DISTRICT CENSUS HANDBOOK
PART - A & B

SATNA DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

CHITRAKOOT

Satna district is famous for its religious and historical places like Chitrakoot, Maihar and Ramvan.

Chitrakoot is 77 km. away from Satna, its headquarters. It is situated on the bank of Mandakini river and belongs to epic Ramayana. It is believed that Ram, Sita and Laxman spent 12 years of their exile at this place. In addition to this, there are many historical places like Kamtanath, Gupt –Godavari, Hanuman dhara. There is a unique Gramodhay Vishwavidyalaya founded in 1991. About 13 km. in the south –west of Chitrakoot, a tributary of the river comes out of a cave and flows underground for a distance, so famous as Gupt- Godavari.

Part - B : Primary Census Abstract

(a) Brief note on Primary Census Abstract 545-547

(b) District Primary Census Abstract (General) 548-553

(c) Appendix to District Primary Census Abstract i.e. urban blockwise figures of Total, SC and ST population 554-567

Primary Census Abstract for Scheduled Castes 568-573

Primary Census Abstract for Scheduled Tribes 574-579

CD Block wise Village Primary Census Abstract 580-819

Urban Primary Census Abstract 820-843

Annexure-I : Number of villages under each Gram Panchayat(CD Blockwise) 844-910

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 910-911

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 911-914

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence,2001 Census 915-917

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 918

Annexure-VI : Marital status of population as per 2001 Census 919

Annexure-VII : Age, Sex and Education in the district,2001 Census 920

Annexure-VIII : Distribution of different mother tongues returned in 2001 Census 921

Annexure-IX : Statement of Five Main SC and ST in the District, 1991 census 922

Annexure-X : Hamletwise total population of villages, Census 2001 923-1021

Annexure-XI : Statement of Disability in the District, Census 2001 1022

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the “total” given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the “total” area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 5th place in the state according to population.

2. The district occupies 15th rank in the state in terms of area having 7,502 sq.km. which is 2.43 percent of the total area of state.

3. Literacy rate of Satna district is 64.6 percent and it occupies 22nd position in the state. The female literacy rate of the district is 51.1 percent .

4. Density wise the rank of the district is 10th in the state.

5. Ranking of the district according to the sex-ratio is 24th in the state.

6. Female work participation of the district is 30.6 percent of total female population. Rank of the district according to female work participation is 32nd.

7. Population wise largest village is Pindra of Raghurajnagar tahsil L.C.No.01386300 with 7,330 population and there are 7 villages having population of just one person .

8. Population wise largest town is Satna (M+OG) having population 229,307 and smallest is Kotar(N.P) with 6,863 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Gramodhay Vishwavidyalaya.

Note : One village is fully covered as outgrowth (OG) and therefore not included under the item, "Number of villages".

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

The district, as per Balmiki Ramayana and Mahabharata, derives its name from Sutikshna Rishi, a staunch devotee of Lord Rama, who during his 14 years of exile had spent nearly five years of his life in the dense forests, hills and rivers of the district - having Vindhya ranges and rivers like Tons, Son and Paisuni. It appears that the district takes its name from Satna river, a tributary of Tons flowing beside the district headquarters.

The present Satna town was founded by Maharaja Raghuraj Singh Judeo of Rewa State in the year 1865, there after a rail service was started in 1867-68 under the auspices of the Great Indian Peninsula Railway (GIPR). The people in those days were so orthodox and superstitious that before entering the train they used to worship the rail engine for their safe return. They were too reluctant to undertake a rail journey on the false belief that the train might leave them any where in the unknown places.

Maharaja Raghuraj Singh was an embodiment of secularism; giving due respects to all castes, creeds, religions, culture and languages. He laid the foundation stone of famous Venkatesh Temple at Mukhtar Ganj in 1925. This temple has no parallel in Rewa division in regards for its unique sculpture, architect and grandeur, it is built of red stones like Red Fort of Delhi and Agra.

The Digamber Jain temple was constructed in 1880 and is also noted for its marble idols, carvings and sanctity. Similarly, the foundation of Pranami Mandir was laid down by one Senbai of Nepal in 1890. A good deal of improvement was done by another lady Malabai of Gujrat in 1908 and its present shape was given by Mahant Sewadasji. People professing Pranami faith visit the temple from all over India, especially from Uttar Pradesh, Gujrat and neighbouring countries like Nepal and Bhutan.

The history of Satna district is the history of Baghelkhand region. The district comprises of Maihar, Raghurajnagar, Nagod, Sohawal, Kothi, Jaso, Baraundha, Paldeo-Parhra, Taraon, Bhaisundha and Kamta-Rajaula- all erstwhile Sanad states of Baghelkhand region.

The early Buddhist books, Ramayana and Mahabharata connect the Baghelkhand tract with the rules of Hai Hai and Kalchuri clan who are believed to have gained sufficient portion of this area during the third Century A.D. They had acquired a fort at Kalinger, and with this as their headquarters extended their dominion in Baghelkhand region. During the 4th and 5th Century A.D., the Gupta dynasty was paramount over this region. The Hai Hai and Kalchuries received the first blow at the hands of Chandel chief Yasovarman, 925 to 955 A.D., who seized the Kalinger fort and the areas surrounding it. However, the Kalchuries held the possession of this area till the end of 12th Century A.D.

The chief of Rewa descended from the Solanki clan of Gujrat, who made their way into this area in the middle of 13th Century and occupied the fort of Merpa first and Kalinger thereafter. It is also said that

a Solanki prince named Kanandev married a Kalchuri (Haihai) girl of Mandla and received Bandhogarh (In the Umaria district) in dowry which remained as the Baghel capital till its destruction in 1597 by the Mughal Emperor Akbar.

In 1298, the emperor Allauddin drove the last Baghel ruler of Gujrat and this led to considerable migration of Baghels to Bandhogarh, where they continued extending their dominion till 15th Century. The Baghel King Ram Chandra was contemporary of Akbar. Tansen, the renowned musician was in his court, from where he was summoned to become one of the nine jewels of Akbar darbar.

After the death of Birbhadra, a minor named Vikramaditya acceded to the throne of Bandhogarh, which gave rise to the disturbances as a result of which Akbar seized and dismantled the Bandhogarh fort in 1597. It is after this that Rewa started gaining importance and the constructions of palaces, forts and other buildings started from 1618.

After the treat of Bassein, the British made overture of alliance to the ruler of Rewa, but the latter rejected it. But, later on, in 1822, Raja Jaisingh entered into alliance - a treaty with the British - and agreed to allow British troops to march through or be stationed within the territory of Rewa state. In the mutiny of 1857, Maharaja Raghuraj Singh helped the British to crush the uprising in the neighbouring areas and for this, His Majesty, the King, was pleased to restore him Sohagpur (Shahdol district) and Amarkantak and also conferred on him the title of His Highness and Maharaja and a salute of 17 guns.

Until the 18th Century, the state was known as Unchahara from the name of its original capital. The chiefs of Nagod were Parihar Rajputs belonging traditionally to Mount Abu. In the seventh century, Parihar Rajputs drove out the Gaharwar rulers from and established themselves in the country between Mahoba and Mau. In the nineth century they were repulsed eastwards by the Chandels, where Raja Dharamsingh seized the fort of Naro from the Teli Rajas in 1344. In 1478 Raja Bhoja obtained Unchahra, which he made the chief town, and which remained so until 1720, when the capital was moved to Nagod by Raja Chainsingh. Lateron, the Parihars lost all their territories to the Baghels and Bundelas except the limited territory that they held before 1947.

When the British became paramount after the treaty

of Bessein (1820), Nagod was held as a territory to Panna and was included in the sanad granted to that State in 1807. In 1809, however, a separate sanad was granted to Lal Shesrajsingh confirming him in his possessions. In the mutiny of 1857, the chief Raghvendra Singh behaved most loyally in assisting the Britishers and was rewarded by the grant of 11 villages, which had belonged to the confiscated State of Bijairaghogarh. The Nagod chiefs had the title of Raja and received a salute of 9 guns.

The chiefs of Maihar claimed descent from the Kachwaha Rajput clan. The family apparently migrated from Alwar in the 17th or 18th century, and obtained land from the Orchha chief Thakur Bhimsingh later entered the service of Chhatrasal of Panna. His grandson Beni Singh became minister to Raja Hindupat, who granted him the territory that now forms most of the Maihar tahsil in about 1770. Originally it had been a part of Rewa. Beni Singh, who was killed in 1788, constructed numerous tanks and buildings. His son Rajdhar was conquered by Ali Bahadur of Banda early in the nineteenth century. Ali Bahadur, however, restored the state to Durjansingh, a younger son of Beni Singh. In 1806 and 1814, Durjansingh received sanads from the British government confirming him in the possession of his lands. On his death in 1826 the State was divided between his two sons, Bishansingh, the elder, succeeding to Maihar, while Pragdas, the younger, obtained Bijai Raghogarh. The latter state (now in Murwara tahsil of Katni district) was confiscated in 1858 owing to the rebellion of the chief. Rulers of Maihar enjoyed the title of Raja and were entitled to a salute of 9 guns.

Kothi was a small sanad state of about 169 sq.km, now included in the Raghurajnagar tahsil. The state was formerly ruled by chiefs of the Bhar tribe but Jagat Rai Singh Baghel drove out the original Bhar chief and founded the jagir. On the establishment of British supremacy Kothi was held to be subordinate to Panna because in the eighteenth century when Chhatar rao Bundela was in power in Panna, the Kothi chiefs were his tributory. Thereafter, however, during the domination of Alibahadur of Banda, and afterwards, the Kothi chiefs maintained their independence. In view of this the British granted a sanad to Rais Lal

Duniyapati Singh in 1810, making him directly dependent on British government.

Sohawal also was a small sanad State of about 213 sq.km, separated into two sections by the Kothi state. Its founder Fatehsingh was one of the two sons of Maharaja Amarsingh of Rewa. He had revolted against his father in the sixteenth century. Originally the State was considerable extent including Birsinghput, Kothi and other tracts in the neighbourhood. On the rise of Panna under Chhatrasal, Sohawal became a territory but retained its independence. Later on, however, Jagatrai and Hirdeshah, sons of Chhatrasal, actually seized much of its territory, while the Kothi chief, taking advantage of these disturbances, with three off his allegiance attacked and killed the Sohawal chief, Prithipal Singh. On the establishment of British supremacy in nineteenth century, Sohawal was first held to be subordinate to Panna. But a separate sanad was granted to Rai Amansingh in 1809 on the ground that, the state had existed before Chhatrasal's rise to power and had remained independent throughout the supremacy of Alibahadur of Banda. The state has been merged in Raghurajnagar tahsil since 1950.

