Janpad and members of district panchayat through adult franchise. These institutions work for five years. At all levels there are reservations for Scheduled Castes and Scheduled Tribes according to proporation of population.

Gram Panchayat from its fund undertakes in the disposal of waste products, water supply, public construction (roads, buildings, wells, ponds), marketing, cooperation in Government works, community health and development works. Janpad panchayat from its budget and within its powers will be responsible for implementing community development, rural, agricultural, social forestry, cattle rearing, fisheries, adult education, cooperatives, cottage industries, welfare and employment oriented programmes. It is the duty of the district panchayat to control, coordinate and guide Janpad panchayats and village panchayats as well as advise the state Government in their developmental work.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is

made of permanent material and the other is made of temporary material.

Temporary houses

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

   i) a city or town with one or more contiguous outgrowths;

   ii) two or more adjoining towns with their outgrowths; and

   iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar

14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri

21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil) Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia
    (i) Chhindwara, Mandla, Dindori and Seoni districts
    (ii) Baihar tahsil of Balaghat district
    (iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
    (iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
    (v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
    (vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
    (vii) Narsimhapur district.
    (viii) Harsud tahsil of Khandwa district.
41. Parja
42. Sahariya, Saharia, Seharia, Sehria, Sosia, Sor
43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any

economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business,

transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000

population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$\text{ENMR} = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$\text{LNMR} = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$\text{PNMR} = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$\text{SBR} = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group 15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in

the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or

for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/ employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country,

state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns

with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Hoshangabad district comprises of 929 inhabited villages, 47 uninhabited vilages and total 976 villages distributed among seven tahsils and seven number of CD blocks. The district has 10 towns. The average household size of the district is 5.4. Total population of the district is 1,084,265 comprising 571,774 males and 512,491 females. Thus the sex ratio of the district works out to 896 which is not better than the sex-ratio of the state (919). Density of the district is 162 persons per sq.km. and is lower than the density of the state which is 196. Literacy rate of the district 70 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 15.8 per cent and 15.1 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data(Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Seoni-Malwa	142,184	121,073	21,111	173,111	146,909	26,202	21.8	21.3	24.1	14.8	15.1
2	Itarsi	204,482	104,233	100,249	238,537	120,447	118,090	16.7	15.6	17.8	49.0	49.5
3	Hoshangabad	126,890	55,976	70,914	163,630	66,206	97,424	29.0	18.3	37.4	55.9	59.5
4	Babai	96,807	85,809	10,998	116,387	101,796	14,591	20.2	18.6	32.7	11.4	12.5
5	Sohagpur	106,613	87,999	18,614	129,734	107,395	22,339	21.7	22.0	20.0	17.5	17.2
6	Pipariya	126,235	79,192	47,043	156,324	100,576	55,748	23.8	27.0	18.5	37.3	35.7
7	Bankhedi	83,238	83,238	-	106,542	106,542	-	28.0	28.0	-	-	-
	District Total:	886,449	617,520	268,929	1,084,265	749,871	334,394	22.3	21.4	24.3	30.3	30.8

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 22.3 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 21.4 per cent, while for urban areas it is 24.3 per cent. Among the tahsils, Hoshangabad has registered the highest decadal growth rate of 29.0 per cent. The growth rate in rural area is highest in Bankhedi tahsil and it is highest in Hoshangabad for urban area of the district. The percentage of urban population to total population of the district is 30.8 per cent in 2001 against 30.3 percent in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Seoni-Malwa	193	146,909	77,063	69,846	22 (11.4)	1,268	1,118
2	Kesala	110	97,964	51,175	46,789	16 (14.5)	829	725
3	Hoshangabad	92	88,689	47,191	41,498	4 (4.3)	309	259

Table 2 gives CD blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD block level in the district. Out of the 929 inhabited villages, 111 (11.9 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 285villages having 30.7 per cent villages of the district while in the size class of 500-999 population there are 318 villages constituting 34.2 per cent of total villages. 156 villages (16.8 per cent) are in the size class of 1000-1999 and 50 villages (5.4 per cent) are in the size class of 2000-4999. There are 8 villages (0.9 per cent) in the size class of 5000-9999 and only one village (0.1 per cent) falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town-

(a) New

(i) Statutory town- Nil

(ii) Census town-

1. Mehragaon

(b) De-notified-

(i) Statutory towns of 1991 census de-notified and also did not satisfy the criteria to be treated as census towns - Nil

(ii) Statutory towns of 1991 census de-notified but identified as census towns based on demographic and economic criteria - Nil

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - Nil

(c) Declassified -

1. Pachmarhi (C.T.)
2. Ranipura (Tabangar)(C.T.)

(d) Wholly merged with other town(s)- Nil

* Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria. -

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	17	1.8	3,017	0.4
11-20	18	1.9	2,516	0.3
21-50	54	5.8	11,332	1.5
51-100	153	16.5	57,983	7.7
101-200	438	47.1	330,074	44.0
201-300	170	18.3	191,621	25.6
301-500	57	6.1	85,726	11.4
501 +	22	2.4	67,602	9.0
Not known	-	-	-	-
District Total:	929	100.0	749,871	100.0
Population Density (Rural) of the district:		159		

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 438 accounting for 47.1 per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 44.0 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 35 villages (3.7 per cent). 22 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 24.4 per cent of the total inhabited villages having 37.0 per cent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 5.8 and 16.5 per cent of inhabited villages. Both these ranges claim 9.2 per cent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	1,004	1,011	950
1911	967	973	903	984	992	892
1921	949	959	863	966	978	882
1931	947	957	862	961	977	862
1941	946	957	869	969	989	867
1951	945	953	902	956	971	898
1961	932	947	860	925	945	853
1971	920	934	864	902	918	854
1981	921	934	878	899	911	866
1991	912	921	887	892	896	883
2001	919	927	898	896	897	895

As per 2001 Census, sex ratio of 896 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly higher in 1911, 1921, 1931 and 1941 over the state average figures. The lowest sex ratio of 892 females per 1,000 males was recorded in the district in Census 1991.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Seoni-Malwa	906	906	905
2	Itarsi	908	905	910
3	Hoshangabad	883	884	882
4	Babai	895	894	905
5	Sohagpur	889	885	913
6	Pipariya	883	890	870
7	Bankhedi	905	905	-
	District Total:	896	897	895

Table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 897 whereas it is 895 for the urban area. The sex ratio in rural area is highest (906) in Seoni-Malwa tahsil whereas in urban area it is highest (913) in Sohagpur tahsil. The sex ratio of the district is 896 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Seoni-Malwa	906
2	Kesala	914
3	Hoshangabad	879
4	Babai	894
5	Sohagpur	885
6	Pipariya	890
7	Bankhedi	905
	District (Rural) Total:	897

The table 7 gives the CD blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 897 females per 1,000 males. Among the CD blocks the highest sex ratio of 914 is found in Kesala CD block and the lowest of 879 is recorded in Hoshangabad CD block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	15	1.6	1,428	0.2
700-749	11	1.2	2,827	0.4
750-799	42	4.5	17,294	2.3
800-849	139	15.0	97,728	13.0
850-899	260	28.0	276,506	36.9
900-949	258	27.8	247,510	33.0
950-999	110	11.8	73,562	9.8
1000-1099	77	8.3	30,440	4.1
1100+	17	1.8	2,576	0.3
District Total:	929	100.0	749,871	100.0
Sex ratio (Rural) for District: 897				

