BARAPANI

Meghalaya, the abode of clouds, receives very heavy rainfall for almost six months of the year, Shillong the capital city of the State is located on the plateau which is about 5,000 ft. above the mean sea level. From this plateau top, the terrain slopes on both the north and the south direction to meet the Brahmaputra valley and the plains of Bangladesh, respectively. Thus, it's hilly terrain and heavy rainfall provides for an ideal place for the development of hydropower generation. In fact, map studies indicate that Meghalaya has a power potential of almost 3000 MW. However, it's present generating capacity is only 185 MW. Efforts are being made to tap the potential to enable the State to convert this resource into an industry. The Picturesque Umiam Dam - A major tourist attraction of Meghalaya, on the way to Shillong from Guwahati is the mainstay of Meghalaya State Electricity Board's power generation efforts.

The Umiam Hydro-electric Project is a trans-basin development scheme for which a highland reservoir at an elevation of 3220 Ft. is created in the Umiam basin by constructing a 256 ft. high concrete dam across the Umiam river and two earth dykes across two subsidiary valleys. The water from the reservoir is carried across the dividing ridge in a 7,000 ft. long tunnel and 1,800 ft. length of penstocks to the powerhouse located in the Umtru basin to avail of a 540 ft. drop. The Umiam Power Station has an installed capacity of 36,000 KW and will have co-ordinated operation with the Umtru Power Station.

The generation voltage is stepped up to 132 K.V. for transmission. Power from the project will cater to the needs of the central and western districts of the State. Transmission lines to Guwahati area, Shillong and Cherrapunjee are ready. Those to Tezpur, Bongaigaon and Cachar are in an advanced stage of construction. The Guwahati - Nawgong line will have a transmission voltage of 220 K.V. as a part of the future link line between the Lower Assam

and Upper Assam grids. Garo Hills, which will have its own self-contained power system at present will be connection to the grid at the appropriate time.

Tail water from the Umiam Power Station will increase the firm power at Umtru from 4,500 K.W. to 11,200 K.W. for which a 4th Unit of 2,800 K.W. is being installed there.

The Umiam tail water has also set the pace for further stage developments in the Umiew-Umiam-Khri-Umtru basin and a comprehensive hydel development plan has now been drawn up enabling generation of over 300 M.W. of power in stages during the next two plan periods. Of these, the Umiew and Umling projects will be taken up in the Fourth Five-Year Plan. Umiam Dam is the first high dam to be built in the highly seismic region of Assam.

The Umiam dam has two angles in its axis to meet the demands of difficult topography and geology. This deviation from the straight line and the unusual topography introduced special design and layout problems.

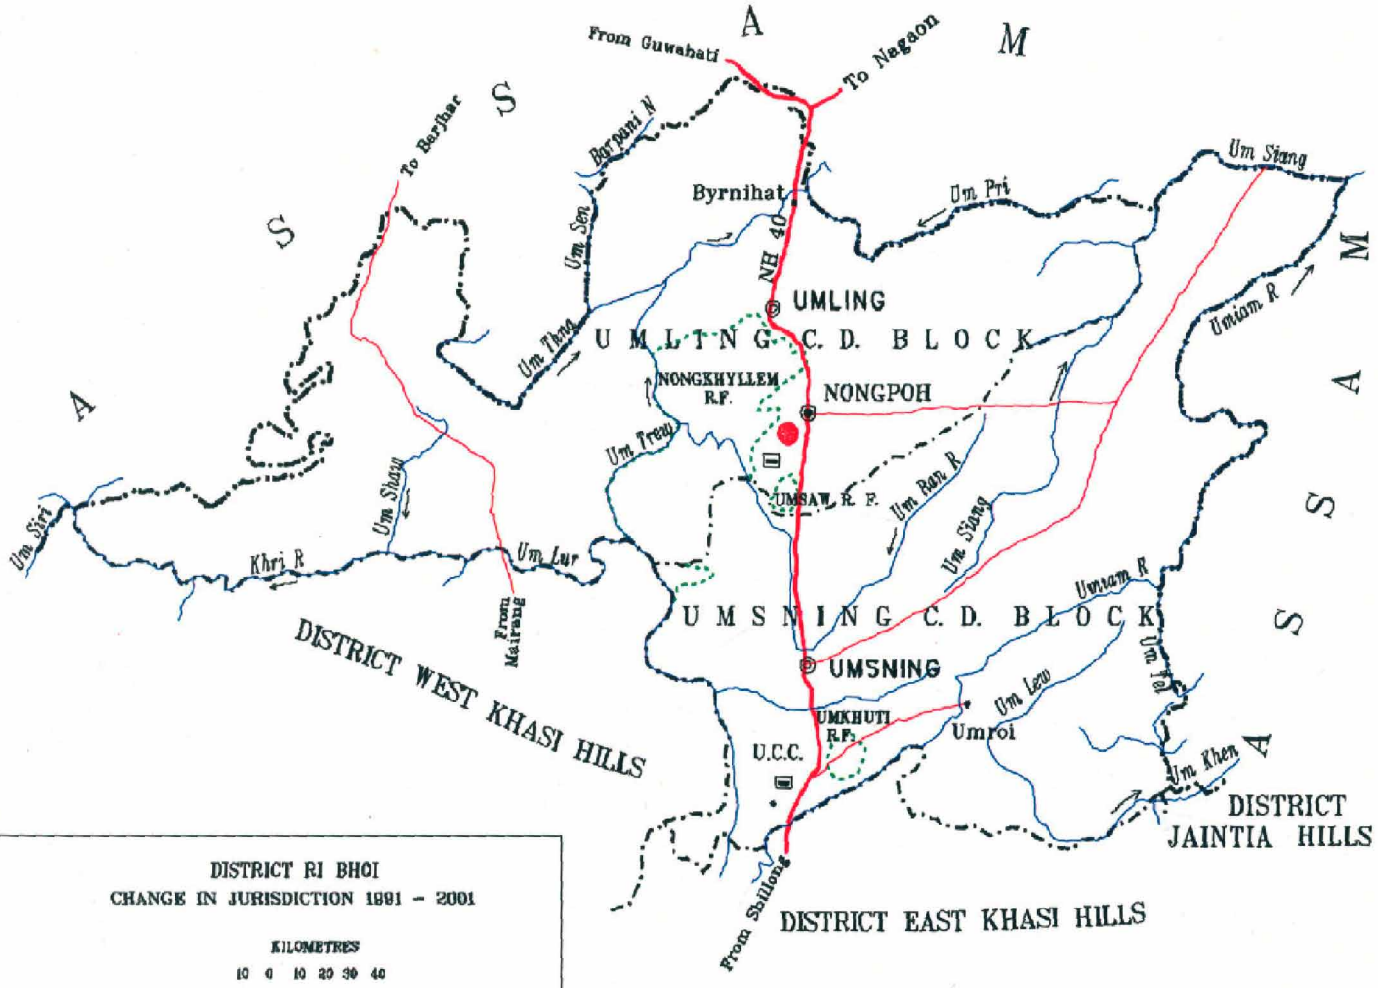

The Umiam reservoir situated within 10 miles of the State capital has submerged the National Highway No. 40 requiring a 9.3 mile diversion of the highway passes over the concrete dam and the main earthen dyke and skirts the Umiam lake.

The area around the Umiam Lake is one of the beauty spots in the country and can be developed as one of the most attractive tourist resorts by providing proper amenities and recreational facilities.

Annexure-V : Brief account of main religions in the district/C.D. Block as per 1991 Census 298
Annexure-VI : Marital status of population as per 1991 Census -
Annexure-VII : Age, Sex and Education in the district, 1991 Census -
Annexure-VIII : Distribution of different mother tongues returned in 1991 Census 298

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic

amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N.K. Laskar, Director of Census Operations, Meghalaya. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. It is also the only publication that presents census data at village level in rural areas and ward level in urban areas. It is also the only publication that presents non-census data in the form of Village Directory and Town Directory at village level and town level respectively. Here, lies the usefulness of the Handbook for micro and grassroot level planning for rural development. Therefore for administrators, planners, research scholars and other data users the Handbook is a sine qua non.

Though Census is a central subject, it is being conducted by the administrative machinery of the State Government under the technical guidance of the Director of Census Operations. It is the State Government who appoints the hierarchy of Census Officers from the rank of Deputy Commissioner of a district designated as Principal Census Officer down to Primary School Teachers and other low rank government employees designated as Enumerators. It is this team of Census Officers who actually conduct the Census Operations. I am, therefore, very grateful to the Government of Meghalaya with special reference to Shri. J. Tayeng, IAS Chief Secretary to the Government of Meghalaya, Shri A. Som, IAS, Secretary, General Administration Department and a hosts of other officers who have made the entire district administrative machinery available to the Census Organization.

I am also grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India, Shri S.P. Sharma, Consultant and other officers in the O/o, The Registrar General of India, for their timely advice and prompt co-operation whenever needed.

In this office I am grateful to Shri A. Pyrtuh, Jt. Director of Census Operations, Shri. B.L. Sharma, Dy. Director of Census Operations, Shri S.K. Baruah, Asstt Director of Census Operations, Shri A. Roy Choudhury, Asstt. Director of Census Operations, (Technical) Shri B. Marbaniang, Shri L.R. Lyngdoh, SI-I, Shri C.D. Sangma, SI-II and other officials without whose hard, sincere and painstaking labour and toil the conduct of the 2001 Census would not have been a success.

N.K. Laskar
Director of Census Operations,
Meghalaya, Shillong

District Highlights 2001 Census

1. Ri-Bhoi occupies a sixth position among the districts of the state in terms of area and population.
2. Ri-Bhoi is the least urbanised district of the state with only 6.8% of the population live in urban area.
3. Ri-Bhoi has the highest decadal growth rate of the population during 1991-01 among the districts of the state.
4. Ri-Bhoi is the fourth densely populated district of the state.
5. Ri-Bhoi has the lowest sex ratio among the districts of the state.
6. Umsning C. D. Block with 117168 is having the highest population while Umling C. D. Block is having only 75622 population in the district.
7. In terms of area, Umsning C. D. Block is larger than Umling C. D. Block.
8. Umsning C. D. Block has more villages than Umling C. D. Block.
9. The economy of the district is mainly dependent on agriculture with 75.07% of the total workers are in the agricultural sector.
10. 37.5% of the total households in the rural areas of the district have electrical connection for lighting.
11. Umsning C. D. Block has the highest number of households availing electricity power facility for lighting in the rural areas.
12. Umroi is the most populated village in the district.
13. The condition of Census houses in the rural areas of the district is comparatively low. 31.66% of the total households live in good condition, 59.51% live in livable condition and 8.83% live in the dilapidated condition.
14. Percentage of households by type of houses in the rural areas of the district are (i)Permanent type of houses 14.96% (ii) Semi permanent 28.73%, (iii) Temporary (Serviceable) 5.22% and (iv) Temporary (Non-Serviceable) 51.04%.
15. Percentage of households by type of latrine in the rural areas of the district are (1)Service Latrine 3.93%, (ii) Pit Latrine 46.24% (iii) Water Closet 5.88% and (iv) No Latrine 43.95%.
16. Percentage of households by type of fuel used for cooking in the rural area of the district are (i) Firewood 91.18% (ii) LPG 1.83% and (iii) Kerosene 0.83%.
17. Percentage of households by having type of assets in the rural areas of the district are (i) Radio/ Transistor 30.5%, (ii) TV 15.34%, (iii) Telephone 2.56% (iv) Bicycle 8.75% (v) Scooter/Motor Cycle/ Moped 1.8%, (vi) Car/Jeep/Van 1.56% and (vii) None 59.33%.
18. Out of the total number of households in the district only 14.6% availed banking facility. In the urban areas. 21.77% of the population availed banking facility while only 14% of the household living in the rural areas availed this facility.

Definition of Census Town:

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000,

ii) At least 75 percent of the male working population engaged in non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Publication of the District Census Handbook was started after the 1951 Census and has been continuing since then with some innovations/ modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State/UT Governments. It inter alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain basic amenities/ facilities in each village and town of the respective district. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The 1951 series of the District Census Handbook incorporated some basic demographic and economic information of the district at the village and town levels separately in addition to some important tables on census data.

Unlike the 1951 District Census Handbook, the 1961 District Census Handbook was made to cover village-wise and town-wise information on the availability of different amenities such as educational facilities, supply of drinking water, supply of electricity, etc. shown by means of abbreviations placed against the name of each village/town in the Primary Census Abstract itself.

In 1971 the District Census Handbook was divided into three parts. Part A contained Village and Town Directory, Part-B contained Primary Census Abstract and Part-C contained Analytical Report, Administrative Statistics and District Census Tables. Part-C was not published in many states/union territories including Meghalaya.

The scope of the 1981 District Census Handbook had been enlarged specially by inclusion of additional information on amenities like existence of kutcha/pucca roads, distance from the nearest town, land-use data and special Primary Census Abstract for Scheduled Castes and Scheduled Tribes at C.D. Block/Town levels which was another innovation introduced in the 1981 series.

The manner of presentation of the District Census Handbook for the 1991 Census was by and large the same as followed in 1981. However, the format for presenting data in Primary Census Abstract had been restructured slightly in the 1991 Census by incorporating nine-fold Industrial Classifications of main workers against four-fold Industrial Classifications presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was presented in the Primary Census Abstract for the first time.

The scope of the 2001 District Census Handbook has been enlarged by incorporating thirteen appendices to Section-I of Part-A against four in the 1991 District Census Handbook. Those additional appendices display the list of villages by number of Primary Schools, the list of villages by number of Primary, Middle and Secondary Schools, the list of villages with different sources of drinking water facilities available, the list of villages with 5000 and above population which do not have one or more basic amenities, the list of census towns which do not have one or more amenities, summary showing the number of villages having or not having Scheduled Caste/ Tribe population, C.D. Block wise number of villages under each Gram Panchayat and statement showing the number of girls school in the villages. Analysis of data of the 1991 census on fertility, mortality, migration, religions, marital status, languages, etc. have also been included as annexures to the Primary Census Abstract.

Brief History of the District

Origin of the name

The Ri Bhoi Civil Sub-division was created from 03.01.1977 Vide Notification No. HPL.49/76/221 dated 03.01.1977 and that sub-division was upgraded into a districted from 04.06.1992 vide Notification No. HPL.139/89/109 dated 04.06.1992. The district derives its name from the name of one of the sub-tribe of the Khasi, "the Bhoi", the indigenous and predominant Khasi sub-tribe inhabiting the district. Since the district was a part of the erstwhile united Khasi and Jaintia Hills district and a part of the Khasi Hills district when the Jaintia Hills was created vide Notification No. HPL.26/71/43 dated 21.02.1972 and a part of the erstwhile East Khasi Hills district when the West Khasi Hills district was created vide Notification No. HPL.49/76/171 dated 12.10.1976, the district has the same history as the East Khasi Hills and West Khasi Hills Districts.

History

Owing to absence of written records, nothing is known about the past history of the Khasi people and the history of the composite Khasi Hills district – the Jaintia Hills, the East Khasi Hills, the West Khasi Hills and the Ri-Bhoi – which today is locally known as the "Bri U Hynniew Trep" – Land of the Seven Huts. How the Khasis had come to those beautiful hills and from where they had come still remains a mystery. Scholars and researchers have attempted to find out the origin of the Khasi races and how they had come to settle in those hills. But their findings have been only conjectures without satisfactory answers. The Khasis have their own legend about how they came to settle in these beautiful hills. They believe they had descended from heaven by a ladder set on the peak of "U Lum Sohpetbneng" located by the side of the present "Umiam Dam". They say they consisted "Khadhynriew Trep" "Sixteen Huts" or sixteen households all of which lived in heaven, but they used to come down to earth through that ladder. However suddenly that ladder snapped and nine huts or households remained in heaven and seven on earth. It is from the Sohpetbneng that the Khasis spread to other parts of the composite Khasi Hills district. Till today the Khasis believe that their present abode was a heavenly gift handed over to them by God.

