Bridge over Simsang River at Baghmara

A small yet growing town standing on the bank of the Simsang River just before it flows into Bangladesh, to be christened as the Someshwari. Baghmara was earlier known as Bong Bazar afater the name of Bong Laskar. It used to be a flourishing market during the pre-partition days, where the manifold produces of the southern slopes of Garo Hills used to find a good market outlet. Exquisitely tasty Simsang-River-fish makes Baghmara a gourmet's delight. The legend says that Balman Sangma, popularily known as Bong Laskar bare handedly fought the tiger and killed, since then the palce has been named Baghmara.

Baghmara is now the headquarters of the South Garo Hills District. Baghmara and its environs are well known for the rare carnivourous pitcher-plant, which is locally known in Garo as Memang Koksi. Baghmara, the birthplace of Captain Williamson A.Sangma, the founder Chief Minister of Meghalaya is the Socio-cultural hub of the Garos of South Garo Hills and is the principal growth centre of the area. Baghmara is 108 kilometres off Tura on the Tura-Baghmara-Moheskhola-Shillong Highway. It is also connected with Dudhnoi in Assam by the Dudhnoi-Damra-Nangalbibra-Siju-Baghmara State Highway. Baghmara-certainly a place to be remembered in Meghalaya.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme, Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tehsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic

amenities available in the villages and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif highlighting significant characteristic of the district and analytical notes as annexure. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri N.K. Laskar, Director of Census Operations, Meghalaya. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Directory of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. It is also the only publication that presents census data at village level in rural areas and ward level in urban areas. It is also the only publication that presents non-census data in the form of Village Directory and Town Directory at village level and town level respectively. Here, lies the usefulness of the Handbook for micro and grassroot level planning for rural development. Therefore for administrators, planners, research scholars and other data users the Handbook is a sine qua non.

Though Census is a central subject, it is being conducted by the administrative machinery of the State Government under the technical guidance of the Director of Census Operations. It is the State Government who appoints the hierarchy of Census Officers from the rank of Deputy Commissioner of a district designated as Principal Census Officer down to Primary School Teachers and other low rank government employees designated as Enumerators. It is this team of Census Officers who actually conduct the Census Operations. I am, therefore, very grateful to the Government of Meghalaya with special reference to Shri. J. Tayeng, IAS Chief Secretary to the Government of Meghalaya, Shri A. Som, IAS, Secretary, General Administration Department and a hosts of other officers who have made the entire district administrative machinery available to the Census Organization.

I am also grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India, Shri S.P. Sharma, Consultant and other officers in the O/o, The Registrar General of India, for their timely advice and prompt co-operation whenever needed.

In this office I am grateful to Shri. B.L. Sharma, Dy. Director of Census Operations, Shri S.K. Baruah, Asstt Director of Census Operations, Shri A. Roy Choudhury, Asstt. Director of Census Operations, (Technical) Shri B. Marbaniang, Shri L.R. Lyngdoh, SI-I, Shri C.D. Sangma, SI-II and other officials without whose hard, sincere and painstaking labour and toil the conduct of the 2001 Census would not have been a success.

N.K. Laskar
Director of Census Operations,
Meghalaya, Shillong

District Highlights 2001 Census

1. South Garo Hills District is the smallest district in term of area and population in the State.
2. South Garo Hills is one of the least urbanised districts in the State, which is about 8.6 % of the district population, while one fifth of State's population lives in urban areas.
3. In terms of population per Sq. Km. South Garo Hills is the least density populated district in the state.
4. South Garo Hills is sixth in Sex Ratio (942) which is less than the State Sex Ratio (972).
5. Baghmara C.D.Block is having the highest population (45529), while Rongara C.D.Block is having the lowest population (17514) in the district.
6. In terms of size Baghmara C.D.Block is the largest Block while Rongara is the smallest block in the district.
7. Chokpot C.D.Block is having the highest number of villages and Rongara C.D.Block is having the lowest number of villages in the district.
8. The economy of the district is mainly dependent on agriculture. Out of every 100 workers in the district, 74 persons are engaged in agricultural sector.
9. 13.4 percent of the total Households in the rural areas of the district availed electricic power facility for lighting. Baghmara C.D.Block is having the highest number of Households availed electricity power for lighting in the rural areas.
10. Village Nongalbibra is the most populated (1553) and Boldam Songkni (2) is the least populated village on the district.
11. The condition of Census houses in the rural areas of the district is comparatively low, 36.6 percent of total households live in good condition, 59.6 percent live in livable condition and 3.8 percent live in the dilapidated condition.
12. Percentage of households by type of houses in rural areas of the district are (i) Permanent type of houses 4.7 %, (ii) Semi permanent 22.5 %, (iii) Temporary which is serviceable 2.4 % and (iv) Temporary (not serviceable) 70.3 %.
13. Percentage of households by type of latrine in the rural areas of the district are (i) Service latrine 10.5 %, (ii) Pit latrine 34.7 %, (iii) Water closet 2.1 % and (iv) Not having latrine are 52.9 %.
14. Percentage of households by type of fuel used for cooking in the rural area of the district are (i) Firewood 96.9 %, (ii) LPG 0.1 %, and (iii) Kerosene 0.6 %.
15. Percentage of households by having types of assets in rural areas of the district are (i) Radio/Transistor 36.0 %, (ii) TV 7.1 %, (iii) Telephone 0.4 %, (iv) Bicycle 8.8 %, (v) Scooter/Motor Cycle/Moped 2.2 %, (vi) Car/Jeep/Van 0.9 and (vii) None 59.8 %.
16. Out of the total number of Household in the district only 11.9 percent availed banking facility. In the urban areas 41.3 % of the population availed banking facility while only 8.9 % of the household living in the rural areas availing this facility.

	Males	2,13,227	37.5	8,353	31.5
	Females	96,990	24.1	6,458	15.3

Definition of Census Town :

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns:

i) A minimum population of 5,000

ii) At least 75 percent of the male working population engaged in non-agricaltural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Publication of the District Census Handbook was started after the 1951 Census and has been continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State/UT Governments. It inter alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain basic amenities/ facilities in each village and town of the respective district. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The 1951 series of the District Census Handbook incorporated some basic demographic and economic information of the district at the village and town levels separately in addition to some important tables on census data.

Unlike the 1951 District Census Handbook, the 1961 District Census Handbook was made to cover village-wise and town-wise information on the availability of different amenities such as educational facilities, supply of drinking water, supply of electricity, etc. shown by means of abbreviations placed against the name of each village/town in the Primary Census Abstract itself.

In 1971 the District Census Handbook was divided into three parts. Part A contained Village and Town Directory, Part-B contained Primary Census Abstract and Part-C contained Analytical Report, Administrative Statistics and District Census Tables. Part-C was not published in many states/union territories including Meghalaya.

The scope of the 1981 District Census Handbook had been enlarged specially by inclusion of additional information on amenities like existence of kutcha/ pucca roads, distance from the nearest town, land-use data and special Primary Census Abstract for Scheduled Castes and Scheduled Tribes at C.D. Block/Town levels which was another innovation introduced in the 1981 series.

The manner of presentation of the District Census Handbook for the 1991 Census was by and large the same as followed in 1981. However, the format for presenting data in Primary Census Abstract had been restructured slightly in the 1991 Census by incorporating nine-fold Industrial Classifications of main workers against four-fold Industrial Classifications presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was presented in the Primary Census Abstract for the first time.

The scope of the 2001 District Census Handbook has been enlarged by incorporating nine appendices to Section-I of Part-A against four in the 1991 District Census Handbook. Those additional appendices display the list of villages by number of Primary Schools, the list of villages by number of Primary, Middle and Secondary Schools, the list of villages with different sources of drinking water facilities available, the list of villages with 5000 and above population which do not have one or more basic amenities, the list of census towns which do not have one or more amenities, summary showing the number of villages having or not having Scheduled Castes/Tribes population, C.D. Block wise number of villages under each Gram Panchayat and statement showing the number of girls' school in the villages. Analysis of data of the 1991 census on fertility, mortality, migration, religions, marital status, languages, etc. have also been included as annexures to the Primary Census Abstract.

(ii) Brief History of the District

The British Government with Captain H J Peet as the Deputy Commissioner of the Garo Hills decided to have a firmer grip on the Garos by imposing

House Tax on the hill of Garos and Land Revenue on the plains people. For this purpose, in 1878, the British Government created four Hill Mauzas with one Mauzadar in each Muaza for assessment and collection of House Tax, and appointed two plain Muazadars for the plain Mauzas with a commission for collection of land revenue.

Reverend Rangku W. Momin was the first Hill Mauzadar appointed by the British Government in 1878, and as such, was deputed to Mauza No-1 with Rewak, near Baghmara,as his head headquarters. Seeing his deep conviction in the Christian Faith and his commitment to spread it far and wide, the Deputy Commissioner gave him a free hand to spread the Gospel while performing his secular duties. By this time, the British Government in Garo Hills was convinced that it was not through sheer force but by the love of Christ that the Garos can be won over to begin a more civilized and mordern way of living. It may be mentioned that prior to the arrival of Christianity, the Garo practicised head hunting in which they would cut out the head of their opponents and preserve it as a trophy.

Immediately after he was appointed as the Mauzadar of Mauza No-1 in 1878, Reverend Rangku proceeded to rewak to establish his office and a house for himself. There already existed a Police outpost at Rewak and on his arrival he was welcomed by the police personnel. The Nokma and the Laskar of the Elaka, Binu Laskar took Rangku Mauzadar along with him during his official tours and introduced him to Balman A Sangma (Bong Laskar) who was a Nokma of Siju village. However, Binu Laskar died that same year and the Nokmas of that Laskar Elaka elected Balman A. Sangma as the new Laskar who became one of the most famous Laskar of Garo Hills and a lifelong follower of Rangku Mauzadar.

As Government officials, both Rangku Mauzadar and Bong Laskar had to send letters to and receive plans from the DC, Tura. The nearest post office was at Sasung-Durgapur located at Mymensing of present day Bangladesh, a distance of forty kms with the only mode of transport being on a dug-out boat that moved through the Simsang river. It took the two of them two days to go to and fro from Sasung-Durgapur. That was also the only bazar for the Garos of Siju areas to purchase their essential commodities and to dispose their jhum and other jungle products. On Many of their voyages along the Simsang river in their dugout boats, Rangku, Bong and the other Garos would halt for the night at either Bolsal A'ding or Konagittim, two different localities of present day Baghmara town. During these halts, Rangku used to suggest to Bong to come and settle down in these swampy plain areas and convert them into permanent agricultural lands with establishment of Schools, Churches, markets around. Moreover, Susung-Durgapur and other towns of Mymensing were only a couple of kms away from here. Though Bong Laskar was illiterate and had no idea about wet cultivation, but by this time, Bong Laskar had complete trust and confidence on the wisdom and ideas of Rangku Mauzadar and so they decided to move down along with their families and settle down in what is now modern day Baghmara town. Bangjan Momin who also met the two often would attentively listen to their discussions on the question of this new settlement and very soon he also expressed his willingness to be a party to this news adventure.

Shortly after their decision to settle down at Baghmara, Bong Laskar built a house for him and his wife and another house for his daughter and son-in-law and moved down in the summer of 1879 in what is now Konagittim. Rangku Mauzadar, on completion of his official works, also moved down during winter to the present locality of Bolsal A'ding the same year. Bangjan and his family came over to begin a new life a couple of months later in 1880 in what is now known as Wa'gesik.

A weekly market was also set up in 1886 at Baghmara which was known to the Garos as Bong Anti . Gradually a post office was also established at the bazar with Rongding Sangma being its first post master.

Bong Laskar is remembered till today because it is due to him that the place was named Baghmara. In 1886 Bong was attacked by a tiger that had been killing number of cattle in the area Bong along with Jengran Raksam Marak came across the tiger and legend has it that he bare handedly fought against the tiger until Jengran finally speared the animal to death. Since then the place has been known as Baghmara.

Creation of the District

Prior to 1976 the entire Garo Hills was the only district in the Western part of State of Meghalaya. The Garo Hills District was divided into two districts in October 1976, West Garo Hills District with Tura as headquarter and East Garo Hills District with headquarter at Williamnagar vide Notification No. HPL.399/75/140 dt.09.10.1976. In June, 1992, West Garo Hills District was further bifurcated and created one new District namely South Garo Hills by upgrading the Baghmara Sub-division in to the district with headquarter at Baghmara vide notification No. HPL 275/84/141 dt. 18.06.92.

The name of then entire district of the Garo Hills was given after name of its predominant inhabitants called the Garos. The names of the districts so far created in the undivided Garo Hills District were given on basis of their geographical locations in the map. Accordingly, the districts located in the Western part, Eastern and Southern part of the original Garo Hills district are known as West Garo Hills, East Garo Hills and south Garo Hills respectively. Till June, 1992, the area of the present district of South Garo Hills was a Civil Sub-division which was created vide Govt. Notification No. HPL 399/75/157 dt. 03.12.1976 with headquarter at Baghmara Town under then West Garo Hills District. In June, 1992, this Civil Sub-Division was upgraded into the District which was named as South Garo Hills District.

The District has three community Development Blocks and one town in 2001, Baghmara the District headquarter is the only town of the District. The Civic status of Baghmara town was upgraded to Municipal Board from the Town committee vide Notification No. UAM 188/92/73 dt. 20.03.1995. The names of Community Development Block are

(1) Chokpot

(2) Baghmara and

(3) Rongara.

People

A great majority of the people of the district are the Garos. Other inhabitants next to Garos are Rabhas, Hajongs, Koch and Dalus.The Garos call themselves Achik-mande (achik = hill, mande = man) The Garos belong to the linguistie stock called by the ethnologists the Tibeto-Burman. They have close linguistic affinity with tribal races inhabiting the plains of Assam, the Cachar hills and part of Tripura. Major Playfair strongly defend that Garos bear the strongest resemblances linguistically as well as physically to the Kacharis. However, Grievson, in his linguistic Survey of India clubbed into a single stalk called Bodo. S.K.Bhuyan (ed), in his book ' An Account of Assam ' quoted " Its inhabitants, the Garos are a section of the great Bodo race which one time occupied much of the Brahmaputra valley, but which probably was driven into the hills by the early Hindu invaders from Bengal. However the original home of the Garos is not known. They themselves believe that their original homeland was in Tibet.

The Garos the main dominant tribe in the district have followed the matrilineal lineage since time immemorial. Under this system mother is the generator of the clan. The children inherit the title of the mother. All the property both movable and immovable belong to her, not only children but also every possession of the children belong to her. There were originally three main clans among the Garos namely Sangma, Marak and Momin but in course of time two more clans, namely Areng and Shira were added. It may be pointed out that women empowerment have no place at all in the much touted "grass root democratic" tribal administrative institution like Nokmaships in the district which are male dominated.

Majority of Garos profess only two beliefs, that is they are either Songsareks or Christians.

The Garos normally do not use many ornaments. The common ones are strings of beads and earings worn both by men and women. Necklaces are also used by both men and women earings are known as shisha.

The Garos (both sexes) wear turban on their heads. These turbans are of dark blue cotton while some are white. On festive occasions all the family heirlooms including the fine clothes and ornaments for men and women are taken out. Rice is the main staple food. They also eat Millet, Maize and Tapioca. Rice beer is also used as a drink.

Festival

Among the festivals, Wangala is the greatest festival. It is known as celebration of thanksgiving

Source : " The Assam Tribune " dt. 02.08.04

after harvest. It is celebrates in October of each year. Feasting including food and rice beer followed by colourful dance of both men and women in best traditional clothes and beating of drums and songs are the main attraction of this festival.

(iii) Administrative Set Up

The Deputy Commissioner is the head of the district administration. Under the Deputy Commissioner there are the following executive officers one Additional Deputy Commissioner one Sub-divisional Officer (Sadar) two EACs one Deputy Director of Supply one Deputy Superintendent of Excise, one Enforcement Inspector (Revenue) one Inspector of Supply and one District Transport Officer.

There is no Civil Sub-division except Sadar Sub-division in the district.

The Deputy Commissioner's office is divided into a number of important branches, among them the General or Establishment Branch, the Development and Planning Branch, the Nazarat Branch, the Registration Branch and other Branches in charge of Supply, Housing, Elections, Community Development Block as well as the District Selection Committee. The law and order maintenance in the District is the major part of their functions.

The Administrative Unit below the district C.D.Blocks were treated as the unit of the administrative set up. The Block Development Officer (BDO) is the administrative head of each C.D.Block area. There is an office at each Block headquarter. All BDOs are accountable to the Deputy Commissioner of the District.

