CENSUS OF INDIA 1971

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following Parts :—

PART I-A	.. ..	General Report
PART I-B	.. ..	General Report (Detailed analysis of the Demographic, Social, Cultural and Migration Patterns)
PART I-C	.. ..	Subsidiary Tables
PART II-A	.. ..	General Population Tables
PART II-A (Supplement)		General Population Tables (Standard Urban Areas)
PART II-B	.. ..	Economic Tables
PART II-C(*i*) and PART V-A	.. ..	Distribution of Population by Religion and Scheduled Castes
PART II-C(*ii*)	..	Social and Cultural Tables (Table C-I to C-VI and Fertility Tables) (Present Volume)
PART II-D	.. ..	Migration Tables
PART III	.. ..	Establishment Report and Tables
PART IV	.. ..	Housing Report and Tables
PART V-B	.. ..	Ethnographic Notes on Scheduled Castes and Scheduled Tribes
PART VI-A	.. ..	Town Directory
PART VI-B	.. ..	Special Survey Reports on Selected Towns
PART VI-C	.. ..	Survey Reports on Selected Villages
PART VIII-A	..	Administration Report—Enumeration (for official use only)
PART VIII-B	..	Administration Report—Tabulation (for official use only)
PART IX	.. ..	Census Atlas
PART IX-A	.. ..	Administrative Atlas

B—STATE GOVERNMENT PUBLICATIONS

PART X .. .. District Census Handbook for each district in three Parts :

PART A—Village and Town Directory

PART B—Village and Townwise Primary Census Abstract

PART C—Analytical Report, Administration Statistics and District Census Tables

Note :—Parts A and B of the District Census Handbook have been printed in one Volume.

PREFACE

The reference date for the 1971 Census of India was the sun-rise of April, 1, 1971. The provisional population totals, giving the population by sex and the literates, were released on April 15, 1971, through Paper No. I of 1971 (Punjab series) and a supplement giving the rural/urban break-up of the population and a broad picture of total workers was released on May 5, 1971. The final population figures, giving the distribution of population among the administrative unit down to the level of tahsil and town in the state and also important scheduled caste population in each of these administrative units were released through General Population Tables—Part II-A —Series 17—Punjab.

We are now releasing, in this volume, data on social and cultural characteristics of the population through Part II-C(*ii*), Punjab—Series 17. We have already separately released Part II-C(*i*) combined with Part V-A, containing the tables pertaining to religion and scheduled castes. The present volume, Part II-C(*ii*) contains the C-Series Tables, C-I to C-VI on mother tongue and all the F-Series Tables, F-I to F-V, on current fertility. The data on languages have been presented in two main census tables—Table C-V (Mother Tongue) and Table C-VI (Bilingualism). The data on mother tongues have been extracted from the individual slips on full count basis through sorter ticket No. 1. Table C-V on mother tongue shows in alphabetical order various mother tongues returned at the 1971 Census at state/district/tahsil/city/town level. Table C-VI on bilingualism gives particulars of subsidiary languages returned by speakers of different mother tongues. According to the instructions to the enumerators, not more than two subsidiary languages were to be recorded.

Punjabi and Hindi are the two principal mother tongues out of the 37 languages/mother tongues spoken in the state. As per the census returns, Punjabi speakers form 79·49 per cent and Hindi speakers 20·01 per cent of the total population in the state. The remaining 35 languages are spoken only by 0·5 per cent of the population.

Fertility tables have been prepared for the first time at the 1971 Census by adding a new question in the individual slip asked of each currently married women. Responses to this question have yielded very interesting data on the levels of marital fertility and differentials in fertility rates of the currently married women by age at marriage and religion for rural and urban areas separately in the state.

The details of each table in C and F-Series have been incorporated in the introduction part of this volume Each table is preceded by a fly-leaf explaining the various relevant census terminologies and the lay-out of data presentation.

We are grateful to Shri K. K. Chakravorty, Assistant Registrar General (Census) and his staff for close scrutiny of these tables.

We have leaned heavily on the officers and technical staff of our organization, and almost everyone in varying measures has contributed at various stages in the completion of this volume. We owe our deep gratitude to each one of them. In particular, we are grateful to Shri J. C. Kalra, Assistant Director of Census Operation and Shri G. S. Pabla, Investigator, who supervised the processing of these tables from day to day. They were assisted profusely by Sarvshri G. S. Gill and A. S. Dhillon, Tabulation Officers.

H. S. KWATRA

Deputy Director of Census Operations,
PUNJAB

CHANDIGARH :

INTRODUCTION

Part II-C volume has been presented in two sub-parts: Part II-C(i) and Part II-C(ii). Part II-C(i) volume alongwith Part V-A, containing tables C-VII and C-VIII with their respective appendices and annexures, pertaining to religion and scheduled castes, has since been printed and released. The present volume, Part II-C(ii), contains the C-series tables, C-I to C-VI, and all the F-Series tables—F-I to F-V. Table C-I is based on the 'Population Record', which was compiled by the enumerator for each household from the filled in individual slip of the 1971 Census. This table has been compiled on two-stage random sampling technique. In the first stage 20 per cent of the blocks were selected and from such blocks a sample of 20 per cent households was drawn in the second stage on random basis. The results obtained have been blown up 25 times uniformally to get estimated figures. Tables C-II, C-III, C-IV, C-VI and the fertility tables, F-1 to F-V, are based on 10 per cent sample of rural slips and 20 per cent sample of urban slips. Table C-V (on mother tongue) has, however, been prepared on full count. A note on the sampling procedure adopted in the 1971 Census for social and cultural tables, (except tables C-I and C-V), prepared in the office of the Registrar General, India, is reproduced at Annexure I. Similarly, a note on the sampling procedure adopted in the 1971 Census for fertility tables, (F-I to F-V), as supplied by the Registrar General's office, is reproduced at Annexure II.

