MOTIF

UJAYANTA PALACE

This magnificent palace is situated at the heart of the capital of Agartala spreading over an area of 1 sq Km. The palace was built by the Maharaja Radhakishore Manikya Bahadur of Tripura in 1901. The construction of the well-balanced and beautiful place was undertaken in 1899 because the old palace built in 1862 was affected badly from a severe earthquake in 1898. The construction of the palace was undertaken by the then renowned Martin Burn Company of Sri Rajen Mukherjee at a cost little above Rs. 10 lakhs. The palace is a two-storied mansion having mixed type of architecture. In front of the massive structure a splendid Mughal type garden in between two large ponds on both sides greets the eyes of visitors of the whole country and abroad. Besides the ornamental floors, tiles and ceilings, the palace can also boast of one beautiful Chiness room ornamented by Chinese craftsmen brought from China. A musical fountain recently added has enhanced the charm of the palace A heritage festival to commemorate the centenary of this Royal palace was organized in January 2001.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and collage), medical facilities (Viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centres),

drinking water, Post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri. K.D. Nath, Director of Census Operations, Tripura. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the presentation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The District Census Handbook first introduced in 1951 census as an additional publication for each district of the country. Directorate of Census Operations, Tripura is also published District Census Handbook since 1961 . The quality of data and its per view have undergone changes towards improvement of the handbook in keeping with needs of the data user.

Like the previous Census of 1991 census, the revenue villages which were cadastral surveyed in 1970 only have been taken into account in 2001 Census too and all the information for 2001 Census were collected on the basis of revenue villages. The information (non-census) collected by the revenue agencies mainly by the Tehsildars deserve to be acknowledged with gratitude. This Directorate is grateful to the Director of Land Records, Director of Economics & Statistics, District Magistrate & Collector, Sub-Divisional Magistrate and the Directors of different Departments of State Govt. & Central Govt. for their sincere co-operation for supply of information for this precious publication.

The 1951 Census is the first innovator of District Census Handbook, a joint venture publication of Census Organization and State Govt./Union Territory Govt. Since 1951 it has been continuing under the banner of each decennial Census with some modification or some innovation. It is a most valuable district level publication brought out by the Census Organization on behalf of each State Govt./Union Territory Administration. This book provides data/information on some basic demographic and socio economic characteristics on the availability of certain important civic amenities/facilities in each village and town of the concerned district. From the very beginning DCHB are able to carry its own fame and popularity amongst the planners, administrators, academicians, researchers and general people. Specially planners, administrators, academicians and researchers are accepted this as a precious publication and valued it as a best reference handbook.

The 1951 Census of Tripura was conducted under the general supervision of the Superintendent of the Census Operations, Assam treating Tripura State as a single district. The publication of 1951 DCHB was a very simple one wherein only Census data were incorporated in a very simple manner. Like 1951 Census, DCHB series of 1961 Census was also published treating Tripura as a single district territory. In 1971 Census, DCHB enlarged considerably to incorporated non census data along with census data. The scope of District Census Handbook, 1981 was enlarged again considerably in relation to the amenities available in the villages and in the nine villages and non-municipal towns. The scope of District Census Handbook of 1991 census was almost similar except minimizing two columns of 1981 census. The scope of District Census Handbook of 2001 is more attractive, useful and informative – this time planner adding some essential items and dropping very few items which has less importance.

The services of Shri S. Raye, Assistant Director and Shri G.R. Saikia, S.I. Gr. I deserve recognition for drafting of District Census Handbook – 2001 Census for four districts and Shri S. K. Sarkar, S.I. Gr. III and Shri S. Deb Ray, Sr. Compiler for computerization work.. The collection of information and their compilation by Shri Saikia, Shri P. K. Ghosh, Sr. Drawing Assitant, Shri B. Rabha, S.I. Gr. II, Smti K. Kshatriya, S.I. Gr. II, Shri S.K. Sarkar, S.I. Gr. III, Shri D. Bhattacharjee, S.I. Gr. III, Shri K. Debbarma, S.I. Gr. III, Smti U. Das, Compiler, are also deserve every praise. The services of Shri S. Rava, Sr. Geographer,Shri S.K.Sarkar, S.I. Gr. III, Shri A. Khan, Sr. Compiler Shri A. Sarkar, Compiler, Shri B. Lalung, UDC, Shri G. Ramchiary, Draftsman, are also deserve every praise for computerization work of data feeding and analytical note. Shri A. Chowdhury, S.I. Gr. II along with tabulation team contributed to the same by supplying figures and guidance in generating inset tables etc. which need appreciation. Moreover Shri B. Das, Compiler, Smti T. Nath, Canteen Clerk is also deserve recognition for compilation work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner, India for his invaluable and inspiring guidance through his circulars and re-view meeting time to time. I am also thankful to Dr. I.C. Agrawal, ARG (SS), and Shri S.L.Jain, Deputy Director, S.S. Div, for their valuable guidance and assistance extended to me in finalisation this volume.

