of the Indian Administrative Service
Director of Census Operations, Maharashtra

Product Code Number

MOTIF

Battis Shirala Nag Panchami Utsav

"Nag Panchami , the snake festival is held towards the end of August or early September. It is celebrated on a grand scale in the village "Battis Shirala" in Shirala Tahsil. The devotees collect hundreds of Cobras and place them in earthen pots and worship them to the accompaniment of folk dances and songs. Later they are carried in procession of bullock carts and chariots. People from the district and neighbouring districts (Mumbai, Pune, Kolhapur, Satara, Sangli etc.) come here to participate in the fair on that day. On Nag Panchami day many people tie the live snakes around their neck and play with them and also on decorated vehicles while snake processions are taken out. During this procession many entertainment items are presented. After this festival, all snakes are released to move to the forest freely from where they were captured.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri Samir Kumar Biswas, Director of Census Operations, Maharashtra. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006

Preface

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. This volume contains the salient results based on the data gathered at the actual head-count and in addition contain a wealth of other non-census information in respect of Villages and Towns of the District. It is hoped that this volume would go a long way to meet the ever-increasing demand for the micro-level data in this era-planned development.

District Census Handbook of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organization of the Government of India. The design for the 2001 District Census Handbook was evolved centrally by the Census Commissioner, India. In the preparation of the District Census Handbook, the role played by the Census Organization is that of data gatherer. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. Much of the data so provided by this field –level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepencies as well. The Village Directory data in addition were also examined logically and possible errors list generated village wise for select facilities was rechecked and revalidated with the revenue officers in the respective collectorate.

I am extremely grateful to Shri D.K. Sikri, Additional Secretary and Registrar General, India for his guidance in bringing out this publication. I am equally grateful to Shri J. K. Banthia, I.A.S. the former Registrar General and Census Commissioner, India for his constant inspiration, help and guidance at every stage.

I also express my thanks to Dr. R.P. Singh, Dy. Registrar General, India (Map), Shri R.G. Mitra, Dy. Registrar General, India (Census Division), Dr. I.C. Agrawal, Assistant Registrar General (SS Division), Shri S.L. Jain Deputy Director (SS Division), Shri C.S. Arora, Director (EDP), Shri Himakar, Additional Director (EDP), Shri M.R. Balakrishnan, Joint Director (EDP), Shri Anil Kumar, Deputy Director (EDP) and their colleagues for their co-operation and support in bringing out this volume.

Shri Samir Kumar Biswas, IAS held the office of Director of Census Operations, Maharashtra and guided the operations of the 2001 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Biswas. We would deem it our duty; therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, Shri R.S. Meena, Joint Director guided this project in a meticulous manner and received all help from Dr. S.S. Hiremath, Deputy Director. The DCHB unit was spearheaded by Smt. Sushma Monga, Assistant Director, who was on deputation from the Planning Commission, New Delhi.

The physical features have been concurred by the Map section, after incorporating necessary changes, wherever required. The Maps, inserted are prepared by the Cartography section under the guidance of Shri D.N. Chaurasia, R.O.

I take this opportunity to offer my grateful thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given separately.

District Highlights – 2001 Census

1. Sangli district has 957 females per one thousand males (Sex ratio).

2. Sangli district is largest turmeric producing district in the State.Turmeric is exported to foreign countries like U.S.A. France, Great Britain etc.

3. Ranjani village (Kavathemahankal C.D.Block) has the largest area (9,686.0 hectares) and Konoli (N.V.) village (Walwa C.D.Block) has smallest area (2.9 hectares) among the villages in the state.

4. Jat village in Jat C.D. Block is the most populated (29,275 persons) and Kusbavade village in Khanapur C.D. Block is the least populated (152 persons).

5. Sangli has attained fame as the birthplace of Marathi Stage.

6. Sangli is one of the least urbanized districts in the state having about one-fourth of its population in urban areas where as about two-fifth of the state population lives in urban area.

7. Among the 35 districts of the state, the district ranks 17th in terms of area, 15th in terms of population and 10th in terms of density.

8. The district has achieved cent percent electrification i.e., all the villages and towns in the district are electrified.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000;
ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometres (1,000 per square mile).

Note : Since the source for the total area figures in respect of the State and districts is the Surveyor General while that for the total area figures in respect of the tahsils is the Settlement Commissioner and Director of State Land Records Department the total areas, as also the rural areas, for the tahsils in district, may not add upto the corresponding figures shown against the district.

The population per square kilometer worked out from actual area figure upto 2 decimal point and then area presented in 1 decimal point.

M.Cl stands for Municipal Council, C.T. for Census Town, M.Corp. for Municipal Corporation

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The origin of DCHB lay in the 1951 Census when it began as a joint venture between the Government of India and the State Government. The present volume pertaining to 2001 Census is sixth in series since then. The District Census Handbook (DCHB) is a unique publication from the Census Organization that, in a condensed form, gives details of the Census and non-Census information from the village level upwards to the district level. It has therefore, been acclaimed & recognized as one of the best source of information next only to the district gazetteer.

The District Census Handbook as published in 1951 incorporated, some basic demographic and economic information of the district, village wise and town wise separately, besides having some important Census Tables. However, it underwent a radical change in the 1961 Census as a much more descriptive account of the district and a lot of non-census information on climate, rainfall, agriculture, industry, education, etc. was added to it besides a number of cross tables being picked up from various series of Census tables. In 1971 the District Census Handbook was divided into Part - A relating to Village and Town Directory, Part - B containing village and town wise Primary Census Abstract and Part - C reported on the administrative aspect and Census tables based on Primary Census Abstract etc. For the state of Maharashtra only Part A and B were published. The 1981 Census again saw the scope of it increasing to contain the data on literacy rate, Primary Health Centers etc. It was published as part A and B and the same pattern was again followed in 1991. However, in 1991 some of the non-census data included information on girls schools, social forestry area etc. as separate Appendices. The DCHB, 2001 Census have been made more informative and exhaustive in terms of coverage and content. The scope of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and Phone, Communication, Bank, Credit societies and Recreational facilities. The Non-Census information collected at the village level or town level by the Tahsildar/ Chief officer was scrutinized and verified in each district by the District Planning Officer and District Statistical Officer. The Collectorate were also requested to once again verify this in case serious discrepancies were observed. Logical checks were applied to the data and the scrutiny points which emerged after this exercise were further verified in the field by officials of this Directorate. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The non-census information was cross-checked with parent department also. For example, information on electricity was cross-checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of health and so on. It is felt that because of this extra validation, information provided in the 2001 District Census Handbook should become more reliable and can be used without any hitch by Scholars and Planners alike. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against

only Class I and Class II towns of the 1981 and 1991 Censuses are provided. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A number of tables based on Primary Census Abstract are also made to correlate data with geography of the tahsils. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The Village and Town Directory as also the Primary Census Abstract included in this Handbook should quench the thirst of the planners involved in micro level planning.

(ii) Brief History of The District

The district derives its name from its headquarters town Sangli, which was erstwhile princely state, and now forms a part of the district. The district forms a part of Deccan Plateau. Its history is essentially linked with the southern Maratha territories also referred to as the Kuntala during the ancient period. After the death of the Emperor Ashoka in 236 B.C., this region witnessed the rise and fall of the dynasties of Satavahanas, Vakatakas, Rashtrakutas, Chalukyas and the Bahamani kings. After the invasion of Devagiri by Ala-ud-din Khilji, the Deccan passed under the overlordship of Delhi emperors. The first Moghal invasion in Deccan began in 1593 during the reign of Akbar. The successive history of the region is marked by prolonged struggle for domination among the forces of the Moghal, Adilshahi's kindom and the Marathas. Maratha chieftains belonging to the Patwardhan family are said to have been the rulers of small principalities such as Sangli, Miraj and Tasgaon which came under the domination of British in 1818-19 and finally these were merged with the State of Bombay during the post independence period in 1948.

Sangli district was formed in 1949 by the transfer of Tasgaon, Khanapur (Vita), Walwa and Shirala tahsils from old Satara district. Two more talukas of Miraj and Jat were formed out of the parts of erstwhile Indian states and merged in the new district. After this merger it was named as South Satara district. However, in 1960 the district was renamed as Sangli. In 1965, two talukas, viz. Miraj and Khanapur were splitted and two new talukas viz. Kavathemahankal and Atpadi were added to the origional set-up of 6 tahsils. The district was thus 8 tahsils, viz.; Miraj, Khanapur, Jat, Tasgaon, Shirala, Walwa, Atpadi and Kavathe Mahankal.

At the time of 1961 census, the district was comprised of 5 talukas and 1 Mahal which in themselves included 526 inhabited villages and 6 towns. At the time of 1971 census, the district had 8 tahsils comprised of 539 inhabited villages and 7 towns. Since the number of tahsils in the district has remained unchanged in 1981 and 1991. One new town was added in 1981. the number of tahsils and towns are same as it was seen in the year 1981 i.e. 8 tahsils and 8 towns. Only the number of inhabited villages increased from 708 in 1981 to 723 in 1991.

During 2001 Census Sangli district recorded 724 total villages and 8 towns 13 villages are declared newly formed revenue villages in the tahsils Shirala, Walwa and Jat.

(iii) Administrative Set-Up

There were Major changes in the administrative set-up of Maharashtra after the 1991 Census, resulting in increase of five districts. The number of division unchanged it is same in 1991 census and 2001 census. The number of districts rose from 30 in 1991 census to 35 in 2001 census. Greater Bombay district of 1991 census divided into two forming Mumbai and Mumbai Suburban districts. Similarly new districts Nandurbar, Washim, Hingoli and Gondiya district were formed bifurcating, Dhule, Akola, Parbhani and Bhandara district respectively. Konkan division includes 6 districts, Nashik division has 5 districts, Pune division has 5 districts, Aurangabad division has 8 districts, Amravati division 5 districts and Nagpur division 6 districts. Thus for 2001 census the State has 35 districts spread over 6 divisions in Maharashtra. Sangli

district is included in Pune division. The district at present has 8 towns and 724 villages spread over 9 tahsils viz., Shirala (96), Walwa (96), Palus (52), Khanapur (107), Atpadi (60), Tasgaon (64), Miraj (64), Kavathemahankal (60) and Jat (125). The following statement indicates the changes, which occurred after 1991 census in the number of villages and towns in each tahsils and also the reasons for variation in brief:-

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/Tahsil	No. of villages as per 1991 Census as in Pune district	No. of villages as per Adjusted as per 2001 Jurisdiction	No. of villages as per 2001 Census	No. of New villages created	No. of Towns 1991 census	No. of Towns 2001 census	Changes since 1991 and Govt. Notification No.
1	2	3	4	5	6	7	8
Sangli District	727	727	724	13	8	8	1 New Tahsil created after 1991 Census 13 New Village created after 1991 Census 1 New Census Towns 1 Non-revenue village included in 1991 Census 12 Villages submerged 2 Villages merged in Sangli-Miraj Kupwad M. Corp. 1 Town (Miraj) merged in Sangli-Miraj Kupwad M.Corp.
1 Shirala	104	104	96	4	1	1	4 New Village created after 1991 Census 12 Villages submerged
2 Walwa	94	94	96	2	2	2	2 New Village created after 1991 Census
3 Palus	--	53	52	--	--	--	40 Villages transferred from Tasgaon Tahsil 13 Villages transferred from Khanapur Tahsil 1 Non-revenue village
4 Khanapur	120	107	107	--	1	1	13 Villages transferred to Palus Tahsil (New) REN/3699/Pr. No. 80/M-10 dated 01.07.1999
5 Atpadi	60	60	60	--	--	--	--
6 Tasgaon	104	64	64	--	1	1	40 Villages transferred to Palus Tahsil (New)
7 Miraj	67	67	64	--	3	3	1 New Census Town 2 Villages merged in Sangli–Miraj Kupwad 1 Town (Miraj) merged in Sangli-Miraj Kupwad M.Corp.
8 Kavathemahankal	60	60	60	--	--	--	--
9 Jat	118	118	125	7	--	--	7 New Villages created after 1991 Census

For administrative purpose the district is divided into 3 sub-divisions viz., Miraj, Walwa and Khanapur. Miraj sub-division includes Miraj, Tasgaon, Jat and Kavathemahankal Tahsils, Walwa sub-division includes Walwa and Shirala tahsils and Khanapur sub-division includes Khanapur, Atpadi and Palus tahsils. The district collector along with the district Judge, Superintendent of Police, Chief Executive Officer of Zilla Parishad and other senior officer's of the State Government look after the development and regulatory functions in the district. At the tahsil level the Tahsildar, Block Development Officer, Judicial Magistrate, Deputy Engineers and other officers look after their respective departments for development and regulatory functions.

Local self Governments, its composition, jurisdiction and the role in the Development.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the 'Bombay Village Panchayat Act, 1958'. The 'Sarpanch' and in the absence of Sarpanch, the 'Upa-Sarpanch' preside over every meeting of 'Gram Sabha'. At least four meetings of the 'Gram Sabha' are held every year. Sarpanch and Upa-Sarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73 rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73 rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at Village, Intermediate (Development Block) and district level.

2. The seats and the offices of the chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Castes or Scheduled Tribes, as the case may be.

3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.

4. Powers, Authority and Responsibilities of Panchayats: -

(a)The preparation of plans for economic development and social justice

(b)The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.

5. An independent State Election Commission to conduct the elections.

6. Powers to impose taxes by, and funds of, the Panchayats.

7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The gram panchayat consists of not less than seven and not more than seventeen members elected from wards on the basis of adult franchise. They hold office for a term of five years. Among these a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well- being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards

annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of panchayat. The Chief Executive Officer of Zilla Parishad appoints the secretary of Panchayat. His salary is paid from the district fund.

The budget of the village Panchayat is submitted to the Panchayat samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is panchayat samiti.

Taxation and Recovery of Claims

The taxes levied by the panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village water supply fund and District village development fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the Development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the district or the state.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samities (C. D. Blocks) have been established in the district of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the district and tahsil boundaries except that the statutory towns are not covered by them.

The local self bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each district are–

a) The Zilla Parishad
b) Panchayat Samitis
c) The Standing Committee
d) The Subjects Committees
e) Presiding authorities
f) The Chief Executive Officer
g) Block Development Officer

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of councillors directly elected on the basis of adult franchise from electoral divisions in the district for a term of five years. The number of councillors being not more than seventy-five and not less than fifty. Some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.

2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.

3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.

4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.

5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.

6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the district List as are included in the development plan of the State.

7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the district is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the district is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti Consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions.

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj Institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats.

Source : 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act,1958).

2. Maharashtra Act No. V of 1962 (The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961).

3. 73rd Constitutional Amendment.

