Sitaburdi Fort

Sitaburdi Fort is undoubtedly the most distinguished object of interest in the city of Nagpur. The fort stands on the twin hills of Sitaburdi. On 25th January 1822; Colonel Adams converted these hills into a fort.

The name Sitaburdi may have originated from the four letters of the names of ruling two brothers, Sitalaprasad and Badriprasad.

For participating in 1857 freedom movements, some freedom fighters were hanged in this fort. Grandson of Tipu Sultan was one of them. Now their memorials stand here. For some period, Gandhiji was also imprisoned in this fort.

At present, the Head Quarters of 118, Infantry Battalion are located in this fort. Tri-colour, our National flag, flies over the main building, taking the panoramic view of whole city.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre),

drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organisation that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognised as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centres etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls' schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided.. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorates were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of the District

Nagpur is situated in 18th century by the Gond king Bakhta Buland. The region around Nagpur was flourishing in the early centuries of the Christian era, but the name of Nagpur was noticed for the first time in records of the tenth century A.D. A copper plate inscription of the Rashtrakuta king Krishna III dated in the shaka year 862, discovered at Devali in Wardha district, records the grant of a villagee situated in the Visaya (district) of Nagpur – Nandivardhana. Nandivardhana which was well known as an ancient capital of the Vakatakas, is now represented by the village Nandirdhana, about three miles from Ramtek. Nagpur, which was situated near it, may have marked the original site of the modern town of that name. Thus tradition, however, gives the credit for settling the town of Nagpur to the Gond king Bakhta Buland of Devagad.

The royal family of Bhoja was ruling over Vidarbha in ancient times. After the ancient period, Nagpur was at one time under the Yadavas of Devagiri. Nagpur under the Yadavas does not seem to have attained any political importance; like the western wing of the Yadava kingdom. By 1292 A.D. the Yadava power was at the height of its glory. It however, began to decline fast when Devagiri was invaded by Alla-uddin Khilji in 1294. Ramchandra Yadava was taken by surprise and completely defeated. The last ruler of the Yadavas Harapailadeva, was defeated and killed in 1318 A.D. by qutb-ud-din Mubarak Shah. By this defeat Maharashtra passed into the hands of the Muslim rulers and Devagiri became a centre of Islamic culture.

The Gond rulers of Devagad are directly related with the history of Nagpur. After Gond Rajas, Nagpur district was ruled by Bakhta Buland who was a capable ruler. He extended his kingdom reaching up to the borders of bearer from North and East. He founded the city of Nagpur by joining the twelve small hamlets formerly known as Rajapur Barsa or Barasta. Bakht Buland died in 1706 A.D. Nagpur attained importance under the sultan, the son and successor of Bakht. After Bakht Buland, had promised to continue the Raj of the Bhosles in perpetuity. But this term was very conveniently set aside and the Court of Directors in England concurring with the view of Lord Dalhousie, the Governer General, ordered that it had been determined on grounds, both of right and policy to incorporate the state of Nagpur with the British territories and Mr. Mansel was ordered to take charge of Nagpur as the first commissioner.

After freedom, and reorganisation of States in 1956. Nagapur along with the other districts of Vidarbha region became a part of the bilingual state of Bombay. In 1960 the State of Maharashtra came into existence of which Nagpur district forms a part. At the time of 1961 census the district was divided in five tahsils. At that time there were 1,653 inhabited villages and 12 towns. In 1981, Nagpur district had 1,658 inhabited villages and 16 towns.

In 1991 Census Nagpur district had 14 tahsils and 1878 villages and 23 towns. In 2001 Census, the number of tahsils remained same with 1869 villages and 29 towns. In 2001 Census 2 new villages are created, 7 villages received the status of census Town. We can see the jurisdictional changes occurred during 1991-2001 in the statement given below.

(iii) Administrative Set-Up

There were major changes took place in the administrative set up of Maharashtra immediately after 1981 census resulting into increase of two divisions and four districts. Again after 1991 Census, five more districts were created. For 2001 census the state has 6 divisions. The Konkan division includes 6 districts, Nashik division includes 5 districts, Pune division includes 5 districts, Aurangabad division includes 8 districts, Amravati division includes 5 districts and Nagpur division includes 6 districts. Thus in 2001 Census, the Maharashtra State has 35 districts spread over 6 divisions. Nagpur district is included in Nagpur division. After 1991 Census 7 villages received the status of Census Town. One census town declassified. Thus Nagpur district now has 29 towns and 1869 villages spread over Narkhed (153), Katol (186), Kalmeshwar (106), Savner (132), Parseoni (114), Ramtak (153), Mouda (124), Kamptee (75), Nagpur (R) (158), Hingna (153), Umred (192), Kuhi (186) and Bhiwapur (137).

For administrative purposes the district is divided into 5 sub-divisions and 14 tahsils. Nagpur subdivision includes Nagpur, Nagpur (R), Kamptee and Hingna tahsils, Katol sub-division includes Katol and Narkhed tahsils, Savner sub-division includes Savner and Kalameshwar tahsils, Ramtek sub-division includes Ramtek, Parseoni and Mouda tahsils, Umred sub-division includes Umred, Bhiwapur and Kuhi tahsils. The district collector alongwith the district Judge, Superintendent of Police, Chief Executive Officer of Zilla Parishad and other senior officers of the State Government look after their respective departments for development and regulatory functions. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other Officers look after their respective departments for development and regulatory functions. The Municipal Commissioner is an overall authority responsible for all civic affairs including health, sanitation and water supply. He is duly assisted in his day-to-day functioning by Dy. Municipal Commissioner assigned to various zones in the city.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for

approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect of councillor from each of the wards and his term is 5 years. The President of Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst the elected councilors. The chairman of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a Municipal Council, he works under the administrative control of the President of Municipal Council. In Corporations a senior I.A.S. Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Nagpur district lies at the southern base of the Satpuda hills in the north-east Maharashtra. It is situated between 20° 35' and 21° 46' north latitudes and 78° 15' and 79° 40' east longitudes. It is surrounded by Madhya Pradesh State in the north, Bhandara district in the east, Chandrapur district in the south, Wardha district in the south-west and west and Amravati district in the north-west.

The district has an area of 9,892 sq.kms. and a population of 4,067,637 persons as per Census 2001. While the area of the district accounts for 3.2 percent of the total area of the State, the districts population constitutes 4.2 percent of the total population of the State. The density of population is 411 persons per sq. km. Among the 35 districts of the State, the district ranks 14th in terms of area, 5th in terms of population and 6th in terms of density.

District headquarters is located at Nagpur town, which is a large city with population of 2,052,066 persons as per 2001 Census. Nagpur city is an important administrative, commercial and industrial center in the state and is well connected by rail, roads and air from the other parts of country.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands are divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Nagpur distric is a part of Wardha- Penganga-Wainganga plain which is micro level division of Deccan Plateau. Most of the district is an undulating plateau which has been incised by many rivers / streams. On the basis of local variation in relief and other characteristics the district can be grouped into three types of physical features ie. (i) The hills of Satpura, (ii) The uplands of Kanhan and Umred and (iii) The Plains of Nagpur and Katol.