Sex ratio (Urban) for the district:		**988**	**996**

The above table depicts the sex ratio of SC & ST in respect of towns. The total sex ratio of SC (urban) for the district is 988. Three towns viz Khowai NP(1036), Agartala MCL(1023) and Pratapgarh CT(1004) having sex ratio of one thousand and above in respect of SC. It is a good significant of the society. The sex ratio of Narsingarh CT(893) in very low in comparision with other towns. Only four towns out of thirteen shose sex ration(SC) is above the district total(urban).

The total sex ratio of ST (urban) for the district is 996 which is higher than the SC sex ratio of the district. It is very very interesting to notice that the sex ratio of Ranirbazar NP is 5000!, as because in Ranirbazar there is 1 male & 5 female i.e. total 6 population(ST). Hence the sex ratio has come as 5000. In sonamura NP the sex ratio is 294 because there are 119(males) & 35(females) as ST population. The sex ratio of Teliamura(1000), Agartala MCL (1032), Gandhigram CT(1268) is a good signaficant in society. Narsingarh CT(721) & Indranagar (part)CT(757) represents low sex ratio in comparision with other towns.

Where the minimum number of scheduled tribe population are in Ranirbazar NP(only 3). In respect of percentage of literates Agartala MCL(95.4) is highest among other town of the district and Ranirbazar NP(50%) is the lowest. The district(urban) literacy rate in respect of ST population is 94.2 only four towns i.e. Khowai NP(95.2%), Teliamura NP(94.4%), Agartala MCL(95.4%) and Pratapgarh CT(94.4%) are above the district level of literacy rate. In respect of males and females the total urban literacy rate is 97.3 & 91.1 respectively. The literacy rate o f Kunjaban(par)CT(99.1) is the highest and Ranirbazar NP(0) is the lowest among males literacy rate. It is interesting to shown from the above table that there is no male literate persons (ST) living in Ranirbazar NP only 3 female literate persons are there. In respect of female literacy rate Khowai NP(93.9) ranked 1st position & Gakulnagar CT(50%) ranked the last position. The district total(urban) male/ female literacy gap is 6.2. The minimum gap shown in Ranirbazar NP(-60) as there was no male persons & maximum are in Gakulnagar CT(26.2%).

The above table represents the number and percentage of Main Worker, Marginal Worker, and Non-Workers & Total Worker (i.e. sum of Marginal + Main workers). Out of total population of 1532982 the total number of workers are 534348 (i.e. 34.9 percent) and total number of non- workers are 998634(i.e. 65.1percent). Out of total male population of 785579 the male worker are 397079(50.5 percent) against males and 388500 (49.5 percent) are males non- workers. Where as out of total number of 747403 females the worker are 137269(18.4 percent) and that of female non-workers 610134 (81.6 percent). When we are considering for main workers 436870(28.5 percent) of the District level out of which males are 359754(45.8 percent) and females are 77116(10.3 percent). When we are considering the Marginal workers in the district level the total are 97478(6.4 percent) and the considering males are

37325(4.8 percent) and females 60153(8 percent). When we are going to the analysis for the Development Block Level then we may observe that the participation of males works are highest in percentage (33 percent) in repeat of main workers and the lowest percentage shown against Kathalia (22.2 percent) Development Block. In repeat of male participation in main worker the highest percentage are in Dukli development block (47.7 percent) where as the lowest shown against Padmabil Development Block within 39.5 percent. In respect of female participation of main workers Jampuijala Development Block (21.4 percent) are highest where as Kathalia (3 percent) rank last among the Development Blocks. Now we are considering the Marginal Worker Tulashikar Development Block (16.2) ranked first where as Dukli Develop0ment Block (3.3 percent) rank last. For Marginal Worker the sex wise highest and lowest percentage is Padmabil (9.1 percent) and Dukli (3.3 percent) repeats the males highest and lowest percentage and for females Tulashikar (23.9 percent) is highest where as Dukli (3.3 percent) is the lowest. In repeat of total workers (Main + Marginal) Tulashikar Development Block (47 percent) is the highest and Boxanagar Development Block (29.1 percent) rank lowest position. Teliamura Devlopment Block (52 percent) ranked and Boxanagar (47 percent) ranked the last positioning repeat of total males workers. In repeat of females total workers Tulashikar Development Block (43 percent) ranked is where as Boxanagar (10 percent) ranked last position. For percentage of Non- Workers Boxanagar Development Block (70.9 percent) ranked where as Tulashikar (53 percent) ranked the last position. Inrepeat of male Non- Workers Boxanagar (53 percent ranked first position and Teleamura (46.8 percent) ranked the last position. In repeat of females non- workers Boxanagar (90 percent) ranked first and Tulashikar (57 percent) ranked the last respectively .