Baraundha was also a petty sanad state of about 218 sq.km. Formerly it was much larger, comprising most of the present Banda district of Uttar Pradesh, the family having held the country for at least 400 years. The name Pathar-Kachhar was derived from its position on the skirts of Vindhyas. The ruling family claimed to be an old one and to belong to the Raghuwanshi clan of the solar division of Rajputs. The original seat of the family was in Rasin in Banda district, originally called Raja Vasini, where there are many old remains. The early history is, however, very obscure. During Bundela supremacy, the State appears to have been held on a sanad from Hirdeshah of Panna. On the accession of British to paramount power, Raja Mohansingh was recognised and confirmed in his territory by a sanad granted in 1807. The rulers of the state bore the title of Raja and received a saltute of 9 guns.

Chaube jagir was a collection of five petty sanad states between Baraunda state and Banda district of U.P. The five states were Paldeo, Pahara, Taraon, Bhaisundha and Kamta-Rajauli with an area of about 126 sq.km. The holders of these estates were Jijhotia Brahmins and bore the appellation of Chaube. They originally held land at village Dadri near Nowgon cantonment. Their aptitude for military service brought them to notice and they rose to high rank under Raja Chhatrasal of Panna. The owners of the first four estates were descended from Ramkishan who was governor of Kalinjar fort under Raja Hirdeshah of Panna. The jagirs are now in Raghurajnagar tahsil.

Early in 1945, the realisation dawned on the rulers of the Princely states that it was no longer possible to thwart in popular demands for responsible government in the states. Maharaja Gulab Singh the ruler of Rewa announced his decision on 2nd April 1946 to draw up a workable constitution for his state. In the same year he was deposed by the British government who was suceeded by his own son Maharaja Martand Singh on 25th June 1946, the political workers of Vindhya Pradesh decided set-up Rewa Rajya Praja Mandal. The organisational committee formed for this purpose included. Three representatives from Satna also. Subsequently events moved swithly and the country achieved independence on 15th August 1947. Finally, the Government of India took over Vindhya Pradesh on 1st January 1950, as a centrally-administered area.

Subsequently, in 1956 due to re-organisation of States, Vindhya Pradesh became a part of New Madhya Pradesh with Satna as one of its district in the Rewa Division.

(iii) Administrative Set-up:

According to 2001 Census, the total number villages are 2052, out of which 1817 are inhabited and 235 villages are un-inhabited. Tahsilwise number of villages are, Raghurajnagar (622), Nagod (262), Unchehara (235), Rampur-Baghelan (226), Amarpatan (187), Rampur (268), and Maihar (252). In the district there are 7 tahsils, whereas CD blocks are 8, Majhgawa, Sihawa, Nagod, Unchehara, Rampur-Baghelan, Amarpatan, Ram-nagar and Maihar. There are 11 towns in the district. As per Urban classification, Satna (M.corp.), Maihar (M), Chitrakoot, Birsinghpur, Kothi, Jaitwara, Nagod, Unchehara, Rampur-Baghelan, Kotar and Amerpatan are all the (CT). In all the CD blocks headquarters there are 8 Janpad Panchayats at CD block level.

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is

the lay functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

He is the Chief Executive Officer of the district and he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various Departments, control over local-self governing bodies, execution of the government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in the time of emergencies like floods, famine and epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main works, viz.(i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) Development.

The Collector is assisted by Deputy Collectors, Tahsildars, Naib Tahsildars, Revenue Inspectors and Patwaris. The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under excise act, so as to enable him to implement the excise and prohibition policy of the Government. Superintendent of Police is the head of police department at the district headquarters.

The Judiciary is independent. At the district level, there is District Court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges who are posted at tahsil level.

(iv) Physical features

Satna is one of the northern district of Madhya Pradesh. After the merger of states the district was formed as a part of Vindhya Pradesh in 1948. It lies in the Rewa revenue division. The district Satna is situated between latitude 23°58' and 25°11' north and longitudes 80°21' and 81°23' east. The district has a peculiar shape. It is surrounded by Banda district of Uttar Pradesh in the north, district Rewa in the eastern side and a portion of it also touches the Sidhi district and the southern boundary abuts (touches) on the Murwara and Vijairaghogarh tahsils of Katni, Bandhogarh tahsil of Umaria district and Beohari tahsil of Shahdol districts, while the entire western boundary is made by Panna district. As per the Census 2001 it's geographical area is 7502 sq.kms. reported by Surveyor General of India. It is the 15th largest district of State in respect of area, which is 2.43% of the total area 308245 sq.kms. of the Madhya Pradesh.

The district lies on the Vindhyan plateau with an average altitude of 300 to 400 metres, Several hills rises from this plateau belonging to the Vindhyan system. The southern portion of Nagod tahsil is a hilly country consisting of angeled mass of low hills enclosing considerable streches of level ground. The general height of the hills is 550 to 600 metres in the southern portion of the district.

The general slope of the country in the tahsil is towards east. The Kaimur ridge, rises suddenly about twelve kilometers north of Son river in Amarpatan tahsil. A line of hills run along with the north bank of the river, which gets split into various separate hills in the east of Amarpatan tahsil. In the extreme south-east of the tahsil there are three more or less parallel such hills. The main scarp rises to more than 600 metres at many points north of Ramnagar an isolated small hill rises to 722 metres. Rest of the area of the tahsil is an alluvial plain drained by Bihar river.

Sandstones of Bhandar series concealed by alluvium are found in south- western part of Maihar tahsil. Kaimur ridge river through the broader eastern portion the Maihar tahsil dividing the Mahanadi basin from that the Tons. The southern portion of the Raghurajnagar tahsil consists of alluvial plain and is watered by Tons and its tributeries Satna and Simrawal. A small hill with north-south strike in the southern portion of the tahsil encloses the narrow plateau. In the north of the tahsil the country is hilly. The Panna hills cross the narrowest portion of the tahsil in the west-east direction and separate the valley of the paisuni from the plateau to the south, further north is the Vindhyachal range running from west to east almost parallel to the Panna hills, through the former Sanad states of Baraundha Pathar-Kachhar and the Chaube jagir. Between these two parallel ranges the country consists of a plateau interspread by hills.

In the north of the Vindhyachal range lies the narrow strip of plain country. The Kaimur, The Panna hills and the Vindhachal ranges of the Vindhyan system

together with their spurs constitute the principal hill system of the district. The Kaimur range enters Maihar tahsil at village Jhukehi and runs through the entire length of Maihar and Amarpatan tahsil in an easterly direction. The Panna hills enter northern portion of the district and traverse the Raghurajnagar tahsil in a west-east direction. The Vindhyachal range is in the extreme north of the district cutting across in a west east direction.

Rivers

The district forms part of the Ganga drainage system. The major tributaries of the system in Satna district are the Son, the Tons and the Paisuni. They drain south-eastern, central and northern parts of the district. The general inclination of the river is towards the north-east. Variations to this are marked by Satna and Sinrvrawal streams the tributaries of the Tons. The water of the Sone and Tons are separated by the Kaimur hill range. Nearly paralled to this is the Northern range, which enters from Panna, traversing the northern part, and passes into Karroi tahsil of Banda in Uttar Pradesh. This range forms the water parting line between the streams of the tons and the Paisuni. The Son rises from the catchment of the Son kund about 19 km. south-east of Pendra Road railway station. The river Son flows to the north-east along the southern boundry of Satna for about 45 km. and joins the Ganga near Ramnagar.

River Tons is the main river of the district. It rises from the Kaimur ranges to the west of Jukehi railway station. The originating place called the Tamasa Kund from where it flows in a narrow and hollowed trench between the two scarps of Kaimur range towards the north-east for about 12 km. After receiving the Kursar nala it turns to the north and again to north east below the confluence of the Satna river. The river flows through the low Ganga Valley in north easterly direction for about 110 kms. and joins the Ganga just above Sirsa.

The Paisumi river is a sacred river as mentioned rises from Dagrihill and flows north-east in the district through the hilly and forest area and leaves below Nayagaon. It forms the north-eastern boundary for some distance. The total length of this river in the district is about 44 km, in Banda district of Uttar Pradesh, it flows to the north past Karwi and finally enters the Yamuna.

The Satna river is supposed to have originated from a place where the Hermit Sutekshna of Ramayana fame once lived. This place is now merged into Panna district. The river has given its name to the district headquarter and later to the district. The Satna rises from the hill between Rampura and Bikrampur. After an easterly course of 18 km. in the district it meets the Amran river which rises from the south western plateau near Kalawal. It flows to the north for about 27 km. through Nagod town and receives the Satna on the boundary of Raghurajnagar - Nagod tahsils, which turns to the south west and flows another stretch of 30 km. before it meets Tons. Sohawal is located on its northern bank.

Climate:

The climate of the district is generally warm and dry. South west monsoon gives good rain. Winter season is from November to end of the February. Then comes summer which is from second week of March to an earlier part of June. The effect from mid of heat of is more in this season than others. June to September is the rainy season when monsoon is active. In October and November monsoon climate prevails. Sometimes, at the end of December and in early mid January, there is mist, cold wave, hail storms and light rain fall. The highest temperature goes upto 48.0°C in the month of June and minimum 5.0°C in the month of January. After monsoon and winter season winds blow from north-east direction. In march winds blow from different directions and from April winds blow from west and south-west and this remains from May to September.

The district has average rainfall for 47 to 67 days during the year. Gradually the average rainfall has been recorded to 923.4 mm. in the year 1997-98. For the year 1993-94 average rainfall was highest 1089.30 mm., 1031.4mm in 1994-95, 920.0 mm. in 1995-96 and 865.7 mm. in 1996-97.

Forests:

As per classification of Indian forests, the forests included in the district fall primarily in the tropical dry deciduous forests group. The occurance of teak as the most prevalent species at some places and those of the adaptic types of vegetation, like salai, and Kardhai met with in the dry deciduous mixed forests.

The total area under government forests is 29.95

percent of the total geographical area. The forests are distributed into large patches or narrow belts in the northern, north western, south-western and southern parts of the district. The teak growth is very poor on sandstones and limestones and on acitic soils it is absent. Amongst the dry species, Kandhai khain, kulu etc. are the high growth trees. These trees give rise to heavy growth of shrubs, herbs, weeds and climbers.

