MOTIF

Amba Mata Mandir

The Temple of Amba Mata is situated in the heart of Amravati city. A big old gate on the road leading to the temple is named as “Amba gate”. This temple is believed have been constructed in the time of Mahabharat though most of the present construction is said to have been completed in last two centuries, particularly in the year 1856.

The main gate as well as the entrance to the shrine faces the east. The shrine has two more doors, in the north and in the south. The door facing the south is used as exit. The ‘Kalas’ on the shrine is gold plated. A Shiva Linga is installed in the shrine in the north.

The fair of Amba Mata is held at Amravati is one of the biggest fairs of the district. It is held in the month of Ashvina, for 10 days from Ashvina Sud. 1 to Ashvina Sud. 10. The pilgrims, mostly from Amravati and adjoining districts, attend this fair.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organisation is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective Collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organisation that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognised as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included viz. information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as banks, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided.. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of Primary and Middle school and College (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit Societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorates were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of the District

The name of the district is taken from the name of the district headquarters town. The name Amravati meaning the abode of immortals may be traced from its association with Lord Krishna. The history of the Amravati district which contains both the ancient and the modern capitals of Berar, is to a great extent that of the province itself.

Berar is first mentioned under the name of Vidarbha, in Maharashtra, one of the two great epics of the Hindus. The early history of the district is vague and fragmentary. Berar formed part of the empire of Ashoka Maurya who reigned from 272 to 231 B.C. The region experienced Hindu and Muhammandan periods and went through rules of different dynasties.

In 1833 the district, with the rest of Berar was assigned to the East India Company in satisfaction of the debt and for the future security. The province was divided into two districts, south Berar (Balaghat) with its headquarters at Hingoli and North Berar with headquarters at Buldana. North Berar included the present Amravati district, the northern half of Akola and part of Buldana. Subsequently, North Berar was reconstituted into East Berar with headquarters at Amravati and West Berar with headquarters at Akola. A new district of Ellichpur (Achalpur) was created in 1857 by separating three tahsils of Ellichpur, Melghat and Daryapur from East Berar district.

In 1864, Yavatmal district, at first called the south-east Berar and later the Wani district, was separated from Amravati and in 1867 the Ellichpur district, which at first included the tahsil of Morshi, subsequently restored to Amravati, was formed. In 1903 the treaties of Assignment were superseded by an agreement under which the Nizam leased Berar to the Governement of India in perpetuity in return for annual rent of twenty five lakhs. However, it was decided that on the first day of every January, the Nizam's flag would be unfurled at Amravati and would be given a salutation by the cannons from the British Army. In 1905, when the districts of the province were redistributed, Ellichpur (Achalpur) district was again amalgamated with Amravati, while the Murtijapur taluk was transferred from Amravati to Akola.

There were no major changes in the boundaries of the district or its tahsil between 1911 to 1955. The reorganisation of States took place in the year 1956 when the district was transferred from Madhya Pradesh to Bombay State. The district forms a part of Maharashtra since 1st May 1960.

At the time of 1961 Census this district was divided into 6 tahsils comprising 1968 villages including 359 uninhabited villages and 13 towns. The number of tahsils (6) and towns (13) remained unchanged in 1971 Census. For 1981 Census there was no change in the number of tahsils but number of towns was reduced from 13 in 1971 to 12 in 1981. During 1981-91, 7 new tahsils were created from the 6 tahsils existing in 1981 and in all there are 13 tahsils in Amravati districts in 1991. The number of towns reduced from 12 in 1981 to 11 in 1991 because of merger of Badnera Municipality into Amaravati Municipal Corporation. The number of villages have also come down from 1999 in 1981 to 1996 in 1991.

During 1991-2001 The number of towns (11) remained unchanged one new tahsil (Dhamangaon-

Railway) was created. Thus the total number of tahsils rose from 13 to 14 in census 2001. The number of villages also come up from 1996 in 1991 to 2002 (including 323 uninhabited villages) in census 2001.

(iii) Administrative Set-Up

There were Major changes in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Greater Bombay district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts viz. Nandurbar, Washim, Hingoli and Gondiya districts were formed bifurcating, Dhule, Akola, Parbhani and Bhandara districts respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts has Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division has 6 districts. Amravati district is included in Amravati division. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Thus Amaravati district has 11 towns and 14 tahsils with 2002 villages spread over Amravati (130), Morshi (166), Warud (140), Teosa (94), Chandur-Railway (92), Nandgaon-Khandeshwar (161), Bhatkuli (137), Daryapur (150), Anjangaon Surji (127), Dharni (156), Chikhaldara (197), Achalpur (170), Chandurbazar (170) and Dhamangaon-Railway (112) tahsils. The following statement indicates the changes, which occurred after 1991 census in the number of villages towns in each tahsil and also the reasons for variation in brief.

