ACKNOWLEDGEMENTS

I am thankful to Shri S. C. Sharma, Mechanical Tabulation Officer, Delhi, and his colleagues who very kindly checked the tables for accuracy.

In the Maharashtra Census Office, Shri D. V. Rangnekar, Deputy Superintendent, rendered valuable assistance in compilation of the tables and notes. Shri V. G. Puntambekar, Research Officer of the Bureau of Economics and Statistics, looked after our machine tabulation work in addition to his normal work in the Bureau for twenty months. Because of his technical experience and devoted work by his colleagues we could process sixteen lakhs of household schedules in the Maharashtra Census Office at higher speeds and lower costs than those attained anywhere in India.

I should mention Shri G. S. Gokarn, Tabulation Officer, Shri R. N. Pongurlekar, Statistical Assistant and their colleagues who worked hard for compilation of the tables and scrutiny of proofs.

I am also indebted to the Manager and the staff of the Government of India Press, Nasik, for the excellent printing of the Volume.

INTRODUCTION

This Part of the Maharashtra Census Report contains eight Household Economic Tables presenting the distribution of households classified by the nature of their participation in the two most important household economic activities in the country, *viz.*, cultivation and household industry.

The distribution of households is first shown classified on the basis of no participation in either of the two economic activities or participation in only one or in both of them (Table B-X). The distribution of households participating in cultivation is then shown classified by the size of land cultivated and further sub-classified by the type of interest in land (Table B-XI), by the number of persons engaged in cultivation (Tables B-XII and B-XV), the type of household industry combined (Table B-XIII) and the size of the household (Table B-XVII). The households participating in household industry are similarly classified by Industry Minor Groups (Table B-XIV-B). Those households are then classified according to the number of persons engaged in household industry and further sub-classified with industry division and major groups of the household industry (Table B-XIV-A) and by the period of working of the household industry (Table B-XVI).

Thus, these eight tables together present a clear picture of the household economy, *i.e.* (*i*) of the household cultivation with reference to the household size, ownership or tenancy interests in land, sizes of cultivation holdings, number of persons engaged and the varying degrees in which different types of household industries combine with it; and (*ii*) of the household industry and its different branches with reference to the number of persons engaged and the period for which they are employed during the year.

Such comprehensive information on household cultivation and industry is being presented here for the first time. In earlier Censuses, the only information available for households was their total number and size and the entire information on economic activity was based on individual (and not household) participation in different sectors. It was thought that in the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information was supplemented by information relating to economic activities of the household as an entity. The " Household Schedule " was, therefore, included as one of the three questionnaire forms for the 1961 Census and designed specially to collect comprehensive material on household cultivation and household industry.

Household Schedule and Instructions

The form of the Household Schedule used and instructions issued to enumerators for filling it at the time of the Census are reproduced as Appendix I to this note.

Scheme of presentation

Each of the eight tables included in this volume is preceded by a note which briefly explains its layout and the method of presentation. This introductory note explains a few general aspects common to all the eight tables and especially the concepts and definitions followed in the 1961 Census so far as they are relevant to the material presented in the volume, the procedure adopted in sampling and coding of the household schedules and compilation of the household economic tables and the limitations of the material presented here. None of these notes, however, presents analysis or discussion of any observed facts, for which Part I-A of the Maharashtra Census Report is exclusively reserved.

All the eight tables present material for 31 units, *i.e.* the State, its four administrative divisions and twenty-six districts and for each unit for rural and urban areas separately. Each table starts with the entries for the State. Then follow the entries for Bombay Division and its districts, then Poona Division and its districts and so on. The order of presentation of the divisions and districts followed in all the tables is as shown below :—

Four out of the eight tables (B-X, B-XI, B-XIII and B-XV) also present talukawise material but to the extent of rural areas only. Talukawise entries are presented immediately after the entry for rural areas of the district. The entries for urban areas appear after all the talukas of the district. Talukawise break-up was not compiled for urban areas and the presentation of material in respect of urban areas is, therefore, limited only upto district level in all the tables included in this volume.

All these eight tables have also been presented in the concerned volumes of the 1961 District Census Handbooks. Table B-XVII is however numbered as Table C-I—Part A in those volumes.

For facility of analysis of the material presented here, twelve subsidiary tables have been prepared to show the distribution of 1,000 households classified on the lines of the main tables. They are presented in Part I-C of the Maharashtra Census Report. As stated earlier an analysis and discussion on the material presented here will be found in Part I-A of the Maharashtra Census Report.

