DISTRICT CENSUS HANDBOOK
PART - A & B

SHAJAPUR DISTRICT

VILLAGE & TOWN DIRECTORY

VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

Ram Singh
Joint Director
Directorate of Census Operations, Madhya Pradesh and Chhattisgarh

BAIJNATH NIDANI TEMPLE, AGAR

Baijnath Nidane temple was founded by Agariya Bhil in 10th century at Agar. Agar is the tehsil headquarters and 52.2 km. away from its district headquarters Shajapur.

An ancient Mahadev temple famous as 'Baijnath Nipania' is 3 km. away from Agar in the north. The temple was constructed by the different *Rajgharanas* of Indore, Sailana, Ratlam, Dewas, Sitamau, Jhalwar, Piploda and Jaora. The construction of the temple was completed in between 1526-1535. Renovation of the temple was done in 1881. There are attractive statues of Mahadev and Parvati. In addition to artistic statue of Varaha Avtar of Lord Vishnu, there is also a temple of Jain community near Kamalkund.

Primary Census Abstract for Scheduled Tribes 382-387

CD Block wise Village Primary Census Abstract 388-537

Urban Primary Census Abstract 538-561

Annexure-I : Number of villages under each Gram Panchayat(C.D. Blockwise) 562-606

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 607

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 608-610

Annexure-IV : Percentage distribution of Migrants by place of birth/ place of last residence,2001 Census 611-613

Annexure-V : Brief account of main religion in the district/tahsils as per 2001 Census 614

Annexure-VI : Marital status of population as per 2001 Census 615

Annexure-VII : Age, Sex and Education in the district, 2001 Census 616

Annexure-VIII : Distribution of different mother tongues returned in 2001 Census 617

Annexure-IX : Statement of Five Main SC and ST in the District, 1991 census 618

Annexure-X : Hamletwise total population of villages, Census 2001 619-663

Annexure-XI : Statement of Disability in the District, Census 2001 664

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in board ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district. In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities. In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Divisions. Dr. R.P. Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division Under the guidance of Shri S.L.Jain, Deputy Director and Shri. R.K. Mehata, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census. As its name suggests, it is brought out for each district in the State. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population thereof. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents. Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans.

Part B of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning. Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included.

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tehsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records ,Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The District Census Handbook had been a joint venture of the Government of Madhya Pradesh and the Government of India. The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 1991 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Shri J.K.Banthia, IAS, Registrar General and Census Commissioner of India. I owe special thanks to Shri. J.K.Banthia. After the repatriation of Shri J.K.Banthia to Maharashtra Government and later to come foreign assignment. We have been receiving continous guidance and support from Shri D.K. Sikri presently Registrar General and Census Commissioner, India for bringing this report out. I am grateful to him. I am thankful to Dr. R.P. Singh, DRG (Map), Shri. R.G. Mitra DRG (C&T) and Dr.I.C. Agrawal, Sr. Research Officer (S.S.) and Shri.S.L. Jain, Dy. Director of S.S. Division for providing technical guidance.

In the directorate many officers/officials contributed in the Census 2001. First of all I am grateful to the then Director of Census Operation, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance the Census 2001 was carried out successfully.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

District Highlights - 2001 Census

1. The district occupies 24th place in the state according to population.

2. The district occupies 26th rank in the state in terms of area having 6,195 sq.km. which is 2.0 percent of the total area of state.

3. Literacy rate of Shajapur district is 70.9 percent and it occupies 8th position in the state. The female literacy rate of the district is 57.4 percent .

4. Density wise the rank of the district is 16th in the state.

5. Ranking of the district according to the sex-ratio is 23rd in the state.

6. Female work participation of the district is 42.0 percent of total female population. Rank of the district according to female work participation is 9th.

7. Population wise largest village is Pankhedi of Kalapipal tahsil L.C.No.02742000 with 9,429 population and smallest village is Singarpur of Shujalpur tahsil L.C.No.02731300 with population of only one person.

8. Population wise largest town is Shajapur (M+OG) having population 57,818 and smallest is Badgaon(NP) with 6,561 population.

9. Economy of the district is mainly dependent on agriculture and the district is famous for Baijnath Nidani temple, Agar.

Note :- No village are fully covered as out growths (OGs) and therefore not included under the item, “Number of villages”.

Definition of Census Town :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:-

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook:

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census. It is brought out for every district and is a very useful publication which is widely used by planners, administrators, academicians and researchers as it provides, among other things, the primary census data down to the village level.

History :

The history of the District Census Handbook could be traced from the "Village lists" brought out for every district in 1901 and "Village Statistics" for every district in 1911. This was discontinued in 1921 and 1931. In 1941, however, "Village Statistics" were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated .

Scope :

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district. With the increasing utility and demand of statistical data for the planning process, the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate, agriculture, animal husbandry, co-operative bank, industry, education, health, etc., apart from presenting the village wise primary census data and census tables. An introductory note giving information on historical background, physical features, soil, climate, civic administration, agriculture, industry, education, etc. together with detailed analysis on census tables was also a novel feature of the 1961 census. Maps of District and Tahsil were also included.

Publication of DCHB at the 1971 Census :

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states. Therefore, in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz. Part A, B and C, in order to release the maximum data as and when ready. Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages, these being part of the non-census statistics. Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented.

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early. For various reasons, collection of non-census statistics took a long time and consequently, finalization of Part C was unduly delayed. Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing. Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing.

Strategy at the 1981 Census :

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics, as well as the census tables for the district were dropped. The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there.

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes.

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981. This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums.

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census. An appendix containing Development block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern.

The 1991 DCHB Series :

In the context of development planning the CD Block stay as an operational unit, the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans. The same had been presented CD Blockwise in 1991 Census.

The scope of the 1991 DCHB, particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area, population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc.

Contents of the DCHB series 2001 :

The present series of District Census Handbook consisting of two parts viz. Part A and Part B is being published in a single Volume.

Part A Village Directory :

Village Directory contains information about the name of the village with location code number, assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communications, approach to village together with distance in Km, distance from the nearest town, power supply and land use data. In addition there are eight appendix to the village Directory as under :

Appendix I : CD Block wise(rural) abstract of educational, medical and other amenities.

Appendix I-a : CD Block wise abstract of villages by number of Primary schools.

Appendix I-b : CD Block wise abstract of Villages of Primary, middle and secondary schools.

Appendix I-c : CD Block wise abstract of Villages with different sources of drinking water facilities available.

Appendix II : Villages with 5000 and above Population, which do not have one or more amenities

Appendix II-a : Census Towns which do not have one or more amenities

Appendix III : Land Utilization data in respect of Census Towns/Non Municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other that drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes Population.

Appendix VI : Summary showing number of villages not having Scheduled Tribe Population.

Appendix VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Statement showing number of girls school in the villages.

Town Directory :

The Town Directory contains the following seven statements and one appendix.

Statement I : Status and Growth History

Statement II : Physical aspects and location of towns

Statement III : Municipal Finance

Statement IV : Civic and other amenities

Statement V : Medical,Educational, Recreational and cultural facilities

Statement VI : Trade, Commerce, Industry and Banking

Statement VII: Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population.

Primary Census Abstract

Part B: -The Primary Census Abstract gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main Workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers. The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels namely, Districts, CD blocks, Village, and UA/Towns. In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract.

Primary Census Abstracts for Scheduled Castes and Scheduled Tribes:

The primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise /Town wise. It will have the same characteristics as indicated in the Primary census Abstract to the total population.

Publication of DCHB in Regional Language :

In 1981, part A and part B of DCHB were brought out separately for every district which were printed in diglot i.e. a mixed up Hindi and English versions while in 1971, both the parts i.e. part A and part B were brought out in a single volume with simultaneous Hindi and English versions. The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses. The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference. That is to say that the districts belonging to the erstwhile state of Madhya Pradesh comprising the Mahakoshal Region and 2 districts of erstwhile Bhopal state has the District Census Handbook in English version only, while with respect to 16 districts of Madhya Bharat region, the DCHB were published in diglot. The DCHB of 8 districts of Vindhya Pradesh region were however published in Hindi version only.

New Features of DCHB 2001 :

The main features of Village Directory of DCHB 2001 are :

(1) For the first time eight digit continuous location code is assigned to all the villages within the state. These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first Tahsil of first district of State and continue till the end of last village of last Tahsil of the last district within a state.

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census . As a result the State code of Madhya Pradesh which was 13 in 1991 has changed to 23 in 2001.

(3) As compared to earlier series of Village Directory addition of more useful information viz. Number of Commercial, co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/ magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory.

(4) Annexures giving information on fertility, religion, migration, mother tongue, Scheduled Caste/Scheduled Tribe have been included in DCHB 2001.

Town Directory :

No major change has been made in Town Directory when compared to Town Directory of 1991. However, some improvement has been made in the data collection on slums of the towns having population

50,000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration. In 2001 information with respect to slum areas have been collected for all towns.

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991. In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII.

Primary Census Abstract :

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued.

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule.

(3) The information on Disability was obtained for the first time in Census 2001 in column 15 of the household schedule.

(4) The household schedule is divided in three parts. The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001.

(ii) Brief History of the District :

Shajapur district derives its name from the headquarter town. The town was a small hamlet in the 17th century. Mughal Emperor Shahjahan founded the town of Shajapur during his visit to Malwa in 1640. He laid a formation of fort and Jama Masjid here hence Shajapur was known as Shahjahanpur. The present Shajapur appears to be a distorted form of Shahjanpur.

As per earlier history, one Agria Bhil founded Agar in the 10th century. But immediately after seizing it, Jahala Rajputs ruled it upto the 18th century. Then it was passed on to the Panwars of Dhar and then to the Scindia. Sujalpur was more important place than Shajapur itself. Originally it was founded by Raj Karnapur, a Jain merchant and thereafter was known by his name as Rai Karanpur. It was taken over and raised to a town by Shujat Khan, the right hand man of Emperor Sher Shah Suri and Baz Bahadur's uncle. The Mughal Emperor Akbar took Shujalpur in 1554 and again in 1562. Most of the district came under the *Sarkar* of Sarangpur in the *Subah* of Malwa. Sarangapur *Sarkar* comprised 24 *Mahals* and the headquarters had a brick fort. Agra(Agar) Bijilpur, Bhorasa, Zirapur, Sarangpur, Sondarsi, Sosnor and Shujjapur (Shujalpur), were some of the *Mahals* that were identified within this district

In ancient times, Shajapur was mentioned as Avanti region, which was later called Malwa. Avanti was one of the great monarchies of northern India during the reign of the Buddha. Since the rule of Haihaya race of the Yadu lineage, Kartavirya extended his conquest from the mouth of the Narmada to as far as the Himalayas and raised the Haihaya power to prominence. The present territory of Shajapur was therefore a part of Haihaya kingdom. Chanda Pradyata Mahasena was the most powerful among the five rulers of this dynasty. They reigned for 138 years from their capital at Ujjaini and were contemporaries of the descendents of Bimbsara and the Saisunaga kings. Thus it seems from the Puranic evidence that the last of the prradyatas was supplanted by a Sisunaga monarch and the Avanti region was incorporated in the growing kingdom of Magadha. Later this area was probably subjugated by Mahamandapa Nand, founder ruler of the dynasty, is referred to in the *Puranas* as the distroyer of all Kashatriyas and sole monarchy. In this way Shajapur district might have come under the rule of the Nandas.

Britishers started pursuing Pindaris and captured Jawad in 1818. The weakness of the internal Government paved the way for the hostilities with the British Government after the death of Maharaja Jankorji Scindia in 1843. On his death eight years old Bhagriath Rao alias Jayaji Rao Scindia succeeded to the *gaddi* (throne) of Gwalior with the British approval. Three months later Dada Khasgiwala the general of Gwalior Darbar commenced hostilities against the British but was defeated, so, he concluded a treaty on 13th January 1844. As per treaty, a sum of Rs. 26 lakhs as war expenses was demanded from Gwalior state and in default several districts including Shajapur were to be handed over to the British Government until the said sum was paid off. Failing to pay of the sum, the civil administration of Shajapur came under the control

of Bristish Government.Till the great revolt in 1857, Agar was a military cantonment in 1844. On the eve of the Great revolt the 5th Infantry regiment of Gwalior was stationed at Agar. No sooner did the revolt first brokeout at Indore on the 1st July, 1857 then the news reached Agar and the contingent broke into revolt on 4th July, 1857.

