VILLAGE & TOWN DIRECTORY

✧

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Samir Kumar Biswas
of the Indian Administrative Service
Director of Census Operations, Maharashtra

Product Code Number

MOTIF

Mines

Of the varied mineral deposits of the district that have been taken up for exploitation by private mining concerns, the Manganese, Chromites are important minerals of the district. Most important manganese deposits are associated with a series of rocks known as “Gondites” which are looked upon as metamorphosed mangniferous sediments of Dharwar age. Next to Manganese, Chromite is found near Pauni. Besides the above two important deposits, there are also four or five belts of Kyanite-sillimanite bearing rocks.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

District Highlights – 2001 Census

1 Bhandara is one of the least urbanized district having about 15.5 per cent of its population living in urban area of the district.

2 The district sex- ratio (981) is higher as compared to the State sex ratio (922).

3 Bhandara is known as the mining district of the state for its rich mineral resources.

4 The economy of the district is mainly depending on agriculture, mining and forest products.

5 There are three villages having population 10,000 and above.

6 In Bhandara district most of the cropped area is under rice cultivation revealing that rice is king crop of the district.

7 Sakoli Village in Sakoli C.D. Block is the most populated (14,724) and Chikhalabodi village in Bhandara C.D. Block is the least populated (1 person).

8 Gidalpar village in Sakoli C.D. Block has the largest area (1964.00 hectares) and Rongha Hamesha and Nilagondi Hamesha villages in Tumsar C.D. Block have the smallest area (7.00 hectares) among all villages of the district.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

		Urban	0.0	0	0	0

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometre worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council and C.T. for Census Town

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided.. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorates were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of the District

According to local interpretation the name Bhandara is a corruption of Bhanara. Reference to Bhanara is found in an inscription of 1100 A.D. traced at Ratnapur. The district was under regency administration from 1818 to 1830 prior to 1820, the district was administered from Lanji, thereafter the headquarters of the district were shifted from Lanji to Bhandara in 1820-21. The area becames British Territory in 1853. In 1881 there were only two tahsils viz Tirora and Sakoli in the district. There were no major changes in the boundaries of the district or its talukas between 1911 and 1955 except that the headquarters of Tirora tahsil were shifted to Gondiya and name of the tahsil was changed to Gondiya tahsil in 1914. From 1947 to 1956 the district of Bhandara along with the other districts of Vidarbha region continued to form a part of the central provinces with the reorganization of states in 1956, Bhandara district was transferred from Madhya Pradesh to the Bombay State, which came into existence in the same year. In 1960, with the formation of the state of Maharashtra it formed a part of the newly created State.

At the time of 1961 census, the district comprised of three tahsil, included 1648 villages and 5 towns. In 1971 census the district had 3 tahsils comprised of 1659 villages and 5 towns. In decade 1971-81, the number of tahsils in the district remained unchanged till 1st March 1981, but there have been certain changes occured in the number of villages and towns within the district with the upgrading of hamlets/wadis in the district, the number of villages has gone up to 1774, likewise two new towns have been added.

After 1981 census, 10 new tahsils were formed from existed 3 tahsils, 26 new villages were created after 1981 census. As compared to 1981 census (1774 villages) number gone up to 1803 in 1991 census and one more town been added. Again in 2001 census Bhandara district is divided in to two districts viz Bhandara and Gondiya.

(iii) Administrative Set-Up

There were Major changes took place in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of divisions unchanged it is same in 1991 census and 2001 census. The Konkan division includes 6 districts, Nashik division 5 districts, Pune division 5 districts, Aurangabad division 8 districts, Amravati division 5 district and Nagpur division 6 districts. Thus in 2001 census, the Maharashtra state has 35 districts spread over 6 divisions. Bhandara district falls in Nagpur division. With effect from 1st may 1999, Bhandara district is divided into two districts viz., Bhandara and Gondiya for administrative purpose. The district had 13 tahsils with 8 towns, after bifurcation of the district, 7 tahsils were shifted to newly created Gondiya district. With 6 original tahsils and one newly created Lakhani tahsil Bhandara district now includes 7 tahsils.

In urban area there were 8 towns in 1991 census, among them two towns were transferred to Gondiya district. After 1991 census, 3 census towns were declassified while 3 villages received the status of census town. Thus total number of towns in 2001 census remained 6 in the district. The district has a total 870 villages spread over 7 tahsils i.e. Bhandara (169), Mohadi (108). Tumsar (148), Sakoli (96), Lakhani (104), Pauni (156) and Lakhandur (89). The following statement indicates the changes in the number of villages and towns in each tahsil during 1991-2001.

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/Tahsil	No. of villages as per 1991 Census as in Bhandara district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
Bhandara District	826	871	870	-	6	6	7 tahsils (977 villages and 2 towns transferred to newly formed Gondiya dist. Noti. No. REN/5099/CR-6/M-10 dt. 24th April 1999. 1 New tahsil created after 1991 census 45 villages transferred from Gondiya dist. 3 villages received the status of Census Town. 3 Census Towns declassified. 1 village merged in MCl.
1 Tumsar	147	148	148	--	3	2	1 village transferred from Mohadi tahsil 1 village merged in Tumsar MCl. 2 census towns declassified 1 village received the status of census town.
2 Mohadi	115	107	108	--	1	--	1 village transferred to Tumsar tahsil 7 villages transferred to Bhandara tahsil 1 Census Town declassified.
3 Bhandara	164	171	169	--	1	3	7 villages transferred from Mohadi tahsil 2 villages received the status of Census Town
4 Sakoli	140	96	96	--	--	--	69 villages transferred to Lakhani tahsil. 23 villages transferred from Arjuni Morgaon Tahsil of Gondiya district. 2 villages transferred from Deori tahsil of Gondiya district.
5 Lakhani	--	104	104	--	--	--	69 villages transferred from Sakoli tahsil 35 villages transferred from Lakhandur tahsil.
6 Pauni	156	156	156	--	1	1	--

JURISDICTIONAL CHANGES DURING 1991-2001 -(Contd.)

Name of District/Tahsil	No. of villages as per 1991 Census while in Bhandara district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
7 Lakhandur	104	89	89	-	-	-	20 villages transferred from Arjuni Morgaon tahsil of Gondiya district. 35 villages transferred to Lakhani tahsil.

For administrative purpose the district has been divided into 2 sub-divisions. Bhandara sub-division includes Bhandara, Mohadi, Tumsar and Pauni tahsils, Sakoli sub-division includes Sakoli, Lakhani and Lakhandur tahsils. The district collector along with district Judge, Superintendent of Police, Chief Executive officer of Zilla Parishad and other Senior officers of the state Government look after the development and regulatory functions in the district, At the tahsil level, the Tahsildar, Block Development officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined

by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban local bodies

The statutory urban local bodies are cantonments, Municipalities, or Municipal corporations. The urban local bodies elect councillors from each of the ward and his term is of five years. The President of the Municipal Council or the Mayer of Municipal Corporation as also their deputies are elected from amongst elected councillors. The chairmen of various committees are also elected from amongst the elected councillors. Although per day to day administration the chief officer is responsible in a municipal council, he works under the administrative control of the President of Municipal council. In corporations a senior I.A.S officer is deputed by the state Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Bhandara district lies entirely in the Wainganga basin in the extreme north-east of Maharashtra. It extends between 20° 35' and 21° 40'north latitudes and 79° 25' and 80° 10' east longitudes. The district is surrounded by Madhya Pradesh state to the north, Gondiya district to the east, Chandrapur and Gadchiroli districts to the south and Nagpur district to the west.

The district headquarters, Bhandara, town having population of 85,213 persons is located on the right bank of Wainganga River in the center of the district. Bhandara Road is the main railway station on the Mumbai-Howrah route of the south eastern railway. It is about 11 kms from the main city of Bhandara. Bhandara is well connected by rail as well as by road.

The district has an area of 4,087 sq.kms. and a population of 1,136,146 persons as per Census 2001. While the area of the district accounts for 1.3 percent of the total area of the State, the districts population constitutes 1.2 percent of the total population of the State. The density of population is 278 persons per sq. km. Among the 35 districts of the State, the district ranks 33rd in terms of area, 31st in terms of population and 14th in terms of density.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso_regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley

and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands are divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below: -

(A)Deccan Plateau:-

(i) Northern Maharashtra :-

(a) Tapi-Purna Valley:- Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola,Washim and Amravati.

(b)Wardha-Penganga-Wainganga Plain:- Includes the districts of Wardha, Nagpur, Yavatmal, **Bhandara**, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau:-

(a) Eastern Maharashtra:- Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b)Western Maharashtra with Protruded Hills:- Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:-

(i) Western Coastal Plains:-

(a) Maharashtra Littoral:- Includes the districts of Thane, Mumbai Suburban, Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Bhandara district as a whole is a part of Wardha –Penganga – Wainganga plain, the micro level division of Deccan plateau. It is a rolling plain with little variation in elevation. Within the district average elevation varies between 250 and 300 meters except for a few elevated parts. On the basis of relief and other physical characteristics the district may be grouped into five parts. 1) Satpuda Range 2) Wainganga Plain 3) Gaikhuri Hills 4) Chulband Valley, and 5) Nishti Upland.

An off shoot of the Satpuda Range covers the northern part of Tumsar Tahsil. It attains a height varying between 300 and 400 meters. The Ambagarh Hill area is the highest part in the range with an elevation of 534 meters. This range acts as a water divide between Bawanthari and Wainganga Rivers and is covered with dry mixed deciduous forests. Deposits of manganese ore are found in these hills.

The Wainganga Plain spreads over the Mohadi and parts of Tumsar, Bhandara and Pauni tahsils. A major part of the district falls in the Wainganga Plain which is almost flat and is dotted with residual hillocks. The height of the plain varies between 250 and 300 meters above mean sea level. The region slopes gently towards the south. Except for a small area near village Ahyal, this plain has no forest cover. This plain has rich fertile soil and it is famous for rice cultivation.

In the central eastern portion of the district covering parts of Bhandara and northern Sakoli Tahsils lie the Gaikhuri Hills. This is a cluster of elongated knolls and act as a water divide between the Wainganga-Chulband and Bagh drainages. The elevation of these hills vary between 300 and 400 meters. These hills are covered with dry mixed deciduous forests.

The Chulband Valley covers the tahsils of Lakhandur and Lakhani and parts of Sakoli and Pauni tahsils. The valley is almost flat and has an elevation of nearly 300 meters. Chulband River, with its source in the Chinchgarh-Palasgaon Hills, along with its tributaries drain the region. It meets river Wainganga at the southeastern tip of the district. From the point of view of geology, it is mainly Dharwar system, Sausar and Sakoli series. There is also Granite Gneisses and Laterite.

The Nishti Upland covers only a small part of Pauni Tahsil. It has an altitude of nearly 300 meters and gradually slopes towards east. Small streams which rise in this upland meet the main river

Wainganga. It is partly covered by forests. From the point of view of geology, it is mainly Dharwar system, Sausar and Sakoli series. There is also some laterite. Chromite ores are found in this region.

Drainage

The district lies entirely in the Wainganga Basin. The Wainganga River rises in the Chhindwara and Seoni Plateaus of Madhya Pradesh and enters Bhandara District at its northeast corner. In the north the river is about 100 meters wide but it widens downstream to almost one kilometer near Bhandara town and to almost two kilometers in the extreme south. The bed of the river is sandy and interspersed with occasional rock barriers and boulders. During the rains the river is swollen but in the hot season the continuity of flow is broken and it looks like a number of shallow pools.

The Bawanthari, a tributary of the Wainganga, rises in the Kurai Plateau of the Satpuda Range in Madhya Pradesh. It enters the district at the northwestern corner. It flows toward east and forms the northern boundary of the district. Chulband is another main tributary of the Wainganga River and drains Sakoli, Lakhani and Lakhandur Tashils. It originates near Alebedar in the Chinchgarh-Palasgaon Hills in Gondiya District. In general, it flows towards south till it meets the Wainganga River.

A large number of lakes/tanks are the special feature of Bhandara District. These are mainly found in Sakoli, Lakhani and Lakhandur tahsils and are used for irrigation and fishing.

Climate

The district experiences four seasons in a year. The rainy season (monsoon season) starts from the first week of June and ends by early October. October and November is the post monsoon season. The winter season starts from December and lasts up to February followed by summer which lasts till the end of May. In general, the climate of the district is dry except during the monsoon months.

The district receives regular and well-distributed rainfall. The average annual rainfall in the district is 1327.0 mm. About 90 percent of annual rainfall is received during the southwest monsoon season. July is the rainiest month of the year. The variation in the annual rainfall from year to year is small.

Temperatures increase rapidly from March and reach the maximum in May when the mean daily maximum temperature at 42.1°c. With the onset of the southwest monsoon both day and night the temperature fall appreciably and the weather becomes pleasant. With the withdrawal of the southwest monsoon day temperatures increases slightly while night temperatures progressively decrease. From November onward both day and night temperature begin to decrease rapidly. December and January are the coldest months of the year with the mean daily minimum temperature at 13.1°c. Sometimes due to the cold waves over northern India, temperatures drop as low as 7 or 8 degrees centigrade.

