CENSUS OF INDIA 2001

SERIES - 24 **MADHYA PRADESH**

DISTRICT CENSUS HANDBOOK
PART - A & B

SAGAR DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

Harisingh Gaur University

Sir Harisingh Gaur University is the oldest university of the state in the field of higher education. It is situated among Patharia hills near Sagar.

Sir Hari Singh Gaur founded the University in 1946 who was a famous educationist and great social reformer. University was named after him as a mark of his outstanding contribution. The faculties available here are Arts, commerce, Science, Engineering, Computers, philosophy, Linguism, Chemistry, Criminal Law, Forsenic studies etc. Besides, there are six hostels and a big library with lot of collection of books.

Statement-6	:Population of Urban Agglomerations/Towns, 2001	xxvii
Statement-7	:Villages with Population of 5,000 and above at CD Block level as per 2001 Census and amenities available	xxviii-xxix
Statement-8	:Statutory Towns with Population less than 5,000 as per 2001 census and amenities available	xxx
Statement-9	:Houseless and Institutional Population of Tahsils, Rural and Urban, 2001	xxx
Analytical Note		
(i)	History and scope of the District Census Handbook	3
(ii)	Brief history of the district	6
(iii)	Administrative Set up	7
(iv)	Physical features	7
(v)	Census Concepts	11
(vi)	Non Census Concepts	18
(vii)	2001 Census findings - Population, its distribution	22
(viii)	Brief analysis of PCA data based on inset tables 1 - 36	23-52
(ix)	Brief analysis of Village Directory and Town Directory data based on inset tables 37 - 47	53-62

		Pages
(x)	Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48 - 52	62-69
(xi)	Major social and cultural events, natural and administrative developments and significant activities during the decade	69
(xii)	Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district	69-71
(xiii)	Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district	71
(xiv)	Scope of Village directory and Town directory - column heading wise explanation and coverage of data	72-74

Part – A : Village and Town Directory

Section I – Village Directory

(a)	Note explaining the abbreviations used in Village Directory	75-80
(b)	List of villages merged in towns and outgrowths at 2001 Census	81
(c)	CD Block wise presentation of Village Directory Data	
(i)	Map of Bina CD Block showing Tahsil boundary	82
	Alphabetical list of villages of Bina CD Block along with location code 1991 and 2001	83-87
	Presentation of Village Directory data of Bina CD Block	88-117
(ii)	CD Block Map of Khurai showing Tahsil boundary	118
	Alphabetical list of villages of Khurai CD Block along with location code 1991 and 2001	119-123
	Presentation of Village Directory data of Khurai CD Block	124-157
(iii)	CD Block Map of Malthon showing Tahsil boundary	158
	Alphabetical list of villages of Malthon CD Block along with location code 1991 and 2001	159-163
	Presentation of Village Directory data of Malthon CD Block	164-197
(iv)	CD Block Map of Banda showing Tahsil boundary	198
	Alphabetical list of villages of Bandai CD Block along with location code 1991 and 2001	199-203
	Presentation of Village Directory data of Banda CD Block	204-235
(v)	CD Block Map of Shahgarh showing Tahsil boundary	236
	Alphabetical list of villages of Shahgarh CD Block along with location code 1991 and 2001	237-239
	Presentation of Village Directory data of Shahgarh CD Block	240-261
(vi)	CD Block Map of Rahatgarh showing Tahsil boundary	262
	Alphabetical list of villages of Rahatgarh CD Block along with location code 1991 and 2001	263-267

Pages

Presentation of Village Directory data of Rahatgarh CD Block 268-303

(vii) CD Block Map of Jaisinagar showing Tahsil boundary 304

Alphabetical list of villages of Jaisinagar CD Block along with location code 1991 and 2001 305-309

Presentation of Village Directory data of Jaisinagar CD Block 310-337

(viii) CD Block Map of Sagar showing Tahsil boundary 338

Alphabetical list of villages of Sagar CD Block along with location code 1991 and 2001 339-343

Presentation of Village Directory data of Sagar CD Block 344-373

(ix) CD Block Map of Rehli showing Tahsil boundary 374

Alphabetical list of villages of Rehli CD Block along with location code 1991 and 2001 375-381

Presentation of Village Directory data of Rehli CD Block 382-421

(x) CD Block Map of Kesli showing Tahsil boundary 422

Alphabetical list of villages of Kesli CD Block along with location code 1991 and 2001 423-427

Presentation of Village Directory data of Kesli CD Block 428-459

(xi) CD Block Map of Deori showing Tahsil boundary 460

Alphabetical list of villages of Deori CD Block along with location code 1991 and 2001 461-467

Presentation of Village Directory data of Deori CD Block 468-509

(d) Appendices to Village Directory

Appendix-I : Abstract of Educational, Medical and other Amenities in Villages - CD Block level 510-513

Appendix-IA : Villages by number of Primary Schools 514

Apendix-IB : Villages by Primary, Middle and Secondary Schools 514

Appendix-IC : Villages with different sources of drinking water facilities available 515

Appendix-II : Villages with 5,000 and above population which do not have one or more amenities available 515

Appendix-IIA : Census Towns which do not have one or more amenities 516

Appendix-III : Land utilisation data in respect of Census Towns/non-municipal towns 516

Appendix-IV : CD blockwise list of inhabited villages where no amenity other than drinking water is available 517

Appendix-V : Summary showing number of villages not having Scheduled Castes Population 518

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population 519

		Pages
Appendix-VIIA :	List of villages according to proportion of the Scheduled Castes to the total population by ranges	520-536
Appendix-VIIB :	List of villages according to the proportion of the Scheduled Tribes to the total population by ranges	537-552
Appendix-VIII :	Statement showing number of girl schools in the villages	553

Section II - Town Directory

(a) Note explaining the abbreviations used in Town Directory		
Town Directory Statements (I to VII)		554-557
(b) Statement-I :	Status and Growth History	558-559
(c) Statement-II :	Physical aspects and location of Towns	560-561
(d) Statement-III :	Municipal Finance	562-563
(e) Statement-IV :	Civic and other amenities	564-565
(f) Statement-V :	Medical, Educational, Recreational and Cultural facilities	566-569
(g) Statement-VI :	Trade, Commerce, Industry and Banking	570-571
(h) Statement-VII :	Civic and other amenities in slums	570-575
(i) Appendix to Town Directory : Towns showing their outgrowth with Population		576

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract		579-581
(b) District Primary Census Abstract (General)		582-593
(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population		594-613
Primary Census Abstract for Scheduled Castes		614-625
Primary Census Abstract for Scheduled Tribes		626-637
CD Block wise Village Primary Census Abstract		638-895
Urban Primary Census Abstract		896-925
Annexure-I :	Number of villages under each Gram Panchayat	926-998
Annexure-II :	Note on Fertility, Mortality and Migration, 1991 Census	999
Annexure-III :	Various measures of Fertility and mean age at marriage, 1991 Census	999-1002
Annexure-IV :	Percentage distribution of Migrants by place of birth/ place of last residence,2001 Census	1003-1005
Annexure-V :	Brief account of main religion in the district/tahsils as per 2001 Census	1006
Annexure-VI :	Marital status of population as per 2001 Census	1007
Annexure-VII :	Age, Sex and Education in the district,2001 Census	1008
Annexure-VIII :	Distribution of different mother tongues returned in 2001 Census	1009
Annexure-IX :	Statement of Five Main SC and ST in the District, 1991 census	1010
Annexure-X :	Hamletwise total population of villages, Census 2001	1011-1090
Annexure-XI :	Statement of Disability in the District, Census 2001	1091

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 3rd place in the state according to population.

2. The district occupies 6th rank in the state in terms of area having 10,252 sq.km. which is 3.3 percent of the total area of state.

3. Literacy Rate of Sagar district is 67.8 percent and it occupies 14th position within the state. The female literacy rate of the district is 54.4 percent .

4. Density wise the rank of the district is 20th within the state.

5. Ranking of the district according to the sex-ratio is 37th in the state.

6. Female work participation of the district is 30.4 percent of total female population. Rank of the district according to female work participation is 33rd .

7. Population wise largest village is Malton of Khurai tahsil L.C.No.01086300 with 9067 population and there are 5 small villages namely, Gadoli Dhirj Kalan ,Chak Baghonia ,Masosa, Khadi of Khurai, Sagar and Garhakota tahsil L.C.No. 01082200, 01087800, 01178300, 01195100 with population of only 1 person .

8. Population wise the largest town is Sagar (M+OG)) having population 244,721 and the smallest is Bina Railway Colony (CT) with 7,220 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Harsingh Gaur University.

	Females	1,047,533	10.9	28,020	9.7

Note :-—Eight villages are fully covered as out growths (OGs) and therefore not included under the item, "Number of villages".

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii)Brief History of the District

Situated in the north central region of Madhya Pradesh, spelt as *'SAUGOR'* during British period, the district of *'Sagar'* takes its name from the headquarters town which in turn derived its name from Hindi word "Sagar" meaning lake or sea; apparently because of the large and once beautiful lake around which the town Sagar has been built. The history of the town of Sagar dates back to about 1660 A.D when Udan Shah, a descendant of Nihal Shah, built a small fort on the site of the present one and founded a village close to it called Parkota, which is now a part of the town. The present fort and a settlement under its walls was founded by Govind Rao Pandit, officer in-charge of Sagar and the surrounding territory after 1735 A.D., when it came under the Peshwa's possession.

In 1818 A.D., the Peshwa Baji Rao II ceded the greater part of the district to the British Government, while different parts of the rest of the present district of Sagar came in the possession of the British at different times between 1818 and 1860. Appaji Bhonsla ceded the Dhamoni *pargana* of Banda tahsil in 1818 A.D. Transfer from the Bundelkhand states acquired the Bhera *pargana* of Banda tahsil in 1818 A.D. The *parganas*, Rahatgarh in Sagar tahsil and Garhakota, Deori, Gourjhamer and Naharmow in Rehli tahsil collectively known as **Punch Mahal** were handed over to British by Sindhiya at different dates from 1820 to 1825 for management. The Shahgarh *pargana* of Banda tahsil was confiscated in 1857 in consequence of the rebellion of its chief. The Kanjia *pargana* of Khurai tahsil was acquired from Sindhia by a treaty in 1860 A.D. A small area in the north-east corner of the tahsil around the village of Hirapur was similarly transferred to the British from Charkhari state to Bundelkhand and added to the district after the uprising of 1857.

