Konkan Railway

A Railway line between Mumbai and New Mumbai was commissioned on May 1992. The Roha-Dasgaon (Veer) station on this line (47 km) was opened for traffic in September 1993. The railway line in Konkan was opened on 20th January 1997 for traffic and goods transport from Roha-Dasgaon via Sawantwadi to Madgaon (Goa). That was the beginning of the great Konkan divisions peoples peninsular railway. Konkan railway ,with a route length of 382 kms. in Maharashtra, 34 modern stations, 37 tunnels and 80 bridges is likely to accelerate the pace of industrialization of Konkan region.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometer worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council and C.T. for Census Town.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as banks, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

Ratnagiri district forms a part of the greater tract known as the 'Konkan'. This tract is historically famous for its long coast line and convenient harbours, together with its comparative nearness to the Arabian Coast. For the administrative convenience and industrial and agricultural development Ratnagiri district was divided into Ratnagiri and Sindhudurg with effect from 1st May 1981.

The word 'Konkan' is of Indian origin and of considerable antiquity, though the origin of the name has neaver been sufficiently explained. The seven kingdoms of the Konkan of Hindu mythology are mentined in the 'Hindu History of Kashmir' and are said to have included nearly the whole west coast of India. The Pandavas, are said to have passed through this region in the 13the year of their exile and had settled in this area for some time. The Raja of this region Veerat Ray had accompanied them in the famous war at Kurukshetra with the Kauravas. In Ratnagiri district there are caves at Chiplun, Khed, Dabhol, Sangameshwar, Gavhani-Velgaum and Vade padel.

In the 2nd Century A.D. the great empire of Mauryas annexed all the Konkan coast. In the middle of the Sixth Century, Kings of the Maurya and Nala dynasties appear to have been ruling in the Konkan. The district of Ratnagiri was under the Silaharas and the capital of their kingdom was probably Goa and later it may have been transferred to a more central place in the vicinity of Ratnagiri or Kharepatan. Chandrapur was one of the most ancient towns in Konkan, probably founded by Chandraditya , a son of the Chalukya King Pulakeshin II.

The Portuguese power slowly declined and with the rise of Shivaji, the hold of Sultans on the district was lost by 1675 and the district passed finally into the hands of Marathas. Marathas continued to rule the district till 1817 i.e., when the struggle between the British ad the Peshvas come to an end and the whole of Konkan was transferred to the British.

In 1819 South Konkan was formed as a separate district. Its headquarters was first at Bankot and later at Ratnagiri. Three northern sub-divisions were transferred to Thane district in 1830 and the district was reduced to a sub-collectorate level under Thane district. In 1833, it was again made a full fledged district and named as Ratnagiri district.

In 1891 the district had the following sub-division Devgad, Ratnagiri, Sangameshwar, Vengurla, Malwan, Rajapur, Chiplun, Khed, Dapoli talukas and Guhagar and Mandangad petas. There were no major changes between 1891 and 1931. In 1945 Kankavli and in 1949(from Sawantwadi) Kudal and Lanja new mahals were formed. With the reorganization of the States in 1956, the district was included in the Bombay State. Since 1960, it forms a part of Maharashtra.

At the time of 1961 Census the district comprised of 11 talukas and 4 mahals included 1,516 inhabited villages covering 13 towns. During the decade of 1961-71, the mahals were upgraded as talukas; thus raising the number of talukas to 15. In 1971, the district had 15 Tahsils comprising of 1,519 villages (including 5 uninhabited) and 15 towns. With the upgrading of hamlets and wadis in the district, the total number of villages has gone upto 2,043 (including 5 uninhabited) in 1981. Kankavli census town was created in 1981. Due to declassification the number of towns has gone down from 15 in 1971 to 13 in

1981. After the 1981 census the district has been divided into two. Ratnagiri and Sindhudurg. In 1991 Ratnagiri district has 9 Tahsils and 8 towns with 4 uninhabited villages and 1,515 inhabited villages. During 2001, Census No.of Tahsils are some as 9 (in 1991), but 3 Census towns declassified, 5 villages received the status of census twons and 26 new villages have been created after 1991 Census.

(iii) Administrative Set-Up

There were Major changes in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Greater Bombay district of 1991 census divided into two forming Mumbai and Mumbai suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya district wear formed bifurcating, Dhule, Akola, Parbhani and Bhandara district respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Ratnagiri district is included in Konkan division. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Ratnagiri district consist of 10 towns and 1543 villages spread over 9 Tahsils viz., Mandangad (109), Dapoli (176), Khed (215), Chiplun (165), Guhagar (121), Ratnagiri (199), Sangameshwar (198), Lanja (122), and Rajapur (238). The following statement indicates the changes, which occurred after 1991 census in the number of villages, towns in each Tahsils and also the reasons for variation in brief:-

At the Tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold

office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad
b) Panchayat Samitis
c) The Standing Committee
d) The Subjects Committees
e) Presiding authorities
f) The Chief Executive Officer
g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block.

The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Ratnagiri district lies along the west coast forming a part of traditional 'Konkan Land' between 16° 13' to 18° 04' North Latitudes and 73° 02' to 73 ° 52' East Longitudes. The district is bounded by Raigarh district in the north, Arabian sea towards the west, Sindhudurg district on the south and Satara, Sangli and Kolhapur districts to the east.

