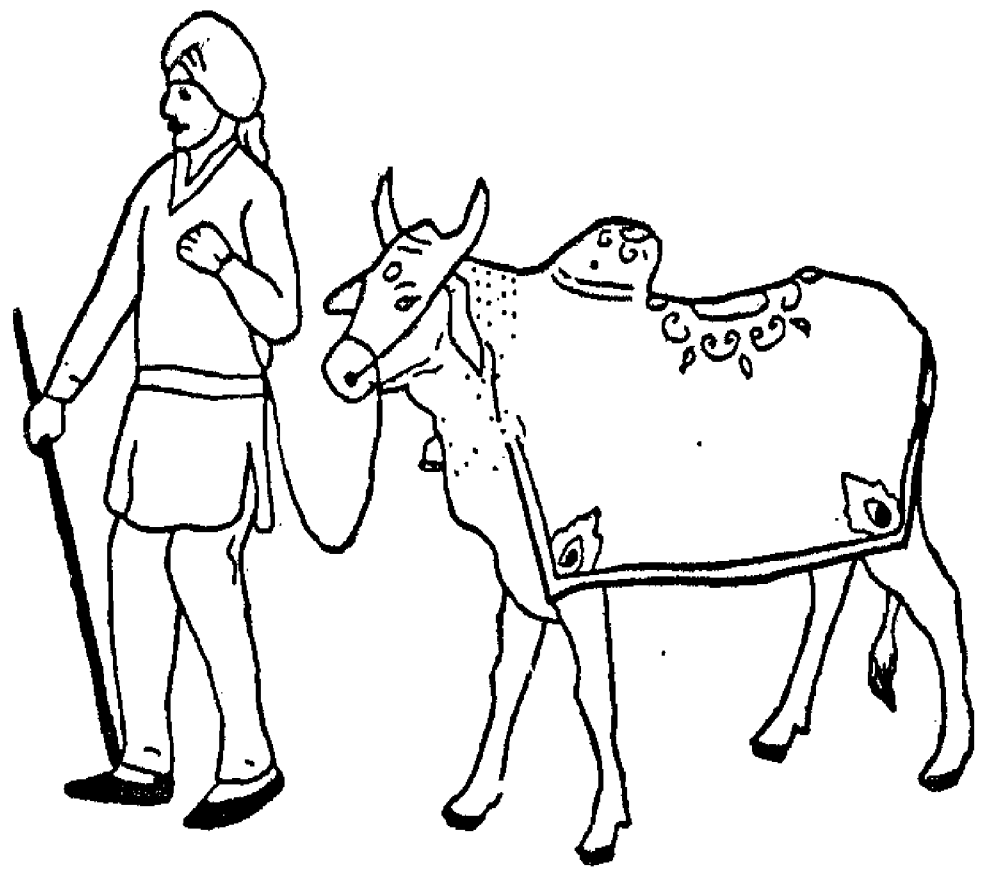
DISTRICT CENSUS HANDBOOK

BILASPUR DISTRICT

ATTAR SINGH
of the Indian Administrative Service
Director of Census Operations, Himachal Pradesh.



BULLOCK WITH OWNER

(MOTIF ON THE COVER)

The motif printed on the right hand bottom of the cover page represents a bullock with its owner a Bilaspuri farmer, is carrying a bullock from the famous Nalwar fair-cattle trade which is held every year at Bilaspur. In the fair, cattle are bought and sold and prize distribution for the best cattle is also held. Not only the people of Bilaspur district but people from other places including the plains also visit this fair which is very much popular in this part of the Pradesh.

PREFACE

In the era of planning, especially in under-developed countries, the importance of Census data needs hardly any emphasis. Census data is utilised in every sphere and at every stage of planning. Schemes of any magnitude cannot yield the desired results without considering the population for which these are to be executed. Census is a unique source of important selected statistics at the micro level also. Paper 1 of 1971 Census and the Supplement to Paper 1, brought out earlier, were based on provisional population figures and were intended to make available to the Government and other data users certain important and basic figures such as Total Population and its Distribution, Sex ratio, Growth rate, Literacy and a broad classification of the population by Workers and Non-workers. Processing of the census schedules was taken up soon after completion of the census count and our first job was to compile the Primary Census Abstract for each village in the rural areas and for each enumerator's block in the urban areas, because immediately, on the completion of census, the administrative authorities as well as academic institutions and private agencies, in fact, most data users anxiously look forward to these primary and basic census statistics down to the village and town levels. This data is required for use in every field of planning educational, developmental, manpower, etc. and for various other urgent official purposes such as adjustment of administrative boundaries, delimitation of electoral constituencies etc. In order to make the necessary data available to the Census data users after its compilation a major change has been made in publication programme of the District Census Handbooks of 1971 Census. Instead of incorporating all the information and statistics of a particular district in a single Volume, the same has been divided into three parts—'A', 'B' and 'C'—so that parts 'A' and 'B' containing (*i*) Village Directory and Town Directory and (*ii*) Village-wise and Town-wise Primary Census Abstracts, could be released, first without waiting for the compilation of data to be included in part 'C'. The initial programme was to bring out all the Parts 'A', 'B' and 'C' independently, as soon as compilation for a particular part were completed. But after having a look at the manuscripts of Part 'A' in respect of most districts, I noticed that the finally printed volumes would be rather slim. Therefore, with the permission of Registrar General, India, I decided to club parts 'A' and 'B' into one volume. The present volume consists of the Parts 'A' and 'B' of the District Census Handbook of Bilaspur. It is proposed to bring out Part 'C' of this publication, as also for other districts, independently, later, because at present the administrative information has just started pouring in from the various Government Departments and Organizations. It will take some more time to put together these facts and figures into proper shape, for Part 'C' Volume.

Bilaspur district is a part of the lower Sutlej Valley and lies in the outer hills. It comprises exclusively of the erstwhile Princely State of Kahloor and is divided into only two tehsils. I have been Deputy Commissioner of this district for a couple of years and its people and area are no strangers to me. It is the people of this district who have made great sacrifices so that waters of Sutlej could be tamed for generation of electric power which is now being utilized in moving the wheels of innumerable industries and for irrigation of parched and thirsty acres in the adjoining States. The old town of Bilaspur and fertile and productive agricultural lands in the district have since been sub-merged in Gobindsagar. This is no mean contribution towards a project of national importance.