For administrative purposes the district is divided into 6 sub-divisions viz., Amravati, Achalpur, Morshi, Daryapur, Chandur Railway and Dharni. The Amravati sub-division includes Amravati, Bhatkuli and Nandgaon-Khandeshwar tahsils, Achalpur sub-division includes Achalpur and Chandur Bazar tahsils, Morshi sub-division includes Morshi and Warud tahsils, Daryapur sub-division includes Daryapur and Anjangaon-Surji tahsils, Chandur- Railway sub-division includes Chandur-Railway, Teosa and Dhamangaon-Railway tahsils and Dharni sub-division includes Dharni and Chikhaldara tahsils. The District Collector alongwith the District Judge, Superintendent of police, Chief Executive Officer of Zilla Parishad and other senior officers of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for delopment and regulatory functions. The Municipal Commissioner is overall authority looking after the civic affairs of the Municipal Corporation including health, sanitation supply of safe drinking water to the citizens and taking preventive measures for the outbreak of epidemics, he is assisted in his day to day functioning by Deputy Commissioners assigned to various zones in the city.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats :

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The Gram Panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by

Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad
b) Panchayat Samitis
c) The Standing Committee
d) The Subjects Committees
e) Presiding authorities
f) The Chief Executive Officer
g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are contonments, Municipallties or Municipal Corporations. The urban local bodies elects a councillor from each of the ward and his term is five years. The President of the Municipal council or the Mayor of the Corportion and there deputy are elected from amongst elected councillors. The chairman of various committees are also elected from amongst elected councillors.Although for day to day administration the chief officer is responsible in a Municipal council, he works under the administrative control of the President of Municipal Council. In corporation a senior I.A.S. officer is deputed by state Government as Municipal Commissioner who is responsible for day to day administration and executive authority lies in him.

(iv) Physical features

Location and Size

Amravati district is situated right in the centre of the northern border of Maharashtra state. It lies between 20°30' and 21° 50' north latitudes and 76° 35' and 78° 27' east longitudes. It is bounded in the north by Madhya Pradesh state, in the east by Nagpur and Wardha districts, in the south by Yavatmal and in the west by Washim, Akola and Buldana districts. The district headquarters is located at Amravati, town with a population of 549,510 persons. It has been known as principal cotton market. The main central railway line passes through Badnera in the southern portion of the city and a branch line runs north to Amravati, 9.65 kms. away. The national highway, NH 6 also passes through Amravati.

The district has an area of 12,210.0 sq.kms. and a population of 2,607,160 persons as per Census 2001. While the area of the district accounts for 4.0 percent of the total area of the State, the districts population constitutes 2.7 percent of the total population of the State. The density of population is 214 persons per sq. km. Among the 35 districts of the State, the district ranks 7th in terms of area, 14th in terms of population and 24th in terms of density.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1) The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Amravati district occupies the extreme northeastern part of the Tapi-Purna Valley, the micro level division of Deccan Plateau. On the basis of relief, the district can be grouped into three parts i.e.

1) Gawilgarh Hills, 2) Chandur Uplands, and 3) The Plain or 'Payinghat', which can be further divided as a) The Tapi Valley, b) The Purna Basin, and c) The Wardha-Bembla Plain.

The Gawilgarh hills are the offshoots of the Satpura Range and cover Chikhaldara tahsil, eastern part of Dharni and the northern fringe of Anjangaon Surji and Achalpur tahsils. These hills are badly eroded and dissected by numerous streams, which originate in the central part of the hills. The crests of the range attain an average elevation of about 1000 meters, the highest point being Vairat at 1177 meters. The hills are fairly covered by dense mixed jungle, mainly teak. These are mainly reserved forests. Chikhaldara is a hill resort in the area developed by the State Government.

Chandur Upland is comprised of parts of Teosa, Amravati and Chandur Railway tahsils. The region attains a height of about 350 to 450 meters and has been dissected by numerous streams resulting in an uneven surface. The region is fairly covered with forests, mainly teak. These forests are reserved forests.

The Plain or 'Payinghat' is divided into three divisions as per their drainage systems. A) The Tapi Valley occupies a small portion of Dharni tahsil at the northwestern corner of the district. It varies a height varying between 300 to 400 meters above mean sea level and slopes towards the southwest. The surface of the area is uneven and it is partly covered with forests. It is a piedmont belt of light and medium black soils with abundant ground water.

B) The Purna Basin occupies the middle part of the district and spreads over Anjangaon Surji, Daryapur, Bhatkuli, Achalpur and Chandur Bazar tahsils and also the western parts of Amravati and Morshi tahsils. It is the upper part of the Tapi River basin and has an elevation varying between 250 meters in the south and 400 meters in the north. This basin gradually slopes towards the south and the surface is relatively smooth. The rich black soil found in this region is locally known as 'Aval Kali', 'Chikan' and 'Gao Ran'.

C) The Wardha-Bembla Plain spreads over Warud, major parts of Morshi, eastern parts of Teosa and Dattapur Dhamangaon tahsils and southern parts of Nandgaon Khandeshwar and Chandur Railway tahsils. This region attains a height of above 300 meters. In the north, in Warud, this height reaches 450 meters. The plain gently slopes towards southeast and has relatively a smooth surface. It has deep and fertile black soils adjoining the Wardha river.