Before the advent of the British, the area comprising the Khasi Hills, including the Jaintia Hills, was divided into 30 "Himas or Chieftainships". The Khasi term for the entire territory is " Ka Ri Laiphew syiem, Ka Ri Khadar Doloi"- the land of 30 (thirty) Kings or Chieftains and 12 (twelve) Dolois. Those are:

1. Sutnga
2. Khyrim
3. Mylliem
4. Maharam
5. Nongkhlaw
6. Nongstoin
7. Sohra
8. Nongspung
9. Langrin
10. Muliang
11. Sohbar
12. Mawphlang
13. Sohiong
14. Lyngiong
15. Mawlong
16. Wahlong
17. Mawsynram
18. Myriaw
19. Rambrai
20. Mawiang
21. Bhowal
22. Malaisohmat

23. Nobosohphoh
24. Jirang
25. Nongpoh
26. Mawdon
27. Dwara Nongtyrnem
28. Nonglwai
29. Pamsangut
30. Shella

Of the Khasi Chieftains within the Composite Khasi Hills district excluding Jaintia Hills, the Hima of Shyllong comprising Mylliem and Khyrim finds mention in the Chronicles of the Koches and is referred to as "Khairam". A King of Khyrim is mentioned in those Chronicles as having made a submission to Sukladhvaj, nicknamed Chilarai, during the reign of the Koch King, Nar Narayan, about the middle of the 16th Century. About 1708 A.D. the Khyrim Chiefs apparently went to the aid of the Jaintias against the Ahoms who had taken the Jaintia King captive.

For the past history of the Khasis we are obliged to be content with legends and circumstantial evidence. However something is certain that the various Chieftains of the composite Khasi Hills have never been subjugated to outside force until they were all subjugated by the British in 1839. Though the British got possession of Sylhet in 1765 and Assam through the Treaty of Yandaboo signed on 24/02/1826, the Khasi Hills was still left untouched. As will be seen later the British subjugated the Khasi Chieftains not by might but by deceit and treachery. In November, 1826, David Scot, the Agent of the Governor General of the East India Company, reached Nongkhlaw. He went to the house of Tirot Singh, Syiem of Nongkhlaw, at Mairang requesting him to allow him (Scot) to construct a road through the latter's Kingdom (Hima) connecting Assam and Sylhet. In turn he (David Scot) would help Tirot Singh to regain possession of a portion of dwars which he had held before the advent of the British. Tirot Singh immediately convened a meeting of his council (Durbar Hima). After two days of deliberation, it was agreed to allow David Scot to construct a road via Hima Nongkhlaw.

When in 1828, Balaram Singh, the Rajah of Ranee, the principal rival of Tirot Sing in the plain disputed the latter's claim to dwars, the British instead of helping Tirot Singh as per the provisions of the Treaty, prevented him from marching to dwars to regain that area. It was only now that he realized how deceitful and treacherous were the British. On 4/4/1829, when Tirot Singh failed to lay his hand on David Scot, he vented his wrath on two British Officers. Military Operations were immediately started against Tirot Singh and other Khasi Chiefs who were believed to have supported him with the sole purpose of driving out the strangers from the hills. But the British army being armed with guns, and the Khasis only with shields, swords, bows and arrows, the former was in a superior position. The Khasis were therefore forced to resort to guerrilla warfare which dragged on for about four years. Maharam was the last to surrender in 1839. With its divide and rule policy of the British, the Khasi Hills was divided and placed under the following administrations:-

1. State Areas

These areas were administered as per the peace Treaty and placed under a political Agent.

2. Non-State Areas (British Areas)

These areas were placed under a Deputy Commissioner.

After Independence the Federation of the Khasi States (Hima Khasi), 25 in number agreed to join India by signing the Instrument of Accession which has never been fully implemented by the Government of India till date.

Administrative Set up:

Ri Bhoi Districts which was carved out of the existing East Khasi Hills District vide Notification No. HPL.139/89/109 dated. 04.06.1992 is located in the North Eastern part of Meghalaya having a common border with Assam in the East, the North and the West. The District comprises of two C.R.D. Blocks, Umling C.R.D. Block and Umsning C.R.D. Block with headquarters at Umling and Umsning respectively. The district has only one town, Nongpoh, which is also the district headquarters. The number of village in the district as per the Census of India 2001 is 570 out of which 27 are uninhabited.

District Council

The Sixth Schedule to the Constitution of India provides for the creation of a District Council in each autonomous district of Assam. On 27/06/1952, the United Khasi and Jaintia Hills Autonomous District Council came into being. The Jaintia Hills or the Jowai subdivision as it was known then was represented by six members in the 24 member Council. In 1957, however, a section of the public began to press their case for the establishment of a separate District Council for Jaintia Hills for administrative convenience. On the recommendation of the Commission set up to enquire into the matter, the Government of Assam in 1964 issued a Notification for the creation of a separate District Council for the Jaintia Hills known as Jaintia Hills Autonomous District Council (JHADC) and the first District Council formed in 1952 renamed as Khasi Hills Autonomous District Council (KHADC).

It was envisaged that the District Council should consist of 24 members out of whom 18 were to be elected on the basis of adult suffrage and six to be nominated by the Governor. The tribals were, however, against having nominated members to the District Council. Owing to agitation by the tribals, all the 24 seats were by the United Khasi and Jaintia Hills District Council (Second Amendment) Act, 1957 thrown open for election from 1957. From 1972 the members of the District Council were by the Assam Reorganisation (Meghalaya) Act, 1969 raised to 30 out of whom 29 were to be elected and one nominated by the Governor. The normal term of the District Council is five years.

Under the Autonomous District Council Rules, 1951, the members elect a Chairman to preside over the meeting of the Council. The members also elect a Deputy Chairman to preside over the meeting of the members during the absence of the Chairman. The same Rules provide for constitution of an Executive Committee headed by the Chief Executive Member elected by the Council. The Executive Members, 4 in number, are however, appointed by the Governor on the advice of the Chief Executive Member.

Power and Functions

The powers and functions of the district Council are mainly(1) Legislative (2) Executive or Administrative (3) Financial and (4) Judicial.

(1) Legislative Powers : The District Council has the power to make law on the allotment, occupation and use of land, regulation of Jhumming (Shifting Cultivation), management and control of forests under the Council, use of water source for agriculture, establishment of Town Committee, matters connected with the administration of village police, appointment and succession of Chief (Syiem) and headmen, inheritance of property, marriage and divorce, preservation of social customs, regulation of money-lending and trade by persons who are not members of the Scheduled Tribes.

(2) Executive Powers: The District council has the power to establish and manage primary schools, dispensaries, markets, cattle-pounds (the powers to establish and manage primary schools have since been withdrawn. All schools are being managed by the State Government).

(3) Financial Powers : The District Council has the powers to assess and collect land revenue, to levy house-tax as well as taxes on professions, trades and callings. It can impose taxes on road transport.

(4) Judicial Powers : For administration of Justice the District Council had set up three classes of courts: (a) The District Council Court and the Subordinate District Council Courts (b) The Additional Subordinate District Council Courts and (c) The Village Courts.

For the Courts at (a) and (b) above, the District Council appoints such officers as are necessary. Those Courts try suits and cases between parties all of whom are Scheduled Tribes.

The Additional Subordinate District Council Courts have jurisdiction only over particular Chieftainships. The Chiefs are empowered to appoint such staff as are deemed necessary.

The District Council Court is the Court of Appeal in respect of all cases tried by the lower Courts, including those of the Khasi Chiefs. No other Court, except the High Court and Supreme Court, can try those Cases.

Theoretically, the District Council has the power to make rules and regulations on the constitution of Village Councils or Village Courts and the powers to be exercised by them but so far it is the Governor who has been authorised to make those rules and regulations.

Functions of Village Durbar (Dorbar Shnong)

There are at present no Village Council as contemplated under para 4 (40) (a) of the Sixth Schedule to the Constitution of India in the Khasi Hills Autonomous District Council areas that at present covers three districts, East Khasi Hills, West Khasi Hills and Ri-Bhoi. There have, however, always been the Dorbar Shnong or Village Durbars which customarily exercise all such functions as would contribute to the general well being of the village. Enforcement of law and order has always been foremost among the various duties of the Dorbar Shnong. With this object in view the Durbar has the power to order any individual or household to leave the village if presence of such individual or household is found to disturb the peace of the village and its inhabitants.

The Durbar lay down the policy for the conduct of village affairs and make rules in accordance with local usages which the village has to observe and follow. The Durbar has the responsibility to look after common properties, if any, such as grazing land and common forests (law shnong). Some of the bigger villages may entrust those and other responsibilities to the executive committee presided over by the Headman in each case.

The municipal functions of the Village Durbar include maintenance and upkeep of village roads and paths, sources of drinking water and general sanitation including cleanliness. These are generally carried out by the entire village on self-help basis as often as necessary during the year. The village Durbar still adjudicates disputes between parties in those villages where Village Courts have not yet been set up as defined in the Sixth Schedule to the Constitution of India.

Source of income

The District Council derives its income from various sources such as taxes on professions, trades and callings, market taxes, royalties on timber and other forest resources as well as grant-in-aid and loan subsidies from the state Government, The District Council has a share of 5% on taxes on vehicle.

Syiemship (Chieftainships)

As stated earlier, the Khasi Hills district, which at present comprised of three districts, East Khasi, West Khasi and Ri-Bhoi, are divided into 25 Chieftainships. Sixteen of them are syiemships, three are Lyngdohships or Priest-Chiefs and five are Sordarships and one is Wahadarship. Those Chieftains were described by the British as oligarchical States most of which were united in a loose confederacy before their (British) coming. The Khasi Chiefs have never exercised powers of the Rajas or Nawabs in other part of India. The Syiems and other Chiefs can function only as part of the "Dorbar Hima" (State Durbars) or Councils which includes Counsellors (Myntris and others) nominated from leading clan within a State. The Chiefs take decisions in the name of the Council. The Chiefs do not have any automatic right to any part of land within their territories. Land is very much in the hands of the people living in villages with the exception such lands as the "Ri Kynti" which belong to certain family by acquisition. The Syiems (Chiefs) in Council tries all cases sent up for trials and decisions are usually based on Customary Laws. Legal training in the modern sense is, therefore, not called for. Even today when the old Khasi States have lost their semi-independent status and are normally administered territories under the District Council, this practice continues although the Chief-in-Council functions as Additional Subordinate District Courts. Appeals from these Courts lie to the District Council Court whose judges are persons trained in laws.

The 25 Chieftainships that are still in existence in the three districts of East Khasi Hills, West Khasi Hills and Ri Bhoi are given below:-

I. Hima Syiem

1. Khyrim	2. Mylliem	3.Maharam
4. Nongkhlaw	5. Nongstoin	6. Sohra
7. Nongspung	8.Langrin	9. Mawsynram
10. Myriaw	11. Rambrai	12. Mawiang

13. Bhowal 14.Malaisolmat 15. Nobosohphoh 16. Jirang.

II. Hima Lyngdoh

1. Sohiong 2. Mawphlang 3. Lyngiong

III. Hima Sordar

1. Mawlong 2. Mawdon 3. Dwara Nongtyrnem 4. Nonglwai 5. Pamsanngut.

IV. Hima Wahadar

1. Shella.

PHYSICAL FEATURES

Location and Size

Ri Bhoi district with an area of 2,376 square kilometres lies between latitude 25 ° 36' and 26 ° 06'and between 91° 20' N and 92° 16' E. It is bounded in the East, the North and the West by Assam and in the South by the East Khasi Hills District, with an area of 2,376 square kilometres, it ranks sixth by area among all the seven districts of the state and occupies 10.91 per cent.of the total area of Meghalaya. The district extends from South West to Northeast.

Physiography

The Ri Bhoi district has only one regional division and this division covers the entire district. Approximately midway between the southern and northern borders of the existing East Khasi Hills District, the land dips suddenly and falls off perceptibly, though gradually till it merges with the Brahmaputra Valley in the north. This area is the Bhoi country or Ri Bhoi predominantly inhabited by the Bhois, a Khasi sub-tribe and the name after which the district is christened, Within the intervening stretch of lands are low hills and spurs generally running north and south which seldom attains heights above 600 metres above mean sea level though a few isolated peaks may reach heights exceeding 1,000 metres above mean sea level. The most important peaks of the district are the Sohpetbneng (1,350 m) and the Raitong (1,237 m).

Geologically, the region is composed of gneiss with old inliers, the sela groups, granites and the Shillong group of rocks. Small patches of Khasi group and Axial groups of rocks are also appearing in the northwestern part of the region. The region has two types of soils, (1) Udalfs – Ochrepts and (2) Ustalfs – Ochrepts – Orthents. The soils of the district are fertile but the district itself is not very healthy due to its people being very frequently attacked by malarial fever. Owing to the high productivity of the land, the district is sometimes called the granary of the Khasi Hills (Composite Khasi Hills district). The region is covered by dense forests of tropical and deciduous type except in the southern part where sub tropical pine forests are found.

Drainage

The district has three important rivers, (1) The Umiam or Barapani (2) The Umtrew and (3) The Umsiang. All the rivers flow northward and empty themselves into the Brahmaputra. Both the Umiam and Umtrew have been dammed for generation of Hydro electricity.

Climate

The Climate of the district is hot and humid in summer and pleasantly warm in winter. The maximum and minimum temperature of the district is being recorded at Barapani a colony situated in the southernmost part of the district bordering the East Khasi Hills District. In 1997 the highest maximum temperature was recorded in August, at 29.1° C and the lowest, in January, at 19.8° C. The highest minimum temperature was recorded in August, at 20.7° C and the lowest, in January, at 4.6° C. However, this temperature cannot be taken for the entire district because those areas in the northern part of the district bordering Assam are extremely hot and during the hottest month the maximum temperature may exceed 35.0° C. The area has sufficient rainfall which in 1997 was 2,108cm. Rain has a great influence on the temperature of the district which makes it pleasant even when the barometer reaches its maximum heights. Strong gales do hit the district at least once in a while uprooting trees that cause roadblock in the NH – 40 that runs through the heart of the district from north to south.

NATURAL ECONOMIC RESOURCES

Forestry

The district is covered by dense forests of tropical and deciduous types. Subtropical forests of pines are found only in the southern part of the district bordering

East Khasi Hills Districts. The major forest produce of the district are teak, sal, bamboo, cane and broom. Bamboo is being exported to Assam to feed the paper mill of the Hindusthan Paper Corporation at Jagi Road, Marigaon district, Assam. Timbers are being supplied to feed the Ply Wood Factory of the district at Byrnihat.

There are two classes of forests in the district (1) State Reserved Forests and (2) Unclassed Forests. The number of State Reserved Forests in the district are two, (1) Nongkhyllem Reserved Forests with an area of 125.91square kilometres and (2)Umsaw Reserved Forests with an area of 0.44 square kilometres. The Unclassed Forests are under the control of the Khasi Hills Autonomous District Council. So far no survey has been conducted either by the Forest Department or the Pre-Investment Forest Survey of India to determine the acreage of the unclassed forests in the district. However, the total area of Meghalaya under these forests in the whole of Meghalaya had been estimated at 850.30 thousand hectares during 1998-99.