Flora

The species found in the district are achar, aonla, arjun, bahera, bamboo, saj, bel, bija, dhaman, dhawra, phansi or dhobin, ganiar, ber, haldu, harra, jaimun, khair, kullu, siwan, mahua, papra, rohan, sal, salai, seris, bendia and teak. Amaltas, baronga, kuda, marorphai, maker, reunjha and thuar are the shrubs and herbs found abundantly in the open hilly areas and among weeds and grasses dhurbhusi, kano, kusal, phuli, panwar, gursakri and harsingar are the most prevalent found in the plain fields which may die out automatically. Amerbel most on ber, keoti, mahul and palasbel are the consipicuous climbers.

Fauna

The forest cover having dwindled, the wild life population in the district cannot be expected to be large. However, it still bears a large variety of species. The northern and north-western parts of the district are found plentiful in herbivora as well as earnivora such as tiger, panther, sloth bear, wild boar and among the herbivora deer, gayelles, sambhar, spotted deer, scramp deer, barking deer and and mause deer. Among the antilopes black buck, chausingha, soth and chinkara are the well known antilopes. Other animals with attraction are the hare, porcupine, monkey and langur, Jakol, fox etc.

Among Indian reptiles pythem, dhaman, cobra, goh are the insect and rat eaters and among birds, peafowls, Jawas, rain and bush quals, black partridges, deb chiral, kathaphora, nulkantha, kabutar, papiha, koyal, hariyal, bagula, panduli ducks, storks, tilehari, baj, eagles, crows and vallures etc. are the acquatic and scavenger birds found in the district.

Land use:

Chief soil in the district are alluvial which can be divided into mar or mair, sigon which comes next in quality to the first and dumatia which forms a mixture of the two. After these come the patar or bhat which is lighter sandy soil of the kind of rakad yielding only one crop that is kharif and the white soil of the lowest fertility which is called usar. Among all these, mair is further sub-divided into three varieties, called dowar, rusi and gobaris. Kachhar is the fertile alluvial soil of river beds and on the banks of the streams.

Area of forest land is 202382 hect. which is 27.26 % of the total area of the district, non agricultural land which is in use are 24001 hect. and wasteland and unagricultural land is 76222 hect. Useful agricultural land is 46602 hect., double crop area is 124316 hect., Padat land is 32274 hect. unirrigated land is 359848 hect.and net area is 484164 hect. The main crops are wheat (189675 hect.), paddy (90778 hect.), jowar (6873 hect.), maize (959 hect.) and under other crops (16677 hect.), production of pulses are gram (61193 hect.), tuar (12862 hect.), 19412 hect. production of soyabean, til and other oil seeds are in 74355 hect. (Source DS Book - 1997-98).

Minerals:

Except for a soil and alluvial covered area, forming the northern end of the district and about a kilometre thick almost east - west belt of Bundelkhand granite, the whole of the district is covered by the sedimentary sandstone, shale and limestone beds of Semri, Kaimur, Rewa and Bhander groups of Vindhyan super group. The wide soil tract running south, south-west from Satna town is underlain by thick beds of shale. A few scattered small exposures of basaltic Deccan Trap flows are present. Near the north eastern corner of the district as well as on the high plateau, south of Satna town, small patches of clay, ochres and minor bauxite bodies are found.

Agriculture:

Agriculture was the most dominant occupation for the people of the district in the past. Two croping seasons of kharif or siari lasting from May to Oct. and rabi or unhari lasting from Oct. to March are both important in the district. The principle crops are rice, kodon, jowar, maize and of the latter wheat, gram, barley, tur, linseed etc. Comparatively speaking however, rabi is more important in the sense that, it grows wheat, areawise the largest, as well as most of the non food crops in the district. For upliftment of the agriculture production is gradually increasing. The soil

of the district is very fertile and suitable for commercial crops like pulses, oil seeds and groves.

Irrigation:

The main source of irrigation is by canals, tube wells, wells tanks and lakes. On the basis of the district statistical book, 1998 number of canals are 55, Tubewells 7143, wells 15070 and tanks (lakes) 110, Canals irrigate 6798 hect., tubewells 37,262 hect. wells 23,932 hect. and tanks 714 hect. of agricultural land, from other sources 19238 hect. of land are also irrigated. Thus from all the sources of total of 87944 hect. are irrigated which is 18.16% of the total sown area.

Animal Husbandry:

Cattle wealth relating to cow number 711031 and relating to buffalloes number 152003. Number of sheeps 26377, goats 174933, horse 484, donkeys 280, camels 2 and pigs 13684, altogether 1078794 are cattle wealth in the district as reported in 1997-98. Total birds which including cocks, hens and ducks are 70294 in number.

There are centres for treating cattle, culture, vaccination and artificial conception. There are 15 veterinary hospitals and 58 veterinary medical health centres in the district. Till 1998 animals given treatment were 158713, 23872 sterilization, 279385 vaccination and 6029 were given artificial conception.

Fisheries:

Number of tanks rivers, small tanks and streams in the Satna district are many, water collection is in abundance due to which many different varieties of fish are found, main fishes are Kotla, rohita, cirrhina, mingala, magur, singhi, saur, padin, Mahaseer, singhan are found in plentiful. In addition sanwal, khokhsi, dersal anal, pectoral caudal fins, Tengna , patola, bam, Bami, etc. are also grow quickly and comparatively at lesser rates than Katla and rohu in the district.

Industries:

The first lime factory under the name and style of Satna Stone and Lime Company was established in 1893 and is perhaps the pioneer of lime manufacturing in the country. Thereafter, hundreds lime manufacturing units have been established at Sohawal, Maihar, Nagod, Sitpura, Jukehi, Sajjanpur and Babupur etc., and these factories are the back bones of the huge steel plants of the country - viz. Bhilai, Durgapur, Rourkela and Tata. Lime stones from this district is being exported to all the factories as well as to the Paper, Sugar and other Chemical factories of the country.

After independence three huge projects have further added to the industrialisation of this district., viz., Satna Cement, Maihar Cement and Universal Cables Ltd. Some more cement factories are coming up and soon the district shall be able to produce enough cement to meet the requirements of the entire state of Madhya Pradesh.

Apart from lime stones, other minerals, viz. white, red and yellow cohres are being extracted from Naro and Chitrakoot hills which are being exported to foreign countries thereby earning lacs of foreign exchange - so badly needed for the development of our Five year plans. These ochres are being transported ex-Jaitwara station to other places.

The district is famous for tendu leaves used in the manufacture of bidies - the popular smoke of common man. Bidi manufacturers from all parts of India - Assam, Bengal, Orissa and other neighbouring countries like Pakistan, Bangladesh and Ceylon visit the district for the purchase of bidi leaves (tendu patta). Satna district itself is one of the biggest bidi manufacturing centres and is exporting bidies all over India to the tune of crores of rupees every year, thereby providing employment to at least one lac villagers - particularly the women folk.

The district is also famous for its oil seeds crops, particularly Alsi - which is noted for its excellent quality all over the world. Even today, in London markets, the rates of Satna quality Alsi are being pronounced and given due place in the market rates.

Another indigenous cottage industry of the district is the Unchehra Phool Thalies Udyong, which has good reputation all over the country. This industry is as old as Satna district and is in the hands of Tavers of Unchehra, a railway station at a distance of 14 miles (22 km.) from district headquarters. Due to high cost of raw materials, government controls and rising popularity of steelwares, the industry has received a set back and the sales considerably reduced. But even then, during the Hindu Marriages, the use of Phoolwares is a must, as this metal is considered to be sacred. Perhaps, this is the only factor which has still

kept the UNCHEHRA PHOOL THALI UDYOG alive.

In short, the future of the district is very bright and the day is not far off when this district will achieve a very important place amongst the industrialised cities of the country.

Transport:

The communication facilities in Satna district can be said to be more developed than in several other districts of Madhya Pradesh. The district is served by 2154.73 km. pucca roads, 1430.01 km. Kachha roads and 129 km. broad gauge railway line and these help in the movement of men and goods under the production of forest department length of road is 216.20 km. All the tahsils of the district are well connected by pucca roads. The road system comprising the National Highways, State Highways, district roads and village roads katchha and pucca have made communication easier.

Till 1996-97 a total no. of 45630 vehicles were registered for transport and communications. However even today number of villages are not served by any road except pathways and east-tracks which are open only during the dry season.

Electricity and Power:

There are 2052 villages in the district out of which 1633 villages are electrified which means 91.54% of villages are electrified. At the end of 1997—98 the domestic consumption was 76478 k.w. commercial 12193 k.w., industrial 301188 k.w., water supply 4932 k.w., Agricultural (irrigation) consumption 186114 k.w. and for street lighting 2806 k.w. electricity was consumed. Thus altogether 134929 k.w. electricity was consumed which was 432.60 unit per person electricity consumption estimated in that year. There were 19036 electrified water pumps.

Gram Panchayat:

Panchayat is the basic institution of local administration and is the foundation of decentralized administration. Under the directive principles of state policy, the Constitution of India provides the Panchayati Raj System. M.P. Government has passed M.P. Panchayat Adhiniyam System. According to 73rd Amendment of the Constitution, M.P. Government passed the Panchayat Notification 1993 which provides Panchayat for villages, Janpad Panchayats for Blocks and district Panchayat for district. M.P. Gram Sabha Notification 2001, Gram Sabha, which includes all the major persons is constitutionally approved unit and gives voting rights to elect Panch, Sarpanch, members of Janpad and members of district Panchayat. The Gram Sabha has power to approve works under annual budget of the village. Constituted with the elected members, these institutions work for 5 years. At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio. For women there is 1/3 reservation. Village Panchayat, Janpad Panchayat and District Panchayat have members 10-20, 10-25, 10-35 respectively.

Gram Panchayat within its area and within its budget, can take up work like cleanliness, water supply, public works(roads, buildings, well tanks) market rates, Co-operation to Government works, Community health and development works. Janpad Panchayat within its budget take up works, like Community development and village integration, agriculture, social, commerce, cattle-rearing, fish-breeding, adult-education, co-operatives, cottage industry, welfare and employment oriented programme. It is the duty of the district Panchayat to have control over Janpad Panchayats and village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works. All the development works of the villages are done by one district panchayat, 8 janapad panchayats, and 555 Gram Panchayats and 8 Community development blocks.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible

Source for Brief History, Administrative Setup and Physical Features :
1. Gagetteer, Satna district.
2. District Statistical Book.
3. District Census Officer.

that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat

as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural

pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada
6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)

33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi
17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia
35. Oraon, Dhanka, Dhangad
36. Panika (in Chhatarpur, Datia(except Bhander tahsil) Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
37. Pao
38. Pardhan, Pathari, Saroti
39. Pardhi (in Bhopal, Raisen and Sehore districts)
40. Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar, Takia

(i) Chhindwara, Mandla, Dindori and Seoni districts
(ii) Baihar tahsil of Balaghat district
(iii) Betul, Shahpur and Bhainsdehi tahsils of Betul district
(iv) Patan and Sihora tahsils and Majholi Block of Jabalpur district
(v) Katni (Murwara) and Vijay Raghogarh tehsil and Bahoriband, Dhimarkheda Block of Katni district.
(vi) Hoshangabad, Babai, Sohagpur, Piparia and Bankhedi tahsils and Kesla Block of Hoshangabad district
(vii) Narsimhapur district.
(viii) Harsud tahsil of Khandwa district.