The Block Development Officer (BDO) functions as the secretary of Block Development Committees. The B.D.O. is assisted by the Extension Officers in-charge of Agriculture, Veterinary, Animal Husbandry as well as by Social Education Organiser and Gram Sevaks. Each Block office is responsible for implementing various community development programmes undertaken by the Govt. for the improvement of rural economy.

The names of C.D.Blocks/Towns within the District are as follows

Name of District/C.D.Block/Town		Area in Km ^{2}	Headqurter	Date of Creation	Total number of Villages/Wards	Number of Inhabited Villages	Number of Uninhabited Villages
1		2	3	4	5	6	7
South Garo Hills District	T	1850	Baghmara	18.06.1992	627	595	32
	R	1841.2					
	U	8.8

Rongara C.D.Block	R	587	Rongara	03.10.1980	120	110	10

There is no jurisdictional changes in any administration units in the District/C.D.Blocks after 1991 Census. Only Baghmara town committee was upgraded to the Municipal Board vide Govt. Notification No. UAM 188/92/73 dt. 20.03.1995.

Local Self Government

There is no Panchayat/Gram Panchayat System in the rural areas of District, as Panchayat Act was not implemented so far in the whole state since its inception. However, the District Councils administration set-up had been constituted in accordance with the provision of the Sixth Schedule to the constitution of India and Rules framed thereunder to safeguard the rights and interest of the tribal people within its juristic as enjoined under the constitution of India. They were autonomous bodies elected on the basis of adult suffrage. There were three District Councils in the

state namely Khasi Hills Autonomous District Council, Jaintia Hills Autonomous District Council and Garo Hills Autonomous District Council. Each District Council has 30 members including one number nominated by the Governor. The 29 members have been elected through adult francies. Accordingly the Garo Hills Autonomous District Council came into being in 1952. A short description of the council is given below.

At present, the jurisdiction of the District Council is the entire geographical area of the Garo Hills (West Garo Hills, East Garo Hills and South Garo Hills Districts) across the District barrier the administration is carried on the executive committee constituted under the Autonomous District Council Rules. The Executive Committee headed by chief executive member elected from among the members of the council, includes five executive members who are appointed by the Governor on the advice of the Chief Executive Member. The Chairman and the Deputy Chairman are also elected from among the members themselves. There is a Secretary to the Executive Committee who is responsible for supervision of the administrative work of District Council. In short in respect of the internal administration of the district they may be compared to the Minister of the State Govt. in that they are elected to the Council and have particular subjects under their charge. The major subjects assigned to the Council are : Forests, Civil works, Taxation, Revenue, Judicial, Transport, etc. The subject of administration of Primary Education had been taken over by the State Govt. through an Act passed by the State Legislature.

Below the District Council, administration set up Village Council for each village or groups of villages consisted of not less than six and not more than ten members, half of them are nominated by the Executive Committee of the District Council and the other half elected on the basis of adult suffrage, is there to deal with all matters relating to the village. Among them, allotment of land for cultivators, Social works, settlement of disputes among the villagers, collection of tolls, local taxes, etc.

Broadly speaking, the Sixth Schedule guaranteed the exercise of a wide degree of autonomy to the Districts with the dominated tribal population, although the District Council had taken ones much of responsible of the old administrative set up the Deputy Commissioner as the local functioning of the State Govt. remain at the helm of the district administration.

Local Self Govt. in Urban areas

The System of Local Self Govt. in Urban areas was also under District Council. Baghmara Town Committee was there upto the March, 1995 but after constitution of Baghmara Municipal Board, in March 1995, it was under the administration of the Civil Sub divisional officer and subsequently under the administration of the Deputy Commissioner, as there was no election for constitution of Municipal Board.

Other Departments in the District

There are other Departments such as Agriculture, Animals Husbandry and Veterinary, Co-operative, Education, Employment, Forest, Industries, Public Works, Public Health Engineering Publicity and Information, Social Welfare, Town Planning, Weight & Measures, Health & Family Welfare, Social Welfare, Fisheries, Labour, Economics & Statistics, Transport, Sericulture and weaving, Tax, Police etc to look after their affairs and to carry out different departmental developmental activities in different area at the district.

(iv) Physical Features

Location and Size: South Garo Hills District is located in the South-Eastern corner of the Western Part of the State of Meghalaya. It is bounded by East Garo Hills District on the north, on the West by the West Garo Hills District and on the East by West Khasi Hills District of the State of the Meghalaya, but on the South it is bounded by international boundary of Bangladesh.

It lies between 25° 09 ' North to 25° 32 ' North Latitudes and 90° 17 ' East to 90° 58 ' East Longitudes.

This new district was carved out from the district of West Garo Hills District after 1991 Census.

The total area of the district is 1850.0 Sq Km; out of which 1841.20 Sq. Km and 8.80 Sq.Km are Rural and Urban areas respectively. Among the districts in terms of area, it was recorded 8.25 % to the total areas of the state and it ranks 7th and the last in terms of the area as well as in terms of size of population in the State.

Physiography

The District is characterised by dissected and rugged hilly terrain. As per Regional Division of India

(Series -1 Volume XV) Meghalaya, 1991 the district of South Garo Hills falls under a part of South Garo Hills with 91 villages of Chokpot Community Development Block and Someswari-Dareng Basin Sub-Micro Regions with 252, 147 and 107 of Chokpot, Baghmara and Rongara Community Development blocks respectively and one town under the Micro Region of Western Meghalaya of Macro Region of Northern Mountains. The entire district is conspicaous with low hills and plains. The northern part has series of hills whereas the southern part is more or less a plain area with the general slope towards the south. The southern part of this district forms an extensive plain area with the appreasance of a few monudnocus here and there.

There are several high peaks/hills having elevation of 200 – 1000 metre above the mean sea level in the district. Among the peaks, Chitmang (Kylas) peak (1025 M), Balphakran Peak (856 M), Dikonggiri (275 M) and Gawangdan (1011 M) are the most important peaks/hills of the District.

The entire districts is occupied by red and yellow soils except a narrow belt in the north which is formed with laterite soils. This region is characterised by dense mixed tropical vegetation. Scattered settlements is the main characteristic of the population pattern of this region. The inclusion of one only town in this region depicts the predominance of rural habitants in the district.

Drainage

The geographical formations, its resultant topography and tendency of headward erosion by rain water have led to the creations of drainage network in the District. The prevailing climate and environment in the District is characterised by heavy rainfall, which favour the action of streams to a considerable extent. The rivers in this district make two district systems separated by small hills. Most of the rivers have their origin in the northern upland area in Tura Range and flow towards the south becoming wider. Important rivers in the district are Dareng (Nitai), Simsang (Sameswari), Bugi (Bogai), Maheshkhola, Mahadeo etc. Among the rivers, Simsang is the largest river and navigable in 32 K.M. long in its course. Its principal tributaries are Ronga, Rongadik, Chibok and Ringdi etc. The river Dareng is also navigable in southern slope of the District. The main tributaries of this river are Rampa, Kakija, Daji etc.

There are some deep pools and falls in the District. They are Mrik, Matma, Kanchru Suk, Jamiiseng, Warisik, Bobra, Goka etc. In the Simsang river Warima, Ronjang, Bamon in the Dareng river, and Nosai Bandari, Warima in Bugi river. Another beautiful and noted water fall namely Imilchang Dare is located in Eman Sakgre, at a distance of 70 km from Chokpot of South Garo Hills district.

Climate

The South Garo Hills District is of comparatively low elevation among the constituent districts of the state of Meghalaya. The climate is accordingly much warmer than other districts of the State. Rainfall though inclined to be as heavy in June-July months of each year is also much less than in the other districts to the east. The mean monthly maximum temperature ranges from 18.60°C in January to 34.75° C in May. The coldest months in the district are December and January and June, July and August are the warmest months in the district. Winter season starts here in October and continues till the end of February. Fair weather are marked too and the diurnal range of temperature is reduced. This seasons is dry with about 20 mm of rainfall. The minimum temperature in the month of December, January and February ranges between 5.0° C to 7.0° C. The months of March, April and May are the period of Pre-monsoon season. The temperature begins to rise from the month of March. The frequency of storms increaser during these months. During the monsoon period, due to heavy rainfall, the weather is suitable for crops growing in the hilly and plain areas.

Flora and Fauna of the District

Flora

The majority of the forests area of this district falls under Tropical Moist Deciduous Forest Zone. These areas are rich in vegetation which ranges from tropical to temperature. Dense jungles clothe the higher summits. The valuable timbers, medical plants hard and soft woods of various types are found in these areas of the district. Sal, Teak are most important valuable timbers. In more or less open moist localities and near water sources, herbs like

Dictyospermum, Aneilema Scabunimum, Burman SP, Coix SP, Cyprus SPP, Oxalis Cornieulate, Anemone Spp and Erieeaulon etc can be seen. A botanic curio shrub Nepenthes Khasian grows in and around Baghmara. Several species of bamboo stretch for long distance forming thickets of secondary vegetation without any completion is also found. A few plants like Areca, Caryota, Pinanga and Didymosprema are also conspienous. In evergreen forest areas species of Alpinia, Amomum, Colocasia, Costus, Hedychium etc are found.

Fauna

Both terrestrial and aquatic fauna are found to be rich in this region of the district. The larger number of mammalian fauna includes the Hoolock Gibbon the stumptailed Macaque, Rlresns Macaque, the Assamese Macaques, the slow loris, the Golden Langur, the Capped Monkey, the Common Langur, the Tiger, the Leopard, the Clouded Leopard, the Golden Cat, the Leopard Cat, the Marle Cat, Indian Fox, varities of Squirrel etc Different species of Bats are also found in this region. Different species of snakes, frogs are found in this region. This region is rich in fish fauna also. Commercially important groups include major carps (Labeorohita, L.conius, L Calbasu, Mrigala etc) minor carps (Barilius bendalisis, B fauna, B.tileo, etc)

Economic Resources

Economic resources are the major sources of states income and also for providing employment avenues in various sectors. Economic development depends upon the exploration of the economic resources and their utilisation in right direction with proper planning and policies. Broadly speaking the economic resources are the parameter or yard stick of economic developmental activities carried out in

Percentage contribution of the district to the state total of Gross Domestic Product (sector-wise) at the current prices during 1993-94 to 1998-99.

Sl. No.	Sector	During the year					
		1993-94	1994-95	1995-96	1996-97	1997-98	1998-99

Source:Meghalaya district Gross Domestic Product 1993-94 to 1999-2000 published by Directorate of Economics & Statistics, Meghalaya in 2003.

the district as well as in the state. The District Domestic Product (year-wise) reflects the trend how district contributes to the state total domestic product. Accordingly, the Statement-1 showing the percentage of contribution of the district to the state total of crops Domestic Products at the current price during 1993-94 to 1998-99 is given below for giving reference of it in the on going discussion on different economic resources in the district. This statement will be helpful in highlighting the observation on contribution of each economic resource to the state economic scenario achieved during 1991 to 2001 Census.

Forest

Forest is the most important renewable economic resource in the district as well as in the state Forest provides mainly timber, fuel wood and medicinal produce to the people, fodder to the livestock, Supply raw materials to the forest based industries and also supply materials for construction of houses, leridges, fences etc and thus contribute to the states income and provide employment etc.

The total land under forest as estimated by the State Forest Department is 1,01,716 hectares for the district of South Garo Hills i.e. constituting 54.99 percent of the total district geographical area (1,85,000 hectares). The forest areas are under the control of both State Forest Deptt. and District Council. The District Council has control on major part of the total forest areas of the district. The forest produces are sold by the State Forest Deptt. with payment of royalty both to the District Council and to the Nokmas in case of unreserved forest areas. From the Statement-1 given above it is observed that the percentage of contribution in the Forestry and Logging Sector to the States total of gross Domestic product varies from 10.66 percent to 10.73 percent during 1993-94 to 1998-99. Among the forest produces Pine, Sal, Teak, Gamari Agar (Aquilania agalocha), Titasopa are important and valuable timbers. Varieties of Bamboo, Broom stick, Orchids, Tezpata, Ritha, Neem and Pine dhur wood are other important forest produces. All these forest produces are exportable to the different states as well as to different countries Sand and bolders are also abundantly available in the district. These two produces are exported to Bangladesh.

The name of National Park, Sanctuaries and Reserve Forest areas under forest areas with areas and Notification No. and date located in the district are given below :

	Area in km²	Notification No with Date
National Park		
1. Balpakran	220.00	No. FOR 103/84/354 Dt. 15.02.86
Sanctuaries		
1. Siju Wild life	5.18	No.MGF 66/4 dt.30.03.79
2. Baghmara pitchar Plant	0.02	No. FOR 79/84/15 dt. 24.05.84
Reserve Forest		
1. Baghmara R.F.	43.91	N.A.
2. Angretoli R.F.	30.11	N.A.
3. Rawak R.F.	6.47	N.A.
4. Emangiri R.F.	8.29	N.A.

Mineral and Mining

Mineral deposits are unique and non-renewals. The Principal mineral deposits explored in the district are coal and limestone. Limestone deposits are found monstly Siju-Artheka region which located in the North of Baghmara.

Another important mineral is found in the district is coal. It is a major revenue earning mineral for the district. The name of the region of limestone and coal deposits with probable reserve is given below.

Name of Mineral	Name of Region	Reserves indicated By G.S.I.	Production during 1999-2000 indicated By Statistical Office Baghmara
Limestone	Siju-Artheka	229 million tones	29,000 M.T.
Coal	1. Siju	125 million tones	
	2. Pendengru Balphakran	107 million tones	907000 M.T.

Glass Sand

Glass Sand is found in new Siju by D.M.R., Meghalaya. The reserves is not estimated. It is quite suitable for manufacture of glass. The exploration is not yet started in these area. After exploration of this item it will help in setting up of Glass Manufacturing Industries in the district.

It is observed from the Statement-1, that it contributes 18.50 percent to the state total gross domestic product in 1998-99. In 1995-96, it recorded highest contribution of 25.99 percent to the state total domestic products.

Agriculture

Agriculture Sector has also played important role in the rural economic development in the district.

Cropping pattern

The cropping pattern for the year 1999-2000 as published by the Directorate of Agriculture, Meghalaya is given below :

Sl. No.	Name of crops	Area (in Hectare)	Production (in Metric Tonne)	Yield (in Kg/ Hectare)
1	2	3	4	5
1.	**Rice**			
	a) Autumn	4,865	4,035	831
	b) Winter	3,907	6,115	1,565
	c) Spring	273	482	1,766
2.	**Wheat**	-	-	-
3.	**Maize**	873	876	1,003
4.	**Other Cereals & Millets**	**231**	**122**	**528**
5.	**Pulses**			
	a) Tur (Arhar)	100	77	770
	b) Gram	23	14	609
	c) Other Rabi Pulses	208	173	832
	Total Foodgrains	**10,471**	**11,894**	**1,136**
6.	**Oil Seeds**			
	a) Eastor	-	-	-
	b) Sesamum	169	89	527
	c) Rape & Mustard	257	180	700
	d) Soyabean	8	10	1,250
	e) Linseed	-	-	-
	Total Oilseeds	**434**	**279**	**643**
7.	**Fibre Crops**			
	a) Cotton*	307	284	157
	b) Jute **	376	1,381	661
	c) Mesta**	1024	4699	829
8.	**Other Crops**			
	a) Suger Cane	6	18	3000
	b) Tobacco	92	52	565

* Cotton = *in bales of 170 kgs each*

** Mesta/jute = in bales of 180 kgs each

Source: Directorate of Agriculture, Meghalaya.

From the above statement it is observed that out of 10,471 hectares under food grains, 9,036 hectares are in rice crops growing areas. Under pulse crops only 331 hectares are recorded under oilseeds only 434 hectares are recorded. In Fibre crops 1,707 hectares are recorded.

Horticulture

Horticulture is also played important role in rural economy of the district as it contributes to the earnings of the rural people for livelihood. The cropping patter of Horticultural crops for the year 1999-2000 for the district is given below :

Sl. No.	Name of crops (Horticulture)	Area (in Hectare)	Production (in Metric Tonne)	Yield (in Kg/ Hectare)
1	2	3	4	5
1.	**Fruit Crops**			
	a) Pineapple	980	6,380	6,437
	b) Citrus fruits	373	262	702
	c) Banana	268	3,327	12,414
	d) Papaya	29	269	9,275
2.	**Vegetables**	NA	NA	NA
3.	**Tuber Crops**			
	a) Potato	32	250	7,812
	b) Sweet Potato	117	387	3,308
	c) Tapioca	298	1,665	5,587
4.	**Spices Crops**			
	a) Ginger	146	711	4,870
	b) Turmeric	56	280	5,000
	c) Tamarind	270	172	637
5.	**Plantation Crops**			
	a) Tea	-	-	-
	b) Arecanut	248	336	1,355
	c) Cashewnut	3,152	3,112	987

Source: Directorate of Horticulture, Meghalaya.

