Male and Female dancers

The costumes and jewellery worn by male and female dancers are described below :

Female

(a) Ka Jingpien Shad : A long piece of cloth which is covered from the waist till the ankle of the foot.

(b) Ka Sopti Mukmor : A full-sleeve velvet blouse decorated with a lace at the neck.

(c) Ka Dhara Rong Ksiar : This is the top:most cover on the body. Woven in golden thread it consist of two rectangular pieces. One piece cover the body from one side and is pinned on the opposite shoulder. The other piece similarly covers from the other side and overlaps the first one.

(d) U Kpieng Paila : A necklace made of red coral beads and fold foil covered beads arranged alternately.

(e) Ki Sohshkor Ksiar : Golden earrings worn specially on festive occasions.

(f) Ka Pansngiat ksiar ne Rupa : A golden or silver crown. Attached to the crown on the back of the head is a tail of very fine silver threads which reaches below the back of the dancer. Flowers are also fixed on the crown as part of head decorations.

(g) Ki Mahu : Big armlets of silver worn on both arms.

(h) Ki Khadu ne ki Syngkha : Golden bracelets worn on the wrists.

(i) U Khanapad Ksiar ne Rupa : A semi-circular plate of either gold or silver used as collar which is tied at the back of the neck with thread.

(j) U Kynjri Tabah : A silver chain worn from the neck.

(k) Ki rumal rit : Handkerchiefs in both the hands to wipe off sweat from the forehead and face during the dance.

Male

(a) Ka Jainspong Khor : A well-designed golden colour silk turban.

(b) U Shanryndang : Semi-circular plate of either gold or silver used as a collar tied at the back of the neck with thread.

(c) U Thuia : A plume about 18 inches long tucked on the turban.

(d) Ka Ryngkap : A silver quiver tied with a cord around the waist with an animal tail at its end and silver arrows inside.

(e) U Panpoh Syngkai : A Silver wire belt to cover the cord the quiver on the waist.

(f) Ka Jainboh : A maroon coloured silk cloth used as a dhoti.

(g) U Symphiah : A whisk.

(h) Ka Waitlam : A sword.

(i) Ka Rumal : A handkerchief.

Annexures and their write-up

Annexure-I : Number of Villages under each Gram Panchayat 463

Annexure-II : Note on Fertility, Mortality and Migration, 1991 Census 463

Annexure-III : Various measures of Fertility and mean age at marriage, 1991 Census 463

Annexure-IV : Percentage distribution of Migrants by place of birth/place of last residence,1991 Census 464

Annexure-V : Brief account of Main Religions in the District as per 1991 Census 465

Annexure-VI : Marital status of population as per 1991 Census 466

Annexure-VII : Age, Sex and Educational level in the district, 1991 Census 468

Annexure-VIII : Distribution of different Mother Tongues returned in 1991 Census 469

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic

amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N.K. Laskar, Director of Census Operations, Meghalaya. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. It is also the only publication that presents census data at village level in rural areas and ward level in urban areas. It is also the only publication that presents non-census data in the form of Village Directory and Town Directory at village level and town level respectively. Here, lies the usefulness of the Handbook for micro and grassroot level planning for rural development. Therefore for administrators, planners, research scholars and other data users the Handbook is a sine qua non.

Though Census is a central subject, it is being conducted by the administrative machinery of the State Government under the technical guidance of the Director of Census Operations. It is the State Government who appoints the hierarchy of Census Officers from the rank of Deputy Commissioner of a district designated as Principal Census Officer down to Primary School Teachers and other low rank government employees designated as Enumerators. It is this team of Census Officers who actually conduct the Census Operations. I am, therefore, very grateful to the Government of Meghalaya with special reference to Shri. J. Tayeng, IAS Chief Secretary to the Government of Meghalaya, Shri A. Som, IAS, Secretary, General Administration Department and a hosts of other officers who have made the entire district administrative machinery available to the Census Organization.

I am also grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India, Shri S.P. Sharma, Consultant and other officers in the O/o, The Registrar General of India, for their timely advice and prompt co-operation whenever needed.

In this office I am grateful to Shri. B.L. Sharma, Dy. Director of Census Operations, Shri S. K. Baruah, Asstt Director of Census Operations, Shri A. Roy Choudhury, Asstt. Director of Census Operations, (Technical, Shri B. Marbaniang, SI-I, Shri L. R. Lyngdoh SI-I, Shri C.D. Sangma, SI-II and other officials without whose hard, sincere and painstaking labour and toil the conduct of the 2001 Census would not have been a success.

N.K. Laskar

Director of Census Operations,

Meghalaya, Shillong

District Highlight

1. The East Khasi Hills district has the lowest decadal growth rate of the population during 1991-2001 among the districts of Meghalaya.
2. The East Khasi Hills district is the most populous district of Meghalaya though by area it ranks fourth among the districts.
3. The East Khasi Hills district is the most densely populated district of Meghalaya.
4. The East Khasi Hills district is the most urbanised district of Meghalaya.
5. The East Khasi Hills district has the second highest sex ratio among the districts of Meghalaya.
6. The East Khasi Hills district has the third highest sex ratio of the population in the 0-6 age-group among the districts of Meghalaya.
7. The East Khasi Hills district along with Ri-Bhoi has the second highest sex ratio of the scheduled caste population and the highest sex ratio of the scheduled tribe population among the districts of Meghalaya.
8. The East Khasi Hills district has the highest percentage of the scheduled caste population and ranks sixth in terms of percentage of the scheduled tribe population among the districts of Meghalaya.
9. The East Khasi Hills district has the highest literacy rate of both males and females among the districts of Meghalaya.
10. The East Khasi Hills district has the lowest work participation rate among the districts of Meghalaya.
11. The East Khasi Hills district has the highest percentage of non-workers among the districts of Meghalaya.
12. The East Khasi Hills district has the lowest percentage of cultivators to the total workers among the districts of Meghalaya.
13. The East Khasi Hills district ranks fifth in terms of percentage of the agricultural labourers to the total workers and has along with West Khasi Hills the lowest proportion of the workers in household industry to the total workers among the districts of Meghalaya.
14. The East Khasi Hills district has the highest percentage of other workers to the total workers among the district of Meghalaya.
15. The East Khasi Hills district along with the West Garo Hills district has the highest number of C.R.D. Blocks.
16. Mylliem C.R.D. Block is the most populous Block of the district and Mawkynrew is the least populated Block.
17. Mawphlang C.R.D. Block has the highest sex ratio and Mylliem, the lowest.
18. Mawphlang C.R.D. Block has the highest sex ratio in the 0-6 age-group population. and Mylliem, the lowest.

19. Shella-Bholaganj C.R.D. Block has the highest percentage of the scheduled caste population and Mawkynrew, the highest percentage of the scheduled tribe population and Mylliem, the lowest.

20. Mawryngkneng C.R.D. Block has the highest sex ratio of the scheduled caste population and Mylliem, the lowest.

21. Mawphlang has the highest sex ratio of the scheduled tribe population and Shella-Bholaganj, the lowest.

22. Mylliem C.R.D. Block has the highest literacy rate of both males and females and Mawkynrew, the lowest.

23. The female literacy rates in Mawphlang, Mawryngkneng and Mawkynrew C.R.D. Blocks are higher than those of the male.

24. Mawkynrew C.R.D. Block has the highest work participation rate and Mylliem, the lowest.

25. Mawphlang C.R.D. Block has the highest percentage of cultivators to the total workers and Mylliem, the lowest.

26. Mawsynram C.R.D. Block has the highest percentage of agricultural labourers to total workers and Pynursla, the lowest.

27. Mawsynram C.R.D. Block has the highest percentage of workers in household industry and Mawkynrew, the lowest.

28. Pynursla C.R.D. Block has the highest proportion of the other workers to the total workers and Mawphlang, the lowest.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000,
ii) At least 75 percent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of District Census Handbook

Publication of the District Census Handbook was started after the 1951 Census and has been continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State/UT Governments. It inter alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain basic amenities/ facilities in each village and town of the respective district. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The 1951 series of the District Census Handbook incorporated some basic demographic and economic information of the district at the village and town levels separately in addition to some important tables on census data.

Unlike the 1951 District Census Handbook, the 1961 District Census Handbook was made to cover village-wise and town-wise information on the availability of different amenities such as educational facilities, supply of drinking water, supply of electricity, etc. shown by means of abbreviations placed against the name of each village/town in the Primary Census Abstract itself.

In 1971 the District Census Handbook was divided into three parts. Part A contained Village and Town Directory, Part-B contained Primary Census Abstract and Part-C contained Analytical Report, Administrative Statistics and District Census Tables. Part-C was not published in many states/union territories including Meghalaya.

The scope of the 1981 District Census Handbook had been enlarged specially by inclusion of additional information on amenities like existence of kutcha/ pucca roads, distance from the nearest town, land-use data and special Primary Census Abstract for Scheduled Castes and Scheduled Tribes at C.D. Block / Town levels which was another innovation introduced in the 1981 series.

The manner of presentation of the District Census Handbook for the 1991 Census was by and large the same as followed in 1981. However, the format for presenting data in Primary Census Abstract had been restructured slightly in the 1991 Census by incorporating nine-fold Industrial Classifications of main workers against four-fold Industrial Classifications presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was presented in the Primary Census Abstract for the first time.

The scope of the 2001 District Census Handbook has been enlarged by incorporating nine appendices to Section-I of Part-A against four in the 1991 District Census Handbook. Those additional appendices display the list of villages by number of Primary, Middle and Secondary Schools, the list of villages with different sources of drinking water facilities available, the list of villages with 5000 and above population which do not have one or more basic amenities, the list of census towns which do not have one or more amenities, summary showing the number of villages having or not having Scheduled Castes/Tribes population, C.D. Block wise number of villages under each Gram Panchayat and statement showing the number of girls' school in the villages. Analysis of data of the 1991 census on fertility, mortality, migration, religions, marital status, languages, etc. have also been included as annexures to the Primary Census Abstract.

(ii) Brief History of the District

Origin of the name

When the Jaintia Kingdom was annexed by the British in 1835, the hill tracts (co-extensive with the present Jaintia Hills district) was placed under one administration with the Khasi Hills and a district known as the United Khasi and Jaintia Hills came into being.

After the Jaintia uprising of 1860-62, Jaintia Hills was made a subdivision known as Jowai subdivision with its headquarters at Jowai and a European Subdivisional Officer (Civil) posted there. The arrangement continued even after the state of Meghalaya was born on 21-01-1972. However exactly one month after Meghalaya's birth, Jowai subdivision of the United Khasi and Jaintia Hills district was upgraded into a district from 22-02-1972 vide Notification No. HPL. 26/71/43 dated 21/02/1972. The Shillong subdivision of the United Khasi and Jaintia Hills was known with effect from 22/02/1972 as Khasi Hills district and continued to be known by that name until 28/10/1976 when from that date vide Notification No. 49/76/171 dated 12/10/1976, the Nongstoin subdivision was upgraded into a district and came to be known as the West Khasi Hills district and the Shillong subdivision , as the East Khasi Hills district. Though the Nongpoh subdivision of the East Khasi Hills district was upgraded into a district with effect from 04/06/1992 vide Notification No. HPL. 139/89/109 dated 04/06/1992, the district retained its third name of East Khasi Hills district. Here we are however concerned only about the origin of the name "Khasi", the original name by which the district had been known for more than a century.

The district derives its name from the Khasi tribe, the inhabitants of the highlands of the Shillong subdivision of the undivided United Khasi and Jaintia Hills district. The word highlands is used here to differentiate those inhabitants of the northern part of the district now covered by the Ri-Bhoi district and those of the southern part who are known by the name Bhoi and War respectively. It may however be mentioned that the Bhois, the Wars, the Synteng/ Pnars, Khynriams and Lyngngams are also Khasis.

The origin of the name "Khasi" is indeed shrouded in mystery as no one has so far been able to explain the meaning of the term. Some believe that it has been derived from the Indo-Aryan word "Khas" meaning a waste or scrub land. Therefore Khasi or Khasia would mean an inhabitants of waste or scrub land. However, there are other inhabitants of waste or scrub land both in the hills and the plains and they have never been named Khasi or Khasia. The question as to why only the inhabitants of the Khasi Hills are called Khasi or Khasia is still to be answered. Pemberton states that the people called themselves "Khyee". But the term seems to be only an Assamese pronunciation of "Khasi" like "Padua" the Bengali pronunciation of Pyrdiwah, a village of the district in the border with Bangladesh which was in the news during 2001. Dalton is of the opinion that "Khasia" was the name by which the entire Khasi Tribe-the Pnars or Syntengs, the Khynriams, the Bhois, the Wars, the Lyngngams-was known to the people of plains.

History

Owing to absence of written records, nothing is known about the past history of the Khasi people and the history of the composite Khasi Hills district – the Jaintia Hills, the East Khasi Hills, the West Khasi Hills and the Ri-Bhoi – which today is locally known as the "Bri U Hynniew Trep" – Land of the Seven Huts. How the Khasis had come to those beautiful hills and from where they had come still remains a mystery. Scholars and researchers have attempted to find out the origin of the Khasi races and how they had come to settle in those hills. But their findings have been only conjectures without satisfactory answers. The Khasis have their own legend about how they came to settle in these beautiful hills. They believe they had descended from heaven by a ladder set on the peak of "U Lum Sohpetbneng" located by the side of the present "Umiam Dam". They say they consisted "Khadriew Trep" "Sixteen Huts" or sixteen households all of which lived in heaven, but they used to come down to earth through that ladder. However suddenly that ladder snapped and nine huts or households remained in heaven and seven on earth. It is from the Sohpetbneng that the Khasis spread to other parts of the composite Khasi Hills district. Till today the Khasis believe that their present abode was a heavenly gift handed over to them by God.

Before the advent of the British, the area comprising the Khasi Hills, including the Jaintia Hills, was divided into 30 "Himas or Chieftainships". The Khasi term for the entire territory is " Ka Ri Laiphewsyiem, Ka Ri Khatar Doloi"- the land of 30 (thirty) Kings or Chieftains and 12 (twelve) Dolois. Those are:

1. Sutnga
3. Mylliem

2.	Khyrim	4.	Maharam
5.	Nongkhlaw	18.	Myriaw
6.	Nongstoin	19.	Rambrai
7.	Sohra	20.	Mawiang
8.	Nongspung	21.	Bhowal
9.	Langrin	22.	Malaisohmat
10.	Muliang	23.	Nobosohphoh
11.	Sohbar	24.	Jirang
12.	Mawphlang	25.	Nongpoh
13.	Sohiong	26.	Mawdon
14.	Lyngiong	27.	DwaraNongtyrnem
15.	Mawlong	28.	Nonglwai
16.	Wahlong	29.	Pamsangut
17.	Mawsynram	30.	Shella

Of the Khasi Chieftains within the Composite Khasi Hills district excluding Jaintia Hills, the Hima of Shyllong comprising Mylliem and Khyrim finds mention in the Chronicles of the Koches and is referred to as "Khairam". A King of Khyrim is mentioned in those Chronicles as having made a submission to Sukladhvaj, nicknamed Chilarai, during the reign of the Koch King, Nar Narayan, about the middle of the 16th Century. About 1708 A.D. the Khyrim Chiefs apparently went to the aid of the Jaintias against the Ahoms who had taken the Jaintia King captive.

For the past history of the Khasis we are obliged to be content with legends and circumstantial evidence. However something is certain that the various Chieftains of the composite Khasi Hills have never been subjugated to outside force until they were all subjugated by the British in 1839. Though the British got possession of Sylhet in 1765 and Assam through the Treaty of Yandaboo signed on 24/02/1826, the Khasi Hills was still left untouched. As will be seen later the British subjugated the Khasi Chieftains not by might but by deceit and treachery. In November, 1826, David Scot, the Agent of the Governor General of the East India Company, reached Nongkhlaw. He went to the house of Tirot Singh, Syiem of Nongkhlaw, at Mairang requesting him to allow him (Scot) to construct a road through the latter's Kingdom (Hima) connecting Assam and Sylhet. In turn he (David Scot) would help Tirot Singh to regain possession of a portion of duars which he had held before the advent of the British. Tirot Singh immediately convened a meeting of his council (Durbar Hima). After two days of deliberation, it was agreed to allow David Scot to construct a road via Hima Nongkhlaw.

When in 1828, Balaram Singh, the Rajah of Ranee, the principal rival of Tirot Sing in the plain disputed the latter's claim to duars, the British instead of helping Tirot Singh as per the provisions of the Treaty, prevented him from marching to duars to regain that area. It was only now that he realized how deceitful and treacherous were the British. On 4/4/1829, when Tirot Singh failed to lay his hand on David Scot, he vented his wrath on two British Officers. Military Operations were immediately started against Tirot Singh and other Khasi Chiefs who were believed to have supported him with the sole purpose of driving out the strangers from the hills. But the British army being armed with guns, and the Khasis only with shields, swords, bows and arrows, the former was in a superior position. The Khasis were therefore forced to resort to guerilla warfare which dragged on for about four years. Maharam was the last to surrender in 1839. With its divide and rule policy of the British, the Khasi Hills was divided and placed under the following administrations:-

1. **State Areas**

   These areas were administered as per the peace treaty and placed under a political Agent

2. **Non-State Areas (British Areas)**

   These areas were placed under a Deputy Commissioner.

After Independence the Federation of the Khasi States (Hima Khasi), 25 in number, agreed to join India by signing the Instrument of Accession which has never been fully implemented by the Government of India till date.