Administratively, the position of Sagar and the neighbouring territories underwent frequent changes. The Saugor territory was, first of all, placed under the superintendent of Political Affairs of Bundelkhand. Later, in 1820, this area, called the Saugor and Nerbudda territories were placed under the administration of an Agent to the Governer General. The Saugor and Nerbudda territories were included in North- western province in 1835. In 1842 occurred the Bundela rising, but order was restored in 1843 and the Saugor and Nerbudda territories were again placed under the political control of an Agent to the Governor-General. These territories were once again restored to the North-western provinces in 1853. Thereafter, in 1861 the Saugor and Nerbudda territories along with the Nagpur state formed a Commissioner's Province called Central Provinces.

Sagar, the headquarters of the Sagar commissionership for a short period, ceased to be so in 1863-64, when this district was incorporated with Jabalpur commissionership. In the year 1932, the district of Damoh was added to Sagar district and was administered as sub-division. In 1956, however, Damoh sub-division was again separated from the district to form a separate district and initially Sagar district consisted of four tahsils viz. Sagar, Khurai, Rehli, and Banda.

(iii)Administrative setup

According to Census 2001, the total number of villages are 2076, out of which, 1901 villages are inhabited and rest of the 175 villages are un-inhabited. In the district there are 9 tahsils and tahsilwise number of villages are, Bina(177), Khurai (380), Banda (307), Rahatgarh (141), Sagar (381), Garhakota(110), Rehli (136), Kesli (189) and Deori (255). C.D. blocks are eleven, Bina, Khuri, Malthon, Banda, Shahgarh, Rahatgarh,, Sagar, Jaisinagar, Rehli, Kesli and Deori. As per urban classification, there are seventeen towns in the district, namely, Bamora, Bina Railway Colony, Dhana, Karrapur, Makronia Bujurg, Rajakhedi etc are Census Towns (CT). Banda, Rahatgarh, Shahgarh and Shahpur are the Nagar Panchayat, Bina, Etwa ,Deori, Garhakota, Khurai and Rehli are the Municipalities; Sagar is Municipal Corporation and Sagar Cantonment is Cantonment Board. There are 753 Gram panchayats in the district.

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the key functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

The Collector is the chief executive officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various departments, control over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, Election and Relief measures during emergencies and natural calamities like floods, famine, epidemics etc. come within his purview.

The narrative on the organizational set-up of the collectorate may be divided into three main functionaries viz. (i) land revenue, land-records including consolidation of land and other allied matters for which, Deputy Collectors, Tahsildars, *Naib* Tahsildars, Revenue inspectors and 395 *Patwaris* assist the Collector (ii) Law and order: Superintendent of Police is the head of police department at the district headquarters. In order to facilitate proper and smooth functioning of judiciary and administration there are 30 police stations and one Harijan Welfare police station and 22 police outposts in the district and (iii) Development : The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under Excise Act to implement the excise and prohibition policy of the Government.

The Judiciary is an independent. At the district level, there is District Court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges posted at tahsil level.

(iv) Physical Features

Situated in the north-eastern part of Malwa region, Sagar district lies between 23°08' and 24°27' north latitudes and 78°04' and 78°20' east longitudes. The elevation of the district is about 1500 feet to 1750 feet above mean sea level. As per the Census 2001, it's geographical area is 10,252 Sq.kms, as reported by the Surveyor General of India. It is the 6th largest district of the state in respect of the area which is 3.33% of the total area 308,245 Sq km. of Madhya Pradesh. The Tropic of Cancer passes through the southern part of the district. Sagar district is bounded on the south by Narsimhapur and Raisen districts, on the west by Vidisha and Guna districts and on the north by Chhatarpur and Jhansi district of Uttar Pradesh and in the east by Damoh district.

The district is mainly composed of Sagar and Bina plateaus. Vidhya ranges extend in the southern part of the district. In the north, Malthon ranges of granites are predominant. Western part of the district is of flat topography. This undulating plateau area is eroded by a number of streams and various rivers, all of which run in a nearly south-north or south-west to north-east direction and numerous hillocks are dotted on the surface.

The relief of the district is best understood in terms of the physical divisions which are represented by the basins of various rivers. The Khurai tahsil in the north-west, which is almost of level tract and forms the main wheat producing area in the district. This low land, with an elevation of about 1350 to 1400 feet (411.5-426.7metres) above mean sea level is drained towards the north-west by the Jhimpa, Parasari and Bina rivers, all are tributaries of the river Betwa. The Khurai plain

is fairly separated from the rest of the district by a series of steeply rising hills, all mostly wooded and running north-east to south-west (from Pithoria to Rahatgarh). These hills, all over 1750 feet (533.40 metres) above mean sea level also act as the water shed between the tributary hills of the Bina and Jhimpa rivers on the one hand and the Dhasan on the other. Maximum elevation in this range is Tora Peak (2108 feet or 642.51 metres). Nestling amongst these hills is the large village of Rahatgarh, washed by the waters of the river Bina.

Five parallel valleys of Dhasan, Bewas, Sonar, Kopra and Bamner dotted over with numerous tapering to the south-west (elevated over 1500 feet) and decreases to the north- east form rich agricultural tracts that contain all the important settlements (excluding Sagar), like, Naryaoli in the Dhasan basin, Banda in the Bewas basin and Rehli and Garhakota in the Sonar basin separated by ranges of hills rising 300-500 feet (91.44-152.40 meters), Patharia(near Sagar city) being 2035 feet(620.26 meters) and Tendu darbar being 2182 feet (665.07 meters)above mean sea level with flat summits are mostly wooded. But these steeply rising belts do not continue more than about 25 kilometer within the district. Naharmau (2,242 feet or 683.4 metres) the highest point in the whole district is located within this range. Lastly a small group of hills rising to a maximum of 2167 feet (660.50 metres) at Silanda separates the tributaries of the upper Sonar and Bamner rivers.

Drainage System

Separated from the Narmada valley by a steep escarpment and having a general slope towards the north, Sagar district forms the catchment of the river Ganges although the river Narmada is (9.6 kms) from the southern corner of the district. Two small streams,viz. the Biranj and the Sindhor take their waters to the Narmada. The drainage of the district is towards the north and the north-east. The principal rivers are the Sonar, the Betwa, the Dhasan, the Bina and the Bewas.

The Sonar river has it's source in the south-western corner of the district, flowing through Rehli tahsil, Gaurjhamer and Garhakota and passes into Damoh district. Its principal tributaries, i.e Dehar joins it at Rehli and Godheri at Garhakota. River Kopra is another tributary of Sonar raises in the centre of the Rehli tahsil flows into Sonar in Damoh district. River Bewas enters the district on the south-west from Raisen district and meets north-east cutting the Sagar-Jabalpur road near Sanodha village (14 kms. from Sagar). River Dhasan enters the district from Raisen and passes towards north course and drains the central portion of Sagar tahsil and north of Banda tahsil as well as forms the boundary between Sagar and Jhansi district of Uttar Pradesh covering only 40 kms. in this district. But river Bina flows from its origin and covers several kilometres to the south of the district, almost north part or Rahatgarh village (50 feet height waterfall) and then turns westwards, and ultimately joins the river Betwa forming the boundary of Sagar and Vidisha districts. River Betwa only forms the boundary of Sagar and Guna districts.

These rivers sometimes submerge the bridges on the Sagar-Jabalpur road stopping traffic during rainy season. Similarly the Sonar floodwater at the Bewas and the Dehar create same situation on the Sagar-Narsimhapur road during rainy season.

Climate

The climate of the district on the whole is pleasant and salubrious The rainy season commences with the onset of monsoon sometimes in middle of June The transition from rainy to winter condition occurs in October. After monsoon the temperature from November till mid February decreases and winter is followed by the hot season from March to the middle of June. January is the coldest month and May is the hottest month of the year. A heavier amount of rainfall occurs by depression that comes from the Bay of Bengal during the monsoon months and occasionally along the south-western boundary in association with post monsoon storms and depressions and diminishes towards the north and slightly towards the east of the district. Banda records lowest rainfall in the district. The average rainfall over the district is between 40 to 50 inches (1016 mm to 1270mm). Thunderstorms occur practically throughout the year. Fog may occur occasionally in the winter season.

Flora and Fauna

Sagar district is one of the most extensively forested districts. Belonging to the Northern tropical

dry deciduous type, consisting of teak forests and mixed forests occur on the Vindhyan sandstone in the Banda and Khurai tahsils and over a large part of the Mohli block in the east of the Rehli tahsil. Teak occurs as a predominant species on the Trap hills (mostly in the Rehli and Sagar tahsils). On the slopes of hills the proportion of teak is less. The chief species are *Saj* (Terminalia tomentosa),*Tendu*(Diospyrosmelonoxylon), *Amla* (Embica officinalis), *Achar* (Buchanania lanzam), *Bel* (Aegle mainlos) *Semal* (salmalia malabarica), *Bhirra* (Chloroxylon swietenia), *Khair* (Acacia Catechu) *Amaltas* (Cassia fistula), *Arjun* (Terminalia arjuna), *Kumbhi* (Careya arborea), *Mahua* (Madhuca indica) etc. Some areas are covered entirely under grass known as wastelands producing good fodder for cattle. Among open country flora, a thick bushy growth of *Jamun* (Syzyxium cumini) occurs along the *nallah*.

The animals found in the forests of the district are lion(16), tiger (Felis tigris), panther (Felis pardus), hynaenas (Hyaena stirata), chinkara (2507) (Gazella bennettic),cheetal, spotted deer (Cervus exis), *sambhar* (407) (Cervus unicolor) etc in the larger grassy block of forests in the Rehli and Deori ranges. *Nilgai,* (7161) (Boselaphus tragocamelus) are in abundance. Black buck (Antelope Cerricaprae) and wild pigs (6848) (Sus critatus) are found all over the forest. The Indian sloth bear (Melussus urrinus) is usually confined to the rocky region and dense forests. Altogether, there were 38,250 wild animals recorded in the year 2001.

Minerals

Occurrence of iron-ore of Bijawar series was reported at Hirapur, Amarman, Thigora, Dalipur and Baraitha in Banda tahsil of Sagar district. Limestone is found in substantial quantity at Bijawar in Banda tahsil and in the vicinity of Hirapur, Thigora and Indore. White clay along with the Cherty and concretionary lime-stone and building-stones of the numerous rock types are found in Banda tahsil.

