**Markanda Temple**

*Markanda* temple is a group of temples in Chamorshi tahsil; situated on the left bank of *Wainaganga* River and known amongst the Hindus as a place of pilgrimage. The Markanda is a supposed to derive its name from sage Markandeya and secondly from a beautiful group of temples including the one housing Siva Linga, which Markandeya is believed to have worshipped. The temple is built in rich purple coloured stone finely situated on a high bluff overlooking the river. There are nearly twenty-four temples in the group. There are no inscriptions to tell their age but their style is similar to that of the temples of Khajurao. The small hillock, the group of temples and the river flowing below has made Markanda a pleasing spot.

# Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

# Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

# District Highlights – 2001 Census

1. Gadchiroli is one of the least urbanized districts in the state.

2. Gadchiroli district has the lowest density (67 persons per sq. km.) in the state.

3. The sex ratio of the district is 976.

4. Area of Gadchiroli district accounts for 4.7 percent of the total area of the state.

5. The district population constitute 1.0 percent of the total population of the state.

6. Among the 35 disticts of the state, Gadchiroli district ranks 5$^{th}$ in terms of area, 34$^{th}$ in terms of population and 35$^{th}$ in terms of density.

7. Gadchiroli district has literacy rate 60.1 percent.

8. There are 158 uninhabited villages in the district.

9. There are only four villages having population 10,000 and above.

10. The economy of the district is mainly depend on agriculture. 44.1 percent workers are cultivators, while 38.1 percent workers are agricultural labourers.

11. The district has the highest proportion of forest area and mineral deposits in the state.

12. Armori Village in Armori C.D. Block is the most populated (17,784) and Patanil village in Aheri C.D. Block is the least populated (1 person).

13. Mandhari village in Etapalli C.D. Block has the largest area (4676.00 hectares) and Chichapalli Rith village in Chamorshi C.D. Block, Morkhandi Rith village in Mulchera C.D. Block, Fulcher(m), Fulnar, Dirangi (m), Timeli, Fodewada (m), Turremarka M, Tirkameta, Kotwara m, Puswara, Nulwara (m), Japeli (m), Hikameta, Gardewada villages in Bhamragad C.D. Block and Welgur M, Katepalli M, Bondra M villages in Aheri C.D. Block have the smallest area (1.00 hectare each) among all villages of the district.

**Definition of Census Town:**

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometres (1,000 per square mile).

| 12 | Aheri | Total | 966.0 | 107 | 162 | 22 |
| | | Rural | 966.0 | 107 | 162 | 22 |
| | | Urban | 0.0 | 0 | 0 | 0 |
| 13 | Sironcha | Total | 403.0 | 173 | 114 | 34 |
| | | Rural | 403.0 | 173 | 114 | 34 |
| | | Urban | 0.0 | 0 | 0 | 0 |

**Note** : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometres worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council

# ANALYTICAL NOTE

# Analytical Note

## (i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

**(ii) Brief History of the District**

The ancient history of the district is linked to Chandarpur parts of this district was under the Rashtrakuta kings. They built the famous Markanda Temple. The architecture of the ancient temples of the district are known as Hemadpanthi style. After the Rashtrakutas, Chalukyas of Kalyani, Paramaras of Dhar and Yadavas of Deogiri established their power. After the fall of yadavas of Deogiri and the Kakatiyas of Warangal at the hands of Alla- ud- din Khilji, the gonds of chandarpur seem to have made their rise as a political power. In the thirteenth century Khandkya Ballal Shah founded the city of chandrapur and shifted.his capital from Sirpur to Chandrapur. With the imprisonment of Nilkanth Shah in 1751 by Raghuji I. Chandrapur passed directly under the rule of the Bhosales of Nagpur and in 1854 the Nagpur province together with chandrapur was declared annexed to the British Empire. In 1905, the British created Gadchiroli tahsil.

Till as late as 1854. Chandrapur formed an independent district and upto 1874 it comprised of three tahsils viz., Mul, Warora and Brahmapuri. In 1874, however, upper Godavari district of Madras was abolished and four tahsils were added to Chandrapur district to form one tahsil with sironcha as its headquarters. In 1895 the headquarters of one of the tahsils were transferred from village Mul to Chandrapur. 1905 witnessed the creation of a new tahsil with headquarters at Gadchiroli by effecting the transfer of Zamindari estates from Brahmapuri and Chandrapur tahsils. A small Zamindari tract from Chandrapur district was transferred to newly formed Durg district in 1907. In the same year an area of about 1560 $km^2$ comprising of three divisions of the lower Sironcha tahsil viz., Cherla, Albaka and Nugur were transferred to Madras State. No major changes occurred in the boundaries of the district or its tahsils between 1911-1955.

**(iii) Administrative Set-Up**

There were Major changes took place in the administrative set-up of Maharashtra immediately after 1981 and 1991 Census, resulting into increase of two divisions and four districts and one division and five districts respectively. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Mumbai district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya districts were formed bifurcating, Dhule, Akola, Parbhani and Bhandara districts respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Gadchiroli district is included in Nagpur division.Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Gadchiroli district came into existence from 23rd Aug 1982 because of partition of Chandrapur district from where 8 tahsils were transferred to Gadchiroli. But in 2001 Census 4 more tahsils added to previous tahsil . Now it comprises 12 tahsils and 2 towns and 1679 villages spread over Gadchiroli (122), Armori (103), Kurkheda (128), Dhanora (228), Etapalli (197), Sironcha (148), Aheri (184), Chamorshi (204), Desaiganj (36), Korchi (133), Bhamaragad (128) and Mulchera (68). The following Statement indicates the changes which occurred after 1991 census in the number of villages, towns in each tahsil and also the reasons for variation in brief :-

For administrative purpose the district is divided into 3 sub divisions viz., Gadchiroli, Aheri and Desaiganj. Gadchiroli sub-division includes Gadchiroli,Dhanora, Chamorshi and Mulchera tahsils,Aheri sub-division includes Aheri, Sironcha, Etapalli and Bhamragad tahsils and Desaiganj sub-division includes Desaiganj (Vadasa), Armori, Kurkheda and Korchi tahsils. The District Collector along with the District Judge, Superintendent of Police, Chief Executive Officer of Zilla Parishad and other senior officers of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other Officers look after their respective departments for development and regulatory functions.

## Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

## 73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

**Constitution of Gram Panchayat**

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

**Administrative powers and duties of Panchayats**

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

**Powers and duties of Panchayats in the scheduled areas**

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

**Establishment, Budget and Accounts**

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

**Taxation and Recovery of Claims**

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

**Financial Assistance to Panchayats**

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad,

Equalisation grant, Village water supply fund and District village development fund.

**Gram Panchayat-role in the Development of the village**

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

**Objectives of the Local Self Government**

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities ( C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

**Zilla Parishad**

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

**Grants to Zilla Parishad**

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to

be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

**Panchayat Samiti**

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

**Devolution of Powers and functions.**

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

**Source** : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

**Urban Local Bodies**

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is of 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors.The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

**(iv) Physical features**

**Location and Size**

Gadchiroli district lies between 18° 35' and 20° 52' north latitudes and 79° 45' and 80° 58' East longitudes. It is surrounded by Gondiya district in north, Chhatisgarh state in the east, Andhra Pradesh in the south and Chandrapur district in the west.

The district has an area of 14,412.0 sq.kms. and a population of 970,294 persons as per Census 2001. While the area of the district accounts for 4.7 percent of the total area of the State, the districts population constitutes 1.0 percent of the total population of the State. The density of population is 67 persons per sq. km. Among the 35 districts of the State, the district ranks 5th in terms of area, 34th in terms of population and 35th in terms of density.

The headquarters of district is located at Gadchiroli, a town having population of 42468 persons. Roads and railway network is very poor within the

district. The density of population is 67 persons per sq.km.

**Physiography**

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, **Gadchiroli** and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, **Pune** and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

The district is located in the extreme eastern part of the state. Although it forms a part of the broader Wardha-Penganga- Wainganga plain, (micro level division of Deccan plateau ) the district as a whole is a elevated land which has been dissected by numerous streams and looks like a series of uplands. On the basis of variation in local relief and other characteristics the district can be grouped into three types of physical features i.e. (i) The valley of Wainganga, (ii) Uplands of Etapalli and Dhanora and (iii) The hills of Sirikonda, Bhamragad and Palasgarh-Kotgal.

Wainganga river in north and Pranhita river in south together form entire western district boundary of Gadchiroli and area drained by Wainganga river on its left bank through the western border of district falls under Wainganga valley which stretches in a narrow strip from north to south within the district. Including parts of Desaiganj, Armori, Gadchiroli and Chamorshi tahsils. It is a flat narrow valley having the height varying between 150-200 metres and gently slopes towards south. Along the bank of river Wainganga productive black loam soils are found which are retentive in moisture and thus these are suitable for cultivation. Intensive rice cultivation is done in this valley. Vegetables, betel and Chillis are the other common crops.

Etapalli upland spreads over the Etapalli, Mulchera and parts of Chamorshi, Gadchiroli, Aheri and Bhamragad tahsils. The elevation of this table land varies between 200 – 300 metres. This region is badly dissected by numerous streams and has uneven surface. The north eastern part of table land is relatively high and slopes towards south and south-west. It has an adequate envelop of forests, which are cleared at some places along the streams for cultivation. Soils are gravelly and coarse sandy on the upper reaches. In low-lying areas it has fine texture. Paddy is the main crop of this tract.

Dhanora upland includes Dhanora tahsil and parts of Gadchiroli, Armori, Desaiganj and Kurkheda tahsil. This region slopes towards west. This upland is badly dissected by the streams originating from Palasgad – Kotgal hills resulting an uneven surface. The elevation of this upland varies between 200-300 metres. This upland is densely covered with dry mixed deciduous forests which are distributed in patches. The greed of human and need of cultivated land has reduced the forest in the vicinity of rivers and streams. The soils are gravelly and coarse sandy in nature on the upper reaches while in low-lying areas these are fine in texture. Paddy is the main crop of this area.

Sirikonda hill is located in southern parts of the district covering northern part of Sironcha and southern part of Aheri Tahsil. These hills vary in elevation between 300 and 800 meters and are dissected by several small streams. The hills are fully covered with dense mixed deciduous forest with dotted human settlement in between.

Bhamragad hills occupy parts of Bhamragad tahsil and attains height varying between 300 and 600 meters. These hills slopes towards south. Several streams originate from these hills which have badly dissected the area. These hills are fully covered with forest with dotted human settlements in between.

Palasgad-Kotgal hills include Korchi and parts of Kurkheda tahsils in the extreme north-eastern portion of the districts. The general height of these hills varies between 300-600 metres and slopes towards west. These hills are fully covered with forest except its north-eastern portion, where the human influence is dominant and a cluster of human settlements is located. Soils are gravelly and coarse sandy in nature. Paddy cultivation is practiced here.

**Drainage**

The district lies in the Godavari River Basin. Pranhita, and Indravati are the two main tributaries of the Godavari. Wardha and Wainganga river after merging together is known as Pranhita The entire western border of the district is bounded partly by the Wainganga and partly by the Pranhita. Garhavi, Khobragarhi, Kathani, Suggum and Mandoli are the important tributaries of Wainganga river on its left bank in the district. Dina is a tributary of Pranhita river. The Godavari River forms the southern boundary of the district. The Pranhita River joins the Godavari River near Sironcha. Further south, at the southern corner of Sironcha Tahsil, the Indravati River flows into the Godavari River along the southeastern boundary of the district. Nibra, Kotri and Bandia are the important tributaries of Indravati river.

**Climate**

The climate of the district is characterised by a hot summer , well distributed rainfall and general dryness except during the rainy season .Since major part of the district are covered by dense forests , the atmosphere is chilly , damp and saltry throughout rainy season.

The rainy season sets in usually in the second or third week of June and lasts till middle of October. The winter season commences from the beginning of November and lasts till the end of February .The period from March to first week of June is the summer season. The maximum temperature recorded is 47.3 degree centigrade and 11.3 degree centigrade is the minimum temperature in Sironcha tahsil. May is the hottest month while December is the coldest month of the year within the district. Sometimes, during the winter season , cold spells affect the district due to cold waves in northern India and temperature drops down to 7 or 8 degree centigrade .

During the monsoon the skies are heavily clouded. On an average 1400 to 1500 mm of rainfall occurs during the year (from June to October). The rainfall in the district generally increases from the west towards east. The rainfall during the southwest monsoon months of July, August and September

constitutes 70 to 80 percent of the annual rainfall. July is the rainiest month .

Winds are generally light with some increase in wind force during the latter part of the summer season and in the South- West monsoon season. In the post-monsoon and the cold seasons wind blows mostly from direction between north and east. During the south-west monsoon season the winds are mainly from the south-west or west. Thunderstorms occur in all the months, their incidence being the highest during the monsoon season and the lowest during the cold season.

**Natural Wealth**

**Minerals**

In Maharashtra iron ore is found mostly in Gadchiroli and Sindhudurg districts. Gadchiroli district account for about three fourth of the iron ore of Maharashtra. These are deposited under hilly area of Surjagad, Bhamragad, Damkot and Wadhavi in Sironcha and Aheri tahsils. The quality of these iron is excellent Lime deposits are found at Viriguttam Koda, Masliguda, Umanur and Ankisa.

Apart from the iron ore, the district is bestowed with deposits of manganese, mica ochres, clays and other minor minerals like building stones, brick earth etc. The mineral wealth of the district will have an increasing vital role in the economy of the state. A systematic survey of this area may reveal many new deposits and may offer new opportunities.

Quartz and Silomanight minerals are also found in this district in a large quantity. Snow white-quarts is found in a large storage near Ghot village in Charmoshi tahsil. White coloured quartz is found in Alapalli tahsil, which is used to manufacture glass.

**Fisheries**

During 1998-99 about 7504 hectares of water-spread area was available. Out of it 6040 hectors were used for fishing activities. Fishing activities in the district are naturally restricted to inland waters only and is carried out in rivers, tanks and ponds. Main rivers within the district are also useful for fisheries. 88 co-operative societies of fishermen have been registered in the district with about 8749 members. During 1998-1999 about Rs.508 Lakhs of fish weighing 1700 metric tons was produced. About Rs.171.25 Lakhs fish egg was supplied which is comparatively increased from 1997-98 year. With a view to improve the socio-economic condition of the fishermen and to augment the fish supply several development schemes are introduced by the fisheries department. Fishermen get training, insurance, new improvement also. Modernisation in fisheries also increase the production of fishing. From Integrated Rural Development Schemes, Sanjay Gandhi scheme etc. fund are made available to fishermen. At Murkhada and Deulgaon villages two egg production centers are located.

The commercially important varieties of fish found in the district are murrel, Dhadkya ,Botri , Padhan Tambu , Karvadi ,Pashti , Dhosra , Gane or Kanheri , Chile , Katva, Seenghan , Chandani , Mahaseer , kolus ,Magur and Zinga. Fast growing types of Begal carps like Rohu , Catala and Mrigal are also produced in a vast scale.

**Soil and cropping pattern**

Generally the soil of the district fall into clearly defined tracks following its physiographical set up. The lowlands of Wainganga rivers contain generally productive black loams which are fine in texture and retentive of moisture. They are locally known as Kali, Kanhar, Bardi, Pandhari and Kacchar. The cropping pattern of this region reveals monoculture, rice dominates the economy, accounting for more than two-third of the grass cropped area. Vegetable, betel and Chillis are other common crops.