(iii) Administrative set up

The East Khasi Hills district is situated in the south-central part of Meghalaya having a common

Source : 1. District Gazetteer, Khasi Hills, 1991 2. Ka History Ka Ri Hynniew trep, I Nongbri, Vol. I Ed. 1992.

border with Bangladesh in the south. The district comprises of two Civil subdivision, the Shillong Sadar Subdivision with headquarters as Shillong and the Sohra Subdivision with headquarters at Sohra (Cherrapunjee). The district has seven Community and Rural Development Blocks.The name of the Blocks and their respective headquarters are given below :

	Name of C.R.D. Blocks	Headquarters
1.	Mawphlang	Mawphlang
2.	Mylliem	5th Mile Upper Shillong.
3.	Mawryngkneng	Mawryngkneng
4.	Mawkynrew	Mawkynrew
5.	Pynursla	Pynursla
6.	Shella-Bholaganj	Sohra (Cherrapunjee)
7.	Mawsynram	Mawsynram

After the Census of India 1991 the Ri-Bhoi Civil subdivision of the district was by a Notification No. HPL. 139/89/109 dated 04/06/1992 upgraded into a district. The newly carved out district comprised of two C & R.D. Blocks, Umsning and Umling.

The district has 8 towns, the name of which along with their respective civic status is given below:

Sl_No	Name of Town	Civic/Status
1.	Shillong	Municipality
2.	Mawlai	Census Town
3.	Pynthorumkhrah	-do-
4.	Nongmynsong	-do-
5.	Nongthymmai	-do-
6.	Madanrting	-do-
7.	Shillong Cantonment	Cantonment Board
8.	Sohra (Cherrapunjee)	Census Town

In the Census of India 2001, the district has 962 villages out of which 42 are uninhabited.

Urban Local Bodies

Shillong is the only town in the district with the civic status of a municipality which was constituted on 15/11/1910 under the Bengal Municipal Act, 1884. The municipality then comprised of ten wards. The Act provided for the election of ward members and the first popular election was held on 23/06/1921. The Bengal Municipal Act, 1884 was replaced by the Assam Municipal Act, 1923 and in 1931 the Government of Assam divided the Shillong Municipality into twelve wards. That number of wards continued till 1974 when the wards were constituted on population basis that gave births to 27 wards.

The Shillong Municipal Administration functioned only irregularly and often the Government had to suspend the civic body for various reasons. The main one being its failure to manage the affair of the Municipality efficiently. The last election was held in 1966 and from 1972 onwards the affairs of Municipal Board have been managed by an Executive Officer appointed by the Government. On the Courts Order, the Government in 2001 made an attempt to hold election to the Board. But due to its being boycotted by the prospective tribal candidates, there was no election. Only one non-tribal candidate was declared elected unopposed. Hence everything was back to square one.

District Council

The Sixth Schedule to the Constitution of India provides for the creation of a District Council in each autonomous district of Assam. On 27/06/1952, the United Khasi and Jaintia Hills Autonomous District Council came into being. The Jaintia Hills or the Jowai subdivision as it was known then was represented by six members in the 24 member Council. In 1957, however, a section of the public began to press their case for the establishment of a separate District Council for Jaintia Hills for administrative convenience. On the recommendation of the Commission set up to enquire into the matter, the Government of Assam in 1964 issued a Notification for the creation of a separate District Council for the Jaintia Hills known as Jaintia Hills Autonomous District Council (JHADC) and the first District Council formed in 1952 renamed as Khasi Hills Autonomous District Council (KHADC).

It was envisaged that the District Council should consist of 24 members out of whom 18 were to be elected on the basis of adult suffrage and six to be nominated by the Governor. The tribals were, however, against having nominated members to the District Council. Owing to agitation by the tribals, all the 24 seats were by the United Khasi and Jaintia

Hills District Council (Second Amendment) Act, 1957 thrown open for election from 1957. From 1972 the members of the District Council were by the Assam Reorganisation (Meghalaya) Act, 1969 raised to 30 out of whom 29 were to be elected and one nominated by the Governor. The normal term of the District Council is five years.

Under the Autonomous District Council Rules, 1951, the members elect a Chairman to preside over the meeting of the Council. The members also elect a Deputy Chairman to preside over the meeting of the members during the absence of the Chairman. The same Rules provide for constitution of an Executive Committee headed by the Chief Executive Member elected by the Council. The Executive Members, 4 in number, are however, appointed by the Governor on the advice of the Chief Executive Member.

Power and Functions

The powers and functions of the district Council are mainly (1) Legislative (2) Executive or Administrative (3) Financial and (4) judicial.

Legislative Powers : The District Council has the power to make law on the allotment, occupation and use of land, regulation of Jhumming (Shifting Cultivation), management and control of forests under the Council, use of water source for agriculture, establishment of Town Committee, matters connected with the administration of village police, appointment and succession of Chief (Syiem) and headmen, inheritance of property, marriage and divorce, preservation of social customs, regulation of money-lending and trade by persons who are not members of the Scheduled Tribes.

Executive Powers : The District council has the powers to establish and manage primary schools, dispensaries, markets, cattle-pounds (the powers to establish and manage primary schools have since been withdrawn. All schools are being managed by the State Government).

Financial Powers : The District Council has the powers to assess and collect land revenue, to levy house-tax as well as taxes on professions, trades and callings. It can impose taxes on road transport.

Judicial Powers : For administration of Justice the District Council had set up three classes of courts: (a) The District Council Court and the Subordinate District Council Courts (b) The Additional Subordinate District Council Courts and (c) The Village Courts.

For the Courts at (a) and (b) above, the District Council appoints such officers as are necessary. Those Courts try suits and cases between parties all of whom are Scheduled Tribes.

The Additional Subordinate District Council Courts have Jurisdiction only over particular Chieftainships. The Chiefs are empowered to appoint such staff as are deemed necessary.

The District Council Court is the Court of Appeal in respect of all cases tried by the lower Courts, including those of the Khasi Chiefs. No other Court, except the High Court and Supreme Court, can try those Cases.

Theoretically, the District Council has the power to make rules and regulations on the constitution of Village Councils or Village Courts and the powers to be exercised by them but so far it is the Governor who has been authorised to make those rules and regulations.

Functions of Village Durbar (Dorbar Snong)

There are at present no Village Council as contemplated under para 4 (40) (a) of the Sixth Schedule to the Constitution of India in the Khasi Hills Autonomous District Council areas that at present covers three districts, East Khasi Hills, West Khasi Hills and Ri-Bhoi. There have, however, always been the Dorbar Snong or Village Durbars which customarily exercise all such functions as would contribute to the general well being of the village. Enforcement of law and order has always been foremost among the various duties of the Dorbar Snong. With this object in view the Durbar has the power to order any individual or household to leave the village if presence of such individual or household is found to disturb the peace of the village and its inhabitants.

The Durbar lay down the policy for the conduct of village affairs and make rules in accordance with local usages which the village has to observe and follow. The Durbar has the responsibility to look after common properties, if any, such as grazing land and

common forests (law shnong), Some of the bigger villages may entrust those and other responsibilities to the executive committee presided over by the Headman in each case.

The municipal functions of the Village Durbar include maintenance and upkeep of village roads and paths, sources of drinking water and general sanitation including cleanliness. These are generally carried out by the entire village on self-help basis as often as necessary during the year. The village Durbar still adjudicates disputes between parties in those villages where Village Courts have not yet been set up as defined in the Sixth Schedule to the Constitution of India.

Source of income

The District Council derives its income from various sources such as taxes on professions, trades and callings, market taxes, royalties on timber and other forest resources as well as grant-in-aid and loan subsidies from the state Government, The District Council has a share of 5% on taxes on vehicle.

Syiemship (Chieftainships)

As stated earlier, the Khasi Hills district, which at present comprised of three districts, East Khasi, West Khasi and Ri-Bhoi, are divided into 25 Chieftainships. Sixteen of them are syiemships, three are Lyngdohships or Priest-Chiefs and five are Sirdarships and one is Wahadarship. Those Chieftains were described by the British as oligarchical States most of which were united in a loose confederacy before their (British) comming. The Khasi Chiefs have never exercised powers of the Rajas or Nawabs in other part of India. The Syiems and other Chiefs can function only as part of the "Dorbar Hima" (State Durbars) or Councils which includes Counsellors (Myntries and others) nominated from leading clan within a State. The Chiefs take decisions in the name of the Council. The Chiefs do not have any automatic right to any part of land within their territories. Land is very much in the hands of the people living in villages with the exception such lands as the "Ri Kynti" which belong to certain family by acquisition. The Syiems (Chiefs) in Council tries all cases sent up for trials and decisions are usually based on Customary Laws. Legal training in the modern sense is, therefore, not called for. Even today when the old Khasi States have lost their semi-independent status and are normally administered territories under the District Council, this practice continues although the Chief-in-Council functions as Additional Subordinate District Courts. Appeals from these Courts lie to the District Council Court whose judges are persons trained in laws.

The 25 Chieftainships that are still in existence in the three districts of East Khasi Hills, West Khasi Hills and Ri Bhoi are given below :

I. Hima Syiem:

1. Khyrim
2. Mylliem
3. Maharam
4. Nongkhlaw,
5. Nongstoin,
6. Sohra
7. Nongspung
8. Langrin
9. Mawsynram
10. Myriaw
11. Rambrai
12. Mawiang
13. Bhowal
14. Malaisolmat
15. Nobosohphoh
16. Jirang.

II. Hima Lyngdoh:

1. Sohiong
2. Mawphlang
3. Lyngiong

III. Hima Sordar:

1. Mawlong
2. Mawdon
3. Dwara Nongtyrnem
4. Nonglwai
5. Pamsanngut.

IV. Hima Wahadar:

1. Shella.

Physical Features

Location and Size

The East Khasi Hills district as it exists on 01/

03/2001 is located approximately between 25 ° 07' and 25 ° 40' N latitude and 92 ° 21' and 92 ° 16' E longitude. It is bounded in the east by Jaintia Hills district, in the north by Ri-Bhoi and West Khasi Hills districts, in the west by West Khasi Hills district and in the south by Bangladesh. It has an area of 2820 square kilometers and occupies 12.57 percent of the total area of the State. It ranks 4th among the districts of Meghalaya in term of area. It extends in the southwest-northeast direction.

Physiography

The present East Khasi Hills district has only one regional division, the Shillong Plateau Region. The region is dominated by rugged landscapes and hills with an average altitude of 1000 meters above mean sea level. The Shillong Peak, situated south of Shillong and which lies in the northern part of the region, at 1963 meters above mean sea level, is the highest spot of the district. The rivers Umngot, Umkhen, Umiam Khwan, Umiam Mawphlang rise from the area around the Shillong Peak. The southern belt of the region has a steep slope towards Bangladesh in the south. The Plateau itself is standing as watershed between the Brahmaputra Valley in the north and the Surma Valley of Bangladesh in the south. Geologically the region is mainly underlain by the Shillong group of rocks. Other groups appear in patches in the eastern and southern belt of the region. The southern part of the region is very rich in mineral deposits. Limestone, coal, copper, etc, are among the important minerals found in the region. Other rocks like gneiss with old inliers, Khasi group, Axial group, granite, Sylhet traps, Surma Series, Jaintia Series, etc are also found in patches. The soil of the region can be classified into (1) Laterite soils (2) Red Loamy soils and (3) Red and Yellow soils, Laterite soils occur in the northern part of the region and red and loamy soils, in the central belt. Red and Yellow soils occur in the southern belt. In modern classification, the soils of the region can be classified into (1) Ustalfs-Ochrepts-Orthents (2) Udalfs-Ochhrepts and (3) Udalfs-Ochrepts-Fluvents-Orthents.

Drainage

The drainage pattern of the region represents a most spectacular feature, revealing extra-ordinary straight course of the rivers and streams evidently along joints and faults. The magnificent gorges scooped by the rivers in the southern belt of the region are the result of massive headward erosions. Because of the topography of the region with higher range running from east to west the principal rivers flow in north and south directions. The main rivers that flow towards the north are Umkhen and Umiam-Khwan. Those which flow towards the south are Umngot and Umiam Mawphlang.

The terrain of East Khasi Hills lends itself to formation of magnificent Waterfalls. In Shillong itself and its surrounding areas we have the following Waterfalls which are the main tourist attractions:

(1) Kshaid Umshyrpi or Beadon Falls.
(2) Kshaid Sunapani or Bishop's Falls.
(3) Kshaid Umdiengpun or Elephant Falls.
(4) Kshaid Thwei Tdem or Sweet Falls
(5) Kshaid Wei-Ka-Lair or Spread Eagle Falls.

In the areas around Sohra (Cherrapunjee) we have the following important waterfalls:

(1) Kshaid Nohsngithiang or Mawsmai Falls
(2) Kshaid Noh-Ka- Likai or Noh-Ka-Likai Falls.
(3) Kshaid Dain-Thlen or Dainthlen Falls.
(4) Kshaid Kynrem or Kynrem Falls.

Because of the hilly terrain, there are no natural lakes of appreciable size in the East Khasi Hills. There is only one man-made lake known as Ward's Lake (Nan Palok to the Khasis) which was constructed in 1893-94 during the Chief Commissionership of Sir William Ward. The lake with its beautiful park is situated in the heart of Shillong, the district and state headquarters. It has a small surface area which permits limited boating facilities. It attracts visitors throughout the year.

Climate

Because of the considerable variations in altitude, differences in climatic condition within the East Khasi Hills district can be expected. The low-lying hills and foothills in the south may be as low as 50 m above mean sea level, while the Shillong Plateau in the north may attain a height of 1900 m and above. The former has a largely tropical type of climate, with hot and humid summer and pleasantly warm winter. The high hills generally enjoy a salubrious climate almost throughout the year. The hottest months are May-

August and the coldest, December-February. The average maximum temperature for Shillong in 1997 was around 20.4° C and the minimum about 12.4° C.

In that year the highest temperature was recorded in August, at 24.5°C and the minimum in January, at 4.8° C. The average maximum temperature at Sohra (Cherrapunjee), another town of the district were record is available, was 20.6° C and the minimum 13.8° C. Unlike Shillong, the highest temperature was recorded in the month of May, at 23.1° C, and like Shillong the minimum temperature was recorded in the month of January, at 6.3° C. Depending on the months it blows, the wind can be either mild or cold but never hot. The wind usually blows from south to north and its speed is quite high during February-march. The district is also vulnerable to cyclone that blows from the Bay of Bengal.

Rainfall is recorded in only three centres of the district, Shillong, Sohra (Cherrapunjee) and Mawsynram. The average annual rainfall recorded in those Centres during 1994 to 1998 is given below:

Sl. No	Centre	Year				
		1994	1995	1996	1997	1998
		(in mm)				
1	Shillong	1,671	2,319	1,953	2,108	NA
2	Sohra (Cherrapunjee)	11,194	14,198	12,989	8,993	NA
3	Mawsynram	10,940	13,832	2,850	9,850	16,720

N.A : Not available

Rainy season in the district is during June-September with les intensity during May and September. The average minimum rainfall can be from 0 mm to 5 mm. Rainfall has a great influence on the weather condition of the district. Depending on the duration of the rain the temperature can be to a great extent reduced.

Natural Economic Resources

Forestry

The district is rich in forest resources and they constitute the major source of revenue of the district and a source of income to its people. Prior to the ban imposed by the Supreme Court of India during the last part of the nineties, quite a good number of people were involved in timber trade. The major forest produce of the district are plywood, salwood, timber and firewood. The minor produces are bamboo, cane, resin, broom, tezpata, etc.

There are three classes of forests in the district

(I) The State Reserved Forests,
(II) The State Protected Forests and
(III) The Unclassified Forests.

State Reserved Forests : There is only one State Reserved Forests in the district known as the Riat Khwan Reserved Forests with an area of 3.91 square kilometers.

State Protected Forests : The State protected Forests are found in areas around Shillong, the district headquarters, and cover an area of 11.77 square kilometers.

Unclassified Forests: These Forests are under the management of the District Council.No survey so far has been conducted to determine the acreage of the areas under these forests.

Mineral and Mining

The East Khasi Hills district is endowed with a number of economically important minerals. The major ones being limestone, coal and clay.

Limestone : An extensive belt of good quality limestone occurs along the southern belt of the district bordering Bangladesh. The total estimated reserves of limestone is placed at 2400 million tones. The mineral was worked privately in the past primarily for lime burning. Subsequently it was also mined for supply to Bangladesh by riverine routes under forest permits. With a view to exploiting those resources more systematically two quarries, (a) The Kommorah Limestone Quarry and (b) The Mawmluh-Cherra Limestone Quarry were set up in 1938 and 1969 respectively. The former used to supply limestone to the Chatak Cement Factory in Sylhet (now in Bangladesh). By the India-Bangla Agreement of 1971, it resumed supply of limestone to the same factory. The latter supplies limestone to the Mawmluh-Cherra Cements Ltd, a Government of Meghalaya Undertaking. During 2000-01, production of limestone in the district was 410.6 thousand metric tone.

Coal : The next important mineral is coal which is confined to the Tertiary Formation. The total estimated reserve of coal is of the order of 163 million tones. However coal mining industries which experience a boom in the sixties had drastically declined in the nineties. During 2000-01 production of coal in the district was only 5.3 thousand metric tone.

Clay : It occurs in Cherrapunjee areas. The estimated reserve of this mineral is about 2.2 million metric tones. The Mawmluh-Cherra Cement Ltd holds two mining leases. Production is maintained according to the demand of the Cement Factory at Mawmluh.

