VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Samir Kumar Biswas
of the Indian Administrative Service
Director of Census Operations, Maharashtra

Product Code Number

MOTIF

Rajeshwar Mandir

The Rajeshwar Mandir is said to be one of the oldest temple in Akola city. It is dedicated to Lord Shiva. The mandir premises are entered through a stone gate surmounted by a *nagarkhana.* The gate leads into a courtyard surrounded on three sides by halls and pavilions. Immediately to the left of the entrance is a small shrine dedicated to Ganapati. In the centre of the courtyard stands an old shrine of Shiva.

Festivities are held in the honour of the God on every monday in the month of Shravana and on the day of Mahashivaratri.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organisation is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective Collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

		Urban	0.0	0	0	0

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometre workout from actual area figure upto 2 decimal point and then area presented in 1 decimal.

M.Cl stands for Municipal Council, C.T. for Census Town.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organisation that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognised as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included viz. information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as banks, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided.. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit Societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorates were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners, alike in town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

In the ancient period, Akola district was part of Dandukaryanaya, where some ashrams were noted for being the centers of education. Long ago the place where is situated the present town of Akola was a thick forest. In the midst of the forest was a temple of shiva. At some distance from lived a person named Akolasinh in the village of katheri. His wife being a devout worshipper of shiva used to visit the temple daily. Having doubts regarding the fidelity of his wife, one day Akolasinh followed his wife with sword in his hand. When just near the temple, the wife of Akolanish, saw Akolasinh with a sword in his hand she immediately come to know the suspicion that had engulfed the mind of her husband. She realised the danger that overhand her and she prayed to the God to give her an eternal place of reguge. The shivlinga, spontaneously opened in to two parts and she disappeared within it. The frantic efforts by Akolasinha to search his wife proved futile and what he could only lay his hands upon was a thread of the sari by his wife, which for years protruded from the head of the image. The town, a small village then, is said to have been established by Akolasinh.

No mention of Akola is available in historical records till 1658 when Aurangzeb ascended the throne of Delhi. The town of Akola was conferred upon Asadkhan when he become the Prime Minister. When the town was bestowed upon Asadkhan, it was a small village while Balapur was a rich town being the center of political activities then and Akola was known at that time as Akola Balapur.

As no exploration or archaeological excavation has yet been under taken in this district we have no definite information about its pre-historic and protohistroic periods. But this district forms a part of Vidharbha and excavations have recently been done at kundinpur in the adjoining district of Amravati and also at Pavnar in wardha. Akola district, like other parts of vidarbha, was undoubtedly included in the empire of Ashoka.

In 1853, Berar which formed a part of the Nizam's dominion was assigned to the East India company in liquidation of the large debt due on account of arrears of pay of the Hyderabad contingent and as a security for the further payment of that force. At that time, Berare was divided into two districts south Berar (The Balaghat) with head quarters at Hingoli and north Berar with Headquarters at Buldana. After 1857, Hingoli with its neighbouring area was restored to the Nizam and Berar was reconstituted area into two districts East berar with headqurters at Akola in 1903, the treaties of assignment were superseded by an agreement under which the Nizam leased Berar to the Governmet of India in perpetuity. Administration of Berar was transferred from Hyderabad to the chief commissioner of central provinces some area was also ransferred in 1875 to the newly created Basim (Washim) district. Mangrul taluka was newly created in that district in the same year.

In 1857, again when washim district was created, some parts transferred and the district and tahsil boundries were completely overhauled in 1905. Murtizapur tahsils was transferred from Amravati to Akola district and khamgaon and Jalgaon tahsils were transferred from akola to Buldana district. The washim district was broken up and two tahsils of washim and mangrulpir were included in Akola district. There were no major changes in the boundries of the district or its tahsils between 1911 with reorganization

of the state in the 1956. The district was transferred from Madhya Pradesh of Bombay and thus the district forms a part of Maharashtra state since 1st may 1960.

At the time of 1961 census the district comprised of 6 tahsil which themselves included 1507 in habited villages and 9 towns. At the time of 1971 census the district has 6 Tahsil comprising 1,708 villages (including 219 uninhabited) and 9 towns. Since 1961number of tahsils towns in the district remained unchanged till reference date of 1st march 1981. However there have been certain changes as to the number of villages within the tahsils during the decade 1971-81 with upgrading of hamlet / wadies in the district, the number of villages has gone upto 1743 (including 197 uninhabited villages). At the time off 1991 census the district has 13 tahsils comprising 1776 villages (including 202 uninhabited villages) and 10 towns. After 1981 census 7 new tahsils have been formed the existing 6 tahsils. After the 1991 census for administrative reason Akola district was bifurcated into Akola and washim districts by government of Maharashtra from 01.07.1998 vide notification No. REN-4597/CR-5/M-10 dt.30th June 1998. Now Akola distric has 7 tahsils and 8 town (including two villages upgraded as a census towns i.e. Umri Pragane Balapur and Malkapur) and 986 villages (including 124 uninhabited villages) spread over in Akola district for 2001 census.

(iii) Administrative Set-Up

There were major changes in the administrative set up of Maharashtra immediately after 1991 census resulting in increase of five districts. The number of divisions are remain unchanged it is same in 1991 and 2001 census. The total districts have increased from 30 in 1991 census to 35 in 2001 census. Mumbai district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya were formed bifurcating, Dhule, Akola, Parbhani and Bhandara districts respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Akola district is included in Amravati division. Akola district divided into two forming Akola and Washim form 1-7-1998 due to the bifurcation of Akola district form where 6 tahsils and 4 towns were transferred to Washim district. Thus Akola district now has 7 tahsils, 8 towns and 986 villages spread over Telhara (101), Akot (177), Balapur (98), Akola (194), Murtijapur (161), Patur (95), and Barshitakli (160) tahsils. The following statement indicates the changes, which occurred after 1991 census in the number of villages, towns in each tahsils and also the reasons for variation in brief :

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/Tahsil	No. of villages as per 1991 Census while in Akola district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
Akola District	989	989	986	3	6	8	6 Tahsils (787 Villages) and 4 Towns transferred to newly formed Washim district after 1991 census vide notification. No. REN-4597/CR-5/ M-10 Dated 30th June 1998. 3 New villages created after 1991 census. 4 Villages merged in municipal council. 2 Villages Received status of census Town.
1 Telhara	102	102	101	--	1	1	1 Villages merged in Telhara M.Cl.

JURISDICTIONAL CHANGES DURING 1991-2001 -(Contd.)

Name of District/Tahsil	No. of villages as per 1991 Census while in Akola district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
2 Akot	180	180	177	--	1	1	3 Villages merged in Akot M.Cl.
3 Balapur	98	98	98	--	1	1	--
4 Akola.	196	196	194	--	1	3	2 Villages received status of census town (Umri Pragane Balapur and Malkapur)
5 Murtijapur	161	161	161	--	1	1	--
6 Patur.	95	95	95	--	1	1	--
7 Barshi Takli	157	157	160	3	--	--	3 New villages created after 1991 census.

For administrative purpose the district has been divided into 4 sub-divisions viz., Akola Akot, Balapur and Murtijapur and seven tahsils. Akola sub-division includes Akola and Barshi Takli tahsils, Akot sub-division includes Akot and Telhara tahsils, Balapur sub-division includes Balapur and Patur tahsils and Murtijapur sub-division includes Murtijapur Tahsil.. The District collector along with district of Judge, Superintendent of Police Chief Executive officer of Zilla Parishad and other senior officers of the state government look after the development and regulatory functions in the district. At the tahsils level the Tahsildar, Block development officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The Gram Panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply

scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies.

The statutory Urban local bodies are cantonments, Municipalities or Municipal corporations. The urban local bodies elect a councillor form each of the wards and his term is 5 years. The President of the Municipal council or mayor of the corporation and their deputy are elected from amongst elected councilors. The chairman of the various committees are also elected from amongst the elected councillors. Although for day to day administration the chief officer is responsible in a Municipal council, he work under the administrative control of the President of Municipal council. In corporations a senior I.A.S officer is deputed by the state government as a Municipal Commissioner who is responsible for day to day administration and executive authority lies in him.

(iv) Physical features

Location and Size

Akola district lies between 20° 15' and 21° 20'- north latitude and 76° 30' and 77° 45' east longitudes. It is surrounded by Washim District in the south and Buldana District in the west. In the north and east it is bounded by Amravati District.

The district headquarters is located at Akola, town having a Population of 400,520 persons. It is a railway junction, located on the Broad gauge railway line running from Mumbai to Howrah and the meter gauge line running from Khandwa to Hingoli. District is also well connected by roads from the other parts of the country.

The district has an area of 5,676.0 sq.kms. and a population of 1,630,239 persons as per Census 2001. While the area of the district accounts for 1.8 percent of the total area of the State, the districts population constitutes 1.7 percent of the total population of the State. The density of population is 287 persons per sq. km. Among the 35 districts of the State, the district ranks 28th in terms of area, 24th in terms of population and 13th in terms of density.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan

Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

The entire district of Akola lies in the Tapi Purna Valley, the micro level division of Deccan Plateau. On the basis of relief, the district may be grouped into two i.e. 1)The hilly tracts of Gawilgarh Hills and Ajanta Hills , and 2) The Purna Plains.

i) The Gawilgarh Hills extending horizontally in the extreme northern part of the district covers only a very small part of Akot and Telhara Tahsils. It is a very narrow strip having a width of about 4 kms. This is the foothills of the Satpuras. In general, it has an elevation of over 400 metres. In the central part it attains a height of over 900 metres. Harnala fort, having an altitude of 940 metres, is the highest point in the region. These hill slopes are covered by poor deciduous forests.

ii) Ajanta Range includes parts of Partur and Barshi Takli tahsils in the extreme southern part of the District. It is a rugged hill country sloping towards north. In fact, it is the northern escarpment of the Washim Plateau. It has an average elevation of between 400 and 500 meters. It is highly dissected by numerous streams, which are tributaries of the Mun, Nirgana, Murna and Katepurna rivers. These hills are covered with moist deciduous forests. All these are reserved forests.

The Purna Plains occupy a major part of the district. It is also known as the great plain of 'Payanghat'. It spreads over Balapur, Akola and Murtizapur tahsils and also covers a major part of Telhara, Akot, Partur and Barshi Takli tahsils. These plains cover more than 80 per cent of the district and it has height around 250 metres near the river bed while at upper reaches height is about 400 metres. It is an unduelating alluvial plain with fertile black cotton soils, in which Cotton and Jowar are grown in abundance.

Drainage

The main river of the district is the Purna, which originates in the Satpuda Range near Bhainsdehi in Madhya Pradesh. It flows towards the southwest in Amravati District and then turns towards the west in

Akola District. The main tributaries of the Purna, on its southern bank, are the Uma, Katepurna, Murna and Mun. All these tributaries originate in the Ajanta Hills. A large number of small non perennial streams rising in the scarp of the Gawilgarh Hills join the Purna on its northern bank. Of these, Vidrupa, Pathar and Shahnur are the more important streams.

