KIANG NANGBAH MONUMENT

Located on the banks of Syntu Ksiar, alongside the river Myntdu, there is a vast field known as Madiah Kmai Blai. At the centre of this field stands the elegant Kiang Nangbah Monument, a hollow tower-like structure of typical Jaintia design, erected by the Jaintia people in honour of U Kiang Nangbah, the Jaintia patriot who died a martyr to the cause of Jaintia freedom, at the hands of the British rulers.

The field known as Madiah Kmai Blai is itself of historical importance, as it was on this field that a meeting of Jaintia leaders took place during 1861. At the meeting U Kiang Nangbah took oath to lead his people, come what may, in their fight to drive the British out of their land. He was, however, asked whether he could do something to show that they had correctly chosen him as their leaders. Kiang Nangbah looked around, said not a word, but plunged suddenly on that cold wintry night into the depths of Syntu Ksiar and emerged moments later with an uprooted little plant from the stem of which three branches spread out. The Oracles agreed that it was a sign signifying the justice of their cause and the correctness of their choice of U Kiang Nangbah as leader. The meeting gave U Kiang Nangbah mandate to wage war against the British who had, by then, attempted to strangulate the local economy and interfere with the religious and cultural life of the Jaintias. It is said that U Kiang Nangbah possessed the strength of an ox, the feet of a deer, the heart of a tiger and the mind of a military strategist. Under his leadership, the Jaintias fought a bitter war of attrition for almost two years against the much superior British military might. Ultimately the British managed to seize U kiang Nangbah by deceit, on 27th December, 1862. After a summary trial, they publicly hanged him at law Musiang, Jowai on the 30th December, 1862. From the scaffold he spoke to his countrymen, loud and clear :

> "If my face turns eastwards when I die on the rope, we shall be free again within a hundred years. If it turns westwards, we shall be enslaved forever."

Appendices to Village Directory

I : Abstract of Educational, Medical and other Amenities in villages-C.D. Block level 162

I A : Villages by number of Primary Schools 164

I B : Villages by Primary, Middle and Secondary Schools 165

I C : Villages with different sources of drinking water facilities available 165

II : Villages with 5,000 and above population which do not have one or more amenities 165

Pages

III : Land utilisation data in respect of Census towns/Non-municipal towns 166

IV : C.D. Block-wise list of inhabited villages where no amenity other than drinking water facility is available 166

V : Summary showing number of villages having or not having Scheduled Caste population 166

VI : Summary showing number of villages having or not having Scheduled Tribe population 166

VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges 167

VII B : List of villages according to the proportion of the Scheduled Tribes to the total population by ranges 167

VIII : Number of villages under each Gram Panchayat (C.D. Blockwise) 172

IX : Statement showing number of girls school in the villages 172

Section II – Town Directory

Note explaining the abbreviations used in Town Directory 174

Town Directory Statement (I to VII) 178

(a) Statement I – Status and Growth History 178

(b) Statement II – Physical Aspects and Location of Towns 178

(c) Statement III – Municipal Finance 179

(d) Statement IV – Civic and other Amenities 179

(e) Statement V – Medical, Educational, Recreational and Cultural Facilities 180

(f) Statement VI – Trade, Commerce, Industry and Banking 181

(g) Statement VII – Civic and other amenities in slums 181

(h) Appendix to Town Directory – Towns showing their outgrowth with population 181

PART-B : PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract 185

District Primary Census Abstract (General) 188

Appendix to District Primary Census Abstract i.e., Urban block-wise figures of Total, SC and ST Population 194

Primary Census Abstract for Scheduled Castes 196

Primary Census Abstract for Scheduled Tribes 202

C.D.Block wise Village Primary Census Abstract 208

Urban Primary Census Abstract 274

Annexure-I : Number of Villages under each Gram Panchayat 280

Annexure-II : Note on Fertility, Mortality and Migration 1991 Census 280

Annexure-III : Various measures of Fertility and Mean Age at Marriage, 1991 Census 280

Annexure-IV : Percentage distribution of Migrants by Place of Birth/Place of last Residence, 1991 Census 281

Pages

Annexure-V : Brief account of Main Religions in the district/C.D. Blocks as per 1991 Census 282

Annexure-VI : Marital Status of Population as per 1991 Census 283

Annexure-VII : Age, Sex and Education in the district, 1991 Census 284

Annexure-VIII : Distribution of different Mother Tongues returned in 1991 Census 285

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic

amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N.K. Laskar, Director of Census Operations, Meghalaya. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. It is also the only publication that presents census data at village level in rural areas and ward level in urban areas. It is also the only publication that presents non-census data in the form of Village Directory and Town Directory at village level and town level respectively. Here, lies the usefulness of the Handbook for micro and grassroot level planning for rural development. Therefore for administrators, planners, research scholars and other data users the Handbook is a sine qua non.

Though Census is a central subject, it is being conducted by the administrative machinery of the State Government under the technical guidance of the Director of Census Operations. It is the State Government who appoints the hierarchy of Census Officers from the rank of Deputy Commissioner of a district designated as Principal Census Officer down to Primary School Teachers and other low rank government employees designated as Enumerators. It is this team of Census Officers who actually conduct the Census Operations. I am, therefore, very grateful to the Government of Meghalaya with special reference to Shri. J. Tayeng, IAS Chief Secretary to the Government of Meghalaya, Shri A. Som, IAS, Secretary, General Administration Department and a hosts of other officers who have made the entire district administrative machinery available to the Census Organization.

I am also grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India, Shri S.P. Sharma, Consultant and other officers ih the O/o, The Registrar General of India, for their timely advice and prompt co-operation whenever needed.

In this office I am grateful to Shri A. Pyrtuh, Jt. Director of Census Operations, Shri. B.L. Sharma, Dy. Director of Census Operations, Shri S.K. Baruah, Asstt Director of Census Operations, Shri A. Roy Choudhury, Asstt. Director of Census Operations, (Technical) Shri B. Marbaniang, Shri L.R. Lyngdoh, SI-I, Shri C.D. Sangma, SI-II and other officials without whose hard, sincere and painstaking labour and toil the conduct of the 2001 Census would not have been a success.

N.K. Laskar

District Highlights 2001 Census

1. Jaintia Hills District is the second largest district in terms of area and third in terms of population in the state.
2. Jaintia Hills District ranks fifth in terms of urban population which is 8.4% of the district population, and it is one fifth of the state's population.
3. In terms of population per Sq.Km, Jaintia Hills District ranks fifth in the state.
4. Jaintia Hills is having highest Sex Ratio (980) which is higher than the state Sex Ratio (972).
5. Thadlaskein C D Block is having the highest population (1,04,620) while Amlarem C D Block is having the lowest population (35,970) in the district.
6. In terms of area, Khliehriat C D block is the largest and Amlarem C D Block is the smallest in the district.
7. Khliehriat C D Block is having the highest number of villages while Amlarem C D Block has the lowest number of villages in the district.
8. The economy of the district is mainly dependent on agriculture, with 75.73% of the total workers in the agricultural sector.
9. 33.8% of the total Households in the rural areas of the district availed electricity facility for lighting.
10. Khliehriat C D Block is having the highest number of households while Laskein C D Block has the lowest number of household availing electricity for lighting in the rural area of the district.
11. Nongbah village is the most populated (5,587) and Khyndawaso (2) and Wah Lyngdoh (2) are the least populated villages in the district.
12. The condition of Census houses in the rural areas of the district is comparatively low, 40.78% of the total households live in good condition, 53.25% live in liveable condition and 5.97% live in dilapidated condition.
13. Percentage of households by types of houses in the rural areas of the district are (i) Permanent 16.47% (ii) Semi Permanent 56.5% (iii) Temporary (Serviceable) 7.08% and (iv) Temporary (Non Serviceable) 19.85%.
14. Percentage of households by type of latrine in the rural areas of the district are (i) Service Latrine 4.12% (ii) Pit Latrine 17.89% (iii) Water Closet 4.57% and (iv) No Latrine 73.42%.
15. Percentage of households by type of fuel used for cooking in the rural areas of the district are (i) Firewood 92.28%, (ii) LPG 1.87% (iii) Kerosene 2.47%.
16. Percentage of households by type of assets in the rural areas of the district are (i) Radio/Transistor 20.51%, (ii) Television 9.54%, (iii) Telephone 1.17% (iv) Bicycle 1.9%, (v) Scooter/Motor Cycle/ Moped 0.69%, (vi) Car/Jeep/Van 2.38% (vii) None 74.34%.
17. 17.19% of the total households in the district availed banking facility which is 13.13% in the rural areas and 56.32% in the urban areas.

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000

ii) At least 75 percent of the male working population engaged in non-agricaltural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Publication of the District Census Handbook was started after the 1951 Census and has been continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State/UT Governments. It inter alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain basic amenities/ facilities in each village and town of the respective district. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The 1951 series of the District Census Handbook incorporated some basic demographic and economic information of the district at the village and town levels separately in addition to some important tables on census data.

Unlike the 1951 District Census Handbook, the 1961 District Census Handbook was made to cover village-wise and town-wise information on the availability of different amenities such as educational facilities, supply of drinking water, supply of electricity, etc. shown by means of abbreviations placed against the name of each village/town in the Primary Census Abstract itself.

In 1971 the District Census Handbook was divided into three parts. Part A contained Village and Town Directory, Part-B contained Primary Census Abstract and Part-C contained Analytical Report, Administrative Statistics and District Census Tables. Part-C was not published in many states/union territories including Meghalaya.

The scope of the 1981 District Census Handbook had been enlarged specially by inclusion of additional information on amenities like existence of kutcha/ pucca roads, distance from the nearest town, land-use data and special Primary Census Abstract for Scheduled Castes and Scheduled Tribes at C.D. Block/Town levels which was another innovation introduced in the 1981 series.

The manner of presentation of the District Census Handbook for the 1991 Census was by and large the same as followed in 1981. However, the format for presenting data in Primary Census Abstract had been restructured slightly in the 1991 Census by incorporating nine-fold Industrial Classifications of main workers against four-fold Industrial Classifications presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was presented in the Primary Census Abstract for the first time.

The scope of the 2001 District Census Handbook has been enlarged by incorporating thirteen appendices to Section-I of Part-A against four in the 1991 District Census Handbook. Those additional appendices display the list of villages by number of Primary Schools, the list of villages by number of Primary, Middle and Secondary Schools, the list of villages with different sources of drinking water facilities available, the list of villages with 5000 and above population which do not have one or more basic amenities, the list of census towns which do not have one or more amenities, summary showing the number of villages having or not having Scheduled Caste/Tribe population, C.D. Block wise number of villages under each Gram Panchayat and statement showing the number of girls' school in the villages. Analysis of data of the 1991 census on fertility, mortality, migration, religions, marital status, languages, etc. have also been included as annexures to the Primary Census Abstract.

(ii) Brief History of the District

Origin of the name of the district

The name "Jaintia" has been in use only when the area came under the British rule in 1835. The name was used to differentiate it from the plains areas

of the old Jaintia Kingdom, the capital of which was Jaintiapur, the whole area of which is now in Bangladesh.

The name Jaintia has been derived variously by different authorities. Late S.K. Chatterjee, the noted philologist, suggested that it could be an Aryanized form of the name "Synteng" by which the people of the Jaintia Hills used to be called till recently. That name has been replaced by the term "Pnar" which the local people prefer.

Another authority derived the name from that of the goddess Jayanti Devi, one of the deities worshipped by the Jaintia royal family when they were converted into Hinduism, probably in the 16th century after consolidating their sway over the plains tracts in the south.

History

The present Jaintia Hills District constituted the nucleus from which the Jaintia Kingdom eventually developed. This kingdom began to play an increasingly important role in the history of the North-eastern region from the 17th century onward.

The Jaintia Kings who belonged to the royal family of Sutnga at first ruled in the hills only but gradually extended their territory by military conquests achieved both in the areas to the north and the south, particularly towards the south. It was probably not long after they had transferred the capital from Nartiang in the hills to Jaintiapur in the plains of Sylhet that they became converted to Hinduism. However, they retained their cultural tradition and like their kinsmen in the Khasi Hills, they reckoned their descent through the female line. Dalton wrote that the royal family still " dipped into the best Cossya blood " when getting their daughters married, since it was through them that succession would have to be transmitted, a king being succeeded in this matrilineal society by the eldest son of his sister.

The kingdom had generally peaceful relationships with the neighbouring kingdoms of the Ahoms and the Cacharis. But occasionally these relations were marred by conflicts. The hill territory suffered comparatively little in these conflicts and virtually remained intact till the very end of the dynastic rule, that is, till the seizure of the kingdom by the British in 1835. At the height of its power, the Jaintia kingdom was the largest and most powerful of the kingdoms in the area that became known under the British rule as the Khasi and Jaintia Hills District.

In any case, the British had even in the late 18th century, that is, immediately after they obtained possession of Eastern Bengal, been involved in armed conflict with the Jaintia Kingdom in the plains in the south, ostensibly over the question of navigation rights in the Surma Valley, which formed the boundary between the British possessions and the Jaintia Kingdom.

Later in 1821, the British became involved again in the affairs of the kingdom because a number of British subjects had allegedly been abducted for sacrifice, the Rajas being devotees of Kali. One of the intended victims escaped and brought the news to the authorities and a demand for explanation was sent to the Rajah, including punishment of those guilty. The discontinuation of these acts as well as the worsening relations with the Burmese shifted attention to more urgent matters. David Scott, the shrewd Agent to the Governor-General, saw an advantage in a treaty of alliance at this stage and this was effected by a treaty concluded on 10th March 1824, between Ram Singh Rajah of Jaintiapur and himself on behalf of the Company. In a separate article, Ram Sing undertook to help the British in any conflict with the Burmese.

It was only after the troubles ended that the British revived the issue. By this time, both the principal signatories of the engagement of 1824, that is, David Scott and Rajah Ram Singh in whose reign the abductions had taken place, had died. The latter had been succeeded by his nephew. Several problems, old and new, rapidly caused a serious deterioration in the relations with the British and the culmination was the annexation in March 1835 of the plains areas of the Jaintia kingdom by the British who had already gained a foothold in the Khasi Hills. With the richest part of his kingdom taken away, the Rajah felt that there could be no purpose in holding on to a poor remnant of it and so he relinquished his hold over the rest of the Kingdom which the British then took over.

Captain Lister, Political Agent at Cherrapunjee, was then placed in charge of both the Khasi and Jaintia Hills.

For about 2 decades, the destiny of the Jaintia Hills became linked with that of the Khasi Hills, with the difference that while the Khasi Chiefs were left in virtual control of their respective territories in regard to all local affairs, the Jaintia Hills were placed under the administration of a British Civil Officers through the local officials called Dolois and were allowed to continue in office as the Company's agents. In time, certain regulations pertaining to taxation that were operative in fully administered areas were introduced. These provoked widespread discontent but the first one in 1860 passed off without serious consequence. The lessons of the troubles had apparently not been heeded and again in 1861 the British administration considered imposition of income-tax. The outcry might eventually have died down but the local police rather high-handedly interfered with a religious function at a place called Ialong, forcibly seizing weapons and shields used at the accompanying dances. The troubles quickly got out of hand and on 20th January 1862, the entire Jaintia Hills was up in flames. The police station and the treasury at Jowai were burnt down and local authorities decided that only the active intervention of a strong force would quell the revolt. As with the Khasis some thirty years earlier, the hillmen of Jaintia Hills had to resort to jungle warfare and it was not till December 1862 that the guiding spirit of the rebellion, U Kiang Nangbah, was captured. It must be remembered that these events took place immediately after the Indian Mutiny which had cost the British administration great loss and suffering and this fact probably explained why Kiang Nangbah, unlike the rebellious Khasi Chiefs earlier, had to pay the extreme penalty, being hanged in Jowai on the 30th December 1862.

Thereafter, the posting of a more responsible British Officer, designated the Sub-Divisional Officer (SDO), in time brought about the pacification of the Jaintia Hills.