The air is humid during the southwest monsoon season and is generally dry during the rest of the year. Except during the monsoon season the skies are clear to lightly cloud. During the monsoon they are heavily clouded to overcast. Winds, in general, are light to moderate with some increase in force during the latter half of summer and the monsoon months. During the monsoon and post monsoon months depressions, which originate in the Bay of Bengal and move across central India affect the district causing wide spread heavy rain and strong winds.

Natural Wealth

In its geological setting the district offers a market contrast to the rest of the state. The rocks underlying the district are quite different to those, which underline most of Deccan Maharashtra, and the mineral wealth of the district is principally due to the outcrops of Dharwars. Maximum area of the district is under mixed deciduous monsoon forests that provide a stable base for forest and pastoral pursuits of the forest communities.

The Dharwar belongs to two series; the highly metamorphosed rocks of the Sausar series, which occur in the north west mainly in the Bawanthari valley, and the Sakoli series which cover a large part of the district in the south and east. The rocks of the two groups show a difference in chemical composition. The rocks of the Sausar group commonly contain

felspar and biotite but not chlorite while the rocks of the Sakoli group invariably contain Chlorite, rarely Biotite and no Felspars. The area in between these two groups is largely covered with alluvium in which small exposures of Sausar occur.

A new system of rocks called Dongargarh stystem of post Sakoli but precuddaph are has been suggested by Sarkar (1952). The main rock types of this system are rhyolite and andesite, Dongargarh granite and sand stones. The cuddaphs lie unconformably over the Aarchaeans and consists mainly of sand stone, shales and grits in the upper part with alternate bounds of quartzites and conglomerates in the lower part sandstone and shales of the vinalhayan age the beds of Gondwana sedimenty refered to as Kamthi series have also been noticed resting unconformably over tree archaeans. The Kamthi series consists of conglomerates, arkose and sandstones. Recent deposits of alluvium, which consists of Kanhar soil and laterites, cover major parts of the district.

Minerals

Bhandara District is one of the important mineral producing districts of Maharashtra. The economically important minerals found in the district are Manganese, Chromite, Kyanite-Sillimanite, Corrundam, Gold, Soapstone and Mica.

Manganese ore deposits are generally associated with rock formations called 'Gondites'. These deposits occur in the Satpuda Range in the northern part of the district and covers a major part of Tumsar Tahsil. Dongri-Buzurg, Sitasawangi, Chikhala and Yedarbuchi are areas where high grade manganese deposits are found while low grade deposits are located at Mangarli, Mandekasa, Lendezari, Alepur, Asolpani and Karli.

Kyanite-Sillimanite is found in the Sakoli series of rocks and is associated with chorite muscovite schist. This is found at Pohara and Dighori of Lakhani Tahsil. Corrundum deposits are also found at Pohara at the foot hill of a small hillock. This is mainly got from pits dug in the ground. Soapstone occurs at Kaneri village of Lakhani and near Sakoli. Gold, Antimony and Lead are also found in Pauni Tahsil.

Fisheries

Fishing in the district is mainly done in rivers, tanks and ponds. The district has nearly 400 kms of fluvial waters and numerous perennial and seasonal tanks and ponds which provide adequate opportunities for development of fishing industry.

The commercially important varities of fish found in the district are Murrel, Dhadkya, Botri, Bod, Tambu, Karvadi, Poshti, Dhaora, Chela, Katva, Magur and Zinga. These varieties are, however, not fast growing and hence fast growing varieties of major carps like Rohu, Catla and Mrigal are imported from Kolkata and are reared in reservoirs and tanks. Prawns constitute an important part of the fish industry in the district.

Fishermen in the district mainly belong to the Dheemer and Kahar communities. Fishing is generally done with the help of gill nets known as 'Tangad', cast nets called 'Bhavan Jal', drag nets or 'Odhe Jal', longlines and bag nets. These nets are made of cotton or nylon threads.

Soil and Cropping pattern

The soils of the district are highly varied, arising out of the tropical sub-humid weathering of crystalline metamorphic and igneous rock. They are essentially residual though in the south alluvial soils predominate in Wainganga valley.

A thick layer of deep rich alluvial soils is found in the southern part of the district in Wainganga valley. These soils are sticky; clay loam in texture retentive of moisture crumbles easily and are easy to work. Both Kharif and rabi crops are grown in these soils. Rice is main crop of this region.

Further away from the rivers in higher ground Morand soils are found, which are coarser in texture and contain sand or lime or both. Rabi wheat and linseed and Kharif jowar are generally grown in these soils.

Sihar soils are derived from crystalline rocks as a result of oxidation under tropical humid conditions. They are reddish yellow in colour, crack very little in the hot weather. After degradation, it is known as Khardi soils. Rice is the main crop of these soils.

Poor laterite soils, known as Bardi soils are found in foot hills and sloping areas. Minor millets and inferior rice is grown.

Land and Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19 – 23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigated by Source and Uninrrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is connoted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing no. of Livestock (Position as on 15th Oct. 1997)

1) Total Cross bred/Indigenous Cattle	750,703
2) Total Buffaloes	191,370
3) Total Goats	430,829
4) Total Sheep	2,646
5) Total Pigs	9,686
6) Total Equine	106
7) Total Camel	0
8) Total Rabbits	238
9) Total Livestock (excluding dogs)	1,385,578
10) Total Poultry (including Ducks)	926,337

(Source- Sixteenth all India livestock and farm equipment census 1997.)

The total livestock (excluding dogs) are 1,385,578 and total poultry (including ducks) are 926,337 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 750,703, total buffaloes are 191,370, goats 430,829, sheeps 2,646, pigs 9,686, equine 106 and rabbits are 238.

Statement showing Selected Livestock dicators (Position as on 15th Oct. 1997)

Category	Value
1) Density of Livestock population (per sq.km.)	149
2) Average Livestock per village	838
3) No. of livestock per thousand human population	657
4) No. of in-Milk cows per thousand human population	43
5) No. of in-Milk buffaloes per thousand human population	25

Statement showing Selected Livestock dicators (Position as on 15th Oct. 1997)

Category	Value
6) No. of poultry fowls per thousand human population	440
7) No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	77
8) No. of tractors per thousand hectares of gross cropped area	5
9) No. of Veterinary Institute per lakh livestock	12

(Source- Sixteenth all India livestock and farm equipment census 1997.)

The density of livestock population per sq. km. works out to149 while average livestock per village is 838 For every thousand human population there are 657 livestock, 43 in-milk cows, 25 in-milk buffaloes and 440 poultry fowls. While there are 77 bullocks and male buffaloes per hundred hectares of gross cropped area and 5 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 12.

Industry

Industrially, Bhandara is one of the underdeveloped district in Maharashtra State. The agriculture is the main production of the district. Cultivators and agricultural labourers together account for 70.5 percent of the total workers. While household industry workers and other workers record only 29.5 percent of the total workers. Bhandara is quite rich in minerals and forestry. The district is one of the important mineral producing district of the state. There is a brass factory at Bhandara, Ferro-Manganese factory in Tumsar, Iron and steel company near Bhandara. These are the main industries in the district. Industries depending on forest are also established in the district i.e., Bidi manufacturing, saw mills, lac manufacturing, cane and bamboo products ect. These are all small scale industries. Other than forest depending products, there are rice mills, kosa silk and handloom textiles manufacturing, brass utensils factories, bidi making and handloom/powerloom industries make the larger proportion of the non-agricultural workers in the district.

For the development of the district, through Maharashtra Industrial Development Board, a industrial estate is established on 142.71 hectares land near Sakoli tahsil, in which industries like Ashok Layland and Hindustan Composites are established. Sunplug Iron and Steel company near Bhandara employs 600 skilled and 400 non-skilled workers.

There are some co-operative industries also established. In Mohadi tahsil, there is Vaina Ganga sugar factory from which daily 1250 tons of sugar is produced and 700 technical workers are engaged in this factory. In the district there are Manganese open cast mines, these are run by Government of India. There is Manganese purification plant for the raw manganese at Khamta, near Tumsar. In this processing work 2000 technical officers and labourers are engaged (Source: District Information office, Bhandara).

Trade and Commerce

The district is well known for mineral products like manganese, chromite, iron ore, copper, corundum, pyrophylite etc. Other agricultural and forest products are also available in large scale. Brass utensils, rice, steel, bidis, spices, coal, wheat, sugar cane, cosa silk and cotton textile are mainly exported from the district.

Transport

Transport includes bus/truck service, railway and waterways. The district enjoys a good system of rail facility. Bhandara Road, Tumsar and Pauni Road are connected by railway. It also enjoys comparatively good system of communication facilities through bus service.

Number of Motor Vehicles registered in the district (As on 31 - 3 – 1999)

Motor Vehicles 1999	
Item	No. Of Vehicles
1	2
1 Jeeps	2,066
2 Motor cars	1,552
3 Station Wagons	41

Number of Motor Vehicles registered in the district (As on 31 - 3 – 1999) -(Contd.)

Motor Vehicles 1999		
Item		No. Of Vehicles
1		2
4	Taxies	56
5	Autorickshaws	489
6	Private Mini Buses	47
7	Ambulance	15
8	Trucks	1,799
9	Tankers	38
10	Delivery Vans	553
11	Moped	18,337
12	Scooters	14,667
13	Motor Cycles	18,435
14	Tractors	4,351
15	Trailors	4,164
16	Others	19
Total		**66,629**

(Source: Transport Commissioner office)

It may be seen that the district had 18435 Motor Cycles , 18337 Mopeds and 14667 scooters. There were 2066 Jeeps , 1552 Motor Cars, 41 Station Wagons, 56 taxies and 489 autorickshaws. Besides, 19 other modes of transport, the district also had 4351 tractors and 4164 trailors as means of transport.

Electricity and Power supply

Most of the villages in the district are electrified. In rural areas five tahsils out of seven tahsils viz., Tumsar, Mohadi, Sakoli, Lakhani and Lakhandur have cent per cent villages electrified, remaining two tahsils are having more than 98 percent villages electrified. In urban areas, there are 36763 electric connections given in domestic area, 758 connections in industrial area and 4560 connections in commercial area in the district (Town Directory Statement II). There are only four villages (3 in Bhandara tahsil and 1 in Pauni tahsil)which do not have power supply.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should

have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number. Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000.
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad, Bant
7) Balahi, Balai
8) Basor, Burud, Bansor, Bansodi
9) Beda Jangam, Budga Jangam
10) Bedar
11) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar , Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami
12) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
13) Bindla
14) Byagara
15) Chalvadi, Channayya
16) Chenna Dasar, Holaya Dasar, Holeya Dasari
17) Dakkal, Dokkalwar
18) Dhor, Kakkayya, Kankayya, Dohor
19) Dom, Dumar
20) Ellamalvar, Yellammalawandlu
21) Ganda, Gandi
22) Garoda, Garo
23) Ghasi, Ghasia
24) Halleer
25) Halsar, Haslar, Hulasvar, Halasvar
26) Holar, Valhar
27) Holaya, Holer, Holeya, Holiya
28) Kaikadi (in Akola, Amravati, Bhandara, Gondiya, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district, other than Rajura tahsil)
29) Katia, Patharia
30) Khangar, Kanera, Mirdha
31) Khatik, Chikwa, Chikvi
32) Kolupulvandlu
33) Kori
34) Lingader
35) Madgi
36) Madiga
37) Mahar, Mehra, Taral, Dhegu Megu
38) Mahyavanshi, Dhed, Vankar, Maru Vankar
39) Mala
40) Mala Dasari
41) Mala Hannai
42) Mala Jangam
43) Mala Masti
44) Mala Sale, Netkani
45) Mala Sanyasi
46) Mang, Matang, Minimadig, Dhankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang
47) Mang Garodi, Mang Garudi
48) Manne
49) Mashti
50) Meghval, Menghvar
51) Mitha Ayyalvar
52) Mukri
53) Nadia, Hadi
54) Pasi
55) Sansi
56) Shenva, Chenva, Sedma, Ravat
57) Sindhollu, Chindollu
58) Tirgar, Tirbanda
59) Turi

Scheduled Tribes

1) Andh
2) Baiga
3) Barda
4) Bavacha, Bamcha
5) Bhaina
6) Bharia Bhumia, Bhuinhar Bhumia, Pando
7) Bhattra
8) Bhil, Bhil Garasia, Dholi Bhil, Dungir Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
9) Bhunjia
10) Binjhwar
11) Birhul, Birhor
12) Chodhara (excluding Akola, Amravati, Bhandara, Gondiya, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts)

13) Dhanka, Tadvi, Tetaria, Valvi
14) Dhanwar
15) Dhodia
16) Dubla, Talavia, Halpati
17) Gamit, Gamta, Gavit, Mavchi, Padvi
18) Gond Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Danddami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond, Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria
19) Halba, Halbi
20) Kamar
21) Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari
22) Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
23) Khairwar
24) Kharia
25) Kokna, Kokni, Kukna
26) Kol
27) Kolam, Mannervarlu
28) Koli Dhor, Tokre Koli, Kolcha, Kolgha
29) Koli Mahadev, Dongar Koli
30) Koli Malhar
31) Kondh, Khond, Kandh
32) Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
33) Koya, Bhine Koya, Rajkoya
34) Nagesia, Nagasia
35) Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
36) Oraon, Dhangad
37) Pardhan, Pathari, Saroti
38) Pardhi; Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Bahelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia
39) Parja
40) Patelia
41) Pomla
42) Rathawa
43) Sawar, Sawara
44) Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar
45) Thoti (in Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts and Rajura tahsil of Chandrapur district)
46) Varli
47) Vitolia, Kotwalia, Barodia

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some

economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the

number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal

Committee/ Municipal council, Municipality etc.