Thorough out the period of the revolt, Jayaji Rao Scindia remained loyal to the British and rendered valuable services to them for which he received back the civil administration and management of Shajapur. From 1860 onwards, the district was partly of the Gwalior state and after the death of Jayaji Rao Scindia in 1886, his son Madhav Rao Scindia succeeded him , Madhav Rao Scindia was vested with ruling powers on December 1894. He died on 5th June 1925 and Maharaja Jivaji Rao Scindia succeeded him and the history of the district is mainly the history of administrative changes and political awakening which flowed from the larger political movement that stirred the century and culminated into the attainment of independence. Subsequently, as a result of the reorganization Madhya Pradesh state in November 1956, Shajapur district became a part of it under the Bhopal Division. Subsequently, the district formed a part of Ujjain division.

(iii) Administrative Set-up

According to Census 2001, the total number of villages in the district are 1117, out of which 1068 are inhabited and 49 un-inhabited. There are 8 tahsils and same number of blocks, in the district. Tahsilwise number of villages are (1) Susner (119), (2) Nalkheda (96), (3) Badod (140), (4) Agar (141) (5) Shajapur 138,(6) Mowan Badodiya (174), (7) Shujalpur (138) and (8) Kalapipal (125). As per urban classification, three big towns of the district, namely Agar, Shujalpur and Shajapur are (M.C) and rest of the towns Susner, Soyatkalan, Nalkheda, Badagaon, Badod, Kanad, Maksi, Akodia and Polay Kalan are Nagar Panchayats. There are 509 gram panchayats in the district.There are 323 *Patwari Halkas* under the revenue administration .

Collector is the Chief Executive Officer of the district and as such he exercises general supervision over various departments with regard to their non-technical work. Co-ordination of the activities of various departments, controls over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in time of natural calamities like floods, famine and epidemics, etc. also come within his purview. The narrative on the organizational set-up of the collectorate may be divided into three main categories , viz.(i) land revenue, land-records including consolidation of land and other allied matters. (ii) Law and order and (iii) Development.

Deputy collectors, tahsildars, *naib* tahsildars, revenue inspectors and *patwaris* assist the Collector. The Collector is also associated with a number of other committees including the District Advisory Committee. The Collector is also vested with statutory powers under excise act to implement the excise and prohibition policy of the Government Superintendent of police is the head of police department at the district headquarters. In order to facilitate proper and smooth judiciary and administration, there are 16 police stations in the district. The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the key functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

The Judiciary is independent. At the district level there is district court headed by District and Session Judge. District and Session Judge is assisted by civil-Judges posted at tahsil levels.

(vi)Physical features

Shajapur district is a part of the Central Madhya Pradesh Plateau-Ratlam plateau Micro region according to the present scheme of regional delineation. The district is situated in the northwestern part of the state and lies between latitudes $23^0$06' and $24^0$19' North and longitudes $75^0$41' and $77^0$02' East. The district is bounded by Ujjain in the west, Dewas and Sehore in the south, Rajgarh in the east and Jalawar district of Rajasthan in the north.

The entire district is a part of Deccan Trap of Cretaceous Eocene age. The general elevation of the district is about 450 metres from the mean sea level. The topography is undulating in general. The valleys are flat plains, with low mounds. The district has deep black and shallow back brown and alluvial soils of the northern region.

Physio-cultural diversities in the district have sub-divide into the following sub-micro regions.

Agar Plateau

The region is delineated over the western part of the district covering the major areas of Agar tahsil. There is a hill tract in the west of Badod town showing scattered hillocks in the north-south direction. The presence of hills in the centre has affected the drainage pattern. The height of this tract varies between 500 and 545 metres above the mean sea level. The slope of this region is towards the north. Dudhaliy and Kachhol are the main streams on the west which originate from the hill tract and drain towards the west Chhoti Kali Sindh, which is the main perennial streams of the region, flows northwards on the western border of the region.

Shajapur Forested upland

The region stretches from north to south in the middle of the district covering considerable portions of Agar and Shajapur tahsils and small part of Susner tahsil. It is a part of Malwa plateau with typical topography. There is a continuous chain of hills in the entire region. The height of the region varies between 450 and 530 metres above the mean sea level. The surface height decreases towards the north. Since it is an upland area, a number of seasonal streams originate from this zone and drain mostly towards the east. Lakundar and Ahu are the main streams flowing from south to north in this region. The streams, which join Lakundar river on its left bank, originate from this hill tract. Ahu river drains along the western border of the region's hilly terrain.

Kali Sindh Basin

The region is elongated between the southern and northern limits of the district. It occupies the major parts of Susner and Shajapur tahsils and a very small part of Agar tahsil. Southern part of the region is hilly whereas northern part has plain land characteristics. The hills gradually decrease in height from south to north. There are a few scattered hillocks in the central and northern parts also. The altitude of the region varies between 450 and 528 metres above the mean sea level. Numerous streams originate from the hilly area and dissect the surface. Kali Sindh is the main river, which traverses through the hills and further flows on the eastern border of the district. Lakundar is the main rivulets of Kali Sindh that flows northwards. Geologically the entire region is a part of Deccan Trap of Cretaceous Eocene period.

Shajapur Upland

This region extends over the eastern part of the district covering the entire Shujalpur tahsil and a small segment of Shajapur tahsil. Being a part of Malwa plateau, it presents the dissected topography. A hill range enters this region from the north and extends towards the south. The southern part of the region is an upland area and northern part is relatively low lying. In the south, the hills are scattered and are eroded by various streams. The height at the region varies between 435 and 507 metres above the main sea level. The 450 metres contour encircles the area along Newaj river where the small hills are spread. The river Newaj dissects these hills. The eastern part of the region is a low and the tributaries of Newaj can decide water dividing line of the western part. Newaj and Parbati rivers drain the region. Parbati river flows northwards on the eastern border of the region while river Newaj flows in the middle of the region. Both the rivers are perennial.

Rivers

Scattered hillocks spread in the west of the district, which affect the drainage pattern. It is known as Agar Plateau. In the middle west there is a continuous chain of hills, which decreases towards the north. Eastern part represents dissected topography where hills are scattered and eroded by streams. Northern part of the district shows a plain topography along Kali Sindh river. The altitudes vary generally in the district between 339 and 500 metres above the mean sea level.

Chhoti Kali Sindh, Kali Sindh, Parbati, Lukandar, Ahu, Newaj and other rivers drain the district. Parbati is a perennial river containing plenty of water, which flows northwards and forms the southeastern border with Sehore district. Chhoti Kali Sindh forms the

western border where as Kali Sindh forms the northeastern border of the district with Rajgarh. All these rivers of the district flow in the northward direction forming the general slope.

Parbati

Parbati or the western Parbati rises from the northern slopes of the Vindhyachal range near Siddiqueganj in Sehore district. It flows towards the north-east and drains a narrow belt in the eastern part of the district . It also forms the eastern boundary common with Sehore. Further it flows into the districts of Rajgarh,Guna and Kota of Rajasthan. Below Narsinghgarh, river attains a large size.Parbati joins the right bank of the Chambal at Palighat after a course of 354 km. of which about 50 km. is within or along the district boundary.

Newaj

Newaj tributary of the Parabti rises from the western boundary of Sehore district. It flows towards the north and enters the district near Geglekheri. It drains the major part of Shajapur tashil. After a course of about 48 km. in the district it ultimately joins the Chambal.

Kali Sindh

It rises from the Vindhyan hill (723 metres) in Dewas district. The river flows to the north traversing across Shajapur tahsil. It leaves the district above Sarangpur but after flowing for about nine kilometres, it retouches the northeastern boundary common with Rajgarh district. Before it leaves the district finally, the Lakundar meets it on the left bank. Sundarsi, Kalisindh railway station, Sarangpur and Jhalawar are important settlements on its bank. It is an important tributary of the Chambal. Its length within the district is 40 km and along northeastern boundary is 56 km.

Lakundar

Lakundar rises from Chandgarh hill in Dewas district. It enters Shajapur near the southwestern corner and flows due north through Shajapur and Susner tahsil. It also forms the inter-district boundary with Ujjain and inter- tahsil boundary between Agar and Susner. The Lakundar joins the left bank of the Kali Sindh.

Ahu and the Auan

The Abu is a small stream, rising from Tonkra hill of Agar tahsil. It flows along the northwestern boundary of the district common with Jhalawar (Rajasthan). The Auan eastern stream rises near Agar and forms the inter-tahsil boundary with Susner.

The Chhoti Kali Sindh

It rises from the vicinity of Dewas and flows to the north-west in Dewas, Ujjain, Shajapur and Jhalawar district. In this district, it flows mostly along the south-western and western boundaries. The banks are cut up and show signs of growing ravines.

Climate

The district enjoys a mild climate being located on the Malwa plateau. The seasons are well defined. The monsoon breaks by the third or fourth week of June. The monsoon begins to Taper off by September and October. It is warm and humid but the nights begin to get colder from November onwards. The ensuing winter goes upto February. After February temperature increases steadily and May generally the hottest month with the mean dally maximum temperature at about 40^0 C and minimum 25^0 C. With the onset of the monsoon in the district by about the middle of June there is appreciable drop of 6 C in temperature. By the end of September when the monsoon withdraws the day temperature slightly increases and the nights become cooler. After November there a is rapid drop in both the day and night temperatures. January is the coldest month with the mean daily maximum temperature at about 26^0 c and the daily minimum at 12^0C. Winds are generally light which starts strengthening in force during the late summer as also during the monsoon period. Generally winds blow from dilation in between south west and north-west.

As per records of rainfall (1996 to 2000), of the district as a whole, the average rainfall in the district was1,260.4 mm in (1996), 1,073.6 mm (in 1997-98), 1,015.21 (in 1998-99) and 1,015 (in 1999-2000). The highest annual rainfall was recorded in the year 1996-97 which was 1,260.4 mm and the lowest rainfall was 1,015.00 in the year 1999-2000.

Flora

The district is devoid of forests. However, in the village jungle, the following trees are commonly found *Babul*, *Khair*, *Neem*, *Aam*(Mango). *Jamun*, *Khajur*(Asecanut), *Mahua*, *Chandan* (Rosewood),

Ber, *Pipal* (Banyan) etc. In the village with stunted and mal formed growth of drier species exists. The Forest Department has taken up some suitable sites in the western hills for protection, regeneration and plantation work.

Fauna

There being very little cover, big animals are found scarcely. *Neelgai*, *Jungli* boar and few other deer species are sometimes seen in remote areas. Panther still can be seen occasionally, Jackal, foxes and smaller animals like rat, hare and reptiles are commonly found everywhere. Among the bird's partridges, sand grouse, green pigeons, peacock, blue rock pigeons, wild *murgi*, *bater* and migratory ducks are found in the district.

Minerals

There is no remarkable deposit of minerals in the district. Some common minerals associate with Deccan traps are agate chaleedony, amethyst, zealots, quartz, calcite etc. but no workable concentration of these have been found in the district. Other important minerals occurring in the district are limestone, ochre and building stone.

Land Use

Entire Shujalpur comprises of rich bleach loamy soil of *mar* of *Kalimat* and a substantial part of the rest of the district also includes black cotton soil. The lesser Kin of which is known as *kabar*, can be assessed through its greater or lesser moisture retaining capacity. These black soils can be put into four classes of kali No. 1,2,3 and 4, first of two of shies which include the *mar* can yield both the autumn or kharif and rabi crops without irrigation. In addition to these two soils are dumatdhumni, khardi bada and badla.

There is 728,953 hectares of agricultural land include net sown area of 444,576 (60.99%) hectares and double crop sown area of 284,377 (39.0%) hectares. The non-agricultural land is 2,728 (0.44%) hectares and 60,282 (9.75%) hectares was not used for cultivation and the land used as agricultural land was 21,054 hectares. The land size of 82,827 (13.39%)hectares is not available for agriculture. The forest area was 6,793 hectares (1.09%) out of the total geographical area of the district. The padat and non-agricultural land may be used as pastures. In most of the agricultural land jowar, paddy, maize, wheat, gram, pulses, fruits, vegetables, oil seeds, sugarcane and cotton is grown.

Agriculture

As per 2001Census, population engaged in agriculture or pastoral occupations was 309,326 persons or 49.1% followed by 201,601 persons or 32.0% agricultural labourers. Agriculture now also continues to occupy the place of prime importance in the district economy. The agriculture sector, comprising of the cultivators and agricultural labourers accounted for over 81.12 % of the total workers in 2001 census. According to the earlier 1971-81 Censuses, the share of the agriculture sector in the total workers remained about the same with 81 %.

