Darjiling Tea Garden

"When it's spring in the Himalayas.....
When the sun-spun rain falls gently on the mountains.....
When magical mists like divine dragons rise from forests.....
That is when the mystique of Darjiling tea is created."

Among the spectacular snow covered mountains at an altitude of 2,134 mtrs. we can encounter the beauty and magic of Darjiling and enjoy the flavour of Darjiling tea. The fragnance and exquisiteness of Darjiling tea is often described as every sip being a trip to enchantment. The distinctive and exclusive character of Darjiling tea which cannot be replicated anywhere in the world is the result of several factors. The tea gardens are situated at elevations from 610 to 2,134 mtrs. on the steep slopes which provide ideal natural drainage for the generous rainfall received. Further the intermittent cloud and sunshine combine to impact the unique character of Darjiling tea. The Darjiling hill station was founded by the British in 1835 with a military cantonment and a health sanatorium. Tea plantation had started around 1850s and the British also introduced various flowers and fruits to the area. It had grown in stature which is incomparable in the world. The word 'Darjiling' comes from the the Tibetan word "Dorje" meaning the thunderbolt of Indra, the king of Gods and "Ling" meaning a place of land. Thus "Dorje-Ling" means the 'land of the thunderbolts'.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts : Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991

census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Vikram Sen, IAS, Director of Census Operations, West Bengal. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

PEOPLE ORIENTED

Preface

The task of publishing the District Census Handbook (DCHB) is a joint venture between the central and state government and the recent publication for 2001 Census happens to be the sixth in the series of its publication since the year 1951. Since then, in view of the contemporary requirement of data, the coverage of DCHB has widened and received regular refinement. Hence, it has become the most widely used publication compiled and prepared by the Census organization. The presentation of data is done in two parts, viz., the Part-XII-A and Part-XII-B seperately for the bigger districts and single combined volume for the each smaller district.

Part-XII-A contains Village & Town Directory data with some important tables depicting availability of basic civic amenities at the C.D. Block/Village and Town level. In the other hand, Part-XII-B presents district Primary Census Abstract (General), Primary Census Abstract for Scheduled Caste, Primary Census Abstract for Scheduled Tribe and CD Block/Villagewise Primary Census Abstract and Urban Primary Census Abstract. In addition to the above an effort is made to furnish various essential information about the district such as – historical background, administrative set-up, drainage, physiography, climate, place of historical, archaeological and tourists importance etc. The 2001 Census DCHB presents a variegated picture of the human life as reflected by the census data. The scope of analysis of census and non-census data has considerably increased through various summary tables and inset tables. Besides brief analysis of basic census data in the form of PCA and analysis of amenities and infrastructural facilities available in villages and towns in the form of Village Directory and Town Directory, the data on houses and household amenities have also been briefly analyzed and included in this volume. Not only this, we have made efforts to present comparative data on various aspects such as distribution of population, growth rate, density of population, sex ratio, work participation rates, literacy, language, religion, scheduled caste and schedule tribe population (since 1951 or 1961) mostly by residence for the benefit of data users. Likewise, in the annexures, brief analysis on some socio-demographic, economic, migration and cultural aspects of the population pertaining to 1991 Census has also been made.

There has been regular and continuous flow of suitable suggestions and advice from Shri J.K. Banthia, Registrar General, India, throughout completion of the work for which I express my deepest and sincere gratitude to him. Other officers in the office of the Registrar General, India, New Delhi, contributed their share in the befitting manner for which as well I record my thankfulness to Shri R.G. Mitra, Deputy Registrar General (C&T), Shri R.P. Singh, Deputy Registrar General (Map), Shri I.C. Agarwal, Senior Research Officer (S.S.) and Shri S.L. Jain, Deputy Director (S.S.), for without their timely help and guidelines this publication would not have appeared before us in time and in this form.

I shall be failing in my duties if I do not acknowledge the contributions made by the District Census Officers/ District Magistrates and innumberable Village, Block and Municipal level officials of all the districts of West Bengal for arranging collection of village and town directory data by the local officials from the villages/towns under their jurisdiction.

In my own office my thanks are due to each one of the staff members for their zeal and enthusiasm shown in completing this project successfully at various stages of work very much within the stipulated time. As it is not feasible to express my thanks individually a separate page of acknowledgement is included in this publication.

Vikram Sen
Director of Census Operations,
West Bengal

Acknowledgements

A. The Directorate of Census Operations respectfully acknowledges the devoted, sincere hard work rendered by about one lakh fifty thousand Census Enumerators, Supervisors and Officials at the District, Block and Municipal levels without whose heroic efforts, the Census 2001 could never be undertaken. Three among these Enumerators also laid down their lives while in discharge of Census work.

B. The Census Directorate, West Bengal also gratefully acknowledges the sincere and dedicated work of the following officers/officials of this Directorate associated with the preparation of this Hand Book.

Drafting of analytical notes/ overall editing and checking at various stages :

District Highlights - 2001 Census

1. Darjiling district occupies second lowest i.e. 17th position in terms of population in the state.
2. The district can be fairly taken as one of the most urbanised districts as it is having 32 per cent of the total population in urban areas whereas the state is having more than 27 per cent of its total population in urban areas.
3. Darjiling district ranks 3rd in growth rate (23.8 per cent).
4. Darjiling has the third lowest density of population per sq.km. in the state (511).
5. The sex ratio of the district (937) is marginally above the state's sex ratio (934).
6. Literacy rate of the district is 71.8 per cent (above the state per centage which is 68.6) thereby making its rank 6th in the state.
7. There are 68 uninhabited villages in the district out of 708 villages.
8. There are in all 5 villages having population of 10,000 and above.
9. Mongpu Cinchona Plantation (Rangli Rangliot CD Block) is the most populated (12,742) and Tarabarir Chhat (Naxalbari CD Block) is the least populated village (2 persons) of the district.
10. The economy of the district is based on Tea Plantation and Tourism. Only 20.9 per cent of the Main Workers of the district is engaged in Agricultural sector.
11. Proportion of female main workers engaged as Cultivators and Household Industry Workers is greater than that of their male counterparts and in two other sectors (Agricultural Labourers and Other Workers) it is almost equal to that of their male counterparts.
12. Phansidewa CD Block has the highest number of villages (113) and Mirik the lowest (21 Part).
13. Singalila Forest of Darjeeling Pulbazar CD Block has the largest area (17,777.9 hectares) and Suntalay Khasmahal under Kalimpong-I CD Block and Pachim Pasunath Barua under Matigara CD Block are two blocks with the smallest area (1.2 hectares each).

	Inhabited	37,945	640
	Uninhabited	2,837	68
Number of Towns		375	9

Concept of Census Town :

Some administratively rural areas are identified and treated as urban pockets for the purpose of census and called Census Towns on the basis of the following demographic criteria :

(i) A minimum population of 5,000.

(ii) At least 75.0 per cent of the male working population engaged in non-agricultural pursuits, and

(iii) A density of population of at least 400 per sq. km.

The Town is spread over to District Jalpaiguri

Darjiling district has 12 CD Blocks in total out of which only 3 of CD Blocks' Headquarters viz. Kalimpong-I, Kurseong and Matigara are urban. Distance wise 4 of them are in the range of 100 plus kilometres from the district headquarters, farthest being the Gorubathan at 165 kms and Jorebunglow Sukiapokhri being the nearest at 27 kilometres. Most of the CD Blocks (7) are in the distance range of 27 to 67 kilometres.

Among towns, barring Mirik - which is a Notified Area, the other 4 are the Statutory Towns. Darjiling being the nearest town at the distance of only zero km. Kalimpong and Mirik are almost at the same distance of 51 and 52 respectively. Siliguri is the farthest town situated at the distance of 83 kms.

		2001	520,432	274,011	246,421	124,372	31.4

The big chunk of the population lives in rural areas. However, there has been a regular fall in the proportion of rural population from 92 per cent of 1901 census to the lowest of 68 per cent in the recent census of 2001. This trend can be attributed to outflow of rural population to urban areas due to reasons like employment, business etc. The highest decadal growth (31.5 per cent) in rural population was noticed in the decade of 1951-1961. There has been regular growth in the district's total population from 5.3 per cent in 1901-1911 to 23.8 per cent in 1991-2001 with the varying Decennial growth rate. The marginal decline in growth rate is observed in 1921 and 1951 and substantial decline in 1971, 1991 and 2001. The highest growth (35.9 per cent) was recorded in the year 1951-1961. However a more fluctuating trend of population growth is observed in the case of urban areas in the district. The highest proportion was recorded in the decade 1941-1951 (62.4 per cent).

The Town is spread over to District Jalpaiguri

Note : While calculating density, area figures have been taken upto two decimal points

Darjiling district extends in an area of 3,149 sq. kms. of which 98 per cent is rural and has 708 villages (640 inhabited and 68 uninhabited), 9 urban units (5 statutory towns and 4 Census Towns). The district has total population of 1,609,172 persons residing in 318,737 households having the population density of 511 persons per sq. km.

Areawise, Gorubathan CD Block is the largest with 442.7 sq. kms. area under its share while Mirik is the smallest CD Block with 119.2 sq. kms. However, in terms of population, Phansidewa is the most populated CD Block with 171,508 population. While looking by density, Matigara is the most congested CD Block with 904 persons per sq. km. against that of Gorubathan CD Block where the density is only 123.

Among the urban units, Siliguri M.Corp. is the most populated town in the district with 284,602. Slightly more than half of the total urban population of the district is housed in this town. In contrast to it, Pattabong Tea Garden census town is the least populated urban unit with 1,633 population. It is also the single urban unit where the female population is more than its male counterpart.

The town is spread over to District Jalpaiguri

In statement 9 we can see the presence of houseless and institutional population by sex and residence in the district. Accordingly, we find that there is houseless population of 3,491 persons comprising 0.2 per cent to the district's total population out of whom 875 (25.6 per cent) are females. Larger component i.e. 64.2 per cent of houseless population is seen residing in the urban areas. Among the females, it is seen that of the total houseless females, 576 (64.4 per cent) are in rural areas. Among the CD Blocks, the highest number of houseless population is found in Kurseong, of 384 persons mostly (369) residing in rural, followed by the Darjeeling Pulbazar with 190 persons, all the rural areas. Among towns, the largest number of houseless population is enumerated in Siliguri Municipal Corporation where there is 1,974 houseless population. Beside it, the district enumerated 30,408 institutional population living in different types of institutions throughout the district. Of the total institutional population, 7,089 (23.3 per cent) are the females. A substantial share of it i.e. 68.7 per cent is the urban dwellers which is obvious since most of the institutions are generally located in the towns. Matigara CD Block has recorded the largest presence of institutional population at 4,034 persons. Likewise, among the towns, Siliguri municipal corporation and Darjiling municipality has recorded the largest presence of such population at 5,790 and 4,983 persons respectively.

STATEMENT - 5
CD BLOCKWISE NUMBER OF VILLAGES AND RURAL POPULATION, 2001

Serial number	Name of CD Block	Number of villages		Rural population		
		Total	Inhabited	Persons	Males	Females
1	2	3	4	5	6	7
1	Darjeeling Pulbazar	46	45	114,204	57,601	56,603

9	Matigara	79	69	123,921	65,123	58,798
10	Naxalbari	98	82	129,141	67,595	61,546
11	Phansidewa	113	103	171,508	87,945	83,563
12	Kharibari	76	75	88,230	45,449	42,781
	District (Rural) Total :	**708**	**640**	**1,088,740**	**556,633**	**532,107**

Of the total 708 villages in the district, in 90.0 per cent 1,088,740 persons inhabit that constitute 68.0 per cent of the district's total population. Highest number of inhabited villages fall in Phansidewa CD Block with 103 (16.1 per cent) of the total inhabited villages in the district. While Mirik has only 21 villages in its share. Phansidewa is the most populated CD Block with a total rural population of 171,508 (15.8 per cent) of the district's total rural population. It may also be seen that Jorebunglow Sukhiapokhri and Mirik CD Block both have higher female population, as compared to male so far the CD Block wise rural population is concerned.

There are 35 villages in the districts having a population in the range of 5,000 and above, out of which only two (i) Bijanbari and (ii) Kharibari are the CD Block Headquarters. Majority of these large size villages are located in 2 CD Blocks - Darjeeling Pulbazar and Phansidewa. In terms of availability of amenities, 4 villages have Senior Secondary Schools. Colleges are available to 2 villages - one under Jorebunglow Sukiapokhri and the other under Matigara CD Block. As regards medical facilities, 3 villages have access to Primary Health Centre, 1 each in Gorubathan, Jorebunglow Sukiapokhri and Naxalbari CD Blocks. While Primary Health Sub-Centre is available to 16 villages, Drinking water facility through tap is available to 14 villages. Three of these villages enjoy the facility of having railway station within its limit. Commercial bank facility is available to 6 villages while Co-operative banks are located in 4 villages.

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

(ii) Brief history of the district :

Darjiling district is a part of Jalpaiguri division of West Bengal located at the extreme north of the state. According to one version, word Darjiling has been derived from the term Dorje-ling, the Buddhist monastery, that once stood on the observatory hill overlooking Mall, the nerve centre of the town. According to another version Darjiling was originated from 'Durjoy Linga', which means highest peak of the mountain in Tibetan Literature. Darjiling came as a new district of West Bengal in 1850 consisting of two regions -Tarai area & Hilly area.

Once upon a time Darjiling area was part of Sikkim and Bhutan. Though Tarai was a part of Sikkim State, it was under the control of Nepal (1788-1816). After the war with Nepal (1814-1816), Tarai area came under British and in 1816 was given back to Sikkim. But in 1835 out of friendship the Maharaja of Sikkim gifted Darjiling area to British Governor general William Bentinck and the area became a British Sanatorium. Darjiling at that time was located "in south of the great Rangit river, east of the Balasun, Kahail and little Rangit rivers and west of Rungno and Mahanadi rivers". (Deed of Grant by the Raja of Sikkim on 1st February, 1835; as reproduced in West Bengal District Gazetteers, Darjiling, March, 1980 edition). After the war with Sikkim, the area extended by the annexation of the Tarai and the portion of the Sikkim Hills bounded by the Rammam and the great Rangit rivers on the north, by the Teesta on the east and by the Nepal frontier on the west. Between 1835-1852, many British families and Bengali people came to settle in this area for its cool climate and natural beauty. In 1856, tea plantation was started and Nepali and Bengali people came to settle in this place to work in the tea plants. Bihari tribes also came to work in the garden and settled in this area. In 1866 Kalimpong area came under Darjiling district and in 1880 Siliguri area was taken out of Jalpaiguri district and was included in Darjiling district. In 1947, some portion of Phansidewa P.S. of the district was included in East Pakistan, now Bangladesh.

(iii) Administrative set up :

(i) Region of the state where district is located :

Darjiling is the northernmost district of the Jalpaiguri Division of West Bengal roughly resembling an inverted wedge with its base resting on Sikkim, its sides touching Nepal, Bhutan and the Jalpaiguri district of West Bengal. The district Headquarters of Darjiling is located at Darjiling town.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

The district has four sub-divisions, namely, Darjiling (Sadar), Kalimpong, Kurseong and Siliguri. There are 16 Police Stations in the district, namely, (1) Lodhama (2) Pulbazar (3) Darjiling (4) Rangli Rangliot

(5) Kalimpong (6) Jaldhaka (7) Gorubathan (8) Jore Bungalow (9) Sukia Pokhri (10) Mirik (11) Naxalbari (12) Kurseong (13) Matigara Investigation Centre (14) Siliguri (15) Phansidewa and (16) Kharibari.

There are in all 12 Community Development Blocks in the district, viz. (1) Darjeeling Pulbazar (2) Rangli Rangliot (3) Kalimpong-I (4) Kalimpong-II (5) Gorubathan (6) Jorebungalow Sukiapokhri (7)Mirik (8)Kurseong (9) Matigara (10)Naxalbari (11)Phansidewa and (12)Kharibari.

During the last decade the number of CD blocks in the district has increased from ten to twelve. The Siliguri-Naxalbari CD block has become Naxalbari CD block. Kharibari-Phansidewa CD block has been bifurcated and Matigara Investigation Centre Police Station has become a CD Block.