The success that I have been able to achieve, in some measure, in bringing out this publication in such a short time is due to the consistant guidance and considerations that I have received from shri A. Chandra Sekhar, Registrar General, India.

I also owe my thanks to all office colleagues who worked hard to complete this volume. A special mention may be made of Shri S. P. Shabi, Senior Investigator who was a great help in finalising this volume. Sarvshri Harbans Singh, Statistical Assistant, S. K. Bhandari, Statistical Assistant and Des Raj Khanna Investigator also lent help in the compilation and computation of various data.

ATTAR SINGH,
Director of Census Operations,
Himachal Pradesh.

PART X-A

TOWN AND VILLAGE DIRECTORY

EXPLANATORY NOTE—PART A

1. History of the District Census Handbook

The District Census Handbook was an innovation of the 1951 Census. Prior to 1951 Census, the Census Reports and Publications threw up the data up to Tehsil/Sub-tehsil, Town and District levels. Statistics for smaller territorial units than these were not published in any census publication. With the rapid development and socio-economic changes in the society, necessity of data for administrative unit at the lowest level was felt considerably by the Government and other organisations as well as the agencies using census statistics. With a view to removing this shortcoming, selected census statistics upto village level were incorporated in the District Census Handbooks of 1951 Census.

Then it shall be seen that the 1951 Census Handbooks contained all the important census tables, in respect of a particular District as well as general information relating to Physical Aspects, Geology, Archaeology, Climate, Rainfall, History, Administration, Medical and Public Health, Education and Literacy, Agriculture and Co-operation, Industries, Local Bodies, Places of Interest etc., relating to the district.

The District Census Handbooks for 1961 Census underwent complete transformation and attempts were made to make them more informative. Information on all the aspects, covered in 1951 Census and on additional items also found place in 1961 District Census Handbooks. Each District Census Handbook in 1961 Census was divided into four parts, each part containing specific set of information and statistics, as briefly discussed below:—

PART I

Besides containing a narrative pertaining to introduction of the particular district, this part comprised mainly of write-up supported by small tables on topics like Physical Aspects, Population, the People, District Administration, Education, Medical and Public Health, Agriculture, Fisheries, Animal Husbandry, Panchayats, Local Bodies, Co-operative Societies, Banking, Industries, Employment, Service, Communications and Road Development, Land Revenue and Land Tenure, Price Trends and Community Development, Flora and Fauna etc. In some Handbooks certain reprints of extracts from works of important authorities were also included.

PART II

All the Census Tables pertaining to a district were included in this part.

PART III

This part of the District Census Handbooks contained the Administrative Statistics on Agriculture, Administration, Medical and Public Health, Local Bodies, Transport and Communications, Livestock, Forests and other Departments.

PART IV

This part mainly consisted of the Village Directory which rendered an account of each village and town in the district. The Census information in this part was given under 36 suitable heads. In addition to the census statistics in respect of each village and town, information about the level of development and amenities was also collected and incorporated in this part. Amenities like schools, Places of Worship, Medical Institutions, Roads, Railways, Telegraph and Post Offices, Electricity etc., if available in a particular village/town were indicated with the help of specific abbreviations.

2. Scope of the District Census Handbooks

It has been the experience of this organization that due to various factors, most of which were beyond its control, the publication of some of the 1961 District Census Handbooks was inordinately delayed, which resulted in unnecessary hardship to the data users. The utility of statistics lies in their timely publication. Statistical data published late lose much of their relevance. With this in view, for the 1971 Census, priorities have been fixed for the publication of the different sets of information. It would be our utmost endeavour to publish the information as soon as the relevant tables and other material are ready. This, it is hoped, would result in the reduction of timelag that usually occurs in making the information available to the Government and other data users.

The District Census Handbooks pertaining to 1971 Census are being brought out in two independent parts as follows:—

(*i*) (*a*) *Part A: Town Directory and Village Directory*:—Data relating to important characteristics alongwith other information for each Town in a district have been compiled in the form of seven statements. It is for the first time that this type of information has been compiled and published in Census publications, in the shape of Town Directory. The first six statements contain Town-wise statistics and information on a variety of subjects like, Status, Growth History and Functional Category of Towns; Physical Aspects and Location of Towns,

1969; Municipal Finance 1968-69; Civic and other Amenities, 1969; Medical, Educational, Recreational and Cultural Facilities 1969; and Trade, Commerce, Industry and Banking, 1969. The seventh statement contains census data on religion in respect of each town.

The village Directory gives for each village particulars of amenities available in the matter of Educational and Medical Institutions, Power Supply, Drinking Water Supply, Post and Telegraph Facilities, Communications, Particulars of Land Use, Weekly Markets, Places of Religious, Historical or Archaeological interest in the village.

(*b*) *Part B: Village-wise and Town-wise Primary Census Abstract*:—This part contains the primary census data for each village. The primary data pertains to Area, Occupied Residential Houses, Number of Households, total Population and its Sex-wise break-up, Sex-wise Scheduled Caste and Scheduled Tribe Population, Sex-wise Literate Population, Working Population by sex and by nine broad Categories i.e. Cultivators; Agricultural Labourers; those working in Livestock, Forestry, Fishing, Plantations, etc,; Mining and Quarrying; In Trade and Commerce; In Transport storage and Communication; In Manufacturing; In Construction; and in Other Services and the non-working population also with sex-wise break-up. Similar information is incorporated in this part, in respect of each town/and the wards/enumerator's blocks, therein.

(*ii*) *Part C: Administrative Statistics and Report*:—The administrative statistics in all fields of development pertaining to the district will be the main content of this part. The other census tables relating to the district i.e. General Population Tables, Economic Tables, Social and Cultural Tables, Migration Tables, Establishment Tables, Fertility Tables and Housing Tables, etc. will also be included in this part.