From the above Statement, It is observed that in case of Single crops under Horticulture only cashew nut with 3,152 crops hectares is recorded the largest cropping area. The next higher crop is pineapple with 980 hectares in the district.

Land use Pattern

The land use pattern for the year 1998-99 for the district as published by the Directorate of Economics and Statistics is given in the next page

Item	Area in Hectors	Percentage to total Reporting area
	Reporting Area	**1,85,000**	
1.	Forest	1,01,746	54.99
2.	Not available for cultivation	9,418	5.08
3.	Other uncultivable land excluding fallow land	31,390	17.0
4.	Fallow land	24,143	13.05
5.	Net area Sown	18,303	9.88
6.	Area Sown more than once	4,722	
7.	**Total cropped area**	**23,025**	

Source : Directorate of Economics and Statistics, Meghalaya (Hand Book 2000)

From the above statement it is observed that the district has a geographical area of 1,85,000 hectares. Out of 1,85,000 hectares, 1,01,746 hectares or 54.99 percent are forest areas, 9,418 hectares or 5.08 percent are not available for cultivation, 31,390 hectares or 17.00 percent in other uncultivable land excluding fallow land, 24,143 hectares or 13.05 percent in fallow land and 18,303 hectares or 9.88 percent under Net area sown.

Under Area sown more than once there are 4,722 hectares or 25.80 percent out of 18,303 hectares under Net area Sown in the district. Only in 25.80 percent areas crops are sown more than once. In about 74 percent areas. Single crops are sown.

Irrigation

Irrigation system is available only in a few villages as reported by the sub divisional officer (Irrigation) Baghmara. All the irrigation schemes are known as Flow Irrigation Scheme. The Flow Irrigation Scheme is introduced in the following areas only as most of the plain area for cultivation is located in the nearly rivers.

Sl.No.	Type of Irrigation system	Area Irrigated in hactres	Covered the Village
1.	Flow Irrigation Scheme	270	Ramchungga
2.	- do -	117	Jatrakona
3.	- do -	57	Rongru-Asim
4.	- do -	28	Tainang and Tainang Songmong

Source : District Irrigation Deptt. Baghmara.

Animal Husbandry

In rural economy of the district, the Animal Husbandry Sector has occupied much importance as it helps the villagers to earn from raring the livestock at lower cost and thereby boosting their financial condition with the additional source of income for livelihood. Moreover, the livestock including poultry is the only alternative avocation to the villagers for subsidiary and their living. The following statement showing major types of livestock and their number by Sex in the district as per 1992 and 1997 livestock census report is given below :

Type of Livestock	Number during					
	1992			1997		
	Total	Male	Female	Total	Male	Female
1. Cattle	41694	19986	21708	38125	17375	20750
3. Buffaloes	1394	714	680	32	15	17
4. Goats	18698	-	-	20512	-	-
5. Sheep's	23	-	-	110	-	-
6. Pigs	17486	-	-	16350	-	-
7. Fowls (Desi)	72242	26486	45756	58279	23102	35177
8. Fowls (Improved)	2605	1281	1324	5	5	-
9. Chikens	69451	-	-	69929	43438	26491
10. Ducks	1270	572	698	1949	603	1346
11. Duckling	874	-	-	2659	-	-

From the above statement it is observed that the total cattle population decreased by 3569 numbers or 8.56 percent, in 1997 Buffalo, Pigs, Fowls have maintained decreasing trend during 1992-1997. However Goats, Chickens, Ducks and Duckling have recorded increasing trend during 1992-1997.

Livestock Infrastructure in the district

The Pace of development of livestock sector depends upon the developmental activities in the livestock infrastructure in the district. The following statement showing livestock infrastructure in the district during 1998-99 and 1999-2000.

From the statement given below it is observed that the Cattle farm, Buffalo farm sheep's Goat farm, Fodder farm are not available in the Govt. Sector in the district. Even no veterinary Hospitals are also available. In terms of livestock infrastructure facilities. The pace of developmental activities is very slow, as such livestock sector did not show any significant improvement during this period. The existence of Co-operative forms or private sector (including self help groups are not found in the district. If the steps will be undertaken to boost up the development in this sector by setting up Milk plant for supply of milk and milk products by encouraging self-help groups to form Co-operative societies for cattle farming. It will help in boosting up the production of milk, milk products and beef etc. If with the help of self-help groups in the form of Co-operative societies, pig and poultry forms are set up, the production of eggs pigs and poultry will be increased and more employment avenues will be generated for livelihood.

Year	Year Break-up of Number of Veterinary Institutions							
	Doctors	Hospitals	Dispensaries	Aid Centres	Mobile Dispensaries	Stockman Centres	Pig Farm	Poultry Farm
1998-1999	4	-	3	5	-	4	1	1
1999-2000	4	-	3	5	1	4	1	1

Source : Statistical Hand-Book, Meghalaya 2000.

Fishery

The fishery is an important economic resource of the district. The river Simsang and its tributaries abound in fish of many varieties. But the requirement of fish in the district is not adequate as the fishery infrastructures in the district are not developed to that extent to have commercially reliable fish farms in the private sector, although the income generating schemes like the fish cum piggery/poultry farming and construction of fisheries ponds/tanks has been implemented among the rural people of the district in order to boost up production of fish seeds and fingerlings. The status of fishery infrastructure is given below :

From the statement, it is observed that number of fish seed farm remains stagnant at the district and also at State level. The decreasing trend is recorded in case of distribution of fish seed at the district level, but it has recorded increasing trend upto 1997-98 at the state level. In 1998-99, it is recorded decreasing trend. In case of production of inland fish, the trend at the state level is also not significant one.

Year	No. of Fish Seed					
	Farm		Number of Fish Seed distributed (in Nos)		Inland fish Production (Tones)	
	In the District	In the State	In the District	In the State	In the District	In the State
1	2	3	4	5	6	7
1995-96	1	15	43,000	1,507,800	N.A.	3,600
1996-97	1	15	22,500	1,837,200	N.A.	4,400
1997-98	1	13	N.A.	2,175,200	N.A.	4,400
1998-99	1	14	N.A.	1,275,800	N.A.	4,500

Source : Directorate of Fisheries, Meghalaya.

Industry

The district is not industrially developed. There are not major industries. There are 61 small scale industries involving Rs. 14.88 lakhs in investment in plant and machine engaging 275 persons during 1998 – 99. All these industries were registered with the Directorate of Industries, Meghalaya. Among the Small Scale Industries, important Industries are Wooden Furniture, Bakery, Tailoring, Motor repairing, Saw mills, Cane and Bamboo works, Tyre retarding, Steel frabrication.

According to Economic Census, 1998 as per the statement given below there are 3052 enterprise in Agricultural and Non-agricultural Sector out of 3052 enterprise. In own account enterprise there are 1486 enterprises and in the establishment engaged in agricultural and Non-agricultures activities there are

Number of Enterprises in the district (as per Economic Census 1998)

Source : District level Statistics – 2002, published by Directorate of Economics and Statistics, Meghalaya.

1566 enterprises in the district 7275 persons are engaged in these enterprises.

There is one District Industries Centre (DIC) at Baghmara, the headquarter of the district to implement all the development and promotional schemes for the Industries Sector, which also includes implementation of training programmes and awareness programmes to motivate and enable the youths to set up their own little ventures for self employment and also to, provide other infrastructure facilities on Industries sector.

Besides DIC, the Meghalaya Industries Development Corporation (MIDC) is also looking after the development of Small scale Industries and also conducts Entrepreneur Development Programmes and holds exhibition in different parts of the district for the benefit of the Entrepreneurs so as to enable them to market their products. Besides these programmes, financial assistance is also given to these enterprises in the form of grant-in-aid and package Scheme of Incentives. The Khadi and Village Industries has also played important role for the development of small and cottage industries in the villages of the district.

The sericulture and weaving has also played important role in the development of rural based cottage Industries in the district. The Muga Silk yarn has a unique permanent natural golden colour and now world wide known as " Golden Fibre ". This rare fibre is not found anywhere in the world except Meghalaya and Assam and hence it has export potential. However, in spite of enormous export potential, this sector could not make much progress due to various constrains such as:

(a) the practice of old mulberry silks worm seeds,

(b) shortage of leaves to feed the silk worms in the absence of systematic plantation

(c) Inadequate supply of Eri and Muga seeds

(d) absence of organised marketing support system

(e) absence of practice of farming in the private sector etc which attributed to slow pace in the development of the rural based cottage industries.

Status of Sericulture and Weaving Infrastructure during 1998-99 in the district is given in the following Statement.

It is observed from, the below Statement, the contribution of the district in this sector is quite insignificant.

	Number of Centre for (during 1998-99)				Production of Cocoons (during 1998-99)		
	Weaving Training	Weaving Demonstration	Handloom Demonstration	Handloom Production	Mulberry in ('000 kgs)	Eri ('000 kgs)	Muga (lakh Nos)

* Units imply mostly household units.

In all major crafts there are 1,399 units involving 6275 artisan out of them there are total 1,324 units involving 5,956 artisans and 75 units involving 319 artisans in rural and urban areas respectively. In textiles craft total 795 units involving 3,515 artisans are there out of them 734 units involving 3,262 artisan and 61 units involving 253 artisans are located in rural and urban areas respectively. In can Bamboo Crafts total 425 units involving 1926 artisans are in the district out ot them 417 units involving 1896 artisans and 6 units involving 30 artisans are located in rural and urban areas respectively. In wood craft total 165 units involving 755 artisans are in the district out of them there are 157 units involving 719 artisans are located in rural areas. In metal and clays ceranies crafts there are 5 units involving 58 artisans and 11 units involving 58 artisan respectively.

Trade and Commerce

The importance of Trade and Commerce sector in the district is centred in the Baghmara town, and rural centres namely Bolsalgre, Siju, Mahadeo, Chokpot, Deku, Gasuapara, Jatrakona, Nagalbiera, Rongara and Sibbari where weekly markets are available. As the district is bounded by the Bangladesh with the international boundary on the south, there is larger scope of exports and imports of some commodities in the border areas. The main centre for the export and trade is Baghmara town. Exportable commodities are limestone, boulder stones, coal and fruits, and some food items, sugar etc. Imported commodities are foreign made cloths, electrical materials, perfumes, salt, fish etc. Exportation activities is regulated by the Trade (including Border) Department created in 1976.

Banking

Banking facilities which depicts the trade and are available in the following areas.

Commercial Scenario in the District

1. Baghmara Town	-	1	Meghalaya Co-operative Bank Ltd.
		1	State Bank of India
2. Nagal Bibra	-	1	State Bank of India
3. Chokpot	-	1	MeghalayaCo-operative Bank Ltd
		1	State Bank of India
4. Gasupara	-	1	State Bank of India

Transport

Road transport is the only means of communication in the hilly district. In view of the fact, that the entire State is not linked with any railway lines and also with any water transport facilities. It is also not linked with Air transport. The district therefore depend solely on the transport system by the roads only. Regular Bus services between different destinations are operated to carry passengers and goods through the Meghalaya Transport Corporation, Private Transport Companies. Now Tata Sumo Services are also available. All the roads are not good through out the year as the most of the roads are damaged frequently after heavy raining and also for running of heavy loaded trucks through them. The frequency of the operation of Bus Services and other Mini Buses, Private Buses, Tata Sumo Services has been increased much for which revenue earning also increased. In the following statement the number of vehicles registered in the district during 1997-1999 is presented to reflect the pace of development in this sector.

Year	Trucks	Bus	Mini Bus	Taxi	Car	Jeep	Tractor	Trailer	Two Wheeler	Three Wheeler
1	2	3	4	5	6	7	8	9	10	11
1994-95

Pvt.	87	-	-	-	10	6	-	-	130	20
1998-99										
Govt.	2	-	-	-	2	18	-	-	-	-
Pvt.	153	2	-	1	26	2	-	-	267	28

Source : Office of the Commissioner of Transport, Meghalaya, Shillong.

Form the above statement it is observed that in case of Govt truck, it reduced to 2 in 1998-99 from 12 in 1997-98, but private trucks have recorded an increase by 153 Nos. during this period. Private Bus is registered only 2 in the district during 1998 – 99. Private car increases to 26 during the same period. Private Jeep recorded to 24 only. Two wheeler and three wheeler in the private category increases to 267 and 28 in 1998-99 from 130 and 20 in 1997-98 respectively. The growth is not significant due to the fact that it is a newly created district and the district is industrially and communicably backward. No new roads are developed during this period, and even new routes for operation of Bus Services are also not taken up. Old routes connecting the Tura, Shillong, Guwahati and other important places are still continuing and hence no scope of increase in transport services is attributed. The important road with distance connecting the importment place is given below :

	Name of Road	Distance in Km
1.	Baghmara to Shillong via Tura	445
2.	Baghmara to Tura	122
3.	Baghmara to Williamnagar	133
4.	Baghmara to Guwahati via Tura	342
5.	Baghmara-Siju-Damra	32

6. There is one P.W.D. Division known as Baghmara Division in the district as on 1997. Total Road length under this Division (as per SDO P.W.D. (Roads) Statistics Branch, Meghalaya, Shillong) to 414.830 Km out of which 257.530 kms are black topped, 53.800 kms are gravelled and 103.500 kms are kutcha categories.

Tourism

Tourism has important role in the economic development as an industry. In district endowed with natural beauty and the places of historical importance. It has direct link with the development of infrastructure of transport system in the district. Tourist information centre is also set up in the district to provide effective and quick means of communication by having a more organised net work of transport system involving the private transport operations. Encouragement is also given to the local youths to set up tour and travel agencies. Besides, these incentives to local entrepreneurs for preparing project feasibility report on tourism spots are also extended recently. Schemes like holiday package comprising of adventures tourism are also taken up. The state has declared the tourism as an Industry. It is an eco-friendly industry capable of generating employment avenues to the youths to some extent and thereby revenues to the Govt. There are nine important tourism spots which are given below :

1.	Siju Cave.	6.	Viewpoint at Badri Rongdong
2.	Captain W.A. Sangma Memorial.	7.	Balpakram Wildlife Sanctuary.
3.	Kanai River.	8.	Siju Wildlife Sanctuary.
4.	Rongira Range & Ganol River (view point at Balalgre)	9.	Baghmara Pitchar plant Sanctuary.
5.	Elephant : Crossing Zone at Mandal a'itok.		

Source : Director of Tourism, Meghalaya, Shillong.

Communication

Communication is also played in economic development of the district. The following statement will reflect the trend in the development of communication sector in the district.

From the statement given below it is observed that Telephone Exchange number is remain in stagnant during 1992-93 to 1998-99 with number of only one public call office is there during 1998-99 and also one PCO in private sector was established during 1998-99. In case of telephone connection number it decreased to 108 in 1996-97 from 121 in 1995-96 but it increased to 111 and 147 in 1997 and 1998-99 respectively. Only 87 number of telephone connection were increased during 1992-93, 1998-99 period. It is not at all encouraging trend in case of development in infrastructure facilities of communication in the district.

Statement showing number of Telephone Exchange, Telephone Connections and Public Call Centres etc during 1992-93 to 1998-99 in the district

Year	Number of Telephone exchange	Public call Offices	Telephone connection	P.C.O. Private
1	2	3	4	5
1992-93	1	-	60	-
1993-94	1	-	88	-
1994-95	1	-	121	-
1995-96	1	-	121	-
1996-97	1	-	108	-
1997-98	1	-	111	-
1998-99	1	1	147	1

Electricity and Power

In the Electricity and power sector the district is self sufficient due to installation of Thermal Power Plant at Nagalbibra. It is 5.00 MW installed capacity project. In addition to supply of electricity to the district, it also provided to nearly districts of the state. There are 132 KV lines for Shillong-Nangalbibra and Maulai Nangalbibra substation.

Rural Electrification

In the rural areas of the district, supply of electricity is still inadequate and far behind the achieving target of cent percent electrification of villages. Till 1998-99, out of total 595 villages in the district only 129 villages were provided with Electricity and only 21.69 percent villages are provided with the electricity.

Census Concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more

than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglo-meration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the constitution provides that the President may, with respect to any State or Union Territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the constitution be deemed to be Scheduled Caste in relation to that State or Union Territory. Article 342 similarly provides for specification of tribes or tribal communities or part s of or group within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States or Union Territories. In pursuance to this provisions, the list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside.