The administration of the Jaintia Hills was more direct than that of the Khasi Hills. Whereas in the latter area, direct British control was limited to only the so-called "British Villages" and the administered area of Cherrapunjee and, after 1864, Shillong, the whole of Jowai subdivision was considered British territory where many administrative and revenue regulations, with modifications, applied. Otherwise, the same district officer – the Deputy Commissioner as he later became known – was in overall control.

Unlike the greater part of the Khasi Hills, the whole of Jaintia Hills was enfranchised after the Government of India Act of 1935 came into force, and elected its own representative to the Assam Legislative Assembly. This apart, nothing of major importance took place till after 1947. The adoption of the Sixth Schedule to the Constitution of India in 1950 saw the creation of one district – the United Khasi & Jaintia Hills District – and the virtual end of the old distinction between former "native states" and "British territory". As the composite district, the Khasi and Jaintia Hills shared in the achievement of the new State of Meghalaya as one of the two components, the other being the Garo Hills.

(iii) Administrative Setup

The Jaintia Hills district is located in the easternmost part of Meghalaya. It comprises two administrative civil subdivisions, Khliehriat and Amlarem. There are four Community and Rural Development Blocks in the district, the name of which, along with their respective headquarters is given below:

Sl. No.	Name of C.R.D. Block	Headquarters
1.	Thadlaskein	Thadlaskein
2.	Laskein	Laskein
3.	Khliehriat	Khliehriat
4.	Amlarem	Amlarem

There is only one town in the district by the name Jowai which is also the district headquarters. The number of villages in the district is 499 out of which 32 are uninhabited.

Urban local body

Jowai town is being administered by a Municipality with a state civil service officer as the Chief Executive Officer. The functions of the Municipality include maintenance and repair of roads

and footpaths, drinking water supply and general sanitation. These are generally done on self-help basis once a year.

District Council

The Sixth Schedule to the Constitution of India provides for setting up of a District Council in each Autonomous District of Assam. In 1952, the United Khasi and Jaintia Hills Autonomous District Council came into being. The Jaintia Hills or the Jowai subdivision as it was known then was represented by six members. In 1957, however, a section of the public began to press their case for the establishment of a separate District Council for the Jaintia Hills for administrative convenience. On the recommendation of the Commission set up to enquire into the matter, the Government of Assam by a notification No. TAD/ R/50/64 dated 25/11/64, set up a separate District Council for the Jaintia Hills known as the Jaintia Hills Autonomous District Council. The first election to the District Council was held in 1967. The Council had then 18 members, 16 elected on the basis of adult suffrage and 2 nominated. The number of members had been raised to 30, 29 elected and 1 nominated. The Council elect a Chairman to preside over its session and a Deputy Chairman to chair its meeting in the absence of the Chairman as provided under the Autonomous District Council Rules, 1951. The same Rules provide for the constitution of an Executive Committee headed by the Chief Executive Member elected by the Council. The Executive Members, ordinarily 2 in members, are, however, appointed by the Governor on the advice of the Chief Executive Member. The term of the Council is ordinarily five years. The Council is expected to meet once in three months.

The powers and functions of the District Council are mainly the following four:

i) Legislative

ii) Executive

iii) Financial and

iv) Judicial

Legislative powers

The District Council has power to make laws on allotment, occupation and use of land; regulation of jhumming, management and control of forest; use of water course for agriculture; establishment of town committees; matters connected with the administration of village police; appointment and succession of Chief and Headmen; inheritance of property; marriage and divorce; preservation of social customs; regulation of money lending by persons other than members of the scheduled tribes.

Executive powers

The District Council has the power to establish, construct or manage dispensaries, markets, cattle pounds, roads and waterways. From 1962, management of the primary schools has been the responsibility of the District Council. It has the power to determine the language and the manner in which primary education should be imparted in the schools under its jurisdiction.

Financial powers

The District Council has the power to assess and collect land revenue, to levy house-tax, taxes on profession, trades, callings, employment, duty on goods brought to the markets for sale and taxes on maintenance of road and on vehicles.

Judicial powers

Under the provision of the Sixth Schedule, the District Council has the power to set up three classes of courts:

i) The District Council Court

ii) The Subordinate District Council Courts and Additional District Council Courts and

iii) The Village Courts.

The jurisdiction of the above courts is limited to cases and suits in which both parties are tribals. All other cases and suits are tried by the District Magistrate Courts.

The District Council Court is the Court of Appeal in respect of all cases and suits tried by the lower Courts, including those of the Dolois, other local authorities and the Village Courts. No other Court, except the High Court and the Supreme Court, has jurisdiction over such cases.

While the lower courts are concerned with the interpretation of customary laws, constitution of these Courts, particularly the Village Courts, is subjected to confirmation by the District Council, which sees that suitable persons of standing with thorough knowledge of local customs and usages are nominated. However, judicial officers of the District Council Court are selected from among the persons trained in laws.

The Village Courts are under the United Khasi and Jaintia Hills Autonomous District Council (Administration of Justice) Rules, 1953 constituted in all the existing Elakas with the Dolois, Head of the Elakas, as the presiding officers to try such cases, as they are competent to take up. A village court cannot try cases involving non-tribals.

It may be mentioned that the institution of Doloiship in Jaintia Hills existed from time immemorial. The Dolois are in charge of their respective Elakas or Doloiship. The Dolois were members of the State Council of the Jaintia King, assisting him in the business of the Council and the Court. Though the institution of Kingship or Chieftainship does not exist any more in Jaintia Hills, the institution of Doloiship still exists and there are at present 18 Doloiship in Jaintia Hills. Each Doloiship is administered by the Doloi assisted by officials called Pators and Sangots, each with his own specialised responsibility. In the past, the Dolois were more than temporal heads. They exercised not only executive, political and magisterial powers but they also had religious duties to perform. The Dolois, Pators and Sangots are not paid any salaries but provided with wet paddy fields for their maintenance. So those paddy fields are usually known by the names "Bam Doloi", "Bam Pator", and "Bam Sangot", which mean field to feed the Doloi, the Pator and the Sangot. In case of death, removal or incapacity of the Doloi, the Pator looks after the administration of the Elaka or Doloiship until a new Doloi is elected.

At the lowest rung of the administration is the Durbar Shnong or the Village Council headed by the Village Elder or Headman who is usually elected by the durbar of male adults. The Village Headman presides over the sessions of the Village Council ordinarily composed of all the male adults of the village, with older people as advisors.

The functions of the Village Council are mainly administrative, municipal and financial. Enforcement of law and order is the first and foremost duty of the Durbar. With this aim in view, it takes pains to investigate into the antecedents of any household that wants to shift into the village before permission is given to it to move in or has also the power to order any household to leave the village if its presence is found to threaten the peace of the village and the security of its inhabitants.

The Durbar lays down the policy for the conduct of community activities in the village and makes rules in accordance with local traditions, which the people of the village have to observe and follow. The Village Durbar has the responsibility to look after the common properties of the village like grazing land and community forests.

(iv) Physical Features

Location and size

Jaintia Hills district is situated in the extreme eastern part of Meghalaya. It lies approximately between Latitude 25°02′ and 25°45′N and Longitude 91°59′ and 92°50′E. it is bounded in the east and north by Assam, in the West by East Khasi Hills district and in the south by Bangladesh. It has an area of 3819 square Kilometres. It is the second largest district occupying 17.03 per cent of the area of the state. It extends both south-north and west-east direction.

Topography

The district is divided into three lateral sections running east and west and are corresponding to those of Khasi Hills of which they are extensions. In the south is the War area which extends to the plain of Bangladesh and the Surma Valley of Assam. In the centre is the central highland, which reaches its highest point at Maryngksih Peak about 1627 metres above mean sea level. Towards the southeast, the highlands merge into the jungle tracts extending into the N.C. Hills of Assam. As in the Khasi Hills, the northern strip comprises of the Ri-Bhoi area, a low-lying terai-type region, though unhealthy, is very fertile.

Physiography

Taking the natural factors like physiography, soil, geology, rainfall, temperature and forest coverage into account, the district can be delineated into two sub-

micro divisions, (1) the East Shillong Plateau Region and (2) the Narpuh-Saipung Forest Region.

1. East Shillong Plateau Region

The region is dominated by hilly and dissected terrain which is mainly composed of Jaintia Series / Disang Series and Shillong group of rocks. There is a good deposits of minerals like coal, limestone, etc., in this region. The central highland of this region forms a watershed where most of the rivers of the region find their sources. The important river like Kharkor along with its tributaries drains through the region to join the Kopily River in the east. Other important rivers of the region are Myntang and Mynsar. Hari is an important river among the rivers flowing southwards. The region is occupied by red loamy soils except a limited belt on the north and south. It has a rich vegetation ranging from tropical to temperate.

The major settlements are confined either along the rivers or roads. Most of the settlements are small in size. Villages are not uniformly distributed due to topographic conditions. The region has a good network of surface roads. The National Highway (NH–44) passes through the region touching the important places; viz., Jowai town, Thadlaskein, Khliehriat etc. Another important road from Jowai joins the NH-40 at Dawki.

This region exhibits a hilly type landscape in general with numerous rivers, streams and interspersed by plateaus. It is an extension of the Shillong Plateau with an elevation of 800 – 1,200 m. However, the region has low hills and peaks in comparison to the central Shillong Plateau region of East Khasi Hills district. The presence of peaks like Nongjngi (1389 m), Shiliang Myntang (1195 m), Larmaiphlong (1307 m), Nongkhyllep (1255 m), Tyrshang (1340 m) Nangbah (1333 m) and Jarain (1225 m), etc. brings out a clear picture of the region. The hills of the eastern part extend towards Karbi Anglong and North Cachar Hills district of Assam. The southern foot-hills ultimately merge with the plain of Bangladesh. The rivers of the region make two distinct drainage system : (1) rivers flowing towards the north and (2) rivers flowing towards the south. The river Umkhen along with its tributaries flows along the northern boundary to meet the river Kupli on the north-east in Karbi Anglong in Assam, whereas the river Myntang and Kharkor along with their tributaries join the river Kopili in the eastern part of the region. Among the south flowing rivers, Umngot and Myntdu are important. A narrow belt along the central part of the region, which runs from west to east is a watershed which separates the north flowing and south flowing rivers. The region has a rich vegetal cover from tropical evergreen to sub-tropical pine.

Geologically, the Region is mainly underlain by the Jaintia Series / Disang Series (with ultrabasic in deep shades) rocks, while the northern part of the region is made up of Shillong group and gneissic rocks. The other group of rocks like Barail Series-Simsang formation (Garo Hills), granite and Khasi Group, Axial group, etc. appear in some patches. Most of the area of the region is occupied by red loamy soils. A narrow belt in the northern part is composed of laterite soils. Red and yellow soils are found in the southern belt. According to NBSS and LUP (ICAR), Nagpur, the region has three types of soil, (1) Udalfs-Ochrepts, (2) Ustalfs-Ochrepts-Orthents and (3) Udalfs-Ochrepts-Fluvents-Orthents.

2. Narpuh-Saipung forest region

Lying on the south-eastern part of Jaintia Hills district, the region spreads over 1,269 Km^2. It extends over a part of Khliehriat C.D. Block only. The region is characterized by hilly and rugged terrain which reflects its geology consisting of rocks of Jaintia Series/Disang Series and Barail Series and Simsang formation (Garo Hills). The region is traversed by numerous rivers and streams. Laterite and red and yellow soil cover the entire area of the region. The region is heavily forested throughout. Tropical vegetation occupies almost the entire area of the region.

This region is dominated by hilly and irregular landscape criss-crossed by numerous rivers and streams with an average altitude of 500-1200 m. The region has several high peaks viz., Lakadong (781 m), Lumpdeng (1330 m), Tharanyang (976 m), Moobyrtap (1269 m), Tangpui (1482 m), Didasip (1585 m), Iakorsing (1448 m) and Maryngksih (1627 m). The rivers of the region can be classified into two groups: (1) North flowing rivers and (2) South flowing rivers. The central highland is a watershed and it is

the originating source of most of the rivers. The river Kopili along with its tributaries, Umtalang, Umphung, Wah Khynriam and Dikisim flow along the eastern boundary of the region and ultimately meets the river Brahmaputra, whereas the river Hari and Lubha along with their tributaries, Prang, Wah Lariang, Umlunai, Umsngat, Lenju etc., flow south to Bangladesh. The region is characterized by rich vegetation of tropical evergreen type. Almost the entire area of the region is occupied by the Narpuh and Saipung reserved forests.

Geologically, the region is mainly composed of rocks of Barail Series, Simsang formation (Garo Hills) and Jaintia Series, Disang Series (with Ultrabasic in deep shades). Other group of rocks like gneiss with Old inliers Sela group, Khasi group/Axial group, Tipam Series and Chengapara formation (Garo Hills) and Surma Series and Baghmara formation (Garo Hills) etc. appear in some parts. The region is mostly covered by Ustalfs-Ochrepts-Orthents type of soils. A small area in the north-eastern and north-western parts of the region has Udalfs-Ochrepts and Udalfs-Ochrepts-Fluvents-Orthents soils.

Drainage

The central uplands which run in a south-easterly direction form a natural watershed diverting the rivers either northeastwards to the Brahmaputra or southwards to the Surma. Like most of the rivers in the states and districts south of the Brahmaputra, the rivers of Jaintia Hills district are fed by rains. The flow of water is for this reason, abundant during the monsoons and low during the dry season. The following are the principal rivers.

a) Rivers flowing to the Surma

i) The Mynngot

ii) The Myntdu

iii) The Prang

iv) The Lukha

v) The Simlieng

b) Rivers flowing to the Brahmaputra

i) The Kupli with its tributaries the Myntang and Mynriang.

Lakes and Tanks

Because of the flat character of the plateau in the Jaintia Hills district, it has more lakes than the Khasi Hills. The important lakes are:

i) Thadlaskein

ii) Myngkoitok (Bir Jympamasi)

iii) Umtisong

iv) Umblang

v) Syndai tank

Climate

The climate of Jaintia Hills is cool round the year. The temperature varies between 4.8° centigrade and 31° centigrade. The hottest month is June-July and coldest month is December. The period of rainfall is June to September. In August 1998, the highest rainfall was recorded as 1536.2 mm. The lowest rainfall period was January, February and December. The lowest rainfall is recorded as Nil and 18.6 mm in the month of December and February 1998 respectively. The suitable climate for field work is during the period from April to October.

Natural Economic Resources

Economic Resources play a vital role in the economy of the district. These resources contribute significantly to the development of the economic infrastructures of the district as well as the state. Natural economic resources namely, forestry, minerals and mining, soil and cropping patterns, land and land-use pattern, tenancy, agriculture, irrigation, animal husbandry, fishery, industry, trade and commerce, transport, electricity and power are the different aspects and important indicators of economic development during the decade 1991-2001. It is impossible in the short compass here to cover all these aspects of economic infrastructure of the district in detail. However an attempt is made here to discuss the different aspects on economic infrastructures briefly.

Forestry

Forests play a vital role in the economy of the district and providing large quantities of timber for construction of building, making of furniture as well as fuel and fodder besides ensuring conservation of water and, soil etc.

The district claims to have the highest reserved forest areas in the state of Meghalaya. The total area

under forests in the district is about 1540.76 km^2 against the state figure of 9496 km^2 in 1998-99. The reserved forest area of the district stands at 311.50 km^2 as against the state figure of 981.00 km^2 in 1998-99. The forests consist of many species of valuable trees, plants and orchids. Among the timber species, teak, sal, plywood and pine trees are available in large quantities. Timber is exported to other areas of the state and also outside the state.

Area under plantation/Afforestation

The areas under plantation/afforestation of the major timber species in the state and district of Jaintia Hills during 1990-91 and 1998-99 are given below.

