MOTIF

PILAK

The Pilak or pilak pathar is located 100 Kms. away from Agartala towards South in Belonia Sub-division is indeed a treasure house of Buddhist sculptures and scripts belonging to the 8^{th} –10^{th} century. Archaeological excavation has unearthed images of lord Buddha, rock-cut inscriptions, a good number of gold coins and seals on burnt clay. The archaeological treasure of Pilak have opened up a new horizon of thoughts for the scholars, in history and archaeology. A colossal image of sun god, also found from this site in recent past, has made Pilak a great center of historical interest. A part of the Pilak –Thakurani Tilla has been made a "protected place" of archaeological interest by the Archaeological Department, Government of India. Tourist can stay in the Pantha Nivas- a Government guest house at nearby Bagafa.

PART A- VILLAGE AND TOWN DIRECTORY

Section I- Village Directory

(a) Note explaining the abbreviations used in Village Directory 85
(b) RD Block wise presentation of Village Directory Data

Killa RD Block

(i) RD Block Maps showing RD Block boundary 91
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 93
(iii) Presentation of Village Directory data in prescribed format 94

Amarpur RD Block

(i) RD Block Maps showing RD Block boundary 101
(ii) Alphabetical list of villages along with location code 1991 and 2001 103
(iii) Presentation of Village Directory data in prescribed format 104

Matarbari RD Block

(i) RD Block Maps showing RD Block boundary 117
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 119
(iii) Presentation of Village Directory data in prescribed format 120

Kakraban RD Block

(i) RD Block Maps showing RD Block boundary 131
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 133
(iii) Presentation of Village Directory data in prescribed format 134

Rajnagar RD Block

(i) RD Block Maps showing RD Block boundary 141
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 143
(iii) Presentation of Village Directory data in prescribed format 144

Hrishyamukh RD Block

(i) RD Block Maps showing RD Block boundary 153
(ii) Alphabetical list of villages alongwith location code 1991 and 2001 155

(iii) Presentation of Village Directory data in prescribed format 156

Bagafa RD Block

(i) RD Block Maps showing RD Block boundary 163

(ii) Alphabetical list of villages alongwith location code 1991 and 2001 165

(iii) Presentation of Village Directory data in prescribed format 166

Karbuk RD Block

(i) RD Block Maps showing RD Block boundary 177

(ii) Alphabetical list of villages alongwith location code 1991 and 2001 179

(iii) Presentation of Village Directory data in prescribed format 180

(c) Appendixes to Village Directory

Rupauchari RD Block

(i) RD Block Maps showing RD Block boundary 187

(ii) Alphabetical list of villages alongwith location code 1991 and 2001 189

(iii) Presentation of Village Directory data in prescribed format 190

(c) Appendixes to Village Directory

Satchand RD Block

(i) RD Block Maps showing RD Block boundary 199

(ii) Alphabetical list of villages alongwith location code 1991 and 2001 201

(iii) Presentation of Village Directory data in prescribed format 202

(c) Appendixes to Village Directory

Appendix I : Abstract of Educational, Medical and other Amenities in villages - RD Block level 210

Appendix IA : Villages by number of Primary Schools 214

Appendix IB : Villages by number of Primary Middle and Secondary Schools 214

Appendix IC : Villages with different sources of drinking water facilities available 215

Appendix II : Villages with 5000 and above Population which do not have one or more amenities available 215

Appendix IIA : Census Towns which do not have one or more amenities 216

Appendix III : Land utilisation data in respect of Census Towns/non-municipal towns 217

Appendix IV : RD Block wise list of inhabited villages where no amenity other than drinking water facility is available 217

Appendix V : Summary showing number of villages not having Scheduled Castes population 217

Appendix VI : Summary showing number of villages not having Scheduled Tribes population 218

Appendix VIIA: List of villages according to the proportion of the Scheduled Castes to the total population by ranges 218

Appendix VIIB: List of villages according to the proportion of the Scheduled 223

Tribes to the total population by ranges

Appendix VIII : Number of villages under each Gram Panchayat (RD Block wise) 230

Appendix IX

Statement showing number of girls schools in the villages 230

Section II - Town Directory

(a) Note explaining the abbreviations used in Town Directory 231

(b) Statement I :Status and Growth History 231

(c) Statement II :Physical aspects and location of towns 231

(d) Statement III :Municipal finance 232

(e) Statement IV: Civic and other amenities 232

(f) Statement V :Medical, Educational, Recreational and cultural facilities 233

(g) Statement VI:Trade, Commerce, Industry and banking 234

(h) Statement VII:Civic and other amenities in slums 234

(i) Appendix to Town Directory - Towns showing their outgrowths with population 241

PART B - PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract 245

(b) District Primary Census Abstract (General) 248

(c) Appendix to District Primary Census Abstract i.e., Urban block wise figures of Total, SC and ST Population 254

(d) Primary Census Abstract for Scheduled Caste 258

(e) Primary Census Abstract for Scheduled Tribe 264

(f) RD Block wise Village Primary Census Abstract 270

(g) Urban Primary Census Abstract 330

Annexure I : Number and village under each gram panchayat N.A.

Annexure II : Fertility and Mortality, 1991 336

Annexure III : Various measures of fertility and mean age at marriage,1991 Census 337

Annexure IV : (a) Percentage distribution of Migrants by place of birth (b) place of last residence, 2001 in Tripura/ South Tripura & a comparison with 1991 338

Annexure V : Main religions in Tripura/South Tripura District- RD Block and Town level, 2001 & a comparison with 1991 Census 346

Annexure VI : Marital Status of Population, 2001 & a comparison with 1991 Census 350

Annexure VII : Educational level by broad age-groups & Sex, 1991 and 2001 Census 353

Annexure VIII : Distribution of mother tongues returned in 1991and 2001 Census 358

Annexure IX : Distribution of Scheduled Castes and Scheduled Tribes population of earlier censuses, 1981 and 1991 363

Notes on area figures and some other information 364

FOREWORD

1. The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage), medical facilities (Viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centres), drinking water, Post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri. K. D. Nath, Director of Census Operations, Tripura. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R. G. Mitra, Deputy Registrar General (C&T) and Dr. I. C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R. P. Singh, Deputy Registrar General (Map) provided the technical guidance in the presentation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D. K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated: 17.10.2006

Preface

The District Census Handbook first introduced in 1951 census as an additional publication for each district of the country. Directorate of Census Operations, Tripura is also published District Census Handbook since 1961 . The quality of data and its per view have undergone changes towards improvement of the handbook in keeping with needs of the dada user.

Like the previous Census of 1991 census, the revenue villages which were cadastral surveyed in 1970 only have been taken into account in 2001 Census too and all the information for 2001 Census were collected on the basis of revenue villages. The information (non-census) collected by the revenue agencies mainly by the Tehsildars deserve to be acknowledged with gratitude. This Directorate is grateful to the Director of Land Records, Director of Economics & Statistics, District Magistrate & Collector, Sub-Divisional Magistrate and the Directors of different Departments of State Govt. & Central Govt. for their sincere co-operation for supply of information for this precious publication.

The 1951 Census is the first innovator of District Census Handbook, a joint venture publication of Census Organization and State Govt./Union Territory Govt. Since 1951 it has been continuing under the banner of each decennial Census with some modification or some innovation. It is a most valuable district level publication brought out by the Census Organization on behalf of each State Govt./Union Territory Administration. This book provides data/information on some basic demographic and socio economic characteristics on the availability of certain important civic amenities/facilities in each village and town of the concerned district. From the very beginning DCHB are able to carry its own fame and popularity amongst the planners, administrators, academicians, researchers and general people. Specially planners, administrators, academicians and researchers are accepted this as a precious publication and valued it as a best reference handbook.

The 1951 Census of Tripura was conducted under the general supervision of the Superintendent of the Census Operations, Assam treating Tripura State as a single district. The publication of 1951 DCHB was a very simple one wherein only Census data were incorporated in a very simple manner. Like 1951 Census, DCHB series of 1961 Census was also published treating Tripura as a single district territory. In 1971 Census, DCHB enlarged considerably to incorporated non census data along with census data. The scope of District Census Handbook, 1981 was enlarged again considerably in relation to the amenities available in the villages and in the nine villages and non-municipal towns. The scope of District Census Handbook of 1991 census was almost similar except minimizing two columns of 1981 census. The scope of District Census Handbook of 2001 is more attractive, useful and informative-this time planner adding some essential items and dropping very few items which has less importance.

The services of Shri S. Raye, Assistant Director and Shri G.R. Saikia, S.I. Gr. I deserve recognition for drafting of District Census Handbook – 2001 Census for four districts and Shri S. K. Sarkar, S.I. Gr. III and Shri S. Deb Ray, Sr. Compiler for computerization work.. The collection of information and their compilation by Shri Saikia, Shri P. K. Ghosh, Sr. Drawing Assitant, Shri B. Rabha, S.I. Gr. II, Smti K. Kshatriya, S.I. Gr. II, Shri S.K. Sarkar, S.I. Gr. III, Shri D. Bhattacharjee, S.I. Gr. III, Shri K. Debbarma, S.I. Gr. III, Smti U. Das, Compiler, are also deserve every praise. The services of Shri S. Rava, Sr. Geographer,Shri S.K.Sarkar, S.I. Gr. III, Shri A.Khan, Sr. Compiler Shri A. Sarkar, Compiler, Shri B. Lalung, UDC, Shri G. Ramchiary, Draftsman, are also deserve every praise for computerization work of data feeding and analytical note. Shri A. Chowdhury, S.I. Gr. II along with tabulation team contributed to the same by

supplying figures and guidance in generating inset tables etc. which need appreciation. Moreover Shri B. Das, Compiler, Smti T. Nath, Canteen Clerk is also deserve recognition for compilation work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India for his invaluable and inspiring guidance through his circulars and re-view meeting time to time. I am also thankful to Dr. I.C. Agrawal, ARG (SS), and Shri S.L.Jain, Deputy Director, S.S. Div, for their valuable guidance and assistance extended to me in finalisation this volume.

District Highlights—2001 Census

1. The district has 3057 sq. km. area in all of which 3043 sq. km. are rural and 14 sq. km. are urban. The district stands first in ranking of area.
2. Out of 277 revenue villages 8 revenue villages are unihabited and thus the district record in this regard amongst the districts.
3. The decadal growth rate (1991-2001) of the district is only 6.10 wich is more less than the state rate of 15.7.
4. The decadal growth (1991-2001) of 0-6 age group is (-) 15.9 wich is also less than the state level of (-) 14.1.
5. Matarbari Dev. Block stands first taking 124,529 population while Killa Dev. Block stands in bottom taking only 31,065 population in the district.
6. Amarpur Dev. Block constituted with 41 revenue villages and it is highest and Killa Dev. Block constituted with 13 revenue villages and thus taking the last position within the district.
7. All the 13 revenue villages have Scheduled Tribe population under Killa Dev. Block.
8. Scheduled caste and Scheduled Tribe population exists more or less in all development blocks of South Tripura district.
9. Density of population in per sq. km. is highest (505) in kakraban Dev. Block while Karbook Dev. Block in bottom position taking only 110 population per sq. km.
10. Bagafa Dev. Block is covering 512 (highest) sq. km. while Kakraban covers only 130.9 (lowest) sq. km. in the district.

ANALYTICAL NOTE

Analytical note

(i) History and Scope of the District Census Handbook

The 1951 Census is the first innovator of District Census Handbook, a joint venture publication of Census Organization and State Govt./Union Territory Govt. Since 1951 it has been continuing under the banner of each decennial Census with some modification or some innovation. It is a most valuable district level publication brought out by the Census Organization on behalf of each State Govt./Union Territory Administration. This book provides data/ information on some basic demographic and socio economic characteristics on the availability of certain important civic amenities/facilities in each village and town of the concerned district. From the very beginning DCHB are able to carry its own fame and popularity amongst the planners, administrators, academicians, researchers and general people. Specially planners, administrators, academicians and researchers are accepted this as a precious publication and valued it as a best reference handbook.

The 1951 Census of Tripura was conducted under the general supervision of the superintendent of the Census Operations, Assam treating Tripura State as a single district (then Tripura was a single district part-C-state). Publication of DCHB for each district separately was first introduced in that Census with the object of making Census data available down to the smallest administrative unit (village). Accordingly a separate DCHB volume for Tripura was published by the Tripura Government, which presented census data of Tripura for 19851 down to the village level. Thus the publication of 1951 DCHB was a very simple one wherein only Census data were incorporated in a very simple manner. Considerable improvement were included in 1961 DCHB publication by making them more informative. Primary Census data and some additional (non census) information (data) for each village were included in 1961 DCHB. The additional information was collected in the form of village notes at the time of actual Census, showing various facilities/amenities like Educational, Medical, Postal etc., which were available in the villages. Moreover a brief description was presented about area, location, physical aspects, hill ranges, plains and river basins, climate and rainfall, class of soil, forest, agriculture, industries, common diseases, calamities, historical development of places etc. in the DCHB of 1961. Like 1951 Census DCHB series of 1961 Census was also published treating Tripura as a single district territory.

In 1970, Tripura was divided in to three districts and three separate DCHB were published in connection with the 1971 census. PCA presenting the basic census data for each village/ward/town found place in the 1951 DCHB. Nevertheless, continuous changes were observed in the nature of information required by various data users of the country. Sometimes, there were conflicting demands from different persons or organizations that were frequently guided by their segmental fields of interest. The census organization of India carefully considered all such points and with an insight of its own, determined the different sorts of information which should be presented in the DCHB of 1971 census. Thus in 1971 census, planning and efforts have been made to compile both census and non- census statistics down to the village level throughout the country in a fairly comprehensive and uniform manner. The main changes in the village directory schedule of 1971 census from that of 1961 were, inclusion of information about the availability of a few additional amenities, like existence of Katcha/Pucca roads, distance from nearest town, types of educational institution and land use data as desired by the Ministry of Food and Agriculture, Government of India.

The scope of district census handbook, 1981 was enlarged considerably specially in relation to the amenities available in the villages and towns and land

use pattern in villages and non-municipal towns. The collection of data on recognized slums of class-I and class-II towns of the state was a new addition of 1981 in the Town Directory Statements of the district census handbook. The format of the Primary Census Abstract was restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips was an important addition of 1981 census, workers had been categorized in four categories (sectors) instead of nine in 1971.

The Village Directory of part-A statement for 1981 contained 20 columns for elucidating information regarding amenities and land use, whereas the statement for 1991 contains 18 columns. The two columns, namely, staple food and remarks including any place of religious, historical archaeological interest have been dropped from the statement in 1991.

In respect of the Town Directory of Part-A, all the seven statement are similar to those adopted in 1981.

The Primary Census Abstract has been slightly modified in the 1991 Census to those adopted in 1981. This time it comprises of the age group of '0-6' population by sex and break up of the total main workers categories from 4 in 1981 in to 9 in 1991 Census by sex.

In 2001 Census, the designer and the expert (ORGI) of village directory format for DCHB are trying to arrange the schedule more attractive, useful and informative by adding some essential items and dropping very few items which has less importance, so that scholars, academicians, administrators, researchers and general people will get more information easily. Accordingly, they included another 13 columns in the village directory schedule in 2001 Census for DCHB. These are – 1) Number of banks, 2) Number of agricultural credit societies, 3) Number of non-agricultural credit societies, 4) Number of other co-operative societies, 5) Cinema/video hall, 6) Sports club, 7) Stadium/Auditorium, 8) Whether News paper/Magazine received, 9) Income-Expenditure-Total received, 10) Total expenditure, 11) Imported commodities, 12) Manufactured commodities, and 13) Exported commodities. The column "Day and days of the market/hat, if any" was dropped from the schedule of 2001. This is the only exception.

On the other hand in 2001 Census, the town directory statement for DCHB is almost alike which were adopted in 1991 census for DCHB. But the sub-statement IV A of 1991 Census was re-named as statement VII in 2001 Census-slightly changing the structure of the previous format of IV A. This time the column "Area of slum" is dropped and includes another two more columns i.e. "Is it notified" and "No. of households (approximately) in statement VII i.e. statement IV A of previous Census (1991).

In order to make the publication of village level statistics, covering large non-census data, available as early as possible to the data users, it was decided that the District Census Handbook should be brought out in two parts during 1981 Census, viz:

Part-A : Village and Town Directory.

Part-B : Village and Town-wise Primary Census Abstract.

Part- A in relation to Village and Town Directory and Part- B in relation to Village and Town-wise Primary Census Abstract were combined together for each district so far Tripura is concerned. Since then the same process has been adopted for the publication of DCHB in 1991 and 2001 census.

(ii) History of the District

Nearly 54 years ago Tripura was an independent princely State. At that time there was no existence of any district like to-day i.e. West, South, North, Dhalai etc. even at the time of merging with Indian Union (1949) also. Bir Bikram Kishore Manikya was the last Maharaja of Tripura. After his death (May, 1947), a council of regency under the leadership of his widowed wife Maharani Kanchanprave Devi took over charge of administration on behalf of the minor prince Kirit Bikram Kishore Manikya. Monarchy came to it's end on September, 1947 with the signing of the agreement of merger of Tripura with the Indian Union by the Maharani on 15th Oct. 1949. Tripura was taken as a part-c State administered by the Chief Commissioner, and it became a Union Territory on November first, 1956. The Territorial formation of Legislative Assembly and a Council of Ministers on July, 1963

were notable events. Tripura became a full-fledged State on January, 1972. The District Administration was run by one District Magistrate & Collector up to 31st August, 1970. For better attention of problems of land and tenancies, for accelerating the pace of development in this backward area especially in the remote Tribal areas and for bringing the people closer to the administration. Tripura was divided into three districts viz. North, South & West Tripura District. Three District Magistrate & Collectors were appointed for the three districts from Ist September, 1970.

Thus the South Tripura District came into focus in the history as well as in the geography on 1st September ,1970 along with other two districts i.e. North and West . At that time the district had 3577 sq. km. having 399728 population . The district had five subdivisions during 1991 census and six development blocks . At present the district had ten development blocks and four subdivisions . The Gandachhara sub-division carved out from South Tripura District and included in Dhalai District. Five revenue villages of Gandachhara sub-division remained with Amarpur sub- division of South Tripura District. Now the district has 2922.51 sq. km. It is bounded by West District in the north by Bangladesh in south and west and by Bangladesh and Dhalai in the east. Udaipur, the district head quarter is situated nearly 52 km. from the state capital Agartala. Belonia, Sabroom and Amarpur are also statutory town of the district. The district is famous for pilgrimage places and ancient ponds.

(iii) Administrative set up

The last decade (1991-2001) came into focus in the history of Tripura due to major restructuring of administrative divisions at different levels. Internal jurisdictional changes amongst the districts, sub-divisions and development blocks was undertaken. Formation of a new District viz., Dhalai, 4 Sub-divisions viz., Bishalgarh in West Tripura, Ambassa and Lontharai valley- in Dhalai district and Kanchanpur in North Tripura District were created. Moreover, 9 more Development Blocks were created in West Tripura District, 5 in South and 7 in North and Dhalai District. In 1991 Tripura had 3 Districts, 11 Sub-divisions and 17 Development Blocks. Now, the figure of Districts, Sub-divisions and Development Blocks stand as 4, 15 and 38 respectively.

The Chief Secretary acts as the administrative head of the state. He is assisted by Principal Secretary, Commissioner cum Secretary, Secretary, Additional Secretary, Joint Secretary, Deputy Secretary, Under Secretary etc. and departmental heads (Directors) of various departments in day to day administrative work.

In all there are four districts in Tripura and each district has an Administrator designated as District Magistrate and Collector. He is the supreme authority of his/her respective district. He is mainly assisted by Additional District Magistrate, a good number of district level officers, Sub-divisional Officers, and Block Development officers under his/her jurisdiction. The district is the chief administrative set up or division of the state.

Sub-division is the main administrative division of the District. In Tripura there are 15 Sub-divisions and each Sub-division is headed by a Sub-divisional officer. Sub-divisional Officer is the head administrator of the Sub-division. He is assisted by Additional S.D.O, Deputy Collector, Circle Officers, Sub-treasury Officer, Tehsildar, Assistant Tehsildars and a good number of Sub-division level officers of various departments.

The Sub-divisional Officers and Additional Sub-divisional officers are responsible for maintenance of law and order in their respective areas, besides collection of revenue and distribution and re-payments of agricultural loans etc. They are also responsible for other developmental works undertaken in the sub-divisions. In each sub-division there are one or two Deputy Collector assisting the SDOs in the matter of collection of revenue and making various enquiries. Again in each sub-division there is one Sub-Treasury Officer entrusted with the powers of second class Magistrate. Besides works of sub-treasury, the S.T. O. assist the SDO in day to day administration of the sub-divisions. Each sub-division is again divided into Tehsils according to area and population. The main functions of Tehsildars and Asstt. Tehsildars are to collect revenue and statistical data as and when required by the administration.

Besides, there are 38 Development Blocks. At the block level Block Development Officer is the head

of his department. They are involved mainly in the developmental works of his/her respective development block. They are also responsible of distribution of various types of loans in block level. The BDOs work under the direct supervision of the DM & collector.

Panchayat

Following 73rd amendment of the constitution of India, a new Act named, "The Tripura Panchayats Act, 1993" was enacted in the State with a view to set up 3-tier Panchayati Raj System and to enable them to function as vibrant institutions of Local Self Government. The first general election for the purpose was held in the year 1994. The next general election was held in the month of July, 1999.