Soil

Local names of soil types found in this district are *Mar, Kabar, Mund, Rathia, Raiyan, Patarua* and *Bhatua*. The *Mar* is a clayey soil, very fertile and retains moisture and does not crack much. *Mar* however, covers only 1% of the cultivated area and is found principally in Khurai tahsil and a little in Rehli tahsil. *Kabar* is a first-rate black cotton soil covering only 5 % of the cultivated area and found chiefly in Rehli and some parts of Banda tahsil. Inferior to *Mar* or *Kabar* with a looser texture in two varieties i.e. *Mund awwal* and *Mund dooyam*, the former being black or nearly black in colour containing little lime-grit and the latter is of brighter colour containing more limestone pebbles and sand covering approximately 49% of the cultivated area. *Rathia* an inferior to *Kabar* soil covering about 5% of the cultivable area and is fit for wheat cultivation. Distinguished from *Mar, Kabar* or *Mund* by its shallowness and the rock underlies at a small depth, *Raiyan* covers about 12 % of the cultivable area. *Patarua* is an inferior variety of *Mund* and is a thin soil, brown in colour and of loose friable texture found on un even ground and covers about 22% of the cultivated area and is good for inferior crops.*Bhatua* is the poor land, generally of reddish colour, covers with cobblestones and covers about 5 % of the cultivated area whereas inferior *kodon kotta* (autumn millet) and oil seed crops are cultivated in the district.

Soils named according to classification of soil are in the district are *Sasiro, Bharkila, Ujarha, Bandhia, abpashi, Geunra* and *Mamuli.*

Land Use

Out of total land of 1,025,200 hectares, 592,673 hectares (60%) were agricultural land where wheat, gram, linseed, jowar, paddy, potato, *tur*, soyabean etc. are mainly produced. Total irrigated land is 168,442 hectares which is 16% of total suitable land for agriculture. Different types of land are *Mar, Kabar, Mund* and *Ratha* locally known *as Sasiro, Bharkila, Ujarha, Bandhia, Alpashi, Geunra* and *Mamuli* respectively. In addition, reserved forest land was191,614 hectares and unreserved was 97,195 hectares, cultivable land was 7,881 hectares and non-cultivable land was 51,860 hectares. And under *Padat* (barren land) was 21,548 hectares and un-irrigated land was 424,231 hectares (41%) in the district.

Agriculture

21.76% of total populations of the district depend on agriculture. Predominant crops are wheat and

paddy, jowar and gram, tuar and soyabean etc, the areas of which are 280,810 hectares, 8967 hectares and 6353 hectares respectively. Among vegetables including potato 2200 hectares, fruits 96 hectares and spices 40 hectares are produced. *Urad* and other pulses, sugarcane, *til* and groundnut also are produced in the district.In 236,130 hectares, pulse, *Tilhan* etc. were sown in the district. Total crop grains in 592673 hectares where grains production is 2,522,567 metric tones. Excellent export quality of wheat 11,378 kg was produced in Sagar district, especially in Bina and Khuria tahsil.

Irrigation

Irrigation is done mainly through canals (7242 hectares land) followed by ponds, bore-wells, wells(81,946 hectares of land i.e. 8%) and other water sources like small streams, nallas and spring water lakes and rivers (62844 hectares of land). Total area is 1,025,200 hectares of which, from all sources, irrigation area was 168,442 hectares. Net irrigation area was 16% of net sown area.

Animal Husbandry

Cattle rearing play an important role in the source of livelihood. As per 1998-1999 animal census, cows were 403,265, buffaloes were 72,165 and goats number was 109,647 by which butter, cheese and ghee is produced and sold. Cow-dung manure, biogas, hide and meat were also produced from cattle.

Fishery

Sagar district is rich in water resources. Rivers are perennials and district has many lakes and ponds. There are many feeding rivers like Narmada,Sonar, Betwa, Dhasan, Bina and the Bewas where fishes like *Rohu*, *Meheir*, *Murail, Sanwal, Katla, Rohu*, *Sirhyna*, *Padhin*, *Mnitus*, *Singala* and *Barbas Saran* are found.

Industry

There are 10,702 industrial units in the district including 10,679 small-scale industries of oil mills, handloom cotton and leather works. Largely established *bidi* household industries can be seen in each household. *Bidi* firms get the *bidis* through middlemen known as *sattedars*. The second chief product is *Agarbatti* (scented sticks).Other industries are straw board, vegetable oil, refined oil, Super Phosphate Fertilizer, steel utensils, plastic goods, detergent powder cake, *Maida*, agriculture equipments, welding electrodes, aluminum, *Dal* mills, PVC cable pipe, Solvent plant, granite, Acrylic sheet and acrylic products found in Khurai , Bina and Sagar.

Generally Sagar town and district enjoyed a goods import trade center in past and at present. Wheat, oil seeds, linseed etc, are the surplus productions which are largely exported from the district. The chief articles of import are salt, sugar, both Indian and European metals, tobacco, hardware, spices and medicines.

Transport And Communication

The nature of the soil of the district in many places is unsuitable for carts, trucks and tractors during monsoon. The surface transport has been improved over years. In the year 1931 the total length of the road was only 465.07 kms. out of which, 385.40 kms. were all weather roads and 79.68 Kms. were un-metalled. The length of national highway is 156.20 kms. State highway is 162 kms. Main district roads are 119.70 kms. Minor district roads are 171.10 Kms. For urban area transport, the municipal roads are 65.80 kms. The total length of pucca roads are 1583 kms. and kuchcha roads are 252.80 kms. and rail line is 166 kms. There is an airstrip for occasional landing of light planes near Dhana village at a distance of 17.6 kms off Sagar-Raheli road.

In the year1998-99, there were 48822 registered vehicles in which 9552 were trucks, bus and tractors, 39270 were motorcycles, scooters and mopeds in the district. There were 259 post offices, 13 telegraph offices, 204 public telephones and 15,882 telephone connections. At the district level fax and internet facilities are available.

Electricity and Power

During 1930's, Thermal Power Station with an installed capacity of 2,500 K.W. and Diesel Power Plant with an installed capacity of 800 K.W. were started. In the year 1957, another Diesel Power Station

was commissioned at Bina, the tahsil headquarter with an installed capacity of 314 KW. Presently Madhya Pradesh Electricity Board is providing electricity to the district. The consumption for industrial units was 13,733 KW. and domestic consumption was 98291 KW as reported. The total consumption of electricity was 112,024 KW. and numbers of consumers were 143,791.For domestic consumption 98,291KW. and for non domestic consumption,13733 KW as reported.

Gram Panchayat

Panchayat is the basic institution of local administration as well as the foundation of decentralized administration. Under the Directive Principles of State Policy, the Constitution of India provides the Panchayati Raj System. Madhya Pradesh Government passed Madhya Pradesh Panchayat Adhiniyam. Under 73rd amendment of the constitution, Madhya Pradesh Government passed the Panchayat Notification 1993, which provides panchayat for villages, Janpad panchayats for blocks and district panchayat for district. Under Gram Sabha Notification 2001, Gram Sabha is a constitutionally approved unit which confers all major persons with voting rights to elect Panch, Sarpanch and also members of Janpad and members of district Panchayat. Constituted with the elected members, these institutions work for five years. At all level, there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is 1/3 reservation. There are 753 Gram panchayats, 11 Janapad panchayats and one district panchayat in the district having each 10-20, 10-25, 10-35 members respectively.

Gram panchayat within its jurisdiction and within it's budget, can take up an works related to cleanliness, water supply, public works (roads, buildings, well tanks) marketing, co-operation to Government works, community health and development works. Janpad panchayat within its budget take up works like community development and village integration, agriculture, social, commerce, cattle-rearing, fish-breeding, adult-education, co-operatives, cottage industry, welfare and employment oriented programmes. It is the duty of the district panchayat to have control over Janpad panchayats and Village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works.

(v) Census Concept

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together

were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are

called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of

the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina

5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil) Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia
    (i) Chhindwara, Mandla, Dindori and Seoni districts
    (ii) Baihar tahsil of Balaghat district
    (iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
    (iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
    (v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
    (vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
    (vii) Narsimhapur district.
    (viii) Harsud tahsil of Khandwa district.
41. Parja
42. Sahariya, Saharia, Seharia, Sehria, Sosia, Sor
43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will

be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the

cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi)Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a

septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country,

state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Sagar district comprises of 1,901 inhabited villages, 175 uninhabited vilages and total 2,076 villages distributed among nine tahsils and eleven number of CD blocks. The district has 17 towns. Among these only Neemuch (M) has two urban outgrowths (OGs). The average household size of the district is 5.4. Total population of the district is 2,021,987 comprising 1,073,205 males and 948,782 females. Thus the sex ratio of the district works out to 884 which is better than the sex-ratio of the state (919). Density of the district is 197 persons per sq.km. which is marginally higher than the density of the state which is 196. Literacy rate of the district 67.3 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 20.54 per cent and 9.72

per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii) Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bina	136,570	86,314	50,256	173,796	107,982	65,814	27.3	25.1	31.0	36.8	37.9
2	Khurai	231,624	199,170	32,454	293,067	251,556	41,511	26.5	26.3	27.9	14.0	14.2
3	Banda	234,081	198,138	35,943	283,590	242,921	40,669	21.2	22.6	13.1	15.4	14.3
4	Rahatgarh	86,332	66,377	19,955	105,639	80,424	25,215	22.4	21.2	26.4	23.1	23.9

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 22.7 percent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 22.7 percent, while for urban areas it is 22.8 percent. Among the tahsils, Bina has registered the highest decadal growth rate of 27.3 percent. The growth rate in rural area is highest in Deori tahsil and it is highest in Bina for urban area of the district. The percentage of urban population to total population of the district is 29.2 percent both in 1991 and 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200

Table 2 gives CD blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD block level in the district. Out of the 1901 inhabited villages, 319 (16.8 percent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 575 villages having 30.2 percent villages of the district while in the size class of 500-999 population there are 583 villages constituting 30.7 percent of total villages. 311 villages (16.4 percent) are in the size class of 1000-1999 and 99 villages (5.2 percent) are in the size class of 2000-4999. There are 14 villages (0.7 percent) in the size class of 5000-9999 and there is no village which falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town

1 Malaykhand(NP)

(ii) Census town

1 Bharveli

2 Hirapur

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

NIL

(iii) Census towns of 1991 census are notiified as statutory town in 2001 census

NIL

(c) Declassified

NIL

(d) Wholly merged with other town(s)

NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	48	2.5	3,641	0.3
11-20	20	1.1	790	0.1
21-50	94	4.9	10,994	0.8
51-100	285	15	81,665	5.7
101-200	837	44	587,547	41.1
201-300	427	22.5	421,608	29.5
301-500	147	7.7	212,009	14.8
501 +	43	2.3	112,826	7.9
Not known	0	0	0	0
District Total:	1901	100	1,431,080	100
Population Density (Rural) of the district:			181.9	