The headquarters of the district is at Ratnagiri, a town having population of 70,383 persons, which is 370 kms. far from capital of Maharashtra, Mumbai. It is well connected from Mumbai and Kanyakumari by Konkan Railway which passes through the district. District also have a good network of roads which connects it from the other parts of the country.

The district has an area of 8,208 sq.kms. and a population of 1,696,777 persons as per Census 2001. While the area of the district accounts for 2.7 percent of the total area of the State, the districts population constitutes 1.8 percent of the total population of the State. The density of population is 207 persons per sq. km. Among the 35 districts of the State, the district ranks 18th in terms of area, 23rd in terms of population and 27th in terms of density.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal

Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, **Ratnagiri** and Sindhudurg.

Ratnagiri district forms a part of the Maharashtra littoral, the micro level division of Coastal Plains. District as a whole is a hilly tract. Over 85 per cent of the land surface is hilly. On the basis of local variation in relief and other characteristics the district can be grouped into three parts. (i) The Sahyadri Hills, which is main system of hills and spreads along the eastern boundary of the district (ii) Ratnagiri Plateau- the tranverse chains of small hills which projecting towards west from the Sahyadri hills and run parallel to each other. and (iii) The Ratnagiri coast.

(i) Sahyadri Hills in the district spread elongated over the parts of Mandangad, Khed, Chiplun, Sangameshwar, Lanja and Rajapur Tahsils in the north-south direction in the extreme east of the district. The hills have an elevation of over 200 metres which is more than 600 metres at the upper reaches and is characterized by having very steep slopes. The highest spot height is 1,239 metres in Khed Tahsil. It slopes towards west. In fact it is western scarp of Sahyadri. It is densely covered by forests.

(ii) The Ratnagiri plateau has an elongated north-south extent varying considerably in width through the center of the district. It covers parts of all the Tahsils of the district. In this portion hill ranges run parallel to each other and as a result the numerous streams, which flow through the valleys, have formed a parallel drainage pattern. The height of plateau varies between 100 metres and 200 metres from mean sea level. The slopes of hills have partly eroded, yellowish red soils, which are shallow in depth, coarse in texture and poor in fertility. However in kharif season, rice, ragi, small millets, kodra, kulthi, udid etc. are grown in this area. In the valleys arecanut and coconut gardens thrive well in deep sandy loams. Cashewnut, jackfruits, kokam and world renowned alphanso mangoes are also grown on the slope of hills, mainly in Ratnagiri and Rajapur Tahsils.

(iii) The Ratnagiri Coast is extending in a narrow stripe of land running the entire length of the district covering parts of Rajapur, Ratnagiri, Guhagar, Dapoli and Mandangad Tahsils. It attains the height below 100 metres. This coast is cliffy and erosion seems to be predominant as can be seen from the number of wave cut platform and cliffs. Beaches, in general, are not well developed and are very narrow and occur only in small patches. Some patches of salty land are also found in the low lying areas. This coastal strip in Dapoli, Guhagar, Ratnagiri and Rajapur Tahsils have a deep sandy loam soils. In which coconut and arecanut gardens thrive well. Rice, ragi, kulthi and other crops are grown in the kharif season.

Drainage

All the rivers in the district originate from Sahyadri ranges and flow from east to west and merge in the Arabian Sea. Vasishthi is the most important river of

the district from the point of view of length as well as navigational facilities. Other rivers of some importance are Shastri, Bav, Ratnagiri, Muchkundi, Jaitapur and Jagbudi. However, the rivers in this district one of great value from the point of view of navigation and fisheries. Parts of these rivers are tidal.

Climate

Ratnagiri district being a coastal district, the variation of temperature during the day and through the seasons is not large. Owing to the proximity of the sea, the percentage of humidity is more and the climate is generally moist and humid. Broadly, the year may be divided into three seasons, the summer season from March to May, the monsoon season from June to October and the winter season from November to February.

In the hot season, temperature rises slowly from March to May and May is the hottest month. With the onset of the monsoon, the temperature drops by three to four degrees. Day temperature during the monsoon is lower than those in the cold season. In the post-monsoon months of October and November, day temperature increases and days in October are as hot as in May. Night temperature is the lowest in January. Rajapur has the highest maximum temperature i.e. 34^{o} centigrade and Chiplun has the lowest minimum temperature i.e. 18^{o} centigrade. Generally the temperature of the district fluctuated between 20^{o} centigrade to 33.5^{o} centigrade. Within the district, the seasons show local variation also. Some of the areas of the coast are the most pleasant, particularly in hot months sea breeze is enjoyable nearly throughout the day. Further inland, during the hot months both days and nights can be impressive more so in the tract at the foot of the Western Ghats. Along the coast the maximum temperature rarely goes beyond 40^{o} centigrade.

During the monsoon, skies are heavily clouded. Winds are very strong and mainly westerly or south-westerly. The monsoon bursts over the district generally by the beginning of June and the rains continue with little intermission till about the middle of October. Rainfall is not uniform in all parts of the district. It increases rapidly from the coast towards the Western Ghats on the eastern border of the district. In and around ghats rainfall is very heavy. Practically the entire annual rainfall occurs during the months from June to October. Highest rainfall is received in the month of July. The highest annual rainfall occurs in Rajapur town i.e. 4589.0 mm. and the lowest annual rainfall reported in Guhagar towns i.e. 3091.0 mm.

