Progress and Heritage of Birbhum

1. In the middle is the front view of the Upasana Griha (Prayer Hall) in Santiniketan. This sanctuary or chapel is a marvellous edifice. The roof is tiled, some painted and some coloured. The glass hall is about 60 feet long and about 30 feet wide. The pavement is of white marble. It has four gates from four sides of the garden. Since 1921 Santiniketan has been the seat of Visva-Bharati, an international university seeking to develop a basis on which the cultures of the east and the west may meet in common fellowship.

2. On the left hand (top) corner shines Bakreswar Thermal Power Project. The project presently consists of 3 Units of 210 MW each. The West Bengal Government has authorised West Bengal power Development Corporation Limited (WBPDCL) to execute another two Units of 210 MW each at Bakreswar Thermal Power Project to meet the nascently growing demand for electricity in the State. Vast deposits of minerals, coal, ceramics, china-clay, quartz and stones, elaborate irrigation facilities from dams and reservoirs all are landmarks of engineering and technical advancement in the district.

3. On the right corner (top) stands the holy shrine of Mother Tara. It is said to be so called because the eye-balls (*tara*) of Sati fell here. Others say that Tarapith is not a *pith*, but that the place owes its sanctity to the fact that the Sage Basistha here worshipped the Goddess Sati in the form of Tara. Tarapith is a stronghold of Tantrik culture.

4. Jayadeva : At the left corner (bottom) stands on the north bank of Ajay river, the temple of Radha Benode, commonly known as Jayadeva's temple. Terracottas depicting Mahisasuramardini and other gods and goddesses are to be found in the temple. Jayadeva (Kenduli) is the birth-place of the Sanskrit lyric poet Jayadeva of the 12th Century A.D. Jayadeva composed the famous lyric 'Gitagovindam' in praise of Radhika and Krishna. A big fair is held here in memory of Jayadeva on the day of *Pous Sankranti* every year. Main attraction of the fair is the congregation of Bauls from distant places in praise of their 'maner manush' (man of the heart).

5. Dance : On the right corner (bottom) is the dance of the Santali women. This ethnic cultural activities - dance, music, art and folk songs flow from the time immemorial with ever freshness.

Calendar of Events

Calendar for Census 2001 upto Houselisting Operation :

December, 1999

(i) Issue of all appointments of Charge Officers, Zonal Sub-Charge Officers and Charge Assistants etc., by the Principal Census Officer.

(ii) State level meeting with all Principal Census Officers to brief them on the different steps to be taken for conduct of Census-2001 to be convened by the Chief Secretary to the Government of West Bengal.

(iii) Meeting to be convened by all the Principal Census Officers at their respective H. Qtrs. to train all the Charge Officers and Sub-Charge Officers and Charge Assistants. The meetings to be attended by Director /Joint Director of Census Operations, West Bengal.

(iv) Principal Census Officers to write to all School Authorities, Govt. Offices, Semi Govt. Offices, local bodies etc., for sending list of officials for appointment as Enumerators and Supervisors.

(v) Collection and compilation of data for Village and Town Directory.

January, 2000

(i) Survey work for preparation of notional maps and layout sketches for formation of House listing Blocks on the basis of 1991 Enumeration Blocks.

(ii) Formation of House listing Blocks on the basis of Survey and Guideline No. 1.

(iii) Collection of list of School Teachers, Govt. Officials etc. from all respective authorities for appointment as Enumerators and Supervisors.

(iv) Preparation of Village Registers at all the Block Charge levels on the basis of data collected on Village Directory.

(v) Regular visit and liaison by the officials of Directorate of Census Operations to the different charges to impart spot training and oversee the Block formation.

February, 2000

(i) 2nd meeting of the Principal Census Officers at the State level to brief them about the House listing Schedules and Instruction Manual.

(ii) Subsequent meeting at the respective H. Qtrs. of all the Principal Census Officers to train all the Charge Officers, zonal Sub-Charge officers etc. on the House listing Schedule, Instruction Manual and House list Abstract – to be attended by Director/ Joint Director of Census Operations.

(iii) Subsequent training at all charges levels on the House listing Schedule, Instruction Manual and House list Abstract to all Zonal Charge Officers, Zonal Assistants by the Charge Officer. Regular contact by officials from the Directorate of Census Operations, West Bengal.

(iv) Completion of appointment of Enumerators and Supervisors and allotment of Houselisting blocks to them.

(v) Despatch of Houselisting Schedules and Instruction Manual, Abstract and other forms from the Directorate of Census Operations to all Districts and receipt/storage of the same at the District level and despatch to all Charge levels, Receipt, storage & giving of locational code numbers to the schedules at each charge levels.

March, 2000

(i) 1st training of Enumerators and Supervisors at the charge level.

(ii) Distribution of Houselisting Schedules, Instructions and Abstract to the Enumerators.

(iii) Completion of assignment of permanent house numbers to the houses by the Panchayats and Municipalities.

(iv) Preparations of the Charge Registers at each charge level.

April, 2000

(i) 2nd training of Enumerators and Supervisors at each charge level.

(ii) Issue of T.A./D.A. amount to the Enumerators/ Supervisors.

(iii) Issue of House-numbering materials to the Enumerators/ Supervisors or advance in lieu thereof.

(iv) Issue of badges/Identity Slips to the Enumerators/ Supervisors.

(v) Training of Enumerators at each circle level/Zone level by the Supervisors/Zonal Sub-Charge Officers.

17.04.2000 to 16.05.2000

(i) Houselisting Operations

(a) First 4 (four) days devoted to survey and preparation of layout sketches as per sketches already prepared at the charge level

(b) Next 20 (twenty) days devoted to house to house canvass of the Houselist Schedule.

(c) Last 2 (two) days devoted to preparation of Houselist Abstract and duplicate Houselist by Enumerators and handing over the same to the Supervisors.

17.05.2000 to 31.05.2000

Collection of the completed Houselist Schedule and Houselist Abstract from Supervisors/Zonal Charge Officers at the Charge level, preparation of Charge Abstract and onward transmission to this Directorate.

Calendar for Enumeration Stage of Census of India – 2001

1. Conference, Training of Principal Census Officers, Additional Principal Census Officer and District Census Officers.
   .....To be completed by 31st July, 2000
2. Training of Charge Officers
   ..... To be completed by 15.08.2000
3. Formation of Enumeration Blocks and despatch of Annexure 'N' by the Charge Officer to the Director of Census Operations, West Bengal.
   ..... To be completed by 31.09.2000
4. Writing of Abridged Houselist based on recarved Enumeration Block and preparation of fresh Charge, Registers after appointment of Enumerators and Supervisors for Each Enumeration Block.
   ..... To be completed by 31.07.2000
5. Despatch of materials to the districts by the Directorate of Census Operations and distribution of the same by the District Census Officers to the Charge Officers
   ..... To be completed 31.10.2000
6. 1st training of Enumerators and Supervisors
   ..... To be completed by 15th December, 2000
7. 2nd training of Enumerators and Supervisors
   .....To be completed by31st December, 2000
8. Field Training of Enumerators and Supervisors and handing over of materials required for Census taking.
   ..... To be completed by 15th January, 2001
9. Population Enumeration to begin on
   ..... 9th February, 2001
10. Population Enumeration to end on
    .....28th February, 2001
11. Enumeration of Houseless Population
    .....To be completed by night of 28th February, 2001
12. Revisional Round to be conducted for updating the information as on 00 hours of 1st March
    ..... To be completed by 1st – 5th March, 2001
13. Receipt of records by district census officers from all charge officers
    ..... To be completed by 07.03.2001
14. Compilation and checking of Population Totals by District Census Officers
    ..... 10.03.2001
15. State wise compilation of PPT by Director of Ceusus Operations and intimation to R.G.I.
    ..... To be completed by 12.03.2001
16. Receipts of records by District Census Officers from all Charge Officers.
    ..... To be completed by 15th March, 2001
17. Intimation of Preliminary Population Figures in respect of the following :
    ..... To be completed by 10.03.2001

(i) Total Population
    Total Male Population
    Total Female Population

(ii) Total Literate Population
    Total Male Literate Population
    Total Female Literate Population

(iii) Total Main workers
    Total Marginal Workers
    Total Non Workers

By the district Magistrates to the Director of Census Operations, West Bengal and Registrar General, India by Telephone and FAX.

Economic Resources

a) Forest Area : Birbhum has 15,926.58 hectares of land covered by forest. Out of the total forest area 6,446.85 hectares of land is under protected forest and 758.88 hectares of land is under reserved forest. From the forest produce the government collected revenue of Rs.1,480,100/- in 2000-01.(District Statistical Hand Book, Birbhum, Government of West Bengal, 2001)

b) Mineral product : The district is rich in mineral products. There is a large source of coal in this area. Apart from that iron ore, yellow stone and limestone have also been found in abundance. Long before iron was extracted at Lohabazar in crude process.

c) Soil & Cropping Pattern : The soil of the Nalhati plain has lateritic soils mixed with recent alluvium. Brahmani- Mayurakshi basin has red sandy and red loamy soils of the older alluvium. The soils are loose and friable. In Suri-Bolpur plain the soil varies from red sandy, red loamy and older alluvium in the south-western to brown and recent alluvium in the central and south-eastern part of the region. The soil of Bakreswar plain is generally laterite mixed with alluvium. The various types of soil as observed in the district and their suitability for growing different crops are described below.

In Bengali language, the brownish clay is called *Entel*. It is wholly unsuitable for rabi cultivation and needs manuring to produce rice. *Metel* is the clay soil, can retain moisture and is capable of producing aman rice and winter crops like gram, wheat, etc. *Palimati* is alluvial deposition. Such soils are very rich and generally are used for growing wheat, potato, vegetables, etc. With adequate irrigation such soils can produce rabi crops in abundance. *Bindi* is friable, loose sandy soil with very little water holding capacity. It can grow rice and is quite capable of growing rabi crops with irrigation. *Doansh* is friable loose blackish soil. It is very rich in fertility and can grow almost all crops. *Bele* is friable loose whitish soil, poor in fertility, oridinarily unsuitable for rabi cultivation, but can grow rice and to some extent some vegetables. *Kankar* is friable loose reddish soil and considered as a very poor type of soil. However, it can grow crop like mahua, bajra, maize, etc. and with irrigation facilities can grow some rabi crops. *Bastu* is rich blackish soil with low water holding capacity which with proper manuring and irrigation, can grow fine rice, wheat, tobacco, sugarcane, etc.

In the Brahmani-Mayurakshi basin Aman paddy is the principal crop. With the help of irrigation Rabi crops are also grown. In Suri-Bolpur plain , along with paddy, wheat, peas, sugar cane and tobacco are grown. The soil of the Bakreswar upland is not fertile but the crops are grown in irrigation schemes of the Mayurakshi canal project and Hingla project. (Source : Regional Divisions of India -A Cartographic Analysis, Series 1, Vol. XXV, West Bengal).

d) Land and land-use pattern : Land is high in the western side near Rajmahal Hills and plain in the eastern side near the rivers. The total area of land is 451,120 hectares according to D.L.R.S., W.B. Out of the total area, 337,530 hectares of land is under Net-cropped area, 16,030 hectares of land is under forest and 6,540 hectares of land is under current fallow. (Source : District Statistical Hand Book, Birbhum, Government of West Bengal, 2001)

e) Tenancy : The State Government is the owner of all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district. In terms of operational land holding, more than 38 percent fall under the marginal (below 1.0 acre) size of holding in the district As per the records of Directorate of Agriculture, Government of West Bengal, till 2000, 17,462.44 hectares of vested agricultural land have been distributed among 140,827 beneficiaries, of which 71.48 per cent belongs to scheduled caste and scheduled tribe community when considered together. (Source : District Statistical Hand Book, Birbhum, Government of West Bengal, 2001)

f) Agriculture : The economic condition of Birbhum district is dominated by agriculture. The land of Birbhum is divided into 13 classes, viz. - (1) *do* (2) *suna* (3) *sali* (4) *ola* or *olan* (5) *jedanga* or *danga* (6) *pat-jami* or mulberry land (7) *jangal bhumi* (8) *paner baraj* (9) *ghas* (10) *sarbera* (11) *bastu* (12) *salghor* and (13) *patit*. Out of these 13 classes of land, mainly the first three classes of land are most fit for rice cultivation. *Do* land has a rich soil, on which aus or aman rice is generally grown, besides gram, masuri, peas, wheat, linseed, khesari, til, sugarcane and occasionally cotton. Suna lands differ from do lands in having a smaller amount of moisture and in being

unsuitable for the cultivation of sugarcane. Other crops that grow on do lands also grow on suna lands, but the quantity of produce is smaller and the cost of cultivation greater. *Sali* land consists of moist muddy land which will bear three crops in the year, viz., a crop of *aman* rice, a crop of khesari, and a crop of *kashta til*. There is double to triple cropping system of Paddy cultivation in the district. The area under Paddy in 2001 is 318.2 thousand hectares of land. (Source : District Statistical Handbook, Government of West Bengal, 2001)

g) Irrigation : Major source of irrigation in this district is the rivers and the streams. Mayurakshi and Hijli projects are helpful for irrigation of the district. Apart from that, the other rivers like, Ajoy, Brahmani, Kuskurni, Dwarka, Hingla and Kopai are also helpful for irrigation of the district. Out of total cultivable land, 273,600 hectares is under irrigation by different sources. There are 21,230 shallow tubewells, 103 deep tubewells and 108 river lift irrigations for watering the field under crop.

h) Animal Husbandry : Birbhum possess a substantial number of cattle population and as a result a considerable number of persons engaged in livestock business. As per last Cattle Census Report and last Livestock Census Report, 1994 there are 994,876 cattle, 60,401 buffaloes, 189, 122 sheep, 736,251 goats and 77,572 pigs in the district. (Source : District Statistical Handbook, Government of West Bengal, 2001)

i) Fishery : As the district contains a large number of extensive river systems, vast network of irrigation canals, reservoirs, tanks, ponds and lakes, different types of fish are still available. Fish is a staple food for the inhabitants of the district. Fishery and allied products provide employment to a large number of persons of the district.

j) Electricity & Power : In the year 2000-01, 223425 units (in thousand K.W.H.) of electricity were consumed. The district Birbhum has 2,473 villages and 5 municipal towns. Out of the total villages, 1,956 villages are electrified. Of these, 1,937 villages are using electricity for domestic purpose, 493 for agricultural purpose, 1,065 for other purposes and 332 for all purposes.

k) Industry : Agro-economy predominates in Birbhum industry. The pottery industry was set up at patelnagar and Muhammad Bazar, which are rich lime stone areas, with Government aids. Sericulture firms and electric cell industry also have been started. Among the other important industries Bakreswar Thermal Power Project, helium plant at Bakreswar, Mini Steel plant at Suri. Gunpowder factories at Chinpai, Sissel firm at Dubrajpur are noteworthy. Sugar mill at Ahmadpur, coconut oil mill at Dubrajpur, small-scale brass and bell metal industries at Dubrajpur are also notable. There are several rice mills in the different places of this district.

District Birbhum is famous for its cottage industry. Sericulture is one of the most flourished among them. The clothes of silk and Tasor of Bakreswar, Tantipara and Illambazar is produced with a good quality and are very popular. The cocoons are even exported from this district. The famous collage industries like jute models, the engraved brass plate designs in Lokepur, the motiffs on wall, terrakota designs, wood works, the designs of batique on leather in Shantinikatan, Bone-China Pottery, embroidery & handloom industry are to be worthy mentioned. The sugar industry of Dubrajpur is also famous for local sweet models like 'batasa', 'kadma' etc.

l) Trade and Commerce : Sainthea town is the main trading centre in the district. Large number of paddy mills & business areas are located in this place. From this place, the agricultural products are exported to different parts of the state & also to different parts of the Eastern states. Suri, Rampurhat & Bolpur are the other important trading & commercial Centres of the district.

m) Transport : In Sainthea, there is a branch line of Andal-Sainthea. The town of Suri, the district headquarters town is situated on this branch line. Bolpur & Rampurhat are the two important railway stations on the Sahebganj loop line of the Eastern Railway. There is also a Nalhati-Azimganj branch line passing through the district. Suri is connected with Barakar & Bolpur by national highway. Bus serveic is also available from Suri bus stand to the different parts of the district. Long distance buses play from Suri, the district town to Durgapur, Siliguri, Barddhaman, Asansol, Kolkata, Maldah, Balarampur and other important towns of the state.

(vi) Gram Panchayat

The three tier Panchayat system has been functional in West Bengal since 1978. In the district at the top there is Zilla Parishad (ZP); the Panchayat Samities (PS) are cotermins with the CD Block. There are Gram Panchyat at the lowest level consisting of elected members from the respective villages. Since 1978 the panchayat system has been performing a vital role for the development

activists from village to district level and fund are placed for implementing the development plans from GP level to district level.

In spite of some shortcomings, the Panchayat System has changed the village economy, social and political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have increased. Due to land reforms and other village development program the productions of agriculture have also increased significantly. As a result the intake of food has also increased.

The district has 19 Panchayat Samities with 169 Gram Panchayats consisting of 2473 villages.

Major Social and Cultural events, natural and administrative developments and significant activities during the decade

Innumerable fairs, festivals and socio-cultural events are held throughout the year in this district having wide admixture of religion, community and culture. The followers of the main faiths and some tribal groups observe their own religious festivals whereas they intermingle in certain *melas* (fairs) and ceremonies. Brief notes on the major festivals and *melas* (fairs) of the district are given below:

Festivals

State level common :

In all the districts of the state certain religious festivals are observed in such a huge magnitude that the impact is cross-cultural involving the overall market economy. Those are :

1. Durga Puja is the most popular annual festival of the Hindus held both at community level and at clan or household level. The four day festival relate to worshiping of the mother god 'Durga' and symbolising the victory of good over evil is held in the month of *Ashwin* (Bengali calender) or September-October. In folk culture this festival also represents the home coming of Mother Durga (Parbati) - wife of Lord Shiva along with her two sons and two daughters to visit her paternal home from their snowy abode of Himalayas. This festival, therefore, also represents a family reunion of members staying at distant places.
2. In north India 'Deepavali' or the festival of lights is celebrated to commemorate the home coming of Lord Rama to Ayodha after fourteen years of punishment as per the epic Ramayana. But in Bengal Kalipuja or Diwali is related to worshiping goddess 'Kali' or 'Shakti' (the power) as another expression of mother cult. This one day event is held on the moon less night following Durga Puja in the month of *Kartik* (mid Oct to mid Nov). Decoration with lights is a part of the observation adding a flavour of the famous national festivity called the 'Festival of light or Deepawali'.
3. Dol Jatra or Holi is the festival of colours. In fact the colours of the spring time nature is celebrated with much grandeur for expressing the feeling of love and friendship as symbolized by the holy conjugation of Lord Krishna and Radha.
4. Rathajatra or the car festival of Krishna, Balaram and Subhadra is held during *Ashadh* (mid-June to mid-July).
5. Id-ul-Fitr is the most popular religious festival of the Muhammedan population in the state. This is observed with a mass prayer (Namaz) and joyful get together after the month-long fasting during 'Ramzan'.
6. The next important festival of the Muhammedans, Idu'z Zuha or the Festival of Sacrifice, is also celebrated with mass prayers and exchange of gifts and sweet meat etc. with a spirit of brotherhood.
7. Muharram is another popular festival of the Mohammedans held on the thirtieth day after Idu'z Zuha to mourn the death of Hassan and Hussain - two grandsons of the Prophet Muhammed in the battle of Karbala. Tajiyas are built and taken in a procession symbolizing the memorial tombs of those two martyrs.
8. The Christmas day on 25th December and Good Friday in April are the two most important religious festivals of the Christian community. 'Christmas day', in particular, is observed with prayers in the church to commemorate the birth of Jesus Christ and the festivity continues till 1st January - the new calender year. The day of Christ's crucifixion is the day to pray again on Good Friday.
9. The Sikhs celebrate their most important religious festival on the occasion of Guru Nanak's birth day, the founder of the Sikhism.
10. The full moon day of May is observed as Buddha Purnima by the followers of Buddhism in different pockets of the State. This is the biggest festival for Buddhists to mark the occasion of the birth of Lord Buddha.
11. The followers of Jainism observe Mahabir Jayanti which is the birthday of Lord Mahabir in the month of April.

District specific :

That the Birbhum district was once inhabited by traditional people, black sturdy men of small stature, is recognised by both tradition and text. The Brahmanda section of Bhabisya Puran also confirms the existence

of a few Vaishnavites besides these sturdy men. In course of time the population received an appreciable Aryan admixture, but to this day a large proportion of the population are of traditional descent, ranking low in the Hindu hierarchy of castes; and during the 19th century the immigration of Santals has largely increased this element.

Hinduism, as a result of this admixture, attained various eclectic forms in the district. On the one hand it is influenced by tantric Buddhism, on the other hand by the folk rituals. This influence is evident in all the forms Hinduism expresses itself - Vaishnavism, Saivism, Saktism etc.

Vaishnavism : The district is a seat of early Gouriya or Bengal Vaishnavism and hallowed with the memory of two great poets, Joydev and Chandidas. The former is the most significant poet of medieval sanskrit literature in whose Git-Govinda the Vaishnav Bhakti cult reached the epitome and the latter is the celebrated poet of early Bengali literature called Vaishnav Padabalis. Though circumstantial evidence proves that Joydev was the court-poet of old and devout King Lakshmansen of the Sen dynasty, his Bengalihood is not unquestioned. In Bengal however it is widely believed that Kendubilva, a village on the river Ajoy in the Ilambazar police station is the birth place of Joydev and an annual festival of the Bauls and Sahajiya Vaishnavites takes place on the Poush-Sankranti day (middle of January) every year in this village now called Joydev-Kenduli. This is a major social and cultural event in the history of the district. Nanur, the birthplace of Chandidas is similarly another pilgrim centre of Vaishnavites, inspiring them right from the days of Chaitanyadev, who was himself inspired by the writings of both Joydev and Chandidas. Although like Joydev, the controversy also centres round Padakar Chandidas's birth place.

Both the creations are poetic and religious compositions of highest-order describing the love-story of Krishna and Radha. The Radha-legend alongwith its erotic exuberance inspired many medieval poets like Joydev, Nimbarka etc. The concept of Parakiya (illegitimate) love, however, that developed in Bengal Vaishnavism was distinct from the medieval concept of Radha-legend and this theological speculation in the early Bengal Vaishnavism became a matter of practice with the Vaishnav Sahajiyas and successfully found an outlet in Chandidas's Padavalis. In attempt to combine the theological aspect of the love-making of Radha and Krishna with that of real men and women the Bengal Vaishnavites evolved this theme. Through this theme the Vaishnav Sahajiyas attributed divinity to life on earth or human love. The delicacy of this theme however misled the Sahajiya Vaishnavs sometimes and reduced the sadhana into morbid practices.

Another major social and cultural event in the district is the congregation of Bauls in Poushmela held at Santiniketan every year. A Baul may be Hindu or a Muslim. The Hindu Bauls are Vaishnavite and the Muslim Bauls are Sufi-istic, both emphasizing the mystic aspect of divine love. Bauls are very free and unsophisticated in their life-style. They have drawn their inspiration from the early Vaishnav Sahajiya movement. They eternally search the beloved of their heart (Maner Manush) and express the thrill of those ventures in their songs.

Saktism : Birbhum district is enriched with as many as five Sakti piths. The cult of the mother-goddess of pre-vedic days appeared as a female creative force in Devisukta, a hyme of the Rigveda (x.125) and later in Markandeya Puran eulogised in the form of Chandi and still later many non-Aryan features (folkish characteristics) assimilated in it and finally the cult got mixed with Buddhist mysticism. It resulted into the worship of the deity under various names and forms throughout the district.

Probably during the earlier part of medieval period a further legend of dismemberment of the body of the deceased Sati was added to the existing legend of Daksha-yagna of the Mahabharat. Whereever the limbs of Sati fell are considered as Pithas. In Bakreswar, it is said, Sati's *manas* (heart) fell, in Attahas Sati's *ostha* (lips) fell, in Tarapith Sati's *netramsatara* (eye-ball) fell, in Nalhati Sati's nala (lower part of the elbow?) fell, in Nandipur Sati's *hara* or *haramsa* (part of the necklace) fell. Analogy of this dismemberment of limbs can be traced with the enshrinement of Buddha's corporal relics in the Buddhist Stupas. All these pithas are famous pilgrim centres of the district. Of the other Sakta deities prevailing in the district, Kali is perhaps worshipped in larger numbers in different names.

Saivism : The male consort (Bhairav) of Sakti is Siva. So, while Sakti in the form of Devi Mahishamardini is worshipped in Bakreswar, it remains as the main centre of worship of Siva who is called Vakranath. A large fair is held there during the Sivaratri festival in February-March every year and besides the Saktas, a great number of Saivites (and Bauls) congregate.

A few more noticeworthy Siva temples are there in the district. At Bhandirban in Suri police station there

is a large temple dedicated to Bhandeswar Mahadev, at Bhimgara in Khayrasol police station there are five Siva temples erected over five *lingams* worshipped as per legend by the Pandavas. On the other side of the river there is another temple over a *lingam* said to have been established by Bhim. The temple of Buro Siva at Paikor in Murari police station is another popular centre of Siva worship. Other old Siva temples are there at Ganpur (Mahind Bazar policae station), Brahamandihi (Nanur police station), Kaleswar, Mallarpur, Mayureswar, Kotasur, Dabuk (all in Mayureswar police station) etc. The siva lingams in all these places have names of their own like Mayureswar, Ekchakreswar, Suratheswar etc. Sivaratri, Gajan etc. take place in almost all the police stations of the district as in other parts of Bengal.

Dharma worship : In his thought provoking article 'Dharma and Serpent worship in Bankura District' published as Appendix A in West Bengal District Gazetters, Bankura, September, 1968 edition, Dr. Ashutosh Bhattacharya outlined the area of influence of religious cult known as the Dharma cult in following way : "In the north it is limited by the northern boundary of Birbhum district, in the east by the river Bhagirathi, in the south by the Ghatal sub-division and the north of the sadar sub-division of Midnapur district and in the west by Purulia district and the western border of Birbhum."(page 207) From the above-noted description the extent of its prevalence in the district can be guessed. Dharma-worship is a specific feature of the Radh area and the set of rituals centring round the cult unknown both in East and North Bengal. This cult originated in the lowest-stratum of the society. Later the influence of the cult not only reached the uppermost layers of the Hindu society but also among the illiterate Muslims and Adivasis. There is controversy over origination of the cult. However, going by the characteristics of the deity, Dr. Bhattacharya has opined that he was a sun-god in the beginning.