Soil and cropping pattern

The entire district is covered by alluvial soils. However laterite group of soils occur in the northern part/belt of the district. The soils are very suitable for growing of rice, maize, millet, sesame, beans, etc. The yields of these crops are high especially rice. For this reason the district is sometimes called the granary of the Khasi Hills (composite Khasi Hills district). This is due as much to the higher fertility of the soil as to the climatic conditions which are most favourable to the growth of rice and permit the productions of two crops in a year.

Land and land use pattern

The land use pattern in the district during 1998-99 was a follows:

Reporting area - 2,37,800 Hectares

1. Forest	- 82,100"
2. Not available for cultivation	- 30,614"
3. Other uncultivated land excluding fallow land	- 83,797"
4. Fallow land	- 14,964"
5. Net area sown	- 21,325"
6. Area sown more than once	- 1,508"
7. Total cropped area	- 22,833"

Tenancy

Tenancy or land tenure system prevailing in most of the East Khasi Hills which is governed by a number of Khasi customary laws is peculiar. Two types of land are most commonly found in the district. These are (i) Ri-Kynti ownership of which vests in particular clans. And (ii) Ri Raid which belongs to particular villages and which no one has absolute right of ownership. Usually land that remains uncultivated for over 3 years reverts to the village. Individual cultivators have no permanent right over it. The question of mortgage for the purpose of agricultural loans remains a vexed one.

The various types of land in the district are given below :

1. Ri Raid on Community Land: No persons has proprietary heritage or transferable right over such land. He has only the right of use and occupancy. Such rights revert to the community when a person ceases to occupy or use the land for a period of three years or more. The only way in which a person can inherit land or obtain transferable right over such land is by making permanent improvements on the land. But these rights lapse if he abandons the land over a long period. Ri Raid land comprises of many sub-classes among which are the followings :

(a) Ri Bam Syiem: That part of Raid Land set apart for maternal relatives of a ruling Chief.

(b) Ri Law Kyntang, Law Lyngdoh, Ri Law Niam : These are forests in Raid Lands set apart for religious purposes, managed and controlled by the Riad or the village or in the case of the Ri Law Lyngdoh by the Lyngdoh (Priest) of the community.

(c) Ri Law Adong, Ri Law Sang, Ri Law Shnong: These are village forests reserved by the villagers as water catchments areas, or to enable members of the village or Raid to get firewood or timber for their personal needs or for any such purposes as the village or Raid dorbar may decide from time to time.

(d) Ri Shnong: Raid land forming part of the village and which the inhabitants of that village can make use of.

(e) Ri Umsnam: Raid Land which an elaka won in the old days by the sword.

(f) Ri Aitimon Sngewbha: Land gifted by private landowner to the community for public use.

The management and control of Ri Raid land belongs to the community which may be a village, a group of villages, or Syiemship, or a Sordarship. Every member of the community has the right of use and occupancy of the Ri Raid Land without payment of land revenue. A member cannot claim more land than the area he can actually occupy or actively make use of.

2. Ri Kynti Land: It is a private land acquire by a particular clan. This clan then has proprietary, heritable or transferable right over such land. Such land may also include any apart of Raid Land which in earlier times was given to a person, a family or a clan for certain services rendered to a particular community.

Like the Ri Raid Land, Ri Kynti Land comprises many sub-classes a few of which are described below:

(a) Ri Kur: It is a Ri Kynti Land which has not yet been divided among different branches of a clan or among different families of a branch of the clan. This land is apportional by a Dorbar Kur (Clan Council) or Dorbar Kpoh (Council of a branch of the clan) as the case may be.

(b) Ri Nongtymmen: It is a Ri Kynti Land which has descended from generation usually after two or three generations. This land is divisible or apportionable by a dorbar of the clan or by a branch of the clan if already divided among the several branches thereof. The head of the family i.e. the mother may also divide this land among her children, usually daughters. The division or apportionment is resorted to when the clan or the branch of the clan, or the family of the branch as the case may be has increased in number and desires for the sake of peace and harmony to avoid future disputes or litigations or if the clan, branch of the clan or family of the branch falls upon hardship or for some other reasons would make such division both admissible and desirable.

(c) Ri Maw (Lit "Stone Land"): It is a Ri Kynti land acquired by right of purchase or by right of apportionment among the members of the family or of the clan and the holders thereof have the right to erect boundary stones to demarcate their respective lots.

(d) Ri Seng: It is a Ri Kynti land acquired from ancient time by a number of different clans or families and has not been divided. Income from this land is divided among the households of the clans or families holding it. The management of Ri Seng is in the hands of the representative elected by members of all owning clans or families. The executive are generally the president and the secretary. In certain elakas such land may also devolve on male descendants when the clan or families have become extinct, that is, when their female relations have died leaving no female issues.

(e) Ri Dakhol: It is a land over which a person has obtained Ri Kynti rights by right of occupation and making permanent improvements thereon by right of purchase or winning a court case.

(f) Ri Shyieng : It is a portion of Ri Kur specially allotted to Ka Khadduh (youngest daughter) of a clan or a family to enable her to meet the expenses connected with the performance of religious rites and ceremonies concerning the clan, kpoh or family, like depositing of the ashes of the dead in the cairns of the clan. Such land is generally given to Ka Khadduh as an additional share.

(g) Ri Lyngdoh: It is a Ri Kynti of the Lyngdoh or priest clan of a particular native State.

(h) Ri Syiem: It is a Ri Kynti of the Syiem's clan. In some Syiemships, it can be Raid Land set apart for maintenance of the Syiem clan.

(i) Ri Iapduh: It is a Ri Kynti of a clan or a family which has become extinct. Such lands according to the time-honoured custom reverts to the chief who is immune from a curse on that family but who will keep it for the Elaka as Ri Raid, or as Ri Bam Syiem for the family of a ruling chief, or it may escheat directly to a Raid wherein it is situated and become a Ri Raid.

Agriculture

More than 56.00 % of the total workers in the district are cultivators. The agricultural labourers constituted more than 18.00 % of the total workers. That is more than 74.00 % of the total workers depend on agriculture for their livelihood. The area in hectare under each crop cultivated in the district production in metric tone and yield in Kg/hectare during 2000-01 is given below:

Sl.No.	Name of Crops	Area	Production	Yield
1	2	3	4	5
I.	**Cereals**			
	1. Rice	11,662	29,778	2,553
	2. Maize	1,560	3,252	2,085
	3. Small Millets	20	14	700
II.	**Pulses**			
	1. Other Rabi Pulses	58	36	621
III.	**Oil Seeds**			
	1. Sesamum	9	7	778
	2. Mustard	160	66	413
	3. Soyabean	147	150	1,020
IV.	**Fruit Crops**			
	1. Pineapple	3,377	29,567	8,755
	2. Citrus fruits	107	81	757
	3. Banana	797	13,907	17,499
	4. Papaya	140	1,051	7,907
V.	**Tuber Crops**			
	1. Potato	17	75	4,412
	2. Sweet Potato	141	519	3,681
	3. Tapioca	15	73	4,867
VI.	**Spice Crops**			
	1. Ginger	822	6,432	7,825
	2. Turmeric			
	(i) Green	67	498	7,433
	(ii) Dry	67	125	1,866
	3.Chillies	50	39	780
VII.	**Plantation Crops**			
	1. Tea	221	351	1,588
	2. Arecanut	92	58	630

Irrigation

Irrigation has so far played only a minimal part in the agricultural development of the district. The topography of the district makes alignment and construction of dams and channels difficult and costly. Even where the lay of the land is favorable, Irrigation is confined only to areas bordering major rivers and streams. The cultivators, therefore, have to depend on rain to irrigate their land, which very seldom fail them.

Animal Husbandry

Rearing of livestock, though popular, is only a subsidiary occupation of the district. In terms of number, poultry takes the first place followed by cattle, pigs and goats. In terms of economic value cattle are the most important.

According to the 16th Quinquinial Livestock and Poultry Census, 1997, the number of livestock of poultry reared in the district is as given below:

1.	Buffaloes	-	3,216
2.	Cattle	-	47,895
3.	Cross Bread Sheep	-	23
4.	Indigenous Sheep	-	112
5.	Goats	-	12,188
6.	Dogs	-	18,559
7.	Donkeys	-	9
8.	Horses/Ponies	-	67
9.	Cross Breed Exotic Pigs	-	3,757
10.	Indigenous Pigs	-	27,980
11.	Rabbits	-	842
12.	Ducks	-	276,912
13.	Hens	-	274,186

In order to provide protection to the livestock and poultry from the ravage of contagious and non-contagious diseases through treatment and preventive vaccination and to improve the level of production of livestock, the following institutions/projects have been set up in the district:

1.	Dispensary	-	9
2.	Aid Centre	-	2
3.	Stockmen Centre	-	22

These are 21 Veterinary Surgeon to attend to the need of the livestock and poultry of the district.

Fisheries

The district is comparatively poor in fishery potentiality. The hill streams have not yet been fully utilized for propagation of fish. Though a few individuals have taken up pisciculture and the district is lucky enough to have a dam in the river Umiam frequented by professional anglers and fishermen, yet the yield has not been sufficient to meet the requirement of fish by the district. Fish has to be imported from outside the state as far as the State of Andhra Pradesh. The Department of Fishery of the State Government have been making all out efforts to promote and intensify pisciculture activities in the district by way of financial aids and technical advice for construction and maintenance of fish ponds and by distributing of fish-seeds and fingerlings from the departmental farm. During 1998–99 38,25,000 seeds were distributed.

Industry

Ri Bhoi is the most industrialised district in Meghalaya. The most important medium scale Industries are the followings :

1. Meghalaya Phyto – Chemical Ltd: The Industry which is located at Barapani was set up in 1974 with a capital outlay of Rs. 1.5 Crore and employing 45 persons. The raw materials used are mainly essential oils which are available in the region. The products are mainly marketed in the State to feed the perfume, cosmetic and drug industries in the state. There is abundant scope for its expansion. The Meghalaya Industrial Development Corporation, as a Co-promoter, has a substantial share in the Company and also grant bridging finance from time to time.

2. Meghalaya Jute Manufacturing Company: Located at Byrnihat the factory was established in 1973 with 263 workers and a capital outlay of Rs. 18.00 lakhs. The raw jute comes from the Garo Hills Districts and the Nagaon District in Assam. The products are marketed mainly in Guwahati, Kanpur, Delhi, Amritsar, Indore and Mumbai.

3. Meghalaya Plywood Factory : The factory was established in 1974 and is located at Byrnihat with a capital outlay of Rs. 74.00 lakhs, it employs 500 persons and provides indirect employment to another 1500 people in the forest based industries as well as transport and allied lines. Raw materials required are timber obtained from the Government Reserved Forests and the District Council Forests and to a lesser extend from a few private forests in Meghalaya.

4. Meghalaya Associate Beverages: The factory started in 1973 and is located at Byrnihat. Its capital outlay was Rs.60.00 lakhs and employed 40 persons. Its products are marketed throughout Northeastern Region.

5. Umiam Calcinates Pvt. Ltd: Started in 1981, the unit is located at Barapani. With a capital outlay of Rs. 35.37 lakhs, it employs 32 persons. Its annual production of hydrated lime is 9,000 metric tones. The products are mainly marketed outside the state.

Besides the above 5 large and medium Industries, the following industries operating in the district with their items of products and capacity are given below:

Sl. No.	Name and Address	Items of Products	Capacity
1	2	3	4
1	Meghalaya Electronic Development Corporation Ltd., Barapani.	Tantalum Capacitor Unit	-
2	R.K.B. Cements, Barapani	Portland Cement	3,000,000 TPA
3	Bomber Cements, Umbang, Sumer	Cement	25 TPD
4	M/S. Pawan Ispat (P) Ltd, Byrnihat.	M.S.Ingots	12,960 MTPA
5	M/S. Meghalaya Mineral Ltd, Byrnihat.	Polished Granite Slabs	90,000 Sq.MPA
6	M/s. Ganapati Rolling Mills, Byrnihat	M.S. Angles, Flat and Torsteel	10,000 MTPA
7	M/s. Jaintia Alloys (P) Ltd., Tamulkuchi.	M.S.Ingots	162,000 MTPA

1	2	3	4
8	M/s. H.M.Cements Ltd., Byrnihat.	Cement Plant	150 TPD
9	M/s. Byrnihat Oxygen (P) Ltd., Byrnihat.	Oxygen Gas	0.72 Million Cubic metre PA
10	M/s. Shri. Sai Megha Alloys, Byrnihat.	Steel Plant	12,000 TPA
11	M/s. Greystone Ispat (P) Ltd., Byrnihat.	Steel Re-Rolling Mills	15,000 MTPA
12	K.K.Beverages (P) Ltd., Byrnihat.	Mineral Water	3,000 Kilo litres PA
13	Shivam Ispat and Alloys (P) Ltd., Byrnihat.	M.S.Ingots	12,825 MTPA
14	Meghalaya Steels, Byrnihat.	Steel	18,000 MTPA
15	Megha Industries and Agro. Products (P) Ltd., Byrnihat.	Domestic Utensils	3,420 MTPA
16	Maithan Smelters (P) Ltd., Byrnihat.	Ferro Silicon	150 MTPA
17	Byrnihat Ispat (P) Ltd., Byrnihat.	M.S. Ingots and Re-Rolling Mills	33 TPA
18	N.R.Roller Flour Mills (P) Ltd., Khanapara.	Roller Flour Mill	9,000 TPA
19	Shivani Ispat and Rolling Mill (P) Ltd., Tamilkuchi.	Re-Rolling Mill	9,000 TPA
20	Meghalaya Alloys (P) Byrnihat.	Steel Mill	10,000 TPA
21	Gita Ferro Alloys (P) Ltd., Byrnihat.	Ferro Silicon M.S.Ingots & GI. Moulds	10,800 TPA 17,500 TPA
22	King Aqua (P) Ltd, Barapani.	Mineral Water and Aerated Drink	10,000 Liter Per day
23	Shyam Century Ferrous, Ltd., Byrnihat.	Ferro Alloy Plant	12,462 TPA
24	Matiz Metal (P) Ltd., Byrnihat.	Copper based Industry	6,000 TPA
25	Commercial Iron and Steel, Byrnihat.	M.S.Ingot	21,600 TPA
26	Megha Polycon (P) Ltd., Byrnihat.	HLPE Water Storage Tanks	10,000 PA
27	Adhunik Meghalaya Steel, Byrnihat.	Ferro Silicon	10,385 TPA
28	Belle Herbals (P) Ltd., Byrnihat.	Hair Oil	-
29	Hindusthan Coca Cola Beverage (P) Ltd., Byrnihat.	Aerated Drinks & Processed Water	1,000,000 Ltr 10,000,000 Ltr
30	Trikuta Ferro Alloys (P) Ltd., Byrnihat.	Ferro Alloys	10,800 TPA

Trade and Commerce

The Khasis have been traders from early times not only within their homeland but also with neighbouring countries in the plains. The people of the district trade with the people of the plains in the north, the present Assam State. Today a substantial portion of the population of the district earns their livelihood from trade which is chiefly carried on through weekly markets. The principal commodities traded in the weekly markets are agricultural products such as Rice, Maize, Oilseeds, Pineapples, Bananas, Papayas, Jackfruits, Tapioca, Ginger, etc. which later on exported outside the State.