3. Collection of non-census data

The information in respect of Town Directory has been collected from various departments concerned and the respective Urban Local Bodies. Besides the Urban Local Bodies, without whose co-operation the compilation of such an exhaustive Town Directory would not have been possible at all, mention must be made of some of the important departments of the Government of Himachal Pradesh which furnished the statistics and information falling in their respective spheres. These are; the Secretary (L.S.G.) to the Government of Himachal Pradesh, the Director of Industries, Himachal Pradesh, the Director of Health Services, Himachal Pradesh, the Director of Education, Himachal Pradesh, the Chief Engineers, Himachal Pradesh, Public Works Department, and the Registrar Co-operative Societies, Himachal Pradesh. And lastly, personal observation and local enquiries by the Investigators of this office yielded many a piece of information and relevant data.

The information for the compilation of Village Directory was collected with the assistance of the Revenue Department of the Government of Himachal Pradesh. The Patwaris were drafted as Enumerators and the Kanungos were deputed to supervise this work, under the overall control of the Tehsildar/Naib Tehsildar concerned. The data was collected by Patwaris in a schedule, especially devised for the purpose, strictly in accordance with a set of instructions issued in this behalf. However, later the officials of the Directorate of Census Operations, Himachal Pradesh, were sent out in the field, again, with a view to rectifying the shortcomings and reconciling the discrepancies. Thus the information, by and large, pertains to mid. 1970. The area figures were based on the 'Lal Kitab' or the Revenue Village papers as maintained at the Tehsil/Sub-Tehsil level and the latest available figures were taken into account.

4. The Town Directory—Brief description and analysis

A comprehensive Town Directory in the form of 7 statements highlighting all important physical, economic, civic, developmental and certain social aspects; has been compiled in respect of each town in Himachal Pradesh. This Town Directory forms an important part of Part 'A' of the District Census Handbook.

(*a*) *Census definition of town.*—The standards laid down for considering a place as an urban area were broadly the same as in 1961 Census. However, criteria adopted for determining the urban areas in the 1971 Census were maintained on the following pattern:—

"To qualify for recognition as an urban area a place should first be either a Municipal Corporation Area or a Municipal Area or under a Town Committee or a Notified Area Committee or a Cantonment Board. If it did not have any of these urban local bodies to administer the affairs, then the following empirical tests should be applied:

(*i*) a minimum population of 5,000 (estimated for 1971);

(*ii*) a density of not less than 400 per square km. (1,000 per sq. mile);

(*iii*) 3/4th of the occupations of the male working population should be outside agriculture; and

(*iv*) the place should have, according to the Director of Census Operations of the State, a few pronounced urban characteristics and amenities."

Thus, all the places having an urban local body such as a Municipal Committee or Notified Area Committee were obviously treated as towns in this District. No place which did not have a statutary urban local body was treated as an urban area in Bilaspur District.

(*b*) *The seven statements of Town Directory*:— Data in respect of the Town Directory has been compiled and presented in the form of seven statements. In all these statements the information is shown individually for each town, the towns having been arranged in alphabetical order. A broad outline of each statement is given hereunder:—

STATEMENT I—STATUS, GROWTH HISTORY AND FUNCTIONAL CATEGORY OF TOWNS

This statement runs into 14 columns and is primarily intended to throw up a comparative picture of the population of each town in the different censuses from 1901 to 1971. The Civic Administration Status of each town is shown under column 5. The last column of statement I (column 14, Functional Category—1961 Census) would require some elucidation. It may be relevant to describe the method followed in arriving at the functional character of a particular town according to 1961 Census. In this context the working population according to 1961 Census was classified into nine broad industrial categories viz., I—As Cultivator; II—As Agricultural Labourer; III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied Activities; IV—Household Industry; V—In manufacturing other than Household Industry; VI—In Construction; VII—In Trade and Commerce; VIII—In Transport, Storage and Communications; and IX—In other Services. For working out the functional category in respect of a particular town these nine categories were suitably combined and grouped into five broad Functional Classifications as below:—

(*i*) Primary Activities—Industrial categories I, II and III;

(*ii*) Industry—Industrial Categories IV, V and VI;

(*iii*) Trade & Commerce—Industrial Category VII;

(*iv*) Transport—Industrial Category VIII; and

(*v*) Services—Industrial Category IX.

The percentage of workers under each of these five classes of economic activities to total workers in a particular town was calculated and the functional character of the town determined according to these percentage values. If workers under one of the five occupations, accounted for 40% or more of the total workers, the town was considered as mono-functional *e. g.* Service, Industrial etc. However, in case the percentage was less than 40 the next predominent occupation was taken into account, so that the total of the two would come to 60% or obove. Such a town was designated as bifunctional e.g., Service-*cum*-Industrial. Further, if the total did not come upto 60% the third predominent occuption was taken into account and such a town was designated Multi-functional *e. g.* Service-*cum*-Industrial-*cum*-Primary Activities.

STATEMENT II—PHYSICAL ASPECTS AND LOCATION OF TOWNS, 1969

Data on annual rain fall, and temperature is shown under Cols. 3 to 5 of this statement which runs into 13 columns. The other columns indicate the distances of a town from the nearest city with a population of 1 lakh or more, from the Headquarters of the State, District, Sub-division, Tehsil and from the nearest Railway Station, Bus Route, Navigable River/Canal (if within 10 Kms.). The last column *viz*, Col. No. 13 pertains to the Sea Port (if within 50 Kms.). Obviously there is no information to be recorded under this column in Himachal Pradesh.

STATEMENT III—MUNICIPAL FINANCE 1968-69

This Statement shows the Receipt and Expenditure in respect of the Municipal Finance of individual towns under different heads. There are in all, 16 columns in this statement.

STATEMENT IV—CIVIC AND OTHER AMENITIES, 1969

This statement displays information under 16 heads. The amenities, about which information has been incorporated are, Road Length (with break up by kutcha and pucca, if available) system of sewerage/Drainage and other related matters; Water Supply; Fire Fighting Service; and Electrification.

STATEMENT V—MEDICAL, EDUCATIONAL, RECREATIONAL AND CULTURAL FACILITIES IN TOWNS, 1969

This statement is intended to depict the degree of availability of medical facilities by type of institutions and number of beds available in each; educational facilities by levels/types, of courses; and recreational and cultural facilities. The statement has 17 columns.

