VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Samir Kumar Biswas
of the Indian Administrative Service
Director of Census Operations, Maharashtra

Product Code Number

MOTIF

Daulatabad Fort

Rising dramatically over 600 ft. above the Deccan Plain is Daulatabad Fort. Once known as Devgiri, this fort served as the head quarters of the powerful Yadava rulers. In the 13th century, Mohammed bin Tughlaq, the Sultan of Delhi made it his capital and named it Daulatabad, meaning the City of Fortune.

Its defense systems comprised fortifications of double and even triple rows of massive walls. Additional protection was provided by ingenious mazes with complicated entryways and by deep rock cut trenches and moats, which could only be crossed over the drawbridge. The most notable structures of Daulatabad are the Chand Minar, Jama Masjid and the Royal Palaces. The tapering, 30 mt. high tower of the Chand Minar is divided into four storeys, and was faced with glazed tiles and carved motifs. The Minar probably served as a Prayer Hall or a Victory monument in its time. The Jama Masjid was a Mosque built in 1318 by Quitubiddin Mubarak, the Khilji rulers of Delhi. The Palaces consist of spacious halls, Pavilions and courtyards embellished with stucco decorations, medallions and geometric motifs.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

	Paithan (M Cl)	Urban	5.1	6,795	0	0

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometre worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council, C.T. for Census Town, M.Corp. for Municipal Corporations, C.B. for Cantonment Board.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girl schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit Societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

Aurangabad district is named after, its headquarters place of Aurangabad. The City was founded in 1610 A.D. by Malik Ambhar, the Prime Minister of Murtaza Nizam Shah of Ahmadnagar on the sight of Village called Khirki. Malik Ambar was succeeded by his son Fateh Khan, who changed the name of Khirki to Fatehnagar. With the capture Daulatabad by the imperial troops in 1633, the Nizam shahi dominions including Fatehnagar came under the possession of the Moghals. In 1653 when Aurangzab was appointed , the Viceroy of the Deccan, he made Fatehnagar his capital and called it Aurangabad. The historians of his reign also occasionally style the city Khujistan Bunyad. Since then the city came to be known as Aurangabad.

It appears from the Archaeological excavations made in the nighbouring district that this region was occupied in the Early Stone Age. The earliest period known from the excavations is the chalcolithic or Early Bronze Age i.e. from 1500-500 B.C. According to the literary tradition, when the Aryans penetrated to the Deccan, the whole region was covered by a thick jungle. Agastya was the first Aryan who crossed the Vinddhyas. We learn from the Ramayana that Rama accompanied by his brother Lakshman and wife Sita met Agastya near Godavari.

Buddhism was first introduced in Maharashtra by Mahadharamrakshita by narrating to the people the story of the Naradakassapa during the reign of Ashoka. This led to the excavation of caves in different parts of Maharashtra; some of these were excavated at pitalkhora, 80 Kms. from Aurangabad and at Ajanta on the northern fringe of the district. After the death of Ashoka, the Satavahanas rose to power in the Deccan. They made Pratishthana (Paithan) as their Capital. They received support from local rulers called Maharathis. Their kingdom extended up to Pune, Nashik, Ahmadnagar, Aurangabad and Jalna districts the earliest group of caves at Ajanta belongs to the Satavahana age. During the period of Satavahanas this region must have attained a high level of prosperity. The Chalukyas of Badami (Bijapur district) rose to power in the first half of the sixth century A.D. Their kingdom extended up to the Narmada in the north. The Chinese pilgrim Hiuen Tsang calls about King Pulakeshin II from Chalukya dynasty as the Lord of Maharashtra. Pulakeshin obtained a resounding victory over Harsha, the lord paramount of North India. Thereafter he assumed the title of Parameshvara. In the last quarter of the twelveth century A.D., the Yadavas of Devagiri (Daulatabad) came into prominence. In 1296 A.D., Ala-ud-din Khilji invaded the kingdom of Ramachanddra (King of Devagiri), he had to pay a heavy ransom to the Muslim conqueror. He was succeeded by his son Shankaragana. He was defeated and slain by Malik Kafur. Thus the Hindu Kingdom of Devagiri came to an end in 1318 A.D.

From the early thirteenth century onwards Muslim rulers started invading this region. They conquerred many small forts. The prominent being the Devagiri fort. Since then the Maratha power never established in thi region. After the death of Emperor Bahadur Shah in 1711, the civil war that took place for supremacy prompted Mir Kamruddin, Chin Kalich Khan Nizam-ul-Mulk, a Governer in Moghals court to become the viceroy of the Deccan in 1713. He founded the Nizam dynasty. This family ruled in Hyderabad till 1948.

There were no major changes in the boundaries of the district or its talukas between 1901 to 1941. Eight villages of Ambad taluka were exchanged with six villages of Pathri taluka of Parbhani district. In 1950 twenty-five enclave villages belonging to the neighbouring districts of Nashik, East Khandesh and Ahmadnagar were transferred to Aurangabad district. More than one third of the district was jagir area. Nizam's own estate called "Sarf-e-Khas" comprising two talukas was merged with the Government area under Sarf-e-Khas (Merger) Regulation of 1949. Consequent upon the integration of Jagirs and Sarf-e-Khas areas, all the taluka boundaries were reconstituted in April 1950. Two new Mahals (Tahsils) with headquarters at Jafferabad were created. In 1953 another new mahal (tahsil) with headquarters at Soegaon was created by transferring 37 villages from Sillod taluka and 30 from Kannad taluka. All the villages transferred to this mahal are situated to the north of the Satmala hills. With the reorganisation of States in 1956, the district was transferred from Hyderabad State to Bombay State and since 1960 it forms a part of Maharashtra.

(iii) Administrative Set-Up

Major changes took place in the administrative set up of Maharashtra State after 1991 Census, as five more districts were carved out in six divisions.These are Nandurbar from Dhule, Washim from Akola, Gondiya from Bhandara, Hingoli from Parbhani and Mumbai suburb from Gr. Bombay districts. The Konkan division includes 6 districts, Nashik division 5 districts, Pune division 5 district, Aurangbad division 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Thus in 2001, the Maharashtra State has 35 districts spread over 6 divisions. Aurangabad district is a part of Aurangabad division. In the district of Aurangabad, after 1991 Census, 1 Tahsil and 1 Town were added. The district now comprises of 9 tahsils, 9 towns and 1344 villages spread over Kannad (201), Soegaon (83), Sillod (131), Phulambri (88), Aurangabad (187), Khuldabad (76), Vaijapur (165), Gangapur (225) and Paithan (188) tahsils. The following statement indicates the changes, which occurred after 1991 census in the number of villages, towns in each tahsil and also the reasons for variation in brief: -

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/Tahsil	No. of villages as per 1991 Census as in Aurangabad district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.

JURISDICTIONAL CHANGES DURING 1991-2001-(Contd.)

Name of District/Tahsil	No. of villages as per 1991 Census while in Aurangabad district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
4 Phulambri	--	88	88	--	--	--	31 Villages transferred from Aurangabad Tahsil 42 Villags transferred from Sillod Tahsil 5 Villages transferred from Khuldabad Tahsil 10 Villages transferred from Kannad Tahsil
5 Aurangabad	219	188	187	--	2	3	1 New Census Town 31 Villages transferred to Phulambri Tahsil
6 Khuldabad	81	76	76	--	1	1	5 Villages transferred to Phulambri Tahsil
7 Vaijapur	164	164	165	1	1	1	1 New village created after 1991 Census
8 Gangapur	225	225	225	--	1	1	--
9 Paithan	188	188	188	--	1	1	--

For administrative purpose, the district has been divided into 3 sub-divisions viz., Aurangabad, Vaijapur and Sillod and 8 tahsils. Aurangabad sub-division includes Aurangabad, Paithan and Phulambri tahsils, Vaijapur sub-division includes Vaijapur, Gangapur and Khuldabad tahsils and Sillod sub-division includes Sillod, Soegaon and Kannad tahsils. The District Collector along with the District judge, superintendent of Police, Chief Executive Officer of Zilla Parishad and other senior officers of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are Cantonments, Municipalities or Municipal Corporations. The urban local bodies elect a councillor from each of the wards, and his term is 5 years. The President of the Municipal Council or Mayor of the Corporation as also his Deputy are elected from amongst elected Councillors.The Chairman of various committees are also elected from amongst the elected Councilors. Although for day-to-day administration the Chief Officer is responsible in Municipal Council, he works under the administrative control of the President of Municipal Council. In corporations a senior IAS officer is deputed by the State Government as a Municipal Commissioner, who is responsible for day-to-day administration, and the executive authority lies in him.

(iv) Physical features

Location and Size

Aurangabad district is situated in the central part of the state. It lies between 19º 18' and 20º 40' north latitudes and 74º 34' and 76º 04' east longitudes. It is surrounded by Jalgaon district to the north, Jalna and Buldana districts to the east, Ahmadnagar and Bid districts to the south, and Nashik district to the west.

The district has an area of 10,107 sq.kms. and a population of 2,897,013 persons as per Census 2001. While the area of the district accounts for 3.3 percent of the total area of the State, the districts population constitutes 3.0 percent of the total population of the State. The density of population is 287 persons per sq. km. Among the 35 districts of the State, the district ranks 13th in terms of area, 11th in terms of population and 12th in terms of density.

Aurangabad town, the headquarters of the district and also the division has a population of 873,311 persons as per the 2001 Census. It is a historical city and though it has its own attractions and charms, tourists value it mainly as the centre from where the world famous Ajanta and Ellora caves can be easily approached. Aurangabad is well connected with the surrounding districts and is linked with Mumbai by air, rail and road.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of **Aurangabad**, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

The district falls in the Eastern Plateau micro region of the Deccan Plateau. It is an elevated land which has been incised by the Godavari river and it's tributaries. The district may be broadly grouped into two geographical regions, 1) The Godavari Basin, and 2) The Ajanta Plateau. However, there are well marked features in the Ajanta Plateau which may be further divided as a) Ajanta Range, b) Sillod Plateau, c) Ellora Hills, and d) Aurangabad Plateau.

The Godavari Basin spreads over parts of Vaijapur, Gangapur and Paithan tahsils. It has an elevation of about 500 meters above mean sea level and slopes towards southeast. This basin is relatively smooth in surface. The best black soils are found in a narrow strip of land on the banks of the Godavari and it's tributaries. As one moves away from the river the depth of the soil decreases. Soils are very fertile and hence both kharif and rabi crops are grown. Cotton, jowar, bajra, wheat, groundnut and pulses are the main crops grown in the basin.

The Ajanta Range occupies the entire tahsil of Soegaon, and small parts of Kannad and Sillod tahsils.

This range has a southwest to northeast orientation and has an altitude of between 600 and 800 metres above mean sea level. It slopes steeply towards north while towards the south the slope is gradual. River Purna and its tributary rivers Khelna and Dhamna rise from the southern escarpment of the Ajanta range. River Vaghur and its tributary river Tittur rise from the northern face of this range. This range is fairly dissected. Forests cover the hilltops and these are mainly reserved forests.

Sillod Plateau includes parts of Kannad, Phulambri, Khuldabad and Sillod tahsils. It has an altitude of about 600 to 700 metres and a gentle slope towards the southeast. River Purna and its tributaries, Khelna and Dhamna drain this plateau. Light soils are found in this area.

Ellora Range spread over small parts of Aurangabad, Khuldabad and Phulambri tahsils in a east-west direction. It has a height of about 800 meters above mean sea level. A few isolated peaks have a height of nearly 900 meters. The several eastward trending ridges from the Ellora Range are really the residual hills left behind by the dissection by rivers of the Ajanta Plateau. This range is partly covered with forests.

Aurangabad plateau has an altitude of about 500-600 meters. The northwestern part of the plateau is more elevated than the southeastern part. Evidently, the region gently slopes towards the southeast. One isolated peak in this region has a height of 998 meters.Rivers Shiv, Kaum, Dudhana and their tributaries, drain this plateau. Shiv river rises from the Ajanta range, and Kaum and Dudhana from the Ellora range. All these rivers finally merge into the Godavari river. Forests appear only in two patches-one near Kannad town and the other near Aurangabad city. These are reserved forests.