Climate

The climate of the district is characterised by a hot summer and general dryness throughout the year except during the monsoon season when it receives moderate well distributed rain. The year may be divided into four seasons. The period from about the middle of the November to end of February constitutes the winter season. The summer extends from March to June and is followed by the monsoon seasons which extends up to the end of September. October and first of November constitute the post monsoon season.

The district receives moderate rainfall. The normal annual rainfall varies between750 and 1000 mm. The rainfall increases from the north-west towards the south-east in the district. The rainfall received during the monsoon months constitutes about 85 per cent of the annual rainfall. July is the rainiest month of the year. The variation in rainfall from year to year is quite large.

Temperature rises rapidly after March till May, which are the hottest months. The heat in summer season is intense during the day and nights are comparatively tolerable. During the Period from April to June, on the individual days, temperatures rise to 45 to 48 degrees centigrade. The afternoon heat is sometime relieved by thunder showers. With the arrival of the south west monsoon in the district by about mid June, there is a appreciable drop in the day temperature and the weather becomes pleasant. At the end of monsoon season day temperatures begin to increase gradually but night temperature decrees progressively. After October both day and night temperature decreases rapidly till December which is the coldest month of the year. Sometimes due to cold wave over north India, temperatures may drop down to 8 to 10 degrees centigrade.

Except during the monsoon season, the air is generally dry and the skies are clear or lightly clouded. During the monsoon season the skies are heavily clouded to overcast. Winds are light to moderate with some increase in force during the later half of summer and in the monsoon months.

Natural Wealth

The district is mostly covered by Deccan traps. The traps rocks are generally dark and gray in colour. They are hard and compact basalts of vesicular and massive traps. The vesicles are filled by secondary mineral likes zeolites quartz, calcite are some earthly or ferruginous materials. Well developed columnar joints and spherical weathering are characteristic features of the massive basalts. Erosive agents and weathering together have developed rich and fertile black cotton soil.

Mineral

Trap rock being hard, dense and durable is most suitable for building purposes but it barren of any economically important minerals. Sodium chloride is found along the entire belt of the Purna River.

Fisheries

Fishing activities are restricted to inland waters only. Rivers, tanks and ponds are the chief sources. Some of the important varieties of fish found in the district are Murrel, Dhadkya, Botri, Padhan, Tambu, Poshti, Katva and Zinga. These varieties are not the fast growing type. Bengal Carps are, therefore, imported and released in the tanks. The varieties imported are Catla, Rohu and Mrigal. Fishermen mainly belong to the Dheemer, Bhoi and Kahar communities. Due to the limited scope of fishing, some of them also take to agriculture. Fishing is generally done with the help of nets make of cotton or nylon.

Soil and cropping pattern

The soils are basically derived from volcanic trap rocks which are quite fertile. The great plain which is known as “Payanghat” occupies about 80 per cent are of the district and contains chiefly rich black soils. On the left bank of Purna river covering entire tahsil of Balapur, Akola, Murtizapur and northern portion of Patur and Barshi-Takli, an open widely cultivated tract is found where an intensive cultivation of Cotton, Jowar and wheat is carried out. Sugarcane and Chillies are also produced depending upon the irrigation facility which due mainly wells. The right bank of Purna river,

covering major portion of Telhara and Akot tahsils is most fertile part of the Purna valley and is chiefly a rich black soil country well cultivated and well wooded with mango groves.

In the vicinity of the hills of Gavilgarh and Ajanta Soils are shallow, stony and less productive. Sourthern portion of Patur and Barshi – Takli and northern portion of Telhara and Akot tahsils fall under this type of soils. This area is devoted entirely to the growth of Kharif crops and it is more dependent on the rainfall.

Land and Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19 – 23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigation by Source and Uninrrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise break up of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing no. of Livestock (Position as on 15th Oct. 1997).

1)	Total Cross bred/Indigenous Cattle	667,421
2)	Total Buffaloes	149,336
3)	Total Goats	360,152
4)	Total Sheep	22,583
5)	Total Pigs	17,140
6)	Total Equine	7,644
7)	Total Camels	536
8)	Total Rabbits	51
9)	Total Livestock (excluding dogs)	1,224,863
10)	Total Poultry (including Ducks)	537,359

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,224,863 and total poultry (including ducks) are 537,359 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 667,421, total buffaloes are 149,336,, goats 360152, sheeps 22583, pigs 17,140, equine 7,644, camels 536 and rabbits are 51.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	116
2)	Average Livestock per village	778
3)	No. of livestock per thousand human population	553

4)	No. of in-Milk cows per thousand human population	46
5)	No. of in-Milk buffaloes per thousand human population	24
6)	No. of poultry fowls per thousand human population	243
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	27
8)	No. of tractors per thousand hectares of gross cropped area	2
9)	No. of Veterinary Institute per lakh livestock	11

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 116 while average livestock per village is 778 For every thousand human population there are 553 livestock, 46 in-milk cows, 24 in-milk buffaloes and 243 poultry fowls. While there are 27 bullocks and male buffaloes per hundred hectares of gross cropped area and 2 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 11.

Industry

The industrial policy of the state is based on the basic decision to encourage industries in the developing and under-developed areas in the districts. In the district, there are industrial estates in Akola and Akot tahsils.

The most important small scale industries in the district are dal mills, oil pressures, confectionery, bidi making, saw mills, soap making, metal plating and engineering etc. In the cottage and small scale industries sector, handloom, khadi and village industries, handicrafts, shoe-making, carpentary, brick-making, pottery and oil mills etc., are some of the important industries located in Akola, Akot, Balapur and Murtijapur tahsils. Mattresses from akot and Balapur are well known in the country. There is also a factory manufacturing wooden toys is located in Akola district.

Trade and Commerce

The chief manufactured articles are cotton bales, cotton threads, polished pulses, ginned and hand pressed cotton, wooden furniture, carpet, bricks, handloom carpets, jowar, tur dal, bakery products, gining cotton, firewood, edible oil and wheat. The main exported articles are cotton bales, seeds and plants, pulses, cotton, tur, green gram, handloom carpets, bricks, jowar, tur dal, wheat, foodgrain, fruits, and edible oil.

Raw cotton is the most important article of export, in addition to cotton seeds, oil cakes, jowar, betel leaves, cattle etc. Betel leaves grown extensively in Akot and near by villages are well known because they can be preserved for about two months. They are largely exported to Delhi, Amritsar, Barhanpur, Ambala, Surat, Jalgaon and Dhule.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

	Motor Vehicles 1999	
	Item	No. of Vehicles
	1	2
1	Buses	737
2	Cars & Station Wagons	3,023
3	Jeeps	3,614
4	Taxies	220
5	Autorickshaws	4,287
6	Mopeds	25,240
7	Scooters	20,209
8	Motor Cycles	28,575
9	Total Goods Vehicles	3,848
10	Tractors	4,739
11	Trailors	4,313
12	Others	119
	Total	**98,924**

Source: Transport Commissioner office

It may be seen that the district had 28,575 motor cycles, 25,240 mopeds and 20,209 scooters. There were 737 buses, 3,023 cars and station wagons, 3,614 jeeps, 220 taxies, 4,287 autorickshaws and 3,848 total goods vehicles. Besides 119 other modes of transport, the district also had 4,739 tractors and 4,313 trailors as means of transport.

Electricity & Power supply

The power supply amenity is available in 840 villages (97.4 percent of the total inhabited villages) and eight towns are enjoying the power supply amenity.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously :

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where

a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad Bant
7) Balahi, Balai
8) Basor, Burud, Bansor, Bansodi
9) Beda Jangam, Budga Jangam
10) Bedar
11) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar , Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami
12) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
13) Bindla
14) Byagara
15) Chalvadi, Channayya
16) Chenna Dasar, Holaya Dasar, Holeya Dasari
17) Dakkal, Dokkalwar
18) Dhor, Kakkayya, Kankayya, Dohor
19) Dom, Dumar
20) Ellamalvar, Yellammalawandlu
21) Ganda, Gandi
22) Garoda, Garo
23) Ghasi, Ghasia
24) Halleer
25) Halsar, Haslar, Hulasvar, Halasvar
26) Holar, Valhar
27) Holaya, Holer, Holeya, Holiya
28) Kaikadi (in Akola, Amravati, Bhandara, Gondiya, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district, other than Rajura tahsil)
29) Katia, Patharia
30) Khangar, Kanera, Mirdha
31) Khatik, Chikwa, Chikvi
32) Kolupulvandlu
33) Kori
34) Lingader
35) Madgi

36) Madiga
37) Mahar, Mehra, Taral, Dhegu Megu
38) Mahyavanshi, Dhed, Vankar, Maru Vankar
39) Mala
40) Mala Dasari
41) Mala Hannai
42) Mala Jangam
43) Mala Masti
44) Mala Sale, Netkani
45) Mala Sanyasi
46) Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang
47) Mang Garodi, Mang Garudi
48) Manne
49) Mashti
50) Meghval, Menghvar
51) Mitha Ayyalvar
52) Mukri
53) Nadia, Hadi
54) Pasi
55) Sansi
56) Shenva, Chenva, Sedma, Ravat
57) Sindhollu, Chindollu
58) Tirgar, Tirbanda
59) Turi

Scheduled Tribes

1) Andh
2) Baiga
3) Barda
4) Bavacha, Bamcha
5) Bhaina
6) Bharia Bhumia, Bhuinhar Bhumia, Pando
7) Bhattra
8) Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
9) Bhunjia
10) Binjhwar
11) Birhul, Birhor
12) Chodhara (excluding Akola, Amravati, Bhandara, Gondiya, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts)
13) Dhanka, Tadvi, Tetaria, Valvi
14) Dhanwar
15) Dhodia
16) Dubla, Talavia, Halpati
17) Gamit, Gamta, Gavit, Mavchi, Padvi
18) Gond Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond, Gowari, Hill Maria,Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria , Madia, Maria , Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha,Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria
19) Halba,Halbi
20) Kamar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in

exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

Number of deaths in a particular age-group

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education

and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./Towns. These Class I UAs/ Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/ Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to census 2001 the district Akola has a total population of 1,630,239 comprising of 841,253 Males and 788,986 Females. The population of the district in census 2001 i.e., 20.6 percent higher than the district population 1,351,959 in 1991 census. Akola tahsil is most populous with a population of 656,746. As much as 40.3 percent of population is concentrated in tahsil Akola. Other tahsils in order of population size are Akot (232,493), Balapur (169,159), Murtijapur (161,661), Telhara (156,776), Barshitakli (132,720) and Patur (120,684).