(iii) Total number of Towns/Villages etc. :

There are 9 urban units including 3 municipalities - Darjiling, Kurseong, Kalimpong and one Municipal Corporation - Siliguri Municipal Corporation, one notified area, namely, Mirik and 4 census towns - Cart Road, Pattabong Tea Garden, Bairatisal and Uttar Bagdogra respectively.

The district has 12 Panchayat Samities with 134 Gram Panchayats consisting of 708 villages.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilization. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas.The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

Darjiling municipality is the oldest municipality in the district and was established on 1st July, 1850. It originally covered an unbelievably large area of 138 sq. miles ranging from below Pankhabari to the borders of Sikkim. Year of establishment of other two municipalities - Kurseong and Kalimpong and Mirik NA are 1879, 1945 and 1984 respectively. Siliguiri Municipality has become the municiapal corporation during the last decade as per notification no. 27/C-4/ MIM-34/92 dated 12.01.94 with increase of some areas.

Civil Administration :

The Civil Administration of the district consists of the District Magistrate as the Principal Executive with 4 Subdivisional Officers being the subdivisional heads and one Block Development Officer for each CD Block. Under the police administration, Superintendent of Police is the head of the district and under him there are 4 Sub-divisional police officers with Inspector in charge/Officer in charge in each police station. At the district Head Quarter District Judge is the head of the Judiciary. The subdivisional Judicial Magistrate sits in the Courts at the subdivisional level.

(iv) Physical features :

(i) Location and size

The district Darjiling lies between $26^0 27' 10''$ and $27^0 13' 05''$ north latitudes and $87^0 59' 30''$ and $88^0 53' 00''$ east longitudes. The district is bounded by Sikkim on the north, by Bangladesh and Uttar Dinajpur district and Bihar on the south, by Nepal on the west and by Bhutan and Jalpaiguri on the east. The total area of the district is 3,149 sq. kms. Its rank in respect of the area in the state is 12th. Its north to south extension is of 87 kms. that of east to west is of 90 kms.

(ii) Physiography :

The district is divided into two regions, hilly and the plain area - a portion of the outlying hill of the lower Himalayas and Terai - a stretch of territory lying along their base. All such areas, are more or less covered by deep forests. The northern part of the district is fully mountainous facing Singalila mountain

and the southern part is almost plain in nature with green valleys. The hills rise abruptly from the plain and the elevation increases northwestward with great heights in the uppermost part. The northern portions consist of hard gneissic rocks capable of resisting denudation to a considerable extent, while the southern portion comprises of comparatively soft, thin, slaty and half - scheistose rocks which are less resistant to erosion.

Topographically the district is divided into the following five sub-micro regions.

1. Darjiling Himalayas - The region is hilly and extends in the northern part of the district. The hill ranges in north-west to south-east alignment and its elevation varies from 400 to 3,000 metres. Along the northern boundary of the region the great Rangit flows in a very deep valley towards the east and falls in the Tista.

2. Kurseong Range - The region extends between the highlands on the north and the plains of the Terai on the south. The Mechi river on the West and the Tista river on the east form the limits of regional boundary. This region slopes from north to south and its altitude ranges from 300 to 1,800 metres approximately above the sea level.

3. Kalimpong Range - The region lies on the south - east of Darjiling Himalayas and extends from the Tista river on the west to the Jaldhaka river on the east. The region is characterized by the presence of rising hills, numerous rivers and small torrents.

4. Western Duars - The region seems to be flat and is sloping from north to south as evident by the flow of the rivers. The Mechi river flows along the regional boundary on the west and the balasan river traverses along the north-eastern parts of the region. The general elevation rises from 80 to 300 metres. There is a lower range called lohargur/Loharger or iron hill which is covered by a dense Terai forest.

5. Mahananda Tract - The region extends in the extreme south-east corner of the Darjiling district having the smallest area of 195.40 km2. The region is a continuation of the western Duars towards the south and some local heights between 100 and 150 metres can be seen in this area. The Mahananda is the only main river flowing along the boundary line of this region. Elevation of the district from mean sea level is 3,596 metres.

Flora & Fauna :

The Himalayan jungles have always been home to the most exotic species of flora and fauna. The short spring season sees the mountain bathed in all conceivable hues. The fiery Rhododendrons splash the mountainside in the most beautiful reds, whites and the pale magnolia forests providing a striking contrast. The valley comes alive with a profusion of daisies, daffodils, chrysanemums and tuberrous begonia.

Even the rarest Orchids grow in abundance in the wild. Amidst this dazzling flora a fauna is equally exotic. The Red Panda is found in the dense jungles between Gairibas and Molley on the way to Sandakpu. The Barking deer, Wild Bear and Himalayan bear are the other animals that are found here. Darjiling is also the abode of a variety of birds and butterflies.

(iii) Drainage

The main rivers of the district are the Tista, the Jaldhaka and the Mahanadi (Mahananda). The Tista is the most important river of the district and rises from a glacier in the north of Sikkim draining whole of that state. It forms the boundary of the district from the point where it is joined by the Rangpo Chu (the chief tributary of Tista) with the great Rangit. From the latter point it flows entirely within the district through a gorge known as Sivak Gola Pass of only 100 yards breadth which debouching into the plains widens and becomes several hundred yards wide. It is a broad mountain torrent with numerous rapids . Its current is swift, dangerous and liable to sudden rise in level. It's length within the district is 37 kms.

The Mahanadi or Mahananda has its source near the east of Kurseong and flows south east . The river attains it's full girth after leaving the Terai portion of the district. The length of this river is 91.70 kms.The Mahanadi or Mahananda is the Bengali corruption of the Lepcha name of the river "Mahaldi".

The river Jaldhaka enters the district at an altitude of 2,020 feet (615.69m.) at its confluence with the Nichu its right bank tributary and flows west to east . The length is 19.47 kms.

Apart from these three main rivers, the mention of the Great Rangit, Mechi and Balasan is obvious too. The Great Rangit is the chief affluent of Tista. And Mechi and Balasan is that of the Mahanadi or Mahananda.

There are innumerable hill streams in the district called Khola or Jhora. The Tista - the master stream of the district has seven tributaries from the right and five from the left. The Mahanadi has three right bank and four left bank streams. Jaldhaka receives five right

bank tributaries and numerous left bank tributaries from Bhutan side. Even the tributaries of these three main rivers like the Great Rangit, Mechi and Balasan have also numerous streams as their tributaries.

Main water features such as tank, lake reservoir etc. :

The municipal and cantonment areas of Darjiling gets its water supply from the springs and rivulets on the southern slope of the Senchal range situated just south of Darjiling town which collects in a large artificial lake. At the lower altitude Konkhola spring acts as the supplementary source. There is some minor springs and rivulets between Kalimpong-Gorubathan border with very meagre discharge and the network of springs in the Durbindanra Hill which is situated in the south of Kalimpong and has a moderate discharge meets the local requirement of Kalimpong. There are two natural lakes in the district most prominent of few lakes - one is situated about 6 miles west of Hope Town while another is called Ramtal. Ramtal and adjoining little stream named the Ramthi nadi, a few miles to the east of the Tista is measured about 1,000 square kilometres.

(iv) Climate

The climate of upper Dajiling is cool and bracing because of higher elevation while in the Terai and the lower valley part of the district it is not so cool .The atmosphere of the northern tract of the district is highly humid throughout the year. In the plains and the low lying tracts the relative humidity is however slightly less. The spring and autumn are the most refreshing seasons in the district . The monsoon is a period of bothersome with frequent mist and nagging rain. The winter after December, is usually too cold and unpleasant.

Darjiling district has the special opportunity of recording its specially noteworthy climatic conditions on daily basis through it's four observatories at Darjiling, Kalimpong, Kurseong and Bagdogra. Also the tea estates, the military cantonments, the Forest and the Agriculture Departments of the district record climatic data on their own. According to the official records, while from March to May a period of three months is the period of oppressive summer (more so in night) in the plains and low valleys, in the hilly portion of the district the temperatures both day and night are higher during the rains than in summer. The temperatures begin to fall more rapidly from November. January is the coldest month of the district and August the hottest. Frosts are fairly common throughout the cold season in the hilly parts of the district. Cold waves occasionally visit the district between November and early March when the minimum temperature may fall even below 00c in places like Darjiling and Kalimpong. Average of the maximum and minimum temperature of the district for the preceding 10 years is as follows:

Year	Maximum (in Celsius)	Minimum (in Celsius)
1991	30	4
1992	31	3
1993	33	2
1994	30	3
1995	-	-
1996	-	-
1997	27	1
1998	37	7
1999	36	10
2000	-	4

Note : Yearwise data have been taken from District Statistical Hand Book, 1996 & 2001

Rainfall is generally heavier in the southern Terai and the ridges and slopes near the plains. Kurseong , for instance , has an annual rainfall of 4,052 mm, while Kalimpong near the northern border of the district, gets only 2,254 mm.80 per cent of the rainfall is full of precipitation during the south west monsoon.Thunder storms occur in summer and in October. On an average there are about 120 rainy days in a year with rainfall of 12.5 mm per day.

During November to May upper winds over the Himalayan region are predominantly westerly and at extreme heights stormy and often rise to hurricane force. This speed lessens in the month of the March, April and May and with the setting in of wind direction is steady from November to May. During monsoon it is unsteady and becomes southerly or south easterly over the Himalayas. In October after the monsoon has gone, the westerly movement of the wind begins. Average wind force at Darjiling does not exceed 6 miles per hour, though the mean velocity is higher at Kalimpong and lower in the Terai. Surface winds have easterly component. In Darjiling town from November throughout the winter the direction of the wind is east-northeast and in the Spring upto June west or southwest and in the monsoon east southeast.

(v) Economic resources

a) Forest Area : Out of 1,188 thousand hectares of the state forest area the district has 1·2 thousand

hectares under forest. The forest region is mainly located in the terai area of the district having trees like Sal, Segun etc. Out of 1·2 thousand hectares 1.02 thousands hectares are under Khas forest. During 1997-98 rupees ten lakhs twelve thousand were collected from forest produce registering 47.2 per cent increase over the previous year.

b) Mineral product : The mining and mineral products are conspicuous by its absence in the district. The mineral products required by the district are imported from other places outside the district.

c) Soil & Cropping Pattern : In the hilly region of the district the soil is suitable for plantation but not very much suitable for growing paddy. Apart from plantation, maize as crop is produced in the hilly region. Paddy is mainly grown in the plain region under Siliguri Sub-Division. Out of the total area of 325 thousand hectares. 145 thousand hectares (46 per cent) were under net cropped area during 1997-98. During the same year out of the total area, 74·3 thousand hectares were under cereal crops. Rice and maize were produced in 35·5 thousand hectares and 22·6 thousand hectares respectively. Apart from maize and paddy, wheat, jute and potato were also produced in the district. During the same year 20·53 thousand hectares of land was under irrigation. Out of this total irrigated area 7·52 thousand hectares of land area was irrigated by Government Canal.

d) Land and land-use pattern : According to D.L.R, West Bengal, total land area, utilizable for cultivations, is 325.5 thousand hectares of land out of which the net cropped area is 136.8 thousand hectares of land, 124.6 thousand hectares of land is under forest as per state Forest Department and 8.8 thousand hectares of land is under current fallow. (Source : District Statistical Hand Book, 2001, Govt. of WB)

e) Tenancy : The State Government is the owner of all estate land since the enactment of West Bengal Estate Acquisition Act, 1948. But in case of agricultural land, the tenancy is contractual with the owner. After the land reform measures taken up by the State Government there is no intermediary system of tenancy in the district. In terms of operational land holding, more than 70.5 per cent falls under the marginal (below 1.0 acre) size of holding in the district. Till 2000, 12,388.65 hectares of vested agricultural land have been distributed among more than 50 thousand beneficiaries. Out of the total beneficiaries, 65 per cent beneficiaries belong to Scheduled Caste and Scheduled Tribe communities taken together. (Source : District Statistical Hand Book, 2001, Govt. of WB)

f) Agriculture : The district is under extremely diverse agricultural conditions owing to its physical configuration. The mountainous region to the north forms its greater part and the alluvial plain to the south is Terai while the Terai contains soils suited for rice cultivation, there are also poor sandy tracts unsuitable for plough. The land is of good fertility on the gentler slopes and is the upper valleys, but no crops are grown above 9,500 feet above sea level owing to the cold. Except potatoes, the upper limits for rice, maize and millet are much lower, Tea does not grow above 7,000 feet.

The crops of the district broadly fall into two groups - the plantation crops like tea and cinchona and non-plantation crops like, rice, maize, wheat, barley and sugarcane. Rice is grown extensively in the plains, while maize, patatoes and cardamoms are grown in the hills of the district. Subsidiary crops like cotton, jute, pulses, oilseed, and sugarcane are grown in the plains. The area under paddy in 2000-01 is 34.2 thousand hectares of land. (Source : District Statistical Hand Book, 2001, Govt. of WB)

g) Irrigation : In the district irrigation from private canal is nil. The source is mainly from government canals, tanks, wells and other sources. Out of total area under crop around a 9 thousand hectares of land is under irrigation as per 2001 report. In the district various sources of irrigation are available. But the year of the report on all available sources is 1997 as per which there are 4 Deep Tubewells (including Main Tubewells) and 236 River Lift Irrigation for watering the field under crop. The number of Shallow Tubewells as per 2001 is 182. (Source : District Statistical Hand Book, 2001, Govt. of WB)

h) Animal Husbandry : There were 233,301 cattle, 10,406 buffaloes, 6,406 sheep, 265,350 goats, 8,058 horses and ponies, 56,756 pigs, 58,037 other animals and 642,298 poultry birds in the district (District Statistical Hand Book, 1998) .

i) Fishery : Over 125 species of fish were recorded in the Darjiling District Gazetteer of 1947. The fish-fauna of Darjiling is of special interest as the area is a meeting place of the Chinese, Malayan and Indian elements of the fishes of the oriental region. All the hill sections of the large streams and especially the Tista river abound in Mahseer, Katli, Indian Trout and Goonch. Apart from these, there are some cat fishes other major and minor carps and some ornamental fishes. Out of 144.5 hectares of water area which is the net area available for pisciculture in the district, the net area under effective pisciculture is 104.5

hectares. The number of government schemes on fisheries operated in the district is 64 and approximate annual production is 3,356 quintal as per District Statistical Hand Book, 2001, Govt. of WB.

j) Electricity & Power : In the year 2000-2001 193,251 units (1,000 KWH.) of electricity were consumed. In the district there are 9 towns and 708 villages with 391 villages having been electrified. Out of them, 381 villages are having electricity for domestic purpose, 60 villages for agricultural purpose and 141 villages for other purposes and 35 villages are using electricity for all purpose.

k) Industry : Tea manufacturing is the main industry in the district. In most cases plantation and processing for manufacturing is done in the same area. Most of the garden and industrial units are situated at the sloping of the hill. Apart from hilly area some industries manufacturing flour and plywood have been established.

Regarding cottage and small-scale industries, there were 14,434 small industrial establishment registerd with the Directorate of Cottage and Small Scale Industries, employing 86,412 workers in the district.

l) Trade and Commerce : The main items of export of the district are tea and timber. Darjiling tea is exported not only to other district or state but also to other countries. Other than industrial product, orange of Darjiling is of high quality which is also exported from the district. The economy of the district is also dependent particularly on tourism. The main tourist spots located in the hilly region are Darjiling. Kurseong, Kalimpong and Mirik. Tourism industry of the district is very much strong. As a tourist resort, Darjiling is known not only to the people of the country but also to the people of abroad.

m) Transport : There are 486.25 kms. of road maintained by PWD (Road) in Darjiling district of which 168.25 kms. are under National Highways. Apart from this, 427.00 kms. of road (surfaced & un-surfaced) were maintained by the Municipalities of the district in 1997-98. In the hilly sub-divisions mainly light vehicles ply. There is a narrow guage railway track connecting Darjiling Himalayan Railways is the authority for running railway. The train called toy train has been running from Siliguri to Darjiling for 150 years. In the year 1997 about 7,153 goods vehicles, 15,383 motorcars & jeeps, 3,640 taxi and contract carriage, 329 mini buses and 930 stage carriage were plying in the district (Source : District Statistical Hand Book, 2001, Govt. of WB)

(vi) Gram Panchayat

The three tier Panchayat system has been functional in West Bengal since 1978. In the district at the top there is Zilla Parishad (ZP); the Panchayat Samities (PS) are coterminos with at CD block. There are Gram Panchyat at the lowest level consisting of elected members from the respective villages. Since 1978 the panchayat system has been performing a vital role for the development activists from village to district level and fund are placed for implementing the development plans from GP level to district level.