In all likelihood the word 'Dharma' is a primitive non-Hindu word which later through various derivations achieved the similar pronounciation of that of the sanskrit word 'Dharma'. Dharma or Dharmaraj Thakur is not worshipped in the form of any image. A piece of natural crude stone is worshipped. In the areas under high influence of Puranic Hinduism the piece of stone representing the deity is explained as tortoise-shaped Vishnu in one of his incarnations (Kurmavatar). The said god is also found associated with Manasa, Chandi or Kali, standing for female energy.

The worship of Dharma is very popular in the district. As worship starts on the full moon day of Baisakh and continues till the full moon day of Sravan throughout the district. Dharmaraj Festival specially takes place in the Suri town. And the worship is organized in great numbers in the rural areas of Karidya, Kalipur, Purandarpur, Langulia in Suri police station, Tantipara in Rajnagar police station, Babrijor, Barra, Sira, Bhadulia in Khayrasol police station, Belia, Iswaripur in Sainthia police station, Barasangra, Kaligram in Ahmadpur police station, Surul in Bolpur police station and Joydev-Kenduli in Illambazar police station either in some impoverished temple located there or in the form of festivals in the name of Dharmarajthakur.

Another interesting feature about the Dharma worship is that the worship is connected to a particular class of people called 'Dom' from ancient time. They are considered to have originated from a Dravidian menial caste or an aboriginal couumunity of a pre-Dravidian stock. During the middle ages they distinguished themselves as a martial community guarding the eastern borders of Bengal in the employment of local chiefs. Later this local Dom army was disbanded by the British. Since they were no good as agriculturists, eventually their emigration to the Adivasi provinces began. With their emigration, the spread of Dharma to other states also began.

In Bengal they are also known as Chandals or Dhangads. They are mainly sweepers and remove night - soil and dead - bodies in some places. Some also make baskets and mats. Some act as musicians and called Bajania Doms. Some have taken to agriculture and many of them work as landless day-labourers. They are mostly Vaishnavites and besides Dharmaraja they also worship Radha and Krishna. A special class of Dom acts as priests of Dharma Thakur and called Dharma Pandits.

Peculiar feature

Brahmadatyi : At a number of places in the district the worship of Brahmadaitya or Brahmadatyi takes place some time every year. The worship takes place at the spot where a tree, as per popular belief, is haunted by a ghost of Brahmin and his worship ensures cure from disease, fulfilment of a desire etc. Such worship centres are to be found in Suri, in Mahammad Bazar, in Bolpur etc.

Jadupatuas : Jadupatuas are a class of people, a mixed one, as by religion they are having the faith in Allah but also worshipping Kali, Manasa and various other Hindu deities. By profession, they are brass-

workers and make trinkets, gongs, weights etc. of that metal, but noted for drawing pictures of persons recently dead and showing there to the bereaved families. The dead persons do not have iris of the eyes who are supposed to roam about in the dark for want of eye-sight. On payment from concerned families they draw the iris and ensure the smooth journey of the dead man to the other world. Their main field of operation is among the tribals. They are to be found in Rampurhat, in Nanur, in Suri, in Mayureswar, in Labhpur, in Nalhati and in Sainthia etc.

THE BAULS OF BIRBHUM

by Prof. Sanat Kumar Bose

A report on Bauls of Birbhum as published in the DCHB of Birbhum, 1961 is reproduced below :

"People belonging to particular religious sect of Bengal call themselves Bauls. Though they are spread all over the State, their number is probably largest in the district of Birbhum. There is hardly any village in this district where some Bauls cannot be seen.

"It is difficult to specify exactly how this relgious sect evolved of how it came to be known by the name of 'Baul'. Opinions differ on these points. But it is fairly certain that it grew as a offshoot of Vaishnavism preached and propagetd by Sri Chaitanya and his disciple in the 15th century A.D. And so far as the word 'Baul' is concerned, it means a person who has given up all material pursuits in order to dedicate himself completely to the task of living in constant communion with God.

Though this sect may be considered to have branched off from the main stream of Vaishnavism, gradually in course of its evolution, it started absorbing and integrating it its philosophy, oher modes of spititual practices (of which Tantrikism is probably the most important one) along with the fundamental tenets of the Vaishnab saints. Having passed through various stages spread over centuries, the Baul philosophy ultimately took a concrete and distinct shape and the Bauls came to be rightly considered as belonging to a distinct religious sect.

"Most of its members come from the so called lower Hindu castes and tribes. It also includes Muslims in its fold, and all its members are treated on equal footing irrespective of their castes. In this sense, it must be admitted that the world outlook of the Bauls is very liberal and is not bogged down by conventional social traditions. It is probably due to this nature of its outlook that this sect was once widely prevalent in Birbhum when a considerable part of its population consists of the so called lower castes and tribes as well as of Muslims.

"The Baul has no written scriptures. His knowledge springs from faith, introspection (i.e. spiritual Sadhana), intuition and the teaching of his Guru. He does not exist outside of his own body and of his own Guru. These two are therefore most important to him from the point of view of his spiritual Sadhana.

"As the name itself implies the Baul is a dedicated person who is entirely devoted to his spiritual practices. These consist of various unconventional processes and methods and through these methods he tries to live in constant communion with his inner self the Brahma. At every stage of his Sadhana, he is guided by his Guru, on whom he has absolute and unconditional faith. He feels himself helpless and lost if he fails to act in accordance with the directions of his Guru or if his Guru refuses to guide him.

"Naturally for a man with such an outlook, the normal social ties and responsibilities hardly exist. In this sense, he cannot be considered a typical social being, and his social or material activities are consciously geared to suit his basic purposes of Sadhana.

"The spritual practices which he adopts are also very difficult from those accepted and sanctioned by the orthdox Brahmanical canons. On their part, the Hindu priesthood and those of the Hindu Society whose outlook has been moulded by the Brahmanical canons and rituals, also do not have any regard for the Baul philosophy. They usually look down upon him and considers his practices to be 'vulgar and offensive'. The upper Hindu castes, therefore, do not accept him in their fold and often he has to face social ostracism.

"But social ostracism cannot distract him from his path. As pointed out earlier, his inner self in his own way. He calls his inner self 'Moner Manus', or Soul's companion. To be able to reach that stage where he may remain in constant communion with his inner self is the ultimate aim of his spiritual life and this stage is denoted by the term "Sahaj Manus" i.e., man in his perfectly free and natural state.

"To reach this state of perfection, one has to pass through various ordeals both spiritual as well as vital. The experiences which he thus gathers in course of his spiritual journey are naturally of immense value to other less experienced Sadhaks. Hence the Baul considers it imperative to communicate his own

experiences to other members of his sect. As a matter of fact, whenever Bauls gather together, they exchange their individual experiences with one another so that every one may benefit from such discussions.

"But they do not discuss problems explicitly because they believe in what is called 'Adhikari-Veda' or discrimination. That is, he does not disclose his inner feelings or mode of Sadhana indiscriminately to any and every one. To do so, he feels, would be harmful both for the Sadhak as well as for the listner. Hence he resorts to the use of symbols and communicates his experiences by means of these symbols, the true spirit of which is realised by only those who take to this form of spiritual practices. Others must remain satisfied with their surface meaning only.

"For the purpose of discussion or for communication his thoughts and feelings, the Baul composes and sings certain types of songs known as Baul songs. These songs represent one of the most distinct and popular forms of folksongs of Bengal, Music is so much a part and parcel of the Baul that he is usually known to the lay man as a wandering minstrel. Whatever view the common people may have about his spiritual practices, his songs always get a ready and keen audience.

The Baul is a typical figure in rural Bengal, and it is not at all difficult to identify him. He is to be seen in his strange attire (of saffron lungi and a long saffron gown running beyond his knees) wandering about here and there or begging alms from house to house, singing all the time to the accompaniment of a simple musical instrument known as 'Aktara' and a kettle drum (Dugi) tied to his waist. He keeps long hairs and long beard and wherever he goes, he takes his favourite musical instruments with him.

"There are many Bauls who make it a point to visit the various fairs and festivals held at different seasons throughout Bengal. In this district, there are some fairs where Bauls can be seen in large numbers. The most important among there fairs is known as 'Jaydev Kendu-Billaw' fair held in the village of Kenduli (in Suri sub-division) on the last day of the Bengali month of *Paus* (middle of January) and which continues for about a week. Here they spend a few days charming other visitors with their songs and dances. They sit in groups and go on singing one after another for days together, with only occasional breaks for food and rest.

"Unfortunately, for some inevitable reasons, this sect is gradually dying out. In course of a few decades hence, probably there will be very few Bauls left to charm us with their inimitable songs and Bengali will deprived of one of her richest forms of folksongs."

Fairs :

Innumerable fairs occasioned by the festivals take place in Birbhum, a brief account of which taken from the District Census Handbook,1961 is given below :

Amongst the fairs, the most popular fair used to take place in Joydeb Kenduli in the Illambazar PS (a gathering of 50,000 people) on the occasion of Paus Samkranti (2nd week of January) which continued for 3 days. Then we can mention Paus Mela at Santiniketan which takes place on the occasion of Dikshya Day of Maharshi Debendranath Thakur in the month of *Paus* (December-January) which continue for 4 days. Another fair takes place at Bakreswar in Dubrajpur PS on the eve of Siv Chaturdashi in the month of Falgun (February-March). The fair lasts for 8 days. In Mandala village of Rampurhat PS people attend in a fair on the eve of Makar snan in the month of *Magh* (January-February). The fair continues for 15 days. In all the three fairs approximately 15,000 gathered as is given in the District Census Handbook, 1961.

The fair that continued for longest number of days used to take place in Kaleswar in Mayureswar PS (30 days) in the month of *Falgun* (February-March) on the occasion of Sivaratri. The fair is followed by Dalima in Murarai PS on the eve of Saraswati Puja which continued for 25 days.

Points to Note

(1) New Towns created subsequent to 1991

Birbhum	Ahmadpur	(CT)

(2) New Village created subsequent to 1991

(11) The Village land area figure in Hectares has been converted from the village(mouza) wise land area in Acres as maintained by Director,Land Records & Survey (DLRS), Govt. of West Bengal.

(12) Villages marked as (P) indicate concerned village is partly Rural and partly Urban or is bifurcated into two CD Blocks.However the total area figure of the villages (mouzas) as per records maintained by DLRS, Govt. of West Bengal has been given here as no record of such bifurcated village area is available with DLRS, Govt. of West Bengal. In case parts of a village fall under more than one CD Block the total land area figures for these parts have been estimated on the basis of plot nos. mentioned in the concerned Govt. order and through interpolation/ extrapolation of the areas of the concerned plots from R.S. maps maintained by DLRS, Govt. of West Bengal.

(13) The area of CD Blocks as shown here is summation of land areas of all villages (mouzas) within the concerned Block and is estimated only.This is because no CD Block wise land area figures are available

with DLRS, Govt. of West Bengal.

(14) In case of statutory and non statutory urban areas, the areas are given here are estimated only. This is because no town wise area figures are available with DLRS, Govt. of West Bengal.The area figure have either been collected from the concerned town authorities or have been calculated from existing village(mouza) wise area figures as maintained by DLRS, Govt.of West Bengal.

(15) The total land area for State/ District as given here is as per area figures obtained from Survey of India.However the totals of / villages / Blocks / Towns as given here are as per records maintained by Directors, Land Records & Survey (DLRS), Govt. of West Bengal.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen
Director of Census Operations,
West Bengal

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

Shri R.K. Ram	Joint Director	Shri P.K. Majumdar	Deputy Director

District Highlights - 2001 Census

1. Birbhum district occupies 13th position in terms of population in the State.
2. It is most rural-based district as it is having 91.0 per cent of the total population in rural areas, whereas the State is having 72.0 per cent of its total rural population.
3. Birbhum has growth rate of population of 18.0 per cent that makes its rank 10th in the State.
4. So far as density (population per sq.km.) is concerned, Birbhum district occupies 14th position in the State (663).
5. The sex-ratio of the district (950) is above the State's sex ratio (934).
6. Literacy rate of the district is 61.5 per cent (lower than the State percentage which is 68.6) thereby making its rank 14th in the state.
7. There are 217 uninhavited villages in the district out of total 2,473 villages.
8. There are 8 villages having population of 10,000 and above.
9. Nalhati (Nalhati-I CD Block) is the most populated village (25,809 persons) and Patharghata (Labpur CD Block) is the least populated village (1 person) of the district.
10. The economy of the district is based on agriculture and 56.8 per cent of the main workers of the district is engaged in agricultural sector.
11. Proportion of female main workers engaged as Agricultural Labourers and in Household Industry is greater than their male counterparts, cultivators category it is lower than their male counterparts and in Other Workers category it is almost equal to that of their male counterparts.
12. Sainthia CD Block has the highest number of villages (230) and Nalhati-II the lowest (48).
13. Chaupahari Jangal village of Illambazar CD Block has the largest area (1,737.9 hectares) and Erazi Kalisankarpur village of Mohammad Bazar CD Block has the smallest area (0.8 hectares).

Important Statistics of the District - 2001 Census

POPULATION		WEST BENGAL	BIRBHUM
TOTAL	Persons	80,176,197	3,015,422
	Males	41,465,985	1,546,633

	Females	22.1	35.6

		WEST BENGAL	BIRBHUM
(iii) Household Industry Workers	Persons	6.2	4.9
	Males	4.0	3.2
	Females	18.7	15.2
(iv) Other Workers	Persons	54.3	38.3
	Males	55.3	38.3
	Females	48.7	38.1
Percentage of Scheduled Caste population to total population			
	Persons	23.0	29.5
	Males	22.8	29.5
	Females	23.2	29.5
Percentage of Scheduled Tribe population to total population			
	Persons	5.5	6.7
	Males	5.4	6.6
	Females	5.6	6.9
Number of Households		15,872,083	598,429
Number of CD Blocks		341	19
Number of Villages			
	Total	40,782	* 2,478
	Inhabited	37,945	2,259
	Uninhabited	2,837	219
Number of Towns		375	6

Note : * 5 villages are spread over in 2 (tw0) CD Blocks, thus raising the total number of villages to 2,478 from the actual 2,473.

Concept of Census Town :

Some administratively rural areas are identified and treated as urban pockets for the purpose of census are called Census Towns on the basis of the following demographic criteria :

(i) A minimum population of 5,000.

(ii) At least 75.0 per cent of the male working population engaged in non-agricultural pursuits, and

(iii) A density of population of at least 400 per sq. km.

The district of Birbhum has recorded continuous growth in its population with the only interruption in 1921 when it declined by 9.4 per cent with rural 11.0 per cent and of urban 154.6 per cent. The highest growth is observed in 1961 (35.5 per cent).

If we consider rural-urban growth separately, the maximum rural growth rate is noticed in 1961 (34.8 per cent) and the maximum in urban area is noticed in 1941 (189.0 per cent) which is a landmark but it had declined to the lowest of -10.2 per cent in 1931.

As already discussed, the lowest growth rate being in 1921 when population declined in absolute numbers for the overall population of the district as well as in its rural components.

Note : While calculating density, area figures have been taken upto two decimal points

Birbhum district is predominantly rural in relation to total population and total area of the district. There are only 6 towns in the district. The density of population of the district is lower (663) as compared to State average (903). Among the CD Blocks, the highest density is recorded by Nalhati-II CD Block (986) while the lowest in Rajnagar (315). There are 2,478 villages (2,259 inhabited and 219 uninhabited) in the district. The highest number of inhabited villages is seen in Sainthia CD Block (216) and highest number of uninhabited villages is noticed in Khoyrasol CD Block (44).

Among the urban units, Rampurhat Municipality with 12,813 population per sq. kilometre is the most densely populated whereas Dubrajpur Municipality with 1,946 population per sq. kilometre is most sparsely populated town.

The above table shows that there are 361 houseless households, with 266 households in rural areas and 95 households in urban areas, consisting of a total population of 1,272 (959 in rural areas and 313 in urban) in the district. It is most likely that they may not have even a plot to construct the house. If some of them may have the plot, they may not have the finance to meet the cost of construction of house. It is a painful fact that a majority of the houseless population live in rural areas and they are unable to arrange even a thatched house. Among the CD Blocks the maximum houseless population live in Nalhati -I (112) followed by Mohammad Bazar CD Block (99) while the minimum is in Suri-II (16). Among the urban units, the highest number of houseless population is seen in Suri Municipality (87) and the lowest in Dubrajpur Municipality (21).

There are 701 institutional households, 556 households living in rural areas and 145 in urban. The total institutional population is 9,645 with 7,244 in rural areas and 2401 in urban areas in the district. Males are numerically much larger than their female counterparts (males 7029, females 2,616). Among the CD Blocks, the maximum institutional population live in Suri-I CD Block (940) followed by Rampurhat-I CD Block (890) and Sainthia CD Block (499) and the minimum in Labpur CD Block (128). Among towns, Suri Municipality has the highest institutional population of 819 followed by Dubrajpur Municipality (597) and Bolpur Municipality (455) whereas Ahmadpur census town has the lowest (43).

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

'A Land of Hill and Dale, wood and water, abounding in scenery interesting to the geologist and lover of the picturesque.The climate also changes: the nights are cool and clear; the damp and fog of Calcutta are left behind,' writes a traveller many years ago on the district of Birbhum in 'The Grand Trunk Road, its localities' (P.18, Pamphlet, octavo, Calcutta). The history of Birbhum is really quite fascinating. Once this area was full of forests, which is reflected in the name 'Birbhum' itself. The 'Mundari' speaking people like the Santals, who were probably the traditional inhabitants of the district, call forest as 'Bir' in their dialect while 'Bhum' means land.

In the ancient period, Birbhum district was the part of a region referred to in the early Jain text 'Acharanga Sutta' in connection with Mahavir, the 24th Tirthankar's extensive travel in the country of Ladh (Radh). The country was pathless and rugged and the terrain was covered with forests and villages scatteredly formed. Ladh or Radh has been stated to be divided in two parts - Suhmabhumi and Vajja (Vajra) bhumi. From the descriptions of the land given in the text it appears that the name Vajrabhumi refers to that part of Radh where it was difficult to travel through dense forest and where it was filled with sand and gravels. This physiognomy of the land fits well with the lateritic portions of Birbhum besides three other districts - Barddhaman, Bankura and Medinipur. Albeit some historians doubt the basis of this contention as the remnants of chalcolithic civilization have been yielded from this tract of land. It is possible that the civilization was confirmed to the areas in and around the particular cities or towns such as those represented by Pandu Rajar Dhibi and Mahisdal while the tribals continued their simple life style in the distant villages and hamlets. Modern Birbhum district might well have been a part of Anga mentioned in the Buddhist text Anguttara Nikäya and Kathasaritsagar. The former's description that the Ganges and the Bhagirathi respectively form the northern and eastern boundaries of Anga and the latter's description of the city Vitankapur in Anga delineates such a boundary which includes the present district. Though the northern Radh's inclusion in the Gupta empire is not supported by definite record, it is a well-known fact that Gour was very much within the Gupta empire till the rise of Sasanka and Birbhum in all probability was part of this Gour. Sasanka had his capital at Karnasuvarna, now finally identified with Kansonapur near Chiruti railway station in Jangipur subdivision of the neighbouring Murshidabad district. The tracts within the boundaries of the modern district of Birbhum lay in the heart of the Kingdom of Gour. Whatabouts of the district of this time is little known because only a small portion of the present district was inhabited by human settlers then. Even in the 11th century Bhavadev Bhatta, a minister of a Varman king, described the tract as arid, full of jungles and sparsely populated. It is not precisely known in which *bhukti* or *mandal* the present district was included. Probably a part of the district along with some parts of the Murshidabad district comprised a *vishaya* called Audambarika*vishaya*. With the death of Sasanka his kingdom had broken up. During next king Jayanga's rule, roughly between AD 550 and 650, the south-east portion of Santal parganas, the whole of north Birbhum and a greater part of the Murshidabad districts were the part of the kingdom.

Matsyanyaya ensued in Bengal after Sasanka's death and in the middle of the 8th century the prakriti that is the general populace elected Gopal to kingship to put an end to *Matsyanyaya*. The present Birbhum district alongwith the Murshidabad district possibly formed the central part of Gour kingdom at that time and it seems probable that during the reign of Gopal's son Dharmapal these areas got incorporated into the Pal empire. During the 2nd half of the 10th century the Pals were not in command over it for the time being, but as per the Tirumalai inscription of Rajendra Chola, the areas comprising the present district having been in the Uttar Radh Zone, must have been under the hegemony of the Pal king Mahipal-I who ascended throne in AD 988. Historically it is well known that the great Chola emperor Rajendra Chola had carried out his northern expedition in the course of 2 years - AD 1021-23, during which he seized Danda*bhukti* (part of the present Midnapur district around Danton) from Dharmapal (not of Pals but another chieftain of the Pals), Dakshin Radh from Ranasur, Vangala from Govindachandra and Uttar Radh from Mahipal-I. However as Prof. Nilkanta Shastri has observed, this campaign "could hardly have been more than a hurried raid across the vast stretch of country" and Mahipal-I, in all probability along with the other kings of Bengal had regained their hegemony over the territories they lost to Rajendra Chola the moment he left.

Mahipal's reign was a profoundly disturbed one and this disturbance continued even in the later period in the history of Pal empire. There was conflict with the Kalchuris, the conflict with the Chalukyas. The Pal hold over Bengal was no longer as firm as it was during the days of Devpal or Mahipal (previous). A number of semi-independent rulers were assuming the style of independent Kings in many places. One such chief was Isvarghosh or Ichhaighosh of Dhekur who might have been one of the earliest known Gop or Sadgop kings. The *mandal*, of which Dhekkari or Dhekur was the headquarters, might have included the southern and south eastern portions of the modern Birbhum district. Another notable feudal chiefdom was of the Karnat - Kshatriya Sens who later formed almost an independent ruling dynasty in Bengal. The fact that some independent or semi-independent rulers held sway over the different parts of the present day district is supported by the list given in Ramcharit by Sandhyakarnandi. It refers to the time of the Pal Emperor Rampal and some of the rulers are Surpal of Kujavati, Bhaskar or Mayagalsimha of Uchchhala, Pratapsimha of Dhekkariya, Narasimharjun of Kajangal and Vijay-raja of Nidravali. It is stated in the text that they were all allies of Emperor Rampal.

After the Pals, the Sens came to be reckoned as the premier political power in Bengal. Samantasen, in all probability, who was the first in the family to establish himself as a local chief and his son Hemantasen had their principality somewhere in the Birbhum district with headquarters situated not far from the Ganges (Bhagirathi). The third head of the family was Vijaysen who, albeit could not conquer Gour, definitely had control over the areas within the present district of Birbhum which once formed a part of the kingdom of Gour. Vijayasen died around AD 1158, and was suceeded by his son Vallalsen. On the basis of information provided by Vallalcharit, which has been accepted as authentic, it can be said that the areas within the present district of Birbhum was under the hegemony of Vallalsen. During the period of Vallasen, the greater portion of the modern districts of Birbhum and Murshidabad formed a *mandal* within Vardhaman*bhukti* under Uttar Radh but during the time of Lakshmansen it was divided into two *bhuktis*. The new *bhukti* was named Kankagram*bhukti* and doubtless included parts of Birbhum and Murshidabad districts. Joydeb, the most significant poet of the medieval Sanskrit literature was the court poet of Lakshmansen and the Bengal tradition associates his place of birth with the village Joydeb-Kenduli within Ilambazar police station in Birbhum district on the river Ajay where an annual festival of the Bauls and Sahajiya Vaishnabs takes place on the Paus-Samkranti day (middle of January).

The so called conquest of Nabadwip (Nadia) by Muhammad Bin Bakhtiyar Khilji had taken place in AD 1201. His route from Bihar Shariff towards Nabadwip was through Santhal Parganas and Birbhum. But this campaign of Bakhtiyar was more of a raid than conquest and sizeable portion of northern Radh was free from his overlordship and remained that even during the period of later Muslim rules. The history of Birbhum of this period is replete with names of many feudatory Hindu chiefs who ruled independently. Some of whom like Rudrasaran Roy or Birsimha still survive in the legends of the district.

The town of Lakhnor, situated within the boundaries of the present district seems to have been an important frontier outpost of the Muslim rulers since the early days of the Turkish conquest of Western Bengal. This Lakhnor is nothing but Nagar or Rajnagar, the old capital of Birbhum, as per O'Malley, who citing reference from Brahmanda section of the Bhavishya Puran shown that the forest-clad tract of the land was divided into two parts - Narikanda and Virbhumi. Narikanda lay to the west of the Bhagirathi and north of the Dwarakewsar river and extended along the panchakut hills on the west and approached Kikat on the north and the other division was Virbhumi.

Lakhnor i.e. Nagar or Rajnagar - the old capital of Birbhum was possibly invaded by the Ganga Emperor Anangabhim III of Orissa during the first half of the 13th century and remained under his control for some time. Ghiyasuddin 'Iwaz Khilzi who ascended the throne of Lakhnawati in AD 1213 and ruled upto 1227 recovered this lost land probably in AD 1214. During next 60 years, from AD 1227 to 1287 as many as 15 rulers held authority in Lakhnawati in quick succession and 10 of them were governors of Bengal sent by the imperial court of Delhi. Even Jadunath Sarkar has been compelled to write that "The history of this period is a sickening record of internal dissensions, usurpation and murders which the court of Delhi after the death of Sultan Iltutmish could not punish. The seizure of the government of Lakhnawati was the highest ambition of the governors of neighbouring provinces, Bihar, Oudh, Kanauj and Kara-Manikpur; because even after the loss of independence, Gaur-Lakhnawati retained its status of a kingdom and its possession alone entitled a Malik to the coveted status of Malik-ush-Sharq or Lord of the East."