The present volume contains the following social and cultural tables:

C-Series:

C-I Part A: Members of households by relationship to head of household classified by age-groups.

C-I Part B(i) & (ii): Households where the head is a male/female by relationship of members with the head.

C-II: Age and marital status.

C-III Part A: Age, sex and education in all areas.

C-III Part B: Age, sex and education in urban areas only.

C-IV: Single year age returns.

C-IV-Appendix: Distribution of persons by five year age-groups.

C-V: Mother Tongue (in alphabetical order).

C-VI: Bilingualism.

F-Series:

F-I Part A (Rural): Distribution of currently married women and the related births during the last year by religion, present age and age at marriage.

F-I Part B (Urban): Distribution of currently married women and the related births during the last year by religion, present age and age at marriage.

Appendix to Table F-I: Distribution of currently married women and the related births during the last year by scheduled castes/scheduled tribes, present age and age at marriage (Rural/Urban).

F-II Part A (Rural): Distribution of currently married women and the related births during the last year by education, present age and age at marriage.

F-II Part B (Urban): Distribution of currently married women and the related births during the last year by education, present age and age at marriage.

F-III Part A (Rural): Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage.

F-III Part B (Urban): Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage.

Appendix to Table F-III: Distribution of currently married women and the related births during the last year by scheduled castes/scheduled tribes, duration of marriage and age at marriage (Rural/Urban).

F-IV Part A (Rural): Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage.

F-IV Part B (Urban): Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage.

F-V: Distribution of currently married women and the related births during the last year by religion, education groups, present age and age at marriage (Rural/Urban).

The C-series tables, except C-I, by and large correspond to the tables prepared at the 1961 Census. The F-series tables, on current fertility levels, have, however; been introduced for the first time in the 1971 Census. The statistical data in this Series (F) have yielded useful demographic information to study and measure the fertility levels and differentials with particular

reference to age at marriage and duration of marriage. These tables have been compiled on the basis of the returns to the following questions pertaining to social and cultural characteristics in the individual slip asked of each currently married women.

Q. 2: Relationship to head.
Q. 4: Age.
Q. 5: Marital status.
Q. 6: For currently married women only;
(a) Age at marriage.
(b) Any child born in the last one year.
Q. 12: Literacy (L or O).
Q. 13: Educational level.
Q. 14: Mother tongue.
Q. 15: Other languages.

The instructions given to the enumerators for recording of replies of the informants to the aforesaid questions have been reproduced in Annexure III. Annexure IV contains the questions, pertaining to the social and cultural characteristics of the people, put to the informants at each of the decennial censuses from 1901 to 1971.

Statement No. 1, based on the main Table C-I, shows the number of members (married status) by relationship to Head of household in Punjab in the total, rural and urban areas in 1971.

STATEMENT NO. 1

Relationship to Head	Percentage distribution of members of household		
	Total	Rural	Urban
1	2	3	4
Married status:			
Son	34·32	34·06	35·41
Brother	6·09	5·82	7·20
Father	2·11	2·10	2·18
Mother	3·28	3·19	3·62
Other male	3·67	3·54	4·22
Other female	50·53	51·29	47·37
Total ..	100·00	100·00	100·00

Statement No. 2, based on Table C-I, shows percentage of 'Never married', 'widowed', divorced or separated' members by relationship to Head of household in 1971 in the total, rural and urban areas in Punjab:

STATEMENT NO. 2

Relationship to Head	Percentage distribution of members of households		
	Total	Rural	Urban
1	2	3	4
Never married, Widowed, Divorced or Separated:			
Son	40·14	39·49	42·38
Brother	2·61	2·71	2·23
Daughter	31·33	30·50	34·18
Sister	1·05	1·03	1·11
Father	0·46	0·49	0·37
Mother	2·67	2·74	2·43
Other males	11·59	12·31	9·15
Other females	10·15	10·73	8·15
Total ..	100·00	100·00	100·00

Statement No. 3, based on table C-I, shows percentage of un-related persons to Head of households and Single-member households in 1971 by sex, in total, rural and urban areas in Punjab:

STATEMENT NO. 3

Sex	Percentage of Un-related persons			Percentage Single-member households		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Male	0·16	0·11	0·35	5·41	4·27	8·69
Female	0·02	0·01	0·04	1·61	1·52	1·90

For obvious reasons proportion of single-member households among males is over-whelming compared to single-member households of females in the urban areas.