In spite of some shortcomings, the Panchayat System has changed the village economy, social and political system. In West Bengal small and marginal farmer have got cultivable land, the wages of agricultural labourers have increased. Due to land reforms and other village development program the productions of agriculture have also increased significantly. As a result the intake of food has also increased.

PEOPLE ORIENTED

History & Scope of District Census Handbook

(i) History and Scope of the District Census Handbook

The District Census Handbook a joint venture of the State Government/ Union Territory Administrations and the Census Organisation, is one of the most important publications, particularly in the context of planning and development at grass root level. It is perhaps the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was for the first time brought out in the 1951 Census. In fact it is the replacement of 'Village Statements' used to be prepared in the Censuses of Pre Independence period and since then it is published after each decennial Census with some innovations/ improvements.

Scope & coverage of District Census Hand Books of 1951-1991 Censuses

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects and also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA. In 1971 Census the DCHBs were brought out in two parts viz. Part A comprising Village and Town Directories and Part B comprising Village and Town PCA in respect of all the States and Union Territories. The Third part of the DCHBs comprising of administrative statistics and district Census tables. During 1981 Census new features alongwith restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part A comprised of Village and Town Directories, the PCA of Village and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA upto tahsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referred village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the Village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Direcotries also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHBs for the 1991 Census was more or less similar to that of 1981. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers was given as against four-fold, industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below seven years of age have been treated as illiterate in 1991 Census. It was expected that these changes would help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of data in the Village Directory and PCA instead of the traditional Police Station level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level would help the planners in formulation of micro level development plans, as the Blocks are the lowest administrative unit for developmental planning. In order to facilitate the task of administrators, Planners and Researchers to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each Village were provided for the 1991 Census alongwith the corresponding codes of 1981.

Scope & coverage of District Census Handbooks of India, 2001

The District Census Hand books for Census of India, 2001 are more informative and exhaustive in terms of coverage and context. The coverage in Village Directory has been further broadened and includes facilities like banking, recreational, income and expenditure of Gram Panchayats and most important commodity/commodities manufactured in the village. Apart from these, more details on distance (s) of basic health and educational facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre, Primary Health Centre and Primary School), if not available in the village are proposed to be given for the first time.

The type and extent of basic amenities available in the villages and towns are proposed to be analyzed in depth with the help of a large number of cross classified inset table & statements. Brief analytical notes /accounts on important aspects concerning respective districts viz. (i) firstly, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongue, all based on 1991 Census, will be given at the end of the text as separate annexures. It is also decided to provide two lists separately indicating names of colleges and hospitals available in the villages and towns in the district.

For the District Census Handbooks under Census of India, 2001 more emphasis has been given towards quality of village and town level amenity data. With a view to find out erratic or aberrant trends or in inexplicable fluctuations in amenity data, similar information brought out by the State and Central Government have been collected & these information have been used to verify the Village Directory & Town Directory data. The inconsistencies noticed in Village Directory & Town Directory data have been removed in consultation with the respective district administration as far as possible.

Brief History of the District

Darjiling district is a part of Jalpaiguri division of West Bengal located at the extreme north of the state. According to one version, word Darjiling has been derived from the term Dorje-ling, the Buddhist monastery, that once stood on the observatory hill overlooking Mall, the nerve centre of the town. According to another version Darjiling was originated from 'Durjoy Linga', which means highest peak of the mountain in Tibetan Literature. Darjiling came as a new district of West Bengal in 1850 consisting of two regions -Tarai area & Hilly area.

Once upon a time Darjiling area was part of Sikkim and Bhutan. Though Tarai was a part of Sikkim State, it was under the control of Nepal (1788-1816). After the war with Nepal (1814-1816), Tarai area came under British and in 1816 was given back to Sikkim. But in 1835 out of friendship the Maharaja of Sikkim gifted Darjiling area to British Governor general William Bentinck and the area became a British Sanatorium. Darjiling at that time was located "in south of the great Rangit river, east of the Balasun, Kahail and little Rangit rivers and west of Rungno and Mahanadi rivers". (Deed of Grant by the Raja of Sikkim on 1st February, 1835; as reproduced in West Bengal District Gazetteers, Darjiling, March, 1980 edition). After the war with Sikkim, the area extended by the annexation of the Tarai and the portion of the Sikkim Hills bounded by the Rammam and the great Rangit rivers on the north, by the Teesta on the east and by the Nepal frontier on the west. Between 1835-1852, many British families and Bengali people came to settle in this area for its cool climate and natural beauty. In 1856, tea plantation was started and Nepali and Bengali people came to settle in this place to work in the tea plants. Bihari tribes also came to work in the garden and settled in this area. In 1866 Kalimpong area came under Darjiling district and in 1880 Siliguri area was taken out of Jalpaiguri district and was included in Darjiling district. In 1947, some portion of Phansidewa P.S. of the district was included in East Pakistan, now Bangladesh.

Administrative Set-up

(i) Region of the state where district is located :

Darjiling is the northernmost district of the Jalpaiguri Division of West Bengal roughly resembling an inverted wedge with its base resting on Sikkim, its sides touching Nepal, Bhutan and the Jalpaiguri district of West Bengal. The district Headquarters of Darjiling is located at Darjiling town.

(ii) Total number of CD Blocks or the next Administrative units after district and changes therein including jurisdictional changes during 1991-2001 :

The district has four sub-divisions, namely, Darjiling (Sadar), Kalimpong, Kurseong and Siliguri. There are 16 Police Stations in the district, namely, (1) Lodhama (2) Pulbazar (3) Darjiling (4) Rangli Rangliot (5) Kalimpong (6) Jaldhaka (7) Gorubathan (8) Jore Bungalow (9) Sukia Pokhri (10) Mirik (11) Naxalbari (12) Kurseong (13) Matigara Investigation Centre (14) Siliguri (15) Phansidewa and (16) Kharibari.

There are in all 12 Community Development Blocks in the district, viz. (1) Darjeeling Pulbazar (2) Rangli Rangliot (3) Kalimpong-I (4) Kalimpong-II (5) Gorubathan (6) Jorebungalow Sukiapokhri (7)Mirik (8)Kurseong (9) Matigara (10)Naxalbari (11)Phansidewa and (12)Kharibari.

During the last decade the number of CD blocks in the district has increased from ten to twelve. The Siliguri-Naxalbari CD block has become Naxalbari CD block. Kharibari-Phansidewa CD block has been bifurcated and Matigara Investigation Centre Police Station has become a CD Block.

(iii) Total number of Towns/Villages etc. :

There are 9 urban units including 3 municipalities - Darjiling, Kurseong, Kalimpong and one Municipal Corporation - Siliguri Municipal Corporation, one notified area, namely, Mirik and 4 census towns - Cart Road, Pattabong Tea Garden, Bairatisal and Uttar Bagdogra respectively.

The district has 12 Panchayat Samities with 134 Gram Panchayats consisting of 708 villages.

(iv) If the district is newly created, the area from which it has been carved out :

It is not a newly created district.

(v) Urban Local Bodies :

The history of urban local bodies dates back in India to Indus Valley Civilization. In modern India it originated during British rule when in 1687 the first Municipal Corporation was set up at Madras under a charter granted by James II. There are different types of municipal bodies, namely, Municipal Corporations, Municipalities, Notified Area Comittees, Cantonment Boards etc. Except the Cantonment Boards all other types are created under state municipal laws. Cantonment Boards owe their origin to the Central Act called Cantonment Acts, 1924. A municipality is a body politic and corporate, constituted by the incorporation of the inhabitants of a city or town. Municipal corporations constitute the highest or topmost form of urban local governments and are created for big cities by the enactment of state legislatures or of Parliament in case of union territories. A Notified Area Committee is created for an area which does not fulfil all the conditions laid down as necessary for the constitution of a municipality or it may also be created for newly developing towns or areas.The councils of all these corporate bodies except notified area comprise elected, opted and associate members. The notified area is governed by the state governments through a body nominated by it. The primary object of every urban local body is to provide civic amenities to the people and the overall development of the town.

Darjiling municipality is the oldest municipality in the district and was established on 1st July, 1850. It originally covered an unbelievably large area of 138 sq. miles ranging from below Pankhabari to the borders of Sikkim. Year of establishment of other two municipalities - Kurseong and Kalimpong and Mirik NA are 1879, 1945 and 1984 respectively. Siliguiri Municipality has become the municiapal corporation during the last decade as per notification no. 27/C-4/MIM-34/92 dated 12.01.94 with increase of some areas.

Civil Administration :

The Civil Administration of the district consists of the District Magistrate as the Principal Executive with 4 Subdivisional Officers being the subdivisional heads and one Block Development Officer for each CD Block. Under the police administration, Superintendent of Police is the head of the district and under him there are 4 Sub-divisional police officers with Inspector in charge/Officer in charge in each police station. At the district Head Quarter District Judge is the head of the Judiciary. The subdivisional Judicial Magistrate sits in the Courts at the subdivisional level.

Physical Features

(i) Location and size

The district Darjiling lies between $26^0 27' 10''$ and $27^0 13' 05''$ north latitudes and $87^0 59' 30''$ and $88^0 53' 00''$ east longitudes. The district is bounded by Sikkim on the north, by Bangladesh and Uttar Dinajpur district and Bihar on the south, by Nepal on the west and by Bhutan and Jalpaiguri on the east. The total area of the district is 3,149 sq. kms. Its rank in respect of the area in the state is 12th. Its north to south extension is of 87 kms. that of east to west is of 90 kms.

(ii) Physiography :

The district is divided into two regions, hilly and the plain area - a portion of the outlying hill of the lower Himalayas and Terai - a stretch of territory lying along their base. All such areas, are more or less covered by deep forests. The northern part of the district is fully mountainous facing Singalila mountain and the southern part is almost plain in nature with green valleys. The hills rise abruptly from the plain and the elevation increases northwestward with great heights in the uppermost part. The northern portions consist of hard gneissic rocks capable of resisting denudation to a considerable extent, while the southern portion comprises of comparatively soft, thin, slaty and half - scheistose rocks which are less resistant to erosion.

Topographically the district is divided into the following five sub-micro regions.

1. Darjiling Himalayas - The region is hilly and extends in the northern part of the district. The hill ranges in north-west to south-east alignment and its elevation varies from 400 to 3,000 metres. Along the northern boundary of the region the great Rangit flows in a very deep valley towards the east and falls in the Tista.

2. Kurseong Range - The region extends between the highlands on the north and the plains of the Terai on the south. The Mechi river on the West and the Tista river on the east form the limits of regional boundary. This region slopes from north to south and its altitude ranges from 300 to 1,800 metres approximately above the sea level.

3. Kalimpong Range - The region lies on the south - east of Darjiling Himalayas and extends from the Tista river on the west to the Jaldhaka river on the east. The region is characterized by the presence of rising hills, numerous rivers and small torrents.

4. Western Duars - The region seems to be flat and is sloping from north to south as evident by the flow of the rivers. The Mechi river flows along the regional boundary on the west and the balasan river traverses along the north-eastern parts of the region. The general elevation rises from 80 to 300 metres. There is a lower range called lohargur/Loharger or iron hill which is covered by a dense Terai forest.

5. Mahananda Tract - The region extends in the extreme south-east corner of the Darjiling district having the smallest area of 195.40 km2. The region is a continuation of the western Duars towards the south and some local heights between 100 and 150 metres can be seen in this area. The Mahananda is the only main river flowing along the boundary line of this region. Elevation of the district from mean sea level is 3,596 metres.

Flora & Fauna :

The Himalayan jungles have always been home to the most exotic species of flora and fauna. The short spring season sees the mountain bathed in all conceivable hues. The fiery Rhododendrons splash the mountainside in the most beautiful reds, whites and the pale magnolia forests providing a striking contrast. The valley comes alive with a profusion of daisies, daffodils, chrysanemums and tuberrous begonia.

Even the rarest Orchids grow in abundance in the wild. Amidst this dazzling flora a fauna is equally exotic. The Red Panda is found in the dense jungles between Gairibas and Molley on the way to Sandakpu. The Barking deer, Wild Bear and Himalayan bear are the other animals that are found here. Darjiling is also the abode of a variety of birds and butterflies.

(iii) Drainage

The main rivers of the district are the Tista, the Jaldhaka and the Mahanadi (Mahananda). The Tista is the most important river of the district and rises from a glacier in the north of Sikkim draining whole of that state. It forms the boundary of the district from the point where it is joined by the Rangpo Chu (the chief tributary of Tista) with the great Rangit. From the latter point it flows entirely within the district through a gorge known as Sivak Gola Pass of only 100 yards breadth

which debouching into the plains widens and becomes several hundred yards wide. It is a broad mountain torrent with numerous rapids. Its current is swift, dangerous and liable to sudden rise in level. It's length within the district is 37 kms.

The Mahanadi or Mahananda has its source near the east of Kurseong and flows south east . The river attains it's full girth after leaving the Terai portion of the district. The length of this river is 91.70 kms.The Mahanadi or Mahananda is the Bengali corruption of the Lepcha name of the river "Mahaldi".

The river Jaldhaka enters the district at an altitude of 2,020 feet (615.69m.) at its confluence with the Nichu its right bank tributary and flows west to east . The length is 19.47 kms.

Apart from these three main rivers, the mention of the Great Rangit, Mechi and Balasan is obvious too. The Great Rangit is the chief affluent of Tista. And Mechi and Balasan is that of the Mahanadi or Mahananda.

There are innumerable hill streams in the district called Khola or Jhora. The Tista - the master stream of the district has seven tributaries from the right and five from the left. The Mahanadi has three right bank and four left bank streams. Jaldhaka receives five right bank tributaries and numerous left bank tributaries from Bhutan side. Even the tributaries of these three main rivers like the Great Rangit, Mechi and Balasan have also numerous streams as their tributaries.

Main water features such as tank, lake reservoir etc. :

The municipal and cantonment areas of Darjiling gets its water supply from the springs and rivulets on the southern slope of the Senchal range situated just south of Darjiling town which collects in a large artificial lake. At the lower altitude Konkhola spring acts as the supplementary source. There is some minor springs and rivulets between Kalimpong-Gorubathan border with very meagre discharge and the network of springs in the Durbindanra Hill which is situated in the south of Kalimpong and has a moderate discharge meets the local requirement of Kalimpong. There are two natural lakes in the district most prominent of few lakes - one is situated about 6 miles west of Hope Town while another is called Ramtal. Ramtal and adjoining little stream named the Ramthi nadi, a few miles to the east of the Tista is measured about 1,000 square kilometres.

(iv) Climate

The climate of upper Dajiling is cool and bracing because of higher elevation while in the Terai and the lower valley part of the district it is not so cool .The atmosphere of the northern tract of the district is highly humid throughout the year. In the plains and the low lying tracts the relative humidity is however slightly less. The spring and autumn are the most refreshing seasons in the district . The monsoon is a period of bothersome with frequent mist and nagging rain. The winter after December, is usually too cold and unpleasant.

Darjiling district has the special opportunity of recording its specially noteworthy climatic conditions on daily basis through it's four observatories at Darjiling, Kalimpong, Kurseong and Bagdogra. Also the tea estates, the military cantonments, the Forest and the Agriculture Departments of the district record climatic data on their own. According to the official records, while from March to May a period of three months is the period of oppressive summer (more so in night) in the plains and low valleys, in the hilly portion of the district the temperatures both day and night are higher during the rains than in summer. The temperatures begin to fall more rapidly from November. January is the coldest month of the district and August the hottest. Frosts are fairly common throughout the cold season in the hilly parts of the district. Cold waves occasionally visit the district between November and early March when the minimum temperature may fall even below 00c in places like Darjiling and Kalimpong. Average of the maximum and minimum temperature of the district for the preceding 10 years is as follows:

Year	Maximum (in Celsius)	Minimum (in Celsius)
1991	30	4
1992	31	3
1993	33	2
1994	30	3
1995	-	-
1996	-	-
1997	27	1
1998	37	7
1999	36	10
2000	-	4

Note : Yearwise data have been taken from District Statistical Hand Book, 1996 & 2001

Rainfall is generally heavier in the southern Terai

and the ridges and slopes near the plains. Kurseong , for instance , has an annual rainfall of 4,052 mm, while Kalimpong near the northern border of the district, gets only 2,254 mm.80 per cent of the rainfall is full of precipitation during the south west monsoon.Thunder storms occur in summer and in October. On an average there are about 120 rainy days in a year with rainfall of 12.5 mm per day.