The Principal weekly markets of the district are the following:

Name of CRD Block	Place of Market	Day of Market
1	2	3
Umsning	1. Unsning	Every 8th day
	2. Umroi	- do -
	3. Mawlasnai	- do -
	4. Mawhati	- do -
Umling	1. Iewmawlong (Nongpoh)	- do -
	2. Umden	- do -
	3. Byrnihat	Friday

At Nongpoh, the only town in the district, there is a daily market where fruits and vegetables produced in the district are sold and bought. Those crops are also seen sold daily, at several places along the NH – 40 that traverses the district from North to South.

Transport

The NH – 40 traverses the district from North to South for about 65 kilometres. Other important roads of the district are:

1. Umsning - Jagi Road
2. Barapani - Mawlasnai – Tyrso
3. Nongpoh - Umden
4. Umling - Patharkhmah

Traffics on the NH – 40 is heavy. Hundreds of Buses, Trucks laden with goods and coal, tourist taxis, such as Sumos, Ambassadors, various types of Maruti Cars and myriad of private vehicles and cars ply on the road in both directions. However, the number of motor vehicles registered in the district is not as numerous as in East Khasi Hills District. The number of motor vehicles registered in the district up to 31.03.1999 is given below:

Sl. No.	Type of Vehicles	Government	Private
1	2	3	4
1	Trucks	-	75
2	Buses	-	25
3	Cars	4	103
4	Jeeps	23	60
5	Tractors	1	2
6	Trailers	2	18
7	Two Wheelers	-	140
8	Three Wheelers	-	431
9	Taxis	-	34
10	Others	-	2

v) Census Concepts

Building

A "Building" is generally a single structure on the ground. Sometimes it is made up of more than one Component Units, which are used or likely to be used as dwellings (residence) or establishment such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have Component Units may be used for contribution of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Permanent houses

Houses in which both wall and roof are made of permanent materials. Materials of wall can be burnt bricks, GI / metal / Asbestos sheets, stone with lime or cement or cement concrete. Roof may be made of tiles, slate, shingle, corrugated / galvanized iron or zinc / other metal or asbestos sheets, bricks, lime and stone, stone, RBC / RCC or concrete.

Semi-permanent houses

Houses in which either wall or roof is made of permanent materials and the other is made of temporary materials.

Temporary houses

Houses in which both wall and roof are made of materials which have to be replaced frequently. Wall may be made of grass, thatch, leaves, reeds, bamboo, mud, plastic / polythene, un-burnt bricks or wood. Roof may be made from grass, leaves, bamboo, thatch, mud, un-burnt bricks or wood.

Room

A room should have four walls with a doorway and a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and breath of at least 1½ metres and 2 metres in height. An enclosure

which is used in common for sleeping, sitting, dining, storing and cooking etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Census house

A Census House is a building or a part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Village

The basic unit for rural area is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognised boundaries is treated as one village.

Town/Urban areas

The following areas are treated as towns/ urban area:

a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

   i) A minimum population of 5,000 ;

   ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and

   iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of the village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 201, following criteria are taken as pre-requisites :

(a) The core town or at least one of the constituents towns of an urban agglomeration should necessarily be a statutory town : and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000

(as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted :

(i) a city or town with one or more contiguous outgrowths;

(ii) two or more adjoining towns with their outgrowths ; and

(iii) a city and one or more adjoining towns with their outgrowths all of which form a contiguous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household may consist of related to each other, unrelated or both. Examples of unrelated household are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, orphanages, etc. These are called 'Institutional Households'. There may be one member household, two member households or multi member households. For census purposes each one of these types is regarded as a 'Household'

If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would be treated as a separate household. The important link in finding out whether it is a household or not is a common kitchen. In a few situations, it may become difficult to apply the definition of household strictly. For example, a person living alone in a census house, whether cooking or not cooking meals, will have to treated as a household. Similarly, if husband and wife or a group of related persons are living together in a census house but not cooking their meals, will also constitute a normal household.

For this purpose of census there are three type of Households i.e., Normal Household, Institutional Household and the Houseless Household.

Institutional household

A group of unrelated persons who live in a institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places like worship, mandaps, railways platforms etc., are treated as Houseless households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

According to the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 and the

Constitution (Scheduled Tribes) Order (Amendment) Act, 1987, the list of Scheduled Castes and Scheduled Tribes in Meghalaya is as follows:

Scheduled Castes :

1. Bansphor
2. Bhuinmali, Mali
3. Brittial, Bania Bania
4. Dhupi, Dhobi
5. Dugla, Dholi
6. Hira
7. Jalkeot
8. Jhalo, Malo Jhalo-Malo
9. Kaibartta, Jaliya
10. Lalbegi
11. Mahara
12. Mehtar Bhangi
13. Muchi, Rishi
14. Namasudra
15. Patni
16. Sutradhar

Scheduled Tribes :

1. Boro, Kachari
2. Chakma
3. Dimasa, Kachari
4. Garo
5. Hajong
6. Hmar
7. Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam
8. Koch
9. Any Kuki Tribes, including :
   - i) Biate, Biete
   - ii) Changsan
   - iii) Chongloi
   - iv) Doungel
   - v) Gamalhou
   - vi) Gangte
   - vii) Guite
   - viii) Hanneng
   - ix) Haokip, Haupit
   - x) Haolai
   - xi) Hengna
   - xii) Hongsungh
   - xiii) Hrangkhwal, Rangkhol
   - xiv) Jongbe
   - xv) Khawchung
   - xvi) Khawathlang, Khothalong
   - xvii) Khelma
   - xviii) Kholhou
   - xix) Kipgen
   - xx) Kuki
   - xxi) Lengthang
   - xxii) Lhangum
   - xxiii) Lhoujem
   - xxiv) Lhouvun
   - xxv) Lupheng
   - xxvi) Mangjel
   - xxvii) Misao
   - xxviii) Riang
   - xxix) Sairhem
   - xxx) Selnam
   - xxxi) Singson
   - xxxii) Sitlhou
   - xxxiii) Sukte
   - xxxiv) Thado
   - xxxv) Thangngeu
   - xxxvi) Uibuh
   - xxxvii) Vaiphei
10. Lakher
11. Man (Tai speaking)
12. Any Mizo (Lushai) tribes
13. Mikir
14. Any Naga tribes
15. Pawi
16. Raba, Rava
17. Synteng

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Marginal worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system means a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in those towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having

water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrine from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of live deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid -year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the different between crude birth and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population of the age-group (15-49) years}} \times 1000$$

Total Fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of woman till the completion of reproductive period.

$$TFR = \frac{5 \times \Sigma_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital Fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of woman till the completion of reproductive period.

$$TMFR = \frac{5 \times \Sigma_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age specific mortality rate (ASMFR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infant dying within the first month of life (28 days or under) in a tear per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late Neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post Late Neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$SBR = \frac{\text{Number of still birth during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of woman in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any related to pregnancy and child births per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to woman in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population)

Number of currently married females in the age group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 woman in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 woman in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he / she is enumerated during the census is other than his/her place of his/ her birth.

Similarly a person is considered as migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational courses that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides she/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relative's houses is in a place where the hospital or parents/relative's house is the place of last residence of the child but not the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of the education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another state of the country (inter-state migration),

(iii) Migration from one country to another country.

The first two streams together constitute internal migration, while the last type of movement is called international migration. This present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz., rural to rural, rural to urban, Urban to rural and urban to urban.

Civic status of urban units

Civic status of town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Committee / Municipal Council, Municipality etc.

Size-class of UA/Town

Size–class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs/ Towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000 to 1,999,999); M4 (500,000 to 999,999); M3 (300,000 to 499,999); M2 (200,000 to 299,999) and M1 (100,000 to 199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,000 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000-9,999 are Class V and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) area by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or family arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are determined to safety, health or morals.

Mega city

The concept of 'Mega City' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastucture Development in Mega Cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega Cities.

Findings of the 2001 Census

Ri Bhoi is a new district carved out of the existing Nongpoh Subdivision of the East Khasi Hills district comprising two CRD Block, Umling and Umsning, and started functioning from 4-06-1992 with headquarters at Nongpoh. The Census of India 2001 recorded a total population of 192,790 out of which 179,610 lives in 543 inhabited villages spread across the district and 13,180, in the only town of the district, Nongpoh. The population of the district is predominantly rural with 93.2% of them living in rural areas and only 6.8% in urban areas. With a total area of 2,376 square kilometres, the density of the population comes to 81 persons per square kilometre. The sex ratio of the district, at 941, is averse to the females. But the sex ratio of the scheduled tribe population though female biased at 979, is comparatively higher. The sex ratio of the population in 0-6 age-group, at 972, is also female biased. The population of the district is predominantly tribal with 87.0% of the total population are scheduled tribes. Only 65.7% of the population of the district is literate with that of the males, at 68.8%, is higher than that

of the females, at 62.4%. The work participation rate of the district stands at 46.4%, the males, 51.8% and the females 40.6%. The majority of the populations are non-workers. The population of the district predominantly depend on agriculture for their livelihood because 56.7% of the workers are engaged in cultivation and 18.4% as agricultural labourers. Of the remaining workers, 1.8% are engaged in household industry and 23.1% in other works.

Though the area of the two CRD Blocks, Umling and Umsning are almost equal with Umsning having an edge of only 16 square kilometres over Umling, there is a wide disparity in the population of the two CRD Blocks, with 60.8% of the population is recorded in Umsning and only 39.2% in Umling.

Brief note on tables

In the few pages that follow an attempt is being made to briefly analyse the few tables based on data collected from the Primary Census Abstract, the Village Directory and Town Directory and Houses, Household Amenities and Assets depicting on their own way the various demographic characteristics of the population of the district, the basic amenities such as education, medical, improved drinking water, etc available to the population of the district, and the housing stock, the household amenities and assets available to the households of the district. A total of 52 tables have been prescribed for the purpose. Tables 1 to 36 present data from the Primary Census Abstract, inset tables 37 to 47 shows data on village Directory and Town Directory and tables 48 to 52 gives data on household amenities and assets.

Tables 6,10,14,21,31 and 34 are to present data on Primary Census Abstract Tahsil wise and the rest C.R.D. Block-wise. In Meghalaya, however, the Census of India starting from 1981 has been conducted with the Community and Rural Development Blocks as the administrative unit below the district and above the villages and towns and all data have been tabulated and presented C.R.D. Block-wise. Therefore the above six tables have been excluded. Moreover, in Meghalaya there is no such administrative unit by the name Tahsil. Till 1971 the Census of India was conducted in Meghalaya Police Station-wise and never Tahsil-wise.

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Umling	50,561	50,561	0	75,622	62,442	13,180	49.6	23.5	0	0	17.4
2	Umsning	76,751	76,751	0	117,168	117,168	0	52.7	52.7	0	0	0
	District Total:	**127,312**	**127,312**	**0**	**192,790**	**179,610**	**13,180**	51.4	41.1	**0**	**0**	**6.8**

From table 1, it is noticed that the decadal growth rate of the population of the district during the decade 1991 – 2001, at 51.4%, is on the high side. The reason is due to the setting up of industrial states in two areas of the district where people have moved to the district for employment in those various industries. In the C.R.D. Blocks, it is noticed that while the decadal growth rate of the population in Umsning is above the district average. Though in both the C.R.D. Blocks an industrial state each has been set up, in Umsning a cantonment has also come up, the population of which has been tagged with the population of the C.R.D. Block.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	Umling	239	62,442	32,118	30,324	115 (48.1)	6,647	6,223	97 (40.6)
2	Umsning	304	117,168	60,445	56,723	102 (33.6)	5,610	5,279	115 (37.8)
	Districts (Rural) Total:	**543**	**179,610**	**92,563**	**87,047**	**217 (40.0)**	**12,257**	**11,502**	**212 (39.0)**

Sl. No.	District / C.D. block	Population 200-499		Number and percentage of villages	Population 500-999		Number and percentage of villages	Population 1000-1999		Number and percentage of villages
		Males	Females		Males	Females		Males	Females	
1	2	11	12	13	14	15	16	17	18	19
1	Umling	14,979	14,384	23 (9.6)	8,091	7,529	4 (1.7)	2,401	2,188	0 (0.0)
2	Umsning	19,448	18,663	78 (25.7)	27,246	26,328	8 (2.6)	4,820	4,760	0 (0.0)
	Districts (Rural) Total:	**34,427**	**33,047**	**101 (18.6)**	**35,337**	**33,857**	**12 (2.2)**	**7,221**	**6,948**	**0 (0.0)**

Sl. No.	District / C.D. block	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
		Males	Females		Males	Females		Males	Females
1	2	20	21	22	23	24	25	26	27
1	Umling	0	0	0 (0.0)	0	0	0 (0.0)	0	0
2	Umsning	0	0	1 (0.3)	3,321	1,693	0 (0.0)	0	0
	Districts (Rural) Total:	**0**	**0**	**1 (0.2)**	**3,321**	**1,693**	**0 (0.0)**	**0**	**0**

From table 2, it is noticed that while the highest number of the villages of the district have a population of < 200 followed by that with a population of 200 – 499, there is only one village in the district with a population of 5,000 – 9,999. The numbers of inhabited villages decrease with the rise in the population size. However, the district does not have any village in the population size of 10,000+.

The same trend is noticed in the CRD Blocks also. Between the two CRD Blocks, it is noticed that up to the population size of 200 – 499, the proportion of the villages in Umling CRD Block is higher than that in Umsning CRD Block. From the population size of 500 – 999 upwards, a reversal trend is noticed.

TABLE 3: NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Towns
	1
(a) New	
i) Statutory Town	Nongpoh
ii) Census Town	
(b) Denotified	NIL
i) Statutory towns of 1991 Census denotified and also did not satisfied the criteria to be treated as Census towns	NIL
ii) Statutory towns of 1991 Census denotified but identified as Census towns based on demographic and economic criteria	NIL
iii) Census towns of 1991 Census are notified as statutory towns in 2001 Census.	NIL
(c) Declassified	NIL
(d) Wholly merged with other town(s)	NIL

Declassified means the Census towns of 1991 Census with failed to satisfy the demographic and economic criteria

Nongpoh is the only town in the district which was notified after 1991 Census. It is also the headquarters of the district. Therefore the question of any town being denotified, declassified or wholly merged with other towns does not arise as far as Ri-Bhoi district is concerned.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10				
11-20				
21-50				
51-100		N.A.		
101-200				
201-300				
301-500				
501 +				
Not known				
District Total:				

In Meghalaya, the villages have not been cadastrally surveyed. The area of the villages is not known. Hence the table 4 is presented without data.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901 –2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,036	1,047	725	1,050	1,050	--
1911	1,013	1,024	757	1,029	1,029	--
1921	1,000	1,009	809	1,002	1,002	--
1931	971	989	697	950	950	--
1941	966	991	683	933	933	--
1951	949	969	784	921	921	--
1961	937	971	764	870	870	--
1971	942	958	853	893	893	--
1981	954	965	904	921	921	--
1991	955	966	910	941	941	--
2001	972	969	982	941	940	951

Note: Sex ratio has been defined here as the number of females per 1000 males.

Sex ratio has been defined here as the number of females per 1000 males. From table 5, it is noticed that up to 1921 at both state and district level the total and rural sex ratio had been in favour of the females. From 1931 onwards till 2001, it had been in favour of the males. While the total and rural sex ratio at state level has always been above 900 throughout the decades from 1901 to 2001, the total and rural sex ratio at district level plummeted below 900 in 1961 and 1971. The urban sex ratio at state level which had been low through the decades from 1901 to 1971 rose above 900 in 1981 to reach 982 in 2001 higher than the state rural sex ratio. The district has an urban population only in 2001, the sex ration of which is higher than that the total and rural sex ratio. It is further noticed that the total and rural sex ratio at state level was lower than that of the district during the first three decades of 1901-1921 but from 1931, the state level total and rural sex ratio has always been higher than the district level.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Umling	944
2	Umsning	938
	District (Rural) Total:	**940**

From the table 7, it is noticed that through the sex ratio of the district may not be as high as that of the state average, yet it is quite honourable in view of the fact that the presence of a cantonment in the district where the majority of the people who live there are males and the presence of a host of industrial units where the workers mostly from outside come to work there leaving their family behind.