STATEMENT VI—TRADE, COMMERCE, INDUSTRY AND BANKING, 1969

This statement displays information under 15 columns in respect of each town. The information pertains to Imports, Exports, Manufactures, Banks

and Agricultural and Non-agricultural Credit Societies.

STATEMENT VII—POPULATION OF TOWNS BY RELIGION, 1971

Town-wise break-up of the 1971 Census Population by religion is shown in this statement.

(*c*) *Coverage.*—There are only three towns in Bilaspur District which are covered in the town directory. Of these Bilaspur and Shri Naina Devi Ji were Urban areas in the 1961 Census also, but Ghamarwin which was declared as a notified area during the intercensal period is a new town in the present census. Ghamarwin is the Tehsil headquarter of the Tehsil of that name. The other two towns are located in Tehsil Bilaspur Sadar.

(*d*) *Sources of information.*—The information has been collected from the respective urban local bodies and the concerned departments of the Government of Himachal Pradesh. Temperature and rain-fall data have been collected from the Director General of Observatories, Government of India, Poona.

(*e*) *Brief notes on Statements*

STATEMENT I—STATUS, GROWTH HISTORY AND FUNCTIONAL CATEGORY OF TOWNS

Out of the three towns in Bilaspur district two viz., Bilaspur and Shri Naina Devi Ji are administered by Municipal Committee, whereas Ghamarwin has a Notified Area Committee. The notations utilized in the statement alongwith their explanations are given here-under:—

Notation		*Explanation*
N A C	..	Notified Area Committee.
M	..	Municipal Committee.

The oldest town in the district is Bilaspur, which was an urban area in 1901 also. Having subsequently been declassified in the censuses of 1911 and 1921, the place again acquired urban status, in 1931 when its population stood at 2,387. The population of this town continued to register growth till 1961 Census. But there has been a little decrease in the population of Bilaspur during the decade 1961-71. This is primarily because of the fact that the old town of Bilaspur, has been submerged in the Gobindsagar lake of the Bhakra Dam Project after 1961, and a new township, has taken its place at a higher elevation. Shri Naina Devi Ji was given urban status only in 1961 Census, whereas Ghamarwin is a new town in the present census. The population of Ghamarwin is 1,967 and of Shri Naina Devi Ji 494, according to 1971 Census.

Table No. 1 given hereunder shows the towns classified according to their functional categories:—

TABLE NO. 1

Distribution of towns by functional category

Functional Category—1961	No. of Towns
1	2
Service	2
*	1

*Functional category in respect of Ghamarwin town could not be worked out because this place has been notified as a town for the first time in 1971 Census.

The above Table reveals that two towns (viz., Bilaspur and Shri Naina Devi Ji) belong to the functional category of service. Functional category, in case of Ghamarwin, could not be worked out because the 1961 Census data has been utilized for the purpose, when this place had rural status.

STATEMENT II—PHYSICAL ASPECTS AND LOCATION OF TOWNS, 1969

Information on the physical and locational aspects of the towns is displayed in this statement.

Temperature data is not available for any of the three towns in this district. The annual rainfall varies between 1,276.5 mm. in Bilaspur to 1,422.4 mm. in Ghamarwin. Because the rainfall data is not available for Shri Naina Devi Ji, revelant figures for Bilaspur have been repeated against this town also.

Another important feature, requiring special attention, is the availability of navigation facilities in the Gobind Sagar (River Sutlej) to Bilaspur town. Distance of Gobind Sagar from Shri Naina Devi ji is 11 Kms.

STATEMENT III—MUNICIPAL FINANCE, 1968-69

Table No. 2 reproduced hereunder shows per capita Receipt and Expenditure, further classified according to sources and various activities, respectively, in respect of the different classes of towns in Bilaspur district:—

TABLE NO. 2

Per capita receipt and expenditure by size class of towns

Class of Town	No. of Towns	Per Capita						
		Receipt (Rs.)			Expenditure (Rs.)			
		Total Receipt	Receipt through taxes	Receipt from all other sources	Total Expenditure	Expenditure on public health and conveniences	Expenditure on public institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9
Class I								
1,00,000 and over	..	..	..	..	..	..	..	..
Class II								
50,000-99,999	..	..	..	..	..	..	..	..
Class III								
20,000-49,999	..	..	..	..	..	..	..	..
Class IV								
10,000-19,999	..	..	..	..	..	..	..	..
Class V								
5,000-9,999	..	1	6.66	20.68	5.98	23.59	5.95	.. 17.64
Class VI								
Below 5,000	..	2*	93.72	13.56	80.16	100.00	27.13	.. 72.87

*Ghamarwin was notified as a town after 1968-69. No data is available for this town.

The data displayed in the above Table pertains to Bilaspur (Class V) and Shri Naina Devi Ji (Class VI) towns only. Ghamarwin was declared as a notified area only a few months before the census, and therefore data for this town is not available.

There is a marked difference in the per capita amounts of receipts in the two classes (also towns in this case, because there is only 1 town in each class). Per capita receipts in Class VI amount to Rs. 93.72 as against Rs. 26.66 in Class V. Receipts from sources, other than through taxes, account for the bulk of total receipts in case of Class VI whereas in Class V receipts through taxes account for a major portion of total receipts. The per capita expenditure on all accounts, in case of Class VI, is higher than in Class V. Shri Naina Devi Ji, the data in respect of which is displayed against Class VI is a place of pilgrimage. This reason accounts for the divergence in the receipt and expenditure patterns of the two towns.

STATEMENT IV—CIVIC AND OTHER AMENITIES, 1969

The notations used for describing various amenities in this statement along with their explanations are given hereunder:—

Col. No.	*Notation*	*Description*
3	PR	Pucca Road
	KR	Kutcha Road
4	OSD	Open Surface Drains
	S	Sewer
9	T	Tap
	Tk	Tank

STATEMENT V—MEDICAL, EDUCATIONAL, RECREATIONAL AND CULTURAL FACILITIES IN TOWNS, 1969

A variety of notations have been utilized for depicting the availability of various types of amenities in this statement. These notations are described hereunder:—

Col. No.	*Notation*	*Description*
3	D	Dispensary
	FC	Family Planning Clinic
	H	Hospital
	O	Others
	TBC	T.B. Clinic

5	AS	Arts and Science
9	CTC	Crafts Training Centre
	RITI	Rural Industrial Training Institute
13	P. Pr	Pre-Primary School
	SI	Sanskrit Institution

Table No. 3 given hereunder shows the extent of availability of medical facilities to the urbanites of Bilaspur District measured in terms of number of beds per 1,000 population.