The southern part of district is enclosed by three rivers viz. Pranhita, Godavari and Indravati. The Godavari lowlands in the culture and life are closely akin to the lowland of Andhra on the other bank rather than Wainganga lowlands. Apart from the fairly drained Kanhar soils, Kacchar soils, young and immature, are frequently met with in areas liable to flood inundations; Kharif rice is the main crop of these low lands.

About three-fourth of the total areas of the district are the uplands. Granular weathering has resulted in gravelly and course sandy soils all over the region. The soils are mainly loam and murmand. Rice is main crop of this region.

**Land and Land Use Pattern**

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19–23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

**Forest**

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

**Irrigation by Source and Unirrigated land**

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is connoted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

**Animal Husbandry**

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

| | | |
|---|---|---|
| 1) | Total Cross bred/Indigenous Cattle | 602,711 |
| 2) | Total Buffaloes | 95,230 |
| 3) | Total Goats | 204,192 |
| 4) | Total Sheep | 13,009 |
| 5) | Total Pigs | 48,294 |
| 6) | Total Equine | 54 |
| 7) | Total Camels | 0 |
| 8) | Total Rabbits | 222 |
| 9) | Total Livestock (excluding dogs) | 963,712 |
| 10) | Total Poultry (including Ducks) | 785,523 |

**Source**: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 963,712 and total poultry (including ducks) are 785,523 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 602,711, total buffaloes are 95,230, goats 204,192, sheeps 13,009, pigs 48,294, equine 54 and rabbits are 222.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

| | Category | Value |
|---|---|---|
| 1) | Density of Livestock population (per sq.km.) | 67 |
| 2) | Average Livestock per village | 641 |
| 3) | No. of livestock per thousand human population | 1,224 |
| 4) | No. of in-Milk cows per thousand human population | 80 |
| 5) | No. of in-Milk buffaloes per thousand human population | 14 |
| 6) | No. of poultry fowls per thousand human population | 998 |
| 7) | No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area | 147 |

| | |
|---|---|
| 8) No. of tractors per thousand hectares of gross cropped area | 2 |
| 9) No. of Veterinary Institute per lakh livestock | 10 |

**Source**: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 67 while average livestock per village is 641. For every thousand human population there are 1224 livestock, 80 in-milk cows, 14 in-milk buffaloes and 998 poultry fowls. While there are 147 bullocks and male buffaloes per hundred hectares of gross cropped area and 2 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 10.

**Industry**

Industrially Gadchiroli district is one of the most underdeveloped districts in the state. Mainly railway link contributes in the development of industries and unfortunately any of the tahsil headquarters/towns are not connected by rail except Desaiganj (Vadasa) town. Practically there are no major manufacturing industries in the district except Porwal Paper Mill at Vadasa.

Most important small scale industries in the district are rice mill, bricks and tiles, factories of cement pipes. Fishing is also one of the important industries and about 65 co-operative societies have been formed in the district. The employment in non-agricultural sector depends mainly upon the village and cottage industries in the district.

**Trade and Commerce**

Since majority of the land is occupied by forest area, forest produce has been the most important item of trade in this district. Two towns have reported wood or wood products such as teak wood, bamboo, paper etc. as the most important commodities exported. Rice is the main crop of the district and it is also exported to nearby cities.

The chief import articles are edible oil, waste paper, sugar, petrol, cloth, wheat etc. Most goods are imported from nearby cities. Apart from the weekly markets and fairs, Desaiganj serves as trade centre for foodgrain. Gadchiroli and Atapalli are timber trade centers.

**Transport**

If a bus stop or a railway station or a navigable waterway is located within the territorial jurisdiction of a village, it is considered to have been served by such facility. The district has about 18.5 kms. of narrow gauge railway line passing through the north-west corner of the district near Desaiganj.

**Number of Motor Vehicles registered in the district (as on 31.03.1999)**

| Motor Vehicles 1999 | | |
|---|---|---|
| | Item | No. of Vehicles |
| | 1 | 2 |
| 1 | Buses | 35 |
| 2 | Cars & Station Wagons | 130 |
| 3 | Jeeps | 453 |
| 4 | Taxies | 32 |
| 5 | Autorickshaws | 83 |
| 6 | Mopeds | 1,203 |
| 7 | Scooters | 2,262 |
| 8 | Motor Cycles | 5,191 |
| 9 | Total Goods Vehicles | 324 |
| 10 | Tractors | 1,077 |
| 11 | Trailors | 1,079 |
| 12 | Others | 20 |
| | **Total** | **11,889** |

**Source:** Transport Commissioner office

It may be seen that the district had 1,203 Moped, 2,262 Scooters and 5,191 Motor Cycles. There were 453 jeeps, 32 taxies, 83 autorickshaws, 35 buses and 130 Cars. Besides, 20 other modes of transport, the district also had 1,077 tractors 1,079 trailors and 324 goods vehicles as means of transport.

**Electricity and Power supply**

1,320 villages out of 1,521 villages (86.8 percent) are enjoying power supply facility, from which 96.4 percent rural population is served with this facility. The villages, which are close to the urban areas are in better position in respect of electrification.

**(v) Census concepts**

**Building** :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent houses :**

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

**Semi-permanent houses :**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary houses :**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

**Dwelling Room :**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census house** :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village**

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City**

Towns with population of 100,000 and above are called cities.

**Urban Agglomeration**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional household**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Castes and Scheduled Tribes**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

**Scheduled Castes**

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad, Bant
7) Balahi, Balai
8) Basor, Burud, Bansor, Bansodi
9) Beda Jangam, Budga Jangam
10) Bedar
11) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar , Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami
12) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
13) Bindla
14) Byagara
15) Chalvadi, Channayya
16) Chenna Dasar, Holaya Dasar, Holeya Dasari
17) Dakkal, Dokkalwar
18) Dhor, Kakkayya, Kankayya, Dohor
19) Dom, Dumar
20) Ellamalvar, Yellammalawandlu
21) Ganda, Gandi
22) Garoda, Garo
23) Ghasi, Ghasia
24) Halleer
25) Halsar, Haslar, Hulasvar, Halasvar
26) Holar, Valhar
27) Holaya, Holer, Holeya, Holiya
28) Kaikadi (in Akola, Amravati, Bhandara, Gondiya, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district, other than Rajura tahsil)
29) Katia, Patharia
30) Khangar, Kanera, Mirdha
31) Khatik, Chikwa, Chikvi
32) Kolupulvandlu
33) Kori
34) Lingader
35) Madgi

36) Madiga
37) Mahar, Mehra, Taral, Dhegu Megu
38) Mahyavanshi, Dhed, Vankar, Maru Vankar
39) Mala
40) Mala Dasari
41) Mala Hannai
42) Mala Jangam
43) Mala Masti
44) Mala Sale, Netkani
45) Mala Sanyasi
46) Mang, Matang, Minimadig, Dhankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang
47) Mang Garodi, Mang Garudi
48) Manne
49) Mashti
50) Meghval, Menghvar
51) Mitha Ayyalvar
52) Mukri
53) Nadia, Hadi
54) Pasi
55) Sansi
56) Shenva, Chenva, Sedma, Ravat
57) Sindhollu, Chindollu
58) Tirgar, Tirbanda
59) Turi

**Scheduled Tribes**

1) Andh
2) Baiga
3) Barda
4) Bavacha, Bamcha
5) Bhaina
6) Bharia Bhumia, Bhuinhar Bhumia, Pando
7) Bhattra
8) Bhil, Bhil Garasia, Dholi Bhil, Dungir Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
9) Bhunjia
10) Binjhwar
11) Birhul, Birhor
12) Chodhara (excluding Akola, Amravati, Bhandara, Gondiya, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts)
13) Dhanka, Tadvi, Tetaria, Valvi
14) Dhanwar
15) Dhodia
16) Dubla, Talavia, Halpati
17) Gamit, Gamta, Gavit, Mavchi, Padvi
18) Gond Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Danddami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond, Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria
19) Halba, Halbi
20) Kamar
21) Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari
22) Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
23) Khairwar
24) Kharia
25) Kokna, Kokni, Kukna
26) Kol
27) Kolam, Mannervarlu
28) Koli Dhor, Tokre Koli, Kolcha, Kolgha
29) Koli Mahadev, Dongar Koli
30) Koli Malhar
31) Kondh, Khond, Kandh
32) Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
33) Koya, Bhine Koya, Rajkoya
34) Nagesia, Nagasia
35) Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
36) Oraon, Dhangad
37) Pardhan, Pathari, Saroti
38) Pardhi; Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Bahelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia
39) Parja
40) Patelia

41) Pomla
42) Rathawa
43) Sawar, Sawara
44) Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar
45) Thoti (in Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts and Rajura tahsil of Chandrapur district)
46) Varli
47) Vitolia, Kotwalia, Barodia

**Language and Mother tongue**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational level**

The highest level of education a person has completed.

**Work**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker**

A person who has worked for major part of the reference period ( i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal worker**

A person who worked for less than six months of the reference period ( i.e. in the last one year preceding the date of enumeration ) in any economic activity is termed as 'Marginal worker'.

**Non worker**

A person who has not worked at all in any economically productive activity during the reference period ( i.e. last one year preceding the date of enumeration ) is termed as 'Non worker'.

**Cultivator**

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

**Agricultural labourer**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker :**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other worker :**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work participation rate :**

Percentage of workers (main + marginal) to total population.

**Population density :**

Population density is the number of persons inhabited per square kilometre of the area.

**Age :**

Age is measured in terms of the completed number of years.

**Sex -ratio :**

Number of females per 1000 males in a population.

**(vi) Non Census Concepts**

**Improved drinking water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

**System of sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which

are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

**Type of latrine andMethod of disposal of night soil :**

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate(CBR) :**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

**Crude death rate(CDR) :**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

**Natural growth rate :**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR) :**

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

**Age specific marital fertility rate (ASMFR) :**

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

**General fertility rate (GFR) :**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

**General marital fertility rate (GMFR) :**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

**Total fertility rate (TFR)** :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

**Total marital fertility rate (TMFR)** :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

**Age-specific mortality rate (ASMR) :**

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

**q1** Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2** Probability of dying between birth and age 2.

**q5** Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

**Infant mortality rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

**Neo-natal mortality rate (NMR) :**

Number of infants dying within the first month of life (28 days or under ) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Early neo- natal mortality rate :**

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Late neo-natal mortality rate :**

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Post neo-natal mortality rate (PNMR) :**

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Peri-natal mortality rate (PMR) :**

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Still birth rate (SBR) :**

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Maternal mortality rate(MMR) :**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

**Eligible couple (Couples per 1,000 population) :**

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

**Child woman ratio (0-4) :**

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

**Child woman ratio (5-9) :**

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

**Migration :**

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration :**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country ( inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural - Urban components of migration:**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units :**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

**Size class of UA/Town :**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area :**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

## (vii) 2001 Census Findings – Population, its distribution

### Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/ Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

### Distribution of Population in Rural-Urban Areas

According to Census 2001, the district Gadchiroli has total population of 970,294 comprising of 491,101 males 479,193 females. The population of the district in census 2001 is 23.3 percent higher than the district population of 787,010 in 1991 census. Among 12 tahsils of the district, Chamorshi tahsil (165,514) is the most populous and Bhamragad tahsil (31,679) the least. Other tahsils in order of their population are 1) Gadchiroli (126,313), 2) Aheri (103,759), 3) Armori (90,846), 4) Kurkheda (77,936), 5) Dhanora (77,346), 6) Desaiganj (Vadasa) (76,154), 7) Etapalli (70,627), 8) Sironcha (69,773), 9) Korchi (40,736) and 10) Mulchera (39,611).

An examination of rural-urban distribution of population reveals that 903,033 persons constituting 93.1 percent of the total population are concentrated in rural areas, while 67,261 persons 6.9 percent are living in urban areas of the district. In absolute numbers, the numbers of people living in rural areas has increased from 718,445 in 1991 to 903,033 in 2001, while in terms of percentage, the people residing in rural areas has increased from 91.3 percent in 1991 to 93.1 percent in census 2001. Correspondingly in urban areas the population has decreased from 68,565 in 1991 to 67,261 in 2001 in absolute numbers as well as in terms of percentage, the people residing in urban areas has decreased from 8.7 percent in 1991 to 6.9 percent in census 2001. Among 12 tahsils only two tahsils have urban population. Tahsil Desaiganj (Vadasa) has 32.6 percent urban population and Gadchiroli has 33.6 percent urban population. Remaining tahsils have only rural population.

**TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001**

| Serial number | Tahsil | Population | | | | | | Percentage decadal variation 1991-2001 | | | Percentage urban population | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

| 6 | Gadchiroli | 101,440 | 71,875 | 29,565 | 126,313 | 83,845 | 42,468 | 24.5 | 16.7 | 43.6 | 29.1 | 33.6 |
| 7 | Chamorshi | 135,592 | 135,592 | 0 | 165,514 | 165,514 | 0 | 22.1 | 22.1 | 0.0 | 0.0 | 0.0 |
| 8 | Mulchera | 30,897 | 30,897 | 0 | 39,611 | 39,611 | 0 | 28.2 | 28.2 | 0.0 | 0.0 | 0.0 |
| 9 | Etapalli | 54,309 | 54,309 | 0 | 70,627 | 70,627 | 0 | 30.0 | 30.0 | 0.0 | 0.0 | 0.0 |
| 10 | Bhamragad | 23,048 | 23,048 | 0 | 31,679 | 31,679 | 0 | 37.4 | 37.4 | 0.0 | 0.0 | 0.0 |
| 11 | Aheri | 82,641 | 63,435 | 19,206 | 103,759 | 103,759 | 0 | 25.6 | 63.6 | 0.0 | 23.2 | 0.0 |
| 12 | Sironcha | 58,883 | 58,883 | 0 | 69,773 | 69,773 | 0 | 18.5 | 18.5 | 0.0 | 0.0 | 0.0 |
| **District Total:** | | **787,010** | **718,445** | **68,565** | **970,294** | **903,033** | **67,261** | **23.3** | **25.7** | **-1.9** | **8.7** | **6.9** |

Table 1 shows Decadal change in population of tahsils by Residence, 1991-2001. The average growth rates for rural and urban areas of the district are 25.7 percent and -1.9 percent respectively. Only two tahsils, Desaiganj (Vadasa) and Gadchiroli have urban areas. Among the twelve tahsils, growth rates in rural areas is below the district rural average in six tahsils and above the district rural average in six tahsils. Within the district in rural areas growth rate is highest in Aheri tahsil (63.6 percent ) and lowest in Armori tahsil (15.8 percent). In urban areas growth rate in Gadchiroli tahsil alone is 43.6 percent. Within the district the proportion of urban population has decreased from 8.7 percent in 1991 to 6.9 percent in 2001.

**TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001**

| Serial number | District / C.D. block | Total number of inhabited villages | Total rural population | | | Number and percentage of villages | Population less than 200 | | Number and percentage of villages |
|---|---|---|---|---|---|---|---|---|---|
| | | | Persons | Males | Females | | Males | Females | |

Percentage in brackets.

