Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometer worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council and C.T. for Census Town.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/Chief officer was scrutinised and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorates were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

Chandrapur district is the eastern part of the greater tract known as the 'Vidarbha', which is famous for various types of minerals like iron coal etc.

The district earlier known as Chanda and now Chandrapur is shrouded in mystery. Tradition and legends tell that the name of this place was Lokapura, which was first changed to Indapur and subsequently to Chandrapur. During the period of the British Raj, Chandrapur came to be called as Chanda, which was again changed to its original name Chandrapur around 1964. Other places of the region in ancient times include Wairagad, Kosala, Bhadravati and Markanda. Hindu and Buddhist kings are said to have ruled the area for a long time. Later on, Mana chiefs who ruled the Chandrapur were overtaken by Gonds around 9th century. Gond kings ruled the area till 1751 when Maratha period started. Raghuji Bhosale, the last king of the dynasty, died heirless in 1853 and Nagpur province together with Chandrapur was declared annexed to the British Empire.

In 1854 Chandrapur formed an independent district. In 1874, however, upper Godavari district of Madras was abolished and four tahsils were added to Chandrapur District to form one tahsil with Sironcha as its headquarters. In 1895, the headquarters of the tahsil was transferred from village Mul to Chandrapur. 1905 witnessed the creation of a new tahsil with headquarters at Gadchiroli by effecting the transfer of Zamindari eastates from Brahmapuri and Chandrapur tashils. A small zamindari tract from Chandrapur district was transferred to newly formed Durg district in 1907. In the same year an area of about 1560 km^2 comprising of three divisions of the lower Sironcha tahsil namely Cherla, Albak and Nugur were transferred to Madras State.

No major change occurred in the boundaries of the district or its tahsils between 1911-1955. Consequent upon the reorganization of state in 1956, the district was transferred from Madhya Pradesh to Bombay State. In the same year Rajura tahsil, a part of adilabad district of Hyderabad state, was transferred to Nanded district. Subsequently it was transferred to Chandrapur district in 1959. The district became part of state of Maharashtra since its creation in May 1960. After 1981 Census Chandrapur district was devided into Chandrapur and Gadchiroli district for administrative convenience comprising ten tahsils.

(iii) Administrative Set-Up

There were Major changes took place in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Mumbai district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya were formed bifurcating, Dhule, Akola, Parbhani and Bhandara district respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Chandrapur district is included in Nagpur division. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra.

There were 10 tahsils and 12 towns in the district. In 1993 Mul and Rajura tahsils were divided into newly formed Sawali and Korpana tahsils respectively.

In 1999 Chandrapur and Gondpipri tahsils were divided into newly formed Ballarpur And Pombhurna tahsils respectively. Now, Chandrapur has 14 tahsils and 14 towns, 1791 villages spread over 1) Warora (188), 2) Chimur (253), 3) Nagbhir (138), 4) Bramhapuri (136), 5) Sawali (111), 6) Sindewahi (114), 7) Bhadravati (155), 8) Chandrapur (90), 9) Mul (105), 10) Pombhurna (71), 11) Ballarpur (36), 12) Korpana (155), 13) Rajura (141), and 14) Gondpipri (98). The following statement indicates the changes, which occurred after 1991 census in the number of villages, towns in each tahsil.

For administrative purpose the district is divided into 4 sub-divisions viz., Chandrapur, Warora, Brahmapuri and Rajura. Chandrapur sub-division includes Chandrapur, Mul, Ballarpur, Sawali, Pombhurna and Gondpipri tahsils, Warora sub-division includes Warora, Bhadravati, and Chimur tahsils, Brahmapuri sub-division includes Brahmapuri, Sindewahi and Nagbhir tahsils and Rajura sub-division includes Rajura and Korpana tahsils. The District Collector along with the District Judge, Superintendent of Police, Chief Excecutive Officer of Zill Parishad and other Senior Officers of the State Government look after the development and regulatory function in the district. At the tahsil level, the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other Officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main

fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on

professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled

Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Chandrapur district is situated in the eastern portion of the Maharashtra State. It lies between 19° 27' to 40 °43' North latitudes and 78° 48' to 80° 00'

East longitudes. The district is surrounded by Bhandara and Nagpur districts at its northern side, Wardha and Yavatmal districts at its western side, Gadchiroli district at its eastern side and Adilabad district of Andhra Pradesh State on the southern side.

The headquarters of the district is located at Chandrapur, a town having a population of 289450 persons as per the 2001 Census. The main railway line connecting Chennai and New Delhi passes through Chandrapur. It is also well connected by roads to the other parts of the State as well as the country.

The district has an area of 11,443 sq.kms. and a population of 2,071,101 persons as per Census 2001. While the area of the district accounts for 3.7 percent of the total area of the State, the districts population constitutes 2.1 percent of the total population of the State. The density of population is 181 persons per sq. km. Among the 35 districts of the State, the district ranks 9th in terms of area, 21st in terms of population and 33rd in terms of density.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and **Chandrapur**.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Chandrapur district falls under the Wardha-Penganga-Wainganga plain, the micro level division of the Deccan Plateau. On the basis of local relief and other characteristics the district can be grouped into four divisions i.e. 1) Rajura Upland, 2) Wardha-Penganga plain, 3) Chimur-Sindewahi Upland, and 4) Wainganga Valley.

Rajura Upland is situated in the extreme southwestern portion of the district and covers the southern parts of Korpana and Rajura tashils. The

uplands attain a maximum height of about 500 meters but a major part of this region lies below 500 meters. It is dissected by numerous streams originating from the upland itself, which have resulted in an uneven surface. The region is fairly covered with forests which are mainly reserved forests. The region is drained mainly by small streams which flow towards the north and east and they merge with the Penganga and Wardha Rivers.

Wardha-Penganga Plain forms a narrow strip in the western part of the district. It spreads over parts of Warora, Bhadravati, Chandrapur, Ballarpur, Korpana, Rajura and Gondpipri tahsils. This plain gently slopes towards southeast and is smooth in nature. It has a height varying between 150 and 300 meters. The area is drained by the Wardha and Penganga rivers. Near the river beds, soils are deep and fertile.

