Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometre worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council and C.T. for Census Town.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

Yavatmal, the name of district is said to have originated from Yeota, and the termination is either the word 'mal' or a 'hill' or a corruption of mahal, chief town of a pargana. In the Ain-I-Akbari the pargana is called Yot Lohara, Lohara being a village three miles to the west of Yavatmal. The district is situated in Vidarbha region, in the eastern part of Maharashtra State.

Yavatmal, with the rest of Berar, must have formed part of the legendary kingdom of Vidarbha mentioned in the Mahabharata. Berar formed part of th empire of Asoka Maurya who reigned from 272 to 231 B.C. The district then came under the dynasty of Sunga. A short inscription in Cava XVI at Ajanta give the name of seven members of the Vakataka family who ruled from 275 A.D. to about 575 the Chalukyas and the Rashtrakutas left no monuments in the district. About 995 A.D., Paramara Raja of Malwa as defeated and the district thus fell once or more under the sway of the Chalukya. Towards the end of the 12th Century, Yadavas of Deogiri captured most of the northern districts of Chalukya kingdom and Yavatmal district was annexed by this dynasty.

During the Mohammadan period Yavatmal district was included in 1347in the dominion of Ala-Uddin Bahaman Shah, the founder of the Bahamani dynasty. In 1572 the district was annexed to the Ahmadnagar kingdom. In 1596, it was ceded by Chand Bibi the queen of Ahmadnagar to Sultan Murad, Akbar's son and the province thus came under Mughals. After the death of Aurangzed (1,707), his son permitted Marathas to collect Chauth and Sardeshmukh. In 1738, Raghuji Bhosala, became the ruler of the territory. In 1853 the district was assigned to the East India Company.

Upto 1863 Yavatmal was a part of East Berar district. In 1864 the tahsils of Yavatmal Darwha, Kelapur and Wan (Wani) were separated from that district to form a new district called South-East Berar and later named Wun (Wani) district. In 1905 Pusad tahsil was transferred from Basin district to Wun district and the designation of the district changed from Wun to Yavatmal. There were no major changes in the boundaries of thedistrict between 1911 and 1955.

With the re-organisation of State in 1956, the district was transferred from Madhya Pradesh to Bombay State. Since 1st May 1960 the district forms a part of Maharashtra State.

At the time of 1961 Census the district comparised of 5 tahsil having 1629 inhabited villages and 8 towns. During the decades 1961-71 and 1971-81 the number of tahsils and towns remained unchanged, but there has been certain changes as to the number of villages due to upgrading of hamlets/ wadis into villages. The number of inhabited villages went upto 1647 in 1971 and 1751 in 1981 Census. After 1981 Census 9 new tahsils were created from the existing 5 tahsils. Two new towns 'Umarsara' in Yavatmal tahsil and Rajur in Wani tahsil were created and the number of villages increased upto 1836 in 1991. In 1991 Census, there were 14 tahsils with 1836 inhabited villages and 10 towns in the district. In Census 2001 the number of tahsils of Yavatmal distict rose from 14 in 1991 to 16 in 2001 census. Arni new tahsil created from 69 villages from Digras tahsil and 37 villages from Ghatanji tahsil. Zari Jamani tahsil created from 10 villages from Kelapur and 118 villages from Maregaon tahsil. 3 new census towns

viz., Waghapur , Wadgaon Road (Yavatmal tahsil) and Vasantnagar (Umarkhed tahsil) are created after 1991 census. Thus in 2001 there were 16 tahsils 2,130 (including 264 uninhabited) villages and 13 towns in the district.

(iii) Administrative Set-Up

There were Major changes in the administrative set up of Maharashtra immediately after the 1991 census of Maharashtra, resulting into increase of five districts. The number of division are remained the same i.e., in 2001 census as in 1991 census. The total number of districts rose from 30 in 1991 Census to 35 in 2001 Census. Mumbai district of 1991 divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya were formed bifurecating Dhule, Akola, Parbhani and Bhandara districts respectively. Konkan division has 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Thus for 2001 Census the state has 35 districts spread over 6 divisions. Yavatmal district is a part of Amravati division. Thus Yavatmal district now has 16 tahsils and 13 towns including 3 new Census towns. There are now 2130 villages spread over Ner (121), Babulgaon (127), Kalamb (142), Yavatmal (149), Darwha (145), Digras (80), Pusad (187), Umarkhed (156), Mahagaon (116), Arni (111), Ghatanji (120), Kelapur (140), Ralegaon (133), Maregaon (115), Zari-Jamani (128) and Wani (160). The changes which occured after 1991 Census in the number of villages, towns in each tahsil and reason for each the changes are shown in the following statement in brief.