Drainage

Most of Aurangabad district belongs to the Godavari drainage system. Only a small portion in the north belongs to the Tapi drainage. The Godavari is the most important river in the district as well as in Maharashtra. It has its source in the Sahyadri range near Trimbak in Nashik district and flows in a general southeasterly direction along the southern boundary of the district. The Sivna, the Kham, the Yelganga, the Shivbhadra, the Yelbhaddra and the Gathati are the most important tributaries of the Godavari within the district. The Purna river rises in the Ajanta range about 8 Kms. north-east of the Satmala hills It flows in a general south-easterly direction and in importance is second only to the Godavari river. The Dudhna is the longest and most important tributary of the Purna. It rises above Ankur village on the northern slopes of the easterly trending off shoot of the Ellora range. After an initial irregular winding course it turns and flows in a southeasterly direction.

The northern parts of the district are drained by innumerable energetic north flowing streams, which belong to the Tapi basin. The most important of these are the Gadadgad, the Hivra, the Sonad and the Waghur. They have in several places cut across the scarp by their active headward erosion and extended their source region further south into the plateau.

Climate

The climate of the district is characterised by a hot summer and general dryness throughout the year except during the south-west monsoon season. The year may be divided into four seasons. The cold season is from December to February and is followed by the hot season from March to May. The south west monsoon season is from June to September while October and November constitute the post-monsoon season.

The average annual rainfall of Aurangabad is 731.0 m.m. In general, the amount of rainfall increases as one proceeds from west to east. About 83 per cent of the total annual rainfall is received during the south-west monsoon season. July is the rainiest month of the year. Some rainfall occurs during May, October and November and is mainly in the form of thunder showers. The variation in the annual rainfall from year to year is large.

The summer season from March to May is a period of rapid and continuous increase in both day and night temperatures. May is generally the hottest month of the year with the mean daily maximum temperature at about 40^{o}C. The heat is often intense and on individual days the temperature sometimes raises to 45^{o}C or 46^{o}C. With the onset of the southwest monsoons by

about the second week of June there is an appreciable drop in temperatures and the weather becomes pleasant. With the withdrawal of the south-west monsoons day temperature again increases and a secondary maximum is recorded in October by about the end of November temperature fall rapidly and December is the coldest month of the year with the mean daily minimum temperature at about 13°C. In the cold season the district is sometimes affected by the cold waves over north India and the minimum temperature may drop to about 6 °C to 7 °C.

The air is generally dry except during the southwest monsoon season when the relative humidity is high. Skies are heavily clouded to overcast during the monsoons but there is a rapid decrease of cloudiness in the post-monsoon months. During the rest of the year the skies are generally clear or lightly clouded.

Dust storms sometimes occur during the summer afternoons. Thunder storms occur throughout the year, their frequency being higher during April to June and from September to October.

Natural Wealth

Minerals

The district as a whole is monotonously covered by Deccan traps,basaltic lava flows which are spread out in the form of horizontal sheets or beds. The trap rocks are more or less uniform in composition corresponding to dolerite or basalt and are dark grey or dark greenish grey in colour. Columnar joining and spheroidal weathering are two characteristic features of Deccan trap.

Trap rocks are generally barren of any economically useful and important minerals but being hard, dense and durable are most suitable for building purposes, road metal, railway ballast and as an aggregate for concrete mixtures. Kankar occurs at numerous places along the foothills and in nalas, which on burning yields good lime, which is locally used for construction purposes.

Fisheries

Fishing in the district is carried out as a part-time occupation and is done in the rivers, tanks and reservoirs of the district. Fishing is done by means of cast nets, drag nets and drift nets. In addition to the use of nets, fish is also caught with the help of hooks and lines. Mahasheer, Shingi, Shingala, Waghari, Ahir, Murral, Dhok and Bam are some of the commercially important varieties of fish caught in the district. Fast growing varieties of major carps like Rohu, Catla and Mrigal are imported from Kolkata and are stocked in reservoirs and tanks so as to augment the fish supply.

Soil and Cropping Pattern

The soils of the district are derived from the Deccan trap, which is the predominant rock formation of the district. They are generally alkaline in reaction, clay loam in texture and have a fairly high content of calcium carbonate. The soils are fairly well supplied with nitrogen but are low in phosphate potash. Caleareous Kankar occurs at numerous places in the soil along the foothills and nalas. The soils of the district can be classified as light, medium and heavy according to the depth, texture and location. The best black soils are found in a narrow strip of land on the banks of the Godavari and its tributaries. As one moves away from the river valleys the depth of the soils decrease. Light soils are found in the northern and northwestern portion of the district on the high lying slopes. They are sandy loam to loamy in texture, brownish black in colour and underlaid with murum derived from the basic rock basalt. Because the murum sub soil is quickly reached, they are also called murmad.

In the western region the soils generally improve as one proceeds from north to south. In Kannad tahsil, owing to the piedmont character of the soils, mango trees are of considerable importance. As one proceeds eastwards along the Godavari valley the soils improve and the eastern region has the most fertile soils in the district. Jowar and cotton are the most important crops grown here. In the Purna-Dudhna basin, the soils generally increase in depth and fertility as one proceeds eastwards and accordingly the proporation of jawar increases while bajra decreases. The area under cotton also shows a marked increase towards the east while the area under pulses shows slight decrease.

The region of the piedmont slopes, in the extreme north of the district, from Nagad in the northern part of Kannad tahsil in the west through the whole of Soegaon tahsil, the soil is mostly poor. However, groundnut is abundant on account of springs all along

the foot of the scarp. Garden crops and cotton are of considerable importance in this region. Almost all the villages are on the banks of the innumerable streams which drain this region northwards to the Tapi river. Within the district the soils become more fertile downstream as a result of which the area under jowar and cotton increases while that under bajra and pulses decreases.

Land and land use pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19-23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This included all land classified as forest under any legal enactment dealing with forest or administered as forests, whether, state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such areas too are shown under column 19 as forest. The process of regularisation of land grants and effecting relevant changes in the basic records of survey and settlement are some what protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual situation.

The forest produce is divided into two main classes, major and minor. The chief major forest produce are timber and firewood and the minor forest produce are Honey, Dink, Temburni leaves etc.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is connoted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	613,861
2)	Total Buffaloes	102,189
3)	Total Goats	411,109
4)	Total Sheep	93,585
5)	Total Pigs	20,587
6)	Total Equine	6,228
7)	Total Camel	1,153
8)	Total Rabbits	43
9)	Total Livestock (excluding dogs)	1,248,755
10)	Total Poultry (including Ducks)	523,156

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,248,755 and total poultry (including ducks) are 523,156 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 613,861, total buffaloes are 102,189, and goats 411,109, sheeps 93,585, pigs 20,587, equine 6,228, and camels 1,153 and rabbits are 43.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	124
2)	Average Livestock per village	961
3)	No. of livestock per thousand human population	546
4)	No. of in-Milk cows per thousand human population	42
5)	No. of in-Milk buffaloes per thousand human population	15
6)	No. of poultry fowls per thousand human population	236
7)	No. of Bullocks and male Buffalloes per hundred hectares of gross cropped area	31
8)	No. of tractors per thousand hectares of gross cropped area	3
9)	No. of Veterinary Institute per lakh livestock	10

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to124, while average livestock per village is 961. For every thousand human population there are 564 livestock, 42 in-milk cows, 15 in-milk buffaloes and 236 poultry fowls. While there are 31 bullocks and male buffaloes per hundred hectares of gross cropped area and 3 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 10.

Industry

Industrially Maharashtra is one of the advanced states in the country. But Aurangabad is one of the developing districts of the states. Now a days Aurangabad attracts many industrialists and many large scale industries have been started in the recent past i.e. Bajaj groups scooters production unit, videocon, colgate, garware plastics, crompton and medicine companies are in Aurangabad district. Other small scale industries are also in Aurangabad district i.e. oil mill, ginning, dairy proucts, leather working, wool weaving etc. Aurangabad district is famous for Himroo mashroo weaving industries Paithan has been associated with fine silk Paithani sarees.

Agiculture is main economic activity of the district. Cultivators and agricultural labourers together records 62.1 pecent workers engaged in these two categories. While household industry records only 1.7 percent and other workers industry records 36.2 percent. The raw materiala is available in the district are mostly agricultural products like cotton, groundnut, sugarcane etc these materials have encouraged the establishment of number of ginning factories and sugar factories are functioning in the district.

Trade and Commerce

The district is famous for Himroo cloth and Paithani sarees. The chief manufactured articles are two wheelers, wine tyres, animal skin, sugar cane, wheat cotton, tobacco, food grain, wooden furniture,agricultural instruments, medicines, plastics, sugar, jowar, groundnut, bidi etc and chief exported commodity are medicines, polyester films, tv, milk, animal skin, sugar, aheat, cotton,spinning and ginning cotton, jowar, auto parts, engineering machinery, maize, paithani sarees. Paithani sarees are exported to all over India and overseas also. The chief imported commodities are wheat rice, cloth, cotton and sugar cane etc. Most of these goods are imported from surrounding places. The distribution of foodgrains and other articles of trade through shops and hawkers. Apart from the weekly markets and fairs Aurangabad, Paithan,Vaijapur and Sillod are important trade centres also.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

	Motor Vehicles 1999	
	Item	**No. of Vehicles**
	1	2
1	Buses	962
2	Cars & Station Wagons	8,226
3	Jeep	5,501
4	Taxies	2,172
5	Autorickshaw	11,271
6	Moped	44,787
7	Scooters	40,883
8	Motor Cycles	50,657
9	Total Goods Vehicles	9,683
10	Tractors	6,692
11	Trailors	5,859
12	Others	212
	Total	**186,905**

Source- Transport Commissioner's Office

If a bus stop railwy station or navigable waterway is located within the territorial jurisdiction of a village or town, it is considered to have been served by such facility even it is little away from actual settlement. This district does not have navigable waterway facility. There is comparatively good system of transport communication facility through bus service and railway service.

It may be seen that the district had 962 Buses; 8,226 Cars and Station Wagons; 50,657 Motor Cycles; 44,787 Mopeds and 40,883 scooters. There were 5,501 Jeeps; 2,172 taxies and 11,271 autorickshaws. Besides, 212 other modes of transport, the district also had 6,692 tractors and 5,859 trailors as means of transport.