During the pre and post monsoon months, the district experiences very strong winds sometimes reaching gale force particularly near the coast and heavy rain in association with cyclonic storms which develop in the Arabian sea and move in close proximity to the coast. Thunderstorms are common in the post monsoon months and the latter part of the hot season.

Natural Wealth

Minerals

Of all the districts in Konkan Division, Ratnagiri district seems to be favourably placed with regard to the availability of some of the important minerals. Manganese and Iron Ores are found in the southern part of Ratnagiri district. limenite is found along the coast from Purangad to Malgund in Ratnagiri Tahsil.

Silica is found in Rajajpur Tahsil, Bauxite is found in Mandagad and Dapoli Tahsils. Rajapur Tahsil is also blessed with deposits of silica sand and annually thousands of tons of silica sand is being dispatched to places like Mumbai, Pune, Kolhapur, Belgaum, Ichalkaranji etc. The feldspar, a minor mineral found in this district can be used in the manufacture of potteries. Other minor minerals found in the district are mica, mineral pigments such as clay, asbestos, building stones, glass, sand, copper, salt, limesone etc. Radio active, minerals like Uranium oxide are also found in some parts of the district.

Fisheries

Ratnagiri is one of the most important maritime district in Maharashtra. Therefore, marine fishery is naturally an important economic activity in the district. Fishing is done all along the coast, in the sea, generally upto 65 kms. from the coast. The important fishery centres in the district are Harnai, Dabhol, Jaigad, Ratnagiri and Jaitapur. Fishing activities are carried out during nine months from September to May.

The commercially important varieties of fish available in quantities are Bangada, Tarli, Pedva, Mushi, Shingada, Paplet, Halwa, Gedar, Surmai, Zinga, Dhoma, Ghol, Karli, and Ravas etc. Besides these clam and oysters are also available along the entire coastal line, mainly in the creeks and backwaters.

A major portion of the fish caught is transported by sea to Mumbai. There is also a good local demand at Chiplun, Sangmeshwar and Lanja. About 60 per cent of the fish is sold fresh, 30 per cent salt and wet cured and about 10 per cent sundried. The salt dried fish goes even to more distant towns in Maharashtra and in southern States. The sundried small fish is powedered in the local grinding mill at Ratnagiri. Oil from Shark liver is extracted at various centres. Supply of Shark fins and air bladders of fishes form an important item of trade. Prawns are also exported. With a view to improve the socio-economic condition of the fishermen and to augment the fish supply, several developmental schemes are introduced by the Fisheries Department.

Soil And Cropping Pattern

The soil of the district is generally classified in three parts i.e. (1) Laterite soil (2) Salty soil and (3) Coastal alluviums.

Laterite soil

The predominant soils in the district are laterite soils and extensive spreads of laterites are noticed throughout the district. They vary in colour from red to brownish red, owing to the preponderance of hydrated iron oxides. They are fairly well supplied with nitrogen and organic matter. Their texture is loamy. They are porous and not retentive of moisture. These soils are found in several grades, the main being rice soil and varkas soil. Both of these soils are available on the slopes of the hill and are partly eroded yellowish red and poor in fertitlity. Further they are shallow in depth and coarse in texture. Ragi (nagli) is the principal crop in these soils and it responds well to suppliers of nitrogen and phosphate. The cultivation of groundnut has also picked up in the recent year.

The district is famous for its mango crop specially the world renowned Alphonso. Plenty of Cashew nut grows in this area. On the mountain tops are the perennial forests, where varkas soils are rich in humus because of their being protected from erosion. They are reddish-brown in colour. Most of these soil being brought under plantations. Entire land-scape is also dotted with Coconut, Kokum, Arecanut and Jackfruit trees which thrive well in these soils and climate. Spices like pepper and other pulses are also cultivated specially in the coastal area.

Salty soil

Due to the inundation of the sea a part of the coastal soils has become salty. They are locally known as ‘Khar’ ‘Khajan’.

Coastal alluviums

The coastal strips have deep sandy loams and in these soils coconut and arecaanut gardens thrive well.

Land And Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19–23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at

least, likely to be different when compared with the actual field situation.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise break up of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	580,552
2)	Total Buffaloes	94,520
3)	Total Goats	60,381
4)	Total Sheep	47
5)	Total Pigs	0
6)	Total Equine	566
7)	Total Camels	0
8)	Total Rabbits	0
9)	Total Livestock (excluding dogs)	736,066
10)	Total Poultry (including Ducks)	1,588,825

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 736,066 and total poultry (including ducks) are 1,588,825 in the district. Out of the total livestock, the total cross-bred/indigenous cattle are 580,552, total buffaloes are 94,520, and goats 60,381, sheeps 47 and equine 566.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	90
2)	Average Livestock per village	486
3)	No. of livestock per thousand human population	477
4)	No. of in-Milk cows per thousand human population	43
5)	No. of in-Milk buffaloes per thousand human population	14
6)	No. of poultry fowls per thousand human population	1,029
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	107
8)	No. of tractors per thousand hectares of gross cropped area	N
9)	No. of Veterinary Institute per lakh livestock	21