For administrative purposes the district is divided into five sub-divisions of Wani, Kelapur, Yavatmal, Darwha and Pusad. Wani sub-division includes Wani, Maregaon and Zari-Jamni tahsils, Kelapur sub-division includes Kelapur, Ghatanji and Ralegaon tahsils, Yavatmal sub-division includes Yavatmal, Babhulgaon, Kalamb and Arni tahsils, Darwha sub-division includes Darwha, Ner and Digras tahsils and Pusad sub-division includes Pusad, Mahagaon and Umarkhed tahsils. The District collector, alongwith the District Judge, Superintendent of Police, Chief Executive Officer of Zilla Parishad and other Senior Officers of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the

inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction

of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented

this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Yavatmal district lies in the southwestern part of the Wardha-Penganga-Wainganga plain. The district lies between 19° 26' and 20° 42' north latitudes and 77° 18' and 79° 9' east longitudes. It is surrounded by Amravati and Wardha district to the north, Chandrapur district to the east, Andhra Pradesh state and Nanded district to the south and Hingoli and Washim districts to the west.

The district has an area of 13,582 sq.kms. and a population of 2,458,271 persons as per Census 2001. While the area of the district accounts for 4.4 percent of the total area of the State, the districts population constitutes 2.5 percent of the total population of the State. The density of population is 181 persons per sq. km. Among the 35 districts of the State, the district ranks 6th in terms of area, 16th in terms of population and 32nd in terms of density.

The headquarters of the district is located at Yavatmal, a town with a population of 120676 persons as per the 2001 Census. It is well connected by roads to the different tahsil headquarters and is also connected to Achalpur by a narrow gauge railway line.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, **Yavatmal**, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

The district lies in the Wardha-Penganga-Wainganga Plain micro region of the Deccan Plateau. On the basis of local variation in relief and other factors the district can be grouped in four parts i.e. 1) Wardha-Bembla Plain, 2) Yavatmal-Darwha Plateau, 3) Pusad Hills, and 4) Penganga Valley.

Wardha-Bembla Plain is situated in the north in a narrow belt of about 8 to 22 Kms. in width along the Bembla and right bank of the Wardha river. It covers parts of Ner, Babulgaon, Kalamb, Ralegaon, Moregaon and Wani tahsils. This plain is an extension of Payanghat, the valley of Berar. The height of the plain varies between 200 to 300 meters. The northern part of the plain is comparatively higher than the southern part. The surface is smooth and slopes gradually towards the southeast. The plain is drained by Wardha river and its tributary the Bembla river. Other small streams originating from Yavatmal-Darwha plateau join these rivers.

Yavatmal-Darwha Plateau is situated in the middle of the district and includes major parts of Darwha, Digras, Arni, Yavatmal, Kalamb, Ghatanji, Kelapur, Moregaon and Zari-Jamani tahsils. It attains a height of 300 to above 400 metres. The northern parts of the plateau near Yavatmal town has a height of above 400 meters while the southern part is lower. It is a dissected plateau with uneven surface. Here and there it rises into ridges or into flat topped or pointed hills. The plateau is partly covered by dense mixed jungle, mainly reserved forests. A number of small streams/ rivers originate from the plateau. Out of these the main are the Waghari and Kuni rivers which are southward flowing tributaries of Penganga river. Aran and its tributary Arna also drain the plateau but originate in Washim district.

The Pusad Hills are situated in the south-western part of the district and cover major parts of Pusad, Mahagaon and Umarkhed tahsils. These hills are the extension of the Ajantha mountains. They attain a height of between 400 and 600 meters. The southern parts of the hills are comparatively higher than the northern part. The region is uneven in surface and slopes towards east. The hills have a fair cover of forests. The Pus river flows towards the east through the middle of this region. It is a tributary of the Penganga river.