Irrigation

The main sources of irrigation in the district are wells and tube wells. There are 51,249 wells, 8,288 tube wells, in addition to 41 Government and private canals and 106 ponds. During the last two years from 1998-99 to 1999-2000 the irrigated area had covered over 221,792 hectares which amounted to about 49.81% of the net sown area. Thus the irrigated area under wells was 126,758 hectares; from tube well 48,522 hectares; by canals 10,138 hectares and by ponds 10,190 hectares while by other sources 25,858 hectares of land during the year 1999-2000.

Animal Husbandry

As per 1999-2000, the district had 381,316 (51.59%) cows 202,272 (27.37%) buffaloes out of total of 739,085 cattle. Number of sheeps were 3,340 (0.49%), goats 142,200 (19.24%), horses were 1,362 (0.18%), donkeys were 2,882 (0.39%), camels were 455 (0.06%) and pigs were 5,256 (0.71). The district had 71,385 (9.66%) poultries including 22 ducks. There were 16 veterinary hospitals and 34 dispensaries in which 8,082 animals were castrated, 144,336 animals were vaccinated and 2,401 animals were artificially inseminated during the year 1999-2000.

Fisheries

The entire district lies in the drainage area of the Chambal which is a major tributary of the Yamuna. Among the old towns, Agar is said to have been built in the 10th country. The tank of Bakayan. near Kala Peepal was built by a chief Banjara nomad. Other tanks are Madaw talab, Ronsi Akoowa and Barod

Ram in Shujalpur tahsil where in large number of small and large sized fish species are found in the district. The common species are *Katla*, *rohu*, *mahasur*, *kayant*, *potis*, *bata*, *kotra*, *parhan*, *singhan*, *mirgal*, *kokia*, *saul*, *patola*, *Chilwa*, *Khoksi*, *bani*, etc. are found in shallow water.

Industry

The level of industrial workers has more or less remained at the same level with not much of divergence towards the modern non-traditional industrial field. In 2000, there were 433 small scale industries which deployed 990 persons and only one medium size industry engaging only 20 persons. There is only one large-scale industry engaging 403 persons. There was almost complete absence of large-scale establishment in the district till 1997-98. U.P. Steel Pvt. Ltd including cotton ginning, pressing and bailing units were among 433 small scale industries. The rest may be edible oil manufacturing, stone cutting and crushing, bicycle parts manufacturing, wooden goods manufacturing, bricks and tiles manufacturing, manufacturing of jewellery and silver ware units employed 900 persons in the district in 1999-2000..

Trade And Commerce

Trade was little improved in the district. There are 3077 shops, 324 trade centers, 371 hotels and 8 cinema houses in the district. Chief exports from Shajapur district were crude – opium, food-grains, ghee, oil, and cotton while cut piece goods, hard wares, sugar, medicines, salt and kerosene oil were imported. The Marwari Banias and Boharas are the most important trading classes in the region.

Transport And Communication

Being located on Agra-Mumbai road and on Maksi-Guna broad gauge railway line, Shajapur occupies an important position. Its road system comprising national highways, stale highways, district roads and other roads have made communication easier. It is connected with Agra, Mumbai, Jhalawar (Rajasthan) Malkapur (Maharashtra), Ranchi (Jharkhand). The district is thus connected by roads to neighbouring areas and states of Rajasthan, Jharkhand and Maharashtra. The length of total pucca roads is 1,415.14 kms. and Kachcha road is 1,712.20 km. The length of national highway is 50.5 km. in the district where in Shajapur, Sunera and Panwadi are situated. The principal means of transportation are carts within the town and nearby places. The motors, taxis, trucks two and three wheelers are playing a leading role in the sphere of mechanical road transport. The various vehicles registered in Shajapur district were two wheelers 14,290, trucks 704, taxis and three wheelers 843, buses 651 and other vehicles like tractors, jeeps etc. were 10,169 in number during 1998-1999.

The district is served by broad guage railway line, comes from Ujjain and goes to Bhopal linking Maksi, Akodia and Shujalpur towns of the district. Another broad guage railway line (Maksi to Sarangpur) connects Shajapur, the district headquarters. The Mumbai-Agra national highway 3 runs closely along the Shajapur-Sarangpur broad guage railway line. State highway 27 passes through the western part of the district linking Agar, Susner and Soyat kalan towns of the district.

Electricity and Power

In the year 2000, domestic consumption of electricity was 68,225 K.W., commercial 7,534 K.W., Industrial 63,123 K.W., water supply 3,075 K.W., while agricultural consumption was 534,402 K.W. and for street lighting 2,000 K.W. Number of electrified villages 1,069 out of 1,117 (95.70 percent). There were 158,485 consumers in district, which was 428.00 thousand K.W. per person. Madhya Pradesh Electricity Board from Ujjain-Agar high tension line provides the electricity though no power production is available in the district. Presently Chambal Hydel Power is providing maximum quantity of electricity.

Gram Panchayat

Panchayat is the basic institute and foundation of decentralized administration of the local self-Government. Under the Directive Principles of the Constitution, M.P. Govt. Passed Madhya Pradesh Panchayat Adhiniyam 1962 in which three tier panchayat system was introduced. Under 73rd amendment of the constitution, M.P. Govt. altered and passed the M.P. Panchayat Raj Adhiniyam 1993, in which, a panchayat for village, Janpad panchayat for a block, a district panchayat for a district was constituted. Under M.P. Gram Sabha Adhiniyam – 2001, Gram Sabha is a constitutional unit, which confer all adults with franchise to directly elect panch, sarpanch, members of janpad and members of district

panchayat. Constituted by the elected members, these institutions work for five years. At all levels there are reservations for Scheduled Castes and Scheduled Tribes according to proportion of population. One third of seats are reserved for women.

Gram Panchayat from its fund undertakes the disposal of waste products, water supply, public construction (roads, buildings, well, ponds) market auction, cooperation in Govt. works, community health and development works. Janpad panchayat, from its budget and within its powers, is responsible for implementing community development, agricultural, social, forestry, cattle rearing, fisheries, adult education, cooperatives, cottage industries, welfare and employment oriented programmes. It is the duty of the district panchayat to control Janpad panchayats and village Panchayats and to bring about coordination between them and guiding and advising the state Govt. in their development work.

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more

than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which

Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given subsquently :

List of Scheduled Castes and Scheduled Tribes

Scheduled Castes :

1. Audhelia
2. Bagri, Bagdi
3. Bahna, Bahana
4. Balahi, Balai
5. Banchada

6. Barahar, Basod
7. Bargunda
8. Basor, Burud, Bansor, Bansodi, Bansphor, Basar
9. Bedia
10. Beldar, Sunkar
11. Bhangi, Mehtar, Balmik, Lalbegi, Dharkar
12. Bhanumati
13. Chadar
14. Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabansi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas
15. Chidar
16. Chikwa, Chikvi
17. Chitar
18. Dahait, Dahayat, Dahat
19. Dewar
20. Dhanuk
21. Dhed, Dher
22. Dhobi (in Bhopal, Raisen and Sehore districts)
23. Dohor
24. Dom, Dumar, Dome, Domar, Doris
25. Ganda, Gandi
26. Ghasi, Ghasia
27. Holiya
28. Kanjar
29. Katia, Patharia
30. Khatik
31. Koli, Kori
32. Kotwal (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia district, Indore, Jhabua, Khargone, Barwani, Neemuch, Mandsaur, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
33. Khangar, Kanera, Mirdha
34. Kuchbandhia
35. Kumhar (in Chhatarpur, Datia(except Bhander tahsil), Panna, Rewa, Satna, Shahdol, Umaria, Sidhi and Tikamgarh districts)
36. Mahar, Mehra, Mehar
37. Mang, Mang Garodi, Mang Garudi, Dankhni Mang, Mang Mahasi, Madari, Garudi, Radhe Mang
38. Meghwal
39. Moghia
40. Muskhan
41. Nat, Kalbelia, Sapera, Navdigar, Kubutar
42. Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Bhander tahsil of Datia distt. Indore, Jhabua, Khargone, Barwani, Mandsaur, ,Neemuch, Morena, Sheopur, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha districts)
43. Pasi
44. Rujjhar
45. Sansi, Sansia
46. Silawat
47. Zamral

Scheduled Tribes :

1. Agariya
2. Andh
3. Baiga
4. Bhaina
5. Bharia, Bhumia, Bhuinhar Bhumia, Bhumiya, Bharia, Paliha, Pando
6. Bhattra
7. Bhil, Bhilala, Barela, Patelia
8. Bhil Mina
9. Bhunjia
10. Biar, Biyar
11. Binjhwar
12. Birhul, Birhor
13. Damor, Damaria
14. Dhanwar
15. Gadaba, Gadba
16. Gond, Arakh, Arrakh, Agaria, Asur, Badi

Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koliabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Nagwanshi, Ojha, Raj Gond, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria, Daroi

17. Halba, Halbi
18. Kamar
19. Karku
20. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
21. Keer (in Bhopal, Raisen and Sehore districts)
22. Khairwar, Kondar
23. Kharia
24. Kondh, Khond, Kandh
25. Kol
26. Kolam
27. Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
28. Korwa, Kodaku
29. Majhi
30. Majhwar
31. Mawasi
32. Mina (in Sironj sub-division of Vidisha district)
33. Munda
34. Nagesia, Nagasia

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language

is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops — tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the

household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-Ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silt pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases

carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of

women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of infant deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49 during the year}}{\text{Number of live birth during the year}} \times 100000$$

Eligible couple (Couples per 1000 population):

Number of currently married females in the age group15-49 years per 1000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which she/he is enumerated during the census is other than the place of her/his birth. Similarly a person is considered as a migrant by place of last residence if the place in which she/he is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important componentsconcerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types

(i) Migration within the state itself with its components

  (a) Migration within the district of enumeration (intra district migration)

  (b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration

and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

According to Census 2001, Shajapur district comprises of 1,068 inhabited villages, 49 uninhabited vilages and total 1,117 villages distributed among five tahsils and six CD blocks. The district has 12 towns. The average household size of the district is 5.9. Total population of the district is 1,290,685 comprising 669,852 males and 620,833 females. Thus the sex ratio of the district works out to 927 which is better than the sex-ratio of the state (919). Density of the district is 208 persons per sq.km. and is higher than the density of the state which is 196. Literacy rate of the district 70.9 per cent is also higher than the State literacy rate 63.7 per cent. Scheduled Castes and Scheduled Tribes population of the district is respectively 22.0 per cent and 2.7 per cent of the total population of the district. Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc. has been covered in the Inset Tables from 1 to 52 based on PCA, Village Directory data, Town directory data and houselisting data pertaining to Census, 2001.

(viii)Brief analysis of the PCA data (Table 1-36)

Analysis of the PCA data based on Census 2001 is presented here in the form of tables from 1 to 36. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/ female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD Block levels separately.