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

N-negligible

The density of livestock population per sq. km. works out to 90 while average livestock per village is 486. For every thousand human population there are 477 livestock, 43 in-milk cows, 14 in-milk buffaloes and 1,029 poultry fowls. While there are 107 bullocks and male buffaloes per hundred hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 21. The number of tractors per thousand hectares of gross cropped area is found to be negligible

Industry

Industrially, Maharashtra is one of the advanced states in the country but Ratnagiri is one of the most industrially under-developed district in the state. There are very few industries in the district. They are located in Ratnagiri, Chiplun and Khed tahsils. The employment in non-agricultural sector depends mainly upon the village and cottage industries.

The industrial policy of the state is based on the decision to encourage industries in the developing and under developed areas in the district and to disperse industries from the heavily congested areas of Mumbai, Thane and Pune. In the district, there are industrial estates in Mirzole (Ratnagiri), Zadgaon (Ratnagiri), Kherdi (Chiplun) and Loteparshuram (Khed) village. The main large scale industries located in these industrial estate are J.K. Files, Narmada Cement, Henkel Chemicals Ltd, Safeast Company Pvt. Ltd., Ganekhadpoli Mahalaxmi Textile Chiplum, Nocil Lotemadkhed and Febina Textile Chiplun. Medium sized industries include Lihan Chemicals, Vanaj engineering Sadvali, Standard Compositors Chiplun and Konkan Steel Ltd. Chiplun.

The most important small scale industries in the district are cashew nut processing, having a great demand in the national market, fruit preservation and Silica processing. Other registered units are oil mills, saw mills, cements product, sodium silicate, laundry soap, printing, book binding, bidi making etc. Which are located in Ratnagiri and Chiplun tahsils. By the size of employment generated fishing is the largest occupation in the district. Powder of dry fish is also used as a fertilizer, steel as well as aluminum utensils are also prepared in Chiplun tahsil. Iron door, Windows and Trunks are prepared in Ratnagiri tahsil.

Trade and Commerce

The district is well known for the “Alphonso” and “Raiwal” varieties of mangoes, mango plants are mainly grown in Ratnagiri tahsil. The chief manufactured articles of the district are Ayurvedic medicine, bakery products, confictionary, refined oil, paper cable, wine, pickle, mango pulp etc and chief exported commodities are mango, cashewnut, rice, fish, coconut, clay pots, wine, alphanso mango, mango slices.They are mainly exported to Mumbai, Pune, Kholapur, Belgaum, apart from the weekly markets and fairs, Dapoli, Khed, Chiplun, Sangameshwar, Ratnagiri and Rajapur are important trade centers also.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles
	1	2
1	Buses	769
2	Cars & Station Wagons	4,968
3	Jeeps	2,934
4	Taxies	130
5	Autorickshaws	7,907
6	Mopeds	3,511
7	Scooters	16,037
8	Motor Cycles	18,100
9	Total Goods Vehicles	7,834
10	Tractors	322
11	Trailors	367
12	Others	109
	Total	**62,988**

Source: Transport Commissioner office

It may be seen that the district had 18,100 motorcycles, 3,511 mopeds and 16,037 scooters. There were 769 buses, 4,968 cars and station wagons, 2,934 jeeps, 130 taxies, 7,907 autorickshaws and 7,834 total goods vehicles. Besides 109 other mode of transport the district also had 322 tractors and 367 trailors as means of transport.

Electricity and Power supply

All the 10 towns and 1,539 inhabited villages (100.0 percent) are enjoying power supply facility in the district

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership

flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000.

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which

are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to the 2001 Census the district Ratnagiri has a total population of 1,696,777 comprising of 794,498 males and 902,279 females. The population of the district in Census 2001 is 9.9 percent higher than the district population of 1,544,057 in 1991 Census. Among 9 tahsil of the district, Ratnagiri Tahsil (302,261) is the most populous and Mandangad tahsil (70,593) the least. Other tahsils in order of their population are 1) Chiplun (281,081), 2) Sangmeshwar (214,819), 3) Khed (194,515), 4) Dapoli (193,430), 5) Rajapur (184,666), 6) Guhagar (142,259) and 7) Lanja (113,153).

As examination of the rural – urban distribution of population reveals that 1,504,568 persons constituting 88.7 percent of the total population is concentrated in rural areas, while 192,209 persons constituting 11.3 percent of total populations are living in urban areas of the district. Although in absolute numbers the number of people living in rural areas has increased from 1,406,001 in 1991 to 1,504,568 in 2001, in terms of percentage the people residing in rural areas has decreased from 91.1 percent in 1991 to 88.7 percent in 2001 Census. While in urban areas has increased from 138,056 in 1991 to 192,209 in 2001, in terms of percentage the people residing in urban areas it has increased from 8.9 percent in 1991 to 11.3 percent in 2001 Census. Among 9 tahsils 2 tahsils Madangad and Sangmeshwar have no urban population.