Other Minerals : The district is also rich in other minerals such as china-clay, silica, base metals, corundum, quartz, feldspar and iron ore. There are also varieties of building and decorative stones such as sandstone, granite, gneiss, quartzite, etc. Sandstone has been widely used for building purposes from time immemorial. Various types of granite are processed and polished for producing slabs, titles and blocks for decorative and ornamental works.

Soil and cropping pattern

The soil of the district is light to heavy in texture ranging from acidic soil to soil rich in organic matter though generally poor in phosphorus. Potash content varies from medium to high. Red soils are commonly found in the central and submontane regions while black and red loam occurs in the low lying hills of the border areas. Light and medium soil is suitable for growing of fruit trees and rice. Light soil is also suitable for growing of potato, maize and medium soil for growing of temperate fruit trees. Heavy soil is suitable for growing of rice, pulse and mustard. The principal crops grown in the district are rice, maize, millet, potato, sweet potato, cabbage, cauliflower, etc. Owing to climate condition in the district the area sown more than once is limited to low lying area bordering Bangladesh. In certain area of the plateau, however, potato is planted alternately with rice.

Land and land use pattern

The land use pattern in the district during 1998-99 is as follows :

Reporting Area-		2,75,200	Hectares
1.	Forest-	1,06,252	"
2.	Not available for cultivation	47,056	"
3.	Other uncultivated land excluding fallow land	80,416	"
4.	Fallow land	10,738	"
5.	Net area shown	30,738	"
6.	Areas shown more than once	7,753	"
7.	Total cropped area	38,491	"

Tenancy: Tenancy or land tenure system prevailing in most of the East Khasi Hills which is governed by a number of Khasi customary laws is peculiar. Two types of land are most commonly found in the district. These are (i) Ri-Kynti ownership of which vests in particular clans. And (ii) Ri Raid which belongs to particular villages and which no one has absolute right of ownership. Usually land that remains uncultivated for over 3 years reverts to the village. the clan and the holders thereof have the right to erect boundary stones to demarcate their respective lots.

The various types of land in the district are given below:

1. Ri Raid or Community Land : No persons has proprietary heritage or transferable right over such land. He has only the right of use and occupancy. Such rights revert to the community when a person ceases to occupy or use the land for a period of three years or more. The only way in which a person can inherit land or obtain transferable right over such land is by making permanent improvements on the land. But these rights lapse if he abandons the land over a long period. Ri Raid land comprises of many sub-classes among which are the followings :

(a) **Ri Bam Syiem :** That part of Raid Land set apart for maternal relatives of a ruling Chief.

(b) **Ri Law Kyntang, Law Lyngdoh, Ri Law Niam:** These are forests in Raid Lands set apart for religious purposes, managed and controlled by the Raid or the village or in the case of theRi Law Lyngdoh by the Lyngdoh (Priest)of the community.

(c) **Ri Law Adong, Ri Law Sang, Ri Law Shnong :** These are village forests reserved by the villagers as water catchment areas,or to enable members of the village or Raid to get firewood or timber for their personal needs or for any such purposes as the village or Raid dorbar may decide from time to time.

(d) **Ri Shnong :** Raid land forming part of the village and which the inhabitants of that village can make use of.

(e) **Ri Umsnam :** Raid Land which an elaka won in the old days by the sword.

(f) **Ri Aitimon Sngewbha :** Land gifted by private landowner to the community for public use.

The management and control of Ri Raid land belongs to the community which may be a village, a group of villages, or Syiemship, or a Sirdarship. Every member of the community has the right of use and occupancy of the Ri Raid Land without payment of land revenue. A member cannot claim more land than the area he can actually occupy or actively make use of.

2. Ri Kynti Land : It is a private land acquired by a particular clan. This clan then has proprietary, heritable or transferable right over such land. Such land may also include any apart of Raid Land which in earlier times was given to a person, a family or a clan for certain services rendered to a particular community.

Like the Ri Raid Land, Ri Kynti Land comprises many sub-classes a few of which are described below:

(a) **Ri Kur :** It is a Ri Kynti Land which has not yet been divided among different branch of a clan or among different families of a branches of the clan. This land is apportional by a dorbar Kur (Clan Council) or Dorbar Kpoh (Council of a branch of the clan) as the case may be.

(b) **Ri Nongtymmen :** It is a Ri Kynti Land which has descended from generation usually after two or three generations. This land is divisible or apportionable by a dorbar of the clan or by a branch of the clan if already divided among the several branches thereof. The head of the family i.e. the mother may also divide this land among her children, usually daughters.The di vision or apportionment is resorted to when the clan or the branch of the clan, or the family of the branch as the case may be has in creased in number and desires for the sake of peace and harmony to avoid future disputesor litiga tions or if the clan, branch of the clanor family of the branch falls upon hardship or for some other reasons would make such division both admissible and desirable.

(c) **Ri Maw (Lit "Stone Land") :** It is a Ri Kynti land acquired by right of purchase or by right of apportionment among the members of the family or of the clan and the holders thereof have the right to erect boundary stones to demarcate their respective lots.

Ri Seng : It is a Ri Kynti land acquired from ancient time by a number of different clans or families and has not been divided. Income from this land is divided among the households of the clans or families holding it. The management of Ri Seng is in the hands of the representative elected by members of all owning clans or families. The executive are generally the president and the secretary. In certain elakas such land may also devolve on male descendants when the clan or families have become extinct, that is, when their female relations have died leaving no female issues.

Ri Dakhol : It is a land over which a person has obtained Ri Kynti rights by right of occupation and making permanent improvements thereon by right of purchase or winning a court case.

Ri Shyieng : It is a portion of Ri Kur specially allotted to Ka Khadduh (youngest daughter) of a clan or a family to enable her to meet the expenses connected with the performance of religious rites and ceremonies concerning the clan, kpoh or family, like depositing of the ashes of the dead in the cairns of the clan. Such land is generally given to Ka Khadduh as an additional share.

(g) **Ri Lyngdoh :** It is a Ri Kynti of the Lyngdoh or priest clan of a particular native State.

(h) **Ri Syiem :** It is a Ri Kynti of the Syiem's clan. In some Syiemships, it can be Raid Land set apart for maintenance of the Syiem clan.

(i) **Ri Iapduh :** It is a Ri Kynti of a clan or a family which has become extinct. Such lands according to the time-honoured custom reverts to the chief who is immune from a curse on that family but who will keep it for the Elaka as Ri Raid, or as Ri Bam Syiem for the family of a ruling chief, or it may escheat directly to a Raid wherein it is situated and become a Ri Raid.

Agriculture : Agriculture is the mainstay of the rural folks of the district. In urban areas, however, agriculture is not the main source of livelihood of the urban population. For in urban areas less than 1.0 percent of the total workers are engaged as cultivators and less than 1.0 percent as agricultural labourers. In rural areas too not cent per cent of the total workers are engaged in cultivation. As can be seen hereinafter,

* *Source: Report of the Land Reforms Commission.*

a little over 36.0 percent only of the total workers work as cultivators and another a little over 20.0 percent, as agricultural labourers. The rest are engaged in non-agricultural activities. Pressure on land due to unabated rise in population has forced the workers to shift from agricultural related activities to non-agricultural ones.

The principal crops cultivated in the district, the area in hectare under each crops, production in matric tone and yield in Kg/hectare during 2000-01 are given below:

Sl-No.	Name of Crops	Area	Production	Yield
1	2	3	4	5
I	**Cereals**			
	1. Rice	5,484	10,357	1,889
	2. Maize	1,940	3,443	1,775
	3. Small Millet	459	487	1,061
II	**Pulses**			
	1. Other Rabi Pulses	221	165	747
III	**Oil Seeds**			
	1. Sesamum	39	18	462
	2. Mustard	62	34	548
	3. Soyabean	190	163	858
IV	**Fruits Crops**			
	1. Pineapple	818	6,674	8,159
	2. Citrus fruit	4,375	19,383	4,430
	3. Banana	672	9,122	13,575
	4. Papaya	74	559	7,554
V	**Tuber Crops**			
	1. Potato	10,829	94,429	8,720
	2. Sweet	892	3,449	3,867
	3. Tapioca	395	2,171	5,496
VI	**Spice Crops**			
	1. Ginger	415	3,458	8,333
	2. Turmeric			
	(i) Green	61	389	6,377
	(ii) Dry	61	97	1,590
	3. Chillies	94	59	628
VII	**Plantation**			
	1. Arcanut	4,602	4,524	983

Source : Directorate of Agriculture, Meghalaya.

Irrigation : Irrigation has so far played only a minimal role in the agricultural development of the district. The topography of the district makes alignment and construction of channels difficult and costly. Even where the lay of the land is favourable, irrigation is confined only to areas bordering major rivers and streams. The cultivators, therefore, have to depend on rainfalls to irrigate their land which seldom fail them.

Animal Husbandry : Rearing of livestock, though popular, is only a subsidiary occupation of the rural people of the district. In terms of number, poultry takes the first place followed by cattle, pigs and goats. In terms of economic value, cattle are the most important. According to the 16th Quinquinial Livestock and Poultry Census, 1997, the number of Livestock Poultry and Fowls in the district is as given as follows:

1.	Buffaloes	256
2.	Cross Breed Cattle	5,758
3.	Indigenous Cattle	457,361
4.	Cross Breed Sheep	255
5.	Indigenous Sheep	5,409
6.	Goats	45,253
7.	Dogs	29,141
8.	Donkeys	41
9.	Horses/Ponies	167
10.	Mules	2
11.	Cross Breed Exotic Pigs	15,613
12.	Indigenous Pigs	68,889
13.	Rabbits	637
14.	Ducks and drakes	364,202
15.	Hens and cocks	360,632

In order to improve the development of livestock and to provide better treatment to them and to prevent diseases from attacking them the following institutions have been set up in the district:

1.	Hospital	1
2.	Dispensary	10
3.	Aid Centre	14
4.	Intensive Cattle Development Project	1
5.	Stockmen Centre	14

There are 61 veterinary Surgeons to attend to the livestock of the district.

Fisheries : The district is comparatively poor in fishery potentiality. The hill streams have not yet been fully utilized for propagation of fish. As a result the district has to depend on fish exported from the plains of Assam, Andhra Pradesh and Bangladesh. The strategy adopted by the Fisheries Department is to promote and intensify pisciculture activities in the private sector by way of financial assistance and

technical advice for construction and maintenance of fish-ponds. Those private pisciculturists get their fish seed and fingerlings from the departmental fish farms. During 1998-99, 546500 fish seeds were distributed in the district.

Industry : There is only one major industry in the district under the public sector, the Mawmluh-Cherra Cement Limited, with a turnover of over 114000 metric tonnes of cement during 1998-99 employing about 656 persons. The total number of small scale industries during the same period was 1428 employing 9577 persons. The small scale industries are usually

(i) Motor Repairing, painting, servicing, etc.
(ii) Wooden Furniture
(iii) Leather Based Industry
(iv) Bakery
(v) Floor and Rice Mills, Atta and Chakki,
(vi) Tailoring
(vii) Printing Press
(viii) Cement Based Industry
(ix) Knitting and Embroidery
(x) Steel Based Industries
(xi) Tyre Retreading Works
(xii) Saw Mills
(xiii) Cane and Bamboo Works
(xiv) Weaving
(xv) Lime Making and
(xvi) Blacksmithy.

Trade and Commerce : The Khasis have been keen traders from very early times not only within their homeland but also with neighbouring countries in the plains. There was a report of a thriving trade in limestone in 1776 with the present Bangladesh. Khasi iron because of its malleability was in great demand for the boat industry in Bangladesh. The bulk of the external trade was apparently with the plains in the south.

Today a substantial portion of the population of the district earn their livelihood from trade which is chiefly carried on through weekly/Bi-weekly/Tri-weekly markets the important ones of which are given:

Name of C & R.D. Block	Place of market	Day (s) of market
Mawryngkneng	1. Mawryngkneng	Weekly
	2. Smit	Bi-weekly
Pynursla	1. Pynursla	Bi-weekly
	2. Lyngkhat	Bi-weekly
	3. Laitlyngkot	Weekly
Shella Bholaganj	1. Sohra	Bi-weekly
	2. Shylla	Bi-weekly
	3. Tyllap	Bi-weekly
Mawphlang	1. Sohiong	Bi-weekly
	2. Krang	Bi-weekly
Mawsynram	1. Mawsynram	Bi-weekly
	2. Balat	Weekly
	3. Nongspung	Bi-weekly
	4. Tyrsad	Bi-weekly

Transport : Two national highways, NH-40 and NH-44 traverse through the district, the former heads to the south traversing the district for about 100 Kms and the latter to the east covering the district for about 45 Km. Other important roads in the district are given as follows

1. Shillong-Sohra-Shella
2. Shillong Mawsynram-Lawbah-Hat Mawdon
3. Shillong-Mawsynram-Balat
4. Pynursla-Nongjri
5. Pynursla-Nongskhen
6. Shillong-Mawkynrew-Nohron
7. Pongtung-Lyngkhat
8. Balat-Shella

All the C & R.D. Block headquarters in the district are connected by black-topped roads. With the privatization of all road in the state, the number of vehicles has increased by leaps and bounds so much so that the state run Meghalaya Transport Corporation finds it very difficult to compete with private buses and has to withdraw its buses from many routes.

As on 31-03-1999 the number of vehicles Registered in the district was as follows:

Sl. No.	Type of vehicle	Government	Private
1.	Trucks	76	5,668
2.	Buses	93	1,284
3.	Cars	453	6,829
4.	Jeeps	1,651	3,040
5.	Tractors	51	206
6.	Trailers	206	1,531
7.	Two Wheelers	284	10,245
8.	Taxis	—	2,397
9.	Three wheelers	—	91
10.	Others	134	181

Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage,

etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

   i) a city or town with one or more contiguous outgrowths;

   ii) two or more adjoining towns with their

outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the constitution provides that the President may, with respect to any State or Union Territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the constitution be deemed to be Scheduled Caste in relation to that State or Union Territory. Article 342 similarly provides for specification of tribes or tribal communities or part s of or group within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States or Union Territories. In pursuance to this provisions, the list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside.

It is important to mention here that under the Constitution (Scheduled Caste) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in religion to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and Sikh religions were placed on the same footing with regard to the made in the Constitution (Scheduled Castes) Order 1991, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

According to the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 and the Constitution (Scheduled Tribes) Order (Amendment) Act, 1987, the list of Scheduled Castes and Scheduled Tribes in Meghalaya is as follows:

Scheduled Castes:

1. Bansphor
2. Bhuinmali, Mali
3. Brittial Bania, Bania
4. Dhupi, Dhobi
5. Dugla, Dholi
6. Hira
7. Jalkeot .
8. Jhalo, Malo Jhalo-Malo
9. Kaibartta, Jaliya
10. Lalbegi
11. Mahara
12. Mehtar Bhangi
13. Muchi, Rishi
14. Namasudra
15. Patni
16. Sutradhar.

Scheduled Tribes:

1. Boro, Kacharis
2. Chakma
3. Dimasa, Kachari
4. Garo
5. Hajong
6. Hmar
7. Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam
8. Koch
9. Any Kuki Tribes, including:
   - i) Biate, Biete
   - ii) Changsan
   - iii) Chonglo
   - iv) Doungel
   - v) Gamalhou
   - vi) Gangte
   - vii) Guite
   - viii) Hanneng
   - ix) Haokip, Haupit
   - x) Haolai
   - xi) Hengna
   - xii) Hongsungh
   - xiii) Hrangkhwal, Rangkhol
   - xiv) Jongbe
   - xv) Khawchung
   - xvi) Khawathlang, Khothalong
   - xvii) Khelma
   - xviii) Kholhou
   - xix) Kipgen
   - xx) Kuki
   - xxi) Lengthang
   - xxii) Lhangum
   - xxiii) Lhoujem
   - xxiv) Lhouvun
   - xxv) Lupheng
   - xxvi) Mangjel
   - xxvii) Misao
   - xxviii) Riang
   - xxix) Sairhem
   - xxx) Selnam
   - xxxi) Singson
   - xxxii) Sitlhou
   - xxxiii) Sukte
   - xxxiv) Thado
   - xxxv) Thangngeu
   - xxxvi) Uibuh
   - xxxvii) Vaiphei
10. Lakher
11. Man (Tai speaking)
12. Any Mizo (Lushai) tribes
13. Mikir.
14. Any Naga tribes.
15. Pawi.
16. Raba, Rava.
17. Synteng.

Language and Mother tongue : As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have as script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate : Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level : The highest level of education a person has completed.

Work : Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are

workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Main Worker : A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker : A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker : A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Marginal worker'.

Cultivator : For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer : A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker : Household Industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker : A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate : Percentage of workers (main + marginal) to total population.

Population Density : Population density is the number of persons inhabited per square kilometre of the area.