Two more tables have been compiled from the household schedules, *viz.*, Tables C-I and SCT-V. Table C-I relates to the composition of households and is presented in Part II-C of the Maharashtra Census Report. The 1961 District Census Handbook volumes also present it but under a slightly different number, *viz.*, Table C-I—Part B. Table SCT-V is similar to Table B-XI but presents the distribution of sample households engaged in cultivation classified by interests in land and size of land cultivated in Rural areas only and for the households belonging to the members of Scheduled Castes (in Part A) and Scheduled Tribes (in Part B). That table is presented in Part V-A of the Maharashtra Census Report along with other special tables on Scheduled Castes and Scheduled Tribes in Maharashtra.

The 1961 Census

The 1961 Census was conducted between 10th and 28th February 1961. The enumerators called on each household in the assigned areas and filled in the Census Individual Slip for each member of the household and the Household Schedule for each household by interviewing one or more responsible members of the household. They re-visited all the households between 1st and 5th March, and corrected the Individual Slips for changes occurring between their first visit and the Census reference date, *viz.*, sunrise of 1st March 1961. These corrections were, however, restricted to changes due to deaths or new births. No corrections were made for the change of economic activity of the household or any of its members during the intervening period. Material presented here is thus relevant approximately to 1st March 1961.

Rural and Urban Population

A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

Household

In the 1961 Census, a **house** was defined as a structure or part of a structure (inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc.) with a separate entrance whether that separate entrance led directly to the street or to a common staircase, courtyard or a gate. A household is defined as a group of persons living in the same house and eating from the same kitchen unless the exigencies of work prevented any of them from doing so.

"Household" is thus slightly different from "family". A domestic servant residing and eating at the employer's house is under the above definition a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

The definition of the household also applies to the group of inmates of hotels, hostels, prisons, hospitals, etc. They are, however, treated as 'non-family' or 'institutional' households. Others are family type households as in spite of the slight differences in composition they are largely based on families.

The 1961 Census household schedules had been filled in for the institutional households also. These schedules were, however, excluded at the time of drawing the sample of households. The material presented in the tables, therefore, relates only to the family type households.

Cultivation of Land

Cultivated land includes all land normally used for cultivation including temporary fallows. It includes only those plots or parcels of land which are cultivated by the household itself. Owned land which is leased out to others is not included. Naturally, it will be the land which lies within the village or in adjacent villages or within such distances as enables the household to work on the land or actively supervise the cultivation. It does not include the land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction.

Cultivation includes ploughing, sowing and harvesting of land but does not include operations treated as industry such as fruit-growing, keeping of orchards or groves and working for plantations like coffee, tea, rubber, cinchona and other medicinal plantations. This restriction of excluding certain activities relating to growing of fruits, orchards, plantations, etc. was not, however, rigidly applied in Maharashtra at the time of 1961 Census enumeration and the areas of cultivated

lands recorded in the household schedules are the areas of cultivated lands as returned by the responding households who might not be aware of the finer distinction made by the definition.

Households engaged in Cultivation

A household having land under cultivation is called a cultivating household. When a head of the household himself and/or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken (on lease) from private persons the household is said to be engaged in household cultivation. It will be seen that owner cultivators and tenant cultivators are both included in this category. The agricultural labourers working on land which is not either of their own or taken from others on lease are not treated as cultivators. The households engaged in cultivation do not, therefore, include the households whose members work only as agricultural labourers.

Interests in Land

The classification of households engaged in cultivation by interests in land is into the following three types :—

(*a*) Those engaged in cultivation of land entirely owned or held from Government;

(*b*) Those engaged in cultivation of land entirely held from private persons or institutions for payment in money, kind or share; and

(*c*) Those engaged in cultivation of land partly owned or held from Government and partly from private persons or institutions for payment in money, kind or share.

The first type includes all pure owner cultivators such as proprietors, occupants or tenure holders with or without right to transfer land. The second type includes pure tenancy cultivators with a variety of tenancy rights. The third type is in fact a combination of the first two types.

Household Industry

Household Industry is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to production, processing, servicing or repairing of goods. This may include sale of goods but should not be confined to buying and selling only. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the essential factor of participation of the head of the household and/or one or more members of the household.