The above table represents Total Population of CD Blocks (Rural) the main occupation, The Marginal Occupation (Worker), The Total Workers (Main + Marginal), Non- Workers and their percentage. The total number of persons in the District (Rural) is 1122915 out of where 401074 are workers and 721841 are non- workers. Again out of 401074 workers 312965 are main workers and 88109 are marginal workers. The percentage of Total workers and Non- workers are (District + Rural level) 35.7 percent and 64.3 percent respectively. The percentage of main and marginal workers is 27.9 and 7.8 respectively. The sex wise participants of total workers as regards males (50.1 percent) and females (20.5percent), males' workers are nearly 2.5 times grater than the total female workers. In respect of main workers the males (44.7 percent) is four times grater then females (10.1 percent). But in repeated of marginal workers the participants of females (10.4 percent) nearly double then males (5.5 percent). In respect of non-works females (79.5 percent) is more then males (49.9 percent). Now we come to the comparison among the Development Block are in all respect i.e., total workers, main workers, marginal workers and non- workers. Now we have to analysis in regards total workers in which the percentage of Tulashikar Development Block (47 percent) ranked first where as Boxanagar Development Block (29.1 percent) ranked last position among the Development Blocks. In respect of males and females the highest and lowest to the worker are Teliamura (53.2 percent) and Tulashikar (43 percent) respectively the highest percent for males and females where as Boxanagar (47 percent) and Boxanagar (10 percent) respectively the lowest for males and females respectively. Now we are analyzing in repeat of main workers as sex wise break up. Jampuijala (43 percent) to the highest where as Kathalia (22.2 percent) is the lowest. In respect of males and females the percentage of highest and lowest participation in main workers are Dukli (47.5 percent) and Jampuijala (21.4 percent) are highest for males and females respectively where as Padmabil (39.5 percent) for males and Kathalia (3 percent) for female are lowest among the main workers. Now for marginal workers Tulashikar (16.2 percent) is highest and Dukli (3.9 percent) is the lowest among total participation in marginal workers. For males the highest and lowest are Padmabil (9.1 percent)

and Dukli (3.6 percent) respectively. For females Tulashikar (23.9 percent) and Dukli (4.2) is the highest and lowest respectively. The highest non- workers percentage is in Boxanagar (70.9 percent) and lowest in Tulashikar (53 percent). For males the maximum and minimum percentage of non- worker are in boxanagaqr (53 percent) and Teliamura (46.8 percent) respectively. For females maximum and minimum are in Boxanagar (90 percent) and Tulashikar (57 percent) respectively.

The above table represents the percentage of main, marginal, total workers and non- workers by sex and its percentage in urban areas of the Districts. Out of 410067 populations 133274 are total workers and 276793 are non- workers. The percentage of total workers is 32.5 and that of non- workers is 67.5 percent. The percentage of sex wise break- up in total workers is males 51.7 percent and females 12.7 percents i.e. the percentage of males is four times higher then the females percentage. In considering for non- workers the females percentage (87.3) is greater then the males percentage (48.3 percent). The highest and lowest to the worker are in Kunjaban CT (41.5 percent) and Pratapgarh CT (29.9 percent). For participation of to the male workers are in Kunjaban CT (62.8 percent) is in minimum and in Sonamura NP (50.2 percent) and Badarghat CT (50.2 percent) jointly are shown the minimum percentage of participation of total male worker. In respect of fe3male total worker the maximum and minimum are in Khowai NP (19.3) and Teliamura are (7.7). Now we analyze the main worker where the maximum and minimum participation are in Kunjaban CT (37.9 percent) and Indranagar CT (26.8 percent) respectively. In case of Males Main workers the maximum and mninimum are in Kunjaban CT (58.3 percent) and Indranagar CT (45.1 percent) respectively. In case of females main workers the maximum and minimum are in Khowai NP (15.4 percent) and Narsingarh CT (5.4 percent) respectively. In case of marginal workers the maximum and minimum participation are in Ranibazar NP (4.1 percent) and Jogendranagar CT (4.1 percent) and Agartala MCL(1.5 percent) respectively considering males participation in marginal workers the maximum and minimum are in Indranagar CT (6 percent) and Gokul nagar CT (1.4 percent) respectively. Considering the females participation in marginal workers the maximum and minimum are in Jogendranagar CT (4.3 percent) and Agartala MCL (1percent) respectively. In case of non- workers the maximum and minimum are in Gandhigram CT (92.5 percent) Agartala MCL (67 percent) respectively.For males non-workers the maximum and minimum are in Sonamura NP and Badharghat CT both level 49.8 percent of males non- workers and Kunjaban CT (37.2 percent i.e. minimum. For female's non- workers the maximum are in Narsingarh CT (92.5 percent) where as the minimum are in Khowai NP 80.7 percent.

Note: Percent of Worker to total worker are given in brackets

The above table represents the distribution of workers by sex in four categories of Economic Activity in Development blocks,2001. Here the total number of workers in the districts is 534348 i.e., 34.9% out of which the Cultivators are 113468(21.2%), Agricultural Laborers are 113405(21.2%), Households Industry workers are 17867(3.3%) and other workers are 289608(54.2%). It is interesting to note from the above table that the percentage of workers in respect of Cultivators and Agricultural Laborers are same i.e.21.2 in district label. The percentage of other workers (54.2) is 2nd half time greater than the percentage of cultivators and Agriculture laborers. The percentage of Household Industry is too low i.e., only 3.3. In respect of male worker district level are 397079(50.5%) and its distribution of four categories of worker are 82043(20.7%) for cultivator, 68833(17.3%) for agricultural laborers, 8489(2.1%) for household Industries and 237714(59.9%) for Other workers. The percentage of other workers is more than the percentage of rest of the category of workers i.e. Cultivators, Agriculture laborers and HH 9. In respect of females worker total number in the district are 137269(18.4%) in which Cultivators are 31425(22.9%), Agriculture laborers are 44572(32.5%), Household Industry are 9378(6.8%) and other workers are 51894(37.8%).