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 260 accounting for 28.0 per cent of the total villages having largest population of 36.9 per cent in the district fall in the sex ratio range of 850-899. It is followed by 258 villages constituting 27.8 per cent of total villages and 33.0 per cent population falling in the range of 900-949.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Babai	(NP)	905
2	Hoshangabad	(M)	882
	Itarsi	UA	914
3	(a) Itarsi	(M+OG)	917
	(i) Itarsi	(M)	917
4	(b) Bhilakhedi	(CT)	896
5	(c) Meharagoan	(CT)	892
6	Ordnance Factory Itarsi	(CT)	872
7	Pachmarhi Cantt.	(CB)	772
	Pipariya	UA	897
8	Pipariya	(M+OG)	897
	(i) Pipariya	(M)	899
9	Seoni-Malwa	(M)	905
10	Sohagpur	(NP)	913
	Sex ratio (Urban) for the district:		895

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 895 females per 1,000 males as a whole. Among the 10 towns of the district the sex ratio varies between 772 to 917. Itarsi (M) has the highest sex ratio 917 while Pachmarhi Cantt. (CB) has the lowest sex ratio of 772 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	-	-	-	-
	District Total:	Total	175,882	91,294	84,588	927
		Rural	132,508	68,584	63,924	932
		Urban	43,374	22,710	20,664	910

This table presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 927 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 932 and 910 respectively. The rural sex ratio in tahsil varies between 917 in Sohagpur tahsil to 947 in Itarsi tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Seoni-Malwa	26,062	13,464	12,598	936
2	Kesala	16,957	8,658	8,299	959

District (Rural) Total	929	100.0	132,508	100.0
Sex ratio (Rural) for District:			932	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e.185 (19.9 per cent) having largest population (23.1 per cent) in the district (rural) fall in the sex ratio range of 1000-1099. It is followed by the sex ratio range of 1100 and above which claims 178 villages (19.2 per cent) and 12.0 per cent population. Next to it 100 villages (10.8 per cent) and 16.0 per cent population are in the range of 900-949. Minimum number of villages i.e. 44 (4.7 per cent) and 4.0 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

		Rural	106,542	21,016	18,906	19.7	17.7
		Urban	-	-	-	-	-
	District Total:	Total	1,084,265	170,780	164,049	15.8	15.1
		Rural	749,871	118,893	147,481	15.9	19.7
		Urban	334,394	51,887	16,568	15.5	5.0

This table depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1084265 total population of the district 15.8 per cent belong to the Scheduled Castes and 15.1 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 15.9 per cent in rural population and 15.5 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Bankhedi tahsil (19.7) while the lowest is found in Babai tahsil (12.9). The proportion of Scheduled Tribes population is 19.7 and 5 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Itarsi tahsil (20.3 per cent) and the lowest Scheduled Tribes population is recorded in Hoshangabad tahsil (5.8 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Seoni-Malwa	146,909	20,945	33,178	14.3	22.6
2	Kesala	97,964	13,180	40,950	13.5	41.8
3	Hoshangabad	88,689	13,663	5,827	15.4	6.6
4	Babai	101,796	13,269	11,017	13.0	10.8
5	Sohagpur	107,395	18,918	17,931	17.6	16.7
6	Pipariya	100,576	17,902	19,672	17.8	19.6
7	Bankhedi	106,542	21,016	18,906	19.7	17.7
	District (Rural) Total:	749,871	118,893	147,481	15.9	19.7

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 15.9 per cent of rural population of the district belongs to Scheduled Castes and 19.7 per cent to Scheduled Tribes. Scheduled Castes population is highest (19.7 per cent) in Bankhedi CD Block whereas it is lowest(13.0 per cent) in Babai CD Block. Scheduled Tribes population is highest (41.8 per cent) in Kesala CD Block and it is lowest (6.6 per cent) in Hoshangabad CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	151	16.3	0	0.0
Less than 5	114	12.3	1,527	1.3
5-10	175	18.8	11,680	9.8
11-20	272	29.3	53,523	45.0
21-30	119	12.8	25,444	21.4
31-40	58	6.2	15,990	13.4
41-50	23	2.5	5,493	4.6
51-75	10	1.1	3,927	3.3
76 and above	7	0.8	1,309	1.1
District Total	929	100.0	118,893	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 151 villages accounting for 16.3 per cent of total 929 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 114 villages (12.3 per cent). In 175 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 272 villages. The range of 21-30 and 31-40 per cent contains 119 and 58 villages respectively. There are 23 villages in the range of 41-50 and 10 villages in the range of 51-75. Only 7 villages are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	121	13.0	0	0.0
Less than 5	167	18.0	3,537	2.4
5-10	121	13.0	12,297	8.3
11-20	129	13.9	17,953	12.2
21-30	80	8.6	16,392	11.1
31-40	30	3.2	6,848	4.6
41-50	35	3.8	11,409	7.7
51-75	73	7.9	26,250	17.8
76 and above	173	18.6	52,795	35.8
District Total	929	100.0	147,481	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 121 villages accounting for 13.0 per cent of total 929 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 167 villages (18.0 per cent). In 121 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 129 villages. The range of 21-30 and 31- 40 per cent contains 80 and 30 villages respectively. There are 35 villages in the range of 41-50 and 73 villages in the range of 51-75. There are 173 villages where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

10	Sohagpur (NP)	22,339	3,381	688	15.1	3.1
	District(Urban) Total	334,394	51,887	16,568	15.5	5.0

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/ Towns of the district. Out of the 10 towns the highest proportion (19.9 per cent) of Scheduled Castes is found in Ordnance Factory , Itarsi (CT) and lowest proportion (8.6 per cent) in Seoni-Malwa (M). For Scheduled Tribes the highest proportion (16.1 per cent) is found in Ordnance Factory , Itarsi (CT) and lowest (2.4 per cent) in Meharagoan (CT).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Seoni-Malwa	879	944
2	Kesala	909	939
3	Hoshangabad	896	890
4	Babai	891	936
5	Sohagpur	880	937
6	Pipariya	891	929
7	Bankhedi	902	957
	District (Rural) Total	892	938

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD block of the district. The Scheduled Castes sex ratio is 892 for district (rural). Among the CD blocks, the highest sex ratio of 909 is found in Kesala CD block and lowest of 879 is recorded in Seoni-Malwa CD block.

Sex ratio of Scheduled Tribes population in Hoshangabad district rural is 938. Among the CD blocks, the highest sex ratio of 957 is found in Bankhedi CD block and lowest of 890 is recorded in Hoshangabad CD block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Babai (NP)	914	848
2	Hoshangabad (M)	881	853
3	Itarsi UA	913	909
	(a) Itarsi (M+OG)	929	903
	(i) Itarsi (M)	930	905

	(c) Meharagoan (CT)	854	889
4	Ordnance Factory Itarsi (CT)	882	933
5	Pachmarhi Cantt.(CB)	966	1,105
6	Pipariya UA	926	763
	Pipariya (M+OG)	926	763
	(i) Pipariya (M)	938	765
7	Seoni-Malwa (M)	882	811
8	Sohagpur (NP)	918	911
Sex ratio (Urban) for the district:		906	881

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/Towns for Census 2001. For the district (urban) sex ratio higher (906) among Scheduled Castes compared to Scheduled Tribes (881).

Among the 10 towns of the district, sex ratio varies from 763 to 1105 for Scheduled Tribes and for Scheduled castes it varies from 854 to 966 . In the remaining towns sex ratio for Scheduled Castes is below one thousand, the lowest being 854 in Meharagoan (CT). On the other hand Scheduled Tribes, lowest sex ratio is 765 . Pachmarhi Cantt. (CB) registers highest sex-ratio between the Scheduled Castes and Scheduled Tribes i.e 966 to 1105.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Tahsilwise literacy rates shows the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 70.0 per cent in the district. This proportion in rural area is 63.0 per cent and 84.8 per cent in urban areas. In the district the literacy rate of males 80.8 per cent is much higher than that of females which is 57.8 per cent.