During the period (AD 1286-1328) when the representatives of the house of the Balbans of Delhi ruled Bengal, the state enjoyed a fairly long respite from aggressions. Thus rulers therefore concentrated in subduing the small independent Hindu principalities of the district.

Ilyas Shah ascended to the throne of Lakhnawati in 1342. During his reign Sultan Firuz Tughlaq made an invasion of Bengal, but in effect, the victory was infructuous. The Bengal Sultan was not dislodged from his throne and the dynasty continued to rule till it was overthrown by Raja Ganesh (AD 1409-1410). After the return of the later Ilyas Shahis to power, we find two inscriptions in Bara (Balanagar) in the district of Birbhum, one dating from the reign of Nasiruddin Muhammad Shah (AD 1450) and another of Ruknuddin Barbak Shah (AD 1459) which show that this area was under their rule. During the next era, i.e. the Husain Shahi period, the eastern portion of the district near the Bhagirathi river was subject to Muslim rule. Traces of an old Badshahi Road which ran from Lakhnawati to Mangalkot (just across the south-eastern border of the district) and then to Burdwan and Satgaon are still to be found and near it an Arabic inscription has been found referring to the digging of a well by King Husain Shah in AD 1560.

The route taken by Sher Shah when he advanced to capture Bengal was through the present district of Birbhum. And in March 1538 when Humayun was pursuing the army of Sher Shah in his bid to capture Gour, a large contingent of Sher Khan's army regrouped at a place now called Sherpur in modern Birbhum district. According to Blochmann, settlement of some Pathan jagirdars with their standing militia were arranged before and after the time of Sher Shah to protect the border against the wild tribes of Jharkhand (Chutia Nagpur) from which later the great Muhammadan Zamindari of Birbhum was formed.

Blochmann has also given a description of the layout of this tract of land as it appeared in Todar Mall's rent roll for the Mahals. This mahals conjointly formed a Sarkar during the time of Akbar. Under Akbar, the district as now constituted was divided among 3 Sarkars, namely, a northern section in Ardumbar, a central-eastern section in Sharifabad, and the rest of the district in Mandaran. The Sarkar Mandaran included parganas Birbhum and Nagar, the last of which had a large revenue and evidently had an extensive area. In Sarkar Audumbar one mahal with a considerable revenue was called Mudesar, supposed to be Mayureswar on the bank of the Mor river with a well-known temple.

The empire founded by Sher Shah did not last long and the Sur dynasty came to an end in AD 1564. It was replaced by the Karranis. During the reign of Daud Karrani Mughal-Afgan strife broke out again and Akbar's general, Munim Khan invaded Bengal in AD 1574. Daud fled to Orissa by way of Satgaon (in Hooghly) using the old Badshahi road that ran through Birbhum. As a result of this invasion no Pathan power was left in Bengal, but no Mughal authority either was established in any part of Bengal including the wilds of Bankura - Birbhum.

Indeed in the last quarter of the 16th century there was no trace of Mughal central authority in this tract of land. The decisive battle that wiped out the Afghan reign was fought within the borders of the present district, near Sherpur Atia (12 February, 1601) which is situated in the east of the district. But then the effective control of the Mughals was confined to very narrow limits, within and around the capital city of Rajmahal set up by Man Singh. At the beginning of Jahangir's reign there were three prinicipalities, one of them was Bir Hambir who held sway over Birbhum and Bankura. Like two others, Bir Hambir had also initially tendered nominal submission to the Mughal commander Islam Khan. The submission was formalised in 1608. Thus it seems that this area and the jungle terrain of the western border of Bengal continued to enjoy some measure of independence during the time of the Great Mughals.

The district of Birbhum came under the Mughal central authority in entirity only from the time of Shah Jahan. When Prince Shuja revolted against his father and Mir Jumla was sent to subdue him, he outflanked Shuja by a detour through Jharkhand with the assistance of a Zamindar of Birbhum named Khwaja Kamal Afghan, and passed through Suri. Then on account of the false rumours of Dara's victory at Ajmer he steadily advanced towards Rajmahal and occupied it. The entire country on the west bank of the Ganges from Rajmahal to Hooghly now passed into the hands of the Mughals.

During the rule of the later Mughals, the Pathan Zaminders of Birbhum became powerful local chiefs, and appeared to have tendered only nominal allegiance to the Subahdars of Bengal. The life of the area was relatively peaceful during this period. This peace was again broken in AD 1741 owing to the Maratha invasion and the Maratha plunder continued till the middle forties of the 18th century. The border principalities of Birbhum and Vishnupur fell into the hands of the Marathas and the once powerful frontier houses were reduced to

poverty and their tenantry fled from a country in which the peasant had become a mere machine for growing food for the soldier.

The ruler of Birbhum at the beginning of the 18th century was Asadulla Khan. The last in his line was Asad-ul-Zaman who got on the wrong side of the British immediately after the Battle of Plassey and it caused the dissolution of the Birbhum Raj. The early period of British administration in Birbhum was a time of trouble and uncertainty. Five years after East india Company secured Diwani of Bengal, Bihar and Orissa from Mughal Emperor Shah Alam II in 1765, the district was devastated by famine (Bengali year 1176) - infamous in the history of Bengal.

From December, 1769 to September, 1770 - it was a one year famine caused by the scanty spring harvest in 1769. Nature tried to compensate the loss by providing in plenty next year but to a silent and deserted province. Before the end of May, 1770 one-third of the population was officially calculated to have disappeared and it was estimated that one-half of the cultivators and payers of revenue would perish with hunger. In the words of W.W. Hunter, "All through the stifling summer of 1770 the people went on dying. The husbandmen sold their cattle; they sold their implements of agriculture; they devoured their seed-grain; they sold their sons and daughters, till at length no buyer of children could be found; they ate the leaves of trees and the grass of the field; and in June, 1770 the Resident at the Durbar affirmed that the living were feeding on the dead." On February, 1771, Mr. Higginson, the supervisor of Birbhum reported the dreadful situation to council and begged it to allow him to suspend the collection of revenue arrears from the remaining poor ryots which the council did with much reservation and with an expectation of recovering the balances in the approaching prosperous year.

In the year 1785 the Collector of the company posted in Murshidabad complained of some troubles in the adjoining areas and following his complaint the district along with Vishnupur was formed into a separate district. In 1793 another change took place and Vishnupur was separated from Birbhum and annexed to Burdwan (Barddhaman). The district was reinstated in 1820 as a separate district and restored to its former size, with the exceptions of a few estates which were transferred to Jungle Mahals. The area of the district considerably diminished again in 1855, when the area known as the Santhal Parganas was separated following the Santal Revolt and the western highlands of the district were transferred to the newly created district of Santhal Parganas, which consisted mostly of Santal settlements. In 1879, the last change took place in the district, when Barwan, with an area of 108 sq. miles was transferred to Murshidabad, and Rampurhat and Nalhati were transfered to the district of Birbhum.

THE SANTAL REVOLT OF 1855

The Santal or the hill tribe of Birbhum forms, in all essentials, a distinct ethnical entity and once inhabited the whole western frontier of Lower Bengal, from within a few miles of the sea to the hills of Bhagalpur. W.W. Hunter, who wrote 'The Annals of Rural Bengal', estimated them as approaching two millions in number. Today their number in West Bengal alone is 2,280,540. The largest concentration of the Santals is to be found in Jharkhand (erstwhile Bihar) today and they are also to be found in Orissa and Tripura. In physical features, a Santal is short or below medium height, have a long head shape, a broad facial profile and a short and moderately broad nose. The traditional occupation of the Santal community was hunting and gathering. Of late the tribe took up agriculture and developed, in the words of Hunter, "crops of his own, implements of his own, his own system of cultivation and an abundant vocabulary of rural life." It is a simple-minded peace loving 'not easily' violent tribe with happy disposition. Though they have their own society, they are courteous and hospitable to the outsiders without behaving servile. Moreover, when it requires to dealing with them, they are as honest as they are with their own people. In many respects, they are more civilized than us. Caste system is unknown among the Santals and they traditionally follow the 'one-wife' system.

Why and how this 'not easily' violent race rose in a body in revolt in 1855 against his tormentors - the mahajans, the banias, the landlords, the corrupt amlas, the police and the negligent sahibs is therefore a question. It all started with the infamous famine of 1770 ('Chhiyattarer Manwantar' in Bengali folk tradition) the appalling spectre of which haunted Lower Bengal for almost a century. Before the commencement of 1771, one-third of a generation of peasants were erased from the face of earth in every district and the depopulation followed by a proportionate area of the land falling out of tillage and for the first 15 years after the famine, the depopulation steadily increased. The land remained so much so depopulated and untilled that in 1789 Lord Cornwallis had to pronounce one-third of the company's territories in Bengal to be 'a jungle inhabited only by wild beasts'.

Until 1790, these western highlanders, when they had gathered in the rice crop in every winter, used to move down to these jungles in the plains and after three months' excellent hunting sport they returned in their own villages to celebrate their February festival. Since 1790, they were also hired to rid the lowlands of the wild beasts when the Permanent Settlement invoked a general extension of tillage. This time the Santals found their sport more profitable than it was in their free-moving days and gradually they were induced to accept regular employment during the cold season on the plains. To be exact, from the year 1792 the Santals appeared as the day-labourer of lowland Bengal. To this, another temptation was added. A large surplus of excellent land still remained and the Santals, having moved down to the plains reclaimed hundreds of rural communes and gave a new land tenure to Birbhum.

By 1795 John Cheap, the company's Commercial Resident introduced indigo manufacture in the district and the venture was carried forward by David Erskine who established a factory at Surul and subsequently at Illambazar. His firm was known as Erskine & Co. In 1872, this gentleman was in possession of 8 factories in Birbhum and 10 beyond the district boundary. But the indigo soon became an unpopular crop with the cultivator. No Hindu with a little farm and a homestead of his own was ready to be the hired workman of foreign employers. From this specific state of things, the Santals of the west afforded Englishmen the means of escape. About 1835 Santals alongwith some other aboriginal tribes moved down in little bands towards the east- willing to work at anything to eke out a living, for, in the hills and arid lateritic tracts of Western Bengal the limits of cultivation were reached. Every winter, after the indigo was packed, numbers of the labourers visited native villages and returned accompanied with some relations who looked forward to the wages of the spring sowing season.

This is how the Santal colonies within the ring of masonry pillars became the part of Lower Bengal, more so of Birbhum district. Herefrom the tale of misery of the Santals took a pathetic turn, the vivid description of which is provided by W.W. Hunter in his famous 'The Annals of Rural Bengal' and it would be best to quote from the book:

"Along the skirt of the Santal country, from the ring fenced colony of the north to the highland valleys of Beerbhoom, Hindu hucksters settled upon various pretences, and in a few years grew into men of fortune. They cheated the poor Santal in every transaction. The forester brought his jars of clarified butter for sale; the Hindu measured it in vessels with false bottoms: the husbandman came to exchange his rice for salt, oil, cloth, and gunpowder; the Hindu used heavy weights in ascertaining the quantity of grain, light ones in weighing out the articles given in return. If the Santal remonstrated, he was told that salt, being an excisable commodity, had a set of weights and measures peculiar to itself. The fortunes made by traffic in produce were augmented by usury. A family of new settlers required a small advance of grain to eke out the produce of the chase while they were clearing the jungle. The Hindu dealer gave them a few shillings worth of rice and seized the land as soon as they had cleared it and sown the crop. Another family, in a fit of hospitality, feasted away their whole harvest, and then opened an account at the grain-dealer's who advanced enough to keep them above starvation during the rest of the year. From the moment the peasant touched the borrowed rice, he and his children were the serfs of the corn merchant. No matter what economy the family practiced, no matter what effort they made to extricate themselves; stint as they might, toil as they might the Hindu claimed the whole crop, and carried on a balance to be paid out of the next harvest. Year after year the Santal sweated for his oppressor. If the victim threatened to run off into the jungle, the usurer instituted a suit in the courts, taking care that the Santal should know nothing of it till the decree had been obtained and execution taken out. Without the slightest warning the poor husbandman's buffaloes, cows, and little homestead were sold, not omitting the brazen household vessels which formed the sole heirloom of the family. Even the cheap iron ornaments, the outward tokens of female respectability among the Santals, were torn from the wife's wrists. Redress was out of the question : the court sat in the civil station perhaps a hundred miles off. The English judge, engrossed with the collection of the revenue, had no time for the petty grievances of his people. The native underlings, one and all, had taken the pay of the oppressor : the police shared in the spoil." (pp.158 - 159)

"Up to 1854 the Santal colonies within the ring-fence had only the choice of continuing the serf of the Hindu usurer, or returning to the sterile, over-populated country whence he had come. In 1848 three whole townships accepted the latter alternative, and, throwing up their clearings, fled in despair to the jungle. But the majority preferred the life even of a serf on the fertile lowlands, to exposing their women and children to the permanently half-starved existence of the forest, and accepted that mild form of prædial slavery which has been an immemorial institution in Bengal. Until 1860

no penal provisions existed against it and indeed the last preceding law, by regulating its incidents and refusing it the support of the courts, had acknowledged its existence. Many of the Santals had no land or crop to pledge for their little debts. If a man of this class required a few shillings to bury his father, he went to the Hindu usurer for it; and having no security to offer except his manual labour and that of his children, he bound over himself and family as slaves till the loan should be repaid. The few pieces of silver were speedily spent on his father's pyre, the funeral feast was eaten, and next morning the unhappy household started for the usurer's residence and delivered themselves into slavery. The master neither expected nor wished for the repayment of the debt, and took care, by working his slave every hour of the day, to leave him no leisure for earning a peculium with which to buy his liberty. The only inheritance he had to leave to his children was the debt, at first a few shillings, but now grown by compound interest at 33 per cent. into many pounds. If the slave refused to give up his whole time, the master stopped his food; if he worked for other people, the master took out legal execution against his person, and soon brought the ignorant creature to his knees, by artfully exaggerting the terrors of the jail." (pp.160 - 161)

As Hunter said, the British administration was 'engrossed with the collection of revenue' and the East India Company which made its dividends out of these revenues looked at the government in the light of a mercantile undertaking. With the extension of cultivation they enhanced the land-tax and the revenue rose to their utmost satisfaction. There was no need for them to go in for any in-depth study of the socio-economic condition of the Santals. On the contrary they were happy to think that they have converted a hundred thousand wandering savages into settled agriculturists. Therefore when their settled agriculturists revolted, they failed to make out any head or tail of the revolt. The taxes came in as usual, the administration continued cheap and practical as before, then what sort of redress the Santals could be asking for? And the Santals under the leadership of two brothers, Sidu and Kanu, natives of Bhagnadihi (afterwards joined by their other two brothers, Chand and Bhairab) first approached the English Governors for justice in vain, next petitioned the chief authority in vain, then the English Superintendent in equal vain. Thereupon "the Santal leaders in despair had recourse to the Commissioner - a high English official in charge of a division of the province - and it is said, plainly told him that if he would not redress their wrongs, they would redress them themselves." When the Commissioner too failed to understand what they wanted, they took to the last recourse and sent the Emissaries, bearing the national Sal branch, to every mountain valley and the Santal people, obedient to the signal, gathered together in vast masses with invariable bow and arrows in their hands and the Revolt begun. In the following paragraphs, taken from the District Census Handbook, Birbhum, 1961, the revolt is chronicled.

"In the beginning of July 1855 the Santals moved across the border and sacked Palsa in the north of the district, but fell back on the advance of a force of 400 men of the 7th Native infantry, which advanced from Berhampur, and next day defeated them at Maheshpur. By the 20th July Mrityunjaypur and Narayanpur to the north-west of Rampurhat had been sacked and by the 23rd Ganpur and other villages had been destroyed. Further south the rebels overran the country from the Grand Trunk Road in Burdwan, a few miles across the south-western boundary, to Sainthia in the heart of the district. The country was panic-stricken, and Suri at one time was threatened with an attack. Major Vincent Jarvis, who was ordered up with his regiment from Barrackpur, was, on his arrival at Burdwan, ordered by the Commissioner to push on direct for suri, as it was in instant danger of attack. 'We marched', he wrote, 'for two days and a night, the rain pouring the whole way, and my men without any regular food. As we came near to Suri, we found panic in every village. The Hindus fairly lined the road, welcoming us with tears in their eyes, and pressing sweetmeats and parched rice upon my exhausted sepoys. At Suri we found things, if possible, worse. One officer kept his horse saddled day and night, the jail seemed to have been hastily fortified and the bulk of the coin from the treasury was said, I know not with what truth, to be hid in a well.' On the western border parties of the 2nd, 37th and 56th regiments were engaged at various places with the rebels, whom they defeated with severe loss; but the small detachments posted at distant places in a wide range of territory were unequal to the task set them. The rebels obtained possession of Nagar and Afzalpur, but after some further fighting were compelled to evacuate them and retire across the border to Kumrabad.

"Towards the end of July General Lloyd was placed in command of the force employed against the Santals, and shortly afterwards Colonel Bird was appointed, with the rank of a Brigadier, to the special

command of the troops in Birbhum and Bankura. All the troops available were hurried up, and by the 17th August quiet was for a time restored to this part of the country. 'The villagers', wrote the Magistrate of Birbhum on the 24th August, 'have returned to their homes, and the husbandmen are engaged in the cultivation of their land as usual. The Santals are nowhere to be found, having retreated to a place some thirty miles off in another district'. In this month a proclamation was issued promising that all rebels who laid down their arms would be pardoned, except the leaders and those proved to have committed murder; but this offer was regarded as a confession of weakness and the flame of rebellion again blazed up. By the end of September the Magistrate of Birbhum reported that the whole country from four miles west Nagar up to Deoghar was in their hands; the daks were stopped, the villagers had fled from their homes. One large body of Santals was encamped to the number of 5,000 to 7,000 at Tilabuni, six miles west of Suri, where they dug tanks, strengthened their position by earthworks, and made preparations for celebrating the Durga Puja. They were, it was reported, only waiting for another body of about 3,000 Santals to join them before advancing to attack Suri, and had given notice of their intention in a characterstic way. 'They sent us in what is called in their language a *dhara* or missive - viz., the twig of a sal tree with three leaves on it, each leaf signifying a day that is to elapse before their arrival - a few days ago, which was brought by one of the Deoghat dak runners, whom they seized and sent back for the purpose.'

"At length in November 1855 martial law was proclaimed, and a cordon of fourteen thousand men, pushed back the Santals from the open country. In six weeks nothing remained but to sweep the jungle clear of stragglers and before the end of the cold weather (1855-56) the rebels had tendered their submission.

"The above account on the Santal rebellion has been taken from O'Malley and presents only one-sided view of the whole thing. Mitra very correctly observes in his District Handbook of 1951, 'An account given by O'Malley of the Santal Rebellion requires to be counterbalanced by W. W. Hunter's account from the Annals of Rural Bengal. Neither O'Malley nor Hunter has paused to probe into the causes of the Santal Rebellion. O'Malley did not seem to like the impetuosity of the Santals and Hunter was very rightly full of sympathy for the Santals. But neither found it necessary to bring out the real cause of the rebellion which arose out of the Permanent Settlement. The Permanent Settlement and the era before it carried desolation and misery and poverty throughout the land. The newly settled zamindar was assessed up to a hypothetical10/11th of the *hastabud* for all lands in his possession, most of which was desolate full of dense jungle and without cultivation. The reclamation of these tracts fell to the lot of the Santal, whom the zamindar perforce had to rob to pay Paul, the East India Company. The East India Company, satisfied to receive the revenue, did not trouble itself to find out how the trouble was being passed on. The Company was content so long as the Diku was there for oppression and the Santals moved about in vain in search of redress. The Company did not raise a little finger to restrain the Diku in order to safeguard the simplest needs of the Santal. It was happy so long as the revenue flowed well. But when the Santals rose in a body and tried to destroy their immediate oppressor, the Diku, the Company found it necessary to protect the Diku to ensure the flow of revenue. It was only after a major catastrophe had happened that the Company was brought to its senses and took, certain measures for the preservation of the Santal. But the essential measures whereby cordial relations might be restored between the Diku and the Santal were deliberately neglected to perpetuate the difficulties and friction."

Administrative Set-up

(i) Region of the state where district is located :

The district is situated in the Barddhaman Division. The district is bounded by the Santhal Parganas district of Bihar now 'Jharkhand' on the north and west, by the districts of Barddhaman and Murshidabad on the east and by Barddhaman on the south.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

At present there are three Sub-Divisions namely, viz. (1)Rampurhat (2) Birbhum Sadar (3) Bolpur. There are 18 Police Stations in the district. But in 1991 census, there were 17 Police stations in the district. (1) Murarai (2) Nalhati (3) Rampurhat (4) Margram (5) Mayureswar (6) Muhammadbazar (7) Rajnagar (8) Suri (9) Nanoor (10) Panrui (11) Sainthia (12) Labhpur (13) Bolpur (14) Illambazar (15) Dubrajpur (16) Khoyrasole and (17) Kankartala. One additional Police station was formed namely, Sadaipur Police Station through bifurcation of Dubrajpur Police station before 2001 census. There has been no change in the jurisdiction of the physical boundary of the district during the last decade, i.e. 1991 to 2001.

The district has 19 Community Development Blocks viz. (1) Murarai-I (2) Murarai-II (3) Nalhati-I, (4) Nalhati-II (5) Rampurhat-I (6) Rampurhat-II (7) Mayureswar- I (8) Mayureswar- II (9) Mohammad Bazar (10) Rajnagar (11) Suri-I (12) Suri-II (13) Sainthia (14) Labpur (15) Nanoor (16) Bolpur-Sriniketan (17) Illambazar (18) Dubrajpur, and (19) Khoyrasol.

(iii) Total number of Towns/Villages etc. :

Total number of urban units in Birbhum is 6, out of which there are 5 municipalities i.e. Statutory Towns viz. 1) Bolpur,2) Dubrajpur, 3) Rampurhat, 4) Sainthia, 5) Suri and 1 census town namely Ahmadpur. Regarding urban areas the number of municipalities remains the same in 2001 as in 1991 at 5. But the number of census towns (NM in 1991) has decreased from 2 in 1991 to 1 in 2001. In other words, Bakreswar Tourist Centre Township (NM) and Nalhati (NM), the two census towns of 1991 have been declassified as rural in 2001 census and a new census town namely Ahmadpur (CT) has been created.

The district has 19 Panchayat Samities with 169 Gram Panchayats consisting of 2,473 villages. The number of villages have increased from 2,464 in 1991 to 2,473 in 2001 i.e. 9 villages have been declassified from the urban frame and added to the rural frame.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilisation. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas. The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

As already stated, there are 5 municipalities in Birbhum, viz. 1) Rampurhat (2) Sainthia (3) Suri (4) Dubrajpur and (5) Bolpur. In Birbhum, excepting the Suri municipality (1876) all other municipalities were established after independence, i.e., Rampurhat and Bolpur both in 1950, Dubrajpur in 1984 and Sainthia being the latest in 1987.

Civil Administration :

The Civil Administration of the district consists of District Magistrate as the Principal Executive with three Sub- divisional Officers being the sub-divisional heads and one Block Development Officer for each CD Block. Under the police administration, Superintendent of Police is the head of the district and under him there are three Sub-divisional police officers with Inspector in charge/ Officer in charge in each police station. At the District Head Quarter District Judge is the head of the Judiciary. The subdivisional Judicial Magistrate sits in the Courts at the sub-divisional level.

Physical Features

(i) Location and size

The Birbhum district extends between $23^0 32' 30''$ and $24^0 35' 40''$ North latitudes and between $87^0 05' 25''$ and $88^0 01' 40''$ East longitudes. The district is bounded by the Santhal Parganas division of Bihar now 'Jharkhand' on the north and west, by the districts of Barddhaman and Murshidabad on east and by Barddhaman on the south. Birbhum is like an isosceles, triangle in shape. It is the 8th largest district in West Bengal, covering about 4,545 sq. km. area.

(ii) Physiography :

Geographically this district is a part of ancient "Radh Bhumi" of Bengal, which indicates barren land and characterized by red and graveled soil. Its topography is very much similar to the Radh areas of Bankura and Medinipur districts. The western portion is the descent from the Chotanagpur plateau to the south and south-east. The land surface of the entire area of the district is broken by a succession of undulations. The general slope of this district is from northwest to south-east. The river valleys, in the south and south-east become shallow and gradually merge into the broad alluvial plains of the Gangetic delta. The land soil of Birbhum is composed of sedimentary rock. However, the river basin of 'Ajoy' is plain, consists of soft soil, thus favourable for cultivation.

Topographically the district has been divided into four sub-micro regions viz.

1. Nalhati plain - The region extends on the northern portion of the district and characterised by some ridges that are at places as high as hills along the western boundary with state of Jharkhand. The ridges are the extension of Rajmahal hills. The maximum heights are from 70 to 80 metres. The larger portion of the region is plain area. The general slope is towards north and north-east as evident by the flow of the rivers. The region is drained by the two prominent rivers viz. the Pagla and the Basoli.

2. Brahmani-Mayurakshi Basin - The region lies between the Brahmani river on the north and the Mayurakshi river on the south. It has been characterised by its uneven surface configuration. The region is sloping from west to east. But the Dwarka takes a north-easterly bend and the Mayurakshi south-easterly direction in the Muhammad Bazar and Mayureswar areas. The land sinks into undulations on the south of the Mayurakshi. However, some plain areas are found further eastward. The land between the Dwarka and the Mayurakshi and to the extreme south-east of the PS Mayureswar become flat and are found in large water bodies.

3. Suri-Bolpur Plain - The region covers the south-eastern part of the district. It exhibits the upland topography sloping from north-west to south-east. The Sal and Bakreswar rivers drain the region from north-west to south-east. The right bank of the Sal river displays severe erosion and resulting into bad land topography. In the south-east, the upland ridges slope gradually and the valley portions become shallow and form the broad alluvial plains of the Gangetic delta. The Ajay river, to the south of the region, dominates the landscape with its shallow and sandy beds. There lies the cultivated land with tanks and other water bodies mainly to the north of the Sal river.