Electricity and Power supply

All the towns and most of villages in the district are electrified. Out of 1,300; 1,286 villages (98.9 percent) are enjoying the power supply facility.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should

have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000.
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad, Bant
7) Balahi, Balai
8) Basor, Burud, Bansor, Bansodi
9) Beda Jangam, Budga Jangam
10) Bedar
11) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar , Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami
12) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
13) Bindla
14) Byagara
15) Chalvadi, Channayya
16) Chenna Dasar, Holaya Dasar, Holeya Dasari
17) Dakkal, Dokkalwar
18) Dhor, Kakkayya, Kankayya, Dohor
19) Dom, Dumar
20) Ellamalvar, Yellammalawandlu
21) Ganda, Gandi
22) Garoda, Garo
23) Ghasi, Ghasia
24) Halleer
25) Halsar, Haslar, Hulasvar, Halasvar
26) Holar, Valhar
27) Holaya, Holer, Holeya, Holiya
28) Kaikadi (in Akola, Amravati, Bhandara, Gondiya, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district, other than Rajura tahsil)
29) Katia, Patharia
30) Khangar, Kanera, Mirdha
31) Khatik, Chikwa, Chikvi
32) Kolupulvandlu
33) Kori
34) Lingader
35) Madgi
36) Madiga
37) Mahar, Mehra, Taral, Dhegu Megu
38) Mahyavanshi, Dhed, Vankar, Maru Vankar
39) Mala
40) Mala Dasari
41) Mala Hannai
42) Mala Jangam
43) Mala Masti
44) Mala Sale, Netkani
45) Mala Sanyasi
46) Mang, Matang, Minimadig, Dhankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang
47) Mang Garodi, Mang Garudi
48) Manne
49) Mashti
50) Meghval, Menghvar
51) Mitha Ayyalvar
52) Mukri
53) Nadia, Hadi
54) Pasi
55) Sansi
56) Shenva, Chenva, Sedma, Ravat
57) Sindhollu, Chindollu
58) Tirgar, Tirbanda
59) Turi

Scheduled Tribes

1) Andh
2) Baiga
3) Barda
4) Bavacha, Bamcha
5) Bhaina
6) Bharia Bhumia, Bhuinhar Bhumia, Pando
7) Bhattra
8) Bhil, Bhil Garasia, Dholi Bhil, Dungir Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
9) Bhunjia
10) Binjhwar
11) Birhul, Birhor
12) Chodhara (excluding Akola, Amravati, Bhandara, Gondiya, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts)

13) Dhanka, Tadvi, Tetaria, Valvi
14) Dhanwar
15) Dhodia
16) Dubla, Talavia, Halpati
17) Gamit, Gamta, Gavit, Mavchi, Padvi
18) Gond Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Danddami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond, Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria
19) Halba, Halbi
20) Kamar
21) Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari
22) Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
23) Khairwar
24) Kharia
25) Kokna, Kokni, Kukna
26) Kol
27) Kolam, Mannervarlu
28) Koli Dhor, Tokre Koli, Kolcha, Kolgha
29) Koli Mahadev, Dongar Koli
30) Koli Malhar
31) Kondh, Khond, Kandh
32) Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
33) Koya, Bhine Koya, Rajkoya
34) Nagesia, Nagasia
35) Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
36) Oraon, Dhangad
37) Pardhan, Pathari, Saroti
38) Pardhi; Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Bahelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia
39) Parja
40) Patelia
41) Pomla
42) Rathawa
43) Sawar, Sawara
44) Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar
45) Thoti (in Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts and Rajura tahsil of Chandrapur district)
46) Varli
47) Vitolia, Kotwalia, Barodia

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some

economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the

number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population.}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1,000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1,000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. /Towns. These Class I UAs. /Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II Towns, 20,000 to 49,999 population are Class III Towns, population with 10,000-19,999 are Class IV Towns, population with 5000 and 9999 are Class V Towns and Towns with less than 5000 population are Class VI Towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction

material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001

8	Gangapur	209,402	192,249	17,153	279,197	256,872	22,325	33.3	33.6	30.2	8.2	8.0
9	Paithan	240,770	213,052	27,718	287,356	252,838	34,518	19.3	18.7	24.5	11.5	12.0
District Total:		**2,213,779**	**1,488,636**	**725,143**	**2,897,013**	**1,809,863**	**1,087,150**	**30.9**	**21.6**	**49.9**	**32.8**	**37.5**

Table 1shows the growth rates for the district and tahsil in total, rural and urban areas and percentage of urban population to total population.

The average growth rates for the rural and urban areas of the district are 21.6 percent and 49.9 percent respectively. Soegaon and Phulambri tahsil do not have urban areas. In the rural areas of the district among the tahsils, Aurangabad tahsil recorded the highest growth rate of 43.5 percent and Kannad tahsil recorded the lowest growth rate (13.2 percent). Creation of new census town (Pandharpur) after 1991 census increased the total number of towns to nine now. The percentage of urban population has increased in 2001 (37.5 percent) compared to 1991 census (32.8 percent). All towns have recorded more percentage of urban population in 2001 census than in 1991 census execept Gangapur tahsil. Aurangabad tahsil has the highest urban population 77.4 percent in 2001.The lowest urban population has been bound in Gangapur tahsil (8.0 percent). The district urban growth rate is 49.9 percent while that of rural is 21.6 percent. In rural areas of the district tahsil Aurangabad (43.5 percent) and Gangapur (33.6 percent) recorded higher growth rate than the district rural average. Remaining all tahsils i.e Kannad tahsil, Soegaon tahsil, Sillod tahsil, Khuldabad tahsil, Vaijapur tahsil and Paithan tahsil recorded lower growth rate than the district rural growth rate. During the previous decade of 1981 - 1991, the rural part of the district had registered the growth rate of 24.90 percent which is more below than that recorded for the decade 1991 – 2001 (21.6 percent).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Percentages are given in brackets

The distribution of the inhabited villages by population size ranges with their percentages is given in the table 2. There are 1,300 inhabited villages in Aurangabad district there are 78 villages (6.0 percent) with population less than 200 population, 211 villages (16.2 percent) with population ranging from 200 – 499, 404 villages (31.1 percent) with a population ranging from 500 – 999, 374 villages (28.8 percent) with population ranging 1,000 -1,999, 194 villages (14.9 percent) with population ranging 2,000 -4,999. 31 villages (2.4 percent) with population of 5,000 -9,999 and 8 villages (0.6 percent) with 10,000 and above population.

Within the 9 C.D Blocks of the district percentage of small sized villages with less than 200 population in Soegaon C.D Block is highest (11.8 percent) and lowest (1.8 percent) in Vaijapur C.D Block. The percentage of 200-499 sized villages is highest in Gangapur C.D Block (21.7 percent) and the lowest in Sillod C.D Block (9.4 percent) the percentage 500-999 sized villages is the highest in Aurangabad C.D Block (34.8 percent) and the lowest in Sillod C.D Block (24.2 percent) the villages in size 1000-1999 is the highest Phulambri C.D Block (38.6 percent) and the lowest in Paithan C.D Block (21.9 percent) the village of size of 2000-4999 is the highest in sillod C.D Block (23.4 percent) and the lowest in Gangapur (10.8 percent) C.D Block, the size of village 5000-9999 is the highest in Sillod (5.5 percent) C.D Block and the lowest in Gangapur (0.9 percent) C.D Block, the size of village 10,000 and above is highest in Sillod (1.6 percent) C.D Block and the lowest in Paithan (0.5 percent) C.D Block. Only 8 villages are in this size.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town	
1	
(a) New	
(i) Statutory town -- Nil	
(ii) Census town --	
1 Pandharpur	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 shows new towns, denotified, declassified and wholly merged with other towns in 2001 census. In 2001 census Pandharpur is declared as Census Town.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	13	1.0	1,323	0.1
11-20	10	0.8	840	0.0
21-50	54	4.2	18,218	1.0

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001 - (Contd.)

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
51-100	196	15.1	138,570	7.7
101-200	582	44.8	694,167	38.4
201-300	281	21.6	445,844	24.6
301-500	119	9.2	290,583	16.1
501 +	45	3.5	220,318	12.2
Not known	0	0.0	0	0.0
District Total:	**1,300**	**100.0**	**1,809,863**	**100.0**

Population Density (Rural) of the district: 182

Table 4 shows distribution of villages by population according to density ranges. The villages have been grouped under eight different density ranges in this table. It indicates 0-10 form 1.0 percent of total 13 inhabited villages covering with 0.1 percent of total population, 11-20 form (0.8 percent) of total 10 inhabited villages covering with (0.0 percent) of total population, 21-50 form (4.2 percent) of total 54 inhabited villages covering with (1.0 percent) of total populations villages, and 51-100 form (15.1percent) of total 196 inhabited villages covering with (7.7 percent) of total population, 101-200 accounts (44.8percent) of total 582 inhabited villages covering with (38.4 percent) of total population, 201-300 form (21.6 percent) of total 281 inhabited villages covering with (24.6 percent) of total population. 301-500 form (9.2 percent) of total 119 inhabited villages covering with 16.1 percent of total population, 501 and above form only 3.5 percent of total 45 inhabited villages covering with (12.2 percent) of total population.

Table 5 :SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	978	1,003	862	998	1,001	980
1911	966	1,000	796	988	991	967
1921	950	994	776	991	994	970
1931	947	987	790	967	972	924
1941	949	989	810	956	965	894
1951	941	1,000	807	974	980	938
1961	936	995	801	955	970	874
1971	930	985	820	935	958	834
1981	937	987	850	936	958	872
1991	934	972	875	922	941	884
2001	922	960	873	924	936	905

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and Maharashtra state. 2001 Census recorded the sex ratio 924 females per 1000 males in the district. This is higher compared to the state average 922 .The sex ratio in Aurangabad district has remained higher than that of state from 1901-1971 and the trend was reversed in

1981 and 1991. Again in Census 2001 the sex ratio at district level was higher than that of the state .As regards total areas, sex ratio the state level declined by 56 points and at district level it declined by 74 points during the last hundred years. Simillary the sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased by 65 points during 1901 -2001. For the urban areas of the state, the sex ratio increased by 11 points and for the district it decreased by 75 points during the above period.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kannad	928	928	925
2	Soegaon	944	944	-
3	Sillod	946	951	918
4	Phulambri	951	951	-
5	Aurangabad	903	911	901
6	Khuldabad	928	928	925
7	Vaijapur	948	950	935
8	Gangapur	925	925	916
9	Paithan	948	948	952
	District Total:	**924**	**936**	**905**

Table 6 shows sex ratio by tahsils .The sex ratio for the district is 924 within the district the sex ratio from 925 in Gangapur tahsil to 951 in Phulambari tahsil. Generally rural areas have higher proportion of females than the urban areas. This district also confirms to this norm. The sex ratio figures for rural and urban areas of Aurangabad district are 936 and 905 respectively. Within the district the rural sex ratio is found high in Sillod (951) and Phulambari (951) tahsils and lowest in Aurangabad (911) tahsil. In urban area the higest sex ratio is in Paithan (952) and lowest in Aurangabad (901) tahsil.

Serial number	Name of C D block	Sex ratio
1	2	3
1	Kannad	928
2	Soegaon	944
3	Sillod	951
4	Phulambri	951

TABLE 7 : - (Contd.)

Serial number	Name of C D block	Sex ratio
1	2	3
5	Aurangabad	911
6	Khuldabad	928
7	Vaijapur	950
8	Gangapur	925
9	Paithan	948
	District (Rural) Total:	**936**

Table 7 gives sex ratio for CD blocks. Among the nine CD blocks sex ratio varies between 911 to 951. Sillod CD block and Phulambari CD blocks have the highest sex ratio (951) while Aurangabad CD block has the lowest sex ratio (911). The sex ratio in Soegaon, Sillod, Phulambari, Vaijapur and Paithan CD blocks is above the district “rural average i.e .936,while Kannad, Aurangabad, Khuldabad, Gangapur CD blocks have sex ratio below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	0.8	4,910	0.3
700-749	5	0.4	4,074	0.2
750-799	15	1.2	57,411	3.2
800-849	47	3.6	42,329	2.3
850-899	173	13.3	218,805	12.1
900-949	427	32.8	710,276	39.2
950-999	404	31.1	590,254	32.6
1000-1099	202	15.5	178,361	9.9
1100+	17	1.3	3,443	0.2
District Total:	**1,300**	**100.0**	**1,809,863**	**100.0**
Sex ratio (Rural) for District:			**936**	

Table 8 shows the sex ratio of rural population by ranges by 2001, A perusal of the table reveals that 427 villages constituting 32.8 percent of total inhabited villages covering 39.2 percent of total district rural population has a sex ratio in the range of 900 – 949 .404 villages forming 31.1 percent of total inhabited

villages and covering 32.6 percent of total rural population have a sex ratio in the range of 950 -999, 219 villages constituting 16.8 percent of total villages and covering 10.1 percent of total rural population have a sex ratio in the range of 1000 – 1099 to 1100 +,173 villages forming 13.3 percent of total inhabited villages and covering 12.1 percent of total population in the range of 850 – 899 ,77 villages forming 6.0 percent of total inhabited villages and it covers only 6.0 percent of total rural population in the range of less than 700 to 800 – 849.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A/Town	Urban status of town	Sex ratio
1	2	3	4
1	Aurangabad UA	UA	902
	(a) Aurangabad (M Corp.)	M Corp.	901
	(b) Aurangabad (CB)	CB	928
2	Gangapur (M Cl)	M Cl	916
3	Kannad (M Cl)	M Cl	925
4	Khuldabad (M Cl)	M Cl	925
5	Paithan (M Cl)	M Cl	952
6	Pandharpur (CT)	CT	783
7	Sillod (M Cl)	M Cl	918
8	Vaijapur (M Cl)	M Cl	935
Sex ratio (Urban) for the district:			**905**