Statement No. 4 shows percentage distribution of population by sex in different age-groups in 1971 in the total, rural and urban areas in Punjab:

STATEMENT NO. 4

Age-Group	Percentage of distribution of population by age-groups					
	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
All ages	**100·00**	**100·00**	**100·00**	**100·00**	**100·00**	**100·00**
0—4	12·64	13·39	12·81	13·54	12·12	12·89
5—9	14·29	14·29	14·65	14·51	13·12	13·57
10—14	14·04	13·96	14·33	14·07	13·09	13·60
15—19	10·65	10·59	10·51	10·41	11·09	11·18
20—24	8·28	8·47	7·87	8·14	9·58	9·57
25—29	6·68	6·81	6·42	6·58	7·50	7·58
30—34	5·50	5·92	5·26	5·79	6·27	6·34
35—39	4·94	5·34	4·72	5·15	5·66	5·95
40—44	4·64	4·74	4·48	4·69	5·14	4·90
45—49	3·76	3·97	3·61	3·99	4·15	3·90
50—54	4·06	3·53	4·12	3·62	3·88	3·25
55—59	2·25	2·36	2·30	2·47	2·12	1·99
60—64	3·22	2·62	3·43	2·73	2·54	2·26
65—69	1·50	1·29	1·59	1·37	1·21	1·03
70+	3·50	2·72	3·87	2·94	2·34	1·99
Age not stated	0·05	N	N	N	0·19	N

NOTE—: 'N' stands for Negligible.

Statement No. 5 shows distribution of population by five major life cycles in total, rural and urban areas in Punjab in 1971:

STATEMENT NO. 5

Life Cycle	Percentage of distribution of population by life cycles					
	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
All ages	**100·00**	**100·00**	**100·00**	**100·00**	**100·00**	**100·00**
Infancy (0 year)	2·77	3·05	2·82	3·12	2·63	2·82
Childhood (1—9 years)	24·16	24·63	24·64	24·93	22·61	23·64
Adolescence (10—19 years)	24·69	24·55	24·84	24·48	24·18	24·78
Adulthood (20—59 years)	40·11	41·14	38·81	40·43	44·30	43·48
Old age (60—70 years)	8·22	6·63	8·89	7·04	6·09	5·28
Age not stated	0·05	N	N	N	0·19	N

NOTE—: 'N' stands for Negligible.

Statement No. 6 shows percentage distribution of population by marital status in the total, rural and urban areas in Punjab in 1971:

STATEMENT NO. 6

Marital status	Percentage distribution of population by marital status					
	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Never married	59·72	51·84	60·01	51·69	58·82	52·34
Married	36·81	42·55	36·25	42·64	38·57	42·23
Widowed	3·31	5·54	3·60	5·59	2·40	5·40
Divorced	0·04	0·04	0·05	0·05	0·02	0·03
Unspecified	0·12	0·03	0·09	0·03	0·19	N

NOTE—: 'N' stands for Negligible.

Statement No. 7 shows effective literacy rates by sex in Punjab and its districts in ranking order in 1971:

STATEMENT NO. 7

Ranking order in General Literacy	State/District	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
	PUNJAB	**38·69**	**46·22**	**29·91**
1	Ludhiana ..	48·47	55·15	40·50
2	Jullundur ..	47·48	55·51	38·39
3	Hoshiarpur ..	46·86	57·52	34·99
4	Ropar ..	42·70	52·48	31·15
5	Kapurthala ..	41·11	48·90	32·31
6	Amritsar ..	40·65	46·94	33·24
7	Gurdaspur ..	39·84	48·04	30·59
8	Patiala ..	36·36	43·54	27·78
9	Firozpur ..	32·09	39·41	23·58
10	Sangrur ..	27·65	34·33	19·58
11	Bhatinda ..	26·96	34·39	18·25

Statement No. 8 shows educational levels attained by the literate population by sex in Punjab in 1971:

STATEMENT NO. 8

Educational levels	Percentage to total literates		
	Persons	Males	Females
1	2	3	4
Literate (without educational level)	31·76	31·19	32·78
Primary	35·35	31·97	41·44
Middle	15·28	16·87	12·41

STATEMENT No. 8

Educational levels	Percentage to total literates		
	Persons	Males	Females
1	2	3	4
Matriculation or Higher Secondary	14·76	17·12	10·52
Non-Technical diploma or certificate not equal to degree	0·29	0·24	0·39
Technical diploma or certificate not equal to degree	0·59	0·42	0·89
Graduates and above ..	1·97	2·19	1·57

Statement No. 9 shows number of speakers in 15 languages specified in Schedule VIII to the Constitution of India and percentage of speakers in each such language to total population in Punjab in 1971:

STATEMENT NO. 9

Serial No.	Mother Tongue	No. of Speakers	Percentage to total population
1	2	3	4
1	Assamese	146	N
2	Bangali	2,294	0·02
3	Gujarati	1,384	0·01
4	Hindi	2,711,490	20·01

ANNEXURE I

A NOTE ON THE SAMPLING PROCEDURE ADOPTED IN THE 1971 CENSUS FOR SOCIAL AND CULTURAL TABLES (EXCEPT C-I & C-V)

Sample size: A ten per cent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tahsil. In the urabn part of the district, a twenty per cent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration tf required precision, available resources and operational convenience.

Selection procedure: The sample design adopted in the 1971 census was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions: (1) Tahsil (rural); (2) Non-city urban district and (3) City (urban unit with 100,000 and more population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the Primary census abstract (PCA) the individual slips were sorted into ten broad industrial categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows: (I) Cultivators; (II) Agricultural labourers; (III) Livestock, forestry, fishing, hunting and plantations, orchards & allied activities (IV) Mining & quarrying: (Va) Manufacturing, processing, servicing & repairs in *household industry;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry;* (VI) Construction: (VII) Trade & commerce; (VIII) Transport, storage & communications, (IX). Other services and (X) Non-workers.