4. Bakreswar upland- The region extends over the western portions of the district from Khoyrasole to Muhammad Bazar and Rampurhat. This portion is the heavily dissected plateau of Santhal Parganas projecting south and south-westward. On the west the highlands are located on the hard impervious crystalline rocks. The undulations rise into high ridges near the western boundary capped by laterite and separated by wide valleys. In the region the elevation of the ridges are ranging from 78 to 110 metres above the mean sea level. The region is drained by the rivers such as Dwarka,Mayurakshi, Bakreswar, Ajay, Sal and Hingla flowing towards the east and south-east. (Source: Regional Divisions of India - A Cartographic Analysis, Series 1,Vol. XXV,West Bengal)

Flora & Fauna

Flora

Botanically the district can broadly be divided into two zones. The first zone comprises the undulated high lands along the western part of the district. The vegetation of this region shows semi-arid nature. The second zone consists of the flat alluvial plain in the south and east of the district. The vegetation of this tract is characteristic of the alluvial rice plain of Gangetic West Bengal (West Bengal District Gazetteers, Birbhum,). Round the villages are the usual clumps of mango trees, palm, bamboo and other trees, among which species of the fig family, jack and arjun

are often present. On the borders of the Santhal Parganas the remains of forest are found containing Sal, Pial, Shau, Kend and Mahua.

Fauna :

The carnivora of the district consists of leopard, bear, wolve and other smaller species. The ungualata are represented by wild pigs. Leopards are not numerous, but are found in some jungles. Bears are very rare, but sometimes they migrate from the neighbouring hills in the Santhal Parganas (now in Jharkhand). Wolves are sometimes found in small patches of jungle. Wild pigs are found in isolated tracts, especially along river banks and in jungles traversed by watercourses. Besides the above, the long tail apes called hanuman, otter, hare, fox and jackal are common.

The game birds of the district chiefly consist of patridge, green pigeon and various water-fowls. The grey patridge is plentiful, and green pigeons may usually be seen on the highest branches of pipal trees when they are bearing fruit. Among the water-fowls the comb and Brahmani ducks are found in abundance. Geese are cold weather visitors, coming in large flocks to feed on the rice crops. Snipes are found in great numbers in the swampy places and in the beds of rivers, and are most common in the east of the district.

The principal rivers of the district, contain rui,katla and sometimes hilsa. Tanks, which are numerous in the district, are stocked with rui,katla,mrigel, magur,koi and other small fish. (Source : West Bengal District Gazetteers, Birbhum, 1975 edition)

(iii) Drainage :

The district is drained by the rivers viz. Mayurakshi, Ajoy, Brahmani, Dwaraka, Hingla, Kopai and other streams. During rainy season, the water channels overflow their banks and inundate the surrounding areas.

The Ajay rises in the Chotanagpur hills of Jharkhand, touches the south-west corner of the district and follows a winding course in an easterly direction, forming the district boundary. The river takes a north-easterly bend at the extreme southeastern angle of Birbhum and enters Barddhaman and falls into the Bhagirathi near Katwa. The river receives Kunur Nala from the right bank. The river confluence with the Hingla at an altitude of 230 feet in the Dubrajpur police station. Then the river turns south easterly till it receives Fumuni Nala from the right at an altitude of 184 feet just below Joydeb Kenduli. In Bolpur and Nanur thanas a Kana Nala and a Kandar Khal with an intricate network are part of the Ajay system.

The Mayurakshi enters Birbhum from the Santhal Parganas (now in Jharkhand) and flows through the centre of the district from west to east, passing two miles north of Suri and forming the southern boundary of Rampurhat subdivision. It leaves the district and joins the Dwaraka, which itself is a tributary of the Bhagirathi. All the distributaries of the Mayurakshi take off from the left bank. In the eastern portion of its course it gives off distributaries known As Kana and Manikarnika Nalas.

The Hingla enters Birbhum district from the Santhal Parganas and gradually approaches the river Ajay. The river unites with the river Ajay at Chapla in Dubrajpur then.

The Bakreswar rises at the hot springs of the same name west of Suri, and after following a zig zag course eastwards, and receiving one by one the waters of almost all the rivulets of South Birbhum, joins the Mayurakshi beyond the eastern boundary of the district.

The Brahmani a river enters the district at Narayanpur bisects the Rampuhat subdivision and passing under the railway two miles south of Nalhati falls into the Dwaraka in the Murshidabad district.

The Dwaraka is a narrow non-perennial stream of considerable length. Originating from the Ramgarh hills of the Chotanagpur plateau the river describes the district boundary of Birbhum flowing south-east. In its southeasterly course the Dwaraka receives numerous small tributaries of which mention might be made of Bamini Nala and Kuila Nala. In its northeasterly course the Dwaraka receives many tributaries on its right bank. The Gharmora and the Chila nalas combine and the united stream falls into the Dwaraka. In its easterly course also the Dwaraka receives a few tributaries from the south. The Dwaraka unites with the Brahmani and goes into Murshidabad district.

Main water features such as tank, lake reservoir etc.

There are several swamps in the northernmost part of Birbhum, most important of them being Pahankuri, Chatankura and Rajchandrapur Bil. On the Dwaraka-Mayurakshi interfluve and extreme south-west of Mayurakshi interfluve and extreme south-west of Mayureswar PS, two large water bodies occupy a low lying depression. Several marshes are found on the right bank of the Mayurakshi. Many derelict channels

forming linear or ox-bow lakes are found on the right bank of the Dwaraka. The largest marsh, however, has been formed by a comparatively smaller stream, namely the Koiya on the Birbhum-Murshidabad border. There is a large dried up lake named Daldali near the Phullara temple at Labpur.

Birbhum is full of tanks- in fact, in most parts of Birbhum, settlements are nucleolated around tanks. There is a tank namely Sona Chal Dighi, at the old fort of Bhimgarh, south west of Dubrajpur. (Source : West Bengal District Gazetteers, Birbhum)

O'Mally, in the old District Gazetteers of Birbhum had mentioned some of the old and large size tanks namely Dantindighi near Dubrajpur, Rajpur Sair and Lambodarpur Sair near Suri.

(iv) Climate

Oppressive heat, high humidity and heavy precipitation are the principal characteristics of the climate of Jalpaiguri district. It would not be out of place to mention here that word 'Tarai'- one of the two geographical regions of the district is a Persian word which means 'a hot and humid place'. The seasons here are otherwise similar to that of the districts in the plains, but due to its proximity to the hills the rainfall is much heavier and the temperature is rarely excessive. Novermber, December and January are usually the driest months, though even in these months some rain falls. They are actually the part of the cold season, duration of which is mid-November to the end of February. This is followed by hot season from March to May and the south-west monsoon season is June to early October when the heavy rainfall occurs. January is the coldest month and April and May are the hottests. The monthly temperature varies between 10^0C in the winter to 39.0^0C in the summer. Average of the maximum and minimum temperatures of the district for the preceding 10 years is as follows :

Year	Birbhum	
	Maximum (in Celsius)	Minimum (in Celsius)
1991	42	8
1992	43	7
1993	40	8
1994	43	9
1995	44	9
1996	45	7
1997	43	9
1998	43	7
1999	43	7
2000	41	7

Note : Yearwise data have been taken from District Statistical Hand Book, 1996 & 2001.

The hottest month in Birbhum is May and the coldest month is January. Characteristics of the wind are generally light or moderate. The force slightly increases during the summer and monsoon. In summer season it blows mostly from directions between the south and east, in monsoon season in south-west and in the cold season from directions between west and in March-April mostly from directions between south and northwest. The district receives a mean annual rainfall varying from 1,100 and 1,600 mm which comes between 61 to 78 rainy days. The rainfall in the district in general decreases from the north-west towards the south-west. About 78 per cent of the annual rainfall come during the four monsoon months of June to September. Norwesters (locally known as *Kalbaisakhi*) mostly occur in the afternoon during the hot season.

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

LIST OF SCHEDULED CASTES
WEST BENGAL

1 Bagdi, Duley
2 Bahelia
3 Baiti
4 Bantar
5 Bauri
6 Beldar
7 Bhogta
8 Bhuimali

34 Parhaiya
35 Rabha
36 Santal
37 Sauria Paharia
38 Savar

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Progress of Population

The population of West Bengal stands at 8,01,76,197 as on 00.00 hours of 1st March, 2001. West Bengal retains its position as the fourth largest state in India as was in 1991. West Bengal in 2001 has a share of 7.81 per cent of total population of India while it occupies only 2.70 per cent of the total Indian land area. The Birbhum district has recorded a total population of 3,015,422 in 2001 census. The rank of the district which was 13th in 1991 among the districts of West Bengal has remained unchanged in 2001. The population of the district as shown in table-1 is increasing rapidly. The population of the district which was 1,066,889 in 1951 has reached 3,015,422 in 2001. The population distribution of the district among rural and urban areas for the last five decades is as below :

TABLE-1: RURAL AND URBAN POPULATION IN THE DISTRICT BIRBHUM WITH PERCENTAGE TO TOTAL IN BRACKETS (1951-2001)

Census Year / Sector	1951	1961	1971	1981	1991	2001
Total	**1,066,889**	**1,446,158**	**1,775,909**	**2,095,829**	**2,555,664**	**3,015,422**
Rural	997,896	1,345,389	1,651,137	1,922,296	2,326,101	2,757,002
	(93.5)	(93.0)	(93.0)	(91.7)	(91.0)	(91.4)
Urban	68,993	100,769	124,772	173,533	229,563	258,420
	(6.5)	(7.0)	(7.0)	(8.3)	(9.0)	(8.6)

(a) Distribution of population in rural-urban areas :

The proportion of rural population has shown a declining trend during 1951-1991 and then slightly improved in 2001. The proportion was 93.5 per cent in the year 1951, which decreased to 93.0 per cent in 1961. Between 1961 and 1971 the proportion of population did not change and then it declined to 91.0 per cent in 1991 and again slightly improved to 91.4 per cent in 2001. Conversely, the urban population has increased upto 1991 with the exception of no change during 1961-71. But in the year 2001, it has slightly decreased. The proportion was 6.5 per cent in the year 1951, which has gone upto 9.0 per cent in 1991, then slightly declined to 8.6 per cent in 2001. Hence, it can be said precisely that maximum people of this district live in rural areas.

(b) Size, class and status of Towns :

There are five municipal towns and one non-municipal town in Birbhum district. The municipal towns are Rampurhat, Suri, Bolpur, Dubrajpur and Sainthia. Ahmadpur is the only non-municipal census town in the district. Among these Rampurhat, Suri and Bolpur with population of 50,613, 61,806 and 65,693 respectively come under class-II town. Besides these three municipalities, other two municipalities viz. Santhia and Dubrajpur with population 39,145 and 32,752 respectively come under class-III town. The last one - Ahmadpur with population 8,411 comes under class-V town category.

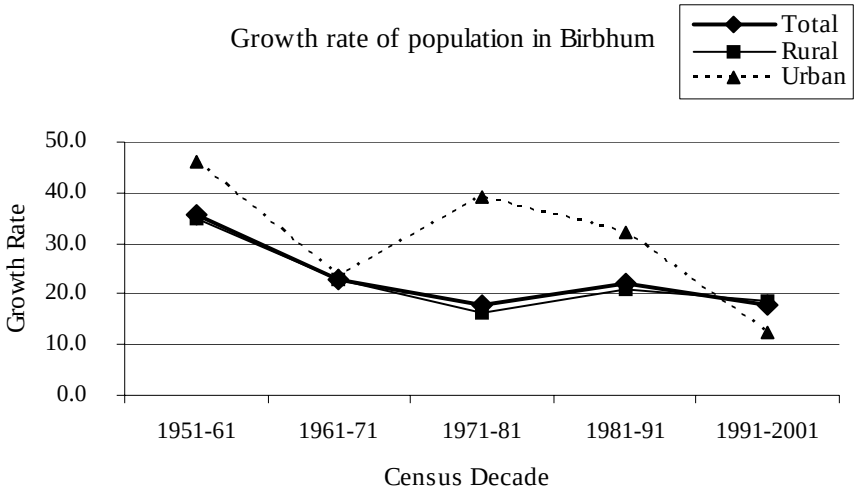

Growth Rate

The rural-urban decennial growth rate for Birbhum district from 1951-2001 shows that during 1991-2001 total growth rate of population is 18.0 per cent with rural 18.5 per cent and urban 12.6 per cent. The urban decadal growth rate in Birbhum during 1951-2001 has always been higher than the rural decadal growth rate excepting the year 1991-2001, when it has declined by 6.0 per cent. Birbhum has the 10th highest decadal growth rate in 2001 at 18.0 per cent among the districts of West Bengal. An overall picture of the growth rate of the district for 1951-2001 can be observed from table-2 below :

TABLE-2 : DECADAL GROWTH RATE OF POPULATION OF BIRBHUM (1951-2001)

Total/Rural/Urban	1951-61	1961-71	1971-81	1981-91	1991-2001
Total	**35.5**	**22.8**	**18.0**	**21.9**	**18.0**
Rural	34.8	22.7	16.4	21.0	18.5
Urban	46.1	23.8	39.1	32.3	12.6

It is evident from the above table that though population of the district has been increasing in absolute numbers during last fifty years, the total growth rate has sharply declined from 35.5 per cent in 1951-61 to 18.0 per cent in 2001. Similar is the case of rural and urban growth rate of the district, which has shown a significant declining trend over the years. Rural growth rate has declined from 34.8 per cent in 1951-61 to 18.5 per cent in 1991-2001 and urban growth rate has declined from 46.1 per cent in 1951-61 to 12.6 per cent in 1991-2001. It is seen that there has been a very sharp decline in the urban growth rate during the decade 1991-2001 in comparison to its previous decade. Hence during the decade 1991-2001, rural growth rate of population is higher than urban growth rate. The following chart has presented the feature.

It can be seen from the Chart that the trend of growth of population has been fluctuating for the district as a whole and also for its rural and urban components.

Sub-district level :

Among the rural areas, Nalhati-I CD Block has the highest decadal growth rate (i.e. 35.7 per cent) during 1991-2001. This block is followed by Murarai-I CD Block (with 25.9 per cent decadal growth rate) and Suri-I C.D. Block (with 24.6 per cent) respectively. Sainthia CD Block has the lowest growth rate of 7.8 per cent among all the CD Blocks.

Again, among the six urban units, Sainthia municipality has recorded the highest growth rate (30.4 per cent) during 1991-2001. It is followed by Bolpur municipality and Dubrajpur municipality with growth rates 24.5 and 21.4 per cent respectively. Suri municipality has the lowest growth rate of population (i.e. 13.8 per cent) among all the urban units.

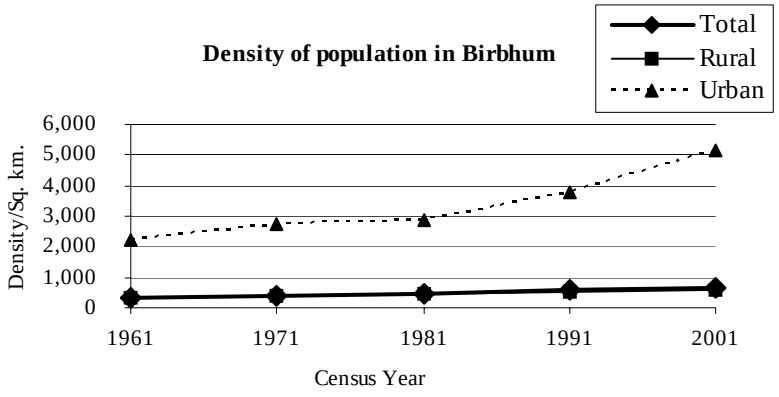

Density of Population :

West Bengal has the highest population density among the States at 903 persons per sq. km. as per 2001 census. It was 767 sq. km. in 1991. Birbhum had density of population at 562 persons per sq. km. in 1991 that has gone upto 663 per sq. km. in 2001. The rank of the district in terms of density which was 13th in 1991, has become 14th in the State in 2001 census. The rural-urban trend of density of population of the district can be observed in the table-3 below :

TABLE-3 : DENSITY OF POPULATION IN THE DISTRICT OF BIRBHUM (1961-2001)

Total/Rural/ Urban	1961	1971	1981	1991	2001
Total	**320**	**390**	**461**	**562**	**663**
Rural	301	367	429	519	613
Urban	2,224	2,754	2,873	3,801	5,170

It is observed from the above table that the density of population has steadily gone up at each successive census years, since 1961. The urban density of population as expected has been much higher than that of the rural. The rural density of population has gone up from 301 persons per sq. km. in 1961 to 613 in 2001. Again, the urban density of population has gone up from 2,224 per sq. km. 1961 to 5,170 in 2001.

It is observed from the chart that the change in the density of population for the total as well as rural areas over the last five decades has been marginal. Whereas, there has been a significant increase in the density of population of urban areas for all the census years excepting the decadal year 1971-81, when the increase was very marginal.

Sub-district level :

Among the rural areas, Nalhati-II CD Block has the highest density at 986, followed by Murarai-II CD Block at 959 and Murarai-I CD Block at 879. Rajnagar CD Block has the lowest density of population, i.e. 315 among the blocks of the district.

Among the towns, Rampurhat Municipality has the highest density of population at 12,813 persons per sq. km., followed by Suri Municipality at 6,883 and Bolpur Municipality at 6,122. Dubrajpur Municipality has the lowest density of population at 1,946 persons per sq. km. the district.

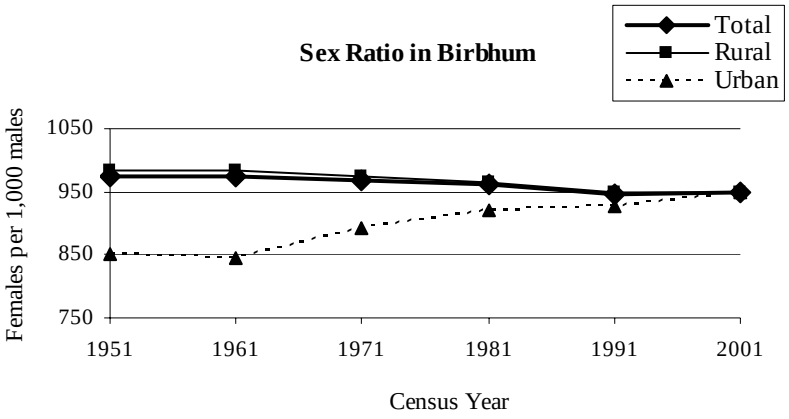

Sex Ratio :

Table 4 presents sex ratio in the district of Birbhum during 1951-2001. It is seen that the sex ratio of the district has decreased in each of the successive census years between 1951-1991 and then slightly increased in 2001. The sex ratio of the district as a whole was 974 in 1951 which has declined to 946 in 1991 and then slightly improved to 950 in 2001 census.

TABLE-4 : SEX RATIO IN BIRBHUM DISTRICT, 1951-2001

	Sex Ratio		
Census Year	Total	Rural	Urban
1951	974	984	851
1961	973	984	844
1971	968	974	893
1981	962	966	920
1991	946	948	926
2001	950	950	950

Rural sex ratio of the district has steadily declined during 1961-1991 and again slightly increased during 2001. The sex ratio in the rural areas of the district was 984 in 1951 and remained the same in 1961. The ratio has decreased to the extent of 948 in 1991 and then slightly improved to 950 in 2001. However, in case of urban areas, the sex ratio has declined from 851 in 1951 to 844 in 1961 and again steadily improved from 893 in 1971 to 950 females in 2001 census. It is to be noted that the sex ratio of the rural part was always better than that of urban part in the district since 1951 to 1991 and in 2001 both have equal sex ratios. It is also observed that the sex-ratios (which indicates number of females per thousand of males) have remained male-biased throughout the period 1951-2001 for the total, rural as well as urban population of the district. In other words, the number of females per thousand males remained below one thousand mark over last fifty years.

The above chart indicates that the district has slightly decreasing sex ratio over the last 5 decades. The above trend has been reflected from the low sex ratio of the rural and urban areas. The sex ratio in urban areas of the district has witnessed an increasing trend over the successive years excepting the year 1961 but at a low pace.

Sub-District level :

Sex ratios of six CD Blocks, viz. Bolpur-Sriniketan, Murarai-I, Labpur, Nalhati-I, Khoyrasol and Suri-I have decreased in 2001 Census in comparison to

1991 Census. Rest of the CD Blocks and towns have shown an increasing trend in their sex ratios during 2001 census. In 2001, among the rural areas, CD Block Murarai-II has the highest sex ratio at 965. This CD Block is followed by Rajnagar and Nanoor CD Block with 962 and 961 respectively. Suri-I CD Block has the lowest sex ratio of 932 females per 1,000 males in the district. Among the urban units of the district. Bolpur Municipality has the highest sex ratio of 971, followed by Ahmadpur Census Town (956) and Sainthia Municipality (952). It is concluded that in the sub district level also, the sex ratios have remained male-biased in 2001 census.

Work participation rate :

The work participation rate by percentage of total workers to total population with its rural-urban break up for the district and State can be found in the table below :

TABLE - 5 : PERCENTAGE OF TOTAL WORKERS (MAIN +MARGINAL) TO TOTAL POPULATION (1951-2001)

	Birbhum			West Bengal		
Year	Total	Rural	Urban	Total	Rural	Urban
1951	34.9	34.9	35.6	34.7	32.6	40.9
1961	31.2	31.4	29.3	33.2	32.7	34.7
1971	26.7	26.7	26.0	27.9	27.2	30.1
1981	30.5	30.9	26.6	30.2	30.3	29.8
1991	33.2	33.7	27.6	32.2	33.2	29.6
2001	37.4	37.9	32.5	36.8	37.9	33.9

Note : Concept of Main workers and Marginal workers was introduced in 1981

The proportion of total workers to total population in the district has decreased over the years from 1951 to 1971. But after that from 1981 to 2001 the same has shown an increasing trend and finally reached at 37.4 per cent. The similar trend is observed in the proportion of total workers of the rural as well as urban part of the district. It is to be noted that total workers of the rural part of the district is higher than the urban part, since 1961 to 2001 census. From the above table it is observed that the percentage of total workers of the district is slightly higher than the corresponding State percentage since 1981 to 2001 census. It is also observed that the percentage of total workers in the rural part of the State is higher than the urban part since 1981-2001 census. This implies that the work participation rate in the rural part of the State as well as in the district is higher than the urban part.

TABLE - 6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)

	Birbhum			West Bengal		
Year	Person	Male	Female	Person	Male	Female
1951	34.9	54.9	14.4	34.7	54.8	11.3
1961	31.2	52.4	9.5	33.2	54.0	9.4
1971	26.7	48.2	4.4	27.9	48.8	4.4
1981	28.1	49.8	5.5	28.3	48.7	5.8
1991	30.4	51.6	8.1	30.2	50.7	8.0
2001	27.6	46.1	8.1	28.7	47.0	9.1

Note : Concept of Main workers and Marginal workers was introduced in 1981

The above table shows that the percentage of total of main workers in the district has decreased as compared to the preceeding years from 1951 to 1971 and in 2001. But it has increased in the years in 1981 and 1991 as compared to its preceeding years. The proportion of male main workers has shown the similar trend as that of total of the district. But for the female main workers, it is observed that the proportion has shown a decreasing trend during 1951-1971 and then an increasing trend during 1981 to 1991 and in 2001 it has remained the same.

It is observed that the district percentage of main workers to total population is slightly above the State average in the census years 1951 and 1991, whereas it is just below the State average in other census years. In case of the male main workers, the district percentage has been higher than the State average in the census years 1951, 1961, 1981 and 1991 whereas it is lower in other census years. In case of the female main workers, the proportion has been higher in 1951, 1961 and 1991 and lower in 1981 and 2001 and just equal in 1971 in the district as against the State average.

The percentage of male main workers is always much higher than the female main workers in the district over all the census years for the district as well as for the State. Hence, there exists a very wide gap in the male-female work participation rate of main workers category in the district as well as in the State.

Literacy rate :

It is evident from that during the decade 1991-2001, literacy rate in Birbhum district has improved by 12.9 per cent points which is the highest for the district in the post independence period. Rural literacy rate in Birbhum district has increased by 13.3 per cent point in the year 2001 which is also the highest for the district in the post independence period. During the same period urban literacy has increased by 10.2 per cent points. Substantial improvement in the literacy rate has been recorded among the rural population as compared to the urban population. A comparative literacy rate for West Bengal and Birbhum district for the period 1951-2001 is given at table-7 below :

TABLE - 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, BIRBHUM AND WEST BENGAL WITH CHANGE IN DECENNIAL PERCENTAGE POINT IN PARANTHESIS (1951-2001)

		Birbhum			West Bengal		
Year	T/R/U	P	M	F	P	M	F
1	2	6	7	8	3	4	5
1951	T	19.9	31.7	7.6	25.0	34.7	13.2
	R	18.8	30.3	6.9	18.8	28.9	7.6
	U	37.6	51.8	20.7	45.7	51.0	37.1
1961	T	26.6	38.9	13.9	34.5	46.6	20.3
		(6.7)	(7.2)	(6.2)	(9.5)	(11.9)	(7.1)
	R	24.8	37.0	12.3	25.8	38.9	11.7
		(6.0)	(6.7)	(5.5)	(7.1)	(10.0)	(4.2)
	U	49.6	61.2	35.5	59.6	66.0	50.0
		(12.0)	(9.4)	(14.8)	(13.8)	(15.0)	(12.9)
1971	T	31.4	41.8	20.6	38.9	49.6	26.6
		(4.8)	(3.0)	(6.8)	(4.4)	(3.0)	(6.3)
	R	29.7	40.2	18.8	30.6	42.3	18.1
		(4.9)	(3.2)	(6.5)	(4.8)	(3.4)	(6.3)
	U	54.0	62.4	44.6	62.3	68.2	54.1
		(4.5)	(1.3)	(9.1)	(2.7)	(2.2)	(4.1)
1981	T	38.5	48.5	28.0	46.3	57.0	34.4
		(7.0)	(6.7)	(7.3)	(7.5)	(7.5)	(7.9)
	R	36.7	46.8	26.2	37.9	49.7	25.3
		(7.0)	(6.6)	(7.4)	(7.3)	(7.4)	(7.3)
	U	57.6	67.0	47.4	68.7	75.2	60.7
		(3.6)	(4.6)	(2.8)	(6.5)	-(7.0)	(6.6)
1991	T	48.6	59.3	37.2	57.7	67.8	46.6
		(10.1)	(10.7)	(9.2)	(11.4)	-(10.8)	(12.1)
	R	46.6	57.5	35.0	50.5	62.1	38.1
		(9.9)	(10.7)	(8.8)	(12.6)	(12.3)	(12.8)
	U	67.4	75.7	58.4	75.3	81.2	68.3
		(9.8)	(8.7)	(11.0)	(6.5)	(6.0)	(7.5)
2001	T	61.5	70.9	51.6	68.6	77.0	59.6
		(12.9)	(11.6)	(14.4)	(10.9)	(9.2)	(13.1)
	R	59.9	69.5	49.7	63.4	73.1	53.2
		(13.3)	(12.0)	(14.7)	(12.9)	(11.1)	(15.0)
	U	77.7	84.7	70.2	81.3	86.1	75.7
		(10.2)	(9.0)	(11.8)	(6.0)	(4.9)	(7.5)

Note : Upto 1971 Literacy rate was calculated excluding the 0-4 age group population. From 1981 onwards Literacy rate is calculated excluding the 0-6 age group population.