Urban Local Bodies

The statutory urban local bodies are cantonments, municipalities or municipal corporations. The urban local bodies elect a councillor from each of the wards and his term is 5 years. The President of the Municipal Council or the Mayor of the Corporation as also his Deputy are elected from amongst elected councillors. The Chairmen of various committees are also elected from amongst the elected councillors. Although for day to day administration the Chief Officer is responsible in a municipal council, he works under the administrative control of the President of Municipal Council. In Corporations, a senior IAS Officer is deputed by the State Government as Municipal Commissioner who is responsible for day to day administration and the executive authority lies in him.

(iv) Physical features

Location and Size

Sangli district is one of the southwestern districts of Maharashtra, which lies between 16° 45' and 17° 33' north latitude and 73° 42' and 75° 40' east longitude. It is surrounded by Satara and Solapur districts to the north, Karnataka State to the east and south, Kolhapur district to the south west and it also has a small boundary with Ratnagiri district in the west.

The district has an area of 8,572.00 sq.kms. and a population of 2,583,524 persons as per Census 2001. While the area of the district accounts for 2.8 percent of the total area of the State, the districts population constitutes 2.7 percent of the total population of the State. The density of population is 301 persons per sq. km. Among the 35 districts of the State, the district ranks 17th in terms of area, 15th in terms of population and 10th in terms of density.

The headquarters of the district is at Sangli, a city with a population of 436,781. The district is well connected by road as well as by rail from the other parts of state as well as the country.

Physiography

India has been divided into four macro level physical divisions i.e. The Northern Mountains, The Great Plains, The Deccan Plateau, and The Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1)The Deccan Plateau, and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine districts of the State while only six districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands is divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the state of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below :

(A) Deccan Plateau :

(i) Northern Maharashtra :

(a) Tapi-Purna Valley : Includes the districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain : Includes the districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau :

(a) Eastern Maharashtra : Includes the districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, **Sangli** and Kolhapur.

(b) Western Maharashtra with Protruded Hills: Includes the districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral : Includes the districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Sangli district is a part of eastern plateau, the micro level physical division of Deccan plateau. In fact, the district as a whole is an elevated land through which river Krishna and its tributaries flow in a general south-eastern direction, making a relatively flat basin. The physiography of the district may be grouped into 3 parts i.e. (i) The Sahyadri hills, (ii) The Plateaux of Khanapur and Jat and (iii) The Krishna-Yerla basin.

(i) Sahyadri Hills includes only a part of Shirala tahsil. This region has an altitude ranging between 700 and 1,100 metres. The region slopes towards south and south-east. Varna river originating in Sahyadri itself along with its tributaries drains this region. These hills are partially covered under forests and these are mainly reserve forests. The surface is uneven and badly dissected by numerous streams and strata is rocky in nature.

(ii) Khanapur plateau spreads over parts of Tasgaon, Khanapur, Atpadi and Kavathemahankal tahsils. The plateau has an altitude ranging between 650 and 800 metres and it slopes towards south and east. It is a dissected plateau and thus has quite an uneven surface. A fairly large part of this plateau is stony wastelands. However in the vicinity of streams/rivers shallow soils are found in patches where mainly kharif crops are grown. The plateau is almost devoid of any vegetation except for Bhapalgarh hill top.

Occupying the extreme eastern part of the district, Jat plateau covers the entire Jat tahsil and a small part of Kavathemahankal tahsil. The plateau has an altitude ranging between 500 metres and 700 metres. However, near Jat the maximum height is 748 metres. It is a globular shaped plateau, which has been dissected by numerous small streams originating from its centre. Two third surface of plateau is stony and gravelly and is poorly suitable for agriculture. Shallow soils are found in patches at the eastern fringe of plateau in which kharif crops are grown.

(iii) Located in the heart of the district, Krishna-Yerla basin covers the entire tahsils of Miraj, Walwa and Palus and major parts of Tasgaon and Khanapur, a small part of Shirala and Kavathemahankal tahsils. The altitude in this basin varies between 500 and 600 metres from mean sea level and the basin gradually slopes towards south-east. The basin is relatively smooth in surface and have a thick layer of fertile soil in the vicinity of Krishna and Yerla rivers. The soils are heavy deep black, capable of yielding bumper kharif crops in Walwa, Palus, Tasgaon and Miraj tahsils. These soils are highly retentive of moisture also grow jowar, wheat and gram. The irrigated crops like chillies, cotton, sugarcane and turmeric are also grown in this soil. This basin is a well developed urbanized and industrialised part of the district.

Drainage

The Krishna forms the main river system of the district though Shirala tahsil in the west may be described as belonging to the Varna and eastern part of the district as belonging to the man. The Krishna is one of the three great rivers of southern India. Like the Godavari and Cauvery it rises to the east of Sahyadries almost within sight of the Arabian seas and after traversing the entire breadth of the Peninsula falls into the Bay of Bengal. Within the district it flows for a distance of about 108 kms and is joined by the Varna and the Yerla, while the Agrani river, with a greater part of its course within the district, joins it just outside the district boundary. The Man River has only about 16 kms of its course within the district, but along with its tributaries is responsible for draining the north-eastern parts of

Khanapur and Miraj tahsils and the northern part of Jat tahsil into the Bhima river.

Climate

The climate of the district is characterised by general dryness throughout the year except during the south-west monsoon season. In general, the climate becomes hotter as one proceeds from west to east. The year may be divided into four seasons. The cold season is from December to about middle of February. The hot season, which follows, lasts till the end of May, which is the hottest month. June to September is the south-west monsoon season and October and November constitute the post monsoon season.

The average annual rainfall in the district is 692.4 mm. In general, the rainfall decreases from west to east. The western part of the district gets over 2,000mm. of rain, while in the eastern part the rainfall is only about 500 mm. The rainfall at individual stations show considerable variation from year to year. Most of the annual rainfall is received during the south-west monsoon season although a considerable amount (about 20 per cent) is received in the post monsoon or retreating monsoon season. Some rainfall in the form of thunder showers occurs in May. In the western parts the climate is cool and healthy in the hot season but gets chilly during the rainy season. In parts of Walwa and Miraj tahsils the climate is pleasant. The temperature increase as one proceeds from west to east and in the eastern parts of the district the climate is much hotter than in the rest of the district. The eastern parts of the district also have a wider range of temperature variation from season to season. The mean maximum temperature ranges from about 32° C to 34° C but in May on an individual day temperature may reach above 40° C. The mean minimum temperature in the district fluctuates between 10° C to 12° C.

In the post-monsoon, cold and summer seasons the air is dry, particularly in the afternoons, while during the south-west monsoon season the air is humid. Skies are generally clear or lightly clouded except during the south-west monsoon season when they are heavily clouded to overcast. Winds are light to moderate but during the south-west monsoon season they become stronger. In the south-west monsoon season, winds are from directions between south west and north west, the westerlies beings more frequent. In the post-monsoon season they are predominatly from the north-east or east Easterlies and south-easterlies are common in the cold season. By February westerlies and north-westerlies appear and these predominate in the summer.

Natural Wealth

Minerals

The Deccan traps generally lack minerals of economic importance but being hard, dense and durable are most suitable as building materials. They are also need as road metal and railway ballast. Some limestone deposits occur around Miraj but the quality is not uniform. The reserves are indicated at a few million tons and do not seem to be useful for cement industry. Good clay for bricks and tiles is found on the banks of rivers. No other mineral of importance is known to occur in any other part of the district.

Fisheries

The fishing activities in the district is restricted to the inland waters i.e., the river, ponds and lakes. The length of perinnial rivers in the district is about 96 kms. There are 914 small lakes (Pazar Talao) in the district which provides good scope for fishing activities and some societies have also come up in Shirala, Atpadi and Jat tahsils. The fishermen of the district belong to Koli, Bhoi and Bagadi communities. Their fishing methods are largely restricted to drag nets known as “Vadap”, cast nets “Phekjal” or “Pag”, bag nets “Ghal”, hooks and lines or in some places gill nets or “Kandal”. The nets are largely made of cotton twine but nylon is also being used effectively.

The commercially important varieties of fish found in the are Vam, Aheer, Vadshi, Mhasheer, Kolshi, Khavli, Tambir, Shingada, Murrels etc. The fast growing varieties like Rohu, Catla and Mrigal are also stored in the ponds.

Soil And Cropping Pattern

The soils of the district are essentially derived from the underlying basalt and under different climatic conditions show variations is texture and structure. They vary from deep black soils in the river valleys to shallow murum red or grey in the hilly areas.

Laterite soils occur on up-ghats in the extreme western part of the district, which receive very heavy rainfall. Under heavy rainfall conditions leaching has taken place. These oils are poor in fertility and are mainly suitable for rice and hill millets.

Reddish brown soils are found on hill slops and in undulating areas in heavy rainfall regions of the district. These are residual soils and are usually structureless and sandy loamy in texture. Due to adverse topographical conditions these soils have limited depth and are poor in fertility.

Deep black soils of the Krishna valley occur particularly in areas having assured rainfall. They have good physical condition, clayey texture and granular to crumb structure. These are fertility soils, highly retentive of moisture and yield bumper crops.

Medium-deep soils occur in the areas of the district where the rainfall is low. They are reddish brown in colour and have clayey texture and granular to blocky structure.

Shallow soils occur in the extreme eastern part in Jat tahsil. They are light brown to reddish brown in colour. They are loamy sands to sandy clay in texture and are usually structureless. Deep soils from the low rainfall areas, unless properly managed develop salinealkaline conditions. They are dark brown in colour and have a sandy loamy texture, and blocky structure. Sodium saturation is very high indicating the deteriorated conditions. The soils are poor in plant nutrients unless reclamation measures are adopted. Normal yields of crops are not obtained.

Land And Land Use Pattern

The Ministry of Food and Agriculture, Government of India has recommended a standard pattern of land use classification for the maintenance of records. Columns 19–23 of the village directory give land use pattern in each village in the district. The data furnished here are based on the village records and pertain to the year 1999.

Forest

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself there may be occasionally cultivated patches or grazing lands, but such area are shown under column 19 as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Irrigated by Source and Unirrigated land

Column 20 and 21 of the Village Directory give all the agricultural land and when added together would correspond to the net area shown plus the current and other fallow lands. Area shown more than once during the same year, if any, in the village is counted only once under this column. In column 20 source wise breakup of the irrigated area is furnished by using abbreviation. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Cultivable waste) and are covered under column 22.

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Animal Husbandry

As per sixteenth Quinquennial census of livestoack of 1997, the information on important number of livestock and livestock indicators are given below.

Statement showing number of Livestock (Position as on 15th Oct. 1997)

1)	Total Cross bred/Indigenous Cattle	276,840
2)	Total Buffaloes	467,645
3)	Total Goats	367,092
4)	Total Sheep	215,702
5)	Total Pigs	11,704
6)	Total Equine	1,513
7)	Total Camels	0
8)	Total Rabbits	128
9)	Total Livestock (excluding dogs)	1,340,624
10)	Total Poultry (including Ducks)	2,432,525

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The total livestock (excluding dogs) are 1,340,624 and total poultry (including ducks) are 2,432,525 in the district. Out of the total livestock, the total crossbred/indigenous cattle are 276,840, total buffaloes are 467,645, and goats 367,092, sheep 215,702, pigs 11,704, equine 1,513 and rabbits are 128.

Statement showing Selected Livestock indicators (Position as on 15th Oct. 1997).

	Category	Value
1)	Density of Livestock population (per sq.km.)	156
2)	Average Livestock per village	1,854
3)	No. of livestock per thousand human population	607
4)	No. of in-Milk cows per thousand human population	26
5)	No. of in-Milk buffaloes per thousand human population	82
6)	No. of poultry fowls per thousand human population	1,101
7)	No. of Bullocks and male Buffaloes per hundred hectares of gross cropped area	14
8)	No. of tractors per thousand hectares of gross cropped area	5
9)	No. of Veterinary Institute per lakh livestock	12

Source: Sixteenth All India Livestock & Farm Equipment Census 1997.

The density of livestock population per sq. km. works out to156, while average livestock per village is 1,854. For every thousand human population there are 607 livestock, 26 in-milk cows, 82 in-milk buffaloes and 1,101 poultry fowls. While there are 14 bullocks and male buffaloes per hundred hectares of gross cropped area and 5 tractors per thousand hectares of gross cropped area, the number of Veterinary institute per lakh livestock has reported to be 12.

Industry

Industrially, Maharashtra is one of the advanced states in the country whereas Sangli is one of the developing districts in the states. Many power loom workshops and sugar factories have been established in this district.

The industrial policy of the state is based on the basic decision to encourage industries in developing and underdeveloped areas in the district and to disperse industries from heavily congested areas of Mumbai, Thane and Pune. In the district there are power loom workshops in Sangli, Madhavnagar, Vita and Miraj.

The most important industry in the district is sugar manufacturing industry. Other registered units are milk dairies, electronic industries, leather industries, engineering workshops etc.

Trade and Commerce

The district is well known for sugar, grapes, milk etc. Sugarcane is mainly grown in Walwa and Miraj tahsil. The chief export articles of the district are sugar, milk, kismis etc. Musical instruments machinery spares parts gray cloths etc are also exported in main cities like Mumbai, Pune, and Thane etc.

The chief import articles are cloth, edible oil, medicines, petrochemicals products etc. Most of goods are imported from Mumbai, Pune, Kolhapur. Apart from the weekly markets all the eight towns have important trade centres also.

In the district main manufactured items are sugar, milk and milk products, cotton clothes, electrical goods etc. Turmeric powder, grapes, kissmis, gray cloth, edible oil, jowar etc are also manufactured.

Transport

Number of Motor Vehicles registered in the district (as on 31.03.1999)

Motor Vehicles 1999		
	Item	No. of Vehicles
	1	2
1	Buses	918
2	Cars & Station Wagons	6,165
3	Jeeps	5,730
4	Taxies	351
5	Autorickshaws	4,822
6	Mopeds	24,429
7	Scooters	28,386
8	Motor Cycles	59,388
9	Total Goods Vehicles	7,653
10	Tractors	7,195
11	Trailors	7,881
12	Others	121
	Total	**153,039**

Source: Transport Commissioner office

It may be seen that the district had 59,388 motorcycles, 24,429 moped and 28,386 scooters. There were 918 buses, 6,165 cars and station wagons, 5,730 jeeps, 351 taxies, 4,822 autorickshaws and 7,653 total goods vehicles. Besides 121 other mode of transport the district also had 7,195 tractors and 7,881 trailors as means of transport.