Principal Household Industry

The form of the Household Schedule had a provision for recording more than one household industries conducted by the household. In such cases, the household industry conducted by the household for a longer period in the year has been treated as its principal household industry. The classification by the nature of industry is, in all cases, based upon the principal industry.

Workers

A person is classified as a worker if—

(*a*) in the case of seasonal work like cultivation, livestock, dairying, household industry, etc. he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular (non-seasonal) employment in any industry, trade, profession or service, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the households.

A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

"Work" includes not only actual work but effective supervision and direction of work also.

Persons under training as apprentices with or without stipend or wages are regarded as workers.

An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice-pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cow-dung cakes, or grass, etc. or any such work, she has been treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who earn an income but who are not participating in any productive work are not treated as workers unless they work in cultivation, industry, trade, profession or service.

The population classified as workers here is the economically active population including family workers but not including unemployed persons.

The Census questionnaire did not ask any question to determine the extent of full employment or under-employment.

As described earlier, the period of reference for regular (non-seasonal) work in any industry, trade, profession or service, was 15 days preceding the day of enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., some regular work of more than one hour a day throughout the greater part of the last working season was the criterion.

Entries in regard to industry and occupation were not corrected in the second round visits with reference to the date of reference, *viz.*, 1st March 1961. As described earlier the material presented here, therefore, relates to the reference period approximating to the conditions as on 1st March 1961.

Family Workers and Hired Workers

A "family worker" is a member of the household who works without receiving wages in cash or kind in any industry, business or trade (cultivation or household industry only as far as the material presented here is concerned) conducted mainly by the members of the household and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in domestic duties are non-workers and are not, therefore, treated as family workers.

A "hired worker" is an outsider who has been in wholetime employment of the household during the last working season or is in wholetime employment during the current working season. This category does not include those agricultural labourers who are casually employed for short periods for harvesting of crops or other operations.

Industrial Classification

The classification of Household Industries presented in Tables B-XIV—Part A and B-XVI is into industry divisions and major groups according to the Standard Industrial Classification, a relevant extract from which is reproduced as Appendix II to this note.

The range of economic activity relating to the Household Industry is, because of its definition, limited to Industry Divisions 0, 1 and 2 & 3 Appendix II, therefore, shows only those industry divisions as well as major groups and minor groups included under them. Though the classification presented in Tables B-XIV—Part A and B-XVI is only up to major groups (two digits), the minor groups (three digits) included under them are also shown in Appendix II to show their coverage.

The classification of household industries in Table B-XIV—Part B is, however, much more elaborate and presents their distribution by four digit code numbers. A list of common household industries and the four digit code numbers assigned to them under the Standard Industrial Classification Scheme is given as Appendix III to this note.

Procedure followed in compilation of the Tables

All the eight household economic tables presented in this volume have been prepared from a 20 per cent. sample of households drawn from the household schedule pads for rural and urban areas separately. The household schedule pads for all the villages in a taluka, each city and non-city urban area in a district were first arranged in the order of their code numbers and beginning from a random start for each taluka (Rural), the city and non-city urban areas, every fifth household schedule was first stamped as a sample and later torn out of the pad. Institutional households were not taken into account. Talukawise bundles of sample households drawn in the regional Census Tabulation Offices were then brought to Bombay Office for coding and further processes for mechanical tabulation.

The information contained in the sample households was then coded in alphabetical and numerical codes. This pre-punch coding facilitated punching operations and also led to a higher standard of accuracy of work. The coded items of information from the sample households were then punched on 80 columns cards. One card was used for two households. The card design used is shown on the next page.

After adequate verification, the cards were processed on the tabulation machines. The Director of the Bureau of Economics and Statistics, kindly allowed his machines to be used in an extra shif. Ten tables were prepared from the Household Schedules. Eight of them are presented in this volume.

Limitations

Part I of the Household Schedule containing information on areas of owned, leased in and leased out lands and local names of rights on land held was operationally the most difficult part of the Census questionnaire to canvas. A few respondents did not know the exact areas of their cultivated, owned or leased out lands and could not describe them even in local measures. A few others were hesitant to give out the area of the land cultivated, owned or leased out. They naturally had apprehensions in the context of land reform laws and the talk of impending legislation to impose ceilings on land holdings.

With the operation of the various land reform laws the land tenures in the State have now been very much simplified. Old local terms describing a variety of ownership and tenancy rights are still in vogue but they have no legal recognition and the differences in the rights previously enjoyed under them have now been legally wiped out leaving only the two groups of occupants (owners) and tenants.