Organisational set up

Panchayati Raj Institution(PRIs) level:- Information based on the last Panchayat general election, 1999 Zilla Parishad at the District level :- 4 Nos. viz. Uttar Tripura Zilla Parishad, Dhalai Zilla Parishad, Paschim Tripura Zilla Parishad and Dakshin Tripura Zilla Parishad. Each Zilla Parishad has one elected Sabhadhipati and Sahakari Sabhadhipati and other elected and Ex-Officio Members.District Magistrate & Collector of each District is the Chief Executive Officer of the concerned Zilla Parishad.District Panchayat Officer of each district is the Secretary of the concerned Zilla Parishad. Besides above officials, each Zilla Parishad has Addl. Chief Executive Officer (P. D., DRDA) and some officers and staff.

Panchayat Samiti (P.S.) at the Block Level

There are 23 Panchayat Samities in the State.Each Panchayat Samiti consists of the Chairman, a Vice-Chairman, other elected and Ex-Officio Members. There are 7 Standing Committees in each Panchayas Samiti which are elected by the members of the concerned Panchayat Samiti.Block Development Officer of concerned Block is the Executive Officer of the Panchayat Samiti. The Panchayat Officer or in case of non-availability of Panchayat Officer, the Panchayat Extension Officer of the concerned Block is the Secretary of the Panchayat Samiti. Besides these officials, there are other staff in each Panchayat Samiti.

Gram Panchayat at the Village Level

Out of total 540 Gram Panchayats, there are 537 elected Gram Panchayats in the state.

Institution in the ADC area

Block Level Bodies

Block Advisory Committees have also been formed to look after the developmental work in the rural areas under ADC like Panchayat Samiti as per orders, instructions, guidelines issued from the Department from time to time. This Body enjoys identical powers, functions and authority like Panchayat Samiti.

Village Level Bodies

Total 428 Village Development Committees have been formed to look after and execute the different developmental activities in the villages under ADC areas as per orders, instructions, guidelines issued from the department from time to time. The Local Body enjoys identical powers, functions and authority like Gram Panchayat.

Urban development

Nomenclature of Local Self Government was changed into Urban Development Department on 22.9.1994. Urban Development Department is concerned with Directorate of Urban Development, Town and Country Planning Organization and Urban Local Bodies such as Agartala Municipal Council and 12 Nagar Panchayats in the State. As per 1991 Census total Urban population of the state is 4,21,721, out of which to population of declared urban local bodies i.e. Agartala Municipal Council and 12 Nagar Panchayats are 3,01,000. Administration of the urban local bodies i.e. Agartala Municipal Council and 12 Nagar Panchayats are vested to the elected body by election which was firstly held on 23.12.1995 and secondly on 16.12.2000. There is a Chairperson-in–Council in Agartala Municipal Council and in each of the 12 Nagar Panchayats. At present there are 13 urban local bodies in Tripura of which one is a Municipal Council at the State Capital at Agartala and others are Nagar Panchayats. Total urban population in all urban areas of Agartala Municipal Council and Nagar Panchayat of the State was 3,54,734 in 1998 as per survey conducted by the Urban

Development Department. The town-wise breakup is as follows:

Source : Economic Review, Directorate of Economics and Statistics, Tripura

Tripura Tribal Areas Autonomous District Council

With a view to fulfill the aspirations of the tribal to have autonomy to administer them, the Tripura Tribal Area Autonomous District Council (TTAADC) was set up in January 1982 under the Eighth Schedule of the Constitution of India. Later, the council was brought under the provisions of the Sixth Schedule of Indian Constitution to entrust more responsibilities and power from first April, 1985. The total area of TTAADC is 7132.56 sq.km. out of total 10,491.69sq.km. area of the state. As per 1991 Census, the total population of the District Council is 8.87 lakhs of which 6.62 lakhs are tribal. The activities of the council range from primary education to maintenance of roads and bridges etc. The rehabilitation of the landless tribal, creation of employment opportunities, agricultural development, soil conservation, flood control, supply of drinking water, education, transport and communication, setting up of village industries are some of the important tasks undertaken by the TTAADC. Special drive has been given to bring high lands under horticultural crops, establishment of small farms to supply inputs of agriculture, horticulture, pisciculture, animal husbandry to the tribal families. Extension of medical facilities in interior areas through mobile unit will be geared up. Safe drinking water will be provided in villages. The sources of fund of the council are the plan allocation as grant in aid, share of taxes and fund from transferred schemes of the State Government. Though the ADC came into existence over a couple of decade ago the organizational network at field level is yet to be strengthened.

(iv) Physical feature

South Tripura District lies approximately between the East Longitude 91 18 and 91 59 and the North Latitude 22 56 and 23 45 .It is situated in the extreme south of the state. West Tripura District covers the entire northern boundary. Similarly entire southern boundary and part of eastern and western boundary is covered by Bangladesh while part of eastern and western boundary is covered by Dhalai(Gandachhara sub- division) and West Tripura District (Sonamura & Bishalgarh sub-div.) respectively. The district had 3909 sq. km.area upto 25th November, 1994. On 26th November,1994 the district lost sq. km. and included this area in Dhalai district. Now the distract has 2922.51 sq. km . Thus the district reduces the area from 2909 sq. km to 2922.51 sq. km.

Topography

Tripura was known as “Hill Tipperah” and the very nomenclatue is suggestive of its hilly nature of undulating surface made uneven by inter-sparsed low hills. A series of hill ranges running from north to South divide the territory from north to south divide the territory into board paralled valleys, consisting of undulating tillas(hillocks) covered with jungles with tortuous streams. There are six principal hill ranges in the State gradually increasing height from west to east. Out of the six principal hill ranges, Sardong and Deotamura ranges fall fully in this district. A part of Athramura hill range is also fallen in South district.

(a) Sardang range : The ridge of this ranges is situated in the eastern part of Amarpur Sub-division and it is about 16 km. in length. Bhagaban Till (287 mts.), are the main peaks of this range.

(b) Deotamura rnge : It is a continuation of Baramura hill range. The length of Deotamura is about 85 kms. Deotamura runs between Amarpur and Udaipur Sub-division. It has four major peaks i.e. Deotamura (268 mts.), Champamura(187 mts.), Sahebmura (148 mts.) and Tolamura (299 mts.). A small range comes out from Deotamura near Champamura peak and runs westward almost along the nothern boundary of Belonia Sub-division. Some images are engraved on the rocks of Deotamura on the bank of the river Gumati and it is accordingly known as Deotamura.

(c) Atharamura range : This range starts from Amarpur Sub-division of south Tripura district

and then enters into the southern part of Knowai Sub-division. The southern part of this range is called 'Jurimura' where the said small hill range embraces the Atharamura and the Sardong hill ranges. This is the common boundary of khwai and Amarpur sub-division of the West and South Tripura district respectively.

Drainage and River system

The whole system of drainage and river system of the district ultimately finds its way into the ncibouring country Bangladesh's rivers, Gomati, Muhuri and Fenney are the major rivers flow through the South Tripura district.

Gomati : The Gomati is the principal river of the district as well as State also. It is formed by the confluence of two revultes, Raima and Sarma. The Raima orginates from the Longtharai range and the Sarma from the Atharamura range and the two revultes meet together near Dhuchaibari of Dhalai district and then assuming the name 'Gomati' running through gorge upto the Dumbur fall in the Amarpur sub-division. It is nearly 133 km in length and runs across the Amarpur and Udaipur sub-division of South Tripura district and Sonamura sub-division of West district and then flows towards Bangladesh by the side of Sonamura Town. The tributaries of the Gomati river on the right bank are elbachhara, Datakchhara, Sarbongchhara, Sougang, Patavgang and Noachhara and on the left bank are Rambhadrachhara, Ekchhara, Chelagang, Kurmachhara, Maharanichhara Ranigan.

On the river Gomati, the Gomati Medium, Irrigation Project was constuoucted. The project was approved by planning Commission in the year 1979 for Rs.5.88 crores. State envisages constouctioin of head works and canal system of total length 45.90 km. (right bank canal 23.40 km, left bank canal 22.50 km) to covered CCA of 4486 hactor. The project on completioin will create ultimate irrigation potential of 9800 hactor. The latest estimte) cost of the prolject (at 1996 price level) is Rs.50.00 crores and expenditure incurred till 3/2001 is Rs.37.90 crores. The project was started during the year 1980-81 and is likely to be completed by 2004-2005.

Muhuri : Muhuri river is originated from the Deotamura range and flows througfh the Belonia sub-division and then enters into Bangaldesh. It is nearly 64 km. in length. Its tributaries on the right bank are Charakbarichhara, Bikorachhara, Laugang and Belonianade and on the left bank are Palekchhara, Abangachhara, Tuigamarichhara and Sonaichhari. It flows by the side of Belonia Town ands after then enter in Bangladesh.

Fenny : The Fenny river has a numbver of streams in the upper dreach. Asalaongrange, fenny and Tuidung are the main streams. Asalong is the main channel of the dFenny river. Bagachatalchhara, Subrumchhara, Magrumchhar, Ludhuachhara, Belagachhara and Manugang are the main tributaries on the right bank and tailafangchhara, Chhataramchhara, Gumatichhara, Ajoddhyachhara, Dholychhara and Pilakchhara are main tributaries on the left bank of the river. It is also frown by the side of Sabroom Town and then enter into Bangladesh.

There are long river valleys extending over a vast area in different Sub-divisions formed mostly of deep alluvial deposits with reach fertility excellently suited for the cultivation of paddy, jute, oil seeds spices, fruits vegetables would be evident from the aforementioned position. The sources of all are in Tripura itself. Due to indiscriminate felling of trees the echology of Tripura is being affected to a grate extent. Human beings and trees belong to the category of living species. There is a gap of felling which might be attributed to the factors of immediate benefit as the very question of subsistence is involved particularly when the majority of the people in Tripura are below poverty line. Exploitations and not extinction should be the way of life. It that be line case the forest resources which are national wealth should be preserved in such a way that they are exploited and not extinct Else danger is inherent in expressing their displeasure. The sign of danger are apparent when we see erosion of soil due to indiscriminate cut down of trees. There is uneven rainfall , water flows merry go round. It carries sands which turn into deposits causing heavy damage to fertile lands which are going to be searce particularly when the population is increasing in geometrical progression.

Climate

The climate of the district, keeping in conformity with the general climate of the State as a whole is tropical in nature and is generally warm and humid. The hilly regions naturally enjoy higher temperature in summer and lower temperature in winter in comparison with the plain lands because of the fact that they participate in greater degrees in cold and hot wind. The climate is woven with three distinct seasons summer, rainy and wither.

Economic Infrastructure

Infrastructure is defined as physical facilities available to the people through which goods & services are provided. The economic infrastructure basically support the economic activities of any state or a region. In fact, economic development of any state or region depends upon basic infrastructure facilities like power, transport, irrigation, communication, banking etc.

The infrastructure facility in the state is not favourable so far both in terms of quantity and quality as compare to National Level and even in comparison to other North-Eastern States. Unlike Assam, Tripura does not have facilities for inland water transport system. In fact, road transport is the only dependable means of transport through out its extremely hostile hilly terrain. The state has a token presence of railways of about 45 km by meter gauge. On the other hand National Highway-44 passing through Assam and Meghalaya is the state's only lifeline. One of the main reason for backwardness of the state is due to its geographical isolation after partition of India in 1947 and now, it has 84% common border with Bangladesh with length of 856 km. In the year 2000-2001 trial run of Agartala-Dhaka bus service is completed and people may expect to take road transport facility to Kolkata via Dhaka buy service in the next year.

The overall backwardness of the State is evident from the composite infrastructures index evolved by the Centre for Monitoring Indian Economy (CMIE), based on availability of power, irrigation, road, railways, post-office, education, health and banking. As per assessment of the CMIE under for 1991-92 Tripura was the second most backward state in the entire country after Arunachal Pradesh. It is worth mentioning that during 1989-90 to 1991-92 infrastructure index for Arunachal Pradesh went up from 31 to 43 whereas the same for Tripura declined from 66 to 63, indicating further worsening of the availability of infrastructure as compared to other States.

Land and land use pattern

According to the report of Agricultural Department on land utilization statistics for the year, 1997-98 (Provisional) the total geographical area of the State is 1049169 ha. of which 606168 ha. (57.77%) is occupied by forest; 133500 ha.(12.72%) is used as non-agricultural use; 27151 ha. (2.58%) is used in misc. tree crops; 2350 ha. (0.22%) is shown as waste land and 280000 ha. (26.68%) is shown as net cropped area. Simultaneously, the net cropped area is classified into three different categories – such as 110000 ha. (39.28%) is shown as single cropped area; 135000 ha. (48.21%) is under double cropped area and 35000 ha. (12.50%) is under triple cropped area.

In South Tripura District the total geographical area is 305478 ha. of which 193781 ha. (63.43%) is covered by forest; 31044 ha. (10.16%) is shown as non-agricultural use; 7349 ha. (2.40%) is used in misc. tree crops; 509 ha. (0.16%) is shown as net cropped area. The net cropped area figure utilized in three different way such as 28627 ha. (39.32%) used for single cropped; 35126 ha. (48.25%) is used for double cropped and 9042 ha. (12.42%) is used for triple cropped.

area. Out of 48050 ha. net area 18185 ha. (37.84%) is covered by single cropped, 23715 ha. (49.35%) is under double cropped and 6150 ha. (12.79%) is covered by triple cropped area respectively.

Land reforms

National Agenda for rural reconstruction ensuring social justice to actual tillers as well as to landless rural poor. This creating sustainable base for the overall growth of industrial and tertiary sector of our economy.

Generating of greater access to land by landless rural poor are also considered as an important programme for poverty alleviation in rural areas.

The below noted table shows details of implementation of Land Ceiling Laws till March 2001.

(Area in Acres)

Name of Districts	Petitions from the to till the of the	received inceptio beginning month	Total disposed	Petition of	Total ration order passed	resto-	Total calration	physi- resto- done	Total pending resto- ration	cases for

Tenancy

In ancient Tripura, according to the Rajmala, no reference was available to know the basis on which the 'Rajkar' (Royality) was charged in those days. It was however, known that the hillpeople used to pay the revenue in kind, such as various types of home-made clothes, brass, iron, ball-metal, ivory, hornes of wild animal and even by serving the state instead of payment of royality in cash. Form the statistical account of Bengal (Vol. VI) by Sir W.W. Hunter, it was known that the Maharaja was the only zaminder as superior landlord in the whole state and used to make grants of lands in perpetuity and at a fixed rental. It could also be known that the land tenture system of the hill state was quite different from the plain area and the rate of revenue was comparatively low, that could be paid either in cash or in kind and the service tenture was also prevalent.

Since 1290 T.E. (1890 A.D.) an enactiment called 'Rajaswa Sambandhiya Niyamabli' on land tenture system was in vouge in Tripura which dealt with the procedure for collection of land revenue from the different types of tenants like 'Kayemi Taluks' (permanently settle estates), 'Khas Mahals' (Government owned lands) and 'Karsha Praja' (cultivating tenants). This Act was followed by another enactment called 'Praja, Bhumyadhikari . Sambandha Bisauak Air, 1296 T.E. (1886-87 A.D.) which dealt with the relationship between the landlords and the tenants, matter relating to payment of rents, recovery of public demands, eviction of tenants, rights of raiyts etc. The first enactment relating to survey settlement in the State was introduced in the year d1899 A.D. under the style of Jarip-o-Bandobast Sambandhiya Niyamabli, 1309 T.E. Tripura Land Revenue and Land Reforms Act, 1960 came into force w.e.f. 14.4.1961. This comprehensive Act was aimed mainly to consolidate and amend the laws relating to land revenue and to being out the land reforms measures in the State providng for acquisition of estates and security of tenures. This Act, as amended substantially be second amendment Act, 1974 and third amendment Act, 1975, seeks to remove the impediments against increase in agricultural production and removal of social injustice in the agrarian system of the State by (1) giving security of tenture to actual cultivators of land who were termed as 'Korfaders' (under raiyats to Jotedars) and Bargadar (sharecropper) by bringing them into direct relationship with the Government (2) reducing ceiling on land holding to 2 standard hectares it the minimum and 7.2 standard hectares at the maximum with retrospective effect from 24.1.71 (3) restricting transfer or partition of any land in certain circumstances to facilitate the operation of ceiling

laws and (4) preparation of field index and correction and updating of records of rights.

Safeguards were provided to protect interest of the tribals over land throughout the District with right of pro-emption in areas predominantly inhabited by them. The law also provides that the lands alienated by the tribals on or after 1.1.69 have to be restored by revenue officers specially empowered to take up such cases.

It may be mentioned here that the cadastral survey in the State were completed in 1960 and two registers namely record of rigfhts called "Khatian" and the other "khasra" were prepared which had ended a system of settlement of land with the tenure in unsurveyed tracts based on undefined boundary schedule. With the introduction of Tripura Land Revenue and Land Reforms Act, 1960, the following categories of tenancy are in vogue in Tripura.

(a) 'Raiyat' : A raiyat is a person who owns land for purposes of agriculture paying land revenue to the Government. His rights over the land are permanent, heritable and transferable. He can erect building on his land, construct wells or tanks or undertake any other improvement measures for better cultivation of the land; likewise he can plant trees and enjoy the sufructs. He enjoys the power to lease out his land, which after the amendment of the Act in 1974 will be generally in perpetuity. Government amy interven whenever he allows to keep the land uncultivated for a year.

(b) 'Non-agricultural tenant': A non-agricultural tenant is a person who holds land for purposes other than agriculture paying land revenue to the Government.

(c) 'Allottee': An allottee is a person who is allotted land by the Government and it liable to pay land revenue. His rights are heritable but not transferable within 10 years of allotment without the written consent of the collector.

(d) 'Bargadar' : A Bargadar is a share-ceopper. He is a person who cultivates the land of any person on condition of delivering a share of the produce of such land to that person. According to the present provisions, a bargadar is liable to deliver not more than one-fourth of the produce to the land-holder if the plough cattle is supplied by the landholder and more than one-fifth if the plough cattle is not supplied by the land holder.

(e) 'Under-raiyat' : An under raiyat means a person who cultivate or holds the land of a raiyat on condition of paying therefore the rent in cash or in kind or delivering a share of produce and includes a bargadar (Share-cropper). An under raiyat is now allowed to hold the land as such in perpetuity except in the case where the raiyat is a disabled person. His interest on such land is heritable but not transferable. Of course, an under raiyat may create a simple mortgage or a charge on his interest in the land leased to him in favour of the Government or a Co-operative society, a Bank or such other institutions approved by the Government Against any loan advanced by such institutions. The raiyat cannot realise from the under-raiyat the rent in cash exceeding four times the land revenue of such land. A special drive was taken by the Government to treat the Bargadars as the raiyats directly responsible to the Government. The ceiling laws were also operated against the land owners having land over the ceiling limits to take away the lands beyond ceiling for allotment to landless agriculturists. Restoration of land to the tribal owners, who alienated the land on or after 1.1.69, was also taken up by specially empowered revenue officer.

According to the "State report on Agricultural Census 1976-77 in Tripura", "there are 246.6 thousand operational holdings covering a total area of 309.2 thousand hectares which constitutes 29.5 percent of the total geographical area of the State. The remaining area of the State is covered by hills, forests and other lands not within the purview of the Agricultural Census". The same report indicates that though North Tripura District is the biggest one in respect of its geographical area the percentage of area operated to its total area is the lowest (21.4%). Average size of the holdings in North Tripura District was found to be 1.44 hectares. Number of holdings and area in each of the main category of tenures in North Tripura District is the lowest amongst the three Districts.

Geophysical Characteristics of the District

The rock formations of the south district range in age from Mid-Territory (15 million years) to recent.

The general geology is represented by the repeatitive succession of argillaceous and arenaceous sedimentary rock like sandstone, shale and clay belonging to the (Bhaban and Boka-Bil subgroups of) Surma Group, Tipam Group and Depotila Group, Quite a large part of this district is occupied by the recent fluvial deposits. The sedimentary rocks are deformed and folded.

The general geology reflects, tectonically, a part of mobile trough whose evolution has taken place gradually from the mobile geosyncline, east of the present site by the uplifts and reaction of basements near shield areas.

Minerals

Lignite : Lignite occurrences have been reported from Betage and Sabroom. The lignite is pyritiferous and belongs to non-caking variety. The deposits are very small and under considerable rock cover and so cannot be economically worked.

Plastic Clay : There are a few small pockets of plastic clay in the district which can be used for the manufacture of roofing tiles and potteries.

Natural Gas : There are several gas seepages the district.

Forest

It is true that the State as a whole was, in the bygone days, far richer in forest whether but with the increasing pressure on land through population increase has rendered this rich forest susceptible to decay, through the process of reckless falling of the trees for different reasons like settlement of landuse and jhumes in some cases and for also augmenting the revenue of the erstwhile princely. State even since the past great wars. With the increase in population, the pressure on land was intensive and the tall trees of the forest had to give way to the increasing need of settling the refugees who came in exodus to this tiny State as well as for maintaining jhum cycle for the considerable percentage of Tribal who still continues to practice jhum cultivation. Without being scholarly to discuss the extent of ecological imbalances created by such indiscriminate exploitation of forest for immediate reasons, it is very much clear that the State has suffered quite heavily in this forest wealth during the past decades.

The forests of Tripura may be classified under the following types :

1. Himalayan lower Bhabar Sal
2. Cachar tropical ever-green forest
3. Moist mixed deciduous forest
4. Low alluvial savannah wood-land
5. Moist mixed deciduous forest-day bamboo brakes
6. Secondary moist bamboo brakes

Broadly the forests may be classified into Bamboo forests, Sal forests, Garjan forests, mixed ever-green and evergreen Savana. Rubber and Coffee plantation have also made considerable progress under the State Forest Department. Generally speaking, along-side the depreciation of natural forests mainly of bamboo, changrass and cane etc. which are commonly used as house building materials in the district, plantation of different improved varieties of timber are also being developed by Forest Department. The introduction of rubber and coffee plantation with intensive stress and participation of people may ultimately emerge as the changing factor of the economy of the district.