During November to May upper winds over the Himalayan region are predominantly westerly and at extreme heights stormy and often rise to hurricane force. This speed lessens in the month of the March, April and May and with the setting in of wind direction is steady from November to May. During monsoon it is unsteady and becomes southerly or south easterly over the Himalayas. In October after the monsoon has gone, the westerly movement of the wind begins. Average wind force at Darjiling does not exceed 6 miles per hour, though the mean velocity is higher at Kalimpong and lower in the Terai. Surface winds have easterly component. In Darjiling town from November throughout the winter the direction of the wind is east-northeast and in the Spring upto June west or southwest and in the monsoon east southeast.

Census Concepts

Building :

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent Houses :

Houses, the walls and roof which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, brunt bricks, stones or concrete. Roof may be made of any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-Permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breath of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling room. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking etc. is regarded as dwelling room. In a situation where a census house is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant's quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or, staircase, etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder :

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure

with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storied ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storied structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area there are separate buildings owned by different persons then each such building is treated a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building should treated as a separate building. But if in any of these buildings there are flats in occupation of different households, each such flat should be reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it should not be realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in three rooms and the second household occupying two rooms, then considering the use, the first three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building should be treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes of the same purpose, then each structure attached to the main hostel/hotel should be treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts should be treated separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work-shed etc., these should be treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number is given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up is treated as a building.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village'; for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) A place which satisfy or are expected to satisfy the following criteria simultaneously :

i) A minimum population of 5,000;

ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

For identification of places which would qualify to be classified as 'urban', all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban areas under Urban Agglomerations. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., may have come up near a statutory town or city but these are within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given in the next page.

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not

only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceeding the date of enumeration.

Main Worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year precceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceeding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceeding the date of enumeration) is termed as 'Non worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural Labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work Participation Rate :

Percentage of workers (main + marginal) to total population.

Population Density :

Population density is the number of persons inhabited per square kilo-metre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex-ratio :

Number of females per 1000 males in a population.

Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil :

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below.

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \frac{\sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specificMortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q_1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 :

Probability of dying between birth and age 2.

q_5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or underduring the year}}{\text{Number of live births during the year}} \times 1,000$$

Early neo-natal mortality rate (ENMR) :

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Late neo-natal mortality rate(LNMR) :

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 married women in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of married women aged 15-49}} \times 100,000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9) :

Number of children in the age group 5-9 years per 1,000 women in the age group 15-49 years.

Migration :

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another

place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/ relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration :

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Census Findings - Population & its distribution

Progress of Population

Amongst the districts of West Bengal, Darjiling has the population content of 1,609,172 and the rank which was 17th in 1991 has not changed in 2001. It accounts for 2.0 per cent of total population of the state. The percentage distribution of population of the district among the rural and urban areas for 1951-2001 has been shown in table - 1 below :

TABLE-1: RURAL AND URBAN POPULATION IN THE DISTRICT OF DARJILING WITH PERCENTAGE TO TOTAL IN BRACKETS (1951-2001)

Sector/Census Year	1951	1961	1971	1981	1991	2001
Total	445,260	624,640	781,777	1,024,269	1,299,919	1,609,172
Rural	350,779 (78.8)	480,003 (76.8)	601,565 (76.9)	742,116 (72.5)	903,859 (69.5)	1,088,740 (67.7)
Urban	94,481 (21.2)	144,637 (23.2)	180,212 (23.1)	282,153 (27.5)	396,060 (30.5)	520,432 (32.3)

(a) Distribution of population in rural-urban areas:

The rural population of Darjiling district according to census of India, 2001 is 1,088,740 in absolute numbers and 67.7 per cent to the total population. It would be seen that the proportion of rural population of the district which was 78.8 per cent in 1951 came down to 76.8 per cent in 1961, slightly increased to 76.9 per cent in 1971 and from 72.5 per cent in 1981 onward to 67.7 per cent in 2001, it has continuously declined. Conversely, the proportion of urban population of the district has continuously increased from 21.2 per cent in 1951 to 32.3 per cent in 2001, except 1971, when it has slightly decreased.

(b) Size, class and Status of Towns, Population, Growth, Density and Sex ratio :

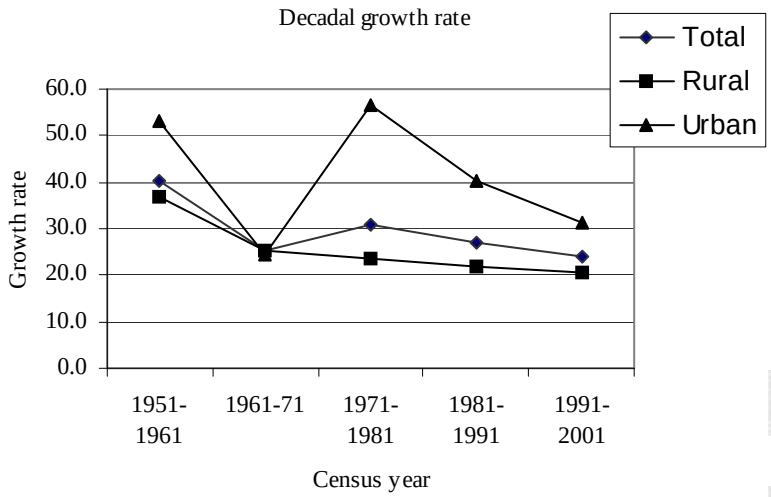

There is one municipal corporation, 3 municipalities viz. Darjiling, Kalimpong and Kurseong, one notified area viz. Mirik and 4 census towns viz. Pattabong Tea Garden, Cart Road, Uttar Bagdogra and Bairatisal thereby making a total of 9 statutory and non-statutory towns in all. Siliguri with population of 284,602 belongs to class I and sub-class M2. Next comes Darjiling, which with population of 107,197 also belongs to class I but sub-class M1. Both Kalimpong and Kurseong with population of 42,998 and 40,019 respectively belong to class III towns. Out of the 4 census towns, both Uttar Bagdogra and Cart Road with population of 15,774 and 13,663 respectively occupy class IV category. Bairatisal is a class V town with population of 5,405 and Pattabong Tea Garden with population of only 1,633 is a class VI town.

Growth rate :

The rural-urban decennial growth rate for Darjiling district from 1951-2001 shows that during 1991-2001 the rural growth rate is 20.5 per cent while the urban growth rate is 31.4 per cent. The urban decadal growth rate in Darjiling between 1951-2001 has always been higher than the rural decadal growth rate except 1961-71 when it actually declined though not significantly. Darjiling has the third highest decadal growth rate in 2001 at 23.8 per cent among the district of West Bengal. An overall picture of the growth rate of the district for 1951-2001 can be observed from table - 2 below :

TABLE- 2 : DECADAL GROWTH RATE OF POPULATION OF DARJILING (1951-2001)

	1951-1961	1961-71	1971-1981	1981-1991	1991-2001
Total	**35.9**	**25.2**	**31.0**	**26.9**	**23.8**
Rural	31.5	25.3	23.4	21.8	20.5
Urban	53.1	24.6	56.6	40.4	31.4

It is evident from the Chart that though the population of the district has been increasing during the last 50 years in absolute numbers, the growth rate has experienced a decreasing trend, except 1981 when it marginally increased as compared with 1971. Growth rate of 1961-71 shows a sharp fall of 15.1 per cent points over the previous year. It again increased during 1971-81 substantially. Then gradual fall is observed in 1981-1991 and 1991-2001.

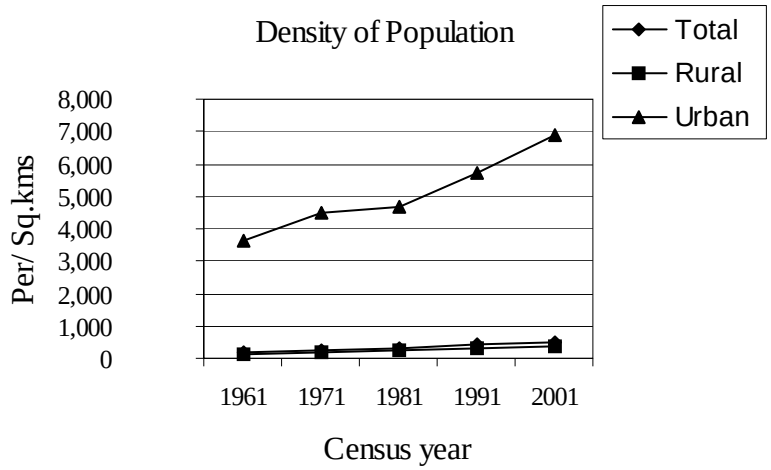

Density of Population

West Bengal has the highest population density among the states at 903 persons per sq.km. It was 767 per sq.km.in 1991. The district Darjiling had the density of population at 413 persons per sq.km. in 1991 which has gone up to 511 in 2001. The rank of the district remains unchanged being 16th in both 1991 and 2001. The rural urban trend of the density of the district can be observed in the table 3 below for 1961-2001:

TABLE- 3 : DENSITY OF POPULATION IN THE DISTRICT OF DARJIING (1961-2001)

T / R / U	1961	1971	1981	1991	2001
Total	208	254	325	413	511
Rural	149	198	240	293	354
Urban	3,634	4,517	4,687	5,717	6,918

It can be seen from the above table that the density of population has steadily gone up at each succesive census since 1961. The urban density of population, as expected has been much higher than that of rural.

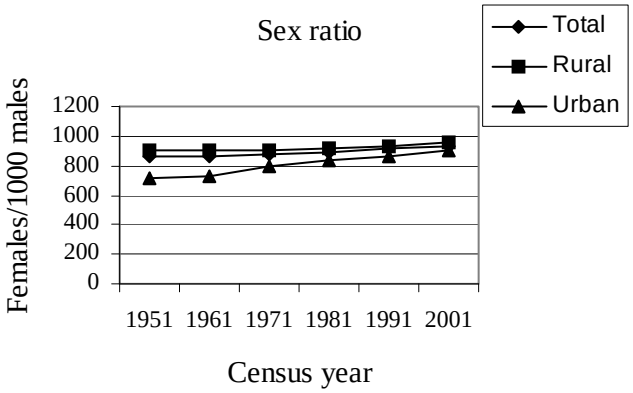

It is observed from the chart that the density of population in the district over 5 decades has shown an increasing trend. For both total and rural density the Decennial increase is all along marginal. The increase of density in the urban areas is as usual, high with only exception of 1981, when the difference is just marginal (170) over 1971.

Sex ratio : The sex ratio has been a very important demographic issue in every census. Since 1951 there has been continuous increase in the overall sex ratio in

favour of females in the district of Darjiling as well as in its rural-urban component. It has increased from 863 females per 1000 males in 1951 to 937 females per 1000 males in 2001. For the last 50 years, the sex ratio by residence has been shown in table-4 below :

TABLE-4 : SEX RATIO IN DARJILING DISTRICT (1951-2001)

	Sex Ratio		
Census year	Total	Rural	Urban
1951	863	905	721
1961	864	909	731
1971	882	910	793
1981	888	911	830
1991	914	934	868
2001	937	956	899

As expected the urban sex ratio has always been much lower than that of rural. It is a heartening fact that it is improving at each level i.e. among the total population of the district and also among the rural and urban population simultaneously. The other distinctive feature of the sex ratio in the district of Darjiling is that during the period of 1951-2001, the rural sex ratio has improved by mere 51 points per 1,000 but the urban sex ratio has registered a marked improvement of 178 points per 1000 against the district average (74 points per 1,000).

Sub-District level

All the CD Blocks of Darjiling have recorded improvements excepts Matigara CD Block where it has slightly declined to 902 in 2001 from 903 in 1991. The highest sex ratio (1,022) has been recorded in case of JoreBunglow Sukiapokhri CD Block which was also highest in 1991. The lowest sex ratio of 902 has been recorded in case of Matigara CD Block.

Among the urban areas, the highest sex ratio of 1,026 has been recorded in case of Pattabong Tea Garden census town and the lowest of 874 in case of Siliguri municipal corporation.

Work participation rate :

The work participation by total rural and urban residence in the district and state can be found in the table below for 1951-2001 :

TABLE- 5 : PERCENTAGE OF TOTAL WORKER (MAIN +MARGINAL) TO TOTAL POPULATION (1951-2001)

	Darjiling			West Bengal		
Year	Total	Rural	Urban	Total	Rural	Urban
1951	39.4	39.7	38.6	34.7	32.6	40.86.
1961	42.6	45.0	34.7	33.2	32.7	34.7
1971	36.1	38.1	29.5	27.9	27.2	30.1
1981	36.2	38.7	29.9	30.2	30.3	29.8
1991	34.2	36.2	29.8	32.2	33.2	29.6
2001	35.4	37.0	31.9	36.8	37.9	33.9

Note - The concept of main worker and marginal worker was introduced in 1981

The above table shows that from 1951 to 1991 percentage of total workers to the total population was higher in the district as compared with the State. But in 2001 the picture is changed whereby the states work participation rate (36.8 per cent) is marginally higher than that of district average (35.4 per cent). In case of district, the work participation rate has registered increase or decrease at each alternate census and ultimately came down from 39.4 in 1951 to 35.4 in 2001. But in case of state it has consistently declined from 34.7 in 1951 to 27.9 in 1971 and increased to 30.2 in 1981and again increase to 32.2 in 1991 and further increased to 36.8 in 2001. The urban work participation rate has been lower than that of rural at each census in the district. However, in case of West Bengal, it has been higher during 1951-1971 and lower during 1981-2001 than that of rural.

The following table presents the percentage of main workers to total population by sex for 1951-2001 in Darjiling.

TABLE 6 : PERCENTAGE OF MAIN WORKERS TO TOTAL POPULATION BY SEX (1951-2001)

	Darjiling			West Bengal		
Year	Person	Male	Female	Person	Male	Female
1951	39.4	51.9	25.1	34.7	54.8	11.3
1961	42.6	53.4	30.1	33.2	54.0	9.4
1971	36.1	48.9	21.6	27.9	48.8	4.4
1981	35.0	48.7	19.6	28.3	48.7	5.8
1991	33.7	46.8	19.4	30.2	50.7	8.0
2001	29.8	43.2	15.4	28.7	47.0	9.1

Note - The concept of main worker and marginal worker was introduced in 1981

It is observed that per centage of main worker to total population in the district all along, since 1951 is higher than the state's per centage. Most probably it has happened mainly due to more and more work participation of female in tea gardens. It is also observed that except 1971, the proportion of male main workers in the district has been lower as compared with the State's figure and in 1981 the proportion of male main worker for both the district and state are same. However, the proportion of female main workers in the district has always been much higher than the corresponding figures for the state. With some fluctuations, the proportion of main workers in the district has gone up from 39.4 per cent in 1951 to 29.8 per cent in 2001 as against the corresponding figures of 34.7 per cent and 28.7 per cent respectively in the state.

Literacy rate : It will be evident from table 7 below that during the decade 1991-2001 literacy rate in Darjiling district has improved by 13.8 per cent points which is the highest for the district in the post independence period. Similarly rural literacy in Darjiling has increased by 16.8 per cent points, which is again the highest in the post independence period. During the same period urban literacy has also increased by 6.5 per cent points which is, however, less than the per cent point increase of 1991 (7.7).

Comparative analysis of improvement in literacy rate of the district with that of the state shows that Darjiling district is always ahead of the state in per centage point increase except in 1991.