An examination of rural-urban distribution of population reveals that 1,002,742 persons constituting 61.5 percent of the total population concentrated in rural areas, while 627,497 persons 38.5 percent are living in urban areas of the district. Although in absolute numbers, the number of people living in rural areas has increased from 860,708 in 1991 to 1,002,742 in 2001 in terms of percentage decreased from 63.7 percent in 1991 to 61.5 percent in census 2001. While tahsil Barshitakli has no urban population. Tahsil Akola 65.4 percent urban population. Tahsil Akot 34.7 percent, Murtijapur 23.8 percent, Tahsil Balapur 23.4 percent, patur 17.0 percent and Telhara 12.1 percent population respectively.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Telhara	130,548	116,700	13,848	156,776	137,870	18,906	20.1	18.1	36.5	10.6	12.1
2	Akot	195,710	130,029	65,681	232,493	151,767	80,726	18.8	16.7	22.9	33.6	34.7
3	Balapur	142,203	109,927	32,276	169,159	129,657	39,502	19.0	17.9	22.4	22.7	23.4
4	Akola	526,811	198,777	328,034	656,746	227,475	429,271	24.7	14.4	30.9	62.3	65.4
5	Murtijapur	142,443	108,429	34,014	161,661	123,107	38,554	13.5	13.5	13.3	23.9	23.8
6	Patur	102,036	84,638	17,398	120,684	100,146	20,538	18.3	18.3	18.0	17.1	17.0
7	Barshitakli	112,208	112,208	0	132,720	132,720	0	18.3	18.3	0.0	0.0	0.0
District Total:		**1,351,959**	**860,708**	**491,251**	**1,630,239**	**1,002,742**	**627,497**	**20.6**	**16.5**	**27.7**	**36.3**	**38.5**

The average growth rates for the rural and urban areas of the district are 16.5 percent and 27.7 percent respecrively. Patur / Barshitakli tahsil has registered the highest rural growth rate (18.3 percent) while Murtijapur tahsil has the lowest growth rate of 13.5 percent. The tahsil of Telhara (18.1 percent), Akot (16.7 percent), Balapur (17.9 percent), Patur and Barshitakali (18.3 percent) are above the district average (16.5 percent) and only two tahsil Akola (14.4 percent) and Murtijapur (13.5 percent) below the district average.

In urban areas, the growth rate is above the district average in two tahsils, Telhara (36.5 percent) and Akola tahsil (30.9 percent) and below in Akot (22.9 percent), Balapur (22.4 percent), Murtijapur (13.3 percent) and Patur (18.0 percent) of in district average (27.7 percent). Barshitakali tahsil do not have urban area. Highest urban growth rate of 36.5 percent is shown in Telhara tahsil, while Murtijapur tahsil has the lowest urban growth rate 13.3 percent.

The Proporation of urban to total Population of Akola district stood at 38.5 percent in 2001. Corresponding against 36.3 percent in 1991 census. It is observed that proportion of urban population has increased in four tahsils i.e. Akot (34.7 percent), Balapur (23.4 percent), Akola (65.4 percent) and Telhara (12.1 percent). While slightly decreased i.e. 0.1 percent Murtijapur (23.8 percent) and Patur (17.0 percent). Barshitakali tahsil do not have urban population.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	Telhara	93	137,870	71,178	66,692	7 (7.5)	212	194	17 (18.3)
2	Akot	148	151,767	78,057	73,710	27 (18.2)	1,178	1,122	34 (23.0)

Districts (Rural) Total:		**86 (10.0)**	**133,594**	**124,486**	**19 (2.2)**	**61,330**	**57,387**	**6 (0.7)**	**47,985**	**45,296**

Percentages are given in brackets.

Among the 862 inhabited villages 100 (11.6 percent) are small sized with a population below 200, 204 villages (23.7 percent) are with population 200-499, 253 (29.4 percent) villages with population 500-999, 194 (22.5 percent) villages with population 1,000 – 1,999, 86 (10.0 percent) villages with population 2,000-4,999, 19 (2.2 percent) villages with population 5,000 – 9,999 and the remaining 6 (0.7 percent) villages have a population of 10,000 and above.

Among the 7 CD blocks of the district, percentage of villages with less than 200 population is the highest in Akot C.D.Block (18.2 percent) and lowest in Patur C.D.Block (3.6 percent). The percentage of villages with population 200 – 499 is highest in Murtijapur (28.9 percent) CD block and lowest in Telhara CD block (18.3 percent). The percentage of villages with population 500 – 999 is highest in Telhara (34.4 percent) and lowest in Akola CD block (26.1 percent). The percentage of villages with 1,000 – 1,999 sized villages is the highest in Patur CD block (28.9 percent) and lowest in Murtijapur CD block (15.4 percent). The percentage of village with population 2,000 – 4,999 is the highest in Akot CD block (14.2 percent) and lowest in Barshi takli CD block (2.4 percent). The percentage of villages with population 5,000 – 9,999 is the highest in Balapur CD block (3.4 percent) and lowest in Murtijapur CD block (1.3 percent). The percentage of villages with population 10,000 and above is the highest in Balapur CD block (2.3 percent) and lowest in Barshitakli CD block (0.8 percent). While Akot, Murtijapur and Patur CD blocks have no villages is this range.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town	
1	
(a) New	
(i) Statutory town -- Nil	
(ii) Census town --	
1 Umri Pragane Balapur	
2 Malkapur	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

There are no statutory towns, no denotified towns, no declassified towns and no wholly merged with other towns in 2001 census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	16	1.9	191	0.0
11-20	16	1.9	2,630	0.3
21-50	43	5.0	8,615	0.9
51-100	121	14.0	50,090	5.0
101-200	382	44.3	346,822	34.6
201-300	169	19.6	252,463	25.2
301-500	68	7.9	172,547	17.2
501 +	47	5.5	169,384	16.9
Not known	0	0.0	0	0.0
District Total:	**862**	**100.0**	**1,002,742**	**100.0**

Population Density (Rural) of the district: 199

The distribution of villages by density ranges indicates that population density range 101-300 has highest number of villages i.e., 551 (63.9 percent) and covers 59.8 percent population in rural area of the district. The low densities of less than 20 range of population per square kilometer are noticeable in 32 villages i.e. 3.8 percent of villages. At the same time there are only few villages than can be classified as having very high densities. While 5.5 percent of 47 villages have a density of 501 and above range of population per sq.km., 7.9 percent 68 villages have density range of 301 to 500 persons per sq.kms.

Table 5 :SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	978	1,003	862	968	987	896
1911	966	1,000	796	968	986	877
1921	950	994	776	958	984	867
1931	947	987	790	952	981	858
1941	949	989	810	957	974	904
1951	941	1,000	807	953	967	918
1961	936	995	801	926	947	872
1971	930	985	820	931	947	894
1981	937	987	850	939	948	920
1991	934	972	875	934	940	923
2001	922	960	873	938	938	938

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and the state. Census 2001 recorded a sex ratio of 938 females per 1000 males in the district. This is higher compared to the state average (922) As regards total areas sex ratio at the state level declined by 56 points and at district level it declined by 30 points during the last 100 years. Similiary the sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased by 49 points during 1901-2001. For the Urban areas of the state, the sex ratio increased by 11 points and also in the district it increased by 42 points during the above period (i.e. 1901-2001)

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Telhara	937	937	935
2	Akot	940	944	931
3	Balapur	943	945	939
4	Akola	935	929	938
5	Murtijapur	938	933	956
6	Patur	946	950	927
7	Barshitakli	935	935	0
	District Total:	**938**	**938**	**938**

In Akola district as a whole as well as its rural and urban areas there are 938 females for every thousand males. Within the district sex ratio varies from 946 in Patur tahsil followed by Balapur (943) Akot (940) Murtijapur (938) Telhara (937) Akola and Barshitakti (935) respectively. The rural and urban areas have same sex ratio i.e., 938. Akola District also confirms to this pattern. The sex ratio figures for rural and urban areas of Akola District are 938 respectively. In rural areas 3 out of seven tahsil namely Akot tahsil, Balapur tahsil and Patur tahsil have higher sex ratios than the district rural average (938) remaining four tahsil i.e. Telhara, Akola, Murtijapur and Barshitakli lower sex ratios than the district rural average. The sex ratio in urban areas of Akola tahsil is equal to district urban sex ratio. In the urban areas highest sex ratio is seen in Murtijapur tahsil and lowest in Patur tahsil.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Telhara	937
2	Akot	944
3	Balapur	945
4	Akola	929
5	Murtijapur	933
6	Patur	950
7	Barshitakli	935
	District (Rural) Total:	**938**

Districts (Rural) Sex ratio is 938. The sex ratio in C.D.Blocks Telhara, Akola,Murtijapur and Barshitakli are below the district average sex ratio of 938. While in remaining 3 C.D.Blocks viz., Akot, Balapur and Patur have sex ratio above the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	12	1.4	1,579	0.2
700-749	5	0.6	1,124	0.1
750-799	14	1.6	7,180	0.7
800-849	48	5.6	25,475	2.5
850-899	133	15.4	123,370	12.3
900-949	293	34.0	459,571	45.8
950-999	213	24.7	297,712	29.7
1000-1099	120	13.9	82,081	8.2
1100+	24	2.8	4,650	0.5
District Total:	**862**	**100.0**	**1,002,742**	**100.0**

Sex ratio (Rural) for District: 938

A perusal of the table reveals that 213 villages constituting 24.7 percent of the total inhabited villages covering 29.7 percent of the total district rural population have a sex ratio in the range of 950-999 while 293 villages forming 34.0 percent of total inhabited villages and covering 45.8 percent of total district rural population have sex ratio in the range of 900-949, 133 villages constituting 15.4 percent of the total inhabited villages and covering 12.3 percent of total rural district population has a sex ratio in the range of 850-899. The sex ratio for 24 villages (2.8 percent) is in the range of 1100 and above and it covers only 0.5 percent of the district total rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Urban status of town	Sex ratio
1	2	3	4
1	Akola	MCI	938
2	Akot	MCI	931
3	Balapur	MCI	939
4	Malkapur	CT	967
5	Murtijapur	MCI	956
6	Patur	MCI	927
7	Telhara	MCI	935
8	Umri Pragane Balapur	CT	921
Sex ratio (Urban) for the district:			**938**

In the urban areas of different towns the sex ratio varies considerably. The lowest sex ratio is in Umeri pr.Balapur (CT) (921) and highest sex ratio is in Malkapur (CT) (967). The sex ratio in Akola MCI(938) is at par with district urban average sex ratio (938). Among the eight towns of the district four towns namely Telhara MCI (935), Akot MCI (931), Umri Pragane Balapur (CT) (921) and Patur M Cl (927) have sex ratio below the district urban average and the remaining three towns have the sex ratio above the district average namely Balapur (939), Malkapur (967) and Murtijapur (956).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

