CHISOBIBRA

Located on the left bank of the River Simsang close to Williamnagar, the district headquarters of East Garo Hills district, Chisobibra and its environs are covered with tall, elegant and mature sal trees which constitute the Rongrengiri Reserve Forest covering an area of over thirty six square kilometres. During the British India, they faced the last major Garo resistance to their intrusion at Chisobibra. After days of seize, they succeeded on 12th December 1872 to fell the Garo Warrior Pa Togan Nengminja Sangma who led the Garos, at Chisobibra near Rongrengiri. This broke the Garo resistance and the British annexed Garo Hills with ease. A simple Memorial to Pa Togan has been erected at Chisobibra within Rongrengiri Reserve Forest. A function, to commemorate the fallen martyr Pa Togan, is held annually at the site of the Memorial, on the anniversary of his martyrdom.

Chisobibra is ten kilometres from Williamnagar on the Tura- Asanangre-Williamnagar State Highway. At Rongrengiri, the River Simsang provides an excellent spot for anglers to try their hand for big as well as small catch. Wildlife lovers will find flocks of Imperial-Pigeons grazing for calcinates, on the sandy banks of the Simsang River, at Chisobibra.

Annexure-VII	: Age, Sex and Education in the district, 1991 Census	474
Annexure-VIII	: Distribution of different mother tongues returned in 1991 Census	475

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic

amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N.K. Laskar, Director of Census Operations, Meghalaya. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. It is also the only publication that presents census data at village level in rural areas and ward level in urban areas. It is also the only publication that presents non-census data in the form of Village Directory and Town Directory at village level and town level respectively. Here, lies the usefulness of the Handbook for micro and grassroot level planning for rural development. Therefore for administrators, planners, research scholars and other data users the Handbook is a sine qua non.

Though Census is a central subject, it is being conducted by the administrative machinery of the State Government under the technical guidance of the Director of Census Operations. It is the State Government who appoints the hierarchy of Census Officers from the rank of Deputy Commissioner of a district designated as Principal Census Officer down to Primary School Teachers and other low rank government employees designated as Enumerators. It is this team of Census Officers who actually conduct the Census Operations. I am, therefore, very grateful to the Government of Meghalaya with special reference to Shri. J. Tayeng, IAS Chief Secretary to the Government of Meghalaya, Shri A. Som, IAS, Secretary, General Administration Department and a hosts of other officers who have made the entire district administrative machinery available to the Census Organisation.

I am also grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India, Shri S.P. Sharma, Consultant and other officers in the O/o, The Registrar General of India, for their timely advice and prompt co-operation whenever needed.

In this office I am grateful to Shri. B.L. Sharma, Dy. Director of Census Operations, Shri S.K. Baruah, Asstt Director of Census Operations, Shri A. Roy Choudhury, Asstt. Director of Census Operations, (Technical) Shri B. Marbaniang, SI-I, Shri L.R. Lyngdoh, SI-I, Shri C.D. Sangma, SI-II and other officials without whose hard, sincere and painstaking labour and toil the conduct of the 2001 Census would not have been a success.

N.K. Laskar
Director of Census Operations,
Meghalaya, Shillong

District Highlights 2001 Census

1. East Garo Hills District is the fifth in rank in terms of area and population in the State.
2. East Garo Hills is in third position of urban population in the State, which is about one-tenth of the district population, while one fifth of State's population lives in urban areas.
3. In terms of population per Sq. Km. East Garo Hills is the third densely populated district in the state.
4. East Garo Hills is fifth in Sex Ratio (966) which is less than the State Sex Ratio (972).
5. Resubelpara C.D.Block is having the highest population (86189). While Songsak C.D.Block is having the lowest population (41992) in the district.
6. In terms of size Dambo Rongjeng C.D.Block is the largest Block while Resubelpara is the smallest Block in the district.
7. Dambo Rongjeng C.D.Block is having the highest number of villages and Samanda C.D.Block is having the lowest number of villages in the district.
8. The economy of the district is mainly dependent on agriculture. Out of every 100 workers in the district, 80 persons are engaged in agricultural sector.
9. 13.5 percent of the total Households in the rural areas of the district availed electricity power facility for lighting. Resubelpara C.D.Block is having the highest number of Households availed electricity power for lighting in the rural areas.
10. Village Damas is the most populated (1549) and Mandalong Akolesi (7) and Dambegre (7) are the least populated village in the district.
11. The condition of Census houses in the rural areas of the district is comparatively low, having 36.5 percent of total households live in good condition, 60.1 percent live in liable conditions and 3.4 percent live in the dilapidated condition.
12. Percentage of households by type of houses in rural areas of the district are (i) Permanent type of houses 5.8 %, (ii) Semi permanent, 14.2 %, (iii) Temporary which is serviceable 0.7 % and (iv) Temporary not serviceable 79.2 %.
13. Percentage of households by type of latrine in the rural areas of the district are (i) Service latrine 13.7 %, (ii) Pit latrine 55.6 %, (iii) Water closet 2.5 % and (iv) Not having latrine are 28.2 %.
14. Percentage of households by type of fuel used for cooking in rural area of the district are (i) Firewood 97.6 %, (ii) LPG 0.1 %, and (iii) Kerosene 0.15 %.
15. Percentage of households by having types of assets in rural areas of the district are (i) Radio/Transistor 36.8 %, (ii) TV 5.9 %, (iii) Telephone 0.6 %, (iv) Bicycle 31.9 %, (v) Scooter/Motor Cycle/Moped – 1.8 %, (vi) Car/Jeep/Van – 0.5 and (vii) None – 48.2 %.
16. Out of the total number of Household in the district only 13.9 percent availed banking facility. In the urban areas 42.4 % of the population availed banking facilities while only 9.1 % of the household living in the rural areas availing this facility.

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000

ii) At least 75 percent of the male working population engaged in non-agricaltural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Publication of the District Census Handbook was started after the 1951 Census and has been continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State/UT Governments. It inter alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain basic amenities/ facilities in each village and town of the respective district. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The 1951 series of the District Census Handbook incorporated some basic demographic and economic information of the district at the village and town levels separately in addition to some important tables on census data.

Unlike the 1951 District Census Handbook, the 1961 District Census Handbook was made to cover village-wise and town-wise information on the availability of different amenities such as educational facilities, supply of drinking water, supply of electricity, etc. shown by means of abbreviations placed against the name of each village/town in the Primary Census Abstract itself.

In 1971 the District Census Handbook was divided into three parts. Part A contained Village and Town Directory, Part-B contained Primary Census Abstract and Part-C contained Analytical Report, Administrative Statistics and District Census Tables. Part-C was not published in many states/union territories including Meghalaya.

The scope of the 1981 District Census Handbook had been enlarged specially by inclusion of additional information on amenities like existence of kutcha/ pucca roads, distance from the nearest town, land-use data and special Primary Census Abstract for Scheduled Castes and Scheduled Tribes at C.D. Block/Town levels which was another innovation introduced in the 1981 series.

The manner of presentation of the District Census Handbook for the 1991 Census was by and large the same as followed in 1981. However, the format for presenting data in Primary Census Abstract had been restructured slightly in the 1991 Census by incorporating nine-fold Industrial Classifications of main workers against four-fold Industrial Classifications presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was presented in the Primary Census Abstract for the first time.

The scope of the 2001 District Census Handbook has been enlarged by incorporating nine appendices to Section-I of Part-A against four in the 1991 District Census Handbook. Those additional appendices display the list of villages by number of Primary Schools, the list of villages by number of Primary, Middle and Secondary Schools, the list of villages with different sources of drinking water facilities available, the list of villages with 5000 and above population which do not have one or more basic amenities, the list of census towns which do not have one or more amenities, summary showing the number of villages having or not having Scheduled Castes/Tribes population, C.D. Block wise number of villages under each Gram Panchayat and statement showing the number of girls' school in the villages. Analysis of data of the 1991 census on fertility, mortality, migration, religions, marital status, languages, etc. have also been included as annexures to the Primary Census Abstract.

(ii) Brief History of the District

Prior to 1976, the entire Garo Hills was the only district. Its name was given after name of its inhabitant called the Garos. It was only on October

1976, vide notification HPL 399/75/140 dated October 9, 1976, that the erstwhile Garo Hills district was bifurcated into two districts namely West Garo and East Garo Hills districts. Further vide Government No. HPL.275/84/141. Dt. 18.6.92. Another district was created namely South Garo Hills districts. The name of the districts followed only from their location in the map of the entire Garo Hills area. As such West Garo Hills district is situated on Western part, East Garo Hills on the Eastern part and South Garo on the Southern part of the entire Garo Hills area.

The East Garo Hills district is situated in the Western part of the State of Meghalaya and covers an area of 2603.00 Sq. Kilometres. Its name implied, that the district is characterized by dissected and rugged hilly terrain which is mainly composed of Gneissic rocks. The relief indicates its sloping pattern towards the north and hence most of the rivers flow towards the north. The Krishnai and the Dudhnai rivers along with their tributaries drain the water through the district to the river Brahmaputra in the north. The district is mostly covered by dense tropical mixed vegetation with a small patch of temperate vegetation on the higher attitude.

The Garos belong to the Scheduled Tribe within the State of Meghalaya. The Scheduled Tribe population of the district constituted the major part within the district. Agriculture is the main occupation of the people. The district does not have good transport or communication network. The National Highway (NH-51) passes through the western part of the district to connect Tura. Other motorable roads connect some important places like Bajengdoba, Resubelpara, Mendipathar, Cheran, Dagal Songsak and Williamnagar Town. Another important road connecting district headquarter passes through Dainadubi, Wage Asi, Rongjeng and Darugiri. The district is not either connected by railway.

The district has four C.D. Blocks and two towns in 2001. In 1981 and 1991, Williamnagar, being the district Headquarter is the only town of the district. However, in the year 1997, Resubelpara Municipality Board was created vide notification No. UA.149/95/54 dt. Shillong the 25th February '97. The names of the C.D. Blocks are

(1) Resubelpara

(2) Dambo- Rongjeng

(3) Songsak and

(4) Samanda C.D. Blocks.

The People

The Garos are the aboriginal tribes of the entire Garo Hills areas as well as of the district. Besides there are large groups of Garos in the contiguous plains areas of the districts of Goalpara and Kamrup in Assam. A Sizeable Population also lives in the areas of East Khasi and West Khasi Hills district as well as in the areas of Bangladesh.

The Garos call themselves Achik-mande (achik=hill, mande=man). The Garos belong to the linguistic stock called by ethnologists the Tibeto-Burman. They have close linguistic affinity with tribal races in habiting the plains of Assam, the North Cachar Hills and part of Tripura. Major play fair strongly defend that the Garos bear the strongest resemblances linguistically as well as physically to the Kacharis. However Grievson, in his linguistic Survey of India clubbed into a single group called Bodo. S.K. Bhuyan (ed), in his book An Account of Assam Quoted". Its inhabitants, the Garos are a section of the great Bodo race which at one time occupied much of the Brahmaputra valley, but which probably was driven into the hills by the early Hindu invaders from Bengal. However the original home of the Garos is not known. They themselves believe that their original homeland was in Tibet.

SC/ST Population

Total Scheduled Tribes population of the state was 15,17,927 in 1991. The population of five major Scheduled tribes in the state are given below:

Sl. No.	Major Scheduled Tribes	Population	Percentage to ST Population
1.	Khasi, (including Jaintia), Synteng, Pnar, War, Lyngngam, Bhoi,	8,70,165	57.33
2.	Garo	5,46,734	36.02
3.	Hajong	29,997	1.98
4.	Raba, Rava	24,859	1.64
5.	Koch	18,370	1.21

Total Scheduled castes population of the state was 9072 in 1991. The population of five major Scheduled castes in the state are given below.

Sl. No.	Major Scheduled Castes	Population	Percentage to SC Population
1.	Namasudra	1,973	21.75
2.	Jhalo, Malo, Jhalo-Malo	1,868	20.59
3.	Mehtar, Bhangi	1,342	14.79
4.	Muchi, Rishi	1,319	14.54
5.	Sutradhar	315	3.47

In the state of Meghalaya, proportion of Scheduled castes population to the total population recorded as 0.51' percent in 1991 and proportion of Scheduled tribes population to total population recorded as 85.53 percent in 1991.

In East Garo Hills district, proportion of Scheduled castes and Scheduled tribes population to total population of the district recorded as 0.13 percent and 96.83 percent in 1991 respectively.

(iii) Administrative Set Up

The district is located in the western part of the state of Meghalaya. In the administration of the Garo Hills areas, Dy. Commissioner was vested with wide powers. As the sole authority in charge of law and order, the Deputy Commissioner was also coordinating authority controlling the working of other departments of the Government functioning in the district. The Dy. Commissioner is the head of the district administration. In East Garo Hills with Williamnagar as the district H.q., the district administration has been functioning since the date of its creation i.e., 1976. Before that the area had been only a civil subdivision under Tura.