Drainage

The main river of the district is the Purna, which rises in the southern slopes of the Gawaligaih hills and flows in a general south-westerly direction till it turns westwards and form a part of the district boundary between Amravati and Akola. Pedhi, Arna, Chandrabhaga and Shahanur are important tributaries of the Purna. The Wardha river rises to the east of Multai in Madhya Pradesh. It froms the eastern boundary of the district and receives a number of short tributaries on its right flowing within the district. Maru, Pak Nala, Narha and Chargar are the more important tributaries that join Wardha river within the district. The Tapi flows along the northwest boundary of the district. Khursi, Khardu, Sipna Garga, Dewal and Dhulghat are its tributaries.

Climate

The climate of the district is characterised by a hot summer and general dryness throughout the year except during the monsoon season. The year may be divided into four seasons. The winter is from December to February, which is followed by the summer season from March to May. The south-west monsoon season is from June to September and the post monsoon season being October and November.

The climate of the Melghat hilly region, consisting of Melghat and Chikhaldara tahsil is entirely different from the plains. The climate is cold and the region receives heavy rain during the south-west monsoon. In the plains the summer heat is severe during the day. With the outset of monsoons, the temperature falls and the weather becomes pleasant. With the withdrawal of the monsoons, day temperatures increase slightly, however, night temperatures progressively decrease. After October both day and night temperatures decrease progressively till December, which is the coldest month. Temperatures rise rapidly from February till May which is the hottest month. In association with the western disturbance,

which moves across North India in winter, temperatures may drop to 5 to 6 degrees Celsius.

The average annual rainfall in the plains is 877.4 mm while at Chikhaldara, a hill stations, it is about twice as much. The rainfall generally increases from southwest to north-east. The rainfall received during the southwest monsoon, constitutes about 85 percent of the annual rainfall. July is the rainiest month of the year. The variation in rainfall from year to year in the district is large.

Except during the monsoon and the latter part of summer the winds are generally light to moderate. In association with monsoon depressions which originate in the Bay of Bengal the district experiences strong winds and widespread heavy rain. Thunder stroms occur in all seasons, their frequency being least from November to January.

Natural Wealth

Minerals

So far no deposit of any important minerals have been traced in the district. However sedimentary clay that is used for manufacturing potteries, earthen wares, bricks, stoneware, pipes etc, are found at certain places in the district. The mining activities so far are restricted only to quarrying of stones, clay, sand gravel etc. Apart from the extensive spread of Purna alluvium, much of the district is covered by Deccan Traps though Hamenta, Gondwana and other metamorphic rocks occur as minor inliers in the northern part of the district.

Trap being hard, dense and durable is most suitable for bulding purposes but is barren of any important minerals. Secondary minerals like Zeolites chalcedony and agate are however found.

Fisheries

Fishing activities in the district are restricted to inland water of rivers, tanks and ponds, which is inadequate for the development of fishing industry. The important varieties of fish such as Botri Chela, Dhadkya, Gane, Katva, Kolus, Murrol, Padhan, Poshi, Zinga etc. are found in river, ponds and tanks in the district.

Soil and Cropping Pattern

Decomposition of the Deccan traps has given rise to either deep brown to rich red or black cotton soils (regur). The regur is rich in plant nutrients such as lime, manganese and low in Nitrogen and phosphorus.

The soils of the district are mainly derived from the deccan trap and may be classified into three broad types. Shallow soils are found in the hilly regions near the foot of the hills, the soils are coarse and redish in colour, being derived from the debris washed from above. The fertility of the soils is low but they respond to the application of fertilizers. Jowar is the main crop grown.

Beyond this belt medium deep soils are found which are extensive and fairly fertile. They are well drained and respond readily to irrigation. Oranges, Plantains, Chillies and grapes are the main crops. There is also a mixed cropping of Jowar with black-gram or green gram or sometimes chillies are mixed with Cambodia cotton. Further away from the Satpudas the depth of the soils increases and there are abundant crops of cotton, Jowar and Wheat. The deep soils of the district are mainly found in the river valleys of Purna and Wardha and are known for their high production of cotton. Amravati is one of the major cotton-producing districts of Maharashtra.

Land and Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19 – 23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigation by Source and Uninrrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more

than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise break-up of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing no. of Livestock (Position as on 15th Oct. 1997).

1)	Total Cross bred/Indigenous Cattle	591,171
2)	Total Buffaloes	128,131
3)	Total Goats	320,747
4)	Total Sheep	23,948
5)	Total Pigs	12,652
6)	Total Equine	8,738
7)	Total Camels	240
8)	Total Rabbits	243
9)	Total Livestock (excluding dogs)	1,085,870
10)	Total Poultry (including Ducks)	326,741

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,085,870 and total poultry (including ducks) are 326,741 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 591,171, total buffaloes are 128,131, goats 320,747, sheep 23,948, pigs 12,652, equine 8,738, camels 240 and rabbits are 243.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	89
2)	Average Livestock per village	646
3)	No. of livestock per thousand human population	493
4)	No. of in-Milk cows per thous and human population	41
5)	No. of in-Milk buffaloes per thousand human population	20
6)	No. of poultry fowls per thousand human population	149
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	24
8)	No. of tractors per thousand hectares of gross cropped area	2
9)	No. of Veterinary Institute per lakh livestock	15

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 89 while average livestock per village is 646 For every thousand human population there are 493 livestock, 41 in-milk cows, 20 in-milk buffaloes and 149 poultry fowls. While there are 24 bullocks and male buffaloes per hundred hectares of gross cropped area and 2 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 15.