The nine age groups into which the slips belonging to each industrial category were sorted were 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+ and age, not stated'. Thus the individual slips of a particular operational unit were sorted into 11×9=99 cells, separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted. All tables except A-I to A-V (Pop. tables), B-I Part A-B II (economic tables), C-V (mother tongue), C-VII (Religion) and C-VIII (scheduled castes & tribes) have been prepared on a sample basis.

Estimation procedure: The tables prepared for each of the districts/states from the ten per cent rural and twenty per cent urban sample slips have been inflated to give the final estimated tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A. In order to ensure the maximum possible inter-table consistency, it become necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

This way of estimating the cell frequencies ensured that marginal totals of estimated tables tallied with that of the full-count tables. This is convenient to the user because, after adjustment, the identical marginal totals are found in tables having the same marginals specification. "The adjustment diminishes the sampling variance to some extent; the more the controls, the smaller the sampling variance of the adjusted frequencies". Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full-count frequency of some characteristics from PCA or Table B-I Part A and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later:—

Table	Level of presentation	Control based from tables
C-II	District	B I Part A & PCA
C-III A	do	,, ,,
C-III B	do	,, ,,
C-IV	State	,, ,,
C-IV App.	District	,, ,,

As no such control was readily available for C-VI (bilingualism), these were estimated by multiplying the sample values by 10 and 5 in rural and urban areas respectively.

Reliability of estimates: No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of sample random sampling, as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion samples, (0.10 in case of rural areas & 0.20 in case of urban areas); 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten per cent of individual slips in rural areas and twenty per cent in urban areas. In the present census, slips were sorted by sex, industrial category and age-group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census. Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

A NOTE ON THE SAMPLING PROCEDURE ADOPTED IN 1971 CENSUS FOR C-I PART A, C-I PART B(i) AND C-I PART B(ii)

Sample size: For the preparation of tables C-I Part A, C-I Part B(i) and C-I Part B (ii) on household composition, a sample of residential households was drawn in two stages. In the first stage, a twenty per cent systematic sample of effective enumeration blocks (defined later) was selected systematically. In the second stage, a twenty per cent sample of population records relating to residential households was selected from each of the sample block again systematically.

Selection procedure: For the purpose of sample selection, the rural and urban parts of each district were treated as separate strata. Within each stratum, a list of blocks was prepared by merging those containing less than 50 households with the neighbouring blocks. Blocks formed in this way were called 'effective enumeration blocks' or simply 'effective blocks'. The list of effective blocks so formed served as a frame for the selection of the first stage unit. A twenty per cent sample of effective blocks was then selected systematically. Having identified the first stage units, the population record books for the selected effective blocks were assembled. Within each selected effective block, the population records relating to residential households were serially numbered. To do this effectively, instructions were issued to fold the population record relating to 'houseless households or institutional households'. Care was also taken to see that only one serial number was assigned to a population record, whenever the record relating to a household covered more than one page. In cases where 'effective blocks' were formed by merging two or more blocks, the population record books corresponding to all the census enumeration blocks constituting the effective block, were assembled together and then the households were selected. Fresh random numbers were selected for each effective block. The population records corresponding to the selected households were marked 'S' at the right hand top corner with a stamp provided.

Estimation procedure: The tables prepared for each of the stratum were multiplied uniformally by 25 to give the final estimated table.

ANNEXURE II

A NOTE ON THE SAMPLING PROCEDURE ADOPTED IN THE 1971 CENSUS FOR FERTILITY TABLES

Sample size: A ten per cent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tashil. In the urban part of the district, a twenty per cent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure: The sample design adopted in the 1971 census was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions: (1) Tahsil (rural); (2) Non-city urban district and (3) City (urban unit with 100,000 and more population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the Primary census abstract (PCA) the individual slips were sorted into ten broad industrial categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows: (I) Cultivators; (II) Agricultural labourers; (III) Livestock, forestry, fishing, hunting and plantations, orchards & allied activities (IV) Mining & quarrying; (Va) Manufacturing, processing, servicing & repairs in *household industry;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry;* (VI) Construction; (VII) Trade & commerce; (VIII) Transport, storage & communications (IX) Other services and (X) Non-workers.

The nine age groups into which the slips belonging to each industrial category were sorted were 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+ and 'age not stated'. Thus the individual slips of a particular operational unit were sorted into $11 \times 9 = 99$ cells, separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted.

Estimation procedure: All the tables F I to F V are presented at state level. The sample table F I to F V have been multipled by '10' in case of rural area and by '5' in case of urban area to estimate the final tables.

Reliability of estimates: No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of simple random sampling. as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion samples (0.10 in case of rural areas & 0.20 in case of urban areas); (8 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten per cent of individual slips in rural areas and twenty per cent in urban areas. In the present census, slips were sorted by sex, industrial category and age-group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census. Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

ANNEXURE III

EXTRACTS FROM INSTRUCTIONS TO ENUMERATORS FOR FILLING UP INDIVIDUAL SLIP—1971 CENSUS

Question 2: *Relationship to Head*

31. In the case of the Head of the household write 'Head'. The Head of the Household for census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the Household as its Head.