Table 9 shows sex ratio of urban agglomerations/ towns. Sex ratio of the districts urban areas is 905 among the 9 towns, 2 towns (Pandharpur Census Town and Aurangabad Municipal Corporation) are having sex ratio below the district average (905) and remaining towns i.e. Kannad (MCl), Sillod (MCl), Aurangabad Cantonment, Khuldabad (MCl), Vaijapur (MCl), Gangapur (MCl) and Paithan (MCl) are above the districts urban average. The sex ratio is 902 in Aurangabad urban agglomeration. Aurangabad U A is below district urban average. Paithan (MCI) records the highest sex ratio i.e. 952 and Pandharpur (Census Town) records the lowest i.e. 783.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Table 10 shows sex ratio of population in the age group of 0 – 6 for tahsils 2001,The sex ratio for the Aurangabad district for 0 – 6 age group is 890.Sillod, Khuldabad and Paithan tahsils have more balanced

sex ratio in 0 – 6 age group that is 912,898 and 909 respectively.as compared to district average in 0 – 6 age grouop. Remaining tahsils namely Soegaon, Phulambari, Aurangabad, Vaijapur and Gangapur tahsils have lower sex ratio as compared to districts averages. Kannad tahsil is at par with district average (890) District rural average of sex ratio is 893 only 3 tahsils i.e Sillod, Khuldabad and paithan have sex ratio higher than district rural average. District urban average of sex ratio is 886.In urban areas 4 tahsils namely Kannad, Sillod, Aurangabad and Paithan have sex ratios above the districts urban average.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

	District (Rural) Total:	**299,140**	**158,046**	**141,094**	**893**

Sex ratio of population in the age group 0 – 6 for C. D blocks 2001 in table 11. The sex ratio for rural areas the district as a whole is 893.C.D block Sillod, Khuldabad and Paithan C.D block have higher sex ratios than the district rural average and the remaining C.D blocks namely Kannad, Soegaon, Phulambari, Aurangabad, Vaijapur and Gangapur have lower sex ratios than the district rural average.

In the nine C.D blocks of the district, there are 158046 males 141094 females as per 2001 census. Thus works out of 893 females for every 1000 males in the age group 0 – 6 years.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	135	10.4	11,309	3.8
700-749	69	5.3	10,583	3.5

Number and percentage of Scheduled Castes and Scheduled Tribe population in tahsils are given in table 14. The total population of district is 2,897,013 persons comparising 376,181 Scheduled Castess and 100,416 Scheduled Tribes. Scheduled Castess and Scheduled Tribes constitute13.0 per cent and 3.5 per cent reporting of the total population. In the rural areas the Scheduled Castes constitute 11.2 percent of total population, while

in urban areas they consitute 15.9 percent of the total populations. The Scheduled Tribes population accounts 4.8 percent of total population in rural areas and 1.3 percent of total population in urban areas of the district.

Tahsil Aurangabad shows highest percentage of Scheduled Castess population (16.1 percent) and tahsil Kannad has the lowest percentage population of Scheduled Castess i.e. 8.4 percent in all tahsil of the districts. In Soegaon tahsil has highest per centage of the Scheduled Tribes population 11.6 percent and tahsil Aurangabad has lowest (1.3 percent) Scheduled Tribes population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kannad	256,864	22,177	16,181	8.6	6.3
2	Soegaon	90,142	7,952	10,456	8.8	11.6
3	Sillod	247,189	20,787	22,704	8.4	9.2
4	Phulambri	131,327	12,273	2,276	9.3	1.7

	District(Urban) Total	**1,087,150**	**173,278**	**14,200**	**15.9**	**1.3**

Number and percentage of Scheduled Castes and schedule tribes population in urban agglomerations / towns is shown in table 18 .In the urban parts of the district proportion of Scheduled Castes and Scheduled Tribes are 15.9 percent and 1.3 percent respectively. Percentage distribution of Scheduled Castess is found higher than in Scheduled Tribes in all towns .The Scheduled Castess population in Pandharpur Census Town recorded the highest percentage of population i.e 24.1 percent and Kannad (MCl). recorded the lowest i.e 7.0 percent. Simillary the Scheduled Tribes population percentage is highest in Aurangabad Cantonment i.e 5.8 percent; Aurangabad (M.Crop) and Paithan (MCl) both recorded the lowest percentage (1.0 percent) of Scheduled Tribes population to total population. Proportion of Scheduled Castes populaton Aurangabad U.A recorded 17.0 percent, while Scheduled Tribes population Aurangabad U.A is 1.2 percent.

Sex ratio (Urban) for the district:		**931**	**926**

Table 20 shows sex ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns. Within the district in urban areas the sex ratio of Scheduled Castes and scheduled tribe are 931 and 926 respectively. The highest sex ratio of Scheduled Castes record in Paithan (MCl) i.e. 1025 and Pandharpur Census Town records the lowest sex ratio i.e.876. The sex ratio is highest among Scheduled tribe in Vaijapur MCl i.e. 1092 and lowest in Sillod MCl i.e.871 in all towns. Of the 9 towns, the 4 towns are having sex ratio of Scheduled Castes above districts urban average. These towns are Aurangabad (CB) 1006 Vaijaphur MCl (964), Gangapur MCl (966), Paithan MCl (1025). The sex ratio in remaining 5 towns is below the districts urban average for Scheduled Castes, while in Scheduled Tribes three towns are above the district urban avarege. These towns are Vaijapur MCl (1092), Gangapur (MCl) (1015) and Paithan (MCl) (1029) remaining six towns are below district urban average.

The sex ratio of Scheduled Castes and Scheduled Tribes reorded in Aurangabad U.A is 928 and 921 respectively. Scheduled Castes and Scheduled Tribes both are below the district urban average.

Table 21 shows the number and percentage of literates and illterates by tahsils 2001. The literacy rate for the district as a whole is 72.9 percent. The rural and urban literacy rates are 67.0 percent and 82.7 percent respectively. For the district as a whole, the literacy rate for males is much higher than females. As much as 84.9 percent of the males are literates while females account only 60.1 percent. Aurangabad tahsil shows highest percentage of male literates 88.9 percent and Soegaon tahsil shows lowest percentage of literates i.e. 79.6 percent. Urban literacy rate in both sexes is higher than rural literacy rate. In male and female illiteracy rate all tahsils except Aurangabad are below the district average. Gap in male and female literacy rate, is rural literacy rate is higher than in urban areas in all tahsils and district also. Gap in male-female literacy rate of the district is 24.8 percent.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 24 shows number and percentage of literates and Illiterates by sex in urban agglomeration/towns. The districts urban literacy rate is 82.7 percent. Among the 9 towns the percentage of literates from 74.4 percent in Pandharpur C.T. to 85.7 percent in Aurangabad Cantonment. The 7 towns are below the districts average (82.7 percent and two towns are above the districts urban average, Aurangabad (M.Corp) (83.7 percent) and Aurangabad C.B (85.7 percent). The highest male literacy rate recorded in Aurangabad Cantonment i.e. (91.5 percent) and lowest in Pandharpur Census Town (85.1 percent). 7 towns are below district average (90.2 percent) and 2 towns Aurangabad (M.Crop) (90.8 percent) and Aurangabad Cantonment (91.5 percent) are above district average while highest literacy rate of female is in Aurangabad cantonment (79.5 percent). The lowest is in Pandharpur Census Town (60.2 percent) all towns except Aurangabad (M.Crop) and Aurangabad Cantonment are above the district average (74.4 percent). The gap in male female literacy rate varies from (12.0 percent) in Aurangabad Cantonment to (24.9 percent) in Pandharpur (Census Town). The district male female literacy rate is (15.8 percent). Percentage of literates of Aurangabad U.A is (83.7 percent). Aurangabad U.A has above the district average.

Number and percentage of main workers, marginal workers and non workers by sex in C.D blocks shown in this table. The district as a whole 40.4 percent is rural population recorded as main workers, 7.3 percent recorded as marginal workers remaining 52.3 percent as a non workers. Among the main workers percentage of male and female workers is 46.8 percent and 33.6 percent respectively. 4.9 percent males and 9.9 percent female workers are recorded as marginal workers respectively and 48.4 percent males and 56.6 percent female are recorded as non workers respectively.

The proportion of male workers is higher than female workers in main workers and non-workers category. The C.D Blocks Vaijapur C.D.Block recorded highest percentage (43.7 percent) of main workers and khuldabad C.D Block recorded lowest percentage (36.9). Marginal workers in Phulambri C.D Block recorded highest percentage (11.1 percent) and Aurangabad C.D Block recorded lowest percentage (4.8 percent). Aurangabad C.D Block recorded highest percentage in non workers (55 percent) and Vaijapur C.D. Block recorded lowest (47.4 percent).

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomeration/towns. In urban population of the district 27.1 percent workers are recorded as main

workers, 1.8 percent as a marginal workers and 71.1 percent as a non workers. Among main workers there is vast difference in male and female share. Male recorded 43.7 percent and female recorded 8.8 percent workers. Male and female share in marginal workers is quite similar i.e. 2.1 percent and 1.5 percent respectively. 54.2 percent males and 89.8 percent females are recorded as a non workers respectively in urban area of the district. Proportion of male main workers is higher than female main workers and marginal workers. In non workers female workers are higher than male workers. Within the towns Pandharpur CT recorded highest percentage of main workers (33.6 percent) and Sillod MCl recorded the lowest (24.8 percent). In marginal workers Khuldabad MCl recorded the highest percentage (5.0 percent) and Kannad MCl recorded the lowest (1.3 percent) and in non-workers highest percentage in Sillod MCl (72.6 percent) and Pandharpur CT recorded the lowest 61.7 percent in urban area. Within the district Aurangabad U.A recorded 27.1 percent as main workers, 1.5 percent as marginal workers and 71.4 percent as non workers.

Note: Percentage of Workers to total workers are given in brackets

Distribution of workers by sex in four categories of economic activity in tahsils showns in this table. The economic activity of the district there are 40.6 percent total workers. Total workers is primarily dependents on agriculture which is supported by the fact that cultivators (37.5 percent) and agricultural labourers (24.6 percent), together constitute (62.1 percent) of the total workers of the district. Percentage of Household Industry Workers is (1.7 percent) and percentage of other workers is (36.2 percent) Phulambri tahsil records highest percentage (60.7 percent) in cultivators category and lowest records Aurangabad tahsil (15.2 percent). In Agricultural laborers category highest percentage is recorded in Soegaon tahsil (51.0 percent) and Aurangabad tahsil record the lowest percentage (8.6 percent). In household industry workers category Gangapur tahsil record highest percentage i.e. 2.3 percent and Soegaon tahsil record the lowest percentage (1.0 percent). In other workers category Aurangabad tahsil recorded highest percentage 74.7 percent and Soegaon tahsil recorded the lowest (i.e. 9.1 percent). In the dist ict Cultivators, Agricultural Labourers and Household Industry females accounts highest percentage than male and other workers category male accounts highest percentage than female.

Note: Percentage of Workers to total workers are given in brackets

Distributions of workers by sex in four categories of economic activity in C.D.Blocks are shown in this table. There are 47.7 percent workers in total rural population of the district. Percentage of cultivators (50.3 percent) and agricultural labourers (32.4 percent) Household industry workers is only 1.7 percent and other workers category workers percentage 15.6 percent in rural areas of the district. In cultivators category Vaijapur C.D Block records highest percentage 61.7 percent and Soegaon C.D Block 38.8 percent lowest. In agricultures labourers Soegaon C.D Block records highest percentage (51.0 percent) and Aurangabad C.D Block (25.1 percent) the lowest. In household industry category Gangapur C.D Block records highest percentage i.e. (2.3 percent) and Soegaon C.D Block shows the lowest i.e. 1.0 percent. In other workers category Aurangabad C.D Block recorded highest percentage (27.3 percent) and Vaiajpur C.D Block records lowest percentage (i.e. 8.8 percent). In male female share in workers females shows higher percentage than male in Cultivator, Agricultural labourers and Household Industry workers categories. In other workers category male accounts a higher percentage than females i.e. 23.5 percent and 5.7 percent respectively.