Chimur-Sindewahi Upland spreads over Chimur, Nagbhir, Sindewahi tahsils, eastern parts of Warora, Bhadravati, Chandrapur tahsils, and northern part of Mul tahsil. This region attains a height of between 200 and 300 meters and serves as a watershed between the Wardha and Wainganga rivers. The upland is dotted with residual hillocks which are locally known as Chimur hills, Mul hills and Parasgarh hills. These hills rise to more than 300 meters. Except these raised hillocks, the surface is relatively smooth. The uplands slope towards the south and southeast. The region is fairly covered with vegetation of commercial significance.

The Wainganga valley extends vertically along Wainganga river in a north-south drection in the eastern part of the district, and it includes eastern strips of Brahmapuri, Sawali, Mul, Pombhurna and Gondpipri tahsils. This region is the area neighbouring the right bank of the Wainganga river. The valley is situated at a height of around 200 metres. The northern part of the valley is relatively higher than the southern, and it slopes towards the south. The valley is partly covered with forests. These are mainly reserved forests. Wainganga river is the main river of the valley, which flows towards the south. A number of small streams join this river from both sides. All these are small and originate from Chimur-Sindewahi upland, Gadchiroli upland and Sironcha plateau.

Drainage

The district is drained by the river systems of Wardha and Wainganga. Wardha river forms the northwestern boundary of the district while it's tributary the Penganga forms the southwestern district boundary. The Penganga meets the Wardha river near Wadha village of Chandrapur tahsil. The Wardha river then forms the tahsil boundary between Korpana, Rajura, Chandrapur, Ballarpur and Gondpipri as it flows towards southeast to meet the Wainganga river.

The Wainganga river enters the district at it's northeastern corner near the Kolari village of Brahmapuri tahsil and flows southwards forming a natural boundary at the eastern side of the district. The Wainganga and Wardha rivers meet at the southeastern corner of the district near Shivani Deshpande village of Gondpipri tahsil. After the confluence, the combined river (i.e. Wardha and Wainganga) is known as the Pranhita.

Climate

Chandrapur is the hottest district of Maharashtra and in the hot season, the district headquarters records a higher temperature, by a degree or so, than Nagpur. Nights are, however tolerable but for May and June, the hottest months of the year, when they are somewhat uncomfortable. The mean daily maximum temperature in May is about 43 ^{o} c and the mean daily minimum temperature is about 29 ^{o} c. In the winter the minimum temperature drops about to 13 ^{o} c and sometimes due to cold waves in northern India, it may come down up to 8 degree centigrade.

The rainy season usually starts in the second or third week of June and lasts till the middle of October. Since the major part of the district is surrounded by dense forest, the atmosphere is chilly, damp and sultry throughout the rainy season. The cold season commences from the beginning of November and lasts till the middle of February. February is characterised by the blowing of wild and violent winds heralding the approach of the hot season that lasts till the middle of June. The rainfall in the district is more or less assured and the southwest monsoon is the main source of rains. Intensity of the rainfall increases from west towards east, and it is highest in the month of July. On an average 1300 to 1400 mm of rainfall

occurs during the year. Nearly 80 percent of annual rain fall is received in the month of July , August and September .

Natural Wealth

Minerals

Chandrapur is quiet rich in minerals and is one of the important mineral producing districts of Maharashtra state, with large reserves of high grade iron ore and coal. Other minerals include cromite, building stone, limestone and clay. Prospecting has also been done for copper and bouxite. Iron ore reseves are found about 22 lakhs metric tons in this district and the bulk of the ore is found in Sindewahi tahsil (about 68 percent).

The reserves of limestone are found in Rajura tahsil (5470 lakh tones).

About 12270 lakh tones coal reserved are found in the district and out of them 68 percent deposit is found in Chandrapur tahsil only.

Fisheries

The district is naturally endowed with good potential water resources and fishing activity is confined to inland water only, such as rivers, tanks and ponds. Wardha and Wainganga are the important rivers with a potential for pisciculture. In Chandrapur district, 19305 hectare area is available for fisheries. In 1998-99, 15378 hectare area was used for fisheries and from these 7567 matric.tones fish products were received. The income received from them was Rs.2391 lakhs. The fish products includes Rahu, Katla and Mrugal, these type of fish are produced on a large scale. The other commercially important varieties of fish found in the district are Murrel, Dhadkya, Botri, Padhan, Tambu, Karved, Poshti, Dhosra, Kolus, Mangur, Zinga etc.

The fisheries department to improve the socio-economic condition of the fishermen and augment the fish supply has introduced several developmental schemes.

Soil And Cropping Pattern

The soil of the district is well defined and conductive for growing crops of various kinds. The most fertile soils are found in the Wardha and Wainaganga valleys. The numerous varieties of soil are known by many local names, yet they are grouped under the following classes.

Kali – This type of soil is mainly confined to the riverine tracts and is found in the valleys of Wardha and Wainaganga. It is suitable only for rabi crop.

Kanhar – It contains small amount of grit in the form of lime. Inferior type of Kanhar is known as bersi Kanhar and is coarser in texture. It is mainly noticed in the Wainganga valley.

Morand – It responds well to irrigation due to its loamy texture. Both kharif and rabi crops can be grown on this soil.

Khardi – This type of soil is light in colour and full of stones, but when embanked sometimes improves itself into morand. Only til and jowar grows in it.

Wardi – It is the principal rice soil of the heavy rice tracts. It is a light coloured soil, as good as sand with just sufficient clay to keep it from crumbling in the dry season.

Other kind of soils called Pandhari, Ratari and Bardi are also found in this district. Further eastwards on either bank of the Wainaganga the black loam reappears and is accompanied by a few rice growing villages. Eastward of Wainganga valley the soil becomes poor and hills are in abundance. Rice is the staple crop of this region.

Land and land use pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19-23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private and whether wooded or simply maintained as

forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

A large quantity and excellent quality of forest wealth is produced in Chandrapur district. Generally forest land is scattered in all tahsils of the district Best quality of teak wood (Sagwan) is produced in large scale, besides fire wood, Tendu Patta (Bidi leafs),Bamboo, Gum, Moha etc. are also produced, in these forests.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	662,262
2)	Total Buffaloes	113,778
3)	Total Goats	268,534
4)	Total Sheep	20,955

9)	No. of Veterinary Institute per lakh livestock	14

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to95 while average livestock per village is 737 For every thousand human population there are 613 livestock, 43 in-milk cows, 17 in-milk buffaloes and 542 poultry fowls. While there are 53 bullocks and male buffaloes per hundred hectares of gross cropped area and 2 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 14.