32. In the case of institutions like boarding houses, messes or friends living together in one census house, which should be regarded as households of unrelated persons living together, which may be called institutional Households, the manager or Superintendent or the person who has administrative responsibility or who by common consent is regarded as the head should be recorded as the Head of the Household.

33. The Manager or Superintendent who does not stay normally in the institution should be enumerated at his place of normal residence. You should make sure before filliing up the slip for the Manager or Superintendent etc. of an institutional household, that he/she has not been enumerated at any other household.

34. In the case of absence of a normal 'Head', the person on whom the responsibility of managing the affairs of the household falls, should be regarded as the Head.

35. All relationships in this question should be recorded in relation to the Head of the household. Write the relationship in full. Do not use words like 'nephew', 'niece or uncle', but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (for uncle), 'son' will include 'adopted son' or 'step son' similarly for a daughter. In the case of visitors' 'boarder', or 'employee' as the case may be. In the case of institution, the members should be recorded as 'unrelated'.

36. If on the check of revisional round between 1st and 3rd April, 1971 the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the deceased Head of the household will, of course, be cancelled.

Question 4: Age

38. Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded.

39. In respect of infants who might not have completed one year by the day of enumeration their age in completed years should be invariably shown as 'O' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infants even if a day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as 'O' only.

40. Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas cannot give their age correctly. They should be assisted to state the correct age by stimulating their memory with reference to any historical event etc. well known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as Headman of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

Question 5: Marital Status

41. In answering this question use the following abbreviations.

NM : Never Married

M : Currently Married

W : Widowed

S : Separated or Divorced

42. For a person who has never been married at any time before, write 'NM'. For a person currently married. whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been, divorced either by a decree of a law court or by an accepted social or religious-custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her.

Question 6 : For currently married women only.

43. This question has to be answered in respect of all currently married women only i.e. all women whose marital status is shown as 'M' against Q. 5. For all others a cross may be put through the two sub-parts of this question.

6(a) Age at marriage

44. *Age at marriage*: You should ascertain the age at which the currently married woman whom you are enumerating was married and record that age in completed years. If the currently married woman had been married more than once, the age at which she got married for the first time should be recorded.

6(b) Any child born in the last one year.

45. *Any child born in the last one year*: You should ascertain if the currently married woman whom you are enumerating gave birth to a child in the last one year prior to the date of enumeration. Since it may be difficult for a person to reckon the exact year with reference to the English calendar dates, the period of one year may be ascertained with reference to a well known festival day which falls close to Feb.-March, as determined by the Census Superintendent of the State. You should ask if a child was born on or after this festival day i.e. the Holi festival which fell on 23rd March, 1970 last year to the date of enumeration. Only if the child was born alive, even if the child had died soon after birth, should the answer be 'Yes', to this question *Still birth*, i.e. *a child which is born dead should not be taken into account for this purpose.* So while you should make sure that every case of birth of child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

46. It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about them. It is necessary to record all live births being missed unless specifically questioned about even if the child had died soon thereafter or had not survived to the day of enumeration. Therefore where the initial answer to this question is 'no', you should ask a specific question if there has been a case of child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not

to offend the sensibility of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows:—

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right?"

This may bring in the required response. If she reports 'no' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. Similarly, probe to eliminate still births may be necessary. For example, when the answer is 'yes' under question 6(b) the enumerator might ask if the child is here in this house. If the answer is 'yes', no further question is needed. If 'no', the enumerator might ask where he has gone. The answer may be 'dead' or he has gone elsewhere. If 'dead' then the enumerator might ask when did the child die and this will bring out the fact whether or not it was a still birth.

47. Write 'Yes', if the currently married woman had given birth to a live child from the prescribed festival day last year to the date of enumeration or 'no' if she had not. In case of twin or multiple births, write 2, 3, etc., as the case may be within round brackets after the entry 'Yes'.

Note:—You may find on your revisional round from 1st to 3rd April, 1971 that a child is born to a married woman in a household after your last visit but before the sunrise of 1st April, 1971. You will have to take this into account and correct the answer against the Q. 6 (b) accordingly. You must enquire specifically if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

Q. 12 : Literacy (L or O)

67. *Definition of a literate*: A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but can not write is not a literate.

68. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

69. For a person who is literate i.e., who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instructions and similarly for writing he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

70. For a person who is illiterate i.e. who can neither read nor write or can merely read but cannot write, in any language, write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Question 13 : Educational level.

71. This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illteracy. In such a case you should put 'X'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to question 12.

72. For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example a person studying in 1st year, B.A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. Similarly a person studying, say, in the 4th year of 'MBBS' should not be noted as 'MBBS' but as 3rd year 'MBBS' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary or other definite levels, you may record the actual standard passed such as say IIIrd standard, VIIIth standard, Ist year B. Com. etc.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as say B.Sc. (Zoology) and MBBS or B.A. (Maths) and B.E. (Bachelor in Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is

76—L/J(N)16DCO(Pb.)—2

higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as B.Sc. (Maths.) M.A. (Economics), M.Sc. (Botany), B.Sc. (Agriculture) etc. should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

73. Whenever you come across graduates or post-graduates as also those with a technical diploma or degree, you will have to issue him a "Degree-holder and Technical Personnel Card" and ask the person concerned to fill it. You should note the location code on the card while issuing it. Put a tick (√) after noting the educational level against question 13 immediately after you issue card. When you collect it after some time but before you complete the enumeration of your area, cross the tick and put a circle as (+).