TABLE NO. 3

Medical Facilities

Total No. of of beds in medical institutions	No. of beds per 1,000 population
1	2

Total number of beds available for in-door patients in the medical institutions located in the urban areas of Bilaspur district is 142. Number of beds per 1,000 of urban population works out at 15 for this District.

Bilaspur town leads in matters of medical facilities with a hospital having 104 beds, a T.B. Clinic with 20 beds, and five other medical institutions. Shri Naina Devi Ji town can boast of only one dispensary, whereas Ghamarwin is provided with a small hospital having 16 beds, besides two medical institutions of other types.

As for educational facilities it would be observed that there is only one college (Arts and Science) in this district (the rural areas have none) located

in Bilaspur town. This town is provided with a Crafts Training Centre and a Rural Industrial Training Institute. Shri Naina Devi Ji town has only one Junior Secondary or Middle School whereas Ghamarwin has a Higher Secondary School in addition to certain other institutions.

As for recreational amenities it is observed that there is no Cinema, Stadium, Auditorium or Drama Hall in the towns of Bilaspur district (data pertains to 1969). However, there are 2 Public Libraries in Bilaspur town and one in Shri Naina Devi Ji. Ghamarwin has not even a public library.

Table No. 4 given hereunder shows the number of various types of schools per 1,000 population in the towns of Bilaspur district.

TABLE NO. 4

Higher Secondary or Secondary, Junior Secondary/Middle and Primary Schools per 1,000 population

Name of the town	Number per 1,000 population		
	Higher Secondary or Secondary Schools	Middle/Junior Secondary Schools	Primary Schools
1	2	3	4
Ghamarwin ..	1	1	1
Bilaspur ..	N	N	N
Shri Naina Devi Ji ..	..	2	..

N-Negligible.

Only Ghamarwin town can boast of 1 Higher Secondary or Secondary, 1 Junior Secondary/Middle and 1 Primary School per 1,000 population. The ratios work out as negligible in case of Bilaspur town for all the three different types of schools. Shri Naina Devi Ji town has only 1 Junior Secondary/Middle School but, because the population of this town is only 494 the proportion per 1,000 works out at 2.

STATEMENT VI—TRADE, COMMERCE, INDUSTRY AND BANKING, 1969

Foodgrains are the most important items of import in all the towns of Bilaspur district. Cloth is yet another important item of import in Bilaspur and Ghamarwin.

Resin and Turpentine, fish and washing soap are exported from Bilaspur town, whereas wooden furniture is exported from Ghamarwin.

As for manufactures, Bilaspur has a Himachal Government Resin aud Turpentine Factory. Washing soap and wooden furniture are also manufactured in small quantities, here. Wooden

furniture is also manufactured at Ghamarwin.

There are two Banks each in Bilaspur and Ghamarwin and the total number of agriculture and non-agricultural credit societies in the three towns is 4.

STATEMENT VII—POPULATION OF TOWNS BY RELIGION, 1971

Hindus constitute the bulk of the population in all the towns of Bilaspur district. Muslims and Sikhs constitute small proportion of the population in Bilaspur and Ghamarwin towns. Other religious groups have either negligible or no share in the population of the towns of Bilaspur District.

5. Village Directory

(*i*) *Concept of Census Village*:— In 1961 Census a Census Village was the same as a Revenue Village. After reorganisation of Punjab, Haryana and Himachal Pradesh on 1st November, 1966 some areas were transferred from the erstwhile State of Punjab to Himachal Pradesh. Whereas in some of these newly merged districts/tehsils etc., the revenue village is comparable in population size and area to the revenue village of the old districts yet in most of the cases the average revenue village is much bigger in area and population then its counterpart in the old districts. The difference is so marked that it renders comparison of the village-wise statistics an exercise in futility. Therefore smaller rural units were considered as census villages in most of the newly merged areas of Himachal Pradesh. However suffice it to mention that the census village remains the same as it was in 1961 Census in Bilaspur District i.e. a revenue village has again been considered as a Census village in the present census. It may be relevant to detail here, area-wise, the names of the smallest census rural units considered as census villages in Himachal Pradesh. This information is given below:—

Name of smallest census rural unit considered as 'Census Village'	Area where considered
1	2
1. Revenue Village	(*i*) In the Districts of Chamba, Mandi, Bilaspur, Mahasu, Sirmaur, Kinnaur and Simla. (*ii*) Una tehsil and Amb Sub-tehsil of Kangra District.
2. "Tikka" having a distinct sub-hadbast number	Kangra District excepting Una Tehsil and Amb sub-tehsil.
3. "Phatti" having distinct sub-hadbast number	Kulu District
4. Village Hamlet (with/without distinct sub-hadbast number).	Lahaul and Spiti District.

(*ii*) *Presentation of data*.—The Village-wise data is displayed in 18 columns. Besides this abstracts of the educational, medical and other institutions and amenities in respect of tehsils/sub-tehsils and the district have been incorported in this publication. For according convenience in the identification of census villages, lists of villages arranged in alphabetical order showing their census location code numbers and the revenue numbers, have also been added.

(*iii*) *Explanatory note regarding the notations used in the Village Directory*.—The information pertaining to the different amenities available in the census village has been shown with the help of a set of notations. These notations along with the particular amenities which these represent are given hereunder:—

Column—4

1.	Primary School	Pr. S
2.	Middle School	Mid. S
3.	Secondary or Higher Secondary School	Sec. S

Column—5

1.	Hospital	H
2.	Maternity and Child Welfare Centre	MCW
3.	Health Centre	HC
4.	Dispensary	D

Column—6

1.	Electricity	E

Column—7

1.	Tap Water	T
2.	River Water	R
3.	Fountain	F
4.	Well	W
5.	Tank	Tk.
6.	Tube Well	TW
*7.	Others	O
8.	Information Not Available ..	N.A.