Age : Age is measured in terms of completed number of years

Sex–ratio : Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil: There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid - year Population}} \times 1000$$

Crude death rate(CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR)

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the

place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types

(i) Migration within the state itself with its components

  (a) Migration within the district of enumeration (intra district migration)

  (b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and

capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

2001 Census Findings

The East Khasi Hills district of 2001 was smaller in area by 2376 square kilometres than that in 1991. That area is utilized to carve out a new district christened as Ri Bhoi with effect from 04-06-1992. The Census of India 2001 records a total population of 660,923, out of which 383,175 live in 920 inhabited villages spread across the length and breadth of the district and 277,748 dwell in 8 towns (2 statutory and 6 census) out of which 7 are around Shillong the district headquarters and one, away from Shillong towards the south. The 2001 census shows a decadal growth rate of 23.4 percent during the decade from 1991 to 2001 against 30.76 percent during the decade from 1981 to 1991. The density of the population of the district has risen to 234 from 191 in 1991. The proportion of the urban population to the total population has, however, declined to 42.0 percent from 43.2 percent in 1991. The sex ratio has gone up to 981 from 948 in 1991. But the sex ratio of the population in the 0-6 age-group has fallen to 972 from 998 in 1991. The sex ratio of the scheduled caste population has, however, gone up to 819 from 758 in 1991. So also is the sex ratio of the scheduled tribe population which has gone up to 1043 from 1031 in 1991. The proportion of the scheduled caste population to the total population at 0.4 percent, is the same as that in 1991. The proportion of the scheduled tribe population has, however, risen to 77.5 percent from 75.9 percent in 1991. The literacy rate of the district shows marked improvement. It has gone up to 76.1 percent, the male 77.3 percent, and the female 74.8 percent from 64.6 percent, 67.2 percent and 61.9 percent respectively in 1991. The work participation rate in respect of the total population and the female population has risen to 38.8 percent and 28.9 percent respectively from 38.1 percent and 26.5 percent respectively in 1991. But the male work participation rate has declined to 48.5 percent from 49.0 percent in 1991. The proportion of the main workers to the total population has declined to 33.2 percent, the male 43.7 percent and the female 22.5 percent from 37.1 percent, 48.8 percent and 24.7 percent respectively in 1991. The proportion of the marginal workers to the total population has, however, risen to 5.7 percent, the male 4.9 percent and the female 6.4 percent from 1.0 percent, 0.2 percent and 1.8 percent respectively in 1991. The proportion of the cultivators to the total workers has also risen to 23.5 percent, the male 20.5 percent and the female 28.6 percent from 14.8 percent, 12.7 percent and 19.1 percent respectively in 1991. While there has been a rise in the proportion of the total agricultural labourers to the total workers and male agricultural labourers to 13.7 percent and 12.4 percent respectively from 13.5 percent and 12.2 percent respectively in 1991, there has been a decline in the proportion of the female agricultural labourers to 15.7 percent from 16.2 percent in 1991. The proportion of the workers in household industry has, however, risen to 1.6 percent, the male 1.3 percent and the female 2.3 percent from 0.6 percent, 0.5 percent and 0.9 percent respectively in 1991. The proportion of the other workers has declined to 61.2 percent, the male 65.8 percent and the female 53.4 percent from 71.1, 74.6 percent and 63.8 percent respectively in 1991.

Brief Notes on Tables

In the few pages that follow an attempt is being made to briefly analyse the few tables based on data collected from the Primary Census Abstract, the Village Directory and Town Directory and Houses, Household Amenities and Assets depicting on their own way the various demographic characteristics of the population of the district, the basic amenities such as education, medical, improved drinking water, etc available to the population of the district, and the housing stock, the household amenities and assets available to the households of the district. A total of 52 tables have been prescribed for the purpose. Tables 1to 36 present data from the Primary Census Abstract, inset tables 37 to 47 shows data on villages Directory and Town Directory and tables 48 to 52 gives data on household amenities and assets.

Tables 6, 10, 14, 21, 31 and 34 are to present data on Primary Census Abstract Tahsilwise and the rest C.R.D. Block wise. In Meghalaya, however, the Census of India starting from 1981 has been conducted with the Communiy and Rural Development Blocks as the administrative unit below the district and above the villages and towns and all the data have been tabulated and presented C.R.D. Blockwise. Therefore the above six tables have been excluded. Moreover, in Meghalaya there is no such administrative unit by the name Tahsil. Till 1971 the Census of India was conducted in Meghalaya police stationwise and never Tahsilwise.

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.R.D. BLOCK BY RESIDENCE,1991-2001

Serial number	C.R.D. Block	Population 1991			Population 2001			Percentage decadal variation 1991-2001			Percentage urban population	
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Mawphlang	46,685	46,685	-	55,441	55,441	-	18.8	18.8	-	-	-
2	Mylliem	293,973	70,607	223,366	365,221	97,559	267,662	24.2	38.2	19.8	76.0	73.3
3	Mawryngkneng	35,914	35,914	-	50,035	50,035	-	39.3	39.3	-	-	-
4	Mawkynrew	30,170	30,170	-	34,133	34,133	-	13.1	13.1	-	-	-

7	Pynursla	47,171	47,171	-	56,448	56,448	-	19.7	19.7	-	-	-
	District Total:	**535,555**	**304,412**	**231,143**	**660,923**	**383,175**	**277,748**	**23.4**	**25.9**	**20.2**	**43.2**	**42.0**

The decadal growth rate of the district, at 23.4 percent, during the decade from 1991 to 2001 is much lower than the state average and also lower than the decadal growth rate of the preceding decade. Unlike elsewhere, the decadal growth rate of the rural population of the district during 1991-01 has outstripped the decadal growth rate of the urban population of the same period despite the fact that a new town has been added to the number of those existing in 1991. Though the proportion of the urban population to the total population has decreased in 2001 by 1.2 percent, at 42.0 percent, the district is the most urbanised one in Meghalaya.

In the C.R.D. Blocks, the decadal growth rate of the population during the decade 1991-01varies from 13.1 percent in Mawkynrew to 39.3 in Mawryngkneng with the decadal growth rate in Mawryngkneng, Mawsynram and Mylliem above the district average and that in the remaining C.R.D. Blocks, below the district average. In the two C.R.D. Blocks having urban population, the decadal growth rate of the urban population in Shella-Bholaganj is higher than that in Mylliem. While the decadal growth rate of rural population of Mylliem is higher than the urban growth rate that of Shella-Bholaganj is lower than the urban growth rate.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl. No	District/ C.D. block	Total number of inha-bited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percent-age of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10

	Districts (Rural) Total:	**19 (2.1)**	**32612**	**31394**	**2 (0.2)**	**9,445**	**6,737**	-	-	-

From table-2, it is noticed that the district does not have any village in the population size of 10000 and above. In the population size of 5000-9999 there are two villages constituting 2.1 percent of the total inhabited villages of 920. The highest number of villages forming 41.8 percent of the total villages of the district have a population in the size of less than 200. The number of the villages in the population size of 200-499 form 34.8 percent of the villages. In fact, the general trend is the proportion of the villages in various population size decreases with the rise in the population size.

In the C.R.D. Blocks, a different pattern in the distribution of villages by population size is noticed. In Mawphlang, Mawsynram, Shella-Bholaganj and Pynursla the highest number of percentage of the villages is in the population size of less than 200, in Mylliem, Mawryngkneng and Mawkynrew, the highest number or percentage of the villages is in the population size of 200-499. Mylliem is the only C.R.D. Block with villages in the population size of 5000-9999 and Pynursla and Mawsynram are the only C.R.D. Blocks which have no villages in the population size of 2000-4999. Except in Mylliem, Mawrengkneng and Mawkynrew, the general trend is, like the district, the proportion of the villages decreases with the rise in the population size.

TABLE 3: NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Towns
	1
(a) New	
i) Statutory Town	NIL
ii) Census Town	Nongmynsong
(b) Denotified	NIL
i) Statutory towns of 1991 Census denotified and also did not satisfied the criteria to be treated as Census towns	
ii) Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	NIL
iii) Census towns of 1991 Census are notified as statutory towns in 2001 Census.	NIL
(c) Declassified	NIL
(d) Wholly merged with other town(s)	NIL

Declassified means the Census towns of 1991 Census with failed to satisfy the demographic and economic criteria.

By virtue of it having fulfilled the prescribed criteria for classification as urban area, Nongmynsong village was for the first time declared as Census Town in the Census of India, 2001.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population (per square kilometer)	Total number of villages in each population density range	Percentage of villages in population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10				
11-20				
21-50				
51-100				
101-200	N.A.			
201-300				
301-500				
501 +				
Not known				

Population Density (Rural) of the district: 138

In Meghalaya the villages have not been cadastrally surveyed for which reason the area of the villages is not known However,at 138 person per square kilometres, the density of the rural areas of the district is comparatively high.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901–2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,036	1,047	725	1,081	1,123	725
1911	1,013	1,024	757	1,054	1,096	757
1921	1,000	1,009	809	1,033	1,071	809
1931	971	989	697	980	1,048	697
1941	966	991	683	962	1,053	683
1951	949	969	784	950	1,028	784
1961	937	971	764	898	1,003	763
1971	942	958	853	916	955	855
1981	954	965	904	951	986	907
1991	955	966	910	948	1,014	865
2001	972	969	982	981	974	992

Note: Sex ratio has been defined here as the number of females per 1000 males.

From table 5, it is noticed that at both state and district levels, the total sex ratio had been in favour of the females in 1901 to 1921 with that at district level higher than that at state level. From 1931 to 2001 the total sex ratio at both state and district levels had been all along averse to the females with that at state level higher than that at district level in 1941, 1961, 1971, 1981 and 1991.

While the rural sex ratio at state level has been averse to the males only in 1901, 1911 and 1921, the rural sex ratio at district level had been in favour of the females from 1901 to 1961 and in 1991 and had been throughout the decades higher than that at state level.

The state and the district levels urban sex ratio had been equal from 1901 to 1951. In 1961 & 1991, the state level urban sex ratio was higher than that of the district and in 1971, 1981 and 2001, was the other way round. At both state and district levels, the rural sex ratio is higher than the urban sex ratio throughout the decades except in 2001. The margin of difference was wider in the earlier censuses and narrower in the recent census.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Sl.No.	Name of C D block	Sex ratio
1	2	3
1	Mawphlang	1020
2	Mylliem	924
3	Mawryngkneng	989
4	Mawkynrew	999
5	Mawsynram	970
6	Shella Bholaganj	950
7	Pynursla	1013
	District (Rural) Total:	**974**

The rural sex ratio of the district, at 974 females per 1000 males, is still on the bright side by Meghalaya standard. In the C.R.D. Blocks, there is a sharp variation of the sex ratio of the Blocks. While the sex ratio in Mawphlang and Pynursla is averse to males, that in other C.R.D.Blocks is female-biased. Though female-biased, the rural sex ratio in Mawryngkneng and Mawkynrew is above the district average and that in the remaining C.R.D. Blocks, below the district average, the lowest being in Mylliem.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	45	4.9	15,713	4.1
'700-749	21	2.3	10,393	2.7
'750-799	26	2.8	3,934	1.0
'800-849	50	5.4	10,278	2.7
'850-899	87	9.5	19,824	5.2
'900-949	123	13.4	47,351	12.4
'950-999	145	15.8	88,128	23.0
'1000-1099	260	28.3	144,437	37.7
'1100+	163	17.7	43,117	11.3
District Total:	**920**	**100.0**	**383,175**	**100.0**
Sex ratio (Rural) for District:		**974**		

Though the rural sex ratio of the district is only 974, the highest number or percentage of the villages having the highest proportion of the population of the district have a sex ratio in the range of 1000-1099 with another 17.7 percent of the villages with 11.3 percent of the total rural population of the district having a sex ratio in the 1100+ range. The third highest number or percentage of the villages with the second highest proportion of the total population, have a sex ratio in the range of 950-999. That makes a total of 61.8 percent, of the villages and 72.0 percent of the population with a sex ratio in the range of 950-999 and above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Cherrapunjee	CT	1043
2	Shillong UA	UA	990
	(a) Madanrting	CT	967
	(b) Mawlai	CT	1066
	(c) Nongmynsong	CT	910
	(d) Nongthymmai	CT	1008
	(e) Pynthorumkhrah	CT	933
	(f) Shillong Cantt.	(CB)	748
	(g) Shillong	(M)	1010
	Sex ratio (Urban) for the district:		**992**

The general trend in the rural sex ratio is usually higher than the urban sex ratio but in Meghalaya as well as in a few districts of the Khasi/Pnars it is just the contrary. In the individual towns the sex ratio in Shillong(M), Mawlai, Nongthymmai and Cherrapunjee is in favour of women while that in the rest of the towns including the Shillong Urban Aglomeration is averse to women with that in Shillong Cantonment the lowest. Being a military area, the military personnel residing there without their family might have made the sex ratio low.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Mawphlang	12,147	6,092	6,055	994
2	Mylliem	18,153	9,320	8,833	948
3	Mawryngkneng	10,934	5,544	5,390	972
4	Mawkynrew	7,536	3,817	3,719	974
5	Mawsynram	9,730	4,919	4,811	978
6	Shella Bholaganj	9,309	4,757	4,552	957
7	Pynursla	11,459	5,785	5,674	981
	District (Rural) Total:	**79,268**	**40,234**	**39,034**	**970**

The sex ratio of the population in the age-group 0-6 in rural areas of the district, at 970, is lower than the corresponding rural sex ratio of the total population. In all the C.R.D. Blocks, the sex ratio of the population in the age-group 0-6 is female-biased with that in Mylliem as the lowest and Mawphlang as the highest. The sex ratio in Mawphlang, Mawryngkneng, Mawkynrew and Pynursla is above the district average and that in Mylliem and Shella-Bholaganj, below the district average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	146	16	4,301	5
700-749	41	4	2,672	3
750-799	46	5	2,920	4
800-849	61	7	6,559	8
850-899	65	7	8,300	10
900-949	75	8	11,171	14
950-999	47	5	8,848	11
1000-1099	152	17	17,200	22
1100+	287	31	17,297	22
District (R) Total	**920**	**100**	**79,268**	**100**
Sex ratio (Rural) for District:		**970**		

It is noticed from table-12 that the highest proportion of the villages and the population in 0-6 age-group have a rural sex ratio in the range of 1100+ followed by that with a sex ratio in the range of 1000-1099. The smallest proportion of the villages with a smallest proportion of the population have a sex ratio in the range of 700-749. More than 50.0 percent of the villages and more than 50.0 percent of the population have a sex ratio in the range of 950-999 and above and the rest, in the range of 900-949 and below.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Cherrapunjee	(CT)	1,952	1,002	950	948
2	Shillong	(UA)	33,949	17,175	16,774	977
	a) Madanrting	(CT)	2,221	1,117	1,104	988
	b) Mawlai	(CT)	6,351	3,189	3,162	992
	c) Nongmynsong	(CT)	1,813	922	891	966
	d) Nonogthymmai	(CT)	3,791	1,929	1,862	965
	e) Pynthrumkhrah	(CT)	3,272	1,662	1,610	966
	f) Shillong Cantonment	(CB)	1,531	801	730	911
	g) Shillong	(M)	14,970	7,555	7,415	981
	Total		**35,901**	**18,177**	**17,724**	**975**

Like the rural sex ratio of population of the district, the urban sex ratio of the of the population in the age-group 0-6 is female-biased in the district as well as in all towns. However with the urban sex ratio of the population ranging from 911 in the Shillong Cantonment to 992 in Mawlai, the sex ratio of that population is still honourable by national standard.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Sl No.	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Mawphlang	55,441	-	54,320	-	98.0
2	Mylliem	97,559	180	77,337	0.2	79.3
3	Mawryngkneng	50,035	2	47,902	-	95.7
4	Mawkynrew	34,133	-	34,054	-	99.8
5	Mawsynram	45,262	184	42,472	-	93.8
6	Shella Bholaganj	44,297	480	37,024	1.1	83.6
7	Pynursla	56,448	5	55,945	-	99.1
	District (R) Total	383,175	**851**	349,054	**0.2**	**91.1**

Meghalaya being predominant inhabited by the Scheduled Tribes, it is not surprised that the Scheduled Tribes population of the district form 91.1 percent of the total population of the district. Since Meghalaya does not have her own indigenous Scheduled Castes, but whatever Scheduled Caste population is available in the state was inherited from Assam as she was the part of Assam till 20.01.1972, the Scheduled Castes cannot impact the district. They can constitute just a meagre 0.2 percent of the total population of the district. In the C.R.D. Blocks, the proportion of the scheduled tribe population varies from 79.3 percent in Mylliem to 99.8 in Mawkynrew. In fact in 5 C.R.D. Blocks, Mawphlang, Mawryngkneng, Mawkynrew, Mawsynram and Pynursla, the proportion of the scheduled tribe

population of the total population of the respective C.R.D. Block is above 90.0 percent and in Shella-Bholaganj, a little over 80.0 percent. Mylliem is the only C.R.D. Block of the district where the proportion of the scheduled tribe population is below 80.0 percent. The reason for the low proportion of the scheduled tribe population in Mylliem is because all the villages around Shillong are inhabited by a sizable non-tribal population. In Shella-Bholaganj, the existence of a cement factory might have been the cause The scheduled caste population can form a little over 1.0 percent of the total population only in Shella-Bholaganj. In Mylliem and Mawsynram, they can form only 0.2 percent and 0.4 percent respectively. In the remaining C.R.D. Blocks, they are not recorded.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	898	97.6	-	-
Less than 5	15	1.6	241	28.3
5-10	-	-	-	-
11-20	4	0.4	292	34.3
21-30	2	0.2	115	13.5
31-40	-	-	-	-
41-50	1	0.1	203	23.9
51-75	-	-	-	-
76 and above	-	-	-	-
District Total	**920**	**100.0**	**851**	**100.0**