Electricity and Power supply

All the 8 towns and 721 inhabited villages (100.0 percent) are enjoying power supply facility in the district

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should

have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000.
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes

1) Ager
2) Anamuk
3) Aray Mala
4) Arwa Mala
5) Bahna, Bahana
6) Bakad, Bant
7) Balahi, Balai
8) Basor, Burud, Bansor, Bansodi
9) Beda Jangam, Budga Jangam
10) Bedar
11) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar , Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami
12) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
13) Bindla
14) Byagara
15) Chalvadi, Channayya
16) Chenna Dasar, Holaya Dasar, Holeya Dasari
17) Dakkal, Dokkalwar
18) Dhor, Kakkayya, Kankayya, Dohor
19) Dom, Dumar
20) Ellamalvar, Yellammalawandlu
21) Ganda, Gandi
22) Garoda, Garo
23) Ghasi, Ghasia
24) Halleer
25) Halsar, Haslar, Hulasvar, Halasvar
26) Holar, Valhar
27) Holaya, Holer, Holeya, Holiya
28) Kaikadi (in Akola, Amravati, Bhandara, Gondiya, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district, other than Rajura tahsil)
29) Katia, Patharia
30) Khangar, Kanera, Mirdha
31) Khatik, Chikwa, Chikvi
32) Kolupulvandlu
33) Kori
34) Lingader
35) Madgi
36) Madiga
37) Mahar, Mehra, Taral, Dhegu Megu
38) Mahyavanshi, Dhed, Vankar, Maru Vankar
39) Mala
40) Mala Dasari
41) Mala Hannai
42) Mala Jangam
43) Mala Masti
44) Mala Sale, Netkani
45) Mala Sanyasi
46) Mang, Matang, Minimadig, Dhankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang
47) Mang Garodi, Mang Garudi
48) Manne
49) Mashti
50) Meghval, Menghvar
51) Mitha Ayyalvar
52) Mukri
53) Nadia, Hadi
54) Pasi
55) Sansi
56) Shenva, Chenva, Sedma, Ravat
57) Sindhollu, Chindollu
58) Tirgar, Tirbanda
59) Turi

Scheduled Tribes

1) Andh
2) Baiga
3) Barda
4) Bavacha, Bamcha
5) Bhaina
6) Bharia Bhumia, Bhuinhar Bhumia, Pando
7) Bhattra
8) Bhil, Bhil Garasia, Dholi Bhil, Dungir Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
9) Bhunjia
10) Binjhwar
11) Birhul, Birhor
12) Chodhara (excluding Akola, Amravati, Bhandara, Gondiya, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts)

13) Dhanka, Tadvi, Tetaria, Valvi
14) Dhanwar
15) Dhodia
16) Dubla, Talavia, Halpati
17) Gamit, Gamta, Gavit, Mavchi, Padvi
18) Gond Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimma, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Danddami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond, Gowari, Hill Maria, Kandra, Kalanga, Khatola, Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria
19) Halba, Halbi
20) Kamar
21) Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari
22) Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri
23) Khairwar
24) Kharia
25) Kokna, Kokni, Kukna
26) Kol
27) Kolam, Mannervarlu
28) Koli Dhor, Tokre Koli, Kolcha, Kolgha
29) Koli Mahadev, Dongar Koli
30) Koli Malhar
31) Kondh, Khond, Kandh
32) Korku, Bopchi, Mouasi, Nihal, Nahul, Bondhi, Bondeya
33) Koya, Bhine Koya, Rajkoya
34) Nagesia, Nagasia
35) Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
36) Oraon, Dhangad
37) Pardhan, Pathari, Saroti
38) Pardhi; Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Bahelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia
39) Parja
40) Patelia
41) Pomla
42) Rathawa
43) Sawar, Sawara
44) Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar
45) Thoti (in Aurangabad, Jalna, Bid, Nanded, Osmanabad, Latur, Parbhani and Hingoli districts and Rajura tahsil of Chandrapur district)
46) Varli
47) Vitolia, Kotwalia, Barodia

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not

as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex -ratio :

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging.This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the

number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population.}} \times 1{,}000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age group}} \times 1{,}000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/Town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs./ Towns. These Class I UAs./Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings – Population, its distribution

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census was the 00.00 hrs. March 1, 2001 i.e. the census provides a snapshot of the population of the country, as on 1st march 2001. Actual enumeration was spread over a period of 20 days from 9th February 2001 to 28 Feb.2001, followed by a rivisional round up to 5th March 2001 for updating of the population figures with reference to 00.00 hours of March 1, 2001. Household schedule having 23 questions regarding each and every person in the family is newly introduced in this Census. These questions are mainly self-explanatory and answers are in code language. Question No. 1 to 15 are related to general and socio-cultural characteristic individual. Question 16 to 20 is about economic activity of the person. Question 21 and 22 about migration and question no. 23 is for women, related to fertility. In addition one question is added in 2001 census which is related to household engaged in cultivation/ plantation in part III.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Director of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously, a list of villages. These lists form the basic frame for the organization of the Census Operations. Thereafter geographical area that could be conveniently covered out to constitute the enumerator's block.

The next major step was the house listing Operation that was carried in the state during May-June 2000. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration's blocks were carefully demarked on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant

construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding number of bedrooms in the household, if couples having separate room, availability of amenities like telephone, TV, Car/Scooter was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on tahsils are same.

Distribution of Population in Rural-Urban Areas

According to Census 2001, the district Sangli has a total population 2,583,524, comprising of 1,320,088 males and 1,263,436 females constituting 2.7 percent of states population spread over 2.8 percent of its area. Among the 9 tahsils of the district Miraj tahsil (756,048) is the most populous and Atpadi tahsil (125,263) the least. Other tahsils in order of population size are Walwa (427,377), Jat (283,950), Khanapur (258,231), Palus (216,556), Tasgaon (213,205), Shirala (158,298) and Kavathemahankal (144,596).

Out of the total population of the district 1,950,306 (75.5 percent) persons are residing in rural areas and remaining 633,218 (24.5 percent) in urban areas. Although in absolute numbers of people living in rural areas has increased from 1,707,041 in 1991 to 1,950,306 in 2001. In terms of percentage the people residing in rural areas has decreased from 77.3 percent in 1991 to 75.5 percent in 2001 Census. The tahsils of Palus, Atpadi, Kavathemahankal and Jat do not have urban areas. Tahsil Miraj has highest urban population (61.2 percent) and tahsil Shirala has lowest urban population (2.5 percent).

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Shirala	147,773	140,351	7,422	158,298	154,376	3,922	7.1	10.0	-47.2	5.0	2.5
2	Walwa	363,244	293,380	69,864	427,377	335,844	91,533	17.7	14.5	31.0	19.2	21.4
3	Palus	189,135	189,135	0	216,556	216,556	0	14.5	14.5	0	0	0
4	Khanapur	220,697	188,679	32,018	258,231	216,427	41,804	17.0	14.7	30.6	14.5	16.2
5	Atpadi	111,557	111,557	0	125,263	125,263	0	12.3	12.3	0	0	0
6	Tasgaon	183,895	154,503	29,392	213,205	179,748	33,457	15.9	16.3	13.8	16.0	15.7
7	Miraj	634,639	270,888	363,751	756,048	293,546	462,502	19.1	8.4	27.1	57.3	61.2
8	Kavathemahankal	117,901	117,901	0	144,596	144,596	0	22.6	22.6	0	0	0
9	Jat	240,647	240,647	0	283,950	283,950	0	18.0	18.0	0	0	0
District Total:		**2,209,488**	**1,707,041**	**502,447**	**2,583,524**	**1,950,306**	**633,218**	**16.9**	**14.3**	**26.0**	**22.7**	**24.5**

The average growth rates for the rural and urban areas of the district are 14.3 percent and 26.0 percent respectively. In rural areas Kavathemahankal tahsil has registered the highest growth rate (22.6 percent) while Miraj tahsil has the lowest growth rate (8.4 percent). Rural growth rates are above the district average in 6 tahsils and below the district average in 3 tahsils, Walwa (14.5 percent), Palus (14.5 percent), Khanapur (14.7 percent), Tasgaon (16.3 percent), Kavathemahankal (22.6 percent) and Jat (18.0 percent) tahsils have registered higher growth rate compared to district rural average (14.3 percent). However tahsils of Shirala (10.0 percent), Atpadi (12.3 percent) and Miraj (8.4 percent) have recorded growth rate below the district rural average. In urban areas, Miraj tahsil has the highest growth rate (27.1 percent), while Tasgaon tahsil has shown the lowest growth rate

(13.8 percent). One tahsil Shirala has recorded negative urban growth rate -47.2 percent in 2001, while 3 tahsils Walwa (31.0 percent), Khanapur (30.6 percent) and Miraj (27.1 percent) growth rate above the district urban average and only Tasgaon tahsil 13.8 percent) falls below the district urban average. The tahsil Palus, tahsil Atpadi, tahsil Kavathemahankal and tahsil Jat do not have urban areas. It is observed that Shirala tahsil, has shown decreased in proportion of urban population from 5.0 percent in 1991 to 2.5 percent in 2001 and Tasgaon tahsil has shown 16.0 percent in 1991 to 15.7 percent in 2001. District average proportion of urban population has increased from 22.7 percent in 1991 to 24.5 percent in 2001. This indicates a slow pace of urbanization in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

9	Jat	42 (33.6)	61,906	58,902	7 (5.6)	25924	24,431	1 (0.8)	14,972	14,303
Districts (Rural) Total:		**221 (30.7)**	**346,073**	**334,198**	**73 (10.1)**	**253,008**	**240,105**	**22 (3.1)**	**169,174**	**158,229**

Percentage in brackets.

Among the 721 inhabited villages, 1 (0.1 percent) village is small sized with a population below 200, 38 (5.3 percent) villages are in the size class 200-499, 134 (18.6 percent) villages are in the size class 500-999, 232 (32.2 percent) villages are in the size class 1,000-1999, 221(30.7 percent) villages are in the size class 2,000-4,999, 73 (10.1 percent) villages are in the size class 5,000-9,999 and the remaining 22 (3.1 percent) villages are in the size class 10,000 and above. There is a village with less than 200 inhabitants constituting 0.1 percent of the total inhabited villages with 152 persons of the rural population of the district, 38 villages with population size 200-499 accounting for 5.3 percent of the total inhabited villages with 0.8 percent (15,104 persons) of the rural population. There are 134 villages in size 500-999, 18.6 percent of the total inhabited villages with 5.1 percent (99,269 persons) of the rural population, 232 villages with population size 1,000-1,999 constituting 32.2 percent of the total inhabited villages with 17.2 percent (334,994 persons) of the rural population, 221 villages with population size 2,000-4,999 constituting 30.7 percent of the total inhabited villages with 34.9 percent (680,271persons) of the rural population, 73 villages with population size 5,000-9,999 constituting 10.1 percent of the total inhabited villages with 25.3 percent (493,113 persons) of the rural population and remaining 22 villages with population size 10,000 and above constituting 3.1 percent of the total inhabited villages with 16.8 percent (32,7403 persons) of the rural population of the district.

Among the 9 C.D. Blocks of the district the percentage of villages with less than 200 population size is only in Khanapur C.D. Block (0.9 percent) and remaining other C.D. Blocks there are no village in this range. The percentage of villages with population size 200-499 is highest in Shirala C.D. Block (14.9 percent) and lowest in Tasgaon C.D. Block (1.6 percent). There is no village in Miraj C.D. Block with population range of less than 200-499. The percentage of villages with population size 500-999 is highest in Shirala C.D. Block (27.7 percent) and lowest Miraj C.D. Block (9.5 percent). The percentage of villages with population size 1,000-1,999 is highest in Khanapur C.D. Block (40.2 percent) and lowest in Palus C.D. Block (23.1 percent). The percentage of villages with population size 2,000-4,999 is highest in Tasgaon C.D. Block (37.5 percent) and lowest in Shirala C.D. Block (20.2 percent). The percentage of villages with population size 5,000-9,999 is highest in Miraj C.D. Block (25.4 percent) and lowest in Shirala C.D. Block (2.1 percent). The percentage of villages with population size 10,000 and above is highest in Palus C.D. Block (9.6 percent) and lowest in Jat C.D. Block (0.8 percent) respectively.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town	
1	
(a) New	
(i) Statutory town -	Nil
(ii) Census town	Nil
1. Budhgaon	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil
1. Miraj (M Cl) is wholly merged with Sangli-Miraj-Kupwad (M. Corp.)	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

There are no new statutory towns, no denotified town and declassified town. There is one new Census town created after 1991 Census viz. Budhgaon. There is one town i.e. Miraj (MCl) is wholly merged with Sangli-Miraj- Kupwad (M.Corp.).

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.8	4,675	0.2
11-20	0	0.0	0	0.0
21-50	8	1.1	4,948	0.3
51-100	80	11.1	114,923	5.9
101-200	241	33.4	496,749	25.5
201-300	160	22.2	406,074	20.8
301-500	120	16.6	442,126	22.7
501 +	106	14.7	480,811	24.7
Not known	0	0.0	0	0.0
District Total:	**721**	**100.0**	**1,950,306**	**100.0**

Population Density (Rural) of the district: 232

The distribution of villages by density ranges indicated that those with medium density ranges 101-300 account for 55.6 percent of the total inhabited villages, while very low densities of less than 20 persons per sq.km. are noticeable in 6 villages constituting 0.8 percent of the villages. There are 80 villages constituting 11.1 percent of villages covering 5.9 percent of total population in 51-100 range. At the same time there are 226 villages constituting 31.3 percent of villages covering 47.4 percent of total population in above 300 range.

Table 5 : SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	978	1,003	862	984	985	979
1911	966	1,000	796	951	953	942
1921	950	994	776	942	942	938
1931	947	987	790	950	956	920
1941	949	989	810	954	954	953
1951	941	1,000	807	968	973	953
1961	936	995	801	957	966	912
1971	930	985	820	949	962	893
1981	937	987	850	967	980	919
1991	934	972	875	958	966	932
2001	922	960	873	957	962	943

Note: Sex ratio has been defined here as the number of females per 1,000 males.

2001 Census recorded sex ratio of 957 females per 1,000 males in the district. This is significantly higher than that of the State average of 922. The sex ratio in Sangli district has remained higher than that of State right from Census 1901 except 1911 and 1921. From 1901 to 2001 the sex ratio in Sangli district has been fluctuated between 984 to 942, while the State average fluctuated between 978 to 922 exhibiting the declining trend in general. District sex ratio has recorded much higher (957) than the State (922).