Year	(a) State (b) District	Teak	Sal	Pine	Plywood	Others
1	2	3	4	5	6	7
1990-91	(a)	140	140	175	190	164
	(b)	20	25	10	30	27
1991-92	(a)	111	160	164	100	161
	(b)	15	25	10	20	25
1992-93	(a)	57	60	55	90	155
	(b)	9	10	9	18	27
1993-94	(a)	45	104	60	45	160
	(b)	8	15	10	9	18
1994-95	(a)	20	10	30	50	115
	(b)	6	4	5	10	15
1995-96	(a)	20	15	-	15	105
	(b)	12	5	-	7	12
1996-97	(a)	55	70	-	40	155
	(b)	9	12	-	8	20
1997-98	(a)	28	24	-	15	69
	(b)	6	8	-	7	11
1998-99	(a)	56	77	-	30	154
	(b)	12	11	-	5	24

Minerals and Mining :

Most of the economic mineral resources of Jaintia Hills are associated with tertiary formations of Eocene age. The minerals associated with the formations are limestone coal, phosphorite, liothomargic clay, etc.

Coal : Jaintia Hills district is rich in Coal deposits and is being commercially exploited. Its production went up to 1369000 tonnes in 1999 from 1321000 tones in 1987. The important coalfields namely Lakadong, Bapung, Rymbai, Sutnga, Jalaphet, Moopala Jarain, Shkepyrsit, Jongkroh, Barato, Mookyndeng, Mootyrshiah, Raliang, Shangpung, Umlatdoh, Musiang, Lamare looksi have been exploited commercially. Coal is exported to Guwahati and also to outside Assam and to Bangladesh.

Limestone : The district is rich in limestone deposit which is an important raw material for Cement Industries. It is found at Lumshnong, Sutnga, Nongkhlieh, Lakadong, Syndai and Nongtalang.

Clay : Clay is found in Shangpung, Thadlaskein, Mynngat and Mulieh. The total estimate of reserves of China Clay in the district is of the order of about 200 million tonnes.

Soil and Cropping Pattern:

The soil in the district is red sandy and largely red loamy and generally acidic in nature but poor in phosphorus, rich in nitrogen and medium in potash content. The upland plateau regions in the north and south have dry soil.

Cropping pattern

(a) Major Food Crops: The major food crops in the district are rice and maize. Two principal varieties of rice are wet and dry rice.

(b) Tuber Crops: Potato, sweet-potato and tapioca.

(c) Other Crops: Sugarcane, tobacco, turmeric and cotton, betelleaf and betelnut.

(d) Vegetables: Cabbage, cauliflower, turnip, radish, carrot, onion, bears, pears, okra, lady finger, brinjal, bottle gourd, bitter gourd, pumpkin and other vegetables

(e) Fruits: Pineapple, citrus fruits, temperate fruits, banana, papaya, etc.

(f) Oil Seed: Sesamum, rapeseed & mustard seed, soyabean.

(g) Pulses: Tur (Arahar), gram, other rabi pulses.

Land and Land use pattern : The total reporting area of the district during 1998-99 was 3811.00 Km^2, the distribution of which is given in the next page.

LAND USE STATISTICS IN THE DISTRICT DURING 1998-99.

Sl. No.	Particulars	Area under different uses of land in	
		Jaintia Hills District (Area in km^2)	Meghalaya (Area in km^2)
1	2	3	4
I	Geographical Area	3,819.0	22,429.0
II	Reporting Area	3,811.0	22,409.0
	1) Forest	1,540.8	9,500.0
	2) Not available for cultivation	301.7	2,202.5
	3) Other Uncultivable land excluding fallow land	1,370.5	6,206.7
	4) Fallow land	267.6	2,316.0
	5) Net area sown	330.5	2,183.9
	6) Area sown more than once	3.2	444.5
	7) Total cropped area	333.6	2,628.3

From the above statement it appears that area under forest and other uncultivable land excluding fallow land recorded the share of about 76% in the district and about 70% in the state level to the total reporting area. Accordingly, the areas under other items together constitutes only 24% and 30% in the district and state respectively.

Land Tenure System

The lands in Meghalaya have not been surveyed earlier and as such there are no systematic and regular records of the land in the state. The absence of maps/records is a drawback not only in the case of development but also unnecessary litigations. In the State of Meghalaya the land is owned by the community and elders of the clan recognized by the unwritten customary laws and usage. No uniform land tenure system is available in the state. However present status is given below. The land tenure system as extracted from the Assam Land Revenue Manual, Vol. I is reproduced below :

"When the British first took possession of these hills no change was made in the indigenous revenue system, which consisted simply of the payment of a he-goat once a year from each village. The Raja derived the greater portion of his income from the plains. The country remained untaxed by Government until the year 1860, when a house-tax was imposed, whereupon the people broke into open rebellion. The rebellion was promptly put down, but in 1862 the people again rebelled owing to the imposition of the income tax. This outbreak was not completely put down till 1863.

Shortly after this the Jaintia Hills were formed into a subdivision, with headquarters at Jowai, and made part of the former Khasi and Jaintia Hills district. Steps were then taken to bring the land under a proper system of settlement, the entire hills being treated as the absolute property of Government. At first only a house-tax of Re.1 per house was assessed on the Synteng population, and of Rs.2/- for the Mikir, Lalung and Kukis population, the land being exempted from taxation. In 1884 a full report (1) on the tenures of the subdivision and the private claims to land which had then been set up, was submitted by the Sub-Divisional Officer (Mr. Heath). The lands were divided into low or hali lands, and high lands, but allowed them to be cultivated by anyone paying the house-tax, which was raised at the same time from Re. 1 to Rs. 2 per house. In the hali lands a division into rajhali lands, at one time the private property of the Raja, and private halis was recognized. The latter lands were unassessed, the house-tax being considered the taxation due in respect of them; for rajhali land, however, an assessment of 10 annas a bigha was to be charged. Certain service lands of village officials and servants were also recognized.

The settlement of rajhali lands was ordered to take effect from 1st April 1887. In 1889 periodic settlement was made in connection with the rajhali lands in 6 circles and in 1893 this was extended to 4 more circles and all pattas were arranged to fall in 1901. In 1901 a further settlement for 10 years was made at the same rate, and in 1904 periodic pattas were issued in two more circles. In 1912 the rate was raised in 9 circles to 12 annas a bigha, and a settlement was made for 20 years from 1st April 1912. The term of the settlement was extended up to 31st March 1941 when a new settlement was made for a term of 10 years. The term of the last settlement was extended from time to time till 26th June 1952 after which the matter came within the purview of the United Khasi Jaintia Hills Autonomous District Council. A rough record was made of private halis in order to safeguard Government interests in future extensions of wet rice cultivation, the area assessed to land revenue as rajhali amounted in 1929 to 25,386 bighas. From 1st April 1928, new rates of house-tax varying from Rs. 2/- to Rs. 5/- in different areas, were fixed for a period of 20 years. The District

Council has since made the United Khasi Jaintia Hills District (Land Revenue) Act, 1954 under which it would make arrangement for the assessment and collection of revenue.

In 1964, the United Khasi and Jaintia Hills Autonomous District Council was bifurcated and a separate Autonomous District Council for Jaintia Hills known as the Jaintia Hills Autonomous District Council was created. By an order No. 508 of 1980 dated the 30th December, 1980 the Jaintia Hills Autonomous District Council abolished the Land Revenue with effect from the 30th December, 1980 synchronising with the 120th death anniversary of Late U Kiang Nangbah, the greatest freedom fighter of Jaintia Hills.

To implement the Land Reforms, the state Government enacted the Meghalaya Land Survey and Records Preparation Act 1980 and introduced the Scheme of cadastral survey to have all land to be cadastrally surveyed and the preliminary records, prepared with a view to identity the owner/user of the land. The management and control of land in the state is vested with the District Councils. In order to make the scheme operational and successful, the Meghalaya Land Survey and Records Preparation Act, 1980 was amended and passed in the Meghalaya Legislative Assembly in August 1991. Accordingly, the management and control of this Scheme were placed at the disposal of the District Councils.

The Land Tenure Research Cell has been established for studying the land tenure system prevalent in the state in the light of the Land Reforms Commission's Report. The cell is to codify various customary laws prevalent in the state so as to avoid unnecessary litigation.

Agriculture

The major chunk of the population (about 80%) of the district is based in the rural areas. The district economy is basically agrarian as it is rural based with agriculture contributing significantly towards state GDP. Agriculture thus plays a great role in the overall economic development of the district and the state. The generation of income and employment also depends upon the agricultural activities. It is common perception that the comparatively low productivity of the agriculture in the upland areas which forms the major portion of the land in the district /state leads to uneconomical operation in the field and this in many cases has resulted in agriculture being only a subsistence farming. Efforts have been taken to adopt modernize methods of technology in cultivation to reduce large scale jhuming cultivation through settled cultivation with high economic value crops. During the Ninth Plan period, a number of measures/ activities have been taken up by the Department of Agriculture especially in introducing horticultural cash crops like Tea, Mushroom, Cashewnut, etc. and encouraged other activities like floriculture and establishment of horticultural nurseries in the private sector for commercialisation towards economic development. Thus the authority has given renewed thrust on infrastructural development of agriculture including horticulture so that productivity can be increased and that the level of economic activity in the villages and rural areas can be given the desired momentum to bring about economic transformation in agricultural production.

The gross cropped area in 1998-99 was 333.62 km^2 and net cropped area 330.47 km^2. Although the agricultural growth rate is yet to touch the national level in the district, it is however, slowly and steadily progressing during the Ninth Plan period in spite of various constraints such as undulating topography, problem of communication, dispersal pattern of population, land tenure system, unsystematic marketing avenues, inadequate credit support, etc. Through continued efforts in the agriculture sector, with greater vigour and renewed emphasis and by adopting certain thrush and priority production to improve the productivity of both agricultural and horticultural, food self-sufficiency may be expected in future.

The statement showing the area under various crops and their production and yield per hectare during 1998-99 in Jaintia Hills district is given below:

PRODUCTION OF AGRICULTURAL CROPS IN JAINTIA HILLS WITH AREA AND YIELD IN 1999.

Sl. No.	Name of crops	Area (in Hectare)	Production (in Metric Tonne)	Average Yield (in Kg/ Hectare)
1	2	3	4	5
1.	Rice:			
	a) Autumn	77	81	1,052
	b) Winter	16,724	26,291	1,572
	c) Spring	52	59	1,135
2.	Maize	2,868	3,241	1,130
3.	Other cereals & small millets	372	455	1,123

1	2	3	4	5
4. Oil Seeds				
	a) Sesamum	34	17	500
	b) Rapeseed & mustard	11	7	636
	c) Soyabean	390	389	997
5 .Other Crops				
	a) Sugarcane	6	5	838
	b) Tobacco	9	4	444
6. Fruit Crops				
	a) Pineapple	286	2,262	7,909
	b) Citrus	1,074	5,550	5,168
	c) Banana	315	1,369	4,346
	d) Papaya	10	25	2,500
7. Tuber Crops				
	a) Potato	344	1,852	5,384
	b) Sweet potato	2,014	5,874	2,917
	c) Tapioca	29	396	13,655
8. Spices Crops				
	a) Ginger	109	487	4,468
	b) Turmeric	834	4,896	5,871
	c) Chillies	119	94	790
9. Plantation Crops				
	a) Arecanut	1,534	3,052	1,990

Irrigation

Irrigation facilities in the district are not adequate. Out of the approximate cultivated area of 45,126 hectares, the irrigated area is only 2,222 hectares. The sources of irrigation are rivers and streams, which in turn must depend on rainfall. In the absence of ground water survey, no initiative has so far been taken for the digging of tube wells, deep wells and other modern methods of irrigation. Based on the existing topography and the hilly terrain of the district, there is practically no scope for major irrigation and also scope for medium irrigation is very limited. Considering the need to accelerate the agricultural production in the district, a number of minor irrigation projects have been taken up. The system of minor irrigation project is of two types - (a) Lift Irrigation Project and (b) Flow Irrigation Project. Ten such projects covering total area of 2,222 hectares of land have been completed. Under the Lift Irrigation Project, there are six schemes covering 1,209 hectares and in the case of Flow Irrigation Project, there are five schemes covering 1,013 hectares.

Private pump sets are used in the low-lying areas bordering Bangladesh and in the eastern area of Thadlaskein C.D. Block.

Animal Husbandry and Veterinary

The development of Animal Husbandry which includes Livestock and Poultry is an important indicator that show the pace of growth and contribution to the rural economic scenario at district and state level in case of self-employment in livestock and diary based farming and food processing, livestock and poultry is the only alternative vocation to the villagers for a subsidiary living.

Livestock including poultry population trend reflect the pace of development in the Animal Husbandry sector. The following statement gives the number of veterinary institutions in the statement and district during 1991-92 and 1998-99.

Livestock including poultry population trend reflect the pace of development in the Animal Husbandry sector. The following statement gives the number of livestock and poultry during 1992 and 1997 in the district.

NUMBER OF VETERINARY INSTITUTIONS IN THE STATE AND DISTRICT DURING 1991-92 AND 1998-99.

State/District	Year	Hospital	Dispensaries	Aid Centres	Key Village Centres	Intensive Cattle Development Projects	Stockmen Centres	Veterinary Doctors/ Surgeons
1	2	3	4	5	6	7	8	9
Meghalaya	1991-92	4	54	51	2	2	80	123
	1998-99	4	59	64	2	2	86	171
Jaintia Hills	1991-92	1	5	9	-	-	8	15
	1998-99	1	8	13	1	-	10	24

There are 4 farms of livestock and poultry in the district. One cattle breeding, one poultry, one pig and one for sheep & goat farming. One chilling centre and pasteurisation plant is also available.

Fishery

In the district the available fishing resources are either in natural pond or river. Fisheries are yet to be developed in a scientific manner. The traditional and old method of fish culture has been practised by the fish farmers in the district. However during 1998-99 1,34,000 fish seeds were distributed against 2,18,000 in 1993-94. The State Government has set up feed mill for fish seed in the private sector to create employment for the unemployed youth and to raise the economic condition of the fish farmers by supplementing the feed requirement in the centres nearest to the C.D. Block headquarters and important places, etc. to remove the hurdles responsible for this poor growth due to the facts that many farmers do not provide proper feeding to the fishes as the procurement of feed and the cost of transport from the main centers, etc. supplied by the district authority made it quite inconvenient and expensive for the fish farmers and as such most of the fish farmers neglected to pay much importance to this aspect.

Industry

There are great potentials for the development of industries, particularly those based on raw materials available in the district.

Mining : The District of Jaintia Hills is rich in mineral resources like limestone, coal, clay, kaolin, bauxite and phosphates. Most of the output is exported outside the district. The following mineral based medium industries are found in the district in the Sutnga Elaka.

(i) Jaintia Cement Ltd.
(ii) Hollow Block Manufacturing.

SMALL SCALE INDUSTRIES IN JAINTIA HILLS DISTRICT

No. of small scale industry	Investment in plant and Machine (in lakh)	No. of person employed.
1	2	3
439	276.02	1,755

Most of industries are Agro-based production, leather processing, forest based, minerals based, etc.

Cottage Industries

The important cottage industries in the Jaintia Hills district are as follows :

(i) Poultry Industry at Laram village
(ii) Lime Processing Industry at Lumshnong
(iii) Pulse Processing unit at Shangpung
(iv) Blacksmithy at Myngngat
(v) Carpentry at Nangbah
(vi) Bee-keeping at Thangskai

Industries in the cooperative sector

The cooperative movement in the field of industries is of comparatively recent origin. The main objective is to develop the economic and cultural interest in rural population and to widen the scope of artisans and craftsmen. There are 422 such industrial cooperative societies in handloom sectors, bamboo and cane furniture, bakery products etc. in the district.

Trade and Commerce

Trade is considered as one of the major sources of livelihood of the people in the district. Trade is chiefly carried on through weekly markets held at different places in the district. The chief articles exported from the district are timber, cotton and muga yarn , lime, coal, various varieties of citrus fruits including oranges, limes and lemons, pineapple, bananas and cash crops like betel-leaf, arecanut, tezpata, honey, hides and skins, etc. Coal and potato are steadily gaining importance in the field of export.

Goods imported include rice and other food grains, sugar, salt oils, iron and steel goods, mill cloth and silks, pulses, wheat, medicines, etc.

The rapid development of the road network has contributed greatly to the expansion of trade commerce especially in the town of Jowai.