Among the two CRD Blocks, it is noticed that while the sex ratio in Umling CRD Block, is above the district average, that in Umsning CRD Block is below the district average. This is due to the presence of a cantonment and Hydro Electric Project in the Block besides industrial units, while in Umling there are only industrial units.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	21	3.9	6,702	3.7
700-749	11	2.0	1,292	0.7
750-799	23	4.2	6,014	3.3
800-849	46	8.5	13,318	7.4
850-899	76	14.0	24,713	13.8
900-949	87	16.0	33,402	18.6
950-999	70	12.9	27,124	15.1
1000-1099	129	23.8	49,287	27.4
1100+	80	14.7	17,758	9.9
District Total:	**543**	**100.0**	**179,610**	**100.0**
Sex ratio (Rural) for District:			**940**	

From table 8, it is noticed that the highest percentage of the villages of the district, 23.8%, have a sex ratio in the range of 1,000-1,099. Followed by the percentage of those with a sex ratio range of 900-949, followed by the percentage of those with a sex ratio in the range of 850-899. The lowest percentage of the villages have a sex ratio in the range of 700 -749 lower than the percentage of those with a sex ratio in the range of less than 700.

TABLE 9 : SEX RATIO OF URBAN

Sl. No.	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Nongpoh	TC	951
Sex ratio (Urban) for the district:			**951**

From table 9, it is noticed that the urban sex ratio of the district is higher than the rural sex ratio. The reason is Nongpoh had been notified as a town only in 1995 by merging into it many surrounding villages. Though a town Nongpoh still bears the same rural characteristics and appearance it used to before the notification as a town. The only difference was that it is the district headquarters since 04-06-1992 where all district level office are located.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Umling	13,089	6,688	6,401	957
2	Umsning	26,709	13,460	13,249	984
District (Rural) Total:		**39,798**	**20,148**	**19,650**	**975**

From table 11, it is noticed that at 975 females per 1,000 males, the sex ratio of the children in the age–group 0-6 is an honourable one where female foeticide can never be suspected as happens in other states of the country. In fact the children of the Hynniewtrep, the name by which the Khasi/Pnar call themselves nowadays, have a great longing for the female child as it is the female child who will propagate the clan from generation to generation.

Among the two CRD Blocks, it is noticed that while the sex ratio of the children in the 0-6 age–group in Umsning is above the district average, that in Umling is below the district average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	78	14.4	2,893	7.3
700-749	23	4.2	1,451	3.6
750-799	32	5.9	2,198	5.5
800-849	36	6.6	2,536	6.4
850-899	44	8.1	3,815	9.6
900-949	40	7.4	5,345	13.4
950-999	23	4.2	2,644	6.6
1000-1099	88	16.2	7,333	18.4
1100+	179	33.0	11,583	29.1
District (Rural) Total	**543**	**100.0**	**39,798**	**100.0**
Sex ratio (Rural) for District:		**975**		

From table 12, it is noticed that the highest number of villages, 179 in number, accounting 33.00% of the villages of the district have a very favourable sex ratio of 1100+ of the rural population in the age group 0-6 followed by the percentage of villages with a sex ratio of 1000-1099. The third position is occupied by the percentage of villages with a sex ratio of 900-945. The lowest percentage of villages of the district have a sex ratio of 700-745. The villages with a sex ratio of less than 700 account for 7.3% of the villages of the district, higher than the percentage of those with a sex ratio of 750-799, 800-849 and 950-999.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ /	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Nongpoh	TC	2,748	1,428	1,320	924
District(Urban) Total			**2,748**	**1,428**	**1,320**	**924**

The sex ratio of the children in the age group 0-6, at 924, is lower than that in rural area. The reason is in urban areas, the tribals live along with the non-tribal who might have preferred male child to female one. However foeticide practice is not heard in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Umling	62,442	85	54,110	0.1	86.7
2	Umsning	117,168	203	102,627	0.2	87.6
District (Rural) Total:		**179,610**	**288**	**156,737**	**0.2**	**87.3**

From Table 15, it is noticed that the proportion of the scheduled caste population to the total population of the district, at 0.2%, is very insignificant. The fact is that Meghalaya itself have no indigenous scheduled castes, the list of 16 scheduled castes is that of Assam but made applicable to Meghalaya because it was a part of Assam till 20-01-1972.

Meghalaya being a tribal state, the high proportion of the scheduled tribe population to the total population of the district, at 81.0% does not make anyone surprised.

Between the two CRD Blocks, it is noticed that while the proportion of the scheduled caste population to the total population in Umling CRD Block is below the district average, that in Umsning CRD Block is equal to the district average. A different picture is, however, noticed in case of the proportion of the scheduled tribe population to the total population. While in Umsning it is below the district average, in Umsning, it is above the district average.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	520	95.8	0	0.0
Less than 5	19	3.5	135	46.9
5-10	2	0.4	59	20.5
11-20	1	0.2	66	22.9
21-30	1	0.2	28	9.7
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**543**	**100.0**	**288**	**100.0**

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	8	1.5	0	0.0
Less than 5	3	0.6	10	0.0
5-10	7	1.3	204	0.1
11-20	6	1.1	405	0.3
21-30	6	1.1	1,966	1.3
31-40	4	0.7	1,005	0.6
41-50	10	1.8	1,592	1.0
51-75	28	5.2	6,924	4.4
76 and above	*471*	*86.7*	*144,631*	*92.3*
District Total	**543**	**100.0**	**156,737**	**100.0**

From table 17, it is noticed that unlike the scheduled caste, the scheduled tribe population is recorded in 533 villages or 98.5% of the villages of the district. In as many as 471 villages or 86.7% of the villages, the proportion of the scheduled tribe population to the total population of the villages is in the percentage range of 76 and above and 92.3% of the total scheduled tribe population lives in those 471 villages. In 28 villages or 5.2% of the villages the proportion of the scheduled tribe population to the total population is in the percentage range of 51-75 and 4.4% of the scheduled tribe population lives in those villages. In the remaining villages where the scheduled tribe population is recorded their percentage to the total population varies from the percentage range of less than 5 to 41-50 and the percentage of the scheduled tribe population living in those villages varies from 0.0% in the percentage range of less than 5 to 1.3% in the percentage range of 21-30. In 8 villages no scheduled tribes are recorded.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Nongpoh (TC)	13,180	12	11,042	0.1	83.8
District(Urban) Total		**13,180**	**12**	**11,042**	**0.1**	**83.8**

In the urban areas of the district too, the proportion of the scheduled caste population to the total population as can be seen from table 18 is very insignificant. Their presence is not felt at all. Though still honourable, the proportion of the scheduled tribe population to the total population is below of that in rural areas. This is, however, as expected because in urban areas quite a number of non-scheduled tribes are working in different fields of economic activities. Their presence do reduce the proportion of the scheduled tribes to the total population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Umling	545	978
2	Umsning	765	978
District (Rural) Total:		**694**	**978**

From table 19, it is noticed that the sex ratio of the scheduled castes in rural areas is comparatively low than that of the scheduled tribes. The reason is either due to cultural difference

between the two communities or the scheduled castes being outsiders in Meghalaya may not own land or have come there for work only leaving their family behind.

Between the two CRD Blocks, it is noticed that while the sex ratio of the scheduled castes in Umling CRD Block is below the district average, that in Umsning CRD Block is above the district average. That of the scheduled tribes in both Blocks is, however, equal to the district average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nongpoh (TC)	714	990
Sex ratio (Urban) for the district:		**714**	**990**

As can be seen from table 20, the urban sex ratio of the scheduled castes like the rural sex ratio is lower than that of the scheduled tribes. The sex ratio of both the scheduled caste and the scheduled tribes is higher in the urban areas than that in rural areas. While it is difficult to explain the reason for the higher urban sex ratio among the scheduled tribes, among the scheduled castes, it is because it is easier for them to keep their family with them in urban areas than in rural areas.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Umling	30,625	17,352	13,273	31,817	14,766	17,051	62.1	68.2	55.5	12.8
2	Umsning	60,370	32,049	28,321	56,798	28,396	28,402	66.7	68.2	65.1	3.1
District (Rural) Total:		**90,995**	**49,401**	**41,594**	**88,615**	**43,162**	**45,453**	**65.1**	**68.2**	**61.7**	**6.5**

In the 2001 Census, like the 1991, children below 7 years of age, though they can both read and write with understanding in any language, they are treated as illiterate. So while calculating the literacy rates, only the population in the 7+ age is taken into consideration.

From table 22, it is noticed that more than 60.0% of the rural population of the district is literate with that of the males prevailing over that of the females making a gap of 6.5%.

Between the two CRD Blocks, while the literacy rate in Umling CRD Block is below the district average, that in Umsning CRD Block is above the district average. However a completely different trend is noticed in the male literacy rate where the male literacy rate of both the CRD Blocks is equal to the district average. The female literacy rate is, however, similar to the total literacy rate where the female literacy rate in Umling is below the district average and that in Umsning above the district average. In both the CRD Blocks the male literacy rate is higher than the female making a gap of 12.8% in Umling and 3.1% in Umsning. In Umling, the females are lagging very far behind the males in term of literacy.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.4	80	0.0
1-10	10	1.8	915	0.5
11-20	22	4.1	4,591	2.6
21-30	42	7.7	7,587	4.2
31-40	41	7.6	8,023	4.5

TABLE 23' : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001 (Cond...)

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
41-50	68	12.5	19,087	10.6
51-60	97	17.9	29,067	16.2
61-70	78	14.4	31,017	17.3
71-80	87	16.0	37,248	20.7
81-90	58	10.7	24,049	13.4
91-99	37	6.8	17,936	10.0
100	1	0.2	10	0.0
District Total:	**543**	**100.0**	**179,610**	**100.0**
Literacy rate for District:		**65.7**		

From table 23, it is noticed that the highest number of the villages, 97 in number accounting 17.9% of the villages of the district covering a population of 29,067 or 16.2% of the total population of the district are in the literacy rate range of 51-60. However the highest population of the district accounting 20.7% of the total population of the district is in the literacy rate range of 71-80. This population live in 87 villages the second highest number of villages by literacy rate range. There are only two villages in the district with zero literacy rate covering a population of 80 and this is only one village with cent percent literacy covering a population of 10. The literate population increases with the rise in the literacy rate up to 71-80 and inversely decreases thereafter with the rise in the literacy rate range.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA^/Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Nongpoh (TC)	7,759	4,093	3,666	5,421	2,663	2,758	74.4	76.8	71.8	5
District(Urban) Total:		**7,759**	**4,093**	**3,666**	**5,421**	**2,663**	**2,758**	**74.4**	**76.8**	**71.8**	**5**

The district has only one town, Nongpoh as its headquarters. It is a new town notified only after the 1991 Census. Several surrounding villages were then merged with the town. Therefore though a statutory town with the civic status of a Town Committee, the literacy rate of the urban population though comparatively higher than the total or rural literacy rates, it is not yet up to the mark that is being expected of a town. As is the usual trend, proportion of the literate males is higher than that of the females creating a gap of 5.0%.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Umling	60	41	19	25	14	11	88.2	89.1	86.4	2.8
2	Umsning	116	83	33	87	32	55	69.9	83	50	33
District (Rural) Total:		**176**	**124**	**52**	**112**	**46**	**66**	**75.2**	**84.9**	**59.1**	**25.8**

From table 25 it is noticed that the literacy rate of the rural scheduled caste population of the district is comparatively higher. But there is a wide difference between the literacy rate of the rural male scheduled caste population and their female counterpart creating a gap of 25.8%.

In the two CRD Blocks, while more than 80.0% of the rural male and female scheduled caste

population in Umling is literate, in Umsning only the rural male scheduled caste population have a literacy rate of more than 80.0%. The literacy rate of the rural female scheduled caste population is exactly 50.0% creating a gap of 33.0% between the two while the gap in Umling between the two sex is just 2.8%.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	8.7	2	0.7
1-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	3	13.0	25	8.7
41-50	3	13.0	13	4.5
51-60	0	0.0	0	0.0
61-70	2	8.7	40	13.9
71-80	4	17.4	126	43.8
81-90	2	8.7	22	7.6
91-99	0	0.0	0	0.0
100	7	30.4	60	20.8
District Total:	**23**	**100.0**	**288**	**100.0**
Literacy rate for District (Rural):		**75.2**		

The scheduled caste population is recorded in only 23 villages out of 543 inhabited villages of the district. From table 26, it is noticed that while in only 2 or 8.7% of the villages with a total population of 2 or 0.7%, nil literacy rate is recorded, in 7 or 30.4% of the villages, the highest percentage, with a total population of 60 or 20.8% (the second highest percentage), cent per cent of the rural scheduled caste population is literate. The second highest percentage of villages with the highest percentage of population have a literacy rate in the 71-80 range. While there is no village with literacy rate in the 1-10 to 21-30 ranges, 51-60 range and 91-99 range, the percentages of the villages with different percentages of the population are equally distributed in the 31-40 and 41-50 ranges and 61-70 and 81-90 ranges.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Nongpoh (TC)	8	5	3	4	2	2	72.7	83.3	60	23.3
Ri Bhoi * (Urban)		**8**	**5**	**3**	**4**	**2**	**2**	**72.7**	**83.3**	**60**	**23.3**

From table 27, it is noticed that though 72.7% of the urban scheduled caste population is literate, it is comparatively lower than the rural literacy rate. The same trend is noticed in regard to the male literacy rate. But the urban female literacy rate of the scheduled caste population is higher than its rural counterpart. Like the rural literacy rate, the urban male literacy rate is higher than the urban female literacy rate creating a gap of 23.3 lower than the gap in rural areas of the district.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Umling	25,806	14,285	11,521	28,304	13,067	15,237	60.8	66.7	54.8	11.9
2	Umsning	51,146	25,949	25,197	51,481	25,923	25,558	65.4	65.6	65.2	0.4
District (Rural) Total:		**76,952**	**40,234**	**36,718**	**79,785**	**38,990**	**40,795**	**63.8**	**66**	**61.6**	**4.4**

From table – 28, it is noticed that 63.8% of the rural scheduled tribe population is literate, the male 66.0% and the female 66.6% creating a gap of 4.4% much lower than the gap created by the rural male and female scheduled caste population. In the two CRD Blocks, it is noticed that while the total and the female literacy rate in Umsning is higher than that in Umling, the male literacy rate in Umling is higher than that in Umsning. It is also noticed that while the total literacy rate and female literacy rate in Umsning is above the district average, in Umling it is below the district average. While the male literacy rate in Umling is above the district average, that in Umsning is below the district average. It both the CRD Blocks the male literacy rate is higher than the female literacy rate creating a gap of 11.9% in Umling and 0.4% in Umsning. This shows that in Umling the parents prefer the boys to the girls to attend school.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	3	0.6	104	0.1
1-10	10	1.9	773	0.5
11-20	18	3.4	3,760	2.4
21-30	39	7.3	6,672	4.3
31-40	37	6.9	7,008	4.5
41-50	70	13.1	17,969	11.5
51-60	95	17.8	26,647	17.0
61-70	82	15.3	29,675	18.9
71-80	80	15.0	31,096	19.8
81-90	62	11.6	22,845	14.6
91-99	36	6.7	10,170	6.5
100	3	0.6	18	0.0
District Total:	**535**	**100.0**	**156,737**	**100.0**