Size class of UA / Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. / Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, Its Distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a revisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 are about economic activity of the person. Question 21 and 22 are about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc.

Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of population in Rural – Urban areas.

According to 2001 census the total population of Bhandara district is 1,136,146 having 573,445 males and 562,701 females . Thus Bhandara district has 1.1 percent of state's population. Among the seven tahsils of the district, Bhandara tahsil (261,645) is the most populous and Lakhandur tahsil (113,335) the least.Other tahsils in order of their population size are Tumsar (213,843), Pauni (151,487), Mohadi (144,621), Sakoli (129,475) and Lakhani (121,740).

Out of total 1,136,146 population of the district 960418 persons (84.5 percent) are residing in rural area and 175728 (15.5 percent)are residing in urban area of the district.

The district has 778 inhabited villages and six towns ,the rural population of the district is distributed among 778 villages in seven tahsils.While urban population is distributed among six towns.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Tumsar	196,050	150041	46,009	213,843	166,063	47,780	9.1	10.7	3.8	23.5	22.3
2	Mohadi	129,094	121183	7,911	144,621	144,621	0	12.0	19.3	0.0	6.1	0.0
3	Bhandara	224,528	152715	71,813	261,645	156,284	105,361	16.5	2.3	46.7	32.0	40.3
4	Sakoli	118,878	118878	0	129,475	129,475	0	8.9	8.9	0.0	0.0	0.0
5	Lakhani	115,115	115115	0	121,740	121,740	0	5.8	5.8	0.0	0.0	0.0
6	Pauni	134,197	114015	20,182	151,487	128,900	22,587	12.9	13.1	11.9	15.0	14.9
7	Lakhandur	103,546	103546	0	113,335	113,335	0	9.5	9.5	0.0	0.0	0.0
District Total:		**1,021,408**	**875493**	**145,915**	**1,136,146**	**960,418**	**175,728**	**11.2**	**9.7**	**20.4**	**14.3**	**15.5**

The table shows variation in population growth during the decade (1991-2001). It also shows the growth rates for the district and tahsils in total, rural and urban areas and also percentage of urban population to total population.

According to census 2001 ,the district Bhandara has a total population of 1,136,146 comprising of 960,418 rural and 175,728 urban population.The population of the district in census 2001 is 11.2 percent higher than the district population in 1991 census.

The average growth rates for the rural and urban areas of the district are 9.7 percent and 20.4 percent respectively.Lakhani is newly created tahsil after 1991 census. Warthi census town from Mohadi tahsil is declassified after 1991 census so Mohadi tahsil does not have urban area for 2001 census. In addition tahsils Sakoli and Lakhandur do not have any urban areas. Tahsils, Tumsar, Bhandara, Pauni recorded 3.8 percent, 46.7 percent, 11.9 percent growth rate in urban areas respectively.

In urban areas Bhandara tahsil has recorded highest growth rate (46.7 percent), while Tumsar recorded the lowest (3.8 percent) growth rate.

In rural areas tahsil Mohadi recorded highest growth rate (19.3 percent), while tahsil Bhandara recorded the lowest (2.3 percent) growth rate. Four tahsils namely Bhandara, Sakoli, Lakhani and Lakhandur registered lower growth rate than the district rural average (9.7 percent).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	Tumsar	136	166,063	83,208	82,855	10 (7.4)	433	467	19 (14.0)
2	Mohadi	100	144,621	72,797	71,824	7 (7.0)	360	353	9 (9.0)
3	Bhandara	142	156,284	78,870	77,414	10 (7.0)	506	424	31 (21.8)
4	Sakoli	86	129,475	65,457	64,018	4 (4.7)	200	209	10 (11.6)
5	Lakhani	94	121,740	61,256	60,484	6 (6.4)	374	350	14 (14.9)
6	Pauni	137	128,900	65,209	63,691	26 (19.0)	1,537	1,425	29 (21.2)
7	Lakhandur	83	113,335	56,971	56,364	4 (4.8)	293	281	12 (14.5)
Districts (Rural) Total:		**778**	**960,418**	**483,768**	**476,650**	**67 (8.6)**	**3,703**	**3,509**	**124 (15.9)**

Serial number	District / C.D. block	Population 200-499		Number and percentage of villages	Population 500-999		Number and percentage of villages	Population 1000-1999	
		Males	Females		Males	Females		Males	Females
1	2	11	12	13	14	15	16	17	18
1	Tumsar	3,256	3,309	40 (29.4)	15,207	14,939	45 (33.1)	30,640	30,581

Percentage in brackets.

The distribution of inhabited villages by population size ranges with its percentages are given in Table 2. There are 778 inhabited villages in the district .Of these 67 villages have population less than 200, i.e 8.6 percent of the total inhabited villages, 124 villages have population ranging from 200–499 (15.9 percent), 233 villages have population from 500–999 (29.9 percent), 232 villages have a population ranging 1000-1999

(29.8percent), 109 villages have population ranging 2000– 4999 (14.0 percent), 10 villages have population ranging from 5,000–9,999 (1.3 percent) and 3 villages have 10,000 and above population with 0.4 percent.

In C D block Tumsar there are total 136 villages of which 45 villages (33.1 percent) have population 1,000–1,999; followed by 40 villages (29.4 percent) with population 500–999; 21 villages (15.4 percent) with population 2,000 – 4,999; 19 villages (14.0 percent) with population 200 – 499; 10 villages (7.4 percent) with population less than 200 and only one village (0.7 percent) with population 5,000–9,999.

Out of 100 villages of Mohadi C.D. block, 35 villages (35.0 percent), are having population 500– 999 followed by 29 villages (29.0 percent) with 1,000–1,999 population, 17 villages (17.0 percent) with population 2,000–4,999, 9 villages (9.0 percent) are having population 200–499, 7 villages (7.0 percent) with population less than 200, 2 villages (2.0 percent) with population 5,000–9,999 and only one village (1.0 percent) is having population 10,000 and above.

In Bhandara C.D. block there are 142 villages of them 41 villages (28.9 percent) are with 1,000–1,999 population, 40 villages (28.2 percent) are with 500–999 population, 31 villages (21.8 percent) are having population 200–499, 19 villages (13.4 percent) are having population 2,000– 4,999 , 10 villages (7.0 percent) are with less than 200 population and only one village is having 5,000–9,999 population.

From total 86 villages of Sakoli C.D. block, 35 villages (40.7 percent) are with 500–999 population, 19 villages (22.1percent) are having 1,000–1,999 population , 15 villages (17.4 percent) are having 2,000–4,999 population, 10 villages (11.6 percent) are with 200– 499 population, 4 villages (4.7 percent) are with less than 200 population, 2 villages (2.3 percent) are having population 5000–9999 and only one village (1.2 percent) is having population 10,000 and above.

There are total 94 villages in Lakhani C.D. block out of them, 34 villages (36.2 percent) are with 1,000–1,999 population, 26 villages (27.7 percent) are with 500–999 population, 14 villages (14.9 percent) are having 200 – 499 population , 12 villages (12.8 percent) are having 2,000–4,999 population, 6 villages (6.4 percent) are with less than 200 population and 1 village each (1.1 percent is having 5,000–4,999 and 10,000 and above population.

In Pauni C.D. block , there are 137 villages of them; 37 villages (27.0 percent) are having population 500–999; 32 villages (23.4 percent) are having population 1000–1999; 29 villages (21.2 percent) are with 200–499 population; 26 villages (19.0 percent) are having less than 200 population; 12 villages (8.8 percent) are having population 2,000–4,999 and one village (0.7 percent) is having population 5,000 – 9,999.

Out of 83 villages of Lakhandur C.D. block 32 villages (38.6 percent) are having 1,000–1,999 population; 20 villages (24.1 percent) are with population 500–999; 13 villages (15.7 percent) are with population 2,000-4,999; 12 villages (14.5 percent) are having population 200–499; 4 villages (4.8 percent) are having population less than 200 and two villages (2.4 percent) are having population 5,000 – 9,999.

It may be seen that there is only one large sized (population 10,000 and above) village each in C.D. blocks Mohadi, Sakoli and Lakhani respectively.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town -- Nil
(ii) Census town --
1 Dewhadi
2 Ganeshpur
3 Sawari Jawharnagar

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS - (Contd.)

Name of town	
1	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census	Nil
(c) Declassified	
1 Warthi	
2 Chikhala	
3 Sitasawangi	
(d) Wholly merged with other town(s)	Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 shows new towns, denotified towns, declassified towns and wholly merged with other towns in 2001 census. In Bhandara district three new census town are decleared for 2001 census namely 1) Dewhadi, 2) Ganeshpur and 3) Sawari Jawharnagar, which were villages in 1991 census. While three census towns of 1991 census namely 1) Warthi 2) Chikhala and 3) Sita Sawangi are declassified as villages in 2001 census. There are no denotified and wholly merged with other towns in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	9	1.2	87	0.0
11-20	6	0.8	154	0.0
21-50	15	1.9	2,860	0.3
51-100	52	6.7	13,540	1.4
101-200	171	22.0	102,297	10.7
201-300	224	28.8	235,192	24.5
301-500	204	26.2	319,518	33.3
501 +	97	12.5	286,770	29.9
Not known	0	0.0	0	0.0
District Total:	**778**	**100.0**	**960,418**	**100.0**

Population Density (Rural) of the district: 310

Table 4 indicates distribution of villages by population density (per sq. kilometre). Out of 778 villages, 28.8 percent of villages are having population density ranging from 201–300.This is followed by density 301–500 in 26.2 percent villages, and density 101–200 in 22.0 percent villages. 97 villages (12.5 percent) of total villages have population density 501 and above, while 52 villages (6.7 percent) have population density 51–100. The population density is 0–50 in remaining 30 villages that accounts only 3.9 percent of the total villages.

Table 5 :SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	978	1,003	862	1,071	1,072	1,060
1911	966	1,000	796	1,038	1,040	1,011
1921	950	994	776	1,024	1,029	976
1931	947	987	790	1,017	1,023	964
1941	949	989	810	1,010	1,014	971
1951	941	1,000	807	1,005	1,010	963
1961	936	995	801	993	1,000	936
1971	930	985	820	984	990	940
1981	937	987	850	989	994	961
1991	934	972	875	980	985	950
2001	922	960	873	981	985	960

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and the state. The census 2001 recorded a sex ratio of 981 female per 1,000 males in the district. This is higher compared to the state average (922). The sex ratio in Bhandara district has remained higher than that of the state from 1901 to 2001. The total sex ratio at the state level declined by 56 points while at district level it declined by 90 points during the last 100 years. Similarly, the sex ratio for the rural areas of the state dcreased by 43 points and for the district it decreased by 87 points during 1901–2001. For the urban areas of the states, the sex ratio increased by 11 points and for the district it decreased by 100 points during the above period (i.e 1901 – 2001).

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Tumsar	992	996	980
2	Mohadi	987	987	0
3	Bhandara	968	982	949
4	Sakoli	978	978	0
5	Lakhani	987	987	0
6	Pauni	975	977	965
7	Lakhandur	989	989	0
	District Total:	**981**	**985**	**960**

Table 6 indicates sex ratio by tahsils 2001 census. The average sex ratio of the district is 981 females per 1000 males. The highest sex ratio is recorded in Tumsar tahsil (992) and the lowest in Bhandara tahsil (968). In rural areas average sex ratio is 985 while inurban areas it is 960 .Both in rural and urban areas highest sex ratio is recorded in Tumsar tahsil i.e 996 and 980 respectively.While lowest sex ratio is recorded as 977 in Pauni for rual areas and 949 in Bhandara urban areas. Four tahsils namely Mohadi ,Sakoli , Lakhani and Lakhandur are entirely rural.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Tumsar	996
2	Mohadi	987
3	Bhandara	982
4	Sakoli	978
5	Lakhani	987
6	Pauni	977
7	Lakhandur	989
	District (Rural) Total:	**985**

It is observed from the table 7 that average sex ratio of the district (rural) is 985 females per 1,000 males. Sex ratio varies from 996 in Tumsar C D block to 977 in Pauni C D block. The sex ratio in C D blocks Tumsar, Mohadi,Lakhani and Lakhandur are higher to the sex ratio for the district (985), while the sex ratio is lower than the district in C D blocks Bhandara, Sakoli and Pauni.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	11	1.4	1,644	0.2
700-749	4	0.5	3,576	0.4
750-799	1	0.1	767	0.1
800-849	14	1.8	4,252	0.4
850-899	38	4.9	19,931	2.1
900-949	112	14.4	124,777	13.0
950-999	268	34.4	441,136	45.9
1000-1099	279	35.9	346,791	36.1
1100+	51	6.6	17,544	1.8
District Total:	**778**	**100.0**	**960,418**	**100.0**

Sex ratio (Rural) for District: 985

A Perusal of the table 8 shows that rural sex ratio in 279 villages constituting 35.9 percent of the total 778 inhabited villages covering 36.1 percent of total rural population are in the range of 1,000–1,099. While for 268 villages constituting 34.4 percent of total villages covering 45.9 percent population are in the range 950–999. 112 villages constituting 14.4 percent total villages covering 13.0 percent population have sex ratio in the range 900–949. 51 villages constituting 6.6 percent of total villages covering 1.8 per cent population are in the range 1100+. The sex ratio in 38 villages constituting 4.9 percent total villages covering 2.1 percent population are in the range 850–899. In sex ratio range of 800–849 there are 14 villages constituting 1.8 percent covering 0.4 percent population, 11 villages (1.4 percent) covering 0.2 percent population have sex ratio less than 700. 4 villages in range 700–749 and one village in range 750–799 covers negliable percentage of rural population in the district .