Table 7 below gives the comparative literacy rate for Darjiling and West Bengal for 1951-2001 by residence and sex :

TABLE - 7 : COMPARATIVE LITERACY RATE BY SEX AND RESIDENCE, DARJILING AND WEST BENGAL WITH CHANGE IN DECENNIAL PERENTAGE POINT IN PARENTHESIS (1951-2001)

		Darjiling			West Bengal		
Year	T/R/U	P	M	F	P	M	F
1	2	6	7	8	3	4	5
	T	22.7	33.7	9.7	25.0	34.7	13.2

Note : Upto 1971 Literacy Rate was calculated excluding 0-4 age population. From 1981 onwards Literacy Rate is calculated excluding the 0-6 age group population

Sub district level :

The highest per centage point increase in literacy rate among the rural areas of Darjiling district has been noticed in case of Gorubathan CD Block wherein the literacy rate jumped from 43.2 in 1991 to 66.9 in 2001 registering an increase of 23.7 per cent points. (In 1991 Jaldhaka Hydel Power Project Township was part of this CD Block as urban segment, but it is declassified now). Next comes Naxalbari CD Block wherein literacy rate increased from 43.3 to 64.7 showing an increase of 21.4 points between 1991-2001. However, the highest literacy in case of rural areas has been observed in Jore Bunglow Sukiapokhri CD Block with 76.7 followed by Kalimpong-I CD Block with 74.2 (Kalimpong-I had the highest literacy among the rural areas with 60.8 in 1991). In rural both male and female literacy rate in 2001 is the same. Jore Bunglow-Sukiapokhri has recorded the highest literacy rate at 86.9 and 66.8 respectively. The lowest rural literacy rate at 50.3 has been recorded at Phansidewa CD Block which also has both the lowest rural male and female literacy rate in 2001 at 62.2 and 37.7. Among the urban areas of the district, Uttar Bagdogra census town has recorded the highest decadal increase in literacy rate from 68.4 in 1991 to 84.2 in 2001 i.e. an increase of 15.8 points. However, Darjiling municipality has the distinction of having the highest urban literacy rate in the district in 2001 with 89.8 per cent followed by Kurseong municipality with 89.6 per cent. Kurseong municipality also has the highest urban male literacy rate at 93.7 per cent while Darjiling municipality has the highest female literacy rate at 85.8 per cent. The lowest urban literacy rate has been recorded at Siliguri municipal corporation (part) with 79.3 per cent.

Religion :

Religion is one of the basic cultural characteristics of the population. In a secular state like India, several religions have thrived and every decennial census has attempted to provide an interesting picture of the religion of the people. The data on religion pursued by persons give the content of population of each of the six major religious communities, viz, Hindus, Muslims, Christians, Sikhs, Buddhists and Jains and combined figures for other religions and persuations and 'religion not stated' by total. The table-8 below gives the distribution of population by religion for 1961-1991 of the district.

TABLE 8 : POPULATION BY RELIGION IN THE DISTRICT OF DARJILING (1961-2001)

Year	Hindus	Buddhist	Christian	Muslim	Sikhs	Jain	Other religions and persuasions	Religion not stated	Total
	1	2	3	4	5	6	7	8	9
1961	501,382	82,046	20,475	19,214	626	840	40	17	624,640
	(80.3)	(13.1)	(3.3)	(3.1)	(0.1)	(0.1)	(0.0)	(0.0)	(100.0)
1971	636,741	91,358	28,037	23,523	1504	597	13	4	781,777
	(81.5)	(11.8)	(3.6)	(3.0)	(0.2)	(0.1)	(0.0)	(0.0)	(100.0)
1981	813,625	120,864	47,161	37,299	2,447	903	125	1845	1,024,269
	(79.4)	(11.8)	(4.6)	(3.6)	(0.2)	(0.1)	(0.0)	(0.2)	(100.0)
1991	1,013,310	155,295	65,605	59,140	1,251	802	4,028	488	1,299,919
	(78.0)	(12.0)	(5.1)	(4.6)	(0.1)	(0.1)	(0.3)	(0.0)	(100.0)
2001	1,237,714	177,327	99,232	85,378	2,229	1,078	5,507	707	1,609,172
	(76.9)	(11.0)	(6.2)	(5.3)	(0.1)	(0.1)	(0.3)	(0.0)	(100.0)

Note:- Figures within brackets indicate percentage to total population

It is observed from the above table that Hindus constitute the maximum population by religion in Darjiling district being followed by the Buddhist, Christian and Muslim for all the census year since 1961. There are marginal difference between the percentage of Christian and Muslim population. The percentage of Hindu population has increased between 1961 and 1971 and decreased from 1981 to 2001. The percentage of Buddhist population has decreased from 13.1 in 1961 to 11.8 in 1981 and increased to 12.0 im 1991 and again decreased to 11.0 in 2001. Whereas the percentage of Christian population has continuously increased from 3.3 in 1961 to 6.2 in 2001. The fourth highest position is occupied by Muslim whose percentage has decreased from 3.1 in 1961 to 3.0 in 1971 and again increased to 5.3 in 2001. A table pertaining to six numerically biggest religions is shown in Annexure-V.

Note : The town is spread over to District Jalpaiguri

A look at Table-1 above help to understand the trend of decadal change in the population of the CD Block in the district during 1991-2001. We can see here that three CD Blocks have recorded negative growth rate ranging from 1.2 to 1.5 per cent. These three CD Blocks are Darjeeling Pulbazar, Rangli Rangliot and Mirik. The highest decadal growth in population is seen in Naxalbari C D Block (54.6 per cent) while Kurseong has registered the least growth of 6.7 per cent among the CD Blocks witnessing positive growth in their population.

Among the urban units, Kurseong Municipality has registered the highest growth of 49.6 per cent while least of 10.7 per cent is recorded in Kalimpong Municipality.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

12	Kharibari	75	9 (12.0)	14,758	13,681	1 (1.3)	2,818	2,624	0 (0.0)	0	0
Districts (Rural) Total :		**640**	**146 (22.8)**	**227,395**	**218,388**	**30 (4.7)**	**102,008**	**96,907**	**5 (0.8)**	**28,387**	**27,117**

It can be seen from the above table that the highest number of villages i.e 175 (27.3 per cent) fall in to the range of 1,000-1,999. Number of villages in the range of 5,000-9,999 and 10,000 above are as low as 4.7 per cent and 0.8 per cent respectively and most of these large sized villages are in Naxalbari, Phansidewa, Matigara and Rangli Rangliot CD Blocks. The proportion of smallest villages having population of below 200 persons is 11.9 per cent .

TABLE 3 : NEW TOWNS DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Sl. No.	Name of the District	District Code	Sl. No.	Name of Town			
	District-Darjiling	01					
(a) NEW							
(i) Statutory Town				: N I L :			
(ii) Census Town			1	Darjiling	01	1	Pattabong Tea Garden
(b) Denotified			(i)	Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns			
				: N I L :			
			(ii)	Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria			
				: N I L :			
			(iii)	Census towns of 1991 census are notified as statutory town in 2001 census			
				: N I L :			
(C) DECLASSIFIED							
2	Darjiling	01	1	Jaldhaka Hydel Power Project Town (NM)			
(D) WHOLLY MERGED WITH OTHER TOWN (S)							
				: N I L :			

Note :- Declassified means the Census Towns of 1991 census which failed to satisfy the demographic and echonomic criteria.

As stated in table – 3 above, Pattabong Tea Garden has been treated as a new Census Town in 2001 and Jaldhaka Hydel Power Project census town (NM) of 1991 has been declassified in 2001.

As stated in Table - 3 above, Pattabong Tea Garden has been treated as a new Census Town in 2001 and Jaldhaka Hydel Power Project census town (NM) of 1991 has been declassified in 2001.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	19	3.0	3,486	0.3
11-20	12	1.9	1,940	0.2
21-50	22	3.4	7,544	0.7
51-100	17	2.7	9,867	0.9
101-200	53	8.3	63,893	5.9
201-300	60	9.4	53,551	4.9
301-500	156	24.4	280,889	25.8
501 +	301	47.0	667,570	61.3
Not known	0	0.0	0	0.0
District Total :	**640**	**100.0**	**1,088,740**	**100.0**
Population Density (Rural) of the district :		**354**		

लोकाभिमुख PEOPLE ORIENTED

The above table presents the density rangewise distribution of villages in the district. Accordingly, we can see that almost half (47.0 per cent) of the total number of villages fall in the density range 501 and above while another 24.4 per cent are in the range of 301-500. Together it is observed that "substantial share" of villages, (71.4 per cent) is in the density range of 301 and above containing 87.1 per cent of rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT AT - 1901-2001

	State - West Bengal			District - Darjiling		
Census year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	945	994	650	875	894	690
1911	925	982	614	871	893	666
1921	905	971	591	898	912	777
1931	890	961	578	881	906	728
1941	852	945	559	884	912	736
1951	865	939	660	863	905	721
1961	878	943	701	864	909	731
1971	891	942	751	882	910	793
1981	911	947	819	888	911	830
1991	917	940	858	914	934	868
2001	934	950	893	937	956	899

Note - Sex ratio has been defined here as the numbers of Femals per 1000 Males

In Table 5 above we can have a glance on the state of sex ratio in the district since the year 1901. The sex ratio is an important demographic component. Imbalanced sex ratio is considered unhealthy demographic phenomena. In viewing the sex ratio at the state level, it is observed that after a regular fall during the period 1901(945) to 1941 (852), it has picked up upwards trend in 1951 with a sex ratio of 865 and this trend continued without any disruption up to 2001 with a sex ratio of 934. In case of district, the trend of sex ratio has been more fluctuating featuring increase or decrease at almost alternate census. It was 875 in 1901 and reached the level of 937 in 2001. When we compare the district sex ratio with that of state, it is noticed that during 1901-2001 the sex ratio in the district has improved by 62 points per 1,000 as against a decline of 11 points per 1,000 in the sex ratio of the state. The urban sex ratio has been much lower than the respective rural sex ratio in case of both the district as well the state. Further, in a hundred year period the rural sex ratio in the district has improved by 62 points per 1000 from 894 in 1901 to 956 in 2001 as against the decrease of 44 points per 1,000 from 994 in 1901 to 950 in 2001 in rural sex ratio of the state. However, the urban sex ratio has registered an increase of 209 points per 1000 from 690 in 1901 to 899 in 2001 in the district as against an increase of 243 points per 1,000 from 650 in 1901 to 893 in 2001 in the state.

TABLE 6 : SEX RATIO BY CD BLOCK, 2001

Serial number	Name of CD Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Darjeeling Pulbazar	983	983	1,026
2	Rangli Rangliot	992	992	---
3	Kalimpong -I	968	968	---
4	Kalimpong - II	925	925	---
5	Gorubathan	969	969	---
6	Jorebunglow Sukiapokhri	1,022	1,022	---
7	Mirik	1,001	1,001	---
8	Kurseong	982	982	979
9	Matigara	902	903	876
10	Naxalbari	911	911	915
11	Phansidewa	950	950	---
12	Kharibari	941	941	---
	District Total :	**937**	**956**	**899**

It can be seen from the above table that the over all sex ratio of the district compiled from the CD Blocks is 937 with 956 in rural and 899 in urban. Among the CD Blocks, two CD Blocks namely the Jorebunglow Sukhiapokhri (1022) and Mirik (1001) have the higher sex ratio of above one thousand against the district average of 937. In the case of other CD Blocks the sex ratio is always above 900 overing between 902 to 992. Sex ratio among rural population is also above 900 in all CD Blocks, the highest again being in Jorebunglow-Sukhiapokhri and Mirik, while among the urban population, Matigara CD Block has recorded the lowest sex ratio of 876 and highest of 1,026 in the Darjeeling Pulbazar CD Block.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of CD block	Sex ratio
1	2	3
1	Darjeeling Pulbazar	983
2	Rangli Rangliot	992
3	Kalimpong -I	968
4	Kalimpong - II	925
5	Gorubathan	969
6	Jorebunglow Sukiapokhri	1,022
7	Mirik	1,001
8	Kurseong	982
9	Matigara	903
10	Naxalbari	911
11	Phansidewa	950
12	Kharibari	941
	District (Rural) Total :	**956**

It can be seen from the above table that the rural sex ratio of the district is 956. The two CD Blocks viz. the Jorebunglow sukhiapokhri and Mirik have the higher sex ratio of 1,022 and 1,001 respectively in the district. Among other CD Blocks, it is between 903 to 992, against the district average of 956.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	3.1	21,280	2.0
700-749	5	0.8	7,058	0.6
750-799	9	1.4	2,189	0.2
800-849	21	3.3	16,347	1.5
850-899	62	9.7	80,094	7.4
900-949	159	24.8	306,032	28.1
950-999	176	27.5	362,122	33.3
1000-1099	155	24.2	277,706	25.5
1100+	33	5.2	15,912	1.5
District Total :	**640**	**100.0**	**1,088,740**	**100.0**
Sex ratio (Rural) for District :		**956**		

Distribution of district's rural population by range of sex ratio is highlighted in table 8 which shows that almost 77 per cent of the total villages fall in the sex ratio range of between 900 to 1099, sharing about 87 per cent of the total population . While on the other hand, around 5 per cent of the villages with just about 2 per cent population is seen falling in the sex ratio range of 1,100 and above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bairatisal	CT	876
2	Cart Road	CT	979
3	Darjiling	UA	917
	(a) Darjiling	M	915
	(b) Pattabong Tea Garden	CT	1,026
4	Kalimpong	M	929
5	Kurseong	M	961
6	Mirik	NA	979
7	Siliguri (Part) #	M.Corp.	874
8	Uttar Bagdogra	CT	915
Sex ratio (Urban) for the district :			**899**

The town is spread over to District Jalpaiguri

The above table reveals that the sex ratio among the urban population of the district is 899. Accordingly it is seen that Pattabong Tea Garden (CT) in Darjiling (UA) has registered the highest sex ratio at 1,026. In tea gardens basically female labourers are employed for picking up tea leaves which is reflected in preponderance of females over the males in this census town. While the lowest sex ratio of 874 is registered in Siliguri (M. Corp) (part) in the case of other towns it lies between 876 to 979.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial number	Name of C D block	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Rural	32,401	16,372	16,029	979
		Urban	0	0	0	

Serial number	Name of C D block	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
12	Kharibari	Total	15,332	7,861	7,471	950
		Rural	15,332	7,861	7,471	950
		Urban	0	0	0	
	District Total :	**Total**	**204,643**	**104,324**	**100,319**	**962**
		Rural	**153,133**	**77,798**	**75,335**	**968**
		Urban	**51,510**	**26,526**	**24,984**	**942**

Sex ratio by residence in the age group 0-6 population for district as presented in table above is yet another important demographic element. The sex ratio for the district is 962 with 968 in rural areas and 942 in urban among the population of 0-6 age groups. It is understood from the table that there is a shortfall of 38 females per 1,000 males in this age category. As visible in the table all the CD Blocks have recorded a sex ratio of 900 and above. However, it is the highest in Gorubathan CD Block (1,045) and the lowest in Rangli Rangliot CD Block (919). In the case of urban population, Darjeeling Pulbazar CD Block has registered the highest sex ratio at 1047. It may be noted here that the urban population is very small i.e. 131 (males 64 females 67). The lowest sex ratio among the urban segment is seen in Kurseong CD Block (946). The implication of the imbalanced sex ratio among the population of 0-6 age group is that it will percolate among the adult populations when they grow up lessening the chance of improvement in future also.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial Number	Name of CD block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Darjeeling Pulbazar	12,893	6,496	6,397	985
2	Rangli Rangliot	6,679	3,481	3,198	919
3	Kalimpong -I	8,689	4,445	4,244	955
4	Kalimpong - II	7,069	3,592	3,477	968
5	Gorubathan	7,227	3,534	3,693	1,045
6	Jorebunglow Sukiapokhri	9,959	4,999	4,960	992
7	Mirik	4,974	2,545	2,429	954
8	Kurseong	8,670	4,395	4,275	973
9	Matigara	19,309	9,787	9,522	973
10	Naxalbari	19,931	10,291	9,640	937
11	Phansidewa	32,401	16,372	16,029	979
12	Kharibari	15,332	7,861	7,471	950
	District (Rural) Total :	**153,133**	**77,798**	**75,335**	**968**