41. Parja
42. Sahariya, Saharia, Seharia, Sehria, Sosia, Sor
43. Saonta, Saunta
44. Saur
45. Sawar, Sawara
46. Sonr

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference

period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground

conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001

in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991

Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Satna district comprises of 1,817 inhabited villages, 235 uninhabited vilages and total 2,052 villages distributed among seven tahsils and eight CD blocks. The district has 11 towns. The average household size of the district is 5.4. Total population of the district is 1,870,104 comprising 971,396 males and 898,708 females. Thus the sex ratio of the district works out to 925 which is higher than the sex-ratio of the state (919). Density of the district is 249 persons per sq.km. and is also higher than the density of the state which is 196. Literacy rate of the district 64.6 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 16.3 per cent and 14.3 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii)Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Raghurajnagar	502,412	305,724	196,688	660,665	380,123	280,542	31.5	24.3	42.6	39.1	42.5
2	Nagod	157,885	143,449	14,436	200,254	180,793	19,461	26.8	26	34.8	9.1	9.7
3	Unchehara	126,674	111,917	14,757	160,016	143,352	16,664	26.3	28.1	12.9	11.6	10.4
4	Rampur-Baghelan	184,655	162,618	22,037	233,232	215,059	18,173	26.3	32.2	-17.5	11.9	7.8
5	Amarpatan	148,222	133,192	15,030	188,005	171,634	16,371	26.8	28.9	8.9	10.1	8.7
6	Ramnagar	116,488	116,488	-	133,393	133,393	-	14.5	14.5	-	-	-
7	Maihar	229,048	202,832	26,216	294,539	260,197	34,342	28.6	28.3	31	11.4	11.7
District Total:		1,465,384	1,176,220	289,164	1,870,104	1,484,551	385,553	27.6	26.2	33.3	19.7	20.6

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 27.6 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 26.2 per cent, while for urban areas it is 33.3 per cent. Among the tahsils, Raghurajnagar has registered the highest decadal growth rate of 31.5 per cent. The growth rate in rural area is highest in Rampur-Baghelan tahsil and it is highest in Raghurajnagar for urban area of the district. The percentage of urban population to total population of the district is 20.6 per cent in 2001 against 19.7 per cent in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1817 inhabited villages, 419 (23.1 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 466 villages having 25.6 per cent villages of the district while in the size class of 500-999 population there are 450 villages constituting 24.8 per cent of total villages. 328 villages (18.1 per cent) are in the size class of 1000-1999 and 140 villages (7.7 per cent) are in the size class of 2000-4999. There are 14 villages (0.8 per cent) in the size class of 5000-9999. There is no village (0.0 per cent) falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Satna

(a) New	
(i) Statutory town	Nil
(ii) Census town	Nil
(b) Denotified	Nil
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census	Nil
(c) Declassified	
(d) Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	63	3.5	1,377	0.1
11-20	48	2.6	3,670	0.2
21-50	125	6.9	26,874	1.8
51-100	164	9.0	41,576	2.8
101-200	372	20.5	235,445	15.9
201-300	403	22.2	395,155	26.6
301-500	438	24.1	471,430	31.8
501 +	204	11.2	309,024	20.8
Not known	0	0.0	0	0.0
District Total:	1,817	100.0	1,484,551	100.0
Population Density (Rural) of the district:		221.8		

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 438 accounting for 24.1 per cent of the total inhabited villages of the district fall in the density range of 301-500 persons having 31.8 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 111 villages (6.1 per cent). 204 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-300 is 22.2 per cent of the total inhabited villages having 26.6 per cent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 6.9 and 9.0 per cent of inhabited villages.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	1,041	1,043	996
1911	967	973	903	1,034	1,037	981
1921	949	959	863	1,016	1,019	956
1931	947	957	862	1,006	1,012	925
1941	946	957	869	986	989	946
1951	945	953	902	976	981	937
1961	932	947	860	965	979	836
1971	920	934	864	950	964	837
1981	921	934	878	936	953	853
1991	912	921	887	918	929	875
2001	919	927	898	925	937	882

As per 2001 Census, sex ratio of 925 females per 1,000 males has been recorded in the district

against the state average of 919. The sex ratio of the district had been significantly higher in all Census years over the state average figures. The lowest sex ratio of 918 females per 1,000 males was recorded in the district in Census 1991.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Raghurajnagar	899	920	870
2	Nagod	918	921	892
3	Unchehara	929	930	920
4	Rampur-Baghelan	950	950	946
5	Amarpatan	947	953	888
6	Ramnagar	959	959	-
7	Maihar	940	943	918
	District Total:	925	937	882

The table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 937 whereas it is 882 for the urban area. The sex ratio in rural area is highest (959) in Ramnagar tahsil whereas in urban area it is highest (946) in Rampur-Baghelan tahsil. The sex ratio of the district is 925 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Chitrakoot (Majhgawan)	919
2	Satna (Sohawal)	922
3	Nagod	921
4	Unchahara	930
5	Rampur Baghelan	950
6	Amarpatan	953
7	Ramnagar	959
8	Maihar	943
	District (Rural) Total:	937

The table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 937 females per 1,000 males. Among the CD Blocks the highest sex ratio of 959 is found in Ramnagar CD Block and the lowest of 919 is recorded in Chitrakoot(Majhgawan) CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	55	3.0	1,769	0.1
700-749	26	1.4	5,827	0.4
750-799	40	2.2	7,685	0.5
800-849	139	7.6	67,693	4.6
850-899	281	15.5	226,586	15.3
900-949	479	26.4	551,312	37.1
950-999	440	24.2	455,567	30.7
1000-1099	275	15.1	156,274	10.5
1100+	82	4.5	11,838	0.8
District Total:	1,817	100.0	1,484,551	100.0
Sex ratio (Rural) for District:			937	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 479 accounting for 26.4 per cent of the total villages having largest population of 37.1 per cent in the district fall in the sex ratio range of 900-949. It is followed by 440 villages constituting 24.2 per cent of total villages and 30.7 per cent population falling in the range of 950-999.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Amarpatan	(NP)	888
2	Birsinghpur	(NP)	905
3	Chitrakoot	(NP)	767
4	Jaitwara	(NP)	958
5	Kotar	(NP)	965
6	Kothi	(NP)	941
7	Maihar	(M)	918
8	Nagod	(NP)	892
9	Rampur Baghelan	(NP)	935
10	Satna	UA	873
	(i) Satna	(M Corp.)	875
11	Unchahara	(NP)	920
	Sex ratio (Urban) for the district:		882

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 882 females per 1,000 males as a whole. Among the 11 towns of the district the sex ratio varies between 767 to 965. Kotar (NP) has the highest sex ratio 965 while Chitrakoot (NP) has the lowest sex ratio of 767 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Urban	5,381	2,829	2,552	902
	District Total:	Total	345,813	179,102	166,711	931
		Rural	284,495	147,061	137,434	935
		Urban	61,318	32,041	29,277	914

The table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 931 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 935 and 914 respectively. The rural sex ratio in tahsil varies between 925 in Nagod and Rampur-Baghelan tahsil to 945 in Unchehara tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Chitrakoot (Majhgawan)	38,454	19,841	18,613	938

District (Rural) Total	1,817	100.0	284,495	100.0
Sex ratio (Rural) for District:			935	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e.359 (19.8 per cent) having population of (11.6 per cent) in the district (rural) fall in the sex ratio range of 1,100 and above. It is followed by the sex ratio range of 1,000-1,099 which claims 306 villages (16.8 per cent) and 18.1 per cent population. Next to it 271 villages (14.9 per cent) and 3.5 per cent population are in the range of less than 700. Minimum number of villages i.e. 70 (3.9 per cent) and 2.8 per cent population fall in the range of 700-749.

		Urban	385,553	51,276	19,814	13.3	5.1

This table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,870,104 total population of the district 16.3 per cent belong to the Scheduled Castes and 14.3 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 17.0 per cent in rural population and 13.3 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Nagod tahsil (22.1) while the lowest is found in Ramnagar tahsil (12.4). The proportion of Scheduled Tribes population is 16.7 and 5.1 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Ramnagar tahsil (25.4 per cent) and the lowest Scheduled Tribes population is recorded in Nagod tahsil (8.1 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Chitrakoot (Majhgawan)	195,841	34,390	40,213	17.6	20.5
2	Satna (Sohawal)	184,282	44,894	19,411	24.4	10.5
3	Nagod	180,793	40,799	16,110	22.6	8.9
4	Unchahara	143,352	22,127	30,563	15.4	21.3
5	Rampur Baghelan	215,059	32,233	27,963	15.0	13.0
6	Amarpatan	171,634	23,026	24,167	13.4	14.1
7	Ramnagar	133,393	16,593	33,900	12.4	25.4
8	Maihar	260,197	38,879	55,963	14.9	21.5
	District (Rural) Total:	1,484,551	252,941	248,290	17.0	16.7