The Penganga Valley is a long narrow strip along the southern boundary of the district. The valley includes parts of Pusad, Umarkhed, Mahagaon, Arni, Ghatanji, Kelapur, Zari-Jamani and Wani tahsils. The height of the valley varies between 300 and 400 meters. The valley is comparatively higher in the west than in the east and it slopes towards the east. A number of small flood plains are found within the valley through the course of the Penganga river which have a thick layer of black soil. The floodwaters of the Penganga may extend as far as half a mile and within this flood zone Kharif jowar is planted. If the jowar crop is washed away, its stalks help in trapping the silt and hence a bumper crop of wheat is got during the rabi season. Mango trees are also found at the extreme limit of the flood zone.

Drainage

The chief rivers of the district are the Wardha and Penganga, both of which flow along the northeastern and southern district boundaries

respectively. The wardha river rises to the east of Multai in Madhya Pradesh. It flows in a general southeasterly direction along the northeastern boundary of the district. The Wardha is the only river of the district that is partly navigable. The bed of the river is broad and deep, but the banks are sometimes overflowed in times of exceptional floods. During the monsoons, the river flows with a strong current but in summer the river is fordable at a number of places. The Bembla and the Nirguda are the main tributaries of the Wardha within the district and both are perennial. The Bembla rises in Amravati district and only the last 30 kilometes or so drain Yavatmal district. The Niguda river rises within the district itself and has a length of about 165 kilometes.

The Penganga river rises in the Ajantha range a little to the southwest of Buldana town. It is a major tributary of the Wardha river. The river is deeply entrenched and has a meandering course. The Penganga forms the southern district boundary throughout its long sinuous course. The river changes twice from one longitudinal valley to a parallel longitudinal valley northward by making big 'S' shaped curves. The Pus, Arna, Aran, Waghavi and Kuni are the major tributaries of the Penganga river within the district.

Climate

The climate of the district is, in general, hot and dry with moderately cold winters. The year may be divided into four seasons. The hot season begin in March and extends up to the first week of June. This is followed by the south-west monsoon season which last up till the end of September. October and November constitute the post monsoon season and is followed by the cold season, which lasts till February.

Most of the total annual rainfall of the district is received during the south-west monsoon season. The rainfall is not uniform in all parts of the district. Wani in the eastern part of the district receives 1125 mm of rain and Darwha in the western part of the district receives 889 mm of rain. Yavatmal in the central portion of the district receives 1099.5 mm of rain. In general, the amount of rainfall, increase as one proceeds from west to east.

The summer season from March to May is one of continuous rise in both day and night temperature. May is generally the hottest month of the year with the mean daily maximum temperature at about 42 degrees celsius. With the on set of the south west monsoons there is an appreciable fall in temperatures and the weather becomes pleasant. With the withdrawal of the monsoons, day temperature increase slightly while night temperature progressively decrease. From about the end of November both day and night temperature fall rapidly. December is usually the coldest month of the year with the mean daily minimum temperature at about 13degree Celsius. The cold waves over northern India sometimes affect the district and the minimum temperature may drop to about 5 degrees Celsius.

During the southwest monsoon season the air is humid and the skies are heavily clouded to overcast. During the rest of the year the air is generally dry and the skies are clear or lightly clouded. Winds are generally light to moderate with some increase in force in the latter part of the summer season and the monsoon months.

Natural Wealth

Minerals

The geology of the district is transitional with trap rocks predominating. Accouring to the period of the formation, the rocks of Peninsular India can be divided into three main groups, the Archaean, the Purana and Aryan. In the district the Archaean rocks were entirely covered by the Gondwana system. Next the Deccan traps were spread over all. Finally the action of the atmosphere removed the Daccan traps in parts exposing Gondwana and Lamenta beds.During the last stage also alluvial soil, the common Black cotton soil, was spread over parts of the district.

The Archaean group is the oldest. It consists of crystalling rocks of various kinds, the most prominent being gueisses and schists and the rocks of the Dharwarian system. No Archaean rock has been noticed in the district.