Among the tahsils, Hoshangabad tahsil tops with 78.6 per cent literates and the lowest literacy rate 59.6 per cent is recorded for Bankhedi tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		389,046	247,085	141,961	360,825	148,205	212,620	63	75.6	48.8	26.8

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD block level in the district. 63.0 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.6 and 48.8 per cent respectively. At CD block level Hoshangabad CD block has the highest rural literacy rate of 71.7 per cent while the lowest literacy rate of 56.4 per cent is recorded for Soghpur CD block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	3	0.3	198	0.0
1-10	12	1.3	2,213	0.3
11-20	22	2.4	7,185	1.0
21-30	47	5.1	14,724	2.0

51-60	181	19.5	145,853	19.5
61-70	232	25.0	215,888	28.8
71-80	193	20.8	219,922	29.3
81-90	44	4.7	30,420	4.1
91-99	4	0.4	3,141	0.4
100	2	0.2	2	0.0
District Total:	929	100.0	749,871	100.0
Literacy rate for District:			70	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 3 villages (0.3 per cent) of the district and population of this village is only 198. There are 2 villages constituting 0.2 per cent of total villages having 100 per cent literacy. Highest number of villages i.e. 232 villages fall in the literacy range of 61-70 per cent. This accounts for 25.0 per cent of total villages and 28.8 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 92.3 per cent is recorded in Ordnance Factory, Itrasi (CT) whereas the lowest literacy rate 77.3 is recorded in Babai (NP). Sex wise highest percentage of male literacy rate is observed in Ordnance Factory, Itrasi(CT) and it is lowest in Babai (NP). Gap in male female literacy rate is maximum in Meharagoan (CT). The total literacy rate of the district (urban) comes to 84.8 per cent. It is 91.9 for males and 76.9 for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

Table 25 presents the CD blockwise number and percentage of Scheduled Castes, literate and illiterates by sex. It is seen that literacy rate of Scheduled Caste population of the district is 59.5 per cent. It is highest 68.9 per cent in Kesala CD block and lowest 52.2 per cent in Sohagpur CD block. The gap in male/female literacy rate is highest (31.0 per cent) in Babai CD block. The overall male literacy rate of the district (rural) works out to 72.7 per cent and it is 44.5 per cent for females.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 28.3 percent of the total population of the district (Urban) and the proportion of non-workers is 71.7 percent. Among the total workers male workers constitute 46.1 percent whereas female workers are only 8.4 percent.

Among males, 42.5% are main workers and 3.6% are marginal workers whereas among females, corresponding figures are 6.5% and 1.9% respectively.

				(20.5)	(21.9)	(56.3)	(3.1)	(18.6)

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that Agricultural Labourers constitute 34.7 per cent of the total workers, 28.7 per cent of total workers are engaged as cultivators, 2.5 per cent as Household industry workers and 34.0 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 16.1 per cent in Itarsi tahsil and 37.6 per cent in Seoni-Malwa tahsil. The percentage of females cultivators is 21.9 per cent which is low as compared to 31.3 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The highest proportion of 57.9 per cent of other workers is recorded in Hoshangabd tahsil while the lowest proportion of 12.5 per cent is found in Bankhedi tahsil.

				(25.9)	(24.8)	(63.5)	(2.2)	(9.6)

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 39.0 per cent of total population. Among these workers cultivators constitute 36.9 per cent, agricultural labourers 45.1 per cent, household industry 2.2 per cent and other workers constitute 15.7 per cent. The proportion of cultivators is highest 41.2 per cent in Seoni-Malwa CD block and is lowest 25.1 per cent in Kesla CD block. Proportion of agricultural labour is highest 48.4 per cent in Bankhedi CD block and lowest 39.1 per cent in Pipariya CD block. It is also seen that the proportion of female workers is more than male workers under the category of agricultural labourers.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/Towns of the district. It is seen that out of the 28.3 per cent of total workers, cultivators constitute 3.4 per cent, agricultural labourers 2.3 per cent, household industry 3.6 per cent and the highest proportion is covered by other workers which is 90.7 per cent. It is also found that proportion of male workers under cultivation and other workers are more than the female workers proportion whereas proportion of female workers under agricultural labourer is seen higher but lower in Household industry than the proportion of males. Townwise analysis shows that the proportion of cultivators is highest 10.7 per cent in Babai (NP), agricultural labourer is highest 15.0 per cent in Babai (NP), household industry workers is highest 9.8 per cent in Soghapur (NP) and other workers is highest 99.4 per cent in Ordnance factory, Itrasi (CT).

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 929 inhabited villages in the district 797 villages i.e 85.8 per cent have been provided with the education facilities of one type or the other. Similarly 375 villages in the district constituting 40.4 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 906 i.e 97.5 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 168 villages constituting 18.1 per cent of villages have been provided with post office facility within the villages. 537 i.e 57.8 per cent villages have been provided with the telephone facility, 179 i.e 19.3 per cent with transport facility, 35 i.e 3.8 per cent villages with bank facility and 84 i.e 9.0 per cent with agricultural credit societies. Similarly there are 291 or 31.3 per cent villages which are linked with the pucca road. Total 883 i.e 95.0 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Hoshangabad CD block has the highest 95.7 per cent villages where educational facility is available and lowest 75.3 per cent is found in Piparia CD block. Medical facility is highest in Soghapur (57.4 per cent) and lowest (26.0 per cent) in Piparia CD block. Telephone facility is highest in Sohagpur CD block (69.1 per cent) and it is lowest in Piparia(49.3 per cent). In the field of power supply around 46 villages have not been covered in the district.

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population

served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 38 : NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of CD block	Total population of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 749,871 persons in the district, 725,956 i.e 96.8 per cent have educational facility of one or the other type. Similarly 438,361 i.e 58.5 per cent population has medical facilities while 744,574 i.e 99.3 per cent have improved drinking water facility. Post office facilities are available to 311,082 i.e 41.5 per cent population. Telephone facility is available to 560,951 i.e 74.8 per cent. Transport communications facility is available to 275,947 i.e 36.8 per cent. Bank facility is available to 116,074 i.e 15.5 per cent. 164,472 or 21.9 per cent have been provided with the facility of agricultural credit societies. 373,931 i.e 49.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 738,573 i.e 98.5 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	111	19	3	133
(b) Middle School	470	206	66	742
(c) Degree College	60	165	702	927
2. Medical:-

6. Banks				
(a) Commercial Bank	143	296	464	903
(b) Cooperative Bank	238	348	327	913
7. Agricultural Credit Societies	274	268	303	845

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 133 villages do not have primary school and out of these villages, children of 111 villages have to travel less than 5 kms. for schooling Out of 929 inhabited villages as many as 742 are deprived of middle school and 927 of degree college. Of these 470 avail the facility of middle school at a distance of less than 5 kms., 206 at a distance 5-10 kms. and the remaining 66 at a distance of 10+ kms. In respect of degree college 60 avail this facility at a distance of less than 5 kms., 165 between 5 to 10 kms. and rest 702 villages at a distance of 10+ kms.

Similarly there are 924 villages in the district which have been devoid of Hospital facility and 909 villages which are deprived of PHC facilities. Of these 94 villages have the facility of Hospital available within 5 kms. while in respect of 224 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 606 villages have this facility at a distance of 10+ kms. As regards PHC 96 avail this facility at a distance of less than 5 kms., 239 at a distance of 5-10 kms. and the remaining 574 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 761 villages do not have this facility in the village itself. Of these majority i.e. 433 have this facility at a distance of less than 5 kms., another 216 villages avail it at a distance of 5-10 kms. In the remaining 112 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 392 villages in the district which are without telephone facilitiy. Of these 137 avail this facility at a distance of less than 5 kms., 96 at a distance of 5-10 kms. and remaining 159 have to traverse a distance of 10+ kms.