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 837 accounting for 44.0 percent of the total inhabited villages of the district fall in the density range of 101-200 persons having 41.1 percent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 68 villages (3.6 percent). 43 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-500 is 30.2 percent of the total inhabited villages having 44.3 percent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 4.9 and 15.0 per cent of inhabited villages. Both these ranges claim 6.5 percent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	973	984	911
1911	967	973	903	960	973	885
1921	949	959	863	941	953	857
1931	947	957	862	942	948	909
1941	946	957	869	979	989	928
1951	945	953	902	934	937	918
1961	932	947	860	920	935	871
1971	920	934	864	892	903	861
1981	921	934	878	891	899	871
1991	912	921	887	881	884	874
2001	919	927	898	884	880	894

As per 2001 Census, sex ratio of 884 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly higher in 1941over the state average figures. The lowest sex ratio of 881 females per 1,000 males was recorded in the district in Census 1991.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bina	901	895	911
2	Khurai	890	888	901
3	Banda	876	871	903
4	Rahatgarh	874	868	894
5	Sagar	878	870	887
6	Garhakota	892	884	914
7	Rehli	885	884	889
8	Kesli	893	893	-
9	Deori	892	888	911
	District Total:	884	880	894

The table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 880 whereas it is 894 for the urban area. The sex ratio in rural area is highest 895 in Bina tahsil while in urban area it is highest 914 in Garhakota tahsil. The sex ratio of the district is 884 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Bina	895
2	Khurai	896
3	Malthone	879
4	Banda	868
5	Shahgarh	875
6	Rahatgarh	874
7	Jaisinagar	855
8	Sagar	876
9	Rehli	884
10	Kesli	893
11	Deori	888
	District (Rural) Total:	880

The table 7 gives the CD blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 880 females per 1,000 males. Among the CD blocks the highest sex ratio of 896 is found in Khurai CD block and the lowest of 855 is recorded in Jaisinagar CD block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
LESS THAN 700	61	3.2	5,015	0.4
700-749	55	2.9	18,973	1.3
750-799	134	7.0	63,725	4.5
800-849	357	18.8	275,729	19.3
850-899	556	29.2	592,003	41.4
900-949	390	20.5	325,291	22.7
950-999	191	10.0	108,173	7.6
1000-1099	119	6.3	38,456	2.7
1100+	38	2.0	3,715	0.3
District Total:	1,901	100.0	1,431,080	100.0
Sex ratio (Rural) for District:			880	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 556 accounting for 29.2 percent of the total villages having largest population of 41.4 percent in the district fall in the sex ratio range of 850-899. It is followed by 390 villages constituting 20.5 percent of total villages and 22.7 percent population falling in the range of 900-949. The sex ratio in rural areas of the district is comes to 880.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Bamora	CT	915
2	Banda	NP	900

		Urban	90,470	46,906	43,564	929

The table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 931 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 932 and 929 respectively. The rural sex ratio in tahsil varies between 927 in Banda tahsil to 941 in Kesli tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

District (Rural) Total:		279,334	144,571	134,763	932

Table 11 gives CD blockwise sex ratio of rural population in the age group of 0-6 years in the district. The sex ratio is 932 for the district (rural). The sex ratio of CD block varies between 920 to 943. It is highest in Jaisinagar CD block and lowest in Banda CD block.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distri-bution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	211	11.1	11,171	4.0
700-749	85	4.5	9,334	3.3
750-799	127	6.7	17,611	6.3
800-849	179	9.4	33,565	12.0
850-899	207	10.9	42,773	15.3
900-949	207	10.9	45,121	16.2
950-999	150	7.9	33,416	12.0
1000-1099	314	16.5	47,190	16.9
1100+	421	22.1	39,153	14.0
District (Rural) Total	1901	100.0	279,334	100.0
Sex ratio (Rural) for District:			932	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e. 421 (22.1 percent) having population (14.0 percent) in the district (rural) fall in the sex ratio range of 1100+. It is followed by the sex ratio range of 1000-1099 which claims 314 villages (16.5 percent) and 16.9 percent population. Next to it 211 villages (11.1 percent) and 4.0 percent population are in the range of Less than 700. Minimum number of villages i.e. 85 (4.5 percent) and 3.3 percent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Urban	590,907	120,249	10,208	20.3	1.7

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 2,021,987 total population of the district 20.5 percent belong to the Scheduled Castes and 9.7 percent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 20.6 percent in rural population and 20.3 percent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Khurai tahsil (23.8) while the lowest is found in Kesli tahsil (11.0). The proportion of Scheduled Tribes population is 13.0 and 1.7 percent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Kesli tahsil (29.6 percent) and the lowest Scheduled Tribes population is recorded in Rahatgarh and Sagar tahsil (5.1 percent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bina	107,982	24,893	18,910	23.1	17.5
2	Khurai	125,395	33,847	16,139	27.0	12.9

	District (Rural) Total:	1431,080	295,125	186,264	20.6	13.0

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD block of the district. 20.6 percent of rural population of the district belongs to Scheduled Castes and 13.0 percent to Scheduled Tribes. Scheduled Castes population is highest (27.0 percent) in Khurai CD block whereas it is lowest (11.0 percent) in Kesli CD block. Scheduled Tribes population is highest (29.6 percent) in Kesli CD block and it is lowest (6.4 percent) in Jaisinagar CD block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	309	16.3	0	0.0
Less than 5	191	10.0	2,294	0.8
5-10	233	12.3	12,943	4.4

21-30	360	18.9	99,522	33.7
31-40	190	10.0	52,831	17.9
41-50	104	5.5	30,335	10.3
51-75	53	2.8	13,180	4.5
76 and above	23	1.2	4,110	1.4
District Total	1,901	100.0	295,125	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 309 villages accounting for 16.3 percent of total 1901 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 percent in 191 villages (10.0 percent). In 233 villages it varies between 5-10 percent while the next range of 11-20 percent accounts for 438 villages. The range of 21-30 and 31-40 percent contains 360 and 190 villages respectively. There are 104 villages in the range of 41-50 and 53 villages in the range of 51-75. Only 23 villages are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	414	21.8	0	0.0
Less than 5	318	16.7	6,670	3.6
5-10	309	16.3	23,612	12.7
11-20	289	15.2	39,642	21.3
21-30	162	8.5	29,106	15.6
31-40	104	5.5	20,518	11.0
41-50	59	3.1	10,629	5.7
51-75	117	6.2	23,964	12.9
76 and above	129	6.8	32,123	17.2
District Total	1,901	100.0	186,264	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 414 villages accounting for 21.8 percent of total 1901 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 percent in 318 villages (16.7 percent). In 309 villages it varies between 5-10 percent while the next range of 11-20 and 21-30 accounts for 289 and 162 villages. In 104 villages it varies between 31-40 percent while the next range of 41-50 and 51-75 accounts for 59 and 117 villages. There are 129 villages in the ranges of above 76 percent.

12	Shahgarh (NP)	878	1011
13	Shahpur (NP)	880	943
Sex ratio (Urban) for the district:		884	895

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is 884 in Scheduled Castes and 895 in Scheduled Tribes.

Among the towns of the district, Scheduled Caste sex ratio is not above one thousand. Sex ratio for Scheduled Castes is highest 936 in Deori (M) while the lowest being 842 in Dhana (CT). Sex ratio for Scheduled Tribes is above parity in 4 towns i.e. Bina - Etawa (M) (1036), Shahgarh (NP) (1011), Sagar Cantt.(CB) (1043), Garha kota (M) (1017). Sex ratio for Scheduled Tribes is lowest in Rahatgarh(NP) (605).

Table 21 Tahsilwise and District literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 67.7 percent in the district. This proportion in rural area is 61.3 percent and 82.5 percent in urban areas. In the district the literacy rate of males 79.4 percent is much higher than that of females which is 54.4 percent.

Among the tahsils, Sagar tahsil tops with 75.5 percent literates and the lowest literacy rate 59.3 percent is recorded for Banda tahsil. Overall in the district gap in male-female literacy rate comes to 25.1 percent.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total:		706,304	460,763	245,541	724,776	300,480	424,296	61.3	74.7	45.9	28.8

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD block level in the district. 61.3 percent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 74.7 and 45.9 percent respectively. At CD block level Sagar CD block has the highest rural literacy rate of 67.2 percent while the lowest literacy rate of 54.1 percent is recorded for Shahgarh CD block. Overall gap in male-female literacy rate in the district is 28.8 percent.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	9	0.5	127	0.0
1-10	9	0.5	965	0.1
11-20	34	1.8	5,679	0.4
21-30	54	2.8	12,851	0.9
31-40	111	5.8	44,547	3.1
41-50	286	15.0	162,225	11.3
51-60	525	27.6	402,311	28.1
61-70	564	29.7	524,467	36.6
71-80	242	12.7	241,456	16.9
81-90	54	2.8	34,965	2.4
91-99	7	0.4	1,453	0.1
100	6	0.3	34	0.0
District Total:	1901	100.0	1,431,080	100.0
Literacy rate for District:			67.7	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 9 villages (0.5 percent) of the district and population of these villages is only 127. There are 6 villages having 100 percent literacy. Highest number of villages i.e. 564 villages fall in the literacy range of 61-70 percent. This accounts for 29.7 percent of total villages and 36.6 percent of the district population.

61-70	349	21.9	78,795	26.7
71-80	114	7.2	17,650	6.0
81-90	37	2.3	3,352	1.1
91-99	6	0.4	433	0.1
100	24	1.5	86	0.0
District Total:	1592	100.0	295,125	100.0
Literacy rate for District (Rural):			55.6	

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 55.6 percent. Highest number of villages i.e. 441 villages fall in the literacy range of 51-60 percent. There are only 24 villages which have 100 percent literacy rate of Scheduled Caste population. 37 villages are such where the literacy rate of Scheduled Caste population is 0 percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 34.3 percent of the total population of the district (Urban) and the proportion of non-workers is 65.7 percent. The total workers are constitutes male workers 47.6 percent whereas female workers are only 19.4 percent.

Among males, 44.6 % are main workers and 2.9% are marginal workers whereas among females, corresponding figures are 14.5% and 4.9% respectively.

				(30.4)	(16.9)	(29.4)	(44.0)	(9.7)

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 26.6 percent of the total workers (main + marginal), 25.8 percent of total workers are engaged as agricultural labourers, 24.3 percent as household industry workers and 23.3 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on cultivator sector absorbing large number of workers. The proportion of cultivators varies between 18.2 percent in Sagar tahsil and 40.9 percent in Kesli tahsil. The percentage of males cultivators is 31.6 percent which is high as compared to 16.9 percent of female cultivators in the district. The percentage of household industry workers is low in the district as stated above. The highest proportion of 36.6 percent of other workers is recorded in Sagar tahsil while the lowest proportion of 7.7 percent is found in Kesli tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 44.5 percent of total population. Among these workers cultivators constitute 33.6 percent, agricultural labourers 33.3 percent, household industry 22.1 percent and other workers constitute 11.1 percent. The proportion of cultivators is highest 41.0 percent in Shahgarh CD block and it is lowest 26.4 percent in Sagar CD block. Proportion of agricultural labour is highest 52.7 percent in Bina CD block and lowest 21.0 percent in Sagar CD block. It is also seen that the proportion of female workers is more than male workers under the category of agricultural labour and household industry workers.

