DISTRICT CENSUS HANDBOOK
PART - A & B

RATLAM DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

HUSSAIN TEKRI SHARIF-JAORA

Jaora town of tahsil Jaora in Ratlam district was the capital of Jaora state during the period of Nawabs. Jama Mosque, Dharamshala and Gumbaj Hussain Tekri etc. are the important historical monuments built during the period of Gafoor Khan and Gaus Mohammed. Hussain Tekri is 4 km. away from the city and is a holy place of Muslim Community. It is beleived that the soul of Hazrat Hussain visits this holy place from time to time during a fair lasting for seven days. It is such a secular place that people of all communities from far off places visit at this particular time. Polio and mental patients are said to have been cured during their stay for few days at this holy place.

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract 357-359

(b) District Primary Census Abstract (General) 360-365

(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population 366-379

Primary Census Abstract for Scheduled Castes 380-385

Primary Census Abstract for Scheduled Tribes 386-391

CD Block wise Village Primary Census Abstract 392-517

Urban Primary Census Abstract 518-541

Annexure-I : Number of villages under each Gram Panchayat 542-580

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 581

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 582-584

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence,2001 Census 585-587

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 588

Annexure-VI : Marital status of population as per 2001 Census 589

Annexure-VII : Age, Sex and Education in the district, 2001 Census 590-591

Annexure-VIII : Distribution of different mother tongues returned in 1991 Census 591

Annexure-IX : Statement of Five Main SC and ST in the District, 1991 census 592

Annexure-X : Hamletwise total population of villages, Census 2001 593-651

Annexure-XI : Statement of Disability in the District, Census 2001 652

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the “total” given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the “total” area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 26th place in the state according to population.

2. The district occupies 37th rank in the state in terms of area having 4,861 sq.km. which is 1.6 percent of the total area of the state.

3. Literacy rate of Ratlam district is 67.2 percent and it occupies 15th position within the state. The female literacy rate of the district is 54.3 percent .

4. Density wise the rank of the district is 9th in the state.

5. Ranking of the district according to the sex-ratio is 8th in the state.

6. Female work participation of the district is 36.2 percent of total female population. Rank of the district according to female work participation is 20th .

7. Population wise largest village is Dhamnod of Ratlam tahsil L.C.No.02509900 with 6,975 population and smallest village is Nahargarh of Bajna tahsil L.C.No.02496100 with population of only 6 persons.

8. Population wise largest town is Ratlam (M) having 222,202 population and smallest is Piploda(NP) with 7,303 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Hussian Tekri Sharif, Jaora.

Note :-—Three villages are fully covered as out growths (OGs) and therefore not included under the item, “Number of villages”.

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Ratlam was the chief Rajput state in Malwa Political Charge of the Central India Agency. Ratan Singh, a grandson of Udai Sing the first Raja of Jodhpur, founded the state about 1650 A.D. The Rajas of erstwhile Ratlam state were Rathore Rajputs of the Jodpur house, whose ancestor was Raja Udai Singh (A.D 1585-95). His great grand son founded the house of Ratlam and obviously gave his name to the state. The emperor Shah Jahan desiring to place a feudatory Rajput state on the eastern side of Malwa conferred special distinction on Ratan Singh in order to mark his high position. Maharaja Ratan Singh made Ratlam his capital and began his rule, but in the early part of 1658 A.D. he was asked by the emperor Shah Jahan to join Maharaja of Jodhpur in opposing an invading force led by Aurangjeb and Murad, two of the emperor's son. Maharaja Ratan Singh was killed in the battle, which took place near Ujjain. After his death, his eldest son Ram Singh succeeded Ratan Singh who ruled for nearly 24 years. He was killed in a battle in the Deccan and was succeeded by Shiv Singh who died without issue hence he was succeeded by his minor younger brother Keshodas who was dethroned by his uncle Chhatarsal. After Chhatarsal the throne was succeeded by his son Kesri Singh (1709-1716) and after him, his eldest son Man Singh (1716-43) succeeded. Mansingh died in 1743 and was succeeded by his son Prithvi singh, in whose time, the state began to be over-run by the Maratha. After the death of Prithvi Singh in 1773 Padam Singh succeeded but he could not resist the Maratha's and at last made an agreement with Sindhias to pay an annual tribute. He died in 1800 A.D. and was succeeded by Parbat Singh, in whose time, the savages of the Marathas increased. Jaswant Rao Holkar twice pillaged the town of Ratlam. The Raja of Dhar over-run the district from end to end to complete the toll of disaster. There was great fighting with Marathas. Further bloodshed however was averted with the interference of Sir Johan Makolm who mediated an agreement with Sindhia and guaranteed the payment of the tribute due on behalf of British Government. This agreement was entered into Jan. 5th, 1819. Nobody succeeded Parbat Singh, so accepted, his favourite Rani Jhaliji, who had great influence over him and infact ruled in his name. After her, Balwant Singh succeeded the thorne in 1825; during his childhood the state was managed by Colonel Barth, the Political Agent at Mahidpur. Bhairon succeeded (1857-64) and died in 1864 leaving behind a bankrupt state. Ranjit Singh (1864-93) an infant son of Bhairon Singh was placed upon throne. So, Khan Bahadur Mir Mohammad Shahmat Ali, native assistant to the Governor Generals Agent for Central India was appointed Superintendent of Ratlam. Raja Ranjit Singh died of pneumonia at Ratlam on 20th Jan. 1893 and was succeeded by his only 13 years old son Sajjan Singh. The administration was carried out by the Diwan Khan Bahadur Cursetji, Rustamji, C.I.E. under the supervision of the Political Agent Major General Highness, Maharaja Sajjan Singh during his happy reign of over 50 years was honoured from time to time by this imperial majesty to the king Emperor for having good work. He died in 1947. With the reconstitution

of Commissioners division in 1972, Ratlam district was included in Ujjain division prior to that it was in Indore Commissioner's division.

(iii) Administrative Set-up

Ratlam district lies along the western part of the Malwa plateau in Madhya Pradesh. The district forms part of the of Indore division. According to Census 2001, the total numbers of villages are 1072 out of which 1053 villages are inhabited and 19 uninhabited. Tahsilwise number of villages are Piploda (91), Jaora (148), Alot (197), Sailana (242), Bajna (221) and Ratlam (173). In the district there are 6 tahsils whereas C.D. Blocks are 6 namely Piploda, Jaora, Alot, Sailana, Bajna and Ratlam. There are 9 towns in the district. As per urban classification Ratlam is (M.Corp.), Jaora (M), Piploda, Badawada, Alot, Tal, Sailana, Namli are (NP) and Ratlam railway colony (Ratlam Kasba) is C.T. In all the C.D. blocks headquarters, there are six Janpad Panchayat. Under the revenue administration there are 239 *patwari halkas*. There is one district jail and two sub-jails are at Jaora and Sailana.

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the lay functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

He is the Chief Executive Officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various departments, control over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, Election and relief measures during natural calamities like floods, famine, epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main functions, viz; (i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) development.

Deputy collectors, tahsildars, *naib* tahsildars, revenue inspectors and *patwaris* assist the Collector. The Collector is also associated with a number of other committees in the district, the most important being is the District Advisory Committee. The Collector is also vested with statutory powers under excise act to enable to implement the excise and prohibition policy of the Government. Superintendent of police is the head of police department at the district headquarters. In order to facilitate proper and smooth judicially and administration there are 21 police station and 14 police out posts in the district.

The judiciary is independent. At the district level, there is district court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges posted at tahsil level.

(iv) Physical Features

Ratlam district is situated in north-west region of Madhya Pradesh from 23°05' North to 23°54' north latitude and 74°31' east to 75°42' east longitude. It is bounded by Mandsaur district in north, Jhabua and Dhar districts on the south, Shajapur district and Jhalawar district of Rajasthan state on the north. Ujjain on the east, Chhitorgarh and Banswara districts of Rajasthan state on the west.

Total area of Ratlam district is 4,861 sq.kms. which is 1.58 % of total area of Madhya Pradesh. The district ranks 37th in terms of area among the district. The altitude of Ratlam is 1,577 feet above mean sea level. The entire district lies on the Malwa plateau, along its western margins. The composition of surface rocks being that of the traps. The general scene is of an undulating country, sloping towards the north and marked by series of high grounds and valleys of north flowing streams, alternating from east to west. Among the subsidiary water divides between the streams, there are isolated hills or low hill ranges running for short distances. These hills attain prominence in the south-east of the district and near the western margins of the plateau. In the west they are dissected and slope in to the narrow valleys of seasonal streams of the Mahi.

In Ratlam district, there are two important rivers, namely, the Chambal flowing to north along with its tributaries and the Mahi flowing to the north-west. The diversions due to these facts, in the general nature of

the topography are distinct into the following five regions :-

1. The Malwa Plateau in the east
2. The Plateau of Sailana
3. The Western Hills of Sailana
4. The Chambal Valley, and
5. The Mahi Valley.

The eastern part of the district is typically a part of the Malwa plateau, which extends further east. It covers nearly the whole of Ratlam, Jaora and Alot tahsils. It is an undulating plain with knolls and narrow valleys gradually falling in the north. Its average elevation is about 500 metres.

The highest part of the plateau is marked along the south eastern boundary. There lies the hill range which extends from south to north and attains a height of 611.3 metres near Berchha and 588.2 metres near Lochitara. The range also separates the water of the Chamla and Bageri (northern) in the east (Ujjain) and the Kurel and the Rattagarhi in the west. The Rattagarhi flows south-west and tributes the Mahi through the southern Bageri. The Malwa plateau is intersected by the Chambal and its tributaries.

The western part of the Malwa plateau is a series of higher ground running south to north. It is known as the plateau of Sailana and marks the eastern boundary of Sailana tahsil, common with Ratlam. It passes further north-west into Partabgarh tahsil of Chittorgarh district of Rajasthan state. The Sailana plateau extends in the north eastern part of Sailana tahsil and the adjoining parts of Ratlam and Jaora tahsils apart from southern Partabgarh. The towns of Sailana and Nawabganj are situated on this plateau. The tahsil town is said to have acquired its name from the plateau. The altitude of the plateau is about 530 metres with the highest point 598.56 metres near Rampura. A hill dissected from the plateau and standing near the village Nal (southern) is the highest point of the district, rising 612.6 metres above mean sea level.