South Tripura District has 2005.393 Sq. Km. total forest area. Out of this 660.112 Sq. Km. area classified as unclassified Govt. forest, 1063.535 Sq. Km. as Reserve forest and 281.746 Sq. Km. area as proposed Reserve Forest.

Flora & fauna

Flora

Once Tripura was rich in flora & fauna , the then Maharaja patronized the introduction and cultivation of economically important plants into the State such as cotton varieties, opium poppy, rhea, mulberry, aloes, sugarcane, castor, jute, potato, ginger, arhar, mustard, rubber, tea, tomato, sweet-potato,

mushari, khesari and boropddy. Thus plant life serves a dominant role in the history of the State during that time.

Phygeographically the territory may be divided into two main divisions covered by evergreen and moist deciduous forest , where as the swamp vegetation, river rain forests, bamboo brakes, cane brakes, garjan forest, grassland etc. are all serial and edaphic forests scattered all over the district wherever favorable situation occurs.. But it has been very seriously affected by biotic influence depleting the forest to a very large extent. It now exists only in patches in the stiff uncultivable slopes and rocky and steady river banks which are not favourable for jhoom or plough cultivation.

Moist deciduous forest is also divided into two categories, characterized by the present or absence of sal. These are moist deciduous sal forest and moist deciduous mixed forest.

Fauna

The forest and hill ranges of Tripura are in close continuity with the Chittagang Hill tracts and the hill of southern Assam. It is, therefore, natural to expect that the fauna of Tripura will bear a close resemblance to death of these adjoining areas. Since the plains of the western border of this territory are continuous with the plains of Bangladesh,_one may also expect to find here many animals like the cranes, darters, etc. commonly seen in the plains of Bangladesh. Tripura, therefore, has a fauna which is a mixture of those of southern Assam and of Bangladesh. Here we have found birds and primates, migratory birds in the winter, elephant, somber, barking deer, wild goats, sorrow, bison, leopard, capped languor, king cobra, spectacled monkey, slow lorries and many species of birds and primates.

Agriculture

Tripura is a small, hilly & land locked state of the North-Eastern region of India with very poor communication facilities. Out of the total geographical area approximately 60% is covered by forest and 27% of land available for cultivation. The economy of the state is mainly based on agriculture, which contributes 28% of the State's Domestic Product. Agriculture in Tripura includes traditional Jhum cultivation i. e. mixed crop cultivation. The activities of agriculture in the State by and large are in the lands of private cultivators.

During Pre-Kharif season the actual rainfall was above the normal rainfall which has created a good situation for kharif crops in the state. There were more number of rainy days (110) as compared to last year (1999). Excessive rain in the last part of October in South and North District caused the damage of Aman Paddy and Vegetables.

Agricultural situation of South Tripura District differs to some extent from that obtained in North and Dhalai Districts in regard to topography of soil, extent of rainfall, variation in temperature and humidity which has resulted in difference in cropping pattern from that of the earlier said two Districts. But it is almost similar with West Tripura District's cultivation pattern. Due to above reason few crops like jute, sugarcane etc. can be grown more successfully in the district than the other three districts. In fact, the extent of plain land is available in South Tripura District is bigger than North and Dhalai Districts though the area of Amarpur sub-division is mainly comprises of tilla and high land. The tribal inhabited those areas mostly practice "Jhum" cultivation. The climate and soil of South district is suitable for crops for vegetables, sugarcane, potato etc. Julaibari area, under Belonia sub-division is famous for potato production. In general, the cultivator of south district have been cropping like rice, wheat, pulses, rape & mustard, sesamum, jute, potato, mesta, etc.

According to the Directorate of Agriculture, Govt. of Tripura, Soiuth Tripura District has 76360 hect. area under rice production from where the district produced 144720 MT. rice. Similarly, 635 hect. area under maize, 225 hect. area under wheat, 35 hect. area under gram, 545 hect. area under other pulses from where the district produced the crops 475 MT, 425 MT, 20 MT, 365 MT respectively. The total pulses area of South District was 580 hect. from where she got 385 MT pulses production during 1998-99. Moreover , the district had 345 hect. area under ground nut production and produced 330 MT ground nut, 680 hect. area under sesamum and produced 290 MT, 625 hect. area under rape/mustard and produced

525 MT, 1305 hect. area under total oil seed and produced 815 MT, 2455 hect. area under potato and produced 42210 MT, 575 hect. area under chilly and produced 345 MT and 420 hect. area under ginger and produced 800 MT.

District wise area and average yield per hect. of HYV during year 2000-2001 is shown in the following table:

Area in ha.

District	Rice		Area	Yield	in kg.	Wheat	Area		Yield	in kg.
	Total	HYV	%	Total	HYV	Total	HYV	%		
North	39177	29879	76	2051	2200	350	350	100	2000	2000
Dhalai	29517	23599	80	1900	2082	165	165	100	2096	2096
West	95447	90044	94	2150	2280	350	350	100	2193	2193
South	77024	71108	92	2228	2340	200	200	100	1984	1984
State	241165	214630	89	2129	2227	1065	1065	100	2096	2096

Irrigation

According to Superintendent Engineer ,Water Resource, Govt. of Tripura ,the state is facilitated with minor irrigation like Lift Irrigation (24269 hect), Deep Tube well (3473 hect), Diversion (2608 hect.),Shallow Tube well (493 hect.), Artesian well (over flow-5318 hect.),Small pump (7985 hect.) Seasonal bund (7577 hect.) and other like Dug well (1953 hect.). The total utilized irrigation potential area was 55766 hect., net potential area was 42664 hect. and gross potential area was 70579 hect. during 1998-99.

South Tripura District provided by lift irrigation system covering 7940 hect.land while 896 hect. by deep tube well, 1004 hect.by diversion, 161 hect. by shallow tube well, 1261 hect. by artesian well, 1334 hect by small pump, 1179 hect by seasonal bund and 1276 hect. by other such as dug well etc.The district has 15051 hect. total utilized irrigation potential area, 6387 hect. potential utilized net area and 9493 hect. utilized potential gross area.

The additional potential to be created during current year of 2001- 2002 through Medium, Minor and Other projects is 7,955 ha.. The responsibility of implementation of above target has been entrusted to various departments like PWD (WR), RD, TTAADC and Agriculture. The State Government has set up a committee headed by the Principal Secretary. Forest to identify the critical components for early completion of irrigation projects in Tripura, so that Tripura may become self-sufficient in food. To meet the shortfall in the requirement of fund Govt. has moved the Central Govt. for mobilization of fund through AIBP. So far Centre has released a fund of Rs. 34.653 crores against AIBP during 1999- 2000 and fund released as yet during 2000- 2001 against AIBP is (Rs. 4.845 crores + 9.03 crores = 13.883 crores).

Works on 3 Medium Irrigation Project viz. Gumati, Khowai and Manu are also going on. All the three projects have been commissioned. Works on cannel is going on. On the completion of the cannel works about 13,199 ha. of land will come under assured irrigation. AIBP find is also made available for these three projects.

Animal resources

The animal husbandry and veterinary services is being considered as one of the major activities for providing subsidiary income during non-harvesting season of the farming families in Tripura. The main aim and object, taken up under this sector were qualitative and quantitative improvement in milk

production, poultry and piggery in addition to providing the over all health care to the livestock population.

The livestock population of this state as well as of the district is less in relation to human population and area of the state. According to livestock census carried out in the state in 1997by te Directorate of Animal Husbandry, total live stock and poultry population was 2250655 and 3553772 respectively. The livestock and poultry population recorded in South Tripura District 552092 and 827239 respectively. The district had only 24.80% livestock and 23.28% poultry population in relation to state's livestock and poultry population. Out of 2250655 livestock population of Tripura, 269198(21.93%) were classified as cattle while 17892, 6154, 639415, 236897, 121163 and 1566 were recorded as buffalo, sheep, goat, pig, dog and rabbit respectively. In case of South Tripura District, out of 552092 livestock population 269198(21.93%) were classified as cattle, 1870(10.45%) as buffalo, 1915(31.12%) as sheep, 139863(21.87%) as goat, 94940(40.08%) as pig, 43966(36.29%) as dog and 340(21.71%) as rabbit. Again, out of 827239 poultry population, 192086(21.91%) were classified as duck and 635153(23.72%) as fowl.

For animal health care the district has only 2 veterinary hospitals, 13 veterinary dispensaries, 65 veterinary first aid center, 9 stockman centers, 5 A.1. Centers and 24 stockman sub centers, 1 poultry breeding farm and 2 pig breeding farm. The aim of such institutions are to provide adequate facilities for treatment of livestock and bird, castration of bulls and vaccination of animals for prevention of contagious disease. Here, the pig multiplication farm has been maintaining exotic pigs of large white Yorkshire, large black Hampshire and Lanbrace breed. This farm was established with the financial help of North-Eastern Council. This institution has been functioning the work to supply necessary breeding stock for the programme of pig production.

Fisherier

Priority has been given to Fisheries for production of fish seed, prawn seed and table fish. The Govt. has also given utmost importance for popularizing technique through extension net-work to the farmers. Considering the increasing demand of fish in the state, the Govt. has been giving emphasis for creation of more cultivable water areas for fish culture. Presently, more emphasis has also been given to increase the productivity of the existing water areas. Till 2000-2001 Fish Farmers Development Agencies (FFDA) have created 3163.54 ha. water area and also brought 4690.12 ha. water area under Scientific Fish Culture. The GOI has sanctioned another FFDA for Dhalai District during 1997- 98.

In the State, the first Co-operative Movement in Fisheries was initiated by forming Rudrasagar Udbastu Fisherman Co-operative Society in 1951 at Melaghar under Sonamura Sub-division. Till March, 2001 the State has 129 nos. Fishermen Co-operative Societies including one Apex- Body. The Department of Fisheries is providing technical and economic support to the less privileged societies for their proper growth.

All the members of the societies have been covered under "Fishermen Accident Insurance" to avail benefits by their family members. Besides, housing facilities along with drinking water facilities are also provided to the poor fishermen families. Till March 2001, 580 nos. houses have been constructed and provided to poor fishermen families.

The state has made remarkable progress in Fishery Sector with limited resources and now, stands in the leading position in North-Eastern Region. As recognition of this advancement, the Central Govt. has sanctioned one Fishery College at Lembucherra, Agartal, a faculty of Central Agricultural University, Imphal.

The estimated requirement of fish for the State is nearly 33,300 M. T. per annum and the total quantity of fish produced is 29,420.00 M. T. in 2000-2001, which was 27,875.00 M. T. during 1999- 2000.

The district wise water area and production of fish excluding raw fish let in for sun drying 2000-2001 are as follows:

District	Culturable water area in hac. (Provisional)	Production of Inland fish excluding non Ding subsistence	Fish in M. T. Catch of fish by non-professional (subsistence fish)	Total
1	2	3	4	5
North	2,907.10	4,733.50	835.00	5,568.50
Dhalai	1,744.63	3,272.00	490.00	3,762.00
West	4,770.99	8,667.20	1529.00	10,196.20
South	3,919.28	8,409.30	1484.00	9,893.30
Total:	**13,342.0**	**25,082.0**	**4,338.0**	**29,420.0**

From 2nd Five-Year Plan onwards, stress was given to raise fish seeds by adopting hypophysation technique as there was no reverine and other sources in the State for collection of fish seeds. During 2000-2001, 209.80 million of Fish Seed(Fry) was produced. Tripura became surplus State in fish seed production at the end of 5th Five Year Plan. The State has also produced 1.05 lakhs numbers freshwater prawn seed during 2000-2001.

To motivate fish farmers at G.P. Level/Block level etc. different training camps are to be organized & incentives to be given to selected fish farmers for his/her production of fish keeping in view the above, the State has already established 2 (two) numbers training center at Bishalgarh and Lembucherra under West Tripura District. Besides, another Fish Farmers training center has been established at Udaipur with the fund of DRDA(South).

Fishery College

The Govt. of Tripura initiated a proposal to establish Regional Fishery College at Lebucherra uner Central Agricultural University. Accordingly, the State Govt. has handed over 44.70 acres of land under Debendranagar mouja at Lembucherra Goan Panchayat. The CAU has agreed and started Fishery College at SIPARD building temporarily in consultation with State Govt. since 1998-99.

The building of Fishery College have been constructed at Lembucherra which will be started soon after shifting from SIPARD to newly constructed building.

Establishment of Prawn Hatchery

The Department of Fisheries has succeeded in breeding and raising of Giant Fresh Water Prawn seed in artificial Sea water and established a Prawn hatchery Unit at College tilla with the help of DRDA (West). The Department has produced and distributed 1.05 lakhs Giant Fresh Water Juvenile from the Hatchery Unit. College tilla to the Fish Farmers under West and south District.

Industries and commerce

Tripura being a land-locked State with a predominantly over saturated agricultural economy lags far behind other developed states so far as overall growth is concerned. It therefore, calls for an earnest endeavor of the State Government to open up employment opportunities for the vast number of unemployed people, both in the rural and the urban sectors, through viable means of production with a view to generate economic growth and productive employment in the non-farm sector through otimum utilization of local resources, manpower, talent and skills, with appropriate technical and financial assistance.

Efforts of the Government are concentrated to create an integrated and comprehensive base for industrialization through proper linkage between medium, large and small-scale units. The Department of Industries and Commerce was established in 1965 to promote Village and Small scale industries as well as medium scale industries in the state. However, in order to achieve a meaningful breakthrough in the industrial sector, the opportunities thrown open by the huge availability of natural gas in the state may be explored. While all efforts are being made to promote entrepreneurship within the State. The outside investors in the public and private sector are also encouraged both for their financial capabilities and technical expertise, for the medium and large-scale units. The Government also laid due importance on

further development of the industrial infrastructure by way of augmentation of power, water supply, development of industrial areas with all common facilities etc.

2. Activities being taken ups

As per record, there were 2424 nos. of manufacturing units with total investment of Rs.775.86 lakhs in 1997-98, which was raised to 2488 nos. in 1998-99 with total investment of Rs.549.76 lakhs and further rose to 2582 nos. with investment of Rs.806.75 lakhs in 2000-2001.

The following table indicates the District-wise break-up in respect of number of units/employment/investment for 1998-99,1999-2000 & 2000-2001.

Name of District	1998-1999		1999-2000		2000-2001	
	Unit	Investment (Rs. In lakhs)	Unit	Investment (Rs.in lakhs)	Unit	Investment (Rs.in lakhs)
West	1,747	323.47	1785	272.88	1,804	389.11
North	435	150.86	445	71.31	454	406.59
South	295	32.31	306	45.04	310	6.00
Dhalai	11	43.12	11	43.12	14	5.05
Total :	**2,488**	**549.76**	**2547**	**432.35**	**2,582**	**806.75**

Rubber plantation

After Kerala, Tripura is the largest producer of natural rubber and rubber produced is of superior quality. In Tripura, rubber plants (Heave Brasiliensis) was introduced on trial basis by Forest Department, Government of Tripura in 1963. Rubber, traditionally, is a tropical crop and it grows in Tripura successfully. At present, about 23000 ha. is under natural rubber plantation.

According to the Rubber Board , Govt. of India and TFDPC Ltd.Agartala, Tripura, South Tripura District has 4989 hect.area under rubber production from where she produced 4077 M.T. rubber during 1998-99 and earned Re. 1053.04 lakh and thus the district secured 1st position in case of production and earning money amongst the districts.

The estimated district-wise production of rubber in Tripura during 2000-2001 is as follows :

District	Tapping area (in ha.)	Estimated Production (MT)	Total value of production (Rs. In lakh)
West	3988	3044	791
North	3940	2855	742
South	474	389	101
Dhalai	76	58	15
Total :	**8478**	**6346**	**1649**

The study conducted by the National Bureau of Soil Survey and Land Use Planning as a part of exploratory study for the World Bank Assistance,

revealed that approximately 1 lakh ha. of land is suitable for rubber cultivation in the State. This offers tremendous scope for expansion of cultivation. Apex Bodies of Industries and Commerce like CII etc. have also realized the importance and the potential of rubber cultivation in the State. It is also proposed to engage an engage an external agency to study the feasibility to extend rubber cultivation in an area not exceeding 10% of the total geographical area of the State.

The raw rubber now produced is being sent out of the State to neighbouring States for further value addition. Necessary follow-up actions are also being made to utilize the raw-rubber that would be produced in the State during the year to come and also to convert within the State to value added finished products which may results in industrial revolution.

Tea plantation

Tripura, a traditional tea growing area, has 58 Tea Gardens covering an area of 6430 ha. with a production of more than 5500 tons per annum. Tea is one of the most important cash crops of the State. Tea produced in the State has good blending qualities. Production of Bio-tea, which does not have any chemical residue, has been taken up as special venture. Suitable land and climate conditions offer good potential for development of tea industry in the state. These plantations- based activities will be of special significance in the rehabilitation of the shifting cultivators and Schedule Tribes in general. Tripura holds third position in quality of tea production.

Out of these 58 Tea Gardens, 42 Tea Gardens are Private Tea Gardens, 7 Tea Gardens are run by Tripura Tea Development Corporation (TTDC) and rest 9 Tea Gardens are under Co-operative. The total factories for tea processing are 25 nos. The details production of tea leaves and price of tea in auction market and cost of production of tea are depicted in the table given below:

Year	Production of Tea leaves (Kg. In Lakhs)	Price of Tea in the auction Market (Rs. In per Kg)	Cost of production of Tea (Rs. In per Kg.)
1998	8.70	58.00	57.00
1999	4.35	58.51	63.70
2000	6.50	44.11	68.50

It reveals from the above table that cost of production of tea (Per Kg.) is higher then price of the tea auction market (Per Kg.) for the year 1999 and 2000. Although there is marginal difference between cost of production of Tea (Per Kg.) and price of tea in the auction market (Per Kg.) in 1998. The large-scale production of tea is severely effected due to low price of tea in the auction market

Transport

For a land-locked State like Tripura, creation of alternate modern transport facilities is a developmental imperative. Keeping this in view, a number of steps has been taken for providing better, cheaper, more convenient and prompt transportation facilities.

As a result of the consistent efforts made by the State Government, the Central Government extended National Highway 44 (Assam-Agartala road) up to Sabroom. The State Government has entrusted the work for widening and up gradation of this highway to the Border Roads Organization. Work for widening and up gradation progressed substantially during the period.The Central Government also accepted the State Government's long-standing demand for double-laning of the existing National Highway between Agartala and Churaibari. A new National Highway, from Manu in Dhalai District to Sairang in Mizoram, was also sanctioned during this period. The State Government provided full support to the Railway authorities for expediting construction of railway line from Agartala to Kumarghat. The land acquisition process was streamlined and Engineers and staff were provided on deputation to the Railway

authorities. The Railway Ministry could also be persuaded to undertake survey for extension of railway line from Agartala to Sabroom via Belonia. The preliminary survey work has been completed and report sent to the Railway Board by the North-East Frontier Railway during the period. Similarly, survey work for extension of railway line from Agartala to Akhaura has also been copleted on our side. Another successful campaign of the State Government was in getting an agreement for introduction of bus service between Agartala and Dhaka, which was cleared by both the Governments of Bangladesh and India. A dry run was arranged to survey the route for facilitating formal introduction of the service. After the completion of other facilities required, it is expected that the long cherished dream of the people of Tripura and Bangladesh is likely to materialize in near future. For providing better service to the people and the passengers, following steps have been taken during the period. Computerization of records and services has been taken up in the Department to provide prompt and quality service. A new building for the Transport Department as constructed with provision for better facilities to the public. A recovery crane and an ambulance were procured for use on the National Highway. Smoke meters to check vehicular emission and speedometer to check speeding by vehicles were procured and put into operation. Sulabh Sauchalayas at Knowai, Amarpur and Sabroom Motor stands were commissioned during the period.

Power, Electricity

Today's material civilization depends on development of power. It plays the key role for industrial/agricultural and commercial sectors of the economy and is also the most crucial source of supplying domestic energy requirement. The demand has therefore, been going at a faster rate. There are three main sources of power viz. Hydro, Thermal and Nuclear power. Presently, the state has two sources of power generation mainly Hydro and Thermal. The state is endowed with natural gas which gives potentiality for Thermal Power generation.

Out of two major sources of power generation, thermal power accounts for more than 77% while remaining 22% generated from Hydral power (i.e Gomati Power Project).

The state is experiencing persistent power shortages, due to increase in demand for electricity. In order to contain the demand, power cuts/load shedding are enforced depending upon the supply demand situation.

The total units sold to ultimate customers in 2000-01 was 388 MU. Out of this, maximum power sold to irrigation/public water and sewage was 143.56 MU followed by domestic consumption 103.75 MU, industrial 74.69 MU and for commercial purposes was 46.52 MU.

During the year 2000- 01, the total installed capacity was 85.35 MW and total power generated 318.38 MU. Total purchase of power was 268.00 MU in 2000- 01 which is 8.85 MU higher than the power purchase in 1999- 2000.

The total revenue collected by the power department in 2000- 01 was Rs. 31 crores and total expenditure incurred by department (excluding salary and wages) was Rs. 86.65 crores, therefore, left a deficit of Rs. 55.35 crores.

The following table depicts a detail comparison on power sold to ultimate consumer during 1997-98, 1998-99, 1999-2000 and 2000-2001.