In thousands of cases, the ownership of land is by law vested upon the cultivating tenants from a notified date but the transactions are subject to the payment of the prescribed instalments to the erstwhile landholders. It was not easy to determine whether those tenants are, in the transition phase, cultivating those lands as owners or as tenants. Some of those tenants might have returned their cultivated lands as owned, others as leased in.

Even the revenue records are not free from the deficiencies resulting in such circumstances. A very large majority of cultivators in Maharashtra cultivate purely owned holdings and that too in small and medium size groups. Fear of the law of ceilings may not, therefore, have had any appreciable effect on the returns as a whole. The marginal doubtful cases of ownership or tenanted holdings do not also affect the distribution as far as it is studied only for cultivation or operational holdings. By and large, the household economic tables do present a true pattern of sizes of operational holdings, more reliable than that available from any other source so far.

Information regarding the areas held under different local rights in land obtained in the household schedule has not so far been compiled in any table. The data regarding the ownership holdings (extent of land owned) or the areas of lands leased out to others have not similarly been processed. These further studies are likely to be taken up in the intercensal period

The number of workers engaged in household cultivation and household industry shown in these household economic tables may not compare with the number of cultivators or workers engaged in household industry obtained from census individual slips and reported in the B Series tables in Part II-B(i) of the Maharashtra Census Report. The main reason for the difference is that the household economic tables include persons engaged in household cultivation or household industry, even as a subsidiary work while the other set deals only with the workers engaged in cultivation or household industry as a principal work. Another reason is that hired workers working for short periods with different households are not included in the household economic tables.

INSTRUCTIONS FOR FILLING UP THE HOUSEHOLD SCHEDULE

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. *A household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'unrelated persons living together'. In such a Household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the weekdays in town and spends the week-ends at home, he should be recorded as Head of Household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the Head of the household marked "S.C./S.T.". If the Head of the Household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the Household belongs within the parallelogram. If the Head of the Household does not belong to Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' reating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (*a*) cultivates land owned or held from Government or taken from private persons or institutions or (*b*) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, *e.g.*, land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will

include land (i) with rights of permanent, heritable and transferable possession; (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:—

(a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);

(b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);

(c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;

(d) tenants holding land on temporary leases who are liable to ejectment; and

(e) areas held on condition of rendering service eighter to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following —

(a) land taken for a fix amount of money,

(b) land taken for a fixed amount of produce,

(c) land taken for a share of the produce,

(d) land for which money is paid partly in one and partly in any other form mentioned above, and

(e) land held free of consideration.

Category 2 land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, land which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owed or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record it in acres corrected up to the first place of decimal in the column relating to 'Area in acres'. In case it is not possible to record the area in decimal, the figures of acres and gunthas may be recorded. It is not however necessary to write fractions of a guntha. A fraction being less than 1/2 guntha should be overlooked and a fraction of 1/2 guntha or more should be taken as one guntha. Figures for acres and gunthas should be written with a dash between them and not with 'σ' written in between. Write 15-22 and not 15 σ 22. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess or cultivate any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' *in all the spaces provided in the right hand side and* put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should *not* be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold :

(a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where women folk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part **'C'** relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of Households engaged in Household Industry only, put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes .. .	320
	Manufacture of rubber footwear.. ..	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches .. .	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
Division 2 & 3—Manufacturing—contd.		
33	*Chemicals and Chemical Products*—concld.	
	Manufacture of common salt .. .	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*—	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime .. .	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products.	346
	Manufacture of asbestos products ..	347
	Manufacture of mica products.. ..	348
35	Manufacture of earthenware and earthen pottery.	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus.. ..	354
	Manufacture of earthen image, busts and statues.	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products coverd above.	357

TABLE B-X

SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH, AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY

EXPLANATORY NOTE

This is a basic table and presents the distribution of sample households classified by participation or otherwise in the two most important household economic activities in the country, *viz.*, Cultivation and Household Industry. The classification of sample households is in the following four categories:—

(*i*) households engaged neither in cultivation nor household industry (Column 4);

(*ii*) households engaged in cultivation only (Column 5);

(*iii*) households engaged in household industry only (Column 6); and

(*iv*) households engaged both in cultivation and household industry (Column 7).