The average growth rates for the rural and urban area of the district are 7.0 percent and 39.2 percent respectively. The tahsils Mandangad and Sangameshwar do not have urban area. It may be observed that Ratnagiri tahsil and Chiplun tahsil have 26.3 percent and 20.3 percent urban population respectively in 2001 Census. Rural growth rates are above the district average in three tahsils viz. Dapoli (13.0 percent), Guhagar (13.9 percent) and Ratnagiri (14.1 percent) have registered higher growth rates than the district rural growth rate (7.0 percent) and Lanja tashil has the lowest (- 5.0 percent) growth rate.

The highest urban growth rate of 48.7 percent is registered by Chiplun tahsil, while Dapoli tahsil have the lowest.

Among the 1,539 inhabited villages 72 (4.7 percent) villages are small sized with a population below 200,384 (25.0 percent) villages are in the size class 200 – 499, 550 (35.7 percent) villages are in the size class 500 – 999, 400 (26.0 percent) villages are in the size class 1,000 – 1,999,126 (8.2 percent) villages are in the size class 2,000 – 4,999, 6 (0.4 percent) villages are in the size class 5,000 – 9,999 and the remaining 1 village is in the size class of 10,000 and above.

Among the 9 C.D. Blocks of the district the percentage of small sized villages less than 200 population in Ratnagiri C.D. Block shows highest percentage (7.0 percent) and lowest in Lanja Tahsil (1.7 percent). The percentage of 200 – 499 sized villages is the highest in Mandangad C.D. Block (40.4 percent) and lowest in Chiplun C.D. Block (9.8 percent). The percentage of 500- 999 sized, villages is highest in Dapoli C.D. Block (42.0 percent) and lowest in Chiplun C.D. Block (26.8

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 shows new towns denotified, declassified and wholly merged with other towns in 2001 Census. In 2001 five towns namely Jalgaon, Kherdi, Guhagar, Nachane and Lanja are declared as Census towns, which were villages in 1991 Census. Harnai, Dabhol and Alore Census towns of 1991 are declassified as villages in 2001 Census. There are no denotified and no wholly merged with other towns.

2001	922	960	873	1,136	1,163	944

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows the sex ratio for the district and the state 2001 Census, recorded a sex ratio of 1136 females per 1000 males in the district. This is higher compared to the state average (922). The sex ratio in Ratnagiri district has remained higher than that of state since 1901. As regards total areas sex ratio of the state level declined by 56 points and at district level it increased by 17 points during the last 100 years. Similarly the sex ratio for the rural areas of the state decreased by 43 points and for the district is increased by 37 points. But for the urban areas of the state the sex ratio increased by 11 points and for the district it decreased by 47 points during the above periods (i.e. 1901 – 2001). From 1901 to 2001 the sex ratio of Ratnagiri district fluctuated between 1,119 in 1901 and 1,136 in 2001 Census exhibiting generally on increasing trend and the state average varied between 978 in 1901 to 922 in 2001 also indicating a decreased trend.

9	Rajapur	1,212	1,226	1,011
	District Total:	**1,136**	**1,163**	**944**

In the district as a whole there are 1,136 females for every thousand males. Within the

district the sex ratio varies from 1,247 in Mandangad Tahsil to 1,042 in Ratnagiri Tahsil. The rural areas in general have a higher proportion of females than urban areas. Ratnagiri district also confirms to this pattern. The sex ratio for rural and urban areas of the district are 1,163 and 944 respectively. In rural areas five tahsils out 9 tahsils viz. Mandangad, Dapoli, Sangmeshwar, Lanja and Rajapur have higher sex ratio than district rural average and four tahsils have lower sex ratio than district rural average. In urban areas five Tahsils Dapoli, Khed, Chiplun, Lanja and Rajapur have higher sex ratio than the district urban average (944).

Table 8 shows sex ratio of rural population by ranges. For convenient understanding patterns villages have been grouped under nine different sex ratio ranges. The perusal of the table reveals that 1172 villages constituting 76.2 percent of the total inhabited villages covering 68.1 percent of the total district rural population has a sex ratio in the range of 1100 and above, while 230 villages 14.9 percent of total inhabited villages covering 18.3 percent of total district rural population have sex ratio in the range of 1000 – 1099, 71 villages constituting 4.6 percent of total inhabited villages covering a population of 109633 (7.3 percent) of the total district rural population has a sex ratio 950 – 999.

All those who had worked for the major part of the preceding were recorded as main workers (at least 6 months or 183 days) while those who worked for sometime during the preceding years but not for major part, have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non workers.Persons engaged in household duties, students, dependents, retired persons, rentires, beggars are some of the categories grouped as non workers. Table 31 shows the distribution of main workers , marginal workers and non workers by sex in Tahsils. In the district recorded 32.9 percent of the district population as main workers, 12.1 percent as marginal workers and remaining 55.0 percent as non-workers. Among the main workers male participation rate in the district is 42.5 percent while that of female is 24.4 percnt. The sexwise breakup shows that among males and females, 8.7 percent and 15.2 percent of the population are marginal workers in the district. Remaining 48.8 percent and 60.5 percent of population are non-workers in the district.