7	Barshitakli	Total	20,286	10,551	9,735	923
		Rural	20,286	10,551	9,735	923
		Urban	0	0	0	
District Total:		**Total**	**235,835**	**122,004**	**113,831**	**933**
		Rural	**149,842**	**77,345**	**72,497**	**937**
		Urban	**85,993**	**44,659**	**41,334**	**926**

The sex ratio for the Akola district for 0-6 age group is 933. Telhara, Akot, Murtujapur and Patur tahsils have higher sex ratio in 0-6 age group as compared to district average. Remaining tahsil

Balapur, Akola and Barshitakli, have low sex ratio as compared to district average. In urban areas four out of seven tahsils namely Telhara, Akot, Balapur and Patur have sex ratio above the district average and Akola and Murtizapur towns below the district average. In rural areas sex ratio is highest in Patur (962) and lowest in Balapur and Barshitakli (923) tahsils respectively.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Telhara	21,330	10,943	10,387	949
2	Akot	22,759	11,719	11,040	942
3	Balapur	19,421	10,101	9,320	923
4	Akola	33,268	17,258	16,010	928
5	Murtijapur	17,493	8,982	8,511	948
6	Patur	15,285	7,791	7,494	962
7	Barshitakli	20,286	10,551	9,735	923
	District (Rural) Total:	**149,842**	**77,345**	**72,497**	**937**

District (Rural) sex ratio in 0-6 age group is 937. In the seven C.D.Blocks of the district there are 77,345 Males & 72,497 Females, as per 2001 census. C.D.blocks namely Telhara, Akot, Murtijapur and Patur have higher sex ratio than districts rural average, while remaining 3 C.D.Blocks viz., Balapur, Akola and Barshitakli have lower sex ratio than districts rural average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	96	11.1	4,710	3.1
700-749	34	3.9	2,909	1.9
750-799	61	7.1	8,487	5.7
800-849	73	8.5	11,769	7.9
850-899	92	10.7	18,432	12.3
900-949	114	13.2	41,304	27.6
950-999	68	7.9	20,749	13.8
1000-1099	136	15.8	23,699	15.8
1100+	188	21.8	17,783	11.9
District (Rural) Total	**862**	**100.0**	**149,842**	**100.0**
Sex ratio (Rural) for District:		**937**		

A perusal of the table reveals that 188 villages constituting 21.8 percent of the total inhabited villages covering 11.9 percent of the total district rural population has a sex ratio in the range of 1,100 and above, while 136 villages constituting 15.8 percent of the total inhabited villages covering 15.8 percent of the total district rural population has a sex ratio in the range of 1,000-1,099; 68 villages constituting 7.9 percent of the total inhabited villages and covering 13.8 percent of total district rural population has a sex ratio in the range of 950-999, 114 villages constituting 13.2 percent of the total inhabited villages covering 27.6 percent of the total district rural population has a sex ratio in the range of 900-949, 92 villages constituting 10.7 percent of the total inhabited villages covering 12.3 percent of the total district rural

population has a sex ratio in the range of 850-899, 73 villages constituting 8.5 percent of the total inhabited villages covering 7.9 percent of the total district rural population has a sex ratio in the range of 800-849, 61 villages constituting, 7.1 percent of the total inhabited. Villages covering 5.7 percent of the total district rural population has sex ratio in the range of 750-799, 34 villages constituting 3.9 percent of the total inhabited villages covering 1.9 percent of total district rural population has a sex ratio in the range of 700-749 and remaining 96 villages constituting 11.1 percent of total inhabited villages covering 3.1 percent of the total district rural population has a sex ratio in the range of less than 700.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Akola	M Cl	52,719	27,397	25,322	924
2	Akot	M Cl	12,041	6,232	5,809	932
3	Balapur	M Cl	6,780	3,474	3,306	952
4	Malkapur	C T	1,550	818	732	895
5	Murtijapur	M Cl	5,111	2,675	2,436	911
6	Patur	M Cl	3,178	1,645	1,533	932
7	Telhara	M Cl	2,583	1,327	1,256	946
8	Umri Pragane Balapur	C T	2,031	1,091	940	862
District(Urban) Total			**85,993**	**44,659**	**41,334**	**926**

Average sex ratio for 0-6 age group for the Districts (Urban) areas is 926. In the Urban areas of different towns, the sex ratio of population in the age-group 0-6 varies considerably. The highest sex ratio is in Balapur (MCI) (952) and lowest in Umri Pragane Balapur (CT) 862. The sex ratio in four towns of the district namely Telhara (MCI), Akot (MCI), Balapur (MCI) and Patur (MCI) is above the district average and four towns i.e. Akola (MCI), Umri Pragane Balapur (CT), Malkapur (CT) and Murtijapur (MCI) have sex ratio below the district average.

The Scheduled Castes population at the time of 2001 census in Akola district was 168,447 which constitutes 10.3 percent of the total population. While Scheduled Tribes population of Akola district is 100,088, which constitutes 6.1 percent of the total population. The Scheduled Tribe population is concentrated in rural areas than urban areas of district. Tahsilwise perusal shows that Scheduled Castes population proportion is highest (20.0 percent) in Murtizapur tahsil and lowest (6.1 percent) in Balapur tahsil. In the rural areas, the highest proportion of SC population is seen in Murtizapur (22.6 percent) and lowest in Balapur and Barashitakli tahsil (6.8 percent). In the urban areas, highest proportion of SC is in Murtizapur tahsil (12.9 percent) & lowest in Balapur tahsil (4.2 percent). Scheduled Tribes population proportion is highest in Patur tahsil (11.1 percent) and lowest in in Balapur tahsil(3.2 percent). In rural areas the highest proportion of Scheduled Tribes population is seen in Akot tahsil (15.2 percent) and lowest in Balapur tahsil (3.4 percent). In urban areas highest proportion of Scheduled Tribes is seen in Telhara tahsil (3.5 percent) and lowest in Akot tahsil (1.9 percent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

7	Barshitakli	132,720	9,063	10,822	6.8	8.2
District (Rural) Total:		**1,002,742**	**114,629**	**85,540**	**11.4**	**8.5**

Scheduled Castes and Scheduled Tribes constitute 11.4 percent and 8.5 percent respectively of the total population. The proportion of Scheduled Castes population is above the district average in three C.D.Blocks viz., Akot, Murtijapur, Akola and below the district average in remaining four C.D.Blocks. The highest proportation of Scheduled Castes population is seen in Murtijapur CD Block (22.2 percent) and the lowest in Balapur and Barshitakli C.D.blocks (6.8 percent) in each C.D.Block. The proportion of Scheduled Tribes population is above the district average in two C.D.Blocks namely Akot & Patur and below in remaining four C.D.Blocks. Akola C.D.Block is at par with the district average (8.5 percent) The highest proportion of Scheduled Tribes population is seen in Akot C.D.Block (15.2 percent) and lowest in the Balapur C.D.Block (3.4 percent).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	152	17.6	0	0.0

District Total	**862**	**100.0**	**114,629**	**100.0**

On the 862 villages the Scheduled Castes population is concentrated in 710 villages in the district. There are 152 villages, constituting 17.6 percent of total villages which do not have any Scheduled Castes population. The Scheduled Castes numbering 29,339 and constituting 25.6 percent of all Scheduled Castes are concentrated in 374 villages (43.4 percent) of total villages. The Scheduled Castes proportion in these 374 villages is upto 10 percent of the total population. As much as 64.1 percent of total Scheduled Castes population is concentrated in 292 villages with their 33.9 proportion in villages ranging from 11-40 percent. There are 24 villages where 2.8 proportion of Scheduled Castes is 41-50, 16 villages where the 1.9 proportion of Scheduled Castes is 51-75 and 4 villages where the 0.5 proportion of Scheduled Castes is as high as 76 percent and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	266	30.9	0	0.0
Less than 5	239	27.7	9,343	10.9

76 and above	52	6.0	19,141	22.4
District Total	**862**	**100.0**	**85,540**	**100.0**

Of the 862 villages, Scheduled Tribes numbering 85,540 are concentrated in 596 villages. There are 266 (30.9 percent) of total villages which do not have any Scheduled Tribes population. There are 239 villages (27.7 percent) of total villages where in the concentration of Schedule Tribes numbering 9,343 (10.9 percent of Scheduled Tribes) is less than 5 percent of the total population in their respective villages. The proportion of Scheduled Tribes numbering 11,899 (13.9 percent percent of total Scheduled Tribes) in 129 villages is ranging from 5-10 percent, while the proportion of Scheduled Tribes numbering 13,778 (16.1 percent of total Scheduled Tribes) in 82 villages (9.5 percent) is in the range 11-20 percent of total village population, the Scheduled Tribes numbering 5,781 (6.8 percent) in 26 villages (3.0 percent) from 21-30 percent of the total population. There in the proportion of 11,567 Scheduled Tribes (13.6 percent) in 37 villages (4.3 percent) ranging from 31-50 percent. There are 31 villages (3.6 percent), where the proportion of Scheduled Tribes population is 51-75 percent, while in 52 villages, the proportion of Scheduled Tribes (6.0 percent) population is 76 percent and above.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWNS, 2001

District(Urban) Total		**627,497**	**53,818**	**14,548**	**8.6**	**2.3**

In urban areas the Scheduled Caste and Scheduled Tribes Constitute 8.6 percent and 2.3 percent of the total urban population respectively. The percentage of Schedule Castes population in Akot, Umari Pragane Balapur, Murtijapur and patur is above the district urban average and below in remaining four towns namely Telhara, Balapur, Akola and Malkapur. The higher percentage is found in Murtijapur (M Cl) (12.9 percent) and lowest in Balapur (M Cl) (4.2 percent). The percentage of Schedule Tribes population is above the district urban average in four towns Telhara (M Cl) Umri Pragane Balapur (CT), Malkapur (CT). Murtijapur (M Cl) and the percentage of Schedule Tribes population is at par with the district urban average in two towns Balapur (M Cl), Akola (M Cl) (2.3 percent) and below in two towns Akot(M Cl) and Patur (M Cl). The highest percentage of Schedule Tribes population is found in Telhara (M Cl) (3.5 percent) and lowest in Akot (M Cl) (1.9 percent).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

3	Balapur	938	928
4	Akola	946	931
5	Murtijapur	944	941
6	Patur	969	943
7	Barshitakli	947	971
	District (Rural) Total	**950**	**944**

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Akola (M Cl)	962	924
2	Akot (M Cl)	922	820
3	Balapur (M Cl)	948	935
4	Malkapur (CT)	952	1,096
5	Murtijapur (M Cl)	940	913
6	Patur (M Cl)	931	895
7	Telhara (M Cl)	972	902
8	Umri Pragane Balapur (CT)	943	1,000
	Sex ratio (Urban) for the district:	**952**	**917**

District (rural) sex ratio for Scheduled Castes is 950, while for Scheduled Tribes population it is 944. Sex Ratio among Scheduled Caste is highest (979) in Telhara C.D. Block and lowest (938) in Balapur C.D.Block. The Sex Ratio is above the district average in two C.D. Blocks i.e. Telhara and Patur C.D. Block and below the district average in five remaining C.D. Blocks viz., Akot, Balapur, Akola, Murtijapur and Barshitakli. For scheduled Tribes, the highest Sex Ratio is seen in Barshitakhli C.D. Block (971) as against district average of (944) and lowest in Telhara C.D. Block (922). In Scheduled tribe population, the sex ratio is above the district average in two C.D. Blocks viz., Akot and Barshitakli and lower in remaining in five C.D.Blocks viz., Telhara, Balapur, Akola, Murtijapur and Patur.