You will have to ensure that the card issued to all the graduates and the technical degree or diploma holders are collected back. The non-crossed tick. If any against question 13 will show that the card has not been collected.

Question 14: *Mother-tongue*

74. *Definition*: Mother-tongue is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

75. Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect to another major language and so on. You should not try to establish any relationship between religion and mother-tongue. *You are bound to record the language as returned by the person as his mother-tongue and you should not enter into any argument with him and try to record anything other than what is returned.* If you have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census Officers for verification. You are not authorised to make any correction on your own.

Question 15: *Other languages*

76. After recording the mother-tongue in question 14 enquire whether the person knows any other language(s) Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue put 'X' against this question.

77. The number of languages recorded under this question need not to be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding.

ANNEXURE IV

RELEVANT SOCIAL AND CULTURAL QUESTIONS ASKED FROM 1901 TO 1971

1901	1911	1921	1931	1941	1951	1961	1971
1	2	3	4	5	6	7	8
Question on Age : 1901—1971							
(7) Age Last birthday	**(7) Age completed last birthday**	(7) Age	(7) Age (in years to nearest birthday)	(6) Age	(4) Age	(2) Age last birthday	(4) Age
Questions on Literacy and Education : 1901—1971							
(14) Literate or Illiterate **(15) Knows or does not know English.**	**(14) Literate or Illiterate.** **(15) Whether literate in English.**	(16) Whether Literate (i.e. able to write and read a letter) or Illiterate. (17) Knows or does not know English.	(1) Literate or Illiterate. (2) Knows or does not know English.	(20) Can you both read and write ? If so what script do you write; Can you only read? (21) How far have you read? Give any Examination passed. (22) Are you Literate in English ?	(12) Literacy and Education.	(6) Literacy and Education	(12) Literacy (L or O) (13) Educational level
Questions on Marital Status : 1901—1971							
(6) Married, Unmarried or Widowed.	**(6) Married, Unmarried or Widowed.**	(6) Married, Unmarried or Widowed.	(6) Married, Unmarried or Widowed (Enter divorced persons as widowed).	(5) Married, Unmarried, Widowed or divorced.	(3) Civil condition	(3) Marital Status	(5) Marital Status.
Questions on Language : 1901—1971							
(9) Language Ordinarily spoken in the household	(13) Language ordinarily spoken in the household.	(13) Language ordinarily used.	(14) Mother Tongue. (15) Other Language in common use.	(18) Mother Tongue (19) Other Indian Languages in common use.	(7) Mother Tongue. (8) Bilingualism.	(7) (*a*) Mother Tongue. (7) (*b*) Any other Language (s).	(14) Mother Tongue (15) Other Languages
Questions on current Fertility : 1901—1971							
..	..	..	..	..	..	..	(6) For currently married women only. (*a*) Age at marriage. (*b*) Any child born in the last one year.

NOTE :—The question on current fertility was introduced at the 1971 Census only.

TABLE C—I

PART A—MEMBERS OF HOUSEHOLD BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY AGE GROUPS

PART B (i)—HOUSEHOLDS WHERE THE HEAD IS A MALE BY RELATIONSHIP OF MEMBERS WITH THE HEAD

PART B (ii)—HOUSEHOLD WHERE THE HEAD IS A FEMALE BY RELATIONSHIP OF MEMBERS WITH THE HEAD

FLY LEAF

Table C-1 is based on Population Record a separate Census schedule at the 1971 Census and has been compiled on a two-phase sampling technique. In the first phase, 20 per cent of the blocks were selected and from such selected blocks a sample of 20 per cent households was drawn in the second phase by random sampling. Part A of this table has been prepared for Total/ Rural/Urban population at the district level. It gives the composition of the households by relationship to the head of the households, classified by three broad age-groups viz., less than 30, 30—49 and 50+. Age not stated is included in "all Ages". Related and unrelated members of the households and the Single member households have been shown separately. Relationship to the head of household is given for sons, brothers, father, mother and other male or female members separately for married persons. Relationship of members with marital status, other than married, with head of household has also been shown for son, brother, daughter, sister, father, mother and other male and female members, separately in this table.

This table is of great sociological interest indicating the extent of the joint family system prevailing in the family composition and trends towards recognising the head of household with changes in the marital status of the composing members. The age distribution of heads of the households and their relations classified by marital status will further help study the future trend of joint family system. At the last Census, its corresponding Table C-1 was prepared on 20 per cent sample basis for rural, urban and total population separately. The relationship to the head was shown as "married sons" and "other married relations" and were not classified by broad age groups.

Part C-I Part B (i) and (ii): This table taken together corresponds largely to Table C-I of 1961. It gives composition of households in two parts where head is male/female by relationship of members with the head of the household at the district level. These data should be of great research value for social scientists as these reveal compositions of households having married relations also.