				(19.4)	(2.3)	(2.5)	(69.2)	(26.1)

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 34.3 percent of total workers, cultivators constitute 4.6 percent, agricultural labourers 2.3 percent, household industry 31.5 percent and the highest proportion is covered by other workers which is 61.6 percent. It is also found that proportion of female workers under agricultural labour and household industry workers are more than the male workers proportion whereas proportion of male workers under cultivation and other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 25.4 percent in Shahpur (NP), agricultural labourer is highest 18.0 percent in Shahpur (NP), household industry workers is highest 72.1 percent in Rahatgarh (NP) and other workers is highest 94.1 percent in Bina Rly Colony(CT).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1901 inhabited villages in the district 1428 villages or 75.1 percent have been provided with the education facilities of one type or the other. Similarly 379 villages in the district constituting 19.9 percent have medical facilities of one type or the other. Improved drinking water facility is available in 1817 or 95.6 percent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 231 villages constituting 12.2 percent of villages have been provided with post office facility within the villages. 287 or 15.1 percent villages have been provided with the telephone facility, 366 or 19.3 percent with transport facility, 37 or 1.9 percent villages with bank facility and 109 or 5.7 percent with agricultural credit societies. Similarly there are 436 or 22.9 percent villages which are linked with the pucca road. Total 1825 or 96.0 percent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Bina CD block has the highest 87.0 percent villages where educational facility is available and lowest 53.6 percent is found in Deori CD block. Medical facility is highest in Banda (32.9 percent) and lowest 6.9 percent in Malthone CD block. Improved drinking water facility is highest in Bina CD block (99.4 percent) and it is lowest in Kesli (89.5 percent). In the field of power supply all villages have been covered except 76 villages in the district.

TABLE 38 : NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,431,080 persons in the district, 1,335,067 or 93.3 percent have educational facility of one or the other type. Similarly 587,826 or 41.1 percent population has medical facilities while 1,403,935 or 98.1 percent have improved drinking water facility. Post office facilities are available to 469,352 or 32.8 percent population. Telephone facility is available to 425,045 or 29.7 percent. Transport communications facility is available to 506,603 or 35.4 percent. Bank facility is available to 139,272 or 9.7 percent. 230,057 or 16.1 percent have been provided with the facility of agricultural credit societies. 539,951 or 37.7 percent have been provided with the facility of approach by pucca road. Power supply is available to 1,402,059 or 98.0 percent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-

3. Post Office	880	594	196	1,670
4. Telephone	445	513	656	1,614
5. Bus Service	751	565	225	1,541
6. Banks				
(a) Commercial Bank	116	234	1,520	1,870
(b) Cooperative Bank	205	497	1,183	1,885
7. Agricultural Credit Societies	507	523	762	1,792

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 474 villages do not have primary school and out of these villages, children of 436 villages have to travel less than 5 kms. for schooling. Out of 1901 inhabited villages as many as 1581 are deprived of middle school and 1898 of degree college. Of these 932 avail the facility of middle school at a distance of less than 5 kms., 538 at a distance 5-10 kms. and the remaining 111 at a distance of 10+ kms. In respect of degree college 9 avail this facility at a distance of less than 5 kms., 15 between 5 to 10 kms. and rest 1874 villages at a distance of 10+ kms.

Similarly there are 1887 villages in the district which have been devoid of Hospital facility and 1877 villages which are deprived of PHC facilities. Of these 194 villages have the facility of Hospital available within 5 kms. while in respect of 426 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 1267 villages have this facility at a distance of 10+ kms. As regards PHC no facility is avail at a distance of less than 5 kms. and at a distance of 5-10 kms. 1877 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1670 villages do not have this facility in the village itself. Of these majority i.e. 880 have this facility at a distance of less than 5 kms., another 594 villages avail it at a distance of 5-10 kms. In the remaining 196 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1614 villages in the district which are without telephone facilitiy. Of these 445 avail this facility at a distance of less than 5 kms., 513 at a distance of 5-10 kms. and remaining 656 have to traverse a distance of 10+ kms.

For Bus service out of 1541 villages which do not have facility, 751 villages avail this facility at a distance of less than 5 kms., 565 at a distance between 5-10 kms. and 225 at a distance of 10+ kms.

In the entire district 1870 villages are deprived of Commercial Bank and 1885 of Co-operative Bank. Of these 1870 villages which are deprived of Commercial Banks 116 villages avail this facility at a distance of less than 5 kms., 234 between 5-10 kms. and the remaining 1520 at a distance of 10+ kms. Regarding Co-operative Banks out of 1885 villages 205 villages avail this facility at a distance of less than 5 kms., 497 at a distance of 5-10 kms. and remaining 1183 at a distance of 10+ kms. 1792 villages do not have agricultural credit societies. This facility to 507 villages is available at a distance of less than 5 kms., 523 at a distance of 5-10 kms. and the remaining 762 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	(33.3)	(33.3)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)
District total	1901	1428	379	231	287	378	37	109	436
	(100.0)	(75.1)	(19.9)	(12.2)	(15.1)	(19.9)	(1.9)	(5.7)	(22.9)

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1901 inhabited villages in the district, there are 123 villages which have nearest towns upto a distance of 5 kms. Of these only 82 villages forming 66.7 percent of total villages, are having the educational facilities atleast one type and 23 villages constituting 18.7 percent, have the medical facilities within the range of 5 km., 10 villages forming 8.1 percent have the facility of post office, 22 villages forming 17.9 percent have the facility of telephone within the range of 5 km. 32 villages constituting 26.0 percent have been linked by transport service. There is no village having facility of banks. 5 villages forming 4.1 percent have been provided by agricultural credit societies. 53 villages comprising 43.1 percent have been provided with pucca road within the distance of 5 km.

There are 767 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 585 villages constituting 76.3 percent have been provided with the educational facilities. 168 villages comprising 21.9 percent have been provided with medical facilities. 102 villages constituting 13.3 percent enjoy the post office facility. 143 villages comprising 18.6 percent have been provided the telephone facility. 166 villages constituting 21.6 percent have been linked with transport communications. 15 villages comprising 2.0 percent have bank facility. 46 villages constituting 6.0 percent are having agricultural credit societies, while 214 villages or 27.9 percent are approachable by pucca road.

970 villages fall in the distance range of 16-50 kms. Of these, 75.7 percent villages have educational facility, 19.0 percent with medical, 12.2 percent with post office, 12.6 percent with telephone and transport & communications available to 17.7 percent villages. banks and agricultural credit societies facilities are available to 2.3 and 5.9 percent of villages. Approach by pucca road facilities are available to 17.1 percent of villages.

There are 35 villages in the district which are covered under the range of 51+ kms. and 25 villages are provided with education facility. There is only 2 village having medical facility. 1 village (2.9 percent) having the facility of post office facility. There is no facility of telephone and banks. 8 villages (22.9 percent) avail the facility of transport communication and 3 villages (8.6 percent) avail the facility of approach by pucca road. There is only one village having the facility of agricultural credit society.

TABLE 41 : DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Sagar district out of a total 1901 inhabited villages, overwhelming 894 have a population of less than 500 persons. Of these, 437 villages (48.9 percent) have education facility, 70 (7.8 percent) have medical facility, 827 (92.5 percent) have improved drinking water facility. 18 villages (2.0 percent) have post office and 64 villages (7.2 percent) have telephone and 2 villages (0.2 percent) have bank facility. 85 (9.5 percent) have been linked by bus service. 8 villages (0.9 percent) has agricultural credit societies, 136 villages (15.2 percent) have been linked with pucca road. 832 villages (93.1 percent) have been provided with electricity.

Out of 583 villages, which fall in the population range of 500-999 persons, 570 villages (97.8 percent) have been provided with the education facility, 92 (15.8 percent) with medical facility, 571 (97.9 percent) villages have improved drinking water facility. 44 villages (7.5 percent) have been provided with post office facilities, 84 villages (14.4 percent) with telephone facility, 104 villages (17.8 percent) with transport facilities, 5 villages (0.9 percent) with bank facility, 16 villages (2.7 percent) with agricultural credit societies and 127 villages (21.8 percent) have approach by pucca road. 572 villages (98.1 percent) in this range have electricity.

311 villages fall in population range of 1,000-1,999 persons. Of these 309 villages or (99.4 percent) have

been provided with the education facility, 125 (40.2 percent) with medical facility, 307 (98.7 percent) villages have improved drinking water facility. 76 villages (24.4 percent) have been provided with post office facilities, 74 villages (23.8 percent) with telephone facility, 102 villages (32.8 percent) with transport facilities, 6 villages (1.9 percent) with bank facility, 45 villages (14.5 percent) with agricultural credit societies and 100 villages (32.2 percent) have approach by pucca road. 310 villages (99.7 percent) in this range have electricity.

There are 99 villages in the district which are covered under 2,000-4,999 population range. Of these, 98 villages (99.0 percent) have been provided with the education facility, Improved drinking water and power supply. 78 (78.8 percent) with medical facility. 80 villages (80.8 percent) have been provided with post office facilities, 98 (99.0 percent) villages have improved drinking water facility, 54 villages (54.5 percent) with telephone facility, 62 villages (62.6 percent) with transport facilities, 14 villages (14.1 percent) with bank facility, 31 villages (31.3 percent) with agricultural credit societies and 59 villages (59.6 percent) have approach by pucca road. 90 (99.0 percent) of villages have electricity.