The above table shows the state of sex ratio among the population of 0-6 age group in the rural population of the district. Accordingly it is seen that the sex ratio varies from the lowest of 919 to the highest of 1,045 females per 1,000 males among the various CD Blocks. In the case of Gorubathan CD Block, the females have outnumbered the males by 45 points per 1,000. The lowest sex ratio is, however, recorded in the case of Rangli Ragliot CD block (919). Out of 12 CD Blocks, 7 CD Blocks have returned equal to or higher sex ratio and 5 CD Blocks lower than the rural district average (968) in the 0-6 group population.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	50	7.8	1,998	1.3
700-749	22	3.4	2,732	1.8
750-799	34	5.3	6,766	4.4
800-849	40	6.3	8,334	5.4
850-899	59	9.2	18,707	12.2
900-949	85	13.3	28,472	18.6
950-999	79	12.3	28,806	18.8
1000-1099	122	19.1	36,359	23.7
1100+	149	23.3	20,959	13.7
District (Rural) Total	**640**	**100.0**	**153,133**	**100.0**
Sex ratio (Rural) for District :		**968**		

An attempt to highlight the distribution of rural population in 0-6 age group by sex ratio range have been made in table 12 above and it is observed that 149 villages (23.3 per cent) of the total 640 villages sharing 13.7 per cent of the total population fall in the sex ratio range of 1,100 and more. Next below it, it is seen that another 19.1 per cent of total villages with 23.7 per cent of total population fall in the sex ratio range of 1000-1099. While 7.8 per cent of the total villages with just 1.3 per cent of population fall in the sex ratio range of less than 700.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

	District (Urban) Total :		**51,510**	**26,526**	**24,984**	**942**

The town is spread over to District Jalpaiguri

State of sex ratio in 0-6 age for urban agglomerations and towns is furnished in the table 13 above. It is observed that the sex ratio among the urban population in 0-6 age group in the district is 942. There is wide variation in town wise sex ratio that spread over from 924 in Darjiling municipality to 1,047 in Pattabong Tea Garden census town. It may be seen here that the quantum of population is very small i.e. 131 (males 64, females 67) in Pattabong Tea Garden census town.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

12	Kharibari	Total	88,230	44,863	17,099	50.8	19.4
		Rural	88,230	44,863	17,099	50.8	19.4
		Urban	0	0	0	0.0	0.0
	District Total:	**Total**	**1,609,172**	**258,881**	**204,167**	**16.1**	**12.7**
		Rural	**1,088,740**	**207,422**	**178,878**	**19.1**	**16.4**
		Urban	**520,432**	**51,459**	**25,289**	**9.9**	**4.9**

The above table clearly demonstrate that the proportion of scheduled caste population is 16.1 per cent with 19.1 per cent in rural and 9.9 per cent in urban and the proportion of scheduled tribe population 12.7 per cent with 16.4 per cent in rural and 4.9 per cent in urban in the district. The proportion of scheduled caste population is seen comparatively higher in the CD Blocks located in the plains viz the Matigara (34.8 per cent), Naxalbari (25.4 per cent), Phansidewa (31.1 per cent) and Kharibari (50.8 per cent), clearly showing the highest proportion of scheduled caste population in Kharibari CD Block. It is further seen that Kurseong, Matigara and Naxalbari blocks have higher concentration of urban scheduled caste population in the district. However, in the case of ST population, we can see that the CD Blocks viz.Kalimpong-I (17.6 per cent), Kalimpong - II (24.6 per cent), Gorubathan (10.8 per cent), Matigara (14.2 per cent), Naxalbari (18.7 per cent), Phansidewa (31.3 per cent) and Kharibari (19.4 per cent) have registered relatively higher content of scheduled tribe population. The highest proportion of scheduled tribe population is registered in the Phansidewa CD Block (31.3 per cent) while the lowest in Jorebunglow Sukiapokhri (6.9 per cent).

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of CD block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Darjeeling Pulbazar	114,204	4,778	8,970	4.2	7.9
2	Rangli Rangliot	64,349	2,508	5,028	3.9	7.8
3	Kalimpong -I	67,680	4,806	11,878	7.1	17.6
4	Kalimpong - II	60,263	1,805	14,835	3.0	24.6
5	Gorubathan	54,279	3,082	5,880	5.7	10.8
6	Jorebunglow Sukiapokhri	100,724	5,991	6,945	5.9	6.9
7	Mirik	42,237	3,074	3,136	7.3	7.4
8	Kurseong	72,204	4,923	6,742	6.8	9.3
9	Matigara	123,921	43,769	18,251	35.3	14.7
10	Naxalbari	129,141	34,451	26,460	26.7	20.5
11	Phansidewa	171,508	53,372	53,654	31.1	31.3
12	Kharibari	88,230	44,863	17,099	50.8	19.4
	District (Rural) Total :	**1,088,740**	**207,422**	**178,878**	**19.1**	**16.4**

The above table shows that the scheduled caste population accounts for 19.1 per cent and scheduled tribe 16.4 per cent of the total rural population of the district. Among the CD Blocks, Matigara, Naxalbari, Phansidewa and Kharibari all falling in the plain areas of the district have bagged the substantial component of scheduled caste population varying from 26.7 per cent in Naxalbari to 50.8 per cent in Kharibari. The lowest proportion of scheduled caste population is registered in Kalimpong-II (3.0 per cent). The highest per centage of scheduled tribe population is registered in the plains in Phansidewa CD Block with 31.3 per cent and the lowest in Jorebunglow Sukiapokhri (6.9 per cent). Kalimpong-I (17.6 per cent), Kalimpong-II (24.6 per cent), Naxalbari (20.5 per cent), Phansidewa (31.3 per cent) and Kharibari (19.4 per cent) CD Blocks have returned higher proportion of scheduled tribe population than the rural district average (16.4 per cent).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	76	11.9	0	0.0
Less than 5	185	28.9	9,484	4.6
5-10	115	18.0	18,159	8.8
11-20	78	12.2	23,704	11.4
21-30	33	5.2	20,621	9.9
31-40	25	3.9	14,592	7.0
41-50	22	3.4	15,441	7.4
51-75	65	10.2	71,714	34.6
76 and above	41	6.4	33,707	16.3
District Total :	**640**	**100.0**	**207,422**	**100.0**

The above table shows that 76 villages (11.9 per cent) have no scheduled caste population. The highest number of villages that is 185 (28.9 per cent) fall in per centage range of less than 5.0 per cent followed by 115 villages (18.0 per cent) falling in next per centage range that is 5-10. Further, 78 villages (12.2 per cent) fall in percentage range of 11-20. There are 106 such villages (16.6 per cent) wherein more than 50 per cent population belongs to scheduled caste. The percentage distribution of scheduled caste population into various per centage range of scheduled caste population to total population in villages indicates that maximum proportion of scheduled caste population (34.6 per cent) is seen in per centage range of 51-75 followed by percentage range 76 and above (16.3 per cent) and percentage range 11-20 (11.4 per cent). The lowest proportion is noticed in percentage range less than 5 (4.6 per cent).

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	66	10.3	0	0.0
Less than 5	152	23.8	6,856	3.8
5-10	84	13.1	14,295	8.0
11-20	93	14.5	26,550	14.8
21-30	70	10.9	24,005	13.4
31-40	51	8.0	23,647	13.2
41-50	24	3.8	13,044	7.3
51-75	56	8.8	45,305	25.3
76 and above	44	6.9	25,176	14.1
District Total :	**640**	**100.0**	**178,878**	**100.0**

The presentation in table 17 shows that of the total 640 villages, 399 villages (62.3 per cent) in the district are such where the range of scheduled tribe population is up to 30 per cent and 40 per cent of ST population falls in this range while the remaining 175 villages (27.5 per cent) accommodating 59.9 per cent of the scheduled tribe population belong to the range of 31 per cent and above. In 66 villages (10.3 per cent) of the district on the other hand there is no scheduled tribe population at all.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bairatisal (CT)	5,405	1,230	160	22.8	3.0
2	Cart Road (CT)	13,663	1,860	855	13.6	6.3
3	Darjiling (UA)	108,830	7,201	12,750	6.6	11.7
	(a) Darjiling (M)	107,197	7,150	12,747	6.7	11.9
	(b) Pattabong Tea Garden (CT)	1,633	51	3	3.1	0.2
4	Kalimpong (M)	42,998	5,100	5,421	11.9	12.6
5	Kurseong (M)	40,019	3,320	2,304	8.3	5.8
6	Mirik (NA)	9,141	641	303	7.0	3.3
7	Siliguri (M Corp.) (Part) #	284,602	29,707	2,880	10.4	1.0
8	Uttar Bagdogra (CT)	15,774	2,400	616	15.2	3.9
	District (Urban) Total :	**520,432**	**51,459**	**25,289**	**9.9**	**4.9**

The town is spread over to District Jalpaiguri

It can be observed from the above table that scheduled caste population constitutes 9.9 per cent and scheduled tribe population 4.9 per cent of the total urban population of the district. All the urban units have the presence of scheduled caste/tribe population in them. In the case of scheduled caste population, it is noticed that mostly the towns located in the plains have higher proportions of scheduled caste population. The highest of 22.8 per cent is registered in Bairatisal (CT). Next to it Uttar Bagdogra census town has registered higher concentration of scheduled caste population at 15.2 per cent. Among the scheduled tribe population, it's higher concentration is seen in the hills, the highest of 12.6 per cent being in the Kalimpong Municipality. Darjiling (UA) has the share of 11.7 per cent. Proportion of scheduled tribe population in the towns located in the plains are comparatively low.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN CD BLOCKS, 2001

Serial Number	Name of CD block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Darjeeling Pulbazar	1,044	981
2	Rangli Rangliot	973	970
3	Kalimpong -I	1,008	1,020
4	Kalimpong - II	994	946
5	Gorubathan	995	982
6	Jorebunglow Sukiapokhri	1,091	1,082
7	Mirik	1,073	1,042
8	Kurseong	1,033	969
9	Matigara	947	997
10	Naxalbari	940	994
11	Phansidewa	923	995
12	Kharibari	938	992
	District (Rural) Total :	**950**	**993**

The above presentation contains the state of sex ratio among scheduled caste/ tribe population separately in the district at CD Block level of rural segment. A comparative look into it shows that the sex ratio among the scheduled caste population is much lower (950) as compared to scheduled tribe (993). Of the 12 CD Blocks in the district, 5 are such where the sex ratio is recorded above 1,000 mark in the case of scheduled caste population whereas it is only three CD Blocks in the case of scheduled tribe. The highest sex ratio for scheduled caste population is seen in Jorebunglow Sukiapokhri CD Block (1,091 and the lowest in Phansidewa CD Block (923). However, in case of scheduled tribe, the maximum sex ratio is returned by Jorebunglow Sukiapokhri CD Block (1,082) against the minimum exhibited by Kalimpong-II CD Block (946).

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bairatisal (CT)	884	905
2	Cart Road (CT)	998	1,096
3	Darjiling (UA)	990	977
	(a) Darjiling (M)	991	977
	(b) Pattabong Tea Garden (CT)	962	500
4	Kalimpong (M)	968	1,104
5	Kurseong (M)	1,012	1,043
6	Mirik (NA)	960	980
7	Siliguri (M Corp.) (Part) #	918	994
8	Uttar Bagdogra (CT)	922	1,026
	Sex ratio (Urban) for the district :	**941**	**1,016**

The town is spread over to District Jalpaiguri

The above table exhibits that the sex ratio among the urban scheduled caste population is 941 and among the urban scheduled tribe is 1,016. At the individual town level also the position of scheduled tribe is comparatively better placed for in four towns Kalimpong Municipality (1,104), Kurseong Municipality (1,043), Cart Road Census Towns (1,096) and Uttar Bagdogra census town (1,026) out of these towns the sex ratio exceeds 1000 mark only in one town- Kurseong Municipality (1,012) in the case of scheduled castes. Barring the Kalimpong Municipality and Kurseong Municipality other two towns with higher scheduled tribe sex ratio are located in the plains. The lowest sex ratio for the scheduled tribe population has returned by Pattabong Tea Garden Census Town (500) as against the highest in Kalimpong Municipality (1,104). In case of scheduled caste the highest sex ratio is observed in Kurseong Municipality (1,012) while the lowest in Bairatisal census town (884).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY CD BLOCKS, 2001

	District Total :	**Total**	**1,008,288**	**581,420**	**426,868**	**600,884**	**249,224**	**351,660**	**71.8**	**80.1**	**62.9**	**17.1**
		Rural	**617,473**	**364,483**	**252,990**	**471,267**	**192,150**	**279,117**	**66.0**	**76.1**	**55.4**	**20.7**
		Urban	**390,815**	**216,937**	**173,878**	**129,617**	**57,074**	**72,543**	**83.3**	**87.7**	**78.5**	**9.1**

It can be seen from the above table that the literacy rate for the district is 71.8 with 80.1 among males and 62.9 among the females. The rural literacy rate is 66 as against the urban literacy rate of 83.3. In terms of absolute figure, it is seen that Naxalbari CD block has the highest number of literate population with 82,261 persons. While Mirik CD block on the other hand has only 26,843 literate persons. But in terms of percentage, the picture is slightly different. Here, Jorebunglow-Sukiapokhri CD Block is at the top with 76.7 per cent, while in Phansidewa CD Block only 50.3 per cent of its population is literate. Among the male population, the highest literacy percentage is recorded in Jorebunglow-Sukiapokhri CD Block which is almost 87 per cent. However, Jorebunglow-Sukiapokhri and Kalimpong-I CD Blocks have recorded almost 67 per cent literacy among the females and stands at the top. The males have always dominated females with the widest male-female literacy gap of 25.1 per cent points seen in the case of Kharibari CD Block. However the lowest gap in male-female literacy rate is observed in Kalimpong-I CD Block (14.9 per cent points). As expected, among the CD Blocks, the gap in male-female literacy rate in urban areas is lower than that of rural, excepting Darjiling Pulbazar CD Block wherein the position is reverse, that is, male-female literacy

rate gap is higher in urban areas by 0.7 per cent points. However, the overall gap in male-female literacy rate for urban district (9.1 per cent points) is significantly lower than that of rural district (20.7 per cent points). The egalitarian attitudes of the urbanites have played major role in the reduction of male-female literacy rate gap among the urban population.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial Number	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

12	Kharibari	39,993	25,197	14,796	48,237	20,252	27,985	54.9	67.0	41.9	25.1
	District (Rural) Total :	**617,473**	**364,483**	**252,990**	**471,267**	**192,150**	**279,117**	**66.0**	**76.1**	**55.4**	**20.7**

The above table reveals that the literacy rate among the rural population of the district is 66 with 76.1 among the males and 55.4 among females. Among the CD Blocks, the highest literacy rate of 76.7 (86.9 for males, 66.8 for females) is obtained by Jorebunglow-Sukhiapokhri CD block, while Phansidewa CD Block is in the opposite with only 50.3 (62.2 for males, 37.7 for females) literacy rate. Darjeeling Pulbazar (72.7), Rangli Rangliot (72.8), Kalimpong-I (74.1), Kalimpong-II (69.6), Gorubathan (66.9), Jorebunglow Sukiapokhri (76.7), Mirik (72.0) and Kurseong (72.2) CD Blocks have recorded higher literacy rate and Matigara (63.7), Naxalbari (64.7), Phansidewa (50.3) and Kharibari (54.9) CD Blocks lower literacy rate than the rural district average (66.0). The widest gap in the literacy rate between male and female is registered in the Kharibari C D Block (25.1 per cent points) and the lowest gap is seen in Kalimpong-I CD Block (14.9 per cent points).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.3	8	0.0
1-10	1	0.2	39	0.0
11-20	14	2.2	4,024	0.4
21-30	15	2.3	11,908	1.1

Literacy rate for District :		**71.8**		

लोकाभिमुख
PEOPLE ORIENTED

It is observed that a good number of villages (395) comprising 61.7 per cent of the total villages possessing 68.1 per cent of the district rural population have the literacy rate ranging from 51-80 per cent. But the number of villages and population are lesser, in the higher literacy range i.e only 13.3 per cent of the total villages with 13.1 per cent of the districts population fall in the literacy range of 81 and above. Out of a total of 640 villages, two villages have returned no literate and contrary to this situation, 5 villages have recorded total literacy. When we have an insight into the pattern of distribution of villages and their proportion and population of those villages and proportion of population by various ranges of literacy rate, it is noticed that all these variables tend to increase in each subsequent higher literacy range and peaked in the range of literacy rate of 71-80 with 147 villages (23.0 per cent and 350,102 population (32.2 per cent) thereafter recorded almost declining trend.