Occupying the parts of Ramtek, Parseoni and Savner tahsils. Satpuda hills run east-west in extreme north-east along the state boundary within the district. This range forms and almost continuous barrior and is pierced only in two places where the Kanhan and Pench rivers have broken through. It has an attitude varying between 450–550 metres above from sea lavel. These hills have a fairly dence cover of forest. Manganese ores are found in these hills.

Kanhan uplands occupies part of Narkhed, Katol, Savner and Hingna tahsils. It is narrow in north and has long base in south. The upland slopes towards west in western part while in eastern part it slopes towards south-east. The height of this upland varies between 400-500 metres above the mean sea level. It is dissected by several small streams which have resulted in uneven surface. Soils are shallow mixed with sand. Pulses and groundnuts are grown in these soils.

Umred uplands includes parts of Kuhi, Bhiwapur and Umred tahsils in the southern parts of district. General height of these uplands is above 350 metres

and it slopes towards east and north-east. The upper slopes of upland are covered with forests. Soils are poor, shallow mixed with red gravel covered with boulders. Jowar, Pulses and Sesame are grown here. In the leveled soils cotton is also grown.

Nagpur plain spreads over the Kamptee, Nagpur, Mouda and parts of Kalmeshwar, Savner, Parseoni, Ramtek, Hingna, Nagpur (Rural) and Kuhi tahsils. In fact, this plain is formed by Kanhan river and its tributaries which flows in south-easterly direction through the middle of the plain and merged in Wainganga river. This wide and open plain gradually slopes towards south-east, and it is situated at the height around 300 metres above the mean sea level. However, the upper reaches in the extreme north attains height above 400 metres. A thick layer of black soils, clayey in texture, fine grained and retentive of moisture is found in this plain; which is known as black cotton soil. The main crops grown are cotton, groundnut, jowar, wheat and paddy.

Katol plains include parts of Katol and Narkhed tahsils and falls under Wardha drainage system drained by Jam river, a tributary of Wardha river. The plain has an elevation varying between 200 to 300 metres. and in general, slopes towards west. The surface is smooth in nature having very rich and fertile soils suitable for harticulture. Cotton, Jowar, Groundnut and Wheat are grown in this soil.

Drainage

The district is drained by two drainage systems. More than half of northern portion, central and eastern portion of the district is drained by the Wainganga river and its tributaries. The north-western, central and sourth-western part of the district is drained by the Wardha river and its tributaries the Jam, Kar and Wunna river.

The Wainganga river rises in the Chhindwara and Seoni plateau of Madhya Pradesh. The Wainganga itself drains only a small part in the extreme east of the district. It forms a small part of the district boundary with Bhandara district. The Kanhan is the chief tributary of the Wainganga within the district. It rises in the Satpuda range in Madhya Pradesh and enters the district near Baregaon. It flows in a general south-easterly direction and is joined by the Pench and the Kolar rivers near Kamptee. Other tributaries are Bawanthari, Sur and Amb river.

The Wardha River rises to the east of Multai in Madhya Pradesh. The river itself drains only a small portion in the extreme north-west of Nagpur district but its tributaries, the Jam and the Kar, drain a much larger portion. The Jam rises among the hills south of Kondhali. It initially flows northwards and then turns westwards a little beyond Katol and Joins the Wardha at Jalalkheda. The Kar also rises in the same range but flows directly north-west to meet the Wardha at Khargad. It forms a part of the district boundary between Nagpur and Wardha district. The other important tributary is Wunna, which rises within the district near the hill of Mahadagad in the pilkapar ranges. It flows in a general southward direction to join the Wardha river outside the district. The Bor and the Nanad are important tributaries of the Wunna and both join it outside the district.

Climate

The climate of the district is characterised by a hot summer, well distributed rainfall and general dryness except during the rainy season.The year may be divided into four seasons. The cold season is from December to February and is followed by the hot season from March to May. June to September is the south-west monsoon season, and October and Novembeer constitute the post-monsoon or retreating monsoon season.

The rainfall in the district is well distributed and the variation in the annual rainfall from year to year is not large. The average annual rainfall is 1161.54 mm. About 90 per cent of the total rainfall is received during the south-west monsoon season and the maximum rainfall received during the month of July.

During the south-west monsoon season the air is humid and the skies are heavily clouded to overcast while during the rest of the year the air is generally dry and the skies are clear. During the monsoon months, in association with depressions from the Bay of Bengal that move westward, the district experiences widespread heavy rain and strong winds.

Duststorms sometimes occur in the summer season. From March to May is a period rapidly increasing temperature. May is the hottest month of the year with the mean daily maximum temperature at 42.7^{0}C. The heat during the day is severe but the nights are comparatively cooler. Sometimes afternoon heat is relieved by thundershower. There is an appreciable drop in temperature by the second week of June with the onset of the south-west monsoon. With the withdrawal of south-west monsoon day temperatures increase slightly while night temparature progressively decrease. From about the end of Noveember both day and night temparature fall rapidly and December is usually the coldest month of the year, with the mean minimum temparature at 14^{0}C. The cold waves over northern India sometimes affects the district and temperature may drop to about 4^{0}C.

Natural Wealth

Minerals

The geological formations in the descending order of their antiquity are as follows :

Name of formation	Age
Soil	Recent
Deccan basalt flows (traps) with associated Intertrappean sediments	Lower Eocene to upper cretaceous
Lamenta beds	Permian
Gondwana Group	Kamthi stage Permian Baraka stage
Talchir Stage	Carboniferous
Streaky granitegneisses Sausar and Sakoli series of metasediments	Archaeans

The archaeans of Nagpur district are comprised of two distinct lighological units; the older unit comprises gneisses and schists resulting from repeated metamorphism of ancient sediments and a younger group of gneisses representing perhaps a granitic intrusion into above metasediments. As both these rock units have suffered intense deformation and metamorphism it is difficult to distinguish them from each other and hence are generally grouped together as unclassified metamorphic and crystalline series.

Rocks referable to the Talchir, Barakar and Kamthi stages of the Gondwans system of fluviatile and lacestrine origin were deposited in troughs, generally produced by faults. There is a marked unconformity between the Barakars and Kamthis. During the time interval indicated by this unconformity Barakars were partly or completely eroded away in some areas and the Kamthis rest directly over the Talchirs.

Lametas are fresh water deposits which rest horizontally over the older Gondwanas and Archaean rocks with an unconformity. Lametas which rarely attain a thickness upto 8 metres grade from calcareous sandstones to sandy limestones with intercalations of chert and clay.

The western part of the district is covered by layers of dolerite and basaltic lavas commonly known as ‘traps’ because of steplike appearance of their outcrops. These traps are of fissure-eruption type, i.e. they welled up through long narrow fissures in the earths crust and flowed out as horizontal layers one over the other. Layers of fresh water sedimentary rocks are interbedded with the Deccan basalt flows. They ranges in thickness from a few centimetres upto two metres and are composed of cherts, impure limestone and pyroclastic material including trap detritus.

