Panhala Fort

Panhala Fort crowns one of the tops of the Panhala spur of the Sahyadris, about twelve miles to the north-west of the Kolhapur–Ratnagiri Road. The Panhala uplands are 2,772 feet and the hill top, which the Panhala fort crowns rises about 275 feet above the uplands. The fort is about four and half miles in circumference. For about half the distance it is protected by a scarp thirty to fifty feet high, which in places is strengthened by a loop holed parapet wall. For the remaining half the fort is surrounded by a strong stone wall, fifteen to thirty feet thick at the top and with bastions at convenient distances for carrying guns. The Fort, had three magnificent double gateways of which, one gateway Car Darvaja has been destroyed while Tin Darvaja and Wagh Darvaja are still intact. About forty-six yard from the third gateway, a beach about forty yards long marks the spot where the British troops forced an entrance when the Fort was held by insurgents in 1844.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometre worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council, C.T. for Census Town, M.Corp. for Municipal Corporations

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike.In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all

statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

Kolhapur is one of the oldest cities in the country. It derives it importance from its past political association and its position as a great commercial historical religious and education centre. As a religious centre Kolhapur derives its appellation of Kashi of the south from the imposing ancient temple of Mahalakshmi also known as Ambabai. It is said to have been built by King Karnadeva of Chalukya Kingdom around 550 AD to 660 AD and embellished by the Silahara rulers of Kolhapur in the 9th century which represents the best Hindu architectural model of its kind.

According to 'Puranas' this tract of the country was originally called 'Kurvir' from the godess Mahalakshmi wring her mace (Kur) in lifting her favoured retreat from the waters of the great deluge. According to another legend the name 'Kolhapur' is derived from the story that a demon 'Kole' (Kolhapur) was defeated and killed on a hill in the vicinity of Kolhapur. Fresh light has been thrown by the recent theory put forward by Prof.G.H. Khare. According to him the name might have been evolved by its geography. The original Kannada word 'Kolla' or 'Golla' (river bed) must be the source as the Kolhapur is situated on the bank of river Panchganga.

Before the temple of Mahalakshmi was built, there appears to have been six centres of habitation or hamlets. The separate existence of these six centres vanished after building of Mahalakshmi temple, which became the centre of Kolhapur city. The history of Kolhapur can be broadly divided into three periods —early Hindu period reaching about A.D. 1347.— Muslim period lasting from A.D. 1347 to about A.D. 1700 and Maratha period since 1700. Around A.D. 500 Kadambas must have been succeeded the Andhrabhrtyas whose capital was at Palasika about 150 Kms south-east of Kolhapur. After the Kadambas the Kingdom was passed to the Chalukyas, Rastrakutas, Western Chalukyas, Kolhapur Silaharas and finally to the Yadavas of Devagiri.

Soon after the overthrow of the Yadavas by the Delhi Sultan in A.D. 1347 this area came under the Bahamani King of the Deccan and after the the Kings of Bijapur. The heroic conquests by the Shivaji of various forts held by Adilshah of Bijapur in the neighbourhood of Kolhapur like Panhala and Vishalgad in 1659, increased the commercial and also political importance of Kolhapur. Many wars have been fought at Vishalgad and Panhala by Shivaji and Adilshah of Bijapur. After the death of Shivaji Aurangzeb captured Panhala and Vishalgad at the beginning of 18th century but he could not hold them for a long time because the second son of Shivaji, Rajaram who had succeeded his father after the death of his elder brother Sammbhaji took up Panhala fort which was for many years the virtual capital of Kolhapur State. In 1782 the seat of Government was moved from Panhala to Kolhapur. The accession of Rajarshi Shahu Chhatrapati to the throne when he was only ten years old. laid the foundation of a new modern era. His rule lasted 38 years from 1884 to 1922 and his authority extended to higher levels of socio-economic activities. During his rule he touched every aspect of social and economic life of his subjects.

In 1884 Kolhapur as a state had the following six subdivisions viz., Karvir, Panhala, Shirol, Ajra, Gadhinglaj and Bhudargad. In addition it had two petas Raybad under Shirol and Katkol under

Gadhinglaj. In the year 1948, the Kolhapur state was merged with the Indian Nation. In 1949, 956 Villages together with five villages from the former state of Kurundvad one village from the state of Miraj and seven villages from Belgaum district were formed into the new district of Kolhapur. Raybag and Katkol were transferred to Belgaum. The new district consisted of Shahuwadi, Hatkangale, Shirol, Karvir, Radhanagari, Kagal, Bhudargad and Gadhinglaj talukas and Panhala, Bavda and Ajra mahals. In 1956 Chandgad taluka was transferred from Belgaum. With the reorganization of states, the district was included in Bombay state in 1956. It forms a part of Maharashtra since 1960.

1961 census has recorded 9 talukas 3 Mahals with 1086 villages and 11 towns. During 1961-71 decade the mahals were upgraded and accordingly12 tahsils with 1093 villages and 11 towns were recorded in 1971 census. For 1981 census twelve tahsils with 1208 villages and 12 towns including one newly created town were recorded. During 1981-91 decade two villages from Chandgad Tahsil were transferred to Sawantwadi tahsil and 53 villages from Bavda tahsil were transferred to newly created Vaibhawadi tahsil of Sindhudurg district. Thus in 1991 census 12 tahsils with 1203 villages (including 15 uninhabited) and 12 towns were recorded.

During 2001 Census Kolhapur District recorded 1217 total villages and 18 towns during this census total 27 villages are declared newly formed revenue village in the tahsils Shahuwadi, Shirol, Radhanagari, Bhudargad, Ajra and Chandgad.

(iii) Administrative Set-Up

There were Major changes in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Greater Bombay district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya district were formed bifurcating, Dhule, Akola, Parbhani and Bhandara district respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Kolhapur district, which is a part of Pune division, has no jurisdictional changes since 1991 census. Thus Kolhapur district has now 12 tahsils and 18 Towns 1217 villages spread over Shahuwadi (145), Panhala (130), Hatkangale (58), Shirol (54), Karvir (125), Bavda (39), Radhanagari (114), Kagal (86), Bhudargad (117), Ajra (99), Gadhinglaj (93), and Chandgad (157) tahsils. The following statement indicates the changes, which occurred after 1991 in number of villages and towns in each tahsil and also reasons for variation in brief :-

The District Collector alongwith the District Judge. Superintendent of Police, Chief Executive Officer of Zilla Parishad and other Senior Officers of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and Other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The

'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and

the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad

b) Panchayat Samitis

c) The Standing Committee

d) The Subjects Committees

e) Presiding authorities

f) The Chief Executive Officer

g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is

responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Kolhapur district is situated in the extreme southern part of Maharashtra State. It lies between 15° 43' and 17° 17' north latitudes and 73° 40' and 74° 42' east longitudes. It is surrounded by Sangli district to the north, Karnataka State to the east and south and Ratnagiri and Sindhudurg districts to the west. The Sahyadri ranges to the west and Varna river to the north form the natural boundries.

The district has an area of 7,685.00 sq.kms. and a population of 3,523,162 persons as per Census 2001. While the area of the district accounts for 2.5 percent of the total area of the State, the districts population constitutes 3.6 percent of the total population of the State. The density of population is 458 persons per sq. km. Among the 35 districts of the State, the district ranks 20th in terms of area, 9th in terms of population and 5th in terms of density.

The headquarters of the district is at Kolhapur, a city with a population of 493,167 as per 2001 Census. Kolhapur was the capital of the former Kolhapur State, a premier State of the Deccan and was also the seat of the Residency for Deccan States. It derives its importance from its past political associations and its present position as a great commercial, religious, cultural and educational centre. It is well connected both by road as well as by rail.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and **Kolhapur**.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

The district lies in the Eastern Plateau, the Micro level division of Deccan plateau, in the extreme southern part of the state. The district as a whole is a table land which descends towards south-east. In general, the physiography of the district may be grouped into 3 (three) parts. i.e. (i) The Sahyadri Hills, (ii) The Plateaux and (iii) The basin of Krishna river.

(i) The Sahyadri hills are spread in a north-south direction along the western boundary of district covering the entire tahsils of Bavda and Shahuwadi, a major part of Panhala and Radhanagri tahsils, parts of Ajra, Bhudargad and Chandgad tahsils, a small part of Karvir tahsil. This part of Sahyadri hills has an elevation between 800 and 1,000 metres. Some peaks have heights more than 1000 metres. A number of finger like spurs run eastwards from the Sahyadri hills and finally they merge with the plateau. The intervening areas between the spurs are the small valleys as a number of streams originate from the Sahyadri within the district. Hill millets and paddy are grown in these valleys. This is the eastern face of the Sahyadri hills and compared to the western, it is less steep. The region slopes in general towards east. These hills are covered under dense forests.

