UNION PRIMARY CENSUS ABSTRACT 1971 CENSUS

The statistics compiled for presentation in the All-India Volume Series-I—Part II-A are being presented in three parts. The first part will contain the general population tables A-I to A-IV. The present volume, which is the second part, contains the basic data called the primary census abstract, in respect of the population for the country, its States and Union Territories, Districts and within Districts for Cities and Urban Agglomerations each having a population of 100,000 and over. Data in respect of the constituent units of the respective urban agglomerations are also given. The third part table A-V will contain data pertaining to standard urban areas.

This abstract generally corresponds to union table E of 1951 and union primary census abstract of 1961. This is the basic table produced on a full count basis and furnishes the figures under the following heads.

(1) Area (in square kilometers). (2) No. of occupied residential houses (3) No. of households. (4) Total population by sex (including institutional and houseless population). (5) Scheduled castes by sex. (6) Scheduled tribes by sex. (7) Literate and educated persons by sex and (8) Total workers and non-workers and the break-up of workers by nine broad industrial categories for persons, males and females separately.

At the 1961 Census, the workers were classified under the following nine industrial categories.

(1) Cultivator. (2) Agricultural labourer. (3) In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities. (4) At household industry. (5) In manufacturing other than household industry. (6) In construction. (7) In trade and commerce. (8) In transport, storage and communications and (9) In other services.

In 1971, a separate category has been provided for mining and quarrying (category 4) as against the 1961 combined category 3 of "Mining, quarrying, livestock forestry, fishing, hunting and plantations, orchards and allied activities". Category 4 of 1961, (household industry), is now included in category 5- (manufacturing, 'processing, servicing and repairs) as Col. 5(a)—household industry. At the 1961 Census, "household industry" covered establishments falling under divisions '0' and '1' of t National Industrial Classification, *e.g.*, cattle rearing, or.. rdry, plantations, *etc.*, apart from divisions 2 & 3. At the 197' Census, "household industry" is confined to divisions 2 and ɔ only, it covers only manufacturing, processing, servicing or repairing. "Business services" as also "tea-stalls" and "restaurants" were included in category 9 at the 1961 Census. They are now included in category 7 which stands for workers in trade and commerce.

The ten broad industrial categories adopted at the 1971 Census are :—

I. Cultivator
II. Agricultural labourer
III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities
IV. Mining and quarrying
V. Manufacturing, processing, servicing and repairs
(a) At household industry and (b) other than household industry
VI. Construction
VII. Trade and commerce
VIII. Transport, storage and communications
IX. Other services
X. Non-workers.

The definition of "workers" in the 1971 Census is slightly different from that of 1961. In the 1961 Census, a person was considered as "worker" according to his participation in any economically productive work. In the case of regular employment in any trade, profession, service, business or commerce, a person was taken as a worker if he was employed during any of the 15 days preceding the day on which he was enumerated. An exception to the 15 days period to reckon one as a worker had been made in 1961 in the case of seasonal work like cultivation, livestock, dairying, household industry, *etc.* In such cases if a person had put in an hour's regular work a day throughout the greater part of the working season, he was considered as a worker. "Work" included not only actual work but also effective supervision and direction of work. A person might be working as a cultivator or as an agricultural labourer or at a household industry or might be doing any other work. He might be engaged either in one or more than one of the above. A full-time student who spent some time in his father's shop for even a day in a fortnight was considered as a "worker". Similarly if a woman who was basically engaged in household duties also engaged herself in work such as pounding rice for sale or wages or in domestic services for wages for others or minding cattle or selling firewood or making and selling dung cakes, grass, *etc.* or any such work, she was also treated as a "worker". Thus in the 1961 Census a person was categorised basically as a "worker" even if such a person's contribution to work was extremely marginal.

In the 1971 Census, every individual was asked to declare himself what according to him was his "main activity" *i.e.* how he engaged himself mostly. Accordingly all persons were divided into two broad streams of main activity as workers and non-workers. A 'worker' was defined clearly as a person whose "main activity" was participation in any economically productive work by his physical or mental activity. "Work" involved not only actual work but effective supervision, or direction of work. The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration and this had been returned as his 'main activity', the person was classified as a worker and categorised accordingly. A person who normally worked but had been absent from work during the reference period on account of illness or travel, holiday, temporary breakdown, strike, *etc.*, was treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as working. A person who was offered work but did not actually join it was not treated as engaged in work. In respect of seasonal work like cultivation, livestock keeping, plantation, some types of household industry, *etc.*, which are not carried on throughout the year, a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration.