There are 14 villages in the district which are covered under 5,000-9,999 population range and all the villages are provided with education, medical, Improved drinking water and approach by pucca road . 13 villages (92.2 percent) have facility of post office, transport communication and power supply. 11 villages (78.6 percent) have the telephone facility. 10 villages (71.4 percent) have facility of banks and 9 villages (64.3 percent) have facility of agriculture credit society. There are no villages in the population range of more than 10,000.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Bina	154	63,484	81.1	24.8
2	Khurai	177	73,250	81.2	18.9
3	Malthone	175	65,633	70.9	14.9
4	Banda	164	78,619	59.5	20.9
5	Shahgarh	108	48,860	52.9	38.7
6	Rahatgarh	199	79,959	66.8	26.5
7	Jaisinagar	146	72,909	60.9	36.7
8	Sagar	152	79,034	60.5	30.8
9	Rehli	221	80,410	69.7	40.4
10	Kesli	172	66,920	48.8	31.9
11	Deori	233	77,474	59.1	45.6
	District Total:	1,901	786,552	64.9	29.4

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1901 inhabited villages in the district having a total area of 786,552 hectares. Of this, 64.9 percent is cultivable and 29.4 percent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

It is seen that percentage of cultivable area to total area is highest 81.2 percent in Khurai CD block. It is lowest 48.8 percent in Kesli CD block. The percentage of irrigated area to cultivable area is highest 45.6 percent in Deori and lowest 14.9 in Malthone CD block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11

9	III Sagar Cantt (CB)	764	286	477	750	140	113	80	141	276
10	IV Shahgarh (NP)	215	151	64	216	87	2	48	0	78
11	IV Shahpur (NP)	160	75	85	157	60	38	57	0	3
	District Total	337	139	198	353	48	72	71	12	150

Note: The difference in various totals is due to rounding off the related figures.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Sagar works out to Rs.337 of which Rs.139 are derived through local taxes and the remaining Rs.198 is received from all other sources. The average of total expenditure incurred per capita is Rs.353. Out of this Rs.48 are spent on general administration, Rs.72 on public health and conveniences, Rs.71 on public works, Rs.12 on public institutions and Rs.150 is spent other items.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Banda (NP)	5.0	3.1	1.9	1.5	0.4
2	Bina-Etawa (M)	7.0	5.3	1.6	1.6	0.6
3	Deori (M)	7.6	3.4	2.5	1.3	0.8
4	Garhakota (M)	4.4	2.9	1.8	1.8	0.4
5	Khurai (M)	5.1	3.4	1.7	1.0	0.5
6	Rahatgarh (NP)	1.2	0.8	0.8	0.4	0.4
7	Rehli (M)	3.9	3.1	1.5	0.8	0.4

9	Sagar Cantt (CB)	5.2	3.9	1.9	1.9	0.0
10	Shahgarh (NP)	5.5	4.1	2.8	0.7	0.0
11	Shahpur (NP)	7.4	4.1	3.3	0.8	0.8
	District Total	5.1	2.8	1.5	1.0	0.3

Table 44 In urban areas of Sagar district the average number of primary school per 10,000 population comes 5.1 schools, 2.8 junior secondary/ middle, 1.5 secondary/matriculation, 1.0 senior secondary schools and the ratio of colleges is only 0.3 college per 10,000 population. Among the towns, the ratio of primary is highest in Deori (M) while lowest is Rahatgarh (NP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bamora(CT)	0
2	Banda(NP)	8
3	Bina Rly Colony(CT)	65
4	Bina-Etawa(M)	17
5	Deori(M)	13
6	Dhana (CT)	5
7	Garhakota(M)	4
8	Karrapur(CT)	2
9	Khurai(M)	31
10	Makronia Buzurg(CT)	0
11	Rahatgarh(NP)	3
12	Rajakhedi(CT)	13
13	Rehli(M)	4
14	Sagar(M Corp.)	31
15	Sagar Cantt(CB)	21
16	Shahgarh(NP)	21
17	Shahpur(NP)	5
	Distrct Total	21

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Sagar district. On an average there are 21 beds per 10,000 population in urban areas of the district, whereas it is the highest 65 in Bina Rly Colony (CT) while there are no beds is recorded in Bamora (CT) and Makronia Buzurg (CT).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Banda	26,183	11,950	45.6
2	Bina-Etawa	51,181	19,419	37.9
3	Garhakota	27,363	20,735	75.8
4	Khurai	41,511	23,900	57.6
5	Rahatgarh	25,215	10,776	42.7
6	Rehli	25,890	8,663	33.5
7	Sagar	244,721	8,007	3.3
8	Shahgarh	14,486	4,921	34.0
	District Total	456,550	108,371	23.7

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 456,550 urban population 108,371 persons constitute slum population which is 23.7 percent of total urban population. Garhakota town has the highest (75.8 percent) of slum populatin while Sagar town has lowest (3.3 percent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bamora (CT)	-	-
		-	-
		-	-

16	Shahgarh (NP)	Bidi Earthern Pots Brass Utensils	Brass Utensil Bidi Earthern Pots
17	Shahpur (NP)	Wooden Furniture Bidi Packing	Wheat Sugarcane Groundnut -

Table 47 indicates most important articles manufactured and exported out of each town in the district. The commodities manufactured are wooden furniture, earthern pots, bricks, pulses, agricultural equipments, bidi, agarbatti, brass utensils, welding rods, baskets, broom, phosphate, khali etc. Soyabeen, earthern pots, edible oil, masur, bidi, wheat, gram, sugarcane, groundnut, vegetable, agarbatti brass utensils, oilseeds, stone, plastic bag etc. are the other important commodities which are exported by different towns.

(x)Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52.

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 370,377 consisting of 273,645 rural and 96,732 urban households. 85,394 households belong to Scheduled Castes, 35,432 to Scheduled Tribes. 331,333 households are living in their own houses constituting 89.5 percent of total households. Of these households, the largest number of households (155,065) have occupied single room accommodation and is followed by double room accommodation numbering to 94,829 households. Next position is claimed by households 40,073 occupying three plus room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 35,627 households while 5,739 households are without any exclusive room.

25,560 households living in rented accommodation accounts for 6.9 percent of total number of households in the district. The largest number of 10,713 households are living in single roomed accommodation followed by 9,516 households in double roomed accommodation. Next position is claimed by households 3,573 occupying three room accomodation. 1,561 three plus and no exclusive rooms are 197 in numbers.

Other households numbering to 13,484 forming only 3.6 percent of total households are distributed in single roomed accommodation numbering 6,839, 3,948 double room and 1,366 in three room accommodation. 765 three plus and no exclusive room are 566 in numbers.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Bina	51.6	47.3	1.1	35.7	63.1	1.3	78.4	20.8	0.7
2	Khurai	44.2	54.9	0.9	40.6	58.5	0.9	68.4	30.7	0.8
3	Banda	73.8	25.0	1.2	72.0	26.7	1.3	86.3	13.3	0.4
4	Rahatgarh	26.1	72.1	1.8	16.5	81.5	2.0	62.0	37.1	1.0
5	Sagar	56.1	42.5	1.4	40.1	58.6	1.3	75.8	22.5	1.6
6	Garhakota	62.0	36.3	1.7	55.1	42.8	2.1	82.2	17.1	0.6
7	Rehli	40.9	56.2	2.9	35.3	61.4	3.3	63.0	35.8	1.2
8	Kesli	11.7	87.4	0.9	11.7	87.4	0.9	0.0	0.0	0.0
9	Deori	30.2	67.9	1.9	26.5	71.4	2.1	53.1	46.2	0.7
	District Total:	50.2	48.4	1.4	41.6	56.9	1.5	74.6	24.2	1.2

The data presented in Table 49 reveals that 50.2 percent of household of the district are living in houses made of pucca materials, residences of 48.4 percent households are semi permanent houses and 1.4 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 74.6 percent are living in houses constructed of pucca materials, 24.2 percent in semi-permanent structure and percentage of households in temporary houses is 1.2 constructed of kutcha materials. At rural level, the lowest percentage of 11.7 households occupying permanent structure is found in Kesli while highest percentage of 72.0 is seen in Banda tahsil. The proportion of semi-permanent houses is high in Kesli (87.4) and low in Banda (26.7) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 3.3 percent in Rehli followed by Garhakota and Deori (2.1) tahsil, Rahatgarh(2.0), Bina, Banda and Sagar (1.3), Kesli and Khurai (0.9) tahsils.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 50 indicates that 45.8 percent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well, 69.2 percent households have provision of electricity in their houses. The bathroom facility is available to only 22.2 percent households within their premises . As regards rural areas, 10.8 percent households are having bathroom facility, whereas this proportion in urban areas comes to 54.4 percent. 61.5 percent rural households have facility of electricity against 90.8 percent in urban areas. Toilet and drainage facilities in the district are available to 21.3 percent and 28.0 percent households respectively. Their percentage is higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil level almost conforms to the district pattern analysed.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that fire wood is used as the most predominant fuel used for cooking by 75.5 percent households in the district. In the tahsils, this proportion varies between 42.1 percent in Bina and 96.1 percent in Kesli tahsil. In rural and urban areas use of wood for cooking is very high. The next most common cooking fuel is L.P.G which is used by 10.6 percent households in the district. This proportion in rural & urban areas is 1.1 and 37.6 percent respectively. In urban areas use of L.P.G for cooking is high as compared to rural areas at tahsil level. There are 8.2 percent households using cowdung cake in the district. Use of cowdung cake for cooking by rural households comes to 10.6 percent while in urban areas its proportion is only 1.3 percent. There are 2.7 percent households using kerosene in the district. Use of kerosene for cooking by rural households comes to 0.4 percent while in urban areas its proportion is 9.4 percent, as a whole. The percentage of households using other types of fuel is insignificant. Both in rural and urban areas wood is main fuel.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Table 52 presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 370,377 households in the district and among them, 88,466 households have been availing banking services. 62,221 households have Radio/Transistor. Television is possessed by 103,517 households. Telephone is available in 15,190 households. Bicycle is the most common means of transportation and is available in 127,997 households. Two wheelers like scooter, motor cycle, moped and four wheeler like car, jeep, van are used by 34,095 and 5,573 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

1. During 2001 Census Raheli community development block from tahsil Deori of Sagar district was constituted on 11.03.1999 as a new tahsil namely, Kesli by merger of 189 villages vide Madhya Pradesh Government Gazette Notification No. F-1-20/97/ (VII)-8 dated 11.03.1999.

2. A new tahsil by name Rahatgarh was created by merging 141 villages thereupon, separated from Sagar tahsil vide Gazette Notification No. F-21-157/95/(VII)-8 dated 19.09.1999

3. Consequently, the geographical area and total number of villages of the district were reduced respectively.

4. The district stood on 6th rank from area point of view, of 3rd by population size and 20th by population density as per Census 2001.

(xii) Brief description of places of religious, historical or archaeological places of tourist importance in villages and towns of the district.