(ii) Kolhapur Plateau includes the entire tahsil of Kagal, major parts of Karvir and Hatkanangle tahsils, and parts of Bhudargad, Radhanagari and Panhala tahsils.In fact this plateau is eastern slopes and offshoots of Sahyadri hills which is dissected by numerous streams. This plateau region having an altitude of 600-700 metres slopes gently towards east. Panchganga, Bhogwati, Dudhganga and Vedganga are the main rivers drain this region. All these rivers rise from the Sahyadri hills in the west. The western portion of the plateau is highly dissected and has soils of laterite origin. While the eastern portion is relatively smooth with a thick layer of alluvium soils, which are retentive in moisture and yield good crops of kharif jowar and groundnuts. Sugarcane, vegetables and tobacco are also grown intensively.

(iii) Gadhinglaj plateau includes the entire tahsil of Gadhinglaj, and parts of Ajra and Chandgad tahsils. This Gadhinglaj plateau is more elevated than the Kolhapur plateau. It has an altitude of 700-900 metres and it slopes towards east and noth-east. Like Kolhapur plateau this too is a dissected plateau. The area around the Gadhinglaj has a thick layer of soils which are quite fertile and yield good crops like jowar, groundnut, sugarcane, tobacco etc. Hiranyakashi and Tamraparni rivers and their tributaries drain this region. Both these rivers have their source in the Sahyadri hills in the west. This plateau has a thin cover of forests in patches.

(iv) Krishna basin is located in the extreme northern part. It covers the entire tahsil of Shirol, part of Hatkanangle tahsil and a small part of Panhala tahsil. This region has a height of about 600 metres with gradual slope towards east and south-east. The surface of basin is smooth in nature. River Varna, which meanders all along the district boundary in the north, joins river Krishana on its right bank near village Kothal of Shirol tahsil. River Krishna too flows along the district boundary and takes a parabolic shape near village Ganeshwadi of Shirol Tahsil. These rivers all together have developed a thick layer of alluvium soil in the basin which is very retentive in moisture and fertile. Rice, sugarcane, jowar, groundnut, tobacco etc. are grown in the basin.

Drainage

The district has a well developed drainage pattern. All the rivers of the district originate from the Sahyadri ranges in the west and flow in a general eastward direction through the district to the Bay of Bengal. The Krishna river flows only for a short distance through the district mainly on its eastern boundary yet all the rivers are geared to the base level of the Krishna which has mastered all the river courses of the district. The main rivers of the district from north to south are the Varna, Panchaganga, Dudhaganga, Vedaganga and Hiranyakeshi. The Varna has a long course but a restricted basin. The Panchaganga, on the other hand, commands a large drainage area through its main tributaries, the Kasari, Kumbhi. Tulsi and Bhogavati. The southern rivers, the Dudhaganga with its main tributaries the Vedaganga and the Hiranyakeshi have long courses but smaller and

independent valleys. There is also an interesting contrast in the direction of flow of the rivers of the district. The Varna flows from north-west to south-east the panchaganga from west to east, while the southern rivers flow from south-west to north-east. This is probably due to the underlying geological structure and the denudation sequence of the Krishna river which controls in a large manner the flow and erosive capacity of these rivers.

Climate

The climate of Kolhapur is generally temperate. On the western part, near the Sahyadries it is always cooler than the eastern part which is liable to hot winds during April and May. The year in respect of Kolhapur district may be divided into three seasons, hot weather from March to May, rainy period from June to October and cold weather from November to February.

The district gets rain from the south-west as well as the north-east monsoons. The amount of rainfall received decreases rapidly from west to east. The range between the maximum and minimum is large and vagaries of rainfall are great. The average annual rainfall within the district varies widely from about 600 mm. in Shirol tahsil in the east to 6,000 mm. in Bavda tahsil in the west. Due to variations in rainfall from year to year (and from place to place) it is difficult to divide the district into district rainfall zones. However, three broad divisions may be defined (i) the western zone receiving heavy and assured rainfall: (ii) the middle zone receiving moderate but fairly regular rainfall: and (iii) the eastern zone receiving low, irregular and uncertain rainfall.

The south-west monsoon commences by about the first week of June and last till about the end of September. With the on set of the south-west monsoon there is a rapid fall in the day temperatures. By the end of September the south-west monsoon loses its strength and give way to the north-east monsoon which provides rabi to the eastern part of the district. The central part of the district also gets some rain from the north-east monsoon which is helpful for rabi sowing and for sugarcane. The extreme portion of the district receives 90 to 95 per cent of the annual rainfall during the south-west monsoon seasons. This percentage decreases in the north-east to about 60 per cent near Kurundvad.

In winter, although day temperatures remain higher than the monsoon season, the mean minimum temperature is the lowest and it ranges from about 14°C to 16°C. December and January are the coldest months of the year and the daily range of temperature if rather large. There is a rapid rise in temperature in March, reaching the maximum in April. Daily temperatures exceeding 38°C are fairly frequent in April. Thunder storms are common in April and May. The rainfall in this season accounts for about 10 per cent of the total annual rainfall.

Natural Wealth

Minerals

In the district Bauxite is the chief mineral of economic value. It occurs in large quantities as laterite cappings in the hills along the eastern margin of the district. Irregular nodules of Kankar occur in the soils, especially in the easten part of the district, which on burning yields good lime. Copper, Gypsum, Iorn and Kaolin is found in small quantities and are not important economically.

The district is well endowed with building stones. Hard, compact, fine to medium grained Kaladgi sandstones and quartzites are quarried for construction materials near Nesri, Harur, Gajargaon, Ajra and Gargoti. Trap rock being hard, dense and durable is a most suitable material for building purpose.

Fisheries

There is no concentration of fishing villages in the district as are found in the coastal districts. The six main rivers of the district offer many sites suitable for dams and weirs. Due to the construction of a series of weirs on the Panchaganga a considerable quantity of water is retained in the river. Thereby providing a suitable habitat for a large number of fish. Further, when the tributaries of this river dry up after the monsoons, fish from the tributaries also migrate into the Panchaganga for shelter and forage. Besides this fishing is also carried out in many natural lakes, irrigation tanks, reservoirs and perennial ponds. As fishing does not provide a full time job, fishermen are obliged to work as field labourers and masons. Vam,

Vadshi, Alkut, Dandvam, Mhasheed, Catla, Rohu, Mirgal, Valshivada, Shingalu and Gorami are a few of the important fish of the district. If the catch is large it is sold in local markets otherwise fisherwomen, and old men hawk the fish from door to door.

Soil And Cropping Pattern

The soils of the district are mainly derived from trap. The soils of the district can be divided into three broad zones. (i) The western zone of heavy rainfall is covered with laterite soils: (ii) The central part with more or less assured rainfall is covered with fertile, well drained brownish soils of neutral reaction: and (iii) the dry eastern zone with precarious rainfall is covered with medium black soils of varying depths.

Laterite soils occur mainly in the western hilly tracts of heavy rainfall on the hill tops which are not covered by forests. They are red to brownish red in colour, mostly eroded and shallow. They are not retentive of moisture and yield mainly coarse hill millets. When terraced, applications of nitrogen and phosphorus are found quite useful and in such cases paddy can also be taken from the soil. Under forests, which abound in valuable trees like teak, undi, jambul etc., these soils are fertile and rich in humus.

In the valleys, lateritic soils are mixed with trap soils. They vary in colour from brown to black, are fairly deep and retentive of moisture. Paddy is the main crop of this area and Val is also grown in rabi season.

Brown soils are found in the central zone. They are mainly derived from trap and are dark brown in colour with a reddish tint. They are rich and fertile with excellent granular structure almost neutral in reaction and well suppled with calcium. As this zone receives moderate and fairly regular rainfall, rice, jowar and groundnuts are grown in the Kharif season. Sugarcane and vegetables are grown wherever irrigation facilities are available. Jaggery produced from sugarcane grown in these soils is well-known throughout the country.

Medium and deep black soils are found in the eastern zone. They are also derived from trap and vary considerably in depth. Medium deep soils are grey in colour with good granular structure and drainage. The deeper soils are more black in colour and more clayey. The soils are quite fertile and good crops of Kharif jowar and groundnut are obtained. As drainage is good the soils are amenable to irrigation and consequently paddy, sugarcane and vegetables can be successfully taken from them.