The Purana group occurs next in point of antiquity. It consists of sediments. In parts, as in the Cuddapah, system, the thickness of this group is as much as

20,000 feet. It can be divided in to lower and higher beds. The lower beds consists chiefly of ferruginus jaspers and procellanities, the higher of shales, limestones and sandstone.

The Aryan group is the most recent and includes two great subdivisions-the Gondwana system and the Deccan trap. The Gondwana system is formed of sub-aerial and freshwater deposits. It is divided into lower and upper Gondwana and further distinctions are made in these. In the lower Gondwanas there occurs the Damuda Series which contains the most valuable of the Indian coal seams. In the upper Gondwanas there occurs the Mahadeva Series which consists chiefly of sandstone.

The Deccan trap is perhaps the most extraordinary of all these formations. It consists of volcanic lava flows which are spread out in the form of horizontal sheets or beds. Because of their dominantly basaltic composition and the tendency to form flat topped plateaus, the lavas are termed plateau basalts. Since these basaltic lava flows cover an extensive region in the Deccan and frequently present step like appearance to the hills and ridges they are commonly termed as 'Deccan traps' the word trap meaning 'step like'. The rocks wither by exfoliation into massive spheriodal boulders which are usually seen on hill slopes and foot hills. In some flows the basalt is columnar and weathers into fantastic shapes.

At the base of the Deccan trap there are beds known as the Lameta Series. They consist chiefly of limestone. They were probably formed by the weathering of the Gondwana or other rocks before lava spread over them.

The district has rich deposits of coal, which are found in northern part of Maregaon and Wani tahsil. The coal fields geologically belong to the Barakav stage of the Damuda Series of the Lower Gondwana system. The district also has extensive deposits of good quality limestone, in Maregaon and Wani tahsils belonging to the Vindhyan system, which is suitable for the manufacture of cement.

Deccan traps cover most of the district. Trap rocks are generally barren of any economically useful and important minerals. But being hard, dense and durable they are extensively used are building stones, road metal, railway ballast and as an aggregate for concrete mixtures.

Fisheries

Fishing activities in the district are naturally confined to inland waters. Fishing is mainly a part time occupation and is carried out in the rivers, tanks and reservoirs of the district. Fishing is done with cast nets, drift nets, drag nets, and hook and line. Fishermen in the district belong to the Dheemer, Bhoi and Kahar communities.

Some of the commercially important varieties of fish found in the district are Murrel, Dhadkya., Botri, Tambu, Poshti, Mahseer, Kolus, Magur and Zinga. These varieties however are not of the fast growing types.in order to augment the fish supply, fast growing varieties of major carps like Rohu, Catla and Mrigal are imported annually from Kolkata and are stocked in tanks.

Soil And Cropping Pattern

The soils of the district are generally black and are mostly derived from the Deccan traps, which cover most of the district. They are of a uniform fine texture and vary in colour from black to dark brown. They are, however, slightly inferior in productive capacity to those found in the other districts of the important cotton-growing region in the Wardha basin. The soils of the district possess three common defects: a mixture of nodular pieces of limestone, sloping surface and an excessive admixture of sand.

Bardi is a stony soil, which is shallow and found on the high lying slope of the district. It is sandy loam to loamy in texture brownish black in colour and underlaid with murum derived from the basic rock basalt. Cotton, tur & jowar are the main crops grown in this soil.

Medium soil is found in low-lying areas. It is black to deep black in colour, rich in lime content and retentive of moisture. Kali soil is the most fertile soil of the district. It is a deep alluvium soil, very fertile and occurs in the river valleys of the district. Intensive harvest of cotton, jowar and pluses are the characteristics of this soil.

Tambdi or red soil is found in Wani tahsil. This soil is of uniform but coarse texture and is reddish in

colour. In Kelapur and Ghatanji tahsils the soil is coarse and gravelly or loose friable texture. It varies in colour from light brown to gray. Cotton and jowar are the main crops grown here.