Note: Percent of Worker to total worker are given in brackets.

Table 36 shows distribution of workers by sex in four categories of economic activity of urban agglomerations / towns. There are 28.9 percent workers in total urban population of the district. In the urban areas of the district, other workers category shows the highest percentage (92.6 percent) of workers cultivators (2.3 percent) and agricultural labours (3.3 percent) together constitute 5.6 percent total workers. Only 1.8 percent workers are engaged in Household Industry. In Cultivator category Gangapur MCI recorded the highest percentage (16.1 percent) and Pandharpur CT recorded the lowest (0.4 percent) cultivators. Agricultural labourers in Paithan MCI recorded the highest percentage (21.8 percent) while Aurangabad M.Corp recorded the lowest (1.0 percent) Household industry workes in Vaijapur MCI recorded the highest percentage (4.5 percent) and Kannad MCI and Aurangabad M Corp both have lowest percent of workers in household industry. (1.5 percent) Other workers in Aurangabad M.Corp recorded the highest percentage (96.5 percent) and Gangapur MCI recorded the lowest (60.7 percent) In the district urban areas cutltivators, agriculatural labourers, Household industry female workers, workers accounts for higher percentage than male with respect to their total population. In other workers category male workers constitute higher percentage (95.0 percent) than female (80.6 percent). Within the district Aurangabad U.A recorded 1.0 percent as Cultivator and Agricultural labourers 1.5 percent as Household Industry and 96.4 percent as Other Workers.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Educational

The educational amenity is available in 1,236 villages which constitutes 95.1 percent of the total 1,300 inhabited villages of the district. Sillod C.D.Block, has the highest (98.4 percent) and Khuldabad C.D Block with lowest (91.9 percent) number of villages with educational amenity (Table 37). The educational amenity is available to 99.2 percent population in the district (Table – 38) There are 64 villages, which do not have primary school amenity of these 55 villages have to cover a distance of 5 kms to reach a place with such amenity. 8 villages within 5-10 kms and 1 village beyond 10 + kms 633 villages which do not have middle school amenity 438 villages within 5 kms 158 villages 5-10 kms and 37 villages 10+ kms. There are 1296 villages which do not have degree college within their revenue limits. 22 villages within 5 kms 116 villages 5-10 kms and 1158 villages beyond 10+ kms. (Table-39). According to the distance range from nearest statutory town, the education facility is available to 25 villages within 5 kms, 307 villages have educational facility within 5-15 kms, 889 villages within 16-50 kms and 15 villages at a distance of 51 and above

kms (Table 40) 228 inhabited villages constituting 78.9 percent of the total 289 inhabited villages have population range less than 499 , 402 villages (99.5 percent) have population size 500-999, 374 villages (100 percent) in 1000-1999, 193 villages (99.5 percent) in 2000-4999 size, 31 villages (100 percent) in 5000-9999 population size and 8 villages (100 pecent) in 10,000 and above size have the avaibility of educational facility within the revenue limits of the villages.

Medical

Medical institutions of one or the other type are functioning in 701 (53.9 percent) villages out of 1300 inhabited villages in the district. Paithan C.D.Block has reported the medical facility for 167 villages (91.3 percent) which is highest in nine C.D.Blocks. The percentage of availability of facility in, Soegaon, Sillod, Phulambri and Paithan C.D Blocks are higher than the district average (53.9 percent) (Table 37) and 71.9 percent of its population gets the benefit (Table 38)

The villages enjoying this amenity through primary health centers, sub centers and dispensaries servers not only the resident population of concerned villages but also those residing in surrounding villages. 599 villages out of 1300 inhabited villages have medical facility in their respective village limits while 701 villages do not have any type of medical amenity (Table – 37). There are 1271 villages without the amenity of hospital and 1260 villages without PHC's. Of these as many as 88 and 249 villages are situated at a distance of less than 5 kms. With reference to the nearest place with medical facilities such as hospital and PHC respectively. Another 199 and 542 villages are located at a distance of 5-10 kms for the same medical facilities. But in the case of 984 and 469 villages the resident have to travel more than 10 kms to reach a place with these medical facilities (Table – 39).

As per the distribution of villages according to the distance range from nearest statutory town the medical amenity is available in 13 villages within 5 Kms., 161 villages have medical amenity within 5-15 Kms., 519 villages within 16-50 Kms. and 8 villages at a distance of 51 and above Kms. from nearest statutory town. (Table-40).

According to the population range the availabilities medical amenity for 87 villages (30.1 percent) covers population range less than 500, 187 villages with population range 500-999, 214 villages with population range 1000-1999,175 villages with population range 2000-4999 and remaining 38 villages with population range 5000 to 10,000 & above have medical facility available within their revenue limits (Table – 41)

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Drinking Water

Water supplied from a tap or hand pump or tube well situated within or outside the premises is considered as improved water amenity. The improved drinking water source is available in 1,209 villages (93.0 percent) out of 1,300 inhabited villages.

Postal

As regards rural areas of the district as a whole, the amenity of post and telegraph is available to 382 villages (29.4 percent) out of 1300 inhabited villages serving 54.4 percent of rural population of the district. Within 9 C.D.Blocks of the district, the percentage of villages having facility of post and telegraph varies considerably. In Vaijapur C.D Block the post office amenity is available to as high as 64.7 percent of the total population. This is to followed by Gangapur, Sillod, Phulambri C.D Blocks etc. covering 60.6 percent, 59.8 percent, 56.1 percent respectively.

Postal facilities are not available at all in 918 villages. Out of these 627 villages are situated at a distance of less than 5 kms, 244 villages have to cover a distance between 5-10 km to avail the postal facility. People of 47 villages have to cover distance more than 10 km for availing postal facility. (Table – 39). As per distribution of villages according to distance from nearest statutory town 7 villages are situated at a distance less than 5 Kms., 103 villages at a distance of 5-15 Kms. and 269s villages at a distance of 16-50 Kms., and 3 villages at a distance of 51 and above Kms. above Kms. (Table-40). Among the 382 villages with facility of post and telegraph 22 villages are having less than 500 population, 46 villages are in population range 500-999, 126 villages are in the range of 1,000-1,999, 152 villages are in the range of 2,000-4,999 and remaining 36 villages have the population range of 5,000 to 10,000 and above.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kms.	5-10 kms.	10+ kms.	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	55	8	1	64

3. Post Office	627	244	47	918
4. Telephone	426	288	226	940
5. Bus Service	315	60	9	384
6. Banks				
(a) Commercial Bank	317	432	463	1,212
(b) Cooperative Bank	505	401	276	1,182
7. Agricultural Credit Societies	304	95	58	457

Telephone

The amenity of telephone is available in 360 villages (27.7 percent) of the district. These villages serve 50.3 percent of rural population of the district. Khuldabad C.D.Block with 66.1 percent has the highest proportion of total population whereas Soegaon C.D.Block with 30.9 percent. The lowest Kannad, Khuldabad, Aurangabad and Gangapur C.D.Blocks having higher proportion of population than district average (50.3 percent) (Table-38).

Telephone amenity is not available in 940 villages. Out of these as many as 426 villages situated at a distance of less than 5 kms. 288 villages have to cover a distance between 5-10 kms to avail the telephone amenity. People of 226 villages have to cover a distance of more than 10 kms to get telephone amenity (Table – 39). There are 10 villages with the amenity at a distance of less than 5 Kms., 115 villages at a distance of 5-15 Kms., 229 villages at a distance of 16-50 Kms. and 6 villages are at distance of 51 and above Kms. from nearest statutory town (Table-40). Among 360 villages with the amenity of telephone, 19 villages are having less than 500 population, 79 villages are in range of 500-999; 106 villages are in range of 1,000-1,999; 118 villages are in range of 2,000-4,999 and remaining 38 villages are in range of 5,000 and above.

Transport and Communications

Transport communication includes bus service, rail facility and having navigable waterways. If a bus stop or railway station or navigable waterway is located within the territorial jurisdiction of a village, it is considered to have been served by such facility even it is little away from the actual settlement. 916 (70.5 percent) villages have communication amenity available serving 85.5 percent of the rural population of the district 120 villages of Sillod C.D.Block constituting 93.8 percent of total villages have the highest proportion of villages where communication / transport amenity is available while the Paithan C.D.Block with 55.2 percent coverage of villages holds the last rank (Table 37).

Out of 1,300 inhabited villages 384 villages do not have any communication amenity of these villages the residents of 315 villages have to cover a distance upto 5 kms to reach a place with such amenity. In 60 villages it is between 5-10 kms and for 9 villages it is beyond than 10 kms (Table- 39). As per distribution of villages according to the distance range from nearest statutory town this amenity is available in 20 villages within 5 kiometers, 229 villages at a distance of 5-15 Kms., 654 villages at a distance of 16-50 Kms. and 13 villages are at a distance of 51 and above Kms.. (Table-40). The availability of this amenity depends upon the location of the village with reference to road. Among the 916 villages which have the availability of communication amenity. Within their respective limits, the population for 122 villages is less than 500, for 263 villages in the range of 500-999, for 306 villages in the range of 1,000-1,999, 187 villages in the range of 2,000-4,999 and the remaining 38 villages fall in the range of 5,000 and above. Thus the population size of a village has an impact on the availability of communication amenity.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and Telegraph office.
$ Transport communications includes bus service, rail facility and navigable waterways.

Banking

The facility of banking services is available in 147 villages (11.3 percent) out of 1,300 inhabited villages serving 30.8 percent rural population of the district. 16 villages (18.2 percent) having highest banking amenity available in Phulambri C.D.Block and 12 villages (6.7 percent) having lowest banking amenity available in Aurangabad C.D. block.

Out of 1,300 inhabited villages the people of 317 and 505 villages have to cover a distance upto 5 kms for availing the amenity of commercial bank and co-operative bank respectively for 432 and 401 villages the amenity is available at a distance of 5-10 kms and for remaining 463 and 276 villages the amenities available at a distance of more than 10 kms (Table-39). 44 villages are having banking amenity at a distance upto 15 kms from the nearest statutory town and 101 villages are having the amenity available to the distance range of 16-50 from the nearest statutory town and 2 villages at a distance of 51 and above Kms. from the nearest statutory town. (Table-40).

Out of 147 villages 3 villages are having banking amenity in the range of less than 500, 33 villages in the range of 500 to 1999, 78 villages are in the range of 2,000-4,999 and remaining 33 villages in the range of 5,000 and above.

Agricultural Credit Societies

There are 843 villages having (64.8 percent) agricultural credit societies in the district. These villages serve 81.3 percent of the population. The highest proportion of villages 69 (78.4 percent) have the amenity available in the Phulambri C.D.Block and lowest i.e. 35 villages (46.1 percent) in soegaon C.D.Block. 463 villages are not having this amenity. Out of these as many as 304 villages are situated at a distance upto 5 kms, 95 villages within 5-10 kms, and 58 villages at a distance more than 10 kms. Where amenity is available (Table – 39). As per the distribution of villages according to availability of amenities from the nearest statutory town, 15 villages are situated at a distance of less than 5 kms from the nearest statutory town, 216 villages at a distance of 5 to 15 kms, 604 villages at a distance of 16-50 and only 8 villages are at distance of 51 kms and above (Table 40)

95 villages having this amenity with population less than 500, 224 villages with population of 500-999, 305 villages with population of 1,000-1,999; 182 villages with population 2,000-4,999 and remaining 37 villages with population 5,000 and above. (Table-41).

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

Road whether Pucca or Kachcha are the nerve system of a district. They act as factor for the development and upliftment of the areas. Roads with cement concrete, black top, water bound macadam etc come under pucca roads and the remaining are treated as kachcha roads.

Pucca road amenity is available to 1080 villages (83.1 percent) Out of 1300 inhabited villages in the district. Population of 1695232 persons (93.7 percent) avails of the approach road amenity. (Table – 38) A highest numbering 165 villages (90.2 percent) have amenity available in Paithan C.D.block and the lowest 148 villages (75.1 percent) in Kannad C.D.Block.