The proportion of main workers is the highest (35.8 percent) in Chiplun Tahsil and lowest (29.6 percent) in Dapoli Tahsil. Among the 9 tahsils of the district 6 tahsils have a proportion above the district average (32.9 percent) i.e. Mandangad (33.3 percent), Chiplun (35.8 percent), Guhagar (33.4 percent), Sangmeshwar (35.1 percent), Lanja (35.5 percent) and Rajapur (33.7 percent). Among the marginal workers the proportion of female marginal workers is higher than that of males. Rajapur tahsil shows highest percentage of marginal workers (19.5 percent) and Chiplun tahsil shows lowest percentage (6.8 percent). While Khed Tahsil shows highest percentage of non-workers, i.e. (58.7 percent) and Rajapur Tahsil shows lowest percentage of non-workers, i.e. 46.8 percent.

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomerations/towns.

In urban population of the district 30.6 percent recorded as a main workers, 3.3 percent recorded as marginal workers and 66.1 percent recorded as non workers.Among main workers there is vast difference in male - female share. Males recorded 49.1 percent while females recorded 11.0 percent. Male – female share in marginal workers is 3.1 percent 3.4 percent respectively while male and female share in non workers is 47.8 percent and 85.6 percent respectively. Within the towns Kherdi (Census Town) recorded highest percentage (34.4 percent) in main workers and Khed (MCl) recorded the lowest percentage i.e. (26.8 percent). In marginal workers Jalgaon (Census Town) recorded the

highest percentage (7.6 percent) and Dapoli camp (Census Town) (2.3 percent), Khed (MCl) (2.3 percent) the lowest, and in non workers highest percentage is seen in Khed (MCl) (70.9 percent) and Kherdi(Census Town) recorded the lowest (62.6 percent) in urban areas.

Note: Percentage of workers to total workers are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers according to the broad four fold classification namely cultivators, agricultural labourers, household industry workers and other workers.

The economic activity of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (52.7 percent) and agricultural labourers (13.4 percent) together constitute 66.1 percent of the workers in the district. The remaining 33.9 percent of workers 2 percent are engaged in household industry and 31.9 percent other workers. The proportion of cultivators varies between 67.8 percent for Lanja tahsil and 33.7 percent for Ratnagiri tahsil. The proportion of agricultural labourers varies between 16.4 percent for Dapoli tahsil to 11.3 percent for Chiplun tahsil. The proportion of household industry workers varies between 2.3 percent to 1.4 percent and other workers varies between 49.1 percent Ratnagiri tahsil to 18.8 percent Lanja tahsil.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or o utside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

This table gives the classification of households having improved drinking water source, electricity, bathrooms, toilet and drainage amenity available in the district. According to 2001 Census the amenity of improved drinking water is available for 169304 households constituting 46.2 percent of the total households. In rural and urban areas of the district. This amenity is available for 139,783 (42.5 percent) and 29,521 (77.5 percent) households respectively. The amenity of electricity is being enjoys 330,572 households (90.2 percent). In rural and urban areas of the district, this amenity is being enjoyed by 294,524 households (89.6 percent) and 36,048 households (94.7 percent) respectively.

The amenity of bathroom is available in 187,711 households constituting 51.2 percent. For rural and urban areas this amenity is available for 154,759 households constituting 47.1 percent and 32,952 households constituting 86.5 percent respectively.

The amenity of toilet is available 104,032 households which constituting 28.4 percent of the total households in the district. In rural and urban areas toilet amenity is available for 76,671 (23.3 percent) and 27,361 (71.9 percent) households respectively.

The amenity of drainage is available 88,442 households constituting 24.1 percent in the district. For rural and urban areas this amenity is available for 59,145 households (18.0 percent) and 29,297 households (76.9 percent) respectively.

Percentage in brackets

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas of the district.

Out of the 366,605 households of these 279,591 households (76.3 percent) use firehood for cooking 4,709 households(1.3 percent) uses crop residue, 178 households uses cowdung cake, 135 households uses electricity, 55,710 households (15.2 percent) uses cooking gas (LPG), 2,447 households (0.7 percent) uses Bio-gas, 22,203 households (6.1 percent) uses kerosene, 51 households uses others and 1,504 households (0.4 percent) reported no cooking being done by them.

In the rural areas total 328,530 households of these 274,225 households constitute 83.5 percent uses firewood for cooking. This is followed by uses crop residue 4,397 households (1.3 percent), cowdung cake 144 households, electricity 130 households, coal lignite

53 households, cooking gas 30952 households (9.4 percent), bio-gas 2275 households (0.7 percent), kerosene 15327 households (4.7 percent), others 49 households and no cooking 978 households (0.3 percent).

In urban areas total 38075 households, of these 24758 households (65.0 percent) uses LPG gas for cooking. This is followed by uses kerosene 6876 households (18.1 percent), firewood uses 5366 households (14.1 percent), and remaining type of fuel used very low percentage in urban areas.

It may seen that while firewood continues to be the predominers fuel used in rural areas. It is the cooking gas in urban areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table gives the number of households availing banking services and number of households having each of the specified assets 2001.

There are 366,605 households of which 328530 households are rural and 38,075 households are urban. The banking facilities are being availed by 156,141 households of which 128,936 households rural and 27,205 households are urban. It may be seen that a higher proportion of households in urban areas 71.5 percent of total urban households utilize the banking amenity as compared to the rural areas 39.2 percent of total rural households availing the banking amenity.