Industry

Industrially Chandrapur district is not much advanced district. With abounding in mineral wealth and forests, there are few large scale industries located, which manufacture paper, glass, pottery and oil, cement, coalmines etc. These industrie are Ballarpur paper mill, Swastik glass works, Dadabhoy potteries. These are cement manufacturing companies namely Mannikgadh cement, L&T cement, o.c.c cement and Ambuja cement. Numbers of coalmines are there in Chandrapur, Ghugus, Padmapur, Majori, Chargaon, Telwasa, Sasti and Murpar. Besides these, a steel industry Maharashtra Electra smelt at Chandrapur, Layeed industries, Thermal powers station at Urjanagar, Electrolux at Warora are located in the district.

There are many categories of medium industries scattered over the district. Such industrial units comprise of oil mills, saw mills, paddy processing mills, cotton ginning mills, tile manufacturing, bidi manufacturing, soap manufacturing, pottery making, tasur silk weaving etc.

Handloom industry is the most important of the various small scale industries. Tasur silk industry also occupies an important place. Next to it is the wollen industry which mainly producing country blankets. Manufacturing of bidies is also increasing as tendu leaves are available in abundance.

The economic activity of the district is mainly depend on agriculture which accounts 88.2 percent workers (Cultivators and agricultural labourers).

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles

6	Mopeds	15,660
7	Scooters	24,819
8	Motor Cycles	18,812
9	Total Goods Vehicles	4,567
10	Tractors	2,577
11	Trailors	2,554
12	Others	211
	Total	**78,426**

Source: Transport Commissioner office

It may be seen that the district had 15,660 Mopeds, 24,819 Scooters and 18,812 Motor Cycles. There were 3,041 jeeps, 245 taxies, 3,164 autorickshaws, 511 buses and 2,265 Cars and Station Wagons. Besides, 211 other modes of transport, the district also had 2,577 tractors and 2,554 trailors as means of transport.

Electricity and Power Supply

The proportion of electrified villages of this district is quite good. In total inhabited villages 98.1 percent villages are electrified. All towns are cent percent electrified. Cent percent villages of three tahsils namely Sawli, Sindewahi and Mul are electrified.

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad, Bant
7) Balahi, Balai

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which

are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II Towns, 20,000 to 49,999 population are Class III Towns, population with 10,000-19,999 are Class IV Towns, population with 5,000 and 9,999 are Class V Towns and towns with less than 5,000 population are Class VI Towns.

Slum Area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 are about economic activity of the person. Question 21 and 22 are about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/ Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to the 2001 Census the total population of district Chandrapur stands at 2071101 with 1062993 males and 1008108 females constituting 2.1 percent of the states population. Among the 14 tahsils of the district, Chandrapur tahsil is the most populous tahsil (440,897) and Pombhurna tahsil the least (47906). Other tahsils in order of their population size are Warora (165,843), Bhadravati (156,995), Chimur(156,772), Bramhapuri (153,486), Rajura (152,216),Korpana (143,210), Ballarpur (133,722), Nagbhir (124,425), Mul (110,109), Sindewahi (106,275), Sawali (104,686) and Gondpipri (74,559).

Out of total 2,071,101 population of the district 1,406,034 persons (67.9 percent) are residing in rural areas and remaining 665,067 persons (32.1 percent) are residing in urban areas of the district. Thus in Maharashtra State 42.4 percent of total population is urban and in Chandrapur district 32.1 percent of total population is urban. The average number of towns per hundered inhabitants villages is considered as an index of urbanization. In Chandrapur district there are 0.95 percent towns for every hundred inhabited villages.

Chandrapur district has 1,791 villages including 319 uninhabited villages. Thus the rural population is distributed among 1,472 inhabited villages in 14 tahsil. The average numbers of inhabited villages per tahsil are about 105. Chimur is the largest tahsil in terms of rural population.

There are 14 towns in the district of which 7 towns are municipal towns and remaining 7 are Census towns. Chandrapur (MCl) is the largest town in terms of urban population. The average size of an urban center of the district works out to 47505 persons.

Table 1 shows variation in population growth during the dacade (1991-2001). It also shows the growth rates for the districsct and tahsils in total rural and urban areas and also percentage of urban population to total population.

According to census 2001, the district Chandrapur has total population of 2,071,101 comprising of 1,406,034 rural and 665,067 urban population. The population of the district in Census 2001 is 16.9 percent higher than the district population in 1991 Census.

The average growth rate for the rural and urban areas of the district are 10.3 percent and 33.9 percent respectively. Four new tahsils namely Sawali, Pombhurna, Ballarpur and Korpana are created after 1991 Census. (The figures against these tahsils for 1991 Census are adjusted as of shifted villages then beloning to original respective tahsils). In addition tahsils Chimur, Nagbir, Sawali, Sindewahi, pombhurna and Gondpipri do not have any urban areas.

In urban areas tahsil Warora and tahsil Ballarpur has - 4.0 percent and - 2.6 percent growth rate. Tahsil Bhadravati and tahsil Chandrapur has recorded highest growth rate (121.1 percent and 37.4 percent respectively) than the district (urban) average 33.9 percent.

In rural areas tahsil Ballarpur recorded highest growth rate (48.4 percent) while tahsils Bhadravati and Chandrapur recorded minus growth during the decade.

Eleven tahsils namely Warora, Chimur, Nagbhir, Bramhapuri, Sindewahi, Mul, Pombhurna, Ballarpur, korpana, Rajura and Gondpipri registered highest growth rate than the district (rural) average (10.3 percent).

The distributions of inhabited villages by population size ranges with its percentages are given in table 2. There are total 1472 inhabited villages in the district of these 178 villages have population less than 200, accounts 12.1 percent of the total inhabited villages. 389 villages (26.4 percent) have 200-499, 456 villages (31.0 percent) have population 500-999, 317 villages (21.5 percent) have population 1000-1999,114 villages (7.7 percent) have population 2000-4999, 14 villages (1.0 percent) have population 5000-9999 and 4 villages (0.3 percent) have population 10000 and above.

In C.D.Block Warora there are 156 villages of which 59 villages (37.8 percent) have population 500-999, 50 villages (32.1 percent) have population 200-499,30 villages (19.2 percent) have population 1000-1999, 12 villages (7.7 percent) have population less than 200, 4 villages (2.6 percent) have population 2000-4999 and one village (0.6 percent) is having population 5000-9999.