Now we are analyzing the category of workers in respect of Development block wise i.e. the maximum and minimum percentage of participation of total works and its sex wise break up etc Jampuijala (44.9%) represents the maximum and Dukli (7.3%) represents the minimum in respect of Cultivators. In respect of Male cultivators the maximum and minimum are in Jampuijala (46.4%) and Dukli (6.8%) respectively. In respect of Females Cultivators the maximum and minimum are in Jampuijala (43.1%) and Kathalia (6.4%) respectively. For Agricultural Laborers the maximum and minimum participants of Total Workers are in Hezamara (44.6%) and Dukli (5.9%) respectively. In respect of males Agricultural laborers workers the maximum and minimum are in Tulashikhar (38.5%) and Dukli (5%) respectively. In respect of females Agricultural laborers workers the maximum and minimum are in Kathalia (61.3%) and Dukli (10.4%) respectively. For household industriy workers the total maximum and total minimum are in Melaghar (8.5%) and Tulashikhar (1.5%) respectively. In respect of males Household industry workers the maximum and minimum are in Melaghar (4.3%) and Jampuijala (0.9%) respectively. In respect of females HHI workers the maximum and minimum are in Melaghar (20.4%) and Tulashikhar (1.9%) respectively. Now we are analyzing the last category of workers i.e., Other Worker. The maximum and minimum percentage for participation in other workeras is in Dukli (83.3%) and Jampuijala (14%) respectively. In terms of males OW " the maximum and minimum are in Dukli (86.3%) and Hezamara (19.2%) respectively. In terms of females OW the maximum and minimum are in Dukli (67.4%) and Jampuijala (6.5%) respectively.

Note: Percent of Worker to total worker are given in brackets

The above table represents the distribution of workers by sex in four categories of Economic activities i.e. in C. D. blocks wise (only rural part) of 2001. Here the total number of workers in the District (rural portion only) are 401074 (35.7%) out of which Cultivators are 111999 (27.9%), Agricultural laborers are 111243 (27.7%), Household Industry are 15238 (3.8%) and Other Workers are162594 (40.5%). We can observed from the table that the categories of workers are in descending order in percentage as 40.5%, 27.9%, 27.7% and 308% in respect of " OW", Cultivators, Ag-laborers and HHI respectively. The percentage of cultivators 27.9 and Agri. Laborers 27.7 are more or less equal. In sex wise distributions of total workers the males (50.1) is 2.5 times greater than females (20.5). For category of workers the parentage of males and females are equal in case of cultivators. Where as for Agricultural laborers and HHI the percentage of females are greater than the percentage of males. But in case of "OW" the percentage of males is greater than the percentage of females. In respect of total workers the maximum and minimum are in the Development block Tulashikhar (47%) and Boxnagar (29.1%) respectively. In respect of males total workers the maximum and minimum are in the Development blocks. Teliamura (53.2%) and Boxnagar (47%) respectively. In respect of females the maximum and minimum are in the Development blocks Tulashikhar (43%) and Boxanagar (10%0 respectively. In respect of Cultivator the maximum and minimum are in the Development blocks Jampuijala (44.9%) and Dukli

(15.1%) repectively. In Cultivators the percentage of males maximum and minimum are in the Development blocks Jampuijala (46.4%) and Dukli (14.1) respectively. Within Cultivators the females percentage of maximum and minimum are in Jampuijala (33.1%) and Kathalia (6.4%) respectively. For Agricultural laborers the maximum and minimum percentage are in Hezamara (44.6%) and Dukli(11.5%) respectively. In Agricultural laborers the males maximum and minimum percentage are in Tulashikhar (38.5%) and Dukli (9.8%) respectively. In Ag-laborers the females maximum and minimum percentage are in Kathalia (61.3%) and Dukli (20.3%) respectively. For household Industries the maximum and minimum percentage of participation are in Melagarh (8.5%) and Tula shikhar (1.5%) respectively. Within "HHI" the females maximum and minimum percentage are in Melagarh (20.4%) and Tulashikhar (1.9%) respectively. For "Other Workers" the maximum and minimum participants are in Dukli (69.9%) and Tulashikhar (13.8%) respectively. Within "Other Workers" the males maximum and minimum percentage are in Dukli (74.1%) and Hazamara (19.2%) respectively. Within "Other Workers" the females maximum and minimum percentage are in Mohanpur (60.9%) and Jampuijala (6.5%) respectively.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The above table represents the amenities available in the village according to population range. The table represents ten types of amenities i.e. Education, Medical, Improved Drinking Water, Post Office, Telephone, Transport Communication, Banks, Agricultural credit Society, Approach by Pucca road and Power Supply. The population ranges are divided into six groups i.e. 1-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10000+.