Year	Total unit sold to ultimate consumer	Domestic light & fans	Commercial	Industrial Power (High volt)	Public lighting	Irrigation/ Public water & Sewage	Tea garden and other bulk supply
1997-98	315.88	75.81	37.96	63.18	15.80	104.24	18.95
1998-99	363.119	97.107	43.57	69.914	7.26	134.36	10.9083
1999-00	362.43	96.91	43.46	69.77	7.21	134.09	10.88
2000-01	388.00	103.75	46.52	74.69	7.72	143.56	11.64

The following table will show the achievement made on district-wise number of towns and villages electrified as on 31.03.98, 31.03.99 and 31.03.01

Electrification

District	As on towns	Total No. of electrified	Total No. of electrified	% of Town (as per 1971 Census)	Total No. of villages electrified	Total No. of villages electrified	% of villages
West	31.03.98	-	-	-	2406	1667	69.28
	31.03.99	-	-	-	2406	1683	70.00
	31.03.00	-	-	-	2406	1699	70.60
	31.03.01	5	5	-	2406	1706	70.00
North	31.03.98				601	567	94.34
	31.03.99				601	571	95.00
	31.03.00	-	-	-	601	571	95.00
	31.03.01	4	4	100	601	571	95.00
South	31.03.98				1015	967	95.27
	31.03.99				1015	974	96.00
	31.03.00	-	-	-	1015	979	96.40
	31.03.01	5	5	-	1015	980	96.56
Dhalai	31.03.98				705	519	73.62
	31.03.99				705	523	74.00
	31.03.00	-	-	-	705	526	74.60
	31.03.01	4	4	-	705	527	74.75
Total :	**31.03.98**	**18**	**18**	**100.00**	**4727**	**3720**	**78.69**
	31.03.99	**18**	**18**	**100.00**	**4727**	**3751**	**79.00**
	31.03.00	**-**	**-**	**100.00**	**4727**	**3775**	**79.80**
	31.03.01	**18**	**18**	**-**	**4727**	**3784**	**-**

During the financial years from 1994- 95 to 2000-01, the revenue collected expenditure incurred (except salary and wages) by the power department are depicted in the following table:

Year	Income (Rs.in crore)	Expenditure (Rs.in crore)
1994-95	Rs. 9.14	Rs.37.92
1995-96	Rs.16.41	Rs.46.81
1996-97	Rs.13.31	Rs.49.83
1997-98	Rs.14.10	Rs.58.10
1998-99	Rs.17.00	Rs.61.60
1999-2000	Rs.28.76	Rs.82.06
2000-2001	Rs.31.00	Rs.86.65

(v) Census concepts

Building : A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc. Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses : Houses in which both wall and roof are made of permanent materials. Material of wall can be burnt bricks, GI / metal / Asbestos sheets, stone with lime or cement or cement concrete. Roof may be made of tiles, slate, shingle, corrugated/ galvanized iron or zinc/other metal or asbestos sheets, bricks, lime and stone, stone, RBC/RCC or concrete.

Semi-permanent houses : Houses in which either wall or roof is made of permanent materials and the other is made of temporary material.

Temporary houses : Houses in which both wall and roof are made of materials which have to be replaced frequently. Wall may be made of grass, thatch, leaves, reeds, bamboo, mud, plastic / polythene, un-burnt bricks or wood. Roof may be made from grass, leaves, bamboo, thatch, mud, un-burnt bricks, wood, plastic or polythene.

Room : A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question. One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used

by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room : A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house : A 'Census' House is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house. If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Rural-Urban area: The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.b) place satisfying the following three criteria simultaneously:i) A minimum population of 5,000;ii)at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village : The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area : The following areas are treated as towns/urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc. (b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometer (1,000 per square mile).

City : Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration : An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household : A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household may consist of persons related to each other, unrelated or both. Examples of unrelated household are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, orphanages, etc. These are called 'Institutional Households'. There may be one member household, two member households or multi member households. For census purposes each one of these types is regarded as a 'Household'. "If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person should be treated as a separate household. The important link in finding out whether it is a household or not is a common kitchen". In a few situations, it may become difficult to apply the definition of household strictly. For example, a person living alone in a census house, whether cooking or not cooking meals, will have to be treated as a household. Similarly, if husband and wife or a group of related persons are living together in a census house but not cooking their meals, will also constitute a normal household. For the purpose of census there are three type of Households i.e., Normal household, Institutional household and the Houseless Household. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household : A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-over and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe: Article 341 of the Constitution provides that the President may, with respect to any State or Union territory,

specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below:

ScheduledCastes	**Scheduled Tribes**
1. Bagdi	1. Bhil
2. Bhuimali	2. Bhutia
3. Bhunar	3. Chaimal
4. Chamar, Muchi	4. Chakma
5. Dandasi	5. Garoo
6. Dhenuar	6. Halam
7. Dhoba	7. Jamatia
8. Dum	8. Khasia
9. Ghasi	9. Kuki, including the following sub-tribes
10. Gour	(i) Balte
11. Gur	(ii) Belalhut
12. Jalia Kaibarta	(iii) Chhalya
13. Kahar	(iv) Fun
14. Kalindi	(v) Hajango
15. Kan	(vi) Jangtei
16. Kanda	(vii) Khareng
17. Kanugh	(viii) Khephong
18. Keot	(ix) Kuntei
19. Khadit	(x) Laifang
20. Kharia	(xi) Lentei
21. Koch	(xii) Mizel
22. Koir	(xiii) Namte
23. Kol	(xiv) Paitu, Paite
24. Kora	(xv) Rangchan
25. Kotal	(xvi) Rangkhole
26. Mahisyadas	(xvii) Thangluya
27. Mali	10. Lepcha
28. Mehtor	11. Lushai
29. Musahar	12. Mog
30. Namasudra	13. Munda, Kaur
31. Patni	14. Noatia
32. Sabar	15. Orang
	16. Riang
	17. Santal
	18. Tipura, Tripuri, Tippera

Language and Mother tongue : As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother

tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate : A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate : Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level : The highest level of education a person has completed

Work : Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker : A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker : A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker : A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator : For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural laborer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer : A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/ he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker : Household industry is defined as an industry conducted by the head of the household herself/himself and or by the

members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker : A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate : Percentage of workers (main + marginal) to total population

Population density : Population density is the number of persons inhabited per square kilometre of the area.

Age : Age is measured in terms of the completed number of years.

Sex -ratio : Number of females per 1000 males in a population.

(vi) Non Census Concepts

Improved drinking water : If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage : Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil : There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching chess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility : In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) : Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid- year Population}} \times 1000$$

Crude death rate (CDR) : Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate : Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) : Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age- group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) : Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid- year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR) : Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) : Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age group (15-49) year}} \times 1000$$

Total fertility rate (TFR) : It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) : Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{54\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR) : Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1: Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2: Probability of dying between birth and age 2.

q5: Probability of dying between birth and age 5.

This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) : Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Number of live births during the yearInfant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) : Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infants deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate:

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) : Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) : Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1000 population) : Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) : 1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9) : 2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration : Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :- (i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant. (ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration : The migration movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration: Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units : Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town : Size-class of UA/ Town is based on the population size of the UA/City/ Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, spopulation with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area : The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

vii) 2001 Census Findings

Distribution of population in rural-urban: According to 2001-Census, the total population of South Tripura District is 767,440 comprising 394,605 male and 372,835 female. Out of the total population of the district 92.94 percent people live in rural areas and 7.06 percent live in urban areas. Rural population of the district is distributed among ten development blocks while urban population is distributed in four towns.

Distribution of Population (State /District) by Rural & Urban including its Percentage

	Tripura	South Tripua
Total	31,99,203 (100%)	7,67,440 (100%)
Rural	26,53,453 (82.9%)	7,13,293 (92.94%)
Urban	5,45,750 (17.0%)	54,147 (7.06%)

	District Total	**718,732**	**673,919**	**44,813**	**767,440**	**713,293**	**54,147**	**6.78**	**5.84**	**20.83**	**6.24**	**7.10**

The above table depicts the decadal changes in population of tohsils (In state of Tripura dev. Block) by Residence and percentage of decadal variation (1991-2001) and percentage of urban population (1991-2001). The district total population of 2001 Census is 767440 and that of 1991 Census was 718732 i.e. the absolute increase in population is “48708”. In case of rural it is 39374 and in urban it is 9334. The percentage of decadal variation of the district(as a whole) is 6.78. In case of rural it is 5.84% and urban 20.83%. The maximum of decadal variation is in Killa(80.8%)development block. Whereas the minimum are in Karbuk (-44) development block. The decadal variation above the district level are in the development blocks Killa((80.8%), Rajnagar (23.7%), Hrishyamuk(17.4%), Bagafa(11.3%), and rest are below the district level. In case of rural the decadal variation of development block above the district level are the same which we have mentioned in case of total percentage decadal variation. The decadal variation of urban within the district are shown as a whole (20.83%). In that case we are unable to analysis the four NP’s percentage of decadal variation respectively. The percentage of urban population in the district in increased from 6.24(1991) to 7.1(2001).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl. No.	District/RD block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10

10	Satchand	26,348	25,139	2 (6.9)	6,454	6,074	0 (0.0)	0	0
	Districts (Rural) Total:	**198,257**	**188,620**	**25 (9.3)**	**88,502**	**82,321**	**1 (0.4)**	**5,895**	**5,531**

The above table depicts the percentage of inhabited villages in seven population size with sex wise breakup i.e. <200, 200-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10000 & above. There are no village within the population range <200. In the population range 200-499 there are 11 villages (4.1%) where total number of males are 1845 and total number of females are 1814. In the population range 500-999 there are 32 villages (11.9%) where total male are 12333 & females are 56845. In the population range 1000-1999 there are 77 villages where males 59501 and females 56845. In the population range 2000-4999 there are 123 villages(45.7%) where males 198257 and females 188620. In the population range 10000 & above there are only 1 village(0.4%) males 5895 and females 5531. If we are analyze development block wise then we may observed that there are no population in the range <200. In respect of Killa, Kakraban, Rajnagar, Bagafa and Satchand having no village of population range 200-499. In Matarbari there are no village in the population range 500-999. For the population range 1000-1999 no villages are in Kakraban dev. Block. In Karbuk and Rupaichhari dev. Block there are no villages in the population range 5000-9999. It is interesting to observed that in Bagafa development block only one village whose population range is 10000+ within entire district. In the district out of 269 inhabited villages the maximum number of district i.e. 123 are in the population range 200-4999 and in percentage it is also maximum i.e.45.7%.

(d) Wholly merged with other town(s)	NIL

Table 3 is self explanatory

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.7	478	0.1
11-20	0	0.0	0	0.0
21-50	9	3.3	13,924	2.0
51-100	28	10.4	26,049	3.7
101-200	61	22.7	103,475	14.5
201-300	52	19.3	126,092	17.7
301-500	65	24.2	210,046	29.4
501 +	52	19.3	233,229	32.7
Not known	0	0.0	0	0.0
District Total:	**269**	**100.0**	**713,293**	**100.0**

Population Density (Rural) of the district: 247.8

The above table depicts the distribution of villages by density of population, 2001. The range of population density (Per square Kilometers) are in 8 villages i.e. 0-10, 11-20, 21-50, 51-100, 101-200, 201-300, 301-500, 501+. From the above table we may notice that the out of 269 inhabited villages only 52 villages having the maximum number of population i.e. 233,229 out of 713293 and so the percentage distribution of population is also maximum i.e. 32.7% and whose density of population is in the 501+. In the lowest population density range i.e. "0-10" there are 2 villages whose population is only 478. It is interesting to notice from the table that the village and its population are in all density range except "11-20" where no villages are there and so the question of population are does not arise. The maximum villages i.e. 65 out of 269 are in the density range of "301-500" and whose population are 201046.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

	State			District		
Census Year	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1901	874	887	595	873	873	-
1911	885	894	636	883	883	-
1921	885	888	787	880	880	-
1931	885	889	727	872	872	-
1941	886	891	754	877	877	-
1951	904	909	836	908	908	-
1961	932	936	884	938	941	900
1971	943	944	935	948	948	948
1981	946	945	957	946	947	932
1991	945	942	958	951	952	942
2001	948	946	959	945	947	915

The above table depicts the sex ratio of the state and district in since 1901 to 2001. In respect of state the sex ratio of 1901 was 874 after that from 1911 to 1941 it was in stable population of 885, 885, 885, 886 but in 1951 it much more increase from 886 to 904 and also increased in 1961 as 932 from 904(1951). Again it was in more or less stable from 1971 to 2001 i.e. 943, 946, 945 and 948 respectively. In comparison of stable rural and urban sex ratio then we may note that rural sex ratio in the stable was always higher than urban sex ratio of the state since 1901 to 1971. But from the 1981 to the latest Census i.e. 2001 it was in reverse trend that urban sex ratio is greater than rural sex ratio. In case of district sex

ratio more or less steady since 1971 to 2001. We are getting the sex ratio of urban since 1961 in case of the district and we may observed at in 1961 the sex ratio of rural is higher than urban but in two decades i.e., 1971 urban sex ratio >rural sex ratio again in 1981 rural sex ratio is greater than urban and 1991 also once again it is in reverse in 2001.

The district urban sex ratio of 2001 is much less than state's urban sex ratio in 2001 Census.

TABLE 6 : SEX RATIO BY RD BLOCKS, 2001

Sl. No.	Name of RD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
	Urban	915	0	915
1	Killa	993	993	
2	Amarpur	953	953	
3	Matarbari	930	930	
4	Kakraban	964	964	
5	Rajnagar	939	939	
6	Hrishyamukh	936	936	
7	Bagafa	948	948	
8	Karbuk	951	951	
9	Rupaichhari	942	942	
10	Satchand	950	950	
	District Total:	945	947	915

In South Tripura district, there are 945 females per 1000 males. In rural it is almost same i.e. 947 per 1000 males but in urban area it is too less than the district as well as in comparison with rural sex ratio. The maximum sex ratio are in Killa development block (993) and maximum are in Matarbari development block(930). Six development blocks out of ten having higher sex ratio in comparison with district total sex ratio and the rest four are below the district level.

TABLE 7 : SEX RATIO BY RD BLOCKS, 2001

Sl. No.	Name of R D block	Sex ratio
1	2	3
1	Killa	993
2	Amarpur	953
3	Matarbari	930
4	Kakraban	964
5	Rajnagar	939
6	Hrishyamukh	936
7	Bagafa	948
8	Karbuk	951
9	Rupaichhari	942
10	Satchand	950
	District (Rural) Total:	**947**

This table is also most same with the previous table i.e. table No.7. Here the sex ratio here shown as development block wise only. The district total sex ratio is 947. The maximum and minimum sex ratio of the development block are in Killa (993) and in Matarbari (930). Six development blocks sex ratio are above the district level and rest four are below the district level.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	0	0.0	0	0.0
700-749	3	1.1	8,381	1.2
750-799	1	0.4	953	0.1
800-849	8	3.0	11,528	1.6
850-899	23	8.6	56,238	7.9
900-949	82	30.5	264,841	37.1
950-999	97	36.1	279,836	39.2
1000-1099	51	19.0	87,477	12.3
1100+	4	1.5	4,039	0.6
District Total:	**269**	**100.0**	**713,293**	**100.0**

Sex ratio (Rural) for District: 947

The above table depicts the range of sex ratio for villages in 2001. The range of sex ratio classified as 9 ranges which are shown in column no. 1 of the above table. 55 villages out of 269 whose sex ratio are 1000 and above which are represents good balancing position in the society. More than 60% villages are above the district level sex ratio (947). Only 12 villages consisting 20862 population are very low sex ratio i.e. 700 to 849. Four villages having more than 1100 sex ratio. It is a good healthy picture in respect of sex ratio of the district that 36.1% villages containing 97 inhabited villages are in the sex ratio range of 950- 999.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Udaipur NP	NP	931
2	Amarpur NP	NP	864
3	Belonia NP	NP	928
4	Sabroom NP	NP	921
	Sex ratio (Urban) for the district:		**915**

The above table represents the sex ratio of urban areas of the district. The total sex ratio of (Urban) for the district is 915. The three NP towns out of four having the sex ratio above the district (Urban) level only. Amarpur NP whose sex ratio (864) is an alarming position in respect of district as well as other Statutory towns. The maximum sex ratio are in Udaipur NP (931).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR RD BLOCKS, 2001

Sl. No.	Name of RD Block	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
	Urban		4,965	2,586	2,379	920
1	Killa	Total	5,070	2,686	2,384	888

		Urban	0	0	0	
8	Karbuk	Total	6,610	3,292	3,318	1,008
		Rural	6,610	3,292	3,318	1,008
		Urban	0	0	0	
9	Rupaichhari	Total	7,918	3,998	3,920	980
		Rural	7,918	3,998	3,920	980
		Urban	0	0	0	
10	Satchand	Total	12,279	6,287	5,992	953
		Rural	12,279	6,287	5,992	953
		Urban	0	0	0	
	District Total:	**Total**	**110,028**	**56,117**	**53,911**	**961**
		Rural	**105,063**	**53,531**	**51,532**	**963**
		Urban	**4,965**	**2,586**	**2,379**	**920**

The above table represents the sex ratio of 0-6 age group children rural and urban areas. The total sex ratio of the district in respect of 0-6 age group children is 961 in which rural in 963 and urban is 920. The rural sex ratio of 0-6 age group children is more than urban sex ratio of 0-6 age group children. Among the development block the highest 0-6 age group sex ratio is in Kakraban (1008) development block and lowest 0-6 age group sex ratio in Killa (888) development block. Out of 10 development blocks the sex ratio of Kakraban (1008), Amarpur (999), Rajnagar (962) and Rupaichhari (980) are above the district level of 961 and Kakraban's sex ratio is equal to district level.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR RD BLOCKS, 2001

Sl. No.	Name of RD block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Killa	5,070	2,686	2,384	888
2	Amarpur	12,101	6,053	6,048	999
3	Matarbari	15,400	7,884	7,516	953
4	Kakraban	8,847	4,511	4,336	961
5	Rajnagar	12,908	6,578	6,330	962
6	Hrishyamukh	6,596	3,388	3,208	947
7	Bagafa	17,334	8,854	8,480	958
8	Karbuk	6,610	3,292	3,318	1,008
9	Rupaichhari	7,918	3,998	3,920	980
10	Satchand	12,279	6,287	5,992	953
	District (Rural) Total:	**105,063**	**53,531**	**51,532**	**963**

The above table is same to the previous table No. (10). This table represents the RD block wise sex ratio but previous table shown Tahsils wise sex ratio. As there is no Census town in South Tripura district, so the urban portion sex ratio are shown separately in the last line of district total of previous table No.(10). So in respect of analysis will be the same with previous table.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	4	1.5	506	0.5
700-749	6	2.2	1,555	1.5
750-799	11	4.1	3,152	3.0
800-849	17	6.3	5,456	5.2
850-899	44	16.4	20,132	19.2
900-949	42	15.6	17,369	16.5
950-999	46	17.1	21,892	20.8
1000-1099	50	18.6	20,119	19.1
1100+	49	18.2	14,882	14.2
District (Rural) Total	**269**	**100.0**	**105,063**	**100.0**
Sex ratio (Rural) for District:		**963**		

The above table represents the sex ratio of rural population in the age group of 0-6 children by range. There are 9 ranges are shown in column 1 of the table. 99 inhabited villages having sex ratio more than 1000 and which covered 35001 population i.e. 33.3% or 1/3rd of the total population of 0-6 age group children. The maximum percentage(18.6) are in the sex ratio range of 1000-1099 which covered 50 villages. In respect of the district total (963) very low sex ratio are 700-899 which covered 82 inhabited villages. Four villages very very low sex ratio i.e. less than 700 whose population are 506. It is good healthy position of the district in respect of 0-6 age group sex ratio that 49 villages having 1100+ sex ratio and 99 villages having more than 1100 sex ratio.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name of UA/ Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Udaipur NP	NP	1,981	1,050	931	887
2	Amarpur NP	NP	1,008	530	478	902
3	Belonia NP	NP	1,350	690	660	957
4	Sabroom NP	NP	626	316	310	981
	District(Urban) Total		**4,965**	**2,586**	**2,379**	**920**

The above table represents the sex ratio district (urban areas). In urban the district total sex ratio is 920. In respect of four NP towns the highest and lowest sex ratio of 0-6 age group are in Sabroom NP(981) and Udaipur NP(887) respectively, two towns i.e. Belonia NP(957) and Sabroom NP(981) are above the district level in respect of sex ratio and rest two's sex ratio are below the district level.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN RD BLOCKS, 2001

Sl. No.	Name of RD Block	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8

		Urban	0	0	0	0.0	0.0

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN RD BLOCKS, 2001

Sl. No.	Name of RD Block	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
10	Satchand	Total	78,104	14,879	26,862	19.1	34.4
		Rural	78,104	14,879	26,862	19.1	34.4
		Urban	0	0	0	0.0	0.0
	District Total:	**Total**	**767,440**	**127,307**	**289,519**	**16.6**	**37.7**
		Rural	**713,293**	**116,870**	**287,815**	**16.4**	**40.4**
		Urban	**54,147**	**10,437**	**1,704**	**19.3**	**3.1**

The total population, total SC population, total ST population and percentage of SC & ST population to total population are shown in the above table. Out of 767440 population 127307 are SC and 289519 are ST population and its percentages are 16.6% 37.7% respectively. In rural and urban population the percentage of SC is 16.4(R) & 19.3(U) where as in respect of ST 40.4(R) & only 3.1(U). Now we are analyzing the maximum percentage of SC & ST among the development blocks. Kakraban development block represents the maximum SC in percentage i.e. 29.9% and that of Killa (0.2%) is the minimum percentage of SC. But when we are considering the total SC population then we can see that Matarbari development block having highest number of SC population i.e. 27170 out of 127307 and Killa development block reports only 53 SC population. In respect of ST population the maximum and minimum percentage are in Killa ((97.8%) and in Kakraban (15.9%) respectively. If we considering the highest and lowest ST population then we can observed that Amarpur dev. Block having 56179 ST population out of 289519 total population and Kakraban represents the lowest ST population of 10474.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Killa	31,065	53	30,372	0.2	97.8
2	Amarpur	81,698	11,312	56,179	13.8	68.8
3	Matarbari	124,529	27,170	21,404	21.8	17.2
4	Kakraban	66,045	19,756	10,474	29.9	15.9
5	Rajnagar	83,198	18,684	14,362	22.5	17.3
6	Hrishyamukh	48,214	6,180	10,982	12.8	22.8
7	Bagafa	121,451	14,971	52,254	12.3	43.0
8	Karbuk	39,643	2,427	32,583	6.1	82.2
9	Rupaichhari	39,346	1,438	32,343	3.7	82.2
10	Satchand	78,104	14,879	26,862	19.1	34.4
	District (Rural) Total:	**713,293**	**116,870**	**287,815**	**16.4**	**40.4**