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 17.0 per cent of rural population of the district belongs to Scheduled Castes and 16.7 per cent to Scheduled Tribes. Scheduled Castes population is highest (24.4 per cent) in Satna(Sohawal) CD Block whereas it is lowest(12.4 per cent) in Ramnagar CD Block. Scheduled Tribes population is highest (25.4 per cent) in Ramnagar CD Block and it is lowest (8.9 per cent) in Nagod CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	572	31.5	0	0.0
Less than 5	166	9.1	3,051	1.2
5-10	244	13.4	22,273	8.8
11-20	338	18.6	82,569	32.6
21-30	215	11.8	61,332	24.2
31-40	117	6.4	37,787	14.9
41-50	53	2.9	16,018	6.3
51-75	79	4.3	24,277	9.6
76 and above	33	1.8	5,634	2.2
District Total	1,817	100.0	252,941	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 572 villages accounting for 31.5 per cent of total 1817 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 166 villages (9.1 per cent). In 244 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 338 villages. The range of 21-30 and 31-40 per cent contains 215 and 117 villages respectively. There are 53 villages in the range of 41-50 and 79 villages in the range of 51-75. Only 33 villages are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	564	31.0	0	0.0
Less than 5	211	11.6	4,202	1.7
5-10	177	9.7	21,485	8.7
11-20	266	14.6	56,522	22.8
21-30	151	8.3	41,884	16.9
31-40	107	5.9	32,276	13.0
41-50	58	3.2	16,775	6.8
51-75	124	6.8	32,848	13.2
76 and above	159	8.8	42,298	17.0
District Total	1,817	100.0	248,290	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 564 villages accounting for 31.0 per cent of total 1817 inhabited villages in the district do not have any Scheduled Tribes population. The proportion of Scheduled Tribes population is less than 5.0 per cent in 211 villages (11.6 per cent). In 177 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 266 villages. The range of 21-30 and 31- 40 per cent contains 151 and 107 villages respectively. There are 58 villages in the range of 41-50 and 124 villages in the range of 51-75. Only 159 villages are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Amarpatan (NP)	16,371	2,963	1,145	18.1	7.0
2	Birsinghpur (NP)	12,338	2,274	708	18.4	5.7
3	Chitrakoot (NP)	22,279	2,989	1,722	13.4	7.7
4	Jaitwara (NP)	8,908	1,984	287	22.3	3.2
5	Kotar (NP)	6,863	1,233	600	18.0	8.7
6	Kothi (NP)	7,710	665	1,406	8.6	18.2
7	Maihar (M)	34,342	4,219	2,352	12.3	6.8
8	Nagod (NP)	19,461	3,429	143	17.6	0.7
9	Rampur Baghelan (NP)	11,310	1,199	2,076	10.6	18.4
10	Satna UA	229,307	27,204	8,614	11.9	3.8
	(i) Satna (M Corp.)	225,464	26,951	8,303	12.0	3.7
11	Unchahara (NP)	16,664	3,117	761	18.7	4.6
	District(Urban) Total	385,553	51,276	19,814	13.3	5.1

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/Towns of the district. Out of the 11 towns the highest proportion (22.3 per cent) of Scheduled Castes is found in Jaitwara (NP) and lowest proportion (8.6 per cent) in Kothi (NP). For Scheduled Tribes the highest proportion (18.4 per cent) is found in Rampur-Baghelan (NP) and lowest (0.7 per cent) in Nagod (NP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chitrakoot (Majhgawan)	914	941
2	Satna (Sohawal)	923	928
3	Nagod	929	952
4	Unchahara	936	940
5	Rampur Baghelan	952	949
6	Amarpatan	958	944
7	Ramnagar	989	962
8	Maihar	962	967
	District (Rural) Total	941	950

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district. The Scheduled Castes sex ratio is 941 for district (rural). Among the CD Blocks, the highest sex ratio of 989 is found in Ramnagar CD Block and lowest of 914 is recorded in Chitrakoot(Majhgawan) CD Block.

Sex ratio of Scheduled Tribes population in Satna district rural is 950. Among the CD Blocks, the highest sex ratio of 967 is found in Maihar CD Block and lowest of 928 is recorded in Satna(Sohawal) CD Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amarpatan (NP)	920	941
2	Birsinghpur (NP)	919	908
3	Chitrakoot (NP)	910	805
4	Jaitwara (NP)	919	952
5	Kotar (NP)	963	974
6	Kothi (NP)	847	1,006
7	Maihar (M)	947	973
8	Nagod (NP)	901	857
9	Rampur Baghelan (NP)	915	958
10	Satna UA	920	907
	(i) Satna (M Corp.)	920	909
11	Unchahara (NP)	922	1,238
	Sex ratio (Urban) for the district:	920	932

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/Towns for Census 2001. For the district (urban) sex ratio is slightly lower (920) among Scheduled Castes compared to Scheduled Tribes (932).

Among the 11 towns of the district, there is no town in the Scheduled Caste sex ratio above one thousand. In Kothi (NP) and Unchahara (NP) Scheduled Tribe sex ratio is above one thousand i.e. 1,006 and 1,238 respectively. In the remaining towns sex ratio for Scheduled Castes is below one thousand, the lowest being 847 in Kothi (NP). Sex ratio of Scheduled Tribes for the remaining towns is below the line of equality, lowest being 805 in Chitrakoot (NP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Tahsil wise and district wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 64.6 per cent in the district. This proportion in rural area is 61.0 per cent and 77.9 per cent in urban areas. In the district the literacy rate of males 77.1 per cent is much higher than that of females which is 51.1 per cent.

Among the tahsils, Raghurajnagar tahsil tops with 68.4 per cent literates and the lowest literacy rate 58.4 per cent is recorded for Ramnagar tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

District (Rural) Total:		732,363	461,330	271,033	752,188	305,180	447,008	61	74.5	46.7	27.8

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 61.0 per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 74.5 and 46.7 per cent respectively. At CD Block level Rampur-Baghelan CD Block has the highest rural literacy rate of 65.1 per cent while the lowest literacy rate of 56.9 per cent is recorded for Chitrakoot(Majhgawan) CD Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	12	0.7	40	0.0
1-10	5	0.3	764	0.1
11-20	14	0.8	3,844	0.3
21-30	50	2.8	13,861	0.9
31-40	111	6.1	36,859	2.5

District Total:	1,817	100.0	1,484,551	100.0
Literacy rate for District:			64.6	

Table 23 gives the distribution of villages by literacy ranges in the district. There is no literate in 12 villages (0.7 per cent) of the district and population of these villages is only 40. There are 25 villages constituting 1.4 per cent of total villages having 100 per cent literacy. Highest number of villages i.e. 519 villages fall in the literacy range of 61-70 per cent. This accounts for 28.6 per cent of total villages and 36.2 per cent of the district population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 81.2 per cent is recorded in Satna (UA) whereas the lowest literacy rate 61.3 is recorded in Chitrakoot (NP). Sex wise highest percentage of male literacy rate is observed in Nagod (NP) and it is lowest in Chitrakoot (NP). Gap in male female literacy rate is maximum in Chitrakoot (NP). The total literacy rate of the district (urban) comes to 77.9 per cent. It is 86.7% for males and 67.8% for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

	District (Rural) Total:	104,123	68,009	36,114	148,818	62,316	86,502	52.4	66.4	37.6	28.8

Table 25 presents the CD Blockwise number and percentage of Scheduled Castes, litertes and illiterates by Sex. It is seen that literacy rate of Scheduled Caste population of the district is 52.4 per cent. It is highest 55.6 per cent in Satna(Sohwal) CD block and lowest 48.2 per cent in Chitrakoot(Majhgawan) CD block. The gap in male/female literacy rate is highest (31.5 per cent) in Ramnagar CD block. The overall male literacy rate of the district (rural) works out to 66.4 per cent and it is 37.6 per cent for females.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	36	2.9	133	0.1
1-10	3	0.2	72	0.0
11-20	15	1.2	761	0.3
21-30	51	4.1	4,771	1.9
31-40	137	11.0	21,460	8.5
41-50	351	28.2	83,908	33.2
51-60	368	29.6	87,638	34.6
61-70	181	14.5	42,149	16.7

81-90	23	1.8	2,568	1.0
91-99	2	0.2	239	0.1
100	13	1.0	56	0.0
District Total:	1245	100.0	252,941	100.0
Literacy rate for District (Rural):			52.4	

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 52.4 per cent. Highest number of villages i.e. 368 villages fall in the literacy range of 51-60 per cent. There are 13 villages which have 100 per cent literacy rate of Scheduled Caste population. 36 villages are such where the literacy rate of Scheduled Caste population is zero per cent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

100	24	1.9	114	0.0
District Total: 1,253		100.0	248,290	100.0
Literacy rate for District (Rural):			36.6	

Distribution of villages by literacy rate range for Scheduled Tribes population of the district (Rural) is presented in this table. The literacy rate of Scheduled Tribes population for district (rural) is 36.6 percent. Accordingly the highest number of villages 332 fall in the literacy rate range of 31-40 percent constituting 26.5 percent of villages having Scheduled Tribe population and 32.1 percent of total Scheduled Tribe population. There are 50 villages which fall in the literacy range of 0 percent and 24 villages have 100 percent literacy rate of the Scheduled Tribe population.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD Block level in the district as per 2001 Census. The proportaion of the total workers works out to 41.9 percent of the total population in the district. The total workers are comprised of 30.0 percent of main workers and 11.9 percent of marginal workers and the remaining 58.1 percent are non-workers.

Among males, 41.2 % are main workers and 7.6% are marginal workers whereas among females, corresponding figures are18.1% and 16.4% respectively.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/towns of the district. It is seen that total workers constitute 32.0 percent of the total population of the district (urban) and the proportion of non-workers is 68.0 percent. Among

males, 43.7 % are main workers and 3.2% are marginal workers whereas among females, corresponding figures are 10.8% and 4.3% respectively.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 34.1 per cent of the total workers (main + marginal), 31.8 per cent of total workers are engaged as agricultural labourers, 8.8 per cent as household industry workers and 25.2 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 29.4 per cent in Raghurajnagar tahsil and 43.0 per cent in Rampur-Baghelan tahsil. The percentage of females cultivators is 32.0 per cent which is low as compared to 35.3 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The highest proportion of 38.6 per cent of other workers is recorded in Raghurajnagar tahsil while the lowest proportion of 13.7 per cent is found in Rampur-Baghelan tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 41.9 per cent of total population. Among these workers cultivators constitute 39.4 per cent, agricultural labourers 37.0 per cent, household industry 8.1 per cent and other workers constitute 15.5 per cent. The proportion of cultivators is highest 51.8 per cent in Chitrakoot(Majhgawan) CD Block and is lowest 31.5 per cent in Satna(Sohwal) CD Block. Proportion of agricultural labour is highest 46.4 per cent in Ramnagar CD Block and lowest 31.7 per cent in Chitrakoot (Majhgawan) CD Block. It is also seen that the proportion of male workers is more than female workers under the category of cultivators.