In C.D.Block Chimur there are total 176 villages of which 52 villages (29.5percent) have population 200-499, 47 villages (26.7 percent) have population 500-999, 33 villages (18.8percent) have population less than 200, 30 villages (17.0 percent) have population 1000-1999 10 villages (5.7 percent) have population 2000-4999,2 villages (1.1 percent) in each have population 5000-9999 and 10000 and above respectively.

In Nagbhir C.D.Block, there are 114 villages of which 32 villages (28.1 percent) have population 500-999,31 villages (27.2 percent) have population 200-499,27 villages (23.7 percent) have population 1000-1999, 12 villages (10.5 percent) have population 2000-4999, 10 villages (8.8 percent) have population less than 200 and one village (0.9 percent) each have population 5000-9999 and 10000 and above respectively.

There are 110 villages in C.D.Block Bramhapuri of which 36 villages (32.7 percent) have population 1000-1999, 34 villages (30.9 percent) have population 500-999,15 villages (13.6 percent) have population 200-499,13 villages (11.8 percent) have population 2000-4999 and 12 villages (10.9 percent) have population less than 200 persons in their respective villages.

In Sawali C.D.Block there are 95 villages of which 28 villages (29.5 percent) have population 500-999, 24 villages (25.3 percent) have population 1,000-1999, 21 villages (22.1 percent) have population 200-499, 12 villages (12.6 percent) have population 2,000-4,999, 9 villages (9.5 percent) have population less than 200 and one village (1.1 percent) have population 5000-9999.

In C.D.Block Sindewahi.there are total 92 villages of which 26 villages (28.3 percent) have population 500-999, 22 villages (23.9 percent) have population 200-499, 17 villages (18.5 percent) have population 1,000-1,999, 15 villages (16.3 percent) have population less than 200, 9 villages (9.8 percent) have population 2,000-4,999, 2 villages (2.2 percent) have population 5,000-9,999 and one village (1.1 percent) have population above 10,000.

There are 119 villages in Bhadravati C.D.Block of which 41 villages (34.5 percent) have population 500-999, 35 villages (29.4 percent) have population 200-499, 19 villages (16.0 percent) have population less than 200,16 villages (13.4 percent) have population 1,000-1,999; 8 villages (6.7 percent) have population 2,000-4,999.

In Chadrapur C.D.Block there are 80 villages of which 22 villages (27.5 percent) in each are having 200-499; 1,000-1,999 population, 21 villages (26.3 percent) have population 500-999, 8 villages (10.0 percent) have less than 200 population, 5 villages (6.3 percent) have 2,000-4,999 population and 2 villages (2.5 percent) have population 5,000-9,999.

There are total 79 villages in Mul C.D.Block of which two population ranges 200-499 and 500-999 population have 19 villages in each range accounting (24.1 percent) of total villages of the C.D.Block. 16 villages (20.3 percent) have 1,000-1,999 population, 14 villages (17.7 percent) have 2,000-4,999 population and 11 villages (13.9 percent) have population less than 200.

In C.D.Block Pombhurna, there are total 58 villages of which 23 villages (39.7 percent) have population 500-999,14 villages (24.1 percent) have population 1,000-1,999, 12 villages (20.7 percent) have population 200-499, 7 villages (12.1 percent) have population less than 200 and two population ranges 2,000-4999 and 5,000-9,999 have one village each accounting 1.7 percent of total villages of the C.D.Block Pombhurna.

The smallest number of villages 32 are in C.D.Block Ballarpur of which 9 villages (28.1 percent) are having population 500-999, 7 villages (21.9 percent) have population 200-499, two population ranges i.e.less than 200 and 1,000-1,999 have 5 villages in each range accounts 15.6 percent villages of the total villages of C.D.Block Ballarpur, 4 villages (12.5 percent) have 2000-4999 population and two villages (6.3 percent) have population 5,000-9,999.

Out of 142 villages in Korpana C.D.Block, 46 villages (32.4 percent) have population 200-499, 40 villages (28.2 percent) have population 500-999, 31 villages (21.8 percent) have population 1,000-1,999; 16 villages (11.3 percent) have population less than 200, 8 villages (5.6 percent) have population 2,000-4,999 and one village (0.7 percent) have population 5,000-9,999 in Korpana C.D.Block.

There are total 130 villages in Rajura C.D.Block, of which 42 villages (32.3 percent) have population 500-999,37 villages (28.5 percent) have population 1,000-1,999, 29 villages (22.3 percent) have population 200-499, 13 villages (10.0 percent) have population less than 200 and 9 villages (6.9 percent) have 2,000-4,999 population.

In Gondpipri C.D.Block there are total 89 villages of them 35 villages (39.3 percent) have 500-999 population, 28 villages (31.5 percent) have 200-499 population, 12 villages (13.5 percent) have populaton 1,000-1,999; 8 villages (9.0 percent) have population less than 200, 5 villages (5.6 percent) have population 2,000-4,999 and one village (1.1 percent) is having population 5,000-9,999.

From the table it can be seen that there are only four large size population 10,000 and above villages (two in C.D.Block Chimur and one each in C.D.Block Nagbhir and Sindewahi) in the district Chandrapur.

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria — Nil
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
1 Bhadravati
(c) Declassified
1 Visapur
(d) Wholly merged with other town(s) — Nil

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 shows new towns, denotified towns, declassified towns and towns merged with other towns for 2001 census. In Chadrapur district three villages of 1991 census are declared as census towns for 2001 census namely, 1)Kondumal, 2)Durgapur 3)Chandur. Bhadravati Census town of 1991 Census is notified as statutory town for 2001 Census. Thus Visapur census town of 1991 census is declassified as village in 2001 census.

Table 4 indicates distribution of villages by population density (per sq.kms.). Out of 1,472 villages, 36.5 percent of villages are having population density ranging from 101-200 and covers 28.3 percent rural population of the district. This is followed by density 201-300 in 17.8 percent villages covering 21.8 percent rural population, density 51-100 in 17.5 percent villages covering 8.2 percent

population, density 301-500 in 12.6 percent villages covers 20.1 percent population (rural), density 501 and above in 7.3 percent villages covers 20.1 population, density 21-50 in 5.3 percent villages, density 0-10 in 1.8 percent villages and density 11-20 in 1.2 percent of villages. These three population density ranges covers negligible percentage of rural population.