Analysis for Scheduled Castes and Scheduled Tribes is also covered in this tables.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Susner	101,386	80,071	21,315	122,680	95,706	26,974	21.0	19.5	26.5	21.0	22.0
2	Nalkheda	84,715	68,143	16,572	102,508	81,749	20,759	21.0	20.0	25.3	19.6	20.3
3	Badod	92,446	83,316	9,130	114,089	102,325	11,764	23.4	22.8	28.8	9.9	10.3
4	Agar	111,365	81,275	30,090	141,086	101,228	39,858	26.7	24.5	32.5	27.0	28.3
5	Shajapur	203,833	147,336	56,497	254,235	178,092	76,143	24.7	20.9	34.8	27.7	29.9
6	Moman Badodiya	142,740	142,740	-	179,365	179,365	-	25.7	25.7	-	-	-
7	Shujalpur	161,052	111,770	49,282	205,098	141,366	63,732	27.3	26.5	29.3	30.6	31.1
8	Kalapipal	135,711	135,711	-	171,624	171,624	-	26.5	26.5	-	-	-
	District Total:	1,033,248	850,362	182,886	1,290,685	1,051,455	239,230	24.9	23.7	30.81	17.7	18.5

This table indicates tahsilwise decadal variation for both the rural and urban areas of the district. It is seen from the table that an overall 24.9 per cent decadal growth has been recorded in the district. The growth rate in rural areas of the district during the decade 1991-2001 works out to 23.7 per cent. Among the tahsils, Shujalpur has registered the highest decadal growth rate of 27.3 per cent. The percentage of urban population to total population of the district is 18.5 per cent in 2001 against 17.7 per cent in 1991.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Susner	111	95,706	49,242	46,464	5 (4.5)	365	372
2	Nalkheda	93	81,749	42,158	39,591	3 (3.2)	232	219
3	Badod	140	102,325	52,760	49,565	6 (4.3)	484	459

Table 2 gives CD Blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district. Out of the 1,068 inhabited villages, 66 (6.2 per cent) are small sized villages with population below 200 persons. In the size class of 200-499 persons, there are 263 villages having 24.6 per cent villages of the district while in the size class of 500-999 population there are 398 villages constituting 37.3 per cent of total villages. 248 villages (23.2 per cent) are in the size class of 1000-1999 and 78 villages (7.3 per cent) are in the size class of 2000-4999. There are 15 villages (1.4 per cent) in the size class of 5000-9999. There is no village falls in the size class of population 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town

(a) New

(i)Statutory town Nil

(ii)Census town Nil

(b) Denotified

(i)Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

(ii)Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

(iii)Census towns of 1991 census are notiified as statutory town in 2001 census Nil

(c) Declassified

(d) Wholly merged with other town(s)

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.6	84	0.0
11-20	4	0.4	6,456	0.6
21-50	15	1.4	1,902	0.2
51-100	127	11.9	51,672	4.9
101-200	587	55.0	509,232	48.4
201-300	244	22.8	330,267	31.4
301-500	74	6.9	105,020	10.0
501 +	11	1.0	46,822	4.5
Not known	0	0.0	0	0.0
District Total:	1,068	100.0	1,051,455	100.0
Population Density (Rural) of the district:			179.4	

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under 8 different ranges of density. The maximum number of villages i.e. 587 accounting for 55.0, per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 48.4 per cent population. The lowest range of 0-10 and 11-20 persons per sq.km. cover 10 villages (0.1 per cent). 11 villages have very high density with more than 501 persons per sq.km. while the corresponding proportion in the lower range of 201-300 is 22.8 percent of the total inhabited villages having 31.4 percent population of the district. In the medium density ranges of 21-50 and 51-100 persons account for 1.4 and 11.9 per cent of inhabited villages.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	-	-	930	-	-	931
1911	967	973	903	942	941	947
1921	949	959	863	932	930	960
1931	947	957	862	927	927	928
1941	946	957	869	946	947	941
1951	945	953	902	966	967	959
1961	932	947	860	943	948	898
1971	920	934	864	931	936	899
1981	921	934	878	929	934	904
1991	912	921	887	918	920	910
2001	919	927	898	927	928	920

Note: Sex ratio has been defined here as the number of females per 1000 males.

As per 2001 Census, sex ratio of 927 females per 1,000 males has been recorded in the district against the state average of 919. The sex ratio of the district had been significantly lower in 1911 to 1931 Census years over the state average figures and higher in 1951 to 2001. It is equal in 1941 Census.The lowest sex ratio of 918 females per 1,000 males was recorded in the district in Census 1991.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Susner	940	944	926
2	Nalkheda	937	939	928
3	Badod	939	939	936
4	Agar	932	936	921
5	Shajapur	921	924	914
6	Moman Badodiya	928	928	-
7	Shujalpur	916	915	919
8	Kalapipal	920	920	-
	District Total:	927	928	920

The table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001. It is observed that the sex ratio for the rural area works out to 928 whereas it is 920 for the urban area. The sex ratio in rural area is highest (944) in Susner tahsil whereas in urban area it is highest (936) in Badod. The sex ratio of the district is 927 females per 1,000 males.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Susner	944
2	Nalkheda	939
3	Badod	939
4	Agar	936
5	Shajapur	924
6	Moman Badodiya	928
7	Shujalpur	916
8	Kalapipal	919
	District (Rural) Total:	928

The table 7 gives the CD Blockwise sex ratio for rural population of the district. The sex ratio in rural areas of the district comes to 928 females per 1,000 males. Among the CD Blocks the highest sex ratio of 944 is found in Susner CD Block and the lowest of 916 is recorded in Shujalpur CD Block.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	0.9	1,277	0.1
700-749	0	0.0	0	0.0
750-799	22	2.1	8,596	0.8
800-849	69	6.5	44,902	4.3
850-899	210	19.7	204,803	19.5
900-949	382	35.8	486,217	46.2
950-999	212	19.9	212,946	20.3
1000-1099	138	12.9	84,864	8.1
1100+	25	2.3	7,850	0.7
District Total:	1,068	100.0	1,051,455	100.0
Sex ratio (Rural) for District:			928	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census. The maximum number of villages i.e. 382 accounting for

35.8 per cent of the total villages having largest population of 46.2 per cent in the district fall in the sex ratio range of 900-949. It is followed by 212 villages constituting 19.9 per cent of total villages and 20.3 per cent population falling in the range of 950-999.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Agar	(M)	924
2	Akodia	(NP)	920
3	Badagoan	(NP)	912
4	Badod	(NP)	936
5	Kanad	(NP)	910
6	Maksi	(NP)	903
7	Nalkheda	(NP)	935
8	Polaykalan	(NP)	916
9	Shajapur	UA	917
	(i) Shajapur	(M)	936
10	Shujalpur	(M)	919
11	Soyatkalan	(NP)	943
12	Susner	(NP)	908
	Sex ratio (Urban) for the district:		920

Table 9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 920 females per 1,000 males as a whole. Among the 12 towns of the district the sex ratio varies between 903 to 943. Soyatkalan (NP) has the highest sex ratio 943 while Maksi(NP) has the lowest sex ratio of 903 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

			Rural	195,676	100,997	94,679	937
			Urban	38,900	20,198	18,702	926

The table 10 presents population of age group 0-6 years and sex ratio for total, rural and urban areas in respect of each tahsil of the district. The total sex ratio in this age group works out to 936 females for every 1,000 males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex ratio in rural and urban areas comes to 937 and 926 respectively. The rural sex ratio in tahsil varies between 918 in Shujalpur to 993 in Nalkheda tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

District (Rural) Total	1,068	100.0	195,676	100.0
Sex ratio (Rural) for District:			937	

Table 12 shows the distribution of villages in 9 ranges of sex ratio of the population in the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex ratio in the district.

The maximum number of villages i.e. 209 (19.6 per cent) having population (18.0 per cent) in the district (rural) fall in the sex ratio range of 1,000-1099.It is followed by the sex ratio range of 1,100

which claims 205 villages (19.2 per cent) and 12.3 per cent population. Next to it 143 villages (13.4 per cent) and 18.9 per cent population is followed by 126 villages (11.8 per cent) and 15.3 per cent population are in the range of 900-949 and 850-899 respectively. Minimum number of villages i.e. 35 (3.3 per cent) and 2.0 per cent population fall in the range of 700-749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION (INCLUDING CONSTITUENT UNIT) TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	239,230	26,971	3,928	11.3	1.6

This table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as the percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,290,685 total population of the district 22.0 per cent belong to the Scheduled Castes and 2.7 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 24.4 per cent in rural population and 11.3 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Moman Badodiya tahsil (25.7 percent) while the lowest is found in Kalapipal tahsil (17.8 percent). The proportion of Scheduled Tribes population is 3.0 and 1.6 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in Nalkheda tahsil (7.0 per cent) and the lowest Scheduled Tribes population is recorded in Badod tahsil (0.2 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

	District (Rural) Total:	1,051,455	256,668	31,374	24.4	3.0

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each CD Block of the district. 24.4 per cent of rural population of the district belongs to Scheduled Castes and 3.0 per cent to Scheduled Tribes. Scheduled Castes population is highest (29.4 per cent) in Agar CD Block whereas it is lowest (17.9 per cent) in Kalapipal CD Block. Scheduled Tribes population is highest (8.1 per cent) in Nalkheda CD Block and it is lowest (0.1 per cent) in Badod CD Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percent-age	Scheduled Castes Population	Percent-age
1	2	3	4	5
Nil	51	4.8	0	0.0

41-50	82	7.7	28,854	11.2
51-75	50	4.7	18,564	7.2
76 and above	24	2.2	6,667	2.6
District Total	1,068	100.0	256,668	100.0

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of population at district level. 51 villages accounting for 4.8 per cent of total 1,068 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 39 villages (3.7 per cent). In 105 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 293 villages. The range of 21-30 and 31-40 per cent contains 266 and 158 villages respectively. There are 82 villages in the range of 41-50 and 50 villages in the range of 51-75. There are 24 villages are such where the proportion of Scheduled Castes is 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percent-age	Scheduled Tribes Population	Percent-age
1	2	3	4	5
Nil	686	64.2	0	0.0
Less than 5	195	18.3	4,825	15.4

District Total	1,068	100.0	31,374	100.0

Table 17 reflects the number of villages according to the proportion of Scheduled Tribes population to their total population in different ranges of population at district level. 686 villages accounting for 64.2 per cent of total 1,068 inhabited villages in the district do not have any Scheduled Tribes population.The proportion of Scheduled Tribes population is less than 5.0 per cent in 195 villages (18.3 per cent). In 87 villages it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 61 villages. The range of 21-30 and 31- 40 per cent contains 21 and 11 villages respectively. There are 2 villages each in the range of 41-50 and 51-75. 3 villages are such where the proportion of Scheduled Tribes is 76 and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

	District(Urban) Total	239,230	26,971	3,928	11.3	1.6

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes in UA/Towns of the district. Out of the 12 towns the highest proportion (18.6 per cent) of Scheduled Castes is found in Badagaon (NP) and lowest proportion (7.5 per cent) in Susner (NP). For Scheduled Tribes the highest proportion (3.1 per cent) is found in Akodia (NP) and lowest (0.7 per cent) in Badod (NP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Susner	920	983
2	Nalkheda	948	938
3	Badod	923	734
4	Agar	933	957
5	Shajapur	928	944
6	Moman Badodiya	917	912
7	Shujalpur	909	879
8	Kalapipal	928	863
	District (Rural) Total	924	923

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district. The Scheduled Castes sex ratio is 924 for district (rural). Among the CD Blocks, the highest sex ratio of 948 is found in Nalkheda CD Block and lowest of 909 is recorded in Shujalpur CD Block.

Sex ratio of Scheduled Tribes population in Shajapur district rural is 923. Among the CD Blocks, the highest sex ratio of 983 is found in Susner CD Block and lowest of 734 is recorded in Badod CD Block..

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Agar (M)	908	828
2	Akodia (NP)	901	899
3	Badagoan (NP)	921	986
4	Badod (NP)	869	814
5	Kanad (NP)	838	933
6	Maksi (NP)	920	734
7	Nalkheda (NP)	953	822
8	Polaykalan (NP)	863	1,169
9	Shajapur UA	948	845
10	Shujalpur (M)	919	979
	(i) Shajapur (M)	990	961
11	Soyatkalan (NP)	924	874
12	Susner (NP)	855	804
	Sex ratio (Urban) for the district:	914	879

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/towns for Census 2001. For the district (urban) sex ratio is higher (914) among Scheduled Castes compared to Scheduled Tribes (879).

Among the 12 towns of the district, the sex ratio of Scheduled Castes is not above one thousand but in case of scheduled tribes it is in

only one town namely Polaykalan (NP). In the remaining towns sex ratio for Scheduled Castes is being lowest (838) in Kanad (NP). Sex ratio of Scheduled Tribes for the remaining towns is below the line of equality, lowest being 734 in Maksi (NP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Tahsilwise and district literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in Table 21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population excluding 0-6 years comes to 70.9 percent in the district. This proportion in rural area is 69.1 per cent and 78.2 per cent in urban areas. In the district the literacy rate of males 83.3 percent is much higher than that of females which is 57.4 percent.