In the Archaean area the rocks are hidden beneath a considerable thickness of alluvial soil deposited by the Kanhan and Wainganga river systems. In the trappean area the soil is usually the black cotton soil known as regur with Kankar, which is also found in the soils on the Archaean areas.

Unlike most of Maharashtra, Nagpur district has a fair amount of economically important minerals. Manganese was first extracted in the district in 1900 and some of the most famous mines are located in the district. Much of the workable ore bodies occur as lenticular messes and bands intercalated in quartzites, schists and gneisses, and appear to have been formed, at least in part, by chemical alteration. Much of the ore produced in the district is exported

while a part is used in the indigenous Ferro-manganese industry. Manganese deposits are worked at Kodegaon, Gumgaon, Ramdongri, Kandri, Parsoda, Borda, Parseoni, Beldongri, Lohdongri, Kachurwahi, waregaon, Khandala, Manegaon and a number of other places. Coal seams to have been found in Barakar beds at various levels down to 100 metres from the surface. Coal fields are found near Kanhan railway station, Tekadi, Sonegaon in the Kamptee-Savner belt and in several other places.

The lamenta beds at Kelod and Chincholi contain workable limestones and several bands of crystalline limestones are found in the Archaean rocks near Koradi, Baregaon and in the north-east part of the district. Much of these limestones are, however, too impure to be used as a source of lime but have been used for making railwaybridges in the district. Kankar which occours extensively on the soil mantle is locally burnt for making lime used in mortar for construction purposes.

The alluvial tracts of the Kanhan and Wainganga systems yield excellent brick-making clay and the trap rocks being hard, dense and durable make excellent building stone. Pottery clay are worked near Shemda, Chorkhairi, Khairi and Bazargaon. Yellow ochre is associated with the Deccan lava flows at Kalameshwar and is locally used as a cheap distemper. Minor occurrences of tungsten, copper and local ores are also found.

Fisheries

Fishing is mainly carried out in the Wainganga, Wardha, Kanhan and Pench rivers and in lakes and tanks. There is 11424 hectare area under pisciculture in the Nagpur district. Besides this 650 km. river belt is also available. The chief fishing communities are Bhois, Kahars and Dhiwars. Fishing is mainly done by means of cast, drag and gill nets. The commercially important varieties of fish caught in the district include Alkut, Tanbra, Kanoshi, Bata, Dutondi, Wagar, Singee, Bodh, Aheer, Vam etc. Fast growing varieties at major corps like Rahu, Catla and Mrigal are imported from Calcutta every year and are stocked in tanks. They are cultured on a large scale and form a great portion of the major fishery. In the year 1998-99, 6280 metric tonne fish products were gained by which Rs.1318.54 lacks was received as income.

Soil And Cropping Pattern

The geology of the district is transitional with trap rocks predominating in the western portion. Due to the undulating topography of the district, erosion has also played an important part in the formation of soils. The soils of the district may broadly be divided into six classes; (1) Kali (2) Morand, (3) Khardi. (4) Bardi, (5) Kachchar and (6) Wardi.

Kali soil

Kali or black cotton soil is rich, fine grained and retentive of moisture. When dry the soil hardens into large clods and when wet can be easily broken by hand. The soil is deep black in colour, clayey in texture and varies in depth from about 1 metre to 6 metres or more. This soil is found around Narkhed and katol in the Wardha valley and in the Nagpur plains. The main crops grown in this soil are cotton, groundnut, jowar and wheat.

Morand soil

The predominant soils in the district are Morand soils which are also black cotton soils but have a higher percentage of lime than the Kali soils. These soils are black, grey or dark to light brown in colour, clayey in texture and have a depth of about 1 to 3 metres. Both kharif and rabbi crops are taken from these soils. The chief crops grown are cotton, jowar, groundnut, wheat, linseed and pulses.

Khardi soil

Khardi soils are shallow soils mixed with sand and are found mainly in the hills. These soils are gray in colour, clay loam in texture and blocky in structure. Pulses groundnut are the main crops grown in these soils.

Bardi soil

These soils are found on the summits and slopes of the trap hills. These soils are similar to khardi soils but less fertile. Jowar, sesame and pulses are taken from these soils. Where the soil is leveled cotton can also be grown.

Kachchaar soil

Kachchar soils mainly found on the banks of the Kanhan River. These are alluvial soils, loamy in texture and vary in depth from about 1 to 3 metres. During floods, the land receives a fresh layer of silt which meals for bumper crops for the next few years. Cotton, garden crops and similar crops are grown in these soils.

Wardi soil

These are red soils with a large amount of sand. It is shallow in depth and sandy clay loam in texture. These soils are mainly found in the paddy tract in the east of the district.

Land And Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19 – 23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

In Nagpur district most of the forest area is located in both sides of the Pench river, at the foot hills of Satpuda hill range in Ramtek Tahsil. Besides this Katol, Narkhed, Kuhi, Hingna and Bhiwapur tahsils are also having forested area. The major forest product are fine quality of teakwood, and firewood. Other produce is salai, Dhawda, Khair, Bamboo, Palas, Tendu etc.

Irrigation by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is connoted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing no. of Livestock (Position as on 15th Oct. 1997).

1)	Total Cross bred/Indigenous Cattle	639,162
2)	Total Buffaloes	98,452
3)	Total Goats	324,680
4)	Total Sheep	15,067
5)	Total Pigs	13,805
6)	Total Equine	1,376
7)	Total Camel	10
8)	Total Rabbits	333
9)	Total Livestock (excluding dogs)	1,092,885
10)	Total Poultry (including Ducks)	690,859

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,092,885 and total poultry (including ducks) are 690,859 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 639,162, total buffaloes are 98,452, goats 324,680, sheeps 15,067, pigs 13,805, equine 1,376, camels 10 and rabbits are 333.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	110
2)	Average Livestock per village	668
3)	No. of livestock per thousand human population	332
4)	No. of in-Milk cows per thousand human population	26
5)	No. of in-Milk buffaloes per thousand human population	9
6)	No. of poultry fowls per thousand human population	210
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	35
8)	No. of tractors per thousand hectares of gross cropped area	2
9)	No. of Veterinary Institute per lakh livestock	17

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 110 while average livestock per village is 668. For every thousand human population there are 332 livestock, 26 in-milk cows, 9 in-milk buffaloes and 210 poultry fowls. While there are 35 bullocks and male buffaloes per hundred hectares of gross cropped area and 2 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 17.

Industry

Industrially, Nagpur district is one of the advanced districts in Maharashtra. The industrial developments has taken place mostly at Nagpur city and some small towns. There are a number of large scale units such as cotton textiles, cotton ginning and pressing, saw mills, paper and straw-board, ceramics, ferro manganese and steel-re-rolling etc. The most of important small scale industries in the district are cotton textiles, art silk, manufacture of rice from paddy, handloom weaving, carpet weaving, cotton ginning, timber sawing, castings, repairing of motor vehicles etc. There are a number of cottage industries in the district. Nagpur handloom sarees are very famous and have a good market allover the state. The well-known silk-border cloth is exported from Nagpur to various part of the country. The district is rich in minerals.