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Shirala	1,020	1,019	1,067
2	Walwa	938	938	936
3	Palus	934	934	-
4	Khanapur	1,000	1,013	935
5	Atpadi	986	986	-
6	Tasgaon	966	974	924
7	Miraj	943	939	945
8	Kavathemahankal	962	962	-
9	Jat	948	948	-
	District Total:	**957**	**962**	**943**

In Sangli district as a whole, there are 957 females for every thousand males. Within the district sex ratio varies from 1020 in Shirala tahsil to 934 in Palus tahsil. Generally, rural area have a higher proportion of females than the urban areas. Sangli district also conforms to this pattern. The sex ratio for rural and urban areas of Sangli district are 962 and 943 corresponding to the state average 960 and 873 respectively. In rural areas sex ratio is above the district average in 4 out of 9 tahsils viz; tahsil Shirala (1019), tahsil Khanapur (1013), tahsil Atpadi (986) and tahsil Tasgaon (974) and 4 tahsils are below the district average viz; tahsil Walwa (938), tahsil Palus (934), tahsil Miraj (939) and tahsil Jat (948) and remaining one tahsil sex ratio is at per with district average 962 in tahsil Kavathemahankal respectively. In urban areas sex ratio is above the district average in 2 out of 9 tahsils viz; Shirala (1,067) and Miraj (945) 3 tahsils below the district urban average viz; Walwa (936), Khanapur (935), Tasgaon (924) and remaining 4 tahsils have no urban population. These tahsils are Palus, Atpadi, Kavathemahankal and Jat respectively.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Shirala	1,019
2	Walwa	938
3	Palus	934
4	Khanapur	1,013
5	Atpadi	986
6	Tasgaon	974
7	Miraj	939
8	Kavathemahankal	962
9	Jat	948
	District (Rural) Total:	**962**

The sex ratio of the rural areas of the district is 962 females per 1,000 males. The sex ratio in 4 C.D. Blocks in this district, viz; Shirala (1,019), Khanapur (1,013), Atpadi (986) and Tasgaon (974) are above the total district rural average, while in 4 C.D. Blocks the sex ratio is below the district rural average viz; Walwa (938), Palus (934), Miraj (939) and Jat (948), and remaining one C.D. Block the sex ratio is equal to district average 962 in C.D. Block Kavathemahankal.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	3	0.4	3,292	0.2
700-749	1	0.1	3,120	0.2
750-799	1	0.1	3,227	0.2
800-849	4	0.6	6,764	0.3
850-899	44	6.1	83,990	4.3
900-949	204	28.3	784,300	40.2
950-999	229	31.8	714,929	36.7
1,000-1,099	163	22.6	278,486	14.3
1,100+	72	10.0	72,198	3.7
District Total:	**721**	**100.0**	**1,950,306**	**100.0**

Sex ratio (Rural) for District: 962

A perusal of the table reveals that 163 villages constituting 22.6 percent of the total inhabited villages covering 14.3 percent of the total district rural population have a sex ratio in the range of 1,000-1,099, while 229 villages forming 31.8 percent of total inhabited villages and covering 36.7 percent of total district rural population have sex ratio in the range of 950-999, 204 villages constituting 28.3 percent of the total inhabited villages and covering a population of 784,300 (40.2 percent) of total rural district population have a sex ratio in the range of 900-949. The sex ratio for 72 villages constituting 10.0 percent of the total inhabited villages and it covers 3.7 percent of the district total rural population have sex ratio in the rage of 1,100 and above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Ashta (M Cl)	M Cl	944
2	Budhgaon (CT)	CT	887
3	Manadur (CT)	CT	1,067
4	Sangli UA	UA	947
	(a) Madhavnagar (CT)	CT	943
	(b) Sangli-Miraj Kupwad (M Corp.)	M Corp.	947
5	Tasgaon (M Cl)	M Cl	924
6	Uran Islampur (M Cl)	M Cl	932
7	Vita (M Cl)	M Cl	935
Sex ratio (Urban) for the district:			**943**

In the urban areas of different towns, the sex ratio varies considerably. The lowest sex ratio is in Budhgaon (Census Town) (887) and highest sex ratio is in Manadur (Census Town) (1067). Among the 8 towns of the district, 3 towns have sex ratio above the district sex ratio viz; Manadur (Census Town) (1067), Ashta (MCl) (944), and Sangli-Miraj-Kupwad (M.Corp.) (947) and 4 towns have sex ratio below the district average viz. Uran Islampur (MCl) (932), Vita (MCl) (935), Tasgaon (MCl) (924) and Budhgaon (Census Town) (887). The sex ratio in Madhavnagar (Census Town) is equal to district sex ratio (943) respectively.

The sex ratio of Sangli Urban Agglomeration 947 is also above the district urban sex ratio 943.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	**78,033**	**42,094**	**35,939**	**854**

The sex ratio for the district for 0-6 age group is 851, Khanapur, Atpadi, Miraj, Kavathemahankal and Jat tahsils have high sex ratio in 0-6 age group as compared to district average. Remaining Shirala, Walwa, Palus and Tasgaon tahsils have low sex ratio as compared to district average. In urban areas 3 out of 5 tahsils have sex ratio above the district average (851). These tahsils are Shirala, Khanapur and Miraj. Four tahsils Palus, Atpadi, Kavathemahankal and Jat do not have urban areas.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

As per 2001 Census Scheduled Castes population in the district is 313,474, which constituted 12.1 percent of the total population. The proportion of Scheduled Castes population is above the district average (12.1 percent) in tahsil Miraj (13.3 percent), Kavathemahankal (13.9 percent) and Jat (13.3 percent). The proportion of Scheduled Castes population is below the district average in tahsil Shirala (9.4 percent), Walwa (11.5 percent), Palus (11.3 percent), Khanapur (11.8 percent), Atpadi (11.3 percent) and Tasgaon (10.4 percent) respectively.

The Scheduled Tribes population is 17,855 which constituted 0.7 percent of the total population. The proportion of Scheduled Tribes population is higher than the district average (0.7 percent) in tahsil Palus and tahsil Miraj (0.8 percent) and tahsil Jat (1.8 percent). The Scheduled Castes population is higher in urban areas whereas Scheduled Tribes population is higher in rural areas.

8	Kavathemahankal	144,596	20,047	400	13.9	0.3
9	Jat	283,950	37,745	5,244	13.3	1.8
District (Rural) Total:		**1,950,306**	**231,295**	**13,854**	**11.9**	**0.7**

Scheduled Castes and Scheduled Tribes constitute 11.9 percent and 0.7 percent respectively of the general rural population. The highest proportion of Scheduled Castes population is seen in Kavathemahankal C.D. Blocks (13.9 percent) and lowest in Shirala C.D. Block (9.4 percent). The proportion of Scheduled Castes population is above the district average in 3 C.D. Blocks viz; Miraj (13.1 percent) Kavathemahankal (13.9 percent) and Jat (13.3 percent) and below the district average in 6 C.D. Blocks.

The highest proportion of Scheduled Tribe population is seen in Jat C.D. Block (1.8 percent) and lowest in Shirala C.D. Block (0.1 percent) respectively. The proportion of Scheduled Tribes population is above the district in 3 C.D. Blocks viz; Palus (0.8 percent), Miraj (1.1 percent) and Jat (1.8 percent) and below the district average in remaining 6 C.D. Blocks viz; Shirala (0.1 percent), Walwa (0.5 percent), Khanapur (0.2 percent), Atpadi, Tasgaon and Kavathemahankal each (0.3 percent).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage

7	Vita (M Cl)	41,804	5,546	172	13.3	0.4
District(Urban) Total		**633,218**	**82,179**	**4,001**	**13.0**	**0.6**

The highest percentage of Scheduled Castes population is found in Madhavnagar (MCl) (18.0 percent) and lowest in Manadur (MCl) (6.1 percent). In urban areas, the Scheduled Castes and Scheduled Tribes constitute 13.0 percent and 0.6 percent of the total urban population respectively. The percentage of Scheduled Castes population in towns Ashta (MCl) (15.0 percent), Vita (MCl) (13.3 percent), Sangli-Miraj-Kupwad (M. Corp.) (13.5 percent), Madhavnagar (Census Town) (18.0 percent) and Sangli (Urban Agglomeration) (13.6 percent) are above the district urban average and Manadur (Census Town) (6.1 percent), Uran Islampur (MCl) (11.9 percent), Tasgaon (MCl) (6.5 percent) and Budhagaon (Census Town) (8.8 percent) are below the district urban average (13.0 percent).

The highest percentage of Scheduled Tribes population is found in Ashta (MCl) (1.7 percent) and lowest in Madhavnagar (Census Town) (0.1 percent) respectively.The percentage of Scheduled Tribes population in Ashta (MCl) (1.7 percent), Tasgaon (MCl) (0.9 percent) and Budhgaon (Census Town) (1.5 percent) are above the district urban average and Manadur (Census Town), Urban Islampur (MCl) (0.5 percent) each, Vita (MCl) (0.4 percent) and Madhavnagar (Census Town) (0.1 percent) and Sangli (Urban Agglomeration) (0.5 percent) are below the district urban average (0.6 percent). Remaining Sangli-Miraj Kupwad (MCl) has Scheduled Tribe population at par with the district urban average (0.6 percent).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Shirala	984	659
2	Walwa	955	949
3	Palus	955	974
4	Khanapur	994	960
5	Atpadi	980	930
6	Tasgaon	990	966
7	Miraj	966	928
8	Kavathemahankal	1,017	1,020
9	Jat	974	949
	District (Rural) Total	**976**	**946**

Sex ratio among Scheduled Castes population stood at 976, while Scheduled Tribes population stood at 946 in C.D. Blocks in 2001 Census. The highest sex ratio among Scheduled Castes population is 1,017 in Kavathemahankal C.D. Block while the lowest is 955 in Walwa and Palus C.D. Blocks. The highest sex ratio of Scheduled Tribes population is 1,020 in Kavathemahankal C.D. Block while the lowest is 659 in Shirala C.D. Block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ashta (M Cl)	941	1,000
2	Budhgaon (CT)	949	946

The district reported 1,717,836 persons as literates in 2001 Census. They constitute 76.6 percent of the total population (excluding 0-6 age group) of the district. For the district as a whole literacy rates for males are substantially higher compared to females in both rural and urban areas. The tahsilwise break up shows that Miraj tahsil has highest literacy rate of (82.1 percent) and Jat tahsil has the lowest literacy rate of 63.0 percent. It is observed that the tahsils having urban centres have literacy rate higher than other confirming the fact that urban centres and surrounding areas have better infrastructure as far as the educational facilities are concerned. Male literacy rate is higher in Miraj tahsil (90.0 percent) and lowest in Jat tahsil (74.3 percent), 5 tahsils have male literacy rate above the district average viz Walwa (88.2 percent), Palus (88.7 percent), Khanapur (86.5 percent), Tasgaon (87.9 percent) and Miraj (90.0 percent) and 3 tahsils literacy rate below the district average viz. Kavathemahankal (83.5 percent), Atpadi (78.5 percent) and Jat (74.3 percent). The male literacy rate is at per with district average (86.3 percent) in tahsil Shirala respectively. Female literacy rate is highest in Miraj tahsil (73.7 percent) and lowest

in Jat tahsil (51.3 percent) 4 out of 9 tahsils have female literacy rate above the district average viz. Walwa (70.2 percent), Palus (70.3 percent), Tasgaon (67.6 percent) and Miraj (73.7 percent) remaining 5 tahsils have female literacy rate below the district average viz. Shirala (60.9 percent), Khanapur (65.5 percent), Atpadi (54.3 percent), Kavathemahankal (62.2 percent) and Jat (51.3 percent).

In the rural areas of the district, the literacy rate is 74.1 percent with male literates having 84.6 percent and females literates accounting for 63.5 percent Palus tahsil has the highest rural literacy rate of 79.7 percent. In this tahsil 88.7 percent of male and 70.3 percent of females are literates. The lowest rural literacy rate is noted in Jat tahsil 63.0 percent. There is a significant difference in literacy rate between males and females in the total areas of the district. A differential of about 16.3 to 25.5 points is seen in the 9 tahsils while Shirala tahsil has the largest male-female literacy rate differential of 25.5 point. In other words females are lagging behind males in literacy in all the tahsils

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

7	Uran Islampur (M Cl)	5,016	2,829	2,187	1,942	713	1,229	83.1	92.3	73.5	18.8
8	Vita (M Cl)	3,609	2,124	1,485	1,937	716	1,221	77.4	88.8	65.4	23.4
	Sangli (Urban)	**54,264**	**31,052**	**23,212**	**27,915**	**10,453**	**17,462**	**76.5**	**87.0**	**65.9**	**21.2**

According to 2001 Census 54,264 Scheduled Castes persons are literates in the urban areas of the Sangli district. Comprising 31,052 males and 23,212 females. The percentage of Scheduled Castes literates is 76.5 percent in urban areas of the district. Among the males it accounts for 87.0 percent while females literacy rate is 65.9 percent. Within the 8 towns of Sangli district, Uran Islampur (MCl) has highest literacy rate (83.1 percent) and lowest literacy is in Manadur (Census Town) (65.2 percent). Among the 8 towns, 4 towns viz. Uran Islampur (MCl) (83.1 percent), Vita (MCl) (77.4 percent), Tasgaon (MCl) (79.0 percent) and Budhgaon (Census Town) (80.0 percent) have literacy rate above the district average and 4 towns viz. Manadur (Census Town) (65.2 percent), Ashta (MCl) (74.5 percent), Madhavnagar (Census Town) (76.3 percent) and Sangli-Miraj-Kupwad (M.Corp.) (75.7 percent) have literacy rate below the district average (76.5 percent).

Among males literacy rate is higher than district average in Uran Islampur (MCl) (92.3 percent), Vita (MCl) (88.8 percent), Tasgaon (MCl), Budhgaon (Census Town) and Madhavnagar (Census Town) (87.4 percent) each and remaining Manadur (Census Town) (80.6 percent), Ashta (MCl) (85.3 percent) and Sangli-Miraj-Kupwad (M. Corp.) (86.4 percent) male literacy rate is below the district average (87.0 percent) whereas among females literacy rate is higher than district average in Uran Islampur (M.Corp.) (73.5 percent), Tasgaon (MCl), (70.1 percent) and Budhgaon (Census Town) (72.3 percent) and remaining Manadur (Census Town) (51.4 percent), Ashta (MCl) (63.4 percent), Vita (MCl) (65.4 percent), Madhavnagar (Census Town) (63.8 percent) and Sangli-Miraj-Kupwad (M.Corp.) (65.1 percent) female literacy rate is below the district average (65.9 percent).

Widest gap in male-female of 29.2 percent is seen in Manadur (Census Town) and least gap in Budhgaon (Census Town) 15.0 percent. District urban male-female gap is 21.2 percent.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

9	Jat	2,710	1,669	1,041	2,534	1,022	1,512	62.3	76.1	48.3	27.8
District (Rural) Total:		**8,461**	**5,008**	**3,453**	**5,393**	**2,111**	**3,282**	**71.9**	**83.3**	**59.9**	**23.3**

According to 2001 Census 8,461 Scheduled Tribes persons are literates in the rural areas of the district. Of these 5,008 are males and 3,453 are females. It is seen that 71.9 percent of the Scheduled Tribes in rural areas of the district are literates. Among the males the literates constitute 83.3 percent and females literate constitute 59.9 percent. Within the district the highest literacy is seen in Palus C.D. Block (82.0 percent) and the lowest in Jat C.D. Block (62.3 percent). Among the 9 C.D. Blocks in the district, in 7 C.D. Block Scheduled Tribes literates are above the district rural literates (71.9 percent) viz. Shirala (75.0 percent), Walwa (76.5 percent), Palus (82.0 percent), Atpadi (78.2 percent), Tasgaon (76.7 percent), Miraj (76.6 percent) and Kavthemahankal (80.9 percent) and remaining 2 C.D. Blocks are below the district average viz. Khanapur (64.4 percent) and Jat (62.3 percent).