Sex Ratio for Urban for the district Scheduled Castes and Scheduled Tribes is 952 and 917 respectively. The Sex Ratio among Scheduled Castes in Urban areas is above the district average in two towns i.e. Telhara M Cl (972) and Akola M Cl (962). The highest Sex Ratio among Scheduled Castes is in Telhara (M Cl) (972) and lowest in Akot (M Cl) (922). Malkapur (C.T.) sex ratio is at par with the district average (952). The Sex Ratio of Scheduled Tribes is above the district average in four towns viz., Balapur M Cl (935), Akola M Cl (924), Umari Pragane Balapur (CT) (1,000) and Malkapur (CT) (1,096) and below the district average in Telhara (M Cl)(902), Akot (M Cl) (820), Murtijapur (M Cl) (913) and Patur (M Cl) (895). The highest sex ratio among Scheduled Tribe population is in Malkapur (CT) (1,096) and lowest in Akot (M Cl) (820).

For the district as a whole literacy rates for males are substantially higher as compared to Females in both rural and urban areas. It is seen that 81.4 percent of population are literate in Akola district. The tahsilwise break up shows that Akola tahsil has highest literacy rate (84.3 percent) while Patur tahsil has the lowest rate (77.3 percent). Male literacy rate is highest in Akola tahsil (90.5 percent). Akola and Murtijapur tahsils have male literacy rate above the district average. Female literacy rate is the highest in Akola tahsil 77.7 percent and lowest in Patur tahsil 66.1 percent. Two tahsils i.e. Akola and Murtijapur tahsils, have female literacy rates, above the district average.

As regards rural areas of the district, the literacy rate is 78.8 percent for the district with male and female literacy rates of 87.9 percent and 69.1 percent respectively. Murtijapur tahsil has the highest literacy rate of 81.5 percent. In this tahsil 89.6 percent of the males and 72.7 percent Females are literates. The lowest literacy rate is noted in Patur tahsil (77.3 percent). The male literacy rate in Telhara tahsil is lowest with 86.3 percent literacy while Patur tahsil has the lowest female literacy rate (66.1 percent).

There is significant difference in literacy rates between males and females in all the tahsils females are lagging behind males in literacy in all the tahsils, however the gap varies from tahsil to tahsil. The average gap for the district is 15.5 percent, rural areas being 18.7 percent and urban areas being 10.4 percent.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table-31 2001 Census recorded 35.7 percent of districts population as main workers 4.0 percent as marginal workers and the remaining 60.2 percent as non-workers. Among the 35.7 percent main workers male participation rate in the district is 48.5 percent while that of females is 22.1 percent, as per 2001 census.

The percentage of main workers is highest in Barshitakli tahsil (43.0 percent) and the lowest in Akola tahsil (31.4 percent). The sex-wise break-up shows that among male and females 3.3 percent and 4.9 percent respectively are in marginal workers. It is seen that the percentage of females marginal workers is substantially higher than that of males. The percentage of marginal workers is the highest is Murtijapur tahsil (6.3 percent) and the lowest in Akola tahsil (3.1 percent) among seven tahsils of the districts.

		Females	**485,277**	**149,155**	**30.7**	**32,922**	**6.8**	**182,077**	**37.5**	**303,200**	**62.5**

2001 Census recorded 40.8 percent of the district population as main workers, 5.2 percent of as marginal workers and remaining 54.0 percent as non-workers. Among the main workers, male participation rate in the district is 50.3 percent while that of females is 30.7 percent. The proportion of main workers is highest in Barshitakli (43.0 percent) and the lowest in Telhara CD Block (39.6 percent). The sexwise breakup shows that among males and females 3.7 percent and 6.8 percent of the population respectively are marginal workers. It is seen that the proportion of females marginal workers is substantially higher than that of males. The proportion of marginal workers is the highest in Murtijapur C.D Block (7.5 percent and the lowest in Barshitakli C.D Block (3.8 percent) among 7 C.D Blocks of the district.

Non-workers constitute 54 percent of the total population. Female non-workers constitute 62.5 percent of their respective population, while 46.1 percent males are non-workers. The highest percentage of (56.5 percent) of non-workers is seen in Telhara C.D block, while the lowest percentage of non-workers is in Tahsil Murtijapur (51.5 percent).

Census 2001 recorded 27.6 percent of the district urban population as main workers, 2.3 percent as marginal workers and the remaining 70.2 percent as non-workers. The sexwise breakup shows that among males and females 45.7 percent and 8.2 percent of the population are main workers.

In urban areas Telhara (M Cl) has the highest participation rate of 33.3 percent while Akola (M Cl) and Malkapur (CT) has the lowest rate of 26.9 percent main workers in the districts urban areas. The percentage of main workers in four towns namely Telhara (M Cl) (33.3 percent), Akot (M Cl) (29.7 percent), Umri Pragane Balapur (CT) (28.0 percent) and Murtijapur (M Cl) (28.0 percent) is above the percentage of main workers in the districts urban average. While four towns Akola (M Cl) and Malkapur (CT) (26.9 percent), Balapur (M Cl) (27.0 percent) and Patur (M Cl) (27.5 percent) has main workers percentage below the district urban average. The percentage of marginal workers is the highest in Umri Pragane Balapur (CT) (3.1

percent) and the lowest in Patur (1.5 percent). The work participation rate for marginal workers in urban areas for the districts is 2.3 percent comprising 2.7 percent males and 1.8 percent females are marginal workers in the district. Non workers constitute 70.2 percent of the total population of the district. Only two towns namely Murtijapur (M Cl) (2.4 percent) and Umri Pagane Balapur (CT) (3.1 percent) have participation rate of marginal worker above district urban average and Balapur (M Cl) and Akola (M Cl) has work participation rate equal to the district urban average i.e 2.3 percent and the remaining four towns have participation rate below the district urban average.

Note: Percentages of Workers to total workers are given in brackets.

Table 34 indicates the distribution of male and female workers by four categories of economic activites for the district.

The relative importance of the main shares of economic activity may be gauged from the pattern of distribution of workers according to the broad four fold classification, namely cultivators agricultural labourers, household industry workers, and other workers. The economy of the district is primarily agricultural which is supported by fact that cultivators (18.9 percent) and agricultural labourers (48.4 percent) together constitute 67.3 percent of the workers in the district.The agriculture sector has absorbed nearly sixty seven percent of the total workers in the district.

The proportion of both cultivators and agricultural laboures differs considerably from tahsil to tahsil .The proportion of cultivators varies between 29.0 percent for patur tahsil.to 10.0 percent for Akola tahsil. The proportion of agricultural labourers varies between 62.0 percent for Telhara tahsil and 27.8 percent for Akola tahsil.

It may be seen that 32.6 percent workers are engaged in work other than agriculture. Among them 1.3 percent are hosehold industry workers and remaining 31.3 percent are other workers.

Note: Percentages of Workers to total workers are given in brackets.

Table 35 indicates the distribution of workers by male and female workers by four categories in C.D. block 2001.

The cultivators (25.0 percent) and agricultural Labourers (62.0)percent together Constitute 87.0 percent of the total workers of the district. The remaining 13.0 percent of workers are engaged in household industry and other works.i.e1.0 percent in household industry and 12.0 percent engaged in other work.

The proportion of cultivators varies from 30.8 percent for patur C D Block and 20.8 percent for Akola C D Block. The proportion for agricultural labourers varies between 67.1 percent for murtijapur CD Block, and 57.7 percent for Akola CD block. More than 87.0 percent of the workers in the districts rural areas are engaged in agriculture as cultivators and agricultural labourers, which is but natured.in the context of the agricultural economy of the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Education

The educational amenity is available in 786 villagers, which constitute 91.2 percent of the total 862 inhabited villages of the district. In Patur CD Block the educational amenity is available in all the inhabited villages. This is followed be Balapur CD block with 94.3 percent, Barshitakli CD block with 93.7 percent, Telhara CD Block with 93.5 percent, Akola CD Block with 89.2 percent, Akot CD Block with 88.5 percent and Murtijapur CD Block with 85.9 percent educational amenity

The educational amenity available to 99.2 percent of population in the district (Table 38). There are only 76 villages, which do not have primary school. The amenity for these 72 villages is available at distance less than 5 kms. (Table 39).

According to the distance range from nearest statutory town, the educational amenity is available in 49 villages (92.5) percent within 5 kms, 326 villages (90.6 percent) have educational amenity within 5-15 kms, 408 villages (91.7 percent) within 16-50 kms and 3 villages (75.0 percent) at distance of 51+ kms. (Table - 40).

228 inhabited villages constituting 75.0 percent of the total 304 inhabited villages in population range up to 499 have the educational amenity available to them within their revenue limits. All the 253 (100 percent) villages with population size 500-999; 194 villages(100.0 percent) are in 1,000-1,999 population range; 86(100 percent) villages in 2,000-4,999 population size; 19 (100 percent) villages in 5,000-9,999 population size and 6 villages in 10,000 and

above population size have the availability of educational amenity.

Medical

Medical amenity of any type specified in the village directory is available in 212 villages constituting. 24.6 percent of and it covers 46.1 percent of the rural population. The villages enjoying this amenity through Primary health centeres, sub-centres and dispensaries serve not only the resident population of concerned villages but also those residing in surrounding villages.

650 villages, out of a total of 862 inhabited villages do not have any type of medical amenity within the village. Of these as many as 136 and 154 villages are situated at a distance of less than 5 kms with reference to the nearest place with hospitals and PHC respectively. Another 163 and 195 villages are located at distance of 5 to 10 kilometres from the Hospital & PHCs respectively But in the case of 530 and 506 villages, the residents have to travel more than 10 kilometres to reach a place where the Hospital and PHC respectively as located.

As per the distribution of villages, according to population range, the medical amenity is available in 28 villages (9.2 percent) with population less than 500; 42 (16.6 percent) villages with population range 500-999; 73 villages (37.6 percent) with population range 1,000-1,999; 52 villages (60.5 percent) with population range 2,000-4,999; 12 villages (63.2 percent) with population range 5,000-9,999 and 5 villages (83.3 percent) with population range 10,000 and above.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or o utside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Drinking Water

Water supplied from a tap or hand pump or tube well situated with in or outside the premises is considered as improved drinking water amenity. The improved drinking water source is availabile in 824 villages (95.6 percent) out of 862 inhabited villages.