Abchand

In the ravines of river Gadheri, enconced in the dense growth of Abchand Reserve Forest (23°45'N and 78°55'E), about 33 kms. east of Sagar- Damoh road, exist about a dozen rock-cut caves with paintings of the same type as found at Singhanpur and Adamgarh. The largest cave is about 40 feet in length and it's walls contain more than a dozen paintings of yellow , green, red, black and white depicting hunting scenes represent individual or group of hunters equipped with bows and arrows, spears and other weapons and the game animals like bisons, bulls, deers antelopes, tigers, boars etc. In one of the shelters a fierce fight between two tigers is depicted. The primitive people seem to have amused themselves with songs, dancing hand-in-hand while instruments like drums, dhapli and flutes being played. There are also some symbolic representations such as the *swastik*, taurean, cross and the tree within railing symbols.

Baleh

Baleh village is 54 kms. south-east of Sagar and about 17 kms from Rehli, its taluk headquarters. Formerly the estate of Baleh consisting of 53 villages belonged to a Gond family of Patehra, which being driven out of Deori and settled here in 1747. It has some old tanks and betel vine gardens producing leaf of reputation.

Bamora

Bamora village in Khurai tahsil is lying 23 ^{0} 35'N and 79 ^{0} 05'E has a railway station on the Bina-Itarsi line of the Central Railway. There is an ancient ruined temple built of stone without mortar of a *Varaha* and has an image of Lord Shiva placed in one corner. There are also Buddhist ruins in the village.

Barodia kalan

Barodia Kalan in tahsil Khurai situated in 24^{0} 10'N and 78^{0} 35'E is 45 kms. north of Sagar on the Jhansi road. There is a ruined fort of the late mediaeval period in the village. On 31st January 1858, an encounter took place at Barodia Kalan between a British force and the insurgents, who had concentrated here after the fall of Rahatgarh fort. A remarkable scene of heroism was enacted in this place, as the Afghan soldiers, even when dying, killed their enemies with their broad swords. From the river Bina to the Garhi the British had to fight their way step by step. The fort was surrounded and occupied although the casualties suffered by the victors were severe.

Bhapel

Bhapel village of Sagar tahsil also called Phular named after Phulnath (Mahadev) is 7.5kms. from Sagar on the Rahatgarh road. During the great uprising on 15th December 1857, Bhapel was the site of an engagement between a British detachment from Sagar and the mutineers. Annual religious fair is held on the Purnima day (after Diwali) attended by about 3,000 persons.

Bilhera

A village of Sagar tahsil situated at 16 Kms. south of Sagar was founded in about 1659 A.D. by a Rajput chief called Pargal Shah, brother of Udan shah, the founder of Sagar, who built the small fort, which still stands.

Bina

An important railway junction on the Central railway in Khurai tahsil, Bina named after the Bina river. It is situated in 24^0 10'N and 78^0 10'E at an elevation of 1352 feet above mean sea level. It is connected with Katni junction by a branch line through Sagar and Damoh.

Binaika

36 Kms. north of Sagar, Binaika in Banda tahsil is supposed to have been populated in the 15th century and was held by the Gond rulers of Garha Mandla from whom it was taken by Raja Beer Singh Deo of Orchha and was ceded to the Marathas in 1730 by Chhatrasal. Later on the Maratha Governer Vinayakrao built a fort here. In 1842, it was plundered by the Bundela Thakur from Bharhut and Chandrapur and thereafter in 1857 was held by the Raja of Shahgarh. On the 18th July 1857, the insurgents, having been reinforced from Shahgarh detached company and were compelled to return to Sagar.

Deori

A municipal town of Deori tahsil on the bank of Sukhchain river at an elevation of 1409 feet above sea mean level, 60 kms. from Sagar on the Narsinghpur road was formerly called Ramgarh or Ujargarh. But following the erection of a temple it was renamed as Deori meaning the "abode of God". The town was founded about 400 years ago by a Chandel Raja. The kingdom of Garha Mandla, the Garh of Deori contained 750 *mouzas*. Later it became the capital of a tract known as Panch Mahal comprising Naharmau, Gourjhamer, Chawarpatha and Tendukheda and was in possession of Durga Singh, the Gond ruler of Gourjhamer who was known to have rebuilt the fort in 1767. Deori and the attached tract of Panchmahal were given rent-free by the Peshwa to Dhondu Dattatraya, a Deshastha Maratha Brahman.

Dhamoni

Dhamoni, a village of Banda tahsil situated 24^0 10'N and 78^0 45' E, 44 Kms. north of Sagar on the Jhansi road has a rich historical past. It was a place of sufficient importance to be a *Garh* in the Kingdom of Garha Mandla and has 750 *mouzas*. On account of old ruins, Dhamoni is undoubtedly a place of archaeological interest. The fortress stands on an eminence and has a triangular ground plan enclosing a space of 52 acres.

Eran

An ancient site lying at the junction of Bina and Reuta rivers, 9 Kms. from Bamora station on the central railway is at the gate of Bundelkhand on one side and Malwa at the other. The name is derived from the abundant growth of *eraka,* a sort of grass. The village of Eran has a most interesting collection of archaeological relics. There is a fort of the Dangis, who formerly dominated over this region. The site used to have a number of Vishnu shrines, even today has a ten feet high colossal Varaha. The excavation conducted by the Department of Archaeology of the University of Sagar have yielded relics similar to those found at Maheshwar and Tripuri showing that Eran formed the northernmost limit of the *Chalcolithic* culture in Madhya Pradesh.

Gadpahra

Also called old Sagar, the capital of the Dangi kingdom situated about 10 kms. north of Sagar on Jhansi road; Gadpahra still has some historical remains. A steep road leading to bastion, a rough gateway and a white washed temple on a platform approaches the fort built on a low range of hills. There are remains of a summer residence called **Shish Mahal** or glass palace of the Dangi ruler namely Raja Jaisingh who supposed to have lived 200 years ago. It looks like a Muslim tomb consisting of two storeys, each room having a varandah all around. The glassed tiles of different colours are fixed alternatively in the panel of the battlement and in the ribbing of the domes. There is a tomb being worshipped. A small lake called Motital, is found below the hill towards the north.

Khimlasa

Founded by a Mohammedan noble in the *sarkar* of Raisen of the *subah* of Malwa, the town of Khimlasa is enclosed within a fortified wall built of stone rubble more or less coursed.

In the center of the tomb is a bastion fort of which, the gateways alone forms an interesting feature. On one side of the fort there is a *dargarh* of the Panch Pirs, with an elaborately carved perforated screen work, which deserves a special mention.

Rahatgrah

A small town 60 kms. away on the west of Sagar on Bhopal-Sagar road is picturesquely situated on the steep bank of the river Bina that is crossed at this point by a fine bridge of fourteen arches, completed in 1863. It is renowned for it's battlement ramparts, gates and ruins of palaces, temples and mosques. Close to the town stands the famous fort of Rahatgarh. It's outer wall consists of 26 enormous towers, some of which were used as dwellings connected by curtain walls and enclosing a space of 66 acres. Two miles away from the fort is a waterfall nearly 50 feet height in picturesque surroundings.

Rangir

15 Kms. from Rehli and 32 kms. from Sagar on Sagar Rehli road on the bank of the Dahar river, Rangir was the site of an engagement between Chatrasal Bundela and Khaliq, the Mugal *Fauzdar* of Damoni. On the adjoining hill stands a temple of Harsiddi Devi in whose honour fairs are held in the months of Asvina and Chaitra (September and March).

During the Chaitra fair the image of the Goddess is held in great veneration and gathered devotees believe that she changes her form thrice every day, as a child at dawn, a young girl at midday and an old women in the evening. A Government Rest house of Forest department is located here.

Fairs and Festivals

Jhoola festival of Sagar and the Cattle fair of Garhakota are important out of altogether 36 fairs held in the district. On the lines of similar celebrations in Mathura of Uttar Pradesh, the Jhoola celebrations of Sagar held from the 3rd of the first half of the month of **Sharavan** (July-August) to the *Raksha Bandhan* day. *Jhoola* festival is a characteristic feature of Sagar. As the celebrations are economically beneficial, the celebrations are hold in all the temples of the town including of Lord Krishna.

The celebrations consist of swinging the image of the deity on a plank (*Jhoola*) and the room where the *Jhoola* placed is profusely decorated *Jhanki*. The decoration done on the *Ekadashi* and on this day, the town gets an influx of lakhs of persons not only from the towns and villages of the district but also from neighbouring districts of Narsimhapur, Damoh and Chhatarpur as well as from the district of Jhansi, Uttar Pradesh.

Cattle fair of Garhakota

According to 1906 Gazetteer, "One of the most important in the Province," the fair is held from **Basant Panchami** to **Holi** i.e. for 40 days. About 50 to 60 thousand people congregate at the fair and transactions of a large number of cattles take place. The fair is known as *Rahas* and was first started by one Raja Mardon Singh and dances in imitation of Lord Krishna's dances with the *Ras* (milk-maids) used to be held, of which Raja was very fond of. The dances are no longer held now.

The district has a rich heritage of song and various dances. The most popular folk dances commonly known are *Baredi*, *Moni*, *Saira*, and *Dhimaryai* and another form of dance locally known as *Rai* are very important recreational dance performed by the Bednis.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Eminent freedom fighters and political leaders who made great sacrifices during the freedom struggle to strengthen the ideals of democracy, secularism and socialism as well as associated with the all round development of the district are; Shri Prem Narayan Katare, Dr. Hari Singh Gour(founder of Sagar University), Nathu Ram Udeniya, Prem Narayan Tiwari, Shaodhara Bai Roy, Pandit Dwarka Prasad Mishra (Ex-Chief Minister and Vice-Chancellor of Sagar, University) Pandit Jwala Prasad Joytishi, Dal Chand Jain, Nandlal Choudhary (All former members of Parliament); Virendra Kumar Khatik, Prakash Chand Jain, Brij Kishore Pateriya, Gopal Bhargava, Laxmi Narayan Yadav, Vithal Bhai Patel, Shivraj Singh Bhupendra, Harnam Singh Rathore, Smt. Sudha Jain, Govind Singh Rajput, Surendra Kumar Choudhary, Uttam Chand Khatik, Santosh Kumar Sahu, etc. The great literates and renowned educationists are, Dr. W.D. West, Dr. Muzzfar Ali, Acharya Nand Dulare Bajpai, Dr. D.S. Shrivastava, Dr. Krishna Dutt Bajpai, etc.

Some distinguished personalities, who always patronized the welfare and prosperity of the district are Smt. Manorama Gour, Pradip Lariya, Raghu Thakur, Gauri Singh Yadav, etc made memorable contributions.

With the collaboration of Oman and Indian Government, a joint venture is achieved to establish a large size Refinery which is being erected in Bina tahsil of Sagar district. As a result of which, a large employment is generated. It has strengthened the economy of the district. High quality and standard variety of wheat is produced in Khurai tahsil of the district, which is exported to the neighboring states and abroad also.