Table 2 gives number and percentage distribution of inhabited villages by population ranges in each tahsil of the district. Among 1,521 villages, 505 villages fall under population range less than 200 with 33.2 percent of the total villages, 469 villages fall under population range 200-499 with 30.8 percent villages, 300 villages under population range 500-999 with 19.7 percent villages, 188 villages under population range 1000-1999 with 12.4 percent villages. 49 villages under population range 2000-4999 with 3.2 percent villages, 6 villages under population range 5000-9999 with 0.4 percent villages, 4 villages under population range 10000 and above with 0.3 percent of the total villages.

Within the twelve tahsils of the district, the percentage of villages with population range group

less than 200 is the highest in Bhamragad C.D. block with 54.5 percent villages and lowest in Desaiganj (Vadasa) C.D. block with 9.7 percent villages. The percentage of population range group 200-499 is the highest in Etapalli C.D. block with 36.5 percent villages and the lowest in Desaiganj (Vadasa) C.D. block with 16.1 percent villages. The percentage of villages with population range 500-999 is highest in Mulchera C.D. block with 34.3 percent villages and lowest in Bhamsaged C.D. block with 8.2 percent villages. The percentage of villages with population range 1,000-1,999 is highest in Gadchiroli C.D. block with 29.0 percent and lowest in Korchi C.D. block 4.8 percent. The percentage of villages with population range group 2,000-4,999 is highest in Desaiganj (Vadasa) C.D. block with 29.0 percent and lowest in Khurkheda and Korchi C.D.blocks 0.8 percent. In population range 5,000-9,999 and 10,000 +, Danora, Chamorshi and Etapalli C.D. blocks show lowest percentage and C.D. block Desaiganj (Vadasa) shows highest (3.2 percent) and Aheri C.D. block 1.2 percent show highest percentage and lowest in Chamorshi tahsil 0.5 percent of villages in the respective population range group.

**TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS**

| Name of town | |
|---|---|
| 1 | |
| **(a) New** | |
| (i) Statutory town -- Nil | |
| (ii) Census town -- Nil | |
| **(b) Denotified** | |
| (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns | Nil |
| (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria | Nil |
| (iii) Census towns of 1991 census are notified as statutory town in 2001 census | Nil |
| **(c) Declassified** | |
| 1 Aheri | |
| 2 Alapalli | |
| **(d) Wholly merged with other town(s)** | Nil |

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table – 3 shows new towns, denotified, declassified and merged with other town (s). There are no new towns, no denotified and no wholly merged with other town (s). Aheri and Alapalli census towns of 1991 are declassified as rural in 2001 census.

**TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001**

| Range of population density (per square kilometre) | Total number of villages in each population density range | Percentage of villages in each population density range | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0-10 | 73 | 4.8 | 4,573 | 0.5 |
| 11-20 | 105 | 6.9 | 17,614 | 2.0 |
| 21-50 | 319 | 21.0 | 76,183 | 8.4 |
| 51-100 | 237 | 15.6 | 88,934 | 9.8 |
| 101-200 | 349 | 22.9 | 202,525 | 22.4 |
| 201-300 | 209 | 13.7 | 177,523 | 19.7 |
| 301-500 | 149 | 9.8 | 182,593 | 20.2 |
| 501 + | 80 | 5.3 | 153,088 | 17.0 |
| Not known | 0 | 0.0 | 0 | 0.0 |
| **District Total:** | **1,521** | **100.0** | **903,033** | **100.0** |

**Population Density (Rural) of the district: 110**

Table 4 shows the distribution of villages by density ranges. For convenient understanding of patterns villages have been grouped under eight different density ranges.

The distribution of village by density ranges shows that density range 0-10 is seen in 73 inhabited villages i.e., 4.8 percent of total 1,521 inhabited villages covering with 0.5 percent of total rural population, 11-20 density range is seen in 6.9 percent of total 105 inhabited villages covering 2.0 percent of total population, density range 21-50 is seen in 21.0 percent of total 319 villages covering 8.4 percent of total population, density range 51-100 is seen in 15.6 percent of total 237 inhabited villages covering with 9.8 percent of total population, density range 101-200 is seen in 22.9 percent of total 349 inhabited villages covering with 22.4 percent of total population, density range 201-300 is seen in 13.7 percent of total 209 inhabited villages covering 19.7 percent of total population, 301-500 in 9.8 percent of total 149 inhabited villages covering 20.2 percent of total population , density range of 501+ is seen in 5.3 percent of total 80 inhabited villages covering with 17.0 percent of total population.

**Table 5 :SEX RATIO OF STATE AND DISTRICT, 1901 - 2001**

| Census Year | State | | | District | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 978 | 1,003 | 862 | 1,023 | 1,023 | - |
| 1911 | 966 | 1,000 | 796 | 1,005 | 1,005 | - |
| 1921 | 950 | 994 | 776 | 1,004 | 1,004 | 985 |
| 1931 | 947 | 987 | 790 | 990 | 991 | 952 |
| 1941 | 949 | 989 | 810 | 989 | 989 | 999 |
| 1951 | 941 | 1,000 | 807 | 1,000 | 999 | 1,013 |
| 1961 | 936 | 995 | 801 | 998 | 998 | - |
| 1971 | 930 | 985 | 820 | 986 | 987 | 961 |
| 1981 | 937 | 987 | 850 | 981 | 980 | 1,016 |
| 1991 | 934 | 972 | 875 | 976 | 982 | 910 |
| 2001 | 922 | 960 | 873 | 976 | 978 | 952 |

**Note:** Sex ratio has been defined here as the number of females per 1000 males.

Table – 5 shows the sex ratio for the district and the state Census 2001 recorded a sex ratio of 976 females per 1000 males in the district. This is higher as compared to the state average (922). The sex ratio in Gadchiroli district has remained higher than that of state from 1901 to 2001. As regards total areas sex ratio at the state level, declined by 56 points and at district level it declined by 47 points during the last 100 years. Similary the sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased by 45 points during 1921-2001. For the urban areas of the state, the sex ratio increased by 11 points during the last 100 years. In 1,901,1911 and 1961 the urban sex ratio of the district was not recorded for want of urban data.

**TABLE 6 : SEX RATIO BY TAHSILS, 2001**

| Serial number | Name of Tahsil | Sex ratio | | |
|---|---|---|---|---|
| | | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 |
| 1 | Desaiganj (Vadasa) | 966 | 972 | 953 |
| 2 | Armori | 985 | 985 | -- |
| 3 | Kurkheda | 967 | 967 | -- |
| 4 | Korchi | 1,003 | 1,003 | -- |
| 5 | Dhanora | 976 | 976 | -- |
| 6 | Gadchiroli | 975 | 986 | 952 |
| 7 | Chamorshi | 973 | 973 | -- |
| 8 | Mulchera | 958 | 958 | -- |
| 9 | Etapalli | 974 | 974 | -- |
| 10 | Bhamragad | 952 | 952 | -- |
| 11 | Aheri | 980 | 980 | -- |
| 12 | Sironcha | 994 | 994 | -- |
| | **District Total:** | **976** | **978** | **952** |

Table 6 shows the sex ratio by tahsil. In Gadchiroli district the sex ratio is 976 females per one thousand males. Within the district, the sex ratio varies from 1,003 in Korchi tahsil to 952 in Bhamragad tahsil. The sex ratio in four tahsils are above the district average viz, Armori, Korchi, Aheri and Sironcha. In Dhanora tahsil the sex ratio is equal to the district average and below the district average in the remaining seven tahsils. The sex ratio figures for rural and urban areas of the district are 978 and 952 respectively. Within the district the rural sex ratio is found highest in Korchi tahsil (1,003) and lowest in Bhamragad tahsil (952). The sex ratio of urban areas shows only in two tahsils i.e. Desaiganj (Vadasa) 953 and Gadchiroli (952) in the district.

**TABLE 7 : SEX RATIO BY CD BLOCKS, 2001**

| Serial number | Name of C D block | Sex ratio |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Desaiganj (Vadasa) | 972 |
| 2 | Armori | 985 |
| 3 | Kurkheda | 967 |
| 4 | Korchi | 1,003 |
| 5 | Dhanora | 976 |
| 6 | Gadchiroli | 986 |
| 7 | Chamorshi | 973 |
| 8 | Mulchera | 958 |
| 9 | Etapalli | 974 |
| 10 | Bhamragad | 952 |
| 11 | Aheri | 980 |
| 12 | Sironcha | 994 |
| | **District (Rural) Total:** | **978** |

Sex ratio by C.D. Blockwise shown in the table – 7. Among the twelve C.D.Blocks, sex ratio varies between 952 and 1003. Korchi C.D.Block has the highest sex ratio (1003) and Bhamragad C.D.Block the lowest (952). The sex ratio is in Amrori, Korchi, Gadchiroli, Aheri and Sironcha C.D.Blocks is above the District average while Desaiganj (Vadasa), Kurkheda, Dhanora, Chamorshi, Mulchera, Etapalli and Bhamragad C.D. Blocks have below the district average i.e. (978).

**TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage of villages in each range | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 36 | 2.4 | 6,348 | 0.7 |
| 700-749 | 16 | 1.1 | 3,558 | 0.4 |
| 750-799 | 31 | 2.0 | 16,011 | 1.8 |
| 800-849 | 44 | 2.9 | 18,034 | 2.0 |
| 850-899 | 83 | 5.5 | 44,949 | 5.0 |
| 900-949 | 209 | 13.7 | 193,312 | 21.4 |
| 950-999 | 329 | 21.6 | 304,411 | 33.7 |
| 1000-1099 | 491 | 32.3 | 254,151 | 28.1 |
| 1100+ | 282 | 18.5 | 62,259 | 6.9 |
| **District Total:** | **1,521** | **100.0** | **903,033** | **100.0** |

**Sex ratio (Rural) for District: 978**

Table 8 shows the sex ratio of rural population by ranges, 2001. For convenient understanding of patterns villages have been grouped under nine different sex ratio ranges. A perusal of the table reveals that out of 1521 inhabited villages, 209 villages constituting 13.7 percent of total inhabited villages covering 21.4 percent of total district rural population have a sex ratio in range of 900-949, 329 villages forming 21.6 percent of total inhabited villages covering 33.7 percent of total population in range of 950-999, 491 villages forming 32.3 percent of total inhabited villages covering 28.1 percent of total rural population in range of 1000-1099, 282 villages forming 18.5 percent of total inhabited villages covering 6.9 percent of total rural population in the range of 1100+, 83 villages forming 5.5 percent of total inhabited villages covering 5.0 percent of total rural population in range of 850-899, 127 villages forming 8.4 percent of total inhabited villages and covering only 4.9 percent of total rural population are in the range of less than 849 ratio.

**TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001**

| Serial number | Name of U.A/ Town | Urban status of town | Sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Desaiganj (M Cl) | M Cl | 953 |
| 2 | Gadchiroli (M Cl) | M Cl | 952 |
| **Sex ratio (Urban) for the district:** | | | **952** |

Table 9 shows the sex ratio of urban Agglomerations / Towns, 2001. In Gadchiroli district the urban sex ratio is 952 females per one thousand males. The sex ratios in urban areas in Desaiganj (MCI) and Gadchiroli (MCI) are 953 and 952 respectively.

**TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001**

| Serial number | Name of Tahsil | Total/ Rural/ Urban | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|---|

| | | **Urban** | **9,173** | **4,733** | **4,440** | **938** |

Table 10 shows tahsilwise sex ratio of population in 0-6 age group, in total, rural and urban areas of the district. Within the district the total sex ratio in 6 Tahsils viz, Armori, Kurkheda, Chamorshi, Etapalli, Bhamragad and Aheri are above the district average and below the district average (966) in remaining tahsils viz., Desaiganj (Vadasa), Korchi, Dhanora, Gadchiroli, Mulchera and Sironcha. Out of twelve tahsils the total sex ratio is found highest in Aheri tahsil (982) and lowest in Desaiganj (Vadasa) tahsil (943). In rural areas the highest sex ratio in Aheri tahsil (982) and lowest in Sironcha tahsil (951). Within the district the urban sex ratio is 938. There are only two towns in the district viz., Desaiganj (Vadasa) and Gadchiroli with sex ratio of 895 and 964 respectively.

**TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001**

| Serial number | Name of C.D. block | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|
| | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Desaiganj (Vadasa) | 6,793 | 3,453 | 3,340 | 967 |
| 2 | Armori | 12,246 | 6,224 | 6,022 | 968 |
| 3 | Kurkheda | 12,093 | 6,148 | 5,945 | 967 |

| 8 | Mulchera | 6,605 | 3,362 | 3,243 | 965 |
| 9 | Etapalli | 14,247 | 7,191 | 7,056 | 981 |
| 10 | Bhamragad | 6,476 | 3,281 | 3,195 | 974 |
| 11 | Aheri | 18,794 | 9,482 | 9,312 | 982 |
| 12 | Sironcha | 11,355 | 5,821 | 5,534 | 951 |
| | **District (Rural) Total:** | **145,571** | **73,991** | **71,580** | **967** |

Table 11 shows sex ratio of population in age group 0-6 for C.D. Blocks. Among twelve C.D.Blocks the sex ratio varies from 982 in Aheri C.D.Blcok to 951 in Sironcha C.D Block. The sex ratio in seven C.D. Blocks viz, Desaiganj (967), Armori (968), Kurkheda (967),Chamoshi (968), Etapalli (981), Bhamragad (974), Aheri (982) are above at population with the district average and remaining five C.D. Blocks are below the district average (967).

**TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage distribution of villages | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 212 | 13.9 | 7,291 | 5.0 |
| 700-749 | 51 | 3.4 | 3,907 | 2.7 |
| 750-799 | 71 | 4.7 | 6,011 | 4.1 |
| 800-849 | 114 | 7.5 | 11,166 | 7.7 |
| 850-899 | 123 | 8.1 | 15,984 | 11.0 |
| 900-949 | 142 | 9.3 | 25,921 | 17.8 |
| 950-999 | 87 | 5.7 | 17,703 | 12.2 |
| 1000-1099 | 248 | 16.3 | 28,212 | 19.4 |
| 1100+ | 473 | 31.1 | 29,376 | 20.2 |
| **District (Rural) Total** | **1,521** | **100.0** | **145,571** | **100.0** |

**Sex ratio (Rural) for District: 967**

Table 12 shows sex ratio of rural population in the age group 0-6 by ranges. Out of 1,521 inhabited villages, the sex ratio in 473 inhabited villages is above 1,100 range for 0-6 age group accounting for 31.1 percent of villages with 20.2 percent of district population, in 248 inhabited villages is in 1,000-1,099 range covering 16.3 percent villages with 19.4 percent of district population, in 212 inhabited villages is in less than 700 range covering 13.9 percent villages with 5.0 percent of total population, in 142 inhabited villages is in 900-949 range covering 9.3 percent villages with 17.8 percent of total population, in 123 inhabited villages is in 850-899 range accounting for 8.1 percent villages with 11.0 percent of district population, in 87 inhabited villages it is in 950-999 range the covering 5.7 percent villages with 12.2 percent of district population. The sex ratio in remaining 236 villages is in 700-749 to 800-849 range covering 15.6 percent villages with 14.5 percent of district total population.

**TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001**

| Serial number | Name of UA/Town | Urban status of town | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|---|
| | | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Desaiganj (M Cl) | M Cl | 3,366 | 1,776 | 1,590 | 895 |
| 2 | Gadchiroli (M Cl) | M Cl | 5,807 | 2,957 | 2,850 | 964 |
| | **District(Urban) Total :** | | **9,173** | **4,733** | **4,440** | **938** |

Table –13 shows sex ratio of population in the age group 0-6 of urban agglomeration/ towns, 2001. In Gadchiroli district, the urban sex ratio is 938 females per one thousand males in age group 0-6 of urban population. The sex ratio of urban areas in two towns i.e. Desaiganj and Gadchiroli (MCI), are 895 and 964 respectively.

Table 14 gives the percentage of Schedule Castes and Schedule Tribes population to total population in rural and urban areas of tahsils in the district. In the district Schedule Castes and Schedule Tribes constitute 11.2 percent and 38.3 percent of the total population respectively. The percentage of Schedule Castes population is above the district average in five tahsils viz., Desaiganj (Vadasa) (16.3 percent), Armori (11.8 percent), Gadchiroli (13.7 percent), Aheri (14.8 percent) and Sironcha (24.8 percent) and below in remaining seven tahsils. The highest proportion of Schedule Castes population is found in Sironcha tahsil (24.8 percent) and the lowest in Bhamragad tahsil (3.6 percent). The percentage of Schedule Tribes population in above the district average in six tahsils namely Kurkheda (53.9percent), Korchi (74.1percent), Dhanora (70.4percent), Etapalli (80.7 percent) Bhamragad (80.4percent) and Aheri (47.5 percent) and below in remaining six tahsils. The highest proportion of Schedule Tribes population is found in Etapalli tahsil (80.7 percent) and lowest in Desaiganj (Vadasa) tahsil 9.8 percent. In rural areas the percentage of Schedule Caste and Schedule Tribes constitute 10.8 percent and 40.4 percent of the total population respectively. The percentage of rural Schedule Caste population is found highest in Sironcha tahsil (24.8 percent) and lowest in Bhamragad tahsil (3.6 percent). The highest percentage of Schedule Tribes population is found in Etapalli tahsil (80.7 percent) and lowest in Desaiganj (Vadasa) tahsil (11.2 percent). In urban areas the percentage of Schedule Castes and Schedule Tribes population constitutes 16.5 percent and 10.6 percent of the total population respectively. Within the district only two tahsil have urban areas i.e. Desaiganj (Vadasa) and Gadchiroli tahsil. The percentage of Schedule Castes population in Desaiganj and Gadchiroli tahsil constitute 19.3 percent and 14.8 percent respectively, while the Schedule Tribes population in Desaiganj (Vadasa) and Gadchiroli tahsil constitute 6.7 percent and 12.9 percent respectively.

Table 15 shows number and percentage of Scheduled Caste ans Scheduled Tribes population in C.D.Blocks, 2001 Within the districts the proportion of Scheduled Castes and Scheduled Tribes population in C.D.Blocks are 10.8 percent and 40.4 percent of the total population respectively. The proportion of Scheduled Castes population is above the district C.D.Block average in six C.D.Blocks and below in remaining six C.D.Blocks namely Desaiganj (Vadasa), Armori, Kurkheda, Gadchiroli, Aheri and Sironcha.The highest proportion of Scheduled Caste population is found in Sironcha C.D. Block (24.8 percent) and the lowest in Bhamragad C.D. Block(3.6 percent). The proportion of Scheduled Tribes population is above the district average in six C.D. Blocks namely Kurkheda, Korchi, Dhanora, Etapalli, Bhamragad and Aheri C.D. Blocks and below in six remaining C.D. Blocks. The highest percentage of Scheduled Tribes population is found in Etapalli C.D. Block (80.7 percent) and the lowest in Desaiganj (Vadasa) C.D. Block (11.2 percent).

**TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage range of Scheduled Castes population to total population | Number of villages | Percentage | Scheduled Castes Population | Percentage |

| **District Total :** | **1,521** | **100.0** | **97,747** | **100.0** |

Table 16 shows the proportion of Scheduled Castes population to total population in villages. Out of 1,521 villages 733 villages constituting 48.2 percent of total villages are not having Scheduled Caste Population. Of the remaining 310 villages fall under Scheduled Caste population range of less than 5 percent accounting for 20.4 percent villages covering 3.9 percent Scheduled Caste population of the district. There are 155 villages with 5-10 percent Scheduled Caste population accouting for 10.2 percent villages covering15.5 percent Schedulated Castes population, 173 villages with 11-20 percent Scheduled Caste population accounting 11.4 percnet villages covering 38.0 percent of total Scheduled Caste population. Schedulated Caste in 63 villages constitute 21-30 percent group accounting for 4.1 percent villages and covering 15.7 percent Scheduled Caste population. While remaining 87 villages fall under various range groups in between 31-40 and 76 and above. These account for 5.7 percent villages and cover 26.9 percent Scheduled Caste population of the district.

**TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage range of Scheduled Tribes population to total population | Number of villages | Percentage | Scheduled Tribes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Nil | 80 | 5.3 | 0 | 0.0 |
| Less than 5 | 68 | 4.5 | 2,099 | 0.6 |
| 5-10 | 81 | 5.3 | 8,966 | 2.5 |

**TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**-(Contd.)

| Percentage range of Scheduled Tribes population to total population | Number of villages | Percentage | Scheduled Tribes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 11-20 | 93 | 6.1 | 19,370 | 5.3 |
| 21-30 | 74 | 4.9 | 27,152 | 7.4 |

| | **District(Urban) Total** | **67,261** | **11,077** | **7,150** | **16.5** | **10.6** |

Table 18 shows number and percentage pf Scheduled Castes and Scheduled Tribes population in Urban Agglomerations/Towns of the district. In Gadchiroli district, the percentage of Scheduled Castes and Scheduled Tribes population in Urban areas constitute 16.5 percent and 10.6 percent to total district population respectively. Within the district in urban areas these are only two towns i.e. Desaiganj (M CL) and Gadchiroli (M CL). The Scheduled Caste population in Desaiganj and Gadchiroli (M CL) constitutes 19.3 percent and 14.8 percent respectively. While Scheduled Tribes population in Desaiganj (M CL) recorded 6.7 percent and Gadchiroli (M CL) recorded 12.9 percent.

**TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001**

| Serial number | Name of C D block | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Desaiganj (Vadasa) | 1,001 | 983 |
| 2 | Armori | 979 | 1,000 |
| 3 | Kurkheda | 972 | 969 |
| 4 | Korchi | 1,032 | 1,010 |
| 5 | Dhanora | 957 | 986 |

**TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001** - (Contd.)

| Serial number | Name of C D block | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 6 | Gadchiroli | 982 | 1,014 |
| 7 | Chamorshi | 981 | 970 |
| 8 | Mulchera | 965 | 986 |

| 10 | Bhamragad | 942 | 971 |
| 11 | Aheri | 999 | 994 |
| 12 | Sironcha | 972 | 1,019 |
| | **District (Rural) Total** | **982** | **988** |

Table 19 gives the Sex Ratio among Scheduled Castes and Scheduled Tribes in C.D. Blocks. Within the district (Rural) the sex ratio is 982 females for 1000 males in Scheduled Castes and 988 females for 1000 males in Scheduled Tribes population. The sex ratio of Scheduled Caste is highest in Korchi C.D. Blocks (1,032) and lowest in Etapalli C.D. Block (946). The Scheduled Tribes show highest sex ratio in Sironcha C.D. Block (1,019) and lowest in Kurkheda C.D. Block (969) of the district.

**TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001**

| Serial number | Name of U.A./Town | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Desaiganj (M Cl) | 1,003 | 903 |
| 2 | Gadchiroli (M Cl) | 983 | 953 |
| **Sex ratio (Urban) for the district:** | | **992** | **941** |

Table 20 shows sex ratio among Scheduled Castes and Scheduled Tribes in Urban Agglomerations/Towns, within the district in urban areas the sex ratio of Scheduled Caste and Scheduled Tribes are 992 and 941 respectively. In Gadchiroli district in urban area there are only two towns i.e. Desaiganj (M CL) and Gadchiroli (M CL). The sex ratio of Scheduled Castes in Desaiganj (M CL) is 1003 and Gadchiroli (M CL) is 983, while the Scheduled Tribes sex ratio in Desaiganj (M CL) is 903 and Gadchiroli (M CL) is 953 in the district.

Table 21 shows the number and percentage of literate and illiterate. In the district as a whole the literacy rate for males is much higher than females i.e. 71.9 percent and 48.1 percent respectively. Urban literacy rate in both sexes is much higher than the rural literacy rate. Among the twelve tahsils six tahsils namely Desaiganj(Vadasa), Armori, Kurkheda, Gadchiroli, Chamorshi, and Mulchera are above the district average (60.1 percent) and the remaining six tahsils are below the districts average. Out of 12 tahsils Desaiganj(Vadasa) tahsil recorded highest literacy rate i.e (73.3 percent) and Bhamragad tahsil recorded the lowest (34.0 percent). In males and females literacy rate in seven tahsils are above the district average. While remaining tahsil are below the district average. Gap in male-female literacy rate in rural area is higher than urban area of the district. There are only two tahsils with urban areas in the district i.e. Desaiganj(Vadasa) and Gadchiroli.

Table 22 shows the number and percentage of literates and illiterates by sex in C.D. Blocks. In the twelve C.D. Blocks of the District the percentage of literates varies from 34.0 percent in Bhamragad C.D. Block to 70.6 percent in Kurkheda C.D. Block. The proportion of literates in seven C.D. Blocks namely Desaiganj (Vadasa), Armori, Kurkheda, Korchi, Gadchiroli, Chrmoshi and Mulchera are above the district avaerage (58.3 Percent) and remaining five C.D.Blocks are below the district average. The proportion of male literates various from 44.8 percent in Bhamragad C.D. Block to 83.1 percent in Kurkheda C.D. Block and female literates various from 22.7 percent in Bhamragad C.D. Block to 57.7 percent in two C.D. Blocks i.e. Desaiganj (Vadasa) and Kurkheda. Gap in male-female literacy rate various from 19.2 percent in Etapalli C.D. Block to 28.6 percent in Gadchiroli C.D. Block. Average gap in male-female literacy rate of the district is 24.3 percent.

**TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |

| 12 | Sironcha | 5,684 | 3,687 | 1,997 | 11,608 | 5,081 | 6,527 | 39.6 | 50.9 | 28.1 | 22.8 |
| **District (Rural) Total:** | | **54,136** | **32,529** | **21,607** | **43,611** | **16,792** | **26,819** | **65.0** | **77.5** | **52.3** | **25.2** |

According to 2001 census 54,136 scheduled castes persons are literate in the rural areas of the Gadchiroli district of these 32,529 are males and 21,607 femeles. It is seen that 65.0 percent of the scheduled castes in rural areas of Gadchiroli district are literates. While among the males the literates constitute 77.5 percent. The rate among females is substantially lower 52.3 percent. Within district the highest literacy rate is seen in Kurkheda C.D. Block (77.6 percent) and lowest in Sironcha C.D. Block (39.6 percent). Also the highest literacy among males is seen in Kurkheda C.D. Block (89.4 percent) and lowest in Sironcha C.D. Block (50.9 percent). The female literacy rate is highest in Korchi C.D. Block (65.5 percent) and lowest in Sironcha C.D. Block (28.1 percent). The average in male-female literacy rate in the district is 25.2 percent. The gap in male-female literacy rate is highest in Gadchiroli C.D. Block (29.7 percent) and lowest in Sironcha C.D. Block (22.8 percent).

**TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Castes Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 19 | 2.4 | 55 | 0.1 |
| 1-10 | 3 | 0.4 | 158 | 0.2 |
| 11-20 | 16 | 2.0 | 1,508 | 1.5 |
| 21-30 | 21 | 2.7 | 2,270 | 2.3 |
| 31-40 | 40 | 5.1 | 9,818 | 10.0 |
| 41-50 | 70 | 8.9 | 8,185 | 8.4 |
| 51-60 | 79 | 10.0 | 7,702 | 7.9 |
| 61-70 | 147 | 18.7 | 18,939 | 19.4 |
| 71-80 | 203 | 25.8 | 37,064 | 37.9 |
| 81-90 | 64 | 8.1 | 10,699 | 10.9 |
| 91-99 | 12 | 1.5 | 897 | 0.9 |
| 100 | 114 | 14.5 | 452 | 0.5 |
| **District Total:** | **788** | **100.0** | **97,747** | **100.0** |

**Literacy rate for District (Rural): 65.0**

Table 26 shows distribution of villages by literacy rate range for Scheduled Castes population. 97,747 scheduled caste population is concentrated in 788 inhabited villages. The scheduled castes literacy rate in 203 villages is in 71–80 range accounting for 25.8 percent villages and covering 37.9 percent total scheduled castes population, 147 villages fall under 61–70 literacy range for scheduled casts group accounting for 19.4 percent total Scheduled Castes population. 114 villages fall

under 100 literacy range group covering 0.5 percent total scheduled castes population. 79 villages fall under 51–60 range group in scheduled castes and cover 7.9 percent total scheduled castes population. 70 villages fall under 41.50 range group for scheduled castes covering 8.4 percent total scheduled castes population, 64 villages fall under 81–90 range group covering 10.9 percent total scheduled castes population. Other literacy rate of range groups are having very low number of villages bearing negligible number of population of scheduled castes in the district for 2001 census.

**TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Number of literates and illiterates | | | | | | Percentage of literates | | | Gap in male/female literacy rate |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Number of literates | | | Number of illiterates | | | | | | |
| | | Persons | Males | Females | Persons | Males | Females | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

| 2 | Gadchiroli (M Cl) | 4,816 | 2,633 | 2,183 | 1,471 | 537 | 934 | 88.2 | 95.7 | 80.5 | 15.2 |
| | **Gadchiroli (Urban)** | **8,062** | **4,432** | **3,630** | **3,015** | **1,129** | **1,886** | **84.3** | **93.0** | **75.7** | **17.3** |

Table 27 shows the number and percentage of scheduled castes literates and illiterates by sex in towns. According to 2001 census 8,062 sscheduled castes persons are literates in urban areas of Gadchiroli district, comprising 4,432 males and 3,630 females. The percentage of scheduled castes literates is 84.3 percent in urban areas of the district. Among the males, it accounts for 93.0 percent while females literacy rate is 75.7 percent. The districts urban areas Desaiganj M Cl has 79.1 percent literacy rate and Gadchiroli M Cl has 88.2 percent literacy rate. Among the males Desaiganj M Cl has 89.1 percent literacy rate and Gadchiroli M Cl it is 95.7 percent. Among the females Desaiganj M Cl has 69.4 percent literates and Gadchiroli M Cl has 80.5 percent female literates. Average in male–female literacy rate in urban areas is 17.3 percent of the district. Gap in male–female literacy rate in Desaiganj M Cl is 19.8 percent while it is 15.2 percent in Gadchiroli M Cl.

| | **District (Rural) Total:** | **144,217** | **90,129** | **54,088** | **220,329** | **93,205** | **127,124** | **48.3** | **60.1** | **36.4** | **23.7** |

According to 2001 census 144,217 scheduled Tribes persons are literates in the rural areas of the Gadchiroli districts. Of these 90,129 are males and 54088 are females. It is seen that 48.3 percent of the scheduled Tribes in rural areas of the Gadchiroli district are literates, while among the males the literates constitutes 60.1 percents. The rate among the females in substantially lower (36.4 percent). Within the district highest literacy is seen in Desaiganj (Vadasa) C.D. Block (66.7 percent) and lowest in Bhamragad C.D. Block (28.2 percent). Also the highest literacy among males is seen in Desaiganj (Vadasa) C.D. Block (80.8 percent) and lowest in Bhamragad C.D. Block (38.4 percent). Among females the highest literacy rate is seen in Desaiganj (Vadasa) C.D. Block (52.3 percent) and lowest in Bhamragad C.D. Block (17.8 percent). Average gap in male – female literacy rate in rural areas is 23.7 percent of the district. Gap in male – female literacy rate is highest in Mulchera C.D. Block (29.1 percent) and lowest in Etapalli C.D. Block (17.9 percent) of the district.

**TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Tribes Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 30 | 2.1 | 710 | 0.2 |

| **District Total:** | **1,441** | **100.0** | **364,546** | **100.0** |

**Literacy rate for District (Rural): 48.3**

Table 29 shows distribution of villages by literacy rate range for Scheduled Tribes population. Out of 1,521 villages, 1,441 villages are having scheduled Tribes population numbering 364,546. 30 villages fall under 0 literacy range group accounting 2.1 percent villages with very negligible (0.2 percent) of total Scheduled Tribes population. 112 villages fall under 1 – 10 range group (7.8 percent villages) with 4.5 percent of total Scheduled Tribes population. 163 villages fall under 11 – 20 range group with 11.3 percent villages covring 9.5 percent of total Scheduled Tribes population. 160 villages fall under 21 – 30

range group with 8.9 percent of total Scheduled Tribes population. 192 villages fall under 31 – 40 range group covering 13.4 percent total Scheduled Tribes population. 199 villages fall under 41 –50 range group (13.8 percent villages) covering 11.8 percent total Scheduled Tribes population 273 villages fall under 51 – 60 range group (18.9 percent villages) with 21.0 percent total Scheduled Tribes population. 210 villages fall under 61 –70 range group (14.6 percent villages) with 19.1 percent total Scheduled Tribes population. While the remaining 102 villages fall under 71 – 100 range group 7.0 percent villages with 11.6 percent to total population very negligible percentage.

**TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Number of literates and illiterates | | | | | | Percentage of literates | | | Gap in male/female literacy rate |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Number of literates | | | Number of illiterates | | | | | | |
| | | Persons | Males | Females | Persons | Males | Females | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| 1 | Desaiganj (M Cl) | 1,120 | 668 | 452 | 549 | 209 | 340 | 76.9 | 87.8 | 65.0 | 22.7 |
| 2 | Gadchiroli (M Cl) | 3,989 | 2,226 | 1,763 | 1,492 | 580 | 912 | 84.6 | 92.1 | 76.7 | 15.5 |
| | **Gadchiroli (Urban)** | **5,109** | **2,894** | **2,215** | **2,041** | **789** | **1,252** | **82.8** | **91.1** | **74.0** | **17.1** |

According to 2001 census 5109 scheduled Tribes persons are literates in the urban areas of Gadchiroli district, comprising 2,894 males and 2,215 females. The percentage of scheduled Tribes literates is 82.8 percent in urban areas of the district. Among the males, it accounts for 91.1 percent while for females, the literacy rate is 74.0 percent. In urban areas of the Gadchiroli district the literacy rate in Desaiganj M Cl is 76.9 percent and Gadchiroli M Cl is 84.6 percent. In Desaiganj M Cl male literacy rate is 87.8 percent and Gadchiroli M Cl it is 92.1 percent. Females literacy rate in Desaiganj M Cl is 65.0 percent and in Gadchiroli M Cl it is 76.7 percent. The average gap in male/female literacy rate of urban areas is 17.1 percent. The gap in male/female literacy rate in Desaiganj M Cl and Gadchiroli M Cl is 22.7 percent and 15.5 percent respectively.

According to 2001 census, 34.7 percent of the districts population is main workers, 16.5 percent as marginal workers and the remaining 48.8 percent are non-workers. Among the 34.7 percent main

workers, male participation rate in the district is 43.6 percent while that of female is 25.6 percent as per 2001 census.

The percentage of main workers is highest in Bhamragad tahsil (47.3 percent) and the lowest in Mulchera tahsil (28.5 percent). The sexwise break-up shows that among males and females there are 11.9 percent and 21.3 percent of marginal workers respectively. It is seen that the percentage of female marginal workers is substantially higher than that of males. The percentage of marginal workers is the highest in Mulchera tahsil (21.2 percent) and the lowest in Bhamragad tahsil (11.3 percent) among 12 tahsil in the district.

Accoring to 2001 census 35.3 percent of the districts rural population is engaged as main workers, 17.0 percent as marginal workers and remaining 47.6 percent as non-workers. Among the main workers male participation rate in the districts rural areas is 43.7 percent while that of females is 26.7 percent. The proportion of main workers is highest in Bhamragad C.D. Block (47.3 percent) and lowest in Mulchera C.D. Block (28.5 percent). The sexwise break-up shows that among males and females population 12.1 percent and 22.0 percent population respectively are marginal workers. It is seen that the proportion of female marginal workers is substantially higher than that of males. The proportion of marginal workers is the highest in Mulchera C.D. Block (21.2 percent) and the lowest in Bhamragad C.D. Block (11.3 percent) among the 12 C.D. Block of the district.

2001 census recorded 26.6 percent of the districts urban population as main workers, 9.5 percent as marginal workers and the remaining 63.8 percent as non–workers. Among the 26.6 percent main workers, male participation rate in the districts urban area is 42.1 percent while that of female is 10.4 percent as per 2001 census. The proportion of main workers in Desaiganj M Cl is 26.1 percent and in Gadchiroli M Cl is 27.0 percent. Among the 9.5 percent marginal workers male participation rate in the districts urban areas is 8.2 percent while that of female is 10.9 percent as per 2001 census. The proportion of marginal workers in Desaiganj M Cl is 13.8 percent and Gadchiroli M Cl is 7.0 percent.

**Note:** Percentage of workers to total workers are given in brackets

Table 34 indicates the distribution of male and female workers by four categories of economic activities for the district i.e. Cultivators, Agricultural labours, Household industry and other workers in the district. The economy of the district is primarily agricultural which is supported by fact that cultivators (44.1 percent) and agricultural labours (38.1 percent) together constitute 82.2 percent of the workers in the district. The agricultural sector has absorbed more than 80 percent of the total workers in the district. The proportion of both cultivators and agricultural labourers differs considerably from tahsil to tahsil. The proportion of cultivators varies between 72.1 percent for Bhamragad tahsil to 25.0 percent for Desaiganj (Vadasa) tahsil. The proportion of agricultural labours varies between 51.2 percent for Armori tahsil to 16.8 percent for Bhamragad tahsil. It may be seen that 17.7 percent workers are engaged in work other than agricultur. Among there 1.6 percent are household industry workers and remaining 16.1 percent are in other workers.

| | | | | **(48.8)** | **(42.0)** | **(50.3)** | **(1.3)** | **(6.3)** |

**Note:** Percentage of workers to total workers are given in brackets

Table 35 indicates the distribution of male and female workers by four main categories for the district i.e. cultivators, Agricultural Labourers, Household Industries and other workers in the district. The economy of the district is primarily agricultural which is supported by the fact that cultivators 46.0 percent and Agricultural Labourers 39.0 percent together constitute 85.0 percent of the total workers of the district. The remaining 15.1 percent of workers are engaged in Household Industry and other work.

The proportion of cultivators varies between 72.1 percent in Bhamragad C.D. Block to 30.6 percent Desaiganj (Vadasa) C.D. Block. The proportion of Agricultural Labourers varies between 58.0 percent in Desaiganj (Vadasa) C.D. Block to 16.8 percent in Bhamragad C.D. Block. Over 85.0 percent of the workers in the district are directly engaged in agriculture as cultivators and agricultural Labourers, which is but natural in the context of agricultural economy of the district. It may be seen that 15.1 percent workers are engaged in work other than agriculture of these 1.6 percent are Household industry workers, and remaining 13.5 percent are in other workers.

**TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001**

| Serial number | Name and urban status of UA/Town | Persons / Males / Females | Total Population | Total number of workers (Main + Marginal) | Category of workers | | | |
|---|---|---|---|---|---|---|---|---|
| | | | | | Cultivators | Agricultural Labourers | Household Industry workers | Other workers |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| | | | | Number (Percentage) | | | | |
| 1 | Desaiganj (M Cl) | Persons | 24,793 | 9,893 | 889 | 3,011 | 484 | 5,509 |
| | | | | (39.9) | (9.0) | (30.4) | (4.9) | (55.7) |
| | | Males | 12,696 | 6,568 | 548 | 1,201 | 220 | 4,599 |
| | | | | (51.7) | (8.3) | (18.3) | (3.3) | (70.0) |
| | | Females | 12,097 | 3,325 | 341 | 1,810 | 264 | 910 |
| | | | | (27.5) | (10.3) | (54.4) | (7.9) | (27.4) |
| 2 | Gadchiroli (M Cl) | Persons | 42,468 | 14,432 | 964 | 2,097 | 324 | 11,047 |
| | | | | (34.0) | (6.7) | (14.5) | (2.2) | (76.5) |
| | | Males | 21,758 | 10,770 | 574 | 798 | 156 | 9,242 |
| | | | | (49.5) | (5.3) | (7.4) | (1.4) | (85.8) |
| | | Females | 20,710 | 3,662 | 390 | 1,299 | 168 | 1,805 |
| | | | | (17.7) | (10.6) | (35.5) | (4.6) | (49.3) |
| | **District (Urban) Total:** | **Persons** | **67,261** | **24,325** | **1,853** | **5,108** | **808** | **16,556** |
| | | | | **(36.2)** | **(7.6)** | **(21.0)** | **(3.3)** | **(68.1)** |
| | | **Males** | **34,454** | **17,338** | **1,122** | **1,999** | **376** | **13,841** |
| | | | | **(50.3)** | **(6.5)** | **(11.5)** | **(2.2)** | **(79.8)** |
| | | **Females** | **32,807** | **6,987** | **731** | **3,109** | **432** | **2,715** |
| | | | | **(21.3)** | **(10.5)** | **(44.5)** | **(6.2)** | **(38.9)** |

**Note:** Percentage of workers to total workers are given in brackets

In the urban areas the district cultivators(7.6 percent) and Agricultural Labourers(21.0 percent) together constitute only 28.6 percent of the total workers of the district. The remaining 71.4 percent of workers are engaged in House-hold industry and other works. The proportion of cultivators Desaiganj M.Cl. is 9.0 percent and Gadchiroli M.Cl. is 6.7 percent. The proportion of agricultural Laboures in Desaiganj M Cl is 30.4 percent and Gadchiroli M.Cl. is 14.5 percent. The proportion of household industry workers in Desaiganj M.Cl. is 4.9 percent and Gadchiroli M.Cl. is 2.2 percent. The proportion of

other workers in Desaiganj M.Cl. is 55.7 percent and Gadchiroli M.Cl. is 76.5 percent, Proportion of male workers is higher than female workers in all the urban areas of the district.

**TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001**

**Note** : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

**Educational**

The educational amenity is available in 1,343 villages, which constitute 88.3 percent of the total 1,521 inhabited villages of the district. The educational amenity is available to a highest number of villages Mulchera C.D. block (97.0 percent) and lowest in Bhamragad C.D. block (70.0 percent). Among the 12 C.D. blocks, namely Desaiganj (Vadasa), Armori, Kurkheda, Chamorshi, Mulchera, Aheri and Sironcha are above the district average (Table 37). The educational amenity is available to 98.7 percent of rural population in the district (Table 38).

There are 242 villages without primary school amenity of these the amenity to 170 villages is available at 5 kms, in 54 villages at a distance between 5-10 kms. and in the remaining 18 villages avail this amenity at a distance of beyond 10+kms. There are 1,129 villages without the middle school amenity, of these the middle school is available to 575 villages is available at a distance of less than 5 kms, to 300 villages from 5.-10 kms and in remaining 254 villages beyond 10 kms. 1510 villages are not having the Degree college amenity. Of these, 141villages have the amenity available within 5 kms, 157 villages within 5-10kms and in remaining 1,212 villages beyond 10 kms. (Table 39).

According to distance range from nearest statutory town, the education amenity is available in 4 villages within 5 kms., 74 villages within 5-15kms., and 370 villages within 16-50 kms. And 895 villages at a distance of 51 and above Kms. (Table 40).

796 inhabited villages constituting 81.7 percent of the total 974 inhabited villages in population range upto 499 have the educational amenity available to them within their revenue limits., 300 (100 percent) villages with population size 500-999, 188 (100.00 percent) villages with population size 1000-1999, 49(100.00 percent) villages with population size 2000-1999, 6 (100.00 percent) villages with population size 5000-9999, and 4 villages (100.00 percent) with 10,000 and above population size have the cent percent minimum educational amenity within their revenue limits.

**Medical**

Medical amenies of any type specified in the village directory is available in 24.3 percent of villages and it covers 55.5 percent of the rural population being served with this amenity. The villages enjoying this amenity through Primary Health Centres, Sub-Centres and dispensaries serve not only the resident population of concerned villages but also those residing in surrounding villages.

369 villages out of 1,521 inhabited villages have medical amenity in their respective villages limits and 1,152 villages do not have any type of medical amenity within their revenue limits. As many as 184 and 362 villages are situated at a distance of less than 5 kms. with reference to the nearest place with medical amenies such as hospital and PHC respectively. Another 209 and 413 villages are located at a distance of 5-10 Kms. for the same medical amenies. But in the case of 1,111 and 709 villages, the villages have to travel beyond 10 Kms. to reach a place with the medical amenity (Table 39).

According to the distance range the medical amenity is available in 2 villages (50.0 percent) within 5 kms, 33 villages (42.9 percent) within 5-15 kms., 124 villages(30.1.percent) within 16-50 kms., and remaining 210 villages (20.4 percent) at a distance of 51 and above kms.(Table 40).

According to the population range the medical amenity is available for 81 villages (8.3 percent) with population ranging up to 499, 108 villages (36.0 percent) with population ranging from 500-999, 123 villages (65.4 percent) with population ranging 1000-1999, 47 villages (95.9 percent) with population 2000-4999 and remaining 10 villages (100.0 percent) covering population range 5000 and above have medical amenity available within their revenue limits. (Table 41).

## TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

| Serial number | Name of C. D. block | Total population of inhabited villages | Type of amenity available | | | | | | | | | |

**Note** : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

## Drinking Water

Water supplied from a tap or handpump or tube well situated within or outside the premises is considered as improved water amenity.

The improved drinking water source is available in 1,473 villages (96.8 percent) out of 1521 inhabited villages

## Postal

As regards rural areas of the district as a whole, the amenity of Post and Telegraph is available to 165 villages (10.8 percent) out of 1,521 inhabited villages serving 37.7 percent of rural population of the district. Within 12 C.D.Blocks of the district, the percentage of villages having post and telegraph amenity varies form 25.8 percent in Desaiganj (Vadasa) C.D.Block to 1.8 percent in Bhamraged C.D.Block. Within the district the percentage of population served with Post offices varies from 54.1 percent in Desaiganj (Vadasa) C.D.Block to 13.4 percent in Bhamragad C.D.Blocks.