The highest literacy among males is seen in Kavathemahankal C.D. Block (92.4 percent) and lowest in Khanapur C.D. Block (73.9 percent). Within district 7 C.D. Blocks viz. Shirala (85. 1 percent), Walwa (86.0 percent), Palus (91.0 percent), Atpadi (86.1 percent), Tasgaon (85.7 percent), Miraj (87.6 percent) and Kavathemahankal (92.4 percent) are above the district male average and remaining 2 C.D. Blocks viz. Khanapur (73.9 percent) and Jat (76.1 percent) are below the district male literates (83.3 percent).

Among females the highest literacy rate is seen in Palus C.D. Block (72.8 percent) and lowest in Jat C.D. Block (48.3 percent). Among 9 C.D. Blocks in 6 C.D. Blocks females have higher literacy rate which is above the district females literacy rate (59.9 percent), viz; Walwa (66.6 percent), Palus (72.8 percent), Atpadi (69.2 percent), Tasgaon (67.5 percent), Miraj (64.9 percent) and Kavathemahankal (69.2 percent) and remaining 3 C.D. Block are below the district female literacy rate i.e. Shirala (57.1 percent), Khanapur (53.8 percent) and Jat (48.3 percent) respectively.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	8	3.0	55	0.4
1-10	4	1.5	113	0.8
11-20	1	0.4	19	0.1
21-30	4	1.5	191	1.4
31-40	5	1.9	301	2.2
41-50	19	7.2	1,272	9.2

There has been no conceptual charge in difining the workers between 1991 and 2001 Census. At 2001 Census there has been mainly three-fold classification of population, viz. main workers, marginal workers and non-workers which adopted for 1991 also. The main workers of 2001 are distributed in four categories of economic activites instead of nine industrial categories in earlier Census 1991.

The work participation rate for workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. 2001 Census recorded 36.9 percent of district population as main workers 10.3 percent as marginal workers and the remaining 52.8 percent as non-workers.

Among the 36.9 percent main workers, male participation rate in the district is 50.3 percent while that of females is 22.8 percent as per 2001 Census.

The percentage of main workers is highest in Khanapur tahsil (44.0 percent) and the lowest in Miraj tahsil (31.7 percent). Among the 9 tahsils of the district 6 tahsils are above the district average viz; Walwa (37.2 percent), Palus (38.9 percent), Khanapur (44.0 percent), Tasgaon (40.5 percent) Kavathemahankal (38.7 percent) and Jat (39.3 percent) and remaining 3 tahsils are below the district average Shirala (35.7 percent), Atpadi (36.2 percent) and Miraj (31.7 percent) of main workers as a district average (36.9 percent) respectively.

Among the 10.3 percent marginal workers male participation rate in the district is 5.7 percent while that at female is 15.1 percent. The percentage of marginal workers is highest in Khanapur tahsil (15.2 percent) and lowest in Miraj tahsil (5.7 percent). Among 9 tahsils of the district 7 tahsils are above the district average i.e. Shirala (13.6 percent), Palus (13.4 percent), Khanapur (15.2 percent), Atpadi (12.9 percent), Tasgaon (12.8 percent), Kavathemahankal (12.2 percent) and Jat (11.3 percent) and remaining 2 tahsils are below the district marginal workers average viz; Walwa (9.4 percent) and Miraj (5.7 percent).

The proportion of females marginal workers (15.1 percent) is substantially higher compared to males (5.7 percent).

In this district 52.8 percent population is recorded as non-workers, within this 43.9 percent males and 62.1 percent females are non-workers.

District (Rural) Total:		**Persons**	**1,950,306**	**760,576**	**39.0**	**242,811**	**12.4**	**1,003,387**	**51.4**	**946,919**	**48.6**
		Males	**994,155**	**507,962**	**51.1**	**65,303**	**6.6**	**573,265**	**57.7**	**420,890**	**42.3**
		Females	**956,151**	**252,614**	**26.4**	**177,508**	**18.6**	**430,122**	**45.0**	**526,029**	**55.0**

In rural areas of the district it is seen that 39.0 percent are main workers 12.4 percent are marginal worker and the remaining 48.6 percent are non-workers. Among the main workers, male participation rate in rural areas of the district is 51.1 percent while that of females is 26.4 percent as per 2001 Census. The proportion of main workers is highest in Khanapur C.D. Block (45.8 percent) and lowest in Shirala C.D. Block (35.7 percent). In C.D. Block Khanapur (45.8 percent), C.D. Block Tasgaon (42.3 percent) and C.D. Block Jat (39.3 percent) are above district rural average of 39.0 percent. The disparity between the proportion of main workers among males and females in rural areas is comparatively less in the C.D. Blocks of Shirala (35.7 percent), Walwa (38.0 percent), Palus (38.9 percent), Atpadi (36.2 percent) Miraj (36.0 percent) and Kavathemahankal (38.7 percent).

Among the rural marginal workers (12.4 percent) male participation rate is 6.6 percent while that of females 18.6 percent. The proportion of marginal workers is the highest in Khanapur C.D. Block (17.3 percent) and the lowest in Miraj C.D. Block (9.7 percent) among 9 C.D. Blocks of the district.

In rural areas of the district 48.6 percent is non-workers. In that 42.3 percent males and 55.0 percent females.

2001 Census recorded 30.3 percent of the urban district population as main workers. 3.7 percent marginal workers and the remaining 66.0 percent as non-workers.

In the case of urban areas, Ashta (MCl) has the highest work participation rate of main-workers (36.9 percent) while Madhavnagar (Census Town) has the lowest rate (28.7 percent). Manadur (Census Town) (34.7 percent), Uran-Islampur (MCl) (32.7 percent), Ashta (MCl) (36.9 percent), Vita (MCl) (34.9 percent) and Tasgaon (MCl) (30.7 percent) are the above the district urban average of 30.3 percent. The proportion of main workers is below the district average, Budhgaon (Census Town) (28.9 percent), Sangli-Miraj Kupwad (M.Corp.) (29.0 percent),

Madhavnagar (Census Town) (28.7 percent) and Sangli Urban Agglomeration (29.0 percent).

The sexwise break up shows that among males and females 48.0 percent and 11.4 percent of the population are main workers. The work participation rate for marginal workers in urban area for the district is 3.7 percent with 3.2 percent males and 4.2 percent females. The percentage of marginal workers is the highest in Manadur (Census Town) (9.6 percent) and lowest in Uran Islampur (MCl) (2.8 percent) respectively.

Six towns have marginal workers average above the district urban average two towns Uran Islampur (MCl) and Sangli-Miraj-Kupwad (M.Corp.) and Sangli Urban Agglomeration also below the district average (3.7 percent). In urban areas in the district non-workers contributed 66.0 percent, 48.7 percent males and 84.3 percent females.

Note: Percentage of workers to total workers are given in brackets.

Table 34 gives the distribution of males and females workers by four industrial categories of economic activities of the district.

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers according to the broad four fold classification viz;, cultivators, agricultural labourers, household industry workers and other economic activity workers. The economic activity of the district is primarily agricultural supported by the fact that cultivators (46.0 percent) and agricultural labourers (23.3 percent) together constitute 69.3 percent of the workers in the district. The agriculture sector has absorbed nearly seventy percent of the total workers in the district.

The proportion of both cultivators and agricultural labourers differs considerably from tahsil to tahsil. The proportion of cultivator varies between 59.7 percent for Jat tahsil and 22.2 percent for Miraj tahsil. The proportion of agricultural labourers varies between 30.5 percent for Walwa tahsil and 18.2 percent for Shirala tahsil. It may be seen that 30.7 percent workers are engaged in work other than agriculture. Among them 3.3 percent are household industry workers and remaining 27.4 percent are in other workers.

The proportion of household industry workers varies between 4.4 percent for Walwa tahsil to 2.0 percent for Palus tahsil. Among 9 tahsils, 4 tahsils have higher household industry workers than district average (3.3 percent) and there proportion is lower in the remaining 5 tahsils.

The proportion of other workers varies between 55.2 percent in Miraj tahsil and 13.2 percent in Jat

tahsil. Among 9 tahsils only one tahsil i.e. Miraj tahsil (55.2 percent) proportion of other workers is higher than that of district average (27.4 percent) and their proportion is lower in the remaining 8 tahsils.

				(45.0)	**(53.9)**	**(34.2)**	**(3.6)**	**(8.3)**

Note: Percentage of workers to total workers are given in brackets.

Table 35 indicates the distribution of workers by male and female workers by four categories for the district.

The economy of the district is primarily agricultural which is supported by the fact that cultivators (53.9 percent) and agricultural labourers (26.2 percent) together constitute 80.1 percent of the total workers of the district. The remaining 19.8 percent of workers are engaged in household industry and other work.

The proportion of cultivators varies between 64.0 percent for Khanapur C.D. Block and 43.1 percent for Miraj C.D. Block. The proportion for agricultural labourers varies between 32.2 percent for Walwa C.D. Block and Miraj C.D. Block and 18.1 percent for Shirala C.D. Block. Over 80.1 percent of the workers in the district are directly engaged in agriculture as cultivators and agricultural labourers, which is but natural in the context of the agricultural economy of the district.

The proportion of household industry for district is 3.0 percent. The proportion of houshehold industry workers varies between 4.3 percent for Shirala C.D. Block and Walwa C.D. Block to 1.8 percent in Khanapur C.D. Block. Among 9 C.D. Blocks 4 C.D. Blocks have higher household industry workers than that of district average (3.0 percent) and their proportion is lower in the remaining 5 C.D. Blocks respectively.

The proportion of other workers for the district is 16.8 percent. The proportion of other workers varies between 21.1 percent in Miraj C.D. Block and 12.7 percent in Khanapur C.D. Block. Among 9 C.D. Blocks 5 C.D. Blocks proportion of other workers have higher than that of district average (16.8 percent) and their proportion is lower in the remaining 4 C.D. Blocks.

				(15.7)	**(12.3)**	**(22.2)**	**(11.1)**	**(54.4)**

Note: Percentage of workers to total workers are given in brackets.

The proportion of cultivators varies between 45.2 percent for Manadur (Census Town) and 2.4 percent for Madhavnagar (Census Town) . The proportion for agricultural labourers varies between 32.6 percent for Ashta (MCl) and 5.1 percent for Sangli-Miraj Kupwad (M.Corp.). In the district 19.0 percent of the workers in urban areas are directly engaged in agriculture as cultivators and agricultural labourers.

The proportion of household industry for district is 4.7 percent. The proportion of household industry workers varies between 8.1 percent for Madhavnagar (Census Town) to 3.2 percent for Tasgaon (MCl). Among 8 towns 4 towns viz; Uran Islampur (MCl) Vita (MCl), Budgaon (Census Town) and Madhavnagar (Census Town) have higher household industry workers than district average (4.7 percent) and their proportion is lower in the other 4 towns and Sangli Urban Agglomeration also.

The district urban average for the other workers proportion is 76.3 percent. The proportion of other workers varies between 87.4 percent in Sangli –Miraj Kupwad (M.Crop) and 30.4 percent in Manadur (Census Town) towns. Among 8 towns Sangli –Miraj Kupwad (M.Corp.) and Sangli Urban Agglomeration proportions of other workers have higher than the district average (76.3 percent) and their proportion is lower in remaining 7 towns.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Educational

The educational amenities is available in 720 villages, which constitute 99.9 percent of the total 721 inhabited villages of the district. This is followed by Miraj (98.4 percent) C.D. Blocks villages with educational amenity (Table 37).

The educational amenity is available to 99.9 percent population in the district. (Table 38).

There are only 2 villages, which do not primary school amenity. Out of these 2 villages without educational amenity. 1 village has a primary school located at a distance of up to 5 Kms.. There is not a single village covered between 5-10 Kms. and for the remaining 1 village it is beyond 10 Kms.. (Table 39).

There are 152 villages, which do not have middle school amenity. Out of these 152 villages without middle school amenity. 119 villages have a middle school located at a distance of hardly 5 Kms., in respect of 29 villages the distance to be covered is between 5 and 10 Kms. and for the remaining 4 villages it is more than 10 Kms. (Table 39).

There are 702 villages which do not have degree college amenity. Out of 702 villages without degree college's amenity, 78 villages have a degree college located at a distance of hardly 5 Kms., in respect of 175 villages the distance to be covered is between 5 and 10 Kms., and for the remaining 449 villages it is more than 10 Kms. (Table 39).

As per the distribution of villages according to the distance range from nearest statutory town, the education amenity is available in all 12 villages (100.0 percent) within 5 Kms., 187 villages have educational amenity within 5-15 Kms., 358 villages within 16-50 Kms., 163 villages at a distance of 51 and above Kms. (Table 40).

231 inhabited villages constituting 99.6 percent of the total 232 inhabited villages is in the population range upto 1,000-1,999 remaining 489 villages constituting 100.0 percent educational amenity available in all ranges.

Medical

Medical institutions of one or the other type are available in 567 villages (78.6 percent) out of 721 inhabited villages in the district serving 91.5 percent of the rural population of the district. It is observed from C.D. Blockwise figures of villages having medical amenity that they are ranging between 87.5 percent in Tasgaon C.D. Block to 68.3 percent in Atpadi and Kavathemahankal C.D. Blocks. The proportion of medical amenities in the district is above the district average in 6 C.D. Blocks while remaining 3 C.D. Blocks fall below the district average (78.6 percent). The villages enjoying this amenity through primary health centres, sub-centres and dispensaries served not only the resident population of the concerned villages but also those residing in surrounding villages. (Table – 37).

567 villages out of 721 inhabited villages have medical amenity in their respective villages limits. 154 villages do not have any type of medical amenity. These villages covered a distance up to 5 Kms., 5-10 Kms. and more than 10 Kms..

Of the 721 total inhabited villages as many as 665 and 650, 124 and 198 villages are situated at a distance of less than 5 Kms., with reference to the nearest place with medical amenity such as Hospital and Primary Health Centre respectively. Another 265 and 282 villages are located at a distance of 5-10 Kms. for Hospital and Primary Health Centres. But in the case of 276 and 170 villages the resident have to travel more than 10 Kms. to reach a place with these medical amenity i.e. Hospital and Primary Health Centres. (Table - 39).