Under the Dy. Commissioner in the district, there are the following executive officers: One Addl. Dy. Commissioner, one Sub-divisional officer (Sadar), two EACS (one of whom is in charge of Revenue matters), one Dy. Director of Supply, one Dy. Superintendent of Excise, one Enforcement Inspector (Revenue), one Inspector of Supply and one District Transport officer. The strength of the Staff in all the branches of the Dy. Commissioner's office is 85.

There is the civil Subdivision/Administrative unit, where the SDO is a member of the I.A.S. He has all the major depths. of Govt. functioning under his overall direction or Supervision and within his area exercises the powers of direction vested in the head of a district.

The unit below the district level prior to the 1971 census, the Thanas in both Khasi & Jaintia Hills and the Mauzas in Garo Hills were considered. With the formation of the new state and the re-organisation of the districts, the C.D. Blocks were treated as the unit of the administrative set up. The Block Development Officer, is the administrative head within his block and in each and every Community Block there is an office within the Block H.q. The BDOs is accountable to Dy. Commissioner.

The Block Development Officer functions as the Secretary of the Blocks Development Committees, he exercises Control and Supervision over the work of the Extension Officers and the Village Workers. He plays the role of an organizer and coordinator of the various Programmes and he also performs other administrative functions assigned to him by the Government. In the execution of his duties, he is assisted by Extension Officers in-charge of Agriculture, Veterinary, and Animal Husbandry as well as by the Social Education Organizer and Gram Sevaks. For the successful implementation of the various Programmes the BDO has to earn the confidence of the village people through their leaders, while making his service available to the villagers at all times.

The implementation of the Community Development Programme involves the combined efforts of the Government and people for the improvement of the economy of the rural community.

The names of C.D. Blocks within the district are given in the next page;

The names of C.D.Blocks/Towns within the District are as follows

Name of C.D. Block	Area in Km^2	Headquarters	Date of Creation
1	2	3	4
East Garo Hills District	2603.00	Williamnagar	9.10.1976
1. Resubelpara	468.00	Resubelpara	1.10.1953
2. Dambo-Rongjeng	885.00	Rongjeng	1.4.1956
3. Songsak	703.00	Songsak	1.4.1976
4. Samanda	547.00	Samanda	3.10.1980

District Administration

1. Pre-Independence

In the administration of the Garo Hills, in keeping with their policy of minimum interference in local affairs, the British allowed the Garos a large measure of freedom, intervening only whenever anything occurred that threatened the peace and tranquility of the Hills.

Broadly speaking, the administration of the Garo Hills was a three-tier arrangement, with the Deputy Commissioner as representative of the Crown at the top, the village authorities at the base and, in between, a class of officials called Laskars who were both agents of Government and, as men who belonged to the same communities as the local people, more often than not functioned as advisers and guides to ensure peace and harmony and good relation between the Government and the common people.

2. Post Independence

With a few modifications, the system remains in force allowing for the growing complexities of life in the present age. The Garo Hills have been bifurcated into two districts, and these again into subdivisions, and the officers in charge direct or coordinate all activities undertaken within their respective areas, law and order remaining the major part of their functions. In East Garo Hills (Hqrs. Williamnagar), the District administration has been functioning since the date of its creation, i.e. 1976. Before that, the area had been only a civil sub-division under Tura.

The Deputy Commissioner is the head of the district administration under him. There are the following executive officers : One Additional Dy. Commissioner, One Sub-Divisional Officer, two EACs (one of whom in charge of Revenue matters), one Dy. Director of supply, one Dy. Superintend of Excise, one Enforcement Inspector (Revenue) one Inspector of Supply and one District Transport Officer.

The Deputy Commissioner's Office is divided into a number of important branches, among them : the General or Establishment Branch, the Judicial Branch, the Revenue Branch, the Development Branch, the Nazarat Branch, the Loan Branch, the Registration Branch and other branches in charge of Supply, Housing, Elections, Block Development as well as the District Selection Committee.

Village Administration

Almost immediately after the British assumed the administration of the Garo Hills, they appointed a body of officials, generally chosen for their personal influence and standing within the local communities, whom they called Laskars. These were in essence the Government's "overseers" in village administration. No such functionary existed before in Garo polity, and the term itself is borrowed from Indo-Aryan. The Laskar was appointed by the British to be in charge of a group of villages within a compact area called an elaka, constituted for fiscal and administrative purposes. As agents of the Deputy Commissioner, they had a certain measure of magisterial powers and rather more of police powers. They were empowered to preside over village courts and to try petty cases civil or criminal, carrying with them penalties of upto Rs. 50 in fines. They were required to send immediate information to the Deputy Commissioner regarding crimes or violent deaths occurring in their areas, to cause the apprehension of

offenders, and generally to report anything that could disturb public peace and tranquility. Moreover, it was their duty to convey Government orders and decisions applicable to their circles and to explain Government policies to the people. They also had to collect revenues and remit the same to the Government Treasury.

The Laskars (a body of officials) have been recognized by the District Council as its officials. The duties that they perform remain the same as before.

Another grade of officials were the Sardars who were appointed to assist the Laskars in the discharge of their duties. They might be directed to collect information regarding any dispute and as the representatives of the Laskars they might even preside over village courts and try petty cases when so directed. The Sardar's duties were usually part-time; he could thus do all his ordinary work during off-duty periods. The Sardars have now been recognized as part-time officials of the District Council and are paid a small annual allowance and when on duty provided with a uniform.

For the purpose of revenue administration, the Garo Hills Districts have been divided into Mauzas.

DIistrict Council Administration

The Garo Hills District Council came into being in 1952 under the provisions of the Sixth Schedule of the Constitution of India and the Assam and Meghalaya (Constitution of District Councils Rules, 1951) framed thereunder. A short description of the working of the Council is given here. As at present, the jurisdiction of the Council is over the entire geographical area of Garo Hills across the district barrier.

The administration is carried on by the Executive Committee constituted under the Autonomous District Rules, the Committee being headed by the Chief Executive Member. Under him, there are two Executive Members. These functionaries share among themselves the entire responsibility of administration, their separate function being defined. In short, in respect of the internal administration of the district they may be compared to the Minister of the State Government in that they are elected to the Council and have particular subjects under their charge. The major subjects assigned to the Council are: Forests, Civil Works, Taxation, Revenue, Judicial, Transport and Education.

The business of the house is conducted by the Chairman and Deputy Chairman, corresponding to the Speaker and the Deputy Speaker in the House.

Tribal community has its own institution and its own way of life, the protection of which is governed by local customs and usages. Recognition of this fact, the constitution of India conferred power upon the District Council regarding administration of Justice. Therefore, the District Council was given powers to safeguard the interest of the tribal as a whole.

Broadly speaking, the Sixth Schedule guaranteed the exercise of a wide degree of autonomy to the district with tribal population. Although the District council had taken over much of the responsibility of the old administrative setup, the Deputy Commissioner as the local functionary of the State Government, remain at the helm of the district administration.

Local Self Government

(i) History

Modern local self Govt. in the Garo Hills was the creation of the British Govt. which came into force on 1st April 1916 initially in the plains areas collectively known as Mechpara 'B' Mahal. The local rates of the Mechpara 'B' Mahal in the plain areas of Garo Hills were to be paid in one instalment on or before the 31st March each year. The Garo Hills District Committee was constituted and the Garo Hills District fund was created to which were credited the proceeds of all local rates realized under the Assam Local Rates Regulation, 1879.

Under the Sixth Schedule to the Constitution of India, the Garo Hills Autonomous District Council was formed and thereafter the District Fund passed into its hands.

As proceeded in Para 3(e) of the Sixth Schedule to the constitution of India, the constitution and administration of the town committee came under the preview of the Garo Hills District Council. The District Council appointed all the Staff of the Town Committee. However, with the dissolution of the Tura Municipality the Govt. took full charge of its functions. The Dy. Commissioner took over as the

administrator, delegating to a Junior Officer (designated as Executive Officer) responsibility for management of the Municipality with effect from 4th August 1982.

In East Garo Hills district, there are two towns namely Resubelpara Municipality Board and Williamnagar Municipality Board unlike Tura Municipality. Both these towns were under the look out of the Dy. Commissioner of East Garo Hills District, and no Executive Officer was appointed as such in both these Towns so far.

The Associate Town planner is in charge of town planning projects in both East and West Garo Hills Districts is assisted by a staff of 24 and the department in Williamnagar was established in 1978.

The main function of the office is the preparation of development plans for new townships, improvement of slum areas, implementation of both rural and urban development schemes. It also prepares Master plan for District and Sub-division headquarters.

Jurisdictional change during 1991-2001

There is no jurisdictional changes in any administrative units in District/C.D. Block during 1991-2001. One new town, namely Resubelpara town was created. The number of villages/towns in the district is given below:

1. Total Villages	-	888
2. Number of inhabited villages	-	864
3. Number of uninhabited villages	-	24
4. Number of towns	-	2

(iv) Physical Feature

Location and size

The district is situated in the Western part of the state of Meghalaya. It is bounded on the north by the State of Assam, on the South by South Garo Hills district, on the East by West Khasi Hills district and on the West by by West Garo Hills district. It lies between 25°.24° and 26.10° of north latitude and between 90°-21' and 91°-02 East Longitude. The total area of the district is 2,603.00 Sq.Km.

Physiography

The district is characterised by dissected and rugged hilly terrain which is mainly composed of gneissic rocks. The relief indicates its shopping pattern towards the north and hence most of the rivers flow towards the north. The Krishnai and Dudhnai rivers along with their tributaries drain in water through the district to the river Brahmaputra in the north. The district is mostly covered by dense tropical mixed vegetation with a small patch of temperate vegetation on the higher altitude.

The district has dispersed settlements. The district does not have good transport or communication network. The National High way (NH-51) passes through the western part of the district to connect Tura, the headquarter of West Garo Hills district. Other motorable roads connect some important places like Bajengdoba , Resubelpara, Mendipathar, Cheran, Dagal Songsak and Williamnagar Town.

On the basis of relief, drainage, soil, geology, vegetation, climate etc. the district has been delineated into two sub-micro regions-

(1) Krishnai Basin

(2) Dudhnoi Basin.

Krishnai Basin

The region spreads over the western part of the district occupying a total area of 1510.00 Sq.km. It consists of 518 villages. The region is characterized by hilly and dissected topography which is composed of gneissic (old inliers Sela group) rocks. The general slope is towards the north. The southern part has a rich deposit of coal. Among other minerals, pyrite is located in the north-western part and iron in the southern parts of the region. The region is drained by the river Krishnai, Simsang, etc and their tributaries. Udalfs -Ochrepts type of soils are found in most of the areas, except a narrow belt in the western part. Transport network is not so much developed in this region. It is not connected by railway. The National Highway (NH-51) passed through the north western part, while only few important places are connected by district motorable roads.

This region is characterized by the dissected and irregular terrain with an elevation of 150-600 m above the mean sea level. The region has a narrow plain along the Brahmaputra valley. There are several

peaks in this region viz., Mongiri (695 m), Bansamgiri (613 m), Megagiri (489 m), Rading (447 m), Nongchran (530 m), etc. Tura range is conspicuously located on the southern part of this region. The region is drained by the Krishnai and Simsang rivers. The rivers in this region make two distinct drainage systems due to presence of Misikokdok (688 m) and Thongbolgiri (714 m) peaks. The Krishnai river along with the tributaries Chidrang, Rongre, Bangje etc. joins the Brahmaputra river in the north, whereas the Simsang river flows to the south-east through a gorge.

Topography of the region is extensively dissected. It is formed of gneissic rocks with old inliers, Sela groups, while some patches in the northern and southern parts are formed of recent alluvium and Jaintia series/Simsang series (with ultra-basic in deep shades) rocks respectively. There is a vast deposits of coal in the southern part. Other important minerals found in the region are pyrite, clay and iron.

Udalfs-Ochrepts soils occupy almost the entire region, except the south-western part which is covered by Udalfs-Orthents type of soils. The region has dense bamboo forests with patches of miscellaneous trees. Besides, temperate forest are also found at the high altitudes.

The region exhibit dispersed and hamlet type settlements obviously due to its dissected plateau terrain. Most of the settlements in this region are of very small size. The presence of only one town Williamnagar having a population of 12,004 clearly indicates the poor urbanization. The important rural settlements are Resubelpara (1,135), Gokolgre (1,005) and Damash (1,145)., Agriculture is the main economy of the people. However, considerable number of persons are engaged in mining and quarrying also.

Dudhnai Basin

The region extends over Dambo-Rongjeng C.D.Block and part of Resubelpara, Songsak and Samanda C.D.Blocks. The region lies in the eastern part of the district and has a total area of 1093 Km^2.

The region is hilly, rugged and mainly made up of gneissic rocks. The northern part is formed by alluvial sediments deposited by rivers and streams. Since the general slope of this region is towards the north, the rivers and streams drain their water towards the north. The region is traversed by important rivers like Dudhnai, Ildek, etc. with their tributaries. Alluvial soils occupy the northern part while the central and the southern part of the region are covered by laterite group of soils.