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows sex ratio for the district and the state from 1901 to 2001 census. The sex ratio for the district is recorded as 948 females per 1,000 males in 2001 census. Compared to state average (922). The sex ratio in Chandrapur district has remained higher than that of state from 1901 census to 2001 census. As regards total areas sex ratio at the state level declined by 56 points and at district level it declined by 75 points during the last 100 years. Similarly sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased by 65 points, during 1901-2001. For the urban areas of the state the sex ratio increased by 11 points and for the district it is decreased by 50 points during the period 1901-2001.

Table 6 indicate sex ratio by tahsils 2001 census. The average sex ratio of the district is 948 females per 1,000 males. The highest sex ratio is recorded in tahsil Sawali (1,003) and the lowest in tahsil Chandrapur (918). In rural areas average sex ratio is 962 while in urban area it is 919. The highest sex ratio in rural area (1003) is recorded in Sawali tahsil while in urban area the highest sex ratio is recorded (965) in Mul tahsil. The lowest sex ratios both in rural and urban areas are recorded in Korpana tahsil i.e. 927 and 880 respectively. Six tahsils out of forteen are entirely rural. In rural area 6 tahsils viz. Nagbhir, Bramhapuri, Sawali, Sindewahi, Mul and Pombhurna have sex ratio above the district (Rural) average (962), whilein urban area 4 tahsil viz. Warora, Bramhapuri, Mul and Ballarpur have sex ratio above the district (urban) average (919).

Table 8 shows ranges of sex ratio in rural population. The sex ratio in 428 villages constituting 29.1 percent of the total 1,472 inhabited villages covering 38.1 percent of total rural population are in the range of 950-999, while for 399 villages constituting 27.1 percent of total villages and covering 24.2 percent rural population have a sex ratio in range 1,000-1,099, 332 villages (22.6 percent) covering 24.7 percent rural population are in range of 900-949, 136 villages (9.2 percent) covering 7.5 percent rural population have sex ratio in range of 850-899, 77 villages (5.2 percent) covering 1.7 percent rural population have sex ratio in range of 1,100 and above, 49 villages (3.3 percent) covering 2.2 percent rural population have sex ratio in range of 800-849, 22 villages (1.5 percent) covering 0.4 percent rural population have sex ratio in less than 700 range, 19 villages (1.3 percent) covering 0.7 percent rural population have sex ratio in range of 750-799 and 10 villages (0.7 percent) covering 0.4 percent rural population have sex ratio in range of 700-749.

It can be seen from the table that the villages having sex ratio range.less than 700, 700-749 and 750-799 covers negligible percentage of rural population in the district.

Tahsil wise sex ratio of population in 0-6 age group in total, Rural and Urban areas of the district can be seen in table–10. The sex ratio in the age group 0-6 years for the district is 939. The rural and urban sex ratio 0-6 years is 957 and 900 respectively. Out of 14 tahsils, 9 tahsils viz. Chimur (949), Nagbhir (945), Brahmapuri (966), Sawali (962), Sindewashi (985), Bhadravati (969), Mul (960), Rajura (951) and Gondpipri (969) shows higher sex ratio than the district sex ratio (939). While remaining 4 tahsils have recorded lower and Pombhurna recorded same sex ratio as the district sex ratio. According to rural-urban areas, highest sex ratio is recorded in Bhadravati tahsil (993) for rural area and (937) in tahsil Brahmapuri for urban area. The lowest sex ratio of 922 is recorded in Chandrapur tahsil for rural area and 870 in Rajura tahsil for urban area. Tahsil Chimur, Nagbhir, Sawali, Sindewahi, Pombhurna and Gondpipri are entirely rural tahsils.

Sex ratio of population in the age group 0-6 for C.D.Blocks, 2001 is presented in table 11. It reveals the sex ratios in 14 C.D.Blocks of the district. Among 14 C.D.Blocks, Bhadravati C.D.Block recorded highest (993) sex ratio and Chandrapur C.D.Block the lowest (922) in population for 0-6 age group. Seven C.D.Blocks namely Bramhapuri, Sawali, Sindewahi, Bhadravati, Mul, Rajura and Gondpipri recorded higher sex ratio than the district sex ratio (957), while remaining seven C.D.Blocks recorded lower sex ratio than the district sex ratio.

Table 33 reveals number and percentage of Main workers, Marginal workers and Non workers in towns 2001.In urban population of the district, 26.1 percent persons are recoreded as Main workers, 4.3 percent as Marginal workers and 69.7 percent as Non workers. Among Main workers there is vast difference in male – female share. Male workers constitute 43.1 percent of total male population while female Main workers constitute 7.5 percent of total female population. There is not much difference in male – female share in Marginal workers. Male Marginal workers constitute for 4.8 percent and female Marginal workers for 3.6 percent of their respective populations in urban areas of the district.

A town wise perusal reveals that Chandur (Census Town) has recorded highest percentage (27.6 percent) and Shivaji Nagar (Census Town) recorded the lowest (22.5 percent) in Main workers. In marginal workers Mul (MCl) recorded highest percentage (14.1 percent) and Kondumal (Census Town) recorded the lowest (0.7 percent) in urban areas of the district.

Note: Percentage of workers to total workers are given in brackets

Table 34 indicates the distribution of person, male female workers by four economically active categories in tahsils of the district Chandrapur. In the district there are 44.9 percent workers (Main + Marginal) in total population .In four categories cultivators (25.7 percent), Agricultural labourers (39.3 percent), Household industry workers (2.2 percent) and other workers (32.9 percent). Cultivators and Agricultural labourers together constitute 65.0 percent of the total workers.

While percentage of households industry workers is very low. The proportion of both cultivators and agricultural labourers varies from tahsil to tahsil. Tahsil Korpana records highest percentage (38.9 percent) in cultivator's category and tahsil Sindewahi records highest percentage (59.0 percent) in agricultural labourer category. While tahsil Chandrapur records lowest percentage in both categories i.e. 6.8 percent and 7.9 percent respectively among all tahsils. In other workers category Chandrapur tahsil records highest percentage (82.9 percent) and tahsil Pornbhurna the lowest (9.2 percent). In four categories female workers constitute highest proportion in Agricultural labourer category (58.7 percent) and male workers accounts for highest proportion in other workers category (45.2 percent) in the district.