Postal amenies are not available at all in 1,357 villages. Out of these amenity is available to 622 villages at a distance of less than 5 kms. to 346 villages at a distance between 5-10 kms., and to the remaining 389 villages at a distance of 10 and above kms.

According to he distance range location of 165 villages with post office from nearest statutory town, the postal amenity there is 1 village within 5 kms., 19 villages within 5-15kms., 63 villages within 16-50 kms. And 82 villages with 51 and above kms. of the district.

Among 165 villages with amenity of post and telegraphs, 5 villages are having less than 500 population, 38 villages are in population range 500-999, 76 villages are in the range of 1000-1999, 36 villages are in the range of 2000-4999, 6 villages have the population range of 5000-9999. There are 4 villages with the amenity covering population above 10,000.

**TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |
|---|---|---|---|---|
| | Less than 5 kms. | 5-10 kms. | 10+ kms. | Total (Col. 2-4) |
| 1 | 2 | 3 | 4 | 5 |

| (b) Cooperative Bank | 196 | 274 | 1,024 | 1,494 |
| 7. Agricultural Credit Societies | 401 | 252 | 698 | 1,351 |

## Telephone

The amenity of telephone is available in 108 (7.1 percent) villages of the district. These villages serve 28.7 percent of rural population of the district with the amenity. Desaiganj (Vadasa) C.D. block with 79.5 percent has the highest population proportion serves with telephone amenity and Mulchera C.D. block with 6.6 percent population has the lowest population proportion serves with the amenity in the district.

Telephone amenity is not available in 1,413 villages out of these the amenity is available 231 villages at a distance of less than 5 Kms. to 194 villages at a distance between 5-10 Kms. and to 988 villages at a distance of beyond 10 Kms..

According to the statutory town among the 108 villages with the telephone amenity, 2 villages are located within 5 Kms., 23 villages with in 5-15 kms., 49 villages with in 16.50 kms., 34 villages beyond 51 Kms..

Among 108 villages with the amenity of telephone, 8 villages are having less than 500 population, 61

villages with population of 500-1999, 29 villages with population of 2000-4999 and 10 villages having population of 5000 and above.

### Transport and Communication

Transport communication includes bus service, rail amenity and navigable waterways. If a bus stop or a railway station or navigable waterways is located within the territorial juridiction of a village, it considered to have been served by such amenity even if it is little away from the actual settlement. 505 (33.2 percent) villages have communication amenity available, serving 62.1 percent of rural population of the district. 20 villages of Desaiganj (Vadasa) C.D. block constituting 64.5 percent of total villages have the highest proportion of villages with communication/ transport amenity available while the Bhamragad CD block with 15.5 percent coverage of villages holds the last rank among the 12 C.D. blocks of the district.

Out of 1,521 inhabited villages 1,016 villages not have any communication amenity. Of these 1,016 villages, the residents of 473 villages have to cover a distance up to 5 Kms. to reach a place with such amenity, for 283 villages it is between 5-10 Kms. and for 260 villages it is beyond 10 Kms.. The distance range from nearest statutory town from the villages where the communication amenity is available in 505 villages out of 1,521 villages, it is seen that 3 villages are within 5 kms from the nearest statutory town, 48 villages within 5-15 kms., 185 villages within 16-50 kms. and 269 villages beyond 51 kms. of the statutory towns. The availability of this amenity depends upon the location of the villages with reference to road. Among the 505 villages which have the availability of communication amenity within their respective limits, the population for 177 villages is less than 500, for 272 villages in the range of 500-1999, 56 villages fall in the range of 2,000 and above.

**TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001**

# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

### Banking

The amenity of banking services is available in 46 (3.0 percent) villages serving 18.8 percent rural population of the district. The proportion of villages with availability of bank amenity varies between 6.5

percent of villages in Desaiganj (Vadasa) C.D.block to 0.8 percent in Korchi C.D.block.

While the amenity of commercial bank is not available in 1484 villages, that of co-operative bank is not available in 1494 villages. Out of these, amenity of commercial bank and co-operative bank to 246 and 196 villages respectively is available at a distance within 5 kms. The commercial and co-operative bank for 311 and 274 villages respectively is available at a distance of 5-10 kms. and for remaining 927 villages and 1024 villages respectively the amenity of commercial bank and co-operative bank is available at a distance beyond 10 kms.

4 villages are having banking amenity at a distance upto 15 kms. from the nearest statutory town and 19 villages are having the amenity available to distance range 16-50 kms. from the nearest statutory town and remaining 23 villages are having banking amenity at a distance more than 51 kms. from the nearest statutory town.

Among 46 villages with the amenity of bank, 2 villages are having less than 500 population; 16 villages are with population of 500-1999; 24 villages are with population of 2,000-9999 and remaining 4 villages have population of 10,000 and above.

**Agricultural Credit Socities**

There are only 170 villages (11.2 percent of total villages) having agricultural credit societies in the district. Serving 36.4 percent of the rural population. The highest proportion of villages with the amenity available is in the Desaiganj (Vadasa) C.D. block (22 villages with 71.0 percent) and lowest i.e.1 village (1.5 percent) in Mulchera C.D. block, 1351 villages are not having this amenity. Out of these the amenity is available to as many as 401 villages within 5 Kms. to 252 villages within 5-10 Kms. and 698 villages at a distance beyond 10 Kms.. There are 3 villages within or such which are situated at a distance of less than 5 kilometeres from the nearest statutory town, 113 villages with the agricultural credit society at a distance of 5 to 50 Kms. from nearest statutory towns and 54 villages with agricultural credit society are at a distance of 51 Kms. and beyond. This amenity is available to 18 villages with population less than 500, 108 villages with population of 500-1,999; 34 villages with population of 2,000-4,999 and remaining only 10 villages cent percent (100percent) with population of 5,000 and above.

**TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001**

# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

## Approach by Pucca Road

Road whether pucca or kuchcha are the nervous system of a district. They act as pull factor for the development and upliftment of the areas. Roads with cement concrete, black top, water bound macadam etc. come under pucca roads and the remaining are treated as kuchcha roads.

Pucca road amenity is available to 1,110 villages (73.0 percent) out of 1,521 inhabited villages in the district. Among 12 C.D. block in the district, the proportion of villages with approach by pucca road is highest in Desaiganj (Vadasa) C.D. Block 31 villages constituting 100.00 percent of villages in C.D. block and lowest in Bhamragad C.D.block 24 villages constitute 21.8 percent of villages C.D.block (Table 37). A rural population of 813,055 persons (90.0 percent) avails of the approach road amenity (Table 38). Of the 1110 villages, 4 villages (100.0 percent) are at a distance of less than 5 kilometors from the nearest statutory town, 445 villages are at a distance of 5 to 50 Kms. to approach nearest statutory town by pucca road, 661 villages are at a distance of 51 kms. and beyond from a nearest statutory town (Table 40). The population of 594 villages (61.0 percent villages) villages served by pucca road is less than 500, 277 (92.3 percent villages) villages the population is in the range of 500-999, 181 villages (96.3 percent of villages) is in the range of 1000-1999, 48 villages (98.0 percent) is in the range of 2000-4999 and 10 villages (100.0 percent) having population ranging from 5000 and above. It may be seen that smaller the population size of the villages lesser is the availability of amenity of pucca approach road. Larger the size of a village greater are the chances of its having this amenity.

## Power Supply

1,320 villages are having power supply in the district. Power supply is available to the highest proportion of villages i.e.106 (99.1 percent) in Gadchiroli C.D. block and a lowest proportion with the facility available in 48 (43.6 percent) in Bhamragad C.D. block. Desaiganj (Vadasa) and Armori C.D. blocks are having cent percent power supply available in its villages (Table 37).

Total population in Desaiganj (Vadasa). Armori, Gadchiroli and Chamorshi C.D. blocks have cent percent power supply available to them. The proportion of power supply amenity in Kurkheda C.D. block is 99.9 percent and in Bhamragad C.D. block it is 75.3 percent. (Table 38).

The power supply is available to cent percent villages with the population range 1,000-1,999 (188 villages), 2,000-4,999 (49 villages), 5,000-9,999 (6 villages) and 10,000 and above (4 villages).

It may be summed up from foregoing paragraphs that in respect of availability of different types of amenities the larger villages have an advantage over the smaller ones. Population size and availability of amenities are associated with each other.

**TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

| Serial number | Name of C. D. block | Number of inhabited villages | Total area | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Desaiganj (Vadasa) | 31 | 18,890 | 123.2 | 60.5 |
| 2 | Armori | 91 | 39,439 | 116.4 | 42.2 |

| 12 | Sironcha | 114 | 34,322 | 102.3 | 20.8 |
| | **District Total:** | **1,521** | **819,237** | **58.1** | **27.9** |

**Note** : - Cultivable area = Irrigated area + Unirrigated area
Total Area figures do not match with the sub-category wise breakup given by the collectorates. Hence the data analysis has not been attempted.

**TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS**

| | | Per capita receipt | | | Per capita expenditure | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Serial number | Class, name & urban status of the Town | Total | Through taxes | From all other sources | Total | General Administration | Public health and conveniences | Public works | Public institutions | Other(s) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | III Desaiganj (M.Cl.) | 612.3 | 273.0 | 339.3 | 546.8 | 130.1 | 135.9 | 143.6 | 4.0 | 133.3 |
| 2 | III Gadchiroli (M.Cl.) | 691.9 | 290.1 | 401.8 | 668.7 | 70.1 | 144.1 | 86.5 | 54.3 | 313.7 |
| | **District Total :** | **662.5** | **283.8** | **378.7** | **623.8** | **92.2** | **141.0** | **107.5** | **35.8** | **247.2** |

Table 43 gives per capita receipts and expenditure for each town in the district. The average per capita receipt for two towns of the district works out Rs.662.5 of which Rs.283.8 are received through taxes and remaining Rs.378.7 from all other sources. The total expenditure incurred per head in Rs.623.8,

of which Rs.92.2 are spent on general administration, Rs.141.0 on public health and conveniences, Rs.107.5 on public works, Rs.35.8 on public institutional and Rs.247.2 on other items. Between two towns of the district both the receipt and expenditure incurred per head are the highest in Gadchiroli (M Cl).

**TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001**

| Serial number | Name and urban status of Town | Type of educational institution | | | | |
|---|---|---|---|---|---|---|
| | | Primary | Junior Secondary / Middle | Secondary / Matriculation | Senior Secondary | College |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Desaiganj (M.Cl.) | 4.8 | 2.8 | 1.6 | 1.2 | 0.4 |
| 2 | Gadchiroli (M.Cl.) | 2.4 | 1.9 | 1.9 | 0.7 | 0.9 |
| | **District Total** | **3.3** | **2.2** | **1.8** | **0.9** | **0.7** |

Table 44 indicates the number of schools and colleges/per ten thousand population in statutory towns. On an average, the ratio of Primary Schools per ten thousand population in urban area of the district works out to 3.3. The number of Junior Secondary/Middle Schools is 2.2, while Secondary/ Matriculation institutions are 1.8, the Senior Secondary Schools are 0.9 and the colleges are 0.7 in urban area of the district.

**TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001**

| Serial number | Name and urban status of the Town | Number of beds in medical institutions per 10,000 population |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Desaiganj (M.Cl.) | 0 |
| 2 | Gadchiroli (M.Cl.) | 24 |
| | **Distrct Total** | **15** |

Table 45 gives the number of beds per ten thousand population in medical institutions in towns. On an average there are 15 beds per ten thousand population in urban area of the district. Gadchiroli (M Cl) has 24 beds per ten thousand population which is above the district average. The information on beds in Medical Institutions with respect to Desaiganj (M Cl) is nil.

**TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001**

| Serial number | Name of the Town | Total population | Slum population | Percentage of slum population to total population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1 | Desaiganj | 24,793 | 0 | 0.0 |
| 2 | Gadchiroli | 42,468 | 0 | 0.0 |
| | **District Total** | **67,261** | **0** | **0.0** |

There is no notified slum area in urban area of the Gadchiroli district.

**TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 1 | Desaiganj (M.Cl.) | Rice | Rice |
| | | Bamboo Basket & Mat | Timber |
| | | -- | Tendu Leaves |
| 2 | Gadchiroli (M.Cl.) | Rice | Rice |
| | | Poha | Poha |
| | | -- | Bamboo |

Most important commodity exported out of and manufactured in towns, 2001. The main items manufactured in urban area of the district are Rice, Poha, Bamboo baskets and Mats. The items mainly exported from the district(urban) are Rice, Poha, Timber, Bamboo and Tendu leaves.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

**Note**:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The total percentage for the three categories viz.Permanent, Semi Permanent and Temporary may not add to 100 percent, the percentage remaining is for the 4th category Unclassified not shown in the table.

This table gives the distribution of households living in permanent, semi-permanent and temporary houses in Gadchiroli district. According to 2001 Census out of total houses of the district, 28.5 percent households are living in permanent houses 66.3 percent are living in semi permanent and 5.1 percent households are living in temporary houses as per defination given in the note below the table 49. In

rural areas 25.6 percent households are living in permanent houses. 69.0 percent are living in Semi permanent and 5.4 percent are living in temporary houses. While in urban area of the district, 67.5 percent households are living in permanent houses, 30.8 percent households are living in semi permanent houses and 1.7 percent households are living in temporary houses.

According to type of houses in tahsils, Desaiganj (Vadasa) tahsil recorded highest percentage (41.0 percent) of households living in permanent houses and tahsil korchi recorded the lowest (4.8 percent). In semi permanent houses tahsil korchi recorded highest percentage (94.2 percent)of households and tahsil Sironcha recorded the lowest (44.9 percent). While in temporary houses Sironcha tahsil recorded highest percentage (18.4 percent) of households and tahsil korchi recorded the lowest (1.0 percent) in all the tahsils of the district.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

Table–50 gives percentages of households having improved drinking water source, electricity, bathroom, toilet and drainage facility in the district Gadchiroli. There are total 205,751 households consisting of 191,194 households and 14,557 households in rural and urban areas respectively. Of total households 58.4 percent households are having improved drinking water, 43.6 percent households are enjoying power supply facility, 21.7 percent households are having bathroom and 18.8 percent households are having toilet facilities. While drainage facility is available for 26.9 percent households in the district.

Percentage in brackets

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table gives number and percentage of households by type of fuel used for cooking in rural and urban areas of the district.

Of the 205,751 households, 173,225 households (84.2 percent) use fire wood, 3,059 households (1.5 percent) use crop residue, 1,493 households (0.7 percent) use cowdunk cake, 62 households use electricity, 57 households use charcoal, 13,231 (6.4 percent) households use L.P.G. Gas, 2,079 (1.0 percent) households use bio gas, 11,797 (5.7 percent) households use kerosene, 156(0.1 percent) households use other type of fuel and 592 (0.3 percent) households reported no cooking being done by them.