287 villages at a distance of upto 15 kms from the nearest statutory town 778 villages at a distance 16-50 kms and remaining 15 villages are at a distance range of 51 and above kms from nearest statutory town. (Table-40). The populating 161 villages (55.7 percent) served by Pucca road is less than 500, for 331 villages (81.9 percent) it is in the range of 500-999, for 356 villages (95.2 percent) in the range of 1000-1999, for 193 villages (99.5 percent) in the range of 2000-4999 and remaining 39 villages (100.0 percent) having population range 5000 and above. (Table-41). Population size is an important factor directly associated with availability of Pucca road facility. Larger the size of a village, greater are the chances of its having this facility.

Power supply

1,286 villages (98.9 percent) are having power supply facility in the district. While the power supply is available to the highest proportion of 196 villages (99.5 percent) in Kannad C.D.Block a lowest proportion of villages 72 (97.3 percent) have the facility available in Khuldabad C.D.Block, Sillod C.D. Block having cent percent power supply amenity available. While total cent percent population in Kannad, and Sillod C.D Block have the power supply facility available to them, Phulambri, Vaijapur and Paithan C.D Blocks is 99.9 percent of the population (Table – 38).

The power supply is available to villages in the population ranges less than 500 (277 villages), 500-999 (402 villages) 1,000-1,999 (374 villages), 2,000-4,999 (194 villages) 5,000-9,999 (31 villages) and 10,000 and above (8 villages) However, all small villages with population size 1-499, do not have the power supply facility of 289 villages in this category, only 277 villages constituting 95.8 percent of total villages (289) in the category have the facility available to them.

There are total 14 villages with population less than 500 (12 villages) and 500-999 (2 villages) which do not have the power supply available to them.

It may be summed up from foregoing paragraphs that in respect of availability of different types of amenities and facilities considered. The larger villages have an advantage over the smaller ones. Population size and availability of amenities are associated with each other.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area

4	Phulambri	88	67,321	74.0	15.6
5	Aurangabad	178	118,658	66.3	12.2
6	Khuldabad	74	47,790	70.2	12.1
7	Vaijapur	164	157,383	88.9	8.0
8	Gangapur	212	130,506	84.5	11.3
9	Paithan	183	134,099	84.4	12.8
	District Total:	**1,300**	**997,375**	**77.7**	**10.4**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 shows the distribution of villages according to land use. The district as a whole has 77.7 percent of the total areas as cultivable. There are 4 C.D blocks with cultivable area above the district average i.e Sillod (80.4 percent), Vaijapur (88.9 percent) Gangapur (84.5 percent) and Paithan (84.4 percent).The cultivable area in remaining 5 C.D blocks are below district average that is Kannad (69.29 percent).Soegaon (68.2 percent),Phulambari (74 percent), Khuldabad (70.2 percent),Aurangabad (66.3 percent).Only 10.4 percent of the cultivable area of the district is irrigated .C.D blockwise examination shows that Phulambari (15.6 percent) ,Aurangabad (12.2 percent),Khuldabad (12.1 percent),Gangapur (11.3 percent), Paithan (12.8 percent).C.D blocks have better proportions of the cultivated area under irrigation.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Aurangabad (M Corp.)	880.4	546.8	333.7	880.4	269.9	5.6	31.7	19.0	554.3
2	IV Aurangabad (C.B.)	1,031.2	218.2	813.1	1,031.2	47.3	270.2	575.9	0.0	137.8
3	III Gangapur (M.Cl.)	455.1	203.5	251.5	428.0	109.8	146.9	116.6	4.3	50.4
4	III Kannad (M.Cl.)	39.4	16.7	22.7	37.1	7.0	10.0	8.5	1.4	10.2
5	IV Khuldabad (M.Cl.)	396.8	115.1	281.7	343.7	135.0	104.3	65.0	7.7	31.7
6	III Paithan (M.Cl.)	83.6	23.2	60.3	62.9	12.5	21.9	5.1	4.4	19.0
7	III Sillod (M.Cl.)	389.7	189.4	200.2	349.9	60.8	87.2	151.8	0.0	50.2
8	III Vaijapur (M.Cl.)	965.5	332.6	632.9	818.2	20.1	192.1	175.0	155.7	275.3
	District Total	**799.1**	**473.1**	**326.1**	**790.5**	**227.3**	**24.8**	**51.8**	**21.1**	**465.6**

Table 43 gives per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for nine towns of the district works out to Rs.799.1 of which Rs.473.1 are received through local taxes and remaining 326.1 are received from all other sources .The total per capita expenditure incurred is Rs.790.5, of which Rs 227.3 are spent on general administration, Rs.24.8 on public health and conveniences, Rs. 51.8 on public work, Rs.21.1on public institution and Rs 465.6 on others. Among all the towns both the receipts received and per capita expenditure incurred are the highest in Aurangabad Cantonment Board and lowest in Kannad town.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Aurangabad (M Corp.)	2.4	1.5	1.5	0.3	0.9
2	Aurangabad (C.B.)	4.2	4.2	3.1	0.5	0.0
3	Gangapur (M.Cl.)	2.2	1.3	1.3	0.9	0.4
4	Kannad (M.Cl.)	5.8	1.5	1.5	2.0	0.3
5	Khuldabad (M.Cl.)	2.3	2.3	2.3	1.6	0.8
6	Paithan (M.Cl.)	2.3	1.2	1.2	0.9	0.3
7	Sillod (M.Cl.)	2.3	2.1	1.8	1.1	0.2
8	Vaijapur (M.Cl.)	6.5	2.4	1.6	0.3	0.3
	District Total	**2.7**	**1.6**	**1.5**	**0.4**	**0.3**

Table 44 indicates schools per ten thousand populations in towns. On an average the ratios of schools per ten thousand population in urban areas in the districts are 2.7 percent (Primary) 1.6 percent (Junior Secondary/ Middle) 1.5 percent (Secondary / Matriculation) 0.4 percent (Senior Secondary) 0.3 percent (Colleges) in the district. Vaijapur M.Cl. recorded highest number of primary schools (6.5 percent) and Gangapur M.Cl. recorded the lowest (2.2 percent) according to its population. Aurangabad Cantonment recorded the highest numbers (4.2 percent) Junior Secondary / Middle Schools, while Secondary / Matriculation Schools are in higher number in Aurangabad Cantonment (3.1 percent) higher numbers of Senior Secondary Schools are in Kannad MCl (2.0 percent) and higher numbers of colleges are in Aurangabad M.Corp. (0.9 percent).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Aurangabad(M Corp.)	27
2	Aurangabad(C.B.)	10
3	Gangapur(M.Cl.)	25
4	Kannad(M.Cl.)	6
5	Khuldabad(M.Cl.)	23
6	Paithan(M.Cl.)	17
7	Pandharpur(C.T.)	8
8	Sillod(M.Cl.)	7
9	Vaijapur(M.Cl.)	20
	Distrct Total	**25**

Table 45 gives the number of beds per 10,000 population in medical institutions in towns. On an average there are 25 beds per ten thousand population in urban areas of the district. Aurangabad M. Corp. shows higher number of beds i.e. 27 beds and Kannad MCl shows the lowest number i.e. 6 beds per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Aurangabad	873,311	159,353	18.2
2	Aurangabad Canntonment	19,172	0	0.0
3	Gangapur	22,325	7,320	32.8
4	Kannad	34,403	600	1.7
5	Khuldabad	12,794	800	6.3
6	Paithan	34,518	6,000	17.4
7	Sillod	43,867	925	2.1
8	Vaijapur	37,064	3,916	10.6
	District Total	**1,077,454**	**178,914**	**16.6**

Proportion of slum population in towns is shown in table 46. Only statutory towns maintained in this table. The proportion of slum population to total population is 16.6 percent in the district. The slum population in Aurangabad, Gangapur and Paithan towns is higher than the district average. Gangapur town records the highest percentage i.e. 32.8 of the slum population while Kannad town records the lowest percentage i.e. 1.7 percentage of slum population. There is no slum population in Aurangabad Cantonment.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Aurangabad (M Corp.)	Two Wheelers Wine Tyres	Medicines Polyester Films T.V.
2	Aurangabad (C.B.)	Animal Skin -- --	Milk Animal Skin --
3	Gangapur (M.Cl.)	Sugar Cane Wheat Cotton	Sugar Wheat Cotton
4	Kannad (M.Cl.)	Sugar Tobacco Foodgrain	Sugar Cotton Wheat
5	Khuldabad (M.Cl.)	-- -- --	Spinning And Ginning Cotton Sugar Cane Fish
6	Paithan (M.Cl.)	Wooden Furniture Ice --	Paithani Saree Fish Jowar
7	Pandharpur (C.T.)	Agricultural Instruments Medicine Plastic	Agricultural Machinery Auto Parts Engineering Machinery
8	Sillod (M.Cl.)	Sugar Cotton Jowar	Sugar Cotton Maize
9	Vaijapur (M.Cl.)	Groundnut Exercise Notebooks Bidi	Onion Cotton Bidi

Table 47 shows most important commodity exported out of and manufactured in towns. The main items manufactured in the district are two wheelers, wine, tyres, animal skin, sugarcane, wheat, cotton, sugar, wooden furniture, Jowar, groundnut, Bidi etc.

The main item exported are medicines, T.V., Polyster flims, milk, sugar, cotton, fish, Jowar, Auto parts, Agricultural machinery, onion, Bidi, Paithani sarees etc. These items are mainly exported to Mumbai, pune and other neighbouring places Paithani sarees are exported to all over India and overseas also.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	1	1	2	1	1	1	1	1	2

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 gives the distribution of households by tenure status and number of rooms occupied per total, rural and urban areas of the district. This table also gives similar information for scheduled caste and scheduled tribe households for the district. According to 2001 census there are 16,851 households having no exclusive room, 283,729 households having one room 141,737 household having two rooms, 48,985 household having three rooms and 34,853 household having 3+ rooms.

Regarding rural and urban areas of the district there are 14,766 and 2,085 households respectively having no exclusive room. 211,932 and 71,797 households having one room, 83,691 and 58,046 households having two rooms, 17,128 and 31,857 households having three rooms, 7,306 and 27,547 households having 3+ rooms respectively.

Among the scheduled castes households 2,872 households comprising 2,416 rural and 456 urban

households having no exclusive room 53,458 household comprising 33,478 rural and 19,980 urban households having one room. 20,102 households comprising 8,780 rural 11,322 urban households having two rooms. There are 5,570 households comprising 1,284 rural 4,286 urban households having three rooms and 3,330 households comprising 537 rural 2,793 urban having more than three rooms.

Within scheduled tribe household of the district there are 1,584 households comprising 1,399 rural 185 urban households having no exclusive rooms, 24,450 households comprising 19,940 rural 4,510 urban households having one room, 7,315 households comprising 4,104 rural 3,211 urban households having two rooms, 2,014 households comprising 681 rural 1,333 urban households having three rooms and 1274 households comprising 253 rural 1,021 urban households having more than three rooms.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The total percentage for the three categories viz.Permanent, Semi Permanent and Temporary may not add to 100 percent, the percentage remaining is for the 4th category Unclassified not shown in the table.

This table gives percentage distribution of households living in permanent, semi permanent and temporary houses in Aurangabad district. According to 2001 Census, out of total houses of the district 51.3 percent households are living in permanent houses 33.3 percent households are living in semi permanent houses and 15.3 percent households are living in temporary houses as per defination given in note below the table 49. Regarding rural areas of district 35.1 percent households are in permanent houses 41.7 percent households are living in semi permanent houses and 23.1 percent households are living in temporary houses. Within the urban areas 79.6 percent households are living in permanent houses 18.6 percent households are living in semi-permanent houses and only 1.8 percent households are living in temporary houses.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or o utside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

According to 2001 census the facility of improved drinking water is available for 419,628 households constituting 79.8 percent of the total households. In rural and urban areas of the district this facility is available for 237,394 (70.9 percent) and 182,234 households (95.2 percent) respectively. The facility of electricity is being enjoyed by 404,475 households (76.9 percent). In rural and urban areas of the district this facility is being enjoyed by 222,450 households (66.4 percent) and 182,025 households (95.1 percent) respectively.