Note: Percentage of workers to total workers are given in brackets

Table 35 indicates distribution of person male and female workers in four economically active categories in C.D Block (Rural) of the district. There are 51.9 percent workers (Main + Marginal) in total rural population of the district. Two categories namely Cultivators (32.4 percent) and Agricultural labourers (48.6 percent) together occupies major proportion of the total rural workers i.e (81.0 percent) of the district. Percentage of 'household industry' workers is only 2.1 percent and 'other workers' category accounts for 17.0 percent in rural area of the district. The proportion for Cultivators varies between 23.9 percent in Chandrapur C.D Block to 43.2 percent in Korpana C.D Block. The Agricultural labourers record highest percentage (59.0 percent) in Sindewahi C.D Block and the lowest (25.8 percent) in Chandrapur C.D Block. In 'Household Industrial' category percentage varies between 1.3 percent in Bramhapuri C.D Block to 2.9 percent in Sindewahi and Bhadravati C.D Blocks. The 'Other Workers' in Chandrapur C.D Block stands highest (47.7 percent) and Bramhapuri C.D Block stands lowest (8.6 percent) in rural areas of the district. In the district, the general pattern in all C.D Blocks is a higher percentage of female workers than male in Agricultural labourer category. In 'Other Workers' category there is quite difference in male –female percentage of workers in all the C.D Blocks.

Note: Percentage of workers to total workers are given in brackets

Table 36 reaveals distribution of wokers by sex in four industrial active categories in town of the district. There are total 30.3 percent workers in urban population of the district. Being urban area 'Other Workers' category shows highest percentage (90.4 percent) in all four categories in the district. This is followed by category Agricultural labourer (5.6 percent), Household Industry (2.4 percent) and Cultivators (1.6 percent).

Regarding towns, percentage varies between 99.5 percent in Kondumal (Census Town) to 61.2 percent in Mul (MCl) in 'Other Workers'category. In Agricultural labourer category Mul (MCl) records highest percentage of workers (31.8 percent), while Kondumal (Census Town) and Durgapur (Census Town) (0.1 percent in each) records the lowest. In household Industrial workers Chandur (Census Town) records highest percentage of workers (4.1 percent) and Kondumal (Census Town) records the lowest (0.4 percent).

It is observed from the table that in all towns percentage of females workers in Agricultural

Labourer category and Household Industrial category are always higher than percentages of male workers. While in 'Other Workers' category percentage of male workers is higher than the percenage of femal workers in all the towns.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Educational

There are total 1,472 inhabited villages in the district. Of these 1,365 villages (92.7 percent) covering 1,393,163 (99.1 percent) population are having at least minimum level education facility in the rural area of the district. The C.D Block Rajura has the highest percentage (96.9 percent) of villages with educational facility available while Ballarpur C.D Block has the lowest (81.3 percent) percentage of villages (Table – 37).

Population served with the educational amenity is highest in Warora and Rajura C.D Blocks (99.7 percent each), while Pombhurna C.D Block records the lowest (96.3 percent) in rural population of the district (table 38).

There are 113 villages not having minimum level (Primary) educational amenity. Of these for 83 villages the amenity is available within 5 Kms. of distance. For 12 villages amenity is 5 – 10 Kms. away and for 18 villages it is more than 10 kilomters at a distance from their respective villages.

There are 864 villages not having middle school amenity, of these 672 villages gets this amenity within 5 Kms. of distance, 136 villages get this amenity from 5 – 10 Kms. of distance and 56 villages are more than 10 kilomaters away from the middle school amenity.

Out of 1,472 villages, 1,460 villages do not have degree colleges, of these 104 villages get this amenity within 5 kilometrs of distance, 364 villages get this amenity from 5–10 Kms. of distance and 992 villages have to go more than 10 Kms. of distance to get this amenity. (Table 39).

1365 villages having educational amenity, of them 40 villages are within 5 Kms. of distance from the nearest statutory town; 282 villages are at 5–15 Kms. of distance, 777 villages are at 16–50 Kms. of distance and 266 villages are more than 51 kilometres of distance from the nearest statutory town.(table – 40).

According to population ranges in inhabited villages (463) are having population 1–499, which covers (81.7 percent) villages. This is followed by 454 villages (99.6 percent) are having population 500 –999 range, 316 villages (99.7 percent) are having population 1,000 – 1,999 range. 114 villages (100.0 percent) are having population 2,000 – 4,999 range, 14 villages (100.0 percent) are having population 5,000 – 9,999 range and 4 villages (100.0 percent) are having population 10,000 and above. (Table – 41). Range of population, which are having education amenity available in their respective villages.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by pucca road

Out of 1,472 villages 1349 villages (91.6 percent) are connected with pucca road that covers 97.0 percent rural population of the district. Of all the C.D Blocks, Chimur C.D Block records highest number of villages (170) having connected by pucca road; that covers 99.9 percent population of the C.D Block. C.D Block Ballarpur records lowest number of villages (31) availing pucca road amenity and according to population Pombhurna C.D Block records lowest percentage of population (81.0 percent) availing the approach by pucca road amenity. (Table – 37 and 38).

The distance from the nearest statutory town to the villages which are connected by pucca road are as 45 villages are within 5 Kms. of distance, 290 villages are at 5 – 15 Kms. of distance, 756 villages are at 16 – 50 Kms. of distance and 258 villages are more than 51 Kms. of distance from the nearest statutory town. (Table – 40).

1,349 villages are availing pucca road amenity these villages are distributed according to population ranges as 474 villages are in population range 1 – 499, 434 villages have population 500 – 999, 309 villages are in population range 1,000 – 1,999; 114 villages have population 2,000 – 4,999 range, 14 villages are in population range 5,000 – 9,999 and population range 10,000 and above accounts 4 villages with having connected by pucca road. (Table – 41).

Power Supply

The proportion of electrified villages for this district is quiet better. 1,444 villages (98.1 percent) out of 1,472 villages are enjoying power supply amenity, it covers 99.4 percent population in rural area of the district. In three C.D Blocks namely Sawali, Sindewahi and Mul cent percent villages are electrified. While according to population cent percent population of five C.D Blocks namely Warora, Sawali, Sindewahi, Mul and Ballarpur are enjoying power supply amenity, other than these C.D Blocks more than 96.0 percent villages of each C.D Block are availing power supply amenity that covers more than 98.0 percent population of each C.D Block (except C.D Block Chandrapur 94.9 percent). (Table – 37 and 38).