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001 -(Contd.)

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bhandara (M Cl)	M Cl	957
2	Dewhadi (CT)	CT	1,002
3	Ganeshpur (CT)	CT	926

TABLE 9 : - (Contd.)

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
4	Pauni (M Cl)	M Cl	965
5	Sawari Jawharnagar (CT)	CT	914
6	Tumsar (M Cl)	M Cl	977
Sex ratio (Urban) for the district:			**960**

It is observed from the table 9 that on an average there are 960 females against every 1,000 males in urban area of the district .Among six towns of the district the sex ratio varies from 1,002 in Dewhadi census town to 977 in Tumsar municipal council. Out of the six towns three towns are having sex ratio above the district average 960. These towns are Tumsar M.Cl, Dewhadi C.T and Pauni M.Cl.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	**20,348**	**10,479**	**9,869**	**942**

Tahsilwise sex ratio of population in 0 – 6 age group in total, rural and urban areas of the district can be seen in the table 10. The sex ratio in the age group of 0–6 years for district is 956. The rural and urban sex ratio in 0–6 years is 958 and 942 respectively. Out of seven tahsils, three tahsils namely Lakhani (964), Pauni (972) and Lakhandur (964) shows higher sex ratio than the district sex ratio i.e (956).While remaninig four tahsils have recorded lower sex ratio than the district sex ratio. According to the rural – urban areas Pauni tahsil recorded the highest sex ratios both in rural and urban areas (972 and 973) respectively. The lowest sex ratio of 931 is recorded in Sakoli tahsil for rural area and 903 in Tumsar tahsil for urban areas. Tahsils Mohadi ,Sakoli, Lakhani and Lakhandur are entirely rural.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

5	Lakhani	15,712	8,001	7,711	964
6	Pauni	18,729	9,496	9,233	972
7	Lakhandur	15,986	8,138	7,848	964
	District (Rural) Total:	**133,703**	**68,270**	**65,433**	**958**

Sex ratio of population in the age group 0–6 for C D blocks 2001 are presented in the table 11. It reveals the sex ratio in seven C D blocks of the districts. Among seven C D blocks, Pauni C D blocks shows the highest sex ratio (972) and Sakoli C D block shows the lowest (931) in population for 0–6 age group. Sex ratio of Tumsar, Lakhani, Pauni and Lakhandur shows higher sex ratio than the district sex ratio (958), while remaining three C D blocks shows the lower sex ratio than the district sex ratio for 0–6 age group of the district population.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	61	7.8	2,759	2.1
700-749	25	3.2	2,557	1.9
750-799	43	5.5	5,711	4.3
800-849	66	8.5	11,313	8.5
850-899	92	11.8	18,697	14.0
900-949	96	12.3	23,677	17.7
950-999	73	9.4	20,191	15.1
1000-1099	142	18.3	28,385	21.2
1100+	180	23.1	20,413	15.3
District (Rural) Total	**778**	**100.0**	**133,703**	**100.0**
Sex ratio (Rural) for District:		**958**		

A perusal of the table 12 reveals that the sex ratio in 180 inhabited villages constituting 23.1 percent of total villages and covering 15.3 percent of total rural population of 0–6 age group is in the range of 1,100 and above. 142 villages constituting 18.3 percent of villages and covering 21.2 percent of rural population of 0–6 age group have the sex ratio between 1000–1099; 96 villages constituting 12.3 percent of villages and covering 17.7 percent of rural population of 0–6 age group have sex ratio 900–949; 92 villages constituting 11.8 percent villages and covering 14.0 percent rural population of 0–6 age group have sex ratio between 850–899; 73 villages constituting 9.4 percent villages and covering 15.1 percent rural population of 0–6 age group have sex ratio 950–999; 66 villages (8.5 percent) covering 8.5 percent rural population of 0–6 age group have sex ratio 800–849; 61 villages (7.8 percent) covering 2.1 percent rural population of 0–6 age group have sex ratio less than 700; 43 villages (5.5 percent) covering 4.3 percent rural population of 0–6 age group have sex ratio between 750–799 and 25 villages (3.2 percent) covering 1.9 percent rural population of 0–6 age group have sex ratio 700–749.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bhandara (M Cl)	M Cl	9,992	5,083	4,909	966
2	Dewhadi (CT)	CT	709	360	349	969
3	Ganeshpur (CT)	CT	850	454	396	872
4	Pauni (M Cl)	M Cl	2,951	1,496	1,455	973
5	Sawari Jawharnagar (CT)	CT	1,017	536	481	897
6	Tumsar (M Cl)	M Cl	4,829	2,550	2,279	894
District(Urban) Total			**20,348**	**10,479**	**9,869**	**942**

Table 13 reveal average sex ratio of towns in 0–6 age group is 942 females against 1,000 males. Sex ratio varies from 973 in Pauni (M Cl) to 872 in Ganeshpur (C T). Out of six towns, three towns i.e Bhandara (M.Cl), Pauni (M.Cl), and Dewhadi (C T) have sex ratio above the district average (942).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Urban	**175,728**	**32,005**	**12,978**	**18.2**	**7.4**

Table 14 reveals tahsilwise scheduled caste and scheduled tribes population with percentage in total, rural and urban areas of the district Bhandara. Total population of the district is returned as 1,136,146 persons comprising 201,949 (17.8 percent) Scheduled Castes and 97,718 (8.6 percent) Scheduled Tribes population. 17.7 percent and 18.2 percent Scheduled Caste population are found in rural and urban areas respectively. While Scheduled Tribes population accounts 8.8 percent in rural area and 7.4 percent in urban area of the district.

Of all tahsils of the district ,tahsil Pauni shows highest percent of Scheduled Castes population (22.1 percent) and tahsil Mohadi has the lowest proportion of Scheduled Castes population (11.2 percent). The Scheduled Tribes population in Sakoli tahsil has recorded highest percentage (12.2 percent) and tahsil Lakhandur recorded the lowest (5.8 percent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C. D. BLOCKS, 2001 - (Contd.)

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
6	Pauni	128,900	29,395	9,297	22.8	7.2
7	Lakhandur	113,335	22,387	6,579	19.8	5.8
	District (Rural) Total:	**960,418**	**169,944**	**84,740**	**17.7**	**8.8**

Number and percentage of scheduled castes and scheduled tribes population in C D blocks are given in table 15. There are 17.7 percent scheduled castes and 8.8 percent scheduled tribes population in rural area of the district. The proportion of scheduled castes and scheduled tribes population to total population in each C D block can be seen in this table. In all C D blocks, Pauni C D block recorded highest percentage of scheduled castes population (22.8 percent) and Tumsar C D blocks recorded the lowest (10.8 percent).While Tumsar C D block recorded 13.7 percent scheduled tribes which is highest of all C D blocks and Lakhandur C D block recorded 5.8 percent the lowest in all C D blocks. Among all seven C D blocks only two C D blocks (Tumsar and Mohadi) recorded percentages below the district average in scheduled castes population while in scheduled tribes population two C D blocks (Tumsar and Sakoli) recorded percentanges above the district average.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	61	7.8	0	0.0
Less than 5	60	7.7	1,655	1.0
5-10	160	20.6	17,732	10.4

76 and above	10	1.3	2,840	1.7
District Total	**778**	**100.0**	**169,944**	**100.0**

Table 16 indicate proportion of scheduled castes population to total population in villages (in percentage ranges) 2001. Out of 778 villages, 61 villages (7.8 percent) are not having scheduled castes population. While for 244 villages the scheduled castes population range is 11–20, accounting for 31.4 percent villages and it covers 33.6 percent scheduled castes population of the rural area of the district. In 20.6 percent of villages (160 villages) the scheduled castes constitute 5-10 percent. These villages cover 10.4 percent scheduled castes population. 134 villages accounting 17.2 percent villages have 21–30 percent range these villages covers of 29.1 percent of scheduled castes population. Remaining 179 villages in percentage ranges less than 5 and between 31-76 + are accounting 23.0 percent villages and covering 27.0 percent scheduled castes population of rural area of the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	162	20.8	0	0.0
Less than 5	239	30.7	7,973	9.4
5-10	124	15.9	13,706	16.2
11-20	102	13.1	20,898	24.7
21-30	44	5.7	9,586	11.3
31-40	34	4.4	12,731	15.0
41-50	18	2.3	4,695	5.5
51-75	33	4.2	9,853	11.6
76 and above	22	2.8	5,298	6.3
District Total	**778**	**100.0**	**84,740**	**100.0**

Table 17 indicates proportion of Scheduled Tribes population to total population in villages (in percentage ranges) 2001.Out of 778 villages, 162 villages (20.8 percent) are not having Scheduled Tribes population. In 239 villages constituting 30.7 percent of total villages and covering 9.4 percent Scheduled Tribes, the proportion of Scheduled Tribes is less than 5 percent. The proportion of Scheduled Tribe in 124 villages accounting 15.9 percent villages and covers 16.2 percent Scheduled Tribes population is in 5-10 percent range. In 102 villages accounting 13.1 percent villages and covers 24.7 percent Scheduled Tribes population is in the range of 11-20 percent. In the remaining 151 villages accounting 19.4 percent villages and covers 49.7 percent Scheduled Tribes population of rural area of the district are in the proportion range of Scheduled Tribes from 21+.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bhandara (M Cl)	85,213	13,814	7,679	16.2	9.0
2	Dewhadi (CT)	5,759	1,019	244	17.7	4.2
3	Ganeshpur (CT)	8,183	1,509	500	18.4	6.1
4	Pauni (M Cl)	22,587	4,032	2,148	17.9	9.5
5	Sawari Jawharnagar (CT)	11,965	4,723	689	39.5	5.8
6	Tumsar (M Cl)	42,021	6,908	1,718	16.4	4.1
District(Urban) Total		**175,728**	**32,005**	**12,978**	**18.2**	**7.4**

The proportion of scheduled castes population is much higher than the proportion of scheduled tribes population in urban area of the district .Among six towns, Sawari Jawaharnagar census town recorded highest percentage (39.5 percent) of scheduled castes population and Bhandara (M Cl) recorded the lowest (16.2 percent). Among scheduled tribes, Pauni (M Cl) recorded highest percentages (9.5 percent) while Tumsar (M Cl) recorded the lowest (4.1 percent) percentages of scheduled tribes (Table 18).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Tumsar	1,018	1,009
2	Mohadi	1,006	1,009
3	Bhandara	997	991
4	Sakoli	978	996
5	Lakhani	998	988
6	Pauni	1,004	973
7	Lakhandur	976	1,016
	District (Rural) Total	**996**	**999**

It can be seen from the table 19 that sex ratio of both scheduled castes and scheduled tribes population are much similar in the district i.e 996 for scheduled castes and 999 for scheduled tribes. Within the C D blocks sex ratio varies from 1,018 in Tumsar C D block to 976 in Lakhandur C D block for scheduled castes population. While for scheduled tribes population, sex ratio varies from 1,016 in Lakhandur C D block to 973 in Pauni C D block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bhandara (M Cl)	980	959
2	Dewhadi (CT)	1,006	984
3	Ganeshpur (CT)	999	938
4	Pauni (M Cl)	973	960
5	Sawari Jawharnagar (CT)	986	919
6	Tumsar (M Cl)	1,005	892
	Sex ratio (Urban) for the district:	**987**	**947**

Sex ratio among scheduled castes and scheduled tribes in towns – 2001 is given in the table 20. Among the towns the sex ratio varies from 1,006 in Dewhadi (C.T.) to 973 in Pauni (M.Cl) for scheduled castes population. While for scheduled tribes population, sex ratio varies from 984 in Dewhadi (C.T.) to 892 in Tumsar (M.Cl).