Among the tahsils, Shujalpur tahsil tops with 80.2 per cent literates and the lowest literacy rate 54.7 percent is recorded for Badod tahsil.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total:		591,611	364,680	226,931	459,844	180,574	279,270	69.1	82.1	55.1	26.9

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at CD Block level in the district. 69.1per cent of the total rural population excluding the age group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 82.1 and 55.1 per cent respectively. At CD Block level Shujalpur CD Block has the highest rural literacy rate of 80.5 per cent while the lowest literacy rate of 52.2 per cent recorded for Badod CD Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	2	0.2	619	0.1

81-90	215	20.1	243,094	23.1
91-99	21	2.0	18,397	1.7
100	3	0.3	12	0.0
District Total:	1,06;8	100.0	1,051,455	100.0
Literacy rate for District:			70.9	

Table 23 gives the distribution of villages by literacy ranges in the district. There are 3 villages having 100 per cent literacy. Highest number of villages i.e. 260 villages fall in the literacy range of 71-80 per cent. This accounts for 24.3 per cent of total villages and 29.2 per cent of the district population.There is no inhabited villages in the range of zero.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Table 24 presents the number and percentage of literates and illiterates by sex in UA/towns of the district. It is seen that the highest literacy rate of 84.8 per cent is recorded in Susner (NP) whereas the lowest literacy rate 55.7 is recorded in Badagaon (NP). Sex wise highest percentage of male literacy rate is observed in Susner (NP) and it is lowest in Badagoan (NP). Gap in male female literacy rate is maximum in Badod (NP). The total literacy rate of the district (urban) comes to 78.2 per cent. It is 88.4% for males and 67.2% for females.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Literacy rate for District (Rural):				63.0

Table 26 presents the distribution of villages by range of literacy rate for Scheduled Caste population. It may be noted that the literacy rate is worked out after excluding population in the age group 0-6 from the total Scheduled Caste population. The overall literacy rate of Scheduled Caste population for the district (rural) works out to 63.0 percent. Highest number of villages i.e. 213 villages fall in the literacy range of 71-80 percent. There are 2 villages which have 100 percent literacy rate of Scheduled Caste population. 4 villages are such where the literacy rate of Scheduled Caste population is zero percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD Block level in the district as per 2001 Census. The proportaion of the total workers works out to 52.2 percent of the total population in the district. The total workers are comprised of 35.0 percent of main workers and 17.2 percent of marginal workers and the remaining 47.8 percent are non-workers.

Among males, 48.9 % are main workers and 7.3% are marginal workers whereas among females, corresponding figures are 20.1% and 27.9% respectively.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Table 33 presents distribution of population by category of workers and non-workers by sex in UA/ Towns of the district. It is seen that total workers constitute 33.9 percent of the total population of the district (urban) and the proportion of non-workers is 66.1 percent. Among the total workers male workers constitute 50.6 percent whereas female workers are only 15.7 percent.The total workers are comprised of 28.5 percent of main workers and 5.3 percent of marginal workers.

Among males, 46.6% are main workers and 4.0% are marginal workers whereas among females, corresponding figures are 8.9% and 6.8% respectively.

				(42.0)	(50.4)	(42.9)	(1.4)	(5.3)

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 49.1 percent of the total workers (main + marginal), 32.0 percent of total workers are engaged as agricultural labourers, 1.6 percent as household industry workers and 17.3 percent of other workers in this district.

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on cultivators sector

absorbing large number of workers. The proportion of cultivators varies between 38.8 percent in Shajapur tahsil and 57.0 percent in Kalapipal tahsil. The percentage of females cultivators is 50.4 percent which is slightly higher as compared to 48.2 percent of male cultivators in the district. In district the percentage of agricultural labourers is 32.0 percent. It is 42.9 percent for females which is high as compared to males (24.3 percent). The percentage of household industry workers is very low in the district as stated above. The highest proportion of 26.9 percent of other workers is recorded in Shajapur tahsil while the lowest proportion of 8.4 percent is found in Moman Badodiya tahsil.

				(48.0)	(52.4)	(43.7)	(1.2)	(2.7)

Table 35 presents CD Blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) constitutes 52.2 percent of total population. Among these workers cultivators constitute 54.0 percent, agricultural labourers 34.9 percent, household industry 1.4 percent and other workers constitute 9.7 percent. The proportion of cultivators is highest 59.0 percent in Shujalpur CD Block and is lowest 47.3 percent in Shajapur CD Block. Proportion of agricultural labour is highest 40.0 percent in Moman Badodiya CD Block and lowest 28.7 percent in Badod CD Block. It is also seen that the proportion of male workers is more than female workers under the category of cultivators.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA/Town	Persons / Males / Females	Total Population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/towns of the district. It is seen that out of the 33.9 percent of total workers, cultivators constitute 15.8 percent, agricultural labourers 12.4 percent, household industry 2.6 percent and the highest proportion is covered by other workers which is 69.2 percent. It is also found that proportion of female workers under cultivators, agricultural labourers and household industry workers are more than the male workers proportion whereas proportion of male workers under other workers is more than the proportion of females. Townwise analysis shows that the proportion of cultivators is highest 59.0 percent in Badagoan (NP), agricultural labourer is highest 27.8 percent in Polaykalan(NP), household industry workers is highest 4.4 percent in Susner (NP) and Kanad(NP) in other workers is highest 89.5 percent in Shajapur(UA).

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47. Alongwith the census data 'Non-Census' data such as village amenity and town amenity data was collected during census 2001. These tables give the

number of total villages, jproportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc. A short analytical note is also given below of each table

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of CD block	Number of inhabited villages	Type of amenity available

		(100)	(93.3)	(19.6)	(96.6)	(16.3)	(42.0)	(18.6)	(6.9)	(12.4)	(31.8)	(99.3)

Note : Percentages are given in brackets.

* Based on the improved drinking water sources, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,068 inhabited villages in the district 996 villages or 93.3 percent have been provided with the education facilities of one type or the other. Similarly 209 villages in the district constituting 19.6 percent have medical facilities of one type or the other. Improved drinking water facility is available in 1,032 or 96.6 percent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 174 villages constituting 16.3 percent of villages have been provided with post office facility within the villages. 449 or 42.0 percent villages have been provided with the telephone facility, 199 or 18.6

percent with transport facility, 74 or 6.9 percent villages with bank facility and 132 or 12.4 percent with agricultural credit societies. Similarly there are 340 or 31.8 percent villages which are linked with the pucca road. Total 1,061 or 99.3 percent of villages are provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at CD block has been found with slight variation. Badod CD block have highest (98.6 percent) villages where educational facility is available and lowest 88.9 percent is found in Shajapur CD Block. Medical facility is highest in Badod (48.6 percent) and lowest (6.4 percent) in Shajapur CD block. Telephone facility is highest in Shajapur CD Block (56.1 percent) and lowest in Nalkheda CD Block (17.2 percent) . In the field of power supply all villages have been covered except 7 villages in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of CD block	Total population of inhabited villages	Type of amenity available

		(100)	(98.8)	(32.0)	(97.4)	(38.2)	(54.2)	(33.2)	(19.9)	(27.5)	(45.1)	(99.6)

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,051,455 persons in the district, 1,039,256 or 98.8 percent have educational facility of one or the other type. Similarly 336,708 or 32.0 percent population has medical facilities while 1,023,719 or 97.4 percent have improved drinking water facility. Post office facilities are available to 401,785 or 38.2 percent population. Telephone facility is available to 569,404 or 54.2 percent. Transport communications facility is available to 348,805 or 33.2 percent. Bank facility is available to 209,206 or 19.9 percent. 288,851 or 27.5 percent have provided with the facility of agricultural credit societies. 473,884 or 45.1 percent have been provided with the facility of approach by pucca road. Power supply is available to 1,047,699 or 99.6 percent rural population in the district. Similar pattern of availability of facilities is visible to the rural population in different CD blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	70	5	-	75
(b) Middle School	485	320	41	846
(c) Degree College	48	200	817	1,065
2. Medical:-				
(a) Hospital	154	355	545	1,054
(b) PHC	88	303	662	1,053
3. Post Office	480	302	112	894
4. Telephone	232	189	198	619
5. Bus Service	337	374	160	871
6. Banks				
(a) Commercial Bank	220	451	345	1,016
(b) Cooperative Bank	221	440	384	1,045
7. Agricultural Credit Societies	380	360	196	936

Table 39 presents distribution of villages not having certain amenities within the village at district level. Such villages have been presented according to various distance ranges in this table. 75 villages do not have primary school and out of these villages, children of 70 villages have to travel less than 5 kms. for schooling. Out of 1,068 inhabited villages as many as 846 are deprived of middle school and 1,065 of degree college. Of these 485 avail the facility of middle school at a distance of less than 5 kms., 320 at a distance 5-10 kms. and the remaining 41 at a distance of 10+ kms. In respect of degree college 48 avail this facility at a distance of less than 5 kms., 200 between 5 to 10 kms. and rest 817 villages at a distance of 10+ kms.

Similarly there are 1,054 villages in the district which have been devoid of hospital facility and 1,053 villages which are deprived of PHC facilities. Of these 154 villages have the facility of hospital available within 5 kms. while in respect of 355 villages the

inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 545 villages have this facility at a distance of 10+ kms. As regards PHC 88 avail this facility at a distance of less than 5 kms., 303 at a distance of 5-10 kms. and the remaining 662 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 894 villages do not have this facility in the village itself. Of these majority i.e. 480 have this facility at a distance of less than 5 kms., another 302 villages avail it at a distance of 5-10 kms. In the remaining 112 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 619 villages in the district which are without telephone facilitiy. Of these 232 avail this facility at a distance of less than 5 kms., 189 at a distance of 5-10 kms. and remaining 198 have to traverse a distance of 10+ kms.

For bus service out of 871 villages which do not have facility, 337 villages avail this facility at a distance of less than 5 kms., 374 at a distance between 5-10 kms. and 160 at a distance of 10+ kms.

In the entire district 1,016 villages are deprived of commercial bank and 1,045 of co-operative bank. Of these 1,016 villages which are deprived of commercial banks 220 villages avail this facility at a distance of less than 5 kms., 451 between 5-10 kms. and the remaining 345 at a distance of 10+ kms. Regarding co-operative banks out of 1,045 villages 221 villages avail this facility at a distance of less than 5 kms., 440 at a distance of 5-10 kms. and remaining 384 at a distance of 10+ kms. 936 villages do not have agricultural credit societies. This facility to 380 villages is available at a distance of less than 5 kms., 360 at a distance of 5-10 kms. and the remaining 196 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,068 inhabited villages in the district, there are 63 villages which have nearest towns upto a distance of 5 kms. Of these 56 villages forming 88.9 percent of total villages, are having the educational facilities atleast one type and 14 villages constituting 22.2 percent, have the medical facilities within the range of 5 km., 12 villages forming 19.0 percent have the facility of post office within the range of 5 km and 25 or 39.7 percent have the facility of telephone under the distance of 5 km. 16 villages constituting 25.4 percent have been linked by transport service. There are 4 villages constituting 6.3 percent have the facility of banks. 8 village constituting only 12.7 percent have been provided by agricultural credit societies. 32 villages comprising 50.8 percent have been provided with pucca road within the distance of 5 km.

There are 542 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 510 villages constituting 94.1 percent have been provided with the educational facilities. 96 villages comprising 17.7 percent have been provided with medical facilities. 80 villages constituting 14.8 percent enjoy the post office facility. 238 villages comprising 43.9 percent have been provided the telephone facility. 122 villages constituting 22.5 percent have been linked with transport communications. 41 villages comprising 7.6 percent have bank facility. 63 villages constituting 11.6 percent are having agricultural credit societies, while 171 villages or 31.5 percent are approachable by pucca road.

456 villages fall in the distance range of 16-50 kms. Of these, 93.2 percent villages have educational facility, 21.7 percent with medical, 17.8 percent with post office , 40.6 percent with telephone , 13.4 percent with transport and communications. 6.4 percent and 13.2 percent villages with banks and agricultural credit societies facilities respectively are available. 135 (29.6 percent) villages have approach by pucca road facility.

There are 5 inhabited villages in the district which fall in the distance range of 51+ kms.Of these 5 villages constituting (cent percent) have been provided with the educational facilities. There are no village have been provided with medical, transport coomunication and banks facility. One village comprising 20.0 percent has been provided the approachable by post office, telephone, agricultural credit society and approach by pucca road.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Shajapur district out of a total 1,068 inhabited villages, overwhelming 329 have a population of less than 500 persons. Of these, 260 villages (79.0 percent) have education facility, 47 (14.3 percent) have medical facility, 313 (95.1 percent) have improved drinking water facility. 9 villages (2.7 percent) have post office facility. 97 (29.5 percent) have telephone facility. 32 (9.7 percent) have been linked by bus service. 7 (2.1 percent) have bank facility. There are 10 villages (3.0 percent) having the facility of agricultural credit societies. 77 villages (23.4 percent) have been linked with pucca road. 326 villages (99.1 percent) have been provided with electricity.

Out of 398 villages, which fall in the population range of 500-999 persons, 395 (99.2 percent) villages have been provided with the Education facility, 56 (14.1 percent) with Medical facility, 383 (96.2 percent) villages have improved drinking water facility. 18 villages (4.5 percent) have been provided with post office facilities, 156 villages (39.2 percent) with telephone facility, 45 villages (11.3 percent) with transport facilities, 8 villages (2.0 percent) with bank facility and 21 villages (5.3 percent) with agricultural credit societies and 108 villages (27.1 percent) have approach by pucca road. 395 villages (99.2 percent) have electricity facility.