The town is spread over to District Jalpaiguri

Among the urban population of the district, the literacy rate is 83.3 with 87.7 among males and 78.5 among females. Among the urban units in the district, the highest literacy rate of 89.8 (93.5 for males 85.8 for females) is recorded in Darjiling Municipality. In all other towns, except Siliguri (M.Corp.), the literacy rate is between 80.5 to 89.6 per cent. Siliguri (M. Corp.) is having the lowest literacy rate at 79.3 per cent . The highest sex wise difference in literacy rate is observed in the case of Pattabong Tea Garden Census Town (19.9 per cent points) and the lowest in Darjiling Municipality (7.7 per cent points).

Among the rural scheduled caste population of the district, 59.9 per cent is literate consisting of 72.3 per cent males and 46.9 per cent females. Among the CD Blocks, Kalimpong-I and Jorebunglow Sukiapokhri CD Blocks with almost 71 per cent literacy rate have occupied the top position while the Matigara CD Block with 55.5 per cent literacy rate is at the bottom. Out of 12 CD Blocks in the district, 9 CD Blocks have higher literacy rate and 3 lower than the district average (59.9). Among the males, the highest literacy rate is observed in Jorebunglow Sukiapokhri CD Block (82.9) and the lowest in Matigara CD Block (67.9). Among the females, the highest literacy rate is returned by Kalimpong-I CD Block (62.4) while the lowest in Matigara CD Block (42.2). The overall gap in male-female literacy rate is 25.4 per cent points among the rural scheduled caste population of the district. At CD Block level, the gap in male-female literacy rate varies from the highest being in Naxalbari CD Block (27.2 per cent points) to the lowest in Kalimpong-I CD Block (16.8 per cent points).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

The town is spread over to District Jalpaiguri

The literacy rate among the urban scheduled caste population is 72.0 (80.0 among males and 63.5 among females). Out of the 9 urban units, excepting one i.e. Siliguri municipality, all have returned higher literacy rate than that of urban district average for the scheduled castes population (72.0). The highest literacy rate is observed in Darjiling municipality (87.1) as against the lowest in Siliguri municipal corporation (63.6). Among the males, Pattabong Tea Garden census town has topped the list with 95.7 literacy rate whereas the bottom position is occupied by Siliguri municipal corporation (72.6). Among the females, the highest literacy rate is noticed in Darjiling municipality (82.0) and the lowest in Siliguri municipal corporation (53.7). The overall gap in urban scheduled caste male-female literacy rate is 16.5 per cent points. Among the various urban units, the highest gap of difference in male-female literacy rate is seen in Mirik notified area (28.6 per cent points) and the lowest in Darjiling municipality (10.1).

The town is spread over to District Jalpaiguri

The literacy rate among the urban scheduled tribe population of the district is 84.8 (89.0 among the males and 80.6 among the females). Among the towns, Pattabong Tea Garden census town has achieved cent per cent literacy as against the minimum recorded by Uttar Bagdogra census town at 71.9 (males 79.2 and females 64.7). It is however, worth mentioning here that the scheduled tribe population in Pattabong Tea Garden census town is just 3 and all are literates. The gap in male-female literacy rate among the urban scheduled tribe population of the district is remarkably low (8.5 per cent points). It is the highest in Mirik notified area (21.7 per cent points).

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN CD BLOCK, 2001

District Total :		**Persons**	**1,609,172**	**478,851**	**29.8**	**90,591**	**5.6**	**569,442**	**35.4**	**1,039,730**	**64.6**
		Males	**830,644**	**359,110**	**43.2**	**43,860**	**5.3**	**402,970**	**48.5**	**427,674**	**51.5**
		Females	**778,528**	**119,741**	**15.4**	**46,731**	**6.0**	**166,472**	**21.4**	**612,056**	**78.6**

Above table shows that out of the total population of the district, 29.8 per cent (males 43.2 per cent, females 15.4 per cent) is main workers, 5.6 per cent (males 5.3 per cent, females 6 per cent) marginal workers and 64.6 per cent (males 51.5 per cent, females 78.6 per cent) is non-workers. CD Blockwise distribution of the district's total population reveals that three CD Blocks viz. the (1)Kalimpong-I (2)Kalimpong-II and (3)Gorubathan have relatively higher proportion of total workers (main and marginal worker together) by registering a mark of 40 per cent and above. While the concentration of main workers is registered in Matigara CD Block at 32.2 per cent followed by Darjeeling Pulbazar CD Block at 31.2 per cent. The lowest share in this regard is apparently seen in Rangli Rangliot CD Block at 25.6 per cent. By sex, the highest proportion of female main workers at 24.1 per cent is recorded in Darjeeling Pulbazar CD Block. Likewise the highest presence of non working population is reported in Rangli Rangliot CD Block at 67.8 per cent.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN CD BLOCKS, 2001

		Females	42,781	4,865	11.4	5,316	12.4	10,181	23.8	32,600	76.2
District (Rural)		**Persons**	**1,088,740**	**323,423**	**29.7**	**79,816**	**7.3**	**403,239**	**37.0**	**685,501**	**63.0**
Total :		**Males**	**556,633**	**229,942**	**41.3**	**36,794**	**6.6**	**266,736**	**47.9**	**289,897**	**52.1**
		Females	**532,107**	**93,481**	**17.6**	**43,022**	**8.1**	**136,503**	**25.7**	**395,604**	**74.3**

Of the total rural population of the district, 29.7 per cent (males 41.3 per cent, females 17.6 per cent) is main workers 7.3 per cent (males 6.6 per cent, females 8.1 per cent) marginal workers and 63.0 per cent (males 52.1 per cent, females 74.3 per cent) is non-workers. Among the three CD Blocks viz, the Kalimpong-I , Kalimpong-II and the Gorubathan have registered the highest share of total workers (Main and Marginal workers together) at 40 to 42.1 per cent. Although Gorubathan CD Block has registered the highest proportion of total workers, it has only 29.4 per cent main workers in it's share. The highest proportion of female main workers is seen in Darjeeling Pulbazar CD Block at 24 per cent followed by Kurseong at 23.7 per cent. Similarly the highest proportion of non-workers at 67.8 per cent is observed in Rangli Rangliot CD block.

The town is spread over to District Jalpaiguri

It can be observed from the above table that of the total urban population of the district, 29.9 per cent (males 47.1 per cent, females 10.7 per cent) is main workers, 2.1 per cent (males 2.6 per cent, females 1.5 per cent) marginal workers and 68.1 per cent (males 50.3 per cent, females 87.8 per cent) is non-workers. The town-wise work participation indicates the highest proportion of total workers (main and marginal) at 38.5 per cent is registered in the case of Pattabong Tea Garden census town. Interestingly this census town has also registered the highest proportion of main workers at 36.4 per cent . On the other hand Kurseong municipality has registered the lowest proportion of total workers at 25.2 per cent. In case of non-workers, the maximum proportion is registered by Kurseong municipality and Cart Road census town (around 75.0 per cent in each) and the lowest by Pattabong Tea Garden census town (61.5 per cent).

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN CD BLOCKS, 2001

Note: Per cent of Worker to total worker are given in brackets

We can have clear picture of people's involvement in the different categories of economic activities viz.the cultivators, agricultural labourers, household industry workers and lastly the other workers in the above presentation. Accordingly 35.4 per cent of the district's total population is engaged in one or the other kind of economic activity with the share of 48.5 per cent belonging to males and 21.4 per cent females. A lion's share is engaged under 'other workers' category (71.5 per cent) with 74.3 per cent males and 64.8 per cent females followed by the next category that is cultivators (15.5 per cent) with males 14.4 per cent and females 18.2 per cent. Another 10.2 per cent working population is engaged as agricultural labourers showing that the two categories together constitute 25.7 per cent engaged in agricultural pursuits. At the same time we can also see that people's engagement in household industry is comparatively very poor at 2.8 per cent only.

Among the CD Blocks, Gorubathan has registered the highest share of working population at 42.1 per cent (males 49.1 per cent, females 34.9 per cent). Here also the majority of workers are found engaged under 'other workers' category recording 41.6 per cent (males 45.8 per cent and females 35.5 per cent). Kalimpong-I and Kalimpong-II are the next two blocks with 40.1 and 40 per cent share respectively. Rangli Rangliot is the CD Block on the other hand which has the least share of 32.2 per cent. Naxalbari, Jorebunglow-Sukiapokhri and Matigara are three CD Blocks where the proportion of population engaged in agricultural pursuit (cultivators plus agricultural labourers) is small at 16.7, 16.0 and 9.2 per cent respectively.

Note: Percent of Worker to total worker are given in brackets

It may be seen that out of the total rural population of the district, 37.0 per cent is workers (47.9 per cent males and 25.7 females).In view of category wise distribution of these total workers we can see that its major component is other workers with the share of 61 per cent (62.4 per cent males and 58.3 per cent females). Besides other workers, the next largest proportion (36 per cent) is engaged in agricultural activity (21.7 per cent cultivators and 14.3 agricultural labourers). Per centage of female participation under this category (cultivators plus agricultural labourers) is comparatively higher (38.3 per cent) against 34.8 per cent in favour of males. In case of household industry the proportion of female workers is slightly higher (3.5 per cent) than their male counter parts (2.7 per cent).

At the block level, Gorubathan has registered the highest concentration of workers at 42.1 per cent (males 49.1 per cent females 34.9 per cent) followed by Kalimpong-I (40.1 per cent), Kalimpong-II (40 per cent). In the case of these two C D Blocks it may be seen that the proportion of workers under agricultural activity (together with cultivors and agricultural labourers) is higher than that of other workers as apparent in the case of other CD Blocks and the district as well . In the case of Kalimpong-I, the proportion is 62.4 per cent against 33.7 under other workers and in the case of Kalimpong-II, the share is 70.8 per cent against 26.3 per cent under other workers. In the case of Household Industry, Gorubathan has registered 9 per cent of its total workers engaged in this pursuit which happens to be the highest in the district's scenario.

The town is spread over to District Jalpaiguri

Sex wise distribution of workers in urban units depicted in the table above indicates that of the district's total urban population, 31.9 per cent is the workers (main plus marginal). Pattabong Tea Garden census town has the largest share of workers at 38.5 per cent among all other urban components. Looking through the economic category of workers, all the towns, whether it be a municipal corporation, municipality, notified area or the census town, the proportion of workers engaged as other workers is high thus recording more than 90.0 per cent. Similarly, the highest share of workers (5.5 per cent) engaged in household industries is registered in the case of Cart Road census town falling in Kurseong subdivision.

Note : Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table shows that out of 640 villages, 79.5 per cent of the villages have access to improved drinking water (drinking water supplied from tap or hand pump/tube well). In 78.0 per cent villages there exists at least the modest form of educational facility. Power supply is available to 61.1 per cent of these villages. In 61.7 per cent villages there lies at least the modest form of medical facility. Another 60.2 per cent villages are approachable by pucca road. Transport communication facility including bus services, rail facility and navigable waterways is available to 39.7 per cent villages. Another 38.3 per cent villages enjoy the facility of telephone. Likewise facility of Post Office is available in 22.8 per cent villages and finally the agricultural credit societies and banking facilities are available to 9.8 per cent and 6.4 per cent of the villages respectively.

At the CD Block level it is seen that only Rangli Rangliot CD Block has achieved the educational facility in all of its villages. Another three CD Blocks, viz. the (1) Darjeeling Pulbazar, (2) Mirik, and (3) Kharibari have recorded such facility in 90.5 to 93.3 per cent of its villages. While Naxalbari CD Block appear to be most poorly served CD Block in terms of educational facility since only 62.2 per cent villages enjoys this important basic amenity. Regarding medical facility, the three CD Blocks - Darjeeling Pulbazar, Jorebunglow-Sukiapokhri and Rangli Rangliot have the better position with 82.2 to 86.2 per cent of its villages leaving access to this facility. Kalimpong-I on the other hand with 36.4 per cent has appeared at the lowest rank.

In terms of availability of power supply, it is observed that not even a single block has achieved cent per cent coverage. However, a good proportion of villages in the three CD Blocks - Darjeeling Pulbazar, Jorebunglow- Sukiapokhri and Rangli Rangliot ranging from 80.0 to 89.7 per cent have been covered under electrification. Gorubathan appears to be the darkest CD Block in the district with merely 22.2 per cent of its villages covered under electrification.

PEOPLE ORIENTED

Note : Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

As per the content of the table above, out of the district's total rural population of 1,088,740, the educational facility is available to 92.6 per cent of them. Another 78.5 per cent population have access to medical facility within the villages. Improved drinking water facility is available to 82.8 per cent population. Electricity is available to the three fourth of the district's rural population. Likewise, 69.1 per cent rural population enjoys the facility of pucca road in order to reach their villages. But transportation and telephone facility is available to only half of the total rural population. While post office service is limited to 38.6 per cent. Finally, Banking and agricultural credit societies facility is available to 14.0 per cent and 16.8 per cent of population respectively.

The CD Block level analysis shows that in the case of educational facility, the total population of Rangli Rangliot CD Block is served by this facility as against the least proportion noticed in Phansidewa CD Block (85.1 per cent). In the matter of availability of medical facility, the most covered CD Block is Rangli Rangliot (96.7 per cent) while the least is Phansidewa (62.2 per cent). Drinking water is available to 98.9 per cent of its populations of Phansidewa CD block which is the highest against the lowest proportion seen in Darjeeling

Pulbazar (8.1 per cent). The highest proportion of population covered under postal services is in Kalimpong-I CD Block (69.5 per cent) in contrast to the lowest proportion seen in Naxalbari CD Block (9.4 per cent). Jorebunglow-Sukiapokhri CD Block (91.7 per cent) is the most extensively served by the telephone connection whereas least is Phansidewa CD Block (34.6 per cent). The maximum proportion of population covered under transport and communications facility is observed in Rangli Rangliot CD Block (87.7 per cent) while the least in Darjeeling Pulbazar CD Block (30.7 per cent). So far as the availability of banking services is concerned 30.4 per cent population in the Rangli Rangliot CD Block, which is the highest availing this facility within their villages while this facility is not available at all in Kurseong and Mirik CD Block. The highest proportion of population availing of facility of agricultural credit societies is noticed in Kalimpong-II CD Block, (53.7 per cent) within their villages while this facility is not available in Gorubathan and Naxalbari CD Blocks. The highest proportion of population served by pucca road connectivity is in Matigara CD Block (95.6 per cent) in contrast to the least proportion recorded by Phansidewa CD Block (33.0 per cent). In the case of rural electrification, the maximum proportion covered by this facility is found in Rangli Rangliot CD Block (96.9 per cent) as against the minimum obtained in Gorubathan CD Block (47.5 per cent).

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :				
(a) Primary School	142	23	3	168
(b) Middle School	208	222	49	479
(c) Degree College	30	116	491	637
2. Medical :				
(a) Hospital	127	213	273	613
(b) PHC	101	221	291	613
3. Post Office	301	164	33	498
4. Telephone	161	144	90	395
5. Bus Service	181	152	55	388
6. Banks :				
(a) Commercial Bank	203	247	162	612
(b) Cooperative Bank	58	164	402	624
7. Agricultural Credit Societies	63	126	388	577

There are still some villages where the facilities such as education, medical, post office, telephone, bus service, banks and agricultural credit societies have not reached. As a result the inhabitants residing in such villages had to depend upon the facilities available to the adjacent villages/towns.

There are 168 total villages in the district without any primary school. But to 142 such villages the facility is available within a radius of 5 kms to next 23 villages, the facility lies at the distance of 5-10 kms in the adjoining locality. But for the remaining 3 villages, the primary school is available at the distance of 10 kms away. As regards to medical facility as well, there are 613 such villages where no Primary Health centre is available. For 291 of these villages, the facility is available at distance of 10 kms and above. Post office facility is not available for 498 villages. But majority of them are availing the facility within the 5 kms range in the adjacent locality. Similar is the case with the telephone facility, 395 villages do not have this facility within its limit however 161 of these villages avail this facility within the range of 5 kms in the nearby locality.