Number and percentage of literates and illiterates by tahsils are given in table 21 .The district as a whole ,has a higher percentage of male literates than of female literates i.e 89.0 percent and 67.8 percent respectively. Urban literacy rate in both the sexs is much higher than the rural literacy rate. In all seven tahsil Bhandara tahsil has highest percentage (82.5 percent) of literates and Lakhandur tahsil has the lowest (72.9 percent). The male–female percentage of literates i.e., gap in the literacy rate for five tahsils are above the district's average gap (i.e 21.2 percent). The gap in male–female literates in rural area is wider than the urban areas in all the tahsils.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates

District (Rural) Total:		**632,659**	**364,572**	**268,087**	**327,759**	**119,196**	**208,563**	**76.5**	**87.7**	**65.2**	**22.5**

Number and percentage of literates and illiterates by sex in C D blocks ,2001 are given in table 22. The general literacy rate in the district in 2001 is 76.5 percent of which males accounts for

87.7 percent literates while females account for 65.2 percent literates. A C.D.Blockwise perusal reveals the percentage of literates varies from 79.7 percent in Lakhani C.D.Block to 72.9 percent in both Pauni and Lakhandur C.D.Blocks. Lakhani C.D.Block shows the highest percentage of literates in male population (91.2 percent) and Pauni C.D.Block shows the lowest (83.8 percent). In female population again Lakhani C.D.Block shows the highest literates (68.0 percent) and Lakhandur C.D.Block shows the lowest (60.5 percent). Gap in male–female literacy rate varies from 24.6 percent in Lakhandur C.D.Block to 20.3 percent in Bhandara C.D.Block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Literacy rate for District: 78.5

Percentage distribution of inhabited villages by literacy rate in ranges with their percentage distribution of population is given in table 23. There are 778 villages classified according to ranges from 0–100 literacy rate in the district. There are no villages within the literacy range of 0–20 in the district, the proportion of villages in range of 71–80 is 430 villages accounting for a highest 55.3 percent villages with 58.1 percent population .This is followed by general literacy rate range 61–70 percent in 169 villages constituting 21.7 percent villages and covering 14.5 percent of total population, 81–90 range of literacy rate for 128 villages constituting 16.5 percent of total villages and covering 25.6 percent of population. In literacy rate range 51–60 there are 29 villages accounting 3.7 percent villages and covering 1.2 percent population, 41–50 range of literacy rate in 12 villages constituting 1.5 percent of total villages and covering 0.3 percent population.The number and percentage of villages with other range groups are negligible in the district for 2001 census.

The number and percentage of literates and illiterates by sex in towns of the district can be seen in table 24. The district as a whole has literacy rate of 88.8 percent for urban area. This includes 95.4 percent literate for males and 82.0 percent for females in the urban areas. Ganeshpur (C.T) has highest percentage of literates 91.9 percent and Pauni (M Cl) has the lowest percentage of literates (81.4 percent) in urban area of the district. In male – female literate Ganeshpur (C.T.) has highest percentages both in male and female literacy i.e., 97.4 percent and 86.0 percent respectively. Pauni (M.Cl) has the lowest percentages in both male and female i.e 90.5 percent in male population and 72.0 percent in female population. Gap in male – female literacy varies between 18.5 percent in Pauni (M.Cl) to 11.3 percent in Bhandara (M.Cl). The average gap in male – female literacy rate in the district (urban) area is 13.4 percent.

Number and percentages of scheduled castes literates and illiterates by sex in C.D. blocks are given in Table number 25. There are 117,356 literate scheduled castes persons accounting for 79.2 percent literate in the district (rural) areas. Of them in 91.1 percent of the males are literates while female literacy rate is 67.4 percent.Out of seven C.D. blocks ,five C. D blocks are having literacy percentage above the district total average (79.2 percent) while two C.D. blocks i.e Pauni C.D. block and Lakhandur C.D. block are having percentages below the district average (79.2 percent) in literacy. Within the district, the

highest literacy rate among males is seen in Tumsar C.D. block (94.6 percent) while lowest in Pauni C. D. block (87.0 percent). Among females, the highest literacy rate is noticed in Mohadi C.D. block (71.6 percent) and the lowest in Lakhandur C.D. block (62.4 percent). The gap in male–female literacy rate is 23.7 percent in the district (Rural). Gap in male–female rural literacy rate varies from 21.0 percent in Bhandara C.D. block to 26.6 percent in Lakhandur C.D. block. The gap in male–female literacy is widest in C.D. block Lakhandur (26.6 percent) followed by the C.D. block Lakhani (25.3 percent), C.D. block Pauni (24.3 percent), C.D. block Tumsar (24.1percent), C.D. block Sakoli (23.7 percent), C. D. block Mohadi (21.5 percent) and C.D. block Bhandara (21.0 percent).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Literacy rate for District (Rural): 79.2

The distribution of inhabited villages by literacy rate in ranges with their percentages of Scheduled Castes population are given in table 26. Out of 778 villages, 717 villages are having scheduled castes population. These 717 villages are classified in to ranges from 0–100 literacy rate in the district. Literacy ranges 0–50 covers only six villages with 0.8 percent of villages accounting for 0.1 percent population .There are 2 villages with Scheduled Castes population size only 3 with nil literacy rate. The literacy rate range varies from 71–80 in 333 villages accounting for 46.4 percent villages with 46.0 percent scheduled castes population. This is followed by literacy rate range 81–90 in 241 villages accounting for 33.6 percent of total villages with 44.0 percent scheduled castes population and literacy range 61–70 in 96 villages (13.4 percent villages), covering 8.1 percent Scheduled Castes population. Other literacy rate range group are having very few villages bearing negligible scheduled caste population of the district.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male/female literacy rate

Number and percentage of scheduled tribes literates and illiterates by sex in C.D. blocks,2001are given in table 28. The table reveals number and percentage of Scheduled Tribes literates and illiterates by sex in the C.D. blocks of Bhandara district. There are 52,263 literates scheduled tribes persons constituting 71.4 percent of total scheduled tribe population in rural area of the district. Among the males the literacy rate is 84.6 percent while for females it is 58.1 percent. Out of seven C.D. blocks, three C.D. blocks, namely Mohadi , Sakoli and Lakhani are having literacy rate above the district average. The highest literacy rate both in male and female is observed in C.D. block Mohadi i.e 89.3 percent and 64.6 percent respectively. The lowest literacy rate 79.6 percent is observed in Pauni C.D. block for male population and

for female it is 53.5 percent in Tumsar C.D. block. The average gap in scheduled tribes male-female literacy rate is 26.5 percent for the district rural area. The gap in male–female literacy rate varies from 29.0 percent in Tumsar C.D. block to 23.9 percent in Bhandara and Pauni C.D. blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Literacy rate for District (Rural): 71.4

The distribution of inhabited villages by literacy rates in ranges with their percentage distribution of scheduled tribes population are given in table 29. Out of 778 villages, 616 villages are having scheduled tribes population. These villages are classified in 0–100 literacy ranges in the district. Ranges from 0–40 covers 23 villages which accounts 3.7 percent of villages covering a negligible 0.6 percent scheduled tribes population of the district. Range group 71–80 covers 187 villages accounting for 30.4 percent villages with 36.9 percent scheduled tribes population. The literacy rate range 61–70 covers 27.4 percent of villages with 29.4 percent scheduled tribes population. The literacy range 51–60 covers 13.0 percent villages with 10.6 percent scheduled tribe population, followed by range group 81–90 which is represented by 11.9 percent villages with 19.0 percent of total scheduled tribe population. Other ranges of literacy rate are having very small number of villages bearing negligible percentage of scheduled tribes population of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 30 reveals number and percentage of scheduled tribes literates and illiterates by sex in towns of the district. There are 9,802 literate and 3,176 illiterate persons in the district (urban). The literate accounts for 85.1 percent The literacy rate is 93.6 percent for males and 76.2 percent for females. Out of six towns the literacy rate in three towns namely Bhandara (M.Cl.), Ganeshpur (C.T.) and Sawari Jawaharnagar (C.T.) is above district average. The highest literacy both in male and female is observed in Sawari Jawaharnagar (C.T.) i.e 98.8 percent and 84.7 percent respectively. The lowest literacy for male population is observed in Tumsar (M.Cl.) 91.0 percent and for female population it is 68.0 percent in Pauni (M.Cl.). The gap in male female literacy rate varies from 26.8 percent in Pauni (M.Cl) to 14.0 percent in Sawari Jawaharnagar (C.T).

		Females	**562,701**	**128,296**	**22.8**	**105,553**	**18.8**	**233,849**	**41.6**	**328,852**	**58.4**

The total population is classified in three folds namely main workers, marginal workers and non-workers. Table 31 shows number and percentages of these three folds by sex in seven tahsils of the district

Bhandara. It can be seen from the table that, 32.2 percent of the district population is recorded as main workers, 15.1 percent recorded as marginal workers and remaining 52.7 percent recorded as non-workers. Among the main workers, male workers constitute 41.4 percent of the total male and female workers constitute 22.8 percent of total female population, while in marginal workers, the male–female share is 11.5 percent and 18.8 percent of their respective population. In non-worker's category male recorded 47.2 percent and female recorded 58.4 percent non-workers. The proportion of main workers is higher in male population (41.4 percent) than in female workers (22.8 percent). While in marginal workers, percentage of female workers shows higher (18.8 percent) than in male workers (11.5 percent). Regarding tahsils, Lakhandur tahsil recorded highest percentage (39.6 percent)and Bhandara tahsil recorded the lowest (28.6 percent) of main workers.While in marginal workers ,Lakhani tahsil recorded highest percentage (21.8 percent) and Bhandara tahsil recorded the lowest (11.6 percent). Among the seven tahsils, tahsil Pauni and tahsil Lakhandur shows higher percentages of main workers than the district average (32.2 percent). And in marginal workers tahsil Tumsar, Bhandara and Pauni shows lower percentages than the district average (15.1 percent).

District (Rural) Total:		**Persons**	**960,418**	**319,340**	**33.3**	**162,275**	**16.9**	**481,615**	**50.1**	**478,803**	**49.9**
		Males	**483,768**	**200,597**	**41.5**	**61,446**	**12.7**	**262,043**	**54.2**	**221,725**	**45.8**
		Females	**476,650**	**118,743**	**24.9**	**100,829**	**21.2**	**219,572**	**46.1**	**257,078**	**53.9**

Table 32 reveals three-fold category of workers namely main workers, marginal workers and non-workers in C.D. blocks (Rural) by sex, 2001 census. In the rural population of the district, 33.3 percent recorded as main workers, 16.9 percent are recorded as marginal workers and 49.9 percent recorded as non-workers. Among the main workers, the percentage of male workers is recorded as 41.5 percent and female workers recorded as 24.9 percent of their respective total rural population. The male-female share of marginal workers is 12.7 percent and 21.2 percent respectively.The proportion of male percentage is higher than the female percentage in main workers. In marginal workers there are more female than male marginal workers. The perusal of data on C.D. block shows Lakhandur C.D. block with highest percentage of main workers (39.6 percent) and in Lakhani C.D. block with the lowest (29.4 percent). Marginal workers in Lakhani C.D. block are recorded highest percentage (21.8 percent) and Pauni C.D. block the lowest (14.0 percent).

		Females	**86,051**	**9,553**	**11.1**	**4,724**	**5.5**	**14,277**	**16.6**	**71,774**	**83.4**

Table 33 reveals number and percentage of main workers, marginal workers and non-workers in towns 2001.In urban population of the district, 26.2 percent workers are recorded as main workers, 5.2 percent

marginal workers and 68.5 percent as non workers. Among main workers there is a vast difference in male – female share. Male workers constitute 40.8 percent of total male population while female main workers 11.1 percent of total females. Similarly male–female share in marginal workers are 4.9 percent and 5.5 percent respectively. A town wise perusal reveals that Tumsar (M.Cl) recorded highest percentage (27.6 percent) and Dewhadi (C.T) recorded the lowest (20.9 percent) in main workers .In marginal workers Pauni (M.Cl) recorded highest (11.3 percent) and Ganeshpur (C.T) recorded the lowest (3.2 percent) in urban area of the district.

Note: Percentage of workers to total workers are given in brackets

Table 34 indicates the distribution of male and female workers by four economically active categories in tahsil of the district Bhandara.In the district there are 47.3 percent workers (main+marginal) in total population. In four categories cultivators (25.1 percent) and agricultural labourers (45.4 percent) together constitute 70.5 percent of the total workers while percentage of household industry worker is only 5.4 percent and other workers category accounts for 24.1 percent workers .The proportion of both cultivators and agricultural labourers varies from tahsil to tahsil. Tahsil Lakhandur records highest percentage in both

categories 31.2 percent and 57.0 percent respectively. While tahsil Bhandara records the lowest percentage in both categories (15.0 percent and 34.0 percent) among all tahsils. In other workers category, Bhandara tahsil records highest percentage (46.5 percent) and tahsil Lakhandur the lowest (9.8 percent). In four categories male and female workers constitute a highest proportion in agricultural labourer category (58.4 percent) and male workers accounts for the highest proportion in agricultural labourer category (35.3 percent) and other workers category (35.2 percent) in the district.

				(46.1)	**(26.0)**	**(60.6)**	**(6.5)**	**(6.9)**

Note: Percentage of workers to total workers are given in brackets.