The western part of Sailana tahsil is hilly and dissected. It is a series of ridges, residual from the western extensions of Sailana *Pathar*, and deeply eroded narrow valleys of the tributaries of the Mahi. The Mahi itself forces its way through these hills from south-east to north-west dividing the area into two halves. In both these parts most of the ridges and the intervening subsidiary valleys run from south-east to north-west. However, the two exceptions are the Telni Nala, which flows to the north and the Jamar Nala, which flows to west both joining the Mahi. The highest point is 639.7 meters near Sakraoda.

The Chambal valley has developed on the Malwa plateau and is marked by the finer ingredients of black cotton soil in the low-lying areas. It extends along the Chambal and its tributaries, namely, Kshipra, Kalisindh and Maleni. The valleys have deeper soils retentive of moisture for a longer period. This has been closely occupied for cultivation and settlement replacing the flora. In this district the banks of the Chambal are dissected throughout, as also of its feeders tributaries especially the banks of the western tributaries, Pingla, Maleni and Kurel and their feeders have cut up banks, which in time may initiate ravine formation. Even Kshipra in its course along the north eastern boundary has broken banks.

The Mahi valley has varying degrees of slopes, frequently interrupted by hillocks and low ridges. The valley extends at acute angles into a series of subsidiary valleys and depressions in close proximity to the water parting ridges. The slopes from ridges to valleys are generally at high degrees. The valleys are deeper and narrower than that of the Chambal. The soil coverage is derived form the same genesis, primarily the Trap, but there is admixture of pebbles and gravels, more so long the outer margins and below the hill slopes.

Drainage

Malvi, Chambal and Kshipra rivers drain the district. All these rivers drain into Bay of Bengal through the Chambal except Mahi, which drains into the Arabian sea. Mahi river passes through the district at a point where boundaries of Jhabua, Dhar and Ratlam districts are about each other. The river enters through the south western boundaries of Ratlam tahsil and passes through Sailana tahsil, crossing Ratlam-Nagda broad gauge railway, Chambal the main river of the district enters the north-east of the district from Ujjain side, making natural boundary between the Alot and Jaora tahsils. At Beg and Bharka village it makes a part of the boundary between Alot tahsil and Mandsaur district. It leaves the district when Kshipra a tributary of Chambal joins it and enters in Alot

tahsil from north eastern side and passes through the boundary of the tahsil till it meets Chambal. Another tributary Maleni also joins Chambal on the boundary of Alot tahsil.

The Chambal It is the most important river of Malwa. It has been mentioned as the Charmawati or Charmanwati in the ancient literature. The Chambal rises from the Janapao hill (854 metres) an offshoot of the Vindhyachal in Indore district. It coordinates of its source are 22°27' N; 75°37' E. Initially the river has a north westernly inclination in Ujjain.

The river flows through the north eastern part of Ratlam district. It enters the district near Limankheri (13 km. north of Nagda) and forms the tahsil boundary between Alot and Jaora. From Bisatkhera near Alot, the river flows in a semi-circle turning west, north, and east until Asaota village is reached. Here it flows along the inter-district boundary with Mandsaur and changes its direction to the north-east, finally leaving near Kalukheri. The river has a stony bed and an island near Airwas, another small island lies below Barkhera Kalan. The Maleni and a small stream Pingla join the Chambal on the left at a point below Uni and form a *triveni* (confluence of three rivers). Kshipra joins the Chambal on the right bank where it leaves the district. The Chambal further flows in Mandsaur, and Jhalwar and Kota district of Rajasthan. Here it jointed by the Chhoti kali sindh on the right and Sau or Siwana on the left banks. It is dammed near the northern boundary of the state creating the Gandhi Sagar reservoir in Mandsaur.

Shipra or Kshipra is also known as the Avantinadi after the King Avant who once ruled over the Avanti or western Malwa territory. The sacred village of Kshipra near Dewas, the holy town Ujjain and Mahidpur town are situated on its banks. The river is said to have sprung from blood of Vishnu. The river throughout its length is marked by sacred spots, the reputed haunts of *rishis* (sages), or the scene of some miraculous incidents around which a whole epic of tale and legend has grow up. Even in Abul Fazl's days it was supposed to flow with milk at occasions, indicating good omens.

Kshipra rises from Kokri Bardi hill (747 metres) about 11 km. south-east of Indore. The river flows to the north-west upto the vicinity of Mahidpur and from Bhojakheri near Alot to its junction with the Chambal. Ksipra forms the eastern boundary of Alot tahsil for about 15 km. and cuts across it in a stretch of 15 km. Finally it forms the north eastern boundary of the district with Jhalawar district of Rajasthan for about 19 km. The total course of the river is estimated to be 195 km.

The Mahi is a consequent river, which has its source in Dhar district. The Mophis of Ptolemy and Mais of the Periplus drains an area of over 40 sq.km. In legends the Mahi is the daughter of the Earth and of the sweat that ran from the body of Raja Indradyumna of Ujjaiyani. It is supposed to have risen from the Mau or Mahu tank at village Mendha (22°35'N; 75°30' E). The place lies on the foot of the Vindhyachal about 5 km. west of Amjhera. It flows to the north in its early course. Then it turns to the west and forms the southern boundary of Ratlam district common with Jhabua.

Climate

Ratlam district has a moderate climate, it receives monsoon from the Arabian sea, which starts sometimes in the middle of June and lasts upto the end of September, July and August are the months of heaviest downpour. The average rainfall of the district is 90 cm. Climate of the district during October is somewhat hot and humid, but comparatively cooler. Actually this is transitional period between rainy and winter season. Summer starts from the festival of Holi i.e. in March, but maximum temperature can be observed in the month of May and June. January is the coldest month of the year. The highest maximum temperature recorded was 45.2°C on April 27, 1958.

Winds

Winds are generally light with some increase in force during latter part of the summer and early monsoon months. During south-west monsoon season the winds flow mainly south-west or west. In cold season the winds blow mostly from directions between north-east and south-east.

Forest

As mentioned elsewhere, the natural flora of the district has been removed widely for cultivation and settlement purposes. In Ratlam district the Government forests are limited to scattered areas on hills and hill-slopes in the south and south-west which too they lie in close proximity to the settlements in the valleys. The

forests are divided into Ratlam, Sailana, Shivgarh and Bajna ranges . Those lying to the south of Sailana-Bajna road and south-west of the river Mahi, downstream, are under Ratlam range of Indore forest divisions, while the forest blocks to the north of the road are under Sailana range. The general quality of forest is low and the density sparse. The forests are capable mostly of producing firewood, grasses and minor products. The output of timber is very small and departmental felling is totally banned. Only 25.57 percent of the total area of the district is covered under the forests belongs to the Forest department. Out of the total forest area of 1248.847 sq.km. only 64.342 sq.km is classed as reserved forests, and the remaining 1185.505 sq.km. as protected forests. At present only 365.935 sq.km. of protected forests in the district is covered under the ten-year working for Rampura, Ratlam, Sailana and Neemuch ranges. Ratlam was the first state to inaugurate a separate Forest department as early as 1873 but that was abolished in 1888 and forests were handed over to revenue department, which carried on the watch and ward of the forests with the assistance of senior guards.

The scattered blocks of poor quality forests with low density provide cover to small animals only. However, the carnivorous preying on them could be found in very small numbers. The large species of herbivorous animals are struggling for existence, except the blue bull which has maintained its number a little higher than others, due to its cunning habits and prolific breeding. Blue bull and wild boar are seen in the later part of nights in the vicinity of cultivated areas and open grassy blanks. Spotted deer, barking deer and chinkara are seen in the large forests blocks, rabbits feed on the fine grasses and are even seen running across the roads on a night drive. Bear lives in rocky areas and regularly visits the fruit bearing trees in the nights. Langur and monkeys are the two primates found in this district. The chief attractions among the carnivorous are the tiger and leopard. While the tigers roam about in a very wide area in the nights, they rest in the cool valleys of Takha, Golamba, Khatan, Ghoraji and Bhuj-ka-nala. They go back in the deep forests during the winter and rainy seasons but prefer to stay over *nala* blanks, with bushy covers in the summer. The leopards also haunt the out skirts of villages to pickup dogs, goat, calves and fowl. The wild life is now restricted to very few localities on Gandhi Sagar Wild Life Sanctuary. The ranges of Ratlam district are practically devoid of game except for rabbits, jackals, partridges, quails, hyena and monkey.

Land-use

With the exception of Sailana tahsil and adjacent of Ratlam and Jaora tahsils which are hilly, the district consists of Malwa plateau proper with its black cotton soil and the typical moderate climate of the plateau. Rainfall is low, but it is sufficient for the **Kharif** crops grown in the district.

Domat and *Pathri* soils are also found in the district. The land of Ratlam district is generally covered with black cotton soil, whereas in Sailana the land consists of *bhatroi, bardy* and *bhuri*, types of soil. The matter of fertility and suitability to production of crops the *Kali* which is black loamy soil is particularly suited for cotton growing. The more fertile soils *Kali* or *dhamni* or even *Bhuri* when found strewn with stones are called *bhatori-dhammi* or *bhatori bhuri*. They are also suited to both the **rabi** and **kharif** crops.

Total geographical area of the district is 468,476 hectares out of which forest area is 33,040 hect. The non-agriculture land is 27,180 hect; uncultivable and no barran land is available. Cultivable land is 41,856 hect. and waste land is 24,025 hect; as reported.

Minerals

Lying in the Deccan Trap area, Ratlam has no minerals of any significance. However, *Basalt* and a few sand stone quarries were found in the former Jaora state and *Jhink-ka-patthar*, a variety of Calcite in the former Ratlam state. During 1999-2000 sand stone excavated 37,501 cubic metric tones. The district is poor in basic minerals. The availability of minor minerals such as lime, lime-kankar, building stone etc. are reported in district. Clay is also found in Jaora town.

Agriculture

Gram is the main crop of the district, however wheat, soyabean, vegetables and spices are also sown. In Jaora tahsil opium is also an important crop. Area under main food crops was 359,894 hect. and non-food crop area was 20,041 hect.