Trade Centres

There are 16 primary markets in the district which serve as the most important trade centres for wholesale and retail business. These markets are located in rural areas and are held weekly or bi-weekly. Commodities brought for sale in the primary markets from the villages consists mainly of agricultural and horticultural produce. A list of primary markets is given on the next page.

BLOCK-WISE LIST OF PRIMARY MARKETS (UN-REGULATED) LINKED TO THE JOWAI MARKET

Name of Market and Periodicity	Principal Commodities	Present Ownership
1	2	3
I. Thadlaskein Development Block		
1. Wahiajer (Weekly)	Rice, maize, potato oranges, sweet potato, vegetables and livestock.	Jaintia Hills Autonomous District Council
2. Nangbah (Weekly)	Rice, maize, oranges and sweet potato	-do-
3. Nartiang (weekly)	Rice, maize and turmeric.	Doloi of Nartiang
4. Namdong (weekly)	Rice and maize	Jaintia Hills Autonomous District Council
5. Khanduli (Weekly)	Rice and maize.	-do-
6. Jowai (Weekly)	Rice, maize, potato oranges, sweet potato, vegetables and livestock.	Jaintia Hills Autonomous District Council.
II. Laskein Development Block		
1. Mynso (Weekly)	Rice, maize, oranges, banana and livestock.	Doloi of Mynso.
2. Barato (Weekly)	Rice, maize, banana and livestock.	Doloi of Shiliang Myntang.
3. Shangpung (Weekly)	Rice, maize, turmeric, banana and livestock.	Doloi of Shangpung.
4. Garampani (Weekly)	Rice, maize and banana.	Jaintia Hills Autonomous District Council.
5. Raliang (Weekly)	Rice, maize and banana.	-do-
III. Amlarem Development Block		
1. Dawki (bi-weekly)	Arecanut, betelleaf, oranges, pineapples and other fruits.	Headman of Dawki
2. Muktapur (weekly)	Arecanut, betelleaf, oranges and pineapples.	Jaintia Hills Autonomous District Council
IV. Khliehriat Development Block		
1. Umkiang (Weekly)	Rice, betelleaf, banana and arecanut.	-do-
2. Sutnga (Weekly)	Rice, maize, banana, oranges, other fruits, dry chillies and livestock.	Doloi of Sutnga
3. Rymbai (weekly)	Rice, banana, turmeric, maize.	Doloi of Rymbai
4. Lumshnong (Weekly)	Rice, oranges, banana and dry chillies.	Doloi of Narpuh
5. Khliehriat (Weekly)	Rice, maize, banana and other fruits.	Headman of Khliehriat.

*(**Source** : Marketing Inspector)*

Wholesale Markets : Jowai has now becomes the principal centre of the wholesale trade in the district as it is connected by a network of roads with other important trade centres within and outside the district.

Electricity and Power : Power plays a vital role in the economic development. The district possesses immense potentialities for generating power on large scale measurable in terms of MKWH based on water and coal resources. In the state of Meghalaya all the activities of electricity and power is managed and controlled by the Meghalaya State Electricity Board constituted by the State Government. A new scheme for construction of 132 KV single circuit line from (84 MW) Leshka HEP to Khliehriat Sub-Station for generation of power is also proposed. Survey and investigation on stage – II of Leshka H.E.P. is also going on. The proposal for another new project for power generation from the Myntdu River "Myntdu – Leshka (2x42 MW) in the district has been submitted T.E.C. was issued by the Central Electricity Authority in September, 1999. After completion, these projects will contribute significantly to the state economy by generating more surplus power in the state for which the state may earn more revenue by providing power to the other states on rent.

Transport : Road transport is the only means of communication in the hilly state of Meghalaya. It is very essential in view of the fact that the state does not have a railway head and water transport facilities. The state Govt. has therefore to depend solely on road.

Classifications of Roads : Roads in the Jaintia Hills district are classified as follows:

(1) Village Roads : Maintained by Community Development Block.

(2) District Council Roads:

Maintained by District Council.

(3) Town Committee Roads:

Maintained by Town Committee

(4) Forest Department Roads:

Maintained by Forest Department.

(5) District P.W.D. Road and State Highway:

Maintained by P.W.D.

(6) National Highways:

Maintained by P.W.D.

Agency of Transport : Transport facilities in the district are run by both the public and the private sectors, the share assumed by the later being greater. At present there are six roads under the operation of the district establishment of the Meghalaya Transport Corporation with its main station at Jowai.

Vehicles and Conveyances : In spite of rapid progress made in road communication in the district, the transport by human porterage, horses, boats, still finds a place in the more remote areas where no motorable roads exist. However, such areas are negligible in number.

In major areas of the district which are covered by road communication network, motor vehicles are almost invariably used for conveyance of goods and passenger. The number of registered vehicles in the district is shown below :

NUMBER OF REGISTERED VEHICLES AS ON 31.03.99 IN THE DISTRICT

Type of Ownership	Trucks	Buses	Cars	Jeeps	Tractor	Trailers	Two Wheelers	Three Wheelers	Taxi	Others
1	2	3	4	5	6	7	8	9	10	11
Govt.	14	-	8	67	13	18	9	-	-	2
Private	2,990	235	1,149	735	22	112	463	-	766	19
Total	3,004	235	1,157	801	35	130	472	-	766	21

v) Census Concepts

Building

A "Building" is generally a single structure on the ground. Sometimes it is made up of more than one Component Units, which are used or likely to be used as dwellings (residence) or establishment such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have Component Units may be used for contribution of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Permanent houses

Houses in which both wall and roof are made of permanent materials. Materials of wall can be burnt bricks, GI / metal / Asbestos sheets, stone with lime or cement or cement concrete. Roof may be made of tiles, slate, shingle, corrugated / galvanized iron or zinc / other metal or asbestos sheets, bricks, lime and stone, stone, RBC / RCC or concrete.

Semi-permanent houses

Houses in which either wall or roof is made of permanent materials and the other is made of temporary materials.

Temporary houses

Houses in which both wall and roof are made of materials which have to be replaced frequently. Wall may be made of grass, thatch, leaves, reeds, bamboo, mud, plastic / polythene, un-burnt bricks or wood. Roof may be made from grass, leaves, bamboo, thatch, mud, un-burnt bricks or wood.

Room

A room should have four walls with a doorway and a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and breath of at least 1½ metres and 2 metres in height. An enclosure which is used in common for sleeping, sitting, dining, storing and cooking etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Census house

A Census House is a building or a part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Village

The basic unit for rural area is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognised boundaries is treated as one village.

Town/Urban areas

The following areas are treated as towns/ urban area:

a) All places with a municipality, municipal corporation, cantonment board or notified

town area committee, etc.

b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000 ;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of the village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 201, following criteria are taken as pre-requisites :

(a) The core town or at least one of the constituents towns of an urban agglomeration should necessarily be a statutory town : and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted :

(i) a city or town with one or more contiguous outgrowths;

(ii) two or more adjoining towns with their outgrowths ; and

(iii) a city and one or more adjoining towns with their outgrowths all of which form a contiguous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household may consist of related to each other, unrelated or both. Examples of unrelated household are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, orphanages, etc. These are called 'Institutional Households'. There may be one member household, two member households or multi member households. For census purposes each one of these types is regarded as a 'Household'

If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would be treated as a separate household. The important link in finding out whether it is a household or not is a common kitchen. In a few situations, it may become difficult to apply the definition of household strictly. For example, a person living alone in a census house, whether cooking or not cooking meals, will have to treated as a household. Similarly, if husband and wife or a group of related persons are living together in a census house but not cooking their meals, will also constitute a normal household.

For this purpose of census there are three type of Households i.e., Normal Household, Institutional Household and the Houseless Household.

Institutional household

A group of unrelated persons who live in a institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements,

in hume pipes, under fly-overs and staircases, or in the open in places like worship, mandaps, railways platforms etc., are treated as Houseless households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

According to the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 and the Constitution (Scheduled Tribes) Order (Amendment) Act, 1987, the list of Scheduled Castes and Scheduled Tribes in Meghalaya is as follows:

Scheduled Castes :

1. Bansphor
2. Bhuinmali, Mali
3. Brittial, Bania Bania
4. Dhupi, Dhobi
5. Dugla, Dholi
6. Hira
7. Jalkeot
8. Jhalo, Malo Jhalo-Malo
9. Kaibartta, Jaliya
10. Lalbegi
11. Mahara
12. Mehtar Bhangi
13. Muchi, Rishi
14. Namasudra
15. Patni
16. Sutradhar

Scheduled Tribes :

1. Boro, Kachari
2. Chakma
3. Dimasa, Kachari
4. Garo
5. Hajong
6. Hmar
7. Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam
8. Koch
9. Any Kuki Tribes, including :
   - i) Biate, Biete
   - ii) Changsan
   - iii) Chongloi
   - iv) Doungel
   - v) Gamalhou
   - vi) Gangte
   - vii) Guite
   - viii) Hanneng
   - ix) Haokip, Haupit
   - x) Haolai
   - xi) Hengna

xii) Hongsungh
xiii) Hrangkhwal, Rangkhol
xiv) Jongbe
xv) Khawchung
xvi) Khawathlang, Khothalong
xvii) Khelma
xviii) Kholhou
xix) Kipgen
xx) Kuki
xxi) Lengthang
xxii) Lhangum
xxiii) Lhoujem
xxiv) Lhouvun
xxv) Lupheng
xxvi) Mangjel
xxvii) Misao
xxviii) Riang
xxix) Sairhem
xxx) Selnam
xxxi) Singson
xxxii) Sitlhou
xxxiii) Sukte
xxxiv) Thado
xxxv) Thangngeu
xxxvi) Uibuh
xxxvii) Vaiphei

10. Lakher
11. Man (Tai speaking)
12. Any Mizo (Lushai) tribes
13. Mikir
14. Any Naga tribes
15. Pawi
16. Raba, Rava
17. Synteng

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the

last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Marginal worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system means a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in those towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrine from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of live deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid -year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the different between crude birth and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

Total Fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of woman till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital Fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of woman till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age specific mortality rate (ASMFR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infant dying within the first month of life (28 days or under) in a tear per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Late Neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$SBR = \frac{\text{Number of still birth during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of woman in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any related to pregnancy and child births per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to woman in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 woman in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 woman in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he / she is enumerated during the census is other than his/her place of his/her birth.

Similarly a person is considered as migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these

are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational courses that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides she/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relative's houses is in a place where the hospital or parents/relative's house is the place of last residence of the child but not the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of the education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another state of the country (inter-state migration),

(iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. This present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz., rural to rural, rural to urban, Urban to rural and urban to urban.

Civic status of urban units

Civic status of town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Committee / Municipal Council, Municipality etc.

Size-class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ Towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000 to 1,999,999); M4 (500,000 to 999,999); M3 (300,000 to 499,999); M2 (200,000 to 299,999) and M1 (100,000 to 199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,000 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000-9,999 are Class V and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (improvement and Clearance)

Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) area by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or family arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are determined to safety, health or morals.

Mega city

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastucture Development in Mega Cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega Cities.

(vii) 2001 Census Findings-Population, its distribution

Jaintia Hills District was created by up-grading Jowai Sub-division with its headquarters at Jowai.It is the easternmost district of the state. It comprises of four C.R.D. Blocks namely; Thadlaskein, Laskein, Khliehriat and Amlarem. The census of India, 2001 recorded a total of 2,99,108 out of which 2,74,051 population are living in 467 inhabited villages and 25,057 in only town of the district , Jowai. The population of the district live predominantly in rural areas with 91.6% while only 8.4% live in urban areas. Jowai town is having status of Municipality (M) falls in class III category. The decadal growth of population of the district is 35.7% higher than the State growth. With a total area of 3,819 Sq.Km, the density of the population comes to 78 persons per square kilometres. The sex ratio of the district is 996 and is the highest sex ratio among the districts of the State. In the town the number of females exceed the number males showing 1,043 females per 1,000 males. Sex ratio of Scheduled Tribes is also very high with 1013. The district is predominantly inhabited by the tribals. The literacy rate of the district is 51.9% of which males are 50.1% and females 53.7%. It is observed that in the district females are more populated and also more literates than males. The district has five Degree Colleges fairly distributed both in urban and rural areas. The work participation of the district 42.4% of which male participation is 48.0% and female is 36.9%. The percentage of non-workers in the district is shown as 63.1% of the total population. The population of the district depend predominantly on agriculture, because 75.7% of the total workers are engaged in agricultural sector. Only 2.1% of workers are engaged in household industry and 22.2% in other workers. The majority of population are Christians by religion with 65.3% of the total population of district. Other major religions viz. Hindus, Muslims, Sikhs, Buddhists and Jains are 4.4%, 0.7%, 0.0%, 0.1%, and 0.0% respectively. However, following " Other religion and persuasions" are comparatively higher with 29.4% in the district.

Scheduled Castes and Scheduled Tribes

The proportion of Scheduled castes and Scheduled Tribes population in the district are recorded 0.2% and 96.0% to the total population respectively. The population growth of Scheduled Castes and Scheduled Tribes for last decade 1991-2001 is recorded (-)39.0% and 36.3% respectively. The decadal growth in the rural areas shown (-) 36.1% and 37.6% respectively while in urban areas it is (-)71.0% and 23.4% respectively. It is observed that the population of Scheduled Castes in the last decade is shown negative growth while the growth rate among Scheduled Tribes shown normal. The negative growth of Scheduled Castes is may be due to constant move in search of jobs and other reasons. Most of them have no permanent residence in the district.

DECADAL GROWTH RATE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION

Total/ Rural/ Urban	SC Population			ST Population		
	1991	2001	Decadal Growth Rate	1991	2001	Decadal Growth Rate
1	2	3	4	5	6	7
Total	747	456	-39.0	210,558	287,049	36.3
Rural	685	438	-36.1	192,043	264,199	37.6
Urban	62	18	-71.0	18,515	22,850	23.4

Brief Analysis of PCA data based on inset tables 1 to 36

In the few pages that follow an attempt is being made to briefly analyse the few tables based on data collected from the Primary Census Abstract, the Village Directory and Town Directory and Houses, Household Amenities and Assets depicting on their own way the various demographic characteristics of the population of the district, the basic amenities such as education, medical, improved drinking water, etc available to the population of the district, and the housing stock, the household amenities and assets available to the households of the district. A total of 52 tables have been prescribed for the purpose. Tables 1 to 36 present data from the Primary Census Abstract, inset tables 37 to 47 shows data on village Directory and Town Directory and tables 48 to 52 gives data on household amenities and assets.

Tables 6,10,14,21,31 and 34 are to present data on Primary Census Abstract Tahsil wise and the rest C.R.D. Block-wise. In Meghalaya, however, the Census of India starting from 1981 has been conducted with the Community and Rural Development Blocks as the administrative unit below the district and above the villages and towns and all data have been tabulated and presented C.R.D. Block-wise. Therefore the above six tables have been excluded. Moreover, in Meghalaya there is no such administrative unit by the name Tahsil. Till 1971 the Census of India was conducted in Meghalaya Police Station-wise and never Tahsil-wise.