The facility of bathroom is available in 302,140 households constituting 57.4 percent of the total households. In rural and urban areas this facility is available for 138,284 households constituting 41.3 percent and 163,856 households constituting 85.6 percent of total households respectively.

The facility of toilet is available in 203,462 households which constituting 38.7 percent of the total households in the district. In rural and urban areas this facility is available in 46,060 (13.8 percent) and 157,402 households (82.3 percent) respectively.

The facility of drainage is available 355,787 households constituting 67.6 percent in the district. For rural and urban areas this facility is available in 186,619 (55.7 percent) and 169,168 households (88.4 percent) respectively.

Percentage in brackets

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas. Of the 526,155 households 266,047 (50.6 percent) households use firewood for cooking, 38,942 (7.4 percent) household use crop residue, 7,099 (1.3 percent) use cowdung cake, 1,352 (0.3 percent) use electricity, 483 (0.1 percent) use coal / lignite (charcoal), 109,551 (20.8 percent) use cookinggas (L.P.G.), 569 (0.1 percent) use bio-gas, 99,962 (19.0 percent) use kerosene, and 424 (0.1 percent) use others. 1,726 (0.3 percent) households reporting no cooking being done by them.

In the rural areas 248,368 households constituting (74.2 percent) of the total households use firewood for cooking. This followed by use of crop residue (10.8 percent), kerosene (6.8 percent), cooking gas (5.5 percent) cowdung cake (1.9 percent), bio-gas (0.1 percent). In the urban areas 91,123 households (47.6 percent) use LPG gas followed by kerosene (40.4 percent), firewood (9.2 percent) and crop residue (1.4 percent).

It may seen that while firewood continues to be the predominant fuel used in rural areas, cooking gas is predominantly used in urban areas for cooking.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table gives the number of households availing banking services and number of households having each of specified asset 2001.

There are 526,155 households of which 334,823 are rural and 191,332 urban. The banking facilities are being availed by 224,013 households of which 126,966 households are rural and 97,047 urban. It may seen that a higher proportion of households in urban areas 50.7 percent utilize the banking facility as compared to the rural areas 37.9 percent of the total rural households.

In the district 144,868 households own radio/ transistor 235,876 own television, 48,259 households own telephone, 135,782 have bicycle, 84,120 households posses scooters, 13,843 households possess car, jeep, van. It may be noticed from the information available of these 526,155 households, 210,518 households do not possess any of the above specified assets. In the rural and urban areas, there are 171,153 and 39,365 such households respectively, who do not possess any of the specified assets.

(viii) Major Social And Cultural Events, Natural and Administrative Developments and Significant Activities During the Decade.

During the decade, 1991-2001, 1 new tahsil and 2 new villages were created in the district. Tahsil Phulambri was created in Census 2001. While village Gokulpur was carved out from Deulgaonwadi village in Sillod Tahsil , Taryachiwadi village was carved out from Hajipurwadi Village in tahsil Vaijapur. During the decade, one village, Kannad (rural) was merged in Kannad, Municipal Council, and one new census town, Pandharpur has been created, thereby increasing the number of towns to 9 in Aurangabad district.

(ix) Brief Description Of Places Of Religious, Historical Or Archeological Importance In The Villages And Places Of Tourist Interest In The Towns Of The District.

Fairs and Places of Tourist Importance

The concentration of fairs is heavier in the district as in rest of Maharashtra. Most of the fairs held in the district are associated with important deities and religious festivals. Life of people is full of celebrations of all kinds. There are holidays and other religious festivals and anniversaries of incarnations and mythological heroes which are observed every year. So far as trade is concerned, fairs are complementary to the weekly markets. In the fairs, the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and articles of daily use are brought for sale. The people buy necessary articles in

these fairs. In this district, four fairs are reported to be very famous. Abdulla shamiya urus is held during October/November in Sekta village of Aurangabad tahsil. Khandoba fair is held during margashirsh Sud-6 (Champa shahti) in kannad town. Both these fairs have more than 10,000 gathering. The urus held in Khuldabad town viz. Hazrath Khoga Moutangle uddin Saheb Urus has a gathering of more than 25,000. It is held during 1 to 8 (Hijari). The biggest fair in the district is Sant Eknath Maharaj fair, held in paithan town in the month of March. It is attended by more than one lakh people. Besides these fairs, a number of Urus/Fairs are also held in the district.

Places of Historical and Tourist Importance

In shaping the Socio-Economic pattern of the district, certain parts, a few old temples and picnic points also play an important role. In Aurangabad there is a lift and rhythm to the name evoking memories of a splendid heritage, for this city was founded as a vice regal capital in the Deccan by the Moghal Emperor Aurangzeb. The fort wall surrounding the city is a poignant reminder of its ancient history. Though the splendour of the 16th and 17th centuries found its finest expression on the royal monuments of Delhi and Agra, there is enough in Aurangabad to reward the curious visitor.

Bibi ka Maqbara

It is a beautiful mausoleum dedicated by the Prince Azam Shah to the memory of begam Rabia Dorani, the wife of Aurangazeb. Built by Azam Shah in 1678, the Bibi Ka Makbara is a Son's loving tribute to the memory of his mother, Begum Rabia Dorani, the queen of Mughal Emperor Aurangazeb. The white marbled monument locked on the lawns of landscaped garden with ponds, fountains and water channel;s rises majestically in a replica of the world famous the Taj Mahal at Agra.

Pan Chakki

It is an intriguing water mill dating back to the 17th century. Ingenious engineers channelled and brought down water from a spring on a hill some distance away to generate energy to turn the large grinding stones which served as a flour mill in times gone by.

Aurangabad Caves

Just outside the city, a cluster of caves probably excavated in the early sixth century are hidden in the hills. There are "Tantric' influences evident in the iconography and architectural designs of the caves. Some of the chaitya halls here are constructed on a mandala plan for the circumambulation of the Buddha, who is depicted here seated on an intricately carved throne.

Ajanta Caves

Ajanta caves are located about 99 kms. north of Aurangabad. It takes barely two hours from Aurangabad to Ajanta, two hours to transport oneself to the second century B.C. when the first of these caves was hollowed out from the side of the cliff.

Early in the 19th century a party of British officers scrambling over the thickly wooded slopes of Sahyadri hills, discovered these caves buried under debris and screened by foliage. Strung out in a sweeping horseshoe shape in an inner fold of the hills, the caves were a secluded retreat for Buddhist monastic orders and yet offered easy access to the trade routes that swung past here to the coast.

The caves are cut in a shallow horizontal stratum of hard trap, damaged by intrusions of green stone, bedded in a softer rock, which weathering badly, has caused many of the columns to crumble away with little more than hammer and chisel and with a deep faith inspiring them, these simple monks excavated chaityas, chapels for prayer and viharas, monasteries where they lived and taught and carried out ritual performances.

The making and adorning of these caves is supposed to have lasted for about 1000 years and contain numerous images of Budha. There are in all 29 caves. The sculpture in cave 26 is elaborated and beautiful, highlights are the panel of the temptation of Buddha and the Parinirvana depicting the breaking of earthly ties and Budddha's passing into nirvana a wounderful recumbent figure amid people in attitudes of mourning and sorrow.

Under the royal patronage of ruling dynasties professional artists helped monks and left a record of

contemporary life with palaces and princess and processions alongwith tales of piety and faith. Narrative panels in the caves illustrates stories from the jatakas. The nymphs, princesses and attendants of Ajanta are women of exquisite elegance and charm, hair dessed in intricate styles and jewels highlighting slender necks and wrists.

Ellora caves

Ellora caves are located about 30 kms. from Aurangabad. There are about 34 caves, all are impressive in terms of architectural splendour. 16 of them are Hindu, 13 are Buddlhist and 5 of the Jain faith. These rock temples and monasteries were constructed between the fifth and eighth centuries A.D.

The Kailasa temple (cave 16) dedicated to Shiva, is unquestionably the most glorious achievement here. Transcending the earlier concept of a cave temple hollowed out of rock, the whole splendid structure of Kailasa is "an enormous monolithic rock carving in architectural form". Three great trenches were cut down into the rock and beginning from the top of the cliff, work progressed down to the base. Massive blocks had to be left intact to fashion the inner sanctuary, the porch, the two free standing pillars, the life sized elephant in the courtyard, lesser shrines and cloisters. The main shrine was placed on a high podium which was carved in a continuous frieze of lions and elephants that seem to carry the massive structure effortlessly on their backs as they march in slow procession.

Khuldabad

Khuldabad is situated about 32kms. north-west of Aurangabad. It is famous for the tomb of Aurangzeb, his son Azam shah and his wife.

Ghrishneshwar Temple

Less than half a kilometer from Ellora is the Ghrishneshwar temple. Ghrishneshwar due to the exquisitely red colour and the 'gopur' looks marvellously beautiful and it is believed that this is the only 'gopur' of its kind in India adorned by images of Shiva and Parvati. It is one of the 5 Jyotirlingas of Maharashtra.

Pitalkhora Caves

In a remote and picturesque defile on the ancient trade route linking Ajanta and Ellora, progressing to the coast and 78 kms. from Aurangabad, is a group of 13 cave sanctuaries-chaityas and viharas dating back to the second century B.C. with additions in the fifth and sixth centuries. The beautiful sculptural façade of the great Vihara (Cave 4) is still impressive though it has largely crumbled away. The relief work in Paithalkora is richer and more elaboral, the carving more precise than at other early sites.

Paithan

The ancient city and pilgrimage centre of Paithan is situated on the banks of the Godavari, 56 kms south of Aurangabad. The Marathi poet-saint Eknath lived here and several centuries ago Paithan was famous as a seat of learning. It is also well-known for the beautiful Paithanis silk sarees with intricate zari borders.

Of special interest to nature lovers are the gardens around the Jayakwadi dam nearby where observation points enable you to watch resident and migratory birds.

Forts

Daulatabad fortress with an amazing history started as an old Hindu stronghold that was captured and plundered in the 13th century. Made the second capital of the Delhi Sultanate a hundred years later, Daulatabad was held as a fine fortress by successive dynasties in the deccan. Dominated by a great conical hill, Daulatabad commanded a natural pass, artificial scarping made it impregnable. The chand Minar, a 30 metre high minaret with three circular galleries, looked down over the approach from the north and east and had a defensive as well as religious role in this fortress.

Antur fort is situated about 26 kms. north east of Kannad on the sphere of a hill which projects into Khandesh. The fort was built about the middle of the 15th century by a Maratha chief and was named after him.

There are several other hill forts, which are ruins such as Saitonda, Vaisagad, Longha and Paidka.

(x) Major Characteristics Of The District, Contribution Of The District In The Form Of Any Historical Figure Associated With The District

Major Characteristics Of The District

Being located in the Godavari and Tapi basins, the district has been endowed with agricultural land. It grows extensively jowar, bajra, cotton and groundnut as Kharif crops and wheat and jowar as Rabi crops. Cotton and sugercane are grown as cash crops. The area under sugercane has increased in the recent years alongwith the increase in the number of sugar factories. Other economic resources found in the district are not of great value i.e., fishing is limited to inland water only. Eventhough the minerals of economic value are not reported, some precious minerals like jasper, agata etc. are found in the basalts. Forests are found extensively in Aurangabad, Kannad and Soegaon tahsils.

Aurangabad is mainly agricultural rather than industrial district since olden times. Industrial activity in the modern science owes its origin to the recent past. Nowadays industrial activity in the district found a new horizon. Many large scale, medium scale and small scale industries have become operational like engineering, mining and quarrying, cotton ginning and processing, sow milling, oil industry etc.

Historically this is one of the most famous district in India. Tourism is one of the major industry of the district. Tourists from all over the world throng here for starting a journey back into time i.e. visiting the world famous Ajanta, Ellora and Aurangabad caves and nearby historical monuments. It is accessible by air, rail and road from Mumbai as well as Delhi. Maharashtra Tourism Development Corporation runs tourist homes at Aurangabad. Ajanta and Fardapur.

