PREFACE

In this volume, I present *D Series*—Migration Tables D-I to D-V of Madras State. The remaining Table D-VI will be found in Part II C-(II)-ii. A detailed discussion on these tables will be found in my General Report on Madras State.

P. K. NAMBIAR.

PRELIMINARY NOTE

The **D** Series tables presented in this volume contain data on the following characteristics of migrants:

(1) Birth place.

(2) Rural and urban classification of the birth place.

(3) Duration of residence.

(4) Nationality.

(5) Classification of migrants (less than five years) by age groups.

(6) Migrants to cities classified by age, literacy and non-workers.

(7) Industrial categories of workers and non-workers.

Migration is an important factor which helps us in understanding the demographic trends. It can be of two types- internal migration and international migration. Of these, internal migration is a more important factor in a country like India. The question on place of birth has, therefore, been included in the 1961 Census. Along with this, the duration of the residence and the rural or urban nature of the place of birth have also been elicited. The nationality of the person enumerated has also been ascertained. The questions relating to the migration and the instructions issued for enumeration of correct particulars are reproduced as Appendix to this note.

In the past Censuses, as much importance has not been given to migration as in 1961. In 1881 its scope was confined to finding out the name of the district if the person was born inside the Province, the name of the district and Province or State if the person was born outside the Province and the name of the country or the State if the person was born outside India. The instructions given to the enumerators read as follows:

" Enter the name of the district where the person was born and add the name of the Province if he or she was not born in the Province in which his or her name was recorded. If the person was born outside India, the country will be named. No further detail is needed "

The scope of enquiry remained unchanged till 1951 when a separate question on Nationality was added. Till then the Nationality was presumed to be identical with the country of birth. Another change made in 1951 was the inclusion of the question on displaced personnel from Pakistan and the year of their arrival in India. Its aim was to find out the number of refugees and displaced persons who moved into India from Pakistan.

On the basis of the data collected during previous Censuses, it was not possible to study the quantum of migration which took place from decade to decade. So, a question on the duration of residence has been introduced in 1961 Census. It will help us in analysing migration trends. The birth place has also been classified as rural or urban. It will help us to understand the nature of the rural-urban migration and urban-rural migration. Thus the scope of enquiry on migration has been significantly widened during this Census.

Tables: 6 tables have been prepared and presented in this volume:

Table D I	..	Non-Indian Nationals.
Table D II	...	Place of birth.
Table D III	.	Migrants classified by places of birth and duration of residence in place of enumeration.
Table D IV	...	Migrants to cities classified by sex, broad age groups, educational levels and in the case of workers by occupational groups

Table D V	... Cities showing population born locally, migrants from rural areas and migrants from other towns and cities.
Table D VI	... Distribution of industrial categories of workers and non-workers by place of birth.

In the first three Censuses of 1871, 1881 and 1891 only one table was prepared. It indicated the total number of migrants from each place of birth or the region into which the places of birth were grouped. This gave, only the information on the total number of male and female migrants and nothing more.

In 1901, two tables were prepared. The first was a repetition of the table prepared in the earlier Censuses. The second was a table on cities with a population of 50,000 and more. No information except the total number of male and female migrants was, however, given in these tables. This pattern was followed till 1931 except for minor variations in grouping of the places of birth. In 1941 no table was prepared. In 1951 the following three tables were prepared: (1) on foreign nationals, (2) on the migrants classified by the places of birth and (3) displaced persons from Pakistan. The first two tables prepared in 1951 would correspond to table D I and D II of this volume. No separate table on cities was prepared in 1951.

In the earlier Censuses upto 1931, birth places of migrants were classified as follows:

(1) District or Feudatory States within the Province.

(2) Provinces or Feudatory States in India beyond the Province of birth.

(3) Countries in Asia beyond India.

(4) Countries in Europe.

(5) Countries in Africa.

(6) Countries in America.

(7) Countries in Australia.

(8) Persons born at sea.

(9) Unrecognisable and

(10) Not returned.

Under each category, the British dominions and others were shown separately. Till 1921, the districts in the Province of enumeration were shown separately. Later they have been grouped together and shown as "other districts of the Province". The migrants from the native States were, however, shown separately till 1931. The birth places outside the Province of enumeration were classified as follows in the earlier Censuses.

(1) The British territory

(2) Feudatory States.

(3) French Settlements

(4) Portugese Settlements and

(5) Other places inside India.

This classification was modified in 1951 as follows:

(1) District of enumeration

(2) Other districts within the State of enumeration

(3) States adjacent to the State of enumeration

(4) Other States in India and

(5) Elsewhere in India.

Important countries in the various continents were also listed separately. The other countries were grouped as elsewhere in that particular continent. In the Appendix to this table, the details of 'elsewhere' were also given. The table on displaced persons was prepared with a view to find out the quantum of refugees from Pakistan following the partition in 1947. Another table was also prepared on Nationality in which foreign nationals were classified.

In this Census, the tables on migrants and foreign nationals have been retained. *But the table on displaced* persons has been given up. A marked change in presentation is the classification of migrants based on the duration of residence and rural or urban nature of the birth place. Classification of birth places follows the pattern adopted in 1951.

APPENDIX

EXTRACT OF INSTRUCTIONS ISSUED

(4-*a*) **Birth Place** The following questions must be put to the persons enumerated in the order indicated below :

(i) Were you born in this Village or Town? If not, were you born in another Village or Town in this district?

(ii) If you were born outside the district, in which district were you born ?