It is important to mention here that under the Constitution (Scheduled Caste) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in religion to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and Sikh religions were placed on the same footing with regard to the made in the Constitution (Scheduled Castes) Order 1991, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

According to the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 and the Constitution (Scheduled Tribes) Order (Amendment) Act, 1987, the list of Scheduled Castes and Scheduled Tribes in Meghalaya is as follows:

Scheduled Castes

1. Bansphor
2. Bhuinmali, Mali
3. Brittial Bania, Bania
4. Dhupi, Dhobi
5. Dugla, Dholi
6. Hira
7. Jalkeot .
8. Jhalo, Malo Jhalo-Malo
9. Kaibartta, Jaliya

10. Lalbegi
11. Mahara
12. Mehtar Bhangi
13. Muchi, Rishi
14. Namasudra
15. Patni
16. Sutradhar.

Scheduled Tribes

1. Boro, Kacharis
2. Chakma
3. Dimasa, Kachari
4. Garo
5. Hajong
6. Hmar
7. Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam
8. Koch
9. Any Kuki Tribes, including:
   - i) Biate, Biete
   - ii) Changsan
   - iii) Chonglo
   - iv) Doungel
   - v) Gamalhou
   - vi) Gangte
   - vii) Guite
   - viii) Hanneng
   - ix) Haokip, Haupit
   - x) Haolai
   - xi) Hengna
   - xii) Hongsungh
   - xiii) Hrangkhwal, Rangkhol
   - xiv) Jongbe
   - xv) Khawchung
   - xvi) Khawathlang, Khothalong
   - xvii) Khelma
   - xviii) Kholhou
   - xix) Kipgen
   - xx) Kuki
   - xxi) Lengthang
   - xxii) Lhangum
   - xxiii) Lhoujem
   - xxiv) Lhouvun
   - xxv) Lupheng
   - xxvi) Mangjel
   - xxvii) Misao
   - xxviii) Riang
   - xxix) Sairhem
   - xxx) Selnam
   - xxxi) Singson
   - xxxii) Sitlhou
   - xxxiii) Sukte

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue is defined as the language spoken in childhood by the person's mother of the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have as script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not a literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes ot through any non-formal educational system. People who are blind but can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the

percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rates.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in "work" as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Main Worker

A person who has worked for major part of the reference period (i.e., six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six (6) months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., in the last one year preceding the date of enumeration) is termed as 'Marginal worker'.

Cultivator

For purposes of the Census, a person is classified as Cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money or share of crop and who does not even supervise or direct the cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals cereal and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, tobacco, ground nuts, topioca etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or graves, etc.. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker

Household Industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musicians, Dancer, Washerman, Astrologer, Dhobi, Barber etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in household industry is termed as a 'Other Workers (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artist, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of completed number of years

Sex–ratio

Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and

normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid – year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR)

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types

(i) Migration within the state itself with its components

  (a) Migration within the district of enumeration (intra district migration)

  (b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town

e.g., Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA/town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs./towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) and M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as

a) Areas where buildings are in any respect unfit for human habitation; or

b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings

South Garo Hills district is newly created by carving out of West Garo Hills with its Headquarter at Baghmara. It comprises of three C.R.D.Blocks viz, Chokpot, Baghmara and Rongara. Census of India, 2001 recorded a total population of 1,00,980 out of which 92,337 population are living in 595 inhabited villages and 8643 in the urban areas of the district. The population of the district live predominantly in rural areas with 91.4 percent of the total population, while in urban areas it is only8.6 percent. The only town, Baghmara is having the status of Municipal Board (MB) in the class V town category. The population growth of last decade is 31.0 percent, little higher than the State growth. The area of the district is 1850 Sq.Kms, and the density of population comes to 55 persons per square kilometres. The sex ratio showing 942 is the lowest among the districts of the state. The district is predominantly inhabited by Scheduled Tribes. The district has only one Degree College, situated in the town. The work participation of the district is 47.4 percent out of which males are 50.9 percent and females 43.6 percent. The percentage of non-workers in the district is 56.4 percent to the total population. The population of the district depend mostly on agriculture, because 73.8 percent of the total workers are engaged in agricultural sector. Only 2.0 percent of workers are engage in household industry and 24.3percent are in other workers. The majority of the population are Christians by religion. The Christian population in the district is 89.6 percent and other major religions are Hindus 4.8 percent, Muslims 2.7 percent, Sikhs 0.0 percent, Buddhists 0.2 percent and Jains 0.0 percent. The percentage of other religion and persuasions are 2.4 percent while religion not stated is returned at 0.2 percent.

Scheduled Castes and Scheduled Tribes

The proportion of Scheduled Castes and Scheduled Tribes population in the district are recorded as 0.2 percent and 95.7 percent to the total

population respectively. The decadal growth rate of Scheduled Castes and Scheduled Tribes 1991 to 2001 is shown as (-) 33.3 percent and 31.3 percent respectively. The population growth in rural areas are (-) 75.1 percent and 29.9 percent respectively while in urban areas it is 97.6 percent and 51.9 percent respectively. It is found that the growth rate of Scheduled Caste population in the district has shown negative growth. It may be due to movement from rural areas to urban areas for want of jobs and other reasons not known. The growth rate of Scheduled Castes in the urban areas are comparatively higher.

Total Rural Urban	SC Population			ST Population		
	1991	2001	Decadal Growth rate	1991	2001	Decadal Growth rate
1	2	3	4	5	6	7
Total	339	226	-33.3	73,603	96,616	31.3
Rural	257	64	-75.1	69,004	89,628	29.9
Urban	82	162	97.6	4,599	6,988	51.9

(viii) Brief Notes on Tables

In the few pages that follow an attempt is being made to briefly analyse the few tables based on data collected from the Primary Census Abstract, the Village Directory and Town Directory and Houses, Household Amenities and Assets depicting on their own way the various demographic characteristics of the population of the district, the basic amenities such as education, medical, improved drinking water, etc available to the population of the district, and the housing stock, the household amenities and assets available to the households of the district. A total of 52 tables have been prescribed for the purpose. Tables 1to 36 present data from the Primary Census Abstract, inset tables 37 to 47 shows data on villages Directory and Town Directory and tables 48 to 52 gives data on household amenities and assets.

Tables 6, 10, 14, 21, 31 and 34 are to present data on Primary Census Abstract Tahsilwise and the rest C.R.D. Block wise. In Meghalaya, however, the Census of India starting from 1981 has been conducted with the Communiy and Rural Development Blocks as the administrative unit below the district and above the villages and towns and all the data have been tabulated and presented C.R.D. Blockwise. Therefore the above six tables have been excluded. Moreover, in Meghalaya there is no such administrative unit by the name Tahsil. Till 1971 the Census of India was conducted in Meghalaya police stationwise and never Tahsilwise.

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Sl No.	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban populatio	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1.	Chokpot	29,464	29,464	-	37,937	37,937	-	28.8	28.8	-	-	-
2.	Baghmara	33,255	27,361	5,894	45,529	36,886	8,643	37.0	34.8	46.6	17.7	19.0
3.	Rongara	14,354	14,354	-	17,514	17,514	-	22.0	22.0	-	-	-
District Total:		**77,073**	**71,179**	**5,894**	**1,00,980**	**92,337**	**8,643**	**31.0**	**29.7**	**46.6**	**7.6**	**8.6**

This table depicts the change in population of C. D.Block by residence, 1991-2001. It is seen that amongst the three C. D. Blocks in the district, percentage decadal variation between 1991-2001, is found to be highest in Baghmara C. D. Block with 37.0 percent whereas Rongara C.D. Block is found to be lowest with 22.0 percent variation. Th Baghmara town is the only Urban area of the distric and the percentage decadal variation between 1991 2001 is found to be 46.6 percent which is higher tha the district decadal variation.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZERANGES WITH THE RELATED POPULATION , 2001

Sl No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1.	Chokpot	336	37,937	19,205	18,732	289 (86.0)	11,632	11,555
2.	Baghmara	149	36,886	19,256	17,630	72 (48.3)	4,234	4,034
3.	Rongara	110	17,514	8,938	8,576	77 (70.0)	4,168	4,003
Districts (Rural) Total:		**595**	**92,337**	**47,399**	**44,938**	**438 (73.6)**	**20,034**	**19,592**

Sl. No.	District / C.D. block	Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999		Number and percentage of villages	Population 1000-1999	
			Males	Females		Males	Females		Males	Female
1	2	10	11	12	13	14	15	16	17	18
1.	Chokpot	42 (12.5)	5844	5558	5 (1.5)	1729	1619	-	-	-
2.	Baghmara	68 (45.6)	11038	10411	8 (5.4)	2876	2740	1 (0.7)	1108	445
3.	Rongara	32 (29.1)	4451	4289	1 (0.9)	319	284	-	-	-
Districts (Rural) Total:		**142(23.9)**	**21333**	**20258**	**14 (2.4)**	**4924**	**4643**	**1 (0.2)**	**1108**	**445**

table cont.

Sl. No.	District / C.D. block	Number and percentage of villages	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females		Males	Females
1	2	19	20	21	22	23	24	25	26	27
1.	Chokpot	-	-	-	-	-	-	-	-	-
2.	Baghmara	-	-	-	-	-	-	-	-	-
3.	Rongara	-	-	-	-	-	-	-	-	-
Districts (Rural) Total:		-	-	-	-	-	-	-	-	-

This table shows the number and percentage of inhabited villages in specified population size ranges with the related population. It is seen that out of 336 number of inhabited villages in Chokpot C.D.Block, in as many as 289 villages (86.0 percent), population are found to be less than 200, in Rongara C.D.Block, 70.0 percent of the villages out of 110 villages and Baghmara C.D. Block ,48.3 percent of the villages, population are found to be less than 200. It is also seen that in 45.6 percent of villages in Baghmara C.D.Block, 29.1 percent in Rongara C.D.Block and 12.5 percent in Chokpot, population are found to be in between 200-499. Only one village is found in Baghmara C.D. Block where the population is found to be between 1000-1999. In Chokpot and Rongara C.D. Block, no villages with more than the population range of 500-999 is available. The villages with the population of 2000 and above are found to be nil in the district.

TABLE 3: NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

NIL

Declassified means the Census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

There is no new town denotified, declassified and merged town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	595	100.0	92,337	100.0
11-20	0	0.0	0	0.0
21-50	0	0.0	0	0.0
51-100	0	0.0	0	0.0
101-200	0	0.0	0	0.0
201-300	0	0.0	0	0.0
301-500	0	0.0	0	0.0
501 +	0	0.0	0	0.0
Not known	0	0.0	0	0.0
District Total:	**595**	**100.0**	**92,337**	**100.0**
Population Density (Rural) of the district:		**0**		

This table depicts the distribution of villages by population density, 2001. In the absence of any cadastral survey, the area of the villages are not available. As such the range of population density in different ranges are not available.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1036	1047	725	987	987	-
1911	1013	1024	757	969	969	-
1921	1000	1009	809	972	972	-
1931	971	989	697	973	973	-
1941	966	991	683	989	989	-
1951	949	969	784	965	965	-
1961	937	971	764	971	971	-
1971	942	958	853	909	909	-
1981	954	965	904	967	970	921
1991	955	966	910	963	971	880
2001	972	969	982	942	948	876

Note: Sex ratio has been defined here as the number of females per 1000 males.

This table shows the Sex Ratio of state and district, 1901-2001. No significant variation of Sex Ratio has been observed from 1901 to 2001. However, the highest sex ratio of 989 females per 1000 males was observed in 1941 Census and the lowest sex ratio of 909 was observed in 1971 Census. The sex ratio has come down from 971 in 1971 to 948 in 2001 Census. The urban sex ratio shows a declining trend from 1981 to 2001 Census.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Sl No.	Name of C D block	Sex ratio
1	2	3
1.	Chokpot	975
2.	Baghmara	916
3.	Rongara	959
District (Rural) Total:		**948**

The table 7 reveals the sex ratio by C.D.Blocks, 2001. It is observed that Chokpot C. D. Block has 975 females per 1000 males which is the highest sex ratio amongst all the three C. D. Blocks in the district followed by Rongara and Baghmara with 959 and 916 sex ratio respectively. It is observed that the rural sex ratio of 948 is more than urban sex ratio of the district with 876 females per 1000 males.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	27	4.5	3,030	3.3
700-749	16	2.7	1,789	1.9
750-799	25	4.2	2,509	2.7
800-849	50	8.4	6,938	7.5
850-899	72	12.1	11,713	12.7
900-949	85	14.3	19,955	21.6
950-999	64	10.8	15,245	16.5
1000-1099	126	21.2	18,440	20.0
1100+	130	21.8	12,718	13.8
District Total:	**595**	**100.0**	**92,337**	**100.0**
Sex ratio (Rural) for District:		**948**		

This table reveals the sex ratio of rural population by ranges, 2001. It is observed that 126 villages out of 595 villages fall in the sex ratio of 1000-1099 which consists of 20.0 percent population of the district and 130 number of inhabited villages having 13.8 percent population fall in the sex ratio of 1100 + . It is seen 71.9 percent of population fall in the sex ratio for villages above 900.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Baghmara	(MB)	876
Sex ratio (Urban) for the district:			**876**

This table depicts the sex ratio of Urban Agglomerations towns, 2001. There is only one town in the district and the sex ratio of the town is found to be 876 females per 1000 males.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1.	Chokpot	7,949	4,046	3,903	965
2.	Baghmara	7,947	4,053	3,894	961
3.	Rongara	3,905	1,956	1,949	996
	District (Rural) Total:	**19,801**	**10,055**	**9,746**	**969**

This table depicts the sex ratio of population in the age group 0-6 per C. D. Blocks, 2001. It is observed that out of 3 C. D. Blocks in the district Rongara has the highest sex ratio of 996 for the age group 0 -6 and Baghmara C. D. Block has the lowest sex ratio of 961 for 0- 6 age group amongst the three C.D. Block in the district. As a whole in the district the sex raio for 0-6 age group is 969.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	129	21.7	2802	14.2
700-749	26	4.4	1019	5.1
750-799	35	5.9	1155	5.8
800-849	31	5.2	1729	8.7
850-899	18	3.0	876	4.4
900-949	34	5.7	2075	10.5
950-999	11	1.8	669	3.4
1000-1099	79	13.3	2561	12.9
1100+	232	39.0	6915	34.9
District (Rural) Total	**595**	**100.0**	**19801**	**100.0**
Sex ratio (Rural) for District:		**969**		

This table shows the sex ratio of rural population in the age group 0-6, 2001. It is observed that out of 595 villages in the district, in 232 villages, sex ratio have been found to be in the range of 1100 + and in 129 villages sex ratio are found to be less than 700, the percentage being 39.0 and 21.7 percent respectively. The percentage distribution of population is found to be 34.9 percent in 1100 + range of sex ratio for villages, 14.2 percent in less than 700 range of sex ratio for villages, 12.9 percent in 1000-1099 range of sex ratio of villages and 10.5 percent in the 900-949 range of sex ratio of villages. Other ranges of sex ratio are found to be insignificant.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Baghmara	(MB)	1513	762	751	986
	District(Urban) Total		**1513**	**762**	**751**	**986**

This table shows sex ratio of population in the age group 0-6 of Urban Agglomerations/Towns, 2001. Baghmara is the only town in the district and the sex ratio for 0-6 age group is found to be 986.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1.	Chokpot	37,937	3	37,397	0	98.6
2.	Baghmara	36,886	8	35,160	0	95.3
3.	Rongara	17,514	53	17,071	0.3	97.5
	District (Rural) Total:	**92,337**	**64**	**89,628**	**0.1**	**97.1**

This table depicts the number and percentage of Scheduled Castes and Scheduled Tribes population in C. D. Blocks, 2001. Percentage of Scheduled Tribes in the district is found to be 97.1. Percentage of Scheduled Tribe population shows a similar trend in respect of all the three C. D. Blocks in the district. There are only 64 Scheduled Caste in the district and 53 of them are found to be in Rongara C. D. Block.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	587	98.7	-	-
Less than 5	6	1.0	21	32.8
5-10	2	0.3	43	67.2
11-20	-	-	-	-
21-30	-	-	-	-
31-40	-	-	-	-
41-50	-	-	-	-
51-75	-	-	-	-
76 and above	-	-	-	-
District Total	**595**	**100.0**	**64**	**100.0**

This table shows the proportion of Scheduled Castes population to total population in villages, 2001. It is seen that, out of 595 villages of the district, Scheduled Castes are available only in 8 villages and amongst them, in 6 villages percentage range of Scheduled Castes population to total population fall in the range less then 5, and 2 villages in the range 5-10 and the percentage of Scheduled Caste population are found to be 32.8 and 67.2 percent respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	5	0.8	-	-
Less than 5	-	-	-	-
5-10	-	-	-	-
11-20	1	0.2	3	-
21-30	-	-	-	-
31-40	-	-	-	-
41-50	-	-	-	-
51-75	5	0.8	1,824	2.0
76 and above	584	98.2	87,801	98.0
District Total	**595**	**100.0**	**89,628**	**100.0**

This table depicts the proportion of Scheduled Tribes population to total population in villages 2001. It is observed that out of 595 villages of the district, in respect of percentage range of Scheduled Tribes population to total population, 584 falls in the percentage range of 76 and above, 5 in the range of 51-75 and only one in the range 11-20 and there are no Scheduled Tribes in 5 villages.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Baghmara (MB)	8643	162	6988	1.9	80.9
District(Urban) Tota		**8643**	**162**	**6988**	**1.9**	**80.9**

This table shows the number and percentage of scheduled castes and scheduled tribes population in Urban Agglomerations/Towns. Baghmara is the only town in the district. The percentages of scheduled tribe and scheduled caste in the town are found to be 80.9 and 1.9 percent respectively.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1.	Chokpot	-	982
2.	Baghmara	143	957
3.	Rongara	606	982
District (Rural) Total		**488**	**972**

This table reveals the sex ratio among Scheduled Castes and Scheduled Tribes in C.D.Blocks, 2001. Sex ratio for Scheduled Tribes are found to be same i.e 982 in respect of Chokpot and Rongara C.D. Blocks, which are higher than the district sex ratio of 972. Baghmara C.D. Block has the sex ratio of 957 which is much lower than the district sex ratio.