Table 35 indicates distribution of persons, male, female workers in four economically active categories in C D blocks (Rural) of the district. There are 50.1 percent workers (main+marginal) in total rural population of the district. Two categories namely cultivators (27.6 percent) and agricultural labourers (49.3 percent) occupy major proportion of the workers i.e (76.9 percent) of total rural workers of the district. Percentage of "household industry" workers is only 5.2 percent and "other workers" category accounts for 17.9 percent in rural area of the district. The proportion of cultivators varies between 20.6 percent in Bhandara C D block to 31.2 percent in Lakhandur C D block. The agricultural labourers in Lakhandur C D blocks recorded highest in percentages proportion (57.0 percent) while Tumsar C D block recorded lowest percentage proportion (41.8 percent). In household industrial category percentage varies between 2.0 percent in Lakhandur C D block and 9.0 percent in Tumsar C D block. The "other workers" in Bhandara C D block stands highest (28.6 percent) and Lakhandur C D block stands lowest (9.8 percent) in rural area of the district. In the district, the general pattern in all C D blocks is a higher percentage of female workers than in males In "agricultural labourer" category and in "household industrial" category (with exception of Pauni and Lakhandur C D blocks). In "other workers" category there is a vast gap in male–female percentage of worker in all the CD blocks.

Note: Percentage of workers to total workers are given in brackets.

Table 36 indicates distribution of person, male and female workers in four economically active categories in towns of the district. There are 31.5 percent workers in total urban population of the district. Being urban area "other workers" category shows highest percentage (79.0 percent) in all four categories in the district , followed by category, "agricultural labourer" (11.2 percent), "household industry" workers (6.6 percent) and "cultivators" (3.3 percent). In "other workers" category percentage varies from 46.3 percent in Pauni (M.Cl) to 89.3 percent in Bhandara (M.Cl). The percentage of agricultural labourers varies from 2.8 percent in Tumsar (M.Cl) to 40.9 percent in Pauni (M.Cl). In "household industry" category Tumsar (M.Cl) accounts highest percentage (14.9 percent) and Sawari Jawaharnagar (C.T) accounts lowest (2.8 percent). In cultivators only two towns shows better percentages i.e Pauni (M.Cl) (9.7 percent) and Dewhadi (C.T) (9.5 percent). According to district as a whole, in "agricultural labourer" category and "household industry" category, female shows higher percentages than males in all towns while in "other workers" category male percentage is higher than female percentage in all towns.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Educational

There are total 778 villages in the district. Of these 729 villages (93.7 percent) covering 952,662 population (99.2 percent) are having at least minimum level education facility in the rural area of the district. Lakhandur C.D. block has highest percentage (97.6 percent) of villages with educational amenity available while C.D. block Pauni has the lowest (90.5 percent) villages (Table -37). With the amenity C.D. block Mohadi and Lakhandur are having highest percentages of villages with availability of education amenity (99.8 percent). These C.D. blocks covers 144,271 and 113,145 population respectively. In C.D. block Bhandara, only 98.3 percent population is served with availability of the educational amenity in the villages (Table 38). There are 62 villages served with even least minimum level (Primary) educational amenity. The amenity is available in these villages within 5 kilometres of distance from there respective villages, 465 villages are not having middle school amenity and of these 416 villages are availing this amenity within 5 kilometres and 49 villages availing it from 5–10 kilometres of distance from their respective villages. 769 villages out of 778 villages are not having degree colleges of these the amenity is available to 142 villages are within 5 kilometers of distance, 211 villages at a distance of 5–10 kilometers and 416 villages at a distance of 10 and above kilometers (Table 39). According population ranges in inhabited villages, the highest number of villages (232) are in 500–999 population range which covers 99.6 percent inhabited villages with having education amenity. This is followed by population range 1,000–1999, which covers 231 villages accounting for (99.6 percent) of villages. 109 villages are in 2,000–4,999 population range, 144 villages are in 1–499 population range, 10 villages are in 5,000–9,999 population range and 3 villages are in 10,000 and above population range which are having education amenity available in their respective villages (Table – 41).

Medical

Out of 778 villages, 442 villages (56.8 percent) are having medical amenity which covers 762,036 (79.3 percent) population in the rural area of the district.The

C D block Mohadi is having highest percentage of (63.0 percent) villages having medical amenity available with the revenue limits of respective villages while C.D. block Pauni is having lowest percentage (52.6 percent) of villages having medical amenity available in all the C.D. blocks (Table 37). C.D. block Mohadi is having highest percentage (83.0 percent) of villages with availability of medical amenity which covers 120,031 population of C.D. block. While C.D. block Tumsar is having lowest percentage (73.6 percent) in availability of medical amenity, it covers 122,227 population of the C.D. block. Hospital amenity is not available for 772 villages of which 80 villages are getting this amenity within 5 kilometers, 135 villages are getting this amenity from distance of 5–10 kilometers and 557 villages are more than 10 kilometres away from the hospital amenity. 746 villages are not having Primary Health Center (P.H.C) amenity in their respective villages, of these 350 villages are getting this amenity within 5 kilometres of distance, 285 villages are getting this amenity from the distance of 5–10 kilometres and 111 villages are getting this amenity from distance of more than 10 kilometres (Table 39). According to nearest statutory town, 60.2 percent from total 442 villages are 5–15 kilometers away from the statutory town from which the medical amenity is available, 56.6 percent villages are 16–50 kilometers away from the statutory town, 48.6 percent villages are within 5 kilometres and 47.5 percent villages are 51 and above kilometers away from the nearest statutory town which the medical amenity is available (Table 40). According to population ranges in inhabited villages, the highest number of villages (181) are in population range 1000–1999, this is followed by range group 500–999 which covers 110 villages, range group 2000–4999 covers 107 villages, 31 villages are in 1–499 range group, 10 villages are in 5,000–9,999 range group and three villages are in 10,000 + range group with having medical amenity available in rural population of the district (Table 41).

Drinking Water

762 villages (97.9 percent) out of 778 villages are having improved drinking water amenity, which covers 955,718 (99.5 percent) population in rural area of the district. In all C.D. blocks, more than 98 percent villages avail of this amenity except C.D. Block Pauni which is having 94.9 percent village availing the drinking water amenity .The cent percent population of C.D. Blocks Sakoli, Pauni and Lakhandur are having improved drinking water while in remaining four C.D. Blocks namely Tumsar, Mohadi, Bhandara and Lakhani, more than 99 percent population is availing improved drinking water amenity. Cent percent population of villages with range group 500–999, 2000–4999, 5000–9999 and 10000+ are having improved drinking water while remaining range groups i.e 1– 499 is having 93.7 percent and range group 1000–1999 is having 98.7 percent population availing improved drinking water amenity.

Postal

Out of 778 inhabited villages, 148 (19.0 percent) villages are having post office amenity which covers 44.1 percent population of rural area of the district. According to C.D. block, Sakoli C.D. block is having highest percentage of (25.6 percent) villages availing post office amenity which covers 76,417 (59.0 percent) population of the C.D. block. The C.D. block Bhandara is having lowest percentage of (12.7 percent) villages, covering 48,982 (31.3 percent) population in rural area of the district.

630 villages out of 778 villages are not having post office amenity. Of these 542 villages are availing this amenity within 5 kilometers distance from their respective villages, 81 villages are getting this amenity from 5–10 kilometer distance from their respective villages and 7 villages are getting this amenity far from 10+ kilometres distance.

According to population range highest number of villages (80) having post office amenity are in 2,000–4,999 population range group. This is followed by 43 villages with 1,000–1,999 population range, 11 villages in 500–999 population range group, 10 villages in 5,000–9,999 range group, 3 villages in 10,000 + range group and one village in 1–499 population range group.

The distance from nearest statutory town of 148 villages (with having post office amenity) is given in table. For 7 villages the nearest town is within 5 kilometres, for 37 villages, nearest statutory town is 5–15 kilometers away, for 96 villages the nearest statutory town is 16–50 kilometres away and for 8

villages the nearest statutory town is 51+ kilometres away (Table 40).

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kms.	5-10 kms.	10+ kms.	Total (Col. 2-4)

Telephone

497 villages (63.9 percent) out of 778 villages are having telephone amenity which covers 801,918 (83.5 percent) population in rural area of the district. The Mohadi C.D. block records highest percentages of villages (80.0 percent) having telephone amenity which covers 134,583 (93.1 percent) population. The C.D. Block Lakhani records lowest percentage (50.0 percent) of villages with telephone amenity and covers 89,046 (73.1 percent) population (Table 37 and 38). 281 villages (36.1 percent) are not having telephone amenity. Of these the telephone amenity to 240 villages is available within 5 kilometers distance, while 36 villages avail of the amenity at distance of 5–10 kilometres. The telephone amenity for 5 villages is available at a distance of beyond 10 kilometres (Table 39). According to population range and availability of telephone amenity, of the total 497 villages, 193 villages are in 1,000–1,999 population range this is followed by population range 500–999 covering 130 villages, population range 2,000–4,999 accounting for 107 villages, range group 1–499 covering 54 villages, range group 5,000–9,999 covering 10 villages and three villages have population of 10,000 and above with telephone amenity.

Transport and Communication

454 villages (58.4 percent), out of 778 villages are having transport and communication amenity which covers 723,795 (75.4 percent) rural population in the district. The amenity in Sakoli, C.D. block is available for a highest percentage (67.4 percent) of villages which covers 110,156 population (85.1 percent).While C.D. block Bhandara (54.9 percent) has the lowest villages with availability of this amenity which covers 108,369 (69.3 percent) population in all C.D. blocks of the district (Table 37 and 38). According to population ranges, highest number of villages (161) are in population range 1,000–1,999, this is followed by range group 500 – 999 which covers 106 villages, 100 villages are in range group 2,000 – 4,999 , 74 villages in 1– 499 range group, 10 villages in 5,000 – 9,999 range group ,and three villages are in 10,000 and above range group with having transport and communication amenity available. Highest number of villages (291) with amenity available are in 16 – 50 kilometres distance range from nearest statutory town. This is followed by 122 villages which are at 5–15 kilometers distance range from the nearest statutory town. There are 23 villages and 18 villages in 51 and above and less than 5 kilometres distance range respectively from the nearest statutory town. 325 villages out of 778 villages are not have bus service available in their respective villages. Of these 278 villagers are availing this amenity within less than 5 kilometres distance, 46 villages avail the amenity from 5–10 kilometres distance, while one village is far away (10 and above kilometres) from this amenity.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Out of 778 villages only 53 villages (6.8 percent) are availing bank amenity. This amenity covers 207531 (21.6 percent) population. The Mohadi C.D Block is having highest percentage (11.0 percent) of villages with bank amenity available which covers 48,835 (33.8 percent) population. While Pauni C.D Block is having lowest percentage (2.9 percent) of villages availing bank amenity which covers 81,203 (63.0 percent) population of the C.D Block.

According to population range highest number of villages (31) are in 2,000-4,999 population range group who are availing bank amenity. This is followed by range group 1,000-1,999 (9 villages), 5,000-9,999 (8 villages), 10,000+ (3 villages) and 2 villages are in 500-999 population range.

Regarding nearest statutory town, one village with availing bank amenity, is at 5 kilometres distance from the nearest statutory town. 16 villages are in 5-15 kilometres distance, 34 villages are in 16-50 kilometres distance range and 2 villages are in 51+ kilometers distance range from the nearest statutory town.

Agricultural Credit Society

Out of 778 villages 395 villages (50.8 percent) are availing this amenity, which covers 691987 (72.1 percent) population of the district. Lakhani C.D Block is having highest percentage (69.1 percent) of villages availing agricultural credit society amenity and covers (86.5 percent) population of the C.D Block. While Pauni C.D Block is having lowest percentage (36.5 percent) of villages and covers 63.0 percent population of the C.D Block.

According to the population range highest number of villages (186) are in population range 1000-1999

who are availing this amenity. This is followed by population range 2000-4999 (92 villages) population range 500-999 (83 villages), population range 1-499 (23 villages), population range 5000-9999 (8 villages) and three villages are in population range 10,000+ who are availing agricultural credit society amenity in the district.383 villages are not having amenity like agricultural credit society of these 320 villages are availing this amenity within 5 kilometres distance, 58 villages are availing this amenity from 5-10 kilometres distance and 5 villages are at distance of 10+ kilometers from this amenity.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

415 (53.3 percent) villages, out of 778 villages are connected with pucca road that covers 724844 (75.5 percent) population in rural area of the district. Of all the C D block, Mohadi C D block records the highest (68.0 percent) percentages of villages in which the amenity of pucca road is available and it covers 125,695 (86.9 percent) population in the C D block, Tumsar C

D block records the lowest (47.1 percent) percentages of villages covering 113,298 (68.2 percent) population. Of these 415 villages, 22 villages are within 5 kilometers of distance from the nearest statutory town, 134 villages are at 5–15 kilometers of distance, 237 villages are at 16–50 kilometers of distance and 22 villages are at 51+ kilometers of distance from the nearest statutory town. According to population range highest number of villages (159) are in 1,000–1,999 population range group. This is followed by range group 2,000–4,999 (107 villages), range group 500– 999 (94 villages), range group 1–499 (42 villages), range group 5,000–9,999 (10 villages) and three villages are in 10,000 + population range with having approach road amenity.