Industry

Industrially, Maharashtra is one of the advanced state in the country. Availability of rail, road, transport, water and electricity have contributed in the development of various types of industries in the district. There are some large scale industries and a number of small scale industries running in the district. Principal crops being cotton and oil seeds, Most of large scale factories in the district, Pertain to cotton processing and oil crushing.

The industrial policy of the state is based on the basic decision to encourage industries in the developing and under developed areas in the district and to disperse industries from the heavily congested areas of Mumbai. Thane and Pune MIDC has started to develop the sites for setting up of industries in the district.

Cotton is grown extensively in the district. This has therefore, facilited the establishment of a number of cotton ginning pressing units. Most of the large scale factories in the district are of cotton processing and oil crushing. There are mainly located in Achalpur, Amravati, Anjangaon Surji, Daryapur Banosa and

Warud tahsils. There are number of small scale units manufacturing oil and oil cakes mills located at Amravati, Badnera and Dhamangaon, Tiles, leather shoes, cotton thread, country tiles, bricks, turmeric powder and edible oil.

Trade and Commerce

The district is famous for orange fruit plantation. There is a great demand for oranges from the district of Maharashtra as well as from out side state. Amravati district cotton market is supposed to be the biggest cotton market in Asia. It exports cotton both in row and processed forms. The other chief exports of the district are cotton bales, wooden furniture, chilli, silk, tur-dal, food grains, jowar, groundnut, edible oils and kumkum. In addition timber from Paratwada depot is sent all over the country. Most of goods are exported Mumbai, Pune and Madras.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles
	1	2
1	Buses	715
2	Cars & Station Wagons	3,335
3	Jeeps	2,739
4	Taxies	284
5	Autorickshaws	7,301
6	Mopeds	43,059
7	Scooters	26,744
8	Motor Cycles	21,952
9	Total Goods Vehicles	4,864
10	Tractors	3,873
11	Trailors	3,485
12	Others	89
	Total	**118,440**

It may be seen that the district had Moped 43,059, Scooters 26,744 and 21,952 Motorcycles. There are 715 Buses, 3,335 Cars and Station Wagons, 2,739 Jeeps, 284 Taxies and 7,301 Autorishaws, 89 other modes of transport. The district also had 3,873 Tractors and 3,485 Trailors as means of transport.

Electricity & Power supply

All the 11 towns, out of total 1,679 villages of them 1,629 (97.0 percent) the power supply facility.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide

and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same

purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously :

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the

minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc.,

and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population.}} \times 1,000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1,000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

Number of deaths in a particular age-group

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. / Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs.

March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic of each individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

As per 2001 Census the district Amravati has a total population of 2,607,160 compirsing 1,345,614 males and 1,261,546 females. The population of the district in Census 2001 i.e. 18.5 percent higher than the district population 2,200,057 in 1991 Census. Amravati tahsil is most populous with a population of 678,192. As much as 26.8 percent of the population is concentrated in tahsil Amravati. Other tahsils in order of population size are Dharni (147,086), Chikhaldara (95,561), Anjangaon Surji (150,384), Achalpur (252,513), Chandur Bazar (190,179), Morshi (170,891), Warud (211,113), Teosa (98,071), Amravati (678,192), Bhatkuli (108,623), Daryapur (162,230), Nandgaon Khandeshwar (124,604), Chandur Railway (90,645) and Dhamangaon Railway (127,068).

An examination of rural-urban distribution of population reveals that 1,707,581 persons constituting 15.1 percent of the total population concentrated in rural areas, while 899,579 persons 25.4 percent are living in urban areas of the district. Although in absolute numbers, the number of people living in rural areas has 1,482,928 in 1991 to 1,707,581 in 2001 in terms of percentage decreased from 67.4 percent in 1991 to 65.5 percent in Census 2001.

The tahsilwise urban population percentage Dharni, Teosa, Bhatkuli and Nandgaon-khandeshwar has no urban population. Amravati 81.0 percent, Achalpur 42.5 percent, Anjangaon Surji 34.0 percent, Warud 29.4 percent, Daryapur 21.2 percent, Chandur Railway 19.5 percent, Morshi 19.7 percent, Dhamangaon Railway 16.9 percent, Chandur Bazar 9.3 percent and Chikhaldara 4.9 urban population respectively the percentage of urban population increased by nearly 2 point during 1991-2001.

The average growth rates for the rural and urban areas of the district 15.1 percent and 25.4 percent respectively. In rural areas Dharni tahsil has registered the highest rural growth rate (29.6 percent), while Chandur Railway has the lowest growth rate of 6.7 percent. The tahsil of Dharni (29.6 percent), Chikhaldara (24.4 percent), Achalpur (26.1) and Chandur Bazar (17.7 percent) are above the district average (15.1 percent) remaining ten tahsils below the district average viz. Anjangaon Surji, Morshi, Warud, Teosa, Amravati, Bhatkuli, Daryapur, Nandgaon Khandeshwar, Chandur Railway and Dhamangaon Railway respectively.