Postal

As regards rural areas of the district as a whole, the amenity of post and telegraph is available to 208 villages (24.1 percent) out of 862 inhabited villages serving (53.0 percent) of rural population of the district. Within seven CD Blocks of the district, the percentage of villages having amenity of post and telegraph varies considerably. In C.D.Block Murtijapur, the post office amenity is available in as low as 9.4 percent of the villages (i.e., 14 villages), whereas in Patur C.D. Block it is highest coverage of 31.3 percent of villages (26 villages) with the amenity, the corresponding coverage of population with post office amenity in C.D. Block Murtijapur is 27.2 percent while it is 68.1 percent population coverage in C.D. Block Balapur.

On the whole, in Balapur C.D. Block, the post office amenity is available to as high as 68.1 percent of the total population. This is followed by C.D.Blocks Telhara (62.4 percent), Patur (58.9 percent), Akot (58.0 percent), Akola (52.8 percent), Barshitakli (42.2 percent) and Murtijapur (27.2 percent). Postal facilities are not available at all in 655 villages. Out of these the post office amenity is available to 443 villages at a distance of less than 5 kms, 125 villages at a distance 5-10 kms.; 87 villages at a distance beyond 10 and above kms. Among the 208 villages with amenity of post and telegraph, 14 villages (4.6 percent) are having population range of 1-499; 29 villages are in population range 500-999; 79 villages are in the range i.e.1,000-1,999; 63 villages are in the range of 2,000-4,999 and remaining 23 villages have the population range of 5,000 and above.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col.2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	72	3	1	76

(b) PHC	154	195	506	855
3. Post Office	443	125	87	655
4. Telephone	142	119	411	672
5. Bus Service	267	41	24	332
6. Banks				
(a) Commercial Bank	260	245	295	800
(b) Cooperative Bank	275	255	274	804
7. Agricultural Credit Societies	246	114	114	474

Telephone

There are 190 villages (22.0 percent) with telephone amenity serving 44.0 per cent of rural population of the district. In Balapur CD Block telephone is available to a highest 29 villages serving of 33.3 per cent of total villages. Whereas Patur CD Block 6 villages with 7.2 percent coverage of villages holds last rank. Akot, Balapur and Murtijapur are only three CD Blocks having propotion of villages more than district average.

Telephone amenity is not at all available in 672 villages. Out of these Telephone amenity is available in as many as 142 villages at a distance of less than 5 kilometers, 119 villages at a distance between 5-10 kilometers and 411 villages at a distance of more than 10 kilometers. Among 190 villages with the amenity of telephone, 19 villages are having population size of 1-499; 103 villages are in the population size of 500-1,999; 47 villages are in the population size of 2,000-4,999 and 21 villages are having population of 5,000 and above.

Transport and Communications

Transport and Communication includes bus service, rail amenity and navigable waterways. If is a bus stop or a railway station or navigable waterways is located within the territorial jurisdiction of a village, it is considered to have been served by such amenity even it is little away from the actual settlement. 535 (62.1 percent) villages have communication amenity available serving of 81.8 percent of rural population of the district. 69 villages in Patur CD Block constituting (83.1 percent) of total villages have the highest proportion of village where communcations/ transport amenity is available, while the Balapur CD Block with 51.7 per cent coverage of village holds the last rank.

Out of 862 inhabited villages 332 villages do not have any Communication amenity of these 332 villages, the residents of 267 villages have to cover a distance upto 5 kilometers to reach a place with such amenity, for 41 villages it is between 5-10 kilometer and for 24 villages it is more than 10 killometeres. The availability of this amenity depends upon the location of the village with reference to road. Among the 862 villages which have the availability of communication amenity within their revenue limits, the population for 123 villages is less than 500, for 307 villages in the range of 500-1,999; 80 villages in the range of 2,000-4,999 and remaining 25 villages fall in the range of 5,000 and above. Thus the population size of a village has an impact on the availability of communication amenity.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Banking

The Banking services are available in 79 (9.2 percent) villages out of 862 inhabited villages serving (33.9 per cent) rural population of the district. While 12.2 per cent of villages (18) in Akot CD Block have highest the banking amenity, the coverage of villages is as low as 4.7 percent (7 villages) in CD Block Murtijapur. Out of 862 inhabited villages the people of 260 and 275 have to cover a distance upto 5 kilometres for availing the amenity of the commercial bank and co-operative bank respectively. For 245 and 255 villages the amenity is available at distance of 5-10 kilometres and remaining 295 and 274 villages the amenity of commercial bank and co-operative bank respectively is available at a distance of more than 10 kilometres.

It has been observed from the table on distribution of villages according to distance from nearest statutary town, that there are 2 villages with banking amenity at a distance less than 5 kilometres, 39 villages at a distance of 5-15 kilometres from the nearest statutory town and 37 villages are having the amenity available to the distance range of 16 to 50 from the nearest statutory town. Remaining one village has the amenity available at the distance beyond 51 kilometers.

In Akola district the population in 5 villages with banking amenity is less than 500 population range in 3 villages having banking availability are in the range of 500-999; 16 villages in the range of 1,000-1,999; 30 villages in the range of 2,000-4,999 and remaining 25 villages in the range of 5,000 and above.

Agricultural credit Societies

There are 388 villages (45.0 percent) having agricultural credit societies in the district. These villages serve 65.3 per cent of the population. The amenity is available to the highest proportion of villages in 53 (63.9 percent) in Patur CD Block and lowest i.e. 55 villages (37.2 percent) in Akola CD Block. 474 villages are not having this amenity. Out of these, the amenity to as many as 246 villages are situated at a distance up to 5 kilometres; 114 villages at a distance 5-10 kilometres and 114 villages at a distance beyond 10 kilometres where the amenity is available. A perusal of the data on distribution of villages according to distance from nearest statutory towns, it is seen that 22 villages are situated at a distance of less than 5 kilometres from the nearest statutory town while 363 villages at a distance 5-50 kilometres and 3 villages are at a distance 51 kilometres and above.

72 villages (23.7 percent) where this amenity is availability has a population less than 500; 233 villages with population of 500-1,999; 61 villages with population of 2,000-4,999 and the remaining 22 villages with population 5,000 and above.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

Road whether "Pucca or Kaccha" are the nerve system of a district. They act as factor for the development and upliftment of the areas road with cement concrete, blacktop, water bound macadam etc. come under pucca roads and the remaining are treated as kuccha roads.

Pucca road amenity is available to 736 villages (85.4) percent out of 862 inhabited villages in the district. Among Seven CD Blocks in the districts proportion of villages with approach by pucca road is highest in Akot CD Block, 134 (90.5 percent) and the lowest in Telhara CD Block 76 (81.7 percent) villages. Two CD Blocks viz., Akot and Balapur are above the district average and remaining five CD Blocks i.e. Telhara, Akola, Murtijapur, Patur and Barshitakli. The amenity is availed by a population of 955, 553 persons (95.3 percent) (Table 38) in the district. With respect to the availability of amenity from nearest statutory town it is seen that, of the 736 villages (85.4 percent), 46 villages are at a distance of less than 5 kilometers from the nearest statutory town, 686 villages at a distance of 16-50 kilometers to approach nearest statutory town by pucca road, 4 villages are at a distance range of 51 and above kilometers from nearest statutory town. 213 (70.1) percent villages served by pucca road have population less than 500, for 220 (87.0 percent) villages it is in the range of 500-999; 193 villages (99.5 percent) in the range of 1,000-1,999; 85 villages (98.8 percent) in the range of 2,000-4,999 and 25 villages (100 percent) having population range 5,000 and above.

It may be seen that smaller the population size of the village, lesser is the availability of amenity of pucca approach road.

Power supply

840 villages (97.4 percent) are having power supply amenity in the district. The power supply is available to the highest proportion of 83 villages (100.0) percent and 126 villages (100.0) percent in Patur and Barshitakli CD Block respectively while it is lowest proportion of villages i.e 167 (94.9) percent in Akola CD Block electrification amenity available in the district.

While total cent percent population in Telhara patur and Barshitakli CD Blocks have the power supply amenity available to them, in Akot tahsil it is accessible to 99.9 percent of the population (table-38). The amenity availed by a population of 996,674 (99.4 percent) in the district.

Out of 862 villages the power supply amenity is available 840 villages (97.4 percent) and 22 villages (2.6 percent) do not have power supply amenity available. The cent percent power supply is available 86 villages in population range 2,000-4,999, 19 villages in population range 5,000-9,999 and 6 villages in population range 10,000 and above. Remaining 286 (94.1 percent) in range of 1-499, 250 villages (98.8 percent) in range 500-999 and 193 villages (99.5 percent) in range 1,000-1,999 have the amenity of power supply available in the district.

It may be summed up from foregoing paragraphs that in respect of availability of different type of amenities and facilities considered. The larger villages have an advantage over the smaller ones, population size and availability of amenities is directly associated with each other.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Telhara	93	54,537.00	183.7	4.5

	District Total	**2.3**	**1.6**	**1.5**	**0.6**	**0.2**

Table 44 indicates the number of schools and colleges per ten thousand population in towns. On an average there are 2.3 primary schools, 1.6 Junior secondary/middle schools, 1.5 secondary/matriculation institutions, 0.6 senior secondary schools and 0.2 colleges in the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Akola(M.Cl.)	24
2	Akot(M.Cl.)	6
3	Balapur(M.Cl.)	1
4	Malkapur(C.T.)	32
5	Murtijapur(M.Cl.)	19
6	Patur(M.Cl.)	0
7	Telhara(M.Cl.)	21
8	Umri Pragane Balapur(C.T.)	4
	Distrct Total	**19**

Table 45 gives the number of beds per ten thousand population in medical institutions in towns. On an average there are 19 beds per ten thousand population in urban areas of the district. Malkapur (CT) has maximum number of beds i.e 32, followed by Akola(MCl), with 24 beds, Telhara (MCl) with 21 beds, Murtijapur (MCl) with 19 beds, Akot (MCl) with 6 beds, Umri Pragane Balapur(C.T.) with 4 beds, Balapur(MCl) with only 1 bed. In Patur (MCI) there is no bed.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Akola	400,520	176,332	44.0
2	Akot	80,726	15,271	18.9
3	Balapur	39,502	3,820	9.7
4	Murtijapur	38,554	13,630	35.4
5	Patur	20,538	1,344	6.5
6	Telhara	18,906	0	0.0
District Total		**598,746**	**210,397**	**35.0**

The proportion of slum population to total population is 35.0 percent in the district. The percentage of slum population of Akola (M Cl) (44.0 percent) is higher than the district average.