Irrigation

The irrigation facilities are available in the district but not adequate. As a whole total irrigated area of the district is 146,600 hect. Main source of the irrigation is through wells. Irrigation by wells is 73,827 hect, by tubewells 46,414 hect., by tanks 6,539 hect. by canals 3,740 hect. and by other sources 16,080 hect. of land is irrigated.

Animal Husbandry

The land under permanent pastures and other grazing lands as described in the earlier land utilization could give an idea of the availability of the grazing area for the cattle and other livestock. In the Ratlam district, the entire livestock population enumerated in the year 1997 consisted 400,192 cattle-wealth; in which 173,885 belong the cows, 77,399 buffaloes and other cattle are 150,908 as per cattle census conducted in the year 1997. To provide medical aid and assistance there are 12 veterinary hospitals and 39 veterinary dispensaries in the district. There is also one mobile veterinary unit.

Fishery

The most important fishery in the district is the riverine fishery. The fishery season is the monsoon season when the rivers are in spate. Some of the important rivers of the district such as Chambal, the Kshipra and the Malini pour their rain water and when open the gates of the Gandhisagar reservoir as a measure of protection.

In the district *katla*, *rohu*, *naren*, *kalot* and *badas* are fast growing species; *padhin*, *sighal*, *kohora* are the carnivorous species. Organisation of the fishermen into co-operative societies is being encouraged for improving the socio-economic condition of the fisherman.

Industries, Trade and Commerce

Ratlam is an important industrial centre in the state. A number of important industries were producing, a wide range of goods. The more important of these were perfect pottery, Government power alcohol plant, and Central Magnet. Modella steel and alloys, Mohta Ispat, Jayant Vitamins, S.S. Solvents and Chemicals in the large and medium scale sector located in Ratlam city. Another large established unit is Shri Sajjan Textiles cotton mills limited at Ratlam, which manufacture poplin, coating, long cloth, saris, towels, bed sheets etc. The other pioneering large industry in the district is Sugar Mill (P) limited located in Jaora town. Medium scale straw board mills (P) Limited, Ratlam, established in the year 1954. producing straw board. This Perfect Pottery (P) limited factory established in 1953-54 manufacture the sewage pipes, acid resistant tiles and bricks. Power alcohol plant in a public sector undertaking run by the State Industries Corporation manufactures of power alcohol. But now the plant manufactures sprit only.

Small-scale industries are also functioning in district such as umbrella, perfumery, utensils, iron and steel fabrication, ice-chemical products, pharmaceutical drugs etc.

The two very old perfumery units, namely, M/S P.M. Rathod and M/S S.R. Gandhi Bros, Ratlam established in 1948 and 1825 respectively.

Cottage and household industries in the district manufacturing copper and brass wares, wool weaving, wardha tel ghani units, moonj rope weaving on *surahis* (water pots), broom- making, pottery, horn work industry etc.

By the end of 2000, there were 4,408 registered small-scale industries, 475 main small industries and 3,500 cottage household industries in the district as reported.

Ratlam is the centre of an extensive trade in opium, tobacco and salt. It was also famous in Malwa for *Sattas*. The principal exports were opium, food grains, cotton, tilli, linseed, metal ware hides, shoes and betel leaves. Clothes, spices, metal goods, kerosene, sugar, ghee from Delhi, woollen stuffs from Punjab were imported while crude opium and grams from neighbouring places.

There is only one lead bank in the district. Among 78 nationalised commercial banks working in the district. 138 credit societies are reported in the district by the end of 2000.

Transport

Ratlam occupies a strategic position on accounts of its being on the main broad gauge train line of Delhi-Mumbai and the meter gauge line from Puna-Jaipur. The rail line runs through the district have helped the movement of people and goods. In 1956, divisional

railway headquarter of Western Railways was created at Ratlam. The total length of broad gauge line is 130 km. and meter gauge line is 83 kms. The main Mumbai-Delhi broad gauge line enters the district boundary at Bhairogarh railway station followed by Raodi- Bildi, Morwani, Ratlam junction and Bangrod. The Khandwa-Ajmer metre gauge railway line enters the district from south eastern part of Pritamnagar, which is the first railway station. The other railway stations on this line are Nauganwa, Ratlam junction, Namli, Choursi, Jaora and Dhodhar.

There is no facility for air transport in the district. The nearest airport is at Indore. Regarding road transport there is 87 km. national/state highway, the length of pucca road is 1127.58 km. and the length of Kachcha road is 145.90 km. in the district. Under the transportation facility, 546 buses, 898 trucks and 7692 tractors are registered. 45,885 two wheelers are registered in the district.

Electricity and Power

The chief sources of energy are coal, petroleum and electric power-thermal and hydel. During the early years of industrial development, it appears, diesel engines were used by a few power driven cotton ginning and pressing factories. Later a number of factories resorted to the use of electricity generated by the local diesel power stations. After the introduction of Chambal hydel power during the sixties the hydro-electricity has become the chief source of industrial energy. In the district all of the 1053 inhabited villages and 9 towns are electrified.

Gram Panchayat

Panchayat is the basic institution of local self-governance and foundation of local administration under the Directive Principles of State Policy; the Constitution of India provides the Panchayati Raj System. Madhya Pradesh, Government passed M.P. Panchayat Adhiniyam System, under 73rd amendment of the Constitution, M.P. Government passed the Panchayat Adhiniyam 1993, which provides panchayat for villages, Janpad panchayat for blocks and district panchayat for district. Under M.P. Gram Sabha Adhiniyam 2001, Gram Sabha, which includes all the major persons, is constitutionally approved unit and gives voting rights to elect Panch, Sarpanch, and members of Janpad and members of district panchayat. The Gram Sabha has power to approve works under annual budget of the village. Constituted with the elected members, these institutions work for five years. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is one third of total seats are reserved. Gram Panchayats have around ten to twenty, Janpad panchayats have ten to twenty five and district panchayats have ten to thirty five members.

Gram Panchayat with its funds execute the disposal of discriminating articles, water supply, public works (roads, buildings, wells, tanks) market exchange, co-operation with governmental works, community health and development works. Janpad panchayat with its funds in its area will work for community development and integration, agriculture, social, trade, cattle breeding, fish breeding, adult-education, co-operatives, cottage industries, welfare and employment oriented programmes. District panchayat has the duty to supervise and has to control over the Janpad and village panchayats and advise the state Government with regard to the development works.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as

a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population

referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna,

Shahdol, Umaria, Sidhi and Tikamgarh districts)

36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil) Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia
    (i) Chhindwara, Mandla, Dindori and Seoni districts

(ii) Baihar tahsil of Balaghat district
(iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
(iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
(v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
(vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
(vii) Narsimhapur district.
(viii) Harsud tahsil of Khandwa district.

41. Parja
42. Sahariya, Saharia, Seharia, Sehria, Sosia, Sor
43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference

period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi)Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground

conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or

for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001

in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment,

Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Ratlam district comprises of 1053 inhabited villages, 19 uninhabited vilages and total 1072 villages distributed among 6 tahsils and equal number of CD blocks. The district has 9 towns. The average household size of the district is 5.6. Total population of the district is 1,215,393 comprising 620,862 males and 594,531 females. Thus the sex ratio of the district works out to 958 which is higher than the sex-ratio of the state (919). Density of the district is 250 persons per sq.km. and is higher than the density of the state which is 196. Literacy rate of the district 67.2 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 13.4 per cent and 25.9 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/ urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Piploda	98,114	91,856	6,258	121,786	114,483	7,303	24.1	24.6	16.7	6.4	6.0
2	Jaora	170,155	108,215	61,940	210,387	137,621	72,766	23.6	27.2	17.5	36.4	34.6
3	Alot	151,618	123,648	27,970	186,065	151,491	34,574	22.7	22.5	23.6	18.4	18.6
4	Sailana	77,357	66,261	11,096	101,917	91,029	10,888	31.7	37.4	-1.9	14.3	10.7
5	Bajna	88,696	88,696	-	122,537	122,537	-	38.2	38.2	0.0	0.0	0.0
6	Ratlam	385,948	183,475	202,473	472,701	229,798	242,903	22.5	25.2	20	52.5	51.4
	District Total:	971,888	662,151	309,737	1,215,393	846,959	368,434	25.1	27.9	19.0	31.9	30.3

Table 1 indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 25.1 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 27.9 per cent. Among the tahsils, Bajna has registered the highest decadal growth rate of 38.2 per cent. The percentage of urban population to total population of the district is 30.3 per cent in 2001 against 31.9 per cent in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Piploda	90	114,483	58,252	56,231	3 (3.3)	217	189

	Districts (Rural) : Total	71 (6.7)	104,011	99,397	5 (0.5)	15,833	15,077	0 (0.0)	0	0

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1,053 inhabited villages, 147 (14.0 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 343 villages having 32.6 per cent villages of the district while in the size class of 500-999 population there are 290 villages constituting 27.5 per cent of total villages. 197 villages (18.7 per cent) are in the size class of 1000-1999 and 71 villages (6.7 per cent) are in the size class of 2000-4999. There are 5 villages (0.5 per cent) in the size class of 5000-9999. There is no village falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town

1 Narwar

(ii) Census town

Nil

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

1 Bijrauni

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

Nil

(iii) Census towns of 1991 census are notiified as statutory town in 2001 census

Nil

(c) Declassified

Nil

(d) Wholly merged with other town(s)

Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.2	400	0.0
11-20	4	0.4	178	0.0
21-50	12	1.1	1,282	0.2
51-100	120	11.4	40,097	4.7
101-200	508	48.2	389,769	46.0
201-300	294	27.9	319,766	37.8
301-500	90	8.5	72,389	8.5
501 +	23	2.2	23,078	2.7
Not known	0	0.0	0	0.0
District Total:	1,053	100.0	846,959	100.0
Population Density (Rural) of the district:			180.7	

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 508 accounting for 48.2, per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 46.0 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 6 villages (0.6 per cent). 23 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-300 is 27.9 percent of the total inhabited villages having 37.8 percent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 1.1 and 11.4 per cent of inhabited villages.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	-	-	983
1911	967	973	903	961	961	960
1921	949	959	863	948	957	912
1931	947	957	862	946	965	887
1941	946	957	869	957	970	916
1951	945	953	902	966	979	937
1961	932	947	860	941	958	900
1971	920	934	864	941	952	914