Column—8

1.	Pucca Road	.. ..	PR
2.	Kutcha Road	.. ..	KR
3.	River	.. ..	R
4.	Railway Train	.. ..	T

1.	River	.. .	R
2.	Tube well		TW
3.	Tank	.. ..	Tk.
**1.	Others	.. ..	O

*The category of Others' includes stream, 'kuhal' and 'nallah'.

**The category of others includes 'kuhals'.

6. Brief Analysis of Data—Village Directory

(*a*) *Distribution of villages by area*:—Table No. 5 given hereunder shows the distribution of villages classified by area.

TABLE NO. 5

Distribution of the villages by their areas

1	2
Area in acres	Number of villages
50 acres or less:	118
51—100	182
101—200	274
201—500	304
501—1,000	97
1,001—2,000	33
2,001—5,000	6
5,001acres and above	1
Area not available	3
Total	1,018

There is predominance of small sized villages in Bilaspur district. Out of a total of 1,018 villages, 878 are of sizes 500 acres or less, which is 86 per cent. There is only 1 village in the size class 5,001 acers or above and the second highest size class of 2,001—5,000 acres claims another 6 villages. Of the villages which have been submerged in the Gobind Sagar lake of the Bhakra Dam Project there are three such villages information about area of which is not available.

(*b*) *Availability of educational facilities*:—Table No. 6 reproduced hereunder shows the number of villages categorized according to their respective distances from the nearest town and the number enjoying educational amenities upto various levels, in these categories.

TABLE NO. 6

Distribution of villages having educational amenities by distance from the nearest town

Distance from the nearest Town	Total No. of village	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 kms. or less ..	119	16	4	3	..	..
6—10 kms. ..	79	12	3	1	..	..
11—15 kms. ..	76	15	4	..	..	..
16—25 kms. ..	235	40	9	3	..	..
26—50 kms. ..	359	54	18	4	..	..
51—100 kms. ..	149	19	10	2	..	..
101—200 kms. ..	1	..	..	..	..	..
201 kms. and above ..	..	..	..	..	..	..
Total:	1,018	156	48	13	..	..

There are 1,018 villages in Bilaspur District and of these 359 are situated between 26—50 kms. which is the highest for a single distance class. There is no village whose distance from the nearest town is 201 kms. and above while only one village is located between 101 and 200 kms. from the nearest town.

156 of the villages have Primary Schools located therein. The villages having Primary Schools are scattered all over the District. There are 48 villages in the District which have Middle Schools, which are distributed a sort of proportionately in the classes of villages situated at various distances from the nearest town. The High or Higher Secondary Schools appear to be disproportionately distributed in the different categories of villages. Against 3 villages in the category of 5 kms. or less out of 119, there are only 4 villages enjoying this facility out of 359 in the category of villages whose distance from the nearest town is 26—50 kms. Similar is the case in other categories. The villages whose distance from the nearest town is 11—15 kms. form a class by themselves is as much as none of these has a High or Higher Secondary School. In all there are 13 villages which have a High or Higher Secondary School in this district.

(*c*) *Availability of Medical Facilities*:—The following Table No. 7 shows the number of Medical Institutions of any kind per 100 square kms. in the Tehsils of Bilaspur District.

TABLE NO. 7

Medical facility per 100 *Sq. Km.*

Tehsil	Total area in Sq. Kms*	No. of medical institutions of any kind per 100 Sq. Km.
1	2	3
Ghamarwin	606.64	3
Bilaspur Sadar	536.04	4
Total:	1,142.68	3

*Area figures according to Director of Land Records, Himachal Pradesh.

There are only two Tehsils in Bilaspur District and the number of Medical Institutions of any kind per 100 square km. is 3 in Ghamarwin and 4 in Bilaspur Sadar against 3 which is the District average.

(*d*) *Electric Power Supply*:—The following Table No. 8 displays the villages classified according to their distances from the nearest town and the number of villages electrified in each class.

TABLE NO. 8

Distribution of villages with electricity and distance from the nearest town

Distance from the nearest Town	Total No. of villages	No. of villages with electric power supply
1	2	3
5 kms. or less	119	83
6—10 kms.	79	31
11—15 kms.	76	28
16—25 kms.	235	90
26—50 kms.	359	161
51—100 kms.	149	35
101—200 kms.	1	..
201 kms. and above	..	..
Total:	1,018	428

None of the villages in this district is situated at 201 or above kms. from the nearest town. Even the distance class 101—200 kms. claims only one village. The two distance classes of 16—25 kms. and 26—50 kms., claim well over half of the villages.

In Bilaspur District the proportion of electrified villages is comparatively quite high. 428 villages out of 1,018 are electrified, which is 42%. No definite trend is discernible in the different classes of villages in matters of electrification. It may however, be recorded that proportion of electrified villages is very high in the category of villages whose distance from the nearest town is 5 kms. or less, absolute figures being 83 out of 119. This proportion is very low in the category of villages situated between 51 and 100 kms. in which case only 35 villages out of 149 are having the facility of electric power supply.

(*e*) *Communications*:—Table No. 9 reproduced

hereunder shows the villages classified according to their distances from the nearest town and the number of villages connected by the various means of communication in the different classes.

TABLE NO. 9

Distribution of villages with different communication facilities and distance from the nearest town

Distance from the nearest Town	Total No. of villages	Number of villages connected by					
		Pucca Road	Kutcha Road	Pucca Road and River	Pucca Road and Rail	Kutcha Road and Rail	Others
1	2	3	4	5	6	7	8
5 kms. or less ..	119	37	47	..	..	..	12 [11 (R), 1 (T)]
6—10 kms. ..	79	16	33	..	..	..	10
11—15 kms. ..	76	20	23	..	..	..	4
16—25 kms. ..	235	45	88	..	..	..	1
26—50 kms. ..	359	41	146	..	..	..	..
51—100 kms. ..	149	8	89	..	..	..	..
101—200 kms. ..	1	..	..	..	..	..	..
201 kms. and above	..	..	..	..	..	..	..
Total:	1,018	167	426	..	..	..	27

Pucca Road and Kutcha Road are the important means of communication in Bilaspur district. 167 villages are connected by Pucca Road and another 426 are connected by Kutcha Road. There is higher proportion of villages connected by Pucca Road in the categories upto a distance of 15 kms. from the nearest town. The proportion goes on decreasing thereafter. Similar is the case with Kutcha Road. The exception here is that as many as 89 villages out of 149 in the class 51—100 kms. are connected by Kutcha Roads, which is a being chunk of the total villages in this class. Yet another mode of communication is River Sutlej. This river has become prtially navigable in certain areas due to construction of Bhakhra Dam. 26 villages are solely connected by River in Bilaspur District.