248 villages fall in population range of 1,000-1,999 persons. Of these all villages have been provided with the Education facility, 60 (24.2 percent) with Medical facility, 246 (99.2 percent) villages have improved drinking water facility. 75 villages (30.2 percent) have been provided with Post Office facilities, 127 villages (51.2 percent) with telephone facility, 68 villages (27.4 percent) with Transport facilities, 25 villages (10.1 percent) with Bank facility, 46 villages (18.5 percent) with Agricultural Credit Societies and 89 villages (35.9 percent) have approach by Pucca road. 247 villages (99.6 percent) have facility of power supply.

There are 78 villages in the district which are covered under 2,000-4,999 population range. Of these, cent percent villages have been provided with the education and Power Supply facility, 32 (41.0 percent) with Medical facility. 75 villages (96.2 percent) have been provided with improved Drinking Water facilities. 57 villages (73.1 percent) have been provided with Post Office facilities, 56 villages (71.8 percent) with Telephone facility, 42 villages (53.8 percent) with Transport facilities, 19 villages (24.4 percent) with Bank facility, 44 villages (56.4 percent) with Agricultural Credit Societies and 51 villages (65.4 percent) have approach by Pucca Road.

There are 15 villages in the district which are covered under 5,000-9,999 population range. All villages have provided all types of facilities except 14 villages (93.3 percent) in case of medical, 13 (86.7 percent) in telephone, 12 (80.0 percent) in transport communication, and 11 (73.3 percent) in agricultural credit societies. There is no facility in the population range of more than 10,000.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Susner	111	61,840	63.3	46.3
2	Nalkheda	93	53,869	66.6	46.7
3	Badod	140	73,615	64.6	43.0
4	Agar	137	67,669	59.9	48.2
5	Shajapur	171	84,717	64.0	50.9
6	Moman Badodiya	167	90,018	76.3	47.3
7	Shujalpur	128	71,762	81.5	48.6
8	Kalapipal	121	82,666	82.6	52.7
District Total:		1,068	586,156	70.4	48.3

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,068 inhabited villages in the district having a total area of 586,156 hectares. Of this, 70.4 percent is cultivable and 48.3 percent of total cultivable area has got the irrigation facility.

It is seen that percentage of cultivable area to total area is highest 82.6 percent in Kalapipal CD Block. It is lowest 59.9 percent in Agar CD Block. The percentage of irrigated area to cultivable area is highest 52.7 percent in Kalapipal and lowest 43.0 in Badod CD Block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure

10	Shujalpur(M)	33
11	Soyatkalan(NP)	0
12	Susner(NP)	15
	Distrct Total	15

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Shajapur district. On an average there are 15 beds per 10,000 population in urban areas of the district. Whereas it is the highest 33 in Shujalpur (M) while zero beds in Badagaon(NP), Kanad(NP), Maksi(NP) and Soyat Kalan(NP).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Agar	31,207	3,025	9.7
2	Akodia	10,421	5,047	48.4
3	Badagaon	6,561	1,280	19.5
4	Badod	11,764	1,663	14.1
5	Kanad	8,651	1,542	17.8
6	Maksi	18,325	6,240	34.1
7	Nalkheda	14,198	4,840	34.1
8	Polaykalan	10,850	8,960	82.6
9	Shajapur	57,818	1,095	1.9
10	Shujalpur	42,461	11,953	28.2
11	Soyatkalan	13,544	4,075	30.1
12	Susner	13,430	2,176	16.2
	District Total	239,230	51,896	21.7

Table 46 presents the proportion of slum population in the towns of the district. Out of the total 239,230 urban population 51,896 persons constitute slum population which is 21.7 percent of total urban population. Polay Kalan town has the highest 82.6 percent of slum population whereas, Shajapur has lowest (1.9 percent) of slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Agar (M)	Pulses Edible Oil Agricultural Equip.	Wheat Pulses Milk
2	Akodia (NP)	Bricks Gram Pulses Agricultural Tools	Soyabean Gram Pulses Wheat
3	Badagaon (NP)	Wooden Agri.Equip. Readymade Clothes -	Dairy Products Oranges Soyabean
4	Badod (NP)	Gram Pulses - -	Soyabean Gram Wheat
5	Kanad (NP)	Mat Broom Baskets	Mat Broom Baskets
6	Maksi (NP)	Soyabean Oil D.O.C. Cement Pipes	Soyabean Oil D.O.C. Cement Pipe
7	Nalkheda (NP)	Bricks Wooden Furniture Groundnut Oil	Soyabean Coriander Wheat
8	Polaykalan (NP)	Soyabean Wheat Gram	Soyabean Wheat Gram
9	Shajapur (M)	Trolley Wooden Furniture Doc	Soyabean Wheat Gram
10	Shujalpur (M)	Pulses Edible Oil Papad	Pulse Edible Oil Papad
11	Soyatkalan (NP)	Bricks Oil Furniture	Soyabean Coriander Gram
12	Susner (NP)	Soyabean Groundnut Furniture Wooden	Soyabean Groundnut Gram

Table 47 indicates most important articles manufactured and exported out of each town in the district. The other commodities manufactured are bricks, agricultural equipment, gram pluses, edible oil, mats, bamboo baskets, soyabean oil cement pipe, wheat,wooden furniture, papad etc. Bricks, gram, pluses, mats, broom, basket, soyabean oil, soyabean, groundnut,milk,dairy products etc are the other important commodities which are exported by different towns.

(x)Brief analysis of the data on houses and household amenities, House listing Operations, Census of India based on Inset tables 48-52

Inset tables 48-52 are based on House listing data pertaining to Census 2001. These tables reflect the tenure status, distribution of households living in permanent, semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 219,259 consisting of 179,240 rural and 40,019 urban households. 55,638 households belong to Scheduled Castes 6,113 to Scheduled Tribes. 204,318 households are living in their own houses constituting 93.2 percent of total households. Of these households, the largest number of households (82,056) have occupied single room accommodation and is followed by two room accommodation numbering to 65,982 households. Next position is claimed by households (25,676) occupying three plus rooms accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 24,963 households while 5,641 households are without any exclusive room.

10,870 households living in rented accommodation account for 5.0 percent of total number of households in the district. The largest number of 4,297 households are living in single room accommodation followed by 4,208 households in two room accommodation. Next position is claimed by households (1,616) occupying three room accomodation. Households with three plus rooms are 592 in number and 157 households don't have any exclusive room.

Other households numbering to 4,071 forming only 1.9 percent of total households are distributed in single room,double room, three rooms and three plus room accommodation numbering 1,874, 1,184, 582 and 275 respectively and 156 households are of no exclusive room.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Susner	38.5	60.3	1.3	32.4	66.3	1.3	61.0	37.8	1.1

8	Kalapipal	53.2	45.7	1.1	53.2	45.7	1.1	0.0	0.0	0.0
	District Total:	39.2	59.5	1.3	33.7	64.8	1.4	63.4	35.8	0.8

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in Table 49 reveals that 39.2 percent of household of the district are living in houses made of pucca materials, residences of 59.5 percent households are semi permanent houses and 1.3 percent households have temporary houses.

District-wise percentage in urban areas indicates that majority of households i.e. 63.4 percent are living in houses constructed of pucca materials, 35.8 percent in semi-permanent structure and percentage of households in temporary houses is 0.8 constructed of kutcha materials. At rural level, the lowest percentage of 8.7 households occupying permanent structure is found in Badod tahsil while highest percentage of 53.2 is seen in Kalapipal tahsil. The proportion of semi-permanent houses is high in Badod (88.2) and lowest in Kalapipal (45.7) tahsil. The proportion of temporary houses is quite low in all tahsils and highest is 3.1 percent in Badod tahsils followed by 2.3 percent in Nalkheda tahsil, 1.3 percent in Susner and Agar, 1.2 percent in Shajapur tahsil, 1.1 percent in Moman Badodiya tahsil and Kalapipal. 1.0 percent in Shujalpur tahsil.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note: Percentage is given in brackets below the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage menas closed and open drainage.

Table 50 indicates that 63.5 percent households in the district have been provided with improved drinking water supplied from a tap or a hand-pump/ tube-well, 90.3 percent households have provision of electricity in their houses 89.3 percent rural households have facility of electricity against 94.8 percent in urban areas. The bathroom facility is available to only 23.1 percent households within their premises . As regards rural areas, 14.3 percent households are having bathroom facility, whereas

this proportion in urban areas comes to 62.4 percent. Toilet and drainage facilities in the district are available to 18.4 percent and 45.2 percent households respectively. Their percentage is higher in urban areas as compared to rural areas.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in Table 51. There are nine types of fuels used for which data have been presented in the table. It is observed that fire wood is used as the most predominant fuel used for cooking by 82.2 percent households in the district. In the tahsils, this proportion varies between 92.8 percent in Badod and 73.0 percent in Shajapur tahsil. The next cooking fuel is L.P.G. which is used by 7.5 percent households in the district. This proportion in rural and urban areas is 1.6 and 34.0 percent respectively. Next fuel is cowdung cake and kerosene. Both is used by 3.5 percent in district. Use of cowdung cake in rural area for cooking is 4.1 percent as compared to urban areas 1.2 percent at district level. Use of kerosene for cooking by rural households comes to 1.1 percent while in urban areas its proportion is 14.1 percent. There are 2.4 percent households using crop residue in the district. Use of crop residue for cooking by urban households comes to 1.8 percent while in rural areas its proportion is 2.6 percent, as a whole. The percentage of households using other types of fuel is insignificant. In rural and urban areas wood is main fuel.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total, rural and urban areas at district/tahsil/sub-tahsil level about households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households.There are 219,259 households in the district and among them, 88,836 households have been availing banking services. 45,616 households have radio/transistor. Television is possessed by 73,019 households. Telephone is available in 9,559 households. Bicycle is the most common means of transportation and is available in 90,762 households. Scooter, motor cycle, moped among two wheelers and car, jeep, van among the four wheelers are used by 18,757 and 2,626 households respectively. None of

the specified assets is in 88,286 households.

(xi) Major social and cultural events, natural and administrative developments and significant activities during the decade.

1. There were divisions of the states of Madhya Pradesh, Bihar and Uttar Pradesh due to their huge shape and geographical conditions. As a result Madhya Pradesh was divided into Madhya Pradesh and Chhattisgarh state on 1st November 2000.
2. Momanbadodiya tahsil was newly created from Shajapur tahsil vide notification No. F-1-116/95/vii/sec.8 Dt. 15-10-99.
3. Shajapur stands 24th in rank as per population during 2001 Census.

(xii) Brief Description of places of religious historical or archaeological importance and places of tourist interest in villages and towns of the district

Agar

The headquarters of the tahsil of the same name, Agar is situated on the Ujjain-Susner-Kota road at a distance of 65.6 km from Ujjain. Another road starts from Agar and runs towards Sarangpur. Situated on north-west, it is 51.2 km from Shajapur, the district headquarter. The town stands at an altitude of about 543 metres above mean sea level. Buses ply frequently on the Agar-Sarangpur and Ujjain-Susner-Kota roads. Agar was once a British cantonment. The town is known to have been named after the Agaria Bhil chief, who founded it in the 10th century. In the 15th century it was captured by the Jhak Rajputs of Malwa under the leadership of Raghodeva. During his sojourn he built a beautiful palace in the midst of the Bade-talao of Agar, presently known as the Goresh-Ki-Mahal. Ferishta too had made a reference to this palace[1]. Agar was then known as Akbarpur. Sultan Bahadur Shah of Gujarat too paid a visit to Agar. During Akbar's time Agar (Agra) was a village in the Sarangpur *Sarkar* of Subah *Malwa*.

In 1857, the place was under the control of the 3rd Regiment of Infantry, Gwalior Contingent. It remained as the headquarters of the Western Malwa Political Agency, the Commandant of the Regiment, holding collateral political charge, from 1860-95. Col. Martin of the Central India House built a picturesque church at Agar in 1884. Till 1904, when its status was reduced, it remained as the headquarters of a *Zila* of the same name.

The town is picturesquely situated between two large lakes, known as the Rataria talao and the Bade talao and surrounded by a ruined battlement wall, built Rangrao Odekar a Brahman *jagirdar*, during the 18th century. It had four huge gates, known as Ujjain gate, Kanod gate, Barod gate and Chhaoni gate. The last has disappeared. The military station once existed lay to the north of the town from which it was separated by the Rataria talao.