In 1971 A person was treated basically as a "non-worker" if he or she did not come under any of the categories of "worker" mentioned above. Thus a person engaged primarily in household duties such as cooking for one's own household or performing one's own household duties or student attending an institution or a rent receiver was classified as such for his main activity and was treated as "non-worker". If he was also engaged in some economic activity, obviously not to the same extent as a full-time worker, that activity was mentioned under the head of "secondary work". The secondary work, if any, of those who were basically classified as "workers" was also ascertained. Data on "secondary work" will be presented in Table B-VII which will be published in Part II-B.

Census Houses and Households

Columns 4 and 5 of the primary census abstract give the total number of occupied residential census houses and the number of households respectively. A "census house" is a building or part of a building having a separate main entrance from the road, common courtyard, staircase, *etc.*, used or recognised as a separate unit. It may be inhabited or vacant. It may be used for residential or non-residential purpose or both. A "builiding" is generally a single structure, but sometimes made up of more than one component units which are used or likely to be used as dwellings or establishments such as shops, workshops, factories, godowns or in combination with any of these uses such as shop-cum-residence or workshop-cum-residence. A "household" is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any from doing so. There may be households of unrelated persons like boarding houses, hotels, orphanages, *etc*; they are called "institutional households". It is possible for more than one family or one census household o live in one census house.

The procedure adopted for the enumeration of the houseless and institutional population is explained in the fly leaf to Appendix III to Union Table A-I.

The following statement shows(a) the number of house holds per 1,000 census houses and (b) the number of households per square kilometre in rural and urban areas of each state and union territory.

Scheduled Castes and Scheduled Tribes

The population figures of scheduled castes and scheduled tribes and their break-up by sex are given in columns 9 to 14 of the primary census abstract.

Each enumerator was furnished with a list of scheduled castes and scheduled tribes applicable to the state under the Scheduled Castes and Scheduled Tribes List (Modification) Order (1956) as amended from time to time . He was instructed to record a person as belonging to a scheduled caste or a scheduled tribe only when the name of the scheduled caste or scheduled tribe as returned by the persons figured in the list. If the person belonging to a scheduled caste or scheduled tribe returned his caste or tribe by any synonym or generic name of the caste or tribe not mentioned in the list, he was not eligible to be entered as belonging to a scheduled caste or tribe.

In the 1961 Census, the enumerators in some States had been provided with a set of synonyms and generic names of the scheduled castes and tribes so that a person who returned his caste or tribe by any synonym or generic name was enumerated as a scheduled caste or scheduled tribe irrespective of whether such synonym or generic name found a place in the notified list. In the 1971 census, however, in view of a Supreme Court judgement on the subject, the notified list of scheduled castes and scheduled tribes had to be strictly followed and the synonyms or generic names of such communities could not be recognised for purposes of enumeration as a scheduled caste or scheduled tribe, as such synonyms or generic names were not included in the list. There is, therefore, a possibility that despite specific instructions to the enumerators to make all efforts to elicit the correct name of the caste or tribe, some persons might have returned themselves by some synonym, local name or generic name and suffered omission from enumeration as a member of a scheduled caste or scheduled tribe Care was, however, taken to include those who returned themselves merely as scheduled caste or scheduled tribe, and in whose case e numerator did not record the actual name of the caste ribe.

The scheduled castes and scheduled tribes as listed in the 1956 Order are given below. The scheduled castes are recognised only among Hindus and Sikhs while the members of the scheduled tribes may belong to any religion.

Literates and Educated :

Columns 15 to 17 of the primary census abstractgive the number of literate and educated persons and their sex break-up for each unit. A person who could both read and write in any language with understanding was to be taken as literate. A person who could merely read but could not write was not to be treated as literate. The test for reading was the ability to read a portion of the instruction booklet for enumerators. The test for writing was the ability to write a simple letter. Children aged 4 and below were treated as illiterate even if the child was going to school and might have picked up reading and writing a few words.

The following statement gives the percentage of literates in total, rural and urban areas of each state and union territory.