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 32.0 per cent of total workers, cultivators constitute 7.4 per cent, agricultural labourers 5.9 per cent, household industry 12.3 per cent and the highest proportion is covered by other workers which is 74.4 per cent. It is also found that proportion of female workers under cultivators, agricultural labourers and household industry workers are more than the male workers proportion whereas proportion of male workers under other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 42.3 per cent in Kotar (NP), agricultural labourer is highest 32.1 per cent in Kotan (NP), household industry workers is highest 37.4 per cent in Unchahara (NP) and other workers is highest 88.7 per cent in Satna (UA).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,817 inhabited villages in the district 1,390 villages or 76.5 per cent have been provided with the education facilities of one type or the other. Similarly 456 villages in the district constituting 25.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,693 or 93.2 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 273 villages constituting 15.0 per cent of villages have been provided with post office facility within the villages. 317 or 17.4 per cent villages have been provided with the telephone facility, 336 or 18.5 per cent with transport facility, 74 or 4.1 per cent villages with bank facility and 112 or 6.2 per cent with agricultural credit societies. Similarly there are 554 or 30.5 per cent villages which are linked with the pucca road. Total 1,689 or 93.0 per cent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Maihar CD block has the highest 90.0 per cent villages where educational facility is available and lowest 65.9 per cent is found in Unchahara CD Block. Medical facility is highest in Amarpatan (47.3 per cent) and lowest (11.2 per cent) in Rampur-Baghelan) CD block. Telephone facility is highest in Nagod CD Block (29.9 per cent) but there is no facility in Ramnagar CD Block. In the field of power supply all villages have been covered except 128 villages in the district.

TABLE 38 : NUMBER AND PER CENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,484,551 persons in the district, 1,421,077 or 95.7 per cent have educational facility of one or the other type. Similarly 692,412 or 46.6 per cent population has medical facilities while 1,458,396 or 98.2 per cent have improved drinking water facility. Post office facilities are available to 585,461 or 39.4 per cent population. Telephone facility is available to 454,583 or 30.6 per cent. Transport communications facility is available to 504,169 or 34.0 per cent. Bank facility is available to 198,955 or 13.4 per cent. 254,796 or 17.2 per cent have been provided with the facility of agricultural credit societies. 710,389 or 47.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,452,493 or 97.8 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	376	40	12	428
(b) Middle School	982	380	85	1,447
(c) Degree College	108	224	1,482	1,814
2. Medical:-				
(a) Hospital	242	396	1,164	1,802
(b) PHC	191	364	1,228	1,783
3. Post Office	1,044	365	135	1,544
4. Telephone	375	272	853	1,500
5. Bus Service	724	449	328	1,501
6. Banks				
(a) Commercial Bank	408	472	883	1,763
(b) Cooperative Bank	328	416	1,041	1,785
7. Agricultural Credit Societies	524	473	708	1,705

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 428 villages do not have primary school and out of these villages, children of 376 villages have to travel less than 5 kms. for schooling. Out of 1,817 inhabited villages as many as 1,447 are deprived of middle school and 1,814 of degree college. Of these 982 avail the facility of middle school at a distance of less than 5 kms., 380 at a distance 5-10 kms. and the remaining 85 at a distance of 10+ kms. In respect of degree college 108 avail this facility at a distance of less than 5 kms., 224 between 5 to 10 kms. and rest 1482 villages at a distance of 10+ kms.

Similarly there are 1,802 villages in the district which have been devoid of Hospital facility and 1,783 villages which are deprived of PHC facilities. Of these 242 villages have the facility of Hospital available within 5 kms. while in respect of 396 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 1164 villages have this facility at a distance of 10+ kms. As regards PHC 191 avail this facility at a distance of less than 5 kms., 364 at a distance of 5-10 kms. and the remaining 1,228 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,544 villages do not have this facility in the village itself. Of these majority i.e. 1,044 have this facility at a distance of less than 5 kms., another 365 villages avail it at a distance of 5-10 kms. In the remaining 135 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1500 villages in the district which are without telephone facilitiy. Of these 375 avail this facility at a distance of less than 5 kms., 272 at a distance of 5-10 kms. and remaining 853 have to traverse a distance of 10+ kms.

For Bus service out of 1,501 villages which do not have facility, 724 villages avail this facility at a distance of less than 5 kms., 449 at a distance between 5-10 kms. and 328 at a distance of 10+ kms.

In the entire district 1,763 villages are deprived of Commercial Bank and 1,785 of Co-operative Bank. Of these 1,763 villages which are deprived of Commercial Banks 408 villages avail this facility at a distance of less than 5 kms., 472 between 5-10 kms. and the remaining 883 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,785 villages 328 villages avail this facility at a distance of less than 5 kms., 416 at a distance of 5-10 kms. and remaining 1,041 at a distance of 10+ kms. 1705 villages do not have agricultural credit societies. This facility to 524 villages is available at a distance of less than 5 kms., 473 at a distance of 5-10 kms. and the remaining 708 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office	Telephone	Transport communica-tions	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,817 inhabited villages in the district, there are 142 villages which have nearest towns upto a distance of 5 kms. Of these only 107 villages forming 75.4 per cent of total villages, are having the educational facilities atleast one type and 24 villages constituting 16.9 per cent, have the medical facilities within the range of 5 km., 14 villages forming 9.9 per cent have the facility of post office within the range of 5 km and 29 or 20.4 per cent have the facility of telephone under the distance of 5 km. 17 villages constituting 12.0 per cent have been linked by transport service. 5 village comprising 3.5 per cent have been provided bank facilities, while 6 villages constituting only 4.2 per cent have been provided by agricultural credit societies. 66 villages comprising 46.5 per cent have been provided with pucca road within the distance of 5 km.

There are 793 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 629 villages constituting 79.3 per cent have been provided with the educational facilities. 230 villages comprising 29.0 per cent have been provided with medical facilities. 135 villages constituting 17.0 per cent enjoy the post office facility. 171 villages comprising 21.6 per cent have been provided the telephone facility. 157 villages constituting 19.8 per cent have been linked with transport communications. 35 villages comprising 4.4 per cent have bank facility. 48 villages constituting 6.1 per cent are having agricultural credit societies, while 257 villages or 32.4 per cent are approachable by pucca road. 786 villages fall in the distance range of 16-50 kms. Of these, 74.9 per cent villages have educational facility, 23.2 per cent with medical, 14.0 per cent with post office, 13.6 per cent with telephone, 17.4 per cent with transport and communications. 3.8 per cent and 6.7 per cent villages with banks and agricultural credit societies facilities respectively are available. 208 (26.5 percent) villages have approach by pucca road facility.There are 74 inhabited villages in the district which fall in the distance range of 51+ kms. Of these 50 villages constituting 67.6 per cent have been provided with the educational facilities. 18 villages comprising 24.3 per cent have been provided with medical facilities. 10 villages constituting 13.5 per cent enjoy the post office facility. 6 villages comprising 8.1 per cent have been provided the telephone facility. 19 villages constituting 25.7 per cent have been linked with transport communications. 3 villages comprising 4.1 per cent have bank facility and agricultural credit societies, while 17 villages or 23.0 per cent are approachable by pucca road.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Satna district out of a total 1817 inhabited villages, overwhelming 885 have a population of less than 500 persons. Of these, 473 villages (53.4 per cent) have education facility, 87 (9.8 per cent) have medical facility, 776 (87.7 per cent) have improved drinking water facility. 7 villages (0.8 per cent) have post office facility. 66 (7.5 per cent) have telephone facility. 79 (8.9 per cent) have been linked by bus service. 4 (0.5 per cent) have bank facility. 17 villages (1.9 per cent) have been provided with the agricultural credit societies, 167 villages (18.9 per cent) have been linked with pucca road. 780 villages (88.1 per cent) have been provided with electricity.

Out of 450 villages, which fall in the population range of 500-999 persons, 437 villages (97.1 per cent) have been provided with the education facility, 122 (27.1 per cent) with medical facility, 442 (98.2 per cent) villages have improved drinking water facility. 52 villages (11.6 per cent) have been provided with post office facilities, 79 villages (17.6 per cent) with telephone facility, 81 villages (18.0 per cent) with transport facilities, 9 villages (2.0 per cent) with bank facility, 13 villages (2.9 per cent) with agricultural credit societies and 140 villages (31.1 per cent) have approach by pucca road. 431 villages (95.8 per cent) have electricity facility.

328 villages fall in population range of 1,000-1,999 persons. Of these 327 villages (99.7 per cent) have been provided with the education facility, 137 (41.8per cent) with medical facility, 321 (97.9 per cent) villages have improved drinking water facility. 97 villages (29.6 per cent) have been provided with post office facilities, 106 villages (32.3 per cent) with telephone facility, 90 villages (27.4 per cent) with transport facilities, 19 villages (5.8 per cent) with bank facility, 29 villages (8.8 per cent) with agricultural credit societies and 139 villages (42.4 per cent) have approach by pucca road. 324 villages (98.8) have electricity facility.

There are 140 villages in the district which are covered under 2,000-4,999 population range. Of these, 139 villages (99.3 per cent) have been provided with the education facility, 97 (69.3 per cent) with medical facility, 140 (100 per cent) villages have improved drinking water facility. 104 villages (74.3 per cent) have been provided with post office facilities, 58 villages (41.4 per cent) with telephone facility, 75 villages (53.6 per cent) with transport facilities, 34

villages (24.3 per cent) with bank facility, 45 villages (32.1 per cent) with agricultural credit societies and 96 villages (68.6 per cent) have approach by pucca road. All villages in this range have electricity.