Power Supply

The proportion of electrified villages for this district is much higher 774 villages (99.5 percent) out of 778 villages are enjoying power supply amenity. It covers a population of 959,001 constituting of (99.9 percent) of total population in rural area of the district. A perusal of electrification in C D blocks shows that all villages of 5 C D blocks namely Tumsar, Mohadi, Bhandara, Lakhani and Lakhandur are electrified. According to population in C D blocks , cent percent population of all C D blocks except C D block Bhandara are enjoying the power supply amenity.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Tumsar	136	53,003	53.7	54.6
2	Mohadi	100	45,689	75.2	59.2
3	Bhandara	142	49,114	59.1	46.0
4	Sakoli	86	39,539	51.1	62.0
5	Lakhani	94	34,439	67.3	43.6
6	Pauni	137	49,587	67.1	28.2
7	Lakhandur	83	38,492	70.5	42.3
	District Total:	**778**	**309,863**	**63.1**	**47.4**

Note : Cultivable area = irrigated area + unirrigated area

Tahsil level distribution of villages according to land use is given in Table 42. The total cultivated area within the district is 63.1 percent of the total area. The cultivable area of Mohadi tahsil (75.2 percent) is above the district average area. This is followed by the cultivable area of Lakhani tahsil (67.3 percent), Pauni tahsil (67.1 percent) and Lakhandur tahsil (70.5 percent). The remaining three tahsils are below the district average 47.4 percent of cultivated area of the district is irrigated. In all tahsils Tumsar, Mohadi and Sakoli has better proportion of the cultivated area under irrigation i.e (54.6 percent, 59.2 percent and 62.0 percent) respectively. Remaining four tahsils are below the district average.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	II Bhandara (M.Cl.)	96.8	23.8	73.1	86.2	7.8	22.2	13.1	18.2	24.9
2	III Pauni (M.Cl.)	661.6	237.7	423.8	644.7	162.0	25.4	308.3	47.2	101.7
3	III Tumsar (M.Cl.)	951.2	299.3	651.9	869.6	153.3	177.2	138.7	245.7	154.6
District Total		**421.6**	**133.3**	**288.3**	**390.1**	**71.9**	**66.1**	**92.9**	**86.4**	**72.9**

Per capita receipt and expenditure for each town in the district are given in table 43. The average per capita receipts for three statutory town of the district works out to Rs 421.6, of which Rs 133.3 are received through taxes and the remaining Rs 288.3 from all other sources. The total expenditure incurred per head is Rs 390.1, of which Rs 71.9 are spent on general administration Rs 66.1 on public health and convenience, Rs 92.9 on public works and Rs 86.4 on public institutions and Rs 72.9 on other items. Among all statutory towns, receipts received is highest in Tumsar (M.Cl) while expenditure incurred per head is highest in Pauni (M.Cl).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bhandara (M.Cl.)	3.9	2.0	1.8	1.3	0.1
2	Pauni (M.Cl.)	4.9	3.1	3.1	1.3	0.9

	District Total	**4.1**	**1.8**	**1.7**	**1.3**	**0.3**

Table 44 indicates schools colleges per ten thousand population in statutory town area of the district per 10,000 population in each statutory town of the district. On an average, there are 4.1 primary, 1.8 junior secondary/middle, 1.7 secondary/ matriculation, 1.3 senior secondary and 0.3 colleges per 10,000 population in the district. Of all the statutory towns Pauni Municipal Council recorded highest number of educational institutions except senior secondary.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bhandara (M.Cl.)	81
2	Dewhadi (C.T.)	12
3	Ganeshpur (C.T.)	20
4	Pauni (M.Cl.)	22
5	Sawari Jawharnagar (C.T.)	17
6	Tumsar (M.Cl.)	20
	Distrct Total	**49**

Number of beds per 10,000 population in each town is given in table 45. On an average there are 49 beds per 10,000 population in the urban area of the district. Bhandara Municipal Council shows the highest number (81) of beds available per 10,000 population in medical institutions, followed by Pauni Municipal Council (22), Tumsar Municipal Council (20), Ganeshpur Census Town (20), Sawari Jawaharnagar Census Town (17), and Dewhadi Census Town (12), the lowest.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bhandara	85,213	53,595	62.9
2	Pauni	22,587	4,585	20.3
3	Tumsar	42,021	0	0
District Total		**149,821**	**58,180**	**38.8**

Table 46 reveal proportion of slum population in towns. There are three Municipal Councils in the district. Out of which two are having slum areas in their respective towns Bhandara Municipal Council has highest number of slum areas (31), with 62.9 percent of slum population to total population of the town .While Pauni Municipal Council has seven slum areas with 20.3 percent of the total town population. Tumsar Municipal Council has no slum area in their town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The total percentage for the three categories viz.Permanent, Semi Permanent and Temportary may not add to 100 percent, the percentage remaining is for the 4th category Unclassified not shown in the table.

Percentage distribution of households living in permanent, semi permanent and temporary houses are given in table 49 there are 34.0 percent households, living in permanent houses, 63.9 percent households are living in semi permanent houses and 2.1 percent households are living in temporary houses in district Bhandara.According to tahsils, Bhandara tahsil records highest percentage (49.9 percent) in permanent houses in total area as well as in urban area (80.5 percent), while in rural area the percentage for permanent houses is highest in Pauni tahsil (35.8 percent). In semi permanent houses tahsil Sakoli records highest percentage (76.5 percent) for total area, tahsil Tumsar records highest percentage (79.5 percent) in rural areas of all the tahsils and tahsil Pauni records highest percentage (52.0 percent) in urban area of all the tahsils. In temporary houses, tahsil Pauni records highest percentage in total as well as in rural area (3.5 percent and 4.0 percent respectively). While in urban area tahsil Tumsar records highest percentage (1.2 percent) in temporary houses of all the tahsils.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

The percentage of households having facilities like improved drinking water, electricity, bathroom, toilet and drainage are given in table 50. According to district figures 65.3 percent households are having improved drinking water sources, 69.8 percent households are having electricity, 36.2 percent households are having bathroom facility, 35.5 percent households are having toilet facility and 36.8 percent households are having drainage facility in the district. According to tahsils out of seven tahsils only three tahsils namely Tumsar, Bhandara and Pauni are having urban area. Facilities are better in urban area than in rural area. In rural area tahsil Mohadi and Pauni are having more facilities compared to other tahsils of the district.

Percentage in brackets

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Number and percentage of households by type of fuel used for cooking can be seen in table 5. According to district figures fire wood is mainly used for cooking (76.6 percent), followed by L.P.G gas (13.7 percent), kerosene (5.3 percent), bio gas and crop residue (1.6 percent each), and cowdung cake (0.7 percent). Percentages of other type of fuel used is less than 0.3 percent.

In rural area of the district, 85.4 percent households are using fire wood for cooking, 6.6 percent households are using L.P.G gas , 3.3 percent households are using kerosene, 1.9 percent households are using bio gas and 1.7 percent households are using crop residue. While in urban area L.P.G gas (54.9 percent) is mainly used for cooking , followed by fire wood (25.7 percent), kerosene (17.2 percent), corp residue (1.2 percent) and cowdung (0.2 percent), other type of fuels percentages are very low in the district.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Number of household availing banking services and number of households having specified assets like radio, television, telephone, bycicle, scooter, motorcycle/ moped, car/jeep/van, etc are given in Table 52. 33.4 percent (80,087) households are availing banking services in the district .In rural area percentage of households availing banking amenity is 28.5 percent and for urban area, 61.7 percent. 31.6 percent (75,866) household own radio/transistor, 27.6 percent households own television, 4.3 percent (10,416) households own telephones, 59.0 percent households are having bicycles, scooter/motorcycle/moped are owned by 10.2

percent (24,557) households. Only 1.1 percent (2,548) households are having car/jeep/van etc and 31.1 percent households are not having any of the above mentioned assets.

(viii) Major Social And Cultural Events, Natural And Administrative Developments And Significant ActivitiesDuring The Decade.

As district is known as lake district of Maharashtra which is well justified by the fact that their are so many large, medium and small size tanks spread all over the district. And there are so many small and big dams in the district. Some projects are under construction. For example 'Bawanthari project work; and 'Indirasagar Project' these projects are under construction. After completion of Bhadravati Projects work, 17,537 hector land in Maharashtra and 18,615 hector land in Madhya Pradesh will come under irrigation. Besides this Gose Khurda (Indirasagar Dam) project is being built in Pauni tahsil of Bhandara district. It is Southern side 35 kms. from Bhandara City and northern side 10 kms. from Pauni city near Gose Khurd villages. After completion of this projects work 190,000 hector land will come under irrigation.

(ix) Brief Description Of Places Of Religious, Historical Or Archeological Importance In The Villages And Places Of Tourist Interest In The Towns Of The District.

The concentration of fairs is heavier in the district most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned fairs are complementary to the weekly markets in the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use are brought for sale. The people buy necessary articles in these fairs. In this district a fair is very famous is at Pauni on the day of Mahashivratri held in the month of January, February (magh vadya 14) majority of the people gather for this fair.

In Bhandara district there are no major places of tourist interest. Even then some old forts, important temples built in earlier period are in the district. But these places are not much attractive for outsiders Pauni.

Pauni

Pauni is the head quarters of Pauni tahsil. It was a place of residences of the mythical king Parvam. Historical importance of the town is made know as some 'Buddha stupa' Gateway etc.are found near Pauni town in the excavation. Pauni was a well known entire of Buddhism in ancient time.

(x) Major Characteristics Of The District, Contribution Of The District In The Form Of Any Historical Figure Associated With The District.

Bhandara district is endowed with two major economic resources viz agricultural land and abundance of mineral deposits. Mostly the raw materials available in the district are agricultural and forest produce like rice, oil, seeds, tendu leaves etc. Easy availability of these raw materials has encouraged the industries of a number of mills, poha mills,dal mills , oil mills and bidi factories in the district.There are number of small scale and large scale factories manufacturing bidis in the district. Large scale factories are located at Bhandara and Tumsar in the district many agricultural labourers work in these industries during their off time at home. Largest proportions of non-agricultural workers are engaged in these industries.

In addition to the agricultural and Bidi Manufacturing industries, considerable deposits of manganese ore and chromite are found in the district. The mining industries are in large scale, medium scale and small scale sector in the district. Other major industrial minerals found in the district are kyanite-sillimanite, corundum pyrophlite, iron ore, copper are etc. Thus the district is known as mines district of the state for its rich minerals resources.

Marathi is the local language of the district and rice is the stapple food of the people. Several special districts are prepared from rice flour, Ganesh Utsava, Shimga, Diwali, Ramnavami, Hanuman Jayanti, Muharram are the religious festivals of the People.

Contribution of the District

Bhandara has given many authors, freedom fighters and social workers to the nation. The well-known Sanskrit dramatist Shri Bhavbhuti hails from this district.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, availability of commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name and location code number of village and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power supply, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV are included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

This column provides data available on medical amenities in the village.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 : Post, Telegraph and Telephone

Column 9 provides the postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village.

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc., the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given.

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given.

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded.

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable waterway, the same has been indicated in this column.

Column 14 : Approach to village

Approach to village refers to the state of road leading to village.

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

This column relates availability of Power Supply in the village.

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column.

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department.

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / Non-municipal Towns.

Appendix - IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to the proportion of the Scheduled Tribes to the total Population by ranges.

Town Directory :

The town directory is presented for each town covering different aspects of urban life. In 2001 Census, Statement I – VII have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finance, civic, medical, and educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutory notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns the Tahsildar and cantonment executive officers supplied the information.

Statement I-Status and Growth History

Statement I shows the status and growth history of the towns in the district, column 2 in this statement indicates class, name and civic administration status of a town. Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and national level. Census towns have no urban civic status.

Column 3 indicates location code number of the town, column 4 gives name of tahsil and column 5 shows the name of C.D.Block. Column 6 presents area in Sq. Kms., Column 7 presents number of households including houseless households.

Column 8 to 18 gives population and growth rate of town since 1901 and would help in drawing the trends in their growth rate, Column 19 presents density and Column 20 to 22 presents sex ratio.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its

name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV-Civic and other Amenities, 1999

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 3 and Schedule Castes/ Scheduled Tribes population given in column 4 and 5 have been added to help in measuring amenities in respect of population size of the weaker sections in the towns. The information on the road length within the town shown under column 6 has been obtained from Municipality.

Column 7 to 12 reflects the information on system of sewerage, number of latrines, and method of disposal of night soil.

Column 13 indicates sources of protected water supply to the inhabitants of the towns. The information on storage and capacity is shown under column 14.

Column 15 gives information regarding availability of fire fighting services. In case it is not available in the referent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Column 16 to 20 pertains to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, are treated as independent units.

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc.

Column 6 to 9 :

The information on educational facilities is reflected in columns 6 to 9

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or Elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle schools with Primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M (3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded.