This region dominates by hilly and dissected landscape with an altitude of 15,00,600 m above the mean sea level. A narrow belt in the northern part of this region is a plain which extends to Assam valley. There are several peaks located in this region such as Chimangiri (432 m), Darugiri (337 m), Rongjeng (627 m), Papira-Avari (735 m) and Ghorkaree etc. The general slope of this region is towards the north to the Brahmaputra valley. The region is drained by Dudhnai river and its tributaries, like Chichara, Chie, etc. The Ronga and Ildek rivers flows through the eastern part along the boundary of West Khasi Hills District.

Geologically, the region is composed of gneiss with old inliers, Sela group of rocks, except in the northern part where it is formed of recent Alluvium. Udalfs-Ochrepts type of soils occupy the western part, while the eastern part of the region is made up of Udalfs-Ochrepts, Fluvents-Orthents type of soils. The vegetal cover is similar to that of Brahmaputra valley. However, the lower hills have dense tropical mixed vegetation with pre-dominance of bamboos. But a small patch of temperate vegetation is also found in the higher parts of the region.

The region is characterized by dispersed and hamletted settlements. The soil cover permits limited arable lands. Most of the settlements are located on the northern and southern parts. The presence of only one important village viz. Rongjeng Bazar having a population of 1419 persons clearly indicates that most of the settlements are small in size. There is no town in this region which clearly brings out the rural characteristics of the region. Though the region is not very suitable for agriculture due to rocky and rugged surface configuration but still the people of this region have to depend upon agriculture and allied activities. Since the top soil is very thin, the fertility of the soil is lost very soon. The people of this region are therefore compelled to practice the shifting cultivation which is commonly known in Meghalaya as *Jhum*.

The means of transport and communication are not developed in this region. It is not connected by railway. The network of surface roads is poor and no National Highway passes through this region. A few motorable roads are found in the southern part of the region.

Climate

The climate is tropical. The temperature varies from 36 degree centigrade during summer to 4 degree centigrade during winter.

The annual rainfall of the district recorded at Williamnagar during 1998 is, 3,217mm. The rainy season in the district started from the month of August with moderate rainfall during the month of March, April and September, October every year. In the four other months, November to February, there is altogether no rain in the district and are also the only really cold months in the year. Though the heavy rainfall in summer months keeps down the temperature, it renders the atmosphere exceedingly steamy and oppressive.

(v) Economic Resources

Forest

Forest occupies a large part of the geographical area of the state. In East Garo Hills District the life of the tribal population is linked with the forest. The tribal people enjoy their customary right over their forest. The vast area of the forest is not the property of the Government by typically belong to tribal communities and whatever management is carried on is the responsibilities of the tribal council. The reserved forest under the State Government and the District Council covers a vast area of the East Garo Hills District. However, only 4 percent of the total land area is controlled and managed by the Government. Many forests have been exploited and the timbers were supplied outside the district. These are managed by the forest department and timbers are sold by them with the payment of royalty both to District Council and to the Nokmas in case of unreserved forest.

A very large part of the district is covered with forest Sal and Teak trees are available.

Mineral Resources

The Department of Mineral Resources is mainly engaged in exploration for proper assessment and utilization of various minerals available in the state. During the year 1991-92 and 1992-93, nine investigation programmes of mineral resources have been taken up mainly on coal, limestone, clay, etc. All the schemes of this Directorate are continuing schemes by generation more infrastructure. During the recent years, the new programme for ground water and geo-technical investigation has already started. The potentiality of initiation or expansion of mineral based industry in East Garo Hills District depends mainly on the three principal mineral deposits viz., coal, limestone and clay. The estimate reserve of coal seam is estimated to a depth fo 300 m is 12,70,00,000 tonnes for and area of 50 Sq.Kms of the field. The coal is found to be of good quality. The estimate of coal reserve is about 125 million tones.

Numerous occurrences of lithomorphic clay have been reported. Extensive lithomorphic and bauxiteic clays with Sylhet sandstone are reported near Chandmari and Siju Songmong. A pottery industry established under the name of Meghalaya Potteries at Mendipathar in East Garo Hills District utilized the lithomorphic clay from the central part of Garo Hills.

Limestone is found abundantly along the southern slope of the Tura range. The largest deposits with a lower 25m thick earthly and marchly and upper of 75 m thick hard and massive cliff making band of limestone lie near Siju Artika and Siju Songmong in the Simsang river valley.

Koalin is found near Darugiri in East Garo Hills District at 51 Km, post on the Dudhnai-Nangalbibra road. The percentage of Grade I Koalin from the Koalinised rock ranges from 24 percent to 40 percent and that of Grade II Koalinised rock ranges from 24 percent to 40 percent.

Promising deposits of Feldspar for use in industries is located near Tura, Anogiri, Jengjalgire, Santhagiri, Chisakgiri and at certain other places. The Tura sandstone accruing near Siju, Tura and Nangalbibra contain angular and pure grains of quartz which can be used in the manufacture of bottle, glass. The occurrence of uranium around Nengkhra in the East

Garo Hills District has been reported. Some radio activity has also been noted around Simsanggiri.

Soil and Cropping

Generally the soil of the district is acidic in nature. Two types of soil are generally recognized in the entire Garo Hills, viz. the soil on the Hills and the soil of the bottom or plain lands. The hill soil is finally textured heave loam found in some place. The colour of the soil is generally red where the soil is derived from sandstone organic. Soil derived from conglomerates contains pebbles. Soil depth varies greatly, from a few inches to several metres. Variation is occasionally due to past use of the land for jhuming.

Bottom lands consist of soil made up of transported material from the hills above and for that reason this soil is sandy or sandy loam. Clayey loam is also found in several places. The colour of the soil generally is dark owing to the presence of a good deal of organic matter and may something be almost black. The district has a variety or mineral products like Coal, Limestone, Clay and Kaolin etc.

Wet rice cultivation is practiced in the plains areas while in the hills, the population practice Jhum or shifting cultivation. However with the increasing pressure of population, the slum cycle has been considerably reduced. After clearing of the jungle and burning of the hitter sometime between March and April with little rainfall, cereals like maize and millets and tapioca are sown. It is also during these months that the ground is prepared for hill rice farmers in the hills have traditionally depended upon rainfall which has generally been dependable. The months of really heavy rainfall are May to August with the peak in June and July, which are months when crops need water to grow well. The abundant supply of rain during the growing season reduces the dependence on artificial alternations, except during the bright day spell before the monsoons. The Department of Agriculture and the Soil Conservation Department have taken up a number of small irrigation schemes to meet the needs of farmers in area where double-cropping is in vogue.

The Land Tenure System

Since the inauguration of the District Council the land revenue administration of the district vests in the District Council under the Sixth Schedule. However, the administration of the District Council have not reformed the old land tenure system adopted during the British period, although it had passed more than 3 decades since the inception of the District Council in 1952. For the purpose of revenue administration, in 1978 Captain Peet, the then Deputy Commissioner classified the land into two categories of mauzas, viz.,

(i) the hill mauzas and

(ii) the plain mauzas.

As a result, he appointed two types of Mauzadars, that is, the Hill Mauzadar and the Plain Mauzadar. Consequent upon this, there are ten mauzas till now. Generally, the A'king lands covering mostly the jhum system of cultivation practicing in the hilly region come under the hill mauza while the plain tracts where the plough cultivation is practiced come under the plain mauza.

The A'king land is the community land where the ownership rest with the community as a whole, and the village headman called 'Nokma' is the mere custodian of such land. Therefore, the right to cultivate such land is conferred upon every household of the village although de facto ownership is vested with the Nokma's wife. As a matter of fact, the Nokma has no power to alienate the land. The A'king land is divided in such a way that it can be rotated annually in order to facilitate practicing of jhum. Each household gets the share of land every year on the strength of its members while equality before the law is applied on in respect of Nokma's household also in this matter. Generally, no land revenue is payable by the residence of the A'king land but the house tax is collected from them by the District Council. However, if an outsider wants to cultivate the A'king land he is allowed to do so on payment of a nominal fee known as 'Awil' to the 'Nokma'. The plantation of arecanuts, oranges, pineapple, betel-leaves, cashew-nuts etc. in the A'king land are carried out by the households of the village without paying any rent for the land. The lands under the A'king suitable for permanent cultivation have been reclaimed and being cultivated without the payment of rent. The ownership rests with the particular household carrying out such plantation of cultivation and as such, they

have the right of inheritance although the transferable right is not unferred upon them. However, some of such types of lands and also the A'king land transferred by the community to an outsider were settled by the District Council initially by issuing an annual patta which confers upon the heritable right on the patta-holder. After a certain period of time, an annual patta is usually converted into the periodic patta which confer upon the permanent heritable and transferable right on the pattadar. The town lands are also settled in the same line.

Ordinary land revenue is realised only in the plain Mauzas which is cadastrally surveyed. The lands were classified into basti, rupit and faringati and were assessed at different rates. There are two categories of rights over the land, viz, (i) Annual pattadar and (ii) Periodic pattadar. The annual patta holder has got only the heritable right whereas the periodic patta holder has permanent heritable and transferable rights. The District Council has also enacted the Garo Hills District (Transfer of land) Act, 1954 under which permission of the Executive Committee of the District Council shall have to be obtained in the matter of acquiring any right over land.

Irrigation

Irrigation has so far played only a minimal role in agriculture development in the district. The topography itself makes alignment and construction of channels difficult and comparatively costly. However, even in areas where the lay of land is more favourable in the hills have traditionally depended upon the rainfall which has generally been dependable. Wherever suitable areas for wet cultivation are available in the hills and wherever there are small streams and springs in the area, the people have constructed channels and bunds to irrigate their fields. Wherever irrigation is feasible, the Department of Agriculture as well as the Soil Conservation Department have taken up a number of small scale irrigation schemes and more are being investigated. There is no doubt that wherever there are irrigation facilities, they have increased the level of production.

Among the major performances of the irrigation Division at Williamnagar which was established in January, 1980 are 11 minor irrigation (six of them 'flow' and the other five 'lift' irrigation schemes) bringing the total area covered to 1,180 hectares. It is estimated that all the schemes, both implemented and propose, will bring a total of 1,795 hectares.

Animal Husbandry

With the large number of livestock in the district, the veterinary work is done at the dispensaries or veterinary aid centers located at vantage points. The number of veterinary and centers in the district are 9 in numbers. Dispensaries are at Rongjeng, Mendipathar, Resubelpara, bajengdoba, Dainadubi and Upper Kharkutta.

It was estimated that the population of cattle are 40,845 numbers, Buffalo are 1403, Sheep & Goats 6849, Pigs 7689. There are also Horses/Ponies and Poultry. Poultry are usually kept by almost all households for domestic consumption and for eggs, and occasionally for religious rituals and sacrifices.

Livestock and Poultry Population as on 1997

1.	Crossbreed Cattle	-	47
2.	Indigenous Cattle	-	1,55,042
3.	Buffaloes	-	1,005
4.	Pig	-	51,588
5.	Goat	-	34,4536
6.	Sheep	-	54
7.	Fowls		
	Deshi	-	3,10,090
	Improved	-	9,597
8.	Ducks		
	Deshi	-	759
	Improved	-	41

Source:Deptt. of Animal Husbandry and Vety., Govt. of Meghalaya

The Animal Husbandry and Veterinary Department is making a start with a number of Schemes under the Integrated Rural Development and Special Animal Husbandry programmes designed to improve stock. The department has also adopted several measures to combat diseases among animals and birds. The main diseases in animale is foot and mouth diseases and among birds are Fowl-Pox and Coccidiosia.

District Livestock Infrastructure as on 1999-2000

1.	Vety. Hospital	-	-
2.	Vety. Dispensaries	-	7
3.	Vety. Aid Centres	-	8
4.	Mobile Vety. Dispensaries	-	2
5.	Stockman Centre	-	9

Industry

Weaving is one of the most important vocations in the economic life of the Garos. The district produces Short Staple Cotton and the weavers are known for their exquisite skill in weaving various types of fabrics. The principal products are dakmander and daksaria. Besides, the artisans also produce other articles like gamchas, bed covers, towels, etc. Training centres for artisans weavers are located at Resubelpara and Williamnagar. Besides these, there are also a number of Handloom Demonstration-Cum-Production Centres in various places of the district. At present, there are no large scale and medium-Scale industry in the district. Bamboo mats, basket making and rude pottery making are also to be found in certain villages. The cane and bamboo work is one of the oldest popular industries to the Garos. It is carried on as a major subsidiary occupation and most families in the rural areas produced their own requirements. The items made are moras (seats) and traditional baskets such as Kok and Migam Kok, Winnowers, baskets of various sizes and shapes, mats, fishing traps, boxes, tray and a wide variety of containers fashioned from bamboo.

There are also few other cottage industries, like carpentry, bee keeping and blacksmithy engaged especially by people in rural areas. There are no large scale industry at present in the district except two medium plants viz.; Virgo Cement plant which produce at a capacity of 200 tonnes per day and another medium plant is the Meghalaya Bamboo Chips at Nongchram which produces 500 tonnes per day.

Fishing

The villagers derived considerable profit from fishing. They are doing good trade by supplying dried fish. Majority of the population purchase dried fish (nakham) at the little village market. All the rivers in the district are rain-fed. They go almost dry in winter. Dudhnai and Krishnai are the important rivers which has variety of fishes which has ample scope for fisheries development. The Fisheries Dept. has distributed fish seed in 1996-97 about 90,000 nos., in 1997-98 at 40,000 nos. and during 1998-99 only 11000 nos.