In urban areas the growth rate is above the district average in 3 tahsils, Chikhaldara (52.9 percent), Warud (34.6 percent) and Amravati (30.3 percent). Remaining seven tahsils below the district average viz. Anjangaon Surji, Achalpur, Chandur Bazar, Morshi, Daryapur, Chandur Railway and Dhamangaon Railway respectively, four tahsils have no urban areas at all.

The percentage of urban population to total population is an indicator of the level of urbanisation of an area Amravati is most urbanised tahsil with 81.0 percent population being urban followed by Achalpur (42.5percent), Anjangaon Surji (34.0) and Warud tahsil (29.4percent). While Chikhaldara and Chandurbazar are least urbanised tahsil (4.9 percent) and (9.3 percent) respectively. Morshi tahsil has 19.7 percent, Daryapur tahsil has 21.2 percent, Chandur Railway tahsil has 19.5 percent and and Dhamgaon Railway tahsil has 16.9 percent urban population to total population in the district.

The proportion of urban to total population of Amravati district stood at 34.5 percent in Census 2001. Corresponding against 32.6 percent in 1991

Census. It is observed that proportion of urban population has increased in seven tahsils, Chikhaldara (4.9percent), Anjangaon Surji (34.0percent), Chandurbazar (9.3percent), Morshi (19.7 percent), Warud (29.4percent), Amravati (81.0 percent) and Chandur Railway (19.5 percent). While slightly decreased Achalpur (42.5percent), Daryapur (21.2 percent) and Dhamangaon Railway (16.9 percent). Dharni, Teosa, Bhatkuli and Nandgaon Khandeshwar tahsils do not have urban population.

Percentages are given in brackets.

Table 2 gives the percentage distribution of inhabited villages by population ranges in each tahsil in 2001 Census.

Out of the 1,679 inhabited villages 285 (17.0 percent) are small sized with population below 200, in the size of 200-499 there are 411 (24.5percent)

villages, in the size class 500-999 there are 464 (27.6 percent), 355 (21.1 percent) are in the size class 1,000-1,999, 126 (7.5 percent) are in the size class 2,000-4,999, 25 (1.5 percent) villages are in the size class 5,000-9,999 and only 13 (0.8 percent) villages having population 10,000 and above. For a broader generalisation villages have been further group as small sized (below 500), Medium size (500-1,999), Large size (2,000-4,999) and exceptionally large sized (5,000+), within the district small sized villages less than 500 inhabitants together account for 41.5 percent of the total inhabited villages, 9.9 percent of the rural population of the district. Medium sized (500-1,999) contribute 48.7 percent of the total inhabited villages of the rural population, Large sized (2,000-4,999) are 7.5 percent of total inhabited villages with 21.5 percent of rural population and exceptionally Large sized (5,000+) are 2.3 percent of the total inhabited villages and 20.5 percent of the total rural population.

Within fourteen tahsils of the district, percentage of less than 200 sized villages is the highest in Morshi CD Block (27.4percent) and the lowest in Dharni CD Block (2.6 percent). The percentage of 200-499 sized villages in higher in Chikhaldara CD Block (48.2 percent) and lowest in Morshi CD Block (12.4 percent) in 500-999 sized villages is highest in Dharni CD Block (48.7 percent) and lower in Warud CD Block (18.3 percent) in 1,000-1,999 sized villages is higher in Dhamangaon Railway CD Block (35.7 percent) and lower in Chilkhadara CD Block (11.3 percent), in 2,000-4,999 sized villages in higher in Morshi CD Block (13.3 percent) and lower in Chikhaldara CD Block (0.6 percent), in 5,000-9,999 size class villages is higher in Chandurbazar CD Block (3.4 percent) and lower in Daryapur CD Block (0.7 percent). In 10000 and above size villages is higher in Teosa CD Block (2.8 percent) and lower in Dharni, Achalpur, Chandurbazar and Daryapur CD Blocks (0.7 percent) respectively.

(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

There are no new town, no denotified, no declassified and no wholly merged town in 2001 Census.

The distribution of villages by density ranges indicates that inhabited villages have medium densities in ranges 101 to 300, 57.7 of the total low densities of less than 20 persons sq.km. are noticeable in 106 villages i.e. 6.3 percent of villages. At the same time there are only few villages that can be classified as having very high densities. While 4.7 percent of villages have a density of 501 and above persons per sq.kms 10.5 percent villages have density range 301 to 500 persons per sq.kms.

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and the State Census 2001 recorded a sex ratio of 938 females per 1,000 males in the district. This is higher compared to the State average (922). As regards total areas sex ratio at the State level declined by 56 points and at district level it declined by 22 points during the last 100 years. Similarly the sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased 27 points during 1901-2001 for the urban areas of the state the sex ratio increased by 11 points and also the district it in equal during the above period. (i.e. 1901-2001)