1991	912	921	887	948	956	932
2001	919	927	898	958	964	943

As per 2001 Census, sex ratio of 958 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly lower in 1911 to 1931 Census years over the state average figures and higher in 1941 to 2001. The lowest sex ratio of 941 females per 1,000 males was recorded in the district in Census 1961 and 1971.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Piploda	965	965	961
2	Jaora	952	951	953
3	Alot	954	956	943
4	Sailana	976	983	920
5	Bajna	990	990	-
6	Ratlam	948	955	940
	District Total:	958	964	943

Table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 964 whereas it is 943 for the urban area. The sex ratio in rural area is highest (990) in Bajna tahsil whereas in urban area it is highest (961) in Piploda tahsil. The sex ratio of the district is 958 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Piploda	965
2	Jaora	951
3	Alot	956
4	Sailana	983
5	Bajna	990
6	Ratlam	955
	District (Rural) Total:	964

Table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 964 females per 1,000 males. Among the CD Blocks the highest sex ratio of 990 is found in Bajna CD Block and the lowest of 951 is recorded in Jaora CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	4	0.4	122	0.0
700-749	6	0.6	526	0.1
750-799	13	1.2	3,483	0.4

950-999	290	27.5	331,306	39.1
1000-1099	281	26.7	174,453	20.6
1100+	72	6.8	21,222	2.5
District Total:	1,053	100.0	846,959	100.0
Sex ratio (Rural) for District:			964	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 290 accounting for 27.5 per cent of the total villages having largest population of 39.1 per cent in the district fall in the sex ratio range of 950-999. It is followed by 281 villages constituting 26.7 per cent of total villages and 20.6 per cent population falling in the range of 1,000-1,099.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Alot (NP)		943
2	Badawada (NP)		967
3	Jaora UA		952
	(i) Jaora (M)		955
4	Namli (NP)		966
5	Piploda (NP)		961
6	(a) Ratlam (M Corp.)		943
7	(b) Ratlam Rly Colony (Ratlam Kasba (CT)		878
8	Ratlam UA		939
9	Sailana (NP)		920
10	Tal (NP)		943
	Sex ratio (Urban) for the district:		943

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 943 females per 1,000 males as a whole. Among the 9 towns of the district the sex ratio varies between 878 to 967. Badawada (NP) has the highest sex ratio 967 while Ratlam Rly Colony (Ratlam Kasba) (CT) has the lowest sex ratio of 878 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Rural	162,684	82,770	79,914	965
		Urban	51,185	26,505	24,680	931

Table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 957 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 965 and 931 respectively. The rural sex ratio in tahsil varies between 949 in Piploda to 996 in Sailana tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

Sex ratio (Rural) for District:			965	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e. 285 (27.1 per cent) having population (18.9 per cent) in the district (rural) fall in the sex ratio range of 1,100+. It is followed by the sex ratio range of 1,000-1099 which claims 187 villages (17.8 per cent) and 21.5 per cent population. Next to it 123 villages (11.7 per cent) and 14.7 per cent population are in the range of 900-949. Minimum number of villages i.e. 33 (3.1 per cent) and 2.5 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	368,434	37,921	13,698	10.3	3.7

This table depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,215,393 total population of the district 13.4 per cent belong to the Scheduled Castes and 25.9 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 14.8 per cent in rural population and 10.3 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Jaora tahsil (21.1 percent) while the lowest is found in Bajna tahsil (1.2 percent). The proportion of Scheduled Tribes population is 35.5 and 3.7 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Bajna tahsil (92.8 per cent) and the lowest Scheduled Tribes population is recorded in Alot tahsil (1.2 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Piploda	114,483	19,441	17,357	17.0	15.2
2	Jaora	137,621	37,306	6,844	27.1	5.0
3	Alot	151,491	34,582	1,720	22.8	1.1
4	Sailana	91,029	1,751	79,692	1.9	87.5
5	Bajna	122,537	1,468	113,705	1.2	92.8
6	Ratlam	229,798	30,532	81,688	13.3	35.5
	District (Rural) Total:	846,959	125,080	301,006	14.8	35.5

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 14.8 per cent of rural population of the district belongs to Scheduled Castes and 35.5 per cent to Scheduled Tribes. Scheduled Castes population is highest (27.1 per cent) in Jaora CD Block whereas it is lowest (1.2 per cent) in Bajna CD Block. Scheduled Tribes population is highest (92.8 per cent) in Bajna CD Block and it is lowest (1.1 per cent) in Alot CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	497	47.2	0	0.0
Less than 5	65	6.2	1,499	1.2
5-10	90	8.5	8,427	6.7
11-20	170	16.1	40,229	32.2
21-30	100	9.5	28,650	22.9
31-40	54	5.1	18,165	14.5
41-50	35	3.3	9,819	7.9
51-75	32	3.0	14,313	11.4
76 and above	10	0.9	3,978	3.2
District Total	1,053	100.0	125,080	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 497 villages accounting for 47.2 per cent of total 1,053 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 65 villages (6.2 per cent). In 90 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 170 villages. The range of 21-30 and 31-40 per cent contains 100 and 54 villages respectively. There are 35 villages in the range of 41-50 and 32 villages in the range of 51-75. There are 10 villages are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	238	22.6	0	0.0
Less than 5	92	8.7	2,671	0.9
5-10	66	6.3	6,484	2.2
11-20	58	5.5	12,214	4.1
21-30	46	4.4	14,129	4.7
31-40	27	2.6	16,361	5.4
41-50	25	2.4	10,389	3.5
51-75	36	3.4	20,040	6.7
76 and above	465	44.2	218,718	72.7
District Total	1,053	100.0	301,006	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 238 villages accounting for 22.6 per cent of total 1,053 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 92 villages (8.7 per cent). In 66 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 58 villages. The range of 21-30 and 31- 40 per cent contains 46 and 27 villages respectively. There are 25 villages in the range of 41-50 and 36 villages in the range of 51-75. 465 villages are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

	District Total(Urban)	368,434	37,921	13,698	10.3	3.7

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/towns of the district. Among the towns the highest proportion (19.5 per cent) of Scheduled Castes is found in Badawada (NP) and lowest proportion (8.3 per cent) in Jaora (M). For Scheduled Tribes the highest proportion (11.0 per cent) is found in Sailana (NP) and lowest (1.2 per cent) in Jaora (UA).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Piploda	972	949

10	Tal (NP)	982	767
Sex ratio (Urban) for the district:		951	855

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is higher (951) among Scheduled Castes compared to Scheduled Tribes (855).

Among the towns of the district, the sex ratio of Scheduled Castes and Scheduled Tribes is not above one thousand. In the remaining towns sex ratio for Scheduled Castes is being lowest (899) in Ratlam Rly Colony (Ratlam Kasba) (CT). Sex ratio of Scheduled Tribes for the remaining towns is below the line of equality, lowest being 552 in Sailana (NP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsils	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Tahsilwise and district literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 67.2 per cent in the district. This proportion in rural area is 60.8 per cent and 80.9 per cent in urban areas. In the district the literacy rate of males 79.5 per cent is much higher than that of females which is 54.3 per cent.

Among the tahsils, Ratlam tahsil tops with 75.4 per cent literates and the lowest literacy rate 34.7 per cent is recorded for Bajna tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	District (Rural): Total	415,942	261,778	154,164	431,017	169,452	261,565	60.8	75.1	45.9	29.2

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 60.8 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.1 and 45.9 per cent respectively. At CD Block level Piploda CD Block has the highest rural literacy rate of 69.2 per cent while the lowest literacy rate of 34.7 per cent recorded for Bajna CD Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	16	0.0
1-10	26	2.5	6,973	0.8
11-20	86	8.2	37,812	4.5
21-30	96	9.1	43,440	5.1
31-40	91	8.6	51,014	6.0
41-50	121	11.5	73,493	8.7
51-60	142	13.5	114,463	13.5
61-70	193	18.3	230,903	27.3
71-80	180	17.1	193,293	22.8
81-90	108	10.3	87,591	10.3
91-99	8	0.8	7,961	0.9
100	0	0.0	0	0.0
District Total:	1053	100.0	846,959	100.0

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 2 villages (0.2 per cent) of the district and population of these villages is 16. There is no village having 100 per cent literacy. Highest number of villages i.e. 193 villages fall in the literacy range of 61-70 per cent. This accounts for 18.3 per cent of total villages and 27.3 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 88.7 per cent is recorded in Ratlam Rly Colony(Raltam Kasba) (CT) whereas the lowest literacy rate 66.3 is recorded in Badawada (NP). Sex wise highest percentage of male literacy rate is observed in Ratlam Rly Colony(Raltam Kasba) (CT) and it is lowest in Badawada (NP). Gap in male female literacy rate is maximum in Badawada (NP). The total literacy rate of the district (urban) comes to 80.9 per cent. It is 88.9 per cent for males and 72.5 per cent for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 25 presents the CD Blockwise number and percentage of Scheduled Castes, litertes and illiterates by Sex. It is seen that literacy rate of Scheduled Caste population of the district is 61.1 per cent. It is highest 68.6 per cent in Bajna CD block and lowest 57.8 per cent in Jaora CD block. The gap in male/ female literacy rate is highest (34.3 per cent) in Piploda CD block. The overall male literacy rate of the district (rural) works out to 76.8 per cent and it is 44.7 per cent for females.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	5	0.9	13	0.0
1-10	2	0.4	183	0.1
11-20	7	1.3	1,543	1.2
21-30	15	2.7	2,957	2.4
31-40	25	4.5	7,371	5.9

District Total: 556		100.0	125,080	100.0
Literacy rate for District (Rural):				61.1

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 61.1 per cent. Highest number of villages i.e. 136 villages fall in the literacy range of 61-70 per cent. There are 9 villages which have 100 per cent literacy rate of Scheduled Caste population. 5 villages are such where the literacy rate of Scheduled Caste population is zero per cent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 28 presents the CD Blockwise number and percentage of Scheduled Tribes, literates and illiterates by sex of the district. The literacy rate of Scheduled Tribe population of the district (rural) comes to 41.3. Jaora CD Block has the highest literacy rate 57.9 percent and Bajna CD Block has the lowest literacy rate 31.1 percent. The gap in male/female literacy rate varies from 21.9 percent to 30.3 percent. It is 28.2 percent for the district (rural).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	12	1.5	208	0.1
1-10	35	4.3	7,860	2.6

District Total:	815	100.0	301,006	100.0
Literacy rate for District (Rural):			41.3	

Distribution of villages by literacy rate range for Scheduled Tribes population of the district (rural) is presented in this table. The literacy rate of Scheduled Tribes population for district (rural) is 41.3 percent. Accordingly the highest number of villages 142 fall in the literacy rate range of 41-50 percent constituting 17.4 percent of villages having Scheduled Tribe population and 22.0 percent of total Scheduled Tribe population. There are 12 villages which fall in the literacy range of zero percent and 21 villages have 100 percent literacy rate of the Scheduled Tribe population.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Table 30 shows the number and percentage of Scheduled Tribes literates and illiterates by sex in towns of the district. The literacy rate of Scheduled Tribes for the district(urban) works out to 55.5 percent. It is 65.4 percent for males and 43.8 percent for females. Among the Scheduled Tribe population the gap in male/female literacy rate of the district(urban) is 21.6 percent. This gap is highest in Piploda (NP) and is lowest in Tal (NP).