As already remarked in table-15, the scheduled caste population could not impact the district. Though out of 920 inhabited villages of the district, they are recorded in only 22 villages with a total population of 851. Only in one village with a population of 203, the scheduled caste population can constituted a proportion in the range of 41-50 percent. In two villages with a total population of 292, their proportion to the total population of total population of those villages is in the percentage range of 11-20. In 15 villages with a total population of 241, their proportion is in the less than 5 percentage range. While the highest percentage of the scheduled caste population form a proportion to the total population in the percentage range of 11-20, in the highest proportion of villages where they are recorded, their proportion to the total population is in the less than 5 percentage range.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

51-75	28	3.0	13,803	4.0
76 and above	863	93.8	328,811	94.2
District Total	**920**	**100.0**	**349,054**	**100.0**

The population of the scheduled tribe population is not recorded in only 6 out of 920 inhabited villages of the district. From table 17, it is noticed that in 93.8 percent of the village covering 94.2 percent of the total scheduled tribe population, the proportion of the scheduled tribe population to the total population of the district is

in the percentage range of 76.0 percent and above. In 3.0 percent of the villages covering a scheduled tribe population of 4.0 percent, the proportion of the scheduled tribe population to the total population is the 51-75 percentage range. In the lower percentage ranges, the proportion of the villages as well as that of the population of the scheduled tribe is insignificant, which shows that the scheduled tribe population predominate in nearly 97.0 percent of villages and they are minority in only a little below 3.0 percent of the villages.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Cherrapunjee (CT)	10,086	5	9,673	N	95.9
2	Shillong UA	267,662	1,476	153,425	0.6	57.3
	(a) Shillong (M)	132,867	841	67,609	0.6	50.9
	(b) Shillong Cantt. (CB)	12,396	362	502	2.9	4.0
	(c) Mawlai (CT)	38,303	52	36,636	0.1	95.6
	(d) Nongthymmai (CT)	34,292	99	22,799	0.3	66.5
	(e) Madanrting (CT)	16,318	24	10,179	0.1	62.4
	(f) Pynthorumkhrah (CT)	22,115	52	11,348	0.2	51.3
	(g) Nongmynsong (CT)	11,371	46	4,352	0.4	38.3
	District(Urban) Total	**277,748**	**1,481**	**163,098**	**0.5**	**58.7**

From table 18, it is noticed that, except in the Shillong Cantonment, where the scheduled caste population form 2.9 percent of the total population, in no other towns of the district could they muster even 1.0 percent. While in Cherrapunjee their proportion to the total urban population is negligible, in the remaining towns they could form only 0.1 percent, in Madanrting and Mawlai to 0.6 percent in shillong (M). At district level they constitute only 0.5 percent of the total urban population and in the Shillong UA, 0.6 percent.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C.D.BLOCKS, 2001

Sl.No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Mawphlang	0	1,020
2	Mylliem	429	1,018
3	Mawryngkneng	1,000	1,004
4	Mawkynrew	0	1,000
5	Mawsynram	917	983
6	Shella Bholaganj	882	963
7	Pynursla	0	1,016
	District (R) Total	**762**	**1,004**

There is a constrasting difference between the sex ratio of the scheduled caste population and the sex ratio of the scheduled tribe population of the district. While the former is too averse to the females, the latter is a bit averse to the males.

In the C.R.D. Blocks, while the sex ratio of the scheduled castes indicates the equal number of males and females in Mawryngkneng that in remaining C.R.D. Blocks is female-biased with only that in Mawsynram is above 900. The sex ratio of the scheduled tribe population is in favour of female in Mawphlang, Mylliem, Mawryngkneng and Pynursla with that in Mawkynrew just 1000. The sex ratio in Mawsynram and Shell-Bholaganj, though averse to female is still above 950.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Cherrapunjee (CT)	667	1057
2	Shillong UA	854	1136
	(a) Madanrting (CT)	714	1092
	(b) Mawlai (CT)	857	1097
	(c) Nongmynsong (CT)	840	1036
	(d) Nongthymmai (CT)	1062	1102
	(e) Pynthorumkhrah (CT)	677	1079
	(f) Shillong Cantt. (CB)	819	1714
	(g) Shillong (M)	865	1189
	District:	**854**	**1131**

From table 20, it is noticed that at district level while the sex ratio of the urban scheduled caste population is female-biased that of the urban scheduled tribe population is male-biased. In fact there is sharp contrast between the two. While the former is below 900 the latter is above 1100. In the towns the same trend is noticed, except in Nongthymmai where both the scheduled caste and scheduled tribe urban sex ratio is above 1000. In the remaining towns, while the scheduled caste sex ratio ranges from 667 in Cherrapunjee to 865 in Shillong (M), the scheduled tribe urban sex ratio ranges from 1036 in Nongmynsong to 1714 in the Shillng Cantonment.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mawphlang	27,613	13,306	14,307	27,828	14,142	13,686	63.8	62.3	65.2	-2.9
2	Mylliem	61,833	32,950	28,883	35,726	17,764	17,962	77.9	79.6	76	3.6
3	Mawryngkneng	24,718	11,590	13,128	25,317	13,562	11,755	63.2	59.1	67.3	-8.2
4	Mawkynrew	14,026	6,396	7,630	20,107	10,680	9,427	52.7	48.2	57.2	-9.0
5	Mawsynram	23,110	12,216	10,894	22,152	10,758	11,394	65	67.7	62.3	5.3
6	Shella Bholaganj	22,115	11,580	10,535	22,182	11,134	11,048	63.2	64.5	61.9	2.6
7	Pynursla	29,734	14,726	15,008	26,714	13,314	13,400	66.1	66.2	66	0.2
	Dist. (Rural) Total:	**203,149**	**102,764**	**100,385**	**180,026**	**91,354**	**88,672**	**66.8**	**66.8**	**66.9**	**-0.1**

Though more than 50.0 percent of the population can read and write with understanding in any language, the literacy rate of the district is still below expectation. But what will surprise many is the fact that unlike the general trend, the female literacy rate is higher than that of the male making gap of -0.1 percent. In the C.R.D. Blocks, Mylliem is the only Block where the literacy rate is above 70.0 percent. Except in Mawkynrew where the literacy is below 55.0 percent and the lowest among the C.R.D. Blocks, the literacy rate in the remaining C.R.D. Blocks, is above 60.0 percent, but all below the district average.

The female literacy rate is noticed to be above the district average only in Mylliem and Mawryngkneng. In the rest of the C.R.D. Blocks, it is below the district average with that in Mawkynrew as the lowest. While the male literacy rate in Mylliem, Mawsynram, Shella-Bholaganj and Pynursla is higher than that of the female creating a gap varying from 0.2 percent in Pynursla to 5.3 percent in Mawsynram, the female literacy rate in Mawphlang, Mawryngkneng and Mawkynrew is higher than that of the male making a gap varying from -9.0 percent in Mawkynrew to -2.9 percent in Mawphlang.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	12	1.3	157	0.0
1-10	24	2.6	4,060	1.1
11-20	37	4.0	6,467	1.7
21-30	60	6.5	13,240	3.5
31-40	95	10.3	31,327	8.2
41-50	108	11.7	37,726	9.8
51-60	108	11.7	44,559	11.6
61-70	103	11.2	38,185	10.0
71-80	150	16.3	91,959	24.0
81-90	141	15.3	77,587	20.2
91-99	69	7.5	37,075	9.7
100	*13*	*1.4*	*833*	*0.2*
District Total:	**920**	**100.0**	**383,175**	**100.0**
Literacy rate for District:				**76.1**

From the table 23, it is noticed that only 1.4 percent of the village of the district with a population of 0.2 percent have a cent per cent literacy rate and 1.3 percent of the villages with 157 population have no literate population. The highest proportion of the villages with the highest proportion of the population have a literacy rate in the percentage range of 71-80 followed by that with literacy rate in the percentage range of 81-99. It is further noticed that both the proportion of the villages and the proportion of the population rises with the rise in literacy range up to the 51-60 ranges. Both the proportion of the villages and population inversely decreases with the rise in the literacy range from 71-80 onwards.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Cherrapunjee (CT)	7,376	3,618	3,758	2,710	1,320	1,390	90.7	91.9	89.5	2.4
2	Shillong UA	204,635	106,255	98,380	63,027	28,242	34,785	87.6	90.6	84.5	6.0

	(c) Nongmynsong (CT)	7,726	4,313	3,413	3,645	1,639	2,006	80.8	85.7	75.4	10.4
	(d) Nongthymmai (CT)	27,650	14,158	13,492	6,642	2,917	3,725	90.7	93.5	87.9	5.6
	(e) Pynthorumkhrah (CT)	15,571	8,516	7,055	6,544	2,926	3,618	82.6	87.1	77.8	9.2
	(f) Shillong (M)	105,055	53,842	51,213	27,812	12,264	15,548	89.1	92	86.3	5.7
	(f) Shillong Cantt. (CB)	9,130	5,534	3,596	3,266	1,556	1,710	84.0	88	78.6	9.4
	Total	**212,011**	**109,873**	**102,138**	**65,737**	**29,562**	**36,175**	**87.7**	**90.6**	**84.7**	**5.9**

From the table 24, it is noticed that, the literate population in the urban areas of the district as a whole stands at 87.7 percent with that of the literate male a little over 90.0 percent and that of the female below 90.0 percent. Creating a gap of nearly 6.0 percent.

In the Urban Agglomeration and individual towns and constituent units the proportion of the urban literate varies from 80.8 percent in Nongmynsong to 90.7 percent in Cherrapunjee and Nongthymmai. The proportion of the urban male literate ranges from 85.7 percent in Nongmynsong to 93.5 percent in Nongthymmai while that of the female literate varies from 75.4 percent in Nongmynsong to 89.5 percent in Cherrapunjee. In all towns/constituent units the proportion of the urban male literate is higher than that of the female creating a gap between the two sex ranging from 2.4 percent in Cherrapunjee to 10.4 percent Nongmynsong.

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mylliem	124	85	39	56	41	15	90.5	96.6	79.6	17.0
2	Mawryngkneng	2	1	1	-	-	-	100.0	100.0	100.0	-
3	Mawsynram	63	48	15	121	48	73	45.3	63.2	23.8	39.3
4	Shella Bholaganj	240	151	89	240	104	136	58.1	66.8	47.6	19.2
5	Pynursla	5	5	-	-	-	-	100.0	100.0	-	100.0
	Dist.(Rural)Total	**434**	**290**	**144**	**417**	**193**	**224**	**62.4**	**73.2**	**48.0**	**25.2**

Table-25 shows that the population of the scheduled castes in the rural areas of the district is very small and their presence is not felt at all. But the number of the literate population among the community is not bad because more than 60.0 percent of them are literate. The male literate form more than

70.0 percent of the scheduled caste population and the female less than 50.0 percent. The gap between the male literate and the female literate is very wide more than 25.0 percent.

In the C.R.D. Blocks, it is noticed that in Mawryngkneng and Pynursla cent per cent of the scheduled caste population both males and females, is literate though no female scheduled caste population is recorded in Pynursla C.R.D. Block. In Mylliem more than 90.0 percent of the scheduled caste population is literate. In Mawsynram and Shella-Bholaganj the literate scheduled caste population constitute more than 45.0 percent and 58.0 percent respectively of the total scheduled caste population and both the percentage are below the district average, while that in Mylliem and Mawrengkneng C.R.D. Blocks is above the district average.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of
1	2	3	4	5
0	1	4.5	5	0.6
1-10	-	-	-	-
11-20	-	-	-	-
21-30	2	9.1	174	20.4
31-40	1	4.5	69	8.1
41-50	2	9.1	71	8.3
51-60	1	4.5	27	3.2
61-70	3	13.6	109	12.8
71-80	-	-	-	-
81-90	3	13.6	242	28.4
91-99	2	9.1	139	16.3
100	7	31.8	15	1.8
District Total:	22	100.0	851	100.0
Literacy rate for District (Rural)				**62.4**

The scheduled caste population is recorded in only 22 inhabited villages of the district out of 920. From table 26, it is noticed that in the highest percentage of the villages with the lowest percentage of the scheduled caste population cent per cent of the scheduled caste population is literate. In the second highest percentages of the villages with the highest and fourth highest percentage of the scheduled caste population, the proportion of the literate scheduled caste population is in the literacy rate,range of 81-90 and 61-70 respectively. In 9.1 percent of the villages with a population of 16.3 percent, 8.3 percent and 20.4 percent, the total literacy rates of the scheduled caste population is in the range of 91-99, 41-50 and 21-30 respectively. Though there is no villages in the literacy rate range of 1-10, 11-20 and 71-80 and there is only one village with nil literacy rate, it is noticed that in the majority of the villages covering a majority of the population, the literacy rate of the scheduled cast population is in the range of 51-60 and above.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mawlai (CT)	24	15	9	28	13	15	55.8	62.5	47.4	15.1
2	Shillong Cantt. (CB)	201	126	75	161	73	88	62.4	70.8	52.1	18.7
3	Shillong (M)	496	291	205	345	160	185	66.7	72.2	60.1	12.1
4	Pynthorumkhrah (CT)	40	26	14	12	5	7	85.1	89.7	77.8	11.9
5	Nongmynsong (CT)	40	23	17	6	2	4	95.2	100.0	89.5	10.5
6	Nongthymmai (CT)	72	37	35	27	11	16	82.8	88.1	77.8	10.3
7	Madanrting (CT)	18	10	8	6	4	2	94.7	100.0	88.9	11.1
8	Cherrapunjee (CT)	3	2	1	2	1	1	75.0	100.0	50.0	50.0
	East Khasi Hills (U)	**894**	**530**	**364**	**587**	**269**	**318**	**68.3**	**74.5**	**61.0**	**13.6**

As can be seen from table 27, the urban literacy rate of the scheduled caste population is comparatively higher, with that of the males, 75.5 percent and the females, 61.0 percent creating a gap of 13.6 percent narrower than the rural gap.

Besides in Nongmynsong, cent percent male literacy rates are recorded in Madanrting and Cherrapunjee. It is noticed that while the total scheduled caste and male literacy rate in Mawlai, Shillong Cantonment and Shillong(M) is below the district average, that in the remaining towns is above the district average. In regard to the female literacy rate, it is noticed that while in Mawlai, Shillong(M), Shillong Cantonment and Cherrapunjee it is below the district average,that in the remaining towns, above the district average. In all the towns, it is noticed that the male literacy rates is higher than the female literacy rates.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mawphlang	27,066	13,040	14,026	27,254	13,849	13,405	63.8	62.3	65.2	-2.9
2	Mylliem	46,587	22,918	23,669	30,750	15,411	15,339	75.1	75.1	75.0	0.1
3	Mawryngkneng	23,210	10,659	12,551	24,692	13,249	11,443	62.1	57.4	66.8	-9.4
4	Mawkynrew	13,992	6,375	7,617	20,062	10,656	9,406	52.7	48.2	57.2	-9.0
5	Mawsynram	22,108	11,508	10,600	20,364	9,913	10,451	66.4	68.7	64.1	4.5
6	Shella Bholaganj	19,339	9,862	9,477	17,685	8,996	8,689	66.2	66.5	66.0	0.5
7	Pynursla	29,494	14,557	14,937	26,451	13,191	13,260	66.2	66.2	66.2	-
	District (Rural)	**181,796**	**88,919**	**92,877**	**167,258**	**85,265**	**81,993**	**66.0**	**65.0**	**67.0**	**-2.0**

The literacy rate of the scheduled tribe population in the rural areas of the district is comparatively higher than their scheduled caste counterpart. More than 65.0 percent of the total scheduled tribe population and female population are literate, while 65.0 percent of the male are literate creating a gap of -2.0 percent.