This table is more or less same with previous table No.14 only exception is here the percentage of SC & ST here shown only in RD block wise and the previous total in Tahsils wise. Though in our state (Tripura) there is no Tahsils but the urban portion have shown in table 14 in the last line of the district total. The maximum and minimum percentage of SC & ST in RD block wise are Kakraban (29.9%) and Killa (0.2%) in respect of SC and in Killa (97.8%) in Kakraban (15.9%) in respect of ST.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	84	31.2	0	0.0
Less than 5	50	18.6	2,880	2.5
5-10	22	8.2	5,255	4.5
11-20	42	15.6	22,279	19.1
21-30	35	13.0	31,707	27.1
31-40	22	8.2	33,267	28.5
41-50	9	3.3	13,715	11.7
51-75	5	1.9	7,767	6.6
76 and above	0	0.0	0	0.0
District Total	**269**	**100.0**	**116,870**	**100.0**

The above table represents the population of Scheduled Castes populations to total population in villages, 2001. There are nine percentage range of SC population shown in the column No.1 of the table. It is interesting to notice that 84 villages out of 269 villages of the district having no Scheduled Castes population. The maximum number of SC population i.e. 33,267 out of 116870 to the SC population are in the range of "31-40" and which consist 22 villages in regards percentage it is also highest i.e. 28.5%. The minimum percentage of SC (2.5%) in the range of less than five and it consist 2880. There was no SC population in the range of 76 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	12	4.5	0	0.0
Less than 5	35	13.0	1,658	0.6
5-10	17	6.3	3,847	1.3
11-20	18	6.7	12,812	4.5
21-30	12	4.5	8,971	3.1
31-40	15	5.6	20,367	7.1
41-50	10	3.7	12,000	4.2
51-75	37	13.8	54,955	19.1
76 and above	113	42.0	173,205	60.2
District Total	**269**	**100.0**	**287,815**	**100.0**

The above table represents the proportion of ST population to total population in village and its percentage. It is observed from the table that 12 villages out of 269 villages having no ST population the dis-

trict. There are nine percentage range of St shown in column 1 of the above table. It is interesting to observed the maximum number of ST population i.e. 173205 out of 287815 are in the percentage range of 76 and above and it consist 113 villages out of 269 villages and in percentage it is 60.2 i.e., highest in comparison in the other range. The minimum percentage are 0.6 which consist 1658 ST population within 35 villages and its percentage range is less than 5.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Udaipur NP	21,758	4,078	528	18.7	2.4
2	Amarpur NP	10,861	2,866	503	26.4	4.6
3	Belonia NP	15,760	2,406	202	15.3	1.3
4	Sabroom NP	5,768	1,087	471	18.8	8.2
District (Urban) Total:		**54,147**	**10,437**	**1,704**	**19.3**	**3.1**

The above table represents the SC & ST population in Urban areas of the district and their percentage to total population. Out of 54147 population in the district the SC populations are 10437 where as ST are 1704 and their percentage to total population are 19.3 and 3.1 respectively. Here we may observed that district urban SC percentage more than six times in comparison with district ST percentage.

Out of four NP towns in the district the maximum SC percentage are in Amarpur NP(26.4) whereas minimum are in Belonia NP(15.3). But in respect of total SC population the maximum (4078) out of 10437 are in Udaipur NP and the minimum i.e. 1087 are in Sabroom NP.

The maximum percentage of ST are in Sabroom NP(8.2) whereas the minimum are in Belonia NP (1.3). In terms of total population Udaipur NP having maximum i.e. 528 out of 1704 and Belonia having minimum i.e. 202 only.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Killa	104	1,011
2	Amarpur	929	993
3	Matarbari	952	991
4	Kakraban	975	1,035
5	Rajnagar	944	991
6	Hrishyamukh	963	967
7	Bagafa	955	982
8	Karbuk	904	973
9	Rupaichhari	910	972
10	Satchand	959	964
	District (Rural) Total	**952**	**986**

The above table represents the sex ratio of SC and ST in RD blocks,2001. The district (Rural) total sex ratio of SC and ST are 952 and 986 respectively i.e. the sex ratio of ST is greater than the sex ratio of SC in the district. In comparison with RD block wise the maximum and minimum SC sex ratio are in Kakraban (975) and Killa (104). It is an alarming that sex ratio of SC in Killa is very very low, it represents the misbalancing condition of social life in SC- society. Four development blocks out of ten the sex ratio of SC are above the district level i.e. 952 and Matarbari having equal sex ratio with district total level.

In case of ST the maximum and minimum the sex ratio are in Kakraban (1035) and Satchand (964) respectively. Killa development block having also good sex ratio i.e. 1011. Five RD blocks are above sex ratio of district total i.e. 986.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Udaipur NP	1,006	371
2	Amarpur NP	907	597
3	Belonia NP	872	530
4	Sabroom NP	994	688
Sex ratio (Urban) for the district:		**945**	**534**

The above table represents the sex ratio of SC and ST in respect of urban areas of the district. The total sex ratio(urban) for the district in case of SC= 945 and ST= 534. The sex (urban) ratio of ST is very very low.

In respect of SC the maximum are in Udaipur NP(1006) and minimum are in Belonia NP(872). Two towns i.e. Udaipur NP and Sabroom NP the SC-sex ratio is above the district total sex ratio. In respect of ST the maximum and minimum sex ratio are in Sabroom NP(668) & Udaipur NP(371) respectively. It is very alarming position in the district about the sex of ST in respect of Urban areas.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY RD BLOCKS, 2001

The above table represents the number of literates, illiterates the percentage of literates gap in male female literacy rate by Tahsils(In state of Tripura RD block). The total population of the district is 767440 in which 459502 are literates and 307938 are illiterates. In terms of rural and urban the total population are 713293(rural) and literates are 414583 and illiterates are 298710. Out of total urban population of 54147 the literates are 44919 and illiterates are 9228 respectively. Out of 459502 literates males are 267091 and females are 192411 and out of 307938 illiterates the males are 127514 and females are 180424 respectively. The total percentage of literates are 69.9% out of which males are 78.9% and females are 60.3%. The percentage of urban literacy 91.3% is higher than the rural literacy 68.2%. Both the cases of males and females the urban literacy rate the higher than the rural literacy rates. Now we are analyzing the development wise the maximum and minimum literacy rate and maximum gap in male /female literacy rates etc. In persons the maximum literacy rate are in Kakraban (76.6%) and that of minimum are in Karbuk(48.9%) respectively. In case of males maximum and minimum literacy rate in Kakraban(84.6) and Karbuk (61.1) respectively.

In terms of females the maximum and minimum literacy rate in Kakaraban(68.3) and Karbuk(35.8) respectively. The maximum gap in male and female literacy rate are in Rupaichhari (25.7) and Matarbari(16.2) respectively.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

81-90	38	14.1	160,951	22.6
91-99	2	0.7	3,137	0.4
100	0	0.0	0	0.0
District Total:	**269**	**100.0**	**713,293**	**100.0**
Literacy rate for District:		**69.9**		

The above table represents the distribution of villages by literacy rate range 2001. There are twelve range of literacy rate shown in column (1) of the table. In the range of "0-100" there are no population in the district. The maximum number of population i.e. 212,756 out of 713,293 are in the literacy range of "71-80" and which covered 65 inhabited villages out of 269 total villages of the district. The percentage distribution of population of this range is 29.8. 105 inhabited villages are above the literacy rate for the district and whose percentage distribution of population are 52.8% only one village consists 257 population are in the lowest range of literacy i.e. "1-10" and 2 villages having 3,137 populations are in the highest range "91-99" of literacy rate.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Udaipur NP	18,187	9,729	8,458	3,571	1,537	2,034	92.0	95.2	88.5	6.8
2	Amarpur NP	8,701	4,896	3,805	2,160	932	1,228	88.3	92.4	83.5	8.9
3	Belonia NP	13,322	7,200	6,122	2,438	976	1,462	92.4	96.2	88.4	7.8
4	Sabroom NP	4,709	2,571	2,138	1,059	431	628	91.6	95.7	87.1	8.7
District (Urban) Total:		**44,919**	**24,396**	**20,523**	**9,228**	**3,876**	**5,352**	**91.3**	**95.0**	**87.3**	**7.6**

The above table represents the number of literates with sex wise break up, number of illiterates with sex wise break up, percentage of literates with sex wise break up and gap in male and female literacy rate in urban areas only. Out of 54,147 population the total number of literates are 44919 and illiterates are 9228. Out of 44919 literates persons the males are 24396 and females are 20523 respectively. Out of 9228 illiterate persons 3876 are males and 5352 are females respectively. The total person of urban literates in the district is 91.3 in which males are 95% and females are 87.3% respectively.

The maximum literate percentage are in Belonia NP(92) and minimum are in Amarpur NP(88.3) respectively. In case of males percentage of literacy the maximum and minimum are in Belonia NP(96.2) and Amarpur NP(92.4) respectively. In case of females the maximum and minimum percentage of literates are in Udaipur NP(88.5) and Amarpur NP(83.5) respectively.

The district (urban) male–female literacy gap is 7.6%. The maximum male–female literacy gaps are in Amarpur NP(8.9) and minimum in Udaipur NP(6.8) respectively.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

The above table represents the population of (SC) literates and illiterates in sex wise break up, percentage of literates within sex wise break up and gap in male-female literacy rate. Out of 14879 total SC population the number of literate is 76658 and illiterates are 40212 respectively. The total percentage of literate persons are 75.5 in district (rural) and male–female break up as 83.3% & 67.4% respectively. The maximum and minimum percentage of literates are in Killa(86.8) and in Rupaichhari(65.3) respectively. In case of males the maximum and minimum also are in Killa(89.6%) and Rupaichhari(75.2%) respectively. In case females the maximum and minimum are in Satchand(72.5%)and minimum in Rupaichhari(54.7%) respectively.

The district (rural) total gap in male-female literacy rate is 15.8%. The maximum are in Killa (29.6%) and minimum are in Matarbari(15%) respectively.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	1.1	2	0.0
1-10	0	0.0	0	0.0
11-20	1	0.5	20	0.0
21-30	0	0.0	0	0.0
31-40	4	2.2	302	0.3
41-50	5	2.7	724	0.6
51-60	7	3.8	1,721	1.5
61-70	36	19.5	22,344	19.1
71-80	73	39.5	60,826	52.0
81-90	47	25.4	29,227	25.0
91-99	3	1.6	1,603	1.4
100	7	3.8	101	0.1
District Total:	**185**	**100.0**	**116,870**	**100.0**
Literacy rate for District (Rural):		**75.5**		

The above table represents the range of literacy rate for Scheduled Castes population, 2001. There are twelve range of literacy rate of villages shown in column no.(1) of above table. The highest number of population i.e. 60,826 are in the literacy range of "71-80" which covered maximum number of villages i.e. 73 and percentage distribution of population is 51. There are two villages whose population is only 2

are in (0) range of literacy rate and 7 villages with 101 population is on 100 range of literacy rate. More than 57 villages having the literacy rate of above the district level. It is interesting from the table that there are no Scheduled Castes population in the range of "1-10" and "21-30" only one village with 20 population having the range of literacy rate of "11-20".

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TONWS, 2001

Sl. No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Udaipur NP	3,133	1,681	1,452	945	352	593	85.2	92.3	78.3	14.0
2	Amarpur NP	2,203	1,219	984	663	284	379	85.1	90.2	79.5	10.7
3	Belonia NP	1,847	1,057	790	559	228	331	84.8	90.5	78.2	12.3
4	Sabroom NP	833	448	385	254	97	157	87.0	92.9	81.1	11.9
South Tripura (Urban):		**8,016**	**4,405**	**3,611**	**2,421**	**961**	**1,460**	**85.3**	**91.3**	**78.9**	**12.5**

The above table represents the number of SC literates and illiterates, the percentage of literates with sex wise break up and gap in male-female literacy rate in urban areas of the district. Out of 10437 SC population the total number of literate person are 8016 and that of illiterate are2421 respectively. Out of 8016 literate the males are 4405 and females are 3611. Out of 2421 illiterate persons the males are 961 and females are 1460.

The total district (urban) percentage of literates are 85.3% and male-female break up it is 91.3% and 78.9% respectively. The maximum an minimum percentage of literates within the town are in Sabroom NP(87%) and Belonia NP(84.8%). In case of males the maximum and minimum are in Sabroom NP(92.9%) and in Amarpur NP(90.2%) respectively. In case of females the maximum and minimum are in Sabroom NP(81.1%) and Belonia NP(78.2%) respectively.

The district(urban) gap in male- female literacy is 12.5%. The maximum and minimum in Udaipur NP(14%) and Amarpur NP(10.7%) respectively.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Number of literates and illiterates						Percentage of literates			Gap in male/female
		Number of literates			Number of illiterates

3	Belonia NP	152	100	52	50	32	18	82.2	80.6	85.2	-4.6
4	Sabroom NP	406	250	156	65	29	36	94.9	96.9	91.8	5.1
South Tripura (Urban):		**1,343**	**868**	**475**	**361**	**243**	**118**	**86.3**	**85.0**	**88.8**	**-3.8**

The above table represents the total number of literates and illiterates with sex wise break up, percentage of literates with sex wise break up and gap in male-females literacy rate in respect of Scheduled Tribe(urban), 2001. Out of 1704 ST population the literates are 1343 and illiterates are 361. Out of 1343 ST literates the males are 868 and females are 475 respectively. Out of 361 illiterate persons the males are 243 and females are 118 respectively. Total district(urban) percentage of literates are 86.3 and males are 85% and females are 88.8% respectively.

The maximum and minimum percentage of literates are in Sabroom NP(94.9) and Udaipur NP(78.8). In case of male the maximum and minimum percentage are also in Sabroom NP(96.9) and UdaipurNP(74.2) respectively. In case of female the maximum and minimum percentage are in Sabroom NP(91.8) and in Amarpur NP(85.1) respectively.

It is very interesting to observe that percentage of female literacy rate in district(urban) level is higher than the males literacy rate. Hence the gap in male/ female literacy rate come in "negative" i.e. -3.8. The maximum gap (in negative) are in Udaipur NP i.e. -17.4% and minimum in Belonia(-4.6%). But in case of other two towns the gap are in positive(+) as because the male literacy rate is higher than the female literacy rate.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD Block	Persons / Males / Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
	Urban	**Persons**	**54,147**	**16,588**	**30.6**	**1,275**	**2.4**	**17,863**	**33.0**	**36,284**	**67.0**

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD Block	Persons / Males / Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
10	Satchand	Persons	78,104	20,771	26.6	7,378	9.4	28,149	36.0	49,955	64.0
		Males	40,058	17,054	42.6	2,831	7.1	19,885	49.6	20,173	50.4
		Females	38,046	3,717	9.8	4,547	12.0	8,264	21.7	29,782	78.3
	District Total:	**Persons**	**767,440**	**226,467**	**29.5**	**77,227**	**10.1**	**303,694**	**39.6**	**463,746**	**60.4**
		Males	**394,605**	**180,350**	**45.7**	**25,415**	**6.4**	**205,765**	**52.1**	**188,840**	**47.9**
		Females	**372,835**	**46,117**	**12.4**	**51,812**	**13.9**	**97,929**	**26.3**	**274,906**	**73.7**

The above table represents the number and percentage of main worker, marginal worker, non-worker and total workers(i.e. sum of main + marginal worker). Out of total population of 767440 the total number of workers are 303694(39.6%) and total number of non-workers are 463746(60.4%). Out of total male(394605) population the male workers are 205765(52.1%) and out of total female population, the total female workers are 97929(26.3%). We can say that total male workers are nearly double than the total female workers. But in case of non-workers the female percentage(73.7%) is greater than the males percentage(47.9%).

When we are considering the main workers in the district i.e. there are 226467(29.5%) are participants and out of which males are 180350(45.7%) and that of females are 46117(12.4%). Here also the male main workers are nearly four times higher than the females main workers. In case of female marginal workers the females percentage (13.9) is greater than males percentage of 6.4.

Now in the d3evelopment block wise the maximum total workers are in Killa(49.9%) and minimum are in Rajnagar(34.3%) development block. In case of males total workers the maximum percentage are in Hrishyamukh(54.8) and the minimum are in Rupaichhari(49.1%) development block. In case of female total worker the maximum are in Rajnagar(15.5%) development block.

In respect of main workers the percentage of total males & females are 29.5%, 45.7% and 12.4% respectively. In terms of maximum males minimum in respect of development blocks are in Amarpur(36.5%) and Rajnagar(26.1%). In terms of males main workers maximum and minimum are in Rhishyamukh(47.1%) and Rupaichhari(42.3%) respectively. In terms of females main workers the maximum and minimum are in Amarpur (25.6) and Rajnagar(6.2)

In respect of marginal worker district total percentage are (10.6%) where as male & female break up as 6.47% & 13.9% respectively. In terms of males marginal workers the maximum and minimum percentage are in Karbuk(9.3%) and Matarbari(5.8%) respectively. In terms of females marginal worker the maximum and minimum are in Killa(30.7%) and Rajnagar(9.3%) respectively. In terms of persons the maximum and minimum marginal worker are in Killa(18.7%) and Amarpur(7.9%) respectively. In terms of non-worker Rajnagar(65.7%) development blocks percentage is maximum where as Killa's percentage (50.1%) is minimum. In terms of male non-worker the maximum and minimum percentage are in Rupaichhari(50.9%) and Hrishyamukh(45.2%) respectively.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN RD BLOCKS, 2001

Sl. No.	Name of RD block	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

		Males	40,058	17,054	42.6	2,831	7.1	19,885	49.6	20,173	50.4
		Females	38,046	3,717	9.8	4,547	12.0	8,264	21.7	29,782	78.3
District (Rural)											
	Total:	**Persons**	**713,293**	**209,879**	**29.4**	**75,952**	**10.6**	**285,831**	**40.1**	**427,462**	**59.9**
		Males	**366,333**	**166,491**	**45.4**	**24,495**	**6.7**	**190,986**	**52.1**	**175,347**	**47.9**
		Females	**346,960**	**43,388**	**12.5**	**51,457**	**14.8**	**94,845**	**27.3**	**252,115**	**72.7**

The above table represents the total population of RD blocks(rural), the main workers the marginal workers, the total workers(main + marginal), non-workers and their percentage. The total number of persons in the district (rural) is 713293 out of which 285831 are worker and 427462 are non-worker. Again out of 285831 workers 209879 are main and 75952 are marginal workers. The percentage of worker is 40.1 and that of non-worker is 59.9% within the total workers the sex wise break up of percentage are males 52.1% and females 27.3% i.e. the percentage of total male workers are almost double the total female workers. Out of 285831 total workers the main workers are 209879 and marginal are 75952 in percentage main are 29.4 and that of marginal are 10.6 i.e. main workers are nearly thrice than marginal workers.

The male & female percentage of main and marginal workers are male(main)=45.4, male (marginal)=6.7 , female(main)=12.5 and female

(marginal)=14.8 respectively. It is deputes from the table that in all the cases the male workers are higher than the female workers except in case of marginal workers where females are greater than males.

Now we are analyzing the development block wise the maximum and minimum of total works, the maximum, minimum of main workers, the maximum and minimum of marginal workers and maximum ,minimum of non-workers. In respect of total workers the maximum and minimum percentage are in Killa (49.9) and Rajnagar(34.3) respectively. In case of total male(maximum) and total male (minimum) percentage of workers are in Hrishyamukh (54.8) and Rupaichhari(49.1) respectively. In case of total females(maximum and minimum) percentage of workers are in Killa (49.4) and Rajnagar(15.5) respectively.