2. Definitions of "household cultivation" and "household industry" are given in the Introductory note at page 3.

3. The material is presented separately for total, rural and urban areas of the State, its four administrative divisions and 26 districts. Talukawise break-up is also presented under each district but to the extent of rural areas alone.

4. The table is prepared on a 20 per cent sample of households drawn for rural and urban areas separately.

5. A subsidiary table (B-X.1) prepared from this Table and showing the distribution of 1,000 sample households (*i*) engaged neither in cultivation nor household industry, (*ii*) engaged either in cultivation or household industry but not in both, and (*iii*) engaged both in cultivation and household industry for all areas is included in Part I-C of the Maharashtra Census Report.

B-X—Sample households (i) Engaged neither in cultivation nor household industry, (ii) Engaged either in cultivation or household industry but not in both, and (iii) Engaged both in cultivation and household industry for all areas

TABLE B-XI

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED

EXPLANATORY NOTE

This table presents the distribution of sample households engaged in cultivation classified by their interest in land and size of land cultivated.

2. The material is presented separately for rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts. Talukawise break-up is also presented under each district but to the extent of rural areas alone.

3. The table starts with the entries for rural and urban areas of Maharashtra followed by rural and urban areas of Bombay Division and its districts. After the end of the last district of Bombay Division follow the entries for Poona Division and its districts and so on. Talukawise entries for rural area are presented immediately after the entries for the rural areas of the concerned district. The entries for the urban areas of each district appear after the talukawise entries for rural areas.

4. The definitions of various terms used in the table are given in the Introductory note at page 3.

5. The sample households engaged in cultivation for which the table presents the classification by interest and size of land cultivated include both the households engaged in cultivation alone and those engaged both in cultivation and household industry. Their figures represent the sum of the figures of households shown in columns 5 and 7 of Table B-X.

6. The classification by size of land cultivated is in ten size groups and is shown by the horizontal spread in columns 3 to 13. The size groups are as follows :—

(1) Less than 1 acre.

(2) 1·0 to 2·4 acres.

(3) 2 5 to 4·9 acres.

(4) 5·0 to 7 4 acres.

(5) 7·5 to 9·9 acres.

(6) 10·0 to 12·4 acres.

(7) 12 5 to 14·9 acres.

(8) 15·0 to 29 9 acres.

(9) 30·0 to 49 9 acres.

(10) 50 and above.

A last group of "unspecified" size is shown in column 13 and consists of the sample households for whom the area of land cultivated had not been recorded at the Census.

7. The interests in land are classified in the following three types and are shown by a vertical spread under column 4 only by the abbreviations (*a*), (*b*) and (*c*) used for the three types as follows :—

(*a*) Entirely owned or held from Government;

(*b*) Entirely held from private persons or institutions for payment in money, kind or share;

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

8. The table is based on a 20 per cent. sample of households drawn for rural and urban areas separately.

9. A subsidiary table (B-XI.1) prepared from this Table and showing the distribution of 1,000 sample households engaged in cultivation by interests in land and size of land cultivated in rural areas only is included in Part I-C of the Maharashtra Census Report.

TABLE B-XII

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS

EXPLANATORY NOTE

This table presents the distribution of sample households engaged in cultivation only classified by size of land cultivated and the number of family workers and hired workers engaged in cultivation.

2. The material is presented separately for rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts. Talukawise break-up is also presented under each district but to the extent of rural areas alone.

3. The table starts with the entries for rural and urban areas of Maharashtra followed by rural and urban areas of Bombay Division and its districts. After the end of the last district of Bombay Division follow the entries for Poona Division and its districts and so on. Talukawise entries for rural areas are presented immediately after the entries for the rural areas of the concerned district. The entries for the urban areas of each district appear after the talukawise entries for rural areas.

4. The definitions of various terms used in the table are given in the Introductory note at page 3.

5. The sample households engaged in cultivation only for which the table presents the classification by size of land and number of workers, etc., represent the figures in column 5 of Table B-X only and do not include those engaged both in cultivation and household industry and shown in column 7 of Table B-X.

6. The classification of households by the number of persons (family workers and hired workers) engaged in cultivation is in five types, *viz.*, the households with 1 person, 2 persons, 3 to 5 persons, 6 to 10 persons and more than 10 persons. It is shown by a horizontal spread in columns 6 to 24. The number of family workers is shown separately for males and females under each of the five types of households.