In the C.R.D. Blocks, it is noticed that the highest literacy rate of the scheduled tribe population of both males and females is recorded in Mylliem, the lowest in Mawkynrew. While the literacy rate of the total and male scheduled tribe population in Mylliem, Mawsynram, Shella-Bholaganj is above the district average that in the remaining C.R.D. Blocks, below the district average. In the remaining Blocks, it is below the district average. Like the district, the female literacy rate of the scheduled tribe population in Mawphlang, Mawryngkneng, Mawkynrew is higher than the male creating a gap varying from -2.9 percent to -9.4 percent in Mawryngkneng.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	14	1.5	170	0.0
1-10	23	2.5	3,844	1.1
11-20	35	3.8	6,088	1.7
21-30	58	6.3	12,733	3.6
31-40	89	9.7	27,520	7.9
41-50	106	11.6	34,154	9.8
51-60	109	11.9	44,085	12.6
61-70	106	11.6	41,429	11.9
71-80	148	16.2	81,569	23.4
81-90	142	15.5	69,432	19.9
91-99	70	7.7	27,207	7.8
100	14	1.5	823	0.2
District Total:	**914**	**100.0**	**349,054**	**100.0**
Literacy rate for District (Rural):				**66**

The scheduled tribe population is recorded in only 914 inhabited villages of the district out of 920. From table 29, it is noticed that while in only 14 villages with 170 scheduled tribe population where no literate scheduled tribe population is recorded, in 14 villages with a population of 825, cent per cent scheduled tribe literate is recorded. The highest number/ percentage of villages with the highest percentage of population have a literacy rate of the scheduled tribe population in the 71-80 range followed by that in the 81-90 range. The majority of the villages with majority of the population have a literacy rate in the range of 51-60 and above. It is further noticed that the number/ percentage of villages rises with the rise in the literacy rate up to the 71-80 range to iniversely decrease with the rise in the literacy rate. But the proportion of the population rises with the rise in the literacy rate range up to 51-60 range to come down in the next range to rise again in the following range and to inversely decrease with the rise in the literacy range.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Number of literates and illiterates									Gap in male/female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mawlai (CT)	26,119	12,570	13,549	10,517	4,899	5,618	85.7	87.4	84.2	3.2
2	Shillong Cantt. (CB)	413	146	267	89	39	50	94.7	95.4	94.3	1.1
3	Shillong (M)	53,220	24,728	28,492	14,389	6,152	8,237	90.1	93.1	87.7	5.3

8	Cherrapunjee (CT)	7,074	3,427	3,647	2,599	1,275	1,324	90.9	92	89.9	2.0
East Khasi Hills (Urban)		**123,455**	**58,880**	**64,575**	**39,643**	**17,662**	**21,981**	**88.5**	**91.1**	**86.3**	**4.8**

From table 30, it is noticed that the literacy rate of the urban scheduled tribe population is higher than the rural literacy rate, with more than 85.0 percent of the total and female scheduled tribe population are literate and more than 90.0 percent of the urban male scheduled tribe population are literate. But unlike the rural literacy rate, the urban male literacy rate is higher than the urban female literacy rate making a gap of 4.8 percent. In the individual towns, it is noticed that the highest literacy rate of the scheduled tribe population of both males and females is recorded in Shillong Cantonment and the lowest, in Pynthorumkhrah. The total male and female literacy rate in Shillong Cantonment, Shillong(M), Nongthymmai and Cherrapunjee is above the district average and that in the remaining towns, below district average. Unlike in the rural area of the district, the male literacy rate is higher than the female.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Sl No.	Name of C.D. block	Persons/ Males/ Females	Population	Total Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

		Females	28,408	8,805	31.0	3,309	11.6	12,114	42.6	16,294	57.4
	District(R) Total:	Persons	383,175	133,536	34.8	31,793	8.3	165,329	43.1	217,846	56.9
		Males	194,118	84,854	43.7	13,300	6.9	98,154	50.6	95,964	49.4
		Females	189,057	48,682	25.7	18,493	9.8	67,175	35.5	121,882	64.5

Table 32 shows that the work participation rate in the district is only 43.1 percent out of which 34.8 percent are main workers and 8.3 percent, marginal workers. While the percentage of the male main workers is higher than that of the female, the percentage of the female marginal workers is higher than that of the male. Similarly the percentage of the female non-worker is higher than that of the male.

In the C.R.D. Blocks, the work participation rate varies from 38.7 percent in Mylliem to 50.1 percent in Mawkynrew. However the lowest proportion of the main worker is recorded in Mawsynram and the highest, in Mawkynrew. Conversely, the highest proportion of the marginal worker is recorded in Mawsynram but the lowest in Mawkynrew. In all the C.R.D. Blocks, the proportion of the male main workers is higher than that of the female. Conversely, the proportion of the female marginal workers and female non-workers is higher than that of the male in all the C.R.D. Blocks.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

		Males	139,435	60,744	43.6	2,995	2.1	63,739	45.7	75,696	54.3
		Females	138,313	24,910	18.0	2,584	1.9	27,494	19.9	110,819	80.1

The work participation rate in the urban areas of the district, at 32.8 percent, is comparatively low. What is striking when one looks at table 33 is that the proportion of both the male main and marginal workers is higher than that of the female. However, the proportion of the female non-workers is higher than that of the male.

In the individual towns the highest work participation rate is noticed in Shillong Cantonment, at 36.8 percent, and the lowest in Madanrting, at 28.4 percent. It is noticed that in all the individual towns including Shillong Urban Aglomeration, the percentage of the male main workers is higher than that of of female. But the percentage of the male marginal workers is higher than that of the male only in Shillong(M), Mawlai, Nongthymmai, Nongmynsong and Cherrapunjee. In the remaining towns, the proportion of the female marginal workers is higher than that of the male. The proportion of the female non-workers is also higher than that of the male in all the towns.

				(35.5)	(40.2)	(21.9)	(2.5)	(35.4)

Note: Percent of Worker to total worker are given in brackets

From table 35, it is noticed that the majority of the total workers of the district are engaged in agriculture. The cultivators from 36.3 percent of the total workers and the agricultural labourers, 20.9 percent. Workers in household industry constitute 1.7 percent of the total workers and the other workers 41.2 percent. It is also noticed that the proportion of the female cultivators, female agricultural labourers and female household industry workers is higher than that of their male counterpart, while the proportion of the male other workers is higher than that of the female.

In the C.R.D. Blocks, it is noticed that the majority of the rural total workers are engaged in agriculture only in Mawphlang, Mawrengkneng, Mawkynrew, Mawsynram and Shella-Bholaganj . In Mylliem and Pynursla, the majority of the total workers are engaged in other work. It is further noticed that the proportion of the female cultivators is higher than that of the male in all C.R.D. Blocks, except in Mawsynram and Pynursla where the proportion of the male cultivators is higher than that of the female. The proportion of the female agricultural labourers is higher than that of the female in Mawphlang, Mylliem, Mawsynram and Shella-Bholaganj. In Mawrengkneng, Mawkynrew and Pynursla that of the male is higher than that of the female. The proportion of the female household industry workers is higher than that of the male in Mylliem, Mawryngkneng, Mawsynram, Shella-Bholaganj and Pynursla.

From table 36, it is noticed that 97.6 percent of the total urban workers are engaged in other works, while those engaged in cultivation and agricultural labour constitute less than 1.0 percent of the total

urban workers and those engaged in household industry a little over 1.5 percent. While the proportion of the female workers engaged in cultivation, agricaltural labour and household industry is higher than that of the male, the proportion of the male workers engaged in other works is higher than that of the female workers.

In the individual towns, it is noticed that in no town could those engaged in cultivation form 1.0 percent of the total workers. Those engaged as agricultural labourers could constitute 1.0 percent or more of the total worker only in Mawlai and Nongmynsong while those engaged as household industry workers could form 1.0 percent or more of the total workers in all the towns, except in Cherrapunjee. The highest proportion of the other workers is recorded in Cherrapunjee, at 98.5 percent, and the lowest in Nongmynsong, at 95.5 percent.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

From Table 37, it is noticed that the majority of the inhabited villages of the district varying from 50.5 percent with approach by pucca road to 82.4 percent with education possess the amenities of education, power supply, improved drinking water, transport/ communication and approach by pucca road. Medical, post office, telephone, banks and agricultural credit societies are available to a small percentage of the villages of the district varying from 0.1 percent of the villages with the amenities of agricultural credit societies to 12.6 percent of the villages with the amenities of post office.

In the C.R.D.Blocks almost the same trend is noticed. In all the C.R.D. Blocks, the majority of the inhabited villages have the amenities of education, improved drinking water and power supply. Transport /Communication is available to the majority of the villages only in Mawphlang, Mylliem, Mawkynrew and Pynursla. Approach by pucca road is available to the majority of the villages only in Mylliem,

Mawryngkneng and Pynursla. The amenities of medical, post office, banks are available to a small percentage of the villages of the C.R.D. Blocks and the amenities of telephone office is not available to any village in Mawphlang, Mylliem, Mawryngkneng and Mawkynrew. Agricultural credit societies is available only to one village in Mawphlang.

		(100)	(94.3)	(16.6)	(83.3)	(27.1)	(1.4)	(72.7)	(11.5)	(0.1)	(70.6)	(89.9)

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

From table 38, it is noticed that the majority of the rural population of the district have the amenities of education, improved drinking water, transport/ communication, approach by pucca road and power supply. But the amenities of medical, post office, telephone, banks and agricaltural credit societies is available to a small percentage of the rural population.

In the C.R.D. Blocks, almost the same trend is noticed. The majority of the population of all the C.R.D. Blocks possess the amenities of education, improved drinking water, transport/communication and power supply. The amenity of approach by pucca road is available to a majority of the population only in Mawphlang, Mylliem, Mawrengkneng, Mawkynrew, Mawsynram and Pynursla. In Shell-Bholaganj, it is available to less than 50.0 percent of the population of the Block. The amenities of medical, telephone, banks and agricaltural credit societies is available to a small proportion of the population in all the C.R.D. Blocks. Post office is available to the majority of the population only in Mawryngkneng. In the remaining C.R.D. Blocks, it is available to a minority of the population. It is also noticed that telephone is not available to the entire population of Mawphlang, Mylliem, Mawryngkneng and Mawkynrew. The amenity of agricultural credit societies is available to only a small percentage of the rural population of Mawphlang C.R.D. Block.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education				
(a) Primary School	151	8	3	162
(b) Middle School	411	175	148	734
(c) Degree College	11	21	887	919
2. Medical				
(a) Hospital	194	104	622	920
(b) PHC	276	199	416	891
3. Post Office	460	154	190	804
4. Telephone	129	52	730	911
5. Bus Service	331	85	24	440
6. Banks				
(a) Commercial Bank	143	121	628	892
(b) Cooperative Bank	50	56	812	918
7. Agricultural Credit Societies	21	15	883	919

From table 39, it is noticed that the highest number of villages without primary and middle schools are situated at a distance of less than 5 kilometres from the place where they are available and those without colleges, at a distance of 10+ kilometres. While children can walk up to 5 kilometres to attend school, they may not be able to walk beyond 10 kilometres to attend colleges. So those who desire to attend colleges and have the financial capacity to do so, have to stay either in hostels or rented houses.Also the highest number of villages without the amenity of medical is situated at a distance of 10+ kilometres which make it impossible to walk to attend a hospital or PHC. Post office and, bus service are the only amenities available to the highest number of villages located at a distance of less than 5 kilometres. The highest number of villages without the amenities of telephone, commercial bank, co-operative bank and agricultural credit societies are situated at a distance of 10+ kilometres from the place where they are available.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory (in km)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telep-hone	Transport communi-cations $	Banks	Agricu-ltural Credit society	Transport communic ation

	(100.0)	(82.4)	(5.9)	(12.6)	(1.0)	(52.3)	(3.2)	(0.1)	(50.5)

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

The main purpose of table 40 is to relate the nearness of the villages from the nearest statutory town and the availability of amenities in those villages. From the table it is it is noticed that more than 55.0 percent of the villages of the district lie beyond 51 kilometres from the nearest statutory town and more than 38.0 percent are situated between 16-50 kilometres and more than 5.0 percent between 5-15 kilometres and less than 1.0 percent are situated at a distance of less than 5 kilometres. But the highest number of villages with the amenities of education are those located at a distance range of 51+ kilometres followed by the number of the villages situated in the distance range 16-50 kilometres from the nearest statutory town. Of the villages with the amenities of medical, the highest number of them are situated in the distance range of 51+ followed by the number of those located in the distance range of 16-50 kilometres. The same trend is noticed in regard to the availability of the amenities of post office, telephone, transport/communication and approach by pucca road. In all those cases the number of villages with those amenities rises with the rise in distance from the nearest statutory town. With regard to the amenities of banking services and agricaltural credit societies, the trend is different.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES

District total	**920**	**758**	54	**655**	**116**	**9**	**481**	**29**	**1**	**465**	**682**
	(100.0)	**(82.4)**	**(5.9)**	**(71.2)**	**(12.6)**	**(1.0)**	**(52.3)**	**(3.2)**	**(0.1)**	**(50.5)**	**(74.1)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The purpose of table 41 is to relate the population size of villages and the availability of various amenities in those villages. As can be seen from the table, the highest number of villages of the district are small. Their population is in the 1-499 range followed by the number of those villages with a population in the range of 500-999. The smaller number of villages being those with a population in the range of 5000-9999. The trend is the number of villages inversely decreases with the rise in the population size.

It is also noticed that the highest number of villages with the amenities of education, medical, improved drinking water, post office, telephone, approach by pucca road and power supply have a population in the 1-499 range and the lowest in the

5000-9999 population range in case of villages with the amenities of education, medical, improved drinking water, transport/communication, approach by pucca road and power supply and in the 2000-4999 population range in case of post office. In all the above cases the number of villages inversely decreases with the rise in population range. In regard to the amenity of Banking Services, the highest number of villages with that amenity are in the 2000-4999 population range followed by the number of those in the 1-499 and 500-999 population range. The amenity of Agricaltural Credit Societies is available in only one village of the district in the 1-499 population range.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mawphlang	210			
2	Mylliem	95			
3	Mawryngkneng	63			
4	Mawkynrew	68	———	N.A. ———	
5	Mawsynram	158			
6	Shella Bholaganj	182			
7	Pynursla	144			
	District Total:	**920**			

In Meghalaya villages are not cadestriallysurveyed, hence no data available in this regards.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Shillong Cantonment (CB)	958.2	22.5	67.4	774.4	107.0	426.7	80.3	71.8	44.5
2	I Shillong Municipality (M)	50373	68.9	1633.8	23050.3	20575.5	-	-	-	1429.1
District Total		**46156**	**64.9**	**1500.2**	**21149.4**	**18828.8**	**36.4**	**6.9**	**6.1**	**1311.0**

There are only two statutory town in the district, one a class IV town with the civic status of a Cantonment Board and the other a class I town with the civic status of a Municipality. From table 43, it is noticed that both the statutory towns derive the higher proportion of their per capita receipt from other sources. While Shillong Cantonment Board highest per capita expenditure is on public health and conveniences followed by that on general administration, the highest per capita expenditure of the Shillong Municipality is on general administration followed by that on other which is the lowest per capita expenditure of the Shillong Cantonment Board. The Shillong Municipality has no per capita expenditure on public health and conveniences, public works and public institutions, whereas the Shillong Cantonment do have per capita expenditure on those items.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Shillong Cantonment (CB)	0.8	-	2.4	-	0.8
2	Shillong Municipality (M)	1.1	0.4	1.7	0.5	0.9
District Total		**1**	**0.3**	**1.8**	**0.4**	**0.9**

From table 44, it is noticed that while Shillong Municipality has all types of educational institution, Shillong Cantonment has only Primary Schools, Secondary Schools and College. While there are less than one Primary School per 10,000 population in Shillong Cantonment, there are more than one in Shillong Municipality. There are more than 2 Secondary Schools per 10,000 population in Shillong Cantonment, there are more than 1 in Shillong Municipality. While no middle and Senior Secondary School available in Shillong Cantonment, less than one each of those institution per 10,000 population available in Shillong Municipality. Less than one college is available per 10,000 population in both of the two statutory towns.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Cherrapunjee(CT)	25
2	Madanrting(CT)	-
3	Mawlai(CT)	3
4	Nongmynsong(CT)	-
5	Nongthymmai(CT)	-
6	Pynthor Umkhrah(CT)	-
7	Shillong Cantonment(CB)	241
8	Shillong Municipality(M)	-
	Distrct Total	12

Out of 8 towns of the district, hospital beds are available only in Cherrapunjee, Mawlai and Shillong Cantonment. Shillong Municipality has about 10 hospitals but the number of beds is not available. At 241 beds per 10,000 population, Shillong Cantonment has the highest number of hospital beds per 10,000 population followed by that in Cherrapunjee, at 25 beds per 10,000 populations. Mawlai has only 3 beds per 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
			N.A.	
	District Total			

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Cherrapunjee (CT)	Cement Lime Spices	Cement Forest Product Spices
2	Madanrting (CT)	House Pine Hollow Block Furniture	
3	Mawlai (CT)	Hollow Block Furniture Bakery	Leather Cowmilk Vegetables
4	Nongmynsong	- - -	- - -
5	Nongthymmai (CT)	Iron Steel Furniture Furniture Bakery	Iron Scraps Charcoal Bakery Prod.
6	Pynthorumkhra (CT)	Iron Steel Furniture	
7	Shillong Cantonment (CB)	-	-
8	Shillong Municipality (M)	Iron Steel Furniture Furniture Bakery & Confectionery	Agriculture Forest Product Spices

Table 47 shows that Cherrapunjee exports goods that are manufactured in towns itself like cement, forest products and spices. Madanrting does not export any of its three most important commodities manufactured there. Nongthymmai exports only Bakery Products out of the three most essential commodities it manufactured. Mawlai and Shillong Municipality do not export any of their respective three most important commodities manufactured there. Instead both towns export other commodities. Nongmynsong and Shillong Cantonment neither manufactured any commodity nor exported any.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

	Median number of rooms	2	2	2	2	2	2	2	2	2
District Total		127,813	68,769	59,044	6,117	1,535	4,582	97,728	64,592	33,136

Data source : Census of India 2001, H-series: " Tables on Houses, Household amenities and Assets".

From table 48, it is noticed that majority of the households of the district live in owned houses. Those who live in rented houses constitute less than 40.0 percent of the total households of the district and those who live in houses neither owned nor rented form less than 5.0 percent of the total households. Among the scheduled caste and the scheduled tribe households too, the majority of the households of those two communities live in owned houses. While those who live in rented houses account for 24.6 percent of the total households in case of the scheduled caste and 28.6 percent in case of scheduled tribe households. Those who live in houses neither owned nor rented form only 11.0 percent of the total households in case of the scheduled caste and 2.8 percent in case of scheduled tribe households.

While the highest number of the households who live in owned houses occupy 3+ rooms followed by the number of those who occupied two rooms, the highest number of the households who live in rented houses occupy two rooms followed by the number of those who occupy one room. Rents play a role in this regards. The highest number of the households who live in houses neither owned nor rented occupy two rooms followed by the number of those who occupy three rooms.