Trade and Commerce

Since time immemorial, there were private money-lenders who used to extend credit to the public in general and to farmers in particular. The rate of interest was very high.

The barter system of trade was recognised even during the nineteenth century "Everything was priced according to its value in cotton".

Prior to 1959, there was no bank in the entire Garo Hills. It was only after, that a branch office was first opened at Tura under West Garo Hills districts. With the opening of more branches for banking facilities in the recent years, the banking business like receipt of deposits in savings Government Bills of India were opened at Adokgiri, Bajengdoba, Dainadubi, Kharkutta, Mendipathar, Mangsang, Mendal, Resubelpara, Rongjeng, Rongsak, Samanda, Songsak, Williamnagar and with another 18 branches in the entire district of East Garo Hills.

In East Garo Hills district, there were 39 Co-operative Societies. These included Service Co-operative Societies, Handloom Co-operative Societies, Fisheries Marketing and Industrial Co-operative Societies. The Meghalaya Co-operative Apex Bank is playing a vital role in financing credit to Co-operative Societies. Today, more and more Garos have become engaged in business with success.

While trade and commerce have led to the increase of industrial activity in the district, particularly in the united areas where communication is relatively easy. The government have taken up new roads construction schemes to open up outlying areas of the district. The most important trade routes is between Williamnagar and Dudhnai, Williamnagar to Tura, Williamnagar to Mendipathar. The people of the district depend much on trade with the people of Kamrup and Goalpara and the principal commodities for export are cotton, timber and other forest products.

In the district, there is a potential rich mineral area which are deposits of coal, limestone and fire-clay which are virtually untapped. The infrastructure is practically nil for the exploitation of minerals and the development of industries.

Electricity and Power

Power plays a vital role in the economic development. Rural electrification is essential for executing the development programme in the agricultural cottage industries sector. In East Garo

Hills, the number of villges electrified are more than 154 in 1991 Census. In the district there is the Nangal Bibra Thermal Project with the capacity of only 5 MW.

No. of Villages Electrified in the District, 2000

Total Rural Urban	No. of Villages Electrified	No. of Connections		
		Domestic	Industrial	Other
Total	399	9086	46	6574
Rural	399	4532	20	5792
Urban	-	4554	26	782

(v) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or

common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

   i) a city or town with one or more contiguous outgrowths;

   ii) two or more adjoining towns with their outgrowths; and

   iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who

normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the constitution provides that the President may, with respect to any State or Union Territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the constitution be deemed to be Scheduled Caste in relation to that State or Union Territory. Article 342 similarly provides for specification of tribes or tribal communities or part s of or group within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States or Union Territories. In pursuance to this provisions, the list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside.

It is important to mention here that under the Constitution (Scheduled Caste) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in religion to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and Sikh religions were placed on the same footing with regard to the made in the Constitution (Scheduled Castes) Order 1991, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

According to the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 and the Constitution (Scheduled Tribes) Order (Amendment) Act, 1987, the list of Scheduled Castes and Scheduled Tribes in Meghalaya is as follows:

Scheduled Castes

1. Bansphor
2. Bhuinmali, Mali
3. Brittial Bania, Bania
4. Dhupi, Dhobi
5. Dugla, Dholi
6. Hira
7. Jalkeot .
8. Jhalo, Malo Jhalo-Malo
9. Kaibartta, Jaliya
10. Lalbegi
11. Mahara
12. Mehtar Bhangi
13. Muchi, Rishi
14. Namasudra
15. Patni
16. Sutradhar.

Scheduled Tribes

1. Boro, Kacharis
2. Chakma
3. Dimasa, Kachari

4. Garo
5. Hajong
6. Hmar
7. Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam
8. Koch
9. Any Kuki Tribes, including:
   - i) Biate, Biete
   - ii) Changsan
   - iii) Chonglo
   - iv) Doungel
   - v) Gamalhou
   - vi) Gangte
   - vii) Guite
   - viii) Hanneng
   - ix) Haokip, Haupit
   - x) Haolai
   - xi) Hengna
   - xii) Hongsungh
   - xiii) Hrangkhwal, Rangkhol
   - xiv) Jongbe
   - xv) Khawchung
   - xvi) Khawathlang, Khothalong
   - xvii) Khelma
   - xviii) Kholhou
   - xix) Kipgen
   - xx) Kuki
   - xxi) Lengthang
   - xxii) Lhangum
   - xxiii) Lhoujem
   - xxiv) Lhouvun
   - xxv) Lupheng
   - xxvi) Mangjel
   - xxvii) Misao
   - xxviii) Riang
   - xxix) Sairhem
   - xxx) Selnam
   - xxxi) Singson
   - xxxii) Sitlhou
   - xxxiii) Sukte
   - xxxiv) Thado
   - xxxv) Thangngeu
   - xxxvi) Uibuh
   - xxxvii) Vaiphei
10. Lakher
11. Man (Tai speaking)
12. Any Mizo (Lushai) tribes
13. Mikir.
14. Any Naga tribes.
15. Pawi.
16. Raba, Rava.
17. Synteng.

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have as script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may

be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Marginal worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops-tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural

labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years

Sex–ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid – year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive aga-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This

indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR)

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular

season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types

(i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are

Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings

East Garo Hills was carved out of the then composite Garo Hills district in October, 1976 with the headquarters at Williamnagar. It comprises of four C R D Blocks, namely, Resubelpara, Rongjeng, Songsak and Samanda. The Census of India, 2001 recorded a total population of 250582 out of which rural population recorded as 214675 and urban as 35907. There are 864 inhabited villages and two statutory towns in the districts. The district population is predominantly rural with 85.7 percent of them living in rural areas while only 14.3 percent in urban areas. The two towns of the district namely Williamnagar town and Resubelpara town both having status of Municipal Board (MB) and fall under class IV town category. The population growth of the last decade (1991-2001) is 32.7 percent higher than the state decadal growth with 30.7 percent . With a total area of 2603 Sq. Kms, the density of the population comes to 96 persons per square kilometre. The Sex ratio of the district is 966 which is lower than the state sex ratio with 972. The sex ratio of Scheduled Tribes population with 977 is comparatively higher. The district population is predominantly tribal. The literacy rate of the district is 60.6 percent of which males is 66.2 percent and female is 54.9 percent. The district has three Degree Colleges and all of them are situated in the towns. The work participation of the district is 44.7 percent of which males are 48.0 percent and females are 41.3 percent. The majority of the population are non workers giving 55.3 percent of the total population. The economy of the district depend mostly on agriculture, because 80 percent of the total workers are engaged in agricultural sector. Of the remaining workers 2.9 percent are engaged in household industry and 17.1 percent are engaged in other workers. The majority of the population are Christians by religion. The percentage of Christians are 88.9 percent of the total population of the district. Those who follow ' Other religion and persuasions ' are only 3.3 percent. Other major religions are Hindus 5.6 percent, Muslims 1.5 percent, Sikhs 0.0 percent, Buddhists 0.1 percent and Jains 0.0 percent to the total population of the district.

Finding Scheduled Castes/Scheduled Tribes

The proportion of Scheduled Castes and Scheduled Tribes population in the district are shown as 0.1 percent and 96.5 percent to the total population respectively. The population growth of Scheduled Castes and Scheduled Tribes for last decade 1991-2001 is recorded 44.0 percent and 32.3 percent respectively. Decadal growth in the rural areas are shown as - 73.5 percent and 22.2 percent respectively while in urban areas it is shown as 130.2 percent and 205.2 percent respectively. It is observed that the population growth of Scheduled Castes in rural areas is shown negative growth with - 73.5 percent. This negative growth in the rural areas may be due to large scale movement from rural areas to urban areas in search of work for living. The growth rate of SC

in the urban has shown considerable increase during last decade. Most of the Scheduled Castes population have no permanent residence in the district.

Total/ Rural/ Urban	SC Population			ST Population		
	1991	2001	Decadal Growth Rate	1991	2001	Decadal Growth Rate
1	2	3	4	5	6	7
Total	241	347	44	1,82,849	2,41,916	32.3
Rural	102	27	-73.5	1,72,733	2,11,042	22.2
Urban	139	320	130.2	10,116	30,874	205.2

Brief Notes on Tables

In the few pages that follow an attempt is being made to briefly analyse the few tables based on data collected from the Primary Census Abstract, the Village Directory and Town Directory and Houses, Household Amenities and Assets depicting on their own way the various demographic characteristics of the population of the district, the basic amenities such as education, medical, improved drinking water, etc available to the population of the district, and the housing stock, the household amenities and assets available to the households of the district. A total of 52 tables have been prescribed for the purpose. Tables 1to 36 present data from the Primary Census Abstract, inset tables 37 to 47 shows data on villages Directory and Town Directory and tables 48 to 52 gives data on household amenities and assets.

Tables 6, 10, 14, 21, 31 and 34 are to present data on Primary Census Abstract Tahsilwise and the rest C.R.D. Block wise. In Meghalaya, however, the Census of India starting from 1981 has been conducted with the Communiy and Rural Development Blocks as the administrative unit below the district and above the villages and towns and all the data have been tabulated and presented C.R.D. Blockwise. Therefore the above six tables have been excluded. Moreover, in Meghalaya there is no such administrative unit by the name Tahsil. Till 1971 the Census of India was conducted in Meghalaya police stationwise and never Tahsilwise.

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Sl No.	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1.	Resubelpara	66,332	66,332	-	86,189	68,529	17,660	29.9	3.3	-	-	20.5
2.	Dambo Rongjeng	60,192	60,192	-	79,224	79,224	0	31.6	31.6	-	-	-
3.	Songsak	32,212	32,212	-	41,992	41,992	0	30.4	30.4	-	-	-
4.	Samanda	30,094	18,090	12004	43,177	24,930	18,247	43.5	37.8	52.0	39.9	42.3
District Total:		**1,88,830**	**1,76,826**	**12,004**	**2,50,582**	**2,14,675**	**35,907**	**32.7**	**21.4**	**199.1**	**6.4**	**14.3**

This table shows the decadal change in the distribution of population Col. 2 shows the name of C.D. blocks in the district, col. 3, 4, & 5 shows population for Rural and Urban of 1991 Census against each C.D. block, Col. 6, 7&8 shows the population of Rural & Urban of 2001 Census and Col. 9, 10, 11 shows the percentage decadal variation between 1991 and 2001 Census for total, rural and urban against each C.D. block. It is observed that Samanda C.D. block is having the largest decadal variation between 1991 and 2001 Census with a percentage of 43.5. The lowest decadal variation is found in Resubelpara C.D. Block with a percentage of 29.9 only. The decadal variation of the district is found to be 32.7 percent which is higher than the state decadal growth of 30.6 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1.	Resuabelpara	231	68,529	34,791	33,738	89 (38.5)	6,158	5,855
2.	Dambo Rongjeng	300	79,224	40,273	38,951	131 (43.7)	7,954	7,670
3.	Songsak	196	41,992	21,362	20,630	113 (57.7)	6,446	6,423
4.	Samanda	137	24,930	12,664	12,266	89 (65.0)	4,702	4,461
	Districts (Rural) Total:	**864**	**214,675**	**109,090**	**105,585**	**422 (48.8)**	**25,260**	**24,409**

cont.

Sl. No.	District / C.D. block	Number and percentage of villages	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females		Males	Females
1	2	19	20	21	22	23	24	25	26	27
1.	Resuabelpara	-	-	-	-	-	-	-	-	-
2.	Dambo Rongjeng	-	-	-	-	-	-	-	-	-
3.	Songsak	-	-	-	-	-	-	-	-	-
4.	Samanda	-	-	-	-	-	-	-	-	-
Districts (Rural) Total:		-	-	-	-	-	-	-	-	-

In this table the inhabited villages are grouped into different ranges of population size as shown in the table. From the table we see that the percentage of villages under the population range of less than 200 is the highest followed by 200-499 population range with 48.8 percent and 42.5 percent respectively. The percentage of villages decreases as the population ranges increase. There is no village found under the population ranges of 2000 and above. Among the rural C.D.Blocks Samanda Block is having highest percentage of villages under the population range of less than 200. However, Resubelpara C.D.Block and Dambo Rongjeng Block are having higher percentage of villages under the population range of 200-499 than other ranges.

TABLE 3: NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Towns
	1
(a) New	
i) Statutory Town	Resubelpara
ii) Census Town	NIL
(b) Denotified	NIL
i) Statutory towns of 1991 Census denotified and also did not satisfied the criteria to be treated as Census towns	
ii) Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	
iii) Census towns of 1991 Census are notified as statutory towns in 2001 Census.	
(c) Declassified	NIL
(d) Wholly merged with other town(s)	NIL

This table shows administrative changes taken place in urban area of the district. Creation of new towns during last decade and also the cases of denotication or declassification of existing town or merged with adjacent town for some reasons will be shown in the table. In the district of East Garo Hills one Resubelpara Town has been created newly after last Census. However, no town has been denotified or declassified or merged with any town in the district. East Garo Hills is having two statutory towns at present.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
N.A.				