(iii) If you were born in another State in India, in which district and State were you born ?

(iv) If you were born in another country outside India, in which country were you born ?

(v) If you were not born in any of these places were you born at Sea or in Air or in a Railway Carriage or in any other form of transport ?

The answer to any of these questions applicable to the individual should be recorded. These answers should be recorded as follows :

P.L.—This should be written for persons born in the village or town in which they are enumerated.

D.—This should be written for persons born in another village or town of the district in which enumerated.

For persons born in another district of the State, write the name of the district.

In the case of persons born in another State, write the district and the State in which he was born.

For persons born outside India the name of the country should be recorded.

If a person was born at Sea or in Air or in a Railway Carriage, or in a Vehicle put on the road, i.e., Bus, Cart, etc., the exact particulars may be entered.

(4*b*) **Whether birth place is Urban or Rural ?** First, you should see the answers recorded under question 4 (*a*) before you enter the answers against this question. If PL is written against question 4 (*a*), you may write 'R' if the place in which you are doing enumeration is a village or panchayat not treated as town and 'U' if the place of enumeration is treated as Urban. If you find any answer other than PL against question 4 (*a*) you should ask the person enumerated, the following questions :

(i) If you were not born in this village or town were you born in a Village or Town outside ?

(ii) Is the place where you were born considered a Village or Town ?

The answers to these questions should be recorded either as R or U according to whether the place of birth happens to be a Village or Town. If, however, the person enumerated is not in a position to say whether his place of birth is a village or town, write the name of the place of birth as returned by him.

(4-*c*) **Duration of Residence** You are required to fill in the number of completed years a person has spent in the Village, Town or City of enumeration. The period of temporary absence spent outside on leave, holiday, tour or business need not be taken into account. If the answer you have recorded in question 4(*a*) is PL, you write 'X' against this question also. In other words, for all persons born in a village or Town or City in which enumerated you have to write 'X'. If the person was born in another Village or Town or City of the district of enumeration or was not born in the district of enumeration, you have to ask him the question "If you were not born in this Village or Town, how long have you been residing in this Village or Town ?" The answer to this will be recorded against this question. In cases where the duration of residence is more than one year, the completed years of residence will be recorded and in the case of persons whose duration of residence is less than one year '**o**' will have to be recorded.

(5*a*) **Nationality** The nationality as disclosed by the person enumerated should be recorded. For Indian nationals write 'I' and for all others write the nationality in full.

TABLE D-I

NON-INDIAN NATIONALS

FLY LEAF

This presents the figures of non-Indian nationals classified according to their nationalities. Important countries in each continent are shown separately and nationals of the countries which have contributed insignificant numbers are grouped under 'elsewhere' in that continent. The details of these countries grouped under elsewhere have been furnished in Appendix to table D 1. This table corresponds to the Table D VI of 1951 Census except for the Appendix. Such an Appendix was prepared for the main table on migration D IV in 1951. But during this Census an Appendix has been added to the table on non-Indian nationals.

TABLE D-II

PLACE OF BIRTH

FLY LEAF

This gives the number of migrants in the State as a whole and in each of the districts of enumeration, classified by their places of birth. It also shows the number of foreign-born people in each district classified according to the countries of their birth. This corresponds to the table D IV of 1951 Census with one important modification that birth places and places of enumeration have been classified as rural and urban. A residual column of 'unclassifiable' has also been added to each birth place. This table will help us in studying the movement of migrants from rural to urban and *vice versa*.

TABLE D-III

MIGRANTS

Classified by place of birth and Duration of Residence in place of Enumeration

FLY LEAF

This presents figures of migrants classified by their places of birth and durations of residence in the places of enumeration. The places of birth have been grouped as follows :

(1) Born elsewhere in the district of enumeration

(2) Born outside the district of enumeration but within the State

(3) Born in other States of India

(4) Born in Nepal

(5) Born in Pakistan

(6) Born in other countries outside India

(7) Birth place unclassifiable

In the case of migrants from other districts of the State and other States of India, places of origin have been classified as rural, urban and unclassifiable. The figures for each of the other States in India have been presented separately. As regards migrants from other countries, those from the neighbouring countries of Nepal and Pakistan have been shown separately and others clubbed together. The durations of residence adopted are less than one year, one to five years, 6 to 10 years, 11 to 15 years, 16 years and over and ' period not stated '. This table will help us in studying migration trends noticed during definite periods of time.

TABLE D-IV

Migrants to Cities Classified by Sex, Broad Age Groups, Educational Levels and in case of Workers also by Occupational Divisions and Groups

FLY LEAF

This deals with the migrants to the nine cities of Madras State which have a population of more than one lakh. Migrants have been classified according to broad age groups, educational levels and occupational divisions and groups (in the case of workers). It helps us to study the pattern of migration to the cities. Detailed educational qualifications have been given. Table D-IV also gives the cross classification of non-workers by age groups and educational levels.

TABLE D-V

Cities showing the population Born locally, Migrants from Rural areas and Migrants from other Towns and Cities.

FLY LEAF

Like D-IV, this presents the migrants to the nine big cities of Madras State. They are first classified broadly as migrants from rural and urban areas. Rural and urban migrants are further classified according to their places of origin as follows :

(1) Migrants from the other areas of the district of enumeration

(2) Migrants from other districts of the State of enumeration and

(3) Migrants from outside the State.

Then migrants from each of these places of origin are further classified according to their duration of residence in the City. They have been classified as people residing in the City for less than 3 years and more than 3 years.