TABLE 20 : SEX RATIO OF SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATION

Sl. No.	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1.	Baghmara (MB)	761	951
District sex ratio (Urban)		**761**	**951**

This table shows the sex ratio among scheduled castes and scheduled tribes in Urban Agglomerations/ Towns, 2001. The sex ratio of scheduled tribe and scheduled caste have been found to be 951 and 761 respectively for Baghmara town which is the only town in the district.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Chokpot	15,453	8,740	6,713	22,484	10,465	12,019	51.5	57.7	45.3	12.4
2.	Baghmara	14,715	8,826	5,889	22,171	10,430	11,741	50.8	58.1	42.9	15.2
3.	Rongara	7,670	4,474	3,196	9,844	4,464	5,380	56.4	64.1	48.2	15.9
District (Rural) Total:		**37,838**	**22,040**	**15,798**	**54,499**	**25,359**	**29,140**	**52.2**	**59**	**44.9**	**14.1**

This table depicts the number and percentage of literates and illiterates by sex in C. D. Block. Percentage of literates are found to be highest in Rongara C. D. Block with 56.4 percent literates which is higher than the district literacy rate of 52.2. The Chokpot and Baghmara C.D. Block have lower literacy rate of 51.5 and 50.8 respectively. The gap in male - female literacy rate is found to be 15.9 in Rongara C. D. Block which is found to be highest amongst 3 C. D. Blocks in the district and lowest in Chokpot C. D. Block with a gap of 12.4 in male female literacy rate.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	5	0.8	160	0.2
1-10	27	4.5	1,846	2.0
11-20	35	5.9	4,213	4.6
21-30	71	11.9	9,543	10.3
31-40	78	13.1	10,516	11.4
41-50	104	17.5	15,747	17.1
51-60	103	17.3	17,073	18.5
61-70	87	14.6	15,456	16.7
71-80	46	7.7	8,811	9.5
81-90	30	5.0	8,107	8.8
91-99	6	1.0	639	0.7
100	3	0.5	226	0.2
District Total:	**595**	**100.0**	**92,337**	**100.0**
Literacy rate for District:		**55**		

This table shows the distribution of villages by literacy rate range, 2001. It is seen that most of the villages fall in the range of literacy rate between 21-30, 31-40, 41-50, 51-60 and 61-70. The highest literacy rate is found to be in the range between 41-50 with 104 villages fall in this range. However, the percentage distribution of population are found to be in the range 51-60.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Baghmara (M B)	5,978	3,300	2,678	2,665	1,308	1,357	83.8	85.8	81.5	4.3
District(Urban) Total		**5,978**	**3,300**	**2,678**	**2,665**	**1,308**	**1,357**	**83.8**	**85.8**	**81.5**	**4.3**

This table depicts the number and percentage of literates and illiterates by sex in Urban Agglomerations/Towns, 2001. Baghmara is the only town in the district and the percentage of literates are found to be 83.8 percent. The gap in male female (4.3) is found to be very low.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Chokpot	3	3	-	-	-	-	100	100	-	100
2.	Baghmara	3	3	-	5	4	1	50	60	0	60
3.	Rongara	33	23	10	20	10	10	71.7	76.7	62.5	14.2

100	3	37.5	20	31.3
District Total:	**8**	**100.0**	**64**	**100.0**
Literacy rate for District (Rural):		**70.9**		

This table depicts the distribution of villages by literacy rate range for scheduled caste population, 2001. It is seen that only 64 scheduled castes population are spread in 8 villagers only. Out of these 8 villages, Scheduled Castes in 3 villages are cent percent literates. In 2 villages they fall in the range of literacy rate between 61-70 consisting of 48.4 percent of population 1 village each falls in the range of literacy rate of 0, 21-30 and 41-50 consisting of 1.6, percent 15.6 percent and 3.1 percent of population respectively.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Baghmara (MB)	106	66	40	56	26	30	78.5	85.7	69	16.7
South Garo Hills (Urban)		**106**	**66**	**40**	**56**	**26**	**30**	**78.5**	**85.7**	**69**	**16.7**

This table shows the number and percentage of Scheduled Castes literates and illiterates by sex in towns, 2001. It is seen that there are 78.5 percent literate persons in Baghmara which is the only town in the district. It is also observed that there is a gap of 16.7 between male and female literacy rate.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Chokpot	15,243	8,576	6,667	22,154	10,294	11,860	51.6	57.7	45.5	12.2
2.	Baghmara	13,449	7,775	5,674	21,711	10,187	11,524	49.1	55.6	42.4	13.2
3.	Rongara	7,343	4,212	3,131	9,728	4,401	5,327	55.6	63.1	48	15.1
District (Rural) Total:		**36,035**	**20,563**	**15,472**	**53,593**	**24,882**	**28,711**	**51.4**	**57.9**	**44.7**	**13.1**

This table depicts the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. Blocks, 2001. It is seen out of three C.D. Blocks in the district, Rongara C. D. Block with 63.1 percent literates has the highest literacy rate in the district followed by Chokpot and Baghmara C. D. Blocks with 57.7 and 55.6 percent literates respectively. The gap in male/female literacy rate is also found to be highest in Rongara followed by Baghmara and Chokpot C. D. Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of
1	2	3	4	5
0	5	0.8	160	0.2
1-10	24	4.1	1,759	2.0
11-20	34	5.8	4,137	4.6
21-30	71	12.0	9,639	10.8
31-40	79	13.4	10,640	11.9

District Total:	**590**	**100.0**	**89,628**	**100.0**
Literacy rate for District (Rural):		**51.4**		

This table shows the distribution of villages by literacy rate range for Scheduled Tribes population, 2001. It is seen that 107 number of inhabited villages with 20.3 percent of population fall in the range of literacy rate for villages between 51-60, which is found to be highest. It is also seen that 5 villages fall in the 0 range and 3 villages fall in the cent percent range of literacy rate for villages.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1.	Baghmara (MB)	4757	2509	2248	2231	1073	1158	83.9	86	81.7	4.2
South Garo Hills * (Urban)		**4757**	**2509**	**2248**	**2231**	**1073**	**1158**	**83.9**	**86**	**81.7**	**4.2**

This table shows the number and percentage of Scheduled Tribes Literates and Illiterates by sex in Towns, 2001. It is seen that there are 83.9 percent literates in Baghmara town which is the only urban area of the District and the gap of male/female literacy rate is found to be 4.2.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D. BLOCKS, 2001

This table shows the number and percentage of main workers, marginal workers and non workers, 2001. It is seen that percentage of total workers population is found to be 51.5 percent in Chokpot C.D. Block, which is found to be highest, and lowest in Rongara C. D. Block with 42.3 percent amongst the 3 C. D. Blocks in the district. The percentage of main workers are also found to be highest in Chokpot with 34.1 percent main workers and lowest in Rongara C. D. Block with 25.3 percent main workers. The female marginal workers are found to be higher than male marginal workers in all the three C. D. Blocks in the district. The non workers also show a similar trend. The percentage of total worker in the district is found to be 48.3 against the state percentage of 41.8.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA /Town	Persons Males Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

				(45.3)	**(72.1)**	**(14.6)**	**(2.0)**	**(11.3)**

This table shows the distribution of workers by sex in four categories of economic activity in C. D. Blocks, 2001. It is observed that, out 48.3 percent workers (Main & Marginal) 65.5 percent are Cultivators, 13.4 percent are Agricultural labourers, 2.0 percent are Household Industry workers and 19.1 percent are Other workers in the district. Cultivators are found to be more with 74.6 percent in Chokpot C. D. Block whereas Baghmara & Rongara C. D. Blocks have 58.7 percent and 57.9 percent cultivators respectively. Percentage of Female Agricultural labourers are found to be more with 19.1 percent followed by Baghmara and Chokpot with 18.0 and 10.4 percent respectively. Females Cultivators are found to be more in numbers than male cultivators in all the three C. D. Blocks in the district. In respect of Household Industry workers only Chockpot C. D. Block has more Household Industry workers than the other two C. D. Blocks. Females other workers are found to be less in all the three C. D. Blocks in the district.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table depicts the distribution of villages by number of villages along with percentage of villages having different amenities at C.D. Block at district level. Type of amenities wise is discussed below :

Educational Facilities

From the above table it is noticed that among the three C.D. Blocks in the district, the situation regarding school, is the best in Rongara C. D. Block where 87.3 percent of the villages is availing educational facilities. In Baghmara C.D. Block situation regarding educational facilities is better with 81.9 percent, but in Chokpot C.D. Block, where 58.9 percent of villages is availing educational facilities, is not exhibiting satisfactory trend which is far below the district average with 69.9percent.

Medical Facilities

In case of medical facilities, all C.D.Blocks recorded inadequate trend in providing medical facilities to villages as 3.5 percent of the total villages in district is provided with medical facilities. In Baghmara and Rongara C.D. Blocks, medical facilities are available only in 11 (7.4 percent) and 5 (4.5 percent) of villages respectively. In Chokpot C.D. Block it is available only in 5 villages or 1.5 percent of villages of the C.D. Block with the lowest range.

Improved Drinking water facilities

Drinking water facilities are available in 56.4 percent, of the villages in Baghmara C.D. Block followed by 47.3 percent of the village in Rongara C. D. Block. The lowest i.e 35.4 percent of the villages is recorded in Chokpot C.D. Block.

Postal Facilities

Postal facilities are available in 24 villages out of 595 villages in the district. Only 4 percent of villages is provided with Postal Service in the district. In 96 percent villages of the district is not providing with postal service. In Baghmara C. D. Block 7.4 percent of villages is provided with Postal Service, it is followed by Rongara C.D. Block with 4.5 percent and the lowest range is recorded in Chokpot C.D. Block with 2.4 percent.

Telephone Facilities

No telephone facilities available in all 595 villages in the district.

Transport and Communication Facilities

Transport and communication facilities are available in 114 or 19.2 percent of villages in the district. In 80.8 percent of the villages is not available.

Banking Facilities : Banking facility is available in 2 villages, only in the district, one in Chokpot C.D. Block and other one in Rongara C.D. Block.

Agriculture and Credit Societies : Only in one village Agriculture and Credit Societies is available in the district. It is available only in Chokpot C.D.Block.

Approach by Pucca Road Facility

This facility is available in 153 villages against 595 villages in the district. Only 25.7 percent of the villages in the district is provided with this facility. The facility is available in 42.3 percent of villages of Baghmara C.D.Block, 32.7 percent of villages at Rongara C.D.Block is provided with this facility. In Chokpot C.D.Block only 16.1 percent of villages is provided with this facility. It depicts how the district is lacking in terms of development and up liftmen.

Power Supply

The proportion of electrical villages in the district is not at all impressive. Only 116 villages out of 595 villages are provided with power supply facility. In Baghmara C.D.Block 69 villages out of 149 villages or 46.3 percent of the villages are provided with the Power Supply facility. 8.9 percent of villages and 15.5 percent of the villages are provided with this facility in Chokpot C.D.Block and Rongara C.D.Blocks respectively.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl No.	Name of C. D. block	Total population of inhabited villages	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

The above table depicts the distribution of rural population by number and percentage served by different types of amenities at C.D. Block and district level. Type of amenities is discussed below.

Educational facility

This facility is available to 78145 persons or 84.6 percent of the total population of the district is provided with this facility. Among the three C.D. Blocks in the district Rongara C.D. Block is the best regarding Educational facility where 93.9 percent of the population of the C.D. Block is served with this facility. The better situation regarding Educational facility is also reflected in Baghmara C.D. Block with 88.9 percent and Chokpot C.D. Block with 76.2 percent of the population are served with this facility.

Medical facility

Situation regarding medical facilities is not at all impressive as only 9.0 percent of the population of the district is served with the Medical facilities. This facility is provided to 14.6 percent, 6.3 percent and 4.8 percent of the population of Baghmara, Rongara and Chokpot C.D. Blocks respectively 91.0 percent

of the population of the district is not provided with this facility.

Improved Drinking water facility

58.2 percent of population of the district is served by this facility, 67.8 percent, 58.3 percent and 48.7 percent of the population of the C.D. Blocks is served by this facility in Baghmara, Rongara and Chokpot C. D. Blocks respectively.

Postal Services

The situation regarding postal services is not at all impressive as only 10.7 percent of the population of the district is served by this type of facility. Same situation is also reflected in case of all C. D. Blocks.

Telephone Services

This facility is not available in the whole rural areas of the district.

Transport and Communication facilities

29.2 percent of the population of the district is served with this facility. Highest range is recorded in Baghmara C.D. Block with 40.7 percent, followed by Rongara C.D. Block with 25.6 percent and Chokpot C. D. Block with 19.7 percent.

Banking facility

Only 0.9 percent of the population of the district is served by this facility. In Baghmara C.D. Block, this facility is not availably 0.9 percent and 1.7 percent of the population of the C.D. Blocks are provided in Rongara and Chokpot C.D. Blocks respectively.

Agricultural Credit Societies

0.3 percent of the population of the district is served by this facility. The facility is available in Chokpot C.D. Block, where only 0.6 percent of the population is served by this facility.

Approach by Pucca Road Facility

37.9 percent of the population of the district is served by this facility. Highest range is recorded in Baghmara C.D. Block, where 53.1 percent of population of the C.D. Block is served by this type of facility followed by 34.9 percent in Rongara C.D. Block and the lowest range i.e 24.4 percent in Chokpot C.D. Block.