In district total the percentage of amenities in descending order are given below. Education 275 villages (100%), Improved Drinking Water (98.2%),Power supply(90.2%) Approach by Pucca road (89.1%), Medical (79.6%), Post Office (76.0%), Transport Communication (65.5%), Telephone (50.9%), Agricultural credit Society (23.3%), and Banking service (14.2%).

If we analyze according to population range and its villages within the range and different types of amenities then we have in the (1-499) population range there are 14 inhabited villages where Educational facilities having (100%), Medical (42.9%), Improved Drinking water (100%), Post Office (50%), Telephone (21.4%), Transport Communication (35.7%), Banking service in that population range i.e.(0%), Agricultural Credit Society (7.1%) Approach by Pucca road (100%), and Power Supply (57.1%). In the (500-999) population range there are 16 inhabited villages where Educational facilities having (100%), Medical (62.59%), Improved Drinking water (93.8%), Post Office (31.2%), Telephone (6.2%), Transport Communication (31.2%), no banking service (0%), Agricultural Credit Society (6.2%) Approach by Pucca road (62.5%), and Power Supply (56.2%). In the (1000-1999) population range there are 48 inhabited villages where Educational facilities having (100%), Medical (56.2%), Improved Drinking water (100%), Post Office (52.1%), Telephone (25%),

Transport Communication (45.8%), Banking service (2.1%), Agricultural Credit Society (16.7%), Approach by Pucca road (77.1%), and Power Supply (87.5%). In the (5000-9999) population range there are 53 inhabited villages where Educational facilities having (100%), Medical (92.5%), Improved Drinking water (100%), Post Office (94.3%), Telephone (79.2%), Transport Communication (88.7%), Banking service (30.2%), Agricultural Credit Society (39.6%), Approach by Pucca road (100%), and Power Supply (98.1%). In the population range 10000+, there are 20 inhabited villages in which (100%) are getting Educational, Medical, Improved Drinking water, Post Office, Telephone, Approach by Pucca road and Power Supply facilities and the percentage of rest of the amenities are as follows: - Transport Communication (80%), Banking Service (35%), and Agricultural Credit Society (50%).

Note:- Data of availability of household assets of urban centers are not available.

Table No. 52 shows no. of households availing Banking services and no. of households having each of the specified asset as per Census-2001. In rural areas of West Tripura district, percentage of HHs availing Banking services varies between highest 33.8% in Kathalia Dev. Block and lowest 12% in Tulashikhar Dev. Block against rural district average of 21.6%.

% of HHs having specified asset of Radio varies between highest 39.5% in Dukli Dev. Block and lowest 16.8% in Tulashikhar Dev. Block against rural district average of 29.2%.

% of HHs having Television varies between highest 28% in Jampuijala Dev. Block and lowest 7.4% in Tulashikhar Dev. Block against rural district average of 19.9%.

% of HHs having Telephone varies between highest 4.5% in Kalyanpur Dev. Block and lowest 0.3% in Padmabil Dev. Block against rural district average of 2.4%.

% of HHs having Bicycle varies between highest 44.8% in Khowai Dev. Block and lowest 17.5% in Boxanagar Dev. Block against rural district average of 34.2%.

% of HHs having Scooter, Motor Cycle, Moped varies between highest 3.8% in Mohanpur Dev. Block and lowest 1.2% in Mandai Dev. Block against rural district average of 2.4%.

% of HHs having Car, Jeep, Van varies between highest 2.8% in Kalyanpur Dev. Block and lowest 0.2% in Hezamara Dev. Block against rural district average of 0.8%.

It is surprising fact that % of HHs having no specified asset is very high in rural areas of West Tripura district, it varies between highest 63.8% in Boxanagar Dev. Block and lowest 38.3% in Jampuijala Dev. Block against rural district average of 48%.

(viii) Major Social And Cultural Events, Natural And Administrative Development Significant Activities During The Decade.

Tripura is a small but picturesque state in the North Eastern Region of the Country. It is a state inhabited by various ethnic groups. Cultural heritage of one community differs from the other. In spite of the different ethnic groups, the many faceted efforts have mingled into a single hole giving Tripura can be terned as a 'Laboratory' of cultural synthesis. Tribal culture and Bengali culture blend here magnificently. Flute music, Bamboo dance, Lebung Boomani dance and Basanta dance are some of the exquisite varieties of Tripura's mixed culture.

Cultural Affairs :

Steps were taken to set up a multicultural complex at Agartala at an initial cost of Rs.2 cr. The project will consist of a centrally air-conditioned modern theatre of one thousand capacity, conference hall, studio, practice and rehearsal rooms, recording rooms and lawn for open-air function. A cultural team comprising artistes from remote area of the State was sent to Japan to perform Hozagiri and other traditional dances along with vocal and instrumental music of Tripura. National level dance and music festival was organized at Agartala where eminent artistes of repute participated. A drama festival and a dram workshop for done month were held in collaboration with National School of Drama at Agartala. Through cultural exchange programmes, cultural teams were sent outside the State and cultural teams of other States were invited to the State with a view to give the artistes of the State good exposure. Three international film festivals were organized at Agartala. Book fairs, Industrial fairs, Science fairs, Co-operative fairs etc. were held at Agartala and other places of the state every year. Three films were prepared on Unakoti, Pilak and on cultural heritage of Tripura. Apart from these, a film on tourism and tourism products of Tripura was prepared through the Films Division, government of India.