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Thadlaskein	78,394	57,793	20,601	104,620	79,563	25,057	33.5	37.7	21.6	26.3	24.0
2	Laskein	46,884	46,884	--	65,726	65,726	0	40.2	40.2	--	--	0.0
3	Amlarem	29,967	29,967	--	35,970	35,970	0	20.0	20.0	--	--	0.0
4	Khliehriat	65,228	65,228	--	92,792	92,792	0	42.3	42.3	--	--	0.0
	District Total:	**220,473**	**199,872**	**20,601**	**299,108**	**274,051**	**25,057**	35.7	37.1	21.6	--	**8.4**

This table shows the decadal change in population of C.D. Blocks by residence between 1991 and 2001 Census. It is observed that Khliehriat C.D. Block has the highest decadal growth rate between 1991 - 2001 with 42.3 percent growth rate followed by Laskein C.D. Block with 40.2 percent. Amlarem C.D. Block has the lowest growth rate with 20.0 percent only. The district growth rate with 35.7 percent is found to be much higher than the State growth rate.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Thadlaskein	122	79,563	39,303	40,260	32 (26.2)	1,556	1,554
2	Laskein	77	65,726	32,886	32,840	15 (19.5)	514	503

Table No. 2 depicts the number and percentage of inhabited villages in specified population size ranges with the related population, 2001. It is observed that out of 467 villages in Jaintia Hills district, as many as 182 villages with 39.0% villages fall under Khliehriat C.D. block. The average number of inhabited villages per C.D. Block is found to be 117. Khliehriat C.D. block is also the largest C.D. Block in terms of population accounting for 33.9 percent of the district population whereas Amlarem C.D. Block is found to be lowest with 13.1 percent of the district population. In this district the village on an average has a population of 587 persons. Out of 467 inhabited villages, 149 (31.9%) villages are small sized with a population below 200. 151 (32.3%) villages are in the size class 200-499, 89 (19.1%) villages are in the size class 500-999, 51(10.9%) villages in the size class 1000-1999, 26 villages in the size class 2000 -4999 and the remaining 1 village is in the size class 5000-9949.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
There is no New, Denotified, Declassified and Merged Town in the District.

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10				
11-20				
21-50				
51-100		N.A.		
101-200				
201-300				
301-500				
501 +				
Not known				
District Total:				

In Meghalaya, the villages have not been cadastrally surveyed. The area of each village is not known and the density of the villages in the absence of their area cannot be calculated. Therefore, no data can be presented in Table No. 4.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,036	1,047	725	1,092	1,092	-
1911	1,013	1,024	757	1,064	1,064	-
1921	1,000	1,009	809	1,041	1,041	-
1931	971	989	697	986	986	-
1941	966	991	683	967	967	-
1951	949	969	784	954	954	-
1961	937	971	764	1,015	1,016	1,041
1971	942	958	853	999	1,003	955
1981	954	965	904	978	977	994
1991	955	966	910	973	973	975
2001	972	969	982	995	991	1,043

Note : Sex ratio has been defined here as the number of females per 1000 males.

Table No. 5 shows the sex ratio of state and district, 1901-2001. It is seen that the sex ratio has decreased steadily from 1901 till 1961 and thereafter increased in every Censuses till 2001 Census in respect of the state. The sex ratio in 2001 in respect of Meghalaya is found to be 972 against the India's sex ratio of 933. The sex ratio of Jaintia Hill district has been found to 995, which is higher than the state sex ratio of 972. The urban sex ratio of the district also shows an upward trend since 1961 to 2001. The sex ratio of Jowai the only town of the district is found to be 1043 in 2001 against the State sex ratio of 982.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial	Name of C D block	Sex ratio
1	2	3
1	Thadlaskein	1,024
2	Laskein	999
3	Amlarem	981
4	Khliehriat	963
	District (Rural) Total:	**991**

The table shows the Sex Ratio by C.D. Block, 2001 Sex Ratio i.e, number of females per 1000 males are found to highest in Thadlaskein C.D. Block with 1024 females per 1000 males whereas Khliehriat C.D. Block with 963 Sex Ratio are found to be lowest amongst the four C.D. Block. But, it is observed that District Sex Ratio in the rural areas with 991 are much higher than State Sex Ratio of 972.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	22	4.7	4,204	1.5
700-749	6	1.3	705	0.3
750-799	13	2.8	2,434	0.9
800-849	13	2.8	2,490	0.9
850-899	41	8.8	17,119	6.2
900-949	61	13.1	33,930	12.4
950-999	87	18.6	63,897	23.3
1000-1099	160	34.3	130,947	47.8
1100+	64	13.7	18,325	6.7
District Total:	**467**	**100.0**	**274,051**	**100.0**
Sex ratio (Rural) for District:			**991**	

Table No. 8 shows the sex ratio of rural population by ranges, 2001. It is seen that sex ratio for villages in the population ranges 1000 - 1099 is the highest with 34.1 percent having 159 villages out of 466 villages in the district. The percentage of population covered in those villages are 47.4. The sex ratio of the villages having population ranges 700 - 749 is found to be minimum with only 6 villages, the percentage being 1.3.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Jowai	(M)	1,043
Sex ratio (Urban) for the district:			**1,043**

Table No. 9 depicts the sex ratio of Urban Agglomerations/Towns, 2001. The Sex Ratio of Jowai town, which is the only town of the district, is found to be 1,043 which is much higher than the district sex ratio of 996 and state urban sex ratio of 982.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age
		Persons	Males	Females	
1	2	3	4	5	6
1	Thadlaskein	18,623	9,274	9,349	1,008
2	Laskein	16,036	8,068	7,968	988
3	Amlarem	7,531	3,757	3,774	1,005
4	Khliehriat	20,978	10,531	10,447	992
District (Rural) Total:		**63,168**	**31,630**	**31,538**	**997**

This table shows the sex ratio of population in the age group 0-6 at C.D. Block level, 2001. Sex ratio of population in the age group 0-6 is found to be more than 1,000 in Thadlaskein and Amlarem C.D. Block with 1,008 and 1,005 respectively whereas the district sex ratio is found to be 997.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	63	13.5	1339	2.1
700-749	19	4.1	1831	2.9
750-799	23	4.9	1665	2.6
800-849	21	4.5	2634	4.2
850-899	40	8.6	5202	8.2
900-949	42	9.0	8487	13.4
950-999	34	7.3	9832	15.6
1000-1099	95	20.3	18830	29.8
1100+	130	27.8	13348	21.1
District (Rural) Total	**467**	**100.0**	**63168**	**100.0**
Sex ratio (Rural) for District:			**997**	

This table shows the sex ratio of rural population in the age group 0-6 by ranges. Sex ratio of the district is found to be 997 which is higher than the state sex ratio of 972 females per 1000 males. The sex ratio of the district is also found to be increasing from 973 in 1991 Census to 997 in 2001 Census. It is observed that the number of inhabited villages having sex ratio of 1100+ are found to be the highest whereas number of villages having sex ratio of 700-799 are found to be lowest with 19 villages only.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town+*	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Jowai	(M)	4,241	2,165	2,076	959
District(Urban) Total			**4,241**	**2,165**	**2,076**	**959**

Table No. 13 reveals the sex ratio of population in the age group 0-6 for urban Agglomerations/Towns, 2001. In Jowai, which is the only urban area of the district, the sex ratio in the age group 0-6 is found to 959 against the state sex ratio of 973 in the age group 0-6.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Thadlaskein	79,563	17	77,563	0.0	97.5
2	Laskein	65,726	43	64,307	0.1	97.8
3	Amlarem	35,970	282	34,203	0.8	95.1
4	Khliehriat	92,792	96	88,126	0.1	95.0
	District (Rural) Total:	**274,051**	**438**	**264,199**	**0.2**	**96.4**

Table No. 15 depicts the number and percentage of Scheduled Castes and Scheduled Tribe population in C D Block. Percentage of Scheduled Tribe population of the district rural areas is found to be 96.4% against the state Scheduled Tribe percentage of 85.9%. Whereas the percentage of Scheduled Caste is found to be negligible with only 0.2 percent population.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	450	96.4	0	0.0
Less than 5	14	3.0	175	40.0
5-10	1	0.2	21	4.8
11-20	1	0.2	11	2.5
21-30	1	0.2	231	52.7
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**467**	**100.0**	**438**	**100.0**

This table reveals the proportion of Scheduled Caste population to total population in villages, 2001. Out of 467 villages in the district, there are no Scheduled Caste population in as many as 450 villages and 14 villages out of 17 villages where Scheduled Caste population are available, the percentage of Scheduled Caste population to total population is less than 5 percent. In the district, there are no villages having more than 30 percent Scheduled Caste population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	6	1.3		0.0
Less than 5	2	0.4	7	0.0
5-10	1	0.2	1	0.0
11-20	1	0.2	16	0.0
21-30	2	0.4	498	0.2
31-40	1	0.2	51	0.0
41-50	3	0.6	919	0.3
51-75	8	1.7	2,331	0.9
76 and above	443	94.9	260,376	98.6
District Total	**467**	**100.0**	**264,199**	**100.0**

This table shows the proportion of Scheduled Tribes population to total population in villages 2001. Out of 467 villages in the district, in 443 villages, the percentage of Village having Scheduled Tribe is found to be more than 94 percent and only in 6 villages there are no Scheduled Tribe population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Jowai (M)	25,057	18	22,850	0.1	91.2
District(Urban) Total		**25,057**	**18**	**22,850**	**0.1**	**91.2**

This table shows the number and percentage of Scheduled Castes and Scheduled Tribes population in Urban Agglomerations/Towns, 2001. It is seen that 91.2 percent of the total population of Jowai town, which is the only town in the district, are Scheduled Tribes.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Thadlaskein	417	1,026
2	Laskein	132	1,005
3	Amlarem	893	1,002
4	Khliehriat	200	999
District (Rural) Total		**570**	**1,008**

Table No. 19 depicts the sex ratio among Scheduled Caste and Scheduled Tribes in C D Block 2001. Sex Ratio amongst the Scheduled Tribes are found to be high whereas sex ratio of Scheduled Caste for most of the C.D. Block of the district are found to be low. The sex ratio of the Scheduled Tribes are found to be more than the district average sex ratio. The reason for low Sex Ratio in Khliehriat C. D. Block is due to the influx of male labourers for coal mining.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jowai (M)	636	1,070
Sex ratio (Urban) for the district:		**636**	**1,070**

This table shows the sex ratio among Scheduled Castes and Scheduled Tribes in urban Agglomerations/Towns, 2001. The Sex ratio of Scheduled Tribe is found to be 1,070 in respect of Jowai town against the urban sex ratio of 1,072 for the state. The sex ratio of Scheduled Caste is found to be 636 for Jowai town against the state Scheduled Caste urban sex ratio of 877.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Thadlaskein	27,351	12,062	15,289	52,212	27,241	24,971	44.9	40.2	49.5	-9.3
2	Laskein	20,844	9,112	11,732	44,882	23,774	21,108	41.9	36.7	47.2	-10.5
3	Amlarem	18,809	9,478	9,331	17,161	8,680	8,481	66.1	65.8	66.5	-0.7
4	Khliehriat	34,565	18,266	16,299	58,227	29,016	29,211	48.1	49.7	46.5	3.2
District (Rural) Total:		**101,569**	**48,918**	**52,651**	**172,482**	**88,711**	**83,771**	**48.2**	**46.1**	**50.2**	**-4.0**

This table brings out number and percentage of literates by sex in C.D. Blocks-2001. For the district as a whole, the number of female literates (50.2%) are substantially higher than the male literates (48.2%). Out of the 4 C.D. Blocks in the district Amlarem is the highest with 66.1% literates whereas Laskein C.D. Block with 41.9% literates are found to be the lowest. Except Khliehriat C.D. Block females literates are found to be the more in all other 3 C.D. blocks compared to the male literates. The rural literacy rate of the district is found to be 48.2 against the 1991 Census rural literacy rate of 30.5

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	6	1.3	93	0.0
1-10	32	6.9	9,364	3.4
11-20	52	11.1	23,422	8.5
21-30	69	14.8	31,586	11.5
31-40	62	13.3	43,453	15.9
41-50	62	13.3	45,063	16.4
51-60	50	10.7	39,780	14.5
61-70	45	9.6	31,716	11.6

1	2	3	4	5
71-80	34	7.3	25,205	9.2
81-90	42	9.0	21,075	7.7
91-99	11	2.4	3,198	1.2
100	2	0.4	96	0.0
District Total:	**467**	**100.0**	**274,051**	**100.0**
Literacy rate for District:		**51.9**		

This table shows the distribution of villages by literacy range 2001. Number of inhabited villages in the range of literacy rate of villages are found to be more in the ranges between 21-30, 31-40 and 41-50, the percentage distribution of population are also found to be more in these ranges.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA^/ Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Jowai (M)	18,613	9,225	9,388	6,444	3,037	3,407	89.4	91.4	87.6	3.8
District(Urban) Total		**18,613**	**9,225**	**9,388**	**6,444**	**3,037**	**3,407**	**89.4**	**91.4**	**87.6**	**3.8**

Table No. 24 shows the number and percentage of literates and illiterates by sex in urban Agglomerations/Towns 2001. The percentage of literates in Jowai town is found to be 89.4% against the state urban literacy rate of 86.3 percent. The gap in male female literacy rate is found to be 3.8

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Thadlaskein	6	5	1	11	7	4	40.0	45.5	25.0	20.5

3	Amlarem	96	61	35	186	88	98	44.9	55.0	34.0	21.0
4	Khliehriat	66	61	5	30	19	11	75.9	80.3	45.5	34.8
District (Rural) Total:		**197**	**154**	**43**	**241**	**125**	**116**	**55.5**	**65.8**	**35.5**	**30.3**

This table depicts the number and percentage of Scheduled Caste literates and literates by Sex in C.D.Blocks, 2001.It is observed that Khliehriat & Laskein C.D.Blocks, literacy rate with 75.9 and 74.4 respectively are higher than the state literacy rate, whereas Amlarem and Thadlaskein C.D.Blocks with 44.9 and 40.0 percent literacy are found to be much lower than the state and district literacy rate. The male literacy rate with 80.3 percent is found to be highest in Khliehriat C.D.Block and female literacy rate with 66.7 percent is found to be highest in Laskein C.D.Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	11.8	32.0	7.3
1-10	0	0.0	0.0	0.0
11-20	2	11.8	22.0	5.0
21-30	0	0.0	0.0	0.0
31-40	0	0.0	0.0	0.0
41-50	3	17.6	243.0	55.5
51-60	0	0.0	0.0	0.0
61-70	1	5.9	14.0	3.2
71-80	1	5.9	42.0	9.6
81-90	2	11.8	74.0	16.9
91-99	0	0.0	0.0	0.0
100	6	35.3	11.0	2.5
District Total:	**17**	**100.0**	**438.0**	**100.0**
Literacy rate for District (Rural):		**55.5**		

This table shows the distribution of villages by literacy rate range for scheduled castes population, 2001. It is observed that majority of Scheduled Caste population (55.5 percent) fall in the range of literacy rate of 41-50 and concentrated only in 3 villages out of 17 villages having Scheduled Caste population 6 villages are found to be cent percent literates with population of only 11.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Jowai (M)	15	9	6	3	2	1	93.8	100	85.7	14.3
	Jaintia Hills (Urban)	**15**	**9**	**6**	**3**	**2**	**1**	**93.8**	**100**	**85.7**	**14.3**

This table depicts the number and percentage of Scheduled Caste literates and illiterates by sex in towns, 2001. Jowai is the only town in the district. With 93.8 percent literates, Jowai town is found to be very high in respect of literacy rate of Scheduled Caste by sex and all males in the town amongst the Scheduled Castes are found to be literates.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Thadlaskein	26,516	11,643	14,873	51,047	26,644	24,403	44.7	39.9	49.3	-9.5
2	Laskein	20,097	8,681	11,416	44,210	23,394	20,816	41.4	35.9	46.8	-10.8
3	Amlarem	18,016	8,895	9,121	16,187	8,192	7,995	66.8	66.0	67.6	-1.6
4	Khliehriat	32,058	16,340	15,718	56,068	27,754	28,314	47.3	48.2	46.3	1.9
District (Rural) Total:		**96,687**	**45,559**	**51,128**	**167,512**	**85,984**	**81,528**	**47.7**	**45.2**	**50.1**	**-4.9**

Table No. 28 shows the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. Blocks, 2001. It is seen that Amlarem with 66.8 percent literates is the highest amongst all the four C.D. Blocks of the district. Literacy rate in other three C.D. Blocks are found to be lower than the District literacy rate of 47.7 percent. It is interesting to note that female literacy rates are found to be higher than male literacy rate in the three out of four C.D. Blocks. Only in Khliehriat C.D. Blocks, male literacy rate is found to be higher than the female literacy rate.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	6	1.3	67	0.0
1-10	29	6.3	9,013	3.4
11-20	50	10.8	23,171	8.8
21-30	71	15.4	33,653	12.7
31-40	59	12.8	39,526	15.0
41-50	64	13.9	46,823	17.7
51-60	48	10.4	35,394	13.4
61-70	43	9.3	29,268	11.1
71-80	35	7.6	22,079	8.4
81-90	42	9.1	21,963	8.3
91-99	11	2.4	3,145	1.2
100	3	0.7	97	0.0
District Total:	**461**	**100.0**	**264,199**	**100.0**
Literacy rate for District (Rural):		**47.7**		

Table No. 29 shows the distribution of villages by literacy rate range for Schedule Tribe population, 2001. Similar literacy rate for villages are found to be in most of the ranges. It is seen that only 3 villages having 97 population are found to be cent percent literates.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Jowai (M)	17,066	8,339	8,727	5,784	2,697	3,087	90.1	92.3	88.1	4.1
Jaintia Hills (Urban)		**17,066**	**8,339**	**8,727**	**5,784**	**2,697**	**3,087**	**90.1**	**92.3**	**88.1**	**4.1**

This table depicts the number and percentage of Scheduled Tribes Literates and Illiterates by sex in towns, 2001. Literacy rate of Scheduled Tribes in Jowai town is found to 90.1 percent, which is much higher than the State literacy rate and the gap in male/female literacy rate is found to be only 4.1

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

This table depicts the number and percentage of main workers, marginal workers and non workers by sex in C D Blocks, 2001. No significant difference regarding percentage of main worker are observed in all the C.D. Blocks of the district. It is seen that female non workers are found to be more than the male non workers in all the C.D. Blocks of the district whereas male total workers are found to be more than the female total workers in all the C.D. Blocks. The male marginal workers are found to be more than female in Amlarem C.D. Block whereas female marginal workers are more than male in other 3 C.D. Blocks.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table No. 33 shows the number and percentage of main workers, marginal workers and non workers by sex in Urban Agglomerations/Towns, 2001. It is observed that in Jowai, which is the only town in the district, the percentage of main workers are 28.4 and the percentage of Non-workers are found to be 70 percent. The Marginal workers of the town is found to be 1.6 percent only. The male main workers of the town is found to be 34.1 percent against the female main workers of 22.9 percent. The male non-workers are found to be 64.0 percent against 75.8 percent female non- workers.