In the district 123,605 households own radio/ transistor, 76,357 households own television, 28,113 households own telephone, 39966 households own bicycle, 27,469 households possess scooters, 8,382 households possess car, jeep or van. It may be noticed form the information available that of these 366,605 households 203,087 households do not possess of the above specified assets. viii) Major Social And Cultural Events, Natural And Administrative Developments And Significant Activities During The Decade.

During decade 1991-2001, 26 new towns were created after 1991 Census in Ratnagiri district, five revenue villages received the status of Census towns, three census towns have been declassified. There are now 9 tahsils and 10 towns in Ratnagiri district.

(ix) Brief Description Of Places Of Religious, Historical Or Archeological Importance In The Villages And Places Of Tourist Interest In The Towns Of The District.

Fairs

The concentration of fairs is heavier in the district. Most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets. In the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use are brought for sale. The people buy necessary articles in these fairs. In this district one of the most famous fair is held at Ganapati Pule, about 50 kms. from Ratnagiri. There is a holy spring oozing from the rock. On 'Ganesh Chaturthi day' this fair is held on a large scale. Besides this the other important fairs held in the district are at Kasba (Sangameshwar Tahsil) on Mahashivaratri day, at Ratnadurga fort during Navaratra festival, at 'Shri Kshetra Parshuram, near Chiplun on Akshaytritiya day and at Adivase during Navaratra festival.

After the increase in the traveling facilities there has been tremendous increase in the number of tourists. Certain forts, a few old temples and picnic points in the district play an important role in shaping the socio-economic pattern of the district. At some places the Sahyadrian traps end abruptly to create spectacular scenery and attract many people not only from this district but from outside also. Tourists are eager to get the taste of delicious eatables of the district such as Mango, Cashew nut, Jack-fruit, Kokam during the month of May. Mumbai-Ratnagiri Vayudoot air service except in the rainy season also boosted tourism in the district.

Ganapati Pule

'Ganapati Pule' is about 50 kms. from Ratnagiri on the west coast. It is religious as well as tourist centre. Considering the growing importance of this centre, Maharashtra Tourism Development Corporation has built a tourist home. There is a holy spring oozing from the rock nearby.

Nandi

At Guhagar the temple of 'Shiva' Built in black stone is known for its architecture. A fine image of Nandi in a squatted position is so exquisitely carved out that even from a close distance one takes it for live animal. It is also a famous tourist place.

White Beach

One of the beautiful decoration in Ratnagiri is the White Beach studded with coconut palms on its border and extending over five miles of sparkling sand from Ratnagiri Jetty to Mirya Hill. With the blue-green sea in front and the green palms behind, the scenery there is fascinating at any hour of the day which makes it a favourite spot of holiday makers.

Durgadevi Temple

Close by to the north of Ratnagiri there is a temple of 'Durgadevi' situated on the high plateau, it commands the sea and gives a clear view for a long distance. Of late this site is becoming popular as a picnic spot.

Forts

Ratnagiri forts are either inland or on the coast. Coastal forts are of two classes, island and headland forts. Among island forts the main is Suvarnadurg fort at Harnai. On the main land opposite Survarnadurg and separated by a narrow channel are the forts of Kanakdurg and Fatehgad of little value except as outworks to Suvarnadurg. Suvarndurg, the golden fortress, with an area of eight acres on a law irregular island about a quarter of a mile from the shore, surrounded by very high wall, is perhaps the most striking of the Ratnagiri forts. Within the fort there are several reservoirs and a small step well with abundant water. The fort is probably built by the Bijapur kings in the sixteenth century and in 1669 strengthened by Shivaji.

The Ratnagiri fort is a series of fortification on the high headland which forms the west and of the north arm of the Ratnagiri harbour. This fort has a total area of about 120 acres. The defences of the headland form an outer and inner fort. According to the local story this fort had been in prominence since the Bahamani kings (1343-1500). Then it was under the Bijapur officer (1500-1660), 'Shivaji' who is said to have gained possession of the fort about 1670, added or renewed the strong wall that crests the eastern ridge south to the light house point, and built protecting towers on two commanding points. In the eighteenth century the citadel defences are said to have been improved by the Angres (1710-1755) and completed by the Peshvas (1755-1818).

Apart from these forts there are many forts in the district viz., Jaygad fort (Ratnagiri Tahsil), Bhairavgad fort (Chiplun Tahsil), Bhavangad fort (Sangameshwar Tahsil), Mahipatgad fort (Khed Tahsil), Rajapur and Yeshvantgad forts (Rajapur Tahsil) etc.