Land And Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pat use classification for the maintenance of records. Columns 19-23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is connoted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	812,857
2)	Total Buffaloes	142,606
3)	Total Goats	398,699
4)	Total Sheep	10,598
5)	Total Pigs	13,699
6)	Total Equine	2,810
7)	Total Camels	0
8)	Total Rabbits	141
9)	Total Livestock (excluding dogs)	1,381,410
10)	Total Poultry (including Ducks)	645,102

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,381,410 and total poultry (including ducks) are 645,102 in the district. Out of the total livestock, the total crossbred/ indigenous cattle are 812,857; total buffaloes are 142,606; and goats 398,699; sheep 10,598 pigs 13,699; equine 2,810 and camels 0 and rabbits are 141.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	102
2)	Average Livestock per village	752
3)	No. of livestock per thousand human population	665
4)	No. of in-Milk cows per thousand human population	51
5)	No. of in-Milk buffaloes per thousand human population	20
6)	No. of poultry fowls per thousand human population	311

7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	32
8)	No. of tractors per thousand hectares of gross cropped area	1
9)	No. of Veterinary Institute per lakh livestock	15

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 102 while average livestock per village is 752. For every thousand human population there are 665 livestock, 51 in-milk cows, 20 in-milk buffaloes and 311 poultry fowls. While there are 32 bullocks and male buffaloes per hundred hectares of gross cropped area and 1 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 15.

Industry

Yavatmal district is one of the industrially backward district in the state. Most of the industries in the district are related to the processing of agricultural product. The existing industries are mostly of medium and small scale like cotton ginning and processing weaving and oil mills etc. The only large scale industry in the district is the Yavatmal oil industry at Yavatmal and sugar factory Vasantnagar in Umarkhed tahsil. The large deposit of minerals like limestones, charcoals found in the district, most of the lime stone is send to cement factories at Chandrapur. In the Yavatmal district there are Industrial estate Lohara near Yavatmal, Pusad and Wani.

The important small scale industries in the district are basket weaving, earthern pots, groundnut oil, bricks and tiles, manufacturing of furniture and blanket weaving. Ginning is an important industry in the district. Other industries are spnning mills, sweet oil mills, saw mills, milk cooling and preserving factories. There is a bone fertilizer industry and nylon factory at Yavatmal in the district.

Trade and Commerce

Jowar and cotton are the main products of the district. Other important cash crops are groundnut and pulses. The chief export articles of the district are cotton and teakwood giving highest revenue to the district. Other exports items are cotton bales, lime, ice candy, wooden furniture and sugar pasha khadhya, oranges, coal and tendu leaves etc.

The chief import articles are cloth, raw cotton, limestone, machinery, cement, medicine gur etc. Most of these imported from Nagpur, Mumbai and Pune. A part from the weekly markets and fairs Yavatmal, Pusad, Wai, Digras, Ghatanji, Pandharkaoda, Ralegaon, Umarkhed, Darwha and Ner are the important trade centres in the district.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles
	1	2
1	Buses	695
2	Cars & Station Wagons	1,334
3	Jeeps	2,025
4	Taxies	191
5	Autorickshaws	2,602
6	Mopeds	20,844
7	Scooters	11,459
8	Motor Cycles	14,960
9	Total Goods Vehicles	2,492
10	Tractors	1,789
11	Trailors	1,817
12	Others	55
	Total	**60,263**

Source: Transport Commissioner office

It is seen that the district had moped 20,844, motor cycles 14,960 and scooters 11,459. There are 695 Buses, 1,334 cars and station wagons, 2,025 jeeps, 191 taxies and 2,602 autorickshaw, 55 modes of other transport. The district also has 1,789 tractors, 1,817 trailors and 2,492 goods vehicles as means of transport.

Electricity and Power supply

The proportion of electrified villages in this district is impressive. All the 13 towns (100 percent) and 1,795 (96.7 percent) villages out of 1,856 inhabited villages are enjoying the power supply facility.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which

are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to Census 2001 the district Yavatmal has a total population of 2,458,271 comprising of 1,265,681 males and 1,192,590 females. The population of the district in Census 2001 is 18.3 percent higher than the district population 2,077,144 in 1991 Census. Yavatmal tahsil is most populous with a population of 335,967. As much as 13.7 percent of the population is concentrated in tahsil Yavatmal. Other tahsils in order of population size are Yavatmal (335,967), Pusad (285,458), Umarkhed (222,818) ,Wani (193,713), Darwha (173,480), Mahagaon (158,230), Kelapur (140,907), Arni (139,861), Digras (134,928), Ghatanji (125,214), Ner (110,762), Ralegaon (104,832), Kalamb (95,830), Babulgaon (89,153), Maregaon (74,879) and Zari-Jamani (72,239).