Health and Family Welfare :

The activities of the Department include provision of health services to the people in general and implementation of family welfare programme, preventive medicine programme, etc. Significant achievements of the Department during the last 2 ½ years were as follows :

Owing to sustained efforts of the Department, infant mortality rate in the state was brought down from 51 to 49 per thousand live births during the period against the national average of 71. Birth rate could be brought down from 18,9 to 17.3 during the period against national target of 21 per thousand by 2000. For providing better health service, operation theatres and/or labour rooms were constructed in 11 Hospitals, 4 Community Health Centres, 6 Primary Health Centres and 35 Sub-Centres. Construction of super-speciality block in progress (with the commissioning of this block in near future, most modern specialist services in cardiology, neurology, gastro-enterology, etc. would be available in the state itself.)

Information Technology :

Information Technology (IT) has been identified as a major thrust sector for the state, considering the availability of educated/trained manpower in the state and the fact that this sector is not affected by the locational disadvantage of the state As much as other sectors are. A new Directorate of IT was created in December, 1998, which started functioning in April 1999. IT Policy, 2000 was formulated and announced in June, 2000. At State Government's instance, Ministry of Information Technology (MIT), Government of India, has agreed to set up a hub center of Software Technology Park (STP) at Agartala, which will be developed into a full-fledged STP in due course. The State Government has also been successful in getting sanction from the MIT for setting up an IT training institution in the state. In order to take IT closer to the common man, a project for setting up of Community Information Centres(CICs) in Blocks has been taken up. Three Blocks have already been covered ands the project will be gradually expanded to cover other Blocks. Similarly, an Information-cum-Facilitation Centre(IFC) has been set up at the Government Secretariat and at the Collectorates in West Tripura, North Tripura and South Tripura to provide information on Government activities to the public.

Education :

Education, a key area of development, was given high attention by the State Government during the period. Achievements under Education Department during the period are indicated below in brief :

Foundation stone of Administrative Blocks of Tripura University laid by Shri K.C. Pant, Deputy Chairman, Planning Commission of India is a major event of the decade.

Sports :

The Vision Statement of Youth Affairs and Sports Directorate envisages provision of high quality training and coaching to the budding sports persons and making available reasonable infrastructure down to the Block level, so that talented sports persons can achieve better results at national and international levels. A very modern scientific elevated Swimming Pool christened RAIMA was commissioned in the Dasaratha Deb State Sports Complex at Badharghat, Agartala. In the same Complex, a composite Stadium with spectator capacity of 27,000 was also commissioned. At Udaipur, Sabroom, Belonia and Kamalpur, swimming pools were set up. Basketball Court in belonia was created. Play fields in five Schools were developed in the outlying District. A Special Area Games (S.A.G.) Project at Dasaratha Deb State Sports Complex was commissioned. This project is aimed at residential training to be imparted to 65 students. As a direct result of up-gradation of sports infrastructure, sports persons from the State could achieve spectacular success both at National and International levels in different athletic events, gymnastics, judo, yoga etc. During 1991-2001 the State athletes achieved 19 Gold, 29 Silver and 36 Bronze prizes from different events.

State Capital Complex :

Construction of new State Capital Complex near salbagan on Mahatma Gandhi Road has been approved at an approximate cost of Rs.177 cr. The Project provides for the

Legislative Assembly, High Court Building, Government Secretariat, State Guest House, MLA Hostel, Civic Amenities and Cultural Complex, Commercial Complex, Bungalows for Ministers, Speaker and Deputy Speaker of Legislative Assembly, Bungalows for High Court Judges, Other residential buildings, Other essential services, Land acquisition. Construction of 150 quarter has already been taken up. Construction of building for Tripura Legislative Assembly and Government Secretariat is likely to be started by March, 2001.

Administrative Events :

During 1991-2001, 21 new Development Blocks, 4 new Sub-divisions and 1 new district were set up with a view to bring the administration closer to the people in the state.. West Tripura District is also not far behind in this regard. Here 9 Dev. Blocks including 1 sub-division were created during the last decade. These were, Hezamara Dev. Bl., Padmabil Dev. Bl., Tulashikhar Dev. Bl., Kalyanpur Dev. Bl., Mandai Dev. Bl., Jampuijala Dev. Bl., Boxanagar Dev. Bl., Kathalia Dev. Bl., Dukli Dev. Bl. and Bishalgarh sub-division.

As there is no new important places of historical, religious and archaeological in the district and which have already been published in previous DCHBs so it is not incorporated in this chapter again.