In rural areas out of 191,194 households, 87.9 percent households use firewood for cooking. This is followed by use of kerosene (4.7 percent) use of L.P.G. gas (3.8 percent) use of crop residue (1.5 percent) bio gas 1.1 percent, cowdunk cake 0.7 percent use of other item 0.1percent only 58 households use electricity and 45 households use charcoal for cooking (Their percentages are very negligible)

In urban areas out of 14557 households, highest percentage (41.3 percent) of households use L.P.G. gas. This is followed by fire wood (35.1 percent) kerosene is used by 19.3 percent households. 1.9 percent households use crop residue, 1.0 percent households use cow dunk cake, 0.5 percent households bio-gas and 0.1 percent households use charcoal for cooking.

In all types of fuel used for cooking, firewood is predominantly used in rural areas, while L.P.G gas is mainly used in urban areas of the district.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table – 52 gives the number of households availing banking services and number of households having each of the specified assets, 2001.

There are 205,751 households of which 191,194 are from rural areas and 14,557 households are from urban areas, of the district. Of total households, 54,766 households are availing banking services of which 46,765 households are from rural areas and 8,001 households are from urban areas.

In the district, 44,694 households have Radio/ Transistor 32,964 households have television, 4498 households have telephone, 107,151 households have bicycle, 11,407 households have Scooter/Motarcycle/ Moped, 1,165 households have car, jeep, van and 80,199 households are not having such specified assets.

**(viii) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the decade.**

No major changes took place during the decade. Reorganisation took place in August 1992, resulted in creation of four new tahsils and six villages. Thus there are now 12 tahsils instead of eight. Aheri and Alapalli census towns are declassified. Hence the number of towns decreased to two and the number of villages increased from 1,671 to 1,679 in the district.

**(ix) Brief Description of Places of Religious, Historical or Archeological Importance in the Villages and Places of Tourist Interest in the towns of the district.**

**Fairs**

The concentration of fairs is heavier in the district. Most of the fairs held are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets. In the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use are brought for sale. The people buy necessary articles in these fairs. In this district large-scale fairs are not reported. However, a few small-scale fairs are held in the district. Ram Navami fair is held in Amgaon and Ankisa villages during March, April. Mahadeo fair is held in Dhanora village in the month of March.

**Places of Historical and Tourist Importance**

Certain forts and few old temples in the district, play an important role in snapping socio-economic patterns of the district. Major portion of this district is covered by hilly and dense forest area. There are a number of attractive hills and forts in the district. The highest peak in the district is located in Gadalgatta ranges, rises to a height of 967 meters.

**Tipagad**

Tipagad hills in Dhanora tahsil are situated about 60 kms from Gadchiroli, forms the highest portion of wild and mountainous region, 2000 feet above the sea level. On the summit of this range, encireted by the chain upon of hills, all covered with the densert forest, stands the old fortress of Tipagad. This fort has massive ramparts of huge undressed stones. In its vicinity there is a tank, which is said to be the source of Tipagad River.

**Somnur**

Somnur village in sironcha tahsil is a spot of great scenic beauty and hence of tourist attraction. It is the meeting place of three rivers in a valley glade formed by numerous hills clothed with lush green forests. The view is enchanting and if properly developed can be one of the most beautiful spots attracting even tourists form foreign countries. Near about here the boundaries of three States viz., Maharashtra, Madhya Pradesh and Andhara Pradesh meet.

**Wairagad**

Wairagad is situated in Armori tahsil. It is a place of great antiquity and is supposed to have been founded in 'Dwapar Yuga'. Historically the place was ruled by Mana chiefs before the Gonds.

**Markanda**

Markanda is a small village is Chamorshi tahsil situated on the left bank of Wainganga river and known amongst the Hindus as a place of pilgrimage. It derived its name as well as fame from sage Markandeya who according to the Hindu holy scriptures worshipped Shiva here and obtained immortality and secondly from a beautiful group of temples including the shivaling which Markandeya is believed to have worshipped, built in rich purple coloured stone finely situated on a high bluff overlooking the river. The small hillock, the group of temples and the river flowing below have made Markanda a pleasing spot. There are nearly twenty four temples in the group and are enclosed in a quadrangle measuring 59.74 × 35.96 metres with entrances on the river side in front and in two side walls. Some of these are in complete ruins and others are very small, but the general effect is very impressive.

**Aheri**

Aheri village the headquarters of the tahsil with the same name has group of three Shrines situated in the heart of the village and dedicated to Shankar, Vithoba and Hanuman with that of Shankar in the centre. Of these the one dedicated to Vithoba and lying on the left of that of Shankar is the largest with a fairly spacious rectangular Sabhamandap and a domed Shikar Dassehra with a spire. On the palanquin of Shankar is taken in procession round the village. The celebration lasts for two days and is attended by a large number of devotees.

**Forts**

Sinorcha once possessed a fort, which was built in 1698 A.D. It appears to have been built under the auspices of one Haidar Wali Shah. When district passed under the British dominion it was considered advisable

to dismantle the fort, and as anybody who care to do so was allowed to take stone from it, the process of dismantling was quick and much of the stone was used in the construction of the jail, which now houses the judicial court and many other public buildings.

**(x) Major characteristics of the district, Contribution of the district in the form of any Historical figure associated with the district**

Gadchiroli district is endowed with two major economic resources i.e. forestry and mineral deposits. The economic picture of Gadchiroli will be completely changed provided the aforesaid resources are completely exploited. There is an abundance of mineral deposits beneath the dense forest in the district. But the district is unable to exploit these resources as it has to destroy the forest wealth and due to this reason the situation is as it is and no development has yet taken place in this direction. Fishery and rice production are the other major occupations in the district.

Gondi is the other widely spoken language apart from Marathi. It is a combination of Tamil,Telgu and Kannad language. The Staple food of the district is rice. On festivals all classes of people prepare special dishes and dainties, which are generally some delicacy or other made from the crop or fruit, which happens to ripen at the time. For example 'Puranpoli' a variety of gram cake made with sugar is eaten on all festival but especially at 'Pola''Modak' balls of wheat chapatti rolled round a kernel of coconut are a speciality for 'Ganesh Chaturthi', Ram Navami, Mahashivratri, Diwali, Chirstmas, Muharram, are the religious festivals of the people. In General the social and cultural life of the people has been quite placid during the decade.

**Contribution of the Distsrict**

Freedom movement was started vigorously in Gadchirolil district as elsewhere in the whole of India. The district also witnessed many freedom struggles. Among the leaders the name of Raje Vishweshwar Rao of Aheri worth mentioning. He had also inspired the establishment of Dharmrao Shikshan Mandal. Raje Vishweshwar Rao and Queen Rajkuwar have donated 34 acres and 31 acres of land respectively to the mandal which now runs many educational institutions throughout Gadchiroli district.

**(xi) Scope of Village Directory and Town Directory**

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

**Village Directory :**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location code numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages ( villages with no population) have been indicated as such after

furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

**Column 1 : Serial Number**

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

**Column 2 : Name and Location Code Number of village.**

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

**Column 6 : Educational**

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools respectively.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

This column provides data available on medical amenities in the village.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

**Column 9 : Post, Telegraph and Telephone**

Column 9 provides the postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village.

**Column 10: Commercial and Co-operative Banks**

If the village is served by any banking service, commercial bank, co-operative bank etc, the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given.

**Column 11: Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given.

**Column 12 : Recreational and Cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded.

**Column 13 : Communications**

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable waterway, the same has been indicated in this column.

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village.

**Column 15 : Nearest Town and distance**

The distance is given in kilometres in brackets against the name of the town nearest to the village.

**Column 16 : Power supply**

This column relates availability of Power Supply in the village.

**Column 17 : News Paper / Magazine**

If a village receives any News Paper/Magazines the same is noted in this column.

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23: Land use i.e. area under different types of land use**

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department.

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / Non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to the proportion of the Scheduled Tribes to the total Population by ranges.

**Town Directory :**

The town directory is presented for each town covering different aspects of urban life. In 2001 Census, Statement I – VII have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finance, civic, medical, and educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutory notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns the Tahsildar and cantonment executive officers supplied the information.

**Statement I-Status and Growth History**

Statement I shows the status and growth history of the towns in the district, column 2 in this statement indicates class, name and civic administration status of a town. Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and National level. Census towns have no urban civic status.

Column 3 indicates location code number of the town, column 4 gives name of tahsil and column 5 shows the name of C.D.Block. Column 6 presents area in Sq. Kms., Column 7 presents number of households including houseless households.

Column 8 to 18 gives population and growth rate of town since 1901 and would help in drawing the trends in their growth rate, Column 19 presents density and Column 20 to 22 presents sex ratio.

**Statement II - Physical Aspects and Location of towns, 1999.**

**Column 3 to 5 : Physical Aspects**

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

**Column 6, 7 and 8 :**

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

**Column 9 and 10 :**

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

**Column 11, 12 and 13 :**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

**Statement III : Municipal Finance 1998 – 1999**

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

**Statement IV-Civic and other Amenities, 1999**

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 3 and Schedule Castes/ Scheduled Tribes population given in column 4 and 5 have been added to help in measuring amenities in respect of population size of the weaker sections in the towns. The information on the road length within the town shown under column 6 has been obtained from Municipality.

Column 7 to 12 reflects the information on system of sewerage, number of latrines, and method of disposal of night soil.

Column 13 indicates sources of protected water supply to the inhabitants of the towns. The information on storage and capacity is shown under column 14.

Column 15 gives information regarding availability of fire fighting services. In case it is not available in the referent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Column 16 to 20 pertains to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999**

**Column 1 to 3 : Self explanatory.**

**Column 4 and 5 :**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, are treated as independent units.

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc.

**Column 6 to 9 :**

The information on educational facilities is reflected in columns 6 to 9

**Column 10 : Recognized shorthand, typewriting and vocational training institutes**

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to 14**:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools upto class IV are treated as Primary or Elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle schools with Primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M (3).

**Column 15: Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded.

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8** : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 and 11** : **Number of Agricultural Credit Societies and Non-Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

# PART A
# VILLAGE AND TOWN DIRECTORY

# Section I - Village Directory

**(a)Note Explaining the abbreviations used in Village Directory**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages ( villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

**Columns 1 : Serial Number**

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

**Columns 2 : Name and Location Code Number of village.**

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

**Column 6 : Educational**

Classes upto class IV are included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

| | | |
|---|---|---|
| (i) | Primary School | P |
| (ii) | Middle School | M |
| (iii) | Secondary School | S |
| (iv) | Senior Secondary School | PUC |
| (v) | College | C |
| (vi) | Industrial School | I |
| (vii) | Training School | Tr |
| (viii) | Adult literacy class/centre | AC |
| (ix) | Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc. | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes :

| | | |
|---|---|---|
| (i) | Allopathic Hospital | H |
| | Ayurvedic Hospital | HA |
| | Unani Hospital | HU |
| | Homeopathic Hospital | H Hom |
| (ii) | Allopathic Dispensary | D |
| | Ayurvedic Dispensary | DA |
| | Unani Dispensary | DU |
| | Homeopathic Dispensary | D Hom |
| (iii) | Maternity & Child Welfare | MCW |
| (iv) | Maternity Home | MH |
| (v) | Child Welfare Centre | CWC |
| (vi) | Health Centre | HC |
| (vii) | Primary Health Centre | PHC |
| (viii) | Primary Health Sub-Centre | PHS |
| (ix) | Family Welfare Centre | FWC |
| (x) | T.B. Clinic | TB |
| (xi) | Nursing Home | NH |
| (xii) | Registered Private Medical Practitioner | RMP |
| (xiii) | Subsidised Medical Practitioner | SMP |
| (xiv) | Community Health Worker | CHW |
| (xv) | Others | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

The type of the drinking water supply sources available within the village are indicated by codes as follows :

| | | |
|---|---|---|
| (i) | Tap Water | T |
| (ii) | Well Water | W |
| (iii) | Tank Water | TK |
| (iv) | Tubewell Water | TW |
| (v) | Handpump | HP |
| (vi) | River Water | R |
| (vii) | Canal | C |
| (viii) | Lake | L |
| (ix) | Spring | S |
| (x) | Others | O |
| (xi) | Summer Source | SS |

**Column 9 : Post, Telegraph and Telephone**

It is indicated by codes as shown below whether within the village exists the following amenities:

| | | |
|---|---|---|
| (i) | Post Office | PO |
| (ii) | Telegraph Office | TO |
| (iii) | Post & Telegraph Office | PTO |
| (iv) | Telephone Connection | PH |

**Column 10 : Commercial and Co-operative Banks**

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

| | | |
|---|---|---|
| (i) | Commercial Bank | CM |
| (ii) | Co-operative Bank | CP |

**Column 11 : Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

| | | |
|---|---|---|
| (i) | Agricultural Credit Society | ACS |
| (ii) | Non- Agricultural Credit Society | NCS |
| (iii) | Other Credit Society | OCS |

**Column 12:Recreational and cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

| | | |
|---|---|---|
| (i) | Cinema/Video Hall | CV |
| (ii) | Sports Club | SP |
| (iii) | Stadium/Auditorium | ST |

**Column 13 : Communications**

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable waterway they are mentioned as follows:

| | | |
|---|---|---|
| (i) | Bus | BS |
| (ii) | Railway Station | RS |
| (iii) | Navigable Waterway | NW |

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

| | | |
|---|---|---|
| (i) | Paved Road | PR |
| (ii) | Mud road | MR |
| (iii) | Foot path | FP |
| (iv) | Navigable River | NR |
| (v) | Navigable Canal | NC |
| (vi) | Navigable waterways other than River, Canal | NW |

**Column 15 : Nearest Town and distance**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power supply**

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

| | | |
|---|---|---|
| (i) | Electricity for domestic use | ED |
| (ii) | Electricity for agricultural use | EAG |
| (iii) | Electricity for other purposes | EO |
| (iv) | Electricity for all purposes | EA |

**Column 17 : News Paper/Magazine**

If a village receives any News Paper/Magazines the same is noted in this column using following codes:

| | | |
|---|---|---|
| (i) | News Paper | N |
| (ii) | Magazine | M |

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23 : Land use i.e. area under different types of land use**

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

| | | |
|---|---|---|
| (i) | Government Canal | GC |
| (ii) | Private Canal | PC |
| (iii) | Well (without electricity) | W |
| (iv) | Well (with electricity) | WE |
| (v) | Tubewell (without electricity) | TW |
| (vi) | Tubewell (with electricity) | TWE |

| | | |
|---|---|---|
| (vii) | Tank | TK |
| (viii) | River | R |
| (ix) | Lake | L |
| (x) | Waterfall | WF |
| (xi) | Others | O |
| (xii) | Total | T |

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

## (b) List of Villages fully merged in towns and outgrowth at 2001 Census

# Section II - Town Directory

**(a) Note Explaining the abbreviations used in Town Directory**

**Town Directory statements (I to VII)**

## Statement I : Status and Growth History

**Column (2) : Class, name and civic administration status of town :**

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000 - 99,999 | II |
| 20,000 - 49,999 | III |
| 10,000 - 19,999 | IV |
| 5,000 - 9,999 | V |
| Below 5,000 | VI |