In Amravati district as a whole as well as its rural and urban areas there are 938 females for every thousand males. The sex ratio figures for rural and urban areas of Amravati District are 940 and 934 respectively. Within the district sex ratio varies from 962 in Dharni tahsil followed by Chikhaldara (952), Anjangaon Surji (932), Achalpur(932), Chandurbazar (932), Morshi (939), Warud (938), Teosa (938), Amravati (932), Bhatkuli (948), Daryapur(940), Nandgaon-Khandeshwar (942), Chandur Railway (936) and Dhamangaon Railway (938). The rural areas in general have 940 proportion of females and proportion of females in urban areas i.e. (934). Amravati District also confirms to this pattern. In rural areas 5 out of 14 tahsils namely Dharni, Chikhaldara, Bhatkuli, Daryapur and Nandgaon-Khandeshwar tahsils have higher sex ratios than the district rural average. Remaining 9 tahsils i.e. Anjangaon Surji, Achalpur, Chandurbazar, Morshi, Warud, Teosa, Amravati, Chandur Railway and Dhamangaon Railway have lower sex ratios than the district rural average. In urban areas in 934 sex ratio to district average. In the urban areas highest sex ratio is seen in Chandurbazar and lowest in Chikhaldara. Dharni, Teosa, Bhatkuli and Nandgaon-Khandeshwar do not have urban sex ratio.

Sex ratio (Rural) for District: 940

A persual of the table reveals that 392 villages constituting 23.3 percent of the total inhabited villages and covering 27.7 percent of total district rural population have sex ratio in the range of 950-999. While 513 villages forming 30.6 percent of total inhabited villages and covering 45.8 percent of total district rural population have sex ratio in the range of 900-949, 227 villages constituting 13.5 percent of the total inhabited villages and covering a 11.5 percent of total rural district population, has a sex ratio in the range of 850-899. The sex ratio for 90 villages (5.4 percent) is in the range of 1,100 and above and it covers only 1.7 percent of the district total rural population.

In 2001 Census recorded 34.8 percent of districts population as main workers 7.2 percent as marginal workers and the remaining 58.0 percent as non-workers.

Among 34.8 percent main workers males participation rate in the district 48.2 percent while that of females is 20.6 percent as per 2001 Census.

The percentage of main workers is highest in Warud tahsil (40.9 percent) and lowest in Amravati tahsil (28.7 percent). The sexwise break up shows that among males and females 5.6 and 8.8 percent marginal workers are respectively. It is seen that the percentage of females marginal workers is substantially higher than that of males. The percentage of marginal workers is highest in Dharni tahsil (15.5 percent) and the lowest in Amravati tahsil (3.6 percent).

According to 2001 Census 42.0 percent of population in the district in workers as main workers and marginal workers and remaining 58.0 percent persons are non-workers in the district.

In 2001 Census recorded 38.4 percent of the district population as main workers, 9.4 percent of as marginal workers and remaining 52.2 percent as non-workers. Among the main workers, males participation rate in the district 49.3 percent while that of females is 26.8 percent. The proportion of main workers is highest in Warud C.D. Block (43.3 percent) and lowest in Dharni C.D. Block (32.2 percent). The sexwise break up shows that among males and females 6.8 percent and 12.1 percent of the population respectively, are marginal workers. It is seen that the proportion of females marginal workers is substantially higher than that of males. The proportion of marginal workers is the highest in Chikhaldara C.D. Block (15.7 percent) and the lowest in Teosa C.D. Block (6.4 percent) among 14 C.D. Blocks of the district.

Non workers constitute 52.2 percent of the total population. Females non workers constitute 61.1 percent of their respective population. While 43.9 percent males are non workers. The highest proportion of (56.0 percent) of non workers is seen in Teosa C.D. Block, while the lowest percentage of non workers is in tahsil Chikhaldara (48.7 percent).

In Census 2001 recorded 28.0 percent of the district urban population as main workers, 3.0 percent as marginal workers and the remaining 68.9 percent as non-workers. The sex wise break up shows that among males and females 46.0 percent and 8.8 percent of the population are main workers, 3.4 percent males and 2.7 percent females are marginal workers, 50.6 and 88.6 percent males and females respectively as non workers.

In urban areas Shendurjana (MCl) has the highest participation rate of 37.5 percent while Amravati (M.Corp.) has the lowest rate of 26.8 percent main workers in the district urban areas. Anjangaon (MCl) (29.6 percent), Chandurbazar (MCl) (29.5 percent),

Morshi (MCl) (30.0 percent), Warud (MCl) (33.9 percent), Shendurjana (MCl) (37.5 percent), Daryapur Banosa (MCl) (29.3 percent), Chandur (MCl) (29.8 percent) and Dattapur Dhamangaon (MCl) (28.9 percent) is above the percentage of main workers in the district urban average (28.0 percent), while Chikhaldara (MCl) (27.9 percent), Amravati (M.Corp.) (26.8 percent) and Achalpur (MCl) (27.8 percent) has main workers percentage below the district urban average.

The percentage of marginal workers is the highest in Chandur (MCl) (5.6 percent) and the lowest Chikhaldara (MCl) (1.7 percent). The work participation rate for marginal workers in urban areas for the district is 3.0 percent only. Eight towns namely Anjangaon (MCl) (4.3 percent), Achalpur (MCl) (4.1 percent), Chandurbazar (MCl) (5.0 percent), Morshi (MCl) (5.2 percent), Warud (MCl) (4.3 percent), Shendurjana (MCl) (4.4 percent), Daryapur Banosa (MCl) (3.6 percent) and Chandur (MCl) (5.6 percent), have participation rate of marginal workers above the district urban average and Chikhaldara (MCl) (1.7 percent), Amravati (M.Corp) (2.3 percent) and Dattapur Dhamangaon (MCl) (2.9 percent) has work participation rate below to the district urban average i.e. 3.0 percent.