(x) Scope of Village Directory and Town Directory

Part A- of the publication contains the village and town directories. The village directory present information for each village such as amenities available in the fields of education, medical, drinking water, post and telegraphs, communications, power supply, banking, credit societies recreational and cultural facilities, news paper and magazine facilities, information about exported, imported and manufacturing products which are of fundamental necessity to the villagers. Besides these particulars relating to approach to the village and land use pattern etc. are also available in village directory. Moreover, development block wise details regarding alphabetical list of villages, abstract of educational, medical and other amenities in the villages; villages by number of primary schools; villages with different sources of

drinking water facilities available; villages by primary, meddle and secondary schools. Information about villages with 5000 and above population which don't have one or more amenities; census towns which don't have one or more amenities; land utilization data in respect of census town/non municipal town; development block wise list of inhabited villages where no amenity other than drinking water facility is available; summary showing number of villages having scheduled castes and scheduled tribes population; proportion of scheduled castes and scheduled tribes to the total population by range; number of villages under each gram panchayat; number of girls schools in each villages etc.

The town directory contains seven statements and present basic information of each town such as status and growth history; physical aspect and location code; municipal finance; civic and other amenities; medical, educational, recreational and cultural facilities; trade-commerce-industry and banking; civic and other amenities in slums etc. Besides those it gives information about towns showing their outgrowth with population.

Part B- of this book contains the primary census abstract (PCA) of the villages and towns. The primary census abstract gives information of each village/town/ ward about the basic census data including area, occupied residential house, number of household, total population, 0-6 population by sex, literate and illiterate population, working population by broad categories, marginal workers and non workers etc. Moreover, information about disabled persons in five categories, fertility particulars for ever married woman and currently married woman, household engaged in cultivation/ plantation etc.

This part included district PCA, PCA for scheduled castes and scheduled tribes, development block wise village PCA, urban PCA etc. Moreover it enlisted appendix to district PCA i. e. urban block wise figures of total scheduled castes and scheduled tribes population. In this part a few number of annexure (I to VIII) are also incorporated which have been prepared according to the 1991 census. From this annexure reader may able to familiar with number of village under each gram panchayat; fertility, mortality and migration; various measures of fertility and mean age at marriage; percentage distribution of migrants by place of birth/place of last residence main religions in the district/ development block; marital status of population; age, sex and education of different mother tongue etc.

The Village Directory statement of Part A- for 1991 contained 18 columns for exposition information regarding amenities and land use pattern, whereas the statement (prescribed format) for 2001 contains 25 columns. In respect of town directory of Part A- all the seven statements are almost similar to those adopted in 1991. The sub-statement IVA of 1991 was renamed as statement VII in 2001. This time the column "Area of slum" is dropped and included another two more columns i.e. "Is it notified" and " No. of households".

The Primary Census Abstract has been slightly modified in 2001 census to those adopted in 1991 census. Three new columns i.e. information about disable persons, fertility particular for ever married and currently married woman and household engaged on cultivation/plantation were included in 2001 census.

PART B- PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation *(Annexure-II)*. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior

officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract Table A-5 for total population gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, A-5 Appendix table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Urban	48.94	49.45	36.69	37.89	28.84	30.08

Annexure II(a) shows no. of currently married female population and percentage to female population. It is clear that range in 42-44% of female population in the district and the state are currently married. Number of married females during 1986-91 are lesser than period of 1981-86.

ANNEXURE II(b): CHILD MORTALITY INDICATOR, 1991

Persons/ Males/ Females	q1		q2		q5	
	Tripura	West Tripura	Tripura	West Tripura	Tripura	West Tripura
1	2	3	4	5	6	7

M	81	77	96	80	102	86
F	84	67	85	72	100	84

Annexure II(b) shows child mortality in different ages i.e. IMR, Under Two Mortality Rate(U2MR) and Under Five Mortality Rate (U5MR) in Tripura state and West Tripura district.q1(IMR),q2(U2MR) & q5(U5MR) are lesser in West Tripura district than state average. It was experienced that IMR among male population is lower than female population at state level and higher at district level.

ANNEXURE III(a): VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991

Total/ Rural/ Urban	CBR		TFR		CWR(0-4)		CWR(5-9)

U	18.47	18.42	19.47	19.35	20.30	20.17

Annexure III(a) shows crude birth rate(CBR) in West Tripura district is one point lower than state average. Total Fertility Rate (TFR) means no. of children born per woman for the entire reproductive age span assuming that there is no mortality of women till the completion of reproductive period, is 4.72 in West Tripura district against state average of 4.91. No. of children in the age group 0-4 & 5-9 per 1000 women in the age group 15-49 years are much higher in rural areas than urban areas. Overall West Tripura district is in better position than state but in rural areas its position is worse. Mean age at marriage of currently married women varies in the range of 17.62-18.47 in district and state at total, rural & urban levels as per Census,1991. It is observed that Mean age at marriage of currently married women who married during 1986-91 shows upward trend.

ANNEXURE III(b) : AGE SPECIFIC FERTILITY & AGE SPECIFIC MARITAL FERTILITY RATES, 1991

Specific age group	ASFR Per 1000 women		ASMFR Per 1000 women	
	Tripura	West Tripura	Tripura	West Tripura
1	2	3	4	5
15-19	44	44	182	174
20-24	156	148	222	213
25-29	157	146	178	166
30-34	118	110	128	120
35-39	78	70	85	77
40-44	48	46	54	52
45-49	28	28	38	33

III(b) As per Census,1991 ASFR was experienced crucial in three specific age groups of 20-24,25-29 & 30-34, it means 15 years of reproductive age span is very important. ASMFR was experienced much higher in four specific age groups of 15-19,20-24,25-29 & 30-34 at both and district level.