Power Supply Facility

33.8 percent of the population of the district is served by this facility which is not significant in terms of power supply to the rural population of the district 57.6 percent of the population of the Baghmara C.D. Block is served by this facility.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	172	6	1	179
(b) Middle School	320	139	66	525
(c) Degree College	4	12	579	595
2. Medical:-				
(a) Hospital	48	86	460	594
(b) PHC	267	134	188	589
3. Post Office	272	181	118	571
4. Telephone	8	23	564	595
5. Bus Service	256	159	69	484
6. Banks				
(a) Commercial Bank	10	25	558	593
(b) Cooperative Bank	36	80	478	594
7. Agricultural Credit Societies	17	26	551	594

This table depicts the distribution of villages not having certain amenities, arranged by distance, ranges from the places where these are available, 2001. It is observed as many as 96.1 percent of the villages are located within a distance of 5 Kilometres from the primary school and 60.9 percent of the villages are located within a distance of 5 Kilometres, from the middle schools. However, only 4 villages are within the distance of less than 5 kilometres from the degree colleges and as many as 579 villages are found to be located 10 + Kilometres distance from the degree college. In respect of medical facilities in the district, it is seen that only 8 percent of the villages are located within less than 5 Kilometres distance from the Hospital and 77.4 percent of the villages are located beyond 10 + Kilometres distance from the Hospital However, 45.3 percent of the villages are located within a distance of less than 5 Kilometres from the nearest P.H.C's. 1.3 percent, 1.7 percent , 6.1 percent and 2.9 percent villages are located within a distance of less than 5 Kilometres from the nearest telephone, commercial banks, co-operative banks and agricultural credit societies respectively. However, 52.9 percent of villages are located within a distance of 5 K.M from the nearest bus stop. It is seen that most of the villages are located in the distance of 10 + from the nearest telephone, banks and agricultural credit societies.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town(in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

This table shows the distribution of villages according to population range amenities available, 2001. It is observed that 580 villages are in the population range from 1-499 out of the total inhabited village of 595 and 14 villages are in the population range of 500-999 and only 1 village is in the population range of 1000-1999. It is seen that in 69.1 percent of villages in the population range of 1-499 are getting education facility 2.6 percent are getting medical facility, 41.4 percent are getting improved drinking water, 31.1 percent of villages are getting post office, 18.3 percent of the villages in Transport and Communications, 0.2 percent of the villages are getting bank, and Agricultural Credit societies, 24.5 percent are getting approach by pucca road and 18.3 percent of the villages are getting power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Chokpot	336			
2	Baghmara	149		NA	
3	Rongara	110			
	District Total:	**595**			

Note : - Cultivable area = irrigated area + unirrigated area

This table shows the distribution of villages according to land use 2001. In the absence of the cadastral survey the areas are not available.So this data could not be shown.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita expenditure								
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	V Baghmara (MB)	287.6	-	287.6	270.9	183.7	-	54.5	-	32.7
District Total		**287.6**	**-**	**287.6**	**270.9**	**183.7**	**-**	**54.5**	**-**	**32.7**

The above table indicates the per capita receipt and per capita expenditure under different heads of Baghmara Town (MB). Under the head of from all sources, per capita receipt is 287.6 which is only one head under receipt. Per capita receipt is not shown in the head of through taxes.

In case of per capita expenditures, out of 270.9, major amount of per capita expenditure is 183.7 under General Administration head 54.5 and 32.7 are per capita expenditure under the head of public works and others respectively. There in not shown any per capita expenditure is the heads of public health and conveniences and public institutions.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Baghmara (MB)	24.3	6.9	4.6	1.2	1.2
	District Total	**24.3**	**6.9**	**4.6**	**1.2**	**1.2**

The above table indicates the distribution of type of educational institutions per 10,000 population in the statutory town, during 2001. Highest range with 24.3 is recorded in respect of Primary Institutions. 6.9, 4.6, 1.2 and 1.2 are recorded in respect of Junior Secondary/Middle Secondary/Matriculation, Senior Secondary and College respectively. Except Primary level the ranges shown against other types of Educational Institutions are not impressive.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Baghmara (MB)	58
	District Total	58

The above table depicts the distribution of beds in Medical Institutions by number per 10,000 population in the town during 2001. The number of beds per 10,000 population in the town during 2001, is 58, which is not adequate in terms of medical facilities provided to people, being the headquarter of the district.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl No.	Name of the Town	Total population	Slum population	Percentage of slum population
1	2	3	4	5
		Nil		
District Total				

In the above table, data is not available as no notified slum areas are available in the Baghmara town which is only town area in the district.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1.	Baghmara (M B)	Brick, Cane & Bamboo Product, Handloom Cloth	Timber, Bamboo, Cane

The above table indicates the name of most important commodities exported out and manufactured in Baghmara town are Brick, Cane & Bamboo furniture and Handloom cloth. As this district is a hilly one, lots of valuable trees are available in its hills and some small scale industries has been set up depending on this resources. The most important commodities exported out from Baghmara town are, Timber, Bamboo and Cane.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS

Tenure status	Number of dweling room	Number of households

District Total		**17,469**	**15,860**	**1,609**	**395**	**303**	**66**	**16,498**	**15,279**	**1,219**

Data source: Census of India 2001, H-series: " Tables on Houses, Household amenities and Assets".

This table reveals the house holds by tenure status and number of rooms occupied in the district,2001. The number of dwelling household occupied in the district viz, one room, two rooms, three rooms, 3 + rooms including Scheduled Tribe and Scheduled Castes have been depicted in this table. It is observed that maximum number of households including Scheduled Tribes households and Scheduled Caste household are occupying two rooms household which constitutes 43.5 percent of household out of the total of 16315 households in the district. The Scheduled Castes and Scheduled Tribes household also show a similar trend.

The table shown in the previou page indicates the percentage of Households having improved drinking water source Electricity, Bathroom, Toilet and Drainage Facility, at District and C.D. Block levels during 2001. Type of facilities wise is discussed below

Improved drinking water facility

39.21 percent of the total households of the district are provided with this type of facility. In urban areas of the district this facility is available to 65.7 percent of the households of the urban area of the district 41.3 percent, 39.2 percent and 21.6 percent of the households of rural areas of Chokpot, Baghmara and Rongara C.D. Blocks respectively are provided with this type of facilities.

Electricity Facility

18.60 percent of the total households of the district is provided with this facility. In urban areas of the district 70 percent of the households is provided with this facility. It is 08.3 percent, 21.1 percent and 08.3 percent of the households of rural areas of Chokpot, Baghmara and Rongara C.D. Block respectively are provided with this facility.

Bathroom Facility

3.63 percent of the total households of the district is provided with this facility. In urban areas of the district, it is provided to 19.6 percent of the households. In rural areas it is provided to 01.2 percent of the households of Chokpot C.D. Block, 2.7 percent of households in respect of Baghmara C.D. Block and 02.2 percent households of Rongara C.D. Block.

Toilet Facility

49.85 percent of the households of the total areas of the district is provided with this facility. In urban areas it is provided to 76.2 percent of the households of the district. Highest range is recorded in Baghmara C.D. Block with 51.7 percent followed by Chokpot C. D. Block with 46.0 percent and Rongara C.D. Block with 40.6 percent.

Drainage Facility

It reflects the poor sanitation situation in the district as only 10.88 percent of the households of the total areas of the districts have drainage facility. In urban areas it is available only in 29.6 percent of the households. It is available to 12.0 percent, 05.4 percent and 09.9 percent of the households of rural areas of Chokpot, Baghmara and Rongara C.D. Blocks respectively.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Sl No.	C.D. Block	Total Rural Urban	Total Households	Fire wood	Crop residue	Cowdung cake	Electricity	Coal/Lignite (charcoal)	Cooking Gas (L.P.G.)	Bio-gas	Kerosene	Others	No cooking

District Total			**17,469**	**2,079**	**6,410**	**1,666**	**173**	**1,823**	**503**	**187**	**10,070**

This table shows the number of households availing banking services and number of households having each of the specified assets, 2001. It is seen that 36.6 percent of the household using Radio/ Transistor in Chokpot C.D.Block, 39.3 percent in Baghmara C.D.Block and 32.4 percent in Rongara C. D. Block Television are available in only 5.7 percent of the household in Chokpot C.D.Block, 14.4 percent in Baghmara C. D. Block and only 5.1 percent in Rongara C. D. Block. Bicycles have been used in 9.9 percent of the household in Chokpot C.D.Block, 13.9 percent in Baghmara C.D.Block and 2.6 percent in Rongara C. D. Block. Other assets used by the household like Telephone, Scooter, Motorcycle, Moped, Car, Jeep and Van are found to be very less.

Major Social and Cultural events

Important Social events in the district as well as in the state are welfare of the Handicapped, child welfare, Medical treatment to ailing poor aged persons, Social Assistance Programme (NSAP-old age pension, Anti Drug Campaign etc child welfare awareness programme was organised in Baghmara, Chokpot, Rongara and Nangalbibra in 1994-95 with the help of voluntary organisation.

Welfare of Handicapped

As per provision of the " person with disability Act, 1995, issue of Identity Card to the disabled in Compliance with the provision of the above Act. The financial assistance like supply of books, uniforms and other allowances etc are also provided to such persons since 1999.

Women Welfare Awareness Progress was organised through voluntary organisations during 1996 -97 at Baghmara, Chokpot and Rongara to help the women in providing training on weaving, knitting and embroidery to set up enterprises for generating income.

Anti Drug Campaign Awareness Programme was also conducted in the district C.D.Block headquarter by the Voluntary Organisation in 1999.

Social Assistance Programme (NSAP) old age pension was also introduced in the district since 1997 -1998. In South Garo Hills old aged pension as per

date was given to 572 supplied by the Director of Community & Rural Development Meghalaya, Shillong persons in 1997-98, 956 in 1998-99 and 1135 in 1999-2000 and 941 families under below poverty line was identified and provided benefit to them during Ninth Plan.

There is no non major cultural events during 1991-2000 in the district. However, cultural department of the district has taken up various programmes to improve cultural activities in the district by organising yearly sports and cultural tournaments, youth festivals and zonal levels among rural school students since 1996-97.

Religious, Historical and Tourist Interest places

There are several places in South Garo Hills that can be developed for tourism. Some of them are historical importance; others are important because of their association with the cultural traditions of the Garo people and many of them again have deservedly earned fame for their scenic beauty. Much of the area still remains untouched, retaining almost intact the original flora and fauna which should have more of the attention of the scientists, or even the ordinary lover of Nature. Tourism, if properly developed, could be a potentially rich source of revenue to the district as well as to the State.

A few of the more important places are described in the following paragraphs:

1. Baghmara

This is a very important commercial town situated on the bank of Simsang river. It is the headquarter of the newly created South Garo Hills district. The distance of this town is 120 kilometres from Tura. It lies on the international border Bangladesh and Garo Hills. The population is 8,643 according to the 2001 Census.

The name Baghmara is given by the Bengali inhabitants who settled in and around Baghmara. The original name of this small town was Konagittim where its market place was known as Chimong Anti.

This Baghmara has its name after its founder Pa Balman A. Sangma whose nickname was Bong, who was born in 1840 at Siju village. During the British Administration, he had been appointed as Laskar in 1877. He came and settled at Konagittim after being made Laskar. He used to trade in Agar wood which was obtained from the jungles of the hinterland, in those days. Bong Laskar had earned reputation as a trader and philanthropist. Thus 'Chimong Anti' is named as 'Bong Bazar' after him.

In the year 1886, one day he killed a huge tiger at this spot with his bare hands by tearing its jaws apart. Thus he was apparently reputed as an intrepid hunter of more than ordinary strength . Local accounts suggest that the tiger was nine feet three inches long. The news of this feat spread all over the country side and hence the place became Baghmara (Bagh- tiger, mara- killed) and that whole area was called Baghmara.

After Independence, the importance of Baghmara as a trading centre dwindled owing to the closure of the natural outlet through what was then East Pakistan. A weekly market is, however, still being held on Tuesday. Baghmara is popular for the tasty fish caught from Simsang river which flows through the township. The fish is sold to other neighbouring States.

At present, Baghmara has become one of the most important places in the State, being the headquarters of the district and also Baghmara Development Block. It also has all the amenities of a town like Post Office, Hospital, Veterinary Hospital, High Schools, Middle Schools and a newly created College.

Other important establishments are the State Bank of India and Meghalaya Cooperative Apex Bank with its branches. Cooperative societies like Weavers' Society, Consumers' Society, Marketing Society Service, Credit Union, etc. have been established in this town.

2. Balpakram

This hilly area, situated in the southeastern corner of South Garo Hills is about 200 sq. km. in extent with a maximum elevation of 1,206 metres. The deep gorge that cuts into the plateau

forms a natural channel for strong winds blowing in regularly from the South, hence, the name ' Balpakram' which means" blowing across", the belief being that anything carried by these winds, even the soul of the dead, comes to rest here.

This place is indeed believed by the Garo people to be the abode of the spirits of the dead and there are many landmarks in and around this plateau which are associated with particular activities of the dead, on their journey to their eternal abode. Believing that the spirit of the dead must go to Balpakram, the Garos usually place some coins in the palm of a dying person so that he or she can use the money to pay the boatman who will ferry him across the river of death. This practice is still being done, not only among simple folk.

The Balpakram plateau has several salt licks and for this reason it is infested with wild animals of all kinds, mostly elephants which discourage human habitation by destroying cultivations and dwelling houses. Few trees can grow here, the vegetation mostly consisting of bushes and shrubs of low growth and ubiquitous high grass.

A Wild-life Sanctuary has been set up in this area by the Government of Meghalaya to ensure the preservation of several species of wild animals, some of which are very rare.

Of the many spots in Balpakram that are associated with the spirits of the dead in Garo folk-lore, the following need particular mention:

Foremost among these is perhaps the small pool called by the Garos " Chidimak" (literally, " dark, shallow water'). The water of this pool are indeed very dark, the belief being that the spirits of the dead take their bath here before they take their food and continue on their journey to their ultimate destination.

Others are:

(i) Bandi-ni Jal'ang- (lit. the makeshift bridge of Bandi) Bandi was the brother of Dikki, one of the heroes of Garo Epic

(ii) Boldak Matchu Karam-Refers to the place where grow trees of a particular kind to which sacrificial bullocks are tied.

(iii) Chi-mite (or mit-de) – Literally, water-god.

(iv) Dikki-ni Ring- i.e., the dug-out canoe of Dikki. This is a rock shaped like a dug-out. Long ago, so it is said, Dikki set out to carve a dug-out from a rock within one night, but before he could complete it, the cock crowed and Dikki had to abandon the work.

(v) Do'de mesaram- i.e., the dancing place of peacocks.

(vi) Ganchi So'ram- i.e., the platform where the funeral pyre is erected.

(vii) Goera Rong' gata or Rong'jaleng- i.e., the stone bridge of Goera, the God of thunder.

(viii) Giting Kera-Onram- i.e., the spot where the mythical heroine Giting placed her basket while resting.

(ix) Matchru-ni- Anti- i.e., the market place of civets.

(x) Matchru-ni Dikking-i.e., the trough of civets.

(xi) Mat- memang- the name given to a spirit which often plays mischief by transforming its shape.

(xii) Mebit Mebang- (Lit. rice grain). These so-called grains or rice are actually coarse sand particles deposited year by year upon a prominent rock by natural agencies. The local belief is, however, that this is the work of a female deity named Rokkime who has her above in that rock. It is also said that whichever direction facing that part of the rock that shows the heaviest deposit of these 'rice grains' is likely to have greater crop of rice in that particular season.

(xiii) Memang Misal Cha'ram- i.e., the place where the spirits have their midday meal.

(xiv) Netapani Nokkap- i.e., the site of the former dwelling of Net',s father, Neta also being the name of a mythical character.

(xv) Rang Dokram- i.e., the place where the gongs are beaten.

(xvi) Rong'Matchu Karam- i.e., the stone to which bullocks are tied before they are sacrificed to the dead.

(xvii) Rong'Mite or Mit-de- lit. god of the rocks (or of a particular rock).

(xviii) Sogin Sa' ram-Lit. the place where vultures make their nests. At this spot, in fact, great flocks of these birds that are commonly associated with death have their nests.

(xix) Wa'memang- i.e., Evil spirits that usually make their abode in thick bamboo groves.

3. Chigitchakgre

This place in situated about thirty-three kilometers from Baghmara town and near the upper reaches of the Rompa River. Here is a rock cave known as Te'teng Kol which believed to be the abode of elves. The place itself is of striking beauty.

Within the cave in a rock formation that bears the shape of a cot and which is believed to be the bed of elves. This is connected by a very imposing pathway leading northwards in the recesses of the cave. Inside is a piece of rock shaped like a basket which is called Te'teng-ni Jengkok, that is, the large-sized basket of the elves. This cave has yet to be fully explored.

4. Emangre

It is situated in the eastern part of the district. This place is famous for its handicrafts in canes and reeds and for its wood carvings and bamboo crafts. The Bachelors Dormitories or Nokkpantes in this area are more lavishly decorated with carvings on every post and pillar than are their counterparts elsewhere. There is usually very keen competition in the decoration of Nokpantes in this area. Each resident clan has its own Nokpante and young boys from the age of twelve reside there till they reach marriageable age and leave for their wives' households.

Near the village, within the Emangre Reserved Forest, there is a famous and beautiful pool Dombe Wari or Dombe's pool, so-called because, according to legend, it was here that a beautiful maiden named Dombe, with other members of her family, was drowned because she refused to be the bride of a merman who was in love with her. In his fury he caused the whole hillock on which her dwelling stood to sink into the waters overnight. This pool can still be seen today.

5. Nangalbibra

This important place is situated near the confluence of the Nongal and the Simsang Rivers in South Garo Hills District.

There are rich deposits of coal in and around this place. The place is electrified. Both mining and electrical undertakings are being undertaken by the Government and progress has, as a result, been fast. A Hospital and a Post Office are located here.