Literacy rate for District (Rural): 63.8

From Table 29, it is noticed that the scheduled tribe population is recorded in only 535 inhabited villages out of 543. It is also noticed that in only 3 or 0.6% of the villages with 104 or 0.1% of the total scheduled tribe population where nil literacy rate is recorded and in only 3 or 0.6% of the villages with 18 scheduled tribe population cent per cent literacy rate is recorded. It is further noticed that while the highest percentage of villages has a literacy rate in the 51-60 range followed by that in the 61-70 range, the highest percentage of the population has a literacy rate in the 71-80 range followed by that in the 61-70 range. It is further noticed that more than 10.0% of the villages in each range with more than 10.0% of the population are distributed in the 41-50 to 81-90 literacy range. In the 31-40 range and below and the 91-99 and above less than 10.0% of the villages in each range with a population below 10.0% each are distributed in those ranges.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	literacy rate
1	2	3	4	5	6	7	8	9	10	11	12
1	Nongpoh (TC)	6,549	3,356	3,193	4,493	2,194	2,299	75.9	78.0	73.9	4.1
	Ri Bhoi * (Urban)	**6,549**	**3,356**	**3,193**	**4,493**	**2,194**	**2,299**	**75.9**	**78.0**	**73.9**	**4.1**

From table 30, it is noticed that 75.9% of the scheduled tribe population in the urban areas of the district, 78.0% males and 73.9% females are literate which is comparatively higher than that in rural areas of the district. The gap between the male literacy rate and the female literacy rate is 4.1% a little lower than the gap in rural areas.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D. block	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
1	Umling	Persons	62,442	24,476	39.2	5,825	9.3	30,301	48.5	32,141	51.5
		Males	32,118	15,008	46.7	2,082	6.5	17,090	53.2	15,028	46.8
		Females	30,324	9,468	31.2	3,743	12.3	13,211	43.6	17,113	56.4
2	Umsning	Persons	117,168	42,880	36.6	11,454	9.8	54,334	46.4	62,834	53.6
		Males	60,445	27,430	45.4	3,904	6.5	31,334	51.8	29,111	48.2
		Females	56,723	15,450	27.2	7,550	13.3	23,000	40.5	33,723	59.5
District (Rural) Total:		**Persons**	**179,610**	**67,356**	**37.5**	**17,279**	**9.6**	**84,635**	**47.1**	**94,975**	**52.9**
		Males	**92,563**	**42,438**	**45.8**	**5,986**	**6.5**	**48,424**	**52.3**	**44,139**	**47.7**
		Females	**87,047**	**24,918**	**28.6**	**11,293**	**13.0**	**36,211**	**41.6**	**50,836**	**58.4**

Depending on the duration a person engages himself in some economically productive activities, the workers are classified into main workers and marginal workers. From table 32, it is noticed that less than 40.0% of the total population of the district are main workers and less than 10.0% are marginal workers while more than 50.0% of the total population are non-workers. While the proportion of the male main workers is higher than that of the female main workers, the proportion of the female marginal workers and female non-workers is higher than that of their male counterpart. The same trend is noticed in the two CRD Blocks.

Between the two CRD Blocks, it is noticed that the proportion of the main workers in Umling is above the district average and that in Umsning below the district average. The same trend is noticed in the case of male and female main workers of the two CRD Blocks. But the proportion of the marginal workers in the two CRD Blocks shows a reversal trend. While the proportion of the marginal workers in Umling is below the district average, that in Umsning is above the district average. While the proportion of the male marginal workers in both the CRD Blocks is equal to the district average that of the female marginal workers in Umling is below the district average and that in Umsning is above the district average.

In regard to the proportion of the non-workers it is noticed that the proportion of the non-workers both male and female in Umling is below the district average and that in Umsning above the district average.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA^ / Town +*	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
1	Nongpoh (TC)	Persons	13,180	3,881	29.4	891	6.8	4,772	36.2	8,408	63.8
		Males	6,756	2,605	38.6	410	6.1	3,015	44.6	3,741	55.4
		Females	6,424	1,276	19.9	481	7.5	1,757	27.4	4,667	72.6
District (Urban) Total:		**Persons**	**13,180**	**3,881**	**29.4**	**891**	**6.8**	**4,772**	**36.2**	**8,408**	**63.8**
		Males	**6,756**	**2,605**	**38.6**	**410**	**6.1**	**3,015**	**44.6**	**3,741**	**55.4**
		Females	**6,424**	**1,276**	**19.9**	**481**	**7.5**	**1,757**	**27.4**	**4,667**	**72.6**

From table 33, it is noticed that the urban main workers of the district form only 29.4% of the total urban population and the marginal workers, 6.8%.This has resulted in the urban non-workers to constitute 63.8% of the total urban population which means that each worker has to feed more than one non-worker.

By sex, it is noticed that while the proportion of the urban male main workers is higher than that of their female counterpart, the proportion of the urban female marginal workers is higher than that of their male counterpart. The proportion of the urban female non-workers is also higher than that of the male.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Serial number	Name of C. D. block	Persons / Males / Females	Total	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
1	Umling	Persons	62,442	30,301	18,309	4,649	536	6,807
				(48.5)	(60.4)	(15.3)	(1.8)	(22.5)
		Males	32,118	17,090	9,837	2,400	260	4,593
				(53.2)	(57.6)	(14.0)	(1.5)	(26.9)
		Females	30,324	13,211	8,472	2,249	276	2,214
				(43.6)	(64.1)	(17.0)	(2.1)	(16.8)
2	Umsning	Persons	117,168	54,334	31,068	10,603	1,030	11,633
				(46.4)	(57.2)	(19.5)	(1.9)	(21.4)
		Males	60,445	31,334	16,879	5,596	522	8,337
				(51.8)	(53.9)	(17.9)	(1.7)	(26.6)
		Females	56,723	23,000	14,189	5,007	508	3,296
				(40.5)	(61.7)	(21.8)	(2.2)	(14.3)
District (Rural) Total:		**Persons**	**179,610**	**84,635**	**49,377**	**15,252**	**1,566**	**18,440**
				(47.1)	**(58.3)**	**(18.0)**	**(1.9)**	**(21.8)**
		Males	**92,563**	**48,424**	**26,716**	**7,996**	**782**	**12,930**
				(52.3)	**(55.2)**	**(16.5)**	**(1.6)**	**(26.7)**
		Females	**87,047**	**36,211**	**22,661**	**7,256**	**784**	**5,510**
				(41.6)	**(62.6)**	**(20.0)**	**(2.2)**	**(15.2)**

Note: Percent of Worker to total worker are given in brackets

Workers, both main and marginal, are classified into four broad categories, Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. From table 35, it is noticed that more than 55.0% of the rural total workers of the district are cultivators .Those engaged as agricultural labourers and other workers constitute 18.0% and 21.8% respectively, of the total workers. The Household industry workers form a very insignificant percentage of 1.9% only.

By sex, it is noticed that the proportion of the female cultivators, agricultural labourers and household industry workers is higher than that of the male while the proportion of the male other workers is higher than that of the female. CRD Block wise, it is noticed that while the proportion of the cultivators both males and females in Umling is above the district average, that in Umsning is below the district average. A reversal trend is noticed in the proportion of the agricultural labourers, both male and female. While the proportion of the household industry workers both male and female in Umling is below the district average, that in Umsning is equal to the district average, except that of the male which is below the district average. The proportion of the other Workers both male and female in Umling is above the district average and that in Umsning is below the district average.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Sl. No.	Name and urban status of UA^ / Town*+	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
				Number (Percentage)				
1	Nongpoh (TC)	Persons	13,180	4,772	1,276	1,206	64	2,226
				(36.2)	(26.7)	(25.3)	(1.3)	(46.6)

				(44.6)	(23.6)	(23.8)	(1.7)	(50.8)
		Females	6,424	1,757	565	487	12	693
				(27.4)	(32.2)	(27.7)	(0.7)	(39.4)
District (Urban) Total:		**Persons**	**13,180**	**4,772**	**1,276**	**1,206**	**64**	**2,226**
				(36.2)	**(26.7)**	**(25.3)**	**(1.3)**	**(46.6)**
		Males	**6,756**	**3,015**	**711**	**719**	**52**	**1,533**
				(44.6)	**(23.6)**	**(23.8)**	**(1.7)**	**(50.8)**
		Females	**6,424**	**1,757**	**565**	**487**	**12**	**693**
				(27.4)	**(32.2)**	**(27.7)**	**(0.7)**	**(39.4)**

In the Census of 2001, the workers are classified into 4 categories, Cultivators, Agricultural Labourers, Workers in Household Industries and Other Workers. From table 36, it is noticed that as is the general trend in urban areas, the highest percentage of the urban population of the district are engaged in other works followed by that engaged in cultivation and as agricultural labourers in that order. Those engaged in household industries constitute only a little over 1.0% of the total workers. By sex, it is noticed that while proportion of the male workers engaged in other works and household industries is higher than that of the female, the proportion of the female workers engaged in cultivation and as agricultural labourers is higher than that of the male .On the whole, however, the proportion of the male workers is higher than that of the female.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Sl. No.	Name of C. D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Umling	240	206	16	135	18	3	75	5	0	96	148
		(100)	(85.8)	(6.7)	(56.2)	(7.5)	(1.2)	(31.2)	(2.1)	(0.0)	(40.0)	(61.7)
2	Umsning	303	253	21	217	18	4	138	5	0	159	212
		(100)	(83.5)	(6.9)	(71.6)	(5.9)	(1.3)	(45.5)	(1.7)	(0.0)	(52.5)	(70.0)

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001 (Contd..)

Sl. No.	Name of C. D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13
District Total:		**543**	**459**	**37**	**352**	**36**	**7**	**213**	**10**	**0**	**255**	**360**
		(100)	**(84.5)**	**(6.8)**	**(64.8)**	**(6.6)**	**(1.3)**	**(39.2)**	**(1.8)**	**(0.0)**	**(47.0)**	**(66.3)**

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The availability of various amenities in a village is a sign of progress and development. From table 37 it is noticed that more than 80.0% of the villages of the district have the amenity of education and more than 60.0%, the amenities of improved drinking water and power supply. Approach by pucca road and transport and communication is available to less than 50% and 40% respectively of the villages. Medical, which is very essential for the well being of the people is available to only 2.8% of the villages. Post offices, banks and telephone are available to small percentage of the villages.

Blockwise, it is noticed that Umsning CRD Block, being a Block with more Villages than Umling CRD Block, the number of villages have various amenities are more in Umsning than in Umling, except Post Offices and Banks which are available in an equal number of villages. By percentage, however, it is noticed that the proportion of the villages with the amenities of education, post office and banks is higher in Umling than that in Umsning and the proportion of the villages with the amenities of medical, improved drinking water, transport/communication, approach by pucca road and power supply is higher in Umsning than that in Umling. The proportion of the villages with telephone in Umling is equal to that in Umsning.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1.	2	3	4	5	6	7	8	9	10	11	12	13
1	Umling	62,597	57,535	8,410	42,183	8,387	1,553	25,790	3,063	0	31,849	45,975
		(100)	(91.9)	(13.4)	(67.4)	(13.4)	(2.5)	(41.2)	(4.9)	(0.0)	(50.9)	(73.4)
2	Umsning	117,013	106,725	17,167	93,020	15,875	2,438	68,233	7,962	0	64,903	98,325
		(100)	(91.2)	(14.7)	(79.5)	(13.6)	(2.1)	(58.3)	(6.8)	(0.0)	(55.5)	(84.0)
District Total:		**179,610**	**164,260**	**25,577**	**135,203**	**24,262**	**3,991**	**94,023**	**11,025**	**0**	**96,752**	**144,300**
		(100)	**(91.5)**	**(14.2)**	**(75.3)**	**(13.5)**	**(2.2)**	**(52.3)**	**(6.1)**	**(0.0)**	**(53.9)**	**(80.3)**

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In table 37, the number and proportion of villages served by different amenities were presented. In this table 38 the number and percentage of the rural population served by different amenities is displayed. From the table, it is noticed that education is the only amenity that serves more than 90.0% of the population of the district followed by the proportion served by power supply, 80.3% and improved drinking water,75.3%. , in that order the amenities of approach by pucca road and transport/ communication serve more than 50.0% of the population of the district. While the amenities of post office and telephone serve only 14.7% and 2.2% respectively of the population of the district. The most essential medical amenity on which service life of the people depend is available to only 14.2% of the rural population of the district and banks 6.1%. In the two CRD Blocks, it is noticed that in Umling CRD Block the proportion of the population served by the amenities education, and telephone is above the district average that served by the medical, improved drinking water, post office, transport and communication, approach by pucca road and water supply is below the district average. In Umsning CRD Block, while the proportion of the population served by medical, improved drinking water, post office, transport and communication, approach by pucca road and power supply is above the district average, that served by education and telephone is below the district average.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	70	13	2	85
(b) Middle School	197	107	139	443
(c) Degree College	8	25	509	542
2. Medical:-				
(a) Hospital	60	82	400	542
(b) PHC	188	95	246	529
3. Post Office	172	134	201	507
4. Telephone	41	44	451	536
5. Bus Service	143	89	98	330
6. Banks				
(a) Commercial Bank	34	60	439	533
(b) Cooperative Bank	15	58	469	542
7. Agricultural Credit Societies	6	32	505	543

From table 39, it is noticed that the highest number of villages without the amenities of Degree College, hospital, PHC, post office, telephone, Commercial Banks, Co-operative Banks and Agricultural Credit Societies lie at a distance of 10+ kilometers from the places where those amenities are available. The highest number of Middle School and Bus Service are at a distance of -5 kilometers from the place where those amenities are available. By and large, except the amenity of Primary School, which is not available to only 15.7% of the villages, the other amenities are not available to the proportion of villages ranging from 81.6% to 99.8%,except Bus Service which is not available to only a little over 60.0% of the villages.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	5	4	1	0	0	3	1	0	2
	(100.0)	(80.0)	(20.0)	(0.0)	(0.0)	(60.0)	(20.0)	(0.0)	(40.0)
5 -15	68	63	2	4	2	22	1	0	28
	(100.0)	(92.6)	(2.9)	(5.9)	(2.9)	(32.4)	(1.5)	(0.0)	(41.2)
16 - 50	228	190	22	20	5	108	6	0	119
	(100.0)	(83.3)	(9.6)	(8.8)	(2.2)	(47.4)	(2.6)	(0.0)	(52.2)
51+	242	202	12	12	0	80	2	0	106
	(100.0)	(83.5)	(5.0)	(5.0)	(0.0)	(33.1)	(0.8)	(0.0)	(43.8)
Unspecified	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0
District total	**543**	**459**	**37**	**36**	**7**	**213**	**10**	**0**	**255**
	(100.0)	**(84.5)**	**(6.8)**	**(6.6)**	**(1.3)**	**(39.2)**	**(1.8)**	**(0.0)**	**(47.0)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

From table 40, it is noticed that the nearness of villages from a statutory town has no bearings on the availability of different amenities in the villages. While the highest number/percentage of villages with the amenity of education are those situated at a distance of 51+ kilometers from the nearest statutory town followed by those at a distance of 16-50 kilometers, the highest number/percentage of villages with the amenities of medical, post office, telephone, transport and communications and approach by pucca road are situated at a distance of 16-50 kilometers from the nearest statutory town followed by those situated at a distance of 51+ kilometers, except those with the amenity of telephone which is followed by the number/ percentage of villages situated at a distance of 5-15 kilometers from the nearest statutory town.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

2000-4,999	0	0	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0	0	0
5000-9999	1	1	1	1	1	0	1	1	0	1	1
	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(0.0)	(100.0)	(100.0)	(0.0)	(100.0)	(100.0)
10000 +	0	0	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0	0	0
District total	**543**	**459**	**37**	**352**	**36**	**7**	**213**	**10**	**0**	**255**	**360**
	(100.0)	**(84.5)**	**(6.8)**	**(64.8)**	**(6.6)**	**(1.3)**	**(39.2)**	**(1.8)**	**(0.0)**	**(47.0)**	**(66.3)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

From table 41, it is noticed that the size of the population of a village has a great bearing on the availability of amenities in that village for the lone village in the district with a population range of 5000-9999 has all the amenities except telephone and Agricultural credit societies. It is further noticed that the percentage of villages with various amenities rises with the rise in the size of the population of the villages, except the proportion of the villages with the amenities of medical and improved drinking water where the proportion of the villages in the population size of 500-999 with the amenities is higher than that in the villages with a population size of 1000-1999.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
		N.A.			