(*f*) *Postal Facilities*:—The following Table No. 10 shows a comparative picture of the number of Post Offices available per 100 sq. kms. in the two Tehsils of Bilaspur District.

TABLE NO. 10

Number of Post Offices Per 100 Sq. Km.

Name of Tehsil	Total area in Sq. Kms.*	No. of post offices per 100 Sq. Km.
1	2	3
Ghamarwin ..	606.64	6
Bilaspur Sadar ..	536.04	5
Total:	1,142.68	6

*Area figures according to Director of Land Records, Himachal Pradesh.

The number of Post Offices available per 100 square km. in this district is 6. This figure stands at 5 in case of Bilaspur Sadar Tehsil whereas it is again 6 in respect of Ghamarwin Tehsil.

(*g*) *Staple food*:—Staple food of the inhabitants of Bilaspur district is Maize and Wheat. Rice is also consumed in limited quantities.

(*h*) *Land use pattern*:—The land use statistics have been compiled under the following heads in the Village Directory:—

(*i*) Forests.
(*ii*) Culturable waste.
(*iii*) Area not available for cultivation.

The figures of—

(*i*) irrigated area, and
(*ii*) un-irrigated area, have also been compiled.

Table No. 11 given hereunder is intended to throw light on the availability of cultivated land and the proportion of cultivable waste land in the rural areas of Bilaspur District.

TABLE NO. 11

Percentage of average cultivable waste per village to average cultivated land per village by distance from the nearest town

(*Acres*)

Distance from the nearest Town	No. of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 kms. or less ..	119	7,980	67.06	11,761	98.83	147.38
6—10 kms. ..	80	5,687	71.09	9,456	118.20	166.27
11—15 kms. ..	76	5,610	73.82	12,733	167.54	226.96
16—25 kms. ..	234	16,869	72.09	24,287	103.79	143.97
26—50 kms. ..	359	26,745	74.50	33,971	96.33	129.30
51—100 kms. ..	149	11,026	74.00	15,700	105.37	142.39
101—200 kms. ..	1	..	..	..	..	..
201 kms. and above ..	..	..	..	..	..	..
Total	1,018	73,917	72.61	107,908	106.00	145.99

Total cultivated area in this district is 73,917 acres and average cultivated land per village works out at 72.61 acres. There is not much variation in this average from one category of villages to another. However, an interesting feature of this data is that the proportion of cultivable waste land as compared to cultivated area is very high in Bilaspur District.

The area under this category adds unto 107,908 acres which works out at 106.00 acres on an average per village. Average cultivable waste per village varies between 96.33 and 167.54 in the categories of villages lying at 26—50 kms. and 11—15 kms. from the nearest town.

The percentage of average cultivable waste per village to average cultivated land per village is 145.99 acres for the district as a whole. This percentage is, on the one hand 226.96 acres, which is the highest in the category of villages lying between 11—15 kms. from the nearest town and on the other hand it is 129.30 in the class of villages situated at 26—50 kms. from the nearest town, which is the lowest.

PART X-B

VILLAGE AND TOWN WISE PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE—PRIMARY CENSUS ABSTRACT

1. Intorductory:

Basic and important statistics revealed by 1971 census in respect of primary Census units i. e., village in rural areas and enumerator's Block in urban areas have been represented under 38 columns of Primary Census Abstract.

2. Area figures:

Primary Census Abstract contains the identification particulars of the villages/enumerator's block and the respective area figures of each unit. The area figures in case of census villages are based on the Revenue village papers as maintained in the respective Tehsil/Sub-tehsil offices, and were collected along with the non-census data pertaining to the Village Directory. The latest available figures were taken into account. The total of these area figures of the Tehsil do not tally with the Tehsil-wise and District-wise figures, because the former represent land use area, and do not necessarily include what is called as the "non-reporting area". Further the figures given in case of district represent the geographical area figure supplied by the Surveyor General India. The Tehsil-wise total area figures have been supplied by the Director of Land Records, Himachal Pradesh, whereas the area figures for towns have been furnished by the respective Local Bodies. In case of Districts and Tehsils/Sub-tehsils, area figures for rural areas are derived by substracting the urban area from the total area.

3. Occupied Census Houses and Households:

The next item of information pertains to the number of Occupied Residential Houses and the number of Households in village/enumerator's block. It may be relevant to give here the definitions of the terms 'House' and 'Household' as adopted in Census.

(*i*) *Census House.*—A Census House is a building or a part of a building inhabited or vacant and having a separate main entrance from the road or common courtyard or stair-case etc., used or recognised as a separate unit. It may be used for a residential or non-residential purpose or both. If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common stair-case or a common courtyard leading to a main gate, they are considered as separate Census Houses. If within a large enclosed area there are separate buildings, then each such building is also considered as a separate House. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance is treated as separate Census House.

(*ii*) *Census Household.*—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless exigencies of work prevented any of them from doing so. A household may be made up of related or unrelated persons.

4. Scheduled Castes and Scheduled Tribes:

Primary Census Abstract is, again, perhaps the only source of information on Scheduled Caste and Scheduled Tribe components of the village-wise/block-wise population. The Castes and Tribes listed as Scheduled Castes/Tribes in Himachal Pradesh under the Government of India, Ministry of Home Affairs, Scheduled Castes and Scheduled Tribes list Modification Order, 1956, constitute the Scheduled population in Census. It may be of interest to note here that, in fact, two different lists were utilised in the different areas of Himachal Pradesh. Such a course was necessitated in view of the merger of certain areas from the erstwhile state of Punjab in Himachal Pradesh on 1st November, 1966 when the three states of Punjab, Haryana Himachal Pradesh and Union Territory of Chandigarh were reorganised. The lists pertaining to Punjab were utilized in the newly merged areas whereas the lists pertaining to Himachal Pradesh were utilized in the old areas of the State. These lists are given hereunder:

LIST 1

List of Scheduled Castes and Scheduled Tribes for the Districts of (1) Chamba (excluding the Towns of Dalhousie M. C. Dalhousie C. B. and Bakloh C.B. (2) Mandi (3) Bilaspur (4) Mahasu (5) Sirmaur and (6) Kinnaur.