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 45.1 percent of the total population in the district. The total workers comprises of 33.3 percent of main workers and 11.7 percent of marginal workers and the remaining 54.9 percent are non-workers.

Among males, 47.1 % are main workers and 6.5% are marginal workers whereas among females, corresponding figures are 19.0% and 17.2% respectively.

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD Block level in the district as per 2001 Census. The proportaion of the total workers works out to 51.3 percent of the total population in the district. The total workers are comprised of 36.0 percent of main workers and 15.3 percent of marginal workers and the remaining 48.7 percent are non-workers.

Among males, 48.0 % are main workers and 7.5% are marginal workers whereas among females, corresponding figures are 23.6% and 23.3% respectively.

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 30.7 percent of the total population of the district (urban) and the proportion of non-workers is 69.3 percent. Among the total workers male workers constitute 49.0 percent whereas female workers are only 11.3 percent.The total workers are comprised of 27.1 percent of main workers and 3.6 percent of marginal workers.

Among males, 44.9 % are main workers and 4.1% are marginal workers whereas among females, corresponding figures are 8.2% and 3.1% respectively.

				(36.2)	(46.8)	(43.0)	(1.4)	(8.8)

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 46.3 per cent of the total workers (main + marginal), 28.3 per cent of total workers are engaged as agricultural labourers, 1.8 per cent as household industry workers and 23.6 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on cultivators sector absorbing large number of workers. The proportion of cultivators varies between 33.2 per cent in Ratlam tahsil and 57.3 per cent in Alot and Sailana tahsils. The percentage of females cultivators is 46.8 per cent which is slightly higher as compared to 45.9 per cent of male cultivators in the district. In district the percentage of agricultural labourers is 28.3 per cent. It is 43.0 per cent for females which is high as compared to males (18.8 per cent). The percentage of household industry workers is very low in the district as stated above. The highest proportion of 41.2 per cent of other workers is recorded in Ratlam tahsil while the lowest proportion of 5.2 per cent is found in Bajna tahsil.

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 51.3 per cent of total population. Among these workers cultivators constitute 56.4 per cent, agricultural labourers 34.4 per cent, household industry 1.1 per cent and other workers constitute 8.1 per cent. The proportion of cultivators is highest 63.4 per cent in Alot CD Block and is lowest 52.3 per cent in Ratlam CD Block. Proportion of agricultural labour is highest 39.0 per cent in Bajna CD Block and lowest 27.4 per cent in Alot CD Block. It is also seen that the proportion of male workers is more than female workers under the category of cultivators.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 30.7 per cent of total workers, cultivators constitute 7.4 per cent, agricultural labourers 4.8 per cent, household industry 4.4 per cent and the highest proportion is covered by other workers which is 83.3 per cent. It is also found that proportion of female workers under cultivators, agricultural labourers and household industry workers are more than the male workers proportion whereas proportion of male workers under other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 39.5 per cent in Badawada (NP), agricultural labourer is highest 29.9 per cent in Piploda (NP), household industry workers is highest 7.1 per cent in Tal (NP) and other workers is highest 98.8 per cent in Ratlam Rly Colony(Raltam Kasba) (CT).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,053 inhabited villages in the district 962 villages or 91.4 per cent have been provided with the education facilities of one type or the other. Similarly 200 villages in the district constituting 19.0 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,018 or 96.7 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 152 villages constituting 14.4 per cent of villages have been provided with post office facility within the villages. 563 or 53.5 per cent villages have been provided with the telephone facility, 368 or 34.9 per cent with transport facility, 27 or 2.6 per cent villages with bank facility and 80 or 7.6 per cent with agricultural credit societies. Similarly there are 517 or 49.1 per cent villages which are linked with the pucca road. Total 1,029 or 97.7 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Jaora CD block have highest (99.3 per cent) villages where educational facility is available and lowest 76.5 per cent is found in Sailana CD Block. Medical facility is highest in Alot (46.1 per cent) and lowest (1.8 per cent) in Bajna CD block. Telephone facility is highest in Jaora CD Block (81.4 per cent) and lowest in Sailana CD Block (10.1 per cent) . In the field of power supply all villages have been covered except 24 villages in the district.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 846,959 persons in the district, 834,191 or 98.5 per cent have educational facility of one or the other type. Similarly 304,736 or 36.0 per cent population has medical facilities while 820,321 or 96.9 per cent have improved drinking water facility. Post office facilities are available to 313,642 or 37.0 per cent population. Telephone facility is available to 612,425 or 72.3 per cent. Transport communications facility is available to 433,678 or 51.2 per cent. Bank facility is available to 89,489 or 10.6 per cent. 176,779 or 20.9 per cent have been provided with the facility of agricultural credit societies. 540,421 or 63.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 839,139 or 99.1 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	87	2	2	91
(b) Middle School	525	227	58	810
(c) Degree College	42	139	872	1,053
2. Medical:-				
(a) Hospital	140	337	566	1,043
(b) PHC	157	284	592	1,033
3. Post Office	551	307	43	901
4. Telephone	269	140	81	490
5. Bus Service	446	198	53	697
6. Banks				
(a) Commercial Bank	284	432	314	1,030
(b) Cooperative Bank	225	377	433	1,035
7. Agricultural Credit Societies	395	389	189	973

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 91 villages do not have primary school and out of these villages, children of 87 villages have to travel less than 5 kms. for schooling. Out of 1,053 inhabited villages as many as 810 are deprived of middle school and 1,053 of degree college. Of these 525 avail the facility of middle school at a distance of less than 5 kms., 227 at a distance 5-10 kms. and the remaining 58 at a distance of 10+ kms. In respect of degree college 42 avail this facility at a distance of less than 5 kms., 139 between 5 to 10 kms. and rest 872 villages at a distance of 10+ kms.

Similarly there are 1,043 villages in the district which have been devoid of hospital facility and 1,033 villages which are deprived of PHC facilities. Of these 140 villages have the facility of hospital available within 5 kms. while in respect of 337 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 566 villages have this facility at a distance of 10+ kms. As regards PHC 157 avail this facility at a distance of less than 5 kms., 284 at a distance of 5-10 kms. and the remaining 592 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 901 villages do not have this facility in the village itself. Of these majority i.e. 551 have this facility at a distance of less than 5 kms., another 307 villages avail it at a distance of 5-10 kms. In the remaining 43 villages habitants have to travel a distance of 10+ kms.

As regards telephone, there are 490 villages in the district which are without telephone facilitiy. Of these 269 avail this facility at a distance of less than 5 kms., 140 at a distance of 5-10 kms. and remaining 81 have to traverse a distance of 10+ kms.

For bus service out of 697 villages which do not have facility, 446 villages avail this facility at a distance of less than 5 kms., 198 at a distance between 5-10 kms. and 53 at a distance of 10+ kms.

In the entire district 1,030 villages are deprived of commercial bank and 1,035 of co-operative bank. Of these 1,030 villages which are deprived of

commercial banks 284 villages avail this facility at a distance of less than 5 kms., 432 between 5-10 kms. and the remaining 314 at a distance of 10+ kms. Regarding co-operative banks out of 1,035 villages 225 villages avail this facility at a distance of less than 5 kms., 377 at a distance of 5-10 kms. and remaining 433 at a distance of 10+ kms. 973 villages do not have agricultural credit societies. This facility to 395 villages is available at a distance of less than 5 kms., 389 at a distance of 5-10 kms. and the remaining 189 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	69	62	20	9	51	35	1	5	40

District total	1053	962	200	152	563	368	27	80	517
	(100.0)	(91.4)	(19.0)	(14.4)	(53.5)	(34.9)	(2.6)	(7.6)	(49.1)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,053 inhabited villages in the district, there are 69 villages which have nearest towns upto a distance of 5 kms. Of these 62 villages forming 89.9 per cent of total villages, are having the educational facilities atleast one type and 20 villages constituting 29.0 per cent, have the medical facilities within the range of 5 km., 9 villages forming 13.0 per cent have the facility of post office within the range of 5 km and 51 or 73.9 per cent have the facility of telephone under the distance of 5 km. 35 villages constituting 50.7 per cent have been linked by transport service. One village constituting 1.4 per cent has the facility of bank. 5 villages constituting only 7.2 per cent have been provided with agricultural credit societies. 40 villages comprising 58.0 per cent have been provided with pucca road within the distance of 5 km.

There are 453 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 421 villages constituting 92.9 per cent have been provided with the educational facilities. 121 villages comprising 26.7 per cent have been provided with medical facilities. 85 villages constituting 18.8 per cent enjoy the post office facility. 300 villages comprising 66.2 per cent have been provided the telephone facility. 169 villages constituting 37.3 per cent have been linked with transport communications. 15 villages comprising 3.3 per cent have bank facility. 58 villages constituting 12.8 per cent are having

agricultural credit societies, while 206 villages or 45.5 per cent are approachable by pucca road.