In the field of folklore and folk dance, people associated are, Ram Sahay Pande, Hargovind Vishvakarma, Munni Bai, Raikwar, Ram Charan Yadav. Some popular and noted film actors are, Mukesh Tiwari, Ashutosh Rana and Namdevji.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been

2)District Statistical Handbook,1997-98

3)Census of India, District Census Handbook,Sagar district,1991

given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
		Nil	

(c) CD blockwise presentation of Village Directory Data

(i) CD Block Maps showing Tahsil Boundary :

(ii) Alphabetical list of Villages alongwith location code 1991 and 2001

32	01247700	Muderi
33	01247800	Chhind
34	01248500	Badha
35	01249100	Ramnna

Appendix IV of the Village Directory gives CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available in the villages. In the entire district there are 34 villages which fall under this category. 1 village in Bina CD Block, 5 in Khurai, 8 in Malthone, 2 in Banda and Rehli, 1 in Shahgarh, Sagar and Kesali, 13 villages in Deori CD Block. There is no village of Rahatgarh and Jaisinagar CD Block which fall under this category.

APPENDIX V - VILLAGE DIRECTORY
SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED CASTES POPULATION

Serial number	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Bina	177	23	154	21
2	Khurai	187	10	177	13
3	Malthone	193	18	175	29
4	Banda	179	15	164	24
5	Shahgarh	128	20	108	25
6	Rahatgarh	211	12	199	16
7	Jaisinagar	149	3	146	10
8	Sagar	162	10	152	12
9	Rehli	246	25	221	39
10	Kesli	189	17	172	48
11	Deori	255	22	233	72
	District Total:	2,076	175	1,901	309

Appendix V of the Village Directory shows the number of villages not having Scheduled Castes population. Out of 2076 villages in the district, 175 villages are uninhabited and remaining 1901 villages are inhabited. Out of 1901 inhabited villages 309 villages have no Scheduled Castes Population and 1592 inhabited villages have Scheduled Castes population in the district. Deori has highest 72 villages with no Scheduled Castes population while in other CD Blocks there are 48 such villages in Kesali, 39 in Rehli, 29 in Malthon, 25 in Shahgarh, 24 in Banda, 21 in Bina, 16 in Rahatgarh, 13 in Khurai , 12 in Sagar and 10 in Jaisinagar CD Block which do not have Scheduled Caste population.

APPENDIX VI - VILLAGE DIRECTORY

SUMMARY SHOWING NUMBER OF VILLAGES NOT HAVING SCHEDULED TRIBES POPULATION

Serial number	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Bina	177	23	154	20
2	Khurai	187	10	177	31
3	Malthone	193	18	175	53
4	Banda	179	15	164	37
5	Shahgarh	128	20	108	31
6	Rahatgarh	211	12	199	68
7	Jaisinagar	149	3	146	43
8	Sagar	162	10	152	31
9	Rehli	246	25	221	56
10	Kesli	189	17	172	17
11	Deori	255	22	233	27
	District Total:	2,076	175	1,901	414

Appendix VI shows number of villages not having Scheduled Tribes population. Out of 1901 inhabited villages, 414 villages have no Scheduled Tribes population and the remaining 1487 inhabited villages are such which are having some Scheduled Tribes population. Rahatgarh has highest 68 villages with no Scheduled tribe population while in other CD Blocks, there are 56 such villages in Rehli, 53 in Malthone, 43 in Jaisinagar, 37 in Banda, 31 in Khurai, Shahgarh and Sagar, 27 in Deori, 20 in Bina and 17 villages in Kesali which do not have Scheduled Tribe population.

APPENDIX VII A
LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED CASTES TO THE TOTAL POPULATION BY RANGES

Note:- Villages having NIL Scheduled Castes Population have been excluded

Appendix VII-A depicts list of villages according to the proportion of Scheduled Castes to total population by ranges of such villages where Scheduled Caste population has been recorded in 2001 Census. These percentage ranges are less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above per cent of total population of villages.

APPENDIX VII B
LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED TRIBES TO THE TOTAL POPULATION BY RANGES

Name of the District: Sagar

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
Name of CD Block: Bina		
Less than 5		
	01063900	Bamorishekh
	01056400	Dhand
	01057400	Kathai
	01052100	Besrakasoi
	01057500	Manau
	01048900	Gadhauli
	01058700	Gulaua
	01056900	Bukhara
	01060200	Shekhpur
	01052800	Patkui
	01062100	Mewli
	01048700	Pandho
	01050900	Deoraji
5-10		
	01063800	Dhanora
	01050500	Salita
	01060600	Eran
	01062400	Reta
	01050700	Ramsagar
	01063200	Hiranchipa
	01054900	Bilakhana
	01062300	Kaorja
	01055100	Niboda
	01054500	Agasod
	01049900	Parasari
	01047500	Rampura
	01052600	Dhimroli
	01061000	Borodiya
	01057900	Sabdha
	01053200	Manmati
	01051600	Sirchopi
	01059700	Mudari
	01053800	Par
11-20		
	01054800	Bamhori Durjan
	01051000	Lahrawada
	01059100	Kaethani Ryt.,
	01049700	Bildho
	01048100	Palikheda
	01064800	Jugpura
	01051300	Bagaspur
	01053700	Bamhorikela
	01050100	Girwal
	01056200	Mirjapur
	01048300	Khitausa
	01049400	Bhangarh
	01059900	Rasulpur
	01047400	Piprasar

Name of the District:Sagar

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
	01048000	Dudhawani

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I
STATUS AND GROWTH HISTORY

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, CENSUS 1981-1991

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district for all ages, from 1981 to 1991.The child mortality for age 1,2,3 and 5 is shown as q(1),q(2),q(3) and q(5) respectively. The district child mortality for all ages in 1991 is higher than the state average. The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also. However some inconsistencies are observed in male-female classification.The female child mortality rate in 1991 is lower than the male child mortality rate for all ages.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Sagar**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	549,242 (92.3)	113,941 (20.7)	435,301 (79.3)
(A)Within the district but outside Enumeration place	395,861 (66.5)	77,812 (19.7)	318,049 (80.3)
(B)Birth place in other district of State	153,381 (25.8)	36,129 (23.6)	117,252 (76.4)
(ii) Place of Birth in other states of India than the state of Enumeration	44,817 (7.5)	11,794 (26.3)	33,023 (73.7)
(iii) Birth place in Foreign	1,205 (0.2)	609 (50.5)	596 (49.5)
(iv) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)
Total Immigrants	595,264	126,344	468,920
Persons born in the place of enumeration	1,426,723	946,861	479,862
Total population	2,021,987	1,073,205	948,782

(Source- Migration Table D-1)

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified. It is observed that the migration by birth from within the state is maximum 92.3 per cent of total migration. The migration from within the district but outside the enumeration place is 66.5 per cent whereas migration from other districts of the state is 25.8 per cent. Migration from other states is 7.5 per cent and the migration from outside India is 0.2 per cent of the total migration. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Sagar**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	560,011 (92.7)	117,156 (20.9)	442,855 (79.1)
(A)Within the district but outside Enumeration place	408,085 (67.6)	80,733 (19.8)	327,352 (80.2)
(B)From other district of State	151,926 (25.2)	36,423 (24.0)	115,503 (76.0)
(ii) From other states of India outside enumeration state	42,973 (7.1)	10,953 (25.5)	32,020 (74.5)
(iii) Place of residence outside India	943 (0.2)	494 (52.4)	449 (47.6)
(iv) Unclassified	0 (0.0)	0 (0.0)	0 (0.0)
Total Immigrants	603,927	128,603	475,324
Population of Non-inmigrants	1,418,060	944,602	473,458
Total population	2,021,987	1,073,205	948,782

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 92.7 per cent of total migrated population. Within this classification, the migration from within the district is 67.6 per cent and only 25.2 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 7.1 per cent of total migration and it is only 0.2 per cent from outside India. Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES- AS PER CENSUS 2001

State : Madhya Pradesh **District : Sagar**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Uttar Pradesh	31,469	70.2
Chhatisgarh	2,642	5.9
Maharashtra	2,553	5.7
Bihar	1,156	2.6
Rajasthan	1,040	2.3
Gujrat	726	1.6
Total of 6 States	39,586	88.3
Total of other States	5,231	11.7
Total	44,817	100.0

Inmigration from other states is classified in this table. 88.3 per cent of total inmigrants are from Uttar Pradesh, Chhatisgargh, Maharashtra, Bihar, Rajasthan and Gujarat whereas the remaining inmigrants from all other states together constitute only 11.7 per cent. Total 31,469 persons have migrated from Uttar Pradesh which alone accounts for 70.2 per cent of total in-migrants. Sagar is located at the neighbouring state border of Uttar Pradesh as such the migration from Uttar Pradesh is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Sagar**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10

		(92.5)	(4.0)	(2.9)	(0.2)	(0.0)	(0.2)	(0.0)	(0.1)
Sagar 2001	2,021,987	1,868,720	83,815	59,931	4,525	1,668	2,819	52	457
		(92.4)	(4.1)	(3.0)	(0.2)	(0.1)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu and Jain population in the district is comparatively higher than that of state. Contrary to this,the proportion of Muslim, Christian, Budhist, Sikh etc. population is lower in the district as compared to state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Sagar**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Sagar							
	Total	2,021,987	1,050,561	879,342	86,040	6,044	0
			(52.0)	(43.5)	(4.3)	(0.3)	(0.0)
	Rural	1,431,080	733,953	631,014	61,394	4,719	0
			(51.3)	(44.1)	(4.3)	(0.3)	(0.0)
	Urban	590,907	316,608	248,328	24,646	1,325	0
			(53.6)	(42.0)	(4.2)	(0.2)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (52.0%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is marginally higher than the state. Contrary to this the percentage of married population of the district is less than the state. The state average is lower than the district in respect of widowed but it is same as in case of divorced population. The proportion of unmarried persons are more in urban areas than rural but married persons are more in the rural areas as compared to the urban areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Sagar**

Age Group	Total Population			Total Literates			Literates (Without educational level) and below primary			Primary		
	P	M	F	P	M	F	P	M	F	P	M	F

(Source- Migration Table C-8)
Note:Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,652,183 persons belonging to the age 7 and above 1,118,993 are literates and thus, the literacy rate of the district works out to 67.7 percent. Similarly the male and female literacy works out to 79.4 and 54.4 percent respectively.

329,488 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 78.6 percent of population in this age group. In the age group 15-34; 125,676 persons (18.6 percent) are found educated up to middle, 115,181 person (17.0 per ent) upto the level of Matriculate/ Higher Secondary/ Intermediate/ Diploma Tech. and 36,420 persons (5.4 percent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.