52. Thatiar or Thathera.

SCHEDULED TRIBES

1. Gaddi.
2. Gujjar.
3. Jad, Lamba, Khampa and Bhot or Bodh.
4. Kanaura or Kinnara.
5. Lahaula.
6. Pangwala.

LIST 2

List of Scheduled Castes for the Districts of (1) Kangra (2) Kulu (3) Lahaul & Spiti and (4) Simla and (5) Towns of Dalhousie (M. C.), Dalhousie (C. B.) and Bakloh (C. B.) of Chamba District.

1. Ad dharmi.
2. Balmiki, Chura or Bhangi.
3. Bangali.
4. Barar, Burar or Berar.
5. Batwal.
6. Bauria or Bawaria.
7. Bazigar.
8. Bhanjra.
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi.
10. Chanal.
11. Dagi.
12. Dhanak.
13. Dumna, Mahasha or Doom.
14. Gagra.
15. Gandhila or Gandil Gondola.
16. Kabirpanthi or Julaha.
17. Khatik.
18. Kori or Koli.
19. Marija or Marecha.
20. Mazhabi.
21. Megh.
22. Nat.
23. Od.
24. Pasi.
25. Perna.
26. Pherera.
27. Sanhai.
28. Sanhal.
29. Sansi, Bhedkut, or Manesh.
30. Sapela.
31. Sarera.
32. Sikligar.
33. Sirkiband.
34. Darain.
35. Dhogri, Dhangri, Siggi, and
36. Sansoi.

List of Scheduled Tribes for Lahaul & Spiti District only.

1. Bhot or Bodh.
2. Gaddi, and
3. Swangla.

Note—There are no Scheduled Tribes in Kangra district, Kulu District, Simla district and Towns of Dalhousie (M.C.) Dalhousie (C.B.) and Bakloh (C.B.) of Chamba District.

5. Literate and Educated Persons:

A person who can both read and write with understanding in any language is considered as literate. A person who can merely read but cannot write is not taken as literate. It is not, however, necessary that a person who is literate should have had received any formal education or should have had passed any minimum educational standard.

6. Workers:

In 1971 Census a person whose main activity is participation in any economically productive work by his physical or mental activity is treated as a worker. Main activity is the one in which one engages oneself mostly. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person has participated in any such regular work on any one of the days during this reference period and that work is returned as his main activity the person is categorised accordingly. Further, the main activity in case of seasonal work such as cultivation, livestock keeping etc., is ascertained with reference to such work in the preceding one year. Total population having been divided into the two groups of "Workers" and "Non-Workers", the workers have further been classified by 9 broad categories according to their main activities. The 9 categories are briefly described

hereunder:

I. Cultivator—For the purposes of the Census a person is considered as a Cultivator if he or she is engaged in cultivation by his or herself by supervision or direction in his or her capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as Wheat, Paddy, Jowar, Bajra, Regi etc., and Pulses, Raw Jute and Kindred fibre Crop, Cotton etc., and other crops such as Sugar-cane, Ground-nuts, Tapioca etc., and does not include Fruit Growing, Vegetable Growing or keeping Orchards or Groves or working of Plantation likeTea, Coffee, Rubber, Cinchona and other medicinal plants.

II. Agricultural Labourer—A person who works in another person's land for wages in money, kind or share is regarded as an Agricultural Labourer. Such a person has no risk in the cultivation but he merely works in another person's land for wages. The labourer can have no right of lease or contract on land on which he works.

III. Livestock, Forestry, Fishing, Hunting and Plantation, Orchards and Allied Activities—Those engaged in Livestock production, Agricultural services, Hunting, Trapping and game propagation, Forestry and Logging, Fishing, Plantations, Orchards etc., are included in this category.

IV. Mining and Quarrying—This category includes all those who are working in only mining or quarrying activities.

V. Manufacturing, Processing, Servicing and Repairs—This category has two sub-categories as below:

(*a*) *Household Industry*—A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory. Further, according to the census concept a Household Industry relates to production, processing, servicing, repairing, or making and selling of goods.

(*b*) *Other than Household Industry*.—This sub-category includes Manufacturing, Processing, Servicing and Repairs, other then Household industry as described above.

VI. Construction—Those engaged in any type of construction and allied activities are included in this category.

VII. Trade and Commerce—This category includes all those persons who are engaged in wholesale or retail trade in any goods. Those working in Restaurants and Hotels, Banking, Financing Insurance, Real Estate and Business services are also classified under this category.

VIII. Transport, Storage and Communications—This category includes Land, Water and Air transport. All activities connected with storage and ware housing and communications like Postal, Telegraphy and Telephone etc., are also included in this category.

IX. Other Services—Those engaged in Community, Social and Personal Services, including Public Administration, Medical and Health Services, Recreational and Cultural Services, Community Services are included in this category. Persons who happen not to adequately describe their activities or those whose services are not classified elsewhere also form part of this category of workers.

X. Non-Workers—This group consists of those persons whose main activity is returned as one of the following:

(*i*) Household Duties.
(*ii*) Students.
(*iii*) Retired persons or rentiers.
(*iv*) Dependents.
(*v*) Beggers etc.
(*vi*) Institutions-inmates of.
(*vii*) Other Non-Workers (Those seeking work).

*These represent provisional 'geographical area' figures supplied by the Surveyor' General. Figures for Urban area are those supplied by the local bodies. Area figures for rural area are derived by subtracting the urban area from the total area of the District. The total of the area figures of the tehsils will not tally with the district figures because the former represent 'land use' area and are derived from the figures supplied by the Director of Land Records, Himachal Pradesh.Like-wise the total of the village-wise area figures may not tally with the tehsil figures because the village-wise area figures are collected from the village-wise. official *Patwari*.