In terms of main workers the maximum and minimum are in Amarpur(36.5) and Rajnagar(26.1). In case of male main (maximum and minimum) workers the percentage are in Hrishyamukh(47.1) and Rupaichhari(42.3) respectively. In case of female main (maximum & minimum) workers the percentage are in Amarpur(25.6) and Rajnagar(6.2) respectively. In terms of marginal workers the maximum & minimum are in Killa (18.7) and Matarbari(7.9) respectively. In Case of males marginal (maximum and minimum) workers the percentage are in Karbuk(9.3) and Matarbari(5,8) respectively. In case of females marginal(maximum & minimum) workers are in Killa(13.7) and Rajnagar(9.3) respectively. Now we are considering the non-workers group where the maximum and minimum percentage are in Rajnagar(65.7) and Killa (50.1) respectively. In case of males non-workers the maximum and minimum percentage are in Rupaichhari(50.9) and Amarpur(47) respectively. In case of females non-workers the maximum & minimum percentage are in Rajnagar(84.5) and Killa (50.6) respectively.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. No.	Name and urban status of UA/ Town	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
1	Udaipur NP	Persons	21,758	7,010	32.2	422	1.9	7,432	34.2	14,326	65.8
		Males	11,266	5,767	51.2	316	2.8	6,083	54.0	5,183	46.0
		Females	10,492	1,243	11.8	106	1.0	1,349	12.9	9,143	87.1
2	Amarpur NP	Persons	10,861	3,331	30.7	296	2.7	3,627	33.4	7,234	66.6
		Males	5,828	2,926	50.2	221	3.8	3,147	54.0	2,681	46.0
		Females	5,033	405	8.0	75	1.5	480	9.5	4,553	90.5
3	Belonia NP	Persons	15,760	4,535	28.8	351	2.2	4,886	31.0	10,874	69.0
		Males	8,176	3,752	45.9	240	2.9	3,992	48.8	4,184	51.2
		Females	7,584	783	10.3	111	1.5	894	11.8	6,690	88.2
4	Sabroom NP	Persons	5,768	1,712	29.7	206	3.6	1,918	33.3	3,850	66.7
		Males	3,002	1,414	47.1	143	4.8	1,557	51.9	1,445	48.1
		Females	2,766	298	10.8	63	2.3	361	13.1	2,405	86.9
District (Urban)											
	Total:	**Persons**	**54,147**	**16,588**	**30.6**	**1,275**	**2.4**	**17,863**	**33.0**	**36,284**	**67.0**
		Males	**28,272**	**13,859**	**49.0**	**920**	**3.3**	**14,779**	**52.3**	**13,493**	**47.7**
		Females	**25,875**	**2,729**	**10.5**	**355**	**1.4**	**3,084**	**11.9**	**22,791**	**88.1**

The above table represent the percentage of main , marginal , total worker(main+marginal) non-workers by sex and their percentage in urban areas of the district out of 54,147 population 17863 are total workers and 36284 are non-workers. In percentage the total workers are 33 and non-workers are 67 respectively. Out of 17863 total -16588 are main workers and 1275 are marginal workers. In percentage main= 30.6 and marginal =2.4 i.e. the percentage of main workers in nearly thirteen times

higher than the percentage of marginal workers. In sex wise break up the male(total) workers = 52.3 and female (total) workers = 11.9. In respect of percentage of male =49 where as females = 10.5. In respect of marginal workers the percentage of males =3.3 where as the females =1.4. In non-worker the percentage of male =47.7 and that of female = 88.1.

Now we are analyzing the town wise maximum and minimum percentage in all respect and its sex wise maximum and minimum percentage also. In respect of total workers the maximum and minimum percentage are in Udaipur NP(34.2) and Belonia NP(31%) respectively. For males total worker the maximum are in Amarpur and Udaipur NP both are 54% and Belonia NP 48.8% respectively. For females the maximum and minimum percentage of total workers are in Sabroon NP(13.1) and Amarpur NP(9.5) respectively.

In respect of marginal workers the maximum and minimum percentage are in Sabroom NP(3.6) and in Udaipur NP(1.9) respectively. For males the maximum and minimum marginal workers are in Sabroom NP(4.8) and in Udaipur NP(2.8) respectively. For females the maximum and minimum marginal workers are in Sabroom(2.3) and in Udaipur NP(1%) respectively. Now we are looking for non-workers percentage. The maximum and minimum are in Belonia NP(69) and Udaipur NP(65.8) respectively. For males non-workers the maximum and minimum are in Belonia NP(51.2) and jointly in Udaipur and Amarpur NP as 46%. For females non-workers the maximum and minimum are in Amarpur NP(90.5) and Sabroom NP(86.9) respectively.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN RD BLOCKS, 2001

Sl. No.	Name of RD Block	Persons / Males / Females	Total Population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers

Note: Percent of Worker to total worker are given in brackets

The above table represents the distribution of workers by sex in four categories of Economic Activity in Development blocks in case of Tripura, 2001. Here the total number of worker in the district are 303694(39.6%) out of which the cultivators are 103963(34.2%), Agricultural labourers 92199(30.4%), Household Industries are 5360(1.8%) and Other Workers are 102172 (33.6%). It is interesting to note from the above table that the percentage of Cultivators(34.2), Other Worker (33.6) and Agricultural labourers (30.4) are above the 30% where as HHI is for below than the other three

categories of workers i.e. only 1.8%. In terms of sex wise distribution the percentage of total workers (district level) are 52.1 where as females are 26.3 i.e. percentage of ales are nearly double than that of females. District total level category of sex wise distribution are as follows:- In respect of cultivators =34.8% and females = 35.2%. In respect of agricultural labourers are =24.9% and females =41.8%. In respect of HHI the males=1.2% and females=2.9%. In respect of (Other workers) the males=40.1% and females=20.1% . Hence after analysis of all economic activities in district total level. We may come to the conclusion that in all respect the participation of females in percentage is higher than the participation of males percentage except in case of "OW" where the males percentage are double in respect of females percentage.

Now we are analyzing the maximum and minimum percentage of total workers, cultivators, Agricultural labourers, HHI and "OW" in persons sex wise. In respect of total workers (main+marginal) the maximum percentage are in Killa(49.9) and Rajnagar(34.3) respectively. In respect of total male workers the maximum and minimum are in Hrishyamukh(54.8) and in Rupaichhari(49.1) respectively. In terms of females total workers the maximum and minimum are in Killa (49.4%) and Rajnagar(15.5%) respectively. In terms of cultivators the maximum and minimum are in Killa (64.8) and in Matarbari(25.6%) respectively. Within cultivators the maximum and minimum males percentage are in Killa (66.7) and Matarbari(24%) respectively. Within cultivators the maximum and minimum females percentage are in Killa(62.8) and Satchand(19.6) respectively. In respect of AG labourers the maximum and minimum percentage are in Rupaichhari(41.7) and Matarbari(23.9) respectively. For females the maximum and minimum percentage are in Karbuk(34.4%) and Killa (16.9) respectively. For females the maximum and minimum percentage are in Hrishyamukh (52.6%) and Killa (33.5%) respectively. In terms of HHI the maximum and minimum are in Hrishyamukh (3%) and Killa(0.4%) respectively. For males the maximum and minimum are in Matarbari(1.5%) and Killa (0.5%) respectively. For females the maximum and minimum are in Hrishyamukh(8.2%) and in Killa(0.4%) respectively. In respect of "OW" the maximum and minimum are in Matarbari(48.3%) and Killa(9.7%) respectively. Within "OW" the males maximum and minimum are in Matarbari(54.7%) and Killa(15.9%) respectively. Within "OW" the females maximum and minimum are in Rajnagar (39.8%) and Killa(3.3%) respectively.

				(27.3)	**(36.3)**	**(43.1)**	**(3.0)**	**(17.6)**

Note: Percent of Worker to total worker are given in brackets

The above table represents the distribution of workers by sex in four categories of economic activities i.e. in RD block wise(rural part) of 2001. have the total number of workers in the district (rural portion only) are 285831(40.1%) out of within cultivators are 103717(36.3%), AG labourers are 91786(32.1%), HHI are 5211(1.8%) and Other workers are 85117(29.8%). We can observed from the table that the percentage of categories of workers i.e. 36.3%, 32.1%, 29.8% and 1.8% respectively. In respect of cultivators AG labourers, Other workers and HHI respectively. In sex wise break up the total works(main+marginal), the percentage of males(52.1), is nearly double than the percentage of females(27.3). It is interesting to notice that the percentage males & females in respect of cultivators are same i.e. 36.3% in district level. In respect of Agricultural laboureres the percentage of females (43.1) is greater than the percentage of males(26.7). Also in respect of HHI females percentage(3) is greater than males(1.2) but in respect of "OW" the males percentage of workers(35.8) is double than females percentage of workers(17.6). Now we are analyzing the block wise maximum, minimum and sex wise maximum, minimum in all respect of workers i.e. total (main+marginal) cultivators, Agricultural labourers, HHI and "OW".

Now we are calculating (analyzing) in respect of total workers(main + marginal) the maximum and minimum percentage in respect of RD block of the district are in Killa(49.9) and Rajnagar(34.3) respectively. For males the maximum and minimum percentage are in Hrishyamukh(54.8) and Rupaichhari(49.1) respectively. For females the maximum and minimum are in Killa(49.4) and Rajnagar(15.5) respectively. In terms of cultivators the maximum and minimum are in Killa(64.8%) and in Matarbari(25.6%) respectively. Within cultivators the males maximum and minimum are in Hrishyamukh(54.8%) and Rupaichhari(49.1%) respectively. Within cultivators the maximum and minimum percentage are in Killa(62.8) and Satchand(19.6) respectively. In terms of Agricultural labourers the maximum and minimum percentage are in Rupaichhari(41.7) and Matarbari(23.9) respectively. Within Agricultural labourers the males the maximum and minimum are in Karbuk(34.4) and Killa(16.9) respectively. Within Agricultural labourers the females the maximum and minimum are in Hrishyamukh (52.6) and in Killa(33.5) respectively. In respect of HHI the maximum and minimum percentage are in Hrishyamukh(3.0) and Killa(0.4) respectively. Within HHI the maximum and minimum females percentage are in Matarbari(1.5) and in Killa(0.5) respectively.

Within HHI the females maximum and minimum are in Hrishyamukh(8.23) and in Killa(0.4) respectively. In respect of other workers the maximum and minimum percentage are in Matarbari(48.3) and in Killa(9.7) respectively. Within "OW" the males maximum and minimum percentage are in Matarbari(54.7) and in Killa(15.9) respectively. Within "OW" the females maximum and minimum percentage are in Rajnagar(39.8) and in Killa(3.3) respectively.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Sl. No.	Name and urban status of UA/ Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
				Number (Percentage)

The above table represents the distribution of workers by sex in four categories of economic activities of urban areas of the district. The percentage of total workers(main+marginal) in respect of district urban are 33% and in sex wise break up as males and females are 52.3% and 11.9% respectively. We may notice here that the percentage of main total workers is more than four times higher

than the percentage of female total workers. In respect of four categories of workers the maximum percentage (95.5%) are in other workers where as the cultivators (1.4%), Agricultural labourers(2.3%) and HHI(0.8%) in very low in comparison with other workers of urban area within the state. In sex wise break up in respect of total workers (main+marginal) the percentage of males(52.3) is higher than the females(11.9). In respect of four categories workers the percentage of male cultivators(1.6) is greater than the females cultivators(0.3) where as HHI the percentage of females(0.9) is slightly greater than males(0.8) percentage and in "OW" the percentage of females (96.7) is slightly greater than the percentage of male(95.2). Now we are analyzing the maximum and minimum percentage of total workers and its sex are break up the cultivators, agriculture, HHI and "OW" and their sex wise break up. The maximum are in Udaipur(34.2%) and maximum are in Belonia NP(31.0%). Within the total workers the males maximum and minimum are in Udaipur and Amarpur both having 54% where as Belonia NP having 48.8%. Within the total workers the maximum and minimum females workers are in Sabroom NP(13.1) and Amarpur NP(0.5) respectively.

In respect of cultivators the maximum and minimum are in Sabroom (2.8) and in Belonia(0.7) respectively. Within cultivators the males maximum and minimum are in Amarpur and Sabroom(0.6% each) and in Udaipur (0.1%) respectively. In respect of Agricultural laboureres the maximum and minimum percentage are in Sabroom NP(8.9) and in Belonia NP(0.6) respectively. Within agricultural labourers the males maximum and minimum are in Sabroom NP(8.3) and in Belonia NP(0.8) respectively. Within agriculture the maximum and minimum percentage are in Sabroom NP(11.4) and in Belonia NP(0.1) respectively. In respect of House Hold Industry the maximum and minimum are in Sabroom NP(1.1) and in Udaipuir NP and Amarpur NP each 0.7 respectively. Within HHI the males maximum and minimum percentage are in Belonia NP(1.2) and in Amarpur NP(0.5) respectively. Within HHI the females maximum and minimum percentage are in Amarpur NP(2.1) and in Belonia(0.6) respectively. In respect of Other worker the maximum and minimum percentage are in Udaipur NP and Belonia NP each are 97.6 and in Sabroom NP(87.3) respectively. Within "OW" the males maximum and minimum percentage are in Udaipur NP(97.3) and in Sabroom NP(87.3) respectively. Within "OW" the females maximum and minimum percentage are in Belinia NP(99.1) and in Sabroom NP(87.0) respectively.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table represents the distribution of villages to the availability of different amenities, 2001. There are ten types of amenities shown in the table. Out of 269 villages educational facilities having 266 villages(98.9%) in district level. Similarly medical in 180 villages(66.9%). Improved drinking water 268 villages(99.6%), Post office 170 villages (63.2%), Telephone 51 villages(19%), Transport communication 180 villages(66.9%), Banking service 34 villages (12.6%), Agricultural credit society 58 villages(21.6%), Approach by Pucca road 221 villages(82.2%) and Power Supply are in 246 villages(91.4%).

Now we are analyzing the R.D. block wise the percentage of amenities available. In Killa Education (100%), Medical(53.8%), Improved drinking water(100%), Post office(53.8%), Telephone(7.7%), Transport communication(46.2%), Banks(7.7%), Agricultural Credit Society(0%), Approach by Pucca road(84.6%), Power Supply(84.6%). In Amarpur development block the 100% amenities are in respect of Improved drinking water only and nearer to 100% are Education (97.6%), Approach by Pucca road (90.2%) and Power supply (95.1%), The lowest percentage of amenities in Amarpur are in Telephone(9.8%), Agricultural Credit Society (7.3%) and Banking service(4.9%) respectively.

TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Sl. No.	Name of RD block	Total population of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table represents the number and percentage of rural population served by different amenities, 2001. The total district rural population is 713293 out of which 99.8% are getting Educational facilities,77.5% are getting medical facilities, 99.6% are getting the Improved drinking water facilities, 79.5% are getting the post office facilities, 31% are getting the Telephone facilities, 80.9% are getting the Transport communication facilities, 20.2% are getting the Banking services facilities, 29.1%are getting the Agricultural Credit Societies facilities, 90.5% are getting the Approach by Pucca road facilities and 96.6% are getting the Power supply facilities. In respect of Killa development block the 100% facilities are getting the amenities of Education, Improved drinking water and 92% population availing Power Supply facilities, 80.5% population are getting the Approach by Pucca road facilities.

It is interesting to notice that there is no Agricultural Credit Society facilities within Killa

development block and only 12.4% people are getting the facilities of Telephone and Banking Services. In Amarpur development block out of 81698 person the facility of Improved drinking water are availing by all persons but 99.7, 96.4% and 95.2% people are getting the facilities of Education, Power Supply and Approach by Pucca road. Very few persons are getting the Banking (13.1%), Telephone(16.1%) and Agricultural Credit Society (18.3%) respectively. In Matarbari development block out of 124529 person-cent percent peoples are getting the facilities of Education , Improved drinking water and Power Supply respectively. 90.5% peoples are getting the facility of Transport communication, very low percentage of people i.e. 23.4% & 25% are availing Banking and Agricultural Credit Society. In Kakraban development block out of 66045 person the facilities like Education, improved drinking water and Approach by Pucca road. 96%, 99%, 84.9%and 81% of people are getting the facilities of Post office, power Supply, Medical and Transport communication facilities. The lowest number of persons in percentage i.e. 20.9 and 29.7 are getting the Telephone and Banking Service facilities. In Rajnagar development block out of 83198 people 100% are availing the amenities of Education, Improved drinking water and Power Supply. (5.8% and 90.1% people availing the amenities of Approach by Pucca road and Transport communication only 10% and 11.8% peoples are getting Agricultural credit Society and banking Service facilities. In Rhishyamukh development block out of 48214 person the 100% facilities are getting in respect of the amenities –Education & Improved drinking water . 97.7%, 95.6% and 91.8% of people are availing the amenities of Approach by Pucca road, Power Supply and Transport communication respectively. Only 14% of people are getting the Banking Service facility. In Bagafa development block out of 121451 people 100% facilities are getting in respect of Education, Improved drinking water. 949%, 93.7%, 81.9% 91.2% and 87.6% of people are getting the facilities of Power Supply, Approach by Pucca road, Transport communication, Medical & Post office respectively. In Karbuk development block out of 39643 people 97.8%, 93.1%, 86% and also 86% of people are getting the amenities of Education, Improved drinking water, Transport communication and Power Supply respectively. Where as only 7.3, 12.3 and 19.2 person are availing the amenities of Agricultural credit Society, Telephone and Bank respectively. In Rupaichhari development block out of 39,346 people the 100% facilities are getting in respect of Education, & Improved drinking water 89.8% are availing Power Supply. 6.7% are getting Banking facilities and it is interesting to notice that neither a single people are getting the Telephone facilities even in the end of the 20th Century(31.12.1999). In Satchand development block out of 78104 people the 100% facilities are getting in respect of Education, and Improved drinking water. 99.1%, 94.9%, 85.4%, 80.1% and 81.6% are availing the amenities of power supply, Approach by Pucca road, Post office, Medical and Transport communication respectively.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	5	0	0	5
(b) Middle School	42	23	14	79
(c) Degree College	18	41	207	266
2. Medical:-				
(a) Hospital	41	64	153	258
(b) PHC	50	85	99	234
3. Post Office	53	31	15	99
4. Telephone	36	63	119	218
5. Bus Service	33	34	35	102
6. Banks				
(a) Commercial Bank	67	71	97	235
(b) Cooperative Bank	0	0	269	269
7. Agricultural Credit Societies	41	46	124	211

The above table depicts the distribution of villages not having the seven types of amenities within the village and if not then the range of distance from where they are available. The distance range are given in three stages i.e. <5km. (5-10km.) and 10+km. and seven types of amenities are 1. Education break with up of (a) Primary (b) Middle and (c) Degree College then 2. Medical with break up (a) Hospital and (b) PHC then 3. Post office 4. Telephone then 5. Bus Services then 6. Banks with break up as (a) Commercial Bank Co-operative Bank and last one 7. Agricultural Credit societies.

There are 5 villages which are getting the amenities of Primary Education within the range of <5km. 42 villages are getting Middle School facilities within the range of <5kms. 23 villages in the range of (5-10) kms. and 14 villages in the range of 10+kms. In terms of Degree college 18 villages in the range of <5kms, 41 villages in the range of (5-10) kms. and 207 villages in the range of 10+kms.

In terms of Medical (a) 41 villages are getting hospital facilities in the range of <5kms. 64 villages in the range of (5-10)kms. and 153 villages in the range 10+kms. for (6) PHC 50 villages are getting facilities in the range <5kms. 85 villages in the rage (5-10) kms. and 99 villages in the range 10+kms.

In respect of Post office 53 villages in the range of <5kms 31 villages in the range of (5-10)kms. and 15 villages in the range of 10+kms.In terms of Telephone facilities 36 villages in the range of <5kms. 63 villages in the range of (5-10)kms. and 119 villages in the range of 10+kms. In respect of bus services 33 villages in the range of <5kms. 34 villages in the range of (5-10)kms. and 35 villages in the ranges of 10+kms. There are 2 types of Banks (a) Commercial Banks and (b) Co- operative Bank. In respect of Commercial bank 67 villages within the range <5kms. 71 villages in the range of (5-10)kms. and 97 villages in the range (10+kms.). In terms of Co-operative Bank only 269 villages in the range of 10+kms. and there are not a single village within the range of <5kms. or (5-10)kms.

In terms of Agricultural Credit Society 41 villages within the range of <5kms. 46 villages in the range of (5-10)kms. and 124 villages in the range of 10+kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	24	24	17	20	11	19	2	4	24
	(100.0)	(100.0)	(70.8)	(83.3)	(45.8)	(79.2)	(8.3)	(16.7)	(100.0)
5 -15	89	88	62	59	19	66	12	17	75
	(100.0)	(98.9)	(69.7)	(66.3)	(21.3)	(74.2)	(13.5)	(19.1)	(84.3)
16 - 50	143	142	95	87	20	88	17	35	115
	(100.0)	(99.3)	(66.4)	(60.8)	(14.0)	(61.5)	(11.9)	(24.5)	(80.4)
51+	11	10	4	2	0	5	2	2	5
	(100.0)	(90.9)	(36.4)	(18.2)	(0.0)	(45.5)	(18.2)	(18.2)	(45.5)
Unspecified	2	2	2	2	1	2	1	0	2
	(100.0)	(100.0)	(100.0)	(100.0)	(50.0)	(100.0)	(50.0)	(0.0)	(100.0)
District total:	**269**	**266**	**180**	**170**	**51**	**180**	**34**	**58**	**221**
	(100.0)	**(98.9)**	**(66.9)**	**(63.2)**	**(19.0)**	**(66.9)**	**(12.6)**	**(21.6)**	**(82.2)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table represents the distribution of villages according to the distance from the nearest statutory towns and availability of different amenities in, 2001. There are eight types of amenities available i.e. Education, Medical, Post Office, Telephone, Transport communications, Banks, Agricultural Credit Society and Approach by Pucca road and also shown table the five distance range i.e. <5 kms, (5-15)kms, (16-50)Kms, 51+ kms. and unspecified.

In respect of district total the total number of 266 villages(98.9%) in terms of Educational amenities are available, similarly for Medical 180 inhabited villages(66.9%), for Post Office total number of 170 inhabited villages(63.2%) for Telephone total number of 51 inhabited villages(19%) for Transport communication total number of 180 inhabited villages(66.9%), for Banks total number of 34 inhabited villages(12.6%), for Agricultural Credit Society total number of 58 inhabited villages(21.6%) and for Power Supply total number of 221 inhabited villages(82.2%).

Now we are analyzing the distance range from the nearest Statutory town with types of amenities available. In the range of <5 kms. there are 24 inhabited villages the different types of percentage of amenities are given in descending order as follows:- Education (100%), Approach by Pucca road(100%), Post Office(83.3%), Transport communication(79.2%), Medical(70.8%), Telephone(45.8%), Agricultural Credit Society(16.7%) and Banks(8.3%).

In the range of (5-15)Kms. there are 89 inhabited villages and the percentage of amenities in descending order are given below:- Education(98.9%), Approach by Pucca road(84.3%), Transport Communications(74.2%), Medical(69.7%), Post office(66.3%), Telephone(21.3%), Agricultural Credit Society(19.1%), Banks(13.5%).