Trade and Commerce

The chief manufactured articles are coal, medicine, tractor, belts (industrial), gas cylinders, handloom cloth and sarees, Gi colour sheets, bidi, groundnut, ginned cotton, orange juice, bricks, burnt bricks, iron and art furniture, earthern pots, woolen blankets, cotton bales, herbal products, plastic goods and bags, wooden boxes, toys, suitcases, plastic and cement pipes, dry fish, tiles, rice, bread, wheat, soyabeen, colgate products, plastic utensils, defence goods, food grains and A.H.valves etc.

The chief articles of export from the district are commodities like coal, tractor, belts (industrial), handloom cloth and sarees, oranges, colour sheets, bidi, vegetables, maize, paddy, wheat, rice, jowar, groundnut, foodgrains, wooden, iron and art furniture, bread, bricks and burnt bricks, flower plants, synthetic yarn, steel and steel products, cotton, soyabeen, plastic bags, suitcases, chilly, plastic utensils, defence goods, milk, food grains etc.

Transport

If a bus stop or a railway station or a navigable waterway is located within the territorial jurisdiction of a village or town, then it is considered to have been served by such a facility even if it is located little away from actual settlement. There is comparatively good system of transport and communication facility through bus service and railway service.

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
Item		No. of Vehicles
1	2	
1	Buses	2,531
2	Cars & Station Wagons	22,911
3	Jeep	9,645
4	Taxies	1,334
5	Autorickshaw	11,796
6	Moped	152,929
7	Scooters	159,570
8	Motor Cycles	71,453
9	Total Goods Vehicles	19,125
10	Tractors	3,855
11	Trailors	4,008
12	Others	708
	Total	**459,865**

(Source: Transport Commissioner office)

It may be seen that the district had 152,929 Mopeds, 159,570 Scooters and 71,453 Motor Cycles. There were 9,645 jeeps, 1,334 taxies, 11,796 autorickshaws, 2,531 buses and 22,911 Cars. Besides, 708 other modes of transport, the district also had 3,855 tractors and 4,008 trailors as means of transport.

Electricity & Power supply

Most of the villages are electrified in the district. 1,616 villages of the total 1,628 inhabited villages and all the towns enjoy power supply.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should

have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000.
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some

economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the

number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that laste for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal

Committee/ Municipal council, Municipality etc.

Size class of UA / Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. / Towns. These Class I UAs. / Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 are about economic activity of the person. Question 21 and 22 are about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc.

Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to census 2001 the district Nagpur has total population 4,067,637 comprising of 2,105,314 males and 1,962,323 females .The population of the district in census 2001 is 23.7 percent higher than the district population of 3,287,139 in 1991 census .Among 14 tahsils of the district , Nagpur (urban) tahsil (2,052,066) is the most populus and Bhiwapur tahsil (83164) the least.Other tahsils in order of their population are 1) Savner (223,165) 2) Kamptee (209,003) 3) Nagpur (Rural) (199,401) 4)Hingna (185,115) 5) Katol (155,668) 6) Ramtek (151,626) 7) Umred (146,843) 8) Narkhed (143,512) 9) Parseoni (141,731) 10) Mauda (135,627) 11) Kuhi (126,316) 12) Kalmeshwar (114,400).

An examination of rural – urban distribution of population reveals that 1453,886 persons constituting 35.7 percent of total population is concentrated in rural areas while 2,613,751 persons constituting 64.3 percent of total population are living in urban areas of the district .Although in absolute numbers, the numbers of people living in rural areas has increased from 1,256,225 in 1991 to 1,453,886 in 2001 , in terms of percentage the people residing in rural areas has decreased from 38.2 percent in 1991 to 35.7 percent in census 2001, while in urban areas it has correspondingly increased in terms of percentage from 61.8 percent in 1991 to 64.3 percent in census 2001. Among 14 tahsils, three tahsils (i.e, Mauda,Kuhi and Bhiwapur) have no urban area and Nagpur (urban) tahsil has no rural area.

The average growth rates for the rural and urban areas of the district are 15.7 percent and 28.7 percent respectively. Mauda, Kuhi and Bhiwapur tahsils do not have urban areas. The Nagpur (urban) tahsil has been entirely urban in 1991 census and in 2001 census. In rural area growth rate is above the district rural average in six tahsils viz; Savner, Ramtek, Mauda, Nagpur (Rural), Hingna and Kuhi and below the district rural average in seven tahsils viz; Narkhed, Katol, Kalameshwar, Parseoni, Kamptee, Umred and Bhiwapur.

There are 11 tahsils having urban area. Out of these the growth rate is above the district urban average in four tahsils viz. Katol, Parseoni, Nagpur (Rural) and Hingna. While in seven tahsils viz. Narkhed, Kalameshwar, Savner, Ramtek, Kamptee, Nagpur (Urban) and Umred are having below the district urban average. Within the district in rural areas growth rate is highest in Mauda tahsil 25.9 percent and lowest in Parseoni tahsil 4.9 percent .In urban areas growth rate is highest in Hingna tahsil 300.4 percent and lowest in sawner tahsils 9.9 percent.The proportion of urban population, is below the district average 64.3 percent in all the 11 tahsils in 2001 census. Within the district the proportion of urban population has increased from 61.8 percent in 1991 to 64.3 percent in 2001.

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 shows new towns, denotified, declassified and wholly merged with other towns in 2001 census. In 2001, seven towns viz., Kandri, Mansar, Yerkheda, Wana dongri, Nildoh, Davlameti and Sonegaon (Nipani) are declared as census towns, which were villages in 1991 census Koradi census town of 1991 is declassified as village in 2001 census. There are no denotified towns and no wholly merged with other towns.

Table 4 gives distribution of villages according to density ranges for convenient understanding of patterns, villagres have been grouped under eight different density ranges.

The distribution of villages by density ranges indicated that 0–10 density range villages form 4.0 percent of total 65 inhabited villages covering with 0.1 percent of total population, 11–20 density villages form 2.5 percent of total 40 inhabited villages covering with 0.2 percent of total population. Villages with 21–50 density range form 7.6 percent of total 123 inhabited villages covering with 1.5 percent of total population. Villages with 51–100 density range form 16.9 percent of total 275 inhabited villages covering with 7.0 percent of total population, Villages with 101–200 density range form 37.5 percent of total 611 inhabited villages covering with 29 .3 percent of total population, Villages with 201–300 density range form 16.1 percent of total 262 inhabited villages covering with 20.1 percent of total population, Villages with 301–500 density range form 9.6 percent of total 157 inhabited villages covering with 16.8 percent of population, Villages with density 501 and above form 5.8 percent of total 95 inhabited villages covering with 25.0 percent of total population.