(x)Major Characteristics Of The District, Contribution Of The District In The Form Of Any Historical Figure Associated With The District

Ratnagiri is essentially a district of villages. In the villages people live in small tile-roofed houses, spread out in two or more hamlets, which comprise the village. Coastal villages are densely shaded by belts of coconut gardens. The village sites of the inland parts are well shaded with mango, jack fruit and tamarind trees. The people of the district belong to Brahmin, Maratha, Bhandari, Tillori, Kunbi, Nav Buddhist and Musalman communities. Christians also found scattered in the district. The people of Konkan are of loving nature. The food habits of the people of Ratnagiri have their regional peculiarities pertaining to Konkan distinguishing them from the general pattern of Maharashtra. Rice is the staple food of the district. Several special dishes are prepared from rice flour. Ramnavami, Hanuman Jayanti, Bhavani Utsav, Srikrishna Janmotsav, Shiv Jayanti, Diwali, Ganeshotsav, Shimga (Holi), Muharram Christmas etc. are the religious festivals of the people. Shimga and Gauri Ganapati are celebrated in a grand scale. People staying in Mumbai, Pune, Kolhapur etc.visit their native places to participate in these festivals. In general, social and cultural life of the people has been quite placid during the decade. one of the major administrative changes is the reorganization of Ratnagiri district which resulted in the creation of the newly formed Sindhudurg district. In this process the district boundaries of both Ratnagiri and Kolhapur districts have changed.

Ratnagiri district is endowed with three major economic resources viz., agricultural land, maritime fishery and an abundance of mineral deposits. The district is famous for its mongo fruit. The king of fruits Alphonso, foreign exchange earner cashewnut, prawns and various types of fruits and flowers are the major characteristics of the district. There is a rapid and dramatic increase in the area under cashew and mango. Large areas of varkas land have been brought under this plantation. In addition to this coconut, kakum, arecanut trees dot the landscape of the district.

A considerable deposits of building stone is found in the district. Huge quantity of this is used in construction activity. At many places a considerable deposits of ilmenities are found. The district has a long coast line and has a considerable fishing activity throughout the year except the monsoon. In this district fish canning industry is one of the busiest one. The industrial development has taken a forward leap thanks to the tremendous encouragement by the government agencies in the from of financial help. The cultivators also have taken benefit from these agencies to develop the horticultural crops such as mango, cashew nut, coconut etc. This has decreased the migration of the people of Konkan area to the nearby big cities.

Tourism is the sunrise industry in the district. Maharashtra Tourism Development Corporation has identified many sites suitable for development of tourism. The 'white beach'in Ratnagiri and 'Ganapati Pule' are very famous tourist centre. This industry has taken a forward leap after the commencement of the Vayudoot air service between Mumbai and Ratnagiri. The much awaited Konkan railway may change the entire tourism scenario in the near future.

Contribution Of The District

Ratnagiri has given many towering personalities, who fought for independence, litterateures, social workers, artists, sportsmen etc. the main among them are Bharat Ratna Dr. Babasaheb Ambedkar, Lokamanya Bal Gangadhar Tilak who thundered, 'Independence is my birth right', freedom fighters Gopalkrishna Gokhale, Maharshi Dhondo Keshav Karve, Rangller Paranjpe, Gandhi of Konkan Appasaheb Patwardhan, social worker Bhagojishet Keer, soft hearted peot Sane Guruji, poet Keshavsut, former speaker of Lok Sabha Late Dadasaheb Mavalankar, Chief Minister of erstwhile Mumbai State Shri Balasaheb Kher, famous cricketers Eknath Solkar, Chandrakant Pandit and Gulam Parkar, Kabaddi player like Maddhu Patil and actors like late Shankarrao Ghanekar, Late Kashinath Ghanekar. These personalities have contributed their might to the cause of the people of this district as well as nation.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility and Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 Census questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on the questions on children ever born and children surviving canvassed for all ever-married women have been tabulated by age of the mother. From this estimates of child mortality have been worked out by using brass technique.

Mortality

From the estimate of child mortality (number of deaths by ages 1, 2, 3 and 5 given above as q(1), q (2), q (3) and q (5)) it is observed that the level of child mortality in the district is higher for males compared to the state males and that for females is lower in the district compared to the state females in 1991 census. A notable feature is the lower female mortality compared to male mortality in the district as against higher female mortality for the state. However, the sex differentials in child mortality appear to be more pronounced in the district compared to the State.

Mean Age at Marriage	--	19.2	--	17.9
Child Women Ratio	--	38.8	--	49.6

Fertility

A perusal of the various fertility measures namely GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crude Birth Rate) for the district vis-à-vis State reveals lower rates for the district as compared to State as a whole except for TMFR and CBR. In 1981, the GFR, GMFR, TFR, TMFR & CBR were 110, 159, 4.0, 5.3 and 39.4 respectively as compared with State average of 134, 168, 4.3, 5.2 and 31.8. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 110, 156, 3.7, 5.5 and 30.0 respectively for the district as against the State average of 124, 157, 3.7, 5.2 and 29.8 respectively.

It may be seen that the fertility measures for the district are lower except for TMFR and CBR in both 1981 and 1991 censuses. But the gap in fertility rates between the district and the State has reduced in 1991.

Mean age at marriage

Mean age at marriage is recorded higher for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio is recorded lower for the district than the state.

There are 700,949 (41.3 per cent) migrants by place of birth comprising 208,890 (12.3 per cent) males and 492,059 (29.0 per cent) females to total population in 2001. Similarly 729,618 (43.0 per cent) migrants by place of last residence comprising 226,561 (13.4 per cent) males and 503,057 (29.6 per cent) females to total population are found in Ratnagiri district.

It may be seen that the percentage of migrants by place of birth has increased in Ratnagiri district during the decade 1991-2001 for both males and females. Similar trend can be seen for the migrants by place of last residence also.