NB: In Meghalaya, villages are not cadestrially surveyed; hence no information available in the table.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1036	1047	725	986	986	-
1911	1013	1024	757	965	965	-
1921	1000	1009	809	967	967	-
1931	971	989	697	967	967	-
1941	966	991	683	982	982	-
1951	949	969	784	958	958	-
1961	937	971	764	976	976	-
1971	942	958	853	930	930	-
1981	954	965	904	941	947	772
1991	955	966	910	958	964	875
2001	972	969	982	966	968	953

This table shows the Sex Ratio of the State and the District since 1901 Census. From the table we find that the sex ratio of the state is diminishing till 1961 which rises gradually after 1971 Censuses. In 1961 the number or females per 1,000 males was 937 while it is 972 in 2001 Census. However, the district Sex ratio gives different figures from that of state. It shows highest sex ratio in 1901 and lowest in 1971 Census. In 2001 Census the sex ratio is 966 and 968 resspectively in Total and Rural. It is noticed that the sex ratio of the district remain above 929 in all the Censuses.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Sl.No.	Name of C D block	Sex ratio
1	2	3
1.	Resubelpara	970
2.	Dambo Rongjeng	967
3.	Songsak	966
4.	Samanda	969
	District (Rural) Total:	**968**

Sex Ratio is defined as the number of females per 1000 males. Amongst all the C.D. block, Resubelpara C.D. block has the highest Sex Ratio with 970 females per 1,000 males whereas Songsak C.D. block with Sex ratio of 966 is found to be the lowest. The sex ratio of the district is found to be 968 which is lower than the State sex Ratio of 972 females per 1,000 males.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	21	2.4	2,375	1.1
700-749	16	1.8	2,148	1.0
750-799	26	3.0	4,193	2.0
800-849	67	7.8	14,493	6.8
850-899	92	10.7	22,501	10.5
900-949	128	14.8	36,740	17.1
950-999	156	18.1	48,945	22.8
1000-1099	218	25.3	60,894	28.3
1100+	139	16.1	22,386	10.4
District Total:	**863**	**100.0**	**214,675**	**100.0**
Sex ratio (Rural) for District:		**968**		

The table shows the sex ratio of rural population by ranges. It is interesting to note that as many as 25.3 percent of the villages falls in the ranges of 1000-1099 which is found to be highest amongst all the ranges and 1.9 percent of the villages falls under 700-749 ranges which is found to be lowest.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1.	Resubelpara (MB)	(MB)	974
2.	Williamnagar (MB)	(MB)	934
	Sex ratio (Urban) for the district:		**953**

The table shows the sex ratio of Urban Agglomeration (including constituent units)/ Towns, in respect of 2001 Census. There are two towns in the district, and the sex ratio of Resubelpara town is found to be higher than the Williamnagar town.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1.	Resubelpara	13,533	6,883	6,650	966
2.	Dambo Rongjeng	16,532	8,388	8,144	971
3.	Songsak	9,301	4,661	4,640	995
4.	Samanda	5,234	2,667	2,567	963
	District (Rural) Total:	**44,600**	**22,599**	**22,001**	**974**

The table shows the sex ratio of population in the age group 0-6 in respect of C. D. Blocks as per 2001 Census. It is observed that Songsak C. D. Block has the highest sex ratio of 995 in the age group 0-6 whereas Resubelpara has the lowest sex ratio of 966 in the age group 0-6. The sex ratio in the age group 0-6 in the respect of East Garo Hills is found to be 974 which is higher than that of the state sex ratio.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	140	16.2	4292	9.6
700-749	34	3.9	1976	4.4
750-799	53	6.1	2953	6.6
800-849	56	6.5	3411	7.6
850-899	60	6.9	3877	8.7
900-949	60	6.9	4588	10.3
950-999	19	2.2	1587	3.6
1000-1099	140	16.2	8270	18.5
1100+	302	35.0	13646	30.6
District (Rural) Total	**864**	**100.0**	**44600**	**100.0**
Sex ratio (Rural) for District:		**974**		

This table shows the number and percentage of inhabited villages and the percentage distribution of population in different ranges of sex ratio among the age group of 0-6 in the rural areas of the district.

From the table we know the highest number of villages with 35.0 percent to total villages fall under the sex ratio range of 1100 and above. The percentage of population under this range is shown as 30.6 percent. The lowest number of villages with 2.2 percent only fall under the sex ratio range of 950-999 and the percentage of population in this range is 3.6 percent only.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Resubelpara (MB)		3,165	1,650	1,515	918
2	Williamnagar (MB)		3,417	1,718	1,699	989
	District(Urban) Total		**6,582**	**3,368**	**3,214**	**954**

This table shows the sex ratio of population in the age group 0-6 of Urban agglomerations/Towns, 2001. It is observed that sex ratio with 989 in the age group 0-6 in respect of Williamnagar is higher than the sex ratio of Resubelpara town in the age group 0-6 i.e, 918 females per 1000 males.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1.	Resubelpara	68,529	18	67,660	0	98.7
2.	Dambo Rongjeng	79,224	4	77,226	0	97.5
3.	Songsak	41,992	0	41,466	-	98.7
4.	Samanda	24,930	5	24,690	0	99.0
	District (Rural) Total:	**214,675**	**27**	**211,042**	**0**	**98.3**

The tables shows the number and percentage of Scheduled Caste and Scheduled Tribes population in C. D. Blocks 2001. It is seen that 98.3 percent of the total population of the District are Scheduled Tribes. The rural Scheduled Tribes population in the urban areas constitutes 85.98 percent.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	857	99.2	-	-
Less than 5	7	0.8	27	100
5-10	-	-	-	-
11-20	-	-	-	-
21-30	-	-	-	-
31-40	-	-	-	-
41-50	-	-	-	-
51-75	-	-	-	-
76 and above	-	-	-	
District Total	**864**	**100.0**	**27**	**100**

Out of 864 villages in the district, it is observed that only in the population ranges less than 5, a few Scheduled Caste Populations are available which represents only 0.8 percent of population Scheduled Caste are not available in any other population ranges. In 99.2 percent villages there is no SC population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	3	0.3	-	-
Less than 5	-	-	-	-
5-10	1	0.1	6	0.0
11-20	1	0.1	4	0.0
21-30	1	0.1	205	0.1
31-40	-	-	-	-
41-50	-	-	-	-
51-75	4	0.5	650	0.3
76 and above	854	98.8	210,177	99.6
District Total	**864**	**100.0**	**211,042**	**100.0**

It is interesting to note that as many as 98.8 percent of scheduled tribe in the district covered in percentage range of 76 and above and out of 864 villages in the district, as many as 854 villages fall in this range. There are four villages which fall in the range of 51-75 population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Resubelpara (M B)	17660	107	15982	0.6	90.5
2	Williamnagar (M B)	18247	213	14892	1.2	81.6
District(Urban) Total		**35907**	**320**	**30874**	**0.9**	**86.0**

This table shows the number and percentage of Scheduled Castes and Scheduled Tribes population in urban in urban Agglomerations/Towns, 2001. It is seen that Resubelpara town is having 90.5 percent of Scheduled Tribe population to total population and Williamnagar Town is having 81.6 percent of Scheduled Tribe population. Scheduled Caste population of both the towns are found to be negligible

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Resubelpara	636	972
2	Dambo Rongjeng	333	978
3	Songsak	-	972
4	Samanda	4000	971
District (Rural) Total		**800**	**974**

This table presents the sex ratio of Scheduled Castes and Scheduled Tribes in different C.D. Blocks of the district. In C.D.Block level, the sex ratio of scheduled caste shows abnormally high in Samanda Block while Dambo Rongjeng C.D.Block shows only 333. This high and low ratio of females among SC is due to small number of population in the Block Songsak C.D.Block has no scheduled castes population.

TABLE 20 : SEX RATIO OF SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATION

Sl. No	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Resubelpara (M B)	814	995
2	Williamnagar (M B)	790	994
Sex ratio (Urban)district:		**798**	**994**

This table shows Sex Ratio among Scheduled Castes and Scheduled Tribes in Urban Agglomeration Towns, 2001. It is observed that sex ratio of the Scheduled Tribes of the Urban area of the district is 994 whereas sex ratio of Scheduled Caste in respect of the urban area of the district is 798. In the case of individual town the sex ratio of Scheduled Caste is higher in Resubelpara than in the Williamnagar Town

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Resubelpara	34272	18932	15340	34257	15859	18398	62.3	67.8	56.6	11.2
2	Dambo Rongjeng	37831	21016	16815	41393	19257	22136	60.3	65.9	54.6	11.3
3	Songsak	14744	8670	6074	27248	12692	14556	45.1	51.9	38.0	13.9
4	Samanda	10165	5838	4327	14765	6826	7939	51.6	58.4	44.6	13.8
District (Rural) Total:		**97012**	**54456**	**42556**	**117663**	**54634**	**63029**	**57.0**	**63.0**	**50.9**	**12.0**

Percentage of literates are found to be highest in Resubelpara C.D.Block with 62.3 percent literates whereas with only 45.1 percent literates in Songsak C.D.Block is found to be lowest. Also the male literacy rate is found to be more than the female literacy rate. The district literacy rate in the rural areas is found to be 57.0 against the state literacy rate of 62.56 percent.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	7	0.0
1-10	28	3.2	3,906	1.8
11-20	50	5.8	8,045	3.7
21-30	100	11.6	20,349	9.5
31-40	104	12.0	23,659	11.0
41-50	117	13.5	25,337	11.8
51-60	135	15.6	34,562	16.1
61-70	120	13.9	32,822	15.3
71-80	100	11.6	31,331	14.6
81-90	70	8.1	25,026	11.7
91-99	36	4.2	9,344	4.4
100	3	0.3	287	0.1
District Total:	**864**	**100.0**	**214,675**	**100.0**
Literacy rate for District:		**60.6**		

Higher literacy rate ranges for villages are found to be in the ranges between 21-30 to 71-80 ranges of villages. The population and percentage distribution of villages is found to be highest in 51-60 range of literacy rate for villages having 35,038 persons with 16.32 percent of population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Resubelpara (MB)	11760	6100	5660	5900	2847	3053	81.1	83.6	78.6	5.0
2	Williamnagar (MB)	12102	6589	5513	6145	2848	3297	81.6	85.4	77.5	7.8
District(Urban) Total		**23862**	**12689**	**11173**	**12045**	**5695**	**6350**	**81.4**	**84.5**	**78.1**	**6.4**

This table shows the number and percentage of literates and illiterates by sex in Urban Agglomeration/ Towns, 2001. It is seen that both the towns are having very high Urban literacy rate both Males and Females literacy rates are found to be higher than the State Urban Literacy Rate.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Resubelpara	10	6	4	8	5	3	55.6	54.5	57.1	-2.6
2.	Dambo Rongjeng	4	3	1	-	-	-	100	100	100	-
3.	Samanda	-	-	-	5	1	4	-	-	-	-
	District (Rural) Total:	**14**	**9**	**5**	**13**	**6**	**7**	**51.9**	**60**	**41.7**	**18.3**

This table gives the number and percentage of literates among the scheduled castes in the district. The percentage of scheduled castes literates is shown as 51.9 percent of which male is 60 percent and female 41.7 percent. The gap in male female literacy of the district is 18.3 percent. In the C.D.Block level, Dambo Rongjeng C.D.Block is having 100 percent while Samanda is having percent literates which is due to small number of population in the Block. In Resubelpara C.D.Block female literacy ratio shows higher than the male literacy rate with a gap of male/ female literacy of -2.6 percent.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	3	42.9	8	29.6
1-10	-	-	-	-
11-20	-	-	-	-
21-30	-	-	-	-
31-40	-	-	-	-

91-99	-	-	-	-
100	3	42.8	9	33.3
District Total:	7	**100.0**	**27**	**100.0**
Literacy rate for District (Rural):		**51.9**		

This table gives the number and percentage of villages having scheduled castes and also percentage of population in different ranges of literacy rate. In the table we see the most number of villages having scheduled castes population under the ranges literacy rate having 0 % and 100 % with 42.9% each percentage of population in these ranges are 29.6 % and 33.3 % respectively. The percentage of villages having SC population is found under the range of 41 -50 percent. Percentage of population in this range is 37.0 %.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Resubelpara (MB)	75	45	30	32	14	18	84.3	84.9	83.3	1.6
2	Williamnagar (MB)	108	72	36	105	47	58	64.3	74.2	50.7	23.5
	East Garo Hills (Urban)	**183**	**117**	**66**	**137**	**61**	**76**	**71.2**	**78**	**61.7**	**16.3**

This table shows the number and percentage of literates among scheduled castes living in towns. The table shows the literacy rate of scheduled castes in the district as 71.2 % of which male is 78 % and female 61.7 % with a gap in male/female literacy rate of 16.3 % . Between the two towns of the district Resubelpara Town is having higher rate with 84.3 % while Williamnagar Town is having 64.3 % literates. The gap in male/female literacy rate in Resubelpara Town is only 1.6 % while in Williamnagar Town is 23.5 %.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Resubelpara	33,837	18,658	15,179	33,823	15,645	18,178	62.3	67.8	56.7	11.2
2.	Dambo Rongjeng	36,728	20,249	16,479	40,498	18,802	21,696	60.2	65.7	54.6	11.1