For Bus service out of 760 villages which do not have facility, 336 villages avail this facility at a distance of less than 5 kms., 270 at a distance between 5-10 kms. and 154 at a distance of 10+ kms.

In the entire district 903 villages are deprived of Commercial Bank and 913 of Co-operative Bank. Of these 903 villages which are deprived of Commercial Banks 143 villages avail this facility at a distance of less than 5 kms., 296 between 5-10 kms. and the remaining 464 at a distance of 10+ kms. Regarding

Co-operative Banks out of 913 villages 238 villages avail this facility at a distance of less than 5 kms., 348 at a distance of 5-10 kms. and remaining 327 at a distance of 10+ kms. 845 villages do not have agricultural credit societies. This facility to 274 villages is available at a distance of less than 5 kms., 268 at a distance of 5-10 kms. and the remaining 303 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	(85.8)	(40.4)	(18.1)	(57.8)	(19.3)	(3.8)	(9.0)	(31.3)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 929 inhabited villages in the district, there are 52 villages which have nearest towns upto a distance of 5 kms. Of these only 43 villages forming 82.7 per cent of total villages, are having the educational facilities atleast one type and 28 villages constituting 53.8 per cent, have the medical facilities within the Range of 5 km., 9 villages forming 17.3 per cent have the facility of post office within the range of 5 km and 40 i.e 76.9 per cent have the facility of telephone under the distance of 5 km. 12 villages constituting 23.1 per cent have been linked by transport service. 3 villages comprising 5.8 per cent have been provided bank facilities, while 5 villages constituting only 9.6 per cent have been provided by agricultural credit societies. 27 villages comprising 51.9 per cent have been provided with pucca road within the distance of 5 km.

There are 399 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 352 villages constituting 88.2 per cent have been provided with the educational facilities183 villages comprising 45.9 per cent have been provided with medical facilities. 80 villages constituting 20.1 per cent enjoy the post office facility. 257 villages comprising 64.4 per cent have been provided the telephone facility. 96 villages constituting 24.1 per cent have been linked with transport communications. 20 villages comprising 5.0 per cent have bank facility. 44 villages constituting 11.0 per cent are having agricultural credit societies, while 158 villages i.e 39.6 per cent are approachable by pucca road. 462 villages fall in the distance range of 16-50 kms. Of these, 85.3 per cent villages have educational facility, 34.6 per cent with medical, 16.9 per cent with post office, 51.3 per cent with telephone and transport and communications available to 15.4 per cent villages. Banks and agricultural credit societies facilities are available to 2.6 and 7.6 per cent of villages.

There are 11 villages which is beyond the range of more than 51 kms. in the district. About 72.7 per cent villages have educational facility, Medical facility is available to 27.3 per cent inhabitants and only 18.2 per cent villages have the connectivity through telephone.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Hoshangabad district out of a total 929 inhabited villages, overwhelming 396 have a population of less than 500 persons. Of these, 264 villages (66.7 per cent) have education facility, 100 (25.3 per cent) have medical facility, 377 (95.2 per cent) have improved drinking water facility. 9 villages (2.3 per cent) have post office facility. 153 (38.6 per cent) have telephone facility. 29 (7.3 per cent) have been linked by bus service. 2 (0.5 per cent) have Bank facility. 7 villages (1.8 per cent) have been provided with the agricultural credit societies, 75 villages (18.9 per cent) have been linked with pucca road. 355 villages (89.6 per cent) have been provided with electricity.

Out of 318 villages, which fall in the population range of 500-999 persons, 318 villages (100 per cent) have been provided with the education facility, 128 (40.3 per cent) with medical facility, 315 (99.1 per cent) villages have improved drinking water facility. 37 villages (11.6 per cent) have been provided with post office facilities, 207 villages (65.1 per cent) with telephone facility, 49 villages (15.4 per cent) with transport facilities, 2 villages (0.6 per cent) with bank facility, 21 villages (6.6 per cent) with agricultural credit societies and 88 villages (27.7 per cent) have

approach by pucca road. Only 5 villages in this range do not have electricity.

156 villages fall in population range of 1,000-1,999 persons. Of these 105 villages (100 per cent) have been provided with the education facility, 96 (61.5 per cent) with medical facility, 155 (99.4 per cent) villages have improved drinking water facility. 72 villages (46.2 per cent) have been provided with post office facilities, 121 villages (77.6 per cent) with telephone facility, 59 villages (37.8 per cent) with transport facilities, 8 villages (5.1 per cent) with bank facility, 30 villages (19.2 per cent) with agricultural credit societies and 80 villages (51.3 per cent) have approach by pucca road. All villages in this range have electricity.

There are 50 villages in the district which are covered under 2,000-4,999 population range. Of these, 50 villages (100 per cent) have been provided with the education facility, 42 (84.0per cent) with medical facility, 50 (100 per cent) villages have improved drinking water facility. 42 villages (84.0 per cent) have been provided with post office facilities, 47 villages (94.0 per cent) with telephone facility, 35 villages (70.0 per cent) with transport facilities, 15 villages (30.0 per cent) with bank facility, 20 villages (40.0 per cent) with agricultural credit societies and 39 villages (78.0 per cent) have approach by pucca road. All villages in this range have electricity.

There are 8 villages in the district which are covered under 5,000-9,999 population range and all the villages are provided with all types of amenities except with slight variations with few amenities like Post office, Transport facility ,banks and agricultural credit societies. There is only one village in the population range of more than 10,000 and it has all the amenities available.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Seoni-Malwa	193	103,400	70.5	77.0
2	Kesala	110	60,997	40.7	57.0
3	Hoshangabad	92	48,992	86.4	85.0
4	Babai	104	57,658	74.9	74.2
5	Sohagpur	162	63,336	65.6	68.9
6	Piparia	146	75,556	49.5	74.1
7	Bankhedi	122	60,603	62.8	68.5
	District Total:	929	470,542	63.8	73.5

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as un-irrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 929 inhabited villages in the district having a total area of 470,542 hectares. Of this, 63.8 per cent is cultivable and 73.5 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

It is seen that percentage of cultivable area to total area is highest 86.4 per cent in Hoshangabad CD block. It is lowest 40.7 per cent in Kesla CD block. The percentage of irrigated area to cultivable area is highest 85 per cent in Hoshangabad and lowest 57 in Kesla CD block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Babai (NP)	272	78	194	300	84	30	143	0	44
2	II Hoshangabad (M)	263	131	131	260	152	8	81	2	16
3	II Itarsi (M)	269	142	128	350	49	96	19	7	180

5	III Pipariya (M)	366	154	211	340	57	105	61	0	117
6	III Seoni-Malwa (M)	540	68	472	654	46	310	181	14	103
7	III Sohagpur (NP)	329	185	144	331	51	120	46	2	111
	District Total	333	140	194	364	105	85	68	8	100

Note: The difference in various totals is due to rounding off the related figures.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Hoshangabad works out to Rs.333 of which Rs.140 are derived through local taxes and the remaining Rs.194 is received from all other sources. The average of total expenditure incurred per capita is Rs.364. Out of this Rs.105 are spent on general administration, Rs.85 on public health and conveniences, Rs.68 on public works, Rs.8 on public institutions and Rs.100 is spent other items.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Babai (NP)	4.1	2.1	1.4	1.4	0.7
2	Hoshangabad (M)	6.2	4.4	2.6	1.5	0.4
3	Itarsi (M)	7.7	2.3	1.7	0.8	0.3
4	Pachmarhi Cantt. (CB)	6.2	4.4	2.6	1.8	0.9
5	Pipariya (M)	7.7	3.2	2.3	1.6	0.7
6	Seoni-Malwa (M)	8.4	4.6	3.4	1.9	0.4
7	Sohagpur (NP)	4.9	2.2	2.2	2.2	0.4
	District Total	6.8	3.3	2.3	1.4	0.4