TABLE35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

This table reveals the distribution of workers by sex in four categories of economic activities in 2001. The number of cultivators are highest in Laskein C.D. Block with 55.8 percent whereas Amlarem C.D. Block with 37.6 percent cultivators is thelowest. The number of Household Industry workers with 3.9 percent are more in Khliehriat C.D. Block. The percentage of Agricultural labourers are more or less equal in all the C.D. Blocks. Amlarem C.D. Block has the highest number of other workers with 26.5 percent.

TABLE36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Percentage of workers by sex to total workers are shown in brackets.

This table depicts the distribution of workers by sex in four categories of economic activity of urban Agglomerations/Towns, 2001. It is observed that as many as 98.6 percent of the population of Jowai town, which is the only urban area of the district, are other workers. The male and female other workers are found to be 98.5 and 98.7 respectively. The other category of workers viz Cultivators, Agricultural labourers and Household Industry workers are found to be negligible.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Sl. No	Name of C. D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table No. 37 shows the distribution of villages according to availability of different amenities. It is seen that as many as 394 villages, out of 467 inhabited villages of the district, are having education facility which include Primary, Middle, High school and colleges. The villages having educational facility account for 84.4 percent in 2001 census as against 79.77 percent in 1991 census. The number of villages having Medical facilities has increased from that of 9.1 percent in 1991 to 15.0 percent in 2001 census. Improved drinking water facilities are found in 25.1 percent of the villages. Post office facility is available in 42.0 percent of villages, transport communication in 80.9 percent villages, Bank in 15.1 percent villages, Agricultural credit societies in 7.7 percent villages, approach by pucca road in 66.5 percent villages and power supply in 84.8 percent villages. The approach by pucca road and power supply has remarkably increased during the decade from 27.11% and 58.88% respectively in 1991 census.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table depicts the number and percentage of rural population served by different amenities, 2001. It is seen that 97.1% of the rural population have been covered by educational facilities in the district. The transport and communication, and power supply cover 80.4 percent and 84.8 percent of the population respectively in the district, which are found to be higher than the other amenities. However, telephone and banking facilities in the district are found to be less with 9.5% and 15.1% of the persons respectively cover under these amenities. The agricultural credit society is found to be in Thadlaskein C.D. Block only in the district.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :				
(a) Primary School	56	19	9	84
(b) Middle School	117	58	168	343
(c) Degree College	18	15	431	464
2. Medical :				
(a) Hospital	16	10	440	466
(b) PHC	139	243	65	447
3. Post Office	111	239	34	384
4. Telephone	12	17	422	451
5. Bus Service	80	75	17	172
6. Banks :				
(a) Commercial Bank	46	46	356	448
(b) Cooperative Bank	26	24	414	464
7. Agricultural Credit Societies	8	6	441	455

Table No. 39 depicts the distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available, 2001. It is observed that most of the primary schools are located within 5 kilometres from the village whereas most of the middle schools and degree colleges are found in the distance range of 10+ kilometres. It is also seen that hospital facilities in 440 villages are available beyond 10 kilometres. Within less than 5 kilometres only 12 villages are having telephone facilities whereas 440 villages having telephone facility beyond 10 kilometres. Out of 467 villages in the district, only 172 villages can avail bus services, of which only 80 villages fall within 5 kilometres distance, for 75 villages it is between 5 to 10 kilometres and for 17 villages, it is more than 10 kilometres. It is also seen that Banks are available in 10+ kilometres distance in most of the villages. The agricultural credit society is available for only 14 villages within 10 kilometres distance, in the remaining 441 villages having these facilities beyond 10 kilometres.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricul-tural Credit Societies	Approach by pucca road

District Total		**18.8**	**8.8**	**10**	**10.5**	**5.9**	**0**	**4.6**	**0**	**0**

This table shows per capita receipt and expenditure in Jowai town. Out of per capita receipt of Rs. 18.8, 53.2 percent of the amount is collected from all other sources and 46.8 percent of the amount collected through taxes. In respect of per capita expenditure, out of per capita expenditure of Rs. 10.5, 56.2 percent of the amount incurred in general administration and 43.8 percent of the amount is incurred in Public works.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Jowai (M)	8.8	4.4	2.8	1.6	1.2
District Total		**8.8**	**4.4**	**2.8**	**1.6**	**1.2**

This table reveals the school/colleges per 10,000 population in Statutory towns. There are 8.8 numbers of Primary schools per 10,000 population, 4.4 numbers of middle schools, 2.8 numbers of Secondary schools, 1.6 number of Senior Secondary schools and 1.2 numbers of college per 10,000 population in the town out of the total population of 25,057.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Jowai(M)	105
District Total		**105**

This table shows the number of beds in medical institutions in towns, 2001. The Jowai town having a population of 25,057, there are 105 beds per 10,000 population which accounts for only 1.05 percent bed.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
		N.A.		

There is no slum population in the town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Jowai (M)	Bakery	Coal
		Bamboo Baskets	Broomstick
		Agricultural Products	Turmeric

Table No. 47 depicts the most important commodity exported of and manufactured in town 2001. There is only one statutory town in Jaintia Hills district. Coal is the main commodity exported outside the state as well as outside the country, apart from turmeric and broomstick. The manufactured products are mainly sold and consumed within the district.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

District total		**21.0**	**54.3**	**24.6**	**16.4**	**56.5**	**26.9**	**64.8**	**32.5**	**2.3**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note :

Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent : 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Table No. 49 depicts the percentage distribution of households living in Permanent, Semi permanent and Temporary houses, 2001. In Jaintia Hill District 21.0 percent households are living in permanent houses, 54.3 percent in Semi permanent houses and 24.6 percent in temporary houses. It is seen that only 16.4 percent of the households in rural areas live in permanent houses whereas 64.8 percent of the households are living in permanent houses in the urban areas. There are 26.9 percent of the households in the rural area who lives in temporary houses against 2.3 percent in the urban areas. Similarly, 56.5 percent of the households are living in Semi permanent houses in the rural areas against 32.5 percent in the urban area.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Sl. No.	Tahsil	Total / Rural / Urban	Number of house-holds	Number and percentage of households having

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'improved' or other wise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

This table depicts the percentage of household having improved drinking water source, electricity, bathroom, toilet and drainage facility. In respect of households having improved drinking water source are found to be highest in Amlarem C.D. Block with 78.1 percent households whereas with 48.4 percent households Laskein C.D. Block is found to be lowest. Number & percentage of having electricity is the highest in Amlarem C.D. Block, in respect of households having Bathroom and Drainage Khliehriat C.D. Block is the highest with 75.6 and 46.3 percent households respectively in respect of toilet, Thadlaskein C.D. Block is the highest among all the C.D. Blocks.

Percentage in brackets

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table No. 51 shows the number and percentage of household by type of fuel used for cooking, 2001. It is observed that 86.0 percent of the households used firewood in the district whereas only 7.1 percent of the households used cooking gas (L.P.G.) and Kerosene is used by 3.1 percent household. The other mediums of cooking are found to be negligible.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSETS, 2001.

Sl. No.	C.D. Block	Total Rural Urban	Total number of house-holds	Total number of households availing banking services	Availability of households assets

4	Khliehriat	Total	15,517	2,096	4,414	1,857	254	282	124	621	10,806
		Rural	15,517	2,096	4,414	1,857	254	282	124	621	10,806
		Urban	-	-	-	-	-	-	-	-	-
District Total			**49,918**	**8,731**	**11,364**	**6,755**	**1,429**	**1,145**	**513**	**1,528**	**36,028**

This table shows the number of households availing banking services and number of households having each of the specified asset, 2001. It is observed that 21.9 percent of the household in Thadlaskein C.D. Block are availing banking facility, 12.2 percent of the household in Laskein C.D. Block 24.1 percent of the household in Amlarem C.D. Block and 13.5 percent of the household Khliehriat C.D. Block are

availing banking facility. It is also seen that only 17.5 percent of the household in the district are availing banking facility. It is also seen that for all the four C.D. Blocks in the district more households are using Radio/transistor than Television. However in urban area more households are found to be using Television than Radio/Transistors. Since the only town falls under Thadlaskein C.D. Block, it is seen that more households in this C.D. Blocks are availing Telephone facility in comparison to other three C.D. Blocks. It is seen that a very negligible percentages of households are availing Bicycle, Scooter, Motor Cycle, moped, Car, Jeep and Van. It is thus seen that 69.3 percent of the household in Thadlaskein C.D. Block, 81.5 percent in Laskein C.D. Block, 70.8 percent households in Amlarem C.D. Block and 69.6 households in Khliehriat C.D. Block have no specified assets.

PLACES OF HISTORICAL OR ARCHAEOLOGICAL IMPORTANCE

Thadlaskein Lake : Thadlaskein, the block headquarters, is located only 3 Kms., away from Jowai, the district headquarter and about 56 Kms., from the state capital, Shillong. There is a beautiful lake at Thadlaskein. According to legend, this lake was dug by using the heads of bows by the followers of U Sajar Nangli, a Lyngskor of Jaintia King, who had revolted against his ruler. Today it is a beautiful spot for outing, boating and picnic.

Nartiang : Nartiang is another place of historical and tourist importance, where majority of the residents claimed to belong to Hindus. Nartiang Village is situated about 22 Kms., from Jowai. Here one finds large number of monoliths, the biggest and longest is 26'5" by 6'9' by 2'3' above ground level. In ancient days the Jaintia King used to hold an annual 'durbar' in that place. There is an old temple where the devotees perform worship of Lord Shiva. A hole near the temple is reported to have been connected with the Myntang River underground and according to legend; human sacrifices were performed in the temple. The place has now been developed by the Tourism Department and there is a tourist bungalow near the village.

Syndai Cave : Syndai is an important village of Jaintia Hills and located at a distance of 35 Kms. from Jowai on the road to Muktapur. It is famous for a number of caverns in the limestone borne area. Till date, eleven caves have so far been discovered near Syndai. These caves have once served as a secure place for Jaintia Kings where they used to keep their families during wartime.

Sutnga : Sutnga, situated in the northeast of Khliehriat C.D. Block, is another village of tourist interest. Sutnga village was the original home of the Jaintia Kings. Just above this village there is a beautiful pool of water, which is another attraction for the tourists.

Dawki : Dawki village, about 86 Kms., from the state capital, Shillong, is a gateway between Meghalaya and Bangladesh. On the way from Shillong to Dawki, a beautiful bridge can be seen hanging over the Umngot River. The water in this river is clear and potable. Fishing and other water sports are the main attractions for the tourists. Every year boating competition is held in the river and participated by the people from far and near.

Syntuksiar : It is a beautiful valley just east of Jowai. A portion of the river transversing the valley is also called Syntuksiar. The valley is always called as the rice bowl of Jaintia Hills, since its yield of rice is higher than any other area of cultivation.

Historical figure associated with the district

U Kiang Nangbah : The legendary U Kiang Nangbah was one of the most gallant freedom fighters the district has ever produced. He had a strong physique and possessed a remarkable feat to do odd jobs. He was a brave fighter, good swimmer and skilled equestrian. He received indigenous training from his family members and local veterans in matter of guerrilla warfare and public affairs, etc. When the Jaintia Hills was annexed in 1835, by the British, U Kiang Nangbah was not at all enchanted with the way the British authority treated the Pnars. The imposition of house tax, income tax and the interference with religious functions and other festivals like the seizure of weapons meant to be used for the "Chad Mastieh" at Ialong near Jowai had not only infuriated U Kiang Nangbah and his people, the Pnars, but had enkindled in him and his people the spirit of revolt to fight back. The durbar of the 12 Dolois was convened and held at the bank of the Syntu Ksiar to elect a leader to lead the people in the fight against the British. Tradition was that whoever

could dive into the bed of the river and fetch an aquatic plant was recognised at the leader. There were many competitors for the job but only U Kiang Nangbah was successful. He was garlanded by the Doloi of Nartiang with his armour and was chosen to lead the Pnars in their fights against the British. All these happened in 1861. On 20.01.1962, U Kiang Nangbah attacked the police station and destroyed it completely. The rebellion then spread to the entire Jaintia Hills. The Pnars fought the British by using guerrilla methods. In order to meet the challenge of the guerrillas, the government in March, 1862 extended the provision of the Arms Act to Jaintia Hills which prohibited persons other than those authorised to carry arms. While the fight was going on, U Kiang Nangbah fell ill and retreated to Mynser in Karbi Anglong now in Assam. While he was lying ill at that place he was betrayed by his own dissident for Rs. 1000/-. He was arrested on 27.12.1962 and hanged on 30.12.1962 at lewmusiang. Tthe fact that he was hanged only three days after his arrest shows how dreadful he was to the British. Before he died he said, " If my face turns towards the east, when I die, my country will be freed within 100 years. If it turns towards the west, we will be slave forever". His face turned towards the east and his country regained its freedom in less than 100 years. December 30 has been declared as "U Kiang Nangbah Day" by the Government of Meghalaya.

Scope of Village Directory and Town Directory

Incorporation of non-census data in the District Census Handbook known as the Village Directory and the Town Directory started in the 1971 census. In that census, the data presented in the Village Directory were educational and medical facilities, drinking water, post and telegraph, market days, communication (bus stop, railway station and water way), nearest town from the village, power supply and staple food. On land use pattern the data presented were forest, area irrigated, area unirrigated, cultivable waste and area non-available for cultivation. Data on land use pattern could not be shown due to their non-availability.

In the 1981 census, by and large, the same data as that of 1971 were presented in the Village Directory. The only addition to that of 1971 was approach to the village, the area under jhum cultivation due to heavy demand on those data by the data-users. In the 1991 census, the same data were presented without addition or subtraction.

In the Census of India, 2001, the scope of the Village Directory has been enlarged to cover data on telephone facilities, the number of commercial and co-operative banks, the number of agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema/video halls, sports club, stadium/auditorium) available in the village. It also covers data on receipt of newspaper/magazine in the village and the most important commodities manufactured in the village.