An examination of rural urban distribution of population reveals that 2,001,060 persons constituting 81.4 percent of the total population concentrated in rural areas while 457,211 persons 18.6 percent are living in urban areas of the district. Although in absolute numbers of population living in rural areas has increased from 1,720,213 in 1991 to 2,001,060 in 2001 in terms of percentage decreased from 82.8 percent in 1991 to 81.4 percent in Census 2001.

The average growth rates for the rural and urban areas of the district are 16.3 percent and 28.1 percent respectively. Mahagaon tahsil has registered the highest rural growth rate (22.8 percent) while Yavatmal tahsil has the lowest growth rate (10.0 percent). The tahsil of Kalamb (16.6 percent) Darhwa (18.5 percent) Digras (16.9 percent), Pusad (22.1 percent), Mahagaon (22.8 percent), Kelapur (16.8 percent) and Wani (17.9 percent) are above the district average (16.3 percent) and Ner (15.3 percent) Babulgaon (12.4 percent) Yavatmal (10.0 percent), Umarkhed (14.8 percent) Arni (15.9 percent), Ghatanji (14.8 percent), Relegaon (13.5 percent) Maregaon (13.6 percent) and Zari-Jamani (12.2 percent) are below the district average.

In urban areas the growth rate is above the district average in tahsil Yavatmal (46.9 percent). Remaining seven tahsils below the district average and eight tahsils have no urban areas at all.

The percentage of urban population to total population is an indicator of the level of urbanization of an area. Yavatmal is most urbanized tahsil with 53.2 percent population being urban followed by Wani (33.3 percent), Digras (29.0 percent), Pusad (23.5 percent), Kelapur (18.9 percent) Umarkhed (17.1 percent), Ghatanji (15.5 percent) and Darwha (13.5 percent) respectively. The proportion of urban to total population of Yavatmal district stood at (18.6 percent) in 2001 Census. Corresponding against (17.2 percent) in 1991 Census.

Table 2 gives the percentage distribution of inhabited villages by population size ranges in each tahsil in 2001 Census.

Out of the 1856 inhabited villages 167 (9.0 percent) are small sized with population below 200, in the size of 200 to 499 there are 394 (21.2 percent) villages, in the size class 500-999 there are 608 (32.8 percent) villages, 494(26.6 percent) are in the size class 1000-1999, 161 (8.7 percent) are in the size clas 2000-4999, 26 (1.4 percent) villages in the size class 5000-9999 and only 6 (0.3 percent) village having population 10000 and above. For a broader generalization villages have been further group as small sized (below 500), Medium sized (500-1999) large sized (2000-4999) and exceptionally large sized (5000+). Within the district small sized villages less than 500 inhabitants together account for 30.2 percent of the total inhabited villages, 7.9 percent of the rural population in the district. Medium sized (500-1999) contribute 59.4 percent of the total inhabited villages. 56.4 percent of the rural population, large sized (2000-4999) are 8.7 percent of total inhabted villages with 22.3 percent of the rural population and exceptionally large size (5000+ are 1.7 percent of the total inhabited villages and 13.4 percent of the total rural population.

With in the sixteen C.D. Blocks of the district percentage of less than 200 sized villages is the highest in Kalamb C.D. Block (19.0 percent) and the lowest in Yavatmal C.D. Block (3.9 percent).

Percentage of 200-499 sized villages is higher in Maregaon C.D. Block (37.5 percent) and lowest in Umarkhed C.D. Block (10.4 percent), in 500-999 sized villages is higher in Maregaon C.D.Block (43.2 percent) and lower in Babulgaon C.D. Block in (23.6 percent), in 1000-1999 sized villages is higher in Arni C.D. Block (39.0 percent) and lower in Zari Jamani C.D. Block (13.5 percent), in 2000-4999 sized villages is higher in Digras C.D. Block (15.6 percent) and lower in Zari Jamani C.D. Block (2.9 percent) in 5000-9999 size class villages is higher in Mahagaon (4.5 percent) and lower in Wani C.D. Block (0.7 percent) and in 10000 and above size villages is higher in Ner C.D. Block (1.1 percent) and lower in Kalamb, Yavatmal and Umarkhed C.D. Block (0.8 percent).