This table gives number of literates and illiterates and also literacy rate of Scheduled Tribes in the district. The literacy rate of Scheduled Tribes in the district is shown as 57 percent of which male is 62.8 percent and female 51 percent with a gap in male/ female literacy rate of 11.9 percent. In the C.D.Block level, Resubelpara Block is having highest percentage of literacy with 62.3 percent having a gap of male/ female literacy rate of 11.2 percent while Songsak Block is having lowest literacy rate with 45.1 percent. The gap in male/female literacy rate is shown better in Dambo Rongjeng C.D.Block with 11.1 percent.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	7	0.0
1-10	28	3.3	3,869	1.8
11-20	51	5.9	8,046	3.8

91-99	34	3.9	9,051	4.3
100	4	0.5	263	0.1
District Total:	**861**	**100.0**	**211,042**	**100.0**
Literacy rate for District (Rural):		**57**		

This table shows the number and percentage of villages having Schedule Tribes and the distribution of S.T. in different ranges of literacy rate for villages. In this table we find maximum number of villages having Schedule Tribes population in the range of literacy rate of 51-60. The percentage of villages and population under this range is 15.2 percent and 16.0 percent respectively. The lowest number of village is found in the range of '0' literacy rate which gives 0.1 percent of villages and 0.0 percent of population in the range. The next highest numbers of villages are found in the range of 61-70 literacy rate. The percentage of villages under this range is 14.2 percent and the percentage of population is 15.2 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBE LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Resubelpara (MB)	10,833	5,527	5,306	5,149	2,485	2,664	82.6	84.7	80.6	4.1
2.	Williamnagar (MB)	9,991	5,230	4,761	4,901	2,238	2,663	83.2	86.6	79.7	6.9
East Garo Hills (Urban)		**20,824**	**10,757**	**10,067**	**10,050**	**4,723**	**5,327**	**82.9**	**85.6**	**80.2**	**5.4**

This table shows the number of literate and illiterates and also the percentage of literates of Schedule Tribes in the urban areas. The literacy rate of Schedule Tribes in the urban areas of the district is shown as 82.9 percent.of which male is 85.6 percent and female 80.2 percent.The gap in male/female literacy is shown as 5.4 percent. It is seen that the literacy rate in the urban areas are higher than the rural literacy. Between the towns of the district Williamnagar town is having higher literacy rate with 83.2 percent while in Resubelpara town it is 82.6 percent.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D. BLOCKS, 2001

Sl. No.	Name of C.D. Block	Persons Males Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

It is seen that number of male main workers are more than the number of female main workers in all the C.D. Blocks of the district. However, female marginal workers are found to be more than the male marginal workers in all the C.D. Blocks of the district. The female non workers are also found to be more than the male non workers in all the C D Blocks of the District. Among the four C D Blocks in the District, percentage of main workers is found to be highest in Songsak C.D. Block with 40.0 percent while Dambo Rongjeng C.D. Block has the lowest main worker with 29.6 percent.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Persons Males Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

District (Urban)		**Persons**	**35,907**	**8,841**	**24.6**	**4,004**	**11.2**	**12,845**	**35.8**	**23,062**	**64.2**
	Total:	**Males**	**18,384**	**6,440**	**35.0**	**1,546**	**8.4**	**7,986**	**43.4**	**10,398**	**56.6**
		Females	**17,523**	**2,401**	**13.7**	**2,458**	**14.0**	**4,859**	**27.7**	**12,664**	**72.3**

There are two towns in the district. It is seen that the percentage of total workers in Resubelpara with 41.7 percent are more than Williamnagar town with only 30.0 percent total workers. It is also observed that, though the percentage of total main workers are found to be more in Resubelpara than Williamnagar town, but male main workers are found to be more at Williamnagar than Resubelpara town. Percentage of marginal workers found to be more Williamnagar town. It is noticed from the table that in the urban areas of the district, the percentage of male main workers are more with 35.0percent than its counterpart female main workers which is only 13.7percent. However, among marginal workers female shows more with 14.0percent than male marginal workers which is shown as 8.4percent.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Sl No.	Name of C. D. Block	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers

3.	Songsak	Persons	41,992	20,757 (49.4)	16,865 (81.2)	1,475 (7.1)	322 (1.6)	2,095 (10.1)
		Males	21,362	11,020 (51.6)	8,951 (81.2)	766 (7.0)	133 (1.2)	1,170 (10.6)
		Females	20,630	9,737 (47.2)	7,914 (81.3)	709 (7.3)	189 (1.9)	925 (9.5)
4.	Samanda	Persons	24,930	12,159 (48.8)	9,629 (79.2)	889 (7.3)	162 (1.3)	1,479 (12.2)
		Males	12,664	6,301 (49.8)	4,832 (76.7)	437 (6.9)	72 (1.1)	960 (15.2)
		Females	12,266	5,858 (47.8)	4,797 (81.9)	452 (7.7)	90 (1.5)	519 (8.9)
District (Rural) Total:		**Persons**	**214,675**	**99,151 (46.2)**	**73,091 (73.7)**	**11,553 (11.7)**	**2,744 (2.8)**	**11,763 (11.9)**
		Males	**109,090**	**53,169 (48.7)**	**38,623 (72.6)**	**5,991 (11.3)**	**774 (1.5)**	**7,781 (14.6)**
		Females	**105,585**	**45,982 (43.5)**	**34,468 (75.0)**	**5,562 (12.1)**	**1,970 (4.3)**	**3,982 (8.7)**

It is seen that 81.2 percent of cultivators are found in Songsak C.D. Block which is the highest amongst all the C.D. Blocks whereas Resubelpara C.D. Block with 65.1 percent is found to be lowest. The other workers with 13.8 percent is found to be highest in Resubelpara C.D. Block whereas Songsak C.D. Block with 10.1 percent other workers is found to be lowest. Persons engaged in Household Industry are very less in all the C.D. Blocks. With 17.9 percent Agricultural labourers the Resubelpara C.D. Block is found to be highest whereas Songsak C.D. Block with only 7.1 percent Agricultural labourer is found to be lowest. In the district level, cultivator is found to the highest with 73.7 percent.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivator	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
				Number (Percentage)				
1	Resubelpara (M B)	Persons	17660	7366	2520	1719	205	2922
				(41.7)	(34.2)	(23.3)	(2.8)	(39.7)

				(41.2)	(6.3)	(2.5)	(3.0)	(88.3)
		Females	8810	1592	186	218	136	1052
				(18.1)	(11.7)	(13.7)	(8.5)	(66.1)
	District (Urban) Total	Persons	35907	12845	2949	2034	456	7406
				(35.8)	(23.0)	(15.8)	(3.6)	(57.7)
		Males	18384	7986	1506	943	185	5352
				(43.4)	(18.9)	(11.8)	(2.3)	(67.0)
		Females	17523	4859	1443	1091	271	2054
				(27.7)	(29.7)	(22.5)	(5.6)	(42.3)

Total number of cultivators in Resubelpara town is found to be 2520 against only 429 numbers of cultivators in Williamnagar town. Similarly Agricultural labourers are also found to be more at Resubelpara than Williamnagar town. However, Williamnagar town has more Household Industry workers and other workers than Resubelpara town. In the case of Other Workers also Williamnagar is more than Resubelpara.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Sl No.	Name of C. D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13

District Total:		**864**	**717**	**91**	**521**	**38**	**2**	**191**	**10**	**15**	**261**	**287**
		(100)	**(83.0)**	**(10.5)**	**(60.3)**	**(4.4)**	**(0.2)**	**(22.1)**	**(1.2)**	**(1.7)**	**(30.2)**	**(33.2)**

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table gives the number and percentage of inhabited villages according to the type of amenities available in the village. From the table we see that the villages having amenities of education is 83.0 %. Improve drinking water 60.3 % and Electric power supply33.2 % which can be said to have better facilities in village. However in the area of medical, Post and Telecommunication and Banking Services are very poor. Among the C.D. Blocks Resubelpara C.D.Block is shown highest in Educational amenity with 88.7 % while Samanda shows lowest with 75.9 %. Other amenities like medical, improved drinking water supply, Post Office, Transport Communication, Electric Power supply etc are also shown comparatively better in Resubelpara C.D.Block.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

		(100)	(82.6)	(9.5)	(71.5)	(5.3)	(1.4)	(27.2)	(2.5)	(0.0)	(29.1)	(26.8)
	District Total:	214675	194842	36361	149916	18144	1088	67797	4638	3910	88608	99002
		(100)	(90.8)	(16.9)	(69.8)	(8.5)	(0.5)	(31.6)	(2.2)	(1.8)	(41.3)	(46.1)

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the number and percentage of population served by different amenities. It is seen that 90.8 % of the district rural population are served by Educational amenities, 69.8 % by Improved drinking water and 46.1 % by Electricity Power supply. Rural population of the district served by medical and Transport Communication is very low showing 16. 9 % and 31.6 % respectively. Other facilities like Telephone is almost nill and like Banking and Agricultural credit facilities are very low in rural villages of the district. Among the C.D. Blocks Resubelpara is having highest number of population served by almost all the amenities shown for the purpose.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	125	20	3	148
(b) Middle School	349	219	162	730
(c) Degree College	16	33	815	864

cont.

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
2. Medical:-				
(a) Hospital	62	66	733	861
(b) PHC	405	263	181	849
3. Post Office	**484**	**225**	**117**	**826**
4. Telephone	**84**	**80**	**698**	**862**
5. Bus Service	**310**	**237**	**136**	**683**
6. Banks				
(a) Commercial Bank	81	82	691	854
(b) Cooperative Bank	80	70	712	862
7. Agricultural Credit Societies	**6**	**9**	**834**	**849**

This table shows the number of villages not having certain amenities and the distance ranges from where such facilities are available to them. The table above shows different levels of education with maximum number of villages not having educational amenity in the higher educational level. Villages not having Primary Schools and middle School are more in distance range of less then 5 km from where such amenities are available. In case of medical maximum number of villages fall under 10 + km for Hospital while more villages fall under the range of less than 5 km. Other amenities like Post Office and Bus services, villages are more in the distance range of less than 5 km. However, the case of Telephone, Banking and other service, most of the village fall within the range of 10 and above kms from which such amenities are available.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the number and percentage of villages according to the distance range from nearest town with availability of different amenitiés. From the table it is seen that the village having amenities Education is less and medicals. In the range of less than 5 and more in the range of 51 and above from the nearest town. It may be assumed that people from nearer to the town can easily avail the facilities from the town which generally give better services

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

District total	**864**	**717**	**91**	**521**	**38**	**2**	**191**	**10**	**15**	**261**	**287**
	(100.0)	**(83.0)**	**(10.5)**	**(60.3)**	**(4.4)**	**(0.2)**	**(22.1)**	**(1.2)**	**(1.7)**	**(30.2)**	**(33.2)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

This table shows the number and percentage of villages according to population range with availability of amenities. It is seen that villages in the range of 1-499 population are more though the percentage of villages having different amenities are less. The percentage of villages having different amenities are more in the population of 500-999. In the district there is no village beyond population 2000.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Resubelpara	231	-	-	-
2	Dambo Rongjeng	301	-	-	-
3	Songsak	195	-	-	-
4	Samanda	137	-	-	-
	District Total:	**864**	-	-	-

Note : - Cultivable area = irrigated area + unirrigated area

The information on cultivable land and irrigated and un-irrigated cultivable land are not available due to non cadestrially surveyed. So, in this table only numbetr of inhabited village is shown.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Resubelpara (MB)	119	6.6	112.4	51.3	-	-	-	-	-
2	IV Williamnagar (MB)	241.5	17.0	224.5	241.5	241.5	-	-	-	-
District Total		**181.2**	**11.9**	**169.4**	**147.9**	**122.7**	-	-	-	-

This table shows the per capita receipt and expenditure in the Towns. It is seen from table that Resubelpara town has total per capita receipt of Rs. 119 while per capita expenditure is shown Rs. 51.3. In Williamnagar town the per capita receipt is shown as Rs. 241.5 while per capita expenditure is Rs. 241.5.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Resubelpara (MB)	14.2	5.1	2.8	0.6	0.6
2	Williamnagar (MB)	7.1	7.1	2.7	0.5	1.1
	District Total	**10.6**	**6.1**	**2.8**	**0.6**	**0.8**

Primary Schools per 10,000 populations are found to be double in Resubelpara than Williamnagar where as Junior Secondary/Middle Schools per 10,000 populations are found to be more in Williamnagar than Resubelpara town. Institutions viz Secondary/Matriculation, Senior Secondary and Colleges are found to be equal in both the towns of district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Resubelpara(MB)	17
2	Williamnagar(MB)	55
	Distrct Total	**36**

This table shows number of beds available in medical institutions per 10,000 population in the urban areas of the district. From the table we find that there are average of 36 beds per 10,000 population in the district urban areas.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
		Nil		
District Total				

Table 46 shows proportion of slum population in Towns, 2001. As there is no slum population in both the towns of East Garo Hills, the table may be treated as NIL.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1.	Resubelpara (MB)	Cement Hume Pipe Soft Drink	Bettle Nut Bamboo Mustard Seed
2.	Williamnagar (MB)	Cement Hume Pipe Soft Drink	Ginger Mustard Oil

This table gives the list of Commodities manufactured in the towns and also the commodities exported outside the town. It is seen that manufacturing cement is the only factory in the district which is very important commodity and also exported outside the town. There are few agricultural horticultural products shown as exporter. Bettle Nut, Bamboo and Mustard Seed are the main important agricultural products which are exported from the Resubelpara Town of the district. In the case of Williamnagar town, Ginger and Mustard Oil are the main two agricultural products exported from the Town.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS

Tenure status	Number of dweling households	Number of households								
		Total			Schedule Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	District Total	45,010	38,572	6,438	1,117	863	254	42,520	37,201	5,319

Data source: Census of India 2001, H-series: " Tables on Houses, Household amenities and Assets".