In the range of (16-50) kms. there are 143 inhabited villages and the percentage of the amenities in descending order are given below:- Education(99.3%), Approach by Pucca road(80.4%), Medical(66.4%), Transport Communication(61.5%), Post office(60.8%), Agricultural Credit Society (24.5%), Telephone(14%) and banks(11.9%).

In the range of 51+ kms. there are 11 inhabited villages and the percentage of the amenities in descending order are given below:- Education(90.9%), Transport communication(45.5%), Approach by Pucca road(45.5%), Medical (36.4%), Post office(18.2%),

Banks(18.2%), Agricultural Credit Society(18.2%) and no Telephone in that range i.e.(0%).

In unspecified range there are 2(two) inhabited villages and the percentage of the amenities in descending order are given below:- Education(100%), Medical(100%), Post office(100%), Transport communication(100%), Approach by Pucca road(100%), Telephone(50%), Banks(50%) and Agricultural Credit society(0%).

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available					Type of amenity available				
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The above table represents the amenities available in the village according to population range. This table represents ten types of amenities i.e. Education, Medical, Improved drinking water, Post office, Telephone, Transport communication, Banks, Agricultural Credit Society, Approach by Pucca road and Power Supply. The population ranges are divided into six groups i.e. 1-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10000+.

In district total the percentage of amenities in descending order are given below:- Improved drinking water (96.6%), Education(98.9%), Power Supply(91.4%), Approach by Pucca road(82.2%), Medical(66.9%), Transport communication(66.9%), Post office(63.2%), Agricultural Credit Society(21.6%), Telephone(19%), and Banks(12.6%). If we analyze according to the population range and its villages within the range and different types of amenities then we have in the (1-499)population range there are 11 inhabited villages where educational facilities having (81.8%), Medical(27.3%), Improved drinking water (100%), Post office(4.1%), Telephone(9.1%), Transport communication(27.3%), Banks(9.1%), Agricultural Credit Society(4.1%), Approach by Pucca road(54.5%) and Power Supply(72.7%) respectively.

In the second group of population ranger i.e. 500-999 there are 32 inhabited villages and the percentage of amenities in descending order are as follows:- Improved drinking water(100%), Education(96.9%), Power Supply(62.5%), Approach by Pucca road(59.4%), Medical(37.5%), Post office(25%), Transport communication(25%), Telephone(3.1%), Banks(3.1%), Agricultural Credit Society(3.1%). In the third range of population i.e. 1000-1999 there are 77 villages and the percentage of amenities in the descending order are as follows :-Education(100%), Improved drinking water(100%), Power Supply(94.8%), Approach by Pucca road((76.6%), Medical(62.3%, Transport communication(54.5%), Post office(48.1%), Agricultural Credit Society(13%), Telephone(7.8%) and Banks(1.3%).

In the fourth range of population rage i.e. 2000-4999 there are 123 villages and the percentage of amenities in the descending order are as follows:- Education(100%). Improved drinking water(99.2%), Power Supply(96.7%), Approach by Pucca road(90.2%), Transport communication(82.1%), Medical(74.8%), Post office(79.7%), Agricultural Credit Society(28.5%), Telephone(22%) and Banks(17.1%).

In the fifth range of population i.e. 5000-9999 there are 25 villages and the percentage of amenities in the descending order are as follows:- Education((100%), Improved drinking water(100%), Post office(100%), Transport communication(100%), Approach by Pucca road(100%), Power Supply(100%), Medical(96%), Telephone(60%), Agricultural Credit Society(40%) and Banks(36%).

In the last range of population i.e. 10,000+ there are only one inhabited village and all the amenities are 100%.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl. No.	Name of RD block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Killa	13	238.6	11.7	7.0
2	Amarpur	41	476.4	22.8	9.9
3	Matarbari	35	281.2	29.5	36.8
4	Kakraban	19	130.9	49.2	34.4
5	Rajnagar	29	320.2	38.8	38.8
6	Hrishyamukh	17	178.3	22.6	49.0
7	Bagafa	39	512.0	22.0	45.5
8	Karbuk	19	361.2	6.9	33.7
9	Rupaichhari	28	256.7	18.9	9.7
10	Satchand	29	288.1	30.6	10.3
	District Total:	**269**	**3,043.6**	**24.1**	**28.6**

Note : - Cultivable area = irrigated area + unirrigated area

The above table represents the distribution of villages according to land use, 2001. There are 287843 hectors areas which covered 269 inhabited villages and its percentage of cultivable area are 28.6%for the district as a whole.

When we are analyze the development block wise than we may notice that maximum area in Bagafa(51201 hectors) which covered 39 inhabited villages and its percentage of cultivable area are in Kakraban development block(13086 hectors) whose percentage of cultivable area to total area are 49.2 and the percentage of irrigated area to total cultivable area are 34.4. The minimum number of inhabited villages are in Killa(13) dev. block whose area is 21866 hectors and percentage of cultivable area to total area is 11.7 and percentage of irrigated area to total cultivable area is 7 only. Amarpur having the maximum number of inhabited villages (41) and its total area is 45656 and percentage of cultivable area to total area is 22.8 and irrigated area to total cultivable area is 9.9%.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Amarpur NP	39,040.8	676.9	38,363.9	34,061.2	7,733.7	2,071.6	23,637.9	0.0	618.0

District Total:		**47,170.2**	**3,939.4**	**43,230.8**	**105,088.6**	**15,062.2**	**2,054.3**	**24,488.5**	**957.8**	**2,269.1**

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amarpur NP	1.8	0.9	0.9	1.8	0.9
2	Belonia NP	2.5	1.3	0.6	2.5	0.6
3	Sabroom NP	8.7	1.7	0.0	3.5	1.7
4	Udaipur NP	1.4	1.4	0.5	2.3	0.5
District Total:		**2.6**	**1.3**	**0.6**	**2.4**	**0.7**

The above table represents the Schools/Colleges per 10,000 population in Statutory Towns, 2001. The type of educational institutes are divided into five categories i.e. Primary, Junior Secondary/Middle, Secondary/Matriculate, Senior Secondary and college.

The district total from the above table represents the percentage of primary is highest(2.6%), in respect with other type of educational institution then in the descending order are Secondary(2.4%), Junior Secondary/Middle(1.3%), College(0.7%) and Secondary/Matriculation(0.6%) respectively.

Among the Statutory Towns Sabroom NP represents the maximum number of percentage Primary School(8.7) where as Udaipur NP is the minimum(1.4). For junior Secondary/Matriculates Sabroom NP(1.7%) is the maximum and Amarpur NP(0.9%) is the minimum.

For Secondary /matriculation Amarpur NP(0.9%) is the maximum where as in case of Sabroom NP(0%).

For Senior Secondary Sabroom is the maximum (3.5%), Amarpur NP(1.8%) is the minimum. For College the maximum are in Sabroom NP(1.7%) and minimum are in Udaipur NP(0.5%).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amarpur NP	46
2	Belonia NP	48
3	Sabroom NP	69
4	Udaipur NP	51
	District Total:	**51**

The above table is self explanatory

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town	Total Population	Slum Population	Percentage of Slum Population to Total Population
1	2	3	4	5

No slum in the District

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amarpur NP	Wooden Furniture	Jute
		Cane Furniture	Timber Product
		Spices	Fish
2	Belonia NP	Wooden Furniture	Soft Rice
		Mollases	Vegetables
		Fruit Juice	Jute
3	Sabroom NP	Wooden Furniture	Wooden Furniture
		Mat Product	Timber
		Cane Furniture	Bamboo
4	Udaipur NP	Wooden Furniture	Vegetables
		Handloom	Furnitures
		Bamboo Goods	Fish

The above table is self explanatory

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
Owned	No exclusive room	1,873	1,767	106	321	297	24	650	648	2

	3+ rooms	45	24	21	7	5	2	4	3	1
	Median number of rooms	1	1	1	1	1	1	1	1	1
Others	No exclusive room	527	485	42	115	104	11	169	165	4
	One room	2,519	2,232	287	611	537	74	502	471	31
	Two rooms	199	170	29	43	34	9	27	25	2
	Three rooms	45	38	7	13	10	3	8	8	0
	3+ rooms	7	6	1	2	2	0	1	1	0
	Median number of rooms	1	1	1	1	1	1	1	1	1
	District (South)	**164,362**	**150,390**	**13,972**	**29,163**	**26,461**	**2,702**	**58,197**	**57,721**	**476**

The above table represents the data of households by tenure status and number of rooms occupied in the district by total, rural and urban. The district has 164,362 households in all of which 150,390 (91.5%) households existed in rural and 13,972 (8.5%) households existed in urban area. The district scheduled caste households are 29,163 (17.7%) of which 26,461 (16.1%) households located in rural and 2,702 (1.6%) households are located in urban area. The district total scheduled Tribes households are 58,197 (35.4%)of which 57,721 (35.1) households are existed in rural and on 476 (0.3%) households are located in urban area.

Among the three tenure status, owned tenure status occupied the top position taking 151,547 (92.2%) households in all out 151,547 household rural is 142,391 and urban is 9157.

It is observed from the above table that user one room by the households are highest in all the three tenure status while the median number of room user household are lowest i. e. 1.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

	District (South)	**3,802**	**2.3**	**8,445**	**5.1**	**1,719**	**1.0**

Table 49 depicts percentage distribution of households living in permanent, semi-permanent and temporary structure of houses. The district has 4.6% (7,641) households having permanent structure while 45.3% (74,446) having semi-permanent and 50% (82,242) households having temporary structure. In rural the district has 2.3% (3,839) households having permanent structure, 40.2% (66,001) households having semi-permanent structure and 49% (80,523) households having temporary structure.

Out of 13,966 households of urban area 27.2% (3802) falls in permanent and the remaining 60.5% (8445) and 12.3% (1719) fall in semi-permanent and temporary respectively

The above depicts the percentage of household data having facility of improved drinking water, electricity, bathroom, toilet and drainage, 2001 in the villages and towns. The district is faciliated to provide 53.1% drainage water facility of which 49.5%falls in rural area while 91.4% falls in urban area. It means improved drinking facility is inadequate in the district. Like this only 62.8% facility of electricity have in this district of which 30.5%falls in rural area and 89.4% falls in urban area. The condition of bathroom facility in the households are very poor, only 14.2%facility exist as a whole in the district of which 3.1% exist in rural and 33.2% exist in urban. Toilet facility in the households in rural area is 77.4% while 98.5% facility are available in urban area. The drainage facility is also not adequate both in rural (18.9%) and urban (39.8%) area.

Table deals with the data of number of households by type of fuel used for cooking, 2001. It is observed from this table that mainly two types of fuel i.e. firewood (87.1%) and LPG (9.1%) are used by the households. Other materials i. e. crop residue, cow-dung cake, electricity, caol/lignite, cooking biogas, kerosene, etc used by the households are very rare

Data source:- Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 52 represents the data of households availing banking facility and existing assets i. e. radia/ transistor, television, telephone, bi-cycle, scooter/motor cycle/moped, car/jeep/van, etc in the households. It is observed, out of 102,579 households only 18,543 households availed the banking in rural area which is accounted only 18%. It means the economic condition of the villagers are not well.

The economic condition of the villagers could also understood from the data of assets having in the households. The households having asset of radio/ transistor (17.4%), television (9.9%), telephone (1.8%), bi-cycle (18.3%), scooter/motor cycle/moped (1.8%) and car/van (0.8%).

(viii) Major events and activities during the decade

Among the major events in the district may be made of the following.

Spell of floods, draught, cyclone and landslide in the decade causing repeated damage to the economy of the state as well as district were frequent. River Gumati, Muhuri and Fenny overflowed vast area of the district is every monsoon.Tripua is a small but picturesque state in the North Eastern Region of the country. It is a state inhabited by various ethnic groups. Cultural heritage of one community differs from one another .But in spite of the different ethnic groups maintaining their insert cultural identity, the many faceted efforts have mingled into as single whole giving birth to unique cultural synthesis. Tribal culture and Bengali culture blend here magnificently .Flute music, Bamboo dance, Reang dance, Garia dance, Lebang boomani dance, Gajan dance and Basanta dance are some of the exquisite varieties of Tripuras mixed cultuire.

(ix) Festivals and Fairs

Durga Puja : "Durga Puja" which is generally held during the month of October is one of the most popular festival in Tripura. All villages and towns appear in a festival mood during the four days of the festival, on the fourth day, images of goddess Durga are taken out in great processions for immersion in rivers or big lakes. Vijaya Dasami, the fourth day of the festival, is significantly observed by exchange of reciprocal greetings.

Garia Puja : The tribals of Tripura perform Garia Puja on the sevently day of the month of Baisak (April). The devotees firmly believe that this Puja makes for their prosperity and enjoyment for the whole year. The sacrifice of cocks is one of the features of the Puja. When the Puja is over, the devotees men and women taken to dancing.

Diwali : Diwali comes next to Durga Puja. On this occasion on every year a big fair is held near Matabari of the Temple of Tripura Sundari at Udaipur, the District Head Quarter of South District 56 Km. from Agartala.

Paus Sankranti Mela : Paus Sankranti Mela at Tirtha Mukh in Amarpur Sub-Division attracts devotees even from distant parts of Tripura. Thousands of people, tribal and non-tribal, assemble every year on the occasion of the Uttarayan Sankranti at this place to take a holy dip in the small lake which is the source of the river Gumti and is known as "Tirtha Mukh".

Places of tourist interest in the District.

South Tripura District is also rich in flora and fauna and the scenic beauty of the hilly terrain is inter-spread with splash, green valleys in between which may attract the tourists to fine solace in the calmness of the nature. The big reservoir area created due to harnessing of river Gumti is really an added attraction to a nature loving tourist with vast stretches of water and the green islands peeping out, from the world of nerve shattering noise ands crowd of every day life in this jet set age. Besides, the district has a very rich sculptural and archaeological for the tourists of the type of connoisseur and scholar and which also ensure pilgrimage to the religious people. The following places may be listed out to be the place of interest in the district in particular.

Udaipur : The district headquarter town of Udaipur situated at a distance of about 50 Km. from Agartala is very rich in its cultural heritage and history with a number of old temples situated near about.

Tripureswari Temple : The temple is one of the fifty one bighas recorded in the Hindu 'Purans'. The temple was built by the Later Maharajan Dhanya Manikya of Tripura in saka 1423 i.e. in 1501 A.D. as it is known from the inscription of the temple. The temple is situated on a hillock with a tank named 'Kalyan Sagar' on its east. Thousands of devotees offer pujas in the temple everyday. Special puja is held on the 'Dipavali Night' coming next to 'Durga Puja' every year and on this occasion a big fair is held in the temple premises with a gathering of thousand of devotees of all communities from all parts of the State.

For every tourist, it is a treat to see the old fishes and tortoises in the 'Kalyan Sagar' tank besides the religious persuit.

Bhubaneswari Temple : The temple of Bhubaneswari built by Maharaja Govinda Manikya stands on the right bank of river Gumti. The temple

alone with its builder Maharaja Gobinda Manikya were held in great esteem by great poet. Rabindra Nath Tagore in his drama named 'Rajarshi'.

Mahadev Group of Temples : Three temples constituting the Mahadev group of temple situated in a well defined enclosure near a big tank named 'Bijoy Sagar' at Udaipur is popularly called Mahadev Bari. These three temples were constructed furing the reign of Maharaja Kalyan Manikya, and 'Rama manikya' between 1572 saka (1650 A.D) and 1595 saka (1672 A.D). A big fair is held near Mahadeb Bari on Sivaratri day.

Jagannath Temple : At the heart of Udaipur town is found the ruins of a temple called the 'Jagannath Temple' a rare specimen of temple architect of Tripura. According to the inscription on the temple, it was constructed by Maharajan Govinda Manikya and his brother Jagannath Deb and dedicated to Bisnu. The big tank in the front of temple seems to have been named after the temple.

Gunahati group of temples : Another group of three big temples is situated in east Udaipur. Though in ruin these temple were built by 'Queen Gunabati' wife of Maharajan Govinda Manikya in 1619 saka (1668 A.D).

Govinda Manikya Palace : On the right bank of Gumti is found in ruin a big palace built by 'Maharaja Govinda Manikya'(1616-1675 A.D). Udaipur was once the capital of the princely state.

Moghal Maszid now completely in ruins, is said to have been built over-night to commemorate the mughal victory over 'Maharajan Yasadhara Manikya (1600-1618 A.D).

Badarsahi Sahi : The place with a shrike is regarded as a most holy place to the Muslim and Hindus alike which was once the halting place of a Fakir'Badar Sahi, a famous muslim asletic of Chirragang.

Udaipur, the district town has a number of big tanks namely 'Jagannath Dighi', 'Amar Sagar', 'Bejoy Sagar', 'Dhani Sagar', 'Kalyan Sagar', etc.

Belonia Sub-division

In this Sub division a place named 'Pillak Pather' and lengthing about 100 Km away from Agartala, a good number of old stone images and Taryal Cotha Temple plapues and sealings which depiction of stoop and Bhudhist scripts belonging to the $8^{th} – 10^{th}$ century have been discovered here, some of which still lied buried in the ground. The archaeological treasure of 'Pillak', have opened up a new horizon of thoughts for the scholars, in history and archaeology. The discovery seeks to establish that Bhudhsim once flourished in this reign even though the 'Rajmala ; the annal of Tripura is consequently silent about it. The stylistic resemblance of some of the lakes found in at 'Pillak' with those found in Mainamoti of Bangladesh, a place not to far suggest that it might be a continuity of the archaeological temple found in Mainamoti.

Amarpur Sub-division

Deotamura : The peak of the God of Deotamura as it is called is a range of hills situated in between Udaipur and Amarpur Sub-divisions. One place popularly known as 'Chhobimura' lies a panel of images curved high up on the steep rocky wall of the hill over the river Gumti. Though the place is not having proper communication facilities and the image have been worn-out by age, an adventurist or a tourist may find it interesting and astonishing to wonder how these big images could be curved from the extremely steep hill side rising straight from the river side.

(x) Scope of Village Directory and Town Directory

Part A- of the publication contains the village and town directories. The village directory present information for each village such as amenities available in the fields of education, medical, drinking water, post and telegraphs, communications, power supply, banking, credit societies recreational and cultural facilities, news paper and magazine facilities, information about exported, imported and manufacturing products which are of fundamental necessity to the villagers. Besides these particulars relating to approach to the village and land use pattern etc. are also available in village directory. Moreover, development block wise details regarding alphabetical list of villages, abstract of educational, medical and other amenities in the villages; villages by number of primary schools; villages with different sources of drinking water facilities available; villages by primary, meddle and secondary schools. Information about

villages with 5000 and above population which don't have one or more amenities; census towns which don't have one or more amenities; land utilization data in respect of census town/non municipal town; development block wise list of inhabited villages where no amenity other than drinking water facility is available; summary showing number of villages having scheduled castes and scheduled tribes population; proportion of scheduled castes and scheduled tribes to the total population by range; number of villages under each gram panchayat; number of girls schools in each villages etc.

The town directory contains seven statements and present basic information of each town such as status and growth history; physical aspect and location code; municipal finance; civic and other amenities; medical, educational, recreational and cultural facilities; trade-commerce-industry and banking; civic and other amenities in slums etc. Besides those it gives information about towns showing their outgrowth with population.

Part B- of this book contains the primary census abstract (PCA) of the villages and towns. The primary census abstract gives information of each village/town/ ward about the basic census data including area, occupied residential house, number of household, total population, 0-6 population by sex, literate and illiterate population, working population by broad categories, marginal workers and non workers etc. Moreover, information about disabled persons in five categories, fertility particulars for ever married woman and currently married woman, household engaged in cultivation/ plantation etc.

This part included district PCA, PCA for scheduled castes and scheduled tribes, development block wise village PCA, urban PCA etc. Moreover it enlisted appendix to district PCA i. e. urban block wise figures of total scheduled castes and scheduled tribes population. In this part a few number of annexure (I to VIII) are also incorporated which have been prepared according to the 1991 census. From this annexure reader may able to familiar with number of village under each gram panchayat; fertility, mortality and migration; various measures of fertility and mean age at marriage; percentage distribution of migrants by place of birth/place of last residence main religions in the district/ development block; marital status of population; age, sex and education of different mother tongue etc.

The Village Directory statement of Part A- for 1991 contained 18 columns for exposition information regarding amenities and land use pattern, whereas the statement (prescribed format) for 2001 contains 25 columns. In respect of town directory of Part A- all the seven statements are almost similar to those adopted in 1991. The sub-statement IVA of 1991 was renamed as statement VII in 2001. This time the column "Area of slum" is dropped and included another two more columns i.e. "Is it notified" and " No. of households".

The Primary Census Abstract has been slightly modified in 2001 census to those adopted in 1991 census. Three new columns i.e. information about disable persons, fertility particular for ever married and currently married woman and household engaged on cultivation/plantation were included in 2001 census.

PART A- VILLAGE AND TOWN DIRECTORY

Section-1: Village Directory

Note explaining the abbreviations used in the Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the RD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO

(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N

(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I : It gives the abstract of educational, medical and other amenities available in villages RD Block wise of the district.

Appendix-I-A : Indicates number of villages RD Block wise having one or more primary schools.

Appendix-I-B : Indicates number of villages RD Block wise having primary, middle and secondary schools.

Appendix-I-C : Shows number of villages RD Block wise with different source of drinking water facilities

Appendix-II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A : Indicates list of Census Towns which do not have one or more amenites

Appendix-III : It gives the land utilization data in respect of Census Towns/ non-municipal Towns.

Appendix-IV : RD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V : Summary showing number of villages not having Scheduled Castes population.