6. Siju

It is a small but very popular village situated on the banks of the Simsang river, some 19.2 kilometres away from the nearest town, Baghmara. There are extensive limestone and coal deposits in the surrounding areas. The river Simsang abounds in fish of many varieties and in winter, specially during the months of December and January, people of the villages on its banks participate in community fishing in the many deep pools of the river. At such times, because of the great demand for fish, people from many parts of Garo Hills traditionally gather here to buy the catch, the local varieties of fish being deservedly famous as table varieties. In recent years because of easier communication, traders come here even from places as far as Guwahati and other places in Assam.

Siju village has two entities. The one is an old village which is known as Songmong and another the new model village settled and situated on the Baghmara-Dudhnoi road. This new model village of Siju is just about 20 km from the nearest town, Baghmara. The distance from Tura to this diversion Road to Siju Cave is 105 km. There are extensive limestone and coal deposits in the surrounding areas. The place is famous for its Cave known as, " DO BAKKOL " or the " CAVE OF BATS " which may be regarded as one of the most wonderful caves in this region, with great potentials for being developed as a Tourist spot. The distance of this cave from the main road is about 4 km. There are thousands of bats living in this cave, hence the name.

One will find also the running stream flowing right from inside the Cave and joining the main Simsang river about 200 meters below. There is also one weekly market at this spot.

The entrance of this Cave is gorgeous and beautiful. The length and depth of this Cave is unexplored. Inside the cave there are beautiful stalagmites and stalactites of cylindrical and conical shapes formed which are removed by the visitors due to the protection measures not being taken by the Government

At present, one cemented footpath has been constructed for the pedestrians from the market place upto the entrance of the cave. The spot is beautiful and has a tourist attraction for its natural environmental surroundings. The diversion road from the main road upto the Siju cave also has not yet been properly maintained. It has a great tourist potentials.

Major Characteristics of the District

The district is predominately rural. The predominate Scheduled Tribe Population is Garos and predominate language is also Garo. Major religions groups are Christan and Sansarik. Occupation of the persons are under Agricultural and Forest based economic activities. The district has abundant forest and mineral resources. The district is economically and industrially backward.

Scope of Village and Town Directory

Incorporation of non-census data in the District Census Handbook known as the Village Directory and the Town Directory started in the 1971 census. In that census the data presented in the Village Directory were educational and medical facilities, drinking water, post and telegraph, market days, communication (bus stop, railway station and water way), nearest town from the village, power supply and staple food. On land use pattern the data presented were forest, area irrigated, area unirrigated, cultivable waste and area non-available for cultivation. Data on land use pattern could not be shown due to their non-avaiilability.

In the 1981 census, by and large, the same data as that of 1971 were presented in the Village Directory. The only addition to that of 1971 was approach to the village, the area under jhum cultivation due to heavy demand on those data by the data-users. In the 1991 census, the same data were presented without addition or subtraction.

In the Census of India, 2001, the scope of the Village Directory has been enlarged to cover data on telephone facilities, the number of commercial and co-operative banks, the number of agricultural, non-agricultural and other credit societies, recreational and cultural facilities (cinema/video halls, sports club, stadium/auditorium) available in the village. It also covers data on receipt of newspaper/magazine in the village and the most important commodities manufactured in the village.

The Town Directory of the 1971 census had seven statements. Statement-I presented data on status, growth, history and functional categories of towns; Statement-II, Physical Aspects and Location of Towns; Statement-III, Municipal Finance; Statement-IV, Civics and other Amenities; Statement-V, Medical, Educational, Recreational and Cultural Facilities in towns; Statement-VI, Trade, Commerce, Industry and Banking; and Statement-VII, Population by Religions. Statement I to VI were retained in the 1981, 1991 and 2001 census also. In the 1981 and 1991 censuses, Statement-VII was dropped and Statement-IVA, showing civic and other Amenities in slums was incorporated. In the Census of India, 2001, Statement-IVA has been replaced by Statement-VII displaying the same data as Statement-IVA.

PART-A
VILLAGE AND TOWN DIRECTORY

Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

Column 6 : Educational

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab,etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family W`elfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i)	Agricultural Credit Society	CS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I : It gives the abstract of educational, medicaland otheramenities available in villages C DBlock wise of the district.

Appendix-I-A : Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B : Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C : Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A : Indicates list of Census Towns which do not have one or more amenities.

Appendix-III : It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV : C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V : Summary showing number of villages not having Scheduled Castes population.

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII : The appendix shows the list of villages according to proportion of the

Appendix-VII-B : Scheduled castes and Scheduled Tribes to the total population by ranges.

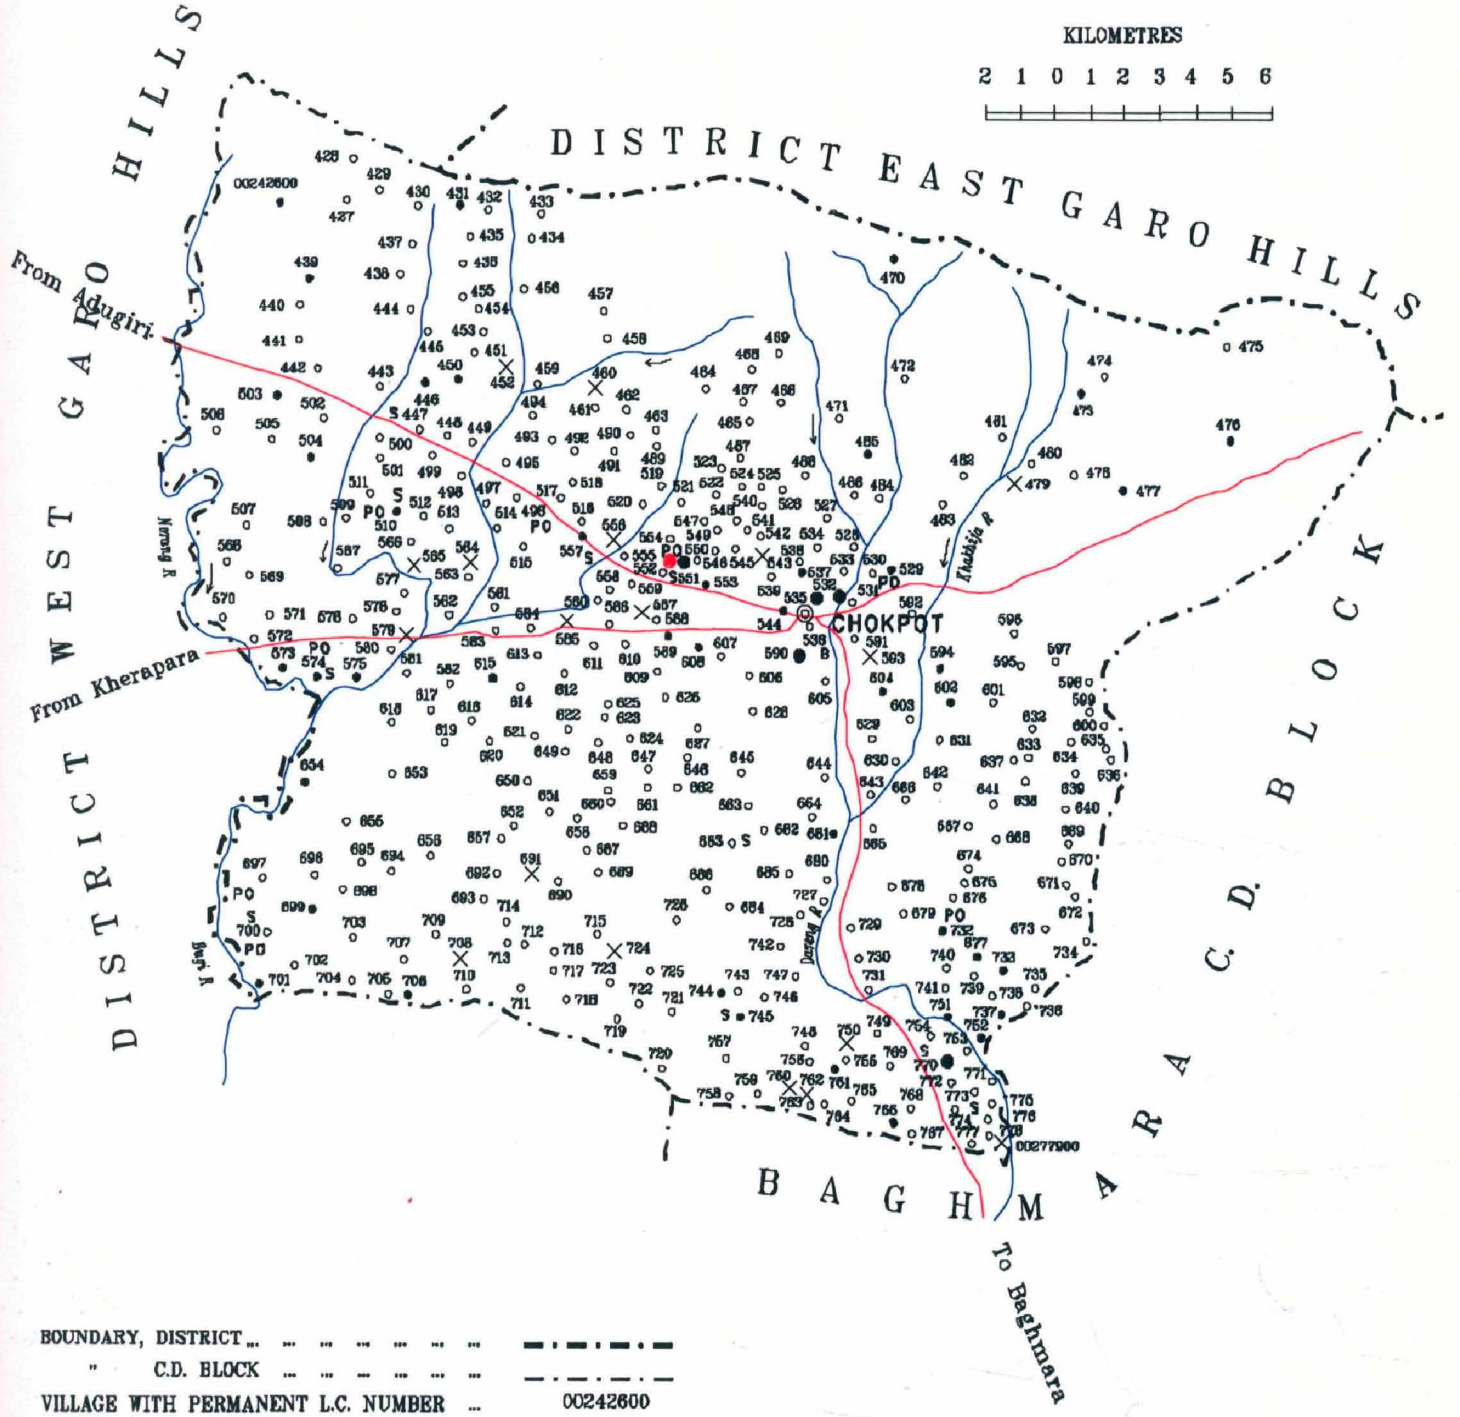

Appendix-VIII : Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX : Shows number of different types of girls school in a village.

APPENDIX 1A - Village Directory
Villages by number of Primary Schools

Name of the District : South Garo Hills

Sl. No.	Name of C. D. block	Total number of inhabited villages	Number of primary schools				
			None	One	Two	Three	Four +
1	2	3	4	5	6	7	8
1.	Chokpot	336	138	192	6	-	-
2.	Baghmara	149	27	116	5	1	-
3.	Rongara	110	14	92	4	-	-
	District Total:	**595**	**179**	**400**	**15**	**1**	**-**

APPENDIX 1B - VILLAGE DIRECTORY
Villages by Primary, Middle and Secondary Schools

Name of the District : South Garo Hills

Sl No.	Name of C. D. block	Total number of inhabited villages	Type of educational institutions available			
			No of School	At least one primary school and no middle school	At least one primary school and one middle school	At least one middle school and one secondary school
1	2	3	4	5	6	7
1.	Chokpot	336	138	164	34	9
2.	Baghmara	149	27	101	21	5
3.	Rongara	110	14	81	15	7
	Total:	**595**	**179**	**346**	**70**	**21**

APPENDIX - 1C - VILLAGE DIRECTORY
Villages with different sources of drinking water facilities available

Name of the District : South Garo Hills

Sl. No.	Name of C. D. block	Number of villages with different sources of drinking water available				
		Only tap	Only well	Only tube well	Only handpump	More than one source only from tap, well, tube well, handpump
1	2	3	4	5	6	7
1.	Chokpot	6	3	-	-	53
2.	Baghmara	1	-	-	-	32
3.	Rongara	6	-	-	-	8
	District Total:	**13**	**3**	**-**	**-**	**-**

APPENDIX II - Village Directory

Villages with 5,000 and above population which do not have one or more amenities

Name of the District : South Garo Hills

Sl. No.	Name of village	Location code number	Name of C. D. block	Popul-ation	Amenities not available (indicate N. A. where amenity not available)			Amenities not available (indicate N. A. where amenity not available)			
					Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Comm-ercial Bank
1	2	3	4	5	6	7	8	9	10	11	12
NIL											

APPENDIX III - Village Directory

Land utilisation data in respect of Census Towns/Non-municipal towns.

Name of District : South Garo Hills

Sl.No.	Name of Census Town and C.D. Block within brakets	Landa used (i.e.,area under different types of land used in hectare)					
		Total area	Forest	Irrigated by source	Unirrigated	Cultivable waste (including gauchar & groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
Not Available							

APPENDIX IV - Village Directory

C.D. block wise list of inhabited villages where no amenity other than drinking water facility is available

Name of the District : South Garo Hills

Serial number	Location code number	Name of village
1	2	3
Name of C.D. Block : Chokpot		
1.	00242900	Rongdi Anchenggiri

APPENDIX V - Village Directory

Summary showing number of villages not having Scheduled Castes population

Sl. No.	Name of C.D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1.	Chokpot	354	18	336	334
2.	Baghmara	153	4	149	146
3.	Rongara	120	10	110	107
	District Total:	**627**	**32**	**595**	**587**

APPENDIX VI - Village Directory

Summary showing number of villages not having Scheduled Tribes population

Sl. No.	Name of C. D. block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1.	Chokpot	354	18	336	5
2.	Baghmara	153	4	149	-
3.	Rongara	120	10	110	-
District Total:		**627**	**32**	**595**	**5**

APPENDIX VII A - Village Directory

List of villages according to the proportion of the Scheduled Castes to the total population by ranges

Name of the District:South Garo Hills

Range of	Location code	Name of village
1	2	3
Name of C.D. Block : Chokpot		
Less than 5		
	00274500	Silki Christiangittim
	00277000	Rongrikimgre
Name of C.D. Block : Baghmara		
Less than 5		
	00279800	Pattal Gittim
	00280400	Rongsa Awe
	00278300	Rongkandi Dengjama
Name of C.D. Block : Rongara		
Less than 5		
	00293400	Rongsu Agal
5-10		
	00301800	Malikona
	00304500	Mohadeo Warima

Note:- Villages having NIL Scheduled Castes Population have been excluded

APPENDIX VII B - Village Directory

List of villages according to the proportion of the Scheduled Tribes to the total population by ranges

Name of the District:South Garo Hills

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
Name of CD Block: Chokpot		
11-20		
	00274600	Aringakolgiri
76 and above

Section II - Town Directory

Town Directory

Note explaining the abbreviations used in the Town Directory

Town Directory statements (I to VII)

Statement - I

Status and Growth History:

Column (2) : Class, name and civic administration Status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement - II

Physical Aspects and Location of towns, 1999:

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditurein thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement - IV

Civic and Other amenities, 1999:

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement-V

Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 : The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 : The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes "Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11to14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement - VI

Trade, Commerce, Industry and Banking, 1999:

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement -VII

Civic and other Amenities in Slums, 1999:

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

PART - B

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been

restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I-VIII

Annexure-I

Number of villages under Gram Panchayats

There is no Gram Panchayats as Administration Units in the State of Meghalaya. Hence, the data is not available and cannot be furnished under this Annexure.

Annexure-II

Fertility, Mortality and Migration

Fertility, mortality and migration are the three components of population change. They balance against one another. In combination they determine whether a population will grow, decline or remain static. A population increases due to births, it decreases due to deaths and either increases or decreases due to net migration. The definition of each of the above is given below.