In Meghalaya state, village are not cadastrally surveyed. Hence, information on this regard is 'Not Available'.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Nongpoh (TC)	9.5	0	9.5	9.5	0	0	9.5	0	0
District Total		**9.5**	**0**	**9.5**	**9.5**	**0**	**0**	**9.5**	**0**	**0**

The district has only one town, Nongpoh, with the civic status of Town Committee. It was notified as town in mid nineties for the purpose of its development rather than being the district headquarter since early nineties. The Town Committee does not seem to levy any tax as no receipt is shown under that head though the annual receipt from other sources comes to Rs 9.5 lakhs. The entire receipt of Rs 9.5 lakhs is spent only in public works with no expenditure incurred on general administration, public health and conveniences and public institution.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Nongpoh (TC)	12.1	1.5	1.5	1.5	0.8
District Total		**12.1**	**1.5**	**1.5**	**1.5**	**0.8**

From table 44, it is noticed that there are 12.1 Primary schools who cater to the educational needs of 10,000 population of the town. Only 1.5 Junior Secondary/Middle schools, Secondary schools and Senior Secondary schools cater to the educational needs of 10,000 population while only 0.8 college caters to the need of 10,000 population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Nongpoh(TC)	46
	District Total	**46**

The only town of the district, Nongpoh, has only one hospital which was in the day before the creation of Ri Bhoi district a Community Health Centre. Being a small hospital it can provide only 46 bed to the population of the town which is a little over 13 thousand. But it has also to cater to the medical needs of the rural populace of the district. Therefore by and large, it may not be able to meet the medical need of the rural population of the district.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
	Not Available			

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Nongpoh (TC)	NIL	Tomato
		NIL	Ginger
		NIL	Broomstick

Nongpoh is newly created town in the district. No commodity is reputedly manufactured and the commodities exported are also negligible.

TABLE 48: HOUSEHOLDS BY TENUE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Schedule Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets".

Shelter is one of the basic needs of man. The accessibility of every man to shelter is the sign of progress and advancement of a society. The availability of shelter to man is through three sources, by owning it, by hiring it and by obtaining it without it being owned and it being hired. From table 48 below, it is noticed that more than 81.0% of the households in the district resided in their owned houses while those households who lived in rented houses formed only a little over 12.0% of the households of the district. Those households who dwelled in houses which were either owned or rented constituted only a little over 6.0% of the household of the district.

By the number of room occupied, it is noticed that the highest number of the household of the district irrespective of their tenure status occupied two rooms followed by the number of those households who occupied three rooms in case of those living in owned houses and in houses neither owned nor rented. The highest number of the households who lived in rented houses occupied two rooms followed by the number of those who occupied one room. The same trend is noticed in rural areas of the district in case of those residing in owned houses and houses neither owned nor rented. In case of those who lived in rented house, while the highest number of households in both rural and urban areas occupied two rooms, in rural areas it is followed by the number of those who occupied three rooms and in urban areas by the number of those who occupied one room.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLD LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

Note:
Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent :-2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Depending on the materials of the construction, houses are classified into three types in the Census of India 2001, permanent, semi-permanent and temporary.

From table 49, it is noticed that the majority [illegible] temporary houses. Those who lived in semi-permanent houses form the second highest proportion of the households at 28.5%. Only 16.5% of the households of the district can afford permanent houses for living. The same trend is noticed in rural areas of the district. In urban areas of the district, however, the picture is quite different. Though the highest percentage of the households in urban areas of the district, at 38.8%, lived in temporary houses, the second highest proportion, at 34.8%, lived I permanent houses. Those who lived in semi-permanent houses form only 26.4% of the households of the district.

[illegible] than 63.0% of the households of Umling CRD Block lived in temporary houses, in Umsning CRD Block, it was a little below 49.0%. Similarly the households living in semi-permanent houses was higher in Umsning CRD Block than that in Umling. The percentage of the households who lived in permanent houses is, however, higher in Umling than in Umsning.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	C.D. Block	Total Rural Urban	Number of House-holds	Number and percentage of households having									
				Improved drinking water*		Electricity		Bathroom		Toilet		Drainage

Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

* Based on the improved drinking water source, drinking water supply has been classified as 'improved' or other wise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to'improve drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.(As per state of Meghalaya, Tap, Hand pump, Tube Well, Well are considered as 'Improved' source of drinking water.

In the Census of India 2001, information on the availability of amenities such as improved drinking water, electricity, bathroom, toilet and drainage in the houses were collected from each household and tabulated and presented in table -50 below.

From the table it is noticed that only 58.12% of the households of the district had access to improved drinking water and 57.93% had toilet in their houses. Those with electricity form only 39.80% of the households and those with drainage, 38.66%. Only a small percentage of 15.76 of the households had bathroom. However, in the urban areas of the district, except the amenity of bathroom, the percentage of the households varied from 57.86% with the amenity of drainage to 80.18% with the amenity of toilet. Though in urban areas, only 23.09% of the households had the amenities of bathroom.

In CRD Blocks, it is noticed that the amenity of improved drinking water and electricity were available to more or less the same percentage of the households in both the CRD Blocks, though in Umling CRD Block, the proportion of the household with improved drinking water is higher than that in Umsning while the proportion of the households in Umsning CRD Block with electricity is higher than that in Umling. The proportion of the households in Umsning CRD Block with the amenities of bathroom and drainage is higher than that in Umling while in Umling, the proportion of the households with the amenity of toilet is higher than that in Umsning.

Percentage in brackets

Data source: Census of India 2001, H-series: " Table on Houses, Household amenities and Assets".

Types of fuel used in cooking are other information collected from each household tabulated and presented in table-51 below.

From the table it is noticed that 90.54% of the households of the district used firewood as fuel for cooking. The households who used other types of fuel for cooking constitutes a very insignificant proportion, the highest being the proportion of those who used electricity as fuel for cooking, at 3.21%.

In the CRD Blocks, it is noticed that while more than 90.0% of the households in Umsning CRD Block used firewood as fuel for cooking in Umling CRD Block, the proportion of the households who used firewood as fuel for cooking was below 90.0%.The proportion of the households using other types of fuel for cooking vary insignificantly in both the CRD Blocks, the highest being the proportion of the households of Umsning CRD Block who used electricity as fuel for cooking, at 4.74%.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSETS, 2001.

Sl. No.	C.D. Block	Total Rural Urban	Total number of households	Total number of households availing banking services	Availability of household assets						
					Radio/ Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, van	None of the specified assets

		Urban	0	0	0	0	0	0	0	0	0
	District Total		**34,993**	**5,110**	**10,490**	**5,756**	**973**	**3,072**	**677**	**586**	**20,652**

Information on whether or not a household was availing banking services and whether or not it possessed each household asset are tabulated and presented in table-52.

From the table it is noticed that more than 85.0% of the households of the district did not avail banking services and more than 59.0% did not have any of the specified assets. The proportion of the households having household assets varies from 1.7%with Car/ Jeep/Van to 30.0% with those having radio/transistor.

In the CRD Blocks, it is noticed that while the proportion of the households availing banking services, those without any of the specified assets, and those having telephone, bicycle and car/jeep/van is higher in Umsning than in Umling. The proportion of those having radio/transistor, television and scooter/ motorcycle/moped is higher in Umling than in Umsning.

Places of tourist Interest

Barapani: Known as Umiam Khwan to the local people, the place is located at a distance of about 15 Kilometres from Shillong, the State Capital and about 37 Kilometres from Nongpoh, the district headquarters on the NH – 40, the Shillong – Guwahati road. In this place there is a lake called Umiam Lake, formed by damming the Umiam River under the Umiam Hydro – Electric Project. Many offices of the Meghalaya State Electricity Board are located here. The lake has been developed into a tourist complex. There is a small hotel-cum-restaurant as well as a few cottages for tourists stay. The Water Sports Complex situated in the lake provides a choice of row boats, paddle boats sailing boats, water scooters and speed boats. The lake is also an angler's paradise.

Scope of Village Directory and Town Directory

Incorporation of non-census data in the District Census Handbook known as the Village Directory and the Town Directory started in the 1971 census. In that census the data presented in the Village Directory were educational and medical facilities, drinking water, post and telegraph, market days, communication (bus stop, railway station and water way), nearest town from the village, power supply and staple food. On land use pattern the data presented were forest, area irrigated, area un-irrigated, cultivable waste and area non-available for cultivation. Data on land use pattern could not be shown due to their non-availability.

In the 1981 census, by and large, the same data as that of 1971 were presented in the Village Directory. The only addition to that of 1971 was approach to the village, the area under jhum cultivation due to heavy demand on those data by the data-users. In the 1991 census, the same data were presented without addition or subtraction.

In the Census of India, 2001, the scope of the Village Directory has been enlarged to cover data on telephone facilities; the number of commercial and co-operative banks, the number of agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema/video halls, sports club, stadium/auditorium) available in the village. It also covers data on receipt of newspaper/magazine in the village and the most important commodities manufactured in the village.

The Town Directory of the 1971 census had seven statements. Statement-I presented data on Status, Growth, History and Functional categories of towns; Statement-II, Physical Aspects and Location of Towns; Statement-III, Municipal Finance; Statement-IV, Civics and other Amenities; Statement-V, Medical, Educational, Recreational and Cultural Facilities in towns; Statement-VI, Trade, Commerce, Industry and Banking; and Statement-VII, Population by Religions. Statement I to VI were retained in the 1981, 1991 and 2001 census also. In the 1981 and 1991 censuses, Statement-VII was dropped and Statement-IVA, showing Civic and Other Amenities in slums was incorporated. In the Census of India, 2001, Statement-IVA has been replaced by Statement-VII displaying the same data as Statement-IVA.

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1: Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2: Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3: Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4: Total population

The total population of the village as per 2001 Census is given against this column.

Column 5: Number of households

The number of households as per 2001 Census is given in this column.

Amenities:

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6: Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school

with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i) Primary School	P
(ii) Middle School	M
(iii) Secondary School	H
(iv) Senior Secondary School	PUC
(v) College	C
(vi) Industrial School	I
(vii) Training School	Tr
(viii) Adult literacy class/centre	AC
(ix) Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7: Medical

Availability of medical facility within the village is indicated by following codes:

(i) Allopathic Hospital	H
Ayurvedic Hospital	HA
Unani Hospital	HU
Homeopathic Hospital	H Hom
(ii) Allopathic Dispensary	D
Ayurvedic Dispensary	DA
Unani Dispensary	DU
Homeopathic Dispensary	D Hom
(iii) Maternity & Child Welfare	MCW
(iv) Maternity Home	MH
(v) Child Welfare Centre	CWC
(vi) Health Centre	HC
(vii) Primary Health Centre	PHC
(viii) Primary Health Sub-Centre	PHS
(ix) Family Welfare Centre	FWC
(x) T.B. Clinic	TB
(xi) Nursing Home	NH
(xii) Registered Private Medical Practitioner	RMP
(xiii) Subsidised Medical Practitioner	SMP
(xiv) Community Health Worker	CHW
(xv) Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8: Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i) Tap Water	T
(ii) Well Water	W
(iii) Tank Water	TK
(iv) Tubewell Water	TW
(v) Handpump	HP
(vi) River Water	R
(vii) Canal	C
(viii) Lake	L
(ix) Spring	S
(x) Others	O
(xi) Summer Source	SS-

Column 9: Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i) Post Office	PO
(ii) Telegraph Office	TO
(iii) Post & Telegraph Office	PTO
(iv) Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.

the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the

facility is not available within the village the distance of the nearest place where such facility exist is given:

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14: Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15: Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16: Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17: News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) News Paper	N
(ii) Magazine	M

Column 18: Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal	GC
(ii) Private Canal	PC
(iii) Well (without electricity)	W
(iv) Well (with electricity)	WE
(v) Tubewell(with electricity)	TW
(vi) Tubewell(with electricity)	TWE
(vii) Tank	TK
(viii) River	R
(ix) Lake	L
(x) Waterfall	WF
(xi) Others	O
(xii) Total	T

The village directory also carries the following appendices.

Appendix-I:

It gives the abstract of educational, medical and other amenities available in villages C.D. Block wise of the district.

Appendix-I-A:

Indicates number of villages C.D. Block wise having one or more primary schools.

Appendix-I-B:

Indicates number of villages C.D. Block wise having primary, middle and secondary schools.

Appendix-I-C:

Shows number of villages C.D. Block wise with different sources of drinking water facilities..

Appendix-II:

Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A:

Indicates list of Census Towns which do not have one or more amenities.

Appendix-III:

It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV:

C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V:

Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI:

Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A, VII B:

The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII:

Indicates C.D. Block wise number of villages under each Gram Panchayat.

Number of villages under each Gram Panchayat (C.D. Block wise)

Name of District: Ri Bhoi

Sl. No.	Name of gram panchayat and location code number	Area of gram panchayat in hactare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Caste population	Total Scheduled Tribes population	Income and expenditure of panchayat/Gram panchayat (in Rs. '000)	
			Number	location code numbers					Total Income	Total Expenditure
1	2	3	4	5	6	7	8	9	10	11
			N.A.*							

* As there is no Gram Panchayat Administrative unit in Meghalaya, the data for the above columns are not available.

APPENDIX IX - Villge Directory
Statement showing number of girls schools in the villages

Name of the District: Ri Bhoi

Serial number	Name of C.D.Block	Village location code number	Name of village	Number of girls schools			
				Primary School	Middle School	Matriculation/ Secondary School	Higher Secondary School/ PUC/ Intermediate/ Junior college
1	2	3	4	5	6	7	8
1	Umling		Not Available				
2	Umsning		Not Available				

SECTION II
TOWN DIRECTORY

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I: Status and Growth History

Column (2): Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8:

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10:

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR

(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB

(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9:

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14: Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8: Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11: Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation *(Annexure-II)*. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality

and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract Table A-5 for total population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, A-5 Appendix table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Location code number	District/ CD Block/ U.A./ City/ Town	Total/ Rural/ Urban	Area of Town/ Ward in square kilometre	Number of households	Total population (including institutional and houseless population)			Population in the age-group 0-6

ANNEXURE I-VIII

Annexure-I

Number of villages under Gram Panchayats

There is no Gram Panchayats as Administration Units in the State of Meghalaya. Hence, the data is not available and cannot be furnished under this Annexure.

Annexure-II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration. The definition of each of the above is given below.