According to population ranges the villages having power supply are distributed as 14 villages have population range 5,000 – 9,999 and 4 villages have population 10,000 and above (with cent percent electrificaton) 542 villages have population range 1-499, 455 villages have population 500 – 999,316 villages have population 1,000 – 1,999 and 113 villages have population range 2,000 – 4,999 (with having more than 96 percent villages electrified).

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

Table–50 This table gives the classification of households having improved drinking water source, electricity, bathrooms, toilets and drainage facility available in the district.

According to Census 2001 the amenity of improved drinking water is available for 303,391 households constituting 67.1 percent of the total households.

In rural and urban areas of the district, this ameniy is available for 180,016 (57.9 percent) and 123,375 (87.5 percent) households respectively. The amenity of electricity is being enjoyed by 280,404 (62.0 percent) households. In rural and urban areas of the district, this amenity is available for 160,864 (51.7 percent) and119,540 (84.8 percent) households respectively. The amenity of bathroom is available for 165,477 households constituting 36.6 percent households. For rural and urban areas, this amenity is available for 72,048 households constitute 23.2 percent households and 93,429 households constiute 66.3 percent households respectively. The amenity of toilet is available for 146,830 households, which constitutes 32.5 percent of the total households. In rural and urban areas, toilet amenity is available in 63,537 households that constitute 20.4 percent households and 83,293 households, which constitute 59.1 percent households respectively.

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas of the district.

Out of 451,981 households in the district, 279,683 households (61.9 percent) uses firewood for cooking, 17,593 households (3.9 percent) uses crop residue, 4,743 households (1.0 percent) uses cowdung cake, 327 households (0.1 percent) use electricity, 18,984 households (4.2 percent) use coal lignite (charcoal), 94,107 households (20.8 percent) use cooking gas (L.P.G), 5345 household (1.2 percent) use biogas, 28,625 household (6.3 percent) use kerosene, 670 households (0.1 percent) use others and 1,904 household (0.4 percent) reported no cooking being done by them.

In the rural areas there are a total 310,960 households, of these 249,303 households constituting 80.2 percent of total household use firewood for cooking. This is followed by use of crop residue by 15,446 households (5.0 percent), cowdung cake use by 4,432 households (1.4 percent); use of electricity by 198 households (0.1 percent); coal lignite by 3,878

households (1.2 percent), cooking gas is used by 20,808 households (6.7 percent); bio gas use by 5,180 households (1.7 percent); kerosene is used by 10,584 households (3.4 percent); others by 394 households (0.1 percent) and no cooking has been reported by 737 households (0.2 percent).

In the urban areas ther are total 141,021 households, of these 73,299 households (52.0 percent) use L.P.G gas, followed by use of firewood by 30,380 households (21.5 percent) kerosene is use by 18,041 households (12.8 percent); coal / lignite is use by 15,106 households (10.7 percent), crop residue is use by 2,147 housholds (1.5 percent) and remaining type of fuel used is in very low perentage in urban areas.

It may be seen that while firewood continues to be the perdominent fuel used in rural areas, it is the cooking gas in urban areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 52 gives the number of households availing banking services and number of households having each of the specified assets 2001.

There are 451,981 households, of which 310,960 households are rural and 141,021 households are urban in the district. The banking facilities are being availed by 200,299 households, of which 11,290 households are rural and 88,009 households are urban. It may be seen that a higher proportion of households in urban areas (62.4 percent) of the total urban households utilize the banking amenity as compared to the rural areas (36.1 percent of the total rural households) availaing the banking amenity.

In the district, 102,166 households own radio transistor, 141,327 households own television, 26,345 households own telephone, 218,086 households own bicycle, 53,814 households posses scooters, 5,424 households posses car, jeep or van.

It may be noticed from the information available that of the 451,981 households, 175,782 households do not posses the above-specified assets. In rural and urban areas, there are 146,886 and 28,896 households respectively, who do not posses any of the specified assets.

(viii) Major Social And Cultural Events, Natural And Administrative Developments And Significant Activities During The Decade.

After 1991 Census there were major changes took place in tahsil boundaries for administrative convenience. On 15th August 1993, two new tahsils namely Sawali and Korpana were created by dividing Mul and Rajura tahsils respectively. On 26th June

1999, still two more tahsils were created namely Ballarpur and Pombhurna byfirecating Chandrapur and Gondpipri tahsils respectively. Two new towns are created after 1991 Census. Thus four new tahsils and two towns are ceated in Chandrapur district in last decade.

Famous social worker and founder of 'Aanandvan' (Leprosy help committee, Warora.) Shri Baba Amte was felicitate with 'Gandhi Peace Prize' of Gandhi Charitable Trust. The prize amount, Rs. 1 crorr and a certificate was given to him by the president of India, Shri K.R. Narayanan at New Delhi. Baba Amte handed over this anount to 'Leprosy Help Committee' work.

To preserve and develop the tradition of Art and Culture of the district, a large cultural auditorium is built in Chandrapur, which has 1,000 seats capacity and having latest audio system in it with airconditioning facility and good electrification. It is named as 'Priyadarshani Sanskritik Sabhagriha' which is open for the public from 6th March 2001.

Chandrapur district has received Rs.2.1 crorr in 1997 from Government for the sports complex under 'Vidarbha Vikas Works'. Today huge, modern sports complex namely 'Dadasaheb Kannamvar Jilha Krida Sankul' is ready and adding the grace of the district. The complex is having modern sporting amenities like 40x20 meter sketing Ring, Handball Court, Multipurpose auditorium, 45x20x13.5 metre court for indoor games, 12x16 metre's stage for cultural activities, International level swimming pool, Openair theatre, hostel for girls and boys etc. There is district sports office in the complex to guide the sport persons and well maintained library also.

In this sports complex interstate tournaments, youth gatherings take place.

400 years old Ramala Talav., which is built by the king Khandkya Ballarshah is now renovated as a tourist interest. Rs.1crorr were spent over its buitification. It is now best tourists spot in Chandrapur City. On 15th August 1999, this renovated lake was open for the public.

Old Ghodzari and Junona both lakes are privately developed as tourist spots. Both lakes are surrounded by garderns, there are toys for children, facilities like boating are made available and so these spots are on the map of tourism of the district.