According to the distance range from nearest statutory town, the medical amenity is available in 9 villages (75.0 percent) within 5 Kms., 163 villages (86.7 percent) have medical amenity within 5-15 Kms., 280 villages (78.2 percent) within 16-50 kilometres and remaining 115 villages (70.6 percent) at a distance of 51 and above Kms. (Table 40).

According to the population range the medical amenity is available for 20 villages (51.3 percent) covering population range up to 499, 75 villages (56.0 percent) with a population range of 500-999, 163 villages (70.3 percent) with a population range of 1,000-1,999, 214 villages (96.8 percent) with a population range of 2,000-4999, 73 villages (100.0 percent) with a population range of 5,000-9,999 and remaining 22 villages (100.0 percent) with a population range of 10,000 and above with their respective revenue limits (Table 41).

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communications includes bus service, rail facility and navigable waterways.

Drinking Water

Water supplied from tap or hand pump or tube well situated within or outside the premisses is considered as improved drinking water amenity.

The improved drinking water source is available in 711 villages (98.6 percent) out of 721 inhabited villages. Drinking water amenity is available 99.4 percent population in the district. 10 inhabited villages do not have improved drinking water amenity.

Postal

As regards rural areas of the district as a while the amenity of post and telegraphs is available to 428 (59.4 percent) villages out of 721 villages, serving 83.1 percent of rural population of the district. Within the 9 C.D. Blocks of the district the percentage of villages having post and telegraphs amenity varies considerably, Tasgaon C.D. Block with 79.7 percent has the highest proportion whereas Atpadi C.D. Block with 40.0 percent holds the last rank. Among the 9 C.D. Blocks of the district 5 C.D. Blocks are above the district average, while remaining 4 C.D. Blocks fall below the district average (59.4 percent). (Table 37).

In Miraj C.D.Block the post office amenity is available to as high as 92.0 percent of the rural population. Post office amenity is available in Walwa (85.5 percent), Palus (86.5 percent), Tasgaon (90.3 percent), Miraj (92.0 percent) and Kavathemahankal (87.8 percent) of the rural population respectively and

which is above the district rural population average (83.1 percent) and remaining 4 C.D. Blocks Shirala (77.3 percent), Khanapur (75.6 percent), Atpadi (71.5 percent) and Jat (75.4 percent) are below the district rural population (Table 38).

Postal amenities are not available to 293 villages. Out of these as many as 213 villages are situated within 5 Kms. with reference to the nearest place with postal amenities, 62 villages have to cover the distance between 5 and 10 Kms. to avail the postal amenity. People of 18 villages have to cover distance beyond 10 Kms. for availing postal amenity (Table – 39).

As per the distribution of villages according to the distance range from nearest statutory town, the postal amenity is availlable in 9 villages (75.0 percent) upto 5 Kms., 120 villages (63.8 percent) have this amenity within 5-15 Kms.. 219 villages (61.2 percent) within 16-50 Kms., 80 villages (49.1 percent) at a distance of 51 and above Kms. from the nearest statutory town. (Table – 40).

Among 428 villages, with amenity of post and telegraph 4 villages are having less than 500 population, 21 villages are in the population range of 500-999, 115 villages are in the population range of 1,000-1,999, 194 villages are in the population range to 2,000-4,999, 72 villages are in the population range of 5,000-9,999 and remaining 22 villages have the population range of 10,000 and above (Table – 41).

Telephone

The amenity of telephone is available in 602 (83.5 percent) villages of the district. These villages serving 92.1 percent of rural population of the district. Within the 9 C.D. Blocks of the district, the percentage of villages having telephone amenities varies considerably Kavathemahankal C.D. Blocks has cent percent coverage proportion. Among the remaining 8 C.D. Blocks of the district, 5 C.D. Blocks viz; Walwa (84.4 percent). Palus (92.3 percent), Khanapur (96.3 percent), Tasgaon (96.9 percent) and Miraj (92.1 percent) are above the district average. While remaining 3 C.D. Blocks viz; Shirala (72.3 percent), Atpadi (65.0 percent) and Jat (66.4 percent) falls below the district average (83.5 percent) (Table–37).

The telephone amenity is available to 92.1 percent population in the district. In Kavathemahankal C.D. Block 100.0 percent rural population avails this amenity (Table – 38).

There are only 119 villages, which do not have telephone amenity. Out of these 119 villages are without telephone amenity. 27 villages have a telephone amenity at a distance of less than 5 Kms., in respect of 20 villages the distance to be covered is between 5-10 Kms. to avail the telephone amenity. People of 72 villages have to cover a distance of more than 10 Kms. to get telephone amenity (Table – 39).

As per distribution of villages according to the distance range from nearest statutory town, the telephone amenity is available in 10 villages (83.3 percent) within 5 Kms., 172 villages (91.5 percent), have this amenity within 5-15 Kms., 314 villages (87.7 percent) within 16-50 Kms., 106 villages (65.0 percent) at a distance beyond 51 Kms. respectively (Table – 40).

Among 602 villages with amenity of telephone, 22 villages are having less than 500 population, 89 villages are in the population range of 500-999, 192 villages are in the population range of 1,000-1,999, 206 villages are in the population range of 2,000-4,999, 71 villages are in the population range of 5,000-9,999 and remaining 22 (100.0 percent) villages have the population range of 10,000 and above (Table – 41).

Transport and Communication

Transport communication includes bus service, rail facility and navigable waterways. It a bus stop or a railway station or navigable waterway is located within the territorial jurisdication of a village, it is considered to have been served by such facility over if it is little away from the actual settlement. 675 (93.6 percent) villages have communication amenity available serving 98.0 percent of the rural population of the district.

Among the 9 C.D. Block of the district, 64 villages of Tasgaon C.D. Block constituting 100.0 percent of total villages where communication transport amenity is available. Among the remaining 8 C.D. Blocks of the district, 4 C.D. Blocks are above the district average. viz; Walwa 94 (97.9 percent), Palus 50 (96.2 percent), Miraj 62 (98.4 percent) and Kavathemahankal 59 (98.3 percent), and 4 C.D. Blocks are below the district average viz., Shirala 82 (87.2 percent), Khanapur 100 (93.5 percent), Atpadi 50 (83.3 percent) and Jat 114 (91.2 percent) respectively. (Table – 37).

In Tasgaon C.D. Block the transport communication amenity is available to as high as 100.0 percent of the rural populaion. This is followed by Miraj (99.7 percent), Kavathemahankal and Palus (99.4 percent) each and Walwa (98.8 percent) higher than the rural population average (98.1 percent) and remaining 4 C.D. Blocks Shirala (93.7 percent), Khanapur (97.4 percent), Atpadi (93.1 percent) and Jat (97.0 percent) are below the district population. (Table-38)

Out of 721 villages, 47 villages have no bus service amenity available. Of the 47 villages the residents of 42 villages have to cover a distance upto 5 Kms. to reach a place with such amenity, for 5 villages it is between 5-10 Kms.. There is not a single village has to cover a distance beyond 10 Kms.. The availability of this amenity depends upon the location of the village with reference to road (Table –39).

Out of 721 inhabited villages 675 villages having transport communications amenity. As per distribution of villages according to the distance range from nearest statutory town, the transport communication amenity is available in 12 villages (100.0 percent) upto 5 Kms., 183 villages (97.3 percent) within 5-15 Kms., 341 villages (95.3 percent) within 16-50 Kms. and remaining 139 villages (85.3 percent) at distance of 51 and above Kms.. (Table-40).

Among 675 villages which have the availability of communication amenity availability within their respective limits, the population for 27 villages is less than 500, for 112 villages population is in the range of 500-999, for 222 villages population is in the range of 1,000-1,999, for 219 villages in the population range of 2,000-4,999, 73 villages in the population range of 5,000-9,999 and remaining 22 villages in the range of 10,000 and above. Thus the population size of a village has an impact on the availability of communication amenity. (Table – 41).

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Banking

The amenity of banking services is available in 214 (29.7 percent) villages out of 721 inhabited villages serving 60.6 percent rural population of the district. It is observed from C.D.Blockwise figures of villages having banking amenity that they are ranging between 44.4 percent in Miraj C.D. Block to 22.3 percent in Shirala C.D. Block. The proportion of banking amenities in the district is above the district average in 4 C.D. Blocks viz; Walwa (39.6 percent), Palus (40.4 percent), Tasgaon (31.3 percent) and Miraj (44.4 percent) and 5 C.D. Blocks is below the district average viz; Shirala (22.3 percent), Khanapur (24.3 percent), Atpadi (25.0 percent), Kavthemahankal (28.3 percent) and Jat (22.4 percent) respectively (Table- 37).

In Miraj C.D. Block the banking service is available to as high as 75.5 percent of the rural population. This is followed by Walwa (70.9 percent) and Palus (69.1 percent) C.D. Blocks of the rural population respectively which is above the district rural population average (60.6 percent) and remaining 6 C.D. Blocks, Shirala (49.3 percent), Khanapur (45.6 percent), Atpadi (57.7 percent), Tasgaon (60.1 percent), Kavathemahankal (53.8 percent) and Jat (49.2 percent) are below the district population (Table–38)

Out of 721 total inhabited villages as many as 623 villages and 518 villages the people of 218 villages and 242 villages have to cover a distance upto 5 Kms. for availing the amenity of commercial bank and co-operative bank respectively. For 245 villages and 173 villages the amenity is available at a distance of 5-10 Kms. and for remaining 160 villages and 103 villages the amenity of commercial bank and co-operative bank respectively is available at a distance of more than 10 Kms.. (Table – 39).

Out of 721 inhabited villages 214 villages having banking amenity. As per distribution of villages according to the distance range from nearest statutory town, the banking amenity is available in 4 villages (33.3 percent) within 5 Kms., 66 villages (35.1 percent) have banking amenity within 5-15 Kms., 113 villages (31.6 percent) within 16-50 Kms. and remaining 31 villages (19.0 percent) at a distance of 51 and above Kms. (Table – 40).

Among 214 villages, which have the availability of banking amenity within their respective limits.

There is not single village cover in less than 500, for 1 village in the range of 500-999 for 21 villages in the range of 1,000-1,999, for 101 villages in the range of 2,000-4,999, for 69 villages in the range of 5,000-9,999 and the remaining 22 villages in the population range of 10,000 and above (Table –41).

Agricultural Credit Societies

There are 493 (68.4 percent) villages having agricultural credit societies in the district. These villages serve 86.7 percent of the rural population. The highest proportion of villages 52(81.3 percent) have the amenity available in the Tasgaon C.D. Block and lowest i.e. 67(53.6 percent) in Jat C.D. Block. The proportion of agricultural credit societies in the district is above the district average in 6 blocks viz; Shirala (74.5 percent), Walwa (69.8 percent), Khanapur (71.0 percent), Tasgaon (81.3 percent), Miraj (77.8 percent) and Kavathemahankal (70.0 percent) and 3 C.D. Blocks are below the district average i.e. Palus (67.3 percent), Atpadi (58.3 percent) and Jat (53.6 percent) (Table-37).

In Tasgaon C.D. Block the agricultural credit societies is available to as high as 90.4 percent of the rural population. This is followed by C.D Blocks Shirala (90.3 percent), Miraj (90.0 percent), Walwa (88.6 percent), Khanapur (88.5 percent), and Kavathemahankal (87.2 percent) of the rural population respectively which is above the district rural population average (86.7 percent) and remaining 3 C.D. Blocks Palus (86.2 percent), Atpadi (79.4 percent) and Jat (78.9 percent) are below the district population (Table-38).

Out of 721 inhabited villages, 228 villages are not having this amenity. Out of these as many as 139. villages are situated at a distance up to 5 Kms., 64 villages within 5-10 Kms. and 25 villages at a distance of more than 10 Kms. where the amenity is available (Table-39).

As per the distribution of villages according to distance from nearest statutory town where the amenity is available, 9 villages are situated at a distance of less than 5 Kms. from the nearest statutory town, 151 villages at a distance of 5-15 Kms., 245 villages at a distance of 16-50 Kms. and only 88 villages at a distance of 51 and above Kms. (Table 40).

This amenity is available to 7 villages with a population range of less than 500, 37 villages with population of 500-999, 155 villages with population of 1,000-1,999, 203 villages with population of 2,000-4,999, 69 villages with 5,000-9,999, and remaining 22 villages with population of 10,000 and above (Table-41).

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Approach by Pucca Road

Road whether 'pucca or kachcha' are the nerve system of a district. They act as a pull factor for the development and upliftment of the area. Roads with cement concrete, black top water bound macadam etc. come under pucca road and the remaining are treated as kachcha road.

Pucca road amenity is available to 674 villages (93.5 percent), out of 721 inhabited villages in the district. In this respect Shirala, Walwa, Palus, Khanapur, Miraj and Kavathemahankal C.D. Block enjoys a better position with 100.0 percent of the villages having pucca road as approch road. Of the remaining 3 C.D Blocks, C.D Block Tasgaon (98.4 percent) is above the district average and 2 C.D Blocks, Atpadi (93.3 percent) and Jat (66.4 percent) are below the district average. (Table-37)

The aggregate population of the villages with pucca road from 96.7 percent of the rural population of the district. When examined from this point of view, Shirala, Walwa, Palus, Khanapur, Miraj and Kavathemahankal C.D. Blocks are 100.0 percent amenity available. In the remaining 3 C.D Blocks, Tasgaon C.D Block is above the district average, while 2 C.D. Blocks are below the district average. Majority of the villages in this district enjoys the pucca road amenity. Population size is an important factor directly associated with availability of pucca road amenity larger the size, greater are the chances of the villages having this amenity (Table – 38).

As per the distribution of villages according to distance of range of availability of amenity from nearest statutory town. Out of 674 villages, 12 villages are at a distance of less than 5 Kms. from the nearest statutory town, 188 villages at a distance of 5-15 Kms., 335 villages at a distance of 16-50 Kms., 139 villages at a distance of 51and above Kms.. (Table-40).