Fertility

In demography, the term fertility is used in relation to the actual production of children or occurrence of births. Fertility is a measure by which a population adds to itself and normally assessed by relating the number of births to a full or part of the population, such as the number of married women or women of the child-bearing age. It must, however, be remembered that fertility has all to depend on marriage. No marriage, no fertility. Early marriage, high fertility and late marriage, low fertility. Crude Birth Rate (CBR) is the most simple and perhaps the most widely quoted measure of fertility. It is the ratio of the number of live births in a year to the midyear population normally expressed per 1000 population.

Mortality

Mortality is the cessation of life of a member of a population commonly known as death. It is a measure by which a population deducts from itself and normally assessed by relating the number of deaths to the population. Crude Death Rate (CDR) is the simplest and most used measure of mortality. It is the ratio of the number of deaths in a year to the midyear population normally expressed per 1000 population.

Migration

Migration is the third component of population change. It is a movement of the population from one place to another for various reasons. In census migrants are classified by place of birth and place of last residence. A persons is considered a migrant by place of birth if the place he/she is enumerated during census is other than the place of his/her birth. Similarly, a persons is considered a migrant by place of last residence if he/she is enumerated in a place other than his/her immediate place of last residence. A persons enumerated in his/her place of birth can be a migrant by place of last residence if his/her immediate place of last residence is other than his/her place of birth.

Annexure-III

Various measures of fertility and mean age at marriage

The various measures of fertility have been given in the Analytical Note under the non-census-concepts. In this annexure we are going to analyse the following indicators of fertility.

(i) General Fertility Rates (GFR):

It is the number of live births per 1000 women in the reproductive age-groups (15-49) years in a given year. From the table we know that average General Fertility rate of the State comes to 129.7. Amongst the districts, East Garo Hills is having lowest fertility rate with only 105.7 while West Khasi Hills district gives highest rate with 155.8.

(ii) General Marital Fertility Rates (GMFR):

It is the number of live birth per 1000 married women in the reproductive age-group (15-49) years in a given year. The table shows that the General Marital Fertility rate of the State as 140.1 and the West Khasi Hills district shows highest rate with 168.3 while East Garo Hills shows lowest rate with 114..3.

(iii) Total Fertility Rates (TFR):

It is the total of the Age Specific Fertility rates for the entire reproductive age span. It shows the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of the reproductive period. The table indicates the total fertility rate of

the State as 4.2. The higest rate amongst the district indicate in West Khasi Hills with 5.0 and the lowest rate in East Garo Hills with 3.4.

(iv) Total Marital Fertility rate (TMFR):

It is the average number of children that would be born to a married woman if she excercises the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of the reproductive period. As per the table the Total Marital Fertility rate of the State is 4.5. West Khasi Hills and Jaintia Hills districts shown the highest rate with 5.3 each while East Garo Hills gives lowest rate with 3.5.

Various measures of fertility and mean age at marriage, 1991

Sl. No.	State/District	GFR	GMFR	TFR	TMFR	CBR	No of children ever born per woman in age group 45-49	Child woman ratio	Mean age at marriage
1	2	3	4	5	6	7	8	9	10
1.	**Meghalaya State**	**129.7**	**140.1**	**4.2**	**4.5**	**22.6**	**4.8**	**6.8**	**19.3**
2.	Weast Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
3.	East Garo Hills District	105.7	114.3	3.4	3.5	20.2	4.1	7.0	19.2
4.	South Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
5.	West Khasi Hills District	155.8	168.3	5.0	5.3	24.8	4.9	8.2	19.6
6.	Ri-Bhoi District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
7.	East Khasi Hills District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
8.	Jaintia Hills District	153.1	167.6	4.9	5.3	25.6	5.4	8.2	19.1

(v) Crude Birth Rate:

It is the ratio of the number of live births in a particular year to the mid year population of the same year, expressed per 1000 population. The Crude Birth rate of the State Shows as 22.6 and the highest rate with 25.6 is shown in Jointia Hills district while the lowest rate with 20.2 is shown in East Garo Hills district.

(vi) Number of Children Ever Born per Woman in age group 45-49:

This table presents the number of childredn ever born per woman in the aghe group of 45-49. From the table we find the average number of children ever born per woman aged 45-49 as 4.8 for the state. Jaintia Hills district gives highest number with 5.4 while East Garo Hills gives the lowest number with only 4.1.

(vii) Child Women Ratio:

It is the number of cfhildren in the age group 0-4 years per 1000 women in the age group 15-49 years. The table shows the child women ratio as 6.8 for the State. Both West Khasi Hills and Jaintia Hills give higher ratio with 8.2 each while Ri_Bhoi district and East Khasi Hills give lowest with 6.1 each.

(viii) Mean Age at Marriage:

It is the mean age at marriage of currently married women during the decade. The mean age at marriage for the state indicates 19.3. In the district level the mean age at marriage shows higher in Ri-Bhoi district and East Khasi Hills district with 19.9 each while it is low in West Garo Hills and South Garo Hills with 18.7 each.

Annexure-IV

Migration

Migration is one of the important aspects in the field of population studies. A community or country can gain population either by births or by inmigration. It can lose population by deaths of the members of the population or by outmigration. Migration is, therefore, like births and deaths, is a

major factor in changing the size and structure of the population. It effects the areas to which the migrants move and from which they move out. As stated in Annexure-II, in the census of India, migrants are classified only by place of birth and place of last residence.

Migrants by place of birth, 1991

Birth place	Meghalaya	Ri Bhoi
1	2	3
Total Migrants	267682	119,358
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	141304	54,141
	(52.8)	(45.4)
Born in other districts of the state of enumeration	27429	13,829
	(10.2)	(11.6)
States in India beyond the state of enumeration	78895	43,041
	(29.5)	(36.1)

Migrants by place of birth, 2001

Birth place	Meghalaya	Ri Bhoi
1	2	3
Total Migrants	358,447	41,749
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	209,891	20,975
	(58.6)	(50.2)
Born in other districts of the state of enumeration	44,108	11,858
	(12.3)	(28.4)
States in India beyond the state of enumeration	92,088	8,200
	(25.7)	(19.6)

From the table it is noticed that at both state and districts levels, the highest proportion of the migrants have their place of birth within the district of enumeration followed by those whose place of birth is in other state of India beyond the state of enumeration. At state and district levels the proportion of those whose place of birth is within the districts of enumeration is 58.6 % and 50.2 % respectively. The proportion of those whose place of birth is in other districts of the state of enumeration form 12.3 % of the total migrants at state level and 28.4 % at district level.

It is further noticed that the district level proportions of the migrants whose place of birth is within the district of enumeration are lower than those at State Level while those born in other district of the State of enumeration are higher than those at the State level.

Migrants classified by place of last residence - 1991

Place of last residence	MEGHALAYA	Ri Bhoi
1	2	3
Total	266,844	117,259
	(100.0)	(100.0)
Elsewhere in the district of enumeration	156,563	59,505
	(58.7)	(50.7)
In other districts of the state of enumeration	26,301	11,962
	(9.9)	(10.2)
States in India beyond the state of enumeration	70,318	38,601
	(26.4)	(32.9)

Migrants classified by place of last residence - 2001

Place of last residence	MEGHALAYA	Ri Bhoi
1	2	3
Total	379,192	44,355
	(100.0)	(100.0)
Elsewhere in the district of enumeration	244,916	26,403
	(64.6)	(59.5)
In other districts of the state of enumeration	41,572	10,131
	(11.0)	(22.8)
States in India beyond the state of enumeration	83,082	7,296
	(21.9)	(16.4)

Like the proportion of the migrants by place of birth, the highest proportion of the migrants by place of last residence at district levels had their place of last residence elsewhere in the district of enumeration followed by the proportion of those whose place of last residence was in other districts of the States of enumeration. The proportion of those whose place of last residence was in other State of India beyond the state of enumeration are 21.9 % at State level and 16.5 % at district level. The proportion of those migrants whose place of last residence was outside India form only little over 2.0 % of the total migrants at state level and a little over 1.0 % at district level.

It is further noticed that the district level proportion of migrants who had their place of last residence elsewhere in the district of enumeration are lower than that of State Level while the proportion in other districts of the state of enumeration are higher than that at State level. The state level proportion of those migrants in other state of India beyond the state of enumeration are higher than that at district level.

Annexure - V

Religions

Religions are one of the most important social institutions. It is also one of the basic characteristics of the population. It has tremendous power to influence the cultural traits and social behaviours of a society. For this reason, it has been one of the field of interest of anthropologists, demographers, administrators and planners. To meet the various requirements of the aforesaid professionals, it has been customary in population census to collect the religion professed by the population. But since India is a secular nation where an individual can professed and practice any religion of his choice, the number of religion collected in census runs to hundreds. It is however, not feasible and practicable to present data on all religions and their denominations. Therefore, in census the population is classified by six major religions only. Those major religions are Hinduism, Islam, Christianity, Sikhism, Buddhism and Jainism. The rest of population professing and practicing religions are grouped under "Other religions and persuasion". The population who cannot or do not wish to state their religions are clubbed under "Religion not stated".

Percentage distribution by religion

Religious communities	1991				2001			
	Persons	Percentage			Persons	Percentage		
		Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8	9
Ri Bhoi *								
All Religions	127,312	100.0	100.0	0.0	192,790	100.0	93.2	6.8
Hindus	17,148	13.5	13.5	0.0	29,117	15.1	13.9	1.2
Muslims	572	0.4	0.4	0.0	1,306	0.7	0.6	0.1
Christians	100,076	78.6	78.6	0.0	153,682	79.7	74.4	5.3
Sikhs	66	0.1	0.1	0.0	180	0.1	0.1	0.0
Buddhists	193	0.2	0.2	0.0	151	0.1	0.1	0.0
Jains	4	0.0	0.0	0.0	19	0.0	0.0	0.0
Others	8,621	6.8	6.8	0.0	7,175	3.7	3.5	0.2
Religion not stated	632	0.5	0.5	0.0	1,160	0.6	0.6	0.0

From the above table, it is noticed that the majority of the population of the district are Christians. At State level, the Christians constitute 70.3 % while at district level is 79.7 %. Hindus constitute little over 13.00 % of the population at state level while at district level it constitute little over 15.0 % . The Muslim, the Buddhists, the Sikh the Jain form an insufficient percentage of the population at both state and district level. The proportion of those populations who profess "Other religions and persuasions" gives 11.5 % and 3.7 % at state and district levels respectively.

Annexure – VI

Marital Status

Though not all the married couples can produce children, fertility is the outcome of marriage. Without marriage there cannot be fertility. Various indicators of fertility discussed at Annexure – III can be calculated only by taking into consideration the number of married female and the number of children born in the year. Therefore, it is essential and important that in every census the marital status of each and every individual irrespective of age and sex is collected. On the basis of return thus collected, the population, both male and females, is classified into four marital status. These four marital status are Never Married, Married, Widowed and Divorced/Separated.

Percentage distribution of population by marital status, 2001

Area Name	Age-group	Total		Never married		Married		Widowed		Divorced/Separated	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12

	40-44	100.0	100.0	4.9	2.4	90.9	83.4	2.3	9.4	1.9	4.9
	45-49	100.0	100.0	3.2	1.9	90.1	79.7	3.9	13.5	2.9	4.9
	50-54	100.0	100.0	3.1	1.3	89.4	66.9	4.3	24.7	3.3	7.1
	55-59	100.0	100.0	2.6	1.2	87.8	67.4	5.7	27.3	3.9	4.1
	60-64	100.0	100.0	3.2	2.2	84.3	49.1	8.0	42.2	4.5	6.5
	65-69	100.0	100.0	2.9	1.7	78.9	43.9	12.7	48.7	5.4	5.7
	70-74	100.0	100.0	5.0	2.4	74.1	34.8	14.4	58.2	6.5	4.6
	75-79	100.0	100.0	4.2	3.2	79.7	32.4	11.7	60.0	4.4	4.4
	80+	100.0	100.0	7.4	5.2	67.3	30.3	18.6	60.7	6.7	3.8
	Age not stated	100.0	100.0	74.2	75.7	25.2	20.6	0.6	2.2	0.0	1.5
	Less than 18	100.0	100.0	99.7	98.4	0.3	1.6	0.0	0.0	0.0	0.1
	Less than 21	100.0	100.0	98.7	93.7	1.3	5.9	0.0	0.1	0.0	0.3

Note : Total will not add up to 100.00 as "Unspecified" marital status is excluded

From the above table, it is noticed that the marital status of cent percent of male and female population upto 9 years of age is "Never Married" which shows that the child marriage is not practiced in the district. The Never Married population constitute the majority of the population of both sex followed by the Married population. The widowed and Divorced/Separated populations form a very insignificant proportion of the district.

By age group, it is noticed that the highest proportion of the married males is in the age group 40 – 44 while the proportion of female is in the age group 30 – 34 and the lowest for both males and females is in 10 – 14.It is also noticed that the widowed females are more than widowed males almost in all age groups. The highest proportion of the Divorced/Separated males is in the age group 80 + while that of females is in the age group 50 – 54.

Annexure – VII

Age, Sex and Education level

With a view to finding out the extent of literacy of the population, it has been a practice in census to ask of all those aged 7 and above, whether or not they are literate, that is whether or not they can

both read and write with understanding in any language, besides asking about the age and sex of each individual. Those of the population who are literate, another question about their educational attainment are asked of. On the basis of the replies to those two questions, the population is classified into literate and illiterate and the literate are further classified by age and sex and educational levels.

(i) Literate without educational level.
(ii) Below Primary
(iii) Primary
(iv) Middle
(v) Matric/Secondary
(vi) Higher Secondary/Intermediate/Pre-University/ Senior Secondary
(vii) Non-Technical Diploma or Certificate not equal to Degree
(viii) Technical Diploma or Certificate not equal to Degree
(ix) Graduate and above.

For the purpose of this annexure, however items (vi), (vii) and (viii) are clubbed together.

From the above statement, it is noticed that the highest proportion of both the male and female literates, more than 47.0 % and 50.0% respectively have 'Below Primary' as their education level followed by the proportion of those with 'Primary', 'Middle' and 'Matric/Secondary' gradually descending manner. It also noticed that the proportion of female literates are little higher than that of their male counterparts in 'Primary' as in the 'Below Primary level. The literate 'Without Educational Level'. 'Higher Secondary/P.U. etc', and 'Graduate and above' could form little above 10.0% of the literates of the district.

By age, the highest proportion of literates both males and females with above 95.0% and 97.0% respectively are found among the age of 8 years in the education level of 'Below Primary'. The highest proportion in the educational level of 'Primary' is shown in the age of 15 years among males while it is in the age of 14 among female literates. In the 'Middle' the highest is indicated among the age of 17 years and 'Matric/Secondary' in the age group 20-24 while 'Graduate and above' in the age group 25-29.

Annexure – VIII

Mother Tongues

Though besides the mother tongue of an individual, two other languages known by an individual is collected in census, tabulation and presentation of language data is base on the mother tongue of an individual. By definition, mother tongue is a language spoken by a person's mother to the person in his childhood. If the mother died in infancy, the language mainly spoken in person's home in childhood is the mother tongue of that person. In case of infants and deaf-mutes, the language usually spoken by the mother is the mother tongue.

India is a multi-lingual nation, collection of the mother tongue of each and every individual in various censuses has thrown light on the linguistic and ethnic composition of the country as well as the states. In India there are 18 scheduled languages and 96 non-schedule languages. Even in a small state like Meghalaya more than 80 non-scheduled languages are spoken in addition to the 18 scheduled languages. However, for the purpose of this annexure, we are presenting only those biggest mother tongues arranged in descending order irrespective of the languages being scheduled or non-scheduled. The statement given below shows the percentage distribution of the numerically biggest languages arranged in descending order of the number of speakers in district.