In urban areas of Hoshangabad district the average number of primary school per 10,000 population comes 6.8 schools, 3.3 junior secondary/ middle, 2.3 secondary/matriculation, 1.4 senior secondary schools and the ratio of colleges is only 0.4 college per 10,000 population. Among the towns, the ratio of primary is highest in Seoni-Malwa (M) while lowest is Babai (N.P.).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Babai(NP)	6
2	Bhilakhedi (CT)	36
3	Hoshangabad(M)	31
4	Itarsi(M)	18

6	Ordinance Factory Itarsi(CT)	24
7	Pachmarhi Cantt.(CB)	16
8	Pipariya(M)	9
9	Seoni-Malwa(M)	11
10	Sohagpur(NP)	7
	Distrct Total	20

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Hoshangabd district. On an average there are 20 beds per 10,000 population in urban areas of the district. Whereas it is the highest 36 in Bhilakhedi (CT) while, Meharagaon (CT) does not have even a single bed.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Babai	14,591	1,670	11.4
2	Hoshangabad	97,424	9,800	10.1
3	Itarsi	92,362	30,604	33.1
4	Pipariya	44,378	10,700	24.1
5	Seoni-Malwa	26,202	10,717	40.9
6	Sohagpur	22,339	8,200	36.7
	District Total	297,296	71,691	24.1

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 297,296 urban population 71,691 persons constitute slum population which is 24.1 per cent of total urban population. Sohapgur town has the highest 36.7 per cent of slum population whereas, Hoshangabad town has lowest (10.1 per cent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Babai (NP)	Rice	Seasonal Fruits
		Bricks	Rice

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 198,176 consisting of 137,024 rural and 61,152 urban households. 35,108 households belong to Scheduled Castes 30,288 to Scheduled Tribes. 163,768 households are living in their own houses constituting 82.64 per cent of total households. Of these households, the largest number of households 77,758 have occupied single roomed accommodation and is followed by double roomed accommodation numbering to 45663 households. Next position is claimed by households 18,730 occupying three rooms accommodation. Number of households in owned accommodation occupying more than three rooms rank at fourth place with 16256 households while 5361 households are without any exclusive room.

25,125 households living in rented accommodation accounts for 12.68 per cent of total number of households in the district. The largest number of 5853 households are living in single roomed accommodation followed by 11843 households in double roomed accommodation. Next position is claimed by households (5329) occupying three room accomodation. Households with three plus are 1828 and no exclusive room are 272 in numbers.

Other households numbering to 9283 forming only 4.68 per cent of total households are distributed in single roomed accommodation numbering 4334, 2900 double room and 1090 in triple room accommodation.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11

6	Pipariya	58.1	38.7	3.2	42.9	53.8	3.3	85.4	11.7	3.0
7	Bankhedi	35.6	62.5	1.9	35.6	62.5	1.9	0.0	0.0	0.0
	District Total:	57.6	38.8	3.6	47.1	48.9	4.0	81.2	16.1	2.6

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 49 reveals that 57.6 per cent of household of the district are living in houses made of pucca materials, residences of 38.8 per cent households are semi permanent houses and 3.6 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 81.2 per cent are living in houses constructed of pucca materials, 16.1 per cent in semi-permanent structure and percentage of households in temporary houses is 2.6 constructed of kutcha materials. At rural level, the lowest percentage of 35.6 households occupying permanent structure is found in Bankhedi while highest percentage of 56.1 is seen in Hoshangabad tahsil. The proportion of semi-permanent houses is high in Bankhedi (62.5) and low in Hoshangabad (39.5) tahsil. The proportion of temporary houses is quite low in all tahsils and it varies from Bankhedi (1.9 per cent) to Seoni-Malwa (6.3 per cet)being the highest.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 50 indicates that 65.9 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well, 81.5 per cent households have provision of electricity in their houses. The bathroom facility is available to only 32.4 per cent households within their premises . As regards rural areas, 15.2 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 70.9 per cent. 75.6 per cent rural households have facility of electricity against 94.5 per cent in urban areas. Toilet and drainage facilities in the district are available to 37.1 per cent and 32.7 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil level almost confirms to the district pattern analyzed.

Percentage in brackets
Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that wood is used as the most predominant fuel used for cooking by 66.3 per cent households in the district. In the tahsils, this proportion varies between 87.1 per cent in Seoni-Malwa and 59.0 per cent in Pipariya tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller amount of population due to availability of L.P.G. The next most common cooking fuel is gas which is used by 18.7 per cent households in the district. This proportion in urban and rural areas is 52.8 and 3.5 per cent respectively. In rural areas use of gas for cooking is very low as compared to urban areas at tahsil level. There are 2.3 per cent households using crop residue in the district. Use of crop residue for cooking by rural households comes to 2.8 per cent while in urban areas its proportion is only 1.1 per cent. There are 4.2 per cent households using kerosene in the district. Use of kerosene for cooking by urban households comes to 12.1 per cent while in rural areas its proportion is only 0.6 per cent, as a whole. The percentage of households using other types of fuel such as crop residue, cow dung cakes, electricity, coal, biogas etc. is prevalent. In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

		Rural	19,452	4,969	2,624	3,737	575	7,349	1,575	161	9,964
		Urban	-	-	-	-	-	-	-	-	-
	District Total:	Total	198,176	66,974	34,718	80,303	13,050	88,010	30,289	3,260	77,100
		Rural	137,024	35,495	18,185	36,499	4,063	50,697	12,031	1,532	66,707
		Urban	61,152	31,479	16,533	43,804	8,987	37,313	18,258	1,728	10,393

This table presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 198,176 households in the district and among them, 66,974 households have been availing banking services. 34,718 households have Radio / Transistor. Television is possessed by 80,303 households. Telephone is available in 13,050 households. Bicycle is the most common means of transportation and is available in 88,010 households. Scooter, Motor cycle, Moped and Car, Jeep, Van are used by 30,289 and 3260 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

A new district, namely, Harda was carved out from erstwhile Hoshangabad district vide M.P. Govt. notification No. 1240/F-20-8-1992-vii-Sha-8 dt. 2-7-1998. As a result, area of Hoshangabad district was reduced from 10,037 sq.kms to 6,707 sq.kms.. Similarly total numbers of villages were reduced to 976 from 1,543 in the district.

(ii) In the last decade (1991-2001), Ordinance Factory at Mehargaon near Itarsi and Bhilakedi was declared as census towns in 2001 census.

(iii) A flood occured due to heaviest rainfall in the month of September-. 1999 in Narmada river, causing much devastation and about 6000 peoples of Hoshangabad were shifted for rehabilitation. Government of Madhya Pradesh sanctioned Rs. 86.36 crore rupees in cash for undertaking relief work.

(iv)Being on Seismic zone. Hoshangabad district was hit by earthquake of 6.3 Richter scale on 22nd May, 1997. Huge property was turned into debris and cracks developed on buildings.

(xii) Brief description of places of religious, historical or archaeological importance in villages and places or tourist interest in the town of the district.

1 Pachmarhi

Pachmarhi is Madhya Pradesh's most verdant jewel, a place where nature has found exquisite expression in a myriad enchanting ways. Each dawn at this lovely hill resort girdled by the Satpura ranges, ushers in a day of tranquil beauty. The green shades that embrace the mountains flow quietly into ravines and the gentle is heard everywhere the murmur of flowing water. Bridle paths lead to tranquil forest glades; groves of wild bamboo, jamun, dense *sal* forests, the fruit bearing *mahua, aonla* and *Gulmohar* trees all lend their distinctive colour tones.