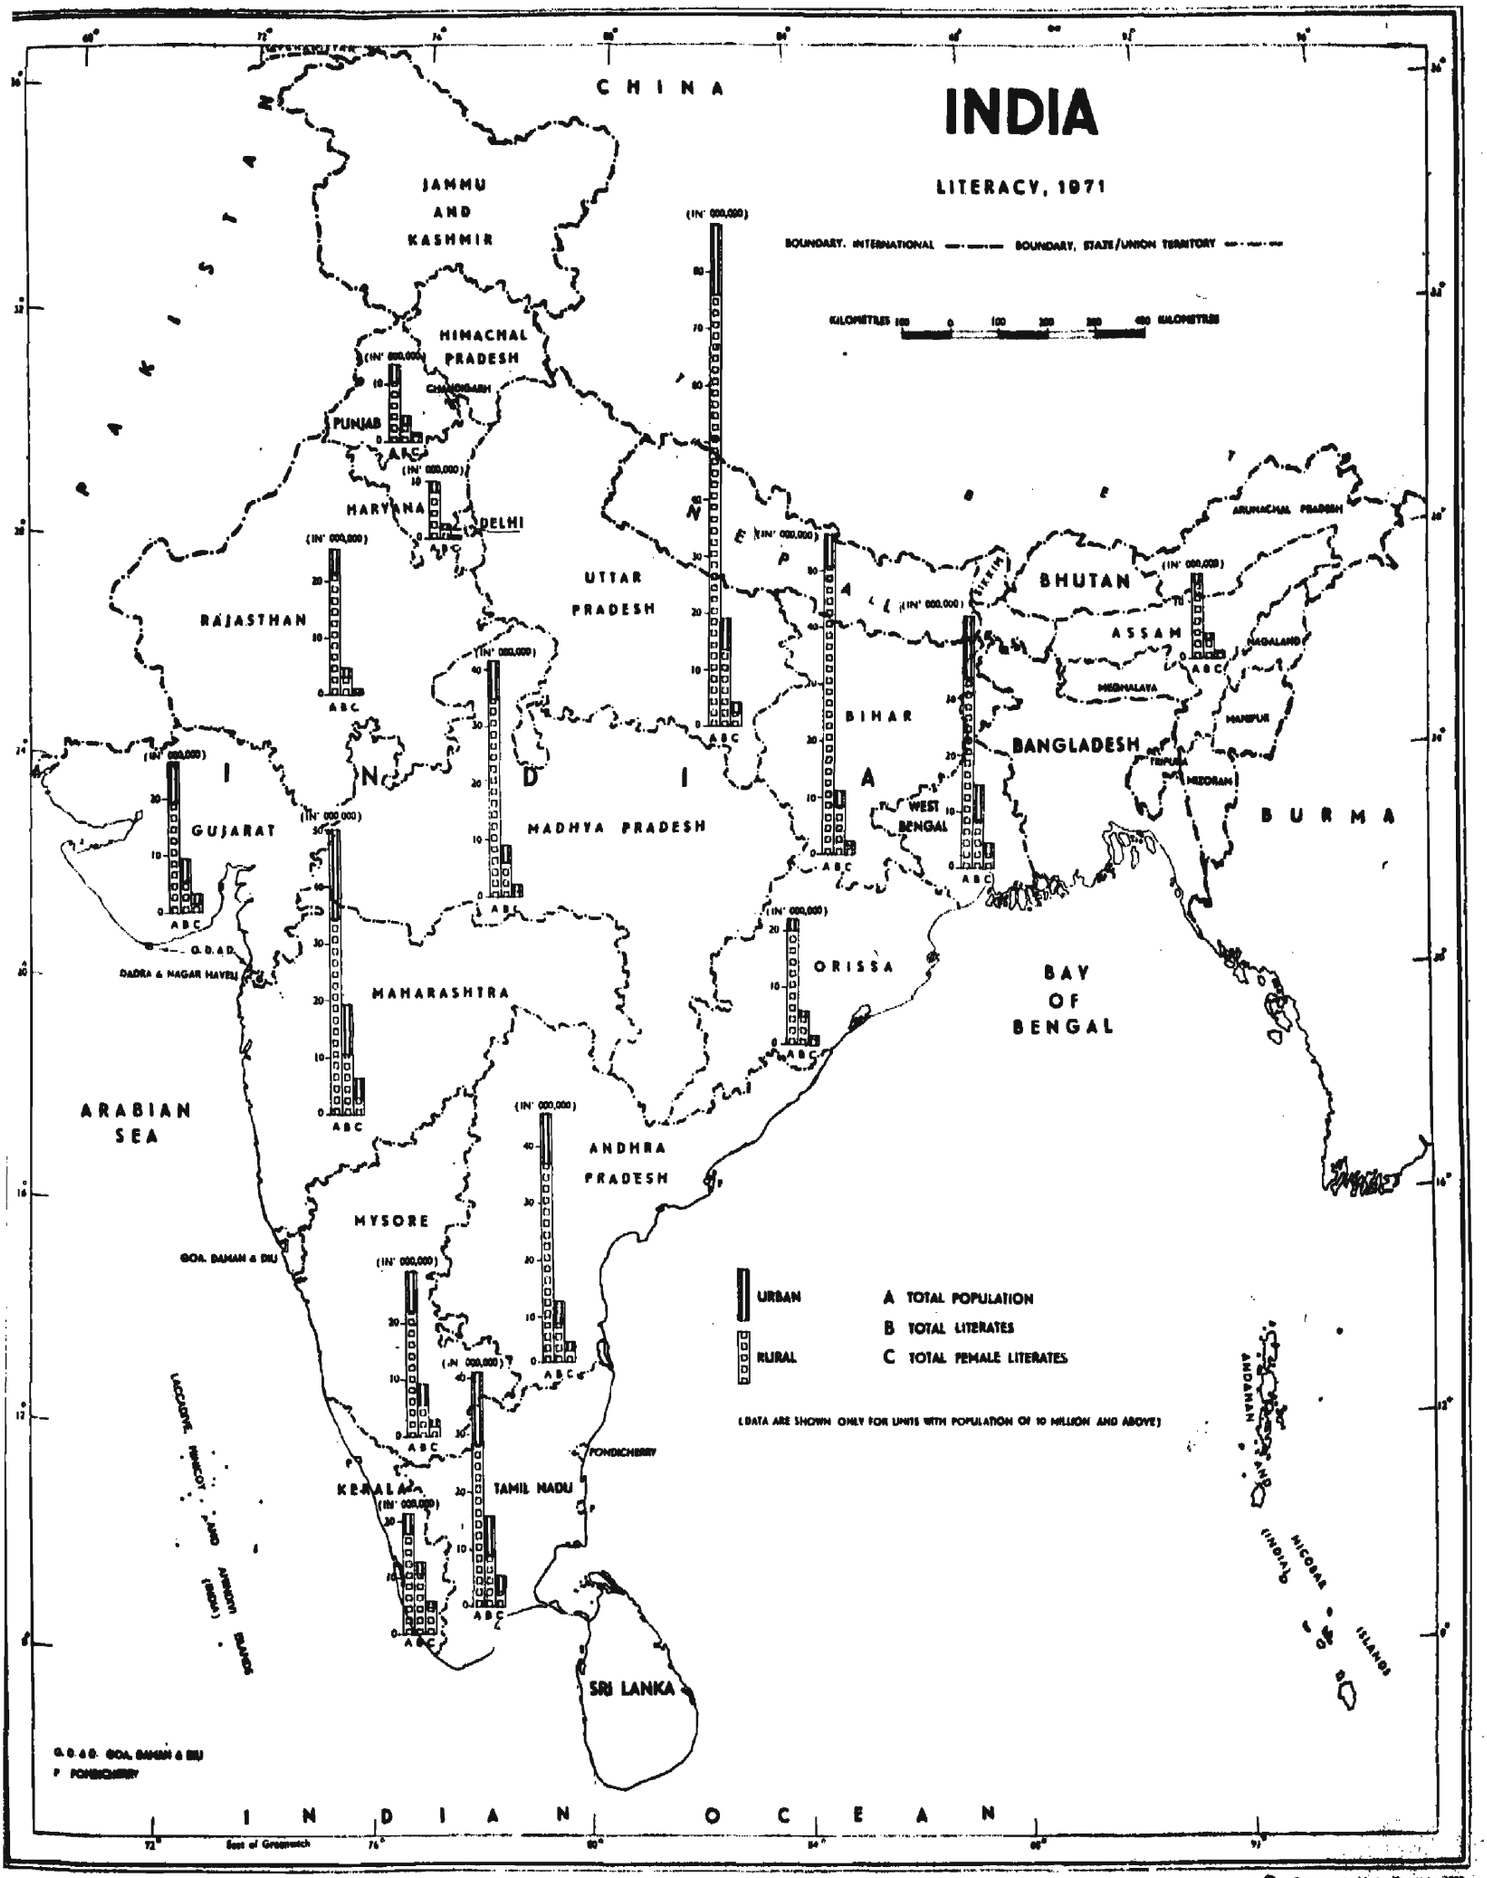
Classification by industry

In 1951, a classification called the Indian census economic classification of industries was adopted which continued the Indian census tradition of an amalgamation of the industrial and occupational classifications. In 1961, a departure in the presentation of the primary census abstract was made on the basis of the Indian standard industrial classification 1961 as adopted by the Director-general of Employment and Training in the Ministry of Labour and recommended for adoption by other departments of Govt. of India for the classification of workers into nine industrial categories. At the 1971 Census the classification for the presentation of primary census data relating to the industrial categories of the working population has been made on the basis of the National Industrial Classification 1970 (as adopted by the office of the Registrar General India). The Code Structure is being reproduced in Series I-India, Part II-B(i)-Economic Tables of 1971 Census.



Based upon Survey of India map with the permission of the Surveyor General of India. The territorial waters of India extend three sea miles to a distance of twelve nautical miles measured from the appropriate base line.

The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern Areas (Reorganisation) Act, 1971, but has yet to be verified.

†Includes Union territory of Mizoram which was carved out of Assam after the 1971 Census.

UNION PRIMARY CENSUS ABSTRACT

Fly-leaf