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and the state 2001 census recorded a sex ratio of 932 females per 1000 males in the district. This is higher compared to the state average (922).The sex ratio in Nagpur district has remained higher than that of state from 1901–1951 and the trend was reversed from 1961–1991, while in 2001 it is higher than that of the state. As regards total areas, sex ratio at the state level declined by 56 points and at district level it declined by 59 points, during the last 100 years. Similarly the sex ratio for the rural areas of the state decreased by 43 points and for the district it decreased by 70 points during 1901–2001. For the urban areas of the state , the sex ratio increased by 11 points and for the district it decreased by 30 points during the above period (i.e.1901–2001).

Table 6 shows the sex ratio by tahsil. Sex ratio is defined as the number of females per thousand males. In Nagpur district the sex ratio is 932 females for one thousand males. Within the district, the sex ratio varies from 865 in Hingna tahsil to 972 in Kuhi tahsil. The sex ratio in nine tahsils viz. Narkhed, Katol, Parseoni, Ramtek, Mauda, Nagpur (Urban), Umred, Kuhi and Bhiwapur are above the district average (932) and remaining five tahsils viz Kalameshwar, Savner, Kamptee, Nagpur (Rural) and Hingna are below the district average. Generally rural area has a higher proportion of females than the urban areas, Nagpur district also confirms to this pattern. The sex ratio figures for rural and urban areas of the district are 935 and 931 respectively. Within the district, in rural areas the sex ratiois found highest in Kuhi tahsil (972) and lowest in Nagpur (Rural) tahsil; (890), while in urban areas the sex ratio is found highest in Ramtek tahsil (961) and lowest in Hingna tahsil (809). [In Nagpur district Nagpur (urban) tahsil has no rural area].

Table 9 shows the sex ratio of urban Agglomerations / Towns, 2001 .In Nagpur district as a whole, there are 931 females per one thousand males. Within the district the urban sex ratio varies from 994 in Mansar (C.T.) to 575 in Kamptee (C.B.). Out of 29 towns the sex ratio in 16 towns viz. Mowad, Narkhed, Katol, Mohpa, Savner, Khapa, Kanhan (Pipri), Totaladoh, Ramtek, Kandri, Mansar, Yerkheda,

Mahadula, Kamptee, Nagpur (M.Corp.) and Umred are above the district average and below the district average (931) in remaining 13 towns viz. Kalameshwar, Walani, Sillewada, Chicholi, Kandri, Tekadi, Kamptee (C.B), Davlameti, Sonegaon (Nipani), Wadi, Wanadongari, Nildoh and Digdoh. Within the district urban sex ratio is found highest in Mansar (C.T.) (994) and lowest in Kamptee (C.B.) (575), towns. The sex ratio is 915 in Kamptee U.A. below the district urban average and 932 in Nagpur U.A. above the district urban average (931).

Table 14 gives tahsilwise percentage of Scheduled Castes and Scheduled Tribes population to total population in rural and urban areas in the district .The percentage of Scheduled Castes and Scheduled Tribes constitute 17.1 percent and 10.9 percent of the total population respectively .The percentage of Scheduled Castes population is above the district average in seven tahsils viz. Savner, Parseoni, Kamptee, Nagpur (Rural), Umred, Kuhi and Bhiwapur and below the district average in seven tahsils viz. Narkhed, Katol, Kalmeshwar, Ramtek, Mauda, Nagpur (Urban) and Hingna. The highest proportion of Scheduled Castes population is found in Kamptee tahsil (22.1 percent) and the lowest in Ramtek tahsil (12.2 percent). The percentage of Scheduled Tribes population is above the district average in nine tahsils viz. Narkhed, Katol, Savner, Parseoni, Nagpur (Rural), Hingna, Ramtek, Umred and Bhiwapur and below the district average in five tahsils viz. Kalameshwar, Mauda, Kamptee, Nagpur (Urban) and Kuhi. The highest proportion of Scheduled Tribes population is found in Ramtek tahsil (32.9 percent) and lowest in Kuhi tahsil (4.1 percent) .In rural areas the percentage of Scheduled Castes and schreduled tribes constitutes 16.6 percent and 15.0 percent of the total rural population respectively. The percentage of Scheduled Castes population in rural areas is found highest in Kuhi tahsil (21.6 percent) and lowest in Ramtek tahsil (11.2 percent). The highest percentage of Scheduled Tribes population in rural areas is found in Ramtek tahsil (38.2 percent) and lowest in Kuhi tahsil (4.1 percent). In urban areas the proportion of Scheduled Castes and Scheduled Tribes constitute 17.4 percent and 8.7 percent of the total urban population respectively. The proportion of Scheduled Castes population in urban areas is found highest in Nagpur (Rural) tahsil (29.6 percent) and lowest in Kalmeshwar tahsil (9.7 percent). The proportion of Scheduled Tribes population in urban areas is found highest in Umred tahsil (17.2 percent) and lowest in Kamptee tahsil (2.9 percent). [One tahsil Nagpur (urban) has no rural population].

Table 18 shows number and percentage of Scheduled Castes and Scheduled Tribes population in Urban Agglomerations / Towns of the district .The proportion of Scheduled Castes population to total population is much higher than proportion of Scheduled Tribes population to total population in the district urban area. In all towns of the district, Davlameti (Census.Town) recorded highest percentage in Scheduled Castes population i.e., 47.4 percent and Mowad (MCl) recorded 6.0 percent the lowest. While for Scheduled Tribes population, highest percentage recorded in Kandri (Census.Town.) i.e, 42.9 percent

and Mohpa (MCl) recorded 1.8 percent the lowest in the district.

The proportion of Scheduled Castes population, Kamptee U.A. recorded 24.6 percent, which is above the district urban average and Nagpur U.A. recorded 16.9 percent which is below the district urban average (17.4 percent). While for Scheduled Tribes population Kamptee U.A. recorded 3.5 percent, which is below the district urban average and Nagpur U.A. recorded 8.7 percent as same as district urban average (8.7 percent).

Table 21 shows the number and percentage of literate and illiterate. Within the district as a whole, the literacy rate for males is much higher than females i.e., 90.2 percent and 77.4 percent respectively. Urban literacy rate in both sexes is much higher than rural literacy rate. Among the 14 tahsils Nagpur (urban) tahsil has highest percentage of literates and Bhiwapur tahsil is the lowest i.e., 89.3 percent and 70.1 percent respectively. In males and females literacy rate Kamptee tahsil and Nagpur (urban) tahsil are above the district average while remaining twelve tahsils are below the district average. Gap in male female literacy rate, in rural areas is always higher than in urban area in all tahsils and district also.

Table 31 shows number and percentage of main workers, marginal workers and non-workers by sex in tahsils. The total population is classified in three types of workers as main workers, marginal workers and non-workers. It can be seen from the table that 31.5 percent of the district population is recorded as main workers, 6.3 percent is recorded as marginal workers and remaining 62.2 percent is recorded as non-workers. Among the main workers, male participation rate in the district is 46.0 percent while that of female is 16.0 percent. In marginal workers male and female participation rate is quiet similar i.e., 5.8 percent and 6.8 percent respectively and remaining 48.1 percent of male population and 77.2 percent of female population are recorded as non-workers in the district. Proportion of main workers is higher in male population (46.0 percent) than in female population (16.0 percent), while in marginal workers percentage of female population (6.8 percent) shows higher than of male population (5.8 percent) it is observed, within the district Kuhi tahsil shows highest percentage of main workers i.e. 43.1 percent and Nagpur (Urban) tahsil shows lowest percentage of main workers i.e. 27.7 percent.