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

| | | |
|---|---|---|
| (I) | Municipal Corporation | M. Corp. |
| (II) | Municipal Committee | MC |
| (III) | Municipal Council | M Cl |
| (IV) | City Municipal Council | CMC |
| (V) | Town Municipal Council | TMC |
| (VI) | Municipal Board | MB |
| (VII) | Municipality | M |
| (VIII) | Cantonment Board / Cantonment | CB |
| (IX) | Notified Area | NA |
| (X) | Notified Town | NT |
| (XI) | Notified Area Committee/ Notified Area Council | NAC |
| (XII) | Notified Town Area | NTA |
| (XIII) | Industrial Notified Area | INA |
| (XIV) | Industrial Township | ITS |
| (XV) | Township | TS |
| (XVI) | Town Panchayat | TP |
| (XVII) | Nagar Panchayat | NP |
| (XVIII) | Town Committee/Town Area Committee | TC |
| (XIX) | Small Town Committee | ST |
| (XX) | Estate Office | EO |
| (XXI) | Gram Panchayat | GP |
| (XXII) | Census Town | CT |

Other columns need no comments

**Statement II - Physical Aspects and Location of towns, 1999.**

**Column 3 to 5 : Physical Aspects**

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

**Column 6, 7 and 8 :**

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

**Column 9 and 10 :**

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

**Column 11, 12 and 13 :**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

**Statement III : Municipal Finance 1998 - 1999**

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

**Statement IV : Civic and Other amenities, 1999**

**Column (1 to 5) : Self explanatory.**

**Column (6) : Road length (in kms.)**

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

| | | |
|---|---|---|
| (i) | Pucca Road | PR |
| (ii) | Kutcha Road | KR |

**Column (7) : System of Sewerage**

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

| | | |
|---|---|---|
| (i) | Sewer | S |
| (ii) | Open Surface Drains | OSD |
| (iii) | Box Surface Drains | BSD |
| (iv) | Sylk Drains | SD |
| (v) | Cesspool method | CP |
| (vi) | Pit System | Pt |
| (vii) | Others | O |

**Column 8 to 11 : Number of latrines**

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 : Method of disposal of night soil**

The various prevalent method of disposal of night soil are given below with codes :

| | |
|---|---|
| Head Loads | HL |
| Basket | B |
| Wheel Barrows | WB |
| Septic Tank | ST |
| Pit System | Pt |
| Sewerage | S |
| Others | O |

**Column 13 and 14 : Water supply**

Source and capacity of storage system. The following codes are used in these columns:

**Column 13 :**

| | | |
|---|---|---|
| (i) | Tap water | T |
| (ii) | Tube-well water | TW |
| (iii) | Tank Water | TK |
| (iv) | Well water | W |

**Column 14 :**

| | | |
|---|---|---|
| (v) | Over Head Tank | OHT |
| (vi) | Service Reservoir | SR |
| (vii) | River Infiltration Gallery | RIG |
| (viii) | Bore Well Pumping System | BWP |
| (ix) | Pressure Tank | PT |

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

**Column 15 : Fire Fighting Service**

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 : Electrification (Number of connections)**

Different type of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) and others.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999**

**Column 1 to 3 : Self explanatory.**

**Column 4 and 5 : Medical**

The data covers all such medical institutions run by or aided by Government / Semi Government / Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family

planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres are treated as independent units and counted separately using following codes:

| | | |
|---|---|---|
| (i) | Hospital | H |
| (ii) | Dispensary | D |
| (iii) | Health Centre | HC |
| (iv) | Family Welfare Centre | FWC |
| (v) | T.B. Clinic | TB |
| (vi) | Nursing Home | NH |
| (vii) | Others | O |

In case of more than one institutions of any type, it is indicated within brackets the number of such institution(s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

| | |
|---|---|
| Ayurvedic | A |
| Unani | U |
| Homoeopathic | Hom. |

**Column 6 to 9 :Educational**

The codes used for these columns are as follows:

| | | |
|---|---|---|
| (i) | Arts only | A |
| (ii) | Science only | S |
| (iii) | Commerce only | C |
| (iv) | Arts & Science only | AS |
| (v) | Arts & Commerce only | AC |
| (vi) | Combined for all categories-Arts, Science and Commerce | ASC |
| (vii) | Law | L |
| (viii) | University | U |
| (ix) | Others | O |

**Column 10 : Recognized shorthand, typewriting and vocational training institutes**

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

| | | |
|---|---|---|
| (i) | Vocational Training Institute | VT |
| (ii) | Shorthand | SH |
| (iii) | Typewriting | Type |
| (iv) | Shorthand & Typewriting | SH Type |
| (v) | Others | O |

The vocation institutions like - Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to 14** :Higher Secondary / Intermediate/ Senior Secondary /PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools upto class IV are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation e.g. P(4), M(3).

**Column 15 : Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats.**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of the nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities.**

Stadium, Cinema, Auditorium / Drama / Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

| | | |
|---|---|---|
| (i) | Public Library | PL |
| (ii) | Reading Room | RR |

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8** : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies.**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area Committee etc.

# PART B
# PRIMARY CENSUS ABSTRACT

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 Census only main workers were presented in to four categories. One of the novel features of the Primary Census Abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks:**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/CD Block/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/CD Block/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/CD Block/Town |
| 4. | Village Primary Census Abstract | CD Block/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

**DISTRICT PRIMARY**

# ANNEXURE - II

## Fertility and Mortality, 1991 Census

### Fertility Levels

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Maharashtra State.

### Mortality Levels

Information on the questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of child mortality have been worked out by using brass technique.

**ANNEXURE II (i)**
**Estimates of Child Mortality, 1991**

| Item | | Gadchiroli District Total | Maharashtra State Total |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| Q1 | P | 106 | 74 |
| | M | 95 | 72 |
| | F | 117 | 76 |
| Q2 | P | 119 | 79 |
| | M | 122 | 78 |
| | F | 126 | 81 |
| Q3 | P | 126 | 86 |
| | M | 132 | 84 |
| | F | 129 | 89 |
| Q5 | P | 144 | 91 |
| | M | 144 | 89 |
| | F | 143 | 93 |

### Mortality

From the estimate of child mortality (number of deaths by ages 1, 2, 3 and 5 given above as q(1), q (2), q (3) and q (5)). It is observed that the level of child mortality in the district is substantially higher as compared to the state in 1991 census. A notable feature is the lower female mortality compared to male mortality in the district as against higher female mortality for the state. However, the sex differentials in child mortality appear to be more pronounced in the district compared to the State.

**ANNEXURE II (ii)**
**Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991**

| Fertility Measures | Gadchiroli District 1981 | Gadchiroli District 1991 | Maharashtra State 1981 | Maharashtra State 1991 |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| GFR | 149 | 134 | 134 | 124 |
| GMFR | 183 | 171 | 168 | 157 |
| TFR | 4.8 | 4.0 | 4.3 | 3.7 |
| TMFR | 5.7 | 5.6 | 5.2 | 5.2 |
| Crude Birth Rate (CBR) | 34.8 | 33.2 | 31.8 | 29.8 |
| No. of children ever born per women in the age group 45-49 | -- | 4.4 | -- | 4.2 |
| Mean Age at Marriage | -- | 18.0 | -- | 17.9 |
| Child Women Ratio | -- | 51.2 | -- | 49.6 |

### Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crude Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole in 1981. In 1981 census the GFR, GMFR, TFR, TMFR and CBR for the district were 149, 183, 4.8, 5.7 and 34.8 respectively as compared with State average of 134, 168, 4.3, 5.2, and 31.8 in 1981 census. Similar trend is observed in 1991 Census. In 1991, GFR, GMFR, TFR, TMFR and CBR for the district were 134, 171, 4.0, 5.6 and 33.2 as against the State average of 124 , 157 , 3.7 , 5.2 , and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole. But the gap in fertility rates between the district and the State has reduced in 1991.

### Mean age at marriage

Mean age at marriage recorded lower for the district than the State in 1991.

### Child Woman Ratio

The Child Woman Ratio is recorded lower for the district as compared to the State in 1991 census.

## ANNEXURE III

## Various Measures of Fertility and Mean Age at Marriage,1991

| | | **100.0** | **100.0** | **100.0** |

On the basis of migrants by place of birth, there are 40,893,229 migrants in Maharashtra in 2001 comprising 16,395,684 males and 24,497,545 females. These migrants constitute 42.2 per cent of total population. Male migrants constitute 32.5 per cent of male population while female migrants account for 52.7 per cent of female population.

**ANNEXURE IV (ii)**

**Percentage distribution of Migrants by Place of Birth – Gadchiroli**

| Serial number | Place of Birth | 2001 Census | | |
|---|---|---|---|---|
| | | Person | Males | Females |
| **1** | **2** | **3** | **4** | **5** |
| 1 | A. Migrants born within the state of enumeration | 308,710 | 105,534 | 203,176 |
| | | 87.0 | 84.2 | 88.5 |
| | i) Migrants born elsewhere in district of enumeration. | 210,580 | 69,269 | 141,311 |
| | | 59.3 | 55.3 | 61.6 |
| | ii) Migrants born in other district of the state | 98,130 | 36,265 | 61,865 |
| | | 27.7 | 28.9 | 27.0 |
| 2 | B. Migrants born in other states of India | 33,258 | 13,169 | 20,089 |
| | | 9.4 | 10.5 | 8.8 |
| 3 | C. Migrants born in other countries | 12,878 | 6,648 | 6,230 |
| | | 3.6 | 5.3 | 2.7 |
| 4 | D. Unclassifiable | 0 | 0 | 0 |
| | | 0.0 | 0.0 | 0.0 |
| | **Total Migrants :** | **354,846** | **125,351** | **229,495** |
| | | **100.0** | **100.0** | **100.0** |

In Gadchiroli district there are 354,846 migrants comprising 125,351 males and 229,495 females. The migrants of this district constitute 36.6 per cent of total population. Male and female migrants constitute for 25.5 and 47.9 per cent respectively.

From the distribution of total migrants in Maharashtra by place of birth, it can be clearly seen that females predominate in intradistrict and interdistrict migration while males predominate in interstate and international migration. In case of Gadchiroli district females predominates in intradistrict, interdistrict and interstate migration while males predominates in international migration.

**ANNEXURE IV (iii)**
**Inter State Migrants to Maharashtra**

| Serial number | Place of Birth | 2001 Census Migrants | 2001 Census Percentage to total Migrants |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Andhra Pradesh | 450,898 | 5.8 |
| 2 | Bihar | 386,799 | 5.0 |
| 3 | Gujarat | 890,428 | 11.5 |
| 4 | Karnataka | 1,267,421 | 16.3 |
| 5 | Kerala | 307,676 | 4.0 |
| 6 | Madhya Pradesh | 616,059 | 7.9 |
| 7 | Rajasthan | 463,875 | 6.0 |
| 8 | Tamil Nadu | 267,477 | 3.4 |
| 9 | Uttar Pradesh | 2,172,971 | 28.0 |
| | Total for Nine States | 6,823,604 | 88.0 |
| | Other States | 932,703 | 12.0 |
| | **Total** | **7,756,307** | **100.0** |

The number of migrants born in other states of India is 7,756,307. It is seen that 19.0 per cent of the total migrants in Maharashtra are from other states. In case of Gadchiroli district 9.4 per cent of the total migrants are from other states.

In case of Maharashtra 9 States viz.,Uttar Pradesh, Karnataka, Gujarat, Madhya Pradesh, Rajasthan, Andhra Pradesh, Bihar, Kerala and Tamil Nadu together account for 6,823,604 migrants (88.0 per cent) out of 7,756,307 interstate migrants.

**ANNEXURE IV (iv)**
**Inter State Migrants to Gadchiroli**

| Serial number | Place of Birth | 2001 Census Migrants | 2001 Census Percentage to total Migrants |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Andhra Pradesh | 11,747 | 35.3 |
| 2 | Bihar | 355 | 1.1 |
| 3 | Chhattisgargh | 13,126 | 39.5 |
| 4 | Gujarat | 440 | 1.3 |
| 5 | Jharkhand | 264 | 0.8 |
| 6 | Madhya Pradesh | 4,177 | 12.6 |
| 7 | Rajasthan | 428 | 1.3 |
| 8 | Uttar Pradesh | 656 | 2.0 |
| 9 | West Bengal | 831 | 2.5 |
| | Total for Nine States | 32,024 | 96.3 |
| | Other States | 1,234 | 3.7 |
| | **Total** | **33,258** | **100.0** |

In respect of Gadchiroli district out of 33,258 migrants Chhattisgarh accounts for 39.5 per cent, Andhra Pradesh accounts for 35.3 per cent, Madhya Pradesh accounts for 12.6 per cent and West Bengal accounts for 2.5 per cent interstate migrants.

## Migrants by Place of last residence

**ANNEXURE IV (v)**
**Percentage distribution of migrants by place of last residence - Maharashtra**

| | Place of last residence | 2001 Census Persons | 2001 Census Males | 2001 Census Females |
|---|---|---|---|---|
| | 1 | 2 | 3 | 4 |
| A) | Last residence within the State of Enumeration | 34,225,081 | 12,486,174 | 21,738,907 |
| | | 82.0 | 74.5 | 87.1 |
| i) | Last residence elsewhere in the district of enumeration | 22,137,959 | 7,237,350 | 14,900,609 |
| | | 53.1 | 43.2 | 59.7 |
| ii) | Last residence in other district of Maharashtra | 12,087,122 | 5,248,824 | 6,838,298 |
| | | 29.0 | 31.3 | 27.4 |

**ANNEXURE IV (v)** - (Contd.)

**Percentage distribution of migrants by place of last residence - Maharashtra**

| Place of last residence | | 2001 Census | | |
|---|---|---|---|---|
| | | Persons | Males | Females |

| 7 | Rajasthan | 399 | 1.2 |
| 8 | Uttar Pradesh | 516 | 1.6 |
| 9 | West Bengal | 926 | 2.9 |
| | Total for Nine States | 31,074 | 96.1 |
| | Other States | 1,257 | 3.9 |
| | **Total** | **32,331** | **100.0** |

In respect of Gadchiroli district out of 32,331 interstate migrants Chattisgarh accounts for 40.8 per cent, Andhra Pradesh 34.6 per cent, Madhya Pradesh 12.1 per cent and West Bengal accounts for 2.9 per cent interstate migrants.

## Rural – Urban Components Of Migration

The flow of migrants would consist of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these various streams in case of migrants is classified by place of last residence. It presents data only in relation to internal migrants. The data for Gadchiroli district is presented separately.

**Source :** Table 31 of Maharashtra State District Profile 1991

Marathi is the main language of the district and is the mother tongue of 54.7 per cent of the district population. In rural areas Marathi speakers account for 52.6 per cent whereas in urban areas 82.1 per cent. Gondi is the second largest language spoken in the district. It accounts for 14.5 per cent of the total

population. The proportion of Gondi speakers is higher in rural areas (15.6 per cent) than the urban areas (0.5 per cent). The third largest language spoken in the district is Telugu, its percentage to the total population is 9.8 and mainly spoken in rural areas by 10.4 per cent, whereas 0.8 per cent in urban areas.

The speakers of the minority languages (Bengali, Chhattisgarhi, Kurukh/Oraon and Maria) are mainly concentrated in rural areas and remaining two languages (Hindi and Urdu) are concentrated in urban areas.

It is found that during the last decade proportion of Marathi speaking persons has decreased from 55.1 per cent to 54.7 per cent while Maria speakers proportion has marginally increased from 8.4 per cent to 8.6 per cent.