C—I PART A MEMBERS OF HOUSEHOLDS BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY AGE GROUPS

State/District	Age Group of the Head of Household	Heads of Households		Total No. of Households	Total Household Population		No. of Members by Relationship to Head							
							Spouses of Heads of Household		Married Relations of Heads of Households					
													Other	Other
		Males	Females		Males	Females	Males	Females	Son	Brother	Father	Mother	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
PUNJAB STATE								TOTAL

TABLE C—II

AGE AND MARITAL STATUS

FLY-LEAF

This table corresponds to table C-II of the 1961 Census and C-III of 1951 Census. In 1951, this table was prepared on a 10 per cent sample of individual slips, in 1961 on full count and in 1971 on 10 per cent sample for rural areas and 20 per cent sample for urban areas. In 1961 as well as in 1971 Censuses the quinquennial age groups have been adopted in keeping with the recommendation of the United Nations for population count.

The data have been presented for the State and each District, and for total, rural and urban areas separately. The population under each age group has been cross-classified into (i) Never married, (ii) Married, (iii) Widowed and (iv) Divorced or Separated marital status categories. Those, who did not return their marital status, have been lumped together under 'Unspecified Status'.

This table is of great demographic importance as it gives proportions of population falling in various marital status categories and changing trends in the age at marriage. The data also give an indication of mortality trends among married persons in different age groups.

TABLE C—III

AGE, SEX AND EDUCATION

PART A—AGE, SEX AND EDUCATION IN ALL AREAS

PART B—AGE, SEX AND EDUCATION IN URBAN AREAS ONLY

FLY LEAF

This table corresponds to table C—III part A and B of the 1961 Census with slight difference in educational standards and age grouping cross tabulated into literates and illiterates. In the 1961 Census, this table was prepared on full count but in the 1971 Census on 10 per cent sample of rural slips and 20 per cent sample of urban slips.

This table has been prepared separately for total and urban population as part A and part B respectively. It measures the growth of literacy in the total population as well as in the different age-groups since the last Census.

The test for literacy adopted at the 1971 Census was "the ability to read and write with understanding in any language. A person who fulfilled this test was taken as 'Literate'. In case he had attained any educational standard, the highest examination passed was recorded. In part A the educational qualifications thus recorded have been classified into six educational levels for the total population cross tabulated by age groups 0—4, 5—9, 10—14, 15—19, 20—24, 25—34 and 35+. These six educational levels are:

1 Primary

2 Middle

3 Matriculation or Higher Secondary

4 Non-technical diploma or certificate not equal to degree

5 Technical diploma or certificate not equal to degree

6 Graduates and above

Part B of this table also contains figures of post graduate degree holders, technical degree holders and technical personnel, further divided into five sub-groups—engineering and technology, medicine, agriculture, veterinary and dairying, teaching and others.

76L/J(F)16DCOPb.

TABLE C—IV

SINGLE YEAR AGE RETURNS

FLY LEAF

This table has been prepared separately for total, rural and urban population at the state level and classified the entire population according to single year age returns. At the 1961 Census, the corresponding table was prepared at the divisional and district level in addition to the state level. It was on 10% sample basis in 1951 Census. It is a very important table used by the Census actuary for preparation of life table and population projections.

An appendix to this table has also been prepared, showing five-year age-groups viz, 0-4, 5-9, 10-14 etc. for the state and each district for total, rural and urban areas.

TABLE C—V MOTHER TONGUE

PART A—DISTRIBUTION OF LANGUAGES (INCLUSIVE OF MOTHER-TONGUES GROUPED UNDER EACH) SPECIFIED IN SCHEDULE VIII TO THE CONSTITUTION OF INDIA.

PART B—SPEAKERS OF LANGUAGES/MOTHER-TONGUES (INCLUSIVE OF MOTHER-TONGUES WHERE GROUPED) OTHER THAN THOSE SPECIFIED IN SCHEDULE VIII TO THE CONSTITUTION OF INDIA

FLY LEAF

These tables correspond to the all-India Language tables of the Census of India 1951 published in Census of India Paper I of 1954 and the language table C-V of Census of India 1961 published in Volume I Part II-C(ii)—Language tables and Volume XIII—Punjab Part II-C(i) Social and Cultural tables.

The question on mother-tongue at the 1971 Census and instructions to enumerators were as follows:

Question 14: Mother-tongue

Definition.—Mother-tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

Instructions

Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect of another major language and so on. You should not try to establish any relationship between religion and mother-tongue. You are bound to record the language as returned by the person as his mother-tongue and you should not enter into any argument with him and try to record anything other than what is returned. If you have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census officers for verification. You are not authorised to make any correction on your own.

Table C-V Part A is in two sections : (i) showing the distribution of speakers of languages (inclusive of mother-tongues grouped under each) specified in schedule VIII to the constitution of India for the state and its eleven districts separately for total, rural and urban areas cross-classified by sex and (ii) showing the distribution of speakers of these languages for eleven districts, forty-two tahsils and one hundred and eight towns in the state for total areas only cross-classified by sex. The language data for the rural areas of the tahsil are not presented but these can be derived by subtracting the figures in respect of towns within the tahsil from the total tahsil figures.

Table C-V part B presents speakers of languages mother--tongues (inclusive of mother-tongues where grouped) other than those shown under part A for the state, districts, tahsils and towns. This table is also being presented in two sections: (i) showing the speakers of these languages/mother-tongues for the state and its districts for total, rural and urban areas cross-classified by sex and (ii) showing the distribution of these languages/mother-tongues for total areas of districts, tahsils and towns cross-classified by sex.