(ix) Brief Description of Places of Religious, Historical or Archeological importance in the Villages and Places of Tourist Interest in the Towns of the district.

Forts, few old temples play an important role in shaping the socio-economic pattern of the district. There are some historical forts, picnic spots like lake, old temples etc.

The concentration of fairs is heavier in the district like other districts in Maharashtra. Most of the fairs held in the district are associated with important deities and religious festivals. Fairs are complementary to the weekly markets. In the fairs traders set up temporary stalls. Large quantities of agricultural products and other articles of daily use are brought for sale. People buy necessary things in these fairs. In Chandrapur district there are three famous fairs are held. In Chandrapur Mahakali Temple fair is held on Chaitra Purnima (March-April). More than 25000 devotees from Vidarbha and Marathwada gather during the fair. At Chimur tahsil Balaji Mandir fair is held in January – February, which is called as Ghoda fair and attracts a large number of people. During October/November at Vada on the occasion of kartik-Ekadashi a big fair is held. Beside these three fairs, many small fairs are held all over Chandrapur district, among them the fair held at Sasti village on Ram Nawami day is important.

Chandrapur district with its wild life richly preserved game sanctuaries, spots of scenic beauty and spots of archaeological interest, also affords excellent opportunities to develop tourists interest.

Ballarpur

Ballarpur is a rapidly developing municipal town, situated on Chandrapur-Madras railway route. It was a royal city in ancient times and signs of its splendour and glory are still seen scattered in its environs. Majority of coal and large quanitities of fine teak and other varieties of timber that brought from the surrounding forests are sold at Ballarpur.

Bhadravati or Bhandak

It is flourishing ancient village in Warora tahsil and today it is better known as place of Jain religious importance for majestic temple of Parshvanatha than for its historical importance or archaeological remains. The architectural remains in and around the village are of remote antiquity and great interest.

Tadoba

Tadoba National Park is the most attractive spot in Chandrapur district. It is situated in the heart of the Government Resserved Forest of West Chandrapur Division and has become an ideal resort in Maharashtra. Here visitors can observe undisturbed wild life in its natural surroundings. It is the only park in Maharashtra where one can see tigers and other wild animals wandering in their natural way.

The beautiful tadoba lake has been formed by bunding up a 'nala' and joining three surrounded hillocks. On top of the hillock there is a rest house from where we can view beautiful lake and well maintained forest.

Chandrapur

Chandrapur the headquarters of the district is largest city in the district. The town is gradually falling outside the fort walls. The fort wall have a number of gates and windows. It is a major railway station on Delhi-Madras railway line. The city possesses several architectural features of interest.

Chandrapur also has temples dedicated to Goddess Ekvira now known as Ekori, commemorates the visit of goddess Renuka of Mahur. There is a fairly large church maintained by the Scottish Episcopalian Mission. It also maintains one or two orphanages.

(x) Major Characteristics of the district, Contribution of the district in the form of any Historical figure associated with the district

Chandrapur district is located at the eastern edge of Maharashtra. The eastern and western boundaries of the district are well defined by the rivers Wainganga and Wardha respectively. The district is endowed with two major econamic resources viz, forest and mineral wealth. Teak wood is found abundantly. Besides fire wood, tendu leaves, bomboo, gum etc. are also found. The district has vast reserves of high grade iron, coal and limestone.

Tourism is one of the fastest growing industries in Maharashtra. In Chandrapur district also there are some places of tourists interest. Tadoba National Park is one of them. The district has no major industries hence it is backward. 20 percent population of the district is of Scheduled Tribe compared to the state average of 9 percent. Gond, Kolam and Pardhan are main tribes in the distric. 79 percent population of the district is depend on cultivation only. Rice is the main crop in eastern tahsils like Nagbhir, Bramhapuri, Sindewahi and Mul while Jowar and cotton are in other tahsils.

Marathi is the local language of the district. Gondi is also widely spoken. Diwali, Dussehra, Pola, Holi, Ganeshotsav, Janmashtami, Ram navmi are the major festivals celebreted in the district. Id, Christmas, Mahavir Jayanti are also celebrated.

'Anandwan' – A garden of happiness for thousands of leprosy patients in the country is at Warora town in Chandrapur district. The prophet of 'Anandwan' Baba Amte represents hope in an area of darkness to the thousands of leprosy patients. No one has done so much to alleviate the suffering of these forgotten people as the legendary social activist from Chandrapur. His tremendous work for the sick and handicapped has earned him many awards including 'padmashree' and Ramon Magsaysay' awards.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were

applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 Census only main workers were presented in to four categories. One of the novel features of the Primary Census Abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question related to currently married women the measures of fertility worked out are based on the F-series tables of 1991 Census pertaining to Maharashtra.

Mortality Levels

Information on questions on children ever born and children surviving canvassed for all ever-married woman has been tabulated by age of the mother. From this, estimates of child mortality have been worked out using Brass technique.

CBR women in the age group 45-49	--	4.5	--	4.2
Mean Age at Marriage	--	17.7	--	17.9
Child Women Ratio	--	47.7	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR & CBR for the district were 149, 183, 4.8, 5.7 and 34.8 respectively as compared with State average 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR for the district were 127, 165, 3.8, 5.4 and 30.8 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Meanage at marriage recorded lower for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio for the district is recorded slightly lower compared to the state.

Source : Table 31 of Maharashtra State District Profile 1991

Marathi is the main language of the district and is the mother tongue of 83.1 per cent of the district population. In rural areas Marathi speakers account for 89.8 per cent whereas in urban areas 69.0 per cent. Hindi is the second largest language spoken in the district. It accounts for 6.0 per cent of the total

population. The proportion of Hindi speakers is higher in urban areas (14.0 per cent) than the rural areas (2.2 per cent). The third largest language spoken in the district is Telugu, its percentage to the total population is 2.8 and mainly spoken in urban areas by 5.8 per cent, whereas 1.4 per cent in rural areas.

The speakers of the minority languages (Bengali, Chhattisgarhi, Mawari and Urdu) are mainly concentrated in urban areas and remaining two languages (Banjari and Gondi) are concentrated in rural areas.

It is found that during the last decade proportion of Marathi speaking persons has decreased from 83.8 per cent to 83.1 per cent while Hindi speakers proportion has marginally increased from 5.8 per cent to 6.0 per cent.