Note: Percentage of Workers to total workers are given in brackets.

The relative importance of the main shares of economic activity may be gauged from the pattern of distribution of workers according to the broad four-fold classification namely cultivators, Agricultural labourers, Household industry workers and other workers. The economy of the district is primarily agricultural which is supported by cultivator factor (19.1 percent) and Agricultural labourers (51.3 percent) together constitute 70.4 percent of the total workers in the district. The Agricultural sector has absorbed nearly 70.4 percent of the total workers in the district and remaining 29.6 percent of population engaged in household industry and other work.

The proportion of both cultivators and agricultural labourers differs considerably from tahsil to tahsil. The proportion of cultivators varies between 41.5 percent in Dharni tahsil to 5.7 percent in Amravati tahsil. The proportion of agricultural labourers varies between 70.2 percent in Bhatkuli tahsil to 20.5 percent in Amravati tahsil. Household Industry workers varies between 2.6 percent Amravati tahsil to 1.0 percent in Dharni and Daryapur tahsil and remaining other workers varies between 71.2 percent in Amravati tahsil to 11.6 percent in Nandgaon Khandeshwar tahsil.

Note: Percentage of Workers to total workers are given in brackets.

Table 35 indicates the distribution of workers by males and females by four categories in C.D Blocks, 2001 Census.

The cultivators 24.1 percent and agriculture labourers 62.8 percent together constitute 86.9 percent of the total workers of the district. The remaining 11.7 percent of workers are engaged in other workers. The proportion of other workers varies between 15.8 percent in Amravati C.D. Block and 8.0 percent in Anjangaon Surji C.D. Blocks. The Household Industry workers are 1.4 percent in the district.

The propotion of cultivators varies from 41.5 percent in Dharni C.D Block to 16.6 percent Bhatkuli in C.D Block. The proportion of agricultural labourers varies between 70.2 percent in Bhatkuli C.D Block and 44.8 percent in Dharni C.D Block. More than 86.9 percent of the workers in the district rural areas are directly engaged in agriculture as cultivators and agricultural labourers, which is but natural in context of the agricultural economy of the district.

It may be seen that 13.1 percent workers are engaged in work other than agriculture. Among them 1.4 percent are household industry workers and remaining 11.7 percent are other workers.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

Road whether "Pucca and Kuchcha" are the nerve system of a district. They act as factor for the development and upliftment of the areas. Roads with cement concrete black top, water bound macadam etc. come under pucca roads and the remaining are treated as Kuchcha roads.

Pucca road amenity is available to 1,475 villages (87.8 percent) out of 1,679 inhabited villages in the district. Among 14 C.D.Block in the district the proportion of villages with approach by pucca road is highest Dharni C.D. Block 151 villages (99.3 percent) and the lowest Amravati C.D. Block 82 villages (73.9 percent) of rural population 1665438 persons (97.5 percent) avails of the approach road amenity.

Of the 1,475 villages, 82 villages (82.0 percent) are at a distance of less than 5 kilometers from the nearest statutory town. 1,170 villages are at a distance of 5-50 kilometers to approach nearest statutory town by pucca road, 223 villages are at a distance of 51 and above kilometers beyond from a nearest statutory town.

The population of size 512 villages (73.6 percent) villages served by pucca road is in the range of 1-499, 446 (96.1 percent) villages the population is in the range of 500-999, 355 villages (100.0 percent) is in the range of 1000-1999, 124 villages (98.4 percent) in the range of 2000-4999, 25 villages (100.0 percent) in the range of 5000-9999 and 13 villages (100.0 percent) have population range from 10000 and above. It may be seen that smaller the population size the villages lesser in availability of amenity of pucca approach road. Larger the size of a village greater the chances of its having this amenity.

Power Supply

1,629 villages (97.0 percent) are having power supply amenity in the district. The power supply is available to the highest proportion of villages 120 (100.0 percent) in Warud C.D.Block, 72 villages (100.0 percent) in Teosa C.D. Block, 111 villages (100.0 percent) in Amravati C.D. Block, 110 villages (100.0 percent) in Bhatkuli C.D. Block and 84 villages (100.0 percent) in Dhamangaon Railway C.D. Block and lowest proportion of villages 132 (78.6 percent) in Chikhaldara C.D. Block.

While total cent percent population in Anjangaon Surji C.D Block, Warud C.D Block, Teosa C.D Block, Amravati C.D Block, Bhatkuli C.D Block, Daryapur C.D Block, Nandgaon-Khandeshwar C.D Block and Dhamangaon Railway C.D Block, have the power supply amenity available to them in Achalpur C.D Block, Chandurbazar C.D Block and Morshi C.D

Blocks are accessible to 99.9 percent of the population.

The power supply is available to cent percent villages with population size range 2000 and above (164 villages). However all small villages with population size 1-499, 654 villages constituting (94.0 percent) of the total villages (696) in the category. 458 villages constituting 98.7 percent of the total villages 464 in the range of 500-999 in the category and 353 villages constituting (99.4 percent) of the total villages 355 in the range of 1000-1999 in the category.