The population of 38 (97.4 percent) villages served by pucca road is less than 500, for 117 (87.3 percent) villages it is in the range of 500-999, for 212 (91.4 percent) villages is in the range of 1,000-1,999, for 212 (95.9 percent) villages is in the range of 2,000-4,999, for 73(100.0 percent) villages is in the range of 5,000-9,999 and remaining 22 (100.0 percent) villages is in the range of 10,000 and above. (Table-41)

Power Supply

All the 721 inhabited villages in the district are electrified. (Table–37)

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Shirala	94	45,690.5	85.4	11.4
2	Walwa	96	68,173.4	91.3	69.5
3	Palus	52	48,901.0	86.7	47.7
4	Khanapur	107	111,117.0	80.7	8.2
5	Atpadi	60	88,646.0	85.9	11.4
6	Tasgaon	64	74,300.0	86.9	10.5
7	Miraj	63	85,069.0	87.4	28.5
8	Kavathemahankal	60	93,632.0	68.7	10.6
9	Jat	125	224,790.0	89.3	10.2
	District Total:	**721**	**840,318.9**	**84.9**	**19.5**

Note : - Cultivable area = Irrigated area + Unirrigated area

For the distribution as a whole 84.9 percent of the total area is cultivable. Among the 9 C.D. Blocks, 7 C.D. Blocks percentage of cultivable area is higher than that of district cultivable area viz; Shirala (85.4 percent), Walwa (91.3 percent), Palus (86.7 percent), Atpadi (85.9 percent), Tasgaon (86.9 percent), Miraj (87.4 percent) and Jat (89.3 percent) and remaining 2 C.D. Blocks cultivable area is below the district average viz; Khanapur (80.7 percent) and Kavathemahankal (68.7 percent). Bearly 19.5 percent of the cultivable area of the district is irrigated. Walwa (69.5 percent), Palus (47.7 percent) and Miraj (28.5 percent) C.D. Blocks have a higher proportion of the cultivable area under irrigation. The remaining 6 C.D. Blocks viz; Shirala (11.4 percent), Khanapur (8.2 percent), Atpadi (11.4 percent), Tasgaon (10.5 percent), Kavathemahankal (10.6 percent) and Jat (10.2 percent) C.D. Blocks are below the district average (19.5 percent) (Table – 42).

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Ashta (M.Cl.)	291.5	172.5	119.0	281.7	52.7	100.5	82.0	0.0	46.6
2	I Sangli-Miraj Kupwad (M Corp.)	909.5	457.8	451.7	909.5	99.5	32.5	211.1	25.8	540.5

4	II Uran Islampur (M.Cl.)	634.7	356.5	278.3	618.6	193.2	0.2	261.8	0.0	163.3
5	III Vita (M.Cl.)	748.3	444.8	303.6	736.4	40.7	91.2	88.3	0.0	516.2
District Total		**836.0**	**424.3**	**411.7**	**829.8**	**98.7**	**46.4**	**208.6**	**19.2**	**456.8**

Table 43 gives per capita receipts and expenditure for each town in the district. The average per capita receipts for 5 towns of the district works out to Rs.836.0 of which Rs. 424.3 are received through taxes and remaining Rs.411.7 are received from all other sources. The total expenditure incurred per head is Rs. 829.8 of which Rs.98.7 are spent on general administration, Rs. 46.4 on publc health and conveniences, Rs.208.6 on public works, Rs. 19.2 on public institutions and remaining Rs.456.8 on all other items. Among all the towns, both the receipt and expenditure incurred per head are the highest in Sangli- Miraj- Kupwad Municipal Corporation.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Ashta (M.Cl.)	6.0	1.2	1.2	0.9	0.3
2	Sangli-Miraj Kupwad (M Corp.)	3.6	1.1	1.1	0.4	0.5
3	Tasgaon (M.Cl.)	12.3	1.8	1.8	0.9	0.6
4	Uran Islampur (M.Cl.)	2.6	1.4	1.0	0.9	0.9
5	Vita (M.Cl.)	5.5	0.7	0.7	0.7	0.2
District Total		**4.3**	**1.1**	**1.1**	**0.5**	**0.5**

Table 44 indicated the number of schools and colleges per ten thousand population in towns. On an average, the ratio of Primary Schools per ten thousand population in urban areas of the district works out to 4.3. The number of Junior Secondary/Middle Schools is 1.1, Secondary/ Matriculation Institutions are 1.1, the Senior Secondary Schools are 0.5 and the Colleges are 0.5 in the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ashta(M.Cl.)	29
2	Budhgaon(C.T.)	8
3	Madhavnagar(C.T.)	13
4	Manadur(C.T.)	15
5	Sangli-Miraj Kupwad (M Corp.)	38
6	Tasgaon(M.Cl.)	47
7	Uran Islampur(M.Cl.)	5
8	Vita(M.Cl.)	84
	Distrct Total	**37**

Table 45 gives the number of beds per ten thousand population in medical institutions in towns. on an average there are 37 beds per ten thousand population in urban areas of the district. Vita municipal council town has maximum number of beds i.e. 84. Out of 8 towns 3 towns viz. Sangli-Miraj Kupwad, Tasgaon and Vita are above the district average (37) and 5 towns falls below the district average.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Ashta	33,203	2,990	9.0
2	Sangli-Miraj-Kupwad	436,781	38,059	8.7
3	Tasgaon	33,457	2,150	6.4
4	Uran-Islampur	58,330	0	0.0
5	Vita	41,804	0	0.0
District Total		**603,575**	**43,199**	**7.2**

The proportion of slum population to total population is 7.2 percent in district. The percentage of slum population of Ashta and Sangli- Miraj- Kupwad towns is higher than the district slum average. The percentage of slum population of Tasgaon town is less than district average. Uran-Islampur and Vita towns do not have slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ashta (M.Cl.)	Sugarcane	Sugarcane
		Milk & Milk Products	Milk & Milk Products
		Steel Utensils	Rose Flowers
2	Budhgaon (C.T.)	Cotton Cloths	Cotton Cloths
		--	--

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

This table gives the distribution of households by tenure status and number of rooms occupied for total, rural and urban areas of the district. This table also gives similar information for Scheduled Castes and Scheduled Tribes households for the district. According to 2001 Census, there are 20,700 households having no exclusive room, 195,947 households having one room, 154,559 households having two rooms, 71,438 households having three rooms and 52,545 households having 3 + rooms.

Regarding rural and urban areas of the district there 16,825 and 3,875 households respectively having no exclusive room, 149,550 and 46,397 households respectively having one rooms, 120,262 and 34,297 households having two rooms, 52,589 and 18,849 households having three rooms and lastly 33,311 and 19,234 households having 3+ rooms respectively.

Among the Scheduled Caste households there are 4,378 hoseholds comprising 3,495 rural and 883 urban households having no exclusive rooms, 39,129 households comprising 28,977 rural and 10,152 urban households having one room, 20,724 households comprisig 15,522 rural and 5,202 urban households having two rooms 6,244 households comprising 4,407 rural 1,837 urban households having 3 rooms 3,449 household comprising 2,064 rural and 1,385 urban households having 3 + rooms respectively.

Within Scheduled Tribe households of the district there are 390 households comprising 295 rural and 95 urban households having no exclusive room, 4,505

households comprising 2,622 rural and 1,883 urban having one room, 2,673 households comprising 1,550 rural and 1,123 urban having two rooms, 1,063 households comprising 579 rural and 484 urban having three rooms, 645 households comprising 318 rural and 327 urban having 3+ rooms respectively.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The total percentage for the three categories viz.Permanent, Semi Permanent and Temporary may not add to 100 percent, the percentage remaining is for the 4th category Unclassified not shown in the table.

This table gives the distribution of households living in permanent semi-permanent and temporary houses in the district. According to 2001 Census out of total households of the district 62.7 percent households are living in permanent houses, 31.3 percent households are living in semi-permanent houses and 6.0 percent households are living in temporary houses, as per definition given in the note below the table no. 49. Regarding rural area of the district 59.2 percent households are living in permanent houses, 33.5 percent households are living in semi-permanent houses and 7.2 percent households are living in temporary houses. Within the urban area of the district 73.3 percent households are living in permanent houses, 24.5 percent households are living in semi-permanent houses and 2.0 percent households are living in temporary houses.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

This table gives the number and percentage of households having improved drinking water source, electricity, bathroom, toilet and drainage facility available in district. According to 2001 Census, the

facility of improved drinking water is available for 401,734 households constituting 81.1 percent of the total households. In rural and urban areas of the district this facility is available for 284,669 (76.4 percent) households and 117,065 (95.4 percent) households respectively.

The facility of electricity is being enjoyed 380,045 households constituting 76.7 percent of the total households. In rural and urban areas of district, electricity is available to 269,605 (72.4 percent) households and 110,440 (90.0 percent) households respectively.

The facility of bathroom is available in 301,321 households constituting 60.8 percent of the total households. For rural and urban areas this facility is available for 206,723 (55.5 percent) households and 94,598 (77.1 percent) households respectively.

The facility of toilet is available in 162,440 households constituting 32.8 percent of the total households in the district. In rural and urban areas toilet facility is available for 89,748 (24.1 percent) households and 72,692 (59.3 percent) households respectively.

The facility of drainage is available for 225,751 households constituting (45.6 percent) of the total households in the district. For rural and urban areas this facility is available for 144,520 (38.8 percent) households and 81,231 (66.2 percent) households respectively.

Percentage in brackets.
Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 51 gives the number and percent of households by type of fuel used for cooking in rural and urban areas.

Of the 495,189 households 250,627 households (50.6 percent) use firewood for cooking, 44,729 households (9.0 percent) use crop residue, 34,190 (6.9

percent) households use cowdung cake, 261 (0.1 percent) households use electricity, 275 households (0.1 percent) use coal/lignite, 112,198 households (22.7 percent) use cooking gas, 9,175 households (1.9 percent) use biogas, 40,171 households (8.1 percent) use kerosene, 1,645 households (0.3 percent) use other fuel and 1,918 households (0.4 percent) reported no cooking being done by them.

In the rural areas of the 372,537 households 228,671 households (61.4 percent) use firewood for cooking 40,862 households (11.0 percent) use crop residue, 31,789 households (8.5 percent) use cowdung cake, 245 (0.1 percent) households use electricity, 125 households use coal/lignite, 47,536 (12.8 percent) households use cooking gas, 8,548 (2.3 percent) households use bio-gas, 12,114 (3.3 percent) households use kerosene, 1,526 (0.4 percent) households use other fuel and 1,121 (0.3 percent) households reported no cooking being done by them.

In the urban areas of the 122,652 households, 21,956 (17.9 percent) households use firewood for cooking, 3,867 households (3.2 percent) use crop residue, 2,401 (2.0 percent) households use cowdung cake, 16 households use electricity, 150 (0.1 percent) households use coal/lignite, 64,662 (52.7 percent) households use cooking gas, 627 (0.5 percent) households use biogas, 28,057 (22.9 percent) households use kerosene, 119 (0.1 percent) households use other fuel and 797 (0.6 percent) households reported no cooking being done by them.

It may be seen that while firewood continued to be the predominant fuel used in rural areas and cooking gas is in urban areas.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Number of housekols availing services and number of households having each of the specified assests 2001

There are 495,189 households of which 372,537 are rural and 122,652 urban of these banking amenities are being availed of by 268,862 households in which 202,168 households are rural and 66,694 are urban. It may be seen that a similar proportion of households in urban areas (54.4 percent) of total urban households utilize the banking amenities as compared to the rural areas (54.3 percent) of the total rural households.

In the district 222,627 households have Radio Transistor 183,423 have Television, 71,676 have Telephone, 243,496 have Bicycle, 87,324 have Scooter/ Motor Cycle/Moped, 16,573 households have Car/ Jeep/Van. It may be noticed that from the information available in the table that a higher proportion of households in the urban areas possess there specified assets. Of there 495,189 households. 143,068 households possess none of the above specified assests. In the rural and urban areas there are 121,016 and 22,052 households respectively who do not possess any of the specified assests.

(viii) Major Social And Cultural Events, Natural And Administrative Developments And Significant Activities During The Decade.

There are some changes in Sangli district after 1991 Census. The new Palus tahsil, Budhagaon Census town and 13 new villages are created after 1991 Census.

(ix) Brief Description Of Places Of Religious, Historical Or Archeological Importance In The Villages And Places Of Tourist Interest In The Towns Of The District.

The concentration of fairs is heavier in the district. Most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets in the villages. In the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use are brought for sale. The people

buy necessary articles in these fairs. In this district three fairs are very famous. One is held in Feb-March i.e., on the day of "Mahashivaratri" at Audumber village of Tasgaon tahsil. In this village on the bank of river 'Krishna' a temple of Goddess "Bhuvaneshwari" is situated and thousands of people gather to participate in the fair. Another famous fair is held during the month of August every year on account of 'Nag Panchami'. It is celebrated in a grand scale in the village 'Battis Shirala' in Shirala tahsil. People from the district and neighbouring districts come here to participate in the fair on that day. On Nagpanchami day many people tie the live snakes around their neck and play with them. The third fair is Ganapati fair, which is held every where in the district and at the district headquarters place. Besides these there are many fairs, which are held in a small scale. They are Peer Gaikwad Dargah Urus at Chinchani-Wangi and Viroba fair at Zare both in Khanapur tahsil and Shri Yellamadevi fair at Jat etc.

Place Of Historical And Tourist Importance

There is a narrow scope for tourism in this district. However it has a number of forts and old temples, which may be of some interest to the visitors. The forest department of Govt. of Maharashtra has started to develop a wild life sanctuary at Sagareshwar, in Khanapur tahsil. Many trees have been planted on a 5.29 sq. kms. and 96 various types animals have been brought in this sanctuary with a view to create tourism centre in the district.

Ganapati Temple, Tasgaon

Of all the objects of interest in the district, in point of beauty and magnificence is Ganesh temple, which is located at Tasgaon. It is of the great attraction and draws hundreds of devotees everyday. It was built by the late Shri Appasahab Patwardhan in the year 1799. The Shrine is an excellent specimen of stone carvings and especially the glass like polished stonework evokes admiration. Unrivalled in its finish and magnificence, it has become an object of keen interest for people visiting Sangli.

Kvaja Samsuddin Mira Sahab Dargah, Miraj

One of the main attractions of Miraj is the dargah of Samsuddin Mira Saheb. It was built in 1668. The dargah stands on a raised plinth with eight minars, which are illuminated with lamps on the occasion of the urus. Every year the urus is attended by thousands of Muslim as well as Hindus.

Forts

Eventhough this district is not famous for forts, a few isolated forts can be located. They are Bahaddurvadi fort near Islampur, which is said to have been built by Madhavrao, the fourth Peshva (1761-1772) as a frontier protection against the attacks of Kolhapur, Bhupalgad fort in Khanapur tahsil, which for the eastern out-post of Shivaji's territories, Machchindragad fort built by Shivaji in 1676 about 16 kms. South-east of Karad, Bhuikot fort at Miraj, which was found to be used by Shivaji and later Sambhaji Maharaj.

(x) Major Characteristics Of The District, Contribution Of The District In The Form Of Any Historical Figure Associated With The District

Sangli district is endowed with two economic resources viz. agricultural land and fishery. The district is well known for sugar factories. There are few sugar factories in the district. The district exports sugar, cloth, food grains etc. to other districts of Maharashtra. With a view to continue traditional art of craft and with a view to create employment in rural sector, the project of development of craft has been implemented. In this project the training is imparted for creating musical instruments, statues and leather articles.