A person is considered as **migrant by place of birth** if the place in which he is enumerated during the census is other than his place of birth. Out of 32 lakh people in the state, 9.4 lakh or 29.4% of total population were reported as migrants by place of birth. This proportion is identical with percent of 29.3 in 1991 Census. The decadal growth of migrants (16.1%) is similar with the growth of total population. In 1991 Census, highest share of 54% were reported in the category of Born Abroad followed by category of Born elsewhere in the district of enumeration (33%) but in Census, 2001, reversibly category of born elsewhere in the district of enumeration (51%) was placed in Ist position followed by Born Abroad (32%).Except category of Born Abroad, in other categories, female migrants were higher than male migrants in both censuses. In respect of inter-state migration, Assam was main contributor to total migrants followed by Bihar in 1991 and as per 2001 census, Mizoram was in Ist position followed by Assam.

Out of 15.3 lakh people in West Tripura district, 4.8 lakh or 31.2% of total population were reported as migrants by place of birth. This proportion is higher than percent of 27.7 in 1991 Census In 1991 Census, highest share of 54% were reported in the category of Born Abroad followed by category of Born elsewhere in the district of enumeration (36%) but in Census, 2001, reversibly category of born elsewhere in the district of enumeration (55%) was placed in Ist position followed by Born Abroad(32%).Overall female migrants were higher than male migrants in both censuses. In respect of inter-state migration, Assam and West Bengal were main contributors to total migrants in both censuses.

The above annexure shows distribution of population of main six religions viz. Hindus, Muslims, Christians, Sikhs, Buddhist and Jains at the State, District, Development Block and Town levels in Census,1991 & 2001.As per Census-2001,it is observed that Hindus constitute 85.6% of total population of Tripura and in West Tripura district they account for 89.6 % of the district's population. The Muslims constitutes the 2nd important segment of the population but their proportion to total population is 7.9% at the state level and that in the district is 8.3%.The 3rd numerically large religious community is Christians and it constitutes 3.2% of the state's population.Buddhists accounting for 3.1% of the state's population constitute the 4th numerically large religious community.Sikhs and Jains constitute a very small proportion of the state's population.

At district level, except Hindus and Muslims, other communities constitute a very small proportion of the district's population.

At block level percentage of Hindus are more than any other religion in all blocks except Boxanagar Development Block where percentage of Muslims is (54.23%).

At town level also the percentage of Hindus are more than any other religion. In Sonamura NP Muslim Community contributes 29.25% to total population. At block level concentration of Christian Community is more at Jiranai (5,829) followed by Jumpuijala (4,705), Teliamura (3,518) and Mandai (3,378) with 4.55%, 10.7%, 4.47% and 7.7% respectively to the total population. Among the towns, Christian Community is more concentrated in Agartala MCL (1,533) followed by Badharghat CT (120) than other towns.

The proportion of Hindus and Buddhists decreased while that of Muslims and Christians increased during 1991-2001 decade in the state. In West Tripura district, except Hindus, proportion of other main communities showed declining trend during the decade.

According to Census-2001,in respect of all ages, category of Never married varies between 46.5% of urban population and 51.8% of rural population in the district. Share of Married category was recorded 43.3% to rural population and 48% to urban population. Widowed category was recorded in the range of 4-5% to total population of rural and urban areas. Other marital status i.e., Divorced/separated are insignificant. It is peculiar that percentage of the Never married males are more than females and it is opposite in case of Widowed. In other status i.e. Married and Divorced/Separated the percentage of males and females are almost equal.

During the decade of 1991-2001, percentage of Never married status showed a declining trend and increasing trend has been reflected in other status i.e. Married, Widowed and Divorced/Separated.

Notes on area figures and some other infomation

The total area figures for the state and for the districts are presented as supplied by the Surveyor General of India.

Total area figures for Rural Development Blocks are presented as supplied by the Land Records & Settlement Department, Govt. of Tripura by deducting urban figures.

The state urban area is presented by adding the districts urban area . Again, the state rural area is obtained by deducting the state urban area from the total area of the state as supplied by the Surveyor General of India.

Total area figures for revenue villages are presented as supplied by the Tahsildars,Revenue Department (under Sub-divisional Office) through the Village Schedules supplied by the ORGI.

Few sub-topics under physical features are incorporated state as a whole due to non availability of district wise published information. All such topics are given from Economic Review, Department of Economics & Statistics (planning), Govt. of Tripura.

Since the source for the total area figures in respect of state as well as for the district is the Surveyor General of India, while for total area figures in respect of the R.D. Blocks figure have bee collected from the the state government. The total area, as also the rural area, for the R.D. Blocks, in the district are not add up to the corresponding figures shown against the districts

In some inset tables, the urban figures of the concerned districts presented against its district name.

Annexures are not inserted in Dhalai district as the re-casting data of 1991 census are not readily available. As the district carved out from North & South Tripura districts- annexures of the two districts are related with this district (Dhalai).

Distances from R.D. Blocks head quarter to district head quarter as well as Tahsil head quarter to district head quarter are provisional.