The shrine of Keoda Bhairava and the temple of Maina Sati are situated to the east of Bade talao. Near by it, there is a huge *dharam shala* (Choultrus) and a big step-well, with a perennial water supply. Gopal Mandir built by Dewan Shivaji Shankar Obekar is a beautiful temple. Other temples of the town are Shriram Mandir, Gupteshwar Mahadeva Mandir, Jayeshwar Mahadeva Mandir, etc.

Barodiya

A big village and the headquarter of a community development block of Shajapur tahsil, Barodiya lies on the Agar-Sarangpur road, at a distance of about 51.2 km. to the east of Agar and and about 9.6 km. to the north of Shajapur.

An annual fair is held here in honour of Mankameshwar, a local deity on the occasion of *Shivaratri*. The weekly market is held on Monday. There are primary health and family planning centres; primary, middle and a higher secondary school, post office and a police station.

Kalapipal

A village of Shujalpur tahsil, Kalapipal lies about 16 km. to the east of the tahsil headquarters.About 6.4 km. away from this village there is a cave temple dedicated to a Jain deity. At a distance of about 9.6 km. from Kalapipal there is an inscribed Buddhist image made of stone.

1.Ferishta (History of the Rise of the who medan power in India) by Brigges P.243

Kanad Kasba

An important village of Agar tahsil, Kanad Kasba lies on the Agar-Sarangpur road, at a distance of about 16 km. to the east of the tahsil headquarters. Formerly, it was a *tappa* in the Nalkhera *pargana* of *Zila* Shajapur and in the Mughal days it was the headquarters of a *mahal* in the Sarangpur *sarkar*. In 1713, the village came into the hand of the Rajgarh chiefs and fell to the Scindia in 1725 after a war.

A mosque belonging to the Mir-Sahib, a few tombs and a small fort now housing the court are some noteworthy buildings. On a small hill, opposite Kanad, there is an old temple of Baijnath Mahadev.

There is one primary, middle and higher secondary schools.. Police station, post offices as well as offices of the gram and nyaya panchayats and a post office. A weekly market meet here on Friday.

Maksi

A well-known village of Shajapur tahsil, Maksi lies at a distance on the Agra-Bombay road of about 25 km. south-west of the tahsil headquarters. It also has a railway station on the Guna-Maksi section of the central railway, and an important bus stop of regular bus services from Shajapur. Maksi has a famous huge Jain temple of Parshwanath. An annual fair meets in his honour for nine days in April. The Jain Samaj, Ujjain organize the *mela*. The weekly market is held on Saturdays.

Nalkheda

Important town of Susner tahsil, Nalkheda is 25.6 km. to the east of Agar. It lies just at the junction point of Agar, Susner and Shajapur tahsils. Formerly it was the headquarters of a *pargana* of the same name in Shajapur *zila*. Nalkheda is connected with Amla by a metalled road of about 15 km. It is said that Nalkheda owes its name to a number of *nalas* (ravines) surrounding it. A small stone fort and a number of temples are situated in the town. A few statues are noticed in the neighborhood of Nalkheda.

An annual fair meets here on the eve of Holi. It is known as the Pir Maharaj ki Yatra. The weekly market meets in four different wards on Saturdays.

Shajapur

The headquarters of the district of the same name, Shajapur is situated on the National Highway No. 3, i.e., the Agra-Bombay road, at a distance of about 101 km. from Indore. It is located on the left bank of the Lakhundar river, a tributary of the Kali-Sindh, at the base of a through formed by the adjoining hills. The elevation of the town is about 455 metres above mean sea-level. Shajapur is also a railway station of the Guna-Maksi section of the western railway.

According to Tieffenthaler, Shajapur was founded by Emperor Shah Jahan in 1640, who halted at this place for some time while visiting Malwa. It was known as Shah-Jahanpur after its founder. Subsequently, it was corrupted to Shajapur. Since then it was a *zila* (district) all along, but its growth has been recent. The town depends on Indore and Ujjain cities for its trade and commerce.

There are two main *chowks* in the town, from where five main road originate, known as Sombaria Kila road, Mirkala road, Kaserwani road, and Nai Sarak, near Shajapur stand the highest peak of the Malwa hills known as Bhairava Tekri with a statue of Bhairava. There are about 75 temples including the old Someshwar Mahadev near Sombaria bazar.A fair is held on *Kartik Purnima*. It is said that the Manganath temple on the opposite bank of the same stream on the Agra-Bombay road is older than the Sombaria temple.

The Nityananda *ashram*, on the Agra-Bombay road, contains Hanuman Mandir, Siva Mandir and a *Hawan-kund* (fire sacrifice pit) as well as a statue of Swami Nityananda, in whose memory the *ashram* was founded. A religious fair is held here in summer. It is a picnic spot too. The Girivar temple and the temple of Raj-Rajeshwari or Rodeshwari to the south of Shajapur exist on the Agra-Bombay road. *Navaratri* mela fairs are held twice in her honour in *Chaitra* and *Kartika* months. Two Jain temples are situated in Shajapur. The presiding deity of both of these is Adinath. At the northwestern corner of the town, there is the Jama Masjid built by Shahjahan. The Idgah belonging to the same period, lies at a distance of 1 km. to the west of the town. A five days' *Urs* (anniversary) of Hazi Hazrat Shah-ka-Makbara is observed at the Bohra Bagh of the Bohra community, with a tomb of Mullah Samsuddin Yusuf Khan being visited by the Bohra community from far and near. Nearby is the beautiful Jayastambha park on the Agra-Bombay road. To the west of the town, there is the old tank called the

Kamardipura talao, with a Shiva temple on its bank. The Shajapur fort is believed to be as old as the foundation of the town itself. In 1844, the British from this fort deposed Rani Tarabai. She constructed a palace and started living there. The Collectorate is housed in it. The *samadhi* of Tarabai stands on the Shajapur-Indore road.An *mela* meets at Shajapur for eleven days in the month of *(Chaitra)*March/April. The weekly market is held on Sundays.

Shujalpur

A sub-divisional headquarters since 1956 and tahsil headquarters of the same name. Shujalpur town is situated at a distance of about 48 kms. to the east of Shajapur. It has a station on the Ujjain-Bhopal section of the western railway. About 1.6 km. to the east of Shujalpur flows the perennial river Newas that joins the Chambal. The town is connected with Barodiya by the Shujalpur-Awantipur-Barodiya road, and with Pachore by the Shujalpur-Pachore road. Buses ply on these roads. The altitudes of place is about 450 metres above sea level, but the area of the town is mostly plain. It is said that Rai Karan, a Jain merchant, originally founded Shujalpur. It was formerly a *pargana* headquarters in zila Shajapur

During the reign of Emperor Sher Shah, his right hand man Shujaat Khan took a liking for this place and raised it from an insignificant position to a flourishing town and named it as Shujatpur. Shujaat's Khan's original name was Shaikh Ismail, who joined Sher Shah, early in his career. When Farid assumed his name as Sher Khan he gave the name Shujaat Khan to Ismail. After his conquest of Malwa in AD 1554 he made Shujaat its Governor. During Akbar's reign, Shujalpur was the headquarters of a *mahal* of Sarangpur *sarkar* in *Suba* Malwa, contributing revenue of 8017,212, dam and supplying a cavalry of 500 and an infantry of 3000. Though Mandu and Ujjain were his official residence, Shujaat had a liking for Shujalpur.

In 1798, Amir Khan and Jaswant Rao Holkar met at this town and formed a historical alliance. In 1808, the area passed on to Karim Khan as a part of his *jagir*. By the Treaty of 1844 (Article 5) its revenue was assigned to the British Government, but subsequently restored to the Scindia in 1860.

About 3 km away from the main *mandi* of Shujalpur there is an old temple of Jatashankar Mahadeva with statue of Nandi on the riverbank. Some old statues were picked up from the area known as Bhilkheri. A cenotaph is standing at a distance of 3 km. from Shujalpur. It belonged to Ranoji Scindia, who founded the Gwalior house and died in 1775.

The Hanuman Mandir *mela* meets at Shujalpur in *Magh* (January-February) for 30 days. It draws about 6000 persons and is managed by the Municipal Committee. Weekly markets are held on two days, viz. Thursday and Sunday.

Sundarsi

A big village of Shajapur tahsil, Sundarsi is situated on the right bank of Kali Sindh river at a distance of 24.8 km. to the south-east of the district headquarters. Private buses are available to reach this place along the Kachcha road from the Kali Sindh to Bercha.

It is believed that one Raja Sudarshan held this place in AD 1032, who might have given his name to this village. During Akbar's time, it was a *mahal* of the *sarkar* of Sarangpur in *suba* Malwa, contributing revenue of 434,889 dam and supplying a cavalry of 105 and an infantry of 2,000. Afterwards it fell into the hands of Sawai Jai Singh of Jaipur and from him to the Peshwas. Subsequently, Sundarsi area was divided among the chiefs of Gwalior (Scindia), Indore (Holkar) and Dhar (Pawar) in proportion to the expenditure incurred by them for maintaining their armies. Thus, the Holkar and the Scindia got 38.5 per cent each, while the Pawar was given 23 per cent of the revenue. The jurisdiction was tripartite till the merger, with a joint court of the *naib* Kamaisdar of Gwalior, sitting with two officers of Indore and Dhar for the trial of cases. Several old temples and tombs are situated here. Of these, the temples of Harsiddhi and Mahakaleshwar are most important. A local Jain temple contains an inscription dated V.S. 1221 (A.D. 1164). An annual fair meets at Sundarsi for seven days in *Pausa* (December/January) in honour of Harsiddhi Mahakali. It is managed by the gram panchayat and visited by 2000 to 3000 persons of the district.

There are a few more important temples. They are Baijnath Mahadeo temple 4 km. away from Agar on the Indore road; Bhainsava Mata temple 20 km. away from the Shajapur; Mata Bagulamukhi of Nalkheda, Raj Rajeshwari Mata temple of Shajapur; Parshvnath Bhagwan temple of Maksi. Harsiddhi and

Kalbhairao temple 30 kms. away from Shajapur which resembles the temple of Kalbhairav at Ujjain.

(xiii)Major Characteristics of the district, contribution of the district in the form of any historical figure associated with the district: -

The district is basically an agriculture-based area. Chief crops are wheat, jowar, paddy, maize and pulses.

The role of freedom fighters is very important for all round development of the district. The seeds of freedom movement were sown in the district during the region of Madhav Rao Schindia. When Lord Curzon inaugurated the policy of partition of Bengal in 1905, an anti partion movement stirred the country. The youths of Agar-region who formed an underground radical organization to fight the Britishers of the district are late Siddhnath-Manhav Agarkar, Uddhaodas Upadhyaya, Sardar Singh Kanoongo, Akhtar-Ujjama-Khan, Kalu Ram Patel, Jagannath Sharma, Tara Chand Jain, Sharkar Lal, Gopi Ballabh Sharma and Ganesh Dutt Sharma. Shri Ganesh Dutt Sharma resigned his services from railway and opened a school at Agar to support the movement. The school was ordered to be closed very soon.

Some freedom fighters surviving among whom / Shri Nandkishore Bhatt, Vishnucharan Joshi, Prem-Nath Soni, Parmal Singh alia Hemchandra, Nand Ram Sharma, Banshilal Chauhan, Rameshwar Sharma and Smt. Sharda Devi Sharma are the promined figures of the district.

Main political leaders of the district are Shri Thawardas Gahlot (M.P.), and Shri Kedar Singh Mandloi, Shri Manohar Singh Yadav, Shri Hukum Singh Karada, Shri Ramlal Malviya, Vallabh Ambawatra are members of Legislative Assembly.

In the field of literary Mr. Bal Krishna Sharma Naween (Poet), Smt. Pukhraj Pandey (poetess), Dr. Ishak Ashq (Poet and writer), Dr. Jagdish Bhaosar (writer), Dr. Sagarmal Jain (writer) and Smt. Santosh Sharma (Poetess and writer) are the main persons of the district.

(xiv)Scope of Village Directory and Town Directory

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tahsil of first district of the state to the last village of last tahsil of the last district. In the state of Madhya Pradesh first PLCN 00000100 has been assigned to village 'DANDETI in Vijaypur tahsil of Sheopur district which is the first villageof first tahsil of first district of Madhya Pradesh while the last PLCN of 05539300 has been assigned to the last village 'MATAGHAT' of the state in Lanji tahsil of Balaghat district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tahsil maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros are used if new villages are created out of existing

Source:
1. Gazetteer of India Madhya Pradesh, Shajapur district 1994
2. Census of India, District Census Handbook, 1991
3. District Statistical Handbook, 1998-99
4. Directorate of Town and Village investment

villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective Tahsildars of each tahsil.

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village.