As in the other districts, most of the people depend on agriculture. Their appearance is very simple. In villages, the standard of living among carpenter, potter, cobbler etc. is similar to that of a cultivator. Jower is the staple food. In villages , cultivators celebrate 'Pola' festival very enthusiastically. Gudipadva, Nagapanchami, Ganeshotsav, Dasera, Diwali, Holi, Christmas, Ramzan, Id, Buddha Jayanti and Mahaveer Jayanti are celebrated throughout the district. In town places, Ganeshotsav is celebrated in a big way. In each Mohalla Ganeshotsav mandals take the initiative and on the last day in a big procession Lord Ganesha is taken for immersion.

Contribution of the District

Paithan town since quite early times has been a religious centre of great importance and has been the birth place of many noted saints such as Bhanudas, Eknath, Mukteshwar etc. who are highly revered even today.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, availability of commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban

agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name and location code number of village and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power supply, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV are included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools respectively.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

This column provides data available on medical amenities in the village.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 : Post, Telegraph and Telephone

Column 9 provides the postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village.

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc., the same

is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given.

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given.

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded.

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable waterway, the same has been indicated in this column.

Column 14 : Approach to village

Approach to village refers to the state of road leading to village.

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

This column relates availability of Power Supply in the village.

Column 17 : News Paper / Magazine

If the village receives any News Paper/ Magazines the same is noted in this column.

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department.

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / Non-municipal Towns.

Appendix - IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to the proportion of the Scheduled Tribes to the total Population by ranges.

Town Directory :

The town directory is presented for each town covering different aspects of urban life. In 2001 Census, Statement I – VII have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finance, civic, medical, and educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutory notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns the Tahsildar and cantonment executive officers supplied the information.

Statement I-Status and Growth History

Statement I shows the status and growth history of the towns in the district, column 2 in this statement indicates class, name and civic administration status of a town. Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and National level. Census towns have no urban civic status.

Column 3 indicates location code number of the town, column 4 gives name of tahsil and column 5 shows the name of C.D.Block. Column 6 presents area in Sq. Kms., Column 7 presents number of households including houseless households.

Column 8 to 18 gives population and growth rate of town since 1901 and would help in drawing the trends in their growth rate, Column 19 presents density and Column 20 to 22 presents sex ratio.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV-Civic and other Amenities, 1999

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 3 and Schedule Castes/ Scheduled Tribes population given in column 4 and 5 have been added to help in measuring amenities in respect of population size of the weaker sections in the towns. The information on the road length within the town shown under column 6 has been obtained from Municipality.

Column 7 to 12 reflects the information on system of sewerage, number of latrines, and method of disposal of night soil.

Column 13 indicates sources of protected water supply to the inhabitants of the towns. The information on storage and capacity is shown under column 14.

Column 15 gives information regarding availability of fire fighting services. In case it is not available in the referent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Column 16 to 20 pertains to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, are treated as independent units.

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc.

Column 6 to 9 :

The information on educational facilities is reflected in columns 6 to 9

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or Elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle schools with Primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M (3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded.

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non-Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

PART A
VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a)Note Explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12:Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water way they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If a village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE

(vii)	Tank	TK

Section II - Town Directory

(a) Note Explaining the abbreviations used in Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board / Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called seperate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) and others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 : Medical

The data covers all such medical institutions run by or aided by Government / Semi Government / Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family

planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres are treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution(s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :Educational

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocation institutions like - Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :Higher Secondary / Intermediate/ Senior Secondary /PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class IV and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats.

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of the nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities.

Stadium, Cinema, Auditorium / Drama / Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading Room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies.

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area Committee etc.

1	2	3	4	5

There is no outgrowth in this district; hence the information is ‘ Nil ’.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on questions on children ever born and children surviving canvassed for all ever-married woman has been tabulated by age of the mother. From this, estimates of child mortality have been worked out using Brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

Item		Aurangabad District	Maharashtra State
		Total	Total
1	2	3	4
Q1	P	56	74
	M	51	72
	F	58	76
Q2	P	68	79
	M	71	78
	F	66	81
Q3	P	71	86
	M	75	84
	F	69	89
Q5	P	81	91
	M	79	89
	F	83	93

From the estimates of child mortality rates, it is observed that the level of child mortality in the district is lower than the state for all ages i.e., 1, 2, 3 and 5 represented by, q1, q2, q3 and q5 respectively. Although a notable feature is lower female child mortality compared to males in the district in the age group of 2 and 3 whereas the female child mortality is higher in all the ages for the state of Maharashtra. The gap between male and female child mortality rate is more for the district when compared to Maharashtra State as a whole.

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Aurangabad District		Maharashtra State	
	1981	1991	1981	1991
1	2	3	4	5
GFR	143	153	134	124
GMFR	166	179	168	157
TFR	4.6	4.6	4.3	3.7
TMFR	5.2	5.7	5.2	5.2
Crude Birth Rate (CBR)	32.6	33.8	31.8	29.8
No. of children ever born per women in the age group 45-49	--	4.5	--	4.2
Mean Age at Marriage	--	17.0	--	17.9
Child Women Ratio	--	62.8	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole in 1981, the GFR, GMFR, TFR, TMFR & CBR were 143, 166, 4.6, 5.2 and 32.6 respectively as compared with State average 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 153, 179, 4.6, 5.7 and 33.8 respectively for the district as against the State average of 124, 157, 3.7, 5.2 and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole except for 1981 GMFR. But the gap in fertility rates between the district and the State has increased in 1991.

Mean age at marriage

Mean age at marriage recorded lower for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio for 1991 Census indicates a higher ratio for the district as compared to the State.

ANNEXURE III

	Total for Nine States	40,265	85.7
	Other States	6,727	14.3
	Total	**46,992**	**100.0**

In respect of Aurangabad district out of 46,992 interstate migrants Andhra Pradesh account for 18.0 per cent, Uttar Pradesh account for 17.1 and Madhya Pradesh account for 10.3 per cent.

Rural – Urban Components Of Migration

The flow of migrants would consist of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these various streams in case of migrants is classified by place of last residence. It presents data only in relation to internal migrants. The data for Aurangabad district is presented separately.

ANNEXURE IV (ix)
Rural And Urban Composition of Internal Migrants by Place of last Residence, 2001 Census - Maharashtra

Place of last residence	Place of Enumeration		
	Total	Rural	Urban
1	2	3	4
Total Internal Migrant :			
1) Within the State			
Total	34,225,081 100.0	21,265,808 62.1	12,959,273 37.9
Rural	24,089,515 70.4	17,275,775 50.5	6,813,740 19.9
Urban	7,281,769 21.3	1,988,464 5.8	5,293,305 15.5
2) In other States of India			
Total	7,313,139 100.0	1,165,461 15.9	6,147,678 84.1
Rural	4,644,986 63.5	931,705 12.7	3,713,281 50.8
Urban	2,392,567 32.7	184,302 2.5	2,208,265 30.2

Note: The place of last residence unclassifiable as 'Rural' or 'Urban' is included in 'Total'.

Of the total 34,225,081 intrastate migrants, 50.5 per cent are from rural to rural, 15.5 per cent from urban to urban, 19.9 percent from rural to urban and 5.8 per cent from urban to rural. In case of Aurangabad district of the total 1,091,461 intrastate migrants 49.9 per cent are from rural to rural, 13.4 percent from urban to urban, 25.8 per cent from rural to urban and 4.2 per cent from urban to rural.

ANNEXURE IV (x)
Rural And Urban Composition of Internal Migrants by Place of last Residence,2001 Census - Aurangabad

Place of last residence	Place of Enumeration		
	Total	Rural	Urban
1	2	3	4
Total Internal Migrant :			
1) Within the State			
Total	1,091,461	636,578	454,883
	100.0	58.3	41.7
Rural	826,266	544,427	281,839
	75.7	49.9	25.8
Urban	192,282	46,238	146,044
	17.6	4.2	13.4
2) In other States of India			
Total	46,992	8,931	38,061
	100.0	19.0	81.0
Rural	17,574	5,388	12,186
	37.4	11.5	25.9
Urban	27,385	2,854	24,531
	58.3	6.1	52.2

Note: The place of last residence unclassifiable as 'Rural' or 'Urban' is included in 'Total'.

In case of migrants from other states 7,313,139; 12.7 per cent have migrated from rural to rural, 30.2 per cent from urban to urban, 50.8 per cent from rural to urban and 2.5 per cent urban to rural. In case of Aurangabad district of the total 46,992 migrants, 11.5 per cent are from rural to rural, 52.2 per cent from urban to urban, 25.9 per cent from rural to urban and 6.1 per cent from urban to rural.

ANNEXURE IV (xi)
Percentage of migrants to total population, 1991-2001, Aurangabad district

Serial number	Place of birth/Place of last residence	Total population	Total Migrants		
			Persons	Males	Females
1	**2**	3	4	5	6
1	**Migrants by place of birth**				
	2001 Census	2,897,013	1,119,190	404,390	714,800
			38.6	14.0	24.7
	1991 Census	2,213,779	592,476	178,683	413,793
			26.8	8.1	18.7
2	**Migrants by place of last residence**				
	2001 Census	2,897,013	1,139,535	412,658	726,877
			39.3	14.2	25.1
	1991 Census	2,213,779	599,686	181,123	418,563
			27.1	8.2	18.9

There are 1,119,190 (38.6 per cent) migrants by place of birth comprising 404,390 (14.0 per cent) males and 714,800 (24.7 per cent) females to total population in 2001. Similarly 1,139,535 (39.3 percent) migrants by place of last residence comprising 412,658 (14.2 per cent) males and 726,877 (25.1 per cent) females to total population are found in Aurangabad district.

It may be seen that the percentage of migrants by place of birth has increased in Aurangabad district during the decade 1991-2001 for both males and females. Similar trend can be seen for the migrants by place of last residence also.

Source: Table C-2 2001 census, Table C-1 of Part IV-A 1991 census.

During the 1991-2001 decade in Maharashtra state, the proportion of never married has decreased both for males and females, the proportions of married, widowed, divorced and separated has increased both for males and females (except widowed males).

The proportion of never married in age group 0-14 and 15-34 has increased in males and females while the proportion of married in the same age group has decreased in males and females.

In Aurangabad district, the proportion of never married has decreased both for male and females whereas the proportion of married, widowed and divorced/separated has increased both for male and females (except widowed and divorced/separated males). The proportion of never married in the age group 0-14 and 15-34 has increased in males and females except 0-14 age-group females.

Note: # The 1991 Census could not be conducted in 33 villages of Akkalkuwa and Akrani C.D. Blocks of Dhule District. The population of these villages (Persons 16,052 Male 8,200 and Females 7,852) has been obtained from secondary sources and included in the population of district and Maharashtra. However, further details are not available.

Source: Table C-2 of Part IV-A, C series - Socio Cultural Tables, 1991 census.

When compared to 1991 data, it is found that during the last decade the literacy rate of the state has jumped from 64.9 percent to 76.9 percent. While during the same period the districts' literacy rate has increased from 57.0 per cent to 72.9 percent.

Source : Table 31 of Maharashtra State District Profile 1991

Marathi is the principal language of the district and is the mother tongue of 69.7 per cent of the district population. In rural areas Marathi speakers account for 76.4 per cent whereas in urban areas 58.5 per cent. Urdu is the second largest language spoken in the district. It accounts for 14.8 per cent

of the total population. The proportion of Urdu speakers is higher in urban areas (24.6 per cent) than the rural areas (8.9 per cent). The third largest language spoken in the district is Hindi, its percentage to the total population is 7.9 and spoken in urban areas by 9.8 per cent people, whereas 6.7 per cent in rural areas.

The speakers of the minority languages (Gujarati, Marwari and Telugu) are mainly concentrated in urban areas and the remaining three languages (Ahirani, Banjari and Bhili/Bhilodi) are concentrated in rural areas.

It is found that during the last decade proportion of Marathi and Urdu speaking persons has decreased from 71.9 per cent to 69.7 per cent and 16.7 per cent to 14.8 per cent respectively whereas Hindi speakers proportion has increased from 5.0 per cent to 7.9 per cent.