The Town Directory of the 1971 census had seven statements. Statement-I presented data on status, growth, History and functional categories of towns; Statement-II, Physical Aspects and Location of Towns; Statement-III, Municipal Finance; Statement-IV, Civics and other Amenities; Statement-V, Medical, Educational, Recreational and Cultural Facilities in towns; Statement-VI, Trade, Commerce, Industry and Banking; and Statement-VII, Population by Religions. Statement I to VI were retained in the 1981, 1991 and 2001 census also. In the 1981 and 1991 censuses, Statement-VII was dropped and Statement-IVA, showing civic and other Amenities in slums was incorporated. In the Census of India, 2001, Statement-IVA has been replaced by Statement-VII displaying the same data as Statement-IVA.

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1: Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2: Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3: Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4: Total population

The total population of the village as per 2001 Census is given against this column.

Column 5: Number of households

The number of households as per 2001 Census is given in this column.

Amenities:

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6: Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school

with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i) Primary School	P
(ii) Middle School	M
(iii) Secondary School	H
(iv) Senior Secondary School	PUC
(v) College	C
(vi) Industrial School	I
(vii) Training School	Tr
(viii) Adult literacy class/centre	AC
(ix) Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7: Medical

Availability of medical facility within the village is indicated by following codes:

(i) Allopathic Hospital	H
Ayurvedic Hospital	HA
Unani Hospital	HU
Homeopathic Hospital	H Hom
(ii) Allopathic Dispensary	D
Ayurvedic Dispensary	DA
Unani Dispensary	DU
Homeopathic Dispensary	D Hom
(iii) Maternity & Child Welfare	MCW
(iv) Maternity Home	MH
(v) Child Welfare Centre	CWC
(vi) Health Centre	HC
(vii) Primary Health Centre	PHC
(viii) Primary Health Sub-Centre	PHS
(ix) Family Welfare Centre	FWC
(x) T.B. Clinic	TB
(xi) Nursing Home	NH
(xii) Registered Private Medical Practitioner	RMP
(xiii) Subsidised Medical Practitioner	SMP
(xiv) Community Health Worker	CHW
(xv) Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8: Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i) Tap Water	T
(ii) Well Water	W
(iii) Tank Water	TK
(iv) Tubewell Water	TW
(v) Handpump	HP
(vi) River Water	R
(vii) Canal	C
(viii) Lake	L
(ix) Spring	S
(x) Others	O
(xi) Summer Source	SS-

Column 9: Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i) Post Office	PO
(ii) Telegraph Office	TO
(iii) Post & Telegraph Office	PTO
(iv) Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.

the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility

exist is given:

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14: Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15: Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16: Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17: News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) News Paper	N
(ii) Magazine	M

Column 18: Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal	GC
(ii) Private Canal	PC
(iii) Well (without electricity)	W
(iv) Well (with electricity)	WE
(v) Tubewell(with electricity)	TW
(vi) Tubewell(with electricity)	TWE
(vii) Tank	TK
(viii) River	R
(ix) Lake	L
(x) Waterfall	WF
(xi) Others	O
(xii) Total	T

The village directory also carries the following appendices.

Appendix-I:

It gives the abstract of educational, medical and

other amenities available in villages C.D. Block wise of the district.

Appendix-I-A:

Indicates number of villages C.D. Block wise having one or more primary schools.

Appendix-I-B:

Indicates number of villages C.D. Block wise having primary, middle and secondary schools.

Appendix-I-C:

Shows number of villages C.D. Block wise with different sources of drinking water facilities.

Appendix-II:

Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A:

Indicates list of Census Towns which do not have one or more amenities.

Appendix-III:

It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV:

C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V:

Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI:

Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A, VII B:

The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

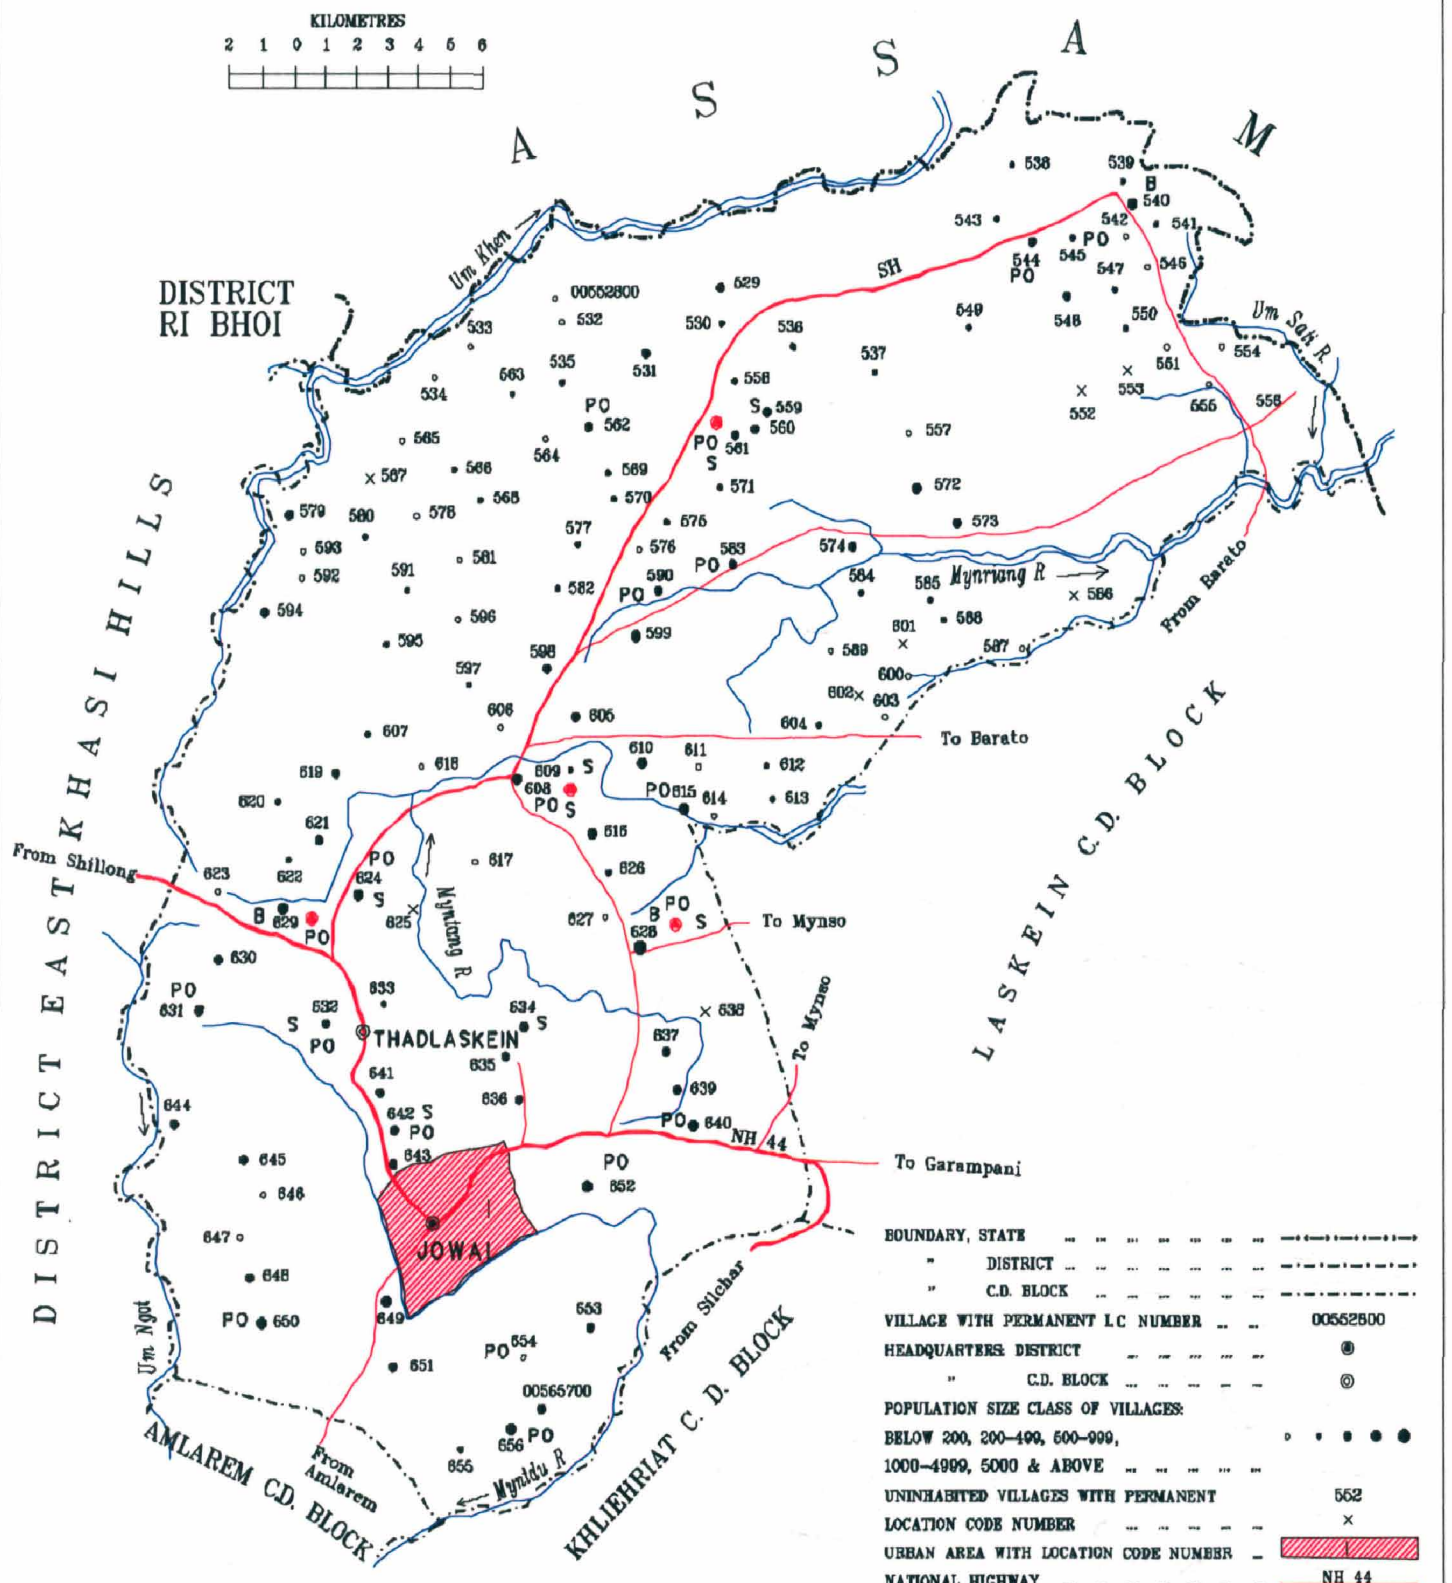

Appendix-VIII:

Indicates C.D. Block wise number of villages under each Gram Panchayat.

Appendix-IX:

Shows number of different types of girls school in a village.

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII - Village Directory
Number of villages under each Gram Panchayat (C.D. Block wise)

Name of District: **Jaintia Hills**

Sl. No.	Name of gram panchayat and location code number	Area of gram panchayat in hactare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Caste population	Total Scheduled Tribes population	Income and expenditure of panchayat/Gram panchayat (in Rs. '000)	
			Number	location code numbers					Total Income	Total Expenditure
1	2	3	4	5	6	7	8	9	10	11
				N.A.*						

* As there is no Gram Panchayat Administrative unit in Meghalaya, the data for the above columns are not available.

APPENDIX IX - Villge Directory
Statement showing number of girls schools in the villages

Name of the District: **Jaintia Hills**

Serial number	Name of C.D.Block	Village location code number	Name of village	Number of girls schools			
				Primary School	Middle School	Matriculation/ Secondary School	Higher Secondary School/ PUC/Intermediate/ Junior college
1	2	3	4	5	6	7	8
1	Thadlaskein		NIL				
2	Laskein		NIL				
3	Amlarem		NIL				
4	Khliehriat		NIL				

SECTION II
TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR

(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB

(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats.

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Town Directory Statements (I to VII)

STATEMENT - I
Status and Growth History

Sl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of C.D. block	Area in sq. km.	Number of households incl. houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the Censuses of

There is no information available on Slum for the district.

Appendix to Town Directory
Towns showing their outgrowths with population

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
		NIL		

There is no Town Outgrowths in the district.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation *(Annexure-II)*. The part II of the Household Schedule had 39 columns and 23 questions all of which, were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality

and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract Table A-5 for total population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, A-5 Appendix table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure – I

Number of Villages under each Gram Panchayats

There is no Gram Panchayats as administrative unit in the state of Meghalaya. Hence the data is not available and cannot be furnished under this Annexure.

Annexure –II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration.

Annexure –III

Various measures of fertility and mean age at marriage

The various measures of fertility have been given in the Analytical Note under the non-census concepts.

Age specific fertility rates, 1991

40-44	65.72	71.92	37.60	80.88	86.54	27.62
45-49	38.41	41.01	25.43	46.50	48.08	27.34
GFR	129.65	132.85	114.73	153.14	150.85	175.67
TFR	4.15	4.24	3.77	4.86	4.81	5.61

From the above statement, it is noticed that the highest age specific fertility rates in Meghalaya in both rural and urban areas is in the age-group 20-24 while in Jaintia Hills it is in the age-group 20-24 in rural areas and in the age-group 15-19 in the urban areas. The lowest is noticed in the age-group 45-49 at both state and district levels and in both rural and urban areas. It is further noticed that the age specific fertility rates in Jaintia Hills in both rural and urban areas is higher than those of the state. While at state level, the age specific fertility rates in rural areas in the age-groups 25-29 to 45-49 is higher than those in urban areas, those in the age-groups 15-19 and 20-24 are higher in urban areas than in rural areas. In Jaintia Hills, the age specific fertility rates in the age-groups 15-19 to 25-29 are higher in urban areas than in rural areas and those in the age-groups 30-34 to 45-45 are higher in rural areas than in urban areas.

The general fertility rates in Jaintia Hills are higher than those of the state average in both rural and urban areas. While the state average general fertility rates in rural areas is higher than that in urban areas, in Jaintia Hills that in urban areas is higher than that in rural areas.

Similarly the total fertility rates in Jaintia Hills are higher than those at state level in both rural and urban areas. While the total fertility rates at state level is higher in rural area than in urban area, those in Jaintia Hills, are higher in urban areas than in rural areas.

Age specific marital fertility rates, 1991

Age-group	Meghalaya			Jaintia Hills		
	Total	Rural	Urban	Total	Rural	Urban
15-19	138.42	133.23	168.26	162.62	153.85	292.21

Mean age at marriage of currently married women who married during 1981-1991

Meghalaya		Total	1981-86	1986-91
	Total	19.33	19.23	19.73
	Rural	19.23	19.09	19.53
	Urban	19.81	19.86	20.54
Jaintia Hills	Total	19.08	18.77	19.07
	Rural	18.98	18.64	18.90
	Urban	20.07	20.03	20.43

From the statement, it is noticed that at both state and districts levels, the highest age specific marital fertility rates are in the age-group 20-24 and the lowest in the age-group 45-49. At state level, the age specific marital fertility rates in the age-group 15-19 and 20-

ANNEXURE I-VIII

Annexure-I

Number of villages under Gram Panchayats

There is no Gram Panchayats as Administration Units in the State of Meghalaya. Hence, the data is not available and cannot be furnished under this Annexure.

Annexure-II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration. The definition of each of the above is given below.

Fertility

In demography, the term fertility is used in relation to the actual production of children or occurrence of births. Fertility is a measure by which a population adds to itself and normally assessed by relating the number of births to a full or part of the population, such as the number of married women or women of the child-bearing age. It must, however, be remembered that fertility has all to depend on marriage. No marriage, no fertility. Early marriage, high fertility and late marriage, low fertility. Crude Birth Rate (CBR) is the most simple and perhaps the most widely quoted measure of fertility. It is the ratio of the number of live births in a year to the midyear population normally expressed per 1000 population.