In both parts A and B, mother-tongues have been grouped in some cases under the relevant language(s). This has been done on the basis of information readily available or in the light of studies already made. Those 'identifiable' mother-tongues which returned 10,000 or more speakers each at the all-India level have been grouped in parts A and B as shown below.

Part A

Hindi—Awadhi; Bhojpuri; Braj Bhasha; Garhwali; Hindustani; Kangri; Kumauni; Maithili; Malvi; Marwari; Mewati; *Pahari; Rajasthani

Marathi—Kamari

Punjabi—Bagri

Part B

Bhili/Bhilodi—Kokna/Kokni/Kukna

Lahnda—Multani

All other mother tongues falling under part B and which returned less than 10,000 speakers each at the all-India level or were not 'identifiable' on the basis of information available as of date are included in the category 'Others' occurring as the last entry in part A.

*PAHARI is a combination of various speeches spoken over long stretches of areas where the speakers preferred to give a general name as Pahari. Similar is the c so with Kuki appearing in table C—V part B and marked by asterisk therein.

C—VI BILINGUALISM

FLY LEAF

This table coresponds to table D-I Part II of the 1951 and C-VI of the 1961 Censuses.

The question on bilingualism at the 1971 Census was:

Question 15: Other languages.

"After recording the mother-tongue in question 14, enquire whether the person knows any other language (s) Indian or foreign, and record language(s) returned by him against the question. In case he does not know any language apart from his mother tongue, put 'X' against this question.

The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding.

In this table, data on bilingualism are presented only for selected languages/mother-tongues (L/MTs). The selection of these L/MTs has been done on the basis of all-India table C-VI-bilingualism of 1961 and a list of L/MTs was devised for all India. This list formed the basis for preparing the table on bilingualism as estimated from the processing of 10 per cent rural and 20 per cent urban sample slips. The rural table was processed manually and the urban table on the computer. The estimated tables for rural and urban areas as pooled are presented here.

Columns 2, 3 and 4 of the table give the total number of speakers of L/MTs inclusive of MTs grouped under it. Columns 5, 6 and 7 give figures of such of the speakers who returned a second language, that is to say, any other L/MTs not accounted for in columns 2, 3 and 4. Column 8 contains in 'run on' fashion the names of subsidiary L/MTs inclusive of L/MTs wherever grouped by number of male and female speakers within brackets.

C—VI BILINGUALISM

TABLE F—I

PART A—DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, PRESENT AGE AND AGE AT MARRIAGE (RURAL).

PART B—DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, PRESENT AGE AND AGE AT MARRIAGE (URBAN).

FLY LEAF

Fertility tables compiled under F-series have been prepared for the first time at the 1971 Census by adding a new question on the subject in the individual slip asked of each currently married women. This table has been prepared in two parts, part A relating to rural and part B to the urban areas of the state. This table has been prepared on 10 per cent rural and 20 per cent urban sample. It shows distribution of currently married women and the related births during the last one year by religion, present age and age at marriage of the mother. These data reflect levels of marital fertility and differentials in age specific marital fertility rates of the currently married women by age at marriage and religion.

An appendix to his table has also been prepared giving similar data for scheduled caste population in the state which should be of great help to the state govt., to formulate future socio demographic policy for the depressed classes on the basis of their fertility trends.

TABLE F—II

PART—A DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, PRESENT AGE AND AGE AT MARRIAGE (RURAL)

PART—B DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, PRESENT AGE AND AGE AT MARRIAGE (URBAN)

FLY LEAF

This table is in two parts, part A relating to the rural and part B relating to the urban areas. This table is also prepared on 10 per cent rural and 20 per cent urban sample. The distribution of women and births by education, present age and age at marriage is provided in this table. These data will help in deriving differentials by education in median age at marriage and in age specific fertility rate, total fertility rate and general fertilty rate of various ages at marriage groups.

TABLE F—III

PART—A DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (RURAL)

PART—B DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (URBAN)

FLY LEAF

This table is in two parts, part A relating to the rural and part B relating to the urban areas. This table is also based on 10 per cent rural and 20 per cent urban sample. The distribution of women and births by religion· duration of marriage and age at marriage of mother is provided in this table. These data will help in deriving differentials by religion in duration specific fertility rates for various age at marriage groups. An appendix is also provided for the table presenting similar data separately for scheduled castes/scheduled tribes only.

TABLE F-IV

PART A—DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (RURAL)

PART B—DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (URBAN)

FLY LEAF

This table is in two parts, part A relating to the rural and part B relating to the urban areas. This table is also based on 10 per cent rural and 20 per cent urban sample. The distribution of women and births by education, duration of marriage and age at marriage is provided in this table. These data will help in deriving differentials by education in duration specific fertility rates for various age at marriage groups.

TABLE F—V

PART—A DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, EDUCATION GROUPS. PRESENT, AGE AND AGE AT MARRIAGE (RURAL)

PART—B DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, EDUCATION GROUPS. PRESENT, AGE AND AGE AT MARRIAGE (URBAN)

FLY LEAF

This table provides the distribution of women and births by religion-cum-education, present age and age at marriage, part A relates to rural and part B to urban areas. They are based on 10 per cent and 20 per cent respectively. These data will help in deriving differentials by religion-cum-education in median age at marriage and in age specific fertility rate, total fertility rate and general fertility rate for various age at marriage groups.