In Yavatmal district as a whole there are 942 females for every thousand males within the district. The sex ratio varies from 972 in Zari Jamani tahsil to 932 in Digras tahsil. The sex ratios in all tahsils are lower in 2001 as compared to 1991. Four tahsils of rural areas have a higher proportion of females than urban areas. The sex ratios for rural and urban areas of Yavatmal district are 944 and 936 respectively. In rural areas six out of 16 tahsils have higher sex ratios than the district rural average and

remaining ten tahsils have lower sex ratio to the districts rural average. In urban areas sex ratio in three tahsil are above the district average. Yavatmal tahsil is equal the district average and remaining four tahsils are lower the district average. Tahsils Ner, Babulgaon, Kalamb, Mahagaon, Arni, Ralegaon, Maregaon and Zari Jamani are totally rural.

The sex ratio for the Yavatmal district for 0-6 age group is 933. Ner (944), Kalamb (950), Umarkhed (949), Ghatanji (949), Kelapur (947), Ralegaon (944), Maregaon (938) and Zari Jamani (943) tahsils have more balanced sex ratio in 0-6 age group as compared to district average in 0-6 groups. Remaining tahsils namely Babulgaon (927), Yavatmal (913), Darwha (930), Digras (927), Pusad (927), Mahagaon (928), Arni (926) and Wani (927) have lower sex ratio as compared to district average (933). In rural areas eight out of 16 tahsils have higher sex ratio than district rural average (937), namely Ner (944), Kalamb (950), Umarkhed (949), Ghatanji (963) Kelapur (956), average. i.e. Babulgaon (927), Yavatmal (928), Darwha (934), Digras (930), Pusad (927), Mahagaon (928), Arni and Wani (926).

For the urban areas the district sex ratio is 911. Four tahsils having sex ratio above the district urban average and four tahsils having sex ratio below the district urban average. Ner, Babulgaon, Kalamb, Mahagaon, Arni, Ralegaon, Maregaon and Zari Jamani tahsils are no urban area in the district. The highest urban sex ratio of population in the age group 0-6 is in Umarkhed tahsil (949) and lowest is in Ghatanji tahsil (864).

Table 14 gives the percentage of Scheduled Castes and Scheduled Tribes population to total population in rural and urban areas of tahsils in the district. The percentage of Scheduled Castes and Scheduled Tribes constitute 10.3 percent and 19.3 percent of the total population respectively. The percentage of Scheduled Castes population is above the district average in six tahsils i.e. Ner, Babulgaon,

Kalamb, Yavatmal, Darwha and Umarkhed and below in ten tahsils i.e. Digras, Pusad, Mahagaon, Arni, Ghatanji, Kelapur, Ralegaon, Maregaon, Zari Jamani and Wani. The highest proportion of Scheduled Castes population is found in Ner tahsil (18.2 percent) and Maregaon tahsil (4.8 percent). The percentage of Scheduled Tribes population is above the district average in six tahsils viz. Kalamb, Ghatanji, Kelapur, Ralegaon, Maregaon and Zari Jamani and below in ten tahsil viz. Ner, Babulgaon, Yavatmal, Darwha, Digras, Pusad, Umarkhed, Mahagaon, Arni and Wani. The highest proportion Scheduled Tribes population in Zari Jamani (40.7 percent) and lowest in Ner tahsil (7.2 percent). In rural areas the percentage of Scheduled Castes and Scheduled Tribes constitute 10.0 percent and 22.1 percent of the total population respectively. The percentage of Scheduled Castes population is found highest in Ner tahsil (18.2 percent) and lowest in Maregaon tahsil (4.8 percent). The highest pecenatge of Scheduled Tribes population is found in Kelapur tahsil (42.5 percent) and lowest in Ner tahsil (7.2 percent). In urban areas the proportion of Scheduled Castes and Scheduled Tribes constitute 11.4 percent and 7.0 percent of the total population respectively. The proportion of Scheduled Tribes population is found highest in Kelapur tahsil (12.8 percent) and lowest in Darwha tahsil (2.8 percent). The proportion of Scheduled Castes population is found highest in Yavatmal tahsil (13.2 percent) and lowest in Darwha tahsil (6.8 percent).