Land And Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19–23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised

in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	260,728
2)	Total Buffaloes	655,293
3)	Total Goats	175,232
4)	Total Sheep	184,343
5)	Total Pigs	4,807
6)	Total Equine	1,527
7)	Total Camels	0
8)	Total Rabbits	242
9)	Total Livestock (excluding dogs)	1,282,172
10)	Total Poultry (including Ducks)	1,582,977

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,282,172 and total poultry (including ducks) are 1,582,977 in the district. Out of the total livestock, the total crossbred/indigenous cattle are 260,728; total buffaloes are 655,293; and goats 175,232; sheep 184,343; pigs 4,807; equine 1,527 and rabbits are 242.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	167
2)	Average Livestock per village	1,079
3)	No. of livestock per thousand human population	429
4)	No. of in-Milk cows per thousand human population	20
5)	No. of in-Milk buffaloes per thousand human population	107
6)	No. of poultry fowls per thousand human population	530
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	26
8)	No. of tractors per thousand hectares of gross cropped area	10
9)	No. of Veterinary Institute per lakh livestock	13

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to 167, while average livestock per village is 1,079. For every thousand human population there are 429 livestock, 20 in-milk cows, 107 in-milk buffaloes and 530 poultry fowls. While there are 26 bullocks and male buffalloes per hundred hectares of gross cropped area and 10 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 13.

Industry

Maharashtra is one of the advanced states in the country as far as industries are concerned. Industrially Maharashtra is one of the most developed state in the country. Similarly Kolhapur is also one of the developing districts of the state. Presence of railway link, better road links, better infra structure for industrilisation, location etc play a better role in the development of industry. There are many large, medium and small scale industries in the district mainly in Kolhapur Ichalkaranji industrial belt.

The industrial policy of the state is based on the basic decision to encourage industries in the developing and underdeveloped areas of the state and to disperse industries from heavily congested areas of Mumbai, Thane and Pune. This decision might have

benefited for this district. In this district co-operative industrial estates have been developed at Kolhapur, Jaysingpur, Ichalkaranji, Hupari, Yadrav, Hatkanagale and Shirol.

In the district there are large scale and small scale industries. The large scale industries include leather industries, sugar factories, jaggery manufacturing, agricultural implements, production of chemicals, automobile spares parts and oil engines steel casting and production of milk, household industries ("Kolhapuri saaz"- gold plated silver decorative ornament). The small scale industries include textile industries, bricks, household cotton yarn production etc. Apart from these the MIDC plots have been given to Maharashtra State Road Transport Corporation and Central Warehousing Corporation for their godowns, 'Kolhapuri saaz' a famous gold plated silver decorative ornament is manufactured at Hupari, Kolhapuri chappals are one of the characteristics of the district. Leather Board has regularized the leather industry in Kolhapur. The chappals manufactured under the Board are sent throughout India.

Trade and Commerce

The district is well known for "Kolhapuri Saaz" and "Kolhapuri Chappals". They have a heavy demand throughout India as well as abroad. The chief exports of the district are Rice, sugar, chilli powder, tobacco, jaggery, cloth, oil seeds etc.

Commodities like wheat, food grains, gur, gram etc are imported from villages, medicines, groceries, machines, spare parts, cotton yarn, building materials are chief items of imports. The chief manufactured in the district are groundnut oil, Jaggery, poha, agricultural goods, leather, sugar, bricks etc.

The distribution of goods beyond the wholesale trade centres is done at market places and weekely bazaars are held at different places on different days of the week. Kolhapur, Gadhingalaj, Hatkanangale, Shirol, Malkapur and Vadgaon Kasba, Kurundvad are important trade centres.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles
1		2
1	Buses	1,170
2	Cars & Station Wagons	12,085
3	Jeeps	7,019
4	Taxies	260
5	Autorickshaws	10,314
6	Mopeds	43,937
7	Scooters	57,708
8	Motor Cycles	77,283
9	Total Goods Vehicles	12,362
10	Tractors	10,717
11	Trailors	11,773
12	Others	164
	Total	**244,792**

Source: Transport Commissioner office

It may be seen that the district had 77,283 motorcycles; 43,937 mopeds and 57,708 scooters. There were 1,170 buses; 12,085 cars and station wagons, 7,019 jeeps; 260 taxies, 10,314 autorikshaws; 12,362 total goods vehicles. Besides 164 other mode of transport the district also had 10,717 tractors and 11,773 trailors as means of transport.

Electricity and Power supply

The proportion of electrified villages in Kolhapur district is much impressive. Out of 1,196 inhabited villages 1,190 (99.5 percent) and all 18 towns enjoy power supply facility in the district.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which

are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28th Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Questions 16 to 20 are about economic activity of the person. Questions 21 and 22 are about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/ Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to Census 2001, the district Kolhapur has a total population of 3,523,162, comprising of 1,807,470 males and 1,715,692 females constituting 3.6 percent of states population spread over 2.5 percet of its area. Among the 12 tahsils of the district Karvir tahsil (906,866) is the most populous and Bavda tahsil (32,525) the least. Other tahsils in order of population size are (1) Hatkanangle (709,628) (2) Shirol (359,179) (3) Kagal (248,237) (4) Panhala (238,383) (5) Gadhinglaj (216,257) (6) Radhanagri (188,107) (7) Chandgad (180,781) (8) Shahuwadi (176,859) (9) Bhudargad (144,910) (10) Ajra (121,430) and (11) Bavda (32,525).

Out of the total population of the district, 2,472,809 (70.2 percent) are residing in rural areas and remaining 1,050,353 (29.8 percent) in urban areas. Although in absolute numbers, the number of people living in rural areas has increased from 2,202,505 in 1991 to 2,472,809 in 2001. In terms of percentage the people residing in rural areas has decreased from 73.7 percent in 1991 to 70.2 percent in 2001 Census. Tahsil Karvir has (60.5 percent) highest urban population and tahsil Panhala has lowest urban population (1.4 percent).

The average growth rates for the rural and urban areas of the district are 12.3 percent and 33.5 percent respectively. In rural areas Bavda tahsil as registered the highest growth rate (17.1 percent) while Ajra tahsil has the lowest growth rate (0.1 percent). Rural growth rates are above the district average in 6 tahsils and below the district average in remaining 6 tahsils. Tahsils Panhala (15.2 percent), Shirol (16.3 percent), Bavda (17.1 percent), Kagal (16.4 percent), Bhudargad (13.6 percent) and Chandgad (13.2 percent) have recorded higher growth rates compared to district rural average (12.3 percent). However tahsils of Shahuwadi (11.7 Percent), Hatkanangle (10.4 percent), Karvir (11.9 percent), Radhagari (11.3 percent), Ajra (0.1 percent) and Gadhinglaj (9.0 percent) have registered growth rates below the district rural average.

In urban areas Hatkanangle tahsil has the highest growth rate (39.2 percent) because of two Census towns newly form after 1991 Census. Shahuwadi tahsil has shown the lowest growth rate (5.1 percent). Out of 12 tahsils only Hatkanangle tahsil (39.2 percent) has registered growth rate above the district average while 6 tahsils Shahuwadi (5.1 percent), Panhala (16.3 percent), Shirol (17.8 percent), Karvir (31.1 percent), Kagal (17.3 percent) and Gadhinglaj (13.3 percent) falls below the district urban average. 4 tahsils recorded nil urban areas.

The proportion of urban to total population for Kolhapur district increased from 26.3 percent in 1991 to 29.8 percent in 2001 Census. Nearly 30 percent population living in urban areas. This indicates a very low level of urbanization in the district. It is observed that only Shahuwadi tahsil has shown decrease in proportion of urban population (3.3 percent in 1991 to 3.1 percent in 2001). 5 tahsils viz., Hatkanangle (44.3 percent in 1991 to 50.0 percent percent in 2001), Shirol (17.7 percent in 1991 to 17.9 percent in 2001), Karvir (56.7 percent in 1991 to 60.5 percent in 2001) Kagal (13.2 percent in 1991 to 13.3 percent in 2001) and Gadhinglaj (11.3 percent in 1991 to 11.7 percent in 2001) have shown increase in proportion of urban population. Bavda, Radhanagari, Bhudargad and Chandgad tahsils did not have urban areas and remaining one tahsil Ajra new Census Town created after 1991 Census.

Among the 1,196 inhabited villages 22 villages (1.8 percent) are small sized with a population below 200, 131 villages (11.0 percent) are in the size class 200-499, 287 villages (24.0 percent) are in the size class 500-999; 376 villages (31.4 percent) are in the size class 1,000-1,999; 284 villages (23.7 percent) are in the size class 2,000-4,999; 74 villages (6.2 percent) are in the size class 5,000-9,999; and remaining 22 villages (1.8 percent) are in the size class 10,000 and above.

There are 22 villages with less than 200 inhabitants each constituting 1.8 percent of the total inhabited villages with 0.1 percent (2,846 persons) of the rural population of the district, 131 villages with population size 200-499 accounting for 11.0 percent of the total inhabited villages with 2.0 percent (49,422 persons) of the rural population of the district, 287 villages with population size 500-999 accounting 24.0 percent of the total inhabited villages with 8.5 percent (209,179 persons) of the rural population of the district, 376 villages with population size 1,000-1,999 accounting 31.4 percent of the total inhabited villages with 21.8 percent (539,543 persons) of the rural population of the district, 284 villages with population size 2,000-4,999 accounting 23.7 percent of the total inhabited villages with 35.0 percent (865,221 persons) of the rural population of the district, 74 villages with population size 5,000-9,999 accounting 6.2 percent of the total inhabited villages with 19.8 percent (489,485 persons) of the rural population of the district, 22 villages with population size 10,000 and above constituting 1.8 percent of the total inhabited villages with 12.8 percent (317,113 persons) of the rural population of the district.