It is observed from the above table that the literacy rate of Birbhum district is 61.5 per cent (male 70.9 per cent and female 51.6 per cent) as against State percentage of 68.6 per cent (male 77.0 per cent and female 59.6 per cent) during 2001 census. The percentage point increase in the literacy rate of the district is 12.9 in 2001 as against the State percentage of 10.9. It is seen that the percentage point increase in litercay rate of the district in rural area (13.3 per cent) is higher than the State rural percentage (12.9 per cent) during 2001 census. Similarly, in urban area also the percentage of the district is 10.2 per cent as against the State percentage of 6.0.

Sub-District level :

In the year 2001, the highest rural literacy rate (65.4 per cent) is recorded by Mayureswar-I CD Block whereas the lowest (46.2) is recorded by Murarai-II. Also male literacy (75.7 per cent) is highest in the CD Block Mayureswar-I, whereas it is lowest (54.5 per cent) in the CD Block Murarai-II. Highest female literacy (54.5 per cent) is recorded in Maureswar-I CD Block whereas, it is lowest (37.6 per cent) in the CD Blocks of Murarai-I.

Among the urban units, the highest literacy rate is recorded in Suri Municipality (82.0 per cent) and the lowest literacy is recorded in Dubrajpur Municipality (64.4 per cent). Male literacy is highest in the Rampurhat Municipality (88.1 per cent) while it is lowest in Dubrajpur Municipality (74.7 per cent). The highest female literacy (76 per cent) is recorded in Suri municipality while it is lowest (53.5 per cent) in Dubrajpur Municipality.

Religion

Religion is also one of the basic cultural characteristics of the population. In a secular country like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religious persuasion of the people of the country. The data on religion practised by persons gives the content of population of each of the six major religious communities, viz, Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for 'other religions and persuasions' and 'religion not stated'. Table-8 below gives the distribution of population by religion since 1961 for Jalpaiguri disitrict.

TABLE – 8 : POPULATION BY RELIGION IN THE DISTRICT OF BIRBHUM (1961-2001)

Year	Hindus	Muslims	Christians	Jains	Sikhs	Budd-hists	Other Religion & Persuasions	Religion not Stated	Total Population
	1	2	3	4	5	6	7	8	9
1961	1,043,661	399,513	1,804	660	411	76	32	1	1,446,158
	(72.2)	(27.6)	(0.1)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)
1971	1,253,117	518,381	3,264	944	103	92	7	1	1,775,909
	(70.6)	(29.2)	(0.2)	(0.1)	(0.0)	(0.0)	(0.0)	(0.0)	(100.0)
1981	1,437,945	649,212	5,010	1,111	258	123	1,817	353	2,095,829
	(68.6)	(31.0)	(0.2)	(0.1)	(0.0)	(0.0)	(0.1)	(0.0)	(100.0)
1991	1,702,259	844,987	4,567	1,812	101	91	2,069	78	2,555,664

Note : Figures within brackets indicate percentage to total population

Table-8 shows that the Hindus constitute the maximum population by religion in Birbhum district, followed by the Muslims, Christians, Jains, Sikhs and the Buddhists in all the Census years 1961-2001. In absolute numbers Hindu and Muslim population have increased in each of the census years during 1961-2001. But the Buddhist and Christian population have increased upto the year 1981 and then declined in 1991 and again increased in 2001. The similar fluctuating trend is observed in case of Sikh population which declined twice in 1971 and 1991 and then increased twice in 1981 and 2001. The Jain population also have increased in each of the census years except in the year 2001. The number persons belonging to other religion category have increased in each of the census years except in 1971 and 2001, when it has decreased. Population of those who have not stated their religion remained stagnant in 1961 and 1971 and then started fluctuating upto 2001 census.

Going by the percentage of the total population, the Hindu population has decreased over the years starting from 1961 to 2001. The proportion was 72.2 per cent in 1961 which has declined to 64.5 per cent in 2001. However, the proportion of Muslim population has increased over all the decadal periods starting from 1961 to 2001. The proportions of other religions as well as those who have not stated their religion have remained more or less stagnant for all the census years.

TABLE - 9 : AVAILABILITY OF UNIVERSITY EDUCATION IN THE DISTRICT BIRBHUM

Serial Number	Name of the University	Territorial Jurisdiction	Remarks
1	Visva-Bharati Viswavidyalaya	Bolpur Sriniketan	The University was founded by Gurudev Rabindranath Thakur and in May, 1951 it was declared to be a central university and an institution of national importance by an act of Parliament.

Brief Analysis of Inset Tables based on PCA (1-36)

TABLE 1 : DECADAL CHANGE IN POPULATION OF CD BLOCKS BY RESIDENCE, 1991-2001

	District Total:	**2,555,664**	**2,326,101**	**229,563**	**3,015,422**	**2,757,002**	**258420**	**18.0**	**18.5**	**12.6**	**9.0**	**8.6**

Table 1 shows that during the decade 1991-2001, there is marginal difference between overall growth of the district (18.0 per cent) and its rural area (18.5 per cent). But the growth rate is much lower (12.0 per cent) in the urban part of the district in comparison to the district average. Among 19 CD Blocks of the district, Murarai-I has the highest (25.9 per cent) decadal variation in population. This block is followed by the blocks Suri-I (24.6 per cent), Murarai -II (22.7 per cent) and Illam bazar (20.1 per cent). Besides these CD Blocks, other CD Blocks having the growth rate of population above the district average (18.0) are Suri-II (18.2 per cent), Mohammad Bazar (19.9 per cent), Mayureswar-I (19.8 per cent), Nalhati-II (19.8 per cent), Nalhati-I (19.5 per cent), and Rampurhat-I (18.5 per cent). The CD Block having lowest decadal variation in population is Khoyrasol (10.7 per cent). The CD Block is preceded by the CD Blocks Sainthia (13.2 per cent) and Rajnagar (13.2 per cent) in this regard. Going by the district's rural frame, Nalhati-I recorded 35.7 per cent growth rate which is the highest and Sainthia recorded the lowest of 7.8 per cent. Among the CD Blocks only Sainthia has urban part in 2001 (non-existent in 1991), which recorded 4.8 per cent growth rate. Among the five municipalities Sainthia recorded the highest growth rate (30.4 per cent) whereas the lowest (13.8 per cent) is in Suri Municipality. It is noticeable that all the municipalities have recorded higher growth rate than the district's urban population growth rate.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table 2 shows that total number of inhabited villages in the Birbhum district are 2,259 under 19 CD Blocks. The number of inhabited villages is highest in the CD Block Sainthia. The CD Block has 216 villages. The CD Block Nalhati-II has the lowest number (48) of villages. The specific population size of 500-999 is found in maximum number of 675 villages, constituting 29.9 per cent of the total village of the district. On the other hand, the specific population size of 10,000 and above has 8 villages (0.4 per cent) only. The highest cluster of village (76) in the specific population size of 500-999 belongs to the Sainthia CD Block. Murarai-II has no inhabited villages in the size, class of less than 200.

TABLE 3 : NEW TOWNS DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Serial Number	Name of the District	District Code	Sl. No.	Name of Town
1	2	3	4	5
	Birbhum	**08**		
(A) NEW				
(i) Statutory Town		: N I L :		
(ii) Census Town			1	Ahmadpur
(B) DENOTIFIED				
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns		: N I L :		
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria		: N I L :		
(iii) Census towns of 1991 census are notified as statutory town in 2001 census		: N I L :		

TABLE 3 : NEW TOWNS DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Serial Number	Name of the District	District Code	Sl.	Name of Town
1	2	3	4	5
(C) DECLASSIFIED			1	Nalhati (NM)
			2	Bakreswar Tourist Centre Township (NM)
(D) WHOLLY MERGED WITH OTHER TOWN (S)		: N I L :		

Note : Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and economic criteria.

It can be observed from Table 3 that no new statutory town has been created in the Birbhum district during 2001 Census. Only one new census town has been created viz, Ahmadpur in 2001. There has been no de-notification whatsoever in 2001. However, Nalhati (NM) and Bakreswar Tourist Centre Township non-municipality has been declassified for its failure to be identified as census town based on demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population

201-300	200	8.9	111,093	4.0
301-500	605	26.8	523,697	19.0
501 +	1,220	54.0	2,068,894	75.0
Not known	3	0.1	5,575	0.2
District Total :	**2,259**	**100.0**	**2,757,002**	**100.0**
Population Density (Rural) of the district :		**638.8**		

A look at the Table 4 gives that the population density (Rural) of the district is 638.8 per sq. km. Out of the total 2,259 villages, 54 per cent villages (i.e.1,220 villages) have the highest density of population range of more than 501 per square kilometre and 26.8 per cent of the villages have population density in the range 301-500 per square kilometre. So it can be said that 80.8 per cent of the villages have the density of population of at least 301 per square kilometre. Only 12 villages (0.5 per cent) have the lowest range of population density of 0-10. If we consider percentage distribution of population in different density ranges, we can observe that the percentage is negligible in the density ranges 0-10 and 11-20. But percentage is very high (75 per cent) in the range 501 and above. So the data shows the villages in the district of Birbhum are basically of larger sizes.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

	West Bengal			Birbhum		
Census year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	1,029	1,031	848
1911	925	982	614	1,017	1,019	861
1921	905	971	591	1,004	1,009	825
1931	890	961	578	1,005	1,010	798
1941	852	945	559	999	1,008	861
1951	865	939	660	974	984	851

	West Bengal			Birbhum		
Census year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1961	878	943	701	973	984	844
1971	891	942	751	968	974	893
1981	911	947	819	962	966	920
1991	917	940	858	946	948	926
2001	934	950	893	950	950	950

Note : Sex ratio has been defined here as the numbers of Femals per 1000 Males.

From Table 5 it can be observed that the sex-ratio in the district of Birbhum has always been higher than that of state average starting from 1901 to 2001. For the state the ratio has continuously declined from 1901 to 1951 and then continuously increased from 1961 to 2001. But for the district the ratio has continuously declined (except in 1931) from 1901 to 1991, and then slightly increased in the census year 2001. The ratio was 1,029 in 1901, declining continuously (except in 1931) it reached at 946 at 1991 and slightly improved to 950 in 2001. The sex-ratio of the rural population of the state has reflected the same trend as that of total population, but for the urban population the sex-ratio has shown declining trend up to the year 1941 and increasing trend from 1951 onwards. For the district also we observe nearly the same trend in the sex-ratio of the rural population as that of its total population. But for the urban population ratio is fluctuating.

TABLE 6 : SEX RATIO BY CD BLOCKS, 2001

		Sex ratio		
Serial Number	Name of CD Block	Total	Rural	Urban

19	Khoyrasol	936	936	0
	District Total :	**950**	**950**	**950**

Table 6 presents sex-ratio of different blocks of the district in 2001. Sex-ratio in 9 CD Blocks out of 19 CD Blocks of Birbhum district is below the district average of 950 and in rest of the blocks it is above the district average. Highest sex-ratio is observed in the CD Block of Murarai-II where sex-ratio is 965. Lowest sex-ratio is observed in Suri-I, where the ratio is 932. As the district is basically rural the same pattern is also found in the rural frame. Only some portion of Sainthia CD Block is urban, the sex ratio of which is higher than the district urban sex-ratio, i.e. 956 against 950.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial Number	Name of CD Block	Sex ratio
1	2	3
1	Murarai - I	948
2	Murarai - II	965
3	Nalhati - I	940
4	Nalhati - II	958
5	Rampurhat - I	957
6	Rampurhat - II	938

16	Bolpur Sriniketan	960
17	Illambazar	943
18	Dubrajpur	954
19	Khoyrasol	936
	District (Rural) Total:	**950**

Table 7 represents sex-ratio of Birbhum district at exclusively rural level. Among the 19 CD Blocks of the district, Murarai-II CD Block contains the highest sex ratio with 965 which overtakes the district (Rural) total of 950 and Suri-I contains the lowest sex ratio with 932 which is below the district (Rural) total.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	0.8	3,478	0.1
700-749	14	0.6	3,844	0.1
750-799	21	0.9	5,970	0.2
800-849	83	3.7	38,813	1.4
850-899	299	13.2	248,797	9.0
900-949	713	31.6	1,055,725	38.3
950-999	700	31.0	1,070,953	38.8
1000-1099	347	15.4	310,225	11.3
1100+	64	2.8	19,197	0.7
District Total:	**2,259**	**100.0**	**2,757,002**	**100.0**
Sex ratio (Rural) for District :		**950**		

Table 8 shows that Birbhum's maximum population (2,757,002) reside in 2,259 villages. The range of sex-ratio for the rural population of the district extends from less than 700 to 1,100+, according to 2001 Census. The highest number of villages, i.e. 713 villages (31.6 per cent of the villages) of the district having 38.3 per cent of population, fall in the sex-ratio range of 900-949. The lowest number of villages (14) accounting to 0.6 per cent of the villages and 0.1 per cent of total population come under sex-ratio range of 700-749. So it can be said that larger number of villages have higher sex-ratio.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	Ahmadpur	CT	956
2	Bolpur	M	971
3	Dubrajpur	M	934
4	Rampurhat	M	938
5	Sainthia	M	952
6	Suri	M	944
	Sex ratio (Urban) for the district:		**950**

As per Table 9, the sex-ratio for the urban population of the district is 950 which is same as that of its rural population. Among the 6 urban units three units namely Bolpur and Sainthia municipalities and Ahmadpur Census Town have above the district urban average sex-ratio. Among the urban units Bolpur Municipality has the highest sex-ratio (971), whereas Dubrajpur Municipality has the lowest sex-ratio (934).

		Urban	**29,857**	**15,312**	**14,545**	**950**

Table 10 depicts that Birbhum district's total population in the age group 0-6 is 488,193, the sex-ratio of which is 964. Out of the 19 CD Blocks, 10 CD Blocks have overtaken the district figure, whereas two CD Blocks namely Mohammad Bazar and Khoyrasol have equal to the state figure, in this regard. Rests of the CD Blocks have shown below the district average figure. The range of the sex-ratio of the blocks which has overtaken the district figure is 967-996 and those who stay below are within the range 928-962. If we look into the sex-ratio of rural population, here also ten CD Blocks out of the 19 CD Blocks have rural population with sex-ratios higher than the state-figure, as the district is basically rural and 18 out of the 19 CD Blocks belong to that sector. Only Sainthia has some urban population and the sex-ratio is 945 which is lower than the sex-ratio of urban population of the age group 0-6.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

	District (Rural) Total :	**458,336**	**233,287**	**225,049**	**965**

From Table 11 it is observed that Birbhum's rural total population in the age group 0-6 is 458,336 of which 233,287 are males and 225,049 are females, giving sex-ratio of 965. The sex-ratio is highest in Nalhati-II CD Block and the lowest in Mayureswar-II block. The highest and the lowest sex-ratios are 996 and 928 respectively. The highest ratio is almost at par with 1,000 males but the lowest ratio is far below, which we may consider as a pointer to female child mortality.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	177	7.8	9,374	2.0

750-799	123	5.4	17,497	3.8
800-849	156	6.9	29,435	6.4
850-899	232	10.3	53,782	11.7
900-949	294	13.0	85,560	18.7
950-999	218	9.7	76,733	16.7
1,000-1,099	495	21.9	118,816	25.9
1,100+	483	21.4	58,850	12.8
District (Rural) Total :	**2,259**	**100.0**	**458,336**	**100.0**
Sex ratio (Rural) for District :		**965**		

As per Table 12, population in the age group of 0-6 is 458,336 in the census year 2001, living in 2,259 villages. In maximum number of inhabited villages the range of sex-ratio is 1,000-1,099. The villages are

495 (21.9 per cent of the total villages of the district) in number and provide residence to 25.9 per cent of the rural population in the age group of 0-6 years. The lowest number of inhabited villages is 81 (3.6 per cent), the sex-ratio range of which is 700-749. The population in these villages is 8,289 with percentage distribution of population of 1.8 only.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

	District (Urban) Total :		**29,857**	**15,312**	**14,545**	**950**

According to Table 13, total population in 0-6 age group of five municipalities and one census town is 29,857 of which 15,312 are males and 14,545 are females. The sex-ratio is 950. Only two municipalities namely, Sainthia and Bolpur have overtaken the district figure and the rests are below the district average of sex ratio.

		Urban	**258,420**	**59,194**	**4,515**	**22.9**	**1.7**

As per Table 14, in the district of Birbhum, the number of scheduled caste population is 889,894 comprising 29.5 per cent of the total population of the district. Also from the table it is observed that the size of the scheduled tribe population in the district is 203,127, constituting 6.7 per cent of the total population of the district. Considering the rural or urban residence, it is found that the proportions of the scheduled castes and scheduled tribes in the total rural population are 30.1 per cent and 7.2 per cent respectively. In the urban areas the proportions are 22.9 per cent and 1.7 per cent respectively. The proportion of scheduled castes is highest in the CD Block Suri-I (36.3 per cent), whereas it is lowest in the CD Block of Murarai-II (17.9 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

	District (Rural) Total :	**2,757,002**	**830,700**	**198,612**	**30.1**	**7.2**

From the Table 15 we can observe the total population of the rural district along with number and percentage of exclusively rural scheduled caste and scheduled tribe population in the CD Blocks. Total number of scheduled castes in rural areas of the district is 830,700 constituting 30.1 per cent of the total rural population of the district. The number of scheduled tribes in rural areas of the district is 198,612 constituting 7.2 per cent of the total rural population. In case of the scheduled caste population, the district proportion is overtaken by 12 CD Blocks starting from 30.6 per cent (in Mayureswar-II) to 36.3 per cent (in Suri-I) whereas 7 CD Blocks have below the district average figure starting from 17.9 (in Murarai-II) per cent to 29.9 per cent (in Bolpur Sriniketan)

For the scheduled tribe population 8 CD Blocks are above the average proportion, the highest being 19.2 per cent (in Mohammad Bazar) and lowest being 8.5 per cent (in Suri -I). There are 11 CD Blocks having below the average district figure starting from 0.3 per cent (Nalhati-II) to 6.7 per cent (in Mayureswar-II).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	207	9.2	0	0.0
Less than 5	109	4.8	3,826	0.5
5-10	171	7.6	24,661	3.0
11-20	263	11.6	81,981	9.9
21-30	325	14.4	125,241	15.1
31-40	329	14.6	140,113	16.9
41-50	279	12.4	166,656	20.1
51-75	411	18.2	212,203	25.5
76 and above	165	7.3	76,019	9.2
District Total :	**2,259**	**100.0**	**830,700**	**100.0**

Table 16 shows that total scheduled caste population of the district is 830,700 dwelling in 2,259 villages. If we consider range of percentage of scheduled caste population it is observed that highest number of villages (411, constituting 18.2 per cent of the total villages) belongs to the range 51-75. These villages provide residence to 212,203 scheduled caste population constituting 25.5 per cent of the total scheduled caste population of the rural district. The percentage range having the lowest number of villages (109 constituting 4.8 per cent of the total villages) is less than 5. The villages give residence to only 0.5 per cent of the district's rural scheduled caste population. The highest percentage 76 and above shows that there are 165 villages (constituting 7.3 per cent of the villages) where 76,019 scheduled castes (constituting 9.2 per cent of the scheduled caste population of the district) live. Also, there are 207 villages (9.2 per cent of villages) having no scheduled caste population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes	Number of villages	Percentage	Scheduled Tribes	Percentage
1	2	3	4	5
Nil	1,237	54.8	0	0.0
Less than 5	295	13.1	10,088	5.1
5-10	127	5.6	13,169	6.6
11-20	195	8.6	37,747	19.0
21-30	129	5.7	33,984	17.1
31-40	78	3.5	24,300	12.2
41-50	49	2.2	15,503	7.8
51-75	69	3.1	34,154	17.2
76 and above	80	3.5	29,667	14.9
District Total :	**2,259**	**100.0**	**198,612**	**100.0**

It is observed from the Table 17 that total number of scheduled tribe population dwelling in 2,259 villages of the district Birbhum is 198,612. Among 1,237 villages (54.8 per cent of the villages) scheduled tribe population is nil. Going by the percentage ranges of scheduled tribe population, it is found that highest number of villages are in the lowest range of less than 5. The number of such villages are 295 covering 13.1 per cent of the total villages where, 10,088 scheduled tribe people (constituting 5.1 per cent of the scheduled tribe population) reside. In the percentage range 76 and above there are 80 villages comprising 3.5 per cent of the total villages giving residence to 29,667 (14.9 per cent of the total scheduled tribe population) scheduled tribe people. However, maximum number of scheduled tribe population 37,747 (19.0 per cent) dwell in 195 villages (8.6 per cent) fall in the percentage range of 11-20.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Ahmadpur (CT)	8,411	2,397	25	28.5	0.3
2	Bolpur (M)	65,693	14,994	1,037	22.8	1.6
3	Dubrajpur (M)	32,752	7,209	1,003	22.0	3.1
4	Rampurhat (M)	50,613	13,126	991	25.9	2.0
5	Sainthia (M)	39,145	9,213	575	23.5	1.5
6	Suri (M)	61,806	12,255	884	19.8	1.4
	District (Urban) Total :	**258,420**	**59,194**	**4,515**	**22.9**	**1.7**

Table 18 presents that total population in the urban areas of the district is 258,420, among them 59,194 constituting 22.9 per cent are scheduled castes and 4,515 constituting 1.7 per cent are scheduled tribes. Among the five municipalities the proportion of the scheduled caste population is highest in Rampurhat and lowest in Suri. In Rampurhat Municipality there are 13,126 scheduled caste population and the proportion of scheduled castes to total population is 25.9 per cent. Suri Municipality, on the other hand gives residence to 12,255 scheduled caste population comprising 19.8 per cent of the total population. Also it is found that like Suri, Dubrajpur and Bolpur municipalities have below the district urban average proportion whereas like Rampurhat, Sainthia municipality have above the district average proportion of scheduled caste population. The lone census town, Ahmadpur also have above the district average proportion of scheduled caste population. Here absolute number of scheduled caste population is 2,397 and it constitutes 28.5 per cent of the total population. Dubrajpur Municipality has the highest proportion of scheduled tribe population among the five municipalities as well as one census town. In Dubrajpur Municipality 1,003 scheduled tribes comprising 3.1 per cent of its total population. Among the municipalities Suri Municipality has 884 scheduled tribe population which constitute 1.4 per cent of its total population. This proportion is lowest among the municipalities. The census town Ahmadpur has only 25 scheduled tribes constituting 0.3 per cent of its total population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Murarai - I	938	1,012
2	Murarai - II	949	973
3	Nalhati - I	934	991
4	Nalhati - II	939	1,158
5	Rampurhat - I	958	1,011
6	Rampurhat - II	924	1,046
7	Mayureswar - I	952	975
8	Mayureswar - II	951	963
9	Mohammad Bazar	948	1,003
10	Rajnagar	955	1,019
11	Suri - I	944	1,002
12	Suri - II	951	974
13	Sainthia	944	1,010
14	Labpur	944	939
15	Nanoor	967	1,009
16	Bolpur Sriniketan	946	1,010
17	Illambazar	944	970
18	Dubrajpur	963	949
19	Khoyrasol	929	885
	District (Rural) Total :	**946**	**994**

As per Table 19, the district (rural) total , sex ratios of the scheduled castes and scheduled tribes are 946 and 994 respectively. 9 CD Blocks have overtaken the district (rural) sex-ratio of the scheduled castes. The CD Block of Nanoor has topped the list with a sex-ratio of 967 scheduled caste population, whereas Mohammad Bazar has bottomed the list with a sex-ratio of 948. There are also 9 blocks where sex-ratio of the scheduled castes is less than the district (rural) figure. Among these CD Blocks, Rampurhat-II with the sex-ratio of 924 bottomed the list whereas Suri-I, Ilambazar, Sainthia and Labpur are tied in the top of the list with the sex-ratio of 944. Only one CD Block namely Bolpur Sriniketan has equalled the district (rural) figure. In case of the scheduled tribes 10 CD Blocks out of the 19 have overtaken the district (rural) figure of 994. In all of these CD Blocks the sex-ratios are more than one thousand. Among these blocks Nalhati-II is in the top of the list with sex-ratio of 1,158 and Suri-I is in the bottom of the list with 1,002 females per thousand males. The sex-ratio of the scheduled tribes in rest of the 9 CD Blocks are less than the district (Rural) figure of 994. Among these CD Blocks the lowest sex ratio (885) is in Khoyrasol.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ahmadpur (CT)	1,023	5,250
2	Bolpur (M)	997	1,018
3	Dubrajpur (M)	988	1,026
4	Rampurhat (M)	975	1,006
5	Sainthia (M)	986	1,146
6	Suri (M)	962	930
Sex ratio (Urban) for the district :		**983**	**1,022**

From Table 20 we can observe that sex-ratio for the scheduled caste and scheduled cribe population in the urban areas of the districts are 983 and 1,022 respectively.