The same trend is noticed among the scheduled caste and the scheduled tribe households who live in owned houses and rented houses. In regard to the scheduled caste and scheduled tribe households who live in houses neither owned nor rented the highest number of the households of both communies occupy two rooms followed by the number of those who occupy one room. The lowest number of households of all tenure statuses and both communities have no exclusive room in their houses.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLD LIVING IN PERMANENT, SEMIPERMANENT AND TEMPORARY HOUSEES, 2001

Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

Permanent : 1. Permanent houses refers to those houses whose wall & roofs are made of pucca marerials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other sheet

Semi permanent : 2 Semipermanent houses refer to those houses made of other types of materials

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of kutcha materials i.e.where grass, leaves, reeds, bambdoo mud, unburnt bricks, are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks.

The type of houses the people are living in indicates the economic condition of the households. From table 49, it is noticed that the highest proportion of the households of the district live in semi-permanent houses. Those who live in temporary houses form a very small percentage of the households. While in rural areas of the district the highest proportion of the households live in semi-permanent houses followed by the proportion of the households who live in permanent houses, in urban areas, the highest proportion of the households live in permanent houses followed by the proportion of those who live in semi-permanent houses. Those households who live in temporary houses whether in rural or urban areas form the lowest proportion of the households of the district.

The same trend is noticed in the C.R.D. Blocks of the district, except in Mylliem, Mawsynram and Shella-Bholaganj where the proportion of the households who live in permanent houses is higher than the proportion of those who live in semi-permanent houses. In the rural area of the district, it is noticed that in Mawsynram and Shella-Bholaganj while the proportion of the households who live in permanent houses is higher than the proportion of those who live in semi-permanent houses, in Mawsynram and Shella-Bholaganj, in Maphlang, Mylliem, Mawrengkneng, Mawkynrew and Pynursla the proportion of the households who live in semi-permanent houses is higher than the proportion of those who live in permanent houses. It is further noticed that in Mawsynram and Shella-Bholaganj the proportion of those who live in temporary houses is higher than the proportion of those who live in semi-permanent houses. In urban areas the proportion of those who live in permanent houses is higher than the proportion of those who live in semi-permanent houses. Those who live in temporary houses form the lowest proportion.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

* Based on the improved drinking water source, drinking water supply has been classified as 'mproved' or other wise. If the household has accesse to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to'limprove drinking watere source'. However, the concept of improved drinking water is state specific and this is to be concidered accordingly.(As per state of Meghalaya, Tap, Hand pump, Tube Well, Well are considered as 'Improved' source of drinking water.

For a household to live in minimum comfort, it should possess some of the basic amenities of life such as improved drinking water, electricity, etc. Form table 50, it is noticed that that though the majority of the households in the district do have improved drinking water, electricity, bathroom, toilet and drainage in their houses, still a few households are without those amenities.

In the C.R.D. Blocks, it is noticed that the majority of the households have improved drinking water in their houses. Electricity is available to the majority of the households only in Mawphlang, Mylliem, Mawryngkneng, Shella-Bholaganj and Pynursla. In Mawkynrew and Mawsynram only 19.8 percent and 46.3 percent respectively of the household have electricity. Bathroom is available to a minority of the households in all C.R.D. Blocks of the district, except Mylliem where it is available to a majority of the households. Toilet and drainage is available to a minority of the households in all C.R.D. Blocks, except Mylliem.

Percentage in brackates
Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

The type of fuel used by the households to cook their food depend on the availability of that fuel in the area as well as the economic status of the households a as far as rural areas is concerned. In urban areas, the people can choose between cooking gas, kerosene and electricity. From table 51, it is noticed that, more than 50.0 percent of the households of the district use firewood as fuel for cooking. Those using cooking gas and kerosene as fuel for cooking form 18.9 percent and 14.8 percent respectively of the total households. The remaining types of fuel are used by a very insignificant percentage of the households.

In the C.R.D. Blocks, except Mylliem, firewood

as fuel for cooking is used by more than 80.0 percent of the households in Shella-Bholaganj and more than 90.0 percent of the households in the remaining C.R.D. Blocks. In Mylliem C.R.D. Block, the households have their choices of fuel, among firewood, cooking gas and kerosene. Though the highest proportion of the households of the C.R.D. Block used cooking gases, the proportion using firewood and kerosene is equally distributed. However, in rural areas of the Block more than 70.0 percent of the household used firewood as fuel for cooking. The remaining proportion of the households used either kerosene, cooking gas or charcoal. Other types of fuels do not find favour with the rural households of the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVECES AND NUMBER OF HAVING EACH OF THE SPECIFIED ASSEST, 2001

Sl. No.	Tehsil	Total Rural Urban	Total No.of house-holds	House-holds availing banking services	Availability of households assets						
					Radio/ Transistor	Telev-ision	Tele-phone	By-cycle	Scooter, Motor Cycle, Moped	Car, Jeep, van	None of the specifeid assets

		Rural	10,974	1,992	3,407	1,572	300	112	98	161	7,002
		Urban	-	-	-	-	-	-	-	-	-
District Total			**127,813**	**42,378**	**46,239**	**50,994**	**18,378**	**3,798**	**5,053**	**6,344**	**58,415**

From table 52, it is noticed that the number of households in the district who do not avail banking services and do not possess any of the specified assets are more than the number of those who avail banking services and own each of those specified assets.

In the C.R.D. Blocks, except Mylliem, the number of households who avail banking services is below 2000 in all the C.R.D. Blocks, the lowest being Mawkynrew where only 233 households avail banking services. Transistors/Radios are owned by a comparatively higher number of households in all the C.R.D. Blocks while telephones, bicycles, two-wheelers and four-wheelers are owned by a comparatively smaller number of households, though the number of households who own four-wheelers is higher than those who own two-wheelers.

Places of Religious Importance

Smit : Situated about 14 Kms. From Shillong, Smit is the seat of the Syiems of Khyrim. A religious festival by the name of Pomblang Nongkrem (beheading of goat) is held every year in this village during November. It is the most celebrated festival and is a relic of the days when the Syiems of the Shyllong State of which Khyrim is a part, held sway over an extensive territory over areas well within Assam and Sylhet of Bangladesh and received annual tributes of goats from local chieftains throughout the kingdom. These goats are sacrificed during the religious part of the festival called "Pom Blang" (beheading of goats) and dedicated to the patron deities of the Syiems. These religious observances are still observed with great pomp and ceremony and are followed by dances called Shad Nongkrem (Nongkrem Dance) in which unmarried damsels clad in richest silks and adorned with gold and silver ornaments take part in the arena in front of the "Ingsad" residence of the "Syiem-sad" (High Priestess) while young men in their costly ceremonial attire, holding sword on one hand and a yaktail whisk in the other, dance around them to the piping of flutes (tangmuri) and the beating of drum. The festival lasts for five days. The "Iingsad" is a thatched house constructed with timber without using a single nail.

Places of Tourist Interest

Sohra : Located about 52 Kms. From Shillong, it is situated amidst deep gorges and roaring waterfalls. No other place in India can offer such variety of falls, the Nohsngithiang Falls (Mawsmi Falls), the legendary Dainthlen Falls, the romantic Nohkalikai Falls (the world's fourth tallest) and other smaller ones down every precipice. Close by are a network of limestone Caves, between Sohra and Mawsmai, the end of which are yet to be explored.

Mawsynram : It lies about 61 Kms. From Shillong. It is a closed rival of Sohra (Cherrapunjee) in terms of annual rainfall. Its major attraction is the picturesque cave called "Mawjymbuin". It is so called from the breast-shaped stalactites hanging down from its ceiling and a giant stalagmite formed at its floor. It is a place of natural wonder for sightseers. In and around Shillong we have the following places of tourist interest :

Ward's Lake : Located in the heart of Shillong is a beautiful artificial lake called Ward's Lake, after the name of a person responsible for its construction, Sir William Ward, the then Chief Commissioner of Assam. The Lake and its gradually undulating grounds are hemmed in by lush green slopes. It has a very pleasant and winding walk-a-away all round its parameter set in cobbled sand stones. It has a striking arched bridge over it providing an exhilarating view of the piscicultural wealth. It also has limited boating facilities.

Lady Hydari Park : It extends over a kilometer in length and is repleted with roses and flowers of the most exquisite hue and fragrance and has an excellent mini zoo-cum-deer park attached it.

Golf Course : Nestled within tall and whispering pines is the 18 – hole Shillong Golf Course, one of the finest Golf Courses in the world.

Botanical Garden : Just below the Ward's Lake is a secluded but captivating spot with plethora of indigenous and exotic plants.

Jharokha Art Gallery : Located in the heart of Shillong, it is the only art gallery run and managed by a renowned artist, Smti Jaya Kaha, who has successfully held exhibitions of her paintings in big metropolises of India and abroad.

Spread Eagle Falls : Located in the outskirt of Shillong is a sparkling waterfall which looks like an eagle with wings spread out. Hence the name Spread Eagle Falls. The falls has fairly steep cliffs on three sides with very deep pool beneath, a soothing setting amidst calm nature. The falls is locally known as Urkaliar or the Falls into which Ka Liar slipped.

Bishop and Beadon Falls : Located in the outskirt of Shillong in the west are the two beautiful and captivating waterfalls, the Bishop Falls and the Beadon Falls, both cascading down the same escarpment into a deep valley, the mass of water dissolving into misty sparks.

Sweet Falls : Situated near Happy Valley and Mawsbuit is the Sweet Falls. It is the most suitable place for a day's outing or picnic. It has always been in the news for its thirst for human life.

Elephant Falls : Located about 10 km off Shillong on the Shillong Mawphlang road is the exquisitely

beautiful Elephant Falls. It is the most frequented of the several waterfalls and tourist spots in and around Shillong. The surroundings of the Elephant Falls and its subsidiary fall are lush green and the rivulet has thick moss, lichens and ferns covering its stony banks. Beautiful Rhododendrons and myriad species of ever chirping birds make the place an enchanting one.

Crinoline Falls : Located near the Lady Hydari Park is the Crinoline Falls, a cool spot within the city limits.

Shillong Peak : Located about 10 km from Shillong and at an altitude of 1965 meters above mean sea level, the peak is an ideal picnic spot and offers a panoramic view of the scenic countryside. It is the highest point of the State of Meghalaya. Obeisance is paid to U 'Lei Shyllong' (god) at the sanctum sanctorum at the peaks summit every spring by the religious priest of Mylliem State. In the evening the city lights below appear like star studded abyss when viewed from the Peak.

Scope of Village Directory and Town Directory

Incorporation of non-census data in the District Census Handbook known as the Village Directory and the Town Directory started in the 1971 census. In that census the data presented in the Village Directory were educational and medical facilities, drinking water, post and telegraph, market days, communication (bus stop, railway station and water way), nearest town from the village, power supply and staple food. On land use pattern the data presented were forest, area irrigated, area unirrigated, cultivable waste and area non-available for cultivation. Data on land use pattern could not be shown due to their non-availability.

In the 1981 census, by and large, the same data as that of 1971 were presented in the Village Directory. The only addition to that of 1971 was approach to the village, the area under jhum cultivation due to heavy demand on those data by the data-users. In the 1991 census, the same data were presented without addition or subtraction.

In the Census of India, 2001, the scope of the Village Directory has been enlarged to cover data on telephone facilities, the number of commercial and co-operative banks, the number of agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema/video halls, sports club, stadium/auditorium) available in the village. It also covers data on receipt of newspaper/magazine in the village and the most important commodities manufactured in the village.

The Town Directory of the 1971 census had seven statements. Statement-I presented data on status, growth, History and functional categories of towns; Statement-II, Physical Aspects and Location of Towns; Statement-III, Municipal Finance; Statement-IV, Civics and other Amenities; Statement-V, Medical, Educational, Recreational and Cultural Facilities in towns; Statement-VI, Trade, Commerce, Industry and Banking; and Statement-VII, Population by Religions. Statement I to VI were retained in the 19811, 1991 and 2001 census also. In the 1981 and 1991 censuses, Statement-VII was dropped and Statement-IVA, showing civic and other Amenities in slums was incorporated. In the Census of India, 2001, Statement-IVA has been replaced by Statement-VII displaying the same data as Statement-IVA.

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school

with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

Column 6 : Educational

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family W'elfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM

(ii) Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i) Agricultural Credit Society	CS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i) News Paper	N
(ii) Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal	GC
(ii) Private Canal	PC
(iii) Well (without electricity)	W

(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I : It gives the abstract of educational, medicaland otheramenities available in villages C DBlock wise of the district.

Appendix-I-A : Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B : Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C : Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III : It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV : C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V : Summary showing number of villages not having Scheduled Castes population.

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII : The appendix shows the list of villages according to proportion of the

A, VII B : Scheduled castes and Scheduled Tribes to the total population by ranges.

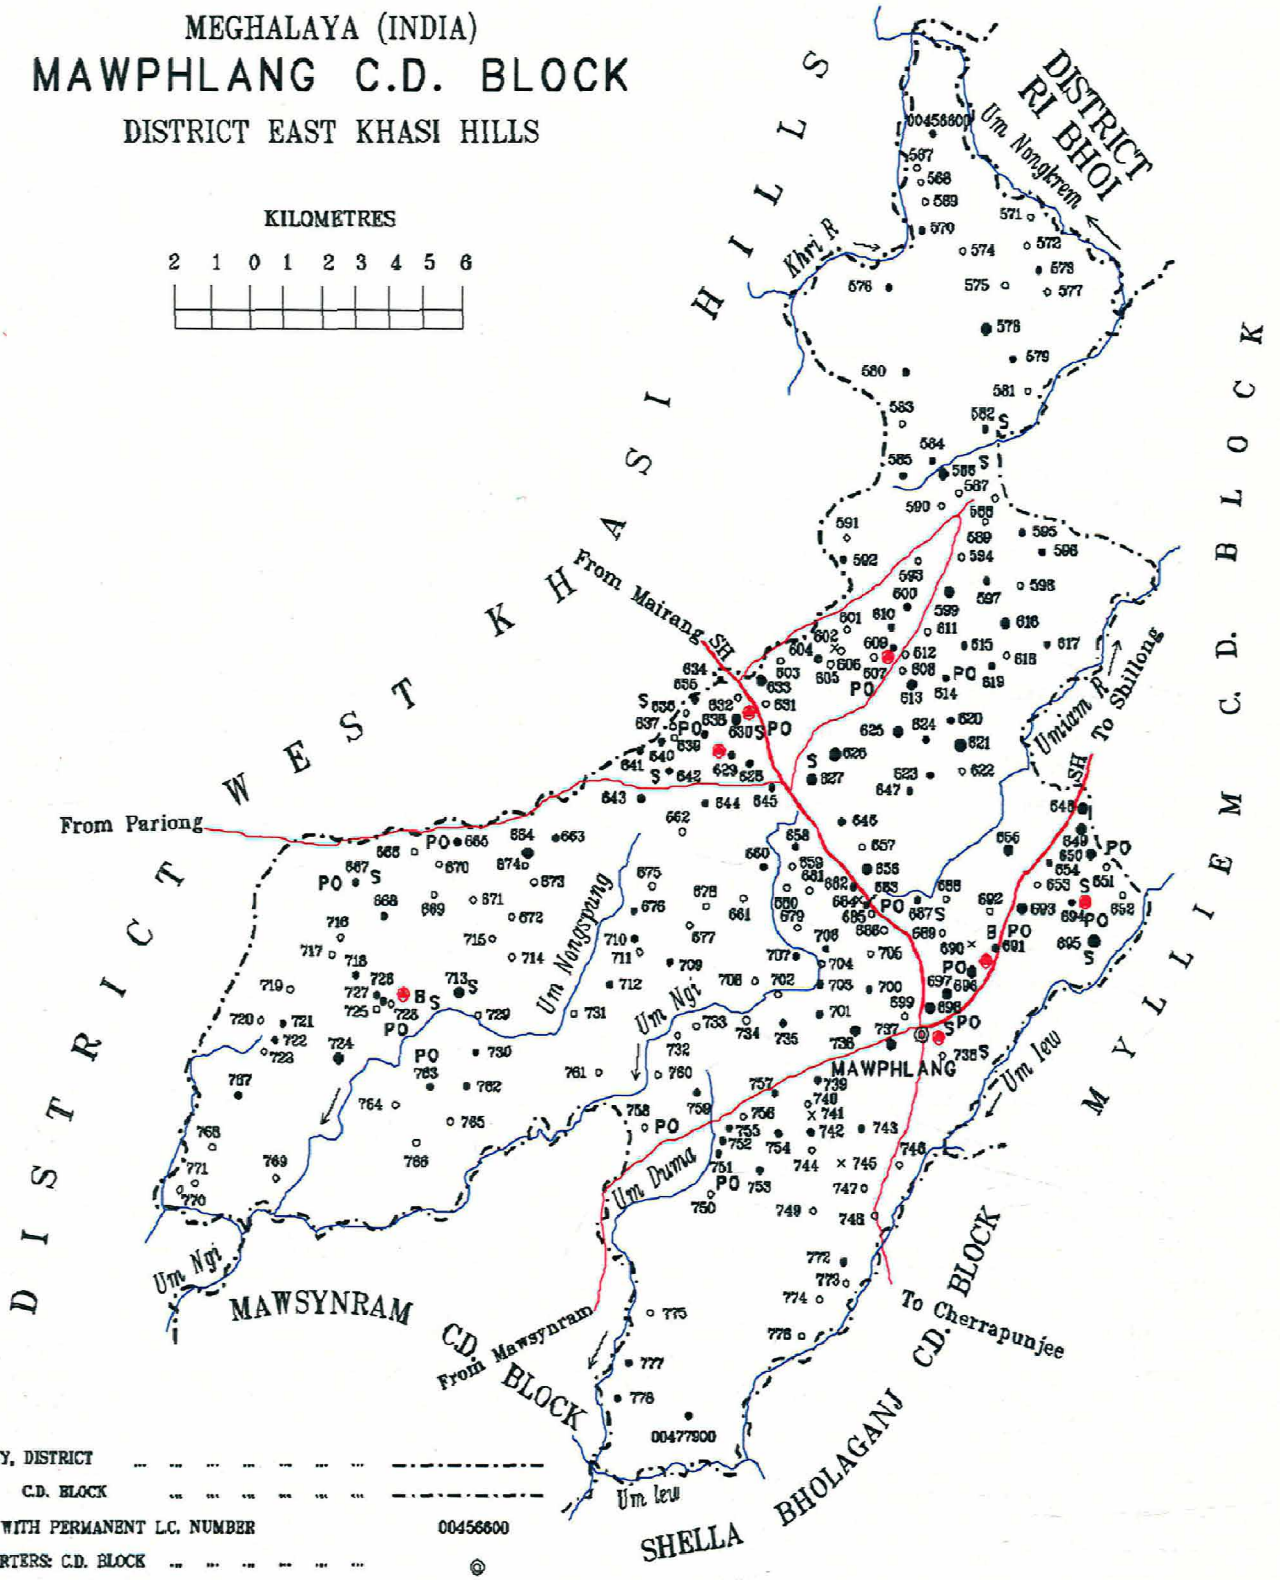

Appendix-VIII : Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX : Shows number of different types of girls school in a village.