522 villages fall in the distance range of 16-50 kms. Of these, 90.2 per cent villages have educational facility, 11.3 per cent with medical, 11.1 per cent with post office, 40.4 per cent with telephone, 30.8 per cent with transport and communications. 2.1 per cent and 3.3 per cent villages with banks and agricultural credit societies facilities respectively are available. 264 (50.6 percent) villages have approach by pucca road facility.

There are 7 inhabited villages in the district which fall in the distance range of 51+ kms.Of these 6 villages constituting (85.7 per cent) have been provided with the educational facilities. One village comprising 14.3 per cent has been provided with transport coomunication facility. 5 villages comprising 71.4 per cent have been provided the approachable by pucca road.There is no facility of medical, post office, telephone, bank, and agricultural credit societies.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Ratlam district out of a total 1,053 inhabited villages, overwhelming 490 have a population of less than 500 persons. Of these, 399 villages (81.4 per cent) have education facility, 35 (7.1 per cent) have medical facility, 473 (96.5 per cent) have improved drinking water facility. 10 villages (2.0 per cent) have post office facility. 166 (33.9 per cent) have telephone facility. 119 (24.3 per cent) have been linked by bus service. One (0.2 per cent) village has bank facility. There are 3 villages (0.6 per cent) having the facility

of agricultural credit societies. 187 villages (38.2 per cent) have been linked with pucca road. 470 villages (95.9 per cent) have been provided with electricity.

Out of 290 villages, which fall in the population range of 500-999 persons, all villages have been provided with the education facility, 50 (17.2 per cent) with medical facility, 280 (96.6 per cent) villages have improved drinking water facility. 17 villages (5.9 per cent) have been provided with post office facilities, 166 villages (57.2 per cent) with telephone facility, 95 villages (32.8 per cent) with transport facilities, 2 villages (0.7 per cent) with bank facility and 5 villages (1.7 per cent) with agricultural credit societies and 147 villages (50.7 per cent) have approach by pucca road. 287 villages (99.0 per cent) have electricity facility.

197 villages fall in population range of 1,000-1,999 persons. Of these all villages have been provided with the education facility, 65 (33.0 per cent) with medical facility, 191 (97.0 per cent) villages have improved drinking water facility. 61 villages (31.0 per cent) have been provided with post office facilities, 163 villages (82.7 per cent) with telephone facility, 89 villages (45.2 per cent) with transport facilities, 6 villages (3.0 per cent) with bank facility, 37 villages (18.8 per cent) with agricultural credit societies and 115 villages (58.4 per cent) have approach by pucca road. 196 villages (99.5 per cent) have facility of power supply.

There are 71 villages in the district which are covered under 2,000-4,999 population range. Of these, cent percent villages have been provided with the education and power supply facility, 45 (63.4 per cent) with medical facility. 69 villages (97.2 per cent) have been provided with improved drinking water facilities. 59 villages (83.1 per cent) have been provided with post office facilities, 63 villages (88.7 per cent) with telephone facility, 60 villages (84.5 per cent) with transport facilities, 13 villages (18.3 per cent) with bank facility, 32 villages (45.1 per cent) with agricultural credit societies and 63 villages (88.7 per cent) have approach by pucca road.

There are 5 villages in the district which are covered under 5,000-9,999 population range. All villages have provided all types of facilities but only 3 villages (60.0 per cent) in case of agricultural credit societies.There is no facility in the population range of more than 10,000.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Piploda	90	58,327	79.5	56.4
2	Jaora	145	70,953	75.5	51.3
3	Alot	191	92,074	71.2	45.1
4	Sailana	238	53,477	49.7	19.5
5	Bajna	220	68,147	43.9	15.7
6	Ratlam	169	125,726	68.9	52.0
	District Total:	1,053	468,704	65.8	44.8

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,053 inhabited villages in the district having a total area of 468,704 hectares. Of this, 65.8 per cent is cultivable and 44.8 per cent of total cultivable area has got the irrigation facility.

It is seen that percentage of cultivable area to total area is highest 79.5 per cent in Piploda CD Block. It is lowest 43.9 per cent in Bajna CD Block. The percentage of irrigated area to cultivable area is highest 56.4 per cent in Piploda and lowest 15.7 in Bajna CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Alot (NP)	334	214	120	333	19	71	110	0	133
2	V Badawada (NP)	199	21	178	153	54	40	0	0	59
3	II Jaora (M)	502	71	430	561	252	2	53	0	255
4	V Namli (NP)	202	104	98	176	77	38	35	0	25
5	V Piploda (NP)	454	55	398	393	114	107	36	0	135
6	I Ratlam (M Corp.)	463	72	391	479	115	81	21	96	166
7	IV Sailana (NP)	362	160	201	333	7	36	2	0	288
8	IV Tal (NP)	301	74	227	308	69	146	16	8	69
	District Total	441	83	358	458	127	65	32	60	174

Note: The difference in various totals is due to rounding off the related figures.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Ratlam works out to Rs.441 of which Rs.80 are derived through local taxes and the remaining Rs.363 is received from all other sources. The average of total expenditure incurred per capita is Rs.460. Out of this Rs.123 are spent on general administration, Rs.63 on public health and conveniences, Rs.31 on public works.There is only Rs.58 expenditure on public institutions. Rs.185 is spent on others.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Alot (NP)	8.4	2.3	1.9	0.9	0.9
2	Badawada (NP)	13.1	5.2	1.3	1.3	0.0
3	Jaora (M)	18.4	7.8	1.1	0.6	0.2
4	Namli (NP)	2.4	2.4	2.4	1.2	0.0
5	Piploda (NP)	4.1	2.7	1.4	1.4	0.0
6	Ratlam (M Corp.)	14.5	6.6	1.0	1.0	0.2
7	Sailana (NP)	8.3	4.6	3.7	2.8	0.9
8	Tal (NP)	8.4	3.1	1.5	1.5	0.0
	District Total	13.9	6.2	1.2	1.0	0.2

In urban areas of Ratlam district the average number of primary school per 10,000 population comes to 13.9 schools, 6.2 junior secondary/middle schools, 1.2 secondary/matriculation schools, 1.0 senior secondary schools and the ratio of colleges is only 0.2 college per 10,000 population. Among the towns, the ratio of primary is highest in Jaora (M) while lowest is in Piploda (NP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Alot (NP)	14
2	Badawada(NP)	8
3	Jaora(M)	18
4	Namli(NP)	5
5	Piploda (NP)	11
6	Ratlam(M Corp.)	46
7	Ratlam Rly Colony (Ratlam Kasba)(CT)	82
8	Sailana(NP)	28
9	Tal (NP)	9
	Distrct Total	36

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Ratlam district. On an average there are 36 beds per 10,000 population in urban areas of the district. Whereas it is the highest 82 in Ratlam Rly Colony (Ratlam Kasba) (CT) while lowest 5 beds in Namli (NP).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Alot	21,513	8,212	38.2
2	Badawada	7,655	4,648	60.7
3	Jaora	65,111	43,719	67.1
4	Namli	8,484	1,681	19.8
5	Piploda	7,303	5,392	73.8
6	Ratlam	222,202	63,599	28.6
7	Tal	13,061	5,900	45.2
	District Total	345,329	133,151	38.6

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 345,329 urban population 133,151 persons constitute slum population which is 38.6 per cent of total urban population. Piploda town has the highest 73.8 per cent of slum population whereas, Namli town has lowest 19.8 per cents of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Badarwas (NP)	Gram Pulse	Gram Pulse
	Oil	Soyabean Oil	
	Gound Nut	Jowar

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 215,477 consisting of 152,614 rural and 62,863 urban households. 32,754 households belong to Scheduled Castes 57,373 to Scheduled Tribes. 191,649 households are living in their own houses constituting 89.0 per cent of total households. Of these households, the largest number of households (79,739) have occupied single room accommodation and is followed by two room accommodation numbering to 57,277 households. Next position is claimed by households (24,985) occupying three plus rooms accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 24,647 households while 5,001 households are without any exclusive room.

19,700 households living in rented accommodation accounts for 9.1 per cent of total number of households in the district. The largest number of 8,203 households are living in single

roomed accommodation followed by 7,866 households in two room accommodation. Next position is claimed by households 2,401 occupying three room accomodation. Households with three plus are 1,015 in numbers and 215 housekols are no exclusive room.

Other households numbering to 4,128 forming only 1.92 per cent of total households are distributed in single room accommodation numbering 1,841, 1,379 double room, 519 in three room, 272 are in three plus and 117 households have no exclusive room.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Piploda	26.1	71.7	2.2	25.4	72.4	2.3	37.1	61.7	1.2
2	Jaora	31.2	65.6	3.2	18.9	77.3	3.8	57.5	40.7	1.8
3	Alot	18.8	79.5	1.7	11.3	86.8	1.9	53.5	45.3	1.2
4	Sailana	16.2	82.3	1.5	10.5	88.1	1.4	68.5	29.6	1.9
5	Bajna	12.8	85.2	2.0	12.8	85.2	2.0	0.0	0.0	0.0
6	Ratlam	51.6	46.1	2.3	23.1	74.8	2.1	79.8	17.7	2.5
	District Total:	33.6	64.1	2.2	17.8	79.9	2.3	72.0	25.8	2.2

The data presented in Table 49 reveals that 33.6 per cent of household of the district are living in houses made of pucca materials, residences of 64.1 per cent households are semi permanent houses and 2.2 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 72.0 per cent are living in houses constructed of pucca materials, 25.8 per cent in semi-permanent structure and percentage of households in temporary houses is 2.2 constructed of kutcha materials. At rural level, the lowest percentage of 10.5 households occupying permanent structure is found in Sailana tahsil while highest percentage of 25.4 is seen in Piploda tahsil. The proportion of semi-permanent houses is high in Sailana (88.1) and lowest in Piploda (72.4) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 3.8 per cent in Jaora tahsils followed by 2.3 percent in Piploda tahsil, 2.1 percent in Ratlam, 2.0 percent in Bajna tahsil, 1.9 per cent in Alot tahsil and 1.4 per cent Sailana.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 50 indicates that 72.0 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/tube-well, 81.4 per cent households have provision of electricity in their houses. 75.4 per cent rural households have facility of electricity against 95.9 per cent in urban areas. The bathroom facility is available to only 28.5 per cent households within their premises . As regards rural areas, 9.8 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 73.9 per cent. Toilet and drainage facilities in the district are available to 29.4 per cent and 43.9 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas.