7. Classification by size of land cultivated is in ten size groups, *viz.*, less than 1 acre, 1 0 to 2 4 acres, 2 5 to 4 9 acres, 5 0 to 7 4 acres, 7 5 to 9·9 acres, 10 0 to 12 4 acres, 12 5 to 14 9 acres, 15 0 to 29 9 acres, 30 0 to 49 9 acres, 50 and above acres. Size groups are presented by a vertical spread under column 1. The last category of "unspecified" size represents the households for whom the area of land cultivated had not been recorded at the Census.

8. The table is based on a 20 per cent. sample of households drawn for rural and urban areas separately.

9. The following 4 subsidiary tables have been prepared from Tables B-XII and B-XV. They are included in Part I-C of the Maharashtra Census Report:—

(1) B-XII 1—Distribution of 1,000 sample households engaged in cultivation by size of land cultivated, in Rural areas only.

(2) B-XII 2—Distribution of 1,000 sample households engaged in cultivation by size of land cultivated and working strength, in Rural areas only.

(3) B-XII 3—Distribution of 1,000 sample household workers (Family/Hired) engaged in cultivation with and without household industry by each size of land cultivated and size of employment by family and hired workers, in Rural areas only.

(4) B-XII 4—Average number of family and hired workers per cultivating household by each size of cultivated holding, in Rural areas only.

TABLE B-XIII

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY

EXPLANATORY NOTE

This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry. The table thus shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees.

2. The material is presented separately for rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

3. The classification by size of land cultivated is in ten size groups, *viz.*, less than 1 acre, 1 0 to 2 4 acres, 2 5 to 4 9 acres, 5 0 to 7 4 acres, 7 5 to 9 9 acres, 10 0 to 12 4 acres, 12 5 to 14 9 acres, 15 0 to 29 9 acres, 30 0 to 49 9 acres, 50 and above acres and is shown by a horizontal spread in columns 4 to 14. The last group of unspecified size represents the households for whom the area of land cultivated had not been recorded at the Census.

4. Industry divisions and major groups of household industry are shown by a vertical spread under column 1. Each industry is briefly described in column 2. Further details of the industrial classification are given in the Introductory Note, pages 3 and 4.

5. Lines with 'Nil' entries have not been presented in the table. For further economy of space, Industry Major Groups of household industry having less than 10 per cent. of the households against the Industry Division concerned have not been shown in the table, and instead entries for those major groups are presented in the appendix to this table in run-on lines giving the number of the major group, the size group of land (by abbreviations) and the number of households (in brackets). For each administrative unit, the Industry Divisions from which one or more major groups are shifted from the table to the appendix are marked with an asterisk. The abbreviations used in the appendix for the size groups of cultivated land are as follows :—

Less than 1 acre	A
1.0— 2.4 acres	B
2.5— 4.9 acres	C
4.0— 7.4 acres . ..	D
7.5— 9.9 acres . .	E
10.0—12.4 acres . ..	F
12.5—14.9 acres	G
15.0—29 9 acres .. .	H
30.0—49 9 acres	I
50 + acres	J
Unspecified	K

6. The table is based on a 20 per cent sample of households drawn for rural and urban areas separately.

B-XIII—Sample Households engaged both in Cultivation and Household Industry showing Size of Land Cultivated classified by Principal Household Industry in Rural and Urban Areas separately

(Based on 20 per cent Sample)

N. B.—Major Groups of Household Industry having figures less than 10 per cent of the respective Industry division are not exhibited in this Table. These are shown separately in run on lines under the respective administrative units in the Appendix to this Table at pages 204 and 205.

TABLE B-XIV

SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

PART A—Households classified by major groups of Principal Household Industry and number of persons engaged

PART B—Households classified by minor groups of Principal Household Industry

EXPLANATORY NOTE

This table presents in two parts the distribution of sample households engaged only in household industry classified by the nature of household industry. Part A of the table presents the classification of sample households by industry divisions and major groups of household industry according to the Standard Industrial Classification as well as by the number of persons engaged. Part B of the table simply presents the number of households engaged in household industry classified into industrial minor groups.

2. Material in both the parts of the table is presented separately for total, rural and urban areas of the State, its four administrative divisions and twenty-six districts.

3. The classification of households by the number of persons engaged in Part A of the table is in five types, *viz.*, households with one person engaged, two persons engaged, 3 to 5 persons engaged, 6 to 10 persons engaged and more than 10 persons engaged. These household types are shown by a horizontal spread under columns 5 to 9.