There are 14 villages in the district which are covered under 5,000-9,999 population range. All villages have facility of education but in case of medical and post office facility there is only in 13 villages, 8 villages have the facility of telephone, banks and agricultural credit societies, 11 villages avail the facility of transport communication.There is no village in the population range of more than 10,000.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Chitrakoot	296	130,146	34.9	22.2
2	Satna	235	67,100	71.0	29.5
3	Nagod	244	88,776	58.6	32.3
4	Unchahara	211	82,776	40.7	35.1
5	Rampur Baghelan	215	77,219	73.4	21.1
6	Amarpatan	169	60,954	62.7	24.8
7	Ramnagar	207	52,505	47.7	15.7
8	Maihar	240	109,738	50.1	25.0
	District Total:	1,817	669,214	52.9	26.0

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents CD blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,817 inhabited villages in the district having a total area of 669,214 hectares. Of this, 52.9 per cent is cultivable and 26.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

It is seen that percentage of cultivable area to total area is highest 73.4 per cent in Rampur Baghelan CD Block. It is lowest 34.9 per cent in Chitrakoot CD Block. The percentage of irrigated area to cultivable area is highest 35.1 per cent in Unchahara and lowest 15.7 in Ramnagar CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure

11	Unchahara (NP)	4.2	0.6	0.6	0.6	0.0
	District Total	7.3	4.2	2.2	1.2	0.2

In urban areas of Satna district the average number of primary school per 10,000 population comes 7.3 schools, 4.2 junior secondary/middle, 2.2 secondary/matriculation, 1.2 senior secondary schools and the ratio of colleges is only 0.2 college per 10,000 population. Among the towns, the ratio of primary is highest in Jaitwara (NP) while lowest is Birsinghpur (NP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amarpatan(NP)	18
2	Birsinghpur(NP)	4
3	Chitrakoot(NP)	226
4	Jaitwara(NP)	4
5	Kotar (NP)	0

1	2	3
6	Kothi (NP)	8
7	Maihar (M)	11
8	Nagod (NP)	15
9	Rampur Baghelan (NP)	5
10	Satna (M Corp.)	12
11	Unchahara (NP)	18
	Distrct Total	24

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Satna district. On an average there are 24 beds per 10,000 population in urban areas of the district. Whereas it is the highest 226 in Chitrakoot (NP) while lowest number as no beds is recorded in Kotar (NP).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Amarpatan	16,371	3,990	24.4
2	Birsinghpur	12,338	3,420	27.7
3	Chitrakoot	22,279	1,370	6.1
4	Jaitwara	8,908	3,069	34.5
5	Kothi	7,710	5,352	69.4
6	Maihar	34,342	3,802	11.1
7	Nagod	19,461	12,802	65.8
8	Rampur Baghelan	11,310	2,591	22.9
9	Satna	229,307	32,010	14.0
10	Unchahara	16,664	14,248	85.5
	District Total	378,690	82,654	21.8

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 378,690 urban population 82,654 persons constitute slum population which is 21.8 per cent of total urban population. Unchahara town has the highest 85.5 per cent of slum population whereas, Chitrakut town has lowest (6.1 per cent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amarpatan (NP)	Amchur	Amchur
		Bidi	Gram
		-	Bidi
2	Birsinghpur (NP)	Batasa	Bidi

Table 47 indicates most important articles manufactured and exported out of each town in the district. The other commodities manufactured are bidi, bricks, bamboo pots, cement, earthan pots, amchur, wooden toys, wooden goods etc. Amchur, bidi, wooden toys, bauxide, tobacco, lime, cement wheat, amchur,lime stone, etc are the other important commodities which are exported by different towns.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 353,077 consisting of 284,031 rural and 69,046 urban households. 63,302 households belong to Scheduled Castes 53,184 to Scheduled Tribes. 328,098 households are living in their own houses constituting 92.9 per cent of total households. Of these households, the largest number of households (100,278) have occupied two rooms accommodation and is followed by three plus room accommodation numbering to 96,579 households. Next position is claimed by households (66,236) occupying one room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 63,083 households while 1,922 households are without any exclusive room.

19,087 households living in rented accommodation accounts for 5.40 per cent of total number of households in the district. The largest number of 7,034 households are living in single roomed accommodation followed by 6,944 households in double roomed accommodation. Next position is claimed by households (3,165) occupying three room accomodation. Households with three plus are 1,825 in numbers and 119 housels are no exclusive room.

Other households numbering to 5,892 forming only 1.7 per cent of total households are distributed in single room accommodation numbering 2,340, 1,887 double room , 923 in three roomed , 636 are in three plus and 106 households are of no exclusive room.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Raghurajnagar	40.2	59.0	0.8	21.3	78.0	0.6	67.4	31.4	1.2
2	Nagod	26.3	72.8	0.9	20.9	78.2	0.9	76.6	22.9	0.5
3	Unchehara	22.6	76.9	0.6	20.1	79.3	0.6	45.3	54.6	0.1
4	Rampur-Baghelan	24.6	74.8	0.5	23.6	75.9	0.6	37.9	61.8	0.3
5	Amarpatan	29.3	70.0	0.7	27.3	72.2	0.6	53.0	44.4	2.6
6	Ramnagar	26.6	72.6	0.9	26.6	72.6	0.9	0.0	0.0	0.0
7	Maihar	28.3	70.9	0.8	24.4	74.8	0.8	60.3	39.1	0.6
	District Total:	31.3	68.0	0.8	23.2	76.1	0.7	64.4	34.6	1.0

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 49 reveals that 31.3 per cent of household of the district are living in houses made of pucca materials, residences of 68.0 per cent households are semi permanent houses and 0.8 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 64.4 per cent are living in houses constructed of pucca materials, 34.6 per cent in semi-permanent structure and percentage of households in temporary houses is 1.0 constructed of kutcha materials. At rural level, the lowest percentage of 20.1 households occupying permanent structure is found in Unchehara tahsil while highest percentage of 27.3 is seen in Amarpatan tahsil. The proportion of semi-permanent houses is high in Unchehara (79.3) and lowest in Amarpatan (72.2) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 0.9 per cent in Nagod and Ramnagar tahsils followed by 0.8 percent in Maihar tahsil, 0.6 percent in Raghurajnagar,Unchehara,Rampur-Baghelan and Amarpatan tahsils.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Table 50 indicates that 41.2 per cent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well, 62.6 per cent households have provision of electricity in their houses. The bathroom facility is available to only 11.8 per cent households within their premises . As regards rural areas, 4.2 per cent households are having bathroom facility, whereas this proportion in urban areas comes to 43.0 per cent. 56.9 per cent rural households have facility of electricity against 86.1 per cent in urban areas. Toilet and drainage facilities in the district are available to 14.2 per cent and 21.7 per cent households respectively. Their percentage is higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil level almost conforms to the district pattern analysed.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that wood is used as the most predominant fuel used for cooking by 64.8 per cent households in the district. In the tahsils, this proportion varies between 93.9 percent in Ramnagar and 39.6 per cent in Rampur-Baghelan tahsil. In rural areas use of wood for cooking is very high while in urban areas it is used by a smaller amount of population due to availability of L.P.G.. The next cooking fuel is cowdung cake which is used by 22.3 percent households in the district. This proportion in rural and urban areas is 26.8 and 4.0 percent respectively. Next fuel is L.P.G and used by 8.0 percent in district.Use of gas in rural area for cooking is very low as compared to urban areas at tahsil level. There are 2.7 percent households using kerosene in the district. Use of kerosene for cooking by urban households comes to 11.2 percent while in urban areas its proportion is only 0.6 per cent. There are 1.5 percent households using crop residue in the district. Use of crop residue for cooking by urban households comes to 1.4 percent while in rural areas its proportion is only 1.6 percent, as a whole. The percentage of households using other types of fuel such as electricity, coal, biogas etc. is insignificant. In rural areas wood is main fuel and in urban areas cooking gas is used as predominant fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Name of Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of house-holds availing banking services	Availability of household assets						
					Radio/ Transistor	Television	Tele-phone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets
1	2	3	4	5	6	7	8	9	10	11	12
1	Raghurajnagar	Total	123,009	42,454	32,320	34,121	8,796	70,006	16,911	2,499	39,402
		Rural	72,751	16,892	16,895	7,234	969	38,010	4,021	611	29,878
		Urban	50,258	25,562	15,425	26,887	7,827	31,996	12,890	1,888	9,524

		Rural	51,006	10,831	11,205	7,513	1,048	24,984	2,702	419	22,007
		Urban	6,224	2,393	1,248	3,223	881	2,897	1,238	261	1,818
	District Total:	Total	353,077	103,913	87,470	68,560	13,480	195,384	32,368	4,935	126,266
		Rural	284,031	70,330	67,054	33,007	3,704	153,417	16,145	2,424	111,649
		Urban	69,046	33,583	20,416	35,553	9,776	41,967	16,223	2,511	14,617

This table presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households.There are 353,077 households in the district and among them, 103,913 households have been availing banking services. 87,470 households have Radio/Transistor. Television is possessed by 68,560 households. Telephone is available in 13,480 households. Bicycle is the most common means of transportation and is available in 195,384 households. Scooter, Motor cycle, Moped and Car, Jeep, Van are used by 32,368 and 4,935 households respectively. None of the specified assets is in 126,266 households.

(xi) Major Social and cultural events, natural and administrative developments and significant activities during the decade.

(i) Entire Unchehara CD block of Nagod tahsil, has been constituted a new tahsil, namely Unchehara, vide gazette notification, M.P Govt. No. F/1-38/89-VII-Sha-8 dated 6-8-1998, by merger of 235 villages.

(ii)Entire Ramnagar CD block of Amerpatan tahsil, has been constituted a new tahsil, namely Ramnagar, vide gazette notification, M.P. Govt. No F/S-27/96/VII/Sha-8, dated 7th Aug. 1998, by merger of 268 villages.

(iii) As per urban classification, Chirakoot, constituted as a nagar panchayat, vide gazetter notification No-27-F-3-1-18-3-95 dated 27-5-1995.

(iv) Status of Madhogarh, nagar panchayat is abolished.

(v)Six villages are seperated from Satna (M. Corp.) vide Gazette Notification No. 2727/18/2-94 dated 12-7-1994.[1]

(xii) Brief description of places of religious, historical or archaeological importance in villages and places or tourist interest in the town of the district.

Places of Tourism :

(a) Bharhut :

About 14 km. from Satna on the Satna-Amarpatan road stands the hill of Bharhut. The Village Bharhut, however, is reached after travelling about 3 km. Like Nalanda of olden times, Bharhut also has its own importance. The ancient history of India has vividly given the picture of Bharhut as one of the most important educational and cultural centres of the country - where an university for learning arts, science, culture and religion was established. This university attracted the scholars from all parts of the country as well as foreign countries like China, Japan and Srilanka. The relics of Bharhut bear testimony to the fact that hundreds of disciples of Budha including Chinese travellers considered Bharhut as one of the important holy places like Dwarkapuri and Badrika Ashram of today.

(b)Maihar

Maihar tahsil headquarters is situated at a distance of about 50 km and connected by rail and bus. The temple of Devi Sharda is considered one of the most pious shrines of the country and people from all parts of India - particularly from Uttar Pradesh - visit Maihar for the solemnisation of various social and religious ceremonies.

(c)Ramvan (Raghurajnagar Tahsil)

Like Salara-e-Jung Museum of Hyderabad (Andhra Pradesh) Ramvan is the creation of one single man - late Babu Sharda Prasad Khatri of Satna - who devoted his whole life for the establishment of this Ashram - which is situated at a distance of about 15 kms. from satna on Satna-Rewa Road and is an embodiment of cherished dreams of Sant Tulsidas, the author of Ramcharit Manas. The Ashram contains 25000 books of various religions of the world starting from Vedic Age. There are nearly 700 'murties' (Idols/ Statues) depicting the Shung, Gupta, Kalchuri and Chandela regimes. Most of these collections have been made from Bharhut and other important old shrines of the district - Two Chapters of Tulsikrit Ramayan are nicely carved on the walls together with the scenes, each Dohas of Ramayana on marble chips and 400 Dohas are beautifully carved on the walls of the Ashram.