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non-Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART A
VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a)Note Explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12:Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water way they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If a village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

(b) List of Villages fully merged in towns and outgrowth at 2001 Census

Serial Number	Name of Villages	Location Code No. 1991	Merged in towns and Outgrowths
1	2	3	4

Section II - Town Directory

(a) Note Explaining the abbreviations used in Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board / Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate Office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) and others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 : Medical

The data covers all such medical institutions run by or aided by Government / Semi Government / Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family

planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres are treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution(s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :Educational

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocation institutions like - Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :Higher Secondary / Intermediate/ Senior Secondary /PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class IV are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats.

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of the nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities.

Stadium, Cinema, Auditorium / Drama / Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading Room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies.

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area Committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and mortality, 1991 census

Fertility levels

Fertility is a major component of population growth. In 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born, alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-series tables of 1991 census pertaining to Maharashtra State.

Mortality levels

Information in the questions on children ever born and children surviving canvassed for all ever a married woman has been tabulated by age of the mother. From this, estimates of child mortality have been worked out by using are Brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

Item		Bhandara District Total	Maharashtra State Total
1	2	3	4
Q1	P	81	74
	M	85	72
	F	76	76
Q2	P	97	79
	M	103	78
	F	88	81
Q3	P	109	86
	M	114	84
	F	105	89
Q5	P	115	91
	M	118	89
	F	112	93

From the estimates of child mortality (number of deaths by ages 1,2,3, and 5 given above as q(1), $q^{(2)}$, $q^{(3)}$ and $q^{(5)}$, it is observed that the level of child mortality in the district is substantially higher compared to the state. A notable feature is the lower female child mortality compared to males in the district as against higher female mortality in the state. However, the differentials in child mortality are more pronounced in the district as compared to the state.

Fertility

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Bhandara District 1981	Bhandara District 1991	Maharashtra State 1981	Maharashtra State 1991
1	2	3	4	5
GFR	137	119	134	124
GMFR	169	158	168	157
TFR	4.5	3.8	4.3	3.7
TMFR	5.3	5.3	5.2	5.2
Crude Birth Rate (CBR)	32.9	30.1	31.8	29.8
No. of children ever born per women in the age group 45-49	--	4.1	--	4.2
Mean Age at Marriage	--	17.7	--	17.9
Child Women Ratio	--	45.4	--	49.6

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crude Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole in 1981, the GFR, GMFR, TFR, TMFR & CBR were 137, 169, 4.5, 5.3, and 32.9 respectively as compared to State average of 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 119, 158, 3.8, 5.3 and 30.1 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while during both the Censuses 1981 and 1991 the fertility rates are higher for the district than the State as a whole except for 1981 GFR, which is lower than the state. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage continuous to be lower for the district than the State in 1991 as for Census 1981.

Child Woman Ratio

The Child Woman Ratio for the district is comparatively lower than the state

ANNEXURE III

Various Measures of Fertility and Mean Age at Marriage,1991

ANNEXURE - IV

Percentage distribution of Migrants by Place of Birth/Place of last residence, — 2001 Census. Migrants by Place of Birth

ANNEXURE IV (i)
Percentage distribution of Migrants by Place of Birth – Maharashtra

Serial number	Place of Birth	2001 Census		
		Person	Males	Females
1	**2**	**3**	**4**	**5**
1	A. Migrants born within the state of enumeration	32,939,182	11,858,299	21,080,883
		80.5	72.3	86.1
	i) Migrants born elsewhere in district of enumeration.	20,718,400	6,618,661	14,099,739
		50.7	40.4	57.6
	ii) Migrants born in other district of the state	12,220,782	5,239,638	6,981,144
		29.9	32.0	28.5
2	B. Migrants born in other states of India	7,756,307	4,427,935	3,328,372
		19.0	27.0	13.6
3	C. Migrants born in other countries	197,731	109,447	88,284
		0.5	0.7	0.4
4	D. Unclassifiable	9	3	6
		0.0	0.0	0.0
	Total Migrants :	**40,893,229**	**16,395,684**	**24,497,545**
		100.0	**100.0**	**100.0**

On the basis of migrants by place of birth, there are 40,893,229 migrants in Maharashtra in 2001 comprising 16,395,684 males and 24,497,545 females. These migrants constitute 42.2 per cent of total population. Male migrants constitute 32.5 per cent of male population while female migrants account for 52.7 per cent of female population.

ANNEXURE IV (ii)
Percentage distribution of Migrants by Place of Birth – Bhandara

Serial number	Place of Birth	2001 Census		
		Person	Males	Females
1	**2**	**3**	**4**	**5**
1	A. Migrants born within the state of enumeration	379,727	92,545	287,182
		91.1	85.8	92.9
	i) Migrants born elsewhere in district of enumeration.	279,160	64,344	214,816
		66.9	59.7	69.5
	ii) Migrants born in other district of the state	100,567	28,201	72,366
		24.1	26.2	23.4
2	B. Migrants born in other states of India	36,810	15,024	21,786
		8.8	13.9	7.0
3	C. Migrants born in other countries	451	239	212
		0.1	0.2	0.1
4	D. Unclassifiable	0	0	0
		0.0	0.0	0.0
	Total Migrants :	**416,988**	**107,808**	**309,180**
		100.0	**100.0**	**100.0**

In Bhandara district there are 416,988 migrants comprising 107,808 males and 309,180 females. The migrants of this district constitute 36.7 per cent of total population. Male and female migrants constitute for 18.8 and 54.9 per cent respectively.

From the distribution of total migrants in Maharashtra by place of birth, it can be clearly seen that females predominate in intradistrict and interdistrict migration while males predominate in interstate and international migration. In case of Bhandara district female predominate in intradistrict, interdistrict and interstate migration while males predominate in international migration.

ANNEXURE IV (iii)
Inter State Migrants to Maharashtra

Serial number	Place of Birth	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
1	Andhra Pradesh	450,898	5.8
2	Bihar	386,799	5.0
3	Gujarat	890,428	11.5
4	Karnataka	1,267,421	16.3
5	Kerala	307,676	4.0
6	Madhya Pradesh	616,059	7.9
7	Rajasthan	463,875	6.0
8	Tamil Nadu	267,477	3.4
9	Uttar Pradesh	2,172,971	28.0
	Total for Nine States	6,823,604	88.0
	Other States	932,703	12.0
	Total	**7,756,307**	**100.0**

The number of migrants born in other states of India is 7,756,307. It is seen that 19.0 per cent of the total migrants in Maharashtra are from other states. In case of Bhandara district 8.8 per cent of the total migrants are from other states.

In case of Maharashtra 9 States viz., Uttar Pradesh, Karnataka, Gujarat, Madhya Pradesh, Andhra Pradesh, Rajasthan, Kerala, Tamil Nadu and Bihar together account for 6,823,604 migrants (88.0 per cent) out of 7,756,307 interstate migrants.

ANNEXURE IV (iv)
Inter State Migrants to Bhandara

Serial number	Place of Birth	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
1	Andhra Pradesh	1,074	2.9
2	Bihar	943	2.6
3	Chhatisgargh	9,662	26.2
4	Gujarat	925	2.5
5	Madhya Pradesh	18,574	50.5
6	Orissa	461	1.3
7	Rajasthan	619	1.7
8	Uttar Pradesh	1,822	4.9
9	West Bengal	744	2.0
	Total for Nine States	34,824	94.6
	Other States	1,986	5.4
	Total	**36,810**	**100.0**

In respect of Bhandara district out of 36,810 interstate migrants Madhya Pradesh accounts for 50.5 per cent, Chhattisgarh accounts for 26.2 per cent, Uttar Pradesh accounts for 4.9 per cent, Andhra Pradesh accounts for 2.9 per cent, Bihar accounts for 2.6 per cent and Gujarat accounts for 2.5 per cent interstate migrants.

Migrants by Place of last residence

ANNEXURE IV (v)
Percentage distribution of migrants by place of last residence - Maharashtra

		0.0	0.0	0.0
	Total migrants :	**426,054**	**110,996**	**315,058**
		100.0	**100.0**	**100.0**

In Bhandara district there are 426,054 migrants comprising 110,996 males and 315,058 females. The migrants of this district constitute 37.5 per cent of total population. Male and female migrants constitute 19.4 and 56.0 per cent respectively.

From the distribution of total migrants in Maharashtra by place of last residence, it can be clearly seen that females predominate in intradistrict and interdistrict migration while male predominate in interstate and international migration. In case of Bhandara district females predominates in intradistrict, interdistrict and interstates migration while males predominate in international migration.

ANNEXURE IV (vii)

Inter State Migrants to Maharashtra

Serial number	Place of Last residence	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
1	Andhra Pradesh	431,774	5.9
2	Bihar	361,351	4.9
3	Gujarat	849,045	11.6
4	Karnataka	1,165,351	15.9
5	Kerala	258,952	3.5
6	Madhya Pradesh	589,745	8.1
7	Rajasthan	431,190	5.9
8	Tamil Nadu	249,989	3.4
9	Uttar Pradesh	2,072,193	28.3
	Total for Nine States	6,409,590	87.6
	Other States	903,549	12.4
	Total	**7,313,139**	**100.0**

The number of migrants by place of last residence from other States of India is 7,313,139. It is seen that 17.5 per cent of the total migrants are from other states. In case of Bhandara district 33,724 (7.9 per cent) of total migrants are from other states.

In Maharashtra, 9 states viz., Uttar Pradesh, Karnataka, Gujarat, Madhya Pradesh, Andhra Pradesh, Rajasthan, Bihar, Kerala and Tamil Nadu together account for 6,409,590 migrants (87.6 per cent) out of 7,313,139 interstate migrants.

ANNEXURE IV (viii)
Inter State Migrants to Bhandara

8	Uttar Pradesh	1,514	4.5

ANNEXURE IV (viii) - (Contd.)

Serial number	Place of Last residence	2001 Census	
		Migrants	Percentage to total Migrants
1	2	3	4
9	West Bengal	632	1.9
	Total for Nine States	31,909	94.6
	Other States	1,815	5.4
	Total	**33,724**	**100.0**

In respect of Bhandara district out of 33,724 interstate migrants Madhya Pradesh accounts for 50.5 per cent, Chhattisgarh accounts for 27.5 per cent, Uttar Pradesh accounts for 4.5 per cent, Andhra Pradesh accounts for 2.8 per cent and Gujarat accounts for 2.6 per cent.

Rural – Urban Components Of Migration

The flow of migrants would consist of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these various streams in case of migrants is classified by place of last residence. It presents data only in relation to internal migrants. The data for Bhandara district is presented separately.

ANNEXURE IV (ix)
Rural And Urban Composition of Internal Migrants by Place of last Residence, 2001 Census - Maharashtra

	Place of last residence	Place of Enumeration		
		Total	Rural	Urban
	1	2	3	4
	Total Internal Migrant :

Table C-1 of Part IV-A, C Series, Socio-Cultural Tables,1991 Census

* Gondiya district was included in undivided Bhandara district in 1991 census.

During the 1991-2001 decade in Maharashtra state, the proportion of never married has decreased both for males and females, the proportions of married, widowed and divorced/separated has increased both for males and females (except widowed males).

The proportion of never married in age group 0-14 and 15-34 has increased in males and females while the proportion of married in the same age group has decreased in males and females.

Since in 1991 Gondiya district was included in undivided Bhandara district, the comparison has not been attempted.

Note: # The 1991 Census could not be conducted in 33 villages of Akkalkuwa and Akrani C.D. Blocks of Dhule District. The population of these villages (Persons 16,052 Male 8,200 and Females 7,852) has been obtained from secondary sources and included in the population of district and Maharashtra. However, further details are not available.

Source : Table C-2 of Part IV-A, C-Series, Socio-Cultural Tables, 1991 Census.

* Gondiya district was included in undivided Bhandara district in 1991 Census.

When compared to 1991 data, it is found that during the last decade the literacy rate of the state has jumped from 64.9 per cent to 76.9 per cent. Since in 1991 Gondiya district was included in undivided Bhandara district, the comparison has not been attempted.

7	Pawari/Powri	2.5	2.9	0.1	99.7	0.3
8	Sindhi	0.6	0.1	3.9	8.5	91.5
9	Urdu	0.5	0.1	3.0	21.6	78.4
	Other Mother Tongues	2.2	1.8	4.7	72.3	27.7
	All Mother Tongues	100.0	100.0	100.0	86.9	13.1

Source : Table 31 of Maharashtra State District Profile 1991

* Gondiya district was included in undivided Bhandara district in 1991 Census.

Marathi is the main language of the district and is the mother tongue of 88.7 per cent of the district population. In rural areas Marathi speakers account for 90.6 per cent whereas in urban areas 77.9 per cent. Hindi is the second largest language spoken in the district. It accounts for 4.2 per cent of the total population. The proportion of Hindi speakers is higher in urban areas (12.5 per cent) than the rural areas (2.6 per cent). The third largest language spoken in the district is Pawari/Powari, its percentage to the total population is 1.4 and mainly spoken in rural areas by 1.7 per cent of the population, whereas it is 0.1 per cent in urban areas.

The speakers of the minority languages are mainly concentrated in rural areas and their proportion in urban areas is very less (except Urdu and Londhi).

Since in 1991 Gondiya district was included in undivided Bhandara district, the comparison has not been attempted.