Scheduled Castes and Scheduled Tribes constitute 10.0 percent and 22.1 percent respectively of the total population. The proportion of Scheduled Castes population is above five C.D. Blocks. Viz. Ner, Babulgaon, Kalamb, Darwha and Umarkhed and below the district average in remaining 11 C.D. Blocks i.e. Yavatmal, Digras, Pusad, Mahagaon, Arni, Ghatanji, Kelapur, Ralegaon, Maregaon, Zari Jamani and Wani.

Note: Percent of Worker to total worker are given in brackets

The importance of main shares of economic activity can be gauged from the pattern of economic distribution of workers according to the broad four fold categories classification namely cultivators, agricultural labourers, household industry workers and other workers, which supported by cultivator factor 27.6 precent and agricultural labour 49.7 percent together constitute 77.3 percent of the total workers in the district. The agricultural sector absorbed 77.3 percent of the total population in the district and remaining 22.7 percent of population engaged in household industry and other work.

The proportion of both cultivators and agricultural labourers differs considerably from tahsil to tahsil. The proportion of cultivators varies between 42.2 percent in Zari Jamani tahsil to 11.4 percent in Yavatmal tahsil. The proportion of agricultural labourers varies between 64.2 percent in Babulgaon to 31.8 percent in Yavatmal tahsil. Household industry workers varies1.6 percent in Ralegaon tahsil to 0.9 percent in Ner and Darwha tahsil. Other worker varies 55.6 percent in Yavatmal to 9.2 percent Zari Jamani tahsil.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 Census only main workers were presented in to four categories. One of the novel features of the Primary Census Abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on questions on children ever born and children surviving canvassed for all ever-married woman has been tabulated by age of the mother. From this, estimates of child mortality have been worked out using Brass technique.

ANNEXURE II (i)

Q5	P	143	91
	M	144	89
	F	143	93

Mortality

From the estimates of child mortality rates, it is observed that that the child mortality in the district is higher than the state for all ages i.e., 1,2, 3 and 5 represented by, q (1), q (2), q (3) and q (5) respectively. A notable feature is higher female child mortality compared to males in the district as well as Maharashtra except in q (5).

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Yavatmal District		Maharashtra State	
	1981	1991	1981	1991
1	2	3	4	5
GFR	159	128	134	124
GMFR	195	165	168	157

TMFR	6.0	5.4	5.2	5.2
Crude Birth Rate (CBR)	35.3	29.9	31.8	29.8
No. of children ever born per women in the age group 45-49	--	5.0	--	4.2
Mean Age at Marriage	--	17.9	--	17.9
Child Women Ratio	--	53.3	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals higher rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR and CBR were 159, 195, 5.0, 6.1 and 35.3 respectively as compared to State average of 134, 168, 4.3, 5.2, and 31.8 in Census 1981. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR and CBR were 128, 165, 3.9, 5.4 and 29.9 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are higher for the district than the State as a whole. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage recorded lower for the district than the State in 1991.

Child Woman Ratio

The child woman ratio is recorded higher for the district than the state in 1991 census.

Source : Table 31 of Maharashtra State District Profile 1991

Marathi is the main language of the district and is the mother tongue of 65.1 per cent of the district population. In rural areas Marathi speakers account for 65.1 per cent whereas in urban areas 65.2 per cent. Banjari is the second largest language spoken in the district. It accounts for

14.2 per cent of the total population. The proportion of Banjari speakers is higher in rural areas (17.0 per cent) than the urban areas (1.8 per cent). The third largest language spoken in the district is Urdu, its percentage to the total population is 5.0 and mainly spoken in rural areas by 2.9 per cent, whereas it is 14.4 per cent in urban areas.

The speakers of the minority languages viz., Gondi, Kolami, and Telugu are mainly concentrated in rural and remaining three languages (Gujarati, Marwari and Hindi) are concentrated in urban areas.

It is found that during the last decade proportion of Marathi speaking persons has decreased from 68.2 per cent to 65.1 per cent whereas Banjari speakers proportion has increased from 12.5 per cent to 14.2 per cent.