TABLE 51 : NUMBER AND PER CENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that fire wood is used as the most predominant fuel used for cooking by 59.0 per cent households in the district. In the tahsils, this proportion varies between 88.9 per cent in Alot and 35.3 per cent in Ratlam tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller amount of population due to availability of L.P.G. The next cooking fuel is L.P.G. which is used by 21.1 per cent households in the district. This proportion in rural and urban areas is 4.1 and 62.6 per cent respectively. Next fuel is crop residue and used by 11.3 percent in district.Use of crop residue in rural area for cooking is 15.3 percent as compared to urban areas 1.5 per cent at district level. There are 4.1 per cent households using cowdung cake in the district. Use of cowdung cake for cooking by rural households comes to 5.5 per cent while in urban areas its proportion is 0.6 per cent. There are 3.5 per cent households using kerosene in the district. Use of kerosene for cooking by urban households comes to 9.3 per cent while in rural areas its proportion is 1.1 per cent, as a whole. The percentage of households using other types of fuel is insignificant. In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Table 52 presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households.There are 215,477 households in the district and among them, 66,810 households have been availing banking services. 45,972 households have radio/transistor. Television is possessed by 87,757 households. Telephone is available in 21,717 households. Bicycle is the most common means of transportation and is available in 103,968 households. Scooter, motor cycle, moped (two wheelers) and car, jeep, van (four wheelers) are used by 36,829 and 3,327 households respectively. None of the specified assets is in 75,643 households.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

During the last decade (1991-2001) the following remarkable administrative changes took place :-

(1) Entire Piploda C.D. block of the Jaora tahsil, has been constituted vide gazette notification No. F/1/ 9/98/Sha dated 5.7.1999, a new tahsil, namely Piploda was merger of 91 villages in Ratlam district.[1]

(xii) Brief description of places of religious, historical or archaeological importance in villages and places or tourist interest in the town of the district.

Places of Tourism :

Alot

Alot town is the headquarters of a tahsil of the same name. It is situated on the Jaora-Tal-Alot road at a distance of about 18 km. from Tal. From Ratlam its distance is about 82 km. and from Bhopal about 288 km. Regular buses ply on Jaora-Tal-Alot road.

There is a sacred tank in Alot, where pilgrims take holy bath on Hindu festivals. Two temples, dedicated to Anadi-Kalpeshwar and Chandra-Shekhar stand on its bank. Two mosques built in A.D. 1524 and 1526 are standing in the town.

Bilpank

A village of Ratlam tahsil, Bilpank lies about 1.8 km. from the 17th km. (mile stone) of the Ratlam-Mhow road on which there is a bifurcation at the 17th km. Bilpank is situated near Nauganwa railway station. Bilpank is a regular bus stop. Formerly Bilpank was the headquarters of a *pargana*.

In Nauganwa some old copper plates were discovered. In one such record Nauganwa is mentioned as Navagrama dated in Gupta Samvat 320 (A.D. 639-40). About 1000 years old Shiva temple of Bilpank constructed on stone pillars enshrining Virupaksha is instead by travellers passing along Mhow-Neemuch road oftenly.

Birmawal

A village of Ratlam tahsil, Birmawal was the headquarters of *jagirdar* of the Bilpank *pargana* in the erstwhile Ratlam state. It lies 4 km. away from the Ratlam-Indore road. Buses are available to reach the place. Birmawal has some local repute, for on a hilltop there is a temple dedicated to Rawalakha Mata. In the temple there is an inscription dated Samvat 1151 (A.D. 1094). The altitude of the hillock is about 1810 feet from mean sea level from where some villages of Dhar district are visible.

Jaora

Headquarters town of Jaora tahsil, Jaora was the capital of the erstwhile Jaora state. It is situated on the Neemuch-Mhow road, at a distance of about 33 km. from Ratlam and about 258 km. from Bhopal. Jama Masjid, Dharamshala, and tombs of Ghafur Khan and Ghaus Muhammad in addition to the Husain Tekri, about 4 km. to the east of Jaora, on the Neemuch road, a place of profound reverence among the Muslims, because they believe that the spirit of Imam Hussain periodically visits the shrine. *Tongas* (horse cart) are available to reach the spot. A fair is held here in the day of the Muharram, where Muslims from far and near assemble. It is believed that the paralytic patient gets cure after a few days' stay at this place. To the north of the town lies the Dargah of Abu Saiyad, who became a martyr. An *Urs* is held here annually, where reputed *Kawwals* come to participate. The famous Hanuman temple of Jaora is situated in an area, known as Boria-Kua. Nearby there is a Jain temple on the Jaora-Khachrod road, known as Dada Wadi, enshrining an idol of Guru Maharaj Rajendra Suri. But the most renowned Jain temple of

the town, is situated in the Pipli Bazar locality. It is a three-storied edifice, where very attractive Jain idols have been installed. The Jaganath temple is situated on the bank of the Pipia-Khal, that flow the heart of the town. Brahmanical idols are enshrined in the building.

Ratlam

The headquarters town of the district, Ratlam was the chief town of the erstwhile Ratlam state. Its distance from Ujjain is 97 km., from Bhopal 280 km. and from Bombay 657.6 km. It is a railway junction on the Western Railway. Ratlam is a clean and well-planned town. It is a beautiful building, encircled by moat. Till independence the plan of this place was in great demand among other feudatory chiefs. The most impressive edifice of this place is the old place "Ramjet Vilas".

Temples of Ratlam are dedicated to Klamath, Hanuman, Satyanarayan, Lakshmi, Shani, Garh Kailash and Jain deities. A large number of Jain religious (establishments) *sthanak*, exist in this town. Two Jain pilgrimage centres near Ratlam are known as Karoudi and Bibrod. Many gardens and parks are there, some of these are the Municipal Garden, Gandhi Garden, Kalka-Mata-Garden, Bhaktan-Ki-Baori, Ganga-Sagar Garden, Gou-shala Garden, Triveni Garden etc. Incidentally it might be mentioned that the Triveni-Sthal, built of white marble is pleasing to eyes. Important markets and shopping centres of the town are known as Manak Chauk, Chandni Chauk, Bajaj-Khana, Chaumukhi-Phool, Station Road, Tilak Marg, Gafur Marg, Tripaulia Marg, etc.

Ringnod

An old village of Jaora tahsil, Ringnod is situated on the bank of the Pingala river and on the Jaora-Ringnod road, at a distance of about 11 km. to the north-east of the tahsil headquarters.

About 10 km. away from Ringnod there is the famous confluence of the three rivers, the Chambal, the Pingala and the Melni. On the confluence there is a Shiva temple, enshrining Mankamaneshwar Mahadeva. The shrine is situated within the jurisdiction of village Mendakher. On the full moon day of May/ June a small fair is held nearby the temple. The Hindus offer *pindas* to their departed relatives in the waters of the confluence.

Ringnod is believed to be a very old place; many old idols are still dug out from its soil. It is said, that in ancient time the name of this place was Inganapada, that gradually corrupted into Ingnod and then to Ringnod. In an inscription at a school of Dewas mention is made of a temple of Mahadeva in near proximity of Ringnod. The inscription records the grant of money to the village of Agasiyaka to defray some expenses of this Mahadeva temple, which is still existing on the bank of the Kshipra and about 11 km. away from Ringnod, . That grant is made by Shri Vijayapaladeva and is dated 11th Ashadha Shuklapaksha Samvat or (A.D. 1133-34). A figure of a Garuda, the emblem of the Parmars, is engraved in one corner.

Sailana

Sailana town is a place of impressive scenic beauty, especially after the rainy season, when the hill and plain, particularly the Malwa plateau to its east, appear bathed in greenery. To the south-west of the town is a picturesque valley, with a cascade falling over the perpendicular edge of the valley into tank. Amidst this panorama stands a temple, dedicated to Kalyan Kedareshwar. The spot is called Jesnagar. As per local belief, Raja Jai Singh the founder of the Sailana state selected Jesnagar, about 3 km. west of Sailana as a spot for his new capital. Then lord Kedareshwar appeared to him in dream and advised him not to establish his capital at Jesnagar, because then the sewage would defile his shrine. He instructed him to move eastward, kill and bury a game and found his residence there. Accordingly, Jai Singh travelled towards east and came to Sailana. There he actually found a hare and acted exactly in the way as the God advised him. The spot is the same where the palace gate called the Surajpol stands.

Another temple of Kedareshwar stands within 3 km. from the town. It is called Bada Kedareshwar to distinguish it from the one existing at Jesnagar.

Sipawara

A village of Alot tahsil, Sipawara is situated picturesquely on the confluence of the Chambal and the Shipra. Formerly it was a village of the Tal-Barkhera tahsil of the erstwhile Jaora state. There is a 13 km. long Kachcha road upto Alot. Near the village stands an old temple, enshrining Kamleshwar Mahadeo, with a stone ghat leading to the water of the rivers.

Uchangarh

A village of Sailana tahsil, Uchangarh is situated on the Ratlam-Bajna road, at a distance of about 40 km. to the west of Ratlam. It has a famous old temple of Rajapuramataji or Khakai Mata stands on the bank of the Mahi. On the occasions of Navaratri, both in September/October and March/April, small fairs are held near the shrine. A local legend has the say that the goddess used to come to the village in the guise of a human being to join in the play of the children of the village. At the instigation of a Bhil Raja once a barber tried to seize her. The enraged Devi cursed the Raja, so that he was vanquished by his enemies, the Bharmalot Rajputs. Out of fear, no barber approaches the shrine of Khakai Mata. From the ruined fort a beautiful view of the surrounding hills and tanks can be obtained.[1]

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

In Ratlam and Jaora, opium is an important industry. Raw opium is produced into balls in hand factories through a complicated process. Ratlam junction is situated on the western railway's broad gauge Delhi-Mumbai main track line and an important divisional headquarters.