The Government of Maharashtra is developing Dandoba hill as a hill station. The forest department Government of Maharashtra has started planting trees on a large scale on Dandoba hill to attract the tourists and to make it a tourism centre. Since the rail facilities are available for this district, the economic and social developments are taking place rapidly. The milk production is another characteristics of the district. The Government of Maharashtra had started a milk dairy in 1961 and the milk is supplied to Mumbai and other districts. The excess milk produced is converted into milk powder and such powder is again converted into milk using white butter during the slack season.

Marathi is the principal language and is the mothertongue of about 80 per cent of the population. Apart from Marathi, Kannada, Urdu and Telugu languages are also spoken. Among Hindus, Marathas and Kunbis form the biggest group. A large number of rural dwellings have hardly any touch of architectural beauty or interior decoration. As opposed to these houses in urban areas offer a better sight. They have got better architectural designs and are built with bricks or stones with cement or lime. Broadly speaking the pattern of food is the same in all tahsils of Sangli. In the eastern parts jowar bread and in the hilly western parts bread of nagli or rice is staple food of the people. Several special dishes are prepared during the festival season Ganesh Utsav, Diwali, Holi, Ramnavami Hanuman Jayanti, Gauripuja, Nagapachami, Janmashtami, Muharram, Christmas etc. are the festivals of the people.

Contribution Of The District

The district Sangli has given many authors, playwrights, stage artists etc. to the nation. Shri Vishnudas Bhave who wrote Marathi drama "Sita Swayamvar", Govind Ballal Deval, Krishnaji Prabhakar Khadilkar, Vasudeo Khare all belong to Sangli. Natasamrat of Marathi stage Balgandharva belongs to Tasgaon in Sangli district. Famous stage personality Master Deenanath Mangeshkar and Lavani Lokanatya's Patthe Bapurao hail from Sangli. In the resent past the persons who shot to fame like Music queen Heerabai Badodekar, Vinayakbua Patwardhan and Vishnu Digamber Paluskar also belong to this district. The melody queen of India Kum. Lata Mangeshkar and Smt. Asha Bhosle were born in Sangli. Teams from Sangli district have participated a couple of times in the republic day celebrations at the capital city New Delhi.

(xi) Scope of Village Directory and Town Directory

Information on this aspect is furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also in the tables presented. The non-census information collected at the village level or town level by the Tahsildar / chief officer was scrutinized and verified in each district by the district planning officer / district statistical officer. The Collectors were also requested to once again reverify the data in case serious discrepancies were observed. Logical tests were applied to the data and the officials of this directorate visited the districts to revalidate the data. Besides this, the non-census information was cross-checked with the parent department. For example information on electricity was cross checked with Maharashtra State Electricity Board, that on roads with Public Works Department, on health with the Directorate of Health and so on.

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools respectively.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

This column provides data available on medical amenities in the village.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 : Post, Telegraph and Telephone

Column 9 provides the postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village.

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc., the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given.

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given.

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available

the particulars of the nearest place with the facility is recorded.

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable waterway, the same has been indicated in this column.

Column 14 : Approach to village

Approach to village refers to the state of road leading to village.

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

This column relates availability of Power Supply in the village.

Column 17 : News Paper / Magazine

If a village receives any News Paper/Magazines the same is noted in this column.

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Unirrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) upto one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department.

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns / Non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B List of villages according to the proportion of the Scheduled Tribes to the total Population by ranges.

Town Directory :

The town directory is presented for each town covering different aspects of urban life. In 2001 Census, Statement I – VII have been included for presentation of this data. The data contained in these statements are the area, population in 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finance, civic, medical, and educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutory notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-

municipal towns the Tahsildar and cantonment executive officers supplied the information.

Statement I-Status and Growth History

Statement I shows the status and growth history of the towns in the district, column 2 in this statement indicates class, name and civic administration status of a town. Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and National level. Census towns have no urban civic status.

Column 3 indicates location code number of the town, column 4 gives name of tahsil and column 5 shows the name of C.D.Block. Column 6 presents area in Sq. Kms., Column 7 presents number of households including houseless households.

Column 8 to 18 gives population and growth rate of town since 1901 and would help in drawing the trends in their growth rate, Column 19 presents density and Column 20 to 22 presents sex ratio.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV-Civic and other Amenities, 1999

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 3 and Schedule Castes/ Scheduled Tribes population given in column 4 and 5 have been added to help in measuring amenities in respect of population size of the weaker sections in the towns. The information on the road length within the town shown under column 6 has been obtained from Municipality.

Column 7 to 12 reflects the information on system of sewerage, number of latrines, and method of disposal of night soil.

Column 13 indicates sources of protected water supply to the inhabitants of the towns. The information on storage and capacity is shown under column 14.

Column 15 gives information regarding availability of fire fighting services. In case it is not available in the referent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Column 16 to 20 pertains to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, are treated as independent units.

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc.

Column 6 to 9 :

The information on educational facilities is reflected in columns 6 to 9

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools upto class IV are treated as Primary or Elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle schools with Primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M (3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded.

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : **Number of Agricultural Credit Societies and Non-Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

PART A
VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a)Note Explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class IV included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class IV.

Classes from V to VII are included in the middle school.

Classes from VIII to X are included in secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12:Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water way they are mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If a village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State Govt. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK

(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A The appendix shows the list of villages according to proportion of the Scheduled Castes to the total population by ranges.

Appendix-VII B The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

(b) List of Villages fully merged in towns and outgrowth at 2001 Census

Serial Number	Name of Villages	Location Code No. 1991	Merged in towns and Outgrowths
1	2	3	4
1	Kupwad	21	Merged in Sangli-Miraj Kupwad M.Corp.
2	Wanleswadi	22

Section II - Town Directory

(a) Note Explaining the abbreviations used in Town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) :Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board / Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate Office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometres, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9 and 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called seperate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) and others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 and 5 : Medical

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning

centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres are treated as independent units and counted separately using following codes:

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution(s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :Educational

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocationl institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. college, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

Schools upto class IV are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools and Primary schools upto class IV.

Schools upto VII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats.

The number of working women's hostels if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of the nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities.

Stadium, Cinema, Auditorium/ Drama / Community Hall are covered under recreational and cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading Room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 and 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies.

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area Committee etc.

There is no outgrowth in this district; hence the information is ‘ Nil ’.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

Fertility And Mortality, 1991 Census

Fertility Levels

Fertility is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question related to currently married women. The measures of fertility worked out are based out the F-Series Tables of 1991 Census pertaining to Maharashtra State.

Mortality Levels

Information on questions on children ever born and children surviving canvassed for all ever a married woman has been tabulated by age of the mother. From this, estimates of child mortality have been worked out using Brass technique.

ANNEXURE II (i)
Estimates of Child Mortality, 1991

Item		Sangli District Total	Maharashtra State Total
1	2	3	4
Q1	P	41	74
	M	50	72
	F	31	76
Q2	P	44	79
	M	47	78
	F	41	81
Q3	P	48	86
	M	50	84
	F	44	89
Q5	P	53	91
	M	55	89
	F	50	93

Mortality

From the estimate of child mortality (number of deaths by ages 1, 2, 3 and 5 given above as q (1), q (2), q (3), and q (5), it is observed that the level of child mortality in the district is substantially lower compared to the state. A notable feature is the lower female mortality compared to male mortality in the district as against higher female mortality in the State. However, the sex differentials is child mortality appear to be higher in the district compared to the State.

ANNEXURE II (ii)
Estimate of Fertility Indicators at district level, Maharashtra,1981 And 1991

Fertility Measures	Sangli District 1981	Sangli District 1991	Maharashtra State 1981	Maharashtra State 1991
1	2	3	4	5
GFR	114	97	134	124
GMFR	136	116	168	157
TFR	3.5	3.0	4.3	3.7
TMFR	4.2	3.8	5.2	5.2
Crude Birth Rate (CBR)	26.9	23.8	31.8	29.8
No. of children ever born per women in the age group 45-49	--	3.7	--	4.2
Mean Age at Marriage	--	17.4	--	17.9
Child Women Ratio	--	45.8	--	49.6

Fertility

A perusal of the various fertility measures viz; GFR (General Fertility Rates), GMFR (General Marital Fertility Rate), TFR (Total Fertility Rate), TMFR (Total Marital Fertility Rate), CBR (Crude Birth Rate) for the district vis-à-vis State reveals lower rates for the district as compared to State as a whole. In 1981, the GFR, GMFR, TFR, TMFR & CBR were 114, 136, 3.5, 4.2 and 26.9 respectively as compared with State average of 134, 168, 4.3, 5.2 and 31.8. Similar trend is observed in 1991 Census. In 1991 GFR, GMFR, TFR, TMFR & CBR were 97, 116, 3.0, 3.8 and 23.8 respectively for the district as against the State average of 124, 157, 3.7, 5.2, and 29.8 respectively.

It may be seen that, while during both Census 1981 and 1991 the fertility rates are lower for the district than the State as a whole. But the gap in fertility rates between the district and the State has increased in 1991 except for TFR.

Mean age at marriage

Mean age at marriage is marginally lower for the district than the State in 1991.

Child Woman Ratio

The Child Woman Ratio for the district is recorded below the state average in 1991 census.

ANNEXURE III

Various Measures of Fertility and Mean Age at Marriage,1991

	Total for Nine States	111,808	97.3
	Other States	3,156	2.7
	Total	**114,964**	**100.0**

In respect of Sangli district out of 114,964 interstate migrants Karnataka accounts for 84.8 per cent and Gujarat account for 3.2 per cent.

Rural – Urban Components Of Migration

The flow of migrants would consist of four streams viz., rural to rural, rural to urban, urban to rural and urban to urban. The data on the basis of these various streams in case of migrants is classified by place of last residence. It presents data only in relation to internal migrants. The data for Sangli district is presented separately.

ANNEXURE IV (ix)
Rural And Urban Composition of Internal Migrants by Place of last Residence, 2001 Census - Maharashtra

	Place of last residence	Place of Enumeration Total	Rural	Urban
	1	2	3	4
	Total Internal Migrant :			
1)	Within the State			
	Total	34,225,081	21,265,808	12,959,273
		100.0	62.1	37.9
	Rural	24,089,515	17,275,775	6,813,740
		70.4	50.5	19.9

		32.7	2.5	30.2

Note: The place of last residence unclassifiable as 'Rural' or 'Urban' is included in 'Total'.

Of the total 34,225,081 intrastate migrants, 50.5 per cent are from rural to rural, 15.5 per cent from urban to urban, 19.9 per cent from rural to urban and 5.8 per cent from urban to rural. In case of Sangli district of the total 1,087,210 intrastate migrants 60.6 per cent are from rural to rural, 7.7 per cent from urban to urban, 13.3 per cent from rural to urban and 6.9 per cent from urban to rural.

ANNEXURE IV (x)
Rural And Urban Composition of Internal Migrants by Place of last Residence,2001 Census - Sangli

Place of last residence	Place of Enumeration		
	Total	Rural	Urban
1	2	3	4
Total Internal Migrant :			
1) Within the State			
Total	1,087,210	834,253	252,957
	100.0	76.7	23.3
Rural	804,189	659,266	144,923
	74.0	60.6	13.3
Urban	158,422	74,475	83,947
	14.6	6.9	7.7
2) In other States of India			
Total	114,964	65,256	49,708
	100.0	56.8	43.2
Rural	83,761	54,977	28,784
	72.9	47.8	25.0
Urban	24,160	6,112	18,048
	21.0	5.3	15.7

Note: The place of last residence unclassifiable as 'Rural' or 'Urban' is included in 'Total'.

In case of 7,313,139 migrants from other states 12.7 per cent have migrated from rural to rural, 30.2 per cent from urban to urban, 50.8 per cent from rural to urban and 2.5 per cent urban to rural. In case of Sangli district of the total 114,964 migrants, 47.8 per cent are from rural to rural, 15.7 per cent from urban to urban, 25.0 per cent from rural to urban and 5.3 per cent from urban to rural.

ANNEXURE IV (xi)
Percentage of migrants to total population, 1991-2001
Sangli district

Serial number	Place of birth/Place of last residence	Total population	Total Migrants		
			Persons	Males	Females
1	**2**	3	4	5	6
1	**Migrants by place of birth**				
	2001 Census	2,583,524	1,171,030	406,570	764,460
			45.3	15.7	29.6
	1991 Census	2,209,488	730,749	257,918	472,831
			33.1	11.7	21.4
2	**Migrants by place of last residence**				
	2001 Census	2,583,524	1,202,685	420,418	782,267
			46.6	16.3	30.3
	1991 Census	2,209,488	743,669	263,438	480,231
			33.7	11.9	21.7

There are 1,171,030 (45.3 per cent) migrants by place of birth comprising 406,570 (15.7 per cent) males and 764,460 (29.6 per cent) females to total population in 2001. Similarly 1,202,685 (46.6 per cent) migrants by place of last residence comprising 420,418 (16.3 per cent) males and 782,267 (30.3 per cent) females to total population are found in Sangli district.

It may be seen that the percentage of migrants by place of birth has increased in Sangli district during the decade 1991-2001 for both males and females. Similar trend can be seen for the migrants by place of last residence also.

ANNEXURE

Note: # The 1991 Census could not be conducted in 33 villages of Akkalkuwa and Akrani C.D. Blocks of Dhule District. The population of these villages (Persons 16,052 Male 8,200 and Females 7,852) has been obtained from secondary sources and included in the population of district and Maharashtra. However, further details are not available.

Source: Table C-2 of Part IV-A, C series - Socio Cultural Tables, 1991 census.

When compared to 1991 data, it is found that during the last decade the literacy rate of the state has jumped from 64.9 per cent to 76.9 per cent. While during the same period the districts' literacy rate has increased from 62.6 per cent to 76.6 per cent.

N - Negligible

Source : Table 31 of Maharashtra State District Profile 1991 census.

Marathi is the principal language of the district and is the mother tongue of 84.8 per cent of the district population. In rural areas Marathi speakers account for 88.2 per cent whereas in urban areas

74.3 per cent. Kannada is the second largest language spoken in the district. It accounts for 5.6 per cent of the total population. The proportion of Kannada speakers is higher in rural areas (6.2 per cent) than the urban areas (3.5 per cent). The third largest language spoken in the district is Urdu, its percentage to the total population is 4.1 and mainly spoken in urban areas by 11.8 per cent, whereas it is 1.6 per cent in rural areas.

The speakers of the minority languages are mainly concentrated in urban areas and their proportion in rural areas is very less except Lamani/Lambadi.

It is found that during the last decade proportion of Marathi, Kannada and Urdu speaking persons have decreased from 85.5 per cent to 84.8 per cent, 6.2 per cent to 5.6 per cent and 4.8 per cent to 4.1 per cent respectively.