Among the 12 C.D. Blocks of the district the percentage of villages with less than 200 population size is the highest in Bhudargad C.D. Block (5.3 percent) and lowest in Karvir C.D. Block (0.8 percent). Within 4 C.D. Blocks of this district do not have any villages with population range less than 200.

The percentage of villages with population size 200-499 is highest in Bavda C.D. Block (23.1 percent) and lowest in Kagal C.D.Block (1.2 percent). The percentage of villages with population size 500-999 is highest in Bavda C.D. Block (41.0 percent) and

lowest in Kagal C.D. Block (7.0 percent). The percentage of villages with population size 1,000-1,999 is highest in Shahuwadi C.D. Block (44.4 percent) and lowest in Shirol C.D. Block (9.3 percent). The percentage of villages with population size 2,000-4,999 is highest in Karvir C.D. Block (48.8 percent) and lowest in Bavda C.D. Block (2.6 percent). The percentage of villages with population size 5,000-9,999 is highest in Shirol C.D. Block (35.2 percent) and lowest in Chandgad C.D. Block (0.6 percent). The percentage of villages with population size 10,000 and above is highest in Hatkanangle C.D. Block (22.4 percent) and lowest in Panhala C.D. Block (0.8 percent) Shahuwadi, Bavda, Radhanagari, Kagal, Ajra, Gadhinglaj and Chandgad C.D. Block have no villages in this range (10,000 and above).

Note: Sex ratio has been defined here as the number of females per 1000 males.

2001 Census recorded sex ratio of 949 females per 1000 males in the district. This is less than that of state average of 922. The sex ratio of Kolhapur district has remained higher compared to the state during 1901-2001 except 1901 and 1921. The urban sex ratio in the district was notably higher compared to state average. From 1901-2001 the sex ratio of Kolhapur district fluctuated between 975 and 946 exhibiting generally decreasing trend and the state average varied between 978 and 922 indicating similar trend. In rural areas in different Census years the district figures were found always lower than the state figures except in 1991 and 2001 Census but in the urban areas the district figures were always found above the state figures.

Kolhapur district reported 2,364,307 persons as literates in 2001 Census. They constitute 76.9 percent of the total population (excluding 0-6 age group) of the district. For the district as a whole literacy rates for males is much higher than that of females in both rural and urban areas. As much as 87.5 percent of the males are literate while females account for 66.0 percent. The tahsilwise break-up shows that Karvir tahsil has the highest literacy rate of 83.2 percent and Bavda tahsil, which is fully rural has the lowest literacy rate 60.7 percent. The remaining ten tahsils are in between these two tahsils. It may be observed that the tahsils situated at the north-eastern region of the district (viz; Hatkanangle, Karvir and Shirol) have the literacy rates above the district average of 76.9 percent. The tahsils having urban components have literacy rate higher than the district average conforming the fact that urban centres and surrounding areas have better infrasctructure as far as the educational facilities are concerned.

Male literacy rate is highest in Karvir tahsil 91.0 percent and lowest in Bavda tahsil 75.3 percent. Three tahsils have male literacy rate above the district average (87.5 percent) viz; Hatkanangle (89.1 percent), Shirol (89.3 percent), Karvir (91.0 percent) and remaining nine tahsils literacy rates below the district average viz; Shahuwadi (81.1 percent), Panhala (86.2 percent), Bavda (75.3 percent), Radhanagari (85.4 percent), Kagal (85.7 percent),

Bhudargad (86.1 percent), Ajra (82.6 percent), Gadhinglaj (84.0 percent) and Chandgad (80.7 percent).

Female literacy rate is highest in Karvir tahsil (74.7 percent) and lowest in Bavda tahsil (46.0 percent). Three out of twelve tahsils have female literacy rate above the district average (66.0 percent) viz; Shirol, Karvir and Hatkanangle and remaining nine tahsils have female literacy rate below the district average viz; Shahuwadi, Panhala, Bavda, Radhanagari, Kagal, Bhudargad, Ajra, Gadhinglaj and Chandgad.

In the rural areas of the district the literacy rate is 73.1 percent with male literates having 85.2 percent and female literates accounting 60.7 percent, Shirol tahsil has the highest literacy rate 79.4 percent. In this tahsil 88.9 percent of males and 69.6 percent of females are literates. The lowest rural literacy rate is noted in Bavda tahsil 60.7 percent. The corresponding male and female rates are 75.3 percent and 46.0 percent respectively. There is a singnificant difference in literacy rates between males and females in the total area of the district. A differential of 16.3 to 29.3 points is seen in twelve tahsils while Bavda tahsil has the largest male-female literacy rate differential 29.3 points each. In other words females are lagging behind males in literacy in all the tahsils, however the gap varies from tahsil to tahsil.

There has been no conceptual change in defining the workers between 1991 and 2001 Census. At 2001 Census there has been mainly threefold classification of population viz; main workers, marginal workers and non-workers which was adopted for 1991 also. The main workers of 2001 are distributed in four categories of economic activities instead of nine industrial categories in earlier Census 1991.

The work participation rate for workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. 2001 Census recorded 39.6 percent of district population as main workers, 7.3 percent as marginal workers and the remaining 53.1 percent as non workers.

Among the 39.6 percent main workers, male participation rate in the district is 52.2 percent while that of females 26.4 percent as per 2001 Census.

The percentage of main workers is highest in Bavda tahsil (48.4 percent) and the lowest in Hatkanangle and Karvir tahsils (35.3 percent). Among the 12 tahsil of the district 10 tahsils are above the district average i.e. Shahuwadi (40.0 percent), Panhala (43.2 percent), Shirol (39.8 percent), Bavda (48.4 percent), Radhanagari (46.1 percent), Kagal (46.3 percent), Bhudargad (44.3 percent), Ajra (43.4 percent), Gadhinglaj (44.1 percent) and Chandgad (43.1 percent) and remaining 2 tahsils are below the district average i.e. Hatkanangle and Karvir (35.3 percent) respectively.

Among the 7.3 percent marginal workers male participation rate in the district is 4.4 percent while that of females is 10.4 percent. The percentage of marginal workers is highest in Shahuwadi tahsil (11.8 percent) and lowest in Hatkanangle tahsil (4.6 percent). Among 12 tahsils of the district 9 tahsils are above the district average i.e. Shahuwadi (11.8 percent). Panhala (10.3 percent), Shirol (9.0 percent), Radhanagari (10.1 percent), Kagal (7.6 percent), Bhudargad (10.9 percent), Ajra (8.0 percent), Gadhinglaj (9.3 percent) and Chandgad (10.6 percent) and 3 tahsils are below the district marginal workers average i.e. Hatkanangle (4.6 percent), Karvir (4.7 percent) and Bavda (7.1 percent). The proportion of female marginal workers (10.4 percent) is much higher compared to males (4.4 percent).

In Kolhapur district 53.1 percent population is recorded as non-workers comprising 43.4 percent males and 63.3 percent females.

2001 Census recorded 31.2 percent of the urban district population as main workers, 2.0 percent marginal workers and the remainig 66.8 percent as non-workers.

In case of urban areas, Murgud (MCl) town has the highest work participation rate of main workers (38.1 percent) while Malkapur (MCl) has the lowest rate (24.5 percent). In Vadgaon Kasba (MCl) (31.7 percent), Korochi (Census Town) (34.8 percent), Hupari (Census Town) (37.1 percent), Ichalkaranji (MCl) (32.4 percent), Kabnur (Census Town) (32.0 percent), Jaysingpur (MCl) (33.2 percent) Kurundvad (MCl) (31.7 percent), Uchgaon (Census Town) (31.9 percent), Kalambe Turf Thane (Census Town) (35.2 percent), Kagal (MCl) (33.2 percent), Murgud (MCl) (38.1 percent) and Gadhinglaj (MCl) (31.3 percent) towns respectively are above the district urban average 31.2 percent. The proportions of main workers below the district urban average towns are Malkapur (MCl) (24.5 percent), Panhala (MCl) (25.9 percent) Pachgaon (Census Town) (30.1 percent), Kolhapur (M.Corp.) (29.8 percent) and Ajra (25.7 percent) respectively. Gandhinagar (Census Town) is as equal as district urban average (31.2 percent).

The sexwise break-up shows that among males and females 50.9 percent and 9.8 percent of the population are main workers.

Ichalkaranji urban agglomerations main workers proportion is slightly higher (32.4 percent) than district urban main workers average and Kolhapur urban agglomerations main workers proportion is lower (29.9 percent) than district urban main workers average (31.2 percent).