For the scheduled caste population, among the municipalities, Bolpur Municipality has the highest sex-ratio of 997. Besides this municipality, other municipalities with above the district average of sex-

ratio are Sainthia (986), Dubrajpur (988).The Census Town Ahmadpur, recording 1,023 as sex-ratio has edge past the highest sex-ratio of the municipalities. Suri Municipality has recorded the lowest sex-ratio for scheduled caste population. For the scheduled tribe population , except in Suri municipality, all the other municipalities and the lone Census Town have registered above 1,000 sex-ratio. The Sainthia Municipality has the highest sex-ratio of scheduled tribe population among the five municipalities, whereas the ratio is lowest in Suri Municipality. It is to be noted that Ahmadpur, the lone Census Town in the district has recorded the sex-ratio of the scheduled tribe population as 5,250, which is very high as compared to the district average as well as the highest figure for the municipalities.

Table 21 gives that the overall literacy rate for the district is 61.5 per cent. The male literacy is 70.9 whereas for female the rate is only 51.6. There is a gap of 19.3 per cent between the male literacy and female literacy rate. In rural area the literacy rate is 59.9 per cent whereas in urban areas it is 77.7 per cent. So there is a 17.8 per cent gap between the urban and rural literacy rate. In both areas there is wide difference between male and female literacy rates but it is more prominent in rural areas. It is found that in urban areas the difference is of 14.5 per cent points but in rural areas it is 19.8 per cent points.

It is also observed that, Mayureswar-I CD Block with 65.4 per cent literacy rate is the leading CD Block in the district in this regard. The lowest literacy rate is recorded in the Murarai-II Block. Male literacy is highest (75.7 per cent) in the CD Block of Mayureswar-I whereas it is lowest (54.5 per cent) in the CD Block of Murarai-II. In the case of female literacy rate, it is found that literacy rate is highest (54.9 per cent) in the CD Block of Sainthia, whereas it is lowest (37.7 per cent) both in Murarai-I and Murarai-II. The maximum gap in male-female literacy rate is observed in the Rajnagar CD Block (24.7 per cent).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

17	Illambazar	75,847	45,012	30,835	69,335	29,716	39,619	63.0	72.3	53.0	19.3
18	Dubrajpur	74,837	46,069	28,768	84,174	35,300	48,874	56.7	68.1	44.8	23.3
19	Khoyrasol	69,513	42,944	26,569	65,588	26,841	38,747	60.5	72.2	48.0	24.2
District (Rural) Total :		**1,376,368**	**820,825**	**555,543**	**1,380,634**	**593,272**	**787,362**	**59.9**	**69.5**	**49.7**	**19.8**

Table 22 presents that the overall rural literacy rate for the district is 59.9 per cent. The male literacy rate is 69.5 per cent whereas for females it is 49.7 per cent. So there is a gap of 19.8 per cent point among rural male-female literacy rate. Out of the 19 CD Blocks 14 CD Blocks have above the district average literacy rate, whereas only 5 CD Blocks have below the average rural literacy rate. The CD Blocks having below the average literacy rate are Murarai-I, Murarai-II, Mohammad Bazar, Rajnagar and Dubrajpur. The CD Block having highest rural literacy rate is Mayureswar-I whereas it is lowest in Murarai-II. In case of male literacy in rural area, Mayureswar-I with 75.7 per cent literacy rate topped the list whereas, Murarai-II with 54.5 per cent literacy rate bottomed the list. Regarding female literacy in rural area, the CD Block Mayureswar-I has highest (54.5 per cent) literacy whereas Murarai-I has the lowest literacy rate (37.6 per cent).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	3	0.1	29	0.0
1-10	7	0.3	1,888	0.1
11-20	27	1.2	6,641	0.2
21-30	48	2.1	19,496	0.7
31-40	133	5.9	157,872	5.7
41-50	274	12.1	333,881	12.1
51-60	579	25.6	871,100	31.6
61-70	705	31.2	927,362	33.6
71-80	370	16.4	382,525	13.9
81-90	92	4.1	51,333	1.9
91-99	16	0.7	4,787	0.2
100	5	0.2	88	0.0
District Total :	**2,259**	**100.0**	**2,757,002**	**100.0**
Literacy rate for District :		**61.5**		

With the help of Table 23 we can study the distribution of villages by the literacy range. It is observed that there are only three villages having zero literacy rate. The share of these villages to total district population is negligible. With the increase in literacy rate, the number of inhabited villages as well as population, corresponding to different literacy ranges also start to increase. Along with these two variables, corresponding per centage distribution of the villages as well as the per centage distribution of total population in these villages have also increased . After reaching the literacy range 61-70, the number of corresponding villages started to decline along with the population and its corresponding percentages. The highest number of villages (705) along with highest per centage distribution of villages (31.2) as well as highest population (927,362) along with highest percentage share (33.6) correspond to the literacy range 61-70. Cent per cent literacy has been achieved only in five villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Ahmadpur (CT)	5,421	3,049	2,372	2,990	1,251	1,739	74.5	82.0	66.6	15.4
2	Bolpur (M)	47,059	25,903	21,156	18,634	7,434	11,200	80.1	87.0	73.1	13.9
3	Dubrajpur (M)	18,115	10,868	7,247	14,637	6,070	8,567	64.4	74.7	53.5	21.2
4	Rampurhat (M)	36,406	20,340	16,066	14,207	5,770	8,437	81.3	88.1	74.1	14.0

6	Suri (M)	45,142	24,829	20,313	16,664	6,972	9,692	82.0	87.6	76.0	11.6
District (Urban) Total :		**177,484**	**99,328**	**78,156**	**80,936**	**33,208**	**47,728**	**77.7**	**84.7**	**70.2**	**14.5**

Table 24 focuses on the fact that on an average 77.7 per cent of urban population is literate. Male literacy (84.7 per cent) is higher than the female literacy (70.2 per cent) by 14.5 per cent point. Among the municipalities, highest literacy (82.0 per cent) is achieved in Suri Municipality whereas the lowest literacy (64.4 per cent) is in Dubrajpur. Only census town Ahmadpur has achieved 74.5 per cent literacy rate. Male literacy is highest in the Rampurhat Municipality (88.1 per cent) while it is lowest in Dubrajpur Municipality (74.7 per cent). But Ahmadpur Census Town has achieved 82 per cent male literacy. The highest female literacy is also recorded in Suri Municipality while it is lowest in Dubrajpur Municipality. The gap in male-female is maximum (21.2 per cent points) in Dubrajpur Municipality while it is minimum (11.6 per cent points) in Suri Municipality.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total :		**308,113**	**201,260**	**106,853**	**522,587**	**225,608**	**296,979**	**44.8**	**56.9**	**32.0**	**24.9**

Table 25 clearly shows that literacy rate among the rural scheduled caste population is 44.8 per cent. Among the males 56.9 per cent and among the females 32 per cent are literate. There exists a gap of 24.9 per cent points between male and female literacy rate. The highest literacy rate is observed in Nalhati-II (53.1 per cent). It is closely followed by Nalhati-I (52.6 per cent), Mayureswar-I (52 per cent). Also Suri-II and Santhia Municipality have nearly 51 per cent literacy among the scheduled castes population.

Male literacy rate is highest (65 per cent) in the CD Blocks Nalhati-I and Nalhati-II among the rural scheduled caste population. In Murarai -II the male literacy rate is only 38.6 per cent which is the lowest male-literacy among the scheduled caste population of the rural areas of the district. Highest female literacy (40.4 per cent) is observed in the CD Block of Nalhati-II (40.4 per cent). This CD Block is closely followed by the CD Blocks of Nalhati-I (39.3 per cent), Mayureswar-I (38.9 per cent), Suri-II (38.1 per cent) and Sainthia (38.1 per cent).The lowest literacy (20.4 per cent) among the females of scheduled caste population is observed in the CD Block of Murarai-II. The CD Blocks Dubrajpur (literacy rate 20.8 per cent), Murarai-I (21.4 per cent) are slightly ahead in this regard. The highest male-female literacy gap is recorded in Rajnagar CD Block (27.9 per cent) and lowest in Murarai-II (18.3 per cent).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	19	0.9	309	0.0
1-10	16	0.8	2,297	0.3
11-20	89	4.3	21,126	2.5
21-30	264	12.9	102,971	12.4
31-40	436	21.2	201,892	24.3
41-50	542	26.4	245,975	29.6
51-60	367	17.9	148,232	17.8
61-70	193	9.4	68,578	8.3
71-80	84	4.1	31,240	3.8
81-90	27	1.3	7,385	0.9
91-99	9	0.4	646	0.1
100	6	0.3	49	0.0
District Total :	**2,052**	**100.0**	**830,700**	**100.0**
Literacy rate for District (Rural) :		**44.8**		

Table 26 shows that there are 19 inhabited villages (0.9 per cent) consisting of a negligible per cent of scheduled caste population where there is no literate. With the increase in literacy rate, from the range 1-10, number of inhabited villages also started to increase, along with the percentage distribution of villages as well as percentage distribution of population. Maximum number of villages corresponds to the literacy range 41-50 per cent. The corresponding proportion of villages is 26.4 per cent and proportion of scheduled caste population is 29.6 per cent. The proportions are highest in respective cases. Thereafter as the literacy range increases, the number of villages, their proportion, scheduled caste population and its proportion tend to go down. There are only 6 villages where cent per cent literacy has been achieved but the percentage share of scheduled caste population is negligible.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

	Birbhum (Urban) :	**29,639**	**17,826**	**11,813**	**29,555**	**12,025**	**17,530**	**58.0**	**69.3**	**46.5**	**22.7**

Table 27 presents that, among the urban scheduled caste population of Birbhum district, 58 per cent is literate. Here among the males 69.3 per cent and among the females 46.5 per cent are literate. Among

the five municipalities and the lone census town, Rampurhat Municipality is on the top with 70.2 per cent literacy and Dubrajpur Municipality with 36.9 per cent literacy is on the bottom of the list. The census town Ahmadpur has 51.2 per cent literacy among the scheduled castes population. Among the scheduled caste male the highest literacy rate is recorded in Rampurhat Municipality (81.0 per cent). The highest female literacy rate among the urban scheduled caste population is also recorded in Rampurhat Municipality (59.1 per cent). In Dubrajpur Municipality lowest literacy rate is recorded for females as well as for males. In case of females the lowest literacy rate is 25 per cent whereas it is 48.7 for males. The male-female literacy gap in the urban scheduled caste is highest in Dubrajpur, the gap is of 23.7 per cent points. The lowest gap is seen in Suri Municipality (21.7 per cent points). So gender bias is prevailing more or less same in all of the urban units.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

District (Rural) Total:		**50,103**	**35,644**	**14,459**	**148,509**	**63,954**	**84,555**	**31.1**	**44.1**	**18.0**	**26.1**

Table 28 presents the literacy status of rural scheduled tribe population. Just 31.1 per cent among the rural tribal population is literate with 44.1 per cent males and 18 per cent females. Among the various CD Blocks of the district Birbhum, the maximum literacy rate is registered by Rampurhat-II CD Block (45.7per cent) followed by Nalhati-I CD Block (40.00 per cent) and Khoyrasol CD Block (38.6) and the minimum is recorded in Murarai-I CD Block (21.7 per cent). Among the males the highest literacy rate is observed in Rampurhat-II CD Block (58.6 per cent) followed by Nalhati-I CD Block (56.2 per cent) and Khoyrasol CD Block (53 per cent) and the lowest in Nanoor CD Block (31.9 per cent). Among the females, the highest literacy rate is observed in Rampurhat-II CD Block (33.2 per cent) and the lowest in Murarai-I CD Block (11per cent).

The male literacy is higher by 26.1 per cent points than the female literacy rate. The largest gap in male-female literacy rate is found in Nalhati-I CD Block (32.4 per cent points) while the lowest is in Nalhati -II and Nanoor both (18.8 per cent points).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Tribes Population	Percentage distribution of population
1	2	3	4	5
0	54	5.3	452	0.2
1-10	68	6.7	8,105	4.1
11-20	171	16.7	31,191	15.7
21-30	243	23.8	61,309	30.9
31-40	214	20.9	57,738	29.1
41-50	115	11.3	24,795	12.5
51-60	72	7.0	12,666	6.4
61-70	27	2.6	1,245	0.6
71-80	15	1.5	597	0.3
81-90	9	0.9	250	0.1
91-99	3	0.3	80	0.0
100	31	3.0	184	0.1
District Total :	**1,022**	**100.0**	**198,612**	**100.0**
Literacy rate for District (Rural) :		**31.1**		

As per Table 29, there are 54 such inhabited villages without any literate scheduled tribe population consisting of 5.3 per cent of villages and 0.2 per cent scheduled tribe population. As the literacy range goes up, the number of villages and their proportion, scheduled tribe population and its percentage distribution increases upto literacy range 21-30. The maximum number of villages (243) and their corresponding proportion (23.8 per cent) and population and its percentage (30.9) share are also maximum. Thereafter the number of villages tend to decrease as the literacy range increases upto literacy range 91-99 and in case of cent per cent literacy , it increased again.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Femal	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Ahmadpur (CT)	22	2	20	3	2	1	91.7	66.7	95.2	-28.6
2	Bolpur (M)	296	205	91	741	309	432	34.0	47.0	21.0	26.1
3	Dubrajpur (M)	142	103	39	861	392	469	18.1	26.7	9.8	16.9
4	Rampurhat (M)	317	201	116	674	293	381	38.3	48.8	28.0	20.8
5	Sainthia (M)	203	110	93	372	158	214	44.3	52.4	37.5	14.9
6	Suri (M)	358	230	128	526	228	298	46.1	58.2	33.5	24.7
	Birbhum (Urban) :	**1,338**	**851**	**487**	**3,177**	**1,382**	**1,795**	**35.8**	**46.2**	**25.7**	**20.5**

Table 30 shows that among the urban scheduled tribe population of the district, 35.8 per cent is literate with 46.2 per cent males and 25.7 per cent females. Among the towns having scheduled tribe population, the highest literacy rate is exhibited by the Ahmadpur Census Town (91.7 per cent) and the lowest by Dubrajpur (18.1 per cent). The highest literacy rate among the males is recorded in Ahmadpur (66.7) while the lowest is in Dubrajpur Municipality (26.7). In case of females also the highest literacy rate is returned from Ahmadpur (95.2) whereas the lowest by Dubrajpur municipality (9.8 per cent). The overall male-female literacy gap in the urban scheduled tribe population is 20.5 per cent points. The largest gap is seen in Bolpur Municipality (26.1 per cent points) and the least in Ahmadpur Census Town where the gap is -28.6. Here female literacy is much higher than the male literacy which is quite surprising.

Out of the total population of 3,015,422, the main workers account for 27.6 per cent, marginal workers 9.8 per cent, total workers 37.4 per cent and non-workers 62.6 per cent in the district. The sex differentials in work participation reveals that basically males are workers and females are non-workers. Further, among male and female workers, the proportion of male main workers is abnormally higher than that of female and under marginal workers category, female proportion is higher than that of male.

The CD Block level analysis of work participation rate reveals that Rampurhat-I CD Block recording 31.6 per cent main workers is at the top while Khoyrasol CD Block with 22.7 per cent main workers is at the bottom. In case of marginal workers, the highest proportion is noticed in Suri-II CD Block (22.7 per cent) whereas the lowest is in Muratai-II CD Block (6.5 per cent). In respect of total workers, the highest proportion is recorded in Suri-II CD Block (49.4 per cent) and lowest in Murarai-II CD Block (32.4 per cent). In case of non-workers, the first position goes to Murarai-II CD Block (67.6 per cent) and the last position to Suri-II CD Block (50.6 per cent). The sex differentials in participation of economic activities reflect that the highest proportion of male total workers is registered in the CD Blocks of Suri-II , Mayureswar-II , and Bolpur Sriniketan. In these three blocks 57.9 per cent are male total workers. The lowest proportion of male total workers is in Murarai-I (49.5 per cent). So far as female total workers are concerned, the highest proportion goes to Suri-II CD Block (40.4 per cent) while the lowest proportion is seen in Murarai-II CD Block (13.1 per cent).

		Females	65,316	2,321	3.6	7,928	12.1	10,249	15.7	55,067	84.3
District (Rural) Total:		**Persons**	**2,757,002**	**755,901**	**27.4**	**288,547**	**10.5**	**1,044,448**	**37.9**	**1,712,554**	**62.1**
		Males	**1,414,097**	**649,167**	**45.9**	**122,015**	**8.6**	**771,182**	**54.5**	**642,915**	**45.5**
		Females	**1,342,905**	**106,734**	**7.9**	**166,532**	**12.4**	**273,266**	**20.3**	**1,069,639**	**79.7**

It can be seen from the above table that in the rural areas of the district, out of the total population, 37.9 per cent are workers and 62.1 per cent non-workers. The main workers constitute 27.4 per cent and marginal workers 10.5 per cent of the total population.

The highest rural proportion of main workers has been obtained in Rampurhat-I CD Block (31.6 per cent) and the lowest in Khoyrasol CD Block (22.7 per cent). Among male main workers, the biggest share goes to Mayureswar-II CD Block (52.6 per cent) while the lowest participation is recorded in

Khoyrasol CD Block (40.6 per cent). In case of female main workers, the highest proportion is noticed in Bolpur Sriniketan (13.5 per cent) and lowest in Khoyrasol CD Block (3.6 per cent).

The highest rural proportion of marginal workers has been registered by Suri-II CD Block (22.7 per cent) and the lowest in Murarai-II (6.5 per cent). The proportion of male marginal workers is lower than their female counterparts.

There exists a reverse relationship between male and female participation rate of main and marginal workers i.e. male proportion is higher in main workers whereas, female proportion is higher in marginal workers category.

The largest proportion of total workers has been observed in Suri-II CD Block (49.4 per cent) which is much higher as compared to district rural average (37.9 per cent) and the lowest in Murarai-II CD Block (32.4 per cent) which is much below the district rural average.

The highest proportion of non-workers is witnessed in Murarai-II CD Block (67.6 per cent) and the lowest in Suri-II CD Block (50.6 per cent).

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

District (Urban) Total:		**Persons**	**258,420**	**75,798**	**29.3**	**8,251**	**3.2**	**84,049**	**32.5**	**174,371**	**67.5**
		Males	**132,536**	**63,905**	**48.2**	**4,787**	**3.6**	**68,692**	**51.8**	**63,844**	**48.2**
		Females	**125,884**	**11,893**	**9.4**	**3,464**	**2.8**	**15,357**	**12.2**	**110,527**	**87.8**

It is evident from the above table that out of the total urban population of Birbhum district, 29.3 per cent are main workers, 3.2 per cent are marginal workers and 67.5 per cent non-workers.

Individual town level analysis indicates that the highest proportion of main workers (30.6 per cent) is exhibited by Bolpur Municipality and lowest (26.8 per cent) in Ahmadpur Census Town among all the towns. In case of marginal workers the highest proportion is recorded in Dubrajpur Municipality (6.2 per cent) and lowest (2.3 per cent) in the municipalities of Rampurhat and Suri. The proportion of non-workers varies from the lowest recorded in Bolpur Municipality (66.2 per cent) to the highest in Rampurhat Municipality (70.1 per cent). The proportion of female non-workers is as high as around 91.3 per cent in Rampurhat Municipality.

Note : Percent of Worker to total worker are given in brackets

It can be seen from the above table that the highest proportion of workers are engaged as agricultural labourers (36.9) followed by the workers engaged in other works (33.5 per cent), cultivators (23.1 per cent) and the workers engaed in household industry (6.5 per cent) for the rural areas of the district. The female participation as agricultural labourers is higher than that of male (females 47.1 per cent, males 33.5 per cent). In case of household industry also, the female participation is remarkably much higher (16 per cent) than that of male (3.2 per cent). Females have shown encouraging representation in other works also though their proportion (26.5 per cent) is still much lower as compared to their male counterparts (35.8 per cent).

The pattern of distribution of total workers into different industrial categories at CD Block level portrays that the highest proportion of workers employed as cultivators is registered in Mayureswar-II CD Block (34.2 per cent) and the lowest in Murarai-I CD Block (14.6 per cent). The highest proportion in agricultural labourer category is returned from Sainthia CD Block (46.8 per cent) and the lowest is found in Suri- I CD Block (28 per cent). Under household industry, the highest proportion is recorded in Murarai-II CD Block (18.3 per cent) and the lowest in Mohammad Bazar CD Block (3.3 per cent). So far as the other work is concerned the highest proportion of workers employed in this sector is reported from Suri-I CD Block (50.2 per cent) and the lowest from Mayureswar-I (20.1 per cent).

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN CD BLOCKS, 2001

Note : Percent of Worker to total worker are given in brackets

The above table shows that in the rural areas of the district Birbhum, out of total workers, 24.9 per cent are cultivators, 39.7 per cent agricultural labourers, 6.7 per cent engaged in household industry and the remaining 28.7 per cent is employed as other workers. By sex, proportion of female workers (49.4 per cent) engaged as agricultural labourers is higher than that of male workers (36.2 per cent). Under household industry also proportion of female workers (16.3 per cent) is noticeably higher as compared to male workers (3.3 per cent) but under other works one can see the reverse trend i.e. proportion of male workers (30.7 per cent) is much higher than that of female workers (23.3 per cent).

The CD Block level analysis of distribution of total workers among four industrial categories indicates that there is wide disparity in the economic activities among the various CD Blocks. The proportion of cultivators is as high as 34.2 per cent in Mayureswar-II CD Block and as low as 14.6 per cent in Murarai-I CD Block. In case of agricultural labourers, the proportion of workers varies greatly from lowest being in Suri-I CD Block (28.0 per cent) to the highest in Sainthia CD Block (48.5 per cent). In household industry, the highest proportion of workers were engaged in Murarai-II CD Block (18.3 per cent) as against the lowest proportion found in Mohammad Bazar (3.3 per cent). Likewise, in case of other works, the highest proportion of workers have been noticed in Suri-I CD Block (50.2 per cent) and the lowest in Sainthia CD Block (20.0 per cent).

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

				(51.8)	**(1.3)**	**(2.6)**	**(2.3)**	**(93.8)**
		Females	**125,884**	**15,357**	**111**	**739**	**1,657**	**12,850**
				(12.2)	**(0.7)**	**(4.8)**	**(10.8)**	**(83.7)**

From Table 36 it can be observed that a majority of the urban working population (92 per cent) is engaged in other works followed by household industry (3.8 per cent). About one per cent of the workers is absorbed as cultivators and 3.0 per cent as agricultural labourers. By sex 93.8 per cent of male workers and 83.7 per cent of female workers are engaged in other works. In household industry, the proportion of female workers is much higher (10.8 per cent) as compared to the proportion of males (2.3 per cent).

The pattern of distribution of total workers in four industrial categories shows that the largest proportion of workers employed as cultivators is recorded in census town, Ahmadpur(3.9 per cent) among all the municipal and non-municipal towns (census towns). But proportion of agricultural labourer is highest in Dubrajpur Municipality (8.4). In case of household industry also, the highest proportion of workers have been observed in Dubrajpur Municipality (5.7 per cent) followed by, Sainthia Municipality (5.4 per cent) and Ahmadpur Census Town (4.9 per cent). The proportion of other workers varies from the lowest being in Dubrajpur Municipality (83.4 per cent) to highest in Suri Municipality (95.7 per cent).

Brief Analysis of Inset Tables based on Village & Town Directory (37-47)

Note : Percentage are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the above table that education amenity is available in 81.5 per cent of villages, medical facility in 45.1 per cent villages, improved drinking water in 97.6 per cent villages, post office in 18.8 per cent villages, telephone in 29.5 per cent villages, transport and communication in 34.4 per cent villages, banks in 4.9 per cent villages, agricultural credit society in 16.0 per cent villages, pucca road linkage in 36.0 per cent villages and electricity is available in 86.6 per cent villages in the district of Birbhum.

Among the CD Blocks, the most served CD Block is Nalhati-II with 97.9 per cent villages having educational amenity and Mayureswar II is the least served CD Block with 58.4 per cent of villages having this facility. In case of medical facility, also the highest proportion goes to Nalhati-II CD Block (97.9 per cent) as against only 4.2 per cent obtained in Sainthia CD Block. So far as the availability of improved drinking water is concerned, it is heartening to note that out of 19 CD Blocks, cent per cent villages is served by this facility in 4 CD Blocks (Murarai-II, Rampurhat-II, Mayureswar-I, Sainthia). Of the remaining CD Blocks, the level of availability varies from the highest proportion returned by Nanoor CD Block (99.2 per cent) to the lowest recorded in Mahammad Bazar CD Block (92.8 per cent). The availability of postal facility ranges from the highest proportion recorded in Murarai-II CD Block (31.3 per cent) to the lowest in Dubrajpur CD Block (12.9 per cent). The telephone facility is available in 47.6 per cent of villages in Suri-I CD Block which is the highest and just 10.1 per cent noticed in Rajnagar CD Block which is the least among all the CD Blocks. In respect of availability of bus service, railway station and navigable waterway etc. within the village, the most of the villages in Suri-I CD Block (57.1 per cent) have this facility while least of the villages are having this facility is observed in Mayureswar-I CD Block (15.7 per cent). In case of availability of banking services, the most served CD Block is Labpur with 8.7 per cent of villages having this facility whereas the least served CD Block is Sainthia (1.9 per cent). The Agricultural Credit Societies are available in as many as 51.7 per cent of villages in Rajnagar CD Block and as against just 5.6 registered in Khayrasol CD Block. In case of proportion of villages connected with pucca road, the highest is in Murarai-II CD Block (86.6 per cent) while the lowest in Rampurhat-I CD Block (16.8 per cent). The most of the villages have been electrified in Nanoor CD Block (97.7 per cent) and the least in Rampurhat -I CD Block (70.8 per cent).

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the above table that on an average 93.9 per cent of population of the district is served by educational facility within their villages; medical facility is available to 64.5 per cent, improved drinking water to 98.8 per cent, post office to 39.2 per cent, telephone to 46.6 per cent, transport and communication facility to 48.0 per cent, banking services to 13.6 per cent, agricultural credit society to 30.3 per cent, approach by pucca road to 50.4 per cent and electricity is available to 92.5 per cent of population.