Apart from above, thousands of old coins, swords, and other valuable items of historical importance - which are rarely available in any other museum of the country are also exhibited. The most interesting feature of the Ramvan is the lofty Moorti - of HANUMAN - visible from long distance which has no parallel anywhere. Before his demise and taking samadhi, Babu Sharda Prasad, handed over the entire Ramvan property to Government of India, Archeological Department in public interest, despite opposition from his successors.

(d) Chitrakoot

The next important pilgrim centre of this district is Chitrakoot - where according to legends Bhagwan Rama stayed for a considerable period during his 14 years exile from Ayodhya. The area is full of green forests, hundreds of shrines, temples and one extra

ordinary Gufa - known as Gupta Godavari, situated on the bank of River Paisuni, and surrounded by green forests. Chitrakoot is an ideal place for people of retiring age to pass their remaining days in devotion and peace. One could see hundreds of Sadhus, saints, pilgrims visiting Chitrakoot and doing Parikrama of thousands of temples almost every day. However, the biggest crowd could be seen on the day of Deepawali.

The importance of Chitrakoot has increased during the last ten years because of the fact that M/S Mafatlal Group have undertaken the construction of 1000 beded eye hospital and holds eye camps every year where more than 5000 eye-operations are conducted by famous eye specialists of the country free of charge and the patients are provided free fooding, lodging, beding, milk, spectacles and what not. Big business magnates of Gujrat visit these eye camps and look after the patients day and night. Besides, a beautiful milk dairy, mainly consisting of Jersey cows has also been established which is helping the villagers in improving their cow breeds.

It was Dr. Ram Manohar Lohia who started yearly Ramayan Mela nearly 12 years ago and since then it has become a regular feature. During Ramayan Mela great religious preachers and scholars and VIPs from Central as well as State Govt. are invited on the occasion.[1]

Important fairs:

In Satna four fairs annually are held, i.e. (Nadi mela on Maker Sankranti), Dali Baba mela on the occasion of Holi, Gopinath Lal Bhari mela (March/April) in the honour of Kherdai devi and the Siding Tazia mela. In Nagod tahsil 9 fairs are held on Shivratri (Feb/Mar.). The duration of the fairs varies from a day to a week. Basant Panchami (Jan.-Feb.) is equally important festival and 7 fairs are held at two places each in Nagod, Amarpatan and Maihar tahsils and at Birsinghpur in Raghuraj nagar tahsil. One of the most important fairs is held at Chitrakoot to honour Lord Rama, on his birthday, Ramanavami (March/April). It lasts for 20 days duration.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

(a) In the district, renowed freedom fighters had played an important role in strengthening the Freedom Movement. The immortal and incredible freedom fighters and enthusiastic eminent political workers are Shri Tirathraj Singh, Heera lal, Hazari Lal Gupta, Thakur Pd.Verma, Ganpat Pd., Alias laila, Ram sujan Pandey, Smt. Swaraj Devi, Dr. L.P. Khare, Heeralal Marwahi, Omkar Pd., Manumadeen Rajput, Deen bandhu, Smt. Satyawati, Gorelal, Mool Chand, Mahadeo Pd. Mishara, Uma Pratap Singh, Sivnath Chamar, Bhupat Tamrakar, Devi Singh, Govind Narayan Singh (ex- Chief Minister of M.P) and several others.

(b) Maihar is the abode of world famous musician ustad Alluddin Khan, (Sarod player). Recently the Govt. set-up a big music institution here in his hounour.

(c) Chitrakoot, Ram-van, and Maihar are all the important Pilgrim centres of the district. Chitrakoot (Kamtanath), Ram-van (Hanuman statue) and Maihar (temple of Sardamata) is noteworthy places.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned

1.Source : Gazetteer, Satna district.
District Statistical Handbook, Satna district

to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
Satna	Chitrakoot (NP)	Kamta	Fully Merged
		Choubepur	Fully Merged
		Nayagaon	Fully Merged
		Faisraha	Fully Merged
		Pathra	Fully Merged
		Brajpur	Fully Merged
		Rajaula	Fully Merged
		Udaipur	Fully Merged
		Mohakamgarh	Fully Merged
		Thar	Fully Merged
		Chaukharwar	Fully Merged
		Kotariya	Fully Merged
		Paldev	Fully Merged
		Padvaniyajagir	Fully Merged

(c) CD blockwise presentation of Village Directory Data

(i) CD Block Maps showing Tahsil Boundary :

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals

with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District Satna**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh	1991	183	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Satna	1991	142	186	198	203	139	183	194	198	147	191	200	207
	1981	181	205	212	241	176	203	207	231	187	200	218	251

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for all ages is higher than the state average. The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also. However some inconsistencies are observed in male-female classification. Male child mortality for q(5) of the district 198 is more than the state average 142.The table also reflects that the female child mortality is more than the male child mortality.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Satna**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	516,337 (89.9)	89,725 (17.4)	426,612 (82.6)
(A)Within the district but outside Enumeration place	379,931 (66.2)	64,047 (16.9)	315,884 (83.1)
(B)Birth place in other district of State	136,406 (23.8)	25,678 (18.8)	110,728 (81.2)
(ii) Place of Birth in other states of India than the state of Enumeration	55,485 (9.7)	21,180 (38.2)	34,305 (61.8)
(iii) Birth place in Foreign	2,440 (0.4)	1,252 (51.3)	1,188 (48.7)
(iv) Unclassified	1 (0.0)	0 (0.0)	1 (100.0)
Total Immigrants	574,263	112,157	462,106
Persons born in the place of enumeration	1,295,841	859,239	436,602
Total population	1,870,104	971,396	898,708

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 89.9 per cent of total migration. The migration from within the district but outside the enumeration place is 66.2 per cent whereas migration from other districts of the state is 23.8 per cent. Migration from other states is 9.7 per cent and the migration from outside India is 0.4 per cent of the total migration. Migration of 1 persons i.e.0.0 per cent which could not be classified in first three classifications has been shown as unclassified in first three classifications has been shown as unclassified in the table. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Satna**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	525,405	92,530	432,875
	(90.4)	(17.6)	(82.4)
(A)Within the district but outside Enumeration place	391,329	66,151	325,178
	(67.3)	(16.9)	(83.1)
(B)From other district of State	134,076	26,379	107,697
	(23.1)	(19.7)	(80.3)
(ii) From other states of India outside enumeration state	53,976	20,416	33,560
	(9.3)	(37.8)	(62.2)
(iii) Place of residence outside India	2,105	1,118	987
	(0.4)	(53.1)	(46.9)
(iv) Unclassified	0	0	0
	(0.0)	(0.0)	(0.0)
Total Immigrants	581,486	114,064	467,422
Population of Non-inmigrants	1,288,618	857,332	431,286
Total population	1,870,104	971,396	898,708

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 90.4 per cent of total migrated population. Within this classification, the migration from within the district is 67.3 per cent and only 23.1 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 9.3 per cent of total migration and it is only 0.4 per cent from outside India. Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES- AS PER CENSUS 2001

State : Madhya Pradesh **District : Satna**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Uttar Pradesh	39,574	71.3
Bihar	3,998	7.2
Chhattisgarh	3,786	6.8
Maharashtra	1,477	2.7
Rajasthan	1,304	2.4
West Bengal	1,262	2.3
Total of 6 States	51,401	92.6
Total of other States	4,084	7.4
Total	55,485	100.0

Source- Migration Table D-1

Inmigration from other states is classified in this table. 92.6 per cent of total inmigrants are from Uttar Pradesh, Bihar, Chhatisgargh, Maharashtra, Rajasthan and West Bengal whereas the remaining inmigrants from all other states together constitute only 7.4 per cent.

Total 39,574 persons have migrated from Uttar Pradesh which alone accounts for 71.3 per cent of total inmigrants. Satna is located at the neighbouring state border of Uttar Pradesh as such the migration from Uttar Pradesh is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Satna**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10
Madhya Pradesh 1991	48,566,242	44,595,604	2,983,127	447,111	123,961	168,016	110,506	45,087	92,830
		(91.8)	(6.1)	(0.9)	(0.3)	(0.3)	(0.2)	(0.1)	(0.2)
Madhya Pradesh 2001	6,0348,023	55,004,675	3,841,449	545,446	170,381	209,322	150,772	409,285	16,693
		(91.1)	(6.4)	(0.9)	(0.3)	(0.3)	(0.2)	(0.7)	(0.0)
Satna 1991	1,465,384	1,421,825	37,194	2,783	1,061	500	947	66	1,008
		(97.0)	(2.5)	(0.2)	(0.1)	(0.0)	(0.1)	(0.0)	(0.1)
Satna 2001	1,870,104	1,811,634	50,172	3,162	1,568	579	1,749	755	485
		(96.9)	(2.7)	(0.2)	(0.1)	(0.0)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu population in the district is comparatively higher than that of state. Contrary to this , the proportion of population belonging to all other religions is significantly lower in the district as compared to state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Satna**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Satna							
	Total	1,870,104	918,638	878,318	69,770	3,378	0
			(49.1)	(47.0)	(3.7)	(0.2)	(0.0)
	Rural	1,484,551	719,728	705,670	56,437	2,716	0
			(48.5)	(47.5)	(3.8)	(0.2)	(0.0)
	Urban	385,553	198,910	172,648	13,333	662	0
			(51.6)	(44.8)	(3.5)	(0.2)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (49.1%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is marginally lower than that of the state. Contrary to this the percentage of married population of the district is higher than that of the state. The state average is higher than the district in respect of widowed and divorced population. The proportion of unmarried persons are more in urban areas than in rural areas but married persons are more in the rural areas as compared to the urban areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Satna**

Age Group	Total Population			Total Literates			Literates (Without educational level) and below primary			Primary

(Source- Migration Table C-8)

Note: Percentages are given in brackets.

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,524,291 persons belonging to the age 7 and above 984,833 are literates and thus, the literacy rate of the district works out to 64.6 per cent. Similarly the male and female literacy works out to 77.1 and 51.1 per cent respectively.

313,021 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 79.4 per cent of population in this age group. In the age group 15-34; 117,739 persons (19.4 per cent) are found educated up to middle, 125,699 person (20.7 per cent) upto the level of Matriculate/ Higher Secondary/ Intermediate/ Diploma Tech. and 29,597 persons (4.9 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII

DETAILS OF VARIOUS MOTHER TONGUES PREVALENT IN THE DISTRICT : CENSUS 2001

State- Madhya Pradesh **District - Satna**