It may be summed up from foregoing paragraphes that in respect of availability of different type of amenities and facilities considered. The larger villages have an adventage over the smaller once population size and availability of amenities are directly associated with over.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of household by type of fuel used for cooking in rural and urban areas.

Of the 513,723 households, 308,112 (60.0 percent) households use firewood for cooking, 62,433 (12.2 percent) households use crop residue, 2,336 (0.5 percent) use cowdung cake, 431 (0.1 percent) use coal/lignite (charcoal) 108,217 (21.1 percent) cooking gas (LPG), 1,177 (0.2 percent) Bio-gas, 28,493 (5.5 percent) households use kerosene 818 (0.2 percent) use other mean. There are 1,568 households (0.3 percent) who reported no cooking being done by them.

In the rural areas 256,080 households constituting (73.0 percent) of the total households use firewood for cooking. This is followed by use crop residue (16.8 percent) cooking gas (LPG) (7.7 percent), cowdung cake (0.5 percent), Bio-gas (0.3 percent). In urban areas 81,280 households (49.8 percent) use L.P.G gas followed by kerosene (14.8 percent) firewood (31.9 percent) and crop residue (2.2 percent).

It may be seen that while firewood continues to be the predominant fuel used in rural areas the cooking gas in urban areas is used to a large extent.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district is endowed with a rich variety of tourist attractions ancient temples, scenic hill resorts, thick forests and varied wild life, hospitable people and colourful fairs and festivals. Amravati is a large centre for cotton trade where cotton is assembled from the adjoining districts as well. The cotton is sent to places all over the country and mainly to the textile centres of Mumbai, Solapur, Madras and Ahmadabad.

In addition to cotton production, Amravati district has rich land which yields a variety of crops. The main agricultural commodities produced in the district are Jowar and Ground-nut Amravati has however, negligible production of rice and imports it from adjoing districts

and also from, Madhya Pradesh. The production of Groundnut is very abundant. The oil-crushing factories are located in the district. Oil-cake, a by-product in oil mills, is exported to United Kingdom, where it has a great demand. There are dal mills at Amravati, Badnera and Dhamangaon. Besides, pulses, mainly tur and mung, from the district and the surrounding areas, are exported to Mumbai, Kolkata and Madras. Apart from the agricultural products, the district is famous for its Orange fruit plantations. There is a great demand for Oranges from the districts of Maharashtra as well as from outside the State.

The principal language of the district is Marathi. The form of the language locally used is known as the 'Varhad' (Berani) dialect and is closely related with Marathi spoken in the Deccan. Among other languages largely spoken in the district, Urdu and Hindi are the main. The main dishes prepared on festive occasions are puran-poli, sira-puri and shrikhand etc. Milk of baffalo and cow is very commonly used. Among the non-vegetarians, chief dishes prepared are mutton or chicken fried or in the form of curry, Khima and preparation eggs. Ganesh Utsav, Shimga (Holi), Diwali, Hanuman Jayanti, Ramnavami, Christmas and Muharum are the most important festivals of the district. In general social and cultural life of the people has been quite placid during the decade. One of the major administrative changes is the creation of one new tahsil in the district.

Contribution of the district

Amravati has a remarkable tradition of an active public life. It has given many freedom fighters like Late Dadasahab Khopard, R.B. Mudholkar and Sir Moropant Joshi. The well known Sant Tukdoji Maharaj, the celebrated national saint and singar has contributed immensely towards the enrichment of the public life of Amravati.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union Territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels :

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and last questions related to currently married women. The measures of fertility worked out are based on the F- series of 1991 Census pertaining to Maharashtra State.

Different fertility measures reveal that the level of fertility of the district is higher compared to the State average; child woman ratio is low as compared to State. But mean age at marriage is slightly high as compared to State average.

Mortality Levels

Information on the question on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of the child mortality have been worked out by using brass technique.

Mean Age at Marriage	--	18.3	--	17.9
Child Women Ratio	--	48.3	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole in 1981, the GFR, GMFR, TFR, TMFR & CBR were 146, 195, 4.8, and 6.4 respectively as compared with State average of 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 128, 176, 4.0, 6.1 and 30.5 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage found to be higher for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio is recorded lower for the district than the state in 1991 Census.

Source : Table 31 of Maharashtra State District Profile 1991 census.

Marathi is the main language of the district and is the mother tongue of 68.1 per cent of the district population. In rural areas Marathi speakers account for 72.3 per cent whereas in urban areas 60.1 per cent. Urdu is the second largest language spoken in the district. It accounts for 11.1 per cent of the total population. The proportion of Urdu speakers is higher in urban areas (20.6 per cent) than the rural areas

(6.1 per cent). The third largest language spoken in the district is Hindi, its percentage to the total population is 7.1 and mainly spoken in urban areas by 11.5 per cent, whereas it is 4.9 per cent in rural areas.

The speakers of the minority languages viz., Banjari, Gondi, Koraku and Korku are mainly concentrated in rural and remaining two languages (Marwari and Sindhi) are concentrated in urban areas.

It is found that during the last decade proportion of Marathi speaking persons has decreased from 70.8 per cent to 68.1 per cent whereas Urdu speakers proportion has increased from 10.8 per cent to 11.1 per cent.