The analysis of availability of various infrastructural facilities to the rural population within their villages reflects that among CD Blocks, maximum population is served by educational facility in Nalhati-II and Labpur CD Block (99.8 per cent) each and the minimum in Dubrajpur CD Block (80.0 per cent). In case of medical facility, the maximum population is served in Nalhati-II CD Block (99.8 per cent) while the minimum is in Sainthia CD Block (6.7 per cent). In case of availability of improved drinking water the highest proportion of population is served in the CD Blocks of Murarai-II,Rampurhat -II, Mayureswar-I, Sainthia CD Block (100.0 per cent) each while the lowest in Rampurhat-I CD Block (93.0 per cent). It may be mentioned here that drinking water is available to total population in only four CD Blocks. Thus out of 19 CD Blocks it is available to total population in 4 CD Blocks and in 15 CD Blocks it is available to the greater proportion of the population. The highest proportion of population is served by post office is noticed in Nalhati-II CD Block (52.5 per cent) whereas the lowest in Suri-II CD Block (22.6 per cent). The maximum population served by the telephone facility is observed in Suri-I CD Block (73 per cent) while the minimum is found in Murarai-II CD Block (25.1 per cent).

In case of availability of transport communication facilities Suri-I CD Block with 69.9 per cent is reported to be the most served and Nalhati-II CD Block with 27.7 per cent is the least served. The situation of availability of banking services shows that the highest proportion of population is served in Rampurhat-II CD

Block (31.5 per cent) while the lowest is obtained in Mayureswar-II CD Block (3.0 per cent). The service of agricultural credit societies is available to the maximum extent returned in Rajnagar CD Block (65.7 per cent) while the lowest is seen in Labpur CD Block (15.2 per cent) as against the overall average of the district (30.3 per cent). As a good network of pucca road maximum population is served in Murarai-II CD Block (91.3 per cent) as against the minimum proportion observed in Mayureswar-I CD Block (28.7 per cent). The highest proportion of population is served by electricity is found in Nanoor CD Block (99.5 per cent) in contrast to the lowest proportion registered in Rampurhat-II CD Block (77.7 per cent).

On the basis of above analysis it is crystal clear that there is a wide variation in availability of infrastructural facilities among the CD Blocks which in turn generate social and economic inequality among the population. For the balanced socio-economic development it is imminent to promote and develop the infrastructural facilities and the basic amenities on uniform basis. Poorly served areas should be given differential treatment and favour in local area planning.

Brief Analysis of Inset Tables based on Houses & Household Amenities data of Houselisting Operations (48-52)

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The analysis of ownership status of houses presents some features regarding occupation of number of room under different tenure categories.

It is observed that the availability of living room in owned category is better than that of rented category for the district as a whole with median number of 2 rooms. This is true if we consider rural as well as urban areas separately. In 'rented' category as well as 'others' category, the median room number is one for the district as well as for its rural and urban components. So far as the schedule caste households and the scheduled tribe households are concerned, the median size number of rooms is one for each tenure category for the district as well as for its rural and urban areas.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI-PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District / CD Block	Total			Rural			Urban

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note :

Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestas sheets, bricks, lime and stone and RBC/RCC concreate are used of roof.

Semi permanent : 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It can be observed from the above table that in the district of Birbhum, 17.3 per cent households live in permanent houses, 22.7 per cent in semi-permanent and 59.9 per cent live in temporary houses. The proportion of households living in permanent houses in urban areas (57.6 per cent) is much higher when compared with corresponding figures for rural areas (13.4 per cent). In contrast, the proportion of households living in urban areas in semi-permanent and temporary houses is much lower than that of households living in rural areas which shows the poor housing condition found in rural areas in respect of durability of houses.

Among the CD Blocks, the highest proportion of households (25 per cent) lives in permanent houses in Suri-I and the lowest proportion (6.4 per cent) live in Nalhati-II. Again, The highest proportion (54.2 per cent) of households living in semi-permanent houses is in Murarai-II, whereas the lowest proportion (10 per cent) is recorded in Khoyrasol. Also it is observed that in Nanoor, the highest proportion (75.3 per cent) household live in temporary houses, whereas the lowest proportion (36.5 per cent) is lowest in Murarai-I CD Block.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series : Tables on Houses, Household amenities and Assets.

* Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved Drinking Water Source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage menas closed and open drainage.

It is evident from the above table that in Birbhum district 71.3 per cent households have access to improved drinking water facility, 27.5 per cent have electricity, 13.9 per cent have bathroom, 16.1 per cent have toilet facility and 33.4 per cent households have drainage. The proportion of households having these facilities in urban areas is much higher as compared to corresponding figures of the rural areas except in the case of safe drinking water. In rural areas, the proportion (71.6 per cent) of households having access to improved drinking water facility is slightly higher than that of urban areas (68.9 per cent). Water is the bare minimum necessity to support the human life which is available to the lowest proportion of households in Muhammad Bazar CD Block (36.2 per cent) and to the highest proportion of households in Nalhati-II CD Block (89.4 per cent). The highest proportion of households served by electricity is noticed in Suri-I CD Block (36.4 per cent) while the lowest in Nalhati-II CD Block (12.1 per cent). In case of availability of bathroom, the maximum households have been found served in Suri-I CD Block (19 per cent) and the minimum in Nalhati-II CD Block (6.5 per cent). The availability of toilet facility varies between the lowest proportion returned in Khoyrasol CD Block (7.3 per cent) and the highest obtained in Suri-I CD Block (19.3 per cent). The highest proportion of households, whose houses are connected with the drainage to dispose of wastewater is reported from the Labpur CD Block (49.2 per cent) whereas the lowest is from Khoyrasol CD Block (15.6 per cent).

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The pattern of use of fuel for cooking in Birbhum district shows that the maximum proportion (36.2 per cent) of households are using cowdung cake as fuel for cooking. Other important fuels used by the households are crop residue (19.0 per cent), coal/lignite (17.5 per cent) and firewood (16.5 per cent). In rural areas, cow-dung cake, crop-residue and firewood whereas in urban areas, coal/lignite and cooking gas are the mostly used fuel for cooking. About 0.5 per cent people have reported having no cooking in their houses. Most probably they are taking their meal from outside.

Among the CD Blocks, cow-dung cake is used as main fuel for cooking by most of the households in 12 CD Blocks namely, Murarai-I (37.4 per cent), Nalhati-II (50.0 per cent), Rampurhat-I (46.6 per cent), Rampurhat-II (57.3 per cent), Mayureswar-I (56.5 per cent), Mayureswar-II (34.1 per cent), Suri-II (36.8 per cent). Sainthia (38.9 per cent), Labpur (52.5 per cent), Nanoor (66.1 per cent), Bolpur Sriniketan (39.6 per cent) and Illam bazar (35.6 per cent). In the CD Blocks Murarai-II and Nalhati-I crop residue is used as main fuel by the households whereas in Dubrajpur, Khoyrasol and Suri-I the main fuel for cooking is coal/lignite. However, fire-wood is mostly used in the CD Blocks of Muhammad Bazar and Rajnagar as fuel for cooking in different households.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Out of a total number of 593,886 households in the district, 214, 977 (36.2 per cent) are availing banking services. Banking services are very much instrumental in bringing about socio-economic change and development in our society but still it is availed by slightly more than one-third of the total households.

Further, out of total households, radio/transistor is available to 233130 (39.3 per cent) households, television to 109,074 (18.4 per cent) households, telephone to 15,784 households (2.7 per cent), Bicycle to 331,952 (55.9 per cent) households, scooter/motor cycle/moped to 22,988 (3.9 per cent) households, car/ jeep/van to 5,105 (0.9 per cent) households and 195,787 (33.0 per cent) households have none of these assets. The proportion of people having different assets is much higher in urban areas as compared to rural areas in each case. The proportion of people, who have none of the specified asset among rural population is higher than that of urban population.

CD Block level analysis shows that the highest proportion of households availing banking services is returned from Suri-II (47.9 per cent), while the lowest is from Nalhati-II (21.0 per cent). The proportion of households having none of the specified assets is the highest in Murarai-I CD Block (43.6 per cent) whereas the lowest in Illambazar CD Block (26.4 per cent). This shows wide inter Block disparity prevailing in social and economic condition of the people.

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

Places of archaeoloigical importance :

Birbhum district has so far yielded a very small amount of pre-historic artefacts. Some post-historic sites however deserve mention. Most important of them is neolithic-chalcolithic site of Mahisdal in Bolpur on the north bank of the river Kopai. There was settled agriculture in the chalcolithic period, rice was already a staple crop and there was enough surplus produce to need the construction of the pit-granary. This period dates back to 1380 and 855 B.C. Another important neolithic-chalcolithic site is Chandidas-Nanur. The continuity in the sequence of human settlements at this place through successive steps of economic, social and technological development is however not certain. Still another important neolithic-chalcolithic site is the so called Surath Rajar Dhibi in Supur.

Place of religious and historical importance :

A word on Birbhum temples to begin with. David McCutchion who studied these temples closely, had opined that the present structure of none of the temples in Birbhum dates back earlier than the Mughal period although foundations and deities may be much earlier. According to him, "this particular technique of temple decoration seems to have arisen with the revival of Hindu architecture during the Mughal period in continuity with the previous technique of mosque decoration (as at Rajnagar)."

Bakreswar : It is a Sakta pithasthan and as already stated, Sati's *manas* (heart) was fell here. It is also a famous Saivite pilgrim centre hallowed by the memory of the tantric sage Aghoribaba. The place is visited by a good number of ordinary tourists, trantics (followers of Tantra cult) Bauls and others. It has a number of temples along with a number of sulphurous hot springs besides a few cold springs. They all discharge into a rivulet which joins a small stream called the Papahara river flowing nearby. All the springs are, as usual, connected to numerous legends. The temple on the eastern bank of the river Bakreswar is connected to the legend of disfigured Astabakra who was actually a renowned sage named Subrita. The main temple is in Orissan style, but the majority of the temples are in chala style.

Bhadrapur : Bhadrapur is in Nalhati. Bhadrapur contains a dilapidated house of Maharaj Nandokumar with an imposing entrance and an old Siv temple within.

Bhadiswar : Bhadiswar is in Murarai PS. Two brick built mounds (at Sasthitala), locally said to be the ruins of the palace and temple of one King named Bhadreswar (or Bhadrasen) is its main attraction. The mounds are protected by the Government. Two stone images of Haragauri (broken) and Manasa and one broken and undeciphered stone-inscription were discovered from the village and kept in Haragauri temple with the inscription fixed up on its wall. Local belief says that the Haragauri image was broken by Kalapahar.

Birchandrapur : This village is also known as Ekchakra or Ekchaka. It is in Mayureswar PS. Legend says that the Pandav brothers lived here during their long exile and it is considered to be a pilgrim centre. Two large fairs - Rasjatra and Doljatra - are held here every year. There is a big temple of Banka Rai, who was worshipped by Nityananda, an associate of Sri Chaitanya. The neighbouring village Garbhabas is his birthplace and is a pilgrim centre of the Vaishnavites. A fair of seven days duration takes place there in the Bengali month of Kartik on the eve of Goshthastami in honour of Nityananda.

Dubrajpur : All temples in Dubrajpur are Siv temples and built of brick. Akshay Dasi's Siv temple has some nice carvings. Sivalaya, a group of five shrines in Mahatopara is also worth mentioning for fine craftsmanship. Their bases and platform are made of porous sand. In Modipara there are three Siv temples in a row with some terracottas on the facade and nearly three temples of the Nayak family are also decorated with geometrical designs with crude terracotta panels of goddesses. Dubrajpur is also a place of interest for two mounds of granitic rocks locally called 'Mama-bhagne pahar'. From the top of the rock which is 60 feet high, the Parasnath hill to the south-west, Rajmahal hills to the north and the Panchet hill to the south-west can be seen.

Ghurisa : This village is in Ilambazar PS and was once a great centre of Sanskrit learning, specially in Nyaya. There are sixteen temples here of which two are worth mentioning. The Raghunathji temple near the Sanskrit school is decorated with terracotta tiles of figures and designs based upon Hindu mythology. The temple is of the thatched-cottage type. But the nearly nine-towered (navaratna) temple of Gopal Lakshmi Janardanji displays many terracotta plaques depicting European life besides scenes from Hindu mythology.

Handa : This village in Bolpur PS contains a richly decorated Jor-bangla temple with profuse terracotta decorations on it depicting Dasavatar and Dasmahavidya sequences along with vegetational motifs. It is said that some 200 years ago it was a Kali temple worshipped by a band of robbers. There is no deity at present.

Joljol : This village in Bolpur PS is now more known as *Kankalitala* (knaakaalitala). It is considered to be one of the 52 *pithasthans* (sacred places) where the waist (*knaakaal*) of Sati fell.

Kenduli : This village also called Kendu-Bilwa or Joydev-Kenduli in Bolpur PS. It is famous as the birth place of the great Sanskrit lyric poet Joydev of 12th century AD who was the court poet of Lakshmansen and composer of Gitagovindam in praise of Radha and Krishna. It is a great pilgrim centre of the Vaishnabs and Bauls drawing thousands of them to the annual fair held in memory of the poet and on the last day of the Bengali month Paus which continues upto the first two days of Magh. There is a temple on the site of Joydev's house called Radha-Vinod temple. It was built by the mother of Maharaja Kirtichand Bahadur of Barddhaman in AD 1683. It is a Navaratna temple. It's facade is decorated with terracottas depicting Dasavatar of Vishnu, scenes from the Ramayan, Mahisa-surmardini, and other gods and goddesses including Siv-lingam. Though the presiding deities of the temple are called Radha and Krishna, there is no scene on their lives.

Labhpur : Previouly known as Attahas, Labhpur is a place which is considered to be another Sakta pithasthan where, it is said , Sati's lips fell and the temple of goddess Phullora has been constructed on the spot. There is a large dried up lake named Daldali nearby and the legend goes that this is the Debidaha of the Ramayan from where Ramchandra got the blue lotuses for the worship of Durga.

Mallarpur : It is famous for the old shrine of the Malleswar Siv (*anadi-lingam*). There are 25 temples surrounded by the wall, the majority of which are small *char-chala* shrines each containing a *lingam*, all built of *phulpathar*. One shrine contains Debi Siddheswari. Some terracotta plaques can be found scattered on the temples. There are three religious fairs held on the occasions of *Maghi Purnima*, *Siv Chaturdasi* and on the day before the *Chaitra Sankranti*.

Margram : The biggest village in Rampurhat PS situated on the river Dwarka. There is a big dilapidated uninhabited building in the village, said to be the residence of a dewan in the court of Sirajuddaula. There are four *samadhis* (graves) of Sha Garib-Ulla-Biabam, Sha-Madar, Sha-Karamuddin and of Jafar Khan Gazi situated respectively on the West, South, North and East of the village. Jafar Khan Gazi's dargah (locally called Budapeertala) deserves special mention. Inside the dargah there is a hidden stone which is called the Mandaveswar Siv. Only the top of this stone is visible. Hindu devotees worship this Siv on some religious occasions, specially during Chadak festival and a fair is held there at that time. Besides, three more fairs are held in the village, one in the Bengali month of Paus at Budapeertala and two on the occasion of other festivals.

Nalhati : The village is considered to be one of the 52 Sakta *pithasthans*. There is a temple on the fort of hillock, known as Lalateswari temple, where the presiding deity is goddess Lalateswari, a form of Sakti. Popular belief is that Sati's *nala* (lower part of the elbow?) fell here. However according to a parallel legend it was the capital of Hindu monarch Raja Nala, the ruins of whose palace are still traceable on a hillock close to the town Nalhati, where also a battle is said to have been fought between the Raja and the conquering Muslim forces.

Nanur : Nanur is most famous as the birth place of Chandidas, the vaishnab lyric poet of the 14th century AD and for this reason it is also a famous Vaishnab pilgrim centre. Chandidas was a Vaishnavite. However stories spin around his conversion from a Sakta to Vaishnab. It is said he was initially devoted to two tantrik goddesses, Chandi and Basuli. There is a mound to the north of the village near the temple of Basuli or Bisalakshi worshipped by Chandidas which is of archaeological interest. It is said that the residence of Chandidas was also there. The main Bisalakshi temple is of little architectural interest, but is associated with a number of Siv temples of more traditional design with some terracotta reliefs on them. The broken Pal images of Vishnu under a tree on top of the mound,

the site of an earlier temple, provide archaeological interest.

Rajnagar or Nagar : This place was an important seat of administration of the Muslim rulers (*jagirdars*) of those days. It was once a prosperous area. The old imambara, nahabatkhana of the Hindu chieftains, the burial place of the Muslim overlords, the twelve-domed Matichor mosque all on three sides of the lake named Kalidaha are worth visiting. There is a wall of a ruined mud-fort said to have been raised in the 18th century as a protective measure against Maratha inroads. This wall ran for a distance of 32 miles and was 12 to 18 feet in height with a broad ditch outside.

Sainthia : Today's Sainthia consists of two villages, Debiganj and Nandipur of earlier times. This Nandipur is also one of the 52 Sakta *pithasthans*, being the seat of Nandikeswari. As already stated, here fell Sati's Hara or Haramsa (part of the necklace). A small heap of soil covered with vermilion mixed in mustard oil is placed on a platform encircled by banyan and other trees. A small door-frame is placed on the outer side of a hollow there, and daily worship is undertaken at this place. A small temple of Siv called Nandikeswar is also there. On the full-moon day of Paus and Baisakh people visit the temple and get Prasad. There are also a new Jain temple and three mosques. A fair called Brahmadaityer mela is held on the last day of Paus.

Supur : A village in Bolpur PS. According to local tradition it was the residence of Raja Surath. There is a lingam here called Suratheswar which the Raja used to worship. But according to David McCutchion, it is "an ancient mound, once a temple site with a Pala period torso lying on it". There are eight or more Siv temples in this village, one in Pancha-ratna style and the rest are rekh-deuls. The must impressive is octagonal with terracotta decoration from top to bottom on all eight sides.

Surul : Surul is a village in Bolpur PS situated 3 miles west of Bolpur. There is a well-decorated Pancha-ratna temple of Lakshmi-Janardan attached to the rajbari (residence of the former *Zamindar* Biswambhar Roy) here. It is the earliest and most extensively decorated temple in Birbhum. It is a Pancha-ratna temple. The style is more refined than at Kenduli, but still lively and well-composed. The archway panels, crowded with figures depict scenes from the Ramayan in all 3 sides and round includes the Dasavatar of Vishnu and many Krishnalila scenes. There are also some Siv temples, with equally beautiful and interesting terracotta panels in the archways.

Suri : Suri is the headquarters town of the district, but mention should be made of the carved brick temple at Sonatorpara. This carved brick temple is known as Rasmancha or Radha-Damodar temple and is one of the finest Birbhum temples. It is a medium sized *at-chala* (eight domed) built of brick and phulpathar with elaborately carved facade. Panels above the archwary represent scenes from the life of Krishna in left and centre, Vishnu anantasayi approached by other gods on their respective mounds in its right side and the panels rising vertically and continuing the top depict Dasavatar of Vishnu together with other gods and musicians etc.

Tarapith : A village previously called Chandipur, now famous as Tarapith. It is within Rampurhat PS. A brick built temple of goddess Tara and a big *smasan* (place for creamation of the dead bodies of Hindus) by the side of the river Dwarka are located here which are frequented by pilgrims. It is said that the Sati's eye-ball fell here and hence it has become one of the 52 Sakta *pithasthans*. Name of a great tantric sage of the late 19th century, Bamakshyapa is associated with the place. Every year pilgrims gather here on the occasion of worship of Ma Tara or Chaturdasi mela in the Bengali month of *Aswin* when a fair is held here which continues for 10 days. A fair is also held during the festival of Baruni Snan in March.

Places of tourist Interest :

Bolpur-Santiniketan :

Bolpur is a municipal town in the district which is important as a trade-centre of rice, but more important nowadays as a gateway to the Santiniketan (Visva-Bharati). The 'Bolpur' is connected to a popular legend about Raja Surath. The nearby village of Supur was his seat. It is said, once he made 100,000 sacrifices (Bali) to Kali and the place thus came to be called Balipur, from which the name 'Bolpur' arrived. But the legends and anecdotes apart, the history of Bolpur does not go much beyond. As per Captain Sherwill, it was a small hamlet with no more than 163 'Kutcha' or 'mud' houses during 1851-52. A major road from 'Bancoorah to catwa' (Bankura - Katwa) skirted the village at its extreme north and other roads had the width of no more than 'footpaths'. There were other villages such as, Makrampur, Kalikapur, 'Kasheenuggur', 'Kishennuggur or Soorool' that clubbed together form today's municipality. Two main roads, one from 'Burdwan to Soory', another from 'Bancoorah to Catwa' entered Surul from the western side and the road to Berhampore branched off towards

the north-west. By the middle of the seventies of the 18th century, Government offices were shifted to Bolpur and Bolpur gained prominence to which was added the glory of Santiniketan (Visva-Bharati).

Visva-Bharati

Visva-Bharati is situated in a rural setting in the district of Birbhum. The place is called Santiniketan. The university campus is about 3 km. from the Bolpur Santiniketan railway station. The university has two campuses, one at Santiniketan and the other at Sriniketan, which is further 3 km. from Santiniketan. The institutional buildings and academic departments are distributed in the two campuses.

It is an unconventional university in every respect and structurally unparallel. On a seven acre plot with a few buildings on it which Maharshi Debendranath Thakur dedicated by a trust of deed for establishment of an Ashram, a Brahma Vidyalaya and a library, Rabindranath started his school Brahmacharyashram formally on and from 23rd December, 1901 (7th *Pous*, 1308 B.S.) with no more than five students on the roll. From that day on, the school was a conscious repudiation of the education system introduced by the British rulers which, with some minor modifications, is still prevalent in India. His initial goal was to establish the pattern of ancient Indian education (*Tapovan*) system in which man and nature remains in perfect harmony and both teachers and students share the single integral socio-cultural life. In Santiniketan the classes are still held in open air in the shade of trees. The school introduced the varied and unconventional curriculum with equal educational emphasis on joyful creative expressions in terms of art and culture through which manifold faculties of the human personality are manifest. From 1925 this school came to be known as Path Bhavan (formally a part of Path Bhavan, a Primary School named Sisu-Vibhag with separate hostel facilities for boys and girls was established later). This was the first stage in the history of the evolution of Visva-Bharati.

Rabindranath was acquainted with the inherent weaknesses of our education system. From his long association with the peasantry of Bengal (Galpaguchchha, Chhinnapatra etc.) he knew that on the one hand our rural people badly needed education and on the other hand, the so-called '*Bhadralok*' class that sprouted particularly in the British India was alienated from the entire nation at the grass root level, yet took pride in their own alienated being and superficial culture. The difference had to be wiped out. It was possible only by promoting the spirit of enquiry in the receiver, by providing him with questions relevant to him as a man among men and nature around him and by making his acquaintance with the productive activity and life at the grass root level.

After Rabindranath received Nobel Prize in 1913, he travelled far and wide over all the continents of the world on invitation. His views became more universal and the second stage in the evolution of the institution began. Santiniketan from 1918 onward became a centre for the co-ordinated study of the different cultures. Thus the institution chose for its motto the Vedic text "*Yatra Visvam bhavatyekanidam*" (where the world makes a home in a single nest),

On 23rd December 1921 Visva-Bharati became a registered public body which adopted a constitution of its own. In 1923 the Department of Higher Studies became Uttar Vibhag to be renamed Vidya Bhavan in 1926. Hindu philosophy, Bengali literature and history, Hindustani literature, Vedic and Classical Sanskrit, Pali, Prakit, Chinese, Tibetan, Persian, Arabic, German, Latin and Hindi formed its areas of study and research. In 1937 China Bhavan, the department of Sino-Indian studies was established, and eversince remains a remarkable symbol of cultural collaboration. In 1939 the Hindi Bhavan with certain distinct projects of studies was formed. Kala Bhavan came into being in 1921 as an institution for both Fine Arts and Music, but later in 1934 Sangeet Bhavan for music as a distinct discipline was founded.

The Institute of Rural Reconstruction was founded in 1922 and inaugurated by its first Director Leonard Elmsherst on 6th of February of the same year at a site later to be named Sriniketan. This was the second contiguous campus of Visva-Bharati. The chief object of the institute was to bring back life in its completeness to the villages and help people solve their own problems instead of a solution being imposed on them from outside. A scientific study of the village problems before a solution attempted was given utmost importance. With a view to help children of the neighbouring villages to acquire knowledge for the welfare of the village community a school named Siksha Satra was started in Santiniketan in 1924 which shifted to Sriniketan in 1927. The Lok-Siksha Samsad for the propagation of non-formal education was started in 1936. Siksha Charcha for training village school teachers started next year. Rabindra Bhavan, an archive on Rabindranath for study and research on him was established in 1942, one year after Gurudev's death. In 1948, Vidya Bhavan, a teachers' training institution came into being. Apart from these institutes, Visva-

Bharati at present also comprises Siksha Bhavan (Institute of Science), Palli Siksha Bhavan (Institute of Agricultural Studies), Uttar Siksha Sadan (Institute for Higher Secondary Education) and Agro-economic Research Centre (A research centre sponsored by the Ministry of Agriculture integrated with Visva-Bharati). These four institutes were founded after Visva-Bharati was declared to be a Central University and "an institution of national importance" by an Act of Parliament in 1951 and it was granted the status of a unitary, teaching and residential university. In 1952 a Nursery School named Ananda Pathsala was also established running on the lines of Pre-Basic Nursery Schools. There is however no residential arrangement for the students of Ananda Pathsala. Students are mainly drawn from the homes of the people residing in Santiniketan and Sriniketan townships.

The educational aspect apart, the place Santiniketan itself is worth visiting for many exquisite objects that make the place a foreshadow of heaven. There is a prayer hall which is actually a glass temple and referred to as Mandir. O'Malley in Bengal District Gazetteers, Birbhum, 1910 had quoted a pious Bengali pilgrim according to whom this glass temple was "a marvelous edifice. The roof is tiled, but the enclosure is of glass, some painted and some coloured. The Crystal Palace, London, is a glass house. We have not heard of any other besides it made of glass. This glass hall is about 60 feet long and about 30 feet broad. The pavement is of white marble. There are suitable inscriptions in it in Sanskrit. It has four gates from four sides of the garden. Towards the eastern gate there is a beautiful portico with a tower over it, and the word OM in Bengali, like the figure of the cross in Christian churches, flourishes over the topmost pinnacle. Suitable inscriptions, both in Sanskrit and Bengali, are inscribed on beautiful pedestals for flower vases, and placed at the approach to the holy place. There is a beautiful artificial fountain, which plays on special occasions, and on the two pillars near it are stuck two large pieces of marble, the one bearing an inscription in Sanskrit and the other in Bengali, describing the Blessedness of heaven - of which the place assuredly is the foreshadow." Most of all the buildings in Santiniketan are fine blend of modern architecture and Buddhist monastery style and they are decorated with the beautiful paintings, frescos and murals done by three foremost artists of our time such as Abanindranath Thakur, Nandalal Bose and Binode Behari Mukhopadhyay and others and the foregrounds are adorned with great sculptor Ramkinkar Baiz's sculptures and that of others. Some of the buildings namely, Udayan, Shyamali, Konark, Udichi and Punascha are particularly associated with Rabindranath and are tourists' special attraction.