Glorious, great dignitaries and immortal martyrs of independence movement worth-noted are Shri Balmukund Sadhu, Ramchandra Porwal, Govindlal Sharma, Harchand, Saiyed Kamrrun Anwar, Smt. Chandraprabha Debey, Ram Gopal Joshi, Ratanlal Baheti and Trilokchand and several other immortal martyrs who sacrificed their lives. Eminent and literary figures are Shri Aasharafilal Verma, Nirmal Kumar Bhatnagar, Smt. Satya Saxena, Sureshchand Jojodiya, Omprakash, Ashok Kumar Jain, Narayanlal Sharma and Abdul Jabbar Khan were awarded with National and state honors.

In addition, Shri Shivkumar Jhalani, Motilal Dave, Lah-Linga Deoda, Mahendra Singh, Kaloo-kheda, Jhawardas Gahlot, Ashok Nav-ratna Himat Kothari M.P. Govt. P.W.D. Minister, Prabhu-dayal Gahtol and Manohar Urwal are the main political leaders of the district. In the district a renowned litterateur and lyricist, Prof. Ajhar Haasmi, participated in several Kavi-Sammelan at international level and gain noteworthy credit.

Important Fairs

In this district *Navaratri mela* held for 12 days in September/October, while the Triveni-faire held in December/January for 8 days. The annual Taj mela held at Jaora in March/April for 7 days. An annual 'Kalka-mata" fair is held for one day at Birmawal, a village of Ratlam tahsil is in the erstwhile Ratlam state. In Alot town two famous fairs are held near the temple Anadi-Kapleshwar on the full moon days in May/June and October/November for 7 days each. Sailana town is a place of impressive scenic beauty. Here two small fairs held near the temple of Bada-Kadareshwar on the full moon day of May/ June and October/ November.[1]

(xiv)Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned

Source for Brief History, Administrative Setup and Physical Features :

1. Gazetteer of India, Ratlam district, 1994
2. District Statistical Book 1999-2000
3. Census of India, District Census Handbook, 1991.

to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most

important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the

2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/ sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
		NIL	

(c) CD blockwise presentation of Village Directory Data

(i) CD Block Maps showing Tahsil Boundary :

1	Ratlam Railway Colony (Ratlam Kasba)	168			Not Available		

APPENDIX IV - VILLAGE DIRECTORY
C.D. BLOCKWISE LIST OF INHABITED VILLAGES WHERE NO AMENITY OTHER THAN DRINKING WATER FACILITY IS AVAILABLE

Name of the District:Ratlam

Serial number	Location code number	Name of village
1	2	3
Name of CD Block: Piploda		
		Nil
Name of CD Block: Jaora		
		Nil
Name of CD Block: Alot		
		Nil
Name of CD Block: Sailana		
1	02475100	Kalyanpura
2	02476700	Jambudia Ka Mal
3	02479500	Junapani
Name of CD Block: Bajna		
4	02496100	Nahargarh
5	02503500	Dhawadiya
6	02506300	Naka
Name of CD Block: Ratlam		

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there

are only 6 villages which fall under this category, 3 villages namely Kalyanpura (02475100), Jambudia ka mal(02476700) and Junapani (02479500) in Sailana CD Block and 3 villages Nahargarh (02496100), Dhawadiya (02503500) and Naka (02506300) in Bajna CD Block. No village of Piploda, Jaora, Alot and Ratlam CD Block falls under this category.

APPENDIX V - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Piploda	91	1	90	11
2	Jaora	148	3	145	14
3	Alot	197	6	191	19
4	Sailana	242	4	238	221
5	Bajna	221	1	220	199
6	Ratlam	173	4	169	33
	District Total:	1,072	19	1,053	497

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 1072 villages in the district, 19 villages are uninhabited and remaining 1053 villages are inhabited. Out of 1053 inhabited villages 497 villages have no Scheduled Castes Population and 556 inhabited villages have Scheduled Castes population in the district. Sailana has highest 221villages with no Scheduled Castes population while in other CD Blocks there are 199 such villages in Bajna, 33 in Ratlam, 19 in Alot, 14 in Jaora and 11 in Piploda CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Piploda	91	1	90	6
2	Jaora	148	3	145	63
3	Alot	197	6	191	152
4	Sailana	242	4	238	8
5	Bajna	221	1	220	1
6	Ratlam	173	4	169	8
	District Total:	1,072	19	1,053	238

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 1053 inhabited villages, 238 villages have no Scheduled Tribes population and the remaining 815 inhabited villages are such which are having some Scheduled Tribes population. Alot has highest 152 villages with no Scheduled Tribe population while in other CD Blocks, there are 63 such villages in Jaora, 8 each in Sailana and Ratlam, 6 in Piploda and 1 village in Bajna CD Block. which do not have any Scheduled Tribe population.

APPENDIX VII A
LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED CASTES TO THE TOTAL POPULATION BY RANGES

Name of the District:Ratlam

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District: Ratlam**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh													
	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Ratlam													
	1991	128	132	140	149	120	134	139	147	132	125	145	151
	1981	143	161	166	196	152	163	171	194	134	158	160	198

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for ages 1,2,3, and4-5 is shown as q(1), q(2), q(3) and q(5) respectively. The child mortality for the district is lower than the state in case of q(1), q(2) and q(3) . The child mortality of the district for q(5) is more than the state average.

The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also. On comparison it is seen that the district mortality rate for all ages is lower than state rates. However some inconsistencies are observed in male-female classification. Male child mortality for q(5) of the district 147 is more than the state average 142.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Ratlam**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	340,364	73,592	266,772
	(86.6)	(21.6)	(78.4)
(A)Within the district but outside Enumeration place	201,687	38,402	163,285
	(51.3)	(19.0)	(81.0)
(B)Birth place in other district of State	138,677	35,190	103,487
	(35.3)	(25.4)	(74.6)
(ii) Place of Birth in other states of India than the state of Enumeration	51,893	16,491	35,402
	(13.2)	(31.8)	(68.2)
(iii) Birth place in Foreign	669	356	313
	(0.2)	(53.2)	(46.8)
(iv) Unclassified	1	0	1
	(0.0)	(0.0)	(100.0)
Total Immigrants	392,927	90,439	302,488
Persons born in the place of enumeration	822,466	530,423	292,043
Total population	1,215,393	620,862	594,531

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 86.6 per cent of total migration. The migration from within the district but outside the enumeration place is 51.3 per cent whereas migration from other districts of the state is 35.3 per cent. Migration from other states is 13.2 per cent and the migration from outside India is 0.2 per cent of the total migration. Migration of one persons i.e.0.0 per cent which could not be classified in first three classifications has been shown as unclassified in first three classifications has been shown as unclassified in the table. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Ratlam**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	347,968	76,040	271,928
	(87.3)	(21.9)	(78.1)
(A)Within the district but outside Enumeration place	209,434	40,799	168,635
	(52.5)	(19.5)	(80.5)
(B)From other district of State	138,534	35,241	103,293
	(34.7)	(25.4)	(74.6)
(ii) From other states of India outside enumeration state	50,207	15,650	34,557
	(12.6)	(31.2)	(68.8)
(iii) Place of residence outside India	542	284	258
	(0.1)	(52.4)	(47.6)
(iv) Unclassified	0	0	0
	(0.0)	(0.0)	(0.0)
Total Immigrants	398,717	91,974	306,743
Population of Non-inmigrants	816,676	528,888	287,788
Total population	1,215,393	620,862	594,531

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 87.3 per cent of total migrated population. Within this classification, the migration from within the district is 52.5 per cent and only 34.7 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 12.6 per cent of total migration and it is only 0.1 per cent from outside India. Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES- AS PER CENSUS 2001

State : Madhya Pradesh **District : Ratlam**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Rajasthan	29,695	57.2
Uttar Pradesh	7,410	14.3
Andhra Pradesh	4,598	8.9
Gujrat	3,540	6.8
Maharashtra	2,865	5.5
Chhattisgarh	728	1.4
Total of 6 States	48,836	94.1
Total of other States	3,057	5.9
Total	51,893	100.0

Source:Migration Table D-1

Inmigration from other states is classified in this table. 94.1 per cent of total inmigrants are from Rajasthan, Uttar Pradesh, Andhra Pradesh, Gujarat, Maharashtra and Chhatisgargh whereas the remaining inmigrants from all other states together constitute only 5.9 per cent.

Total 29,695 persons have migrated from Rajasthan which alone accounts for 57.2 per cent of total inmigrants. Ratlam is located at the neighbouring state border of Rajasthan as such the migration from Rajasthan is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Ratlam**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10

		(86.9)	(10.2)	(2.4)	(0.3)	(0.0)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu, Budhhist and Sikh population in the district is comparatively lower than that of state. Contrary to this, the proportion of Muslim and Jain population is higher in the district as compared to state average. The proportionate distribution of population belonging to 'other' religions in the district is lower than the corresponding state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Ratlam**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Ratlam							
	Total	1,215,393	577,449	579,500	53,999	4,445	0
			(47.5)	(47.7)	(4.4)	(0.4)	(0.0)
	Rural	846,959	398,897	406,916	37,943	3,203	0
			(47.1)	(48.0)	(4.5)	(0.4)	(0.0)
	Urban	368,434	178,552	172,584	16,056	1,242	0
			(48.5)	(46.8)	(4.4)	(0.3)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (47.5%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is lower than the state. Contrary to this the percentage of married population of the district is higher than the state. The state average is lower than the district in respect of widowed and divorced population. The proportion of unmarried persons are more in urban areas than rural but married persons are more in the rural areas as compared to the urban areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Ratlam**

(Source- Migration Table C-8)

Note: Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,001,524 persons belonging to the age 7 and above 672,715 are literates and thus, the literacy rate of the district works out to 67.2 percent. Similarly the male and female literacy works out to 79.5 and 54.3 percent respectively.

176,511 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 73.3 percent of population in this age group. In the age group 15-34; 53,488 persons (13.3

percent) are found educated up to middle, 55,866 person (13.9 percent) upto the level of Matriculate/ Higher Secondary/ Intermediate/ Diploma Tech. and 18,408 persons (4.6 percent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII

DETAILS OF VARIOUS MOTHER TONGUES PREVALENT IN THE DISTRICT : CENSUS 2001

State- Madhya Pradesh **District - Ratlam**