4. The classification by industry divisions and major groups is shown by a vertical spread under column 1. Each division and major group of household industry is briefly described in column 2. Households engaged in more than one household industries are classified on the basis of their principal household industry.

5. Lines with "*Nil*" entries are not presented in the table. For further economy of space, the major groups of household industry having less than 10 per cent of the households in the respective industry division are not shown in the table. Instead, the entries of those major groups are presented in the Appendix to Part A of the table in run-on lines giving the number of major group, the number of persons engaged (by abbreviations) and the number of households (in brackets). For each administrative unit, the Industry Divisions from which one or more major groups are shifted from the table to the appendix are marked with an asterisk. The abbreviations used in the appendix for the type of households by number of persons engaged are as follows:—

1 person	A
2 persons	B
3 to 5 persons	C
6 to 10 persons	D
More than 10 persons	E

For example, the entry 00 (A-68, B-51, C-26) in the appendix shows that in the household industry major group 00 'field produce and plantation crops', there are 68 households with 1 person engaged, 51 households with 2 persons engaged and 26 households with 3 to 5 persons engaged.

6. The classification of household industries into minor groups in Part B of the table is shown vertically under column 1 according to the Standard Industrial Classification. The minor groups are shown by code numbers in 4 digits. A list of common household industries is presented with such four digit classification in Appendix III to the Introductory Note on pages 14 to 17. Each minor group shown in column 1 is briefly described in column 2.

7. Both the parts of the table are based on a 20 per cent sample of households drawn for rural and urban areas separately.

8. The following two subsidiary tables have been prepared from this table. They are included in Part I-C of the Maharashtra Census Report:—

(1) B-XIV-A.1	Distribution of 1,000 sample households engaged in household industry only by principal household industry and working strength, in all areas.
(2) B-XIV-B.1	Distribution of 1,000 sample households engaged in household industry only by principal household industry (division/major/minor groups), in all areas

B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in all Areas

(Based on 20 per cent Sample)

Part A—Households classified by major groups of Principal Household Industry and number of persons engaged

N. B.—Major Groups of Household Industry having figures less than 10 per cent of the respective Industry division are not exhibited in this Table. These are shown separately in run-on lines under the respective administrative units in the Appendix to this Table at pages 225 to 227.

TABLE B-XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND

18—2 Cen Bom./63

EXPLANATORY NOTE

This table presents the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of persons engaged.

2. The material is presented in this table separately for rural and urban areas of the State, its four administrative divisions and twenty-six districts. Talukawise break-up is presented under each district but to the extent of rural areas alone.

3. The classification of households by the number of persons engaged is in five types, *viz.*, one person engaged, 2 persons engaged, 3 to 5 persons engaged, 6 to 10 persons engaged and more than 10 persons engaged. This classification is shown by the horizontal spread in columns 6 to 24. The number of family workers and hired workers are shown separately in addition to the number of households for each type of households. The number of family workers is also shown for males and females separately.

4. The classification of households by size of land cultivated is in ten size groups, *viz.*, less than 1 acre, 1.0 to 2.4 acres. 2.5 to 4.9 acres, 5.0 to 7.4 acres, 7.5 to 9.9 acres, 10.0 to 12.4 acres, 12.5 to 14.9 acres, 15.0 to 29.9 acres, 30.0 to 49.9 acres and 50+ acres. The last size group of 'unspecified' represents the households for whom the area of land cultivated had not been recorded at the Census. This classification is shown by a vertical spread under column 1.

5. The table is based on a 20 per cent sample of households drawn for rural and urban areas separately.

TABLE B-XVI

SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN ALL AREAS

EXPLANATORY NOTE

This table shows the distribution of sample households engaged in Household Industry classified by the nature of principal household industry and the period of working of that industry.

2. The material is presented separately for total, rural and urban areas of the State, its four administrative divisions and twenty-six districts.

3. The classification by the nature of principal household industry is in industry divisions and industry major groups according to the Standard Industrial Classification scheme and is shown by a vertical spread under column 1 and each industry division and major group is described in column 2.

4. The number of households for whom the table presents the classification by nature and the period of working of the household industry is inclusive of both the households engaged in household industry (*a*) with cultivation, and (*b*) without cultivation shown in columns 7 and 6 of Table B-X, respectively. Entries in the table are presented not only for the total of the two types of households but for each type (*a*) and (*b*) separately by a vertical spread under column 4 onwards.