The valley, ravines and maze of gorges, sculpted in red sandstone by wind and weather aeons ago add their own colouring to this palette of shades and cascading waterfalls flash silver in the sunshine. Deep azure pools are hidden delights which beckon swimmers and paddlers everywhere, wildlife watchers will be rewarded by fascinating glimpses of the animal and bird kingdom, for the tourists there are the natural habitat of woodland birds and wild species like the langur, *sambar*, *gaur* or Indian bison, barking deer, bear, wolf and leopard. Eagles soar in majestic flight over cliffs, coming to rest only when sunset paints the sky in a burst of deep pink and orange colours that are reflected in the steep mountain scarps.

Complementing the magnificence of nature are the works of man, for Pachmarhi is also an archaeological treasure house. Cave shelters in the Mahadeo hills contain an astonishing richness in rock paintings. The bulk of these have been placed in the 500-800 AD period but the earliest paintings are estimated to be 10,000 years old.

(i) Priyadarshini Point: This vantage viewing point marks the place from where Pachmarhi was discovered. In 1857, Captain Forsyth, a Bengal Lancer, approached the plateau as the head of a column of troops. At this point (originally named after him) he first glimpsed the extraordinary beauty of this saucer-shaped scenic spot. Acting on Forsyth's information, the British developed Pachmarhi as a sanitorium and hill resort and even today, their legacy remains, embodied in Pachmarhi's church and colonial architecture.

(ii) Handi Khoh: Pachmarhi's most impressive ravine has a 300 feet height precipice with steep sides. A solitary place with water flowing far below with an incessant murmuring sound, Handi Khoh's over hanging crags shelter gigantic, undisturbed bee hives.

(iii) Apsara Vihar: A lovely little bathing pool and easily accessible from Jai Stambh, this fairy pool is an ideal picnic spot for families with small children, since the pool is shallow, deepening only towards the base of the fall which cascades gently into its waters.

(iv) Rajat Pratap: Those seeking adventure in Pachmarhi will find it in this ten minute walk over rocks and boulders from Apsara Vihar to the top of Rajat Pratap, the "big fall". A thrilling experience is looking straight down to the bottom of the fall which plunges down a 350 feet height precipice.

(v) Raj Giri: Also known as Club hill, this is a short, easy climb from Pachmarhi club to a 300 feet height spot from where one get a panoramic view of Pachmarhi.

(vi) Lanjee Girl: This hill can be scaled from both east and west. For the rock climbing enthusiast, there are some easy scaling to be done near the summit. Near the western summit, there is an underground passage leading down the northern face.

(vii) Irene Pool: Discovered and named after Irene Bose, wife of Justice Vivian Bose. The route upstream leads to a cave, through which the stream goes underground and then over a *Khund* in a series of falls.

(viii) Jalawataran(Duches Fall): 3 km long the path from Belle view, branching off from the milestone for Bharat Neer, is a route to the beautiful Duches Fall. The descent is steep and the trek a strenuous one for almost all of the 4 km walks to the base of the first cascade of the fall. This waterfall, which tumbles down in three distinct cascades is the most picturesque of all Pachmarhi's falls.

(ix) Sunder Kund: Crossing the stream below Duchess Fall and following a footpath for about 2.5 km in the south-west direction, brings one to a huge rocky pool in the Jambu Dwip stream. This is an excellent place for swimming.

(x) Jata Shankar: A sacred cave under a mass of loose boulders, in which, the Jambu Dwip stream has its source. It is believed that Lord Mahadeo reached the place by a tunnel from Tilak Sindur to save himself from the demon king Bhasmasur. A rocky formation of this place resembles the matted locks of Lord Shiva, hence the name.

(xi) Chota Mahadeo : Renowned as a sacred spot, this is a narrow point in the valley with rocks overhanging a stream and a small spring from where water cascades down. Regarded as holy for countless generations, Mahadeo hill has a shrine with an idol of Lord Shiva and an impressive Shivlinga. On the east side of the hill there is an excellent cave shelter with paintings.

(xii) Chauragarh: 4 km from Mahadeo, it is one of the Satpura's prominent landmarks and the sacred summit crowned with emblems of Mahadeo worship.

(xiii) Dhupgarh: The highest point in the Satpura range, it commands a magnificent view of the surrounding ranges.

(xiv) Pandav Caves: It is believed that the Pandav brothers spent a part of their exile here from which Pachmarhi takes its name

(xv) The Cave Shelters: Some of the best cave shelters and groups of shelters around Pachmarhi are:

(**a**) **Dhuandhar** : **A**pproached from the footpath too Apsara Vihara, the painting are mostly in white and include a group of archers with the typical **Gond** bun and ear-rings.

(**b**) **Bharat Neer(**Dorothy deep) is accessible via a steep descent from the footpath around Astachal hill. It has well executed animal paintings and when excavated in the 1930s, yielded many pottery shards and microliths.

(c) Astachal: On this hill there are four shelters with paintings, comparatively early linear drawings.

(**d**) Along the northern side of Jambu Dwip valley there are some six shelters with a large number of paintings, animals and many human figures including a detailed battle scene.

(e) The Harper's Cave, named because of one of its paintings- a man seated and playing a harp, is close to the Jata Shankar shrine.

(f) The Chieftain's Cave derives its name from a battle scene showing two chieftains on horses.

(**g**) Another painting depicts women and a child sitting in a hut. A terrace that runs the length of the south, south-east and east faces of **Kites Crag** has become five camel paintings, the majority of which are in white or outlined in red. Several animals and birds are depicted here.

(2) Bori's Sanctuary : Set up in the area of about 1200 sq.km., Bori Santuary is a small forest village in the extreme south of the Sohagpur tehsil, about 20 km. west of Pachmarhi in Hoshangabad district. The Bori range extends from the bottom of the Pachmarhi hills to the Tawa and Denwa rivers which produce some of the finest teak wood and bamboos in the state. Other common trees in the Bori forest are *Saj*. *Dhaora* and *Tinsa*. The Bori river which rises on the west face of Dhupgarh is the principal tributary of the Sanbhadra. The Bori Sanctuary will be accessible by rail and road from Bhopal.

(3).Hoshangabad

Thousands of pilgrims visit this place for sacred bath in river Narmada on the occasion of *Makrasankranti, Mahasivaratri* and all *Amavasyas*. The Sethani ghat is the most popular ghat for sacred bath. A *mela* is organized in the winter season. The *Narmada Jayanti* is celebrated in the winter season in which one month long *mela* and thousands of pilgrims take part nearby the *samadhi* of Ramji Baba every year

(4).Anhoni

Lying at a distance of about 17.6 km. to the south-east of its taluk headquarters Sohagpur, Anhoni is situated at the edge of the outer range of Mahadeo hills. There is a hot spring containing Sulphur and believed to cure boils etc.

(5).Bhilat-Deo

8 kms away from Seoni-Malwa road, Bhilat-Deo has a shrine of Bhilat-Deo where persons possessed with devils could be relieved and snake bite would be cured as believed.

(6).Hatwas

Lying in between the Sandia and Sohagpur railway stations, Hatwa village has a shrine dedicated to Ramji Baba.

(7).Khatoura

Khatoura lies about 14.5 km. South-east of the Kiratpur railway station. There is a small hill called Tilak-Sindur, from where white sand-stone is quarried. There is a rock-cut cave temple situated at a height of about 1230 feet on the bank of the Khari-nala.

Important fairs

Shivratri is celebrated for three days at Babai and Pachmari in February/March. Pachmari is also famous for a three days Nagpanchmi fair (July-August).