In marginal workers Kuhi tahsil shows highest percentage i.e. 14.0 percent and Nagpur (Urban) tahsil shows lowest percentage i.e. 2.9 percent while in non-workers Nagpur (Urban) shows highest percentage i.e. 69.4 percent and Kuhi tahsil shows lowest percentage i.e. 42.9 percent in the district. Only a single Nagpur (Urban) tahsil is having lower percentage (2.9 percent) of marginal workers than the district average of 6.3 percent.

Number and percentage of main workers, marginal workers and non-workers by sex in C.D. Blocks is shown in table 32. In the district as a whole 38.5 percent of population is recorded as main workers in rural areas, 11.5 percent recorded as marginal workers and remaining 50.0 percent recorded as non-workers. Among the main workers, percentage of male worker recorded 47.9 percent and female workers recorded 28.5 percent. While in marginal workers male, female percentages are 8.9 percent and 14.3 percent respectively. In non-workers male, female percentage is recorded as 43.2 percent and 57.2 percent respectively in the district. Proportion of male population is higher than female population in main workers (47.9 percent and 28.5 percent) respectively.

Within the 13 C.D.Blocks, Kuhi C.D. Block recorded highest percentage in main workers 43.1 percent and Parseoni C.D. Block recorded lowest percentage in main workers 34.0 percent. While in marginal workers Narkhed C.D. Block recorded highest percentage i.e, 14.9 percent and lowest in Savner C.D. Block 7.4 percent. Nagpur (Rural) C.D. Block recorded highest percentage in non-workers (56.0 percent) and Kuhi C.D. Block recorded lowest (42.9 percent) in the district rural.

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomerations/towns, 2001. In urban population of the district, 27.7 percent recorded as main workers, 3.4 percent recorded as marginal workers and 69.0 percent recorded as non-workers. Among the main workers there is vast difference in male, female share. Male recorded 45.0 percent while female recorded 9.0 percent in urban main worker. Male, female participation rate in marginal workers is quite similar i.e. 4.1 percent and 2.6 percent respectively. While 50.9 percent and 88.4 percent population is recorded as non-workers of male and female respectively. Out of 29 towns the proportion of main workers recorded highest in Kamptee (Cantonment Board) 39.6 percent and lowest in Kanhan (Pipri) (Census Town) 20.8 percent in the district. In marginal workers Mohpa (M.Cl.) recorded highest percentage i.e. 12.7 percent and Nildoh (Census Town) recorded the lowest 2.1 percent in the urban area of the district. Among the non-workers participation rate recorded highest in

Walani (Census Town) 75.4 percent and lowest in Kamptee (Cantonment Board) 51.8 percent in the district. Within the district Kamptee U.A. recorded 25.2 percent as main workers, 6.0 percent as marginal workers and 68.8 percent as non-workers, while for Nagpur U.A. 27.7 percent recorded as main workers, 2.9 percent as marginal workers and 69.4 percent as non-workers.

Note: Percentage of Workers to total workers are given in brackets.

Table 34 indicates the distribution of persons, male and female workers by four economically active categories in tahsils of the district. Within the district there are 37.8 percent workers in total population. Of them 14.6 percent are recorded as cultivators, 24.0 percent are recorded as agricultural labourers. Agricultural labourers and cultivators together constitute 38.6 percent of the total workers in the district. Percentage of household industry workers is very poor i.e. 2.5 percent and 58.9 percent workers accounts in other workers category. The proportion of both cultivators and agricultural labourers differs from tahsil to tahsil. Kuhi tahsil records highest percentage in cultivators and Bhiwapur tahsil records highest percentage in agricultural labourers i.e. 34.6 percent and 53.8 percent respectively. While in both categories lowest percentage is recorded in Nagpur (urban) tahsil i.e., 0.3 percent and 0.4 percent respectively in the district. In 'household industry workers' category

Kamptee tahsil records highest percentage 3.9 percent and Umred tahsil records lowest percentage 1.2 percent. In 'other workers' category Nagpur (Urban) tahsil records highest percentage i.e. 96.0 percent and Kuhi tahsil records lowest percentage i.e. 11.2 percent. In the district cultivators, agricultural labourers and household industry, female accounts higher percentage than male and 'other worker' category male accounts higher percentage than female.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by pucca road

Road whether pucca or kachha are the nervous system of a district. They act as factor for the development and upliftment of the areas. Road with cement concrete, Block top, water bound macadam etc.come under pucca road and the remaining are treated as kuchcha roads.

Pucca road amenity is available to 1,443 villages (88.6 percent) out of 1,628 inhabited village in the district. Among 13 C.D Blocks in the district, the proportion of villages with approach by pucca road is highest in Mauda C.D Blck 118 villages constitute 98.3 percent and lowest in Hingana C.D Block 88 villages constitute 71.5 percent (Table – 37). A rural population of 1,406,672 persons (96.8 percent) avails of the approach by pucca road amenity (Table – 38).

According to the distance range from statutory town, among 1,443 villages with the approach by pucca road amenity, 60 villages are at a distance of less than 5 Kms., 523 villages with 5 – 15 Kms., 776 villages within 16 – 50 Kms. and 84 villages are at a distance of 51 and above Kms. from the nearest statutory town. (Table – 40).

According to population range, 1,443 villages (88.6 percent) having pucca road amenity are divided into 1 to 10,000+ population ranges in the district. Of these 537 villages (76.9 percent) served by pucca road are in population range less than 500, for 512 villages (95.9 percent) with population range of 500 – 999, 268 villages (99.6 perent) with population range 1000–1999, 96 villages (99.0 percent) with population range of 2000–4999 and remaining 30 villages (100.0 percent villages) population ranging from 5000 and above. It may be seen that smaller the population size of the village lesser is the availability of amenity of pucca approach road. Larger the size of a village, greater are the chances of its having this amenity.

Power Supply

The power supply amenity is available in 1,616 villages, which constitute 99.3 percent of the total 1,628 inhabited villages of the district. Among 13 C.D Blocks of the district, seven C.D Blocks namely Narkhed, Katol, Kalameshwar, Savner, Mauda,Kuhi and Bhiwapur are having cent percent (100.0 percent) power supply amenity is available in its villages and remaining six C.D blocks are below the district average (99.3 percent) i.e, Parseoni C.D Block 96.4 percent, Ramtek C.D Block 98.6 percent, Kamptee C.D Block 98.6 percent,Nagpur (Rural) C.D Block 98.5 percent, Hingana C.D Block 99.2 percent and Umred C.D. Block 98.6 percent. (Table – 37).

The rural population of 1,451,615 persons (99.8 percent) avails of power supply amenity in the district (Table – 38).