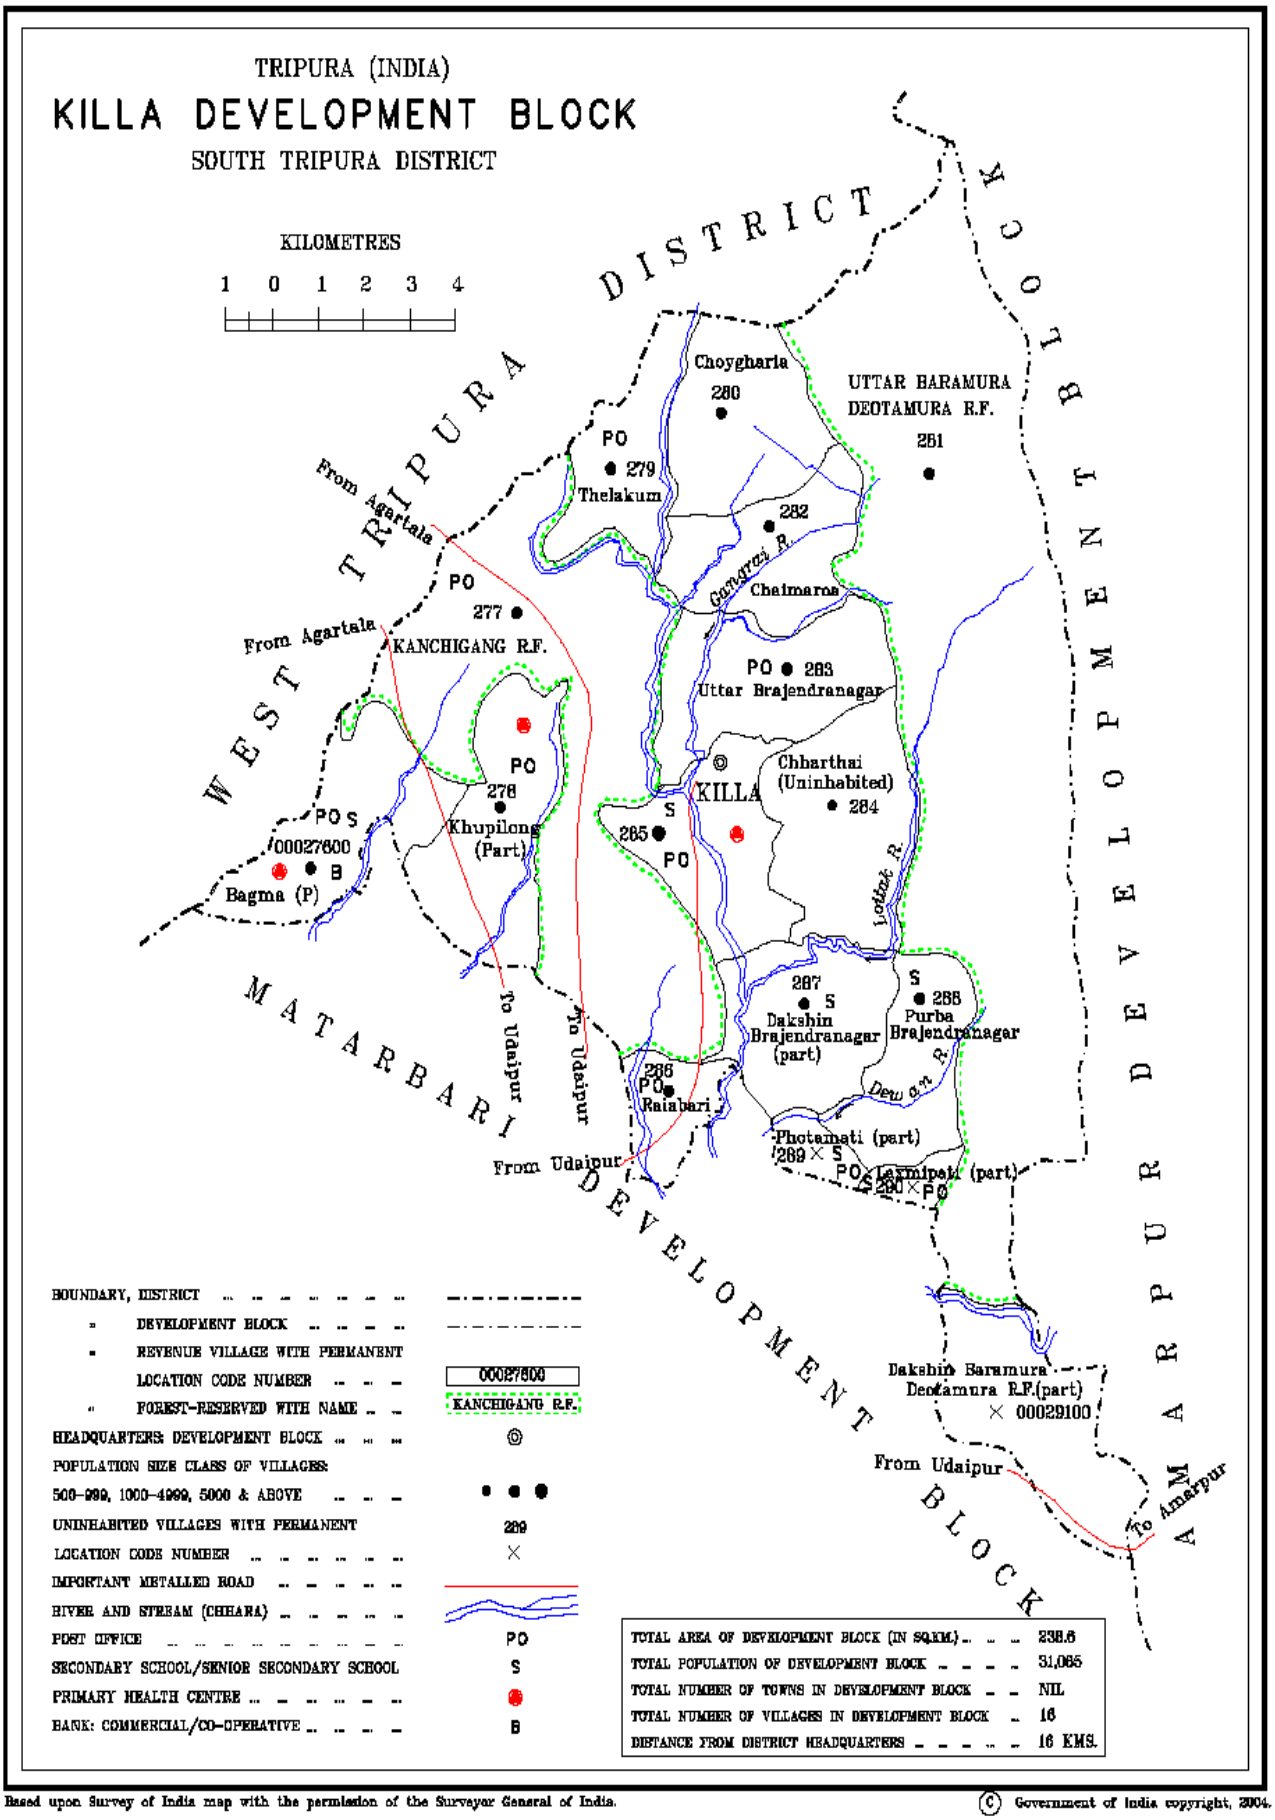

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII: The appendix shows the list of villages according to proportion of the A, VIIB Scheduled Castes and Scheduled Tribes to the total population

by ranges.

Appendix-VIII : Indicates RD Block wise number of villages under each Gram Panchayat.

Appendix-IX : Shows number of different types of girls school in a village.

Section II - Town Directory

Note explaining the abbreviations used in the Town directory :

A. Statement I : Status and Growth History

Column (2) : Class, name and civic adminis tration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/ Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee /Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects :

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i) Pucca Road	PR
(ii) Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i) Sewer	S
(ii) Open Surface Drains	OSD
(iii) Box Surface Drains	BSD
(iv) Sylk Drains	SD
(v) Cesspool method	CP
(vi) Pit System	Pt
(vii) Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i) Tap water	T
(ii) Tube-well water	TW
(iii) Tank Water	TK
(iv) Well water	W

Column 14:

(v) Over Head Tank	OHT
(vi) Service Reservoir	SR
(vii) River Infiltration Gallery	RIG
(viii) Bore Well Pumping System	BWP
(ix) Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the

number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities.

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies.**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B- PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation *(Annexure-II)*. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior

officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract Table A-5 for total population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, A-5 Appendix table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY CENSUS ABSTRACT

	Tripura	South Tripura	Tripura	South Tripura	Tripura	South Tripura
1	8	9	10	11	12	13
Total	55.34	56.01	48.27	50.18	40.55	42.87
Rural	56.56	56.45	50.58	51.28	42.92	44.03
Urban	48.94	49.14	36.69	34.36	28.84	26.44

The above annexure-II(a) represents the female age at marriage below 18 years who are living with their husband(currently married). Some of them might be recently married and some of them decades ago. In view of this the figures mentioned in the annexure-(IIa) should be regarded as indicating the situation for the population state as a whole and South Tripura.

It is observed from the above annexure–II(a) that the percentage of currently married women in respect of state and South Tripura district are more or less equal in 1991. The total number of currently married women in 1986-91 was decreased both for the State and district in comparison with 1981-86 i.e. 95,498 to 80,709 (in State) and 26,301 to 21,834 (South Tripura).

Presently the statutory minimum age at marriage is 18 for females. It is worth examining the proportioned of currently married women whose age at marriage was below this limit during the period 1981-86 and 1986-91. It is observed from the above annexure- II(a) that this proportion has decreased from 48.27 to 40.55 percent during 1981- 86 to 1986-91 in State level(Total) and also from 50.18% to 42.87% in district level (South Tripura). But in respect of total the percentage of South Tripura(56.01%) is slightly higher than the State(55.34%).

ANNEXURE -II(b)

CHILD MORTALITY INDICATORS, 1991

Persons/ Males/ Females	q1		q2		q5	
	Tripura	South Tripura	Tripura	South Tripura	Tripura	South Tripura
1	2	3	4	5	6	7
P	82	92	94	96	101	106
M	81	97	96	103	102	108
F	84	86	85	88	100	106

Child Mortality Indicators, 1991:- Information on question on children ever born and children surviving convened for all ever married women have been tabulated by age group of mother. From this estimates of child mortality q(1) have been worked out using Brass technique where q(1) is the probability of new born child dying before age i.e. 1, 2 and 5 (i.e. 1,2, 5). It is observed that from the above annexure-II(b) that the child mortality estimates for the district is higher than the State in case of child age below 1, 3 & 5 years (dying age).

ANNEXURE-III(a)

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Total/ Rural/ Urban	CBR		TFR		CWR(0-4)		CWR(5-9)	
	Tripura	South Tripura	Tripura	South Tripura	Tripura	South Tripura	Tripura	South Tripura
1	2	3	4	5	6	7	8	9
T	37.65	38.06	4.91	5.02	514	520	685	711
R					552	536	733	733
U					335	305	461	417

Mean age at marriage of currently married women					
Total		who married during			
		1981-86		1986-91	
Tripura	South Tripura	Tripura	South Tripura	Tripura	South Tripura
10	11	12	13	14	15
17.82	17.75	18.40	18.24	19.06	18.83
17.70	17.71	18.18	18.13	18.80	18.71
18.47	18.46	19.47	19.70	20.30	20.50

The above annexure-III(a) and III(b) depicts the variations of fertility and mean age at marriage 1991. There are so many parameter for measuring fertility such crude birth rate (CBR). Total fertility rate (TFR) child women ratio(CWR) in two age group i.e. 0-4 and 5-9 i.e. number of children in the age group (0-4) years and (5-9) years per 1000 women in the age group of 15-49 years. Age Specific Fertility Rate(ASFR) and Age Specific Marital Fertility Rate(ASMFR).

The CBR of South Tripura district is higher than the CBR of State as a whole. In percentage the TFR is also higher than the State in respect of South Tripura district. The number of children in the age group of 0-4 years/1000 women in the age group 15-49 is 520 for South Tripura district against 514 in the state as a whole. In case of CWR (5-9) the number of children is also higher in South Tripura district(711) in comparison with State(685). But in case of rural and urban break up for CWR (0-4) it was reverse i.e. South Tripura(536)<than State (552) & also for urban South Tripura 305<than Tripura State (335). In case of CWR(5-9) the rural number of children/1000 reproductive age group of women is equal i.e. 773 for South Tripura district and also 733 for the State. But in case of urban the South Tripura (417) is less than the State(461).

ANNEXURE- III(b)

AGE SPECIFIC FERTILITY & AGE SPECIFIC MARITAL FERTILITY RATES, 1991

Specific age group	ASFR Per 1000 women		ASMFR Per 1000 women	
	Tripura	South Tripura	Tripura	South Tripura
1	2	3	4	5
15-19	44	46	182	186
20-24	156	162	222	223
25-29	157	157	178	175
30-34	118	118	128	126
35-39	78	81	85	87
40-44	48	44	54	49
45-49	28	28	38	33

The mean age at marriage of currently married women for the state has increased 0.66 during the year 1981-86 to 1986-91 and has also increased for the district as 0.59 during the year 1981-86 to 1986-91 respectively. In total the mean age at marriage is slightly higher for South Tripura district(18) against the state 17.82. But in case of during the year 1981-86 and 1986-91 the district figures are less than the state figure. It is shown for the above annexure-III(a) the maximum ASFR in case of state is in the age group 25-29 and it

is also equal to district level. In all the reproductive age group i.e. 15-19 to 45-49 the ASFR of the district are either equal or higher than that of state figure except in the age group 40-44 where state figure is greater than the district figure. In case of ASMFR the district figure in the age group (15-19),(20-24) the district figure is higher than the State figure where as the reproductive age group it was lower than the State.

A person is considered as **migrant by place of birth** if the place in which he is enumerated during the census is other than his place of birth. Out of 32 lakh people in the state, 9.4 lakh or 29.4% of total population were reported as migrants by place of birth. This proportion is identical with percent of 29.3 in 1991 Census.The decadal growth of migrants (16.1%) is similar with the growth of total population. In 1991 Census, highest share of 54% were reported in the category of Born Abroad followed by category of Born elsewhere in the district of enumeration (33%) but in Census, 2001, reversibly category of born elsewhere in the district of enumeration (51%) was placed in Ist position followed by Born Abroad (32%).Except category of Born Abroad, in other categories, female migrants were higher than male migrants in both censuses. In respect of inter-state migration, Assam was main contributor to total migrants followed by Bihar in 1991 and as per 2001 census, Mizoram was in Ist position followed by Assam.

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable. Out of 7.7 lakh people in South Tripura district, 2.1 lakh or 28% of total population were reported as migrants by place of birth. Categories of Born elsewhere in the district of enumeration and Born Abroad played main role in total migrants as per Census, 2001. Overall female migrants were higher than male migrants in 2001 census. In respect of inter-state migration, Assam and West Bengal were main contributors to total migrants.

A person is considered as **migrant by place of last residence**, if the place in which he is enumerated during the census is other than his place of immediate last residence.

The data on migration by last residence in Tripura as per Census 2001, shows that the total no. of migrants were 9.6 lakh. Out of these migrants, 56% were found to be from within the district. During 1991-2001 no. of migrants by place of last residence increased by 18.4%.Share of migrants by place of last residence to total population was recorded 29.5% in 1991 and 30.1% in 2001. In census 1991,highest share of 45% was under category of last residence outside India followed by elsewhere in the district of enumeration (40%) and in Census 2001 highest percentage was recorded under category of elsewhere in the district of enumeration(56%) followed by Last residence outside India(27%). Overall female migrants were higher than male migrants in both censuses.

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable. As per Census 2001, migrants by last residence in South Tripura district were 2.2 lakh. Out of these migrants, 52% were found to be from within the district followed by Last Residence outside India(35%) and In other districts of the state of enumeration(23%).Share of migrants by place of last residence to total population was recorded 28.4% in 2001. Overall female migrants were higher than male migrants in 2001 census.

The above annexure shows distribution of population of main six religions viz. Hindus, Muslims, Christians, Sikhs, Buddhist and Jains at the State, District, Development Block and Town levels in Census, 2001.As per Census-2001,it is observed that Hindus constitute 85.6% of total population of Tripura and in South Tripura district they account for 86.1 % of the district's population. The Muslims constitutes the 2nd important segment of the population but their proportion to total population is 7.9% at the state level but in the district Buddhists constitute the 2nd important segment(5.6%) .The 3rd

numerically large religious community is Christians and it constitutes 3.2% of the state's population. Buddhists accounting for 3.1% of the state's population constitute the 4th numerically large religious community. Sikhs and Jains constitute a very small proportion of the state's population.

At district level, except Hindus, Buddhists,Muslims(3rd rank) and Christians(4th rank), other communities constitute a very small proportion of the district's population.

At block level percentage of Hindus are more than any other religion in all blocks. In Kakraban Development Block Muslims communities contributes (15.01% and in Rupaichari Development Block Buddhist communities contributes (36.8%) to the total population.

At town level also the percentage of Hindus are more than any other religion. In Belonia NP percentage of Hindus is all most cent percent (99.09%). In Udaipur NP Muslim Community contributes 4.97% to total population. At block level concentration of Christian Community is more at Amarpur (6,933) followed by Karbuk (4,143), Matarbari (3,554) and Bagafa (2,851) with 8.49%, 10.45%, 2.857% and 2.35% respectively to the total population. Among the towns, Christian Community is more concentrated in Udaipur NP (69) followed by Amarpur NP (56).

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable.

According to Census-2001, in respect of all ages, category of Never married varies between 46.5% of urban population and 51.2% of rural population in the district. Share of Married category was recorded 43.7% to rural population and 47.7% to urban population. Widowed category was recorded in the range of 4-5% to total population of rural and urban areas. Other marital status i.e., Divorced/separated are insignificant. It is peculiar that percentage of the Never married males are more than females and it is opposite in case of Widowed. In other status i.e. Married and Divorced/Separated the percentage of males and females are almost equal.

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable.

As per Census-2001, in South Tripura District illiteracy rate was recorded 40.1% in all ages for total population, 41.9% for rural population and 17% for urban population.

According to the educational level, below primary category contributes 39.3% to rural literates followed by primary level of 31.8%. Only 3.1% of rural literates is graduate and above.

In urban areas primary educational level contributes 27.8% of total literates followed by middle level of 23.9%. 13.7% of total literates was recorded as graduate and above level as per Census- 2001.

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable.

As per Census,2001,in the whole state, Bengali, is predominant scheduled mother tongue, contribute 65.1% to total population followed by non-scheduled mother tongue of Kok Barak(23.6% of total population), scheduled mother tongue of Chakma (2%).

During 1991-2001 decade, proportion of Bengali mother tongue was unchanged and Kokbarak showed increasing proportion from 19% to 24% while other main mother tongues i.e.Chakma(from 3.5% to 2%), Tripuri(from 2.6% to 0.3%) and Reang(from 2% to 1.5%) showed decreasing proportion. 4th ranked mother tongue Tripuri in 1991 Census sliped at 11th position in 2001.

In South Tripura district, Bengali mother tongue shows lower percentage of 62.2 than the state average followed by Kok Barak(28.7%),Mogh (3.3%) and Chakma(2.1%).

Due to creation of a new district of Dhalai after Census-1991, district-level data of both censuses are not comparable.

ANNEXURE-IX

DISTRIBUTION OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION ON EARLIER CENSUSES

The above annexure-IX shows the distribution of Scheduled Castes and Scheduled Tribes in rural and urban areas of the state and South Tripura district and also the percentage of Scheduled Castes and Scheduled Tribes to total population. From the annexure it is clearly evident that the concentration of Scheduled Castes and Scheduled Tribes are mostly in rural areas of the state and district also because major portion of population is rural based. Out of the hundred Scheduled Castes population 84 resides in rural areas and rest 16 in urban areas for the state. Again out of 100 Scheduled Tribes 98 resides in rural areas and only 2 in urban areas. The picture is in South Tripura district where SC population of 93 resides in rural areas and rest 7 in urban areas. But in case of ST nearly cent percent (99.73) are resides in rural areas and only (0.27) resides in urban areas.

In percentage of SC to total population in case of state the rural and urban are almost same i.e.(16.26) & (16.94) respectively and in case of district it is 15.21% in rural & 16.54% in urban. In case of percentage of ST to total population for the state is 35.93% in rural areas but in urban it is only 3.34%. In case of South Tripura district the percentage of ST to total population is 45.57% for rural areas and only 1.97% for urban areas. The above analysis is done only for the year 1991 Census.

Notes on area figures and some other infomation

The total area figures for the state and for the districts are presented as supplied by the Surveyor General of India.

Total area figures for Rural Development Blocks are presented as supplied by the Land Records & Settlement Department, Govt. of Tripura by deducting urban figures.

The state urban area is presented by adding the districts urban area . Again, the state rural area is obtained by deducting the state urban area from the total area of the state as supplied by the Surveyor General of India.

Total area figures for revenue villages are presented as supplied by the Tahsildars,Revenue Department (under Sub-divisional Office) through the Village Schedules supplied by the ORGI.

Few sub-topics under physical features are incorporated state as a whole due to non availability of district wise published information. All such topics are given from Economic Review, Department of Economics & Statistics (planning), Govt. of Tripura.

Since the source for the total area figures in respect of state as well as for the district is the Surveyor General of India, while for total area figures in respect of the R.D. Blocks figure have bee collected from the the state government. The total area, as also the rural area, for the R.D. Blocks, in the district are not add up to the corresponding figures shown against the districts

In some inset tables, the urban figures of the concerned districts presented against its district name.

Annexures are not inserted in Dhalai district as the re-casting data of 1991 census are not readily available. As the district carved out from North & South Tripura districts- annexures of the two districts are related with this district (Dhalai).

Distances from R.D. Blocks head quarter to district head quarter as well as Tahsil head quarter to district head quarter are provisional.