The work participation rate for marginal workers in urban areas for the district is 2.0 percent with 1.9 percent male and 2.2 percent female. The percentage of marginal workers is highest in Murgud (MCl) 7.9 percent and lowest in Ichalkaranji (MCl) 0.8 percent. Twelve towns have marginal workers average above the district average. Five towns below the district average and one town Jaysingpur (MCl) equal to district average (2.0 percent).

Table 34 gives the distribution of male and female workers by four industrial categories of economic activities of the district.

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers according to the broad four-fold classification viz., cultivators, agricultural labourers, household industry workers and other economic activity workers. The economic activity of the district is primarily depend on agriculture which is supported by the fact that cultivators (40.3 percent) and agricultural labourers (17.7 percent) together constitute 58.0 percent of the workers in the district.

The proportion of both cultivators and agricultural labourers differs considerably from tahsil to tahsil. The proportion of cultivators varies between 63.2 percent for Chandgad tahsil and 21.2 percent for Hatkanangle tahsil. It may be seen that 42.0 percent workers are engaged in work other than agriculture. Among them 3.6 percent are household industry workers and remaining 38.4 percent are in other workers.

The proportion of Household industry workers varies between 4.9 percent for Hatkanangle tahsil and 2.3 percent for Bavda tahsil. Among 12 tahsils 3 tahsils have higher household industry workers than district average and their proportion is lower in 7 tahsils and in remaining 2 tahsils proportion is as equal as district proportion (3.6 percent).

The proportion of other workers varies between 60.2 percent in Karvir tahsil and 16.2 percent in Bavda tahsil. Among the 12 tahsils viz; Hatkanangle (54.7

percent) and Karvir (60.2 percent) proportion of other workers is higher than that of district average (38.4 percent) and their proportion is lower in the remaining 10 tahsils.

Note: Percentage of workers to total workersare given in brackets

Table 35 indicates the distribution of workers by male and female workers of C.D. Blocks by four categories for the district.

The economy of the district is primarily agricultural which is supported by the fact that cultivators (50.1 percent) and Agricultural labourers (21.1 percent) together constitute 71.2 percent of the total workers of the district. The remaining 28.8 percent of workers are engaged in household industry and other work.

The proportion of cultivators varies between 65.0 percent for Ajra C.D. Block and 34.5 percent for Hatkanangle C.D Block. The proportion for agricultural labourer varies between 33.6 percent for Shirol C.D. Block and 14.9 percent for Ajra C.D. Block. More than 71.2 percent of the workers in the district are directly engaged in agriculture as cultivators and agricultural labourers, which is but natural in the contact of the agricultural economy of the district.

The proportion of household industry for district is 3.3 percent. The proportion of Household industry workers varies between 5.0 percent for Hatkanangle C.D. Block and 2.3 percent for Bavda C.D. Block. Among 12 C.D. Blocks 3 C.D. Blocks have higher household industry workers than the district average and their proportion is lower in the 6 C.D. Blocks and 3 C.D. Blocks i.e. Shahuwadi Karvir and Ajra C.D. Blocks proportion is as equal as district average 3.3 percent.

The proportion of other workers for district is 25.5 percent. The proportion of other workers varies between 31.5 percent in Hatkanangle C.D. Block and 16.2 percent in Bavda C.D. Block. Among 12 C.D.

Blocks 4 C.D. Blocks recorded proportion of other workers higher than the district average (25.5 percent) and their proportion is lower in the remaining 8 C.D. Blocks.

Note: Percentage of workers to total workers are given in brackets.

Table 36 indicates the distribution of workers by sex in four categories of economic activity of urban agglomeration/towns 2001.

The economy of the district is primarily agricultural which is supported by the fact that cultivators (3.8 percent) and agricultural labourer (5.2 percent) together constitute 9.0 percent of the total workers of the urban area of the district. The remaining 91.0 percent of workers are engaged in household industry and other work.

The proportion of cultivators varies between 22.5 percent for Murgud (MCl) town and 0.5 percent for Gandhinagar (Census Town) town. The proportion for agricultural labourers varies between 23.1 percent for Hupari (Census Town) and 0.3 percent for Gandhinagar (Census Town). Only 9.0 percent of the workers in urban areas are directly engaged in agriculture as cultivators and agricultural labourers.

The proportion of household industry for district is 4.5 percent. The proportion of household industry workers varies between 14.1 percent for Hupari (Census Town) town and 2.5 percent for Kalambe Turf Thane (Census Town). Among 18 towns 9 towns have higher household industry workers than district average (4.5 percent) and their proportion is lower in the remaining 9 towns.

The district urban average for other workers proportion is 86.5 percent. The proportion of other workers varies between 93.0 percent in Gandhinagar (Census Town) town and 53.9 percent in Kurundvad

(MCl) town. Among 18 towns 4 towns proportion of other workers have higher than that of district average (86.5 percent) and their proportion is lower in the remaining 14 towns.

In the district Ichalkaranji as well as Kolhapur urban agglomeration cultivators (2.3 percent and 1.3 percent), agricultural labourers (2.6 percent and 2.0 percent) and household industry workers (3.5 percent and 4.2 percent) respectively, the proportion is less than district cultivators (3.8 percent), agricultural labourers (5.2 percent) and household industry workers (4.5 percent) respectively. In other workers Ichalkaranji (91.6 percent) Kolhapur (92.4 percent) urban agglomerations proportion is higher than district average (86.5 percent).

Educational

The educational amenity is available in 1,186 villages which constitute 99.2 percent of the total 1,196 inhabited villages of the district. Shahuwadi, Hatkanangle, Shirol, Karvir, Bavda, Radhanagari, Kagal and Chandgad C.D. Blocks have cent percent minimum educational amenity. This is followed by Panhala (99.2 percent), Gadhinglaj (98.9 percent, Bhudargad (96.5 percent) and Ajra (95.8 percent) C.D.Blocks villages with educational amenity (Table-37).

The educational amenity is available to 99.9 percent population in the district.(Table-38)

There are only 11 villages which do not have primary school amenity. Out of these 11 villages without educational amenity, 10 villages have a primary school located at a distance of upto 5 Kms. and for the remaining 1 village the distance to be covered is between 5 and 10 Kms..

There are 359 villages which do not have middle school amenity. Out of these 359 villages without middle school amenity, 218 villages have a middle school located at a distance of hardly 5 Kms.. In respect of 94 villages the distance to be covered is between 5 and 10 Kms. and for remaining 47 villages it is more than 10 Kms..

There are 1,178 villages which do not have degree college amenity. Out of 1,178 villages without degree college amenity 173 villages have a degree college located at a distance of hardly 5 Kms.. In respect of 308 villages the distance to be covered is between 5 and 10 Kms. and for the remaining 697 villages residents have to cover more than 10 Kms. (Table 39).

As per the distribution of villages according to the distance range from nearest statutory town, the educational amenity is available in all 50 villages (100.0 percent) within 5 kms; 410 villages (99.3 percent) have educational amenity within 5-15 kms, 664 villages (99.4 percent) within 16-50 kms; 62 villages (95.4 percent) within 51 and above kms (Table 40).

144 inhabited villages constituting 94.1 percent of the total 153 inhabited villages are in the population range upto 499; 286 (99.7 percent) villages with population size 500-999; 376 (100.0 percent) villages with population size 1,000-1999; 284 (100.0 percent) villages with population size 2,000-4,999; and 74 (100.0 percent) villages with population size 5,000-9,999; and remaining 22 (100.0 percent) villages with population size 10,000 and above have educational amenity available to them within their revenue limits. From the above table out of 153 villages in the population size range upto 499, 144 villages have educational amenity i.e. 9 villages didn't have the educational amenity available within the revenue limit of the village. Out of 287 villages in the population size range 500-999; 286 villages have the educational amenity available i.e. one village does not have the educational amenity. Educational amenity is available cent percent in all other ranges (Table 41).

Medical

Medical institutions of one or the other type are available in 638 (53.3 percent) villages. Out of 1,196 inhabited villages in the district serving 77.9 percent of the rural population of the district. It is observed from C.D. Blockwise figures of villages having medical amenity that they are ranging between 89.7 percent in Hatkanangle C.D. Blocks to 21.9 percent in Ajra C.D. Block.

The proportion of medical amenities in the district is above the district average in 6 C.D. Blocks while remaining 6 C.D. Blocks fall below the district average (53.3 percent). The villages enjoying this amenity through primary health centre, sub-centres and dispensaries served not only the resident population of the concerned villages but also there residing in surrounding villages (Table 37).

638 villages out of 1,196 inhabited villages have medical amenity in their respective limits. 558 villages do not have any type of medical amenity. These villages covered a distance upto 5 kms, 5-10 kms and more than 10 kms.