The primary census abstract of 1971 gives area in square kilometres, the number of occupied residential houses, households, the total population (including institutional and houseless population), population of scheduled castes and scheduled tribes, literate and educated persons, workers and non-workers. The working population is further classified into nine industrial categories. Figures for each characteristic are classified by sex for total, rural and urban areas. Data are given for all-India, states, union territories, districts, urban agglomerations and cities with a population of 100,000 and over.

The total 'area' figures given for states, union territories and districts are' provisional' as on 1 July 1971 except for the Andaman and Nicobar Islands which are as on 1 January 1966 and are based on the area figures supplied by the Survey of India. 'Area' figures are rounded off to the nearest integer in respect of states/union territories/districts.

The population figures exclude population of areas under unlawful occupation of Pakistan and China, where census could not be taken.

In the states where urban 'areas' for some units are not available, their respective 'areas' have been included in the 'rural' area.

The rural and urban 'area' figures for India do not include rural and urban figures for Arunachal Pradesh since these are not available.

'Occupied residential houses' do not include the number of houses occupied by Indian nationals and their families (population 8,099) in Indian missions abroad, the data for which have been included in the population figures of Delhi union territory for total and urban, Delhi urban agglomeration and Delhi (NDMC).

The figures for India and the Andaman and Nicobar Islands are exclusive of the Jarawas and Sentinelese tribes of those Islands. These tribesmen could not be contacted and hence no information pertaining to them could be collected at the 1971 Census.

The following abbreviations have been used for the civic status of the towns:

U.A.—Urban agglomeration.
M. Corp.—Municipal corporation.
C.—Corporation.
M.—Municipality.
M.B.—Municipal board.
M.C.—Municipal committee.
T.C.—Town committee.
N., N.A.—Notified area.
N.A.C.—Notified area committee (Notified area council is used in the state of Orissa only).
N.C.—Notified committee.
T.S.—Township
T.A.—Town area
Cantt.—Cantonment
C.B.—Cantonment board
P.—Panchayat
T.P.—Town panchayat
S.B.—Sanitary board
N.P.—Nagar panchayat
V.P.—Village panchayat
G.P.—Gram panchayat
T.B.—Town board
S.A.—Special area
N.M.—Non-municipal
U.C.—Union committee

Appendix

The primary census abstracts include data for individual cities and urban agglomerations each with a population of 100,000 and over falling under each district and also the constituent units of the respective urban agglomeration.

In this appendix similar data are given for such urban agglomerations comprising urban units which are spread over more than one district. The area figures of the urban units are those supplied by local bodies or state authorities.

The following abbreviations have been used for the status of Towns:

U. A.—Urban agglomeration
M. Corp.—Municipal corporation
M.—Municipality
N.M.—Non-municipal
T.S.—Township
P.—Panchayat