Number of households having two rooms are found to be more in owned, rented and others households for the total & urban households of the district. However, for rural rented households, one room households are found to be more than the two rooms household. In respect of Scheduled Caste household one room household is found to be more than the others. In most of the cases median number of rooms are found to be 2. In case of urban the median room is 3 in all the cases.

TABLE-49: PERCENTAGE DISTRIBUTION OF HOUSEHOLD LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'mproved' or other wise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to'limprove drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.(As per state of Meghalaya, Tap, Hand pump, Tube Well, Well are considered as 'Improved' source of drinking water.

Percentage of households having Improved drinking water is found to be highest in Resubelpara C D Block with 73.4 percent and Songsak C D Block is found to be lowest with 44.4 percent. Number & percentage of households having Electricity, Bathroom, Toilet & Drainage are found to be highest in Samanda C D Block with 39.4 percent whereas Songsak C D Block is found to be lowest with 5.4 percent household.

This table shows the number of households who are availing Banking Services and having different specified assets shown in the table. From the table we find that 13.9 percent of total household in the district are availing Banking Service, of which 9.1 percent household in the rural areas are availing while in the urban areas 42.4 percent households are availing Banking services. Among the C D Block level Samanda Block is having higher percentage of household with 28.9 percent followed by Resubelpara with 15.7 percent of households availing Banking services. Songsak Block is having lowest number and percentage of households that are availing banking service. Maximum number of households availing banking services are in the urban areas

Household having specified assets are maximum in having Radio/Transistor followed by haying Bicycle with 38.1 percent and 33.7 percent respectively in the district. Households having Car, Jeep, Van are only 0.9 percent of the total households in the district. Among the C. D. Blocks Resubelpara block is showing maximum number of household having Bicycle with 7387 (48.2 percent) and also having Radio/Transistor with 6033 (39. 4 percent). Songsak Block is recorded lowest number of households having Radio/Transistor with 2532 (32.4 percent) and having Bicycle with only 1288 (16.5 percent). Household having Car, Jeep & Van is shown 31 (0.4 percent) in Songsak Block.

Major Social and Cultural Events

The Garos have all along maintained their own traditional and culture. Before they enter into the Garo Hills, the Garos wandered through the Assam plain many of whom settled down in pockets, but they were not influenced by the culture of the plain. In the interior of the hills they maintained complete freedom from the influence of other.

The organisation of the Garos is more or less democratic. When a matter is in dispute all concerned including the woman, assembled and debate with feasting proportionate to the gravity of the issue. Generally the chair is taken by the Nokma, if it concerns only one village, or by the laskar (a petty magistrate appointed by the District Council generally on election by the Nokmas of the charge). There is no definite division into groups or classes with a definite order of social precedence in between these classes. Any man who has acquired social status is called a 'Nokma', anyone else is an ordinary man (ramram mande).

The most distinctive social organisation among the Garo society is the matrilineal system which is still carried out with great thoroughness. Inheritance goes to the female and property frequently goes to the daughter and the son-in-law. Where this is the case among the non-christian Caros the son-in-law is compelled to marry his mother-in-law if she is still alive. When a woman dies, the family property passes to the youngest daughter, or occasionally to her eldest daughter. The husband is, however, allowed to retain possession of the estate if he can succeed in obtaining one of his first wife's family as his second spouse.

In respect of dresses, in the old days and even now in the interior of the Garo Hills, the Garos costume is as scanty as it is compatible with decency. The principal garment of the men is the Gando, the man wear a narrow cloth about six inches wide and about six or seven feet long which is passed between the leg and fastened around the waist. The women's cloth which is only about fourteen inches broad is fastened round the body below the navel, the two top corners meeting over the weist ; the bottom corners are left unfastened, as otherwise the petticoat would be too tight making it comfortable. The women load their ears with masses of brass earrings, each 6½ inches in circumference and weighting altogether just under 2 lbs in the lobe of a single ear. Garos wear turbans tightly round the top of their head. They generally do not cover the upper part of the body when it is hot. However, a cotton cloth or blanket is used to cover their body when it is cold.

Religious, Historical and Tourist Interest places

1. **Rongrenggiri**

   It is situated near Williamnagar town where the Garos had fought the last historic battle against the Britishers in 1872 which ultimately led them to tender their submission to the Britishers. The trench dugged by the Britishers near the District Council Dak Bungalow at Chisobibra can still be seen till this day. It is also here that a Pa Togan Nengminza Memorial was erected by the Government, in memory of Pa Togan who was a great freedom fighter of the Garos against the British.

2. **Raja Simla**

   It is situated on the north just on the border of Goalpara district. The first Baptist Christian Church was established here by the American Baptist Mission with the help of the first Garo converts, viz., Omed and Ramke.

3. **Tasek Wari**

   It is situated near Songsak. It is a beautiful natural lake which has been developed as a tourist spot. The government has also taken up to develop the fishery in this lake.

4. **Nongalbibra**

   Nongalbibra is the place where river Nongal joins the river Simsang. There are rich deposits of coal in and around this place. Electric Thermal Project is constructed here. This place is popular for coal mining work and became a business center.

5. **Hot Spring**

   This hot spring is found on the hill of village Resu Bakrapara. Now the residential area have extended to this area.

6. **Na°kaChikong**

It is a natural pool in the Ildek river near village Adokgiri. Mostly one type of fish called na°ka is found in this pool. During breeding season the fishes climb the waterfalls and the people could catch fishes abundantly.

7. **Rongbang Falls**

This is a river falls of one tributary of river Simsang. The Rongbang Dare is one of the beautiful falls which can be seen from Tura-Williamnagar road.

Scope of Village and Town Directory

Incorporation of non-census data in the District Census Handbook known as the Village Directory and the Town Directory started in the 1971 census. In that census the data presented in the Village Directory were educational and medical facilities, drinking water, post and telegraph, market days, communication (bus stop, railway station and water way), nearest town from the village, power supply and staple food. On land use pattern the data presented were forest, area irrigated, area unirrigated, cultivable waste and area non-available for cultivation. Data on land use pattern could not be shown due to their non-availability.

In the 1981 census, by and large, the same data as that of 1971 were presented in the Village Directory. The only addition to that of 1971 was approach to the village, the area under jhum cultivation due to heavy demand on those data by the data-users. In the 1991 census, the same data were presented without addition or subtraction.

In the Census of India, 2001, the scope of the Village Directory has been enlarged to cover data on telephone facilities, the number of commercial and co-operative banks, the number of agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema/video halls, sports club, stadium/auditorium) available in the village. It also covers data on receipt of newspaper/magazine in the village and the most important commodities manufactured in the village.

The Town Directory of the 1971 census had seven statements. Statement-I presented data on status, growth, History and functional categories of towns; Statement-II, Physical Aspects and Location of Towns; Statement-III, Municipal Finance; Statement-IV, Civics and other Amenities; Statement-V, Medical, Educational, Recreational and Cultural Facilities in towns; Statement-VI, Trade, Commerce, Industry and Banking; and Statement-VII, Population by Religions. Statement I to VI were retained in the 1981, 1991 and 2001 census also. In the 1981 and 1991 censuses, Statement-VII was dropped and Statement-IVA, showing civic and other Amenities in slums was incorporated. In the Census of India, 2001, Statement-IVA has been replaced by Statement-VII displaying the same data as Statement-IVA.

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school

with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

Column 6 : Educational

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family W'elfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM

(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i)	Agricultural Credit Society	CS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W

(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I : It gives the abstract of educational, medical and other amenities available in villages C. D. Block wise of the district.

Appendix-I-A : Indicates number of villages C. D. Block wise having one or more primary schools.

Appendix-I-B : Indicates number of villages C. D. Block wise having primary, middle and secondary schools.

Appendix-I-C : Shows number of villages C. D. Block wise with different sources of drinking water facilities.

Appendix-II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III : It gives the land utilisation data in respect of Census Towns / non-municipal Towns.

Appendix-IV : C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V : Summary showing number of villages not having Scheduled Castes population.

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII : The appendix shows the list of villages according to proportion of the

A, VII B : Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII : Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX : Shows number of different types of girls school in a village.

Section II - Town Directory

Town Directory

Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement - I

Status and Growth History:

Column (2) : Class, name and civic administration Status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement - II

Physical Aspects and Location of towns, 1999:

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement - IV

Civic and Other amenities, 1999:

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement-V

Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 : The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes "Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11to14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement - VI

Trade, Commerce, Industry and Banking, 1999:

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement -VII

Civic and other Amenities in Slums, 1999:

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART - B

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitised form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialised software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalisation of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalised at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalised much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I-VIII

Annexure-I

Number of villages under Gram Panchayats

There is no Gram Panchayats as Administration Units in the State of Meghalaya. Hence, the data is not available and cannot be furnished under this Annexure.

Annexure-II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration. The definition of each of the above is given below.

Fertility

In demography, the term fertility is used in relation to the actual production of children or occurrence of births. Fertility is a measure by which a population adds to itself and normally assessed by relating the number of births to a full or part of the population, such as the number of married women or women of the child-bearing age. It must, however, be remembered that fertility has all to depend on marriage. No marriage, no fertility. Early marriage, high fertility and late marriage, low fertility. Crude Birth Rate (CBR) is the most simple and perhaps the most widely quoted measure of fertility. It is the ratio of the number of live births in a year to the midyear population normally expressed per 1000 population.

Mortality

Mortality is the cessation of life of a member of a population commonly known as death. It is a measure by which a population deducts from itself and normally assessed by relating the number of deaths to the population. Crude Death Rate (CDR) is the simplest and most used measure of mortality. It is the ratio of the number of deaths in a year to the midyear population normally expressed per 1000 population.

Migration

Migration is the third component of population change. It is a movement of the population from one place to another for various reasons. In census migrants are classified by place of birth and place of last residence. A persons is considered a migrant by place of birth if the place he/she is enumerated during census is other than the place of his/her birth. Similarly, a persons is considered a migrant by place of last residence if he/she is enumerated in a place other than his/her immediate place of last residence. A persons enumerated in his/her place of birth can be a migrant by place of last residence if his/her immediate place of last residence is other than his/her place of birth.

Annexure-III

Various measures of fertility and mean age at marriage:

The various measures of fertility have been given in the Analytical Note under the non-census-concepts. In this annexure we are going to analyse the following indicators of fertility.

(i) General Fertility Rates (GFR):

It is the number of live births per 1000 women in the reproductive age-groups (15-49) years in a given year. From the table we know that average General Fertility rate of the State comes to 129.7. Amongst the districts, East Garo Hills is having lowest fertility rate with only 105.7 while West Khasi Hills district gives highest rate with 155.8.

(ii) General Marital Fertility Rates (GMFR):

It is the number of live birth per 1000 married women in the reproductive age-group (15-49) years in a given year. The table shows that the General Marital Fertility rate of the State as 140.1 and the West Khasi Hills district shows highest rate with 168.3 while East Garo Hills shows lowest rate with 114..3.

(iii) Total Fertility Rates (TFR):

It is the total of the Age Specific Fertility rates for the entire reproductive age span. It shows the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of the reproductive period. The table indicates the total fertility rate of

Various measures of fertility and mean age at marriage, 1991

3.	East Garo Hills District	105.7	114.3	3.4	3.5	20.2	4.1	7.0	19.2
4.	South Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
5.	West Khasi Hills District	155.8	168.3	5.0	5.3	24.8	4.9	8.2	19.6
6.	Ri-Bhoi District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
7.	East Khasi Hills District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
8.	Jaintia Hills District	153.1	167.6	4.9	5.3	25.6	5.4	8.2	19.1

the State as 4.2. The higest rate amongst the district indicate in West Khasi Hills with 5.0 and the lowest rate in East Garo Hills with 3.4.

(iv) Total Marital Fertility rate (TMFR):

It is the average number of children that would be born to a married woman if she excercises the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of the reproductive period. As per the table the Total Marital Fertility rate of the State is 4.5. West Khasi Hills and Jaintia Hills districts shown the highest rate with 5.3 each while East Garo Hills gives lowest rate with 3.5.