The slum population in Akola (M Cl) is highest of the six towns in absolute numbers and i.e 176,332. The slum population is lowest in terms of number in Patur M Cl (1,344) forming 6.5 percent of the total town's population. There is no slum population in Telhara (M Cl).

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 gives the distribution of households by tenure status, and number of rooms occupied for total, rural and urban areas of the district. This table also gives similar information for Scheduled Castes and Scheduled Tribe households for the district. According to 2001 census there are 6,927 households having no exclusive room, 151,623 households having one room. 95,681 households having two rooms. 34,486 households having three rooms, 24688 households having 3 + rooms. The median number of rooms is only one.

Regarding rural and urban areas of the district there are 6,160 and 767 households respectively having no exclusive room, 111,245 and 40,378 households having one room. 61,123 and 34,558 households having two rooms, 15,472 and 19,014 households having three rooms and 8,186 and 16,502 having more than 3 rooms, medium number rooms is 1 and 2 in rural and urban areas respectively.

Among the Scheduled Castes households, there are 2,183 households compresing 1,862 rural and 321 urban households having no exclusive room, 47,468 households comprising 37,389 rural and 10,079 urban households having one room, 19,063 households comprising 12,781 rural and 6,282 urban households having two rooms. There are 4,076 households comprising 1,844 rural and 2,232 urban households having three rooms, and 2,096 households comprising 837 rural and 1,259 urban households having 3 + rooms respectively. Median number of rooms figures one each respectively. Within Scheduled Tribes, household of Akola district, there are 1,032 households

comprising 985 rural and 47 urban households having no exclusive room, 16,009 households comprising 13,818 rural and 2,191 urban having one room. 7,612 households comprising 5,901 rural and 1,711 urban households having two rooms, 1807 households comprising 1,043 rural and 764 urban having three rooms and 992 households comprising 450 rural and 542 urban having more than 3 rooms.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The total percentage for the three categories viz.Permanent, Semi Permanent and Temportary may not add to 100 percent, the percentage remaining is for the 4th category Unclassified not shown in the table.

According to 2001 census, of the total households of the district, 41.8 percent households are living in permanent houses, 55.2 percent are living in semi-permanent and 2.9 percent are living in temporary houses. In rural areas of the district, 31.3 percent households are living in permanent , 65.2 percent are living in semi permanent and 3.5 percent are living in temporary houses. In the urban areas of the district, 61.1 percent households are living in permanent ,37.1 percent are living in semi-permanent and 1.8 percent are living in temporary houses. The households living in temporary houses in urban areas constitute 1.8 percent of the total households against 3.5 percent living in rural areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

This table gives the number and percentage of households having improved Drinking Water Source, Electricity, Bathroom, Toilet and Drainage amenity available in the district. According to 2001 census, the amenity of improved drinking water is available for 256,839 households constituting 82.0 percent of the total households. In rural and urban areas of the district, this amenity is available for 153,640 (76.0 percent) and 103,199 households (92.8 percent) respectively. Electricity is being enjoyed by 222,288 households (70.9 percent). In rural and urban areas of district, electricity is available to 125,729 households (62.2 percent) and 96,559 households (86.8 percent) respectively.

The facility of Bathroom is available in 225,921 households (72.1 percent) for rural and urban areas this amenity is available for 137,932 households constituting (68.2 percent) and 87,989 households constituting (79.1 percent) respectively.

The amenity of toilet is available to 119,979 households which constitute 38.3 percent of the total households in the district. In rural and urban areas toilet facility is available for 49,088 (24.3 percent) and 70,891 households (63.7 percent) respectively.

The amenity of drainage is available for 227,382 households, constituting 72.6 percent in the district. For rural and urban areas drainage amenity is available for 136,489 households (67.5 percent) and 90,893 households (81.7 percent) respectively.

Percentage are given in brackets.
Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas.

Of the 313,405 households, 174,939 (55.8 percent) households use firewood for cooking, 40,315 households use crop residue (12.9 percent), 2,650 (0.8 percent) use cowdung cake, 332 (0.1 percent) use coal/lignite (charcoal), 67,610(21.6 percent) cooking gas, 779 (0.2 percent) Bio-gas, 25,465 (8.1 percent) households use Kerosene, 344 (0.1 percent) use other means. There are 819 households who reported no cooking (0.3 percent) being done by them.

In the rural areas 143,413 households constituting (70.9 percent) of the total households use firewood for cooking. This is followed by use crop residue (18.1 percent) cooking gas (7.4 percent) kerosene (1.9 percent), cowdung cake (0.9 percent), Bio-gas (0.3 percent) In urban areas 52,602 households (47.3 percent use LPG gas followed by Kerosene (19.4 percent) firewood (28.3 percent) crop residue (3.4 percent).

It may be seen that while firewood continues to be the predominant fuel used in rural areas, the cooking gas in urban areas is used to a large extent.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 52 gives the number of households availing banking services and number of households having each of the specified assets 2001.

There are 313,405 households, of which 202,186 are rural and 111,219 urban. Of these banking facilities are being availed by 138,852 households of which 84,561 households are rural and 54,291 in urban. It may be seen that a higher proportion of households in urban areas (48.8 percent of total urban households) utilize the banking facility as compared to the rural areas (41.8 percent to the total rural households).

In the district 66,807 have radio/transister 123,494 have television 25,591 households have telephone, 107,976 households have bicycles, 38,548 households posses scooters, 5,292 household possess car, Jeep or van. It may be noticed that from the information available in the table that a higher proporation of households in the urban areas possess these specified assets of these 313,405 households, 136,215 households possess none of the above specified assets. In the rural and urban areas, there are 110,493 and 25,722 households respectively. Who do not possess any of the specified assets.

(viii) Major Social and Cultural events, Natural and Administrative developments and significant activities during the decade.

A new district viz., Washim was carved out from Akola District vide Govt. Notification No. REN-4597/ CR-5/M-10 Dated 30th June 1998. Six tahsils viz., Malegaon Mangrulpir, Karanja, Manora, Washim and Risod were transferred from Akola district to newly formed Washim district. The district Akola thus retained remaining seven tahsils viz., Telhara, Akot, Balapur, Akola, Murtijapur, Patur and Barshitakli under its jurisdiction.

(ix) Brief description of places of Religious, Historical or Archeological importance in the villages and Places of Tourist interest in the towns of the district.

The fairs in India usually served more than one purpose. No doubt they are primarily religions gatherings of persons belonging more often than not to one particular religion. However they also bring into the market various indigenous articles produced by the villagers and thus, serve as place for exchange of the goods produced by the village artisans. Except that they are much larger gathering these fairs differ little from weekly markets. Beside local pedlars and the traveling dealers, most fairs are attended by agents of many traders. The chief articles of sale / purchase are cloth, pots, carts, and livestock. People buy necessary articles in these fairs. Important fairs are held in various part of the district. Among them a few, viz loni fair in vidarbha reason of Maharashtra is the biggest fair of Akola district. The fair is held between kartika vad 14 and margashirash sud 2. This fair is attended about 80,000 pilgrims from all part of vidarbha. The main items of entertainment are singing parties etc. various stalls are opened at the fair, important among them being those brass utensils, sweetmeats, bangles, stationery, cloths and fancy goods etc. beside the major fair described above 237 minor fairs are also held in the district from time to time.

Places of Historical and tourist importance

The history of vidarbha is very ancient forts, old temples, Darghas, Maths in the district play an important role in shaping the socio cultural pattern of the district and are major tourist attentions.

Akola there are a number of temples in the district. The Rajeshwar mandir said to be one of the oldest temples in the town. Ram mandir situated near the city kotvali on the Tilak road in respect of beauty and architectural monument. The temple was built by Bachulkji at the instance of shri Gajanan maharaj of Shegaon. Ram mandir is modern temple contains the images of Kartika swami, Parvati and Ganpati all of white marble. The temple of Narsinghbuva Akot, the Hemadpanti temples and Mahadeva temple at Barsitakli a place rich in old temples and well built havelis are situated in the tahsil Jain temple of Parvanath at Shirpur and Garga gods temple at patur and others beautiful old temples at Telhara are attractive in the district.

Shri Babaji math, an old math in said to have been constructed about 300 years ago It is situated on the Sakola Akot road. Every year a fair is held on Ashvin. Purnima which is attended by local people only shri Shivcharan Baba math, shri Jangam math sansthan is a region center of the veershi lingayat community.

There are churches in the town, of which two are Roman Catholic and one is protestant church memorial halls are constructed by the Pramilatai Oke memorial committee near the Swarajya Bhavan. The municipal council has constructed two memorial halls in Gandhi Jawahar Bag just opposite the government circuit house named he Gandhi Darshan hall and the Jawahar darshan hall. Statues of Mahatma Gandhi and Pandit jawahar Nehru are installed infront of the respective memorial halls.

Fort

In this district Asad khan constructed a small fort, which come to be known as Asad Gadh. The fort is said to have been constructed in 1697 A.D. during the region of Emperor Aurangzeb. Other fort constructed of Balapur was storted by Azam shah the son of Emperor Aurangzeb and was completed by Ismail Khan, the Nabab of Ellicpur in 1757.

Balapur

The main object of interest in this town are the chhatri (Umbrella Shapped Pavalion) said to have been constructed by Raja Jaysing who was the governor of Deccan after Aurangzeb ascended the throne, and the fort constructed by Ismail khan, the

first Nabab of Ellichpur in 1757. The chhatri a mausoleum constructed by Raja Jaysing is a 25 feet square has height of 33 feet. This chhatri attracts many people not only from this district but also from outside also.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Akola district has 87.0 percent of its total working population engged in agricultural activities as per the 2001 census. It has one of the biggest cotton Market in Maharashtra as well as outside the state. Besides cotton, groundnut oil is also exported outside the district. Natural resources required for agriculture based industries are available to a great extent in the district as is evident from the existence of a large number of cotton ginning, Pressing and weaving units in the district. The other major occupation of the people is brick and tile making.

Another important feature of the district is the hydrogenated oil mill known as the Berrar oil industries and produces hydrogenated oil besides non–fatty vegetable and soap. Other small scale establishments like dal mills oil presses, confectionery, bidi factory, saw mills, soap making units, metal platiing, cement and bricks etc Provide employment to many People.

The main centers of Iron and steel based workshops are it the district at Akola, Akot Telhara and murtijapur. These units were mainly engaged in Manufacture of steel furniture, agricultural implements and other iron and steel products. In addition to this there are many soap factories in the district. Village and cottage industries play an important role in the industrial development of the district. Handloom weaving has been the age old occupation in the district.

The government has provided many travel and tourist facilities in Akola district Marathi is the principal language spoken and understood by the majority of people. Urdu has the second largest number of Speakers Jowar and wheat, constituted the main staple food o the rural people in the Akola district. Ganesh utsav holi, Diwali, Ramnavmi, Christmas, Moharram are the important religious festivals of the people.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number,

Name of village & location code number and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

This column provides data available on medical amenities in the village.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 : Post, Telegraph and Telephone

Column 9 provides the postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village.