Section II - Town Directory

Town Directory

Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement - I

Status and Growth History:

Column (2) : Class, name and civic administration Status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement - II

Physical Aspects and Location of towns, 1999:

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure

in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement - IV

Civic and Other amenities, 1999:

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement-V

Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run

by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

.Column 6 to 9 : The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes "Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11to14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement - VI

Trade, Commerce, Industry and Banking, 1999:

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement -VII

Civic and other Amenities in Slums, 1999:

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

Part B

Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 6,38,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is another important publication of 2001Census gives basic information on area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I-VIII

Annexure-I

Number of villages under Gram Panchayats

There is no Gram Panchayats as Administration Units in the State of Meghalaya. Hence, the data is not available and cannot be furnished under this Annexure.

Annexure-II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration. The definition of each of the above is given below.

Fertility

In demography, the term fertility is used in relation to the actual production of children or occurrence of births. Fertility is a measure by which a population adds to itself and normally assessed by relating the number of births to a full or part of the population, such as the number of married women or women of the child-bearing age. It must, however, be remembered that fertility has all to depend on marriage. No marriage, no fertility. Early marriage, high fertility and late marriage, low fertility. Crude Birth Rate (CBR) is the most simple and perhaps the most widely quoted measure of fertility. It is the ratio of the number of live births in a year to the midyear population normally expressed per 1000 population.

Mortality

Mortality is the cessation of life of a member of a population commonly known as death. It is a measure by which a population deducts from itself and normally assessed by relating the number of deaths to the population. Crude Death Rate (CDR) is the simplest and most used measure of mortality. It is the ratio of the number of deaths in a year to the midyear population normally expressed per 1000 population.

Migration

Migration is the third component of population change. It is a movement of the population from one place to another for various reasons. In census migrants are classified by place of birth and place of last residence. A persons is considered a migrant by place of birth if the place he/she is enumerated during census is other than the place of his/her birth. Similarly, a persons is considered a migrant by place of last residence if he/she is enumerated in a place other than his/her immediate place of last residence. A persons enumerated in his/her place of birth can be a migrant by place of last residence if his/her immediate place of last residence is other than his/her place of birth.

Annexure-III

Various measures of fertility and mean age at marriage

The various measures of fertility have been given in the Analytical Note under the non-census-concepts. In this annexure we are going to analyse the following indicators of fertility.

(i) General Fertility Rates (GFR):

It is the number of live births per 1000 women in the reproductive age-groups (15-49) years in a given year. From the table we know that average General Fertility rate of the State comes to 129.7. Amongst the districts, East Garo Hills is having lowest fertility rate with only 105.7 while West Khasi Hills district gives highest rate with 155.8.

(ii) General Marital Fertility Rates (GMFR):

It is the number of live birth per 1000 married women in the reproductive age-group (15-49) years in a given year. The table shows that the General Marital Fertility rate of the State as 140.1 and the West Khasi Hills district shows highest rate with 168.3 while East Garo Hills shows lowest rate with 114..3.

(iii) Total Fertility Rates (TFR):

It is the total of the Age Specific Fertility rates for the entire reproductive age span. It shows the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of the reproductive period. The table indicates the total fertility rate of

the State as 4.2. The higest rate amongst the district indicate in West Khasi Hills with 5.0 and the lowest rate in East Garo Hills with 3.4.

(iv) Total Marital Fertility rate (TMFR):

It is the average number of children that would be born to a married woman if she excercises the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of the reproductive period. As per the table the Total Marital Fertility rate of the State is 4.5. West Khasi Hills and Jaintia Hills districts shown the highest rate with 5.3 each while East Garo Hills gives lowest rate with 3.5.

Various measures of fertility and mean age at marriage, 1991

Sl. No.	State/District	GFR	GMFR	TFR	TMFR	CBR	No of children ever born per woman in age group 45-49	Child woman ratio	Mean age at marriage
1	2	3	4	5	6	7	8	9	10
1.	**Meghalaya State**	**129.7**	**140.1**	**4.2**	**4.5**	**22.6**	**4.8**	**6.8**	**19.3**
2.	Weast Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
3.	East Garo Hills District	105.7	114.3	3.4	3.5	20.2	4.1	7.0	19.2
4.	South Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
5.	West Khasi Hills District	155.8	168.3	5.0	5.3	24.8	4.9	8.2	19.6
6.	Ri-Bhoi District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
7.	East Khasi Hills District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
8.	Jaintia Hills District	153.1	167.6	4.9	5.3	25.6	5.4	8.2	19.1

(v) Crude Birth Rate:

It is the ratio of the number of live births in a particular year to the mid year population of the same year, expressed per 1000 population. The Crude Birth rate of the State Shows as 22.6 and the highest rate with 25.6 is shown in Jointia Hills district while the lowest rate with 20.2 is shown in East Garo Hills district.

(vi) Number of Children Ever Born per Woman in age group 45-49:

This table presents the number of childredn ever born per woman in the aghe group of 45-49. From the table we find the average number of children ever born per woman aged 45-49 as 4.8 for the state. Jaintia Hills district gives highest number with 5.4 while East Garo Hills gives the lowest number with only 4.1.

(vii) Child Women Ratio:

It is the number of cfhildren in the age group 0-4 years per 1000 women in the age group 15-49 years. The table shows the child women ratio as 6.8 for the State. Both West Khasi Hills and Jaintia Hills give higher ratio with 8.2 each while Ri_Bhoi district and East Khasi Hills give lowest with 6.1 each.

(viii) Mean Age at Marriage:

It is the mean age at marriage of currently married women during the decade. The mean age at marriage for the state indicates 19.3. In the district level the mean age at marriage shows higher in Ri-Bhoi district and East Khasi Hills district with 19.9 each while it is low in West Garo Hills and South Garo Hills with 18.7 each.

Annexure-IV

Migration

Migration is one of the important aspects in the field of population studies. A community or country can gain population either by births or by inmigration. It can lose population by deaths of the members of the population or by outmigration. Migration is, therefore, like births and deaths, is a

major factor in changing the size and structure of the population. It effects the areas to which the migrants move and from which they move out. As stated in Annexure-II, in the census of India, migrants are classified only by place of birth and place of last residence.

Migrants by place of birth, 1991

Birth place	Meghalaya	East Khasi Hills
1	2	3
Total Migrants	267682	119,358
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	141304	54,141
	(52.8)	(45.4)
Born in other districts of the state of enumeration	27429	13,829
	(10.2)	(11.6)
States in India beyond the state of enumeration	78895	43,041
	(29.5)	(36.1)

Migrants by place of birth, 2001

Birth place	Meghalaya	East Khasi Hills
1	2	3
Total Migrants	358,447	132,836
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	209,891	63,089
	(58.6)	(47.5)
Born in other districts of the state of enumeration	44,108	15,690
	(12.3)	(11.8)
States in India beyond the state of enumeration	92,088	48,367
	(25.7)	(36.4)

From the table it is noticed that at both state and district levels, the highest proportion of the migrants have their place of birth within the district of enumeration followed by those whose place of birth is in other state of India beyond the state of enumeration. At state and district levels the proportion of those whose place of birth is within the districts of enumeration is 58.6 % and 47.5 % respectively. The proportion of those whose place of birth is in other districts of the state of enumeration form 12.3 % of the total migrants at state level and 11.8 % at district level.

It is further noticed that the district level proportion of the migrants whose place of birth is within the districts of enumeration and in other State in the districts of the State of enumeration are lower than those at the State level, while the proportion of the migrants from other state in India beyond the State of enumeration and outside India are higher than those at the state level.

Migrants classified by place of last residence - 1991

Place of last residence	MEGHALAYA	East Khasi Hills
1	2	3
Total	266,844	117,259
	(100.0)	(100.0)
Elsewhere in the district of enumeration	156,563	59,505
	(58.7)	(50.7)
In other districts of the state of enumeration	26,301	11,962
	(9.9)	(10.2)
States in India beyond the state of enumeration	70,318	38,601
	(26.4)	(32.9)

Migrants classified by place of last residence - 2001

Place of last residence	MEGHALAYA	East Khasi Hills
1	2	3
Total	379,192	138,183
	(100.0)	(100.0)
Elsewhere in the district of enumeration	244,916	75,701
	(64.6)	(54.8)
In other districts of the state of enumeration	41,572	12,763
	(11.0)	(9.2)
States in India beyond the state of enumeration	83,082	44,865
	(21.9)	(32.5)

Like the proportion of the migrants by place of birth, the highest proportion of the migrants by place of last residence at both state and district levels had their place of last residence elsewhere in the district of enumeration followed by the proportion of those whose place of last residence was in other States of India beyond the state of enumeration. The proportion of those whose place of last residence was in other districts of the state of enumeration constitutes 11.0 % at State level and 9.2 % at district level. The proportion of those migrants whose place of last residence was outside India form only little over 2.0 % of the total migrants at state level and a little over 3.5 % at district level.

It is further noticed that the district level proportion of migrants who had their place of last residence elsewhere in the district of enumeration and in other district of the State of enumeration is lower than that those at State level while the proportion of migrant whose last residence is in the India other district of the state of enumeration is higher than that at district level.

Annexure - V

Religions

Religions are one of the most important social institutions. It is also one of the basic characteristics of the population. It has tremendous power to influence the cultural traits and social behaviours of a society. For this reason, it has been one of the field of interest of anthropologists, demographers, administrators and planners. To meet the various requirements of the aforesaid professionals, it has been customary in population census to collect the religion professed by the population. But since India is a secular nation where an individual can professed and practice any religion of his choice, the number of religion collected in census runs to hundreds. It is however, not feasible and practicable to present data on all religions and their denominations. Therefore, in census the population is classified by six major religions only. Those major religions are Hinduism, Islam, Christianity, Sikhism, Buddhism and Jainism. The rest of population professing and practicing religions are grouped under "Other religions and persuasion". The population who cannot or do not wish to state their religions are clubbed under "Religion not stated".

Percentage distribution by religion

Religious communities	1991				2001			
	Persons	Percentage			Persons	Percentage		
		Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8	9
East Khasi Hills								
All Religions	535,555	100.0	56.8	43.2	660,923	100.0	58.0	42.0
Hindus	116,385	21.7	4.3	17.5	129,373	19.6	4.7	14.9
Muslims	7,471	1.4	0.1	1.3	9,796	1.5	0.2	1.3
Christians	299,425	55.9	35.1	20.8	403,277	61.0	38.4	22.6
Sikhs	2,369	0.4	0.0	0.4	2,537	0.4	0.1	0.3
Buddhists	1,901	0.4	0.0	0.3	2,338	0.4	0.0	0.3
Jains	363	0.1	0.0	0.1	364	0.1	0.0	0.1
Others	106,668	19.9	17.3	2.6	110,959	16.8	14.3	2.5
Religion not stated	973	0.2	0.0	0.1	2,279	0.3	0.3	0.1

From the above table, it is noticed that the majority of the population of the district are Christians. At State level, the Christians constitute 70.3 % while at district level is 61.0 %. Hindus constitute little over 13.00 % of the population at state level while at district level it constitute little over 19.5 % . The Muslim, the Buddhists, the Sikh the Jain form an insufficient percentage of the population at both state and district level. The proportion of those populations who profess "Other religions and persuasions" gives 11.5 % and 16.8 % Which is comparatively high.

Annexure – VI

Marital Status

Though not all the married couples can produce children, fertility is the outcome of marriage. Without marriage there cannot be fertility. Various indicators of fertility discussed at Annexure – III can be calculated only by taking into consideration the number of married female and the number of children born in the year. Therefore, it is essential and important that in every census the marital status of each and every individual irrespective of age and sex is collected. On the basis of return thus collected, the population, both male and females, is classified into four marital status. These four marital status are Never Married, Married, Widowed and Divorced/Separated.

Percentage distribution of population by marital status, 2001

Area Name	Age-group	Total		Never married		Married		Widowed		Divorced/Separated	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12
East Khasi Hills	All ages	100.0	100.0	63.1	57.0	34.5	33.8	1.2	6.1	1.3	3.1
	0-9	100.0	100.0	100.0	100.0	0.0	0.0	0.0	0.0	0.0	0.0

Note : Total will not add up to 100.00 as "Unspecified" marital status is excluded

From the above table, it is noticed that the marital status of cent percent of male and female population upto 9 years of age is "Never Married" which shows that the child marriage is not practiced in the district. The Never Married population constitute the majority of the population of both sex followed by the Married population. The widowed and Divorced/Separated populations form a very insignificant proportion of the district.

By age group, it is noticed that the highest proportion of the married males is in the age group 40 – 44 while that of females in the age group 35 – 39 and the lowest for both males and females is in 10 – 14.It is also noticed that widowed females are more than widowed males almost in all age groups. The highest proportion of the Divorced/Separated males is in the age group 70 - 74 while that of females is in the age group 50 – 54.

Annexure – VII

Age, Sex and Education level

With a view to finding out the extent of literacy of the population, it has been a practice in census to ask of all those aged 7 and above, whether or not they are literate, that is whether or not they can

both read and write with understanding in any language, besides asking about the age and sex of each individual. Those of the population who are literate, another question about their educational attainment are asked of. On the basis of the replies to those two questions, the population is classified into literate and illiterate and the literate are further classified by age and sex and educational levels.

(i) Literate without educational level.
(ii) Below Primary
(iii) Primary
(iv) Middle
(v) Matric/Secondary
(vi) Higher Secondary/Intermediate/Pre-University/ Senior Secondary
(vii) Non-Technical Diploma or Certificate not equal to Degree
(viii) Technical Diploma or Certificate not equal to Degree
(ix) Graduate and above.

For the purpose of this annexure, however items (vi), (vii) and (viii) are clubbed together.

From the statement, it is noticed that the highest proportion of both the male and female literates, with more than 32.0% have 'Below Primary' as their education level followed by the proportion of those with 'Primary', 'Middle' and 'Matric/Secondary' levels. The literate 'Without Educational Level', together with 'Higher Secondary/P.U. etc', and 'Graduate and above' could form more than 17.0% of the literates of the district. The proportion of 'Higher Secondary/P.U. etc with 8.6% male and 7.8% female literates and the proportion of 'Graduate and above' with male 9.6% and female literates 8.3% are the highest among the districts of the state.

By age, it is noticed that the highest proportion of literates both males and females are 98.8% and 99.0% respectively found the male population in the age of 7 and female in the age of 8 years in the education level of 'Below Primary'. The highest proportion in the educational level of 'Primary' is shown under the age of 13 years, in the 'Middle' under the age of 15 years and 'Matric/Secondary' in the age 17 years while 'Graduate and above' in the age group 55-59 for males and 25-29 for females.

Annexure – VIII

Mother Tongues

Though besides the mother tongue of an individual, two other languages known by an individual is collected in census, tabulation and presentation of language data is base on the mother tongue of an individual. By definition, mother tongue is a language spoken by a person's mother to the person in his childhood. If the mother died in infancy, the language mainly spoken in person's home in childhood is the mother tongue of that person. In case of infants and deaf-mutes, the language usually spoken by the mother is the mother tongue.

India is a multi-lingual nation, collection of the mother tongue of each and every individual in various censuses has thrown light on the linguistic and ethnic composition of the country as well as the states. In India there are 18 scheduled languages and 96 non-schedule languages. Even in a small state like Meghalaya more than 80 non-scheduled languages are spoken in addition to the 18 scheduled languages. However, for the purpose of this annexure, we are presenting only those biggest mother tongues arranged in descending order irrespective of the languages being scheduled or non-scheduled. The statement given below shows the percentage distribution of the numerically biggest languages arranged in descending order of the number of speakers in district.

From the Statement, it is noticed that the mother tongue of the majority of the population in the district is Khasi. The speakers of Khasi language in the district recorded highest with 72.6 percent. Though the second and third highest proportion of the population return Bengali and Nepali as mother tongue, they constitute a little over 12.00 percent of the total population only in the district. The speakers of other mother tongues from a very insignificant percentage of the population of the district. Among the speakers of Khasi language the proportion in the rural is higher with 87.7 percent than the urban areas which recorded only 51.8 percent of the population.