According to the population range the power supply amenity is a available to 1,616 villages

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

Table 50 gives the classification of households having improved drinking water source, electricity, bathroom, toilets and drainage facility available in the district.

According to 2001 census, the amenity of improved drinking water is available for 648367 households constituting 82.0 percent of the total households. In rural and urban areas of the district, this amenity is available for 218,590 (74.3 percent) and 429,777 (86.6 percent) households respectively. The amenity of electricity is being enjoyed by 682,019 (86.3 percent) households. In rural and urban areas of the district, the amenity is available for 228,782 households (77.7 percent) and 453,237 households (91.3 percent) respectively. The amenity of bathroom is available for 543,670 households constituting 68.8 percent households. For rural and urban areas, this amenity is available for 132,291 households constituting 44.9 percent households and 411,379 households constituting 82.9 percent households respectively. The amenity of toilet is available for 480,944 houseolds constituting 60.8 percent households of the total households. In rural and urban areas toilet amenity is available for 78,345 households (26.6 percent) and 402,599 households (81.1 percent) households respectively. The amenity for drainage is available for 554,900 households constituting 70.2 percent households in the district. In rural and urban areas this amenity is available for 134,650 households (45.7 percent) and 420,250 households (84.7 percent) households respectively.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percentage of households by type of fuel used for cooking in rural and urban areas of the district.

Out of the 790,524 households, 317,501 households (40.2 percent) use firewood for cooking, 12,951 households (1.6 percent) use crop residue, 3,679 households (0.5 percent) use cowdung cake, 408 households (0.1 percent) use electricity, 20,844 households (2.6 pecent) use coal/lignite (charcoal), 335,614 households (42.5 percent) use cooking gas (L.P.G.), 1,159 households (0.1 percent) use bio gas, 93,820 households (11.9 percent) use kerosene , 1,532 households (0.2 percent) use other types of fuel and 3,016 households (0.4 percent) reported no cooking being done by them.

In the rural areas there are total 294,317 households. Of these, 230,660 households constituting 78.4 percent use firewood for cooking. This is followed by use of cooking gas (12.8 percent), Kerosene (4.0 pecent), crop residue (2.2 percent), coal ligmine (1.3 percent), cowdung cake (0.8 percent), bio gas (0.2 percent), electricity (0.1 percent), other (0.1 percent) and no cooking (0.2 percent).

In urban areas out of total 496,207 households, 298,076 households (60.1 percent) use L.P.G. followed by firewood (17.5 percent), kerosene (16.5 percent), coal lignine (3.5 percent) and crop residue (1.3 percent).

It may be seen that while firewood continues to be the predominant fuel used in rural areas, it is the cooking gas in urban areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 52 gives the number of households availing banking services and number of households having each of the specified assets 2001.

There are 790,524 households of which 294,317 households are of rural and 496,207 households are of urban areas. The banking facilities are being availed by 421,598 household of which 135,850 household are rural and 285,748 households are urban .It may be seen that a higher proportion of households in urban areas 57.6 percent of total urban households utilize the banking amenity as compared to the rural areas 46.2 percent of total rural households availing the banking amenity.

In the district 349,397 households own radio/ transistor, 452,739 households own television, 98,854 households own telephone, 467,074 households own bicycle, 207,118 households possess scooter, motorcycle and moped, 28,355 households possess car, jeep or van. It may be noticed from the information available that 171,520 households do not possess the above specified assets. In the rural and urban areas there are 112,162 and 59,358 such households respectively, who do not posses any of the specified assets.

(viii) Major Social and Cultural events, Natural and Administrative developments and significant activities during the decade.

Government has introduced 'Matoshree Vriddhashram Yojana' for childless olderly people to maintain their good life.

This home for elderly persons is situated in Aadsa Village of Kalameshwar tahsil of Nagpur district. The home is having 50 bed's capacity dormitory with essential commodities, Television for entertainment, health service centre, cultural hall etc., Aashram is

built up on 1500 km2 area with beautiful natural surrounding, provided nicely maintained garden, library, meeting hall for visitors, etc.

Today softwear industries are in demand for engineers and technical persons from this region, 'soft-wear technology park' is constructed. In this park there are industrial units having different capacities are available. There is communication centre in which regular power supply, well maintained meeting hall is available. There are other facilities like Zerox, Telephone, Fax, E-mail etc. are available. Amenities like internet, remote login, opportunity of data base availability, file transfer are also available here.

(ix) Brief description of places of Religious, Historical or Archeological importance in the villages and Places of Tourist interest in the towns of the district.

Fairs

A large number of fairs are held in the district. Most of the fairs held in the district are associated with important deities and religious festivals. So far, as trade is concerned, fairs are complementary to the weekly markets. In the fairs, the traders and shop-keepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use, are brought for sale. The people buy necessary articles in these fairs. There are two fairs held at Ramtek, a town named after "Lord Rama" viz. Ramnavami fair to celebrate the birth anniversary of Lord Rama from Chaitra shuddha 1st to Chaitra shuddha 11th and the other fairs held in the month of Kartika to commemorate the killing of the demon Tripurasur by Rama. On an average more than thirty thousand pilgrims mostly from Vidarbha region and Madhya Pradesh attend the fair. It is believed that during their exile, Lord Rama, Laxman and Sita stayed for some time on this hill. Besides the solitary 'major' fairs described above, there are 121 'minor' fairs held in the district.

Places of Historical and Tourist importance

Forts, old temples and picnic points in the district play an important role in shaping the socio-economic pattern of the district. Ramtek is situated at a height of about 1,508 feet to the north-east of Nagpur city and is the taluka head-quarters. The temple at Ramtek is situated on a hill in the extreme west of Ambagarh ranges, in the northern part of the town and is 500 feet above the town level. To reach the temple one has to climb a hill, known as 'Ramgiri' 'Shendurgiri', 'Tapogiri' i.e. the hill of penance. Besides, there are few other temples in the district i.e. Saibaba temple, Maruti temple, Shiva temple and Ambabai temple etc.

In addition to Nagpur city itself which is famous for oranges, Sitabuldi fort and Amlazari lake, and other places of tourist interest including Ganpati temple in Adasa village (Savner tahsil), Khapa for rich natural surroundings and temples, Mansar village located north of Kamptee is a piligrims place and famous for oranges and deep-oranges spessartite crystals found in the pit known as the "Kamptee lady". Orange barffi (sweet made of oranges) is also famous in the district.

Paradsinga in Katol tahsil is famous for oranges and other fruits gardens and Ramtek is famous for its location around the foot of detached hill with its fractured stones appearing almost blood red and for its betel leaf and number of temples on the hill. The hill is attached with belief that legendary lord Rama took up his residence here and hence is invested with special sanctity.

Forts

Sitaburdi Fort

Sitaburdi fort is undoubtedly the most distinguished object of tourists interest in the city of Nagpur. The fort stands on the twin hills of sitaburdi. In Gond Region it was a storage of military weapons. On 25th January 1822, Colonel Adams converted these hills into a fort. Some freedom fighters were hanged in this fort, for participating in '1857 freedom movement'. Grandson of Tipu Sultan was one of them. Now their memorials are there. For some period Gandhiji was also imprisoned in this fort.