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Eminent freedom fighters associated with the district are Shri Mahesh Dutt Mishra, Pt. Shambhu Dayal Mishra, Sheo Kumar Pagare, Arun Singh, Hari Prasad Chaturvedi, Gukul Parsad Tiwari, Omkar Prasad Mishra, Sayyad Ahmed, Babulal Dixit, Radhakishan Agrawal, Smt. Saras Pagare, Balkirshna Sharma, Gouri Shanker Dubey, Girija Shanker Shukla, Hairmohan Tiwari, Abdul Rauf, Ranjit Singh, Kamta Prasad, Narayan Singh, Dhannalal, Sajjad Ali, Razar Ali, Bhagwant Singh Yadav, Rana Shiv Dayal Singh, Ashwani Kumar Mishra, Swami Dayal, Ganga Charan Dwivedi, Ballabhdas Agarwal, Ballabh Kumar Malviya, etc.

Hoshangabad is also known as the place of poetry and literature. Shri Suresh Upadhayaya, Manik Verma, B.S. Thakur and Shrimati Umashri Shrivastava are renowned nationalist poets; Shri Makhanlal Chaturvedi and noteable Sarcastic Hari Shanker Parsai are such great locally well known personalities. In the field of education, Shri R.N. Sharma, Shri B.K. Kapadiya, Shri K.P. Soni, Smt. S. Grover are the eminent persons honoured by President of India for their meritorious services rendered by them during the decade.

Hoshangbad always patronised sports and sportmen. Shri Uma Shaker Vyas participated in All India swimming competetion and won 14 gold, 25 silver and 4 bronze medals. Similarly Jaikumar Verma and M.P. Jain also won the 14 and 12 medals respectively. Some other renowned athletes are Sushil Kumar Meena, Niraj Pandit, Harjeet Singh, Kumari Anju Shukla, Shashi Pandey, Sweta Saxena, Vikrant Tomer, Marshal Jo-Jo and Avinash etc. Eminent politicians associated with the district are Hazari lal Raghuwanisi, Madhukar Harde, Sartaj Singh, Rameshwar Nikhara, Sunder Lal Patwa (Ex- Chief Minister of the state) and Kripa Shankar Sharma worked as chief secretary of the state.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25

columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name

of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with

population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/ type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
	----------Nil----------		

(c) CD blockwise presentation of Village Directory Data

6	Semri Harchand	04439900	Sohagpur	8,096	Available	N.A.	N.A.	Available	Available	Available	Available
7	Shobhapur	04446700	Sohagpur	6,545	Available	N.A.	Available	Available	Available	Available	Available
8	Hatwas	04459500	Piparia	8,411	N.A.	N.A.	Available	Available	N.A.	Available	Available
9	Bankhedi	04478100	Bankhedi	11,602	Available	N.A.	N.A.	Available	Available	Available	Available

Appendix II deals with the villages having 5,000 & above population which do not have one or more amenities in the district. In all 9 villages of Hoshangabad district have population above 5,000 of which 1 village is in Seoni Malwa CD Block, 2 in Kesala , 1 in Hoshangabad, 1 in Babai and 2 in Sohagpur, 1 in Piparia and 1 in Bankhedi CD Block. Senior secondary school is available in most of these villages except in Raipur and Hatwas. College facility is not available in any of these villages. Primary health sub centres are available in most of the villages except in Raipur, Semri Harchand and Bankhedi. Tap drinking water facility is available in all the villages. Commercial bank facility is available in most of these villages and is not available only in 2 villages,Raipur and Sanga kheda. Bus service is available in most of these villages except in Raipur and Hatwas. However approach by pucca road is available in all these villages.

APPENDIX II - A VILLAGE DIRECTORY
CENSUS TOWNS WHICH DO NOT HAVE ONE OR MORE AMENITIES

Name of the District: Hoshangabad

Serial number	Name of census town	Location code number	Name of C. D. block	Population	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12
1	Ordinance Factory Itarsi	43706000		10,259	Available	N.A.	N.A.	Available	N.A.	Available	Available
2	Meharagaon	43707000		4,301	N.A.	N.A.	Available	N.A.	N.A.	Available	N.A.
3	Bhilakhedi	43708000		11,168	Available	N.A.	N.A.	N.A.	N.A.	Available	Available

Appendix II A shows the details of availability or non-availability of certain amenities in the Census towns of the district. It is seen that there are 3 Census towns namely Ordinance Factory Itarsi(43706000), Meharagaon(43707000)and Bhilakhedi(43708000) in the district. College and Bus facility is not available in any of these towns whereas senior secondary school and banks is not available in Meharagaon.Tap facility is only available in Ordinance Factory Itarsi and Health centre is only available in Meharagaon. However approach by Pucca Road is available in all the 3 census towns.

APPENDIX III - VILLAGE DIRECTORY
LAND UTILISATION DATA IN RESPECT OF CENSUS TOWNS / NON-MUNICIPAL TOWNS

Serial number	Name of Census town and CD block within brackets	Land use (i.e., area under different types of land use in hectare)					
		Total area	Forest	Irrigated by source	Unirrigated	Culturable waste (including gauchar & groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
1	Bhilaikhedi	280		Not	Available	-	-
2	Meharagaon	750	-	-	-	-	-
3	Ordinance Factory Itarsi	1011	-	-	-	-	-

Appendix III is meant to show the land utilizations data of Census Towns are listed as revenue villages with the District/Revenue administration. The district has 3 Census towns Bhilaikhedi, Meharagaon and Ordinance factory, Itarsi, with total area of 280, 750 and 1,011 hextares respectively.

APPENDIX IV - VILLAGE DIRECTORY
CD BLOCK WISE LIST OF INHABITED VILLAGES WHERE NO AMENITY OTHER THAN DRINKING WATER FACILITY IS AVAILABLE

Name of the District : Hoshangabad

Serial number	Location code number	Name of village
1	2	3
	Name of CD Block: Seoni-Malwa	
1	04384000	Malka Khedi
2	04386700	Petla Khedi
3	04401700	Gidkheda
4	04402100	Banspani
5	04402400	Bent
	Name of CD Block: Kesala	
6	04418200	Chichadhana
	Name of CD Block: Hoshangabad	
		Nil
	Name of CD Block: Babai	
7	04436100	Dobh
	Name of CD Block: Sohagpur	
8	04443800	Nandner
9	04443900	Chitor Pattan
10	04451900	Mallupura
11	04452900	Madai
	Name of CD Block: Piparia	
12	04465400	Kham Khedi
13	04466100	Kanji Ghat
14	04466500	Sankari
15	04466600	Churni
16	04467600	Nimgoan
	Name of CD Block: Bankhedi	
17	04475900	Bargondi

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there are 17 villages which fall under this category. 5 villages in Seoni Malwa CD Block, 1 in Kesala, 1 in Babai, 4 in Sohagpur, 5 in Piparia and one in Bankhedi CD Block. No village of Hoshangabad CD Block falls under this category.

APPENDIX V - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Seoni-Malwa	203	10	193	30
2	Kesala	133	23	110	20
3	Hoshangabad	94	2	92	3
4	Babai	106	2	104	12
5	Sohagpur	167	5	162	35
6	Piparia	148	2	146	39
7	Bankhedi	125	3	122	12
	District Total:	976	47	929	151

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 976 villages in the district, 47 villages are uninhabited and remaining 929 villages are inhabited. Out of 929 inhabited villages 151 villages have no Scheduled Castes Population and 778

inhabited villages have Scheduled Castes population in the district. Piparia has highest 39 villages with no Scheduled Castes population while in other CD Blocks there are 35 such villages in Sohagpur, 30 in Seoni Malwa, 20 in Kesala, 12 each in Babai and Bankhedi and 3 in Hoshangabad CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Seoni-Malwa	203	10	193	13
2	Kesala	133	23	110	1
3	Hoshangabad	94	2	92	15
4	Babai	106	2	104	33
5	Sohagpur	167	5	162	27
6	Piparia	148	2	146	19
7	Bankhedi	125	3	122	13
	District Total:	976	47	929	121

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 929 inhabited villages, 121 villages have no Scheduled Tribes population and the remaining 808 inhabited villages are such which are having some Scheduled Tribes population. Babai has highest 33 villages with no Scheduled tribe population while in other CD Blocks, there are 27 such villages in Sohagpur, 19 in Piparia, 15 in Hoshangabad, 13 each in Seoni Malwa and Bankhedi and 1 in Kesala CD Block which do not have Scheduled Tribe population.