5. The classification by the period of working of the household industry is into four periods, *viz.*, 1 to 3 months, 4 to 6 months, 7 to 9 months and 10 months to one year. One more type of unspecified period is added. This classification is shown by a horizontal spread in columns 8 to 23. Under each of those categories, the number of households, number of family workers males and females and number of hired workers are shown separately.

6. Lines with "*Nil*" entries are omitted in the table. For further economy of space, the major groups of household industry having less than 10 per cent out of the households of the respective division are not presented in the table. Instead, the entries for those major groups are presented in run-on lines in the Appendix to this table (pages 478 to 482) giving the number of the major group and the break-up for the period of working of the household industry with or without cultivation (by abbreviations) and the number of households (in brackets). The industry divisions from which the entries for one or more major groups are so shifted from the table to the appendix are marked with an asterisk. The abbreviations used in the appendix are as follows :—

With cultivation 1 to 3 months	A
With cultivation 4 to 6 months	B
With cultivation 7 to 9 months	C
With cultivation 10 months to 1 year	D
With cultivation period not stated	X
Without cultivation 1 to 3 months	E
Without cultivation 4 to 6 months	F
Without cultivation 7 to 9 months	G
Without cultivation 10 months to 1 year	H
Without cultivation period not stated	Y

7. For example, the entry 01 (B-3, D-66 and H-4) will show that in the Household Industry Major Group 01 there are 3 households engaged both in household industry and cultivation with the period of working of 4 to 6 months, there are 66 households engaged both in household industry and cultivation with the period of working of 10 months to 1 year and that there are 4 households engaged only in household industry with the period of working of 10 months to 1 year.

8. The table is based on a 20 per cent sample of households drawn for rural and urban areas separately.

9. The following 3 subsidiary tables have been prepared from this table. They are included in Part I-C of the Maharashtra Census Report:—

B-XVI.1	Distribution of 1,000 sample households engaged in household industry (with and without cultivation) by principal household industry in each duration.
B-XVI.2	Distribution of 1,000 sample household workers engaged in principal household industry (with and without cultivation) by family and hired workers in each duration.
B-XVI.3	Average number of family and hired workers per household engaged in principal household industry (with and without cultivation) by the duration of household industry, in Rural and Urban areas.

TABLE B-XVII

SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY, (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

EXPLANATORY NOTE

This table shows the distribution of sample households classified by their size and household economic activities, *i.e.*, participation in household cultivation or household industry.

2. The material is presented separately for total, rural and urban areas of the State, its four administrative divisions and twenty-six districts.

3. The classification of households by size is into five size groups and is shown by a horizontal spread in columns 7 to 21. The size groups are :—

(1) Single member;
(2) two to three members (small);
(3) four to six members (medium);
(4) seven to nine members (large); and
(5) ten members and over (very large).

4. The classification of households by economic activities is shown by a vertical spread in column 2 and is limited to rural areas only. That classification is in three types, *viz.*, (*i*) households engaged neither in cultivation nor in household industry; (*ii*) households engaged in household industry only; and (*iii*) households engaged in cultivation. The last category is further sub-classified by size of holdings (cultivated land) into ten groups, *i.e.*, less than 1 acre, 1.0 to 2.4 acres, 2.5 to 4.9 acres, 5.0 to 7.4 acres, 7.5 to 9.9 acres, 10.0 to 12.4 acres, 12.5 to 14.9 acres, 15.0 to 29.9 acres, 30.0 to 49.9 acres, 50 and over acres. The last group of unspecified size represents households for which the area of cultivated land had not been recorded at the Census.

5. For facility of comparison, the table also shows for total, rural and urban areas of each unit the total number of households, total household population males and females as well as the total number of sample households and the total sample household population males and females separately.

6. For each size group of households and against each type of economic activity, the table shows the number of sample households and their population for males and females separately.

7. The table is based on a 20 per cent sample of households drawn for rural and urban areas separately.

8. The 1961 Census tabulation plan initially included this table as Table C-I—Part A in the " Social and Cultural " Tables series. It was later on decided to present it as Table B-XVII along with the household economic tables. The District Census Handbook volumes in Maharashtra, however, present it as Table C-I—Part A.

9. A subsidiary table (B-XVII.1) showing the number of households per 1,000 houses and distribution by size of 1,000 sample households has been prepared from this Table. It is included in Part I-C of the Maharashtra Census Report.