Of the 1,196 inhabited villages as many as 1,146 and 1,110 villages; 230 and 391 villages are situated at a distance of less than 5 kms. with reference to

the nearest place with medical amenities such as hospital and primary health centres respectively. Another 278 and 371 villages are located at a distance of 5-10 kms. for hospital and primary health centres. But in the case of 638 and 348 villages the resident have to travel more than 10 kms. to reach a place with these medical amenities i.e. hospital and primary health centres (Table 39).

According to the distance range from nearest statutory town the medical amenity is available in 32 villages (64.0 percent) within 5 kms; 284 villages (68.8 percent) have medical amenity within 5-15 kms, 293 villages (43.9 percent) within 16-50 kms; and remaining 29 villages (44.6 percent) at a distance of 51 and above kms. (Table 40).

According to the population range the medical amenity is available for 21 villages (13.7 percent) covering population range upto 499; 75 villages (26.1 percent) with population range of 500-999; 204 villages (54.3 percent) with population range of 1,000-1,999; 242 villages (85.2 percent) with population range of 2,000-4,999; 74 villages (100.0 percent) with population range of 5,000-9,999; and remaining 22 villages (100.0 percent) with a population range of 10,000 and above have medical amenity available with their revenue limits.(Table 41).

Telephone

The amenity of telephone is available in 677 (56.6 percent) villages of the district. These villages serve 75.5 percent of rural population of the district. Within the 12 C.D. Blocks of the district, the percentage of villages having telephone amenities varies considerably. Shirol C.D. Block with 98.1 percent average of villages in C.D. Block as the highest proportion whereas Chandgad C.D. Block with 12.8 percent villages average holds the last rank.

Among the 12 C.D. Blocks of the district 6 C.D. Blocks viz; Panhala, Hatkanangle, Shirol, Radhanagari, Kagal and Gadhinglaj are above the district average while remaning 6 C.D. Blocks viz; Shahuwadi, Karvir, Bavda, Bhudargad, Ajra and Chandgad falls below the district average (56.6 percent) (Table-37).

The telephone amenity is available to 75.5 percent population in the district. In Panhala, Hatkanangle, Shirol, Radhanagari and Gadhinglaj C.D. Blocks, more than 85 percent rural population avail telephone amenity (Table-38).

There are 519 villages which do not have telephone amenity. Out of these 519 villages are without telephone amenity 132 villages have a telephone amenity at a distance of less than 5 Kms.. In respect of 126 villages the distance to be covered is between 5 and 10 Kms. to avail the telephone amenity. People of 261 villages have to cover a distance of more than 10 Kms. to get telephone amenity (Table 39).

As per distribution of villages according to the distance range from nearest statutory town. The telephone amenity is available in 39 villages (78.0 percent) within 5 kms; 295 villages (71.4 percent) have this amenity within 5-15 kms; 334 villages (50.0 percent) within 16-50 kms; 9 villages (13.8 percent) at a distance beyond 51 kms; (Table 40).

Among 677 villages with the amenity of telephone, 36 villages are having less than 500 population, 118 villages are in the population range of 500-999; 210 villages are in the population range of 1,000-1,999; 221 villages are in the population range of 2,000-4,999; 71 villages are in the population range of 5,000-9,999; and remaining 21 villages have the population range of 10,000 and above (Table 41).

Transport and Communication

Transport communication includes bus service, rail facility and navigable waterways. If a bus stop or a railway station or navigable waterway is located within the territorial jurisdiction of a village, it is considered to have been served by such facility even if it is little away from the actual settlement 998 villages (83.4 percent) have communication facility available serving 94.1 percent of the rural population of the district.

Among the 12 C.D. block of the district 53 villages of Shirol C.D. Block constituting 98.1 percent of total villages have the highest proportion of villages where communication/transport amenity is available, while the Chandgad C.D. Block with 63.5 percent coverage of villages holds the last rank. Among the 12 C.D. Blocks of the district 7 C.D. Blocks are above the district average i.e. Panhala, Hatkanangle, Shirol, Karvir, Bavda, Kagal and Gadhinglaj while remaining 5 C.D.Blocks are below the district average. (Table 37).

In Gadhinglaj C.D. Block the transport communication facility is available to as high as 98.8 percent of the rural population. This is followed by Bavda (98.6 percent), Shirol (98.5 percent), Hatkanangle (98.0 percent), Karvir (97.8 percent) and Panhala (95.5 percent) and Kagal (95.2 percent) C.D. Blocks which is above the district rural population average (94.1 percent) and remaining 5 C.D. Blocks are below the district rural population (Table 38).

Out of 1,196 villages, 200 villages have no bus service amenity available. Of the 200 villages the residents of 143 villages have to cover a distance upto 5 Kms. to reach a place with such amenity, for 34 villages it is between 5 to 10 Kms. and for 23 villages it is beyond 10 Kms.. The availability of this amenity depends upon the location of the village with reference to road. (Table 39).

As per the distribution of villages according to the distance range from nearest statutory town, the transport communication facility is available in 44 villages (88.0 percent) within 5 kms, 370 villages (89.6 percent) have this amenity within 5-15 kms; 543 villages (81.3 percent) have this amenity within 16-50 kms and 41 villages (63.1 percent) at a distance of beyond 51 kms. (Table 40).

Among the 998 villages which have the avilability of communication availability within their respective limits, the population for 72 villages is less than 500; for 206 villages in the population range of 500-999; for 346 villages in the population range of 1,000-1,999; for 280 villages in the population range of 2,000-4,999; for 72 villages in the population range of 5,000-9,999; and the remaining 22 (100.0 percent) villages in the population range of 10,000 and above. Thus the population size of a village has an impact on the availability of communication amenity. (Table 41).

Banking

The amenity of Banking services is available in 267 villages (22.3 percent). Out of 1196 inhabited villages serving 47.5 percent rural population of the district. It is observed from C.D. Blockwise figures of villages having banking amenity that they are ranging between 57.4 percent in Shirol C.D. Block to 9.8 percent in Shahuwadi C.D. Block. The proportion of banking amenities in the district is above the district average in 4 C.D. Blocks i.e. Hatkanangle (53.4 percent), Shirol (57.4 percent) Karvir (35.2 percent) and Kagal (29.1 percent) and remaining 8 C.D. Blocks are below the district average i.e. Shahuwadi (9.8 percent), Panhala (19.2 percent), Bavda (20.5 percent), Radhanagari (21.1 percent) Bhudargad (14.9 percent), Gadhinglaj (22.0 percent) and Ajra and Chandgad (11.5 percent) each (Table 37).

In Hatkanangle C.D. Block the banking amenity is highest 80.3 percent of the rural populaion and lowest in Shahuwadi C.D. Block 16.8 percent of the rural population of the district. (Table 38).

Out of 1,196 total inhabited villages as many as 1,084 villages and 961 villages people of 369 villages and 423 villages have to cover a distance upto 5 Kms. for availing the amenity of commercial bank and Co-operative bank respectively. For 352 villages and 330 villages the amenity is available at a distance of 5-10 Kms. and for remaining 363 villages and 208 villages the amenity of Commercial bank and Co-operative bank respectively is available at a distance of more than 10 Kms.. (Table 39).

Out of 1,196 inhabited villages 267 villages having banking amenity. As per distribution of villages according to the distance range from nearest statutory town, the banking amenity is available in 10 villages (20.0 percent) within 5 kms; 128 villages (31.0 percent) have banking amenity within 5-15 kms; 123 villages (18.4 percent) within 16-50 kms; and remaining 6 villages (9.2 percent) at a distance of beyond 51 kms. (Table 40)

Out of 1,196 inhabited villages which have the availability of banking amenity within their respective limits the population for 5 villages is less than 500; for 10 villages in the range of 500-999; for 64 villages in the range of 1,000-1,999; for 105 villages in the range of 2,000-4,999; for 61 villages in the range of 5,000-9,999 and the remaining 22 villages in the population range of 10,000 and above. (Table 41)

Agricultural Credit Societies

There are 792 villages (66.2 percent) having agricultural credit societies in the district. These villages serve 81.4 percent of the rural population. The highest proportion of villages 78 villages (90.7 percent) in Kagal C.D. Block. The proportion of agricultural credit societies in the district is above the district average in 10 C.D.Blocks i.e. Panhala 107 (82.3 percent), Hatkanangle 47 (81.0 percnet), Shirol 47 (87.0 percent), Karvir 87 (69.6 percent), Bavda 27 (69.2 percent), Radhanagari 83(72.8 percent), Kagal 78 (90.7 percent), Bhudargad 76 (66.7 percent), Ajra 65 (67.7 percent) and Gadhinglaj 72 (79.1 percent) and remaining 2 C.D. Blocks are below the

district average i.e. Shahuwadi 5(3.8 percent) and Chandgad 98 (62.8 percent) (Table 37).