APPENDIX VII A
LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED CASTES TO THE TOTAL POPULATION BY RANGES

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District : Hoshangabad**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Hoshangabad	1991	138	155	171	179	138	144	167	174	139	167	178	183
	1981	163	190	198	229	170	189	189	215	156	191	208	244

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for ages 1, 2, 3 and 4-5 is shown as q(1), q(2), q(3) and q(5) respectively. The child mortality for the district is more than the state average in case of q(1), q(2), q(3) and q(5)

The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also.

On comparison it is seen that the district mortality rate for all ages is lower than state rates. However some inconsistencies are observed in male-female classification. Male child mortality for q(5) of the district 174 is more than the state average 142.

The table also reflects that the female child mortality is more than the male child mortality showing a positive response towards female birth in this district.

ANNEXURE IV (i)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State : Madhya Pradesh **District: Hoshangabad**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	325,738	88,798	236,940
	(91.1)	(27.3)	(72.7)
(A)Within the district but outside Enumeration place	206,022	51,550	154,472
	(57.6)	(25.0)	(75.0)
(B)Birth place in other district of State	119,716	37,248	82,468
	(33.5)	(31.1)	(68.9)
(ii) Place of Birth in other states of India than the state of Enumeration	30,001	13,619	16,382
	(8.4)	(45.4)	(54.6)
(iii) Birth place in Foreign	1,686	906	780
	(0.5)	(53.7)	(46.3)
(iv) Unclassified	6	3	3
	(0.0)	(50.0)	(50.0)
Total Immigrants	357,431	103,326	254,105
Persons born in the place of enumeration	726,834	468,448	258,386
Total population	1,084,265	571,774	512,491

Source :- Migration Table D-1
Note : Percentages are given in brackets.

This table presents the number of inmigrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 91.1 per cent of total migration. The migration from within the district but outside the enumeration place is 57.6 per cent whereas migration from other districts of the state is 33.5 per cent. Migration from other states is 8.4 per cent and the migration from outside India is 0.5 per cent of the total migration. Migration of 6 persons i.e.0.0 per cent which could not be classified in first three classifications has been shown as unclassified in the table. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Hoshangabad**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	333,913	91,982	241,931
	(92.0)	(27.5)	(72.5)
(A)Within the district but outside Enumeration place	215,963	54,823	161,140
	(59.5)	(25.4)	(74.6)
(B)From other district of State	117,950	37,159	80,791
	(32.5)	(31.5)	(68.5)
(ii) From other states of India outside enumeration state	27,965	12,591	15,374
	(7.7)	(45.0)	(55.0)
(iii) Place of residence outside India	1,170	642	528
	(0.3)	(54.9)	(45.1)
(iv) Unclassified	6	4	2
	(0.0)	(66.7)	(33.3)
Total Immigrants	363,054	105,219	257,835
Population of Non-inmigrants	721,211	466,555	254,656
Total population	1,084,265	571,774	512,491

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 92.0 per cent of total migrated population. Within this classification, the migration from within the district is 59.5 per cent and only 32.5 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 7.7 per cent of total migration and it is only 0.3 per cent from outside India. Migration of 6 persons constituting almost negligible per cent of total migration which could not be placed in the first three classification has been shown as unclassified in the table.Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES-AS PER CENSUS 2001

State : Madhya Pradesh **District : Hoshangabad**

Birth Place	Census 2001	
	Migrant Popultion	Percentage of total In-migrants
Maharashtra	9,989	33.3
Uttar Pradesh	8,618	28.7
Chhattisgarh	3,068	10.2
Bihar	1,681	5.6
Rajasthan	1,140	3.8
West Bengal	927	3.1
Total of 6 States	25,423	84.7
Total of other States	4,578	15.3
Total	30,001	100.0

Source - Migration Table D-1

Inmigration from other states is classified in this table. 84.7 per cent of total inmigrants are from Maharashtra, Uttar Pradesh, Chhatisgargh, Bihar, Rajasthan and West Bengal whereas the remaining inmigrants from all other states together constitute only 15.3 percent.

Total 9,989 persons have migrated from Maharashtra which alone accounts for 33.3 per cent of total inmigrants. Hoshangabad is located at the neighbouring state border of Maharashtra as such the migration from Maharashtra is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District -Hoshangabad**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10
Madhya Pradesh 1991	48,566,242	44,595,604	2,983,127	447,111	123,961	168,016	110,506	45,087	92,830
		(91.8)	(6.1)	(0.9)	(0.3)	(0.3)	(0.2)	(0.1)	(0.2)
Madhya Pradesh 2001	60,348,023	55,004,675	3,841,449	545,446	170,381	209,322	150,772	409,285	16,693
		(91.1)	(6.4)	(0.9)	(0.3)	(0.3)	(0.2)	(0.7)	(0.0)
Hoshangabad 1991	886,449	838,400	35,505	3,078	3,790	1,399	2,083	48	2146
		(94.6)	(4.0)	(0.3)	(0.4)	(0.2)	(0.2)	(0.0)	(0.2)
Hoshangabad 2001	1,084,265	1,025,978	45,155	3,919	4,319	1,613	3,001	75	205
		(94.6)	(4.2)	(0.4)	(0.4)	(0.1)	(0.3)	(0.0)	(0.0)

(Source :- Religion Table - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu population in the district is comparatively higher than that of state. In contrast to this, the proportion of Muslim and Jain population is lower in the district as compared to state average. The proportionate distribution of population belonging to other religions except Christian religion, in the district is lower than the corresponding state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State : Madhya Pradesh **District: Hoshangabad**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Hoshangabad							
	Total	1,084,265	562,711	469,781	47,739	4,034	0
			(51.9)	(43.3)	(4.4)	(0.4)	(0.0)
	Rural	749,871	385,708	327,608	33,499	3,056	0
			(51.4)	(43.7)	(4.5)	(0.4)	(0.0)
	Urban	334,394	177,003	142,173	14,240	978	0
			(52.9)	(42.5)	(4.3)	(0.3)	(0.0)

(Source:- Social Cultural Table, Table G-1)

The above table reflects that the population (51.9%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is higher than that of the state. Contrary to this the percentage of married population of the district is marginally less than the state. The state average is marginally lower than that of the district in respect of widowed and divorced population. The proportion of unmarried persons is higher in urban areas than those in rural areas but married persons are lower in the urban areas as compared to the rural areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Hoshangabad**

Age Group	Total Population			Total Literates			Literates (Without educational level) and below primary			Primary

(Source- Migration Table C-8)

Note:Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 908,383 persons belonging to the age 7 and above 635,839 are literates and thus, the literacy rate of the district works out to 70.0 per cent. Similarly the male and female literacy works out to 80.8% and 57.8 percent respectively.

175,312 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 79.6 per cent of population in this age group. In the age group 15-34; 64,742 persons (17.8 per cent) are found educated up to middle, 75,287 person (20.7 per cent) upto the level of Matriculate/ Higher Secondary/ Intermediate/ Diploma Tech. and 27,397 persons (7.5 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII
DETAILS OF VARIOUS MOTHER TONGUES PREVALENT IN THE DISTRICT : CENSUS 2001