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc., the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given.

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given.

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village,

the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded.

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water, the same has been indicated in this column.

Column 14 : Approach to village

Approach to village refers to the state of road leading to village.

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

This column relates availability of Power Supply in the village.

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines the same is noted in this column.

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department.

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / Non-municipal Towns.

Appendix - IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Town Directory :

The town directory is presented for each town covering different aspects of urban life. In 2001 Census, Statement I – VII have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finance, civic, medical, and educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutory notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns the Tahsildar and cantonment executive officers supplied the information.

Statement I-Status and Growth History

Statement I shows the status and growth history of the towns in the district, column 2 in this statement

indicates class, name and civic administration status of a town. Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and National level. Census towns have no urban civic status.

Column 3 indicates location code number of the town, column 4 gives name of tahsil and column 5 shows the name of C.D.Block. Column 6 presents area in Sq. Kms., Column 7 presents number of households including houseless households.

Column 8 to 18 gives population and growth rate of town since 1901 and would help in drawing the trends in their growth rate, Column 19 presents density and Column 20 to 22 presents sex ratio.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquartres with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV-Civic and other Amenities, 1999

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 3 and Scheduled Castes/Scheduled Tribes population given in column 4 and 5 have been added to help in measuring amenities in respect of population size of the weaker sections in the towns. The information on the road length within the town shown under column 6 has been obtained from Municipality.

Column 7 to 12 reflects the information on system of sewerage, number of latrines, and method of disposal of night soil.

Column 13 indicates sources of protected water supply to the inhabitants of the towns. The information on storage and capacity is shown under column 14.

Column 15 gives information regarding availability of fire fighting services. In case it is not available in the referent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Column 16 to 20 pertains to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, are treated as independent units.

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc.

Column 6 to 9 :

The information on educational facilities is reflected in columns 6 to 9

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the

government or semi government or autonomous bodies, public sector undertakings etc.

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or Elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class IV and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle schools with Primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M (3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded.

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

PART A
VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a)Note Explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12:Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water way they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If a village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK

(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

(b) List of Villages fully merged in towns and outgrowth at 2001 Census

Serial Number	Name of Villages	Location Code No. 1991	Merged in towns and Outgrowths

Section II - Town Directory

(a) Note Explaining the abbreviations used in Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) :Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board / Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate Office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called seperate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) and others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 : Medical

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning

centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres are treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution(s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :Educational

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocationl institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. college, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats.

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of the nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities.

Stadium, Cinema, Auditorium/ Drama / Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading Room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies.

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area Committee etc.

There is no outgrowth in this district; hence the information is ‘ Nil ’.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation . The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active co-operation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union Territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels :

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and last questions related to currently married women. The measures of fertility worked out are based on the F- series of 1991 Census pertaining to Maharashtra State.

Different fertility measures reveal that the level of fertility of the district is higher compared to the State average; child woman ratio is also high as compared to State. But mean age at marriage is slightly low as compared to State average.

Mortality Levels :

Information on the question on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of the child mortality have been worked out by using brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

Item		Akola District Total	Maharashtra State Total
1	2	3	4
Q1	P	101	74
	M	103	72
	F	96	76
Q2	P	103	79
	M	106	78
	F	101	81
Q3	P	108	86
	M	109	84
	F	107	89
Q5	P	115	91
	M	117	89
	F	112	93

Mortality

The estimates of child mortality in 1991 of q(1), q(2), q(3) and q(5) it is observed that child mortality in the district is higher compared to the State .

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Akola District 1981	Akola District 1991	Maharashtra State 1981	Maharashtra State 1991
1	2	3	4	5
GFR	146	148	134	124
GMFR	183	190	168	157
TFR	4.7	4.6	4.3	3.7
TMFR	5.7	6.3	5.2	5.2
Crude Birth Rate (CBR)	35.5	34.1	31.8	29.8
No. of children ever born per women in the age group 45-49	--	4.7	--	4.2
Mean Age at Marriage	--	17.9	--	17.9
Child Women Ratio	--	56	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crude Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR & CBR were 146, 183, 4.7, 5.7 and 35.5 respectively as compared with State average 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 148, 190, 4.6, 6.3 and 34.1 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage for the district and the State in 1991 found to be the same.

Child Woman Ratio

The child woman ratio is found more in the district compared to the state.

ANNEXURE III

Various Measures of Fertility and Mean Age at Marriage,1991

Serial number	State / District	GFR	GMFR	TFR	TMFR	CBR	No.of children ever born per ever married women in age-group 45-49	Child - Women ratio	Mean Age at Marriage

On the basis of migrants by place of last residence, there are 41,715,711 migrants in Maharashtra comprising 16,763,943 males and 24,951,768 females. These migrants constitute 43.1 percent of total population. Male migrants constitute 33.3 percent of male population while female migrants account for 53.7 per cent of female population.

ANNEXURE IV (vi)
Percentage distribution of migrants by place of last residence - Akola

	Place of last residence	2001 Census Persons	Males	Females
	1	2	3	4
A)	Last residence within the State of Enumeration	599,494 96.4	199,009 95.0	400,485 97.0
i)	Last residence elsewhere in the district of enumeration	385,097 61.9	130,505 62.3	254,592 61.7
ii)	Last residence in other district of Maharashtra	214,397 34.5	68,504 32.7	145,893 35.3
B)	Last residence in other States/UTs	21,354 3.4	9,833 4.7	11,521 2.8
C)	Last residence in other Countries	1,345 0.2	606 0.3	739 0.2
D)	Unclassifiable	0 0.0	0 0.0	0 0.0
	Total migrants :	**622,193** **100.0**	**209,448** **100.0**	**412,745** **100.0**

In Akola district there are 622,193 migrants comprising 209,448 males and 412,745 females. The migrants of this district constitute 38.2 percent of total population. Male and female migrants constitute 24.9 and 52.3 percent respectively.

From the distribution of total migrants in Maharashtra by place of last residence, it can be clearly seen that females predominate in intradistrict and interdistrict migration while male predominate in interstate and international migration. In Akola district females predominate in all streams.

The number of migrants by last residence from other States of India is 7,313,139. It is seen that 17.5 per cent of the total migrants are from other states. In case of Akola district 21,354 (3.4 percent) of total migrants are from other states.

ANNEXURE IV (vii)
Inter State Migrants to Maharashtra

Serial number	Place of Last residence	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
1	Andhra Pradesh	431,774	5.9
2	Bihar	361,351	4.9
3	Gujarat	849,045	11.6
4	Karnataka	1,165,351	15.9
5	Kerala	258,952	3.5
6	Madhya Pradesh	589,745	8.1
7	Rajasthan	431,190	5.9
8	Tamil Nadu	249,989	3.4
9	Uttar Pradesh	2,072,193	28.3
	Total for Nine States	6,409,590	87.6
	Other States	903,549	12.4
	Total	**7,313,139**	**100.0**

In Maharashtra, 9 states viz., Uttar Pradesh, Karnataka, Gujarat, Madhya Pradesh, Andhra Pradesh, Rajasthan, Bihar, Kerala and Tamil Nadu together account for 6,409,590 migrants (87.6 per cent) out of 7,313,139 interstate migrants.

ANNEXURE IV (viii)
Inter State Migrants to Akola

Serial number	Place of Last residence	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
1	Andhra Pradesh	1,343	6.3
2	Bihar	416	1.9
3	Chhatisgargh	2,405	11.3
4	Gujarat	2,097	9.8
5	Madhya Pradesh	7,638	35.8
6	Orissa	448	2.1
7	Rajasthan	2,100	9.8
8	Uttar Pradesh	2,906	13.6
9	West Bengal	543	2.5
	Total for Nine States	19,896	93.2
	Other States	1,458	6.8
	Total	**21,354**	**100.0**

In respect of Akola district out of 21,354 interstate migrants Madhya Pradesh accounts for 35.8 per cent and Uttar Pradesh accounts for 13.6 per cent.

Rural – Urban Components Of Migration

The flow of migrants would consist of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these various streams in case of migrants is classified by place of last residence. It presents data only in relation to internal migrants. The data for Akola district is presented separately.

ANNEXURE IV (ix)

Source: Table C-9 of Part IV-(B)(ii), Religion, 1991 Census

* Washim district was included in undivided Akola district in 1991

The distribution of religions by rural and urban areas of the district shows that about 62.8 per cent of the population is reported their religion as Hindu (66.8 per cent in rural and 56.5 per cent in urban areas). Muslim account for 10.9 percent in rural areas and 29.9 per cent in urban areas. Buddhist are 21.9 percent in rural areas and 11.7 per cent in urban areas. Christian, Sikh and Jain are found numerous in urban areas. Since in 1991 Washim district was included in undivided Akola district, the comparison has not been attempted.

Source: Table C-2 2001 census, Table C-1 of Part IV-A 1991 census.

*Washim district was included in undivided Akola district in 1991 census..

During the 1991-2001 decade in Maharashtra state, the proportion of never married has decreased both for males and females, the proportions of married, widowed and divorced/separated has increased both for males and females (except widowed males).

The proportion of never married in age group 0-14 and 15-34 has increased in males and females while the proportion of married in the same age group has decreased in males and females.

Since in 1991 Washim district was included in undivided Akola district, the comparison has not been attempted.

Note: # The 1991 Census could not be conducted in 33 villages of Akkalkuwa and Akrani C.D. Blocks of Dhule District. The population of these villages (Persons 16,052 Male 8,200 and Females 7,852) has been obtained from secondary sources and included in the population of district and Maharashtra. However, further details are not available.

* Washim district was included in undivided Akola district in 1991

When compared to 1991 data, it is found that during the last decade the literacy rate of the state has jumped from 64.9 percent to 76.9 percent. Since in 1991 Washim district was included in undivided Akola district, the comparison has not been attempted.

Source : Table 31 of Maharashtra State District Profile, 1991.

* Washim district was included in undivided Akola district in 1991

Marathi is the main language of the district and is spoken by 71.2 per cent of the district population. In rural areas Marathi speakers account for 82.0 per cent whereas in urban areas 54.0 per cent. Urdu is the second largest language spoken in the district. It accounts for

16.6 per cent of the total population. The proportion of Urdu speakers is higher in urban areas (28.1 per cent) than the rural areas (9.4 per cent). The third largest language spoken in the district is Hindi, its percentage to the total population is 5.5 and mainly spoken in urban areas by 9.8 per cent, whereas it is 2.8 per cent in rural areas.

The speakers of the minority languages viz., Gujarati, Marwari, Sindhi and Telugu are mainly concentrated in urban areas and the remaining two languages (Banjari and Korku) are concentrated in rural areas of the district.

Since in 1991 Washim district was included in undivided Akola district, the comparison has not been attempted.