The agricultural credit societies is available above 90 percent population in the district in 3 C.D. Blocks i.e. Panhala (93.1 percent), Kagal (94.3 percent) and Gadhinglaj (91.0 percent) (Table 38).

Out of 1,196 inhabited villages, 404 villages are not having this amenity. Out of these as many as 217 villages are situated at a distance upto 5 Kms., 90 villages within 5-10 Kms. and remaining 97 villages at a distance of more than 10 Kms. where the amenity is available (Table 39).

As per the distribution of villages according to distance from nearest statutory town where the amenity is available 32 villages are situated at a distance of less than 5 Kms. from the nearest statutory town, 301 villages at a distance of 5-15 Kms., 427 villages at a distance of 16-50 Kms. and remaining 32 villages are at a distance of 51 and above Kms. (Table 40).

This amenity is available to 43 villages with population of less than 500; 141 villages with population of 500-999; 280 villages with population of 1,000-1,999; 240 villages with population of 2,000-4,999; 67 villages with population of 5,000-9,999 and remaining 21 villages with population of 10,000 and above. (Table 41).

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

Road whether 'Pucca or Kachcha' are nerve system of a district. They act as a pull factors for the development and upliftment of the area. Roads with cement concrete, black top, water bound macadam etc, come under pucca road and the remaining are treated as kachcha road.

Pucca road amenity is available to 921 villages (77.0 percent) out of 1,196 total inhabited villages in the district. In Hatkanangle tahsil all 58 inhabited

villages have pucca approach road whereas in Panhala C.D. Block 80 villages (61.5 percent) have pucca road out of 130 inhabited villages. The proportion of pucca road facility is above the district average in 5 C.D. Blocks i.e. Shirol (96.3 percent), Karvir (92.0 percent), Bavda (82.1 percent), Kagal (95.3 percent) and Gadhinglaj (94.5 percent). (Table 37)

The aggregate population of the villages with pucca roads from 91.8 percent of the rural population of the district. When examined from this point of view, Hatkanangle cent percent and Kagal C.D. Block (98.4 percent) stand at the higher side and Radhanagari C.D. Block (78.1 percent) stands at the lower side in 12 C.D. Blocks. Majority of the villages residents in this district enjoys the pucca road amenity (Table 38).

As per the distribution of villages according to distance range of availability of amenity from nearest statutory town out of 921 villages, 46 villages are at a distance of less than 5 Kms. from nearest statutory town, 375 villages at a distance of 5-15 Kms., 467 villages at a distance of 16-50 Kms. and remaining 33 villages at a distance of beyond 51 Kms.. (Table 40).

The population of 51 villages (33.3 percent) served by pucca road is less than 500; for 174 villages (60.6 percent) is in the range of 500-999; 320 villages (85.1 percent) is in the range of 1000-1999, 280 villages (98.6 percent) is in the range of 2000-4999; for 74 villages (100.0 percent) is in the range of 5,000-9,999; and remaining 22 villages (100.0 percent) is in the range of 10,000 and above. (Table 41)

Population size is an important factor directly associated with availability of pucca road amenity. Larger the size, greater are the chances of the villages having this facility.

Power Supply

Out of 1196 inhabited villages 1,190 (99.5 percent) villages are having power supply amenity in the district. All the villages of Shahuwadi, Hatkananglee, Shirol, Karvir, Bavda, Radhanagari, Kagal, Gadhinglaj and Chandgad C.D. Blocks are electrified (Table 37).

The aggregate population of the electrified villages constitute 99.9 percent of the rural population of the district. (Table-38).

The amenity of power supply is available to cent percent villages in the population ranges 1,000-1,999 (376 villages) 2,000-4,999 (284 villages), 5,000-9,999 (74 villages), 10,000 and above (22 villages). However small size 148 villages and 286 villages respectively with population size 1-499 and 500-999 have the power supply amenity. There are only 5 villages and 1 village with population of less than 500 and 500-999 range respectively, do not have the power supply amenity.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas.

Of the 690,523 households 246,768 households (35.7 percent) use firewood for cooking, 25,045 households (3.6 percent) use crop residue, 128,588 households (18.6 percent) use cowdung cake, 363 households (0.1 percent) use electricity, 334 households use coal/lignite (charcoal) 191,876 households (27.8 percent) use cooking gas, 45,083 households (6.5 percent) use bio-gas, 49,209 households (7.1 percent) use kerosene, 1,180 households (0.2 percent) use other fuel and 2,077 households (0.3 percent) reported no cooking being done by them.

In the rural areas of the 481,907 households, 223,375 households (46.4 percent) use firewood for cooking, 21,513 households (4.5 percent) use crop residue, 123,846 households (25.7 percent) use cowdung cake, 335 households (0.1 percent) use electricity, 174 households use coal/lignite (charcoal), 54,161 households (11.2 percent) use cooking gas, 44,516 households (9.2 percent) use bio-gas, 12,093 households (2.5 percent) use kerosene, 1,025 households (0.2 percent) use other fuel and 869 households (0.2 percent) reported no cooking being done by them.

In the urban areas of the 208,616 households, 23,393 households (11.2 percent) use firewood for cooking, 3,532 households (1.7 percent) use crop residue, 4,742 households (2.3 percent) use cowdung cake, only 28 households use electricity, 160 households (0.1 percent) use coal/lignite (charcoal), 137,715 households (66.0 percent) use cooking gas, 567 households (0.3 percent) use bio-gas, 37,116 households (17.8 percent) use kerosene, 155

households (0.1 percent) use other fuel and 1,208 households (0.6 percent) reported no cooking being done by them.

It may be seen that while firewood continued to be the predominant fuel used in rural areas and cooking gas is in urban areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

There are 690,523 households of which 481,907 are in rural and 208,616 in urban areas, of these banking amenities are being availed by 406,745 households. Among these 282,342 households are in rural and 124,403 in urban areas. It may be seen that percentages of households in rural (58.6 percent) and urban (59.6 percent) areas availing banking services are nearly equal.

In the district 310,379 households have radio/ transistor, 299,546 have television, 86,207 have telephone, 276,476 have bicycle, 131,346 have scooter, motor cycle, moped, 24,734 households have car, jeep, van. It may be noticed that from the information available in the table that a higher proportion of households in the urban areas possess there specified assets. Of these 690,523 households, 201,824 households possess none of the above specified assets. In the rural and urban areas, there are 165,389 and 36,435 households respectively who do not possess any of the specified assets.

(viii) Major Social and Cultural Events, Natural and Administrative Developments and Significant activities during the decade.

No major changes took place during the decades. In the district 27 new villages and 6 new towns were created after 1991 Census.

(ix) Brief Description of Places of Religious, Historical or Archeological importance in the Villages and Places of Tourist interest in the towns of the district.

From the time immemorial Kolhapur district had been famous for its cultural and religious activities. As in the neighbouring districts the concentration of fairs is heavier in the district. Most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned fairs are complementary to the weekly markets. In the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily us are brought for sale. The

people buy necessary articles in these fairs. In this district two fairs are very famous. They are i) Jyotiba fair at Wadi Ratnagiri (Panhala tahsil) and ii) Tryamboli fair at Kolhapur (Karvir tahsil).

Jyotiba Fair

This fair is held in Wadi Ratnagiri village about 19 kms. from Kolhapur. It is known as Jaykedar and is one of the biggest fairs in Maharashtra. It is held in the month of March/April for 8 days. People of different castes visit the shrine making more than 2 lakh congregations. Many stalls are opened on the occasion. The important commodities sold here are utensils, clothing, stationery, sweetmeats, coconuts, red powder etc.

Tryamboli Fair

This fair is held at the district headquarters itself. During the fair Amba Bhavani is venerated. It is held to the month of September/October. The construction of Mahalakshmi temple dates back to about 500 to 600 years when king Bhoja was ruling. Mostly Hindu women attend the fair in a great number. About 60,000 persons are reported to at tend the fair. The main items of trade at the Tryamboli fair are parched rice, phutanas, sweetmeat, earthern toys, utensils etc. Apart from these two fairs, there are more than 400 fairs held every year throughout the district.

Place of Historical and Tourist Importance

Kolhapur district has been covered with Sahyadrian ranges along its western boundary. It has many isolated peaks, which have given the district some of the best hill stations. Some of the hill tops are pleasantly broken and adorned with cliffs, pools and shady springs. Except during the rains the climate here is delightful, the days are cool and the nights are fresh, which have ben attracting the tourists. Known as Shivaji Maharajas land it is full of natural scenery and historical places.

Kolhapur

It is the district headquarters and is about 394 kms. from the state headquarters viz. Mumbai. As a religious centre it is known as the Kashi of the south, the ancient temple of Mahalakshmi being the tourists attraction. The temple was initially built by the Chalukya kings in the sixth century and extended by the Rastrakuta kings in the ninth century. The main portion of the building is of two storied and is built of black stone. The body of the temple is built of local black trap without help of any timber. It has no opening for air except a few doors. Fair is held in September/ October every year.