Mortality

Mortality is the cessation of life of a member of a population commonly known as death. It is a measure by which a population deducts from itself and normally assessed by relating the number of deaths to the population. Crude Death Rate (CDR) is the simplest and most used measure of mortality. It is the ratio of the number of deaths in a year to the midyear population normally expressed per 1000 population.

Migration

Migration is the third component of population change. It is a movement of the population from one place to another for various reasons. In census migrants are classified by place of birth and place of last residence. A persons is considered a migrant by place of birth if the place he/she is enumerated during census is other than the place of his/her birth. Similarly, a persons is considered a migrant by place of last residence if he/she is enumerated in a place other than his/her immediate place of last residence. A persons enumerated in his/her place of birth can be a migrant by place of last residence if his/her immediate place of last residence is other than his/her place of birth.

Annexure-III

Various measures of fertility and mean age at marriage

The various measures of fertility have been given in the Analytical Note under the non-census-concepts. In this annexure we are going to analyse the following indicators of fertility.

(i) General Fertility Rates (GFR):

It is the number of live births per 1000 women in the reproductive age-groups (15-49) years in a given year. From the table we know that average General Fertility rate of the State comes to 129.7. Amongst the districts, East Garo Hills is having lowest fertility rate with only 105.7 while West Khasi Hills district gives highest rate with 155.8.

(ii) General Marital Fertility Rates (GMFR):

It is the number of live birth per 1000 married women in the reproductive age-group (15-49) years in a given year. The table shows that the General Marital Fertility rate of the State as 140.1 and the West Khasi Hills district shows highest rate with 168.3 while East Garo Hills shows lowest rate with 114..3.

(iii) Total Fertility Rates (TFR):

It is the total of the Age Specific Fertility rates for the entire reproductive age span. It shows the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of the reproductive period. The table indicates the total fertility rate of

the State as 4.2. The higest rate amongst the district indicate in West Khasi Hills with 5.0 and the lowest rate in East Garo Hills with 3.4.

(iv) Total Marital Fertility rate (TMFR):

It is the average number of children that would be born to a married woman if she excercises the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of the reproductive period. As per the table the Total Marital Fertility rate of the State is 4.5. West Khasi Hills and Jaintia Hills districts shown the highest rate with 5.3 each while East Garo Hills gives lowest rate with 3.5.

Various measures of fertility and mean age at marriage, 1991

Sl. No.	State/District	GFR	GMFR	TFR	TMFR	CBR	No of children ever born per woman in age group 45-49	Child woman ratio	Mean age at marriage
1	2	3	4	5	6	7	8	9	10
1.	**Meghalaya State**	**129.7**	**140.1**	**4.2**	**4.5**	**22.6**	**4.8**	**6.8**	**19.3**
2.	Weast Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
3.	East Garo Hills District	105.7	114.3	3.4	3.5	20.2	4.1	7.0	19.2
4.	South Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
5.	West Khasi Hills District	155.8	168.3	5.0	5.3	24.8	4.9	8.2	19.6
6.	Ri-Bhoi District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
7.	East Khasi Hills District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
8.	Jaintia Hills District	153.1	167.6	4.9	5.3	25.6	5.4	8.2	19.1

(v) Crude Birth Rate:

It is the ratio of the number of live births in a particular year to the mid year population of the same year, expressed per 1000 population. The Crude Birth rate of the State Shows as 22.6 and the highest rate with 25.6 is shown in Jointia Hills district while the lowest rate with 20.2 is shown in East Garo Hills district.

(vi) Number of Children Ever Born per Woman in age group 45-49:

This table presents the number of childredn ever born per woman in the aghe group of 45-49. From the table we find the average number of children ever born per woman aged 45-49 as 4.8 for the state. Jaintia Hills district gives highest number with 5.4 while East Garo Hills gives the lowest number with only 4.1.

(vii) Child Women Ratio:

It is the number of cfhildren in the age group 0-4 years per 1000 women in the age group 15-49 years. The table shows the child women ratio as 6.8 for the State. Both West Khasi Hills and Jaintia Hills give higher ratio with 8.2 each while Ri_Bhoi district and East Khasi Hills give lowest with 6.1 each.

(viii) Mean Age at Marriage:

It is the mean age at marriage of currently married women during the decade. The mean age at marriage for the state indicates 19.3. In the district level the mean age at marriage shows higher in Ri-Bhoi district and East Khasi Hills district with 19.9 each while it is low in West Garo Hills and South Garo Hills with 18.7 each.

Annexure-IV

Migration

Migration is one of the important aspects in the field of population studies. A community or country can gain population either by births or by inmigration. It can lose population by deaths of the members of the population or by outmigration. Migration is, therefore, like births and deaths, is a

major factor in changing the size and structure of the population. It effects the areas to which the migrants move and from which they move out. As stated in Annexure-II, in the census of India, migrants are classified only by place of birth and place of last residence.

Migrants by place of birth, 1991

Birth place	Meghalaya	Jaintia Hills
1	2	3
Total Migrants	267682	18,100
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	141304	10,046
	(52.8)	(55.5)
Born in other districts of the state of enumeration	27429	2,364
	(10.2)	(13.1)
States in India beyond the state of enumeration	78895	4,961
	(29.5)	(27.4)

Migrants by place of birth, 2001

Birth place	Meghalaya	Jaintia Hills
1	2	3
Total Migrants	358,447	28,049
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	209,891	21,761
	(58.6)	(77.6)
Born in other districts of the state of enumeration	44,108	1,777
	(12.3)	(6.3)
States in India beyond the state of enumeration	92,088	3,806
	(25.7)	(13.6)

From the table it is noticed that at both state and district levels, the highest proportion of the migrants have their place of birth within the district of enumeration followed by those whose place of birth is in other state of India beyond the state of enumeration. At state and district levels the proportion of those whose place of birth is within the districts of enumeration is 58.6 % and 77.6 % respectively. The proportion of those whose place of birth is in other districts of the state of enumeration form 12.3 % of the total migrants at state level and 6.3 % at district level.

It is further noticed that the district level proportion of the migrants whose place of birth is within the districts of enumeration are higher than those at State level while migrants whose place of birth is in other districts of the State of enumeration and in the State in India beyond the State of enumeration are lower than those at the State level.

Migrants classified by place of last residence - 1991

Place of last residence	MEGHALAYA	Jaintia Hills
1	2	3
Total	266,844	18,197
	(100.0)	(100.0)
Elsewhere in the district of enumeration	156,563	11,256
	(58.7)	(61.9)
In other districts of the state of enumeration	26,301	2,746
	(9.9)	(15.1)
States in India beyond the state of enumeration	70,318	3,542
	(26.4)	(19.5)

Migrants classified by place of last residence - 2001

Place of last residence	MEGHALAYA	Jaintia Hills
1	2	3
Total	379,192	29,134
	(100.0)	(100.0)
Elsewhere in the district of enumeration	244,916	23,469
	(64.6)	(80.6)
In other districts of the state of enumeration	41,572	1,825
	(11.0)	(6.3)
States in India beyond the state of enumeration	83,082	3,252
	(21.9)	(11.2)

Like the proportion of the migrants by place of birth, the highest proportion of the migrants by place of last residence at both state and district levels had their place of last residence elsewhere in the district of enumeration followed by the proportion of those whose place of last residence was in other States of India beyond the state of enumeration. The proportion of those whose place of last residence was in other districts of the state of enumeration constitutes 11.0 % at State level and 6.3 % at district level. The proportion of those migrants whose place of last residence was outside India form only little over 2.0 % of the total migrants at state level and a little over 2.0 % at district level.

It is further noticed that the district level proportion of migrants who had their place of last residence elsewhere in the district of enumeration are higher than those at the State level. The State level proportion of the migrants whose last residence is in other district of the State of enumeration and in State in India beyond the State of enumeration is higher than that at district level.

Annexure - V

Religions

Religions are one of the most important social institutions. It is also one of the basic characteristics of the population. It has tremendous power to influence the cultural traits and social behaviours of a society. For this reason, it has been one of the field of interest of anthropologists, demographers, administrators and planners. To meet the various requirements of the aforesaid professionals, it has been customary in population census to collect the religion professed by the population. But since India is a secular nation where an individual can professed and practice any religion of his choice, the number of religion collected in census runs to hundreds. It is however, not feasible and practicable to present data on all religions and their denominations. Therefore, in census the population is classified by six major religions only. Those major religions are Hinduism, Islam, Christianity, Sikhism, Buddhism and Jainism. The rest of population professing and practicing religions are grouped under "Other religions and persuasion". The population who cannot or do not wish to state their religions are clubbed under "Religion not stated".

Percentage distribution by religion

Religious communities	1991				2001			
	Persons	Percentage			Persons	Percentage		
		Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8	9
Jaintia Hills								
All Religions	220,473	100.0	90.7	9.3	299,108	100.0	91.6	8.4
Hindus	9,846	4.5	3.6	0.9	13,150	4.4	4.0	0.4
Muslims	722	0.3	0.3	0.1	2,236	0.7	0.6	0.1
Christians	138,280	62.7	57.5	5.2	195,196	65.3	60.1	5.2
Sikhs	4	0.0	0.0	0.0	42	0.0	0.0	0.0
Buddhists	7	0.0	0.0	0.0	213	0.1	0.1	0.0
Jains	19	0.0	0.0	0.0	28	0.0	0.0	0.0
Others	71,563	32.5	29.3	3.2	87,827	29.4	26.7	2.7
Religion not stated	32	0.0	0.0	0.0	416	0.1	0.1	0.0

From the above table, it is noticed that the majority of the population of the district are Christians. At State level, the Christians constitute 70.3 % while at district level is 65.3 %. Hindus constitute little over 13.00 % of the population at state level while at district level it constitute little over 4.0 % . The Muslim, the Buddhists, the Sikh the Jain form an insufficient percentage of the population at both state and district level. The proportion of those populations who profess "Other religions and persuasions" gives 11.5 % and 29.4 % which is very high.

Annexure – VI

Marital Status

Though not all the married couples can produce children, fertility is the outcome of marriage. Without marriage there cannot be fertility. Various indicators of fertility discussed at Annexure – III can be calculated only by taking into consideration the number of married female and the number of children born in the year. Therefore, it is essential and important that in every census the marital status of each and every individual irrespective of age and sex is collected. On the basis of return thus collected, the population, both male and females, is classified into four marital status. These four marital status are Never Married, Married, Widowed and Divorced/Separated.

Percentage distribution of population by marital status, 2001

Area Name	Age-group	Total		Never married		Married		Widowed		Divorced/Separated	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12
Jaintia Hills	All ages	100.0	100.0	66.6	59.7	30.7	31.8	1.0	4.5	1.7	4.0
	0-9	100.0	100.0	100.0	100.0	0.0	0.0	0.0	0.0	0.0	0.0
	10-14	100.0	100.0	99.6	98.6	0.3	1.3	0.0	0.0	0.0	0.0
	15-19	100.0	100.0	96.5	82.3	3.3	15.9	0.0	0.2	0.2	1.6
	20-24	100.0	100.0	65.9	33.0	32.1	59.3	0.2	1.1	1.9	6.6
	25-29	100.0	100.0	30.5	11.7	66.3	77.9	0.7	2.0	2.6	8.4
	30-34	100.0	100.0	14.6	5.2	81.0	82.9	0.8	3.2	3.6	8.7

	40-44	100.0	100.0	5.2	2.1	88.1	78.2	2.0	9.0	4.7	10.6
	45-49	100.0	100.0	3.9	1.6	88.5	75.5	2.9	12.6	4.8	10.3
	50-54	100.0	100.0	3.4	1.5	86.4	64.4	4.7	22.4	5.5	11.7
	55-59	100.0	100.0	3.3	0.7	83.5	63.3	6.3	25.9	6.9	10.0
	60-64	100.0	100.0	3.3	2.3	79.5	47.4	8.3	38.8	8.9	11.4
	65-69	100.0	100.0	3.4	3.0	78.0	42.7	10.6	43.7	8.0	10.6
	70-74	100.0	100.0	2.4	2.1	71.0	31.2	18.6	55.4	8.0	11.3
	75-79	100.0	100.0	2.9	2.6	69.1	29.1	19.3	58.8	8.8	9.5
	80+	100.0	100.0	7.1	5.2	61.6	26.1	20.3	60.7	10.9	8.0
	Age not stated	100.0	100.0	76.6	76.8	22.1	19.2	0.4	2.5	0.9	1.5
	Less than 18	100.0	100.0	99.7	98.4	0.3	1.5	0.0	0.0	0.0	0.1
	Less than 21	100.0	100.0	98.4	94.0	1.5	5.3	0.0	0.1	0.1	0.5

Note : Total will not add up to 100.00 as "Unspecified" marital status is excluded

From the above table, it is noticed that the marital status of cent percent of male and female population upto 9 years of age is "Never Married" which shows that the child marriage is not practiced in the district. The Never Married population constitute the majority of the population of both sex followed by the Married population. The widowed and Divorced/Separated populations form a very insignificant proportion of the district.

By age group, it is noticed that the highest proportion of the married males is in the age group 45 – 49 while the proportion of female married is in the age group 35 – 39 and the lowest for both males and females is in 10 – 14.It is also noticed that widowed females are more than widowed males almost in all age groups. The highest proportion of the Divorced/ Separated males is in the age group 80+ while that of females is in the age group 50 – 54.

Annexure – VII

Age, Sex and Education level

With a view to finding out the extent of literacy of the population, it has been a practice in census to ask of all those aged 7 and above, whether or not they are literate, that is whether or not they can

both read and write with understanding in any language, besides asking about the age and sex of each individual. Those of the population who are literate, another question about their educational attainment are asked of. On the basis of the replies to those two questions, the population is classified into literate and illiterate and the literate are further classified by age and sex and educational levels.

(i) Literate without educational level.
(ii) Below Primary
(iii) Primary
(iv) Middle
(v) Matric/Secondary
(vi) Higher Secondary/Intermediate/Pre-University/ Senior Secondary
(vii) Non-Technical Diploma or Certificate not equal to Degree
(viii) Technical Diploma or Certificate not equal to Degree
(ix) Graduate and above.

For the purpose of this annexure, however items (vi), (vii) and (viii) are clubbed together.

EDUCATIONAL LEVEL BY AGE AND SEX FOR POPULATION AGE 7 AND ABOVE

Area Name	Age-group	Literate		Educational level														Educational level

From the table, it is noticed that the highest proportion of both the male and female literates, with more than 46.0 % have 'Below Primary' as their education level followed by the proportion of those with 'Primary', 'Middle', and 'Matric/Secondary' gradually 'Literate without educational level' indicate comparatively high in the district. The literate in 'Higher Secondary/P.U. etc', and 'Graduate and above' level could not form even 7.0% of the literates of the district.

The proportion of literates by age, both males and females the highest proportion noticed by 95.6% and 96.5% among the age of 7 years and 8 years respectively in the educational level of 'Below Primary'. The highest proportion in the educational level of 'Primary' is indicated in the age of 14 years, in the 'Middle' in the age of 16 years and 17 years and 'Matric/Secondary' in the age of 19 years while Graduates and above are in the age group 25-29.

Annexure – VIII

Mother Tongues

Though besides the mother tongue of an individual, two other languages known by an individual is collected in census, tabulation and presentation of language data is base on the mother tongue of an individual. By definition, mother tongue is a language spoken by a person's mother to the person in his childhood. If the mother died in infancy, the language mainly spoken in person's home in childhood is the mother tongue of that person. In case of infants and deaf-mutes, the language usually spoken by the mother is the mother tongue.

India is a multi-lingual nation, collection of the mother tongue of each and every individual in various censuses has thrown light on the linguistic and ethnic composition of the country as well as the states. In India there are 18 scheduled languages and 96 non-schedule languages. Even in a small state like Meghalaya more than 80 non-scheduled languages are spoken in addition to the 18 scheduled languages. However, for the purpose of this annexure, we are presenting only those biggest mother tongues arranged in descending order irrespective of the languages being scheduled or non-scheduled. The statement given below shows the percentage distribution of the numerically biggest languages arranged in descending order of the number of speakers in district.