Columns 6 to 9 deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section. The list of colleges, senior secondary schools, hospitals, post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end.

Column-10 shows the number of banks – Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12 shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13 Indicates the type of communicational amenities such as by bus, railway or navigable waterway available to the village.

Column-14 refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15 gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17 gives the information as to whether newspapers/magazines are received in the village.

Column-18 gives the information of most important commodities manufactured in the village.

Columns- 19 to 23 give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests

or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tahsil to which town belongs. While column 5 shows the name of CD block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1991

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tahsil/sub-tahsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement

showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays this information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census. The codes used in col. 8 and 13 are the same as for statement IV.

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.
the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix-VIII Shows number of different types of girls school in a village.

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
		Nil

Appendix I of the Village Directory depicts CD Block-wise abstract of educational, medical, drinking water, post, telegraph, phone, communications, banks, power supply, credit societies, recreations and news/ magazine facilities available in the 1068 total inhabited villages. Out of total 1068 inhabited villages in the district, 993 villages have primary schools numbering to 1188 schools implying that some of villages are having more than one primary school. As regards middle schools 222 villages have 245 schools and in 57 villages there are 58 matriculation/secondary school while 24 villages are having equal number of higher secondary/senior secondary school. There are only 3 villages having college facility, which could provides education of graduate and above level i.e. one college in Shajapur, Shujalpur and Kalapipal CD Block each. 66 villages have 69 adult literacy centres and 9 villages have 14 other educational institution. Of the total inhabited villages 72 villages are such which do not have any type of educational institution and students of these villages have to go out of the village for their schooling. The highest 19 villages without any school are located in Shajapur CD Block which do not have any school facility and is followed by

Note:- Villages having NIL Scheduled Castes Population have been excluded

Appendix VII-A depicts list of villages according to the proportion of Scheduled Castes to total population by ranges of such villages where Scheduled Caste population has been recorded in 2001 Census. These percentage ranges are less than 5, 5-10, 11-20, 21-30, 31-40, 41-50, 51-75 and 76 and above per cent of total population of villages.

APPENDIX VII B
LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED TRIBES TO THE TOTAL POPULATION BY RANGES

Name of the District:Shajapur

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
Name of CD Block: Susner		
Less than 5		
	02647200	Ankli
	02647700	Chhapariya
	02637600	Guradiya Soyat
	02643800	Malanwasa
	02641700	Gagorni
	02649100	Antraliya
	02639500	Kanthaliya
	02639000	Soyat Khurd
	02638800	Kanthaliya Ka Kheda
	02637500	Barai
	02648400	Amla Nankar
	02641800	Bhawanipura
	02638500	Rawli
	02642800	Payali
	02639400	Karkadiya Soyat
	02638300	Devli
	02639200	Lohariya
	02646200	Badiya
	02648800	Dharu Khedi
	02648000	Kheriya Susner
	02646600	Bamniyakhedi
	02642500	Modi
5-10		
	02642100	Ganeshpura
	02647000	Laturi Gujar
	02638700	Kanwara Khedi
	02648200	Nandna
11-20		
	02638000	Dongargaon
	02642700	Mana
	02638100	Khindiya Khedi
	02638200	Salyakhedi
	02637900	Shripatpura
31-40		
	02639300	Kalyanpura
	02637700	Pipalya Ka Kheda
Name of CD Block: Nalkheda		
Less than 5		
	02652100	Kachnariya
	02658500	Laturi Umat
	02652200	Lasudaliya Kelwa
	02650100	Eklera
	02658400	Guradiya Nalkheda
	02650400	Gareli
	02653900	Semali
	02652600	Borkhedi Saloki
	02658000	Goyal
	02656800	Anandikhedi

Name of the District:Shajapur

Range of Scheduled Tribes population (percentages)	Location code number	Name of village

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In

1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit. Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility. The first three questions were asked to all ever-married women and the last question related to currently married women. The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991.

Mortality analysis is one of the most important branches of demographic studies. This branch deals with the demographic event of death. Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women.

Migration is an important aspect in the area of Population Studies. There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration. In other words, migration is an important reason for the change in size and composition of population. Those areas are affected by migration from where migrants go or where they have gone.

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables.

ANNEXURE-III(i)

ANNEXURE III(ii)

CHILD MORTALITY RATE IN THE STATE AND DISTRICT : CENSUS 1981-1991

State : Madhya Pradesh **District Shajapur**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
Madhya Pradesh	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
Shajapur	1991	116	131	149	168	113	144	147	153	118	132	164	184
	1981	149	185	201	232	150	194	193	231	148	175	209	232

Source - Estimate of Mortality Indicators by sex at district level-M.P.1991

The above table shows that the child mortality in the state and district has decreased considerably from 1981 to 1991. The child mortality of the district for q(1), q(2) is lower than the state average where as q(3) and q(5) is more than the state average.

The child mortality data of the district shows that there is a remarkable decline in the child mortality during 1981 to 1991 which is the same for state also. However some inconsistencies are observed in male-female classification.

The table also reflects that in 1991 the female child mortality for all ages except q(2) is more than the male child mortality in this district.

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH : CENSUS 2001

State- Madhya Pradesh **District : Shajapur**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	400,778 (93.6)	74,796 (18.7)	325,982 (81.3)
(A)Within the district but outside Enumeration place	246,789 (57.6)	43,990 (17.8)	202,799 (82.2)
(B)Birth place in other district of State	153,989 (36.0)	30,806 (20.0)	123,183 (80.0)
(ii) Place of Birth in other states of India than the state of Enumeration	27,295 (6.4)	7,090 (26.0)	20,205 (74.0)
(iii) Birth place in Foreign	159 (0.0)	90 (56.6)	69 (43.4)
(iv) Unclassified	1 (0.0)	1 (100.0)	0 (0.0)
Total Immigrants	428,233	81,977	346,256
Persons born in the place of enumeration	862,452	587,875	274,577
Total population	1,290,685	669,852	620,833

(Source- Migration Table D-1)

Note: Percentages are given in brackets.

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i.e. (i) Migration from within the state, (ii) Migration from other states of India,(iii) Migration from foreign place and (iv) Unclassified.

It is observed that the migration by birth from within the state is maximum 93.6 per cent of total migration. The migration from within the district but outside the enumeration place is 57.6 per cent whereas migration from other districts of the state is 36.0 per cent. Migration from other states is 6.4 per cent and the migration from outside India is 0.0 per cent of the total migration. Migration of one person i.e.0.0 per cent which could not be classified in first three classifications has been shown as unclassified in first three classifications has been shown as unclassified in the table. It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage.

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE : CENSUS 2001

State- Madhya Pradesh **District : Shajapur**

Place of last residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	411,897	77,984	333,913
	(94.0)	(18.9)	(81.1)
(A)Within the district but outside Enumeration place	258,161	47,200	210,961
	(58.9)	(18.3)	(81.7)
(B)From other district of State	153,736	30,784	122,952
	(35.1)	(20.0)	(80.0)
(ii) From other states of India outside enumeration state	26,079	6,412	19,667
	(6.0)	(24.6)	(75.4)
(iii) Place of residence outside India	116	69	47
	(0.0)	(59.5)	(40.5)
(iv) Unclassified	0	0	0
	(0.0)	(0.0)	(0.0)
Total Immigrants	438,092	84,465	353,627
Population of Non-inmigrants	852,593	585,387	267,206
Total population	1,290,685	669,852	620,833

Source: Migration Table D-2

Note: Percentages are given in brackets.

Migration of population by place of last residence distributed in four classifications is presented in this table. It is seen that the migration by usual place of last residence from within the state is highest 94.0 per cent of total migrated population. Within this classification, the migration from within the district is 58.9 per cent and only 35.1 per cent migration is from other districts of the state. Migration from other states of India outside enumeration state works out to 6.0 per cent of total migration and it is only 0.0 per cent from outside India. Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage.

ANNEXURE IV (III)
POSITION OF INMIGRANTS FROM OTHER STATES- AS PER CENSUS 2001

State : Madhya Pradesh **District : Shajapur**

Birth Place	Census 2001	
	Migrant population	Percentage of total In-migrants
1	2	3
Rajasthan	20,188	74.0
Uttar Pradesh	2,256	8.3
Maharashtra	1,182	4.3
Karnataka	862	3.2
Chhattisgarh	628	2.3
Gujarat	568	2.1
Total of 6 States	25,684	94.1
Total of other States	1,611	5.9
Total	27,295	100.0

Source:Migration Table D-1

Inmigration from other states is classified in this table. 94.1 per cent of total inmigrants are from Rajasthan, Uttar Pradesh, Maharashtra, Karnataka, Chhatisgargh and Gujarat whereas the remaining inmigrants from all other states together constitute only 5.9 per cent.

Total 20,188 persons have migrated from Rajasthan which alone accounts for 74.0 per cent of total inmigrants. Shajapur is located at the neighbouring state border of Rajasthan as such the migration from Rajasthan is very high and the culture and language is homogeneous.

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State : Madhya Pradesh **District - Shajapur**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10
Madhya Pradesh 1991	48,566,242	44,595,604	2,983,127	447,111	123,961	168,016	110,506	45,087	92,830
		(91.8)	(6.1)	(0.9)	(0.3)	(0.3)	(0.2)	(0.1)	(0.2)
Madhya Pradesh 2001	60,348,023	55,004,675	3,841,449	545,446	170,381	209,322	150,772	409,285	16,693
		(91.1)	(6.4)	(0.9)	(0.3)	(0.3)	(0.2)	(0.7)	(0.0)

		(87.8)	(11.0)	(1.0)	(0.1)	(0.0)	(0.1)	(0.0)	(0.0)

Source :- Religion Table of Madhya Pradesh - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions. It is observed that the proportion of Hindu, Christian, Buddhist and Sikh population in the district is comparatively lower than that of state. Contrary to this the proportion of Muslim and Jain population is higher in the district as compared to state average. The proportionate distribution of population belonging to 'other' religions in the district is lower than the corresponding state average.

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT : CENSUS 2001

State- Madhya Pradesh **District- Shajapur**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Madhya Pradesh							
	Total	60,348,023	30,219,605	27,515,074	2,420,090	193,254	0
			(50.1)	(45.6)	(4.0)	(0.3)	(0.0)
	Rural	44,380,878	22,000,621	20,412,833	1,817,380	150,044	0
			(49.6)	(46.0)	(4.1)	(0.3)	(0.0)
	Urban	15,967,145	8,218,984	7,102,241	602,710	43,210	0
			(51.5)	(44.5)	(3.8)	(0.3)	(0.0)
Shajapur							
	Total	1,290,685	586,158	644,261	55,598	4,668	0
			(45.4)	(49.9)	(4.3)	(0.4)	(0.0)
	Rural	1,051,455	467,639	533,727	46,288	3,801	0
			(44.5)	(50.8)	(4.4)	(0.4)	(0.0)
	Urban	239,230	118,519	110,534	9,310	867	0
			(49.5)	(46.2)	(3.9)	(0.4)	(0.0)

(Source- Migration Table C-2)

Note: Percentages are given in brackets.

The above table reflects that the population (45.4%) of the district comes under the unmarried class. When compared to state the percentage of unmarried population of the district is lower than the state. Contrary to this the percentage of married population of the district is higher than the state. The state average is lower than the district in respect of widowed and divorced population. The proportion of unmarried persons are more in urban areas than rural but married persons are more in the rural areas as compared to the urban areas of the district.

ANNEXURE - VII

AGE, SEX AND EDUCATIONAL LEVELS AS PER 2001 CENSUS

State: Madhya Pradesh **District: Shajapur**

Age Group	Total Population			Total Literates			Literates (Without educational level) and below primary			Primary

(Source- Migration Table C-8)

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups. As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately.

It is seen that out of 1,056,109 persons belonging to the age 7 and above 748,357 are literates and thus, the literacy rate of the district works out to 70.9 per cent. Similarly the male and female literacy works out to 83.3 and 57.4 per cent respectively.

215,610 persons have been recorded to attain education upto primary level in the age group 7-14 which is only 83.9 per cent of population in this age group. In the age group 15-34; 53,750 persons (12.9 per cent) are found educated up to middle, 44,379 person (10.6 per cent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech. and 11,535 persons (2.8 per cent) upto Graduate and above level. It may be noted that this is the group having maximum class interval and thus it has the maximum population as well. The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years.

ANNEXURE VIII

DETAILS OF VARIOUS MOTHER TONGUES PREVALENT IN THE DISTRICT : CENSUS 2001

State- Madhya Pradesh **District - Shajapur**