(v) Crude Birth Rate:

It is the ratio of the number of live births in a particular year to the mid year population of the same year, expressed per 1000 population. The Crude Birth rate of the State Shows as 22.6 and the highest rate with 25.6 is shown in Jointia Hills district while the lowest rate with 20.2 is shown in East Garo Hills district.

(vi) Number of Children Ever Born per Woman in age group 45-49:

This table presents the number of childredn ever born per woman in the aghe group of 45-49. From the table we find the average number of children ever born per woman aged 45-49 as 4.8 for the state. Jaintia Hills district gives highest number with 5.4 while East Garo Hills gives the lowest number with only 4.1.

(vii) Child Women Ratio:

It is the number of cfhildren in the age group 0-4 years per 1000 women in the age group 15-49 years. The table shows the child women ratio as 6.8 for the State. Both West Khasi Hills and Jaintia Hills give higher ratio with 8.2 each while Ri_Bhoi district and East Khasi Hills give lowest with 6.1 each.

(viii) Mean Age at Marriage:

It is the mean age at marriage of currently married women during the decade. The mean age at marriage for the state indicates 19.3. In the district level the mean age at marriage shows higher in Ri-Bhoi district and East Khasi Hills district with 19.9 each while it is low in West Garo Hills and South Garo Hills with 18.7 each.

Annexure-IV

Migration

Migration is one of the important aspects in the field of population studies. A community or country can gain population either by births or by inmigration. It can lose population by deaths of the members of

the population or by outmigration. Migration is, therefore, like births and deaths, is a major factor in changing the size and structure of the population. It effects the areas to which the migrants move and from which they move out. As stated in Annexure – II, in the census of India, migrants are classified only by place of birth and place of last residence.

Migrants by place of birth, 1991

Birth place	Meghalaya	East Garo Hills
1	2	3
Total Migrants	267682	21,574
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	141304	11,141
	(52.8)	(51.6)
Born in other districts of the state of enumeration	27429	4,451
	(10.2)	(20.6)
States in India beyond the state of enumeration	78895	5,174
	(29.5)	(24.0)

Migrants by place of birth, 2001

Birth place	Meghalaya	East Garo Hills
1	2	3
Total Migrants	358,447	32,107
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	209,891	22,941
	(58.6)	(71.5)
Born in other districts of the state of enumeration	44,108	3,935
	(12.3)	(12.3)
States in India beyond the state of enumeration	92,088	4,756
	(25.7)	(14.8)

From the table it is noticed that at both state and districts levels, the highest proportion of the migrants have their place of birth within the district of enumeration followed by those whose place of birth is in other state of India beyond the state of enumeration. At state and district levels the proportion of those whose place of birth is within the districts of enumeration is 58.6 % and 71.5 % respectively. The proportion of those whose place of birth is in other districts of the state of enumeration form little over 12.0 % of the total migrants at state and district level.

It is further noticed that while the district level proportion of the migrants whose place of birth is within the district of enumeration is higher than those at the State level. The State level proportion of the migrants born in other state in India beyond the state of enumeration and outside India are higher than those at district level.

Migrants classified by place of last residence - 1991

Place of last residence	MEGHALAYA	East Garo Hills
1	2	3
Total	266,844	21,915
	(100.0)	(100.0)
Elsewhere in the district of enumeration	156,563	12,667
	(58.7)	(57.8)
In other districts of the state of enumeration	26,301	4,424
	(9.9)	(20.2)
States in India beyond the state of enumeration	70,318	4,304
	(26.4)	(19.6)

Migrants classified by place of last residence - 2001

Place of last residence	MEGHALAYA	East Garo Hills
1	2	3
Total	379,192	34,214
	(100.0)	(100.0)
Elsewhere in the district of enumeration	244,916	25,826
	(64.6)	(75.5)
In other districts of the state of enumeration	41,572	4,793
	(11.0)	(14.0)
States in India beyond the state of enumeration	83,082	3,429
	(21.9)	(10.0)

Like the proportion of the migrants by place of birth, the highest proportion of the migrants by place of last residence at both state and district levels had their place of last residence elsewhere in the district of enumeration followed by the proportion of those whose place of last residence was in other States of India beyond the state of enumeration. The proportion of those whose place of last residence was in other districts of the state of enumeration constitutes 11.0 % at State level and 10.0 % at district level. The proportion of those migrants whose place of last residence was outside India from only little over 2.0 % of the total migrants at state level and a little over 0.1 % at district level.

It is further noticed that while the district level proportion of migrants who had their place of last residence elsewhere in the district of enumeration and also in other districts of the state of enumeration are higher than that at state level, the state level proportion of those migrants in other state of India beyond the state of enumeration are higher than that at district level.

Annexure – V

Religions

Religions are one of the most important social institutions. It is also one of the basic characteristics of the population. It has tremendous power to influence the cultural traits and social behaviours of a society. For this reason, it has been one of the field of interest of anthropologists, demographers, administrators and planners. To meet the various requirements of the aforesaid professionals, it has been customary in population census to collect the religion professed by the population. But since India is a secular nation where an individual can professed and practice any religion of his choice, the number of religion collected in census runs to hundreds. It is however, not feasible and practicable to present data on all religions and their denominations. Therefore, in census the population is classified by six major religions only. Those major religions are Hinduism, Islam, Christianity, Sikhism, Buddhism and Jainism. The rest of population professing and practicing religions are grouped under "Other religions and persuasion". The population who cannot or do not wish to state their religions are clubbed under "Religion not stated".

Percentage distribution by religion

Religious communities	1991				2001			
	Persons	Percentage			Persons	Percentage		
		Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8	9
East Garo Hills								
All Religions	188,830	100.0	93.6	6.4	250,582	100.0	85.7	14.3
Hindus	11,703	6.2	5.2	1.0	14,113	5.6	3.7	1.9
Muslims	1,185	0.6	0.5	0.2	3,829	1.5	0.8	0.8
Christians	152,467	80.7	75.7	5.0	222,892	88.9	77.4	11.6
Sikhs	2	0.0	0.0	0.0	41	0.0	0.0	0.0
Buddhists	33	0.0	0.0	0.0	362	0.1	0.1	0.0
Jains	18	0.0	0.0	0.0	40	0.0	0.0	0.0
Others	22,914	12.1	12.0	0.2	8,305	3.3	3.3	0.0
Religion not stated	508	0.3	0.3	0.0	1,000	0.4	0.4	0.0

From the above table, it is noticed that the majority of the population of the district are Christians. At State level, the Christians constitute 70.3 % while at district level is 89.0 %. Hindus constitute little over 13.00 % of the population at state level while at district level it constitute little over 5.0 % . The Muslim, the Buddhists, the Sikh the Jain form an insufficient percentage of the population at both state and district level,. The proportion of those populations who profess "Other religions and persuasions" gives 11.5 % and 3.3 % at state and district levels respectively.

Annexure – VI

Marital Status

Though not all the married couples can produce children, fertility is the outcome of marriage. Without marriage there cannot be fertility. Various indicators of fertility discussed at Annexure – III can be calculated only by taking into consideration the number of married female and the number of children born in the year. Therefore, it is essential and important that in every census the marital status of each and every individual irrespective of age and sex is collected. On the basis of return thus collected, the population, both male and females, is classified into four marital status. These four marital status are Never Married, Married, Widowed and Divorced/Separated.

Percentage distribution of population by marital status, 2001

Area Name	Age-group	Total		Never married		Married		Widowed		Divorced/Separated	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12
East Garo Hills	All ages	100.0	100.0	62.3	57.5	36.7	38.2	0.8	3.8	0.2	0.5
	0-9	100.0	100.0	100.0	100.0	0.0	0.0	0.0	0.0	0.0	0.0
	10-14	100.0	100.0	99.6	98.5	0.4	1.4	0.0	0.1	0.0	0.0
	15-19	100.0	100.0	97.6	85.0	2.3	14.6	0.1	0.2	0.0	0.2
	20-24	100.0	100.0	75.4	37.6	24.4	60.6	0.1	1.1	0.1	0.7
	25-29	100.0	100.0	33.1	12.7	66.5	84.7	0.2	1.8	0.2	0.8

	40-44	100.0	100.0	3.4	2.4	95.2	88.3	1.0	8.3	0.4	0.9
	45-49	100.0	100.0	3.1	2.3	95.0	84.8	1.5	12.0	0.4	1.0
	50-54	100.0	100.0	2.1	2.8	94.3	76.7	2.9	18.9	0.7	1.6
	55-59	100.0	100.0	2.6	2.9	93.9	74.2	3.0	21.5	0.5	1.4
	60-64	100.0	100.0	3.7	4.0	90.4	57.7	5.3	36.1	0.6	2.3
	65-69	100.0	100.0	3.1	4.4	88.9	50.0	7.2	42.3	0.8	3.3
	70-74	100.0	100.0	4.3	5.7	84.0	36.0	10.1	56.8	1.6	1.4
	75-79	100.0	100.0	4.6	4.8	82.1	37.4	12.1	56.5	1.2	1.4
	80+	100.0	100.0	5.1	6.5	77.2	39.8	16.3	52.8	1.3	0.9
	Age not stated	100.0	100.0	73.9	75.4	26.1	23.9	0.0	0.7	0.0	0.0
	Less than 18	100.0	100.0	99.7	98.6	0.3	1.4	0.0	0.0	0.0	0.0
	Less than 21	100.0	100.0	98.7	94.2	1.2	5.5	0.0	0.1	0.0	0.1

Note : Total will not add up to 100.00 as "Unspecified" marital status is excluded

From the above table, it is noticed that the marital status of cent percent of male and female population upto 9 years of age is "Never Married" which shows that the child marriage is not practiced in the district. The Never Married population constitute the majority of the population of both sex followed by the Married population. The widowed and Divorced/ Separated populations form a very insignificant proportion of the district.

By age group, it is noticed that the highest proportion of the married males is in the age group 45 – 49 while that of females in the age group 35 – 39 and the lowest for both males and females is in 10 – 14.It is also noticed that widowed females are more than widowed males almost in all age groups. The highest proportion of the Divorced/Separated males is in the age group 70 – 74 while that of females is in the age group 65 – 69.

Annexure – VII

Age, Sex and Education level

With a view to finding out the extent of literacy of the population, it has been a practice in census to ask of all those aged 7 and above, whether or not they are literate, that is whether or not they can both read and write with understanding in any language, besides asking about the age and sex of each individual. Those of the population who are literate, another question about their educational attainment are asked of. On the basis of the replies to those two questions, the population is classified into literate and illiterate and the literate are further classified by age and sex and educational levels.

(i) Literate without educational level.
(ii) Below Primary
(iii) Primary
(iv) Middle
(v) Matric/Secondary
(vi) Higher Secondary/Intermediate/Pre-University/Senior Secondary
(vii) Non-Technical Diploma or Certificate not equal to Degree
(viii) Technical Diploma or Certificate not equal to Degree
(ix) Graduate and above.

For the purpose of this annexure, however items (vi), (vii) and (viii) are clubbed together.

EDUCATIONAL LEVEL BY AGE AND SEX FOR POPULATION AGE 7 AND ABOVE

	Age not stated	100.0	100.0	49.2	33.3	11.1	25.9	15.9	31.5	11.1	5.6	12.7	3.7	0.0	0.0	0.0	0.0	0.0	0.0

From the table, it is noticed that the highest proportion of both the male and female literates, more than 34.0 % have 'Below Primary' as their education level followed by the proportion of those with 'Primary' and 'Middle'. Proportion of male population in 'Matric/Secondary' gives higher than that of both males and females in Middle. The literate 'Without Educational Level'. 'Higher Secondary/P.U. etc', and 'Graduate and above' could not form even 10.0% of the literates of the district.

By age, it is noticed that the highest proportion of literates both males and females are 95.3% and 96.5% respectively are found obviously among the age of 8 years in the education level of 'Below Primary'. The highest proportion in the educational level of 'Primary' is indicated in the age of 14 years, in the 'Middle' in the age of 17 years and 'Matric/Secondary' in the age group 20-24 while 'Graduate and above' in the age group 40-44.

Annexure – VIII

Mother Tongues

Though besides the mother tongue of an individual, two other languages known by an individual is collected in census, tabulation and presentation of language data is base on the mother tongue of an individual. By definition, mother tongue is a language spoken by a person's mother to the person in his childhood. If the mother died in infancy, the language mainly spoken in person's home in childhood is the mother tongue of that person. In case of infants and deaf-mutes, the language usually spoken by the mother is the mother tongue.

India is a multi-lingual nation, collection of the mother tongue of each and every individual in various censuses has thrown light on the linguistic and ethnic composition of the country as well as the states. In India there are 18 scheduled languages and 96 non-schedule languages. Even in a small state like Meghalaya more than 80 non-scheduled languages are spoken in addition to the 18 scheduled languages. However, for the purpose of this annexure, we are presenting only those biggest mother tongues arranged in descending order irrespective of the languages being scheduled or non-scheduled. The statement given below shows the percentage distribution of the numerically biggest languages arranged in descending order of the number of speakers in district

POPULATION BY MOTHER TONGUE

AREA NAME	MOTHER TONGUE	TOTAL			RURAL			URBAN