Fertility

In demography, the term fertility is used in relation to the actual production of children or occurrence of births. Fertility is a measure by which a population adds to itself and normally assessed by relating the number of births to a full or part of the population, such as the number of married women or women of the child-bearing age. It must, however, be remembered that fertility has all to depend on marriage. No marriage, no fertility. Early marriage, high fertility and late marriage, low fertility. Crude Birth Rate (CBR) is the most simple and perhaps the most widely quoted measure of fertility. It is the ratio of the number of live births in a year to the midyear population normally expressed per 1000 population.

Mortality

Mortality is the cessation of life of a member of a population commonly known as death. It is a measure by which a population deducts from itself and normally assessed by relating the number of deaths to the population. Crude Death Rate (CDR) is the simplest and most used measure of mortality. It is the ratio of the number of deaths in a year to the midyear population normally expressed per 1000 population.

Migration

Migration is the third component of population change. It is a movement of the population from one place to another for various reasons. In census migrants are classified by place of birth and place of last residence. A persons is considered a migrant by place of birth if the place he/she is enumerated during census is other than the place of his/her birth. Similarly, a persons is considered a migrant by place of last residence if he/she is enumerated in a place other than his/her immediate place of last residence. A person enumerated in his/her place of birth can be a migrant by place of last residence if his/her immediate place of last residence is other than his/her place of birth.

Annexure-III

Various measures of fertility and mean age at marriage

The various measures of fertility have been given in the Analytical Note under the non-census-concepts. In this annexure we are going to analyse the following indicators of fertility.

(i) General Fertility Rates (GFR):

It is the number of live births per 1000 women in the reproductive age-groups (15-49) years in a given year. From the table we know that average General Fertility rate of the State comes to 129.7. Amongst the districts, East Garo Hills is having lowest fertility rate with only 105.7 while West Khasi Hills district gives highest rate with 155.8.

(ii) General Marital Fertility Rates (GMFR):

It is the number of live birth per 1000 married women in the reproductive age-group (15-49) years in a given year. The table shows that the General Marital Fertility rate of the State as 140.1 and the West Khasi Hills district shows highest rate with 168.3 while East Garo Hills shows lowest rate with 114.3.

(iii) Total Fertility Rates (TFR):

It is the total of the Age Specific Fertility rates for the entire reproductive age span. It shows the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of the reproductive period. The table indicates the total fertility rate of

Various measures of fertility and mean age at marriage, 1991

Sl. No.	State/District	GFR	GMFR	TFR	TMFR	CBR	No of children ever born per woman in age group 45-49	Child woman ratio	Mean age at marriage
1	2	3	4	5	6	7	8	9	10
1.	**Meghalaya State**	**129.7**	**140.1**	**4.2**	**4.5**	**22.6**	**4.8**	**6.8**	**19.3**
2.	Weast Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
3.	East Garo Hills District	105.7	114.3	3.4	3.5	20.2	4.1	7.0	19.2
4.	South Garo Hills District	115.5	124.0	3.7	4.0	22.2	4.7	6.5	18.7
5.	West Khasi Hills District	155.8	168.3	5.0	5.3	24.8	4.9	8.2	19.6
6.	Ri-Bhoi District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
7.	East Khasi Hills District	132.9	150.0	4.3	4.6	22.0	4.9	6.1	19.9
8.	Jaintia Hills District	153.1	167.6	4.9	5.3	25.6	5.4	8.2	19.1

the State as 4.2. The higest rate amongst the district indicate in West Khasi Hills with 5.0 and the lowest rate in East Garo Hills with 3.4.

(iv) Total Marital Fertility rate (TMFR):

It is the average number of children that would be born to a married woman if she excercises the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of the reproductive period. As per the table the Total Marital Fertility rate of the State is 4.5. West Khasi Hills and Jaintia Hills districts shown the highest rate with 5.3 each while East Garo Hills gives lowest rate with 3.5.

(v) Crude Birth Rate:

It is the ratio of the number of live births in a particular year to the mid year population of the same year, expressed per 1000 population. The Crude Birth rate of the State Shows as 22.6 and the highest rate with 25.6 is shown in Jointia Hills district while the lowest rate with 20.2 is shown in East Garo Hills district.

(vi) Number of Children Ever Born per Woman in age group 45-49:

This table presents the number of childredn ever born per woman in the aghe group of 45-49. From the table we find the average number of children ever born per woman aged 45-49 as 4.8 for the state. Jaintia Hills district gives highest number with 5.4 while East Garo Hills gives the lowest number with only 4.1.

(vii) Child Women Ratio:

It is the number of cfhildren in the age group 0-4 years per 1000 women in the age group 15-49 years. The table shows the child women ratio as 6.8 for the State. Both West Khasi Hills and Jaintia Hills give higher ratio with 8.2 each while Ri_Bhoi district and East Khasi Hills give lowest with 6.1 each.

(viii) Mean Age at Marriage:

It is the mean age at marriage of currently married women during the decade. The mean age at marriage for the state indicates 19.3. In the district level the mean age at marriage shows higher in Ri-Bhoi district and East Khasi Hills district with 19.9 each while it is low in West Garo Hills and South Garo Hills with 18.7 each.

Annexure-IV

Migration

Migration is one of the important aspect in the field of population studies. A community or country can gain population either by births or by inmigration. It can lose population by deaths or by outmigration.

Migration is therefore, like births and deaths, is a major factor in changing the size and structure of the population. It affects the areas to which the migrants move and from which they move out. As stated in Annexure-II, in the census of India, migrants are classified only by place of birth and place of last residence.

Migrants by place of birth, 1991

Birth place	Meghalaya	South Garo Hills
1	2	3
Total Migrants	267682	86,973
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	141304	48,349
	(52.8)	(55.6)
Born in other districts of the state of enumeration	27429	4,377
	(10.2)	(05.0)
States in India beyond the state of enumeration	78895	24,581
	(29.5)	(28.3)

Migrants by place of birth, 2001

Birth place	Meghalaya	South Garo Hills
1	2	3
Total Migrants	358,447	12,062
	(100.0)	(100.0)
Born elsewhere in the district of enumeration	209,891	7,413
	(58.6)	(61.5)
Born in other districts of the state of enumeration	44,108	2,630
	(12.3)	(21.8)
States in India beyond the state of enumeration	92,088	1,622
	(25.7)	(13.4)

From the tables it is noticed that at both state and districts levels, the highest proportion of the migrants have their place of birth within the district of enumeration followed by those whose place of birth is in other state of India beyond the state of enumeration. At state and district levels the proportion of those whose place of birth is within the districts of enumeration is 58.6 % and 61.5 % respectively. The proportion of those whose place of birth is in other districts of the state of enumeration form 12.3 % of the total migrants at state level and 21.8 % at district level.

It is further noticed that the district level proportions of the migrants whose place of birth is within the district of enumeration and also those born in other districts of the State of enumeration are higher than those at the State level.

Migrants classified by place of last residence - 1991

Place of last residence	MEGHALAYA	South Garo Hills
1	2	3
Total	266,844	87,624
	(100.0)	(100.0)
Elsewhere in the district of enumeration	156,563	55,368
	(58.7)	(63.2)
In other districts of the state of enumeration	26,301	4,774
	(9.9)	(5.4)
States in India beyond the state of enumeration	70,318	22,799
	(26.4)	(26.0)

Migrants classified by place of last residence - 2001

Place of last residence	MEGHALAYA	South Garo Hills
1	2	3
Total	379,192	15,422
	(100.0)	(100.0)
Elsewhere in the district of enumeration	244,916	11,459
	(64.6)	(74.3)
In other districts of the state of enumeration	41,572	2,639
	(11.0)	(17.1)
States in India beyond the state of enumeration	83,082	1,012
	(21.9)	(6.6)

The proportion of those whose place of last residence was in other State of India beyond the state of enumeration are 21.9 % at State level and 6.6 % at district level. The proportion of those migrants whose place of last residence was outside India form only little over 2.0 % of the total migrants at state level and a little over 2.0 % at district level.

It is further noticed that while the district level proportion of migrants who had their place of last residence elsewhere in the district of enumeration and also in other districts of the state of enumeration are higher than that at State level, the state level proportion of those migrants in other state of India beyond the state of enumeration are higher than that at district level.

Annexure – V

Religions

Religions are one of the most important social institutions. It is also one of the basic characteristics of the population. It has tremendous power to influence the cultural traits and social behaviours of a society. For this reason, it has been one of the field of interest of anthropologists, demographers, administrators and planners. To meet the various requirements of the aforesaid professionals, it has been customary in population census to collect the religion professed by the population. But since India is a secular nation where an individual can professed and practice any religion of his choice, the number of religion collected in census runs to hundreds. It is however, not feasible and practicable to present data on all religions and their denominations. Therefore, in census the population is classified by six major religions only. Those major religions are Hinduism, Islam, Christianity, Sikhism, Buddhism and Jainism. The rest of population professing and practicing religions are grouped under "Other religions and persuasion". The population who cannot or do not wish to state their religions are clubbed under "Religion not stated".

Percentage distribution by religion

Religious communities	1991				2001			
	Persons	Percentage			Persons	Percentage		
		Total	Rural	Urban		Total	Rural	Urban
1	2	3	4	5	6	7	8	9
South Garo Hills *								
All Religions	77,073	100.0	92.4	7.6	100,980	100.0	91.4	8.6
Hindus	3,880	5.0	3.4	1.6	4,880	4.8	3.2	1.7
Muslims	254	0.3	0.2	0.1	2,767	2.7	2.6	0.2
Christians	67,555	87.7	81.7	5.9	90,526	89.6	83.0	6.7
Sikhs	9	0.0	0.0	0.0	35	0.0	0.0	0.0
Buddhists	3	0.0	0.0	0.0	161	0.2	0.1	0.0
Jains	0	0.0	0.0	0.0	13	0.0	0.0	0.0
Others	5,349	6.9	6.9	0.0	2,418	2.4	2.4	0.0
Religion not stated	23	0.0	0.0	0.0	180	0.2	0.2	0.0

From the above table, it is noticed that the majority of the population of the district are Christians. At State level, the Christians constitute 70.3 % while at district level is 89.7 %. Hindus constitute little over 13.0 % of the population at state level while at district level it constitute little over 4.8 % . The Muslim, the Buddhists, the Sikh the Jain form an insufficient percentage of the population at both state and district level. The proportion of those populations who profess "Other religions and persuasions" gives 11.5% and 2.4 % at state and district levels respectively.

Annexure – VI

Marital Status

Though not all the married couples can produce children, fertility is the outcome of marriage. Without marriage there cannot be fertility. Various indicators of fertility discussed at Annexure – III can be calculated only by taking into consideration the number of married female and the number of children born in the year. Therefore, it is essential and important that in every census the marital status of each and every individual irrespective of age and sex is collected. On the basis of return thus collected, the population, both male and females, is classified into four marital status. These four marital status are Never Married, Married, Widowed and Divorced/ Separated.

Percentage distribution of population by marital status, 2001

Area Name	Age-group	Total		Never married		Married		Widowed		Divorced/Separated	
		Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12
South Garo Hills *	All ages	100.0	100.0	61.6	56.5	37.1	38.3	1.1	4.5	0.2	0.7
	0-9	100.0	100.0	100.0	100.0	0.0	0.0	0.0	0.0	0.0	0.0
	10-14	100.0	100.0	99.2	97.8	0.6	1.9	0.1	0.2	0.1	0.1
	15-19	100.0	100.0	97.9	83.9	2.1	15.5	0.1	0.2	0.0	0.4
	20-24	100.0	100.0	74.0	35.2	25.8	61.9	0.2	1.3	0.1	1.6
	25-29	100.0	100.0	34.9	12.0	64.4	84.6	0.5	2.2	0.1	1.3
	30-34	100.0	100.0	15.3	5.9	83.9	89.7	0.6	2.8	0.2	1.5
	35-39	100.0	100.0	6.0	3.1	92.5	91.8	1.2	4.0	0.3	1.2
	40-44	100.0	100.0	4.1	1.7	94.0	88.8	1.1	7.8	0.7	1.6
	45-49	100.0	100.0	2.6	1.2	95.4	84.9	1.7	12.8	0.3	1.1
	50-54	100.0	100.0	1.7	2.1	94.8	80.6	2.8	16.4	0.6	1.0
	55-59	100.0	100.0	2.1	1.1	94.1	76.3	2.8	21.9	1.0	0.7
	60-64	100.0	100.0	1.3	2.3	91.6	59.6	6.2	36.9	0.9	1.2
	65-69	100.0	100.0	2.2	2.5	88.0	54.6	8.7	41.3	1.1	1.5
	70-74	100.0	100.0	1.6	2.2	83.4	39.2	13.5	57.3	1.6	1.4
	75-79	100.0	100.0	1.5	4.1	77.8	37.2	18.5	58.1	2.2	0.6
	80+	100.0	100.0	4.5	4.3	79.0	32.6	15.5	62.0	1.0	1.1
	Age not stated	100.0	100.0	73.9	68.8	24.6	27.3	1.4	3.9	0.0	0.0
	Less than 18	100.0	100.0	99.6	98.3	0.3	1.5	0.0	0.1	0.0	0.0
	Less than 21	100.0	100.0	98.8	94.4	1.1	5.3	0.0	0.1	0.0	0.1

Note : Total will not add up to 100.00 as "Unspecified" marital status is excluded

From the above table, it is noticed that the marital status of cent percent of male and female population upto 9 years of age is "Never Married" which shows that the child marriage is not practiced in the district. The Never Married population constitute the majority of the population of both sex followed by the Married population. The widowed and Divorced/ Separated populations form a very insignificant proportion of the district.

By age group, it is noticed that the highest proportion of the married males is in the age group 45 – 49 while that of females in the age group 35 – 39 and the lowest for both males and females is in 10 – 14.It is also noticed that widowed females are more than widowed males almost in all age groups. The highest proportion of the Divorced/Separated males is in the age group 75– 79 while that of females is in the age group 40 – 44.

Annexure – VII

Age, Sex and Education level

With a view to finding out the extent of literacy of the population, it has been a practice in census to ask of all those aged 7 and above, whether or not they are literate, that is whether or not they can both read and write with understanding in any language, besides asking about the age and sex of each individual. Those of the population who are literate, another question about their educational attainment are asked of. On the basis of the replies to those two questions, the population is classified into literate and illiterate and the literate are further classified by age and sex and educational levels.

(i) Literate without educational level.
(ii) Below Primary
(iii) Primary
(iv) Middle
(v) Matric/Secondary
(vi) Higher Secondary/Intermediate/Pre-University/ Senior Secondary
(vii) Non-Technical Diploma or Certificate not equal to Degree
(viii) Technical Diploma or Certificate not equal to Degree
(ix) Graduate and above.

For the purpose of this annexure, however items (vi), (vii) and (viii) are clubbed together.

EDUCATIONAL LEVEL BY AGE AND SEX FOR POPULATION AGE 7 AND ABOVE

From the table, it is noticed that the highest proportion of both the male and female literates with more than 36.0 % have 'Below Primary' as their education level followed by the proportion of those with 'Primary', 'Middle'. and 'Matric/Secondary' with more than 26.0%, 15.0% and 14.0 % respectively. The literate without Educational level, 'Higher Secondary/P.U. etc' and 'Graduate and above' do not form even 10.0% of the literates of the district.

The proportion of literates by age, it is noticed that the highest proportion of both males and females with 95.0% and 97.0% respectively are found among the age of 8 years in the educational level of "Below Primary". The highest proportion in the educational level of 'Primary' is indicated in the age of 15 years, in the 'Middle' among the males in the age of 19 years and female in the age of 17 years and 'Matric/Secondary' among males 30-34 age group and among females 25-29 age group.

Annexure – VIII

Mother Tongues

Though besides the mother tongue of an individual two other languages known by an individual is collected in census, tabulation and presentation of language data is base on the mother tongue of an individual. By definition, mother tongue is a language spoken by a person's mother to the person in his childhood. If the mother died in infancy, the language mainly spoken in person's home in childhood is the mother tongue of that person. In case of infants and deaf-mutes, the language usually spoken by the mother is the mother tongue.

India is a multi-lingual nation, collection of the mother tongue of each and every individual in various censuses has thrown light on the linguistic and ethnic composition of the country as well as the states. In India there are 18 scheduled languages and 96 non-schedule languages. Even in a small state like Meghalaya more than 80 non-scheduled languages are spoken in addition to the 18 scheduled languages. However, for the purpose of this annexure, we are presenting only those biggest mother tongues arranged in descending order irrespective of the languages being scheduled or non-scheduled. The statement given below shows the percentage distribution of the numerically biggest languages arranged in descending order of the number of speakers in district.

POPULATION BY MOTHER TONGUE