Now there is Head Quarters of 118, Infuntry Bataliyan in this fort. Tricolour, our national flag flies over the main building, taking the panoramic view of whole city.

Seminary Hills

A seminary hill is one of the most attractive and beautiful places in the city. 'Kinder garden schools are located here. It is in the centre of the city near Sitaburdi. Veterinary collage, degree colleges and home science colleges are located in this place.

Maharaj Baug

This is perhaps the oldest garden in Nagpur and is situated on Nagpur-Amravati road, near the Nagpur University. The garden, it is believed was laid out by the Bhosale rulers. The garden is having different species of trees. The grand old trees with their massive trunks speak of their long years of existence and consequently of the antiquity of the Maharaj Baug. There is a small but lovely artificial tank in the centre seating an elephant artistically carved out of black rock. It is laid out on the same pattern as other gardens, having beautiful flower plants planted in gaiety, hanging creepers, lovely soft green lawns, children's corner, playing fountains, which look charming but unlike other gardens it houses a zoo which is an added attraction for the people. The zoo has a rare collection of species of animals and birds like lion and tigers, different types of apes, monkey, deers, spotted antelopes and bears, bird like peacocks and serpents like pythons and cobras. The agricultural college, and laboratory are situated close by. There is also a nursery garden where different varities of plants are grown and sold. The Maharaj Baug can definitely be regarded as one of the most beautiful spot of recreation.

Koradi

Jagdamba temple in Koradi village is very famous in the district. Thousands of people visit this temple daily. 'Navratra Ustav' is celebrated in the temple. The great 'garba and dandiya rass' programmes are held during the Navratras.

Krishnaji Buva math, the Samadhi of a couple, a certain Buva Krishnaji by name thought of taking samadhi but his wife, at the thought of parting away from her husband was overcome by grief and began to shed tears, Krishnaji did not serve from his path and at the time of taking samadhi he blessed his wife by placing his palm on her head and surprisingly enough, she also swooned to death on the spot.

Sahid Laskar Savli dargah is situated to the north-west of Khapa town and was built in memory of one Savli who died fighting the enemies. It is said that, though the head of Sahid Laskar Savli was separated from the trunk, the trunk went on fighting for some time. The dargah was built on the spot where the trunk fell.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

On 1ST May 1960, after the formation of Maharashtra State, Nagpur district was given status of Secondary Capital of Maharashtra State.

Nagpur district is one of the advanced districts of the State. The industrial development has taken place mostly at Nagpur City and at few smaller towns. There are number of large-scale units such as cotton textile, cotton ginning, and pressing, sawing mills, paper and straw board, ceramics, ferro manganese, and steel-re-rolling etc.

The most important small-scale industries in the district are cotton textiles, art silk, manufacture of rice from paddy, handloom weaving, carpet weaving, cotton ginning, timber sawing, castings etc. There are a number of cottage industries in the district. The principal cottage industries are handloom weaving, oil ghanis, tanning and leather goods manufacturing, pottery and bricks, cane and bamboo works; dying and printing etc. Cotton weaving in handlooms engage the largest number of workers in the district. Nagpur handloom sarees are very famous and have a good market all over the state. The well known silk bordered cloth is exported from Nagpur to various part of the country.

The district is rich in minerals. It is endowed with large deposits of manganese ore of both high and low grade. It also has rich deposits of non-cooking coal, lime stone, dolomite clays and ochres.

Nagpur is noted in India for its orange cultivation and for the cotton and silk fabricks woven by the koshti. Despite the keen competition of mill-made cloth, the handlooms still attracts the attention of a large number of buyers. Nagpur is by far the biggest orange market in India.

Marathi is the local language of the district. Rice, wheat, Jowar constitute the main food items of the people. Ganapati festival, Holi, Diwali, Ramnavami, Navaratri are the religious festivals of the people.

Nagpur is an important administrative commercial and industrial centre. It is well connected by rail, road and air to the other cities of the State and India.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation

2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Fertility and Mortality, 1991 Census

Fertility Levels :

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and last questions related to currently married women. The measures of fertility worked out are based on the F- series of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on the question on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of the child mortality have been worked out by using brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

Item		Nagpur District Total	Maharashtra State Total
1	2	3	4
Q1	P	75	74
	M	72	72
	F	78	76
Q2	P	84	79
	M	82	78
	F	89	81
Q3	P	94	86
	M	92	84
	F	95	89
Q5	P	101	91
	M	100	89
	F	101	93

From the estimate of child mortality (number of deaths by ages 1, 2, 3 and 5 given above as q(1), q (2), q (3) and q (5)) it is observed that the level of child mortality in the district is comparatively higher compared to the state in 1991 census. A notable feature is the higher female mortality compared to male mortality in the district. Similar trend is noticed in case of state.

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Nagpur District 1981	Nagpur District 1991	Maharashtra State 1981	Maharashtra State 1991
1	2	3	4	5
GFR	146	119	134	124
GMFR	194	165	168	157
TFR	4.6	3.5	4.3	3.7
TMFR	6.3	5.7	5.2	5.2
Crude Birth Rate (CBR)	34.1	29.1	31.8	29.8
No. of children ever born per women in the age group 45-49	--	4.4	--	4.2
Mean Age at Marriage	--	18.2	--	17.9
Child Women Ratio	--	45.8	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR and CBR were 146, 194, 4.6, 6.3 and 34.1 respectively as compared with State average of 134, 168, 4.3, 5.2 and 31.8 in Census 1981. In 1991 GFR, GMFR, TFR, TMFR and CBR were 119, 165, 3.5, 5.7 and 29.1 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while in 1981 census the fertility rates for the district are comparatively higher than the state, in 1991 census the GFR, TFR and CBR are recorded higher for the state. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage is recorded slightly higher for the district than the state in 1991 census.

Child Woman Ratio

The Child Woman Ratio 1991 Census i.e. the number of children in 0-4 years age groups for every 1000 women of 15-44 years age groups indicates a lower ratio for the district as compared to the State.

Source : Table 31 of Maharashtra State District Profile 1991 census.

Marathi is the main language of the district and is the mother tongue of 70.1 per cent of the district population. In rural areas Marathi speakers account for 84.0 per cent whereas in urban areas 62.4 per cent.

Hindi is the second largest language spoken in the district. It accounts for 15.8 per cent of the total population. The proportion of Hindi speakers is higher in urban areas (20.3 per cent) than the rural areas (7.9 per cent). The third largest language spoken in the district is urdu, its percentage to the total population is 4.3 and mainly spoken in urban areas by 6.6 per cent of the population, whereas it is 0.3 per cent in rural areas.

The speakers of the minority languages are mainly concentrated in urban areas and their proportion in rural areas is very less (except Gondi).

It is found that during the last decade proportion of Marathi speaking persons has decreased from 73.1 per cent to 70.1 per cent while Hindi speakers proportion has increased from 14.0 per cent to 15.8 per cent.