There is Rabindra Bhavan which is the treasure house of the manuscripts of Rabindranath, papers of the Thakur family, a collection of painting and sketches by the poet and a few others. Thakur memorabilia including gifts and addresses to the poet from many parts of the world and a large collection of photographs of which periodic exhibitions are held. The audio-visual unit preserves a large collection of discs and cassettes containing readings and songs by the poet himself and others. Films and documents on the poet, collected from India and aborad, are also in this wing. A specialized library contains books used by the poet and a large collection of works on him and his work. A newly built gallery houses a permanent exhibition with photographs and memorabilia of the poet's life, work and traels and other activities. And the second gallery houses original paintings by him. This Bhavan is a unique research centre for studies on Rabindranath (Detail of Rabindra Bhavan has been taken from 'Visva-Bharati - A Profile').

Accommodation

Tourists can get accommodation in Santiniketan Tourist Lodge, Santiniketan Second tourist lodge and Bakreswar Tourist Lodge.

Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The people of Birbhum fight no less with their day to day miseries, suffer no less setbacks, yet they stoically maintain their perfect peace of mind which is reflected in their ever-smiling faces. This inherent strength of pleasantness and calm and quietness derives from all-pervading Baul philosophy that embraces the world through mystic aspect of divine love.

Following persons are the historical figures associated with the district :

1. Bhavadeva Bhatta (A scholar of mimamsa, siddhanta, tantra, agama, ganita, jyotirvidya, arthasastra, dharma, niti, smriti and ayurveda and written treatises on all these subjects)

2. Joydev (A fore-ranking Medieval Sanskrit poet of Gita Gobinda fame)

3. Chandidas (The pioneering Vaishnab Bengali lyric poet of 14th century AD famous for his Padavalis)

4. Rabindranath Thakur (The district contributed a lot to the socio-economic and cultural progress of the state in the form of long creative and active association of the poet with it)

5. Tarasankar Bandopadhyay (A foremost novelist of our time who chronicled the feudal Birbhum in transition)

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

PEOPLE ORIENTED

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

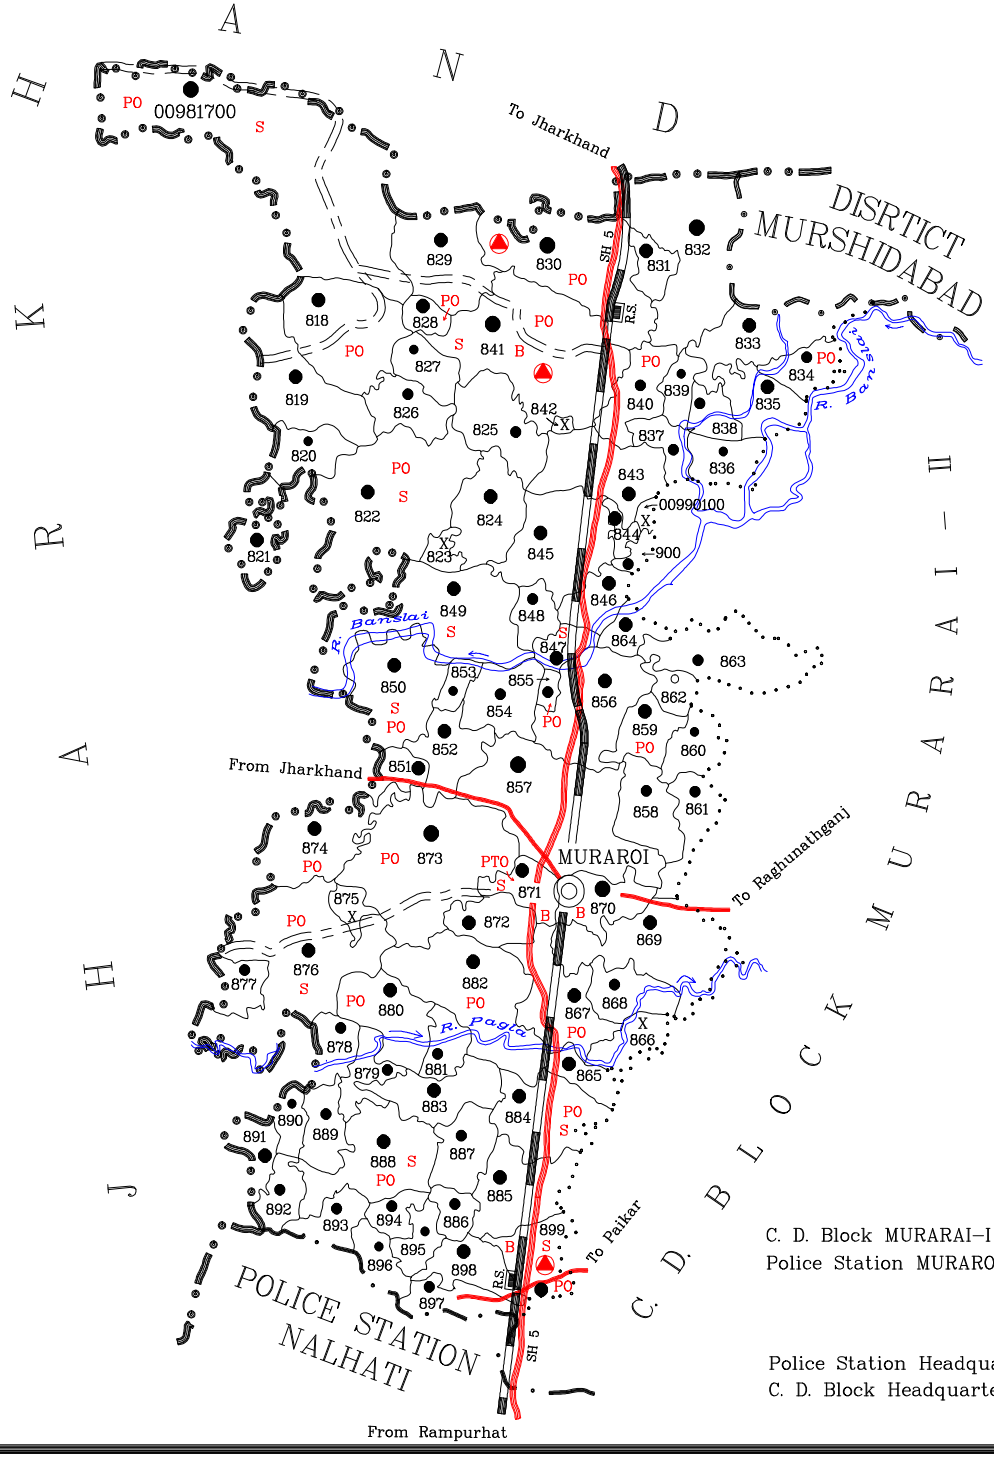

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Appendix to Town Directory

APPENDIX TO TOWN DIRECTORY

TOWNS SHOWING THEIR OUT GROWTH WITH POPULATION

Serial Number	Name of the Town with location code	Population of the Core Town	Name of Out Growth	Population of Out Growth
1	2	3		
There is no Out Growth in Birbhum district				

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Out of 19 CD Blocks of district, the CD Blocks Muhammad Bazar and Sainthia have the highest number of Gram Panchayats (12). The CD Block Sainthia has highest number of villages (228 and 4 part villages). The second position in terms of number of Gram Panchayats is occupied by the three CD Blocks of Nalhati-I, Labpur and Nanoor. Each of the CD Block has 11 Gram Panchayats. Among these three CD Blocks, the highest number of villages is in Labpur (179). Among the blocks of the district, Nalhati -II has the least number of villages, which is 48.

Annexure

Annexure - II : Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure

ANNEXURE – II (A)

AGE SPECIFIC MARITAL FERTILITY LEVELS - 1991 IN THE DISTRICT OF BIRBHUM

Age Group	Birbhum	West Bengal
1	2	3
15-19	0.172	0.160
20-24	0.204	0.191
25-29	0.142	0.133
30-34	0.087	0.082
35-39	0.059	0.050
40-44	0.029	0.030
45-49	0.014	0.016

Source : Fertility Tables - F Series 1991 Census

The fertility level in the district in all age groups except in the age group 40-44 and 45-49 are higher as compared with the State figures. The highest fertility level in both the district and the State has been reflected in the age group of 20-24. The fertility differentials between the district and the State are highest in the age group of 20-24. The differentials are also pronounced in the age groups 15-19, 25-29 and 35-39.

Annexure

ANNEXURE – II (B)
OTHER FERTILITY MEASURES IN THE DISTRICT OF BIRBHUM, 1981-91

	Birbhum		West Bengal	
Fertility Measures	1981	1991	1981	1991
1	2	3	4	5
G.F.R	142	131	153	122
G.M.F.R	184	161	185	158
T.F.R	4.4	3.8	4.3	3.6
T.M.F.R	5.5	5.1	5.7	5.1
C.B.R	35.1	31.3	34.7	29.0
No. of children ever born per woman in the age group 45-49	-	4.6		4.6
Mean age at marriage	-	16.9		17.2
Child woman ratio	-	79.0		71.1

It is evident from Annexure-II(B) that the different fertility measures except TFR and CBR reveal lower levels of fertility in the district compared to the State average in 1981 but in 1991, all fertility measures reveal higher levels in the district except TMFR and number of children ever born per woman in the age group 45-49 which is same both in State and district. Mean age at marriage in the district (16.9) is lower than the State average (17.2) in 1991.

Annexure

Mortality :

Apart from fertility and migration, mortality is also considered as the dynamics of population change. In census, information on the questions on children ever born and children surviving by sex is collected from all ever married women. From this, estimates of child mortality have been worked out by age of mother by using Brass technique. The table below shows the estimates of child mortality in 1981-91 in the district of Birbhum.

ANNEXURE – II (C)
ESTIMATE OF CHILD MORTALITY, 1981-91 IN THE DISTRICT OF BIRBHUM

Mortality ages	Census Year	West Bengal			Birbhum		
		P	M	F	P	M	F
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
q_1	1981	95	103	57	103	116	89
	1991	62	75	51	87	101	74
q_2	1981	102	106	98	111	117	105
	1991	81	79	83	99	109	95
q_3	1981	111	113	110	126	133	118
	1991	86	86	85	109	116	105
q_5	1981	124	123	125	141	143	140
	1991	94	94	92	117	121	112

Source : Occasional Paper No. 1 of 1997

The estimates of child mortality by ages 1,2,3 and 5 have been shown in the table as q_1, q_2, q_3 and q_5. It is evident from the table that male child mortality of the district in all the age group is higher than that of female both in 1981 and 1991. At each ages the mortality levels in the Birbhum district are higher than the State average for both the sexes in 1981 and 1991.

Source : Occasional Papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the State as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position occupies by Hugli for GMFR, TFR and TMFR. Number of children ever borm per woman in age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the State average of 4.56 and the minimum number is observed in Kolkata. Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

ANNEXURE – IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Uttar Dinajpur		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
A. Migrants born within the state of Enumeration	19,082,558	4,489,736	14,592,822	445,608	91,204	354,404
	(77.4)	(60.0)	(84.9)	(71.3)	(52.2)	(78.7)
i) Migrants born elsewhere in the district of Enumeration	14,526,298	2,892,376	11,633,922	338,438	52,425	286,013
	(58.9)	(38.7)	(67.7)	(54.1)	(30.0)	(63.5)
ii) Migrants born in other district of the State	4,556,260	1,597,360	2,958,900	107,170	38,779	68,391
	(18.5)	(21.4)	(17.2)	(17.1)	(22.2)	(15.2)
B. Migrants born in other State of India	2,491,932	1,352,219	1,139,713	66,039	22,334	43,705
	(10.1)	(18.1)	(6.6)	(10.6)	(12.8)	(9.7)
C. Migrants born in other countries	3,090,393	1,636,343	1,454,050	113,576	61,145	52,431
	(12.5)	(21.9)	(8.5)	(18.2)	(35.0)	(11.6)
Total Migrants	**24,664,883**	**7,478,298**	**17,186,585**	**625,223**	**174,683**	**450,540**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

It is seen from table IV(A) that out of total migrants in the district, 71.3 per cent migrants were born within the State of enumeration, 10.6 per cent and 18.2 per cent migrants had their places of birth in other States of India and other countries respectively. Similar trend has been observed in the table pertaining to State. The female proportion of the migrants born within the State of enumeration is higher than males in respect of both the district and State.

Percentage distribution of Migrants by place of birth, 2001 Census

Migration :

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/ her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below :

ANNEXURE – IV (A)
PERCENTAGE DISTRIBUTION IF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	West Bengal			Birbhum		
	Persons	Males	Females	Persons	Males	Females
A. Migrants born within the state of Enumeration	19,082,558	4,489,736	14,592,822	795,950	156,374	639,576
	(77.4)	(60.0)	(84.9)	(92.1)	(87.0)	(93.4)
i) Migrants born elsewhere in the district of Enumeration	14,526,298	2,892,376	11,633,922	638,338	119,583	518,755
	(58.9)	(38.7)	(67.7)	(73.9)	(66.5)	(75.8)
ii) Migrants born in other district of the State	4,556,260	1,597,360	2,958,900	157,612	36,791	120,821
	(18.5)	(21.4)	(17.2)	(18.2)	(20.5)	(17.6)
B. Migrants born in other State of India	2,491,932	1,352,219	1,139,713	57,672	17,602	40,070
	(10.1)	(18.1)	(6.6)	(6.7)	(9.8)	(5.9)
C. Migrants born in other countries	3,090,393	1,636,343	1,454,050	10,698	5,754	4,944
	(12.5)	(21.9)	(8.5)	(1.2)	(3.2)	(0.7)
Total Migrants	**24,664,883**	**7,478,298**	**17,186,585**	**864,320**	**179,730**	**684,590**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

It is observed from the Annexure IV(A) that out of 24,664,883 migrants in the State 77.4 per cent were born within the State of enumeration. Among the total migrants 58.9 per cent migrants were born elsewhere in district of enumeration, whereas 18.5 per cent were born in the other districts outside the district of enumeration. It is also observed from the State figures, that out of the total migrants 10.1 per cent and 12.5 per cent migrants having place of birth in other States of India and in other countries respectively. In the district of Birbhum also it is found that 92.1 per cent of the migrants had born within the State of enumeration. Among the total migrants 73.9 per cent had born within the district of enumeration whereas 18.2 per cent of them had born outside the district of enumeration. The female migrant population is greater than that of male migrant population in case of migrants born within the State for West Bengal as well as for the district.

		(3.8)	(10.1)	(1.9)	(5.6)	(12.9)	(3.4)	(100.0)	(100.0)	(100.0)

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the State overtake the State percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

Jains	1,408	563	845	0.0	40.0	60.0
Others	1,874	1,816	58	0.1	96.9	3.1
Religion not stated	1,722	1,678	44	0.1	97.4	2.6

It is observed that in the district of Birbhum, the Hindus occupy the first place with 64.5 per cent of the total population of the district, being followed by the Muslims with 35.1 per cent indicating that they are the two main religions of the district.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration :

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/ her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below :

Annexure

Annexure - VI

Marital Status of population as per 2001 Census

Marital Status :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status, broad age group and sex of 1991 and 2001 is shown below :

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

			Marital Status							
			Never married		Married		Widowed		Divorced or Separatated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.6	99.3	0.4	0.7	0.0	0.0	0.0	0.0
	15-34	100.0	48.6	17.6	50.8	79.3	0.3	1.6	0.3	1.6
	35-54	100.0	2.7	0.8	94.4	82.3	2.5	15.7	0.4	1.3
	55+	100.0	5.4	1.7	80.9	37.4	13.3	60.4	0.4	0.6
	All ages	100.0	56.0	45.2	42.2	46.0	1.6	8.0	0.2	0.8
2001	0-14	100.0	99.8	99.4	0.2	0.6	0.0	0.0	0.0	0.0
	15-34	100.0	49.5	18.3	50.0	78.6	0.2	1.5	0.3	1.6
	35-54	100.0	2.1	1.0	96.2	83.5	1.4	13.7	0.4	1.8
	55+	100.0	1.9	1.1	86.4	41.3	11.1	56.9	0.5	0.7
	All Ages	100.0	53.6	42.6	45.0	48.1	1.2	8.3	0.2	1.0

We can observe from the above table that during the period 1991 to 2001 the proportion of never married in the age group 0-14 remained almost unchanged. But the proportion of never married persons in the age group 15-34 in 2001 is found to be increased for both males as well as females. The proportion of married persons in the age group 15-34 in 2001 has declined over the previous census year for both males as well as females. Under the age group 35-54 the proportion of married males as well as females has increased also. A remarkable change has been observed for the never married males in the age group of 55 and above. In 1991 it was 5.4 per cent whereas the same has decreased to 1.9 per cent in 2001. But in case of never married females the percentage has slightly decreased. It is also observed that the percentage of widow and divorced/ separated females are always higher than their male counterparts in all age groups for both the census years.

It is observed that around 36.2 per cent of the total population of Birbhum district belong to 0-14 age group and naturally constitute the bulk of the “never married” as per 2001 Census data. Although none is found in the married status in 0-9 age group of the district, 1.1 per cent of 10-14 age group population of the district has been enumerated as married implying that child marriage still exists in the district. Number of females however being greater than the males. One striking feature of the 25-29 age group is that out of 134,770 females, only 125,837 females are found married, whereas in the same age group out of 128,341 males, number of married males are only 95,922. The highest number of married females are found in 25-29 age group and for males it is in 35-39 male age group indicating that gradually late marriage is being preferred by both the sexes. A pointer to mortality is the number of widow which is more than six times of the widower (in all ages) and highest for both the sexes is in 60-64 age group. The number of divorced or separated females is always higher than that of the number of males in all age groups, except in the age group 70-74 and 75-79.

It is observed that in most of the sub-levels of literacy of Birbhum district, the females have not been able to catch up the males in number in 2001 Census. About 61.5 per cent of the total population of Birbhum district are literates, 0-6 age group excluded. The percentages of literate males are more than that of females by about 19.0 per cent points. It is noteworthy that 29.0 per cent of the age group 7-10 remains still illiterate. In this age group 26.5 per cent among male and 31.6 per cent of the female are illiterate. The highest illiteracy of 52.6 per cent is observed in 45+ age group, number of females (166,461) being higher than the number of males (88,487). Number of literates without any formal schooling including education level is very little : 18,513 for males and 11,051 for females are the figures for the district and likewise number of graduates and above level of education is also very little, which is only 4.8 per cent of the total literate population.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

The above table shows that most of the people in the district are Bengali by mother tongue. The population has increased absolutely in each of the census year starting from 1961 to 2001. However, the proportion of the population is fluctuating during the period. The proportion of Bengali speaking population was at least 90.0 per cent throughout the period 1961-2001. The proportion was 90.5 per cent in 1961, slightly increased to 91.0 per cent in 1971, then slightly declined to 90.7 per cent in 1981 and again increased to 91.9 per cent in 1991 as well as 2001. The next highest mother tongue spoken in the district is Santali (5.9 per cent), followed by Hindi (1.2 per cent), Khortha/ Khotta (0.3 per cent), Koda/ Kora (0.2 per cent) and Telugu (0.1 per cent). It is to be noted that only 0.2 per cent people speak other languages as their mother tongue in the district.

Annexure - IX

Scheduled Castes and Scheduled Tribes population - Size and Growth

The collection of population statistics on the scheduled castes and the scheduled tribes as per the state scheduled castes and scheduled tribes list in the State is one of the most important aspects of decadal census in post independence period. This information is required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for scheduled castes and scheduled tribes on various aspects of their life at the micro level.

In 1991 Census, the district registered a total scheduled caste population of 784,062 accounting for 30.7 per cent of the total population in the district which comprised 403,477 males and 380,585 females. Out of this bulk of scheduled caste population, 93.0 per cent was in rural and 7.0 per cent was in urban areas of the district. In all, 58 scheduled caste communities were reported in the district and were scattered all over the district. The six major scheduled castes in order of population size were the (i) Bagdi/Duley (192,486) (ii) Chamar/Charmakar/Mochi/Muchi/Rabidas/Ruidas/Rishi (123,256) (iii) Mal (91,975) (iv) Bauri (71,640), (v) Dom/Dhangad (62,591) (vi) Konai (56,072). These major scheduled caste group constituted 76.3 per cent of the total scheduled caste population of the district.

The literacy rate among scheduled castes was 27.7 per cent registering 38.5 per cent for males and 16.1 per cent for females against the general literacy rate of 48.6 per cent in the district in 1991.

In view of work participation practice among scheduled castes in the district, they registered 33.2 per cent main workers with the break up of 53.1 per cent males and 12.1 per cent females, corresponding to 30.4 per cent main workers (51.6 per cent males and 8.1 per cent females) in the case of general population in the census year 1991. The scheduled castes in the district were mainly working as agricultural labourers accounting for 60.6 per cent of the total scheduled caste main workers. Among the females 75.1 per cent and among the males 57.5 per cent are Agriculture labourers.

Likewise the district had registered 177,501 total scheduled tribes population accounting for 6.9 per cent of the total population of the district which comprised 89,840 males and 87,661 females. A substantial portion (97.6 per cent) of this bulk of scheduled tribe population was in rural areas and the remaining only 2.4 per cent was in urban areas in the district. In all, 38 scheduled tribe communities were reported settled all over the district. The five major scheduled tribes in order of population size are the (i) Santal (156,464) (ii) Kora (9,293) (iii) Oraon (3,268) (iv) Mahali (1,964) and (v) Bedia (1,256). Of these 5 major scheduled tribes, Santal alone constituted 88.1 per cent of the total scheduled tribe population of the district.

The literacy rate among scheduled tribes was 14.8 per cent with a break up of 23.6 per cent for males and 5.6 per cent for females against the general literacy rate of 48.6 in the district in 1991.

Work participation rate in the case of scheduled tribe communities was reported at 47.2 per cent in main workers category with the breakup of 56.6 per cent males and 37.5 per cent females. The scheduled tribes in the district were mainly working as agricultural labourers accounting for 64.5 per cent of the total scheduled tribes main workers of the district with the female proportion being greater (which is 72.4 per cent) than the male proportion (which is 59.4 per cent).

As per 2001 Census, Birbhum district has 889,894 scheduled castes population comprising 456,719 males and 433,175 females accounting for 29.5 per cent of the total population of the district. Among the scheduled castes of the district, the first five major castes in order of population size are Bagdi/Duley with 240,641 persons (27.0 per cent), Chamar/Charmakar/Mochi/Muchi/Rabidas/Ruidas/Rishi with 143,855 persons (16.2 per cent), Mal with 113,401 persons (12.7 per cent), Bauri with 81,179 persons (9.1 per cent) and Dom/Dhangad with 71,192 persons (8.0 per cent). These five major castes constitute 73.0 per cent of the total scheduled castes population of the district.

Further, the district has also recorded 203,127 scheduled tribe population comprising 101,831 males and 101,296 females in 2001 Census acounting for 6.7 per cent of the total district population. Among these, the first five major tribes in order of population size are Santal with 176,789 persons (87.0 per cent), Kora with 13,456 persons (6.6 per cent), Oraon with 4,502 persons (2.2 per cent), Bedia/Bediya with 2,130 persons (1.0 per cent) and Mahali with 2,105 persons (1.0 per cent). Out of these, only first two tribes constitute 93.6 per cent of the total scheduled tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Darjiling district since 1961 can be observed in the following table :

ANNEXURE - IX

SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF BIRBHUM (1961-2001)

Total /Rural /Urban	1961		1971		1981		1991		2001	
	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	421,344	106,860	532,697	125,250	624,521	145,133	784,062	177,501	889,894	203,127
			(26.4)	(17.2)	(17.2)	(15.9)	(25.5)	(22.3)	(13.5)	(14.4)
Rural	399,728	105,500	506,076	123,735	585,667	142,072	729,066	173,299	830,700	198,612
			(26.6)	(17.3)	(15.7)	(14.8)	(24.5)	(22.0)	(13.9)	(14.6)
Urban	21,616	1,360	26,621	1,515	38,854	3,061	54,996	4,202	59,194	4,515
			(23.2)	(11.4)	(46.0)	(102.0)	(41.6)	(37.3)	(7.6)	(7.4)

Note : Figures within brackets indicate decennial growth rate.

It can be seen from the above table that there has been substantial fluctuation in the rate of growth in the scheduled caste population during the period 1961 to 2001. The growth rate was 26.4 in 1961-71 declined to 17.2 per cent in 1971-81, and then it shot up to 25.5 in 1981-91 and then declined to 13.5 per cent in 1991-2001. The growth rate for the rural area followed the same pattern. In urban area the pattern was different. The growth rate was 23.2 in 1961-71 then it shot up to 46.0 per cent in 1971-81, then declining to 41.6 per cent in 1981-91 and went on further declining in 1991-2001 and reached just at 7.6 per cent.

In case of scheduled tribe communities also the growth rate witnessed a fluctuating trend. During 1961-71 the growth rate was 17.2 per cent that declined to 15.9 per cent during 1971-81, then risen to 22.3 per cent during 1981-91 and again declined to 14.4 per cent during 1991-2001. In case of scheduled tribes also, the rural growth rate followed the similar pattern of trend as that of total upto 2001. But the urban growth rate substantially increased from 11.4 per cent in 1961-71 to 102.0 per cent in 1971-81, declined to 37.3 per cent in 1981-91 and further declined to 7.4 per cent in 1991-2001

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent half yearly survey by supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office

of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and 2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 2,000 or more. In urban areas the sampling unit is a census enumeration block with a population of 600 or 120 households. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