Kolhapur is known for wrestling. A big wrestling stadium was built by Rajarshi Shahu Maharaj. It is located near the Palace theatre. It is a circular open place with a pavilion at one end and cicular sloping ground all around. The arena is in the middle. The area can accommodate 20,000 persons at a time. The Kolhapur Sports Association arranges wrestling bouts periodically.

Apart from these places, Kolhapur has Rankala lake, Old Palace, New Palace, Town hall, Shalini Palace, Bramheshwar Temple, Kholkhandoba Temple, Radhakrishna Mandir etc. which also attract tourists.

Panhala

Panhala the headquarters of Panhala tahsil is the best health resort in Kolhapur district. It is about 20 kms. from Kolhapur. It has very impressive natural scenery. The climate is very delightful, the days are cool and nights are fresh. The fort is famous for its freedom from cholera chieffy because of its plentiful supply of pure iron-charged water.

Kumbhoj

It is situated in Hatkanangale tahsil on the Varna valley, about 29 kms from Kolhapur. It is named after Kumbheshwar, a form of shiv. Who is the guardian of the village. It has a Jain temple with a huge statue of Bahubali.

Panhala fort crowns one of the tops of the Panhala spur of the Sahyadri about 19 kms. north-west of Kolhapur. It has witnessed many historically important events. The fort is bout 7 kms. in circumference. It is entered through three magnificent double gateways which were reached from the table land by long flights of stone steps. Of these three gateways 'Char Darvaja' are still entire and are finely built with much light tracery on the door posts. Two unfailing reservoirs and many pure springs afford an ample water supply. Apart from these forts there are many forts in the district. Viz., Samangad fort, Pargad fort, Pavangad fort etc.

(x) Major Characteristics of the District, Contribution of the district in the form of any Historical figure associated with the district

Like other districts of the state, Kolhapur is essentially a district of villages. Out of the total district population 70.2 per cent live in rural areas. Villages of Kolhapur are of two classes-walled and open. In most of the villages houses are not built in rows but are scattered all over the village site, Kunbis or husbandsmen, Marathas, Jains and Lingayats form the bulk of the population. Dhangar (Shepherds) and other herdsmen live with their herds on the hills. On the outskirts of the village are the quarters of Harijans such as Mahars, Mangs, Chambhars and Dhors. People of Kolhapur are of medium height. The colour of their skin is brown. The food of the people all over the district is more or less the same, it include rice bhakari (unleavened bread) made of jowar, curry to mix with rice and a vegetable preparation.

People wear turban in a typical style. It is of light colour and made quite stiff with starch while a long end of it kept hanging behind along the back. Farmers of this region are hardworking. People from this district celebrate many festivals. Gudi Padva is celebrated as new year day. Farmers also celebrate 'Bendur' in appreciation of various work done by bullocks. Nagapanchami is also celebrated all over the district. The people are fond of wrestling. Wrestlers from Kolhapur are famous all over India. In general there has not been any significant change during the decade.

Kolhapur is endowed with three major economic resources, viz. agricultural land, an abundance of mineral deposits and industrial infractructure. Kolhapur district is known for its co-operative movements. It has spread its tentacles into all spheres of public life Co-operative sugar mills, Co-operative milk processing projects. Co-operative Industrial units, Co-operative Market, estates etc. Kolhapur Shetkari Sahakari Sangh is beggest Co-operative unit is Asia engaged in various trade like agricultural products fertilizers and other goods.

Sugarcane is grown on a large scale all over the district. There are about 11 co-operative sugar factories in the district. Most of the names given to the sugar factories bear the names of the important rivers from the district. From the time immemorial jaggery has been one of the important trade item. Jaggery from Kolhapur is exported to abroad also. Handloom cloths from Ichalkaranji silver ornaments from Hupari. Kolhapuri chappals from Kolhapur and Kapashi are equally known all over the country and even in foreign countries.

A considerable deposit of bauxite is found near Radhanagari on Kolhapur-Phonda-Ghat road. Gargoti (Bhudargad) on the Kadgaon-Nipani road, Amboli Ghat deposit at the trijunction of Kolhapur-Belgaum-Sindhudurg etc. In addition to this copper. Jypsum, Iron and Kaolin is also found. The district is endowed with building stones. Hard compact fine to medium grained Kaladgi sandstones and quartzites are quarried for construction material near Nesari. Harur, Gajargaon, Ajra and Gargoti. These materials have a market all over the state.

Contribution of the District

Kolhapur district is one of the frontline districts of India in the field of Art, Education, Culture, Music, Sports, Agriculture, Cinema, Industry etc. A brief account of the main contributors is given below.

Wrestling

Kolhapur is the centre field in wrestling. The credit for reviewing the game of wrestling goes to Rajarshi Shahu Maharaj. He had constructed a big ground (Khasbag maidan) having a capacity of about 20,000 seats. It produced world class wrestlers like Shripati Khanchnale, Ganpati Andalkar and Maruti Mane who got Hind Kesari Award. Ganpati Andalkar was honoured by Government of India with Arjuna Award.

Literature

Kolhapur has given many literatures. It is known for newness and difference in style. The main poets who made Marathi poetry more colourful were S/ shri Moropant. Lahiri Hailder of Panhalgad, Shahir Naniwadekar, Khumbhar and Shahir Sarnaik. Famous poets like S/Shri Rendalkar, V.D. Karandikar, Madhav Patkar, P. Savlaram, Shrirang Samdholikar, Suryakant Khandekar and Jagadish Khebudkar all hail from this district. Welknown literatures like S/Shri late V.S. Khandekar, Madhav Julian, N.C. Phadke and late G..D. 'Madgulkar' made Kolhapur district very proud. Writer like 'Mrutyunjay' Shivaji Sawant, Ramesh Mantri, Namdeo Vhatkar, Baba Kadam, Sumati Kshetramande, Kamala Phadke, Vijaya Rajadhyaksha, Kavita Narvane, Ambuja Sontakke, Shobha Buddhisagar, Snehlata Dasanurkar, Deepa Govarikar, Ranjit Desai etc., added weight to Kolhapur's fame.

Indian Cinema

In the development of Indian cinema industry, Kolhapur has the lion's share. It has been the birth place of Marathi film industry. It has produced many writers, producers, directors, talented actors, great music directors etc. World famous directors like late V. Shantaram and Balasaheb Yadav etc. hail from the district. Baburao Painter of 'Samadhi' fame, Master Vinayak of 'Brahmachari' fame and Indian first walkie-talkie picture 'Alam Ara's leading actor Master Vittal, all belong to this district. Towering personalities of Indian cinema S/Shri V. Shantaram, Bhalaji Pendharkar and Indias melody queen Lata Mangeshkar belong to this district. She has started a film studio for the production of movies, which has been named as Jayprabha studio.

(xi) Scope of Village Directory and Town Directory

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 Census only main workers were presented in to four categories. One of the novel features of the Primary Census Abstract of 1991 Census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Fertility and Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on the questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of child mortality have been worked out by using brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

	M	74	84
	F	57	89
Q5	P	74	91
	M	76	89
	F	64	93

Mortality

From the estimate of child mortality (number of deaths by ages 1, 2, 3 and 5 given above as q(1), q (2), q (3) and q (5)). It is observed that the level of child mortality in the district is substantially lower as compared to the state in 1991 census. A notable feature is the lower female mortality compared to male mortality in the district as against higher female mortality for the state. However, the sex differentials in child mortality appear to be more pronounced in the district compared to the State.

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra, 1981 and 1991

Fertility Measures	Kolhapur District		Maharashtra State	
	1981	1991	1981	1991
1	2	3	4	5
GFR	112	98	134	124
GMFR	140	121	168	157
TFR	3.5	2.9	4.3	3.7
TMFR	4.4	4.1	5.2	5.2
Crude Birth Rate (CBR)	27.4	24.9	31.8	29.8
No. of children ever born per women in the age group 45-49	--	3.6	--	4.2
Mean Age at Marriage	--	18.3	--	17.9
Child Women Ratio	--	42.3	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crudes Birth Rate) for the district vis-à-vis State reveals lower rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR and CBR were 112, 140, 3.5, 4.4 and 27.4 respectively as compared to State average of 134, 168, 4.3, 5.2 and 31.8 in 1981 census. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR and CBR were 98, 121, 2.9, 4.1 and 24.9 respectively for the district as against the State average of 124, 157, 3.7, 5.2 and 29.8 respectively.

It may be seen that, while in both 1981 and 1991 census the fertility rates are lower for the district than the State as a whole. But the gap in fertility rates between the district and the State has increased in 1991.

Mean age at marriage

Mean age at marriage recorded higher for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio is recorded lower for the district than the state in 1991.