In 388 villages there is no bus facility. But here also majority of the villages has this facility within the range of 5 kms. The services of commercial banks are not available in 612 villages but out of these villages, 203 villages have this facility within 5 kms. In case of availability of the services of co-operative banks, this facility is not available in 624 villages of which maximum villages (402) have this facility from the places located at 10 kms or beyond. In 577 villages the services of agricultural credit societies are not available and the majority of the villages (388) can have this facility at 10 kms and above.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	24	17	16	4	15	8	1	0	18
	(100.0)	(70.8)	(66.7)	(16.7)	(62.5)	(33.3)	(4.2)	(0.0)	(75.0)
5 -15	368	260	210	65	134	146	17	30	240
	(100.0)	(70.7)	(57.1)	(17.7)	(36.4)	(39.7)	(4.6)	(8.2)	(65.2)

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Distribution of 640 inhabited villages by distance range from the nearest statutory town shows that majority of the villages (368) are located at the distance of 5-15 kms from the nearest town. Another 224 villages are at the distance of 16-50 kms. Next 19 villages are situated at more than 51 kms distance. But for the remaining 24 villages the nearest towns are located closely at less than 5 kms distance. The availability of various amenities in the villages located at different distance ranges exhibits that there is no definite trend between the availability of amenities and distance of villages from the statutory town except for postal services and connectivity by pucca road. The availability of postal services have recorded an increasing trend in proportion of villages having this amenity with the increase in distance from the statutory town. In the case of approach by pucca road, the situations is quite reverse, that is, the proportion of villages having connectivity with pucca road has continuously declined with increase in distance from the statutory town in each consecutive distance range.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

As seen in the above table, the highest number of villages 175 (27.3 per cent) of the total 640 inhabited villages fall in the population range of 1,000-1,999. According to availability of amenities in these villages, it is found that educational facility is available to 157 (89.7 per cent) villages. Another 84 per cent villages enjoy the facility of improved drinking water. Medical facility is available to another 128 villages, constituting 73.1 per cent of the total villages. Another pack of 114 villages (65.1 per cent) are served with the facility of electrification while the facility to approach by pucca road is available to 102 (58.3 per cent) villages. There are only 5 villages in the district falling in the population range of 10,000 and more. In this case the basic facilities such as the education, medical, drinking water and power supply is available to all the villages. Pucca road approach is available to 4 out of 5 villages. Similarly telephone and banking facility is available to 3 villages in each case. The above analysis also gives an insight in to the interaction of availability of amenities and size of population. The amenities like education, medical, transport and communications, banking and supply of electricity is very sensitive to the size of population. It means the proportion of villages having these amenities tend to increase continuously with an increase in the population size of the villages in the successive population ranges. However, there is a general trend in all amenities to increase in proportion of villages having these amenities starting from population range 1-499 to 2,000-4,999. Some of them such as postal services and agricultural credit societies have increased up to population range 5,000-9,999 then declined in the population range of 10,000 and above. Availability of improved drinking water, telephone and connectivity by pucca road have peaked in the population range 2,000-4,999 then declined in the next population range of 5,000-9,999 and again increased in the population range 10,000 and above.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial Number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Darjeeling Pulbazar	45	41,098.3	47.3	36.9
2	Rangli Rangliot	29	27,298.7	23.2	25.1
3	Kalimpong - I	44	30,795.6	44.2	27.3
4	Kalimpong - II	33	19,810.1	35.7	23.5
5	Gorubathan	27	30,389.2	44.2	13.4
6	Jorebunglow Sukiapokhri	47	22,212.2	49.9	17.4
7	Mirik	21	11,917.6	51.8	16.1
8	Kurseong	65	34,482.1	44.8	22.6
9	Matigara	69	13,323.6	59.2	19.0
10	Naxalbari	82	17,088.1	59.1	48.7

Serial Number	Name of CD Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
11	Phansidewa	103	30,621.9	69.8	4.7
12	Kharibari	75	14,483.0	66.7	3.1
	District Total :	**640**	**293,520.2**	**48.2**	**21.2**

Note : Cultivable area = irrigated area + unirrigated area

The above table shows that out of total rural areas of the district, 48.2 per cent is cultivable and out of this total cultivable area 21.2 per cent is irrigated. At the CD Block level, Phansidewa has the largest number of inhabited villages (103) in the district followed by Naxalbari (82) and Kharibari (75). Mirik CD Block, on the other hand, has only 21 villages with it. Darjeeling Pulbazar CD Block is the largest in terms of area with 41,098.3 hectares followed by Kurseong with 34,482.1 hectares land area and Kalimpong-I with 30,795.6 hectares whereas Mirik CD Block is the smallest with an areas of 11,917.6 hectares. According to the proportion of cultivable area available at the CD Block level, it is observed that Phansidewa leads the race with 69.8 per cent next being Kharibari with 66.7 per cent followed by Naxalbari and Matigara both at around 59.0 per cent. Likewise Rangli Rangliot has the smallest proportion of cultivable land at 23.2 per cent . While seeing through the per centage of irrigated area to total cultivable area the table shows that Naxalbari block has the highest share with 48.7 per cent. In Darjeeling Pulbazar the proportion is at 36.9 per cent followed by Kalimpong-I at 27.3 per cent while the proportion is recorded at the lowest in case of Phansidewa and Kharibari at 4.7 and 3.1 per cent respectively.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial Number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Adminis-tration	Public health and conveniences	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	I Darjiling (M)	619.1	57.7	561.4	272.6	53.5	154.7	26.2	22.9	15.3
2	III Kalimpong (M)	438.6	16.9	421.7	421.9	169.0	2.0	171.3	0.0	79.6
3	III Kurseong (M)	579.6	33.5	546.1	593.0	28.3	196.8	165.5	32.1	170.4
4	V Mirik (NA)	843.0	16.3	826.7	836.2	110.7	9.4	709.3	0.0	6.8
5	I Siliguri (M.Corp) #	384.0	73.4	310.6	536.2	84.7	148.2	282.2	21.1	0.0
	District Total :	**442.9**	**64.1**	**378.8**	**494.3**	**82.1**	**140.9**	**233.1**	**20.4**	**17.8**

Though the town is spread over to district Jalpaiguri, data against the M.Corp as a whole has been shown in Darjiling DCHB

Table 43 depicts the status of municipal finance (income and expenditure) in respect of all statutory towns in the district. The overall per capita receipt of revenue for the urban population living in the statutory towns comes to Rs. 442.9 and per capita expenditure is Rs. 494.3. Here we can see that Mirik (NA) has recorded the highest per capita receipt of 843.0 rupees (16.3 through taxes and 826.7 from all other sources) and also the highest per capita expenditure of Rs. 836.2. The per capita expenditure of Rs. 536.2 has been observed in Siliguri Municipal Corporation which is mainly spent in the process of infrastructural developmental activities. The highest share of Rs. 709.3 was spent on the subject like public works in Mirik. Siliguri Municipal Corporation registered total per capita collection of Rs. 384.0 through taxes and other sources. But in the case of Darjiling Municipality, per capita expenditure has concentrated more on public health and conveniences. In Kalimpong Municipality, public works and general administration received more attention and in respect of Kurseong Municipality, public health and convenience received more attention.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial Number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Darjiling (M)	4.9	0.8	0.8	0.8	0.3
2	Kalimpong (M)	6.7	2.8	2.8	1.9	0.5
3	Kurseong (M)	3.7	2.5	2.5	1.0	0.2
4	Mirik (NA)	5.5	3.3	3.3	1.1	1.1
5	Siliguri (M.Corp) #	2.0	0.5	0.5	0.2	0.1
	District Total :	**2.9**	**0.9**	**0.9**	**0.5**	**0.2**

Though the town is spread over to district Jalpaiguri, data against the M.Corp as a whole has been shown in Darjiling DCHB

As seen in the above table, Kalimpong Municipality has recorded the highest ratio of primary schools at 6.7 per 10,000 population. In Mirik (NA) it is at 5.5, Darjiling Municipality at 4.9, Kurseong Municipality at 3.7. while Siliguri Municipal Corporation has registered the lowest at 2.0 per 10,000 population. Mirik (NA) has returned the highest ratio at 3.3 as regards the availability of junior secondary/middle school and the lowest is seen in Siliguri Municipal Corporation at 0.5 per 10000 populations. In the case of secondary/matriculation school also, Mirik notified area is highest placed with 3.3 institutions per 10,000 population while the lowest position goes to Siliguri Municipal Corporation with just 0.5 institution per every 10,000 population. As regards to senior secondary school, Kalimpong Municipality has the highest ratio of 1.9 and the lowest is observed in Siliguri Municipal Corporation 0.2. As regards to the availability of college level educational facility is concerned, Mirik notified area is the best served compared to the others having 1.1 colleges per 10,000 population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bairatisal (CT)	0
2	Cart Road (CT)	7
3	Darjiling (M)	45
4	Kalimpong (M)	114
5	Kurseong (M)	200
6	Mirik (NA)	0
7	Pattabong Tea Garden (CT)	0
8	Siliguri (M.Corp) #	16
9	Uttar Bagdogra (CT)	6
	Distrct Total :	**36**

Though the town is spread over to district Jalpaiguri, data against the M.Corp as a whole has been shown in Darjiling DCHB

The information contained in the above table shows the availability of number of beds per 10,000 population in the medical institutions in the towns. Kurseong Municipality appeared as the best served town in the district with 200 beds. This is followed by Kalimpong Municipality with 114 beds. While Cart Road census town and Uttar Bagdogra census town on the other hand have 7 and 6 beds respectively. In Bairatisal and Pattabong Tea Garden census town there is no medical institution and in Mirik notified area there are medical institutions but without beds. [Please see Statement IV of Town Directory]

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial Number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Darjeeling (M)	107,197	31,200	29.1
2	Kalimpong (M)	42,998	34,468	80.2
3	Kurseong (M)	40,019	8,707	21.8
4	Mirik (NA)	9,141	5,177	56.6
5	Siliguri (M.Corp.) #	472,374	168,214	35.6
	District Total :	**671,729**	**247,766**	**36.9**

Though the town is spread over to district Jalpaiguri, data against the M.Corp as a whole has been shown in Darjiling DCHB

It can be seen from the above table that more than one third of the total urban population of the district is living in slum deprived of basic civic amenities. Percentage of slum population in the towns of the district shows that Kurseong Municipality has the least (21.8 per cent) slum population. On the other hand Kalimpong Municipality has the highest percentage of slum population at 80.2 followed by Mirik (NA) and Siliguri Municipal Corporation at 56.6 and 35.6 per cent respectively. While Darjiling Municipality has 29.1 per cent slum population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial Number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bairatisal (CT)	Grill	Paddy Jute
2	Cart Road (CT)		Potato Ginger
3	Darjiling (M)	Carpet Handicraft	Carpet Handicraft
4	Kalimpong (M)	Silk Yarn Leather Goods Woolen Garments	Orange Flower Cardamom
5	Kurseong (M)	Timber Products Woolen Garments	Tea Orange Poultry Products
6	Mirik (NA)		Woolen Garments
7	Pattabong Tea Garden (CT)	Tea	Tea Cardamon
8	Siliguri (M.Corp) #	Wheat Product Cattle Food Plastic Product	Tea Timber Rice
9	Uttar Bagdogra (CT)	Tea	Tea Rice

Though the town is spread over to district Jalpaiguri, data against the M.Corp as a whole has been shown in Darjiling DCHB

In Table 47 we find information about important commodity manufactured in and exported out from the towns in the district. Accordingly tea is recorded as an important item of export in case of Kurseong municipality, Pattabong Tea Garden census town, Siliguri municipal corporation and Uttar Bagdogra census town. In the case of Kalimpong (M) we find that it produces items like silk yarns, leather goods, woollen garments and exports - oranges, flowers and large cardamom. The manufactured and exported products of Darjiling municipality are the carpets and handicraft items. The manufactured goods in Siliguri municipal corporation consists of wheat products, cattle food and plastic products while the main items of export are tea, timber and rice. The district is famous for its Darjiling tea. This town is a commercial hub catering to the needs of entire north eastern states.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE D

As per presentation in table 48 we could see the distribution of households by tenure status and number of rooms occupied. Accordingly, we find that majority of the households (72.6 per cent) have their owned houses to live in. From the remaining lot 15.6 per cent live in rented houses and other 11.8 per cent live in houses treated under others category. Majority or the 78.6 per cent of the households living in owned houses are the village dwellers. Community wise 82.4 per cent scheduled castes live in owned houses. Among

scheduled tribes 64.6 per cent reported living in owned houses showing difference of 17.8 per cent in favour of scheduled castes. It is also seen here that the number of households living without any exclusive room is high among scheduled tribes at 640 against 475 in the case of scheduled castes.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : Permanent : 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets

Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

Temporary : 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.

Presentation in Table No. 49 is about the distribution of households living permanent, semi permanent and temporary houses by per centage in the district. Accordingly, it is seen that majority of the households (47.8 per cent) live in the semi permanent houses. Households living in permanent houses constitute another 37.6 per cent of the total households. While remaining 14.5 per cent live in temporary houses. As obvious the concentration of households living in permanent houses is as high as 60.9 per cent in the urban areas. But in the case rural areas a majority of the households (56.5 per cent) live in semi-permanent houses. In this context Matigara CD Block has the highest number of households living in permanent houses at 46.5 per cent (rural 44.2 and urban 86.0 per cent) as against the lowest observed in Rangli Rangliot CD Block (15.8 per cent) with purely rural habitations. In the case of semi-permanent houses, Rangli Rangliot CD Block (73.3 per cent) is in the top of the list and the bottom position goes to Matigara CD Block (39.5 per cent). Further, in the case of temporary houses the highest proportion of households is returned by Kharibari CD Block (28.7 per cent) and the lowest by Kurseong CD Block (7.4 per cent).

Data source : Census of India 2001, H-series : Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as Improved or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

Availability of the basic amenities such as the improved drinking water, electricity, bathroom, toilet and drainage to households, the indicators of the quality of life of the inhabitants, show that the facility of improved drinking water is available to 33.0 per cent of the total households (29.1 per cent rural, 41.6 per cent urban) in the district. The highest of 42.1 per cent being in the case of Jorebunglow Sukiapokhri CD Block and the lowest in Matigara CD Block (17.2 per cent).

As regards to availability of electricity , it is seen that 54.9 per cent of the total households in the district have this facility, which is 42.1 in the rural and 82.4 per cent among urban households, again Jorebunglow Sukiapokhri leading the contest at 61.2 per cent.

As regards to facility of bathroom is concerned, 28.4 per cent of the total households (15.1 rural and 57.2 per cent urban) in the district have this facility with them. At the CD Block level Matigara has the highest per centage of households (28.8 per cent) enjoying this facility (rural 25.7 per cent and urban 81.3 per cent).

The facility of toilet is available to 58.7 per cent (rural 46.9 per cent and 84.4 per cent urban) of the

total households in the district. Among the C D Blocks Rangli Rangliot has the highest per cent of households having such facility.

Drainage is yet another facility having its contribution upon the level of sanitation upon the residents in the locality. Accordingly 39.5 per cent households (rural 24.4 urban 72.2) in the disrtrict have such facility. Thus facility is best served to Jorebunglow-Sukiapokhri where 38.5 per cent of the total households enjoy this facility.

Percentage in brackets

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Distribution of households by type of fuel used for cooking purpose at CD Block level is discussed in the table. We can see here that firewood is the main type of fuel used by 57.1 per cent (73.4 rural 21.6 urban) in the district. At the CD Block level, 90.4 per cent all rural households in Gorubathan CD Block report the use of firewood followed by Rangli Rangliot and Kalimpong-I at 89.9 and 87.0 per cent respectively. Matigara CD Block is the highest consumer of L.P.G for cooking with 15.0 per cent households followed by Kalimpong-I at 14.5 per cent. In Naxalbari 9.4 percent of its households use kerosene for cooking, highest among other blocks in the district.

Data source : Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

It can be seen from the above table that at the district level, 35 per cent of its total 310,149 households (25.9 rural and 54.6 per cent urban) are availing the facility of banking services. Among the CD blocks, Kurseong is at the top with 35.6 per cent with 31.9 per cent being the rural households. Among the urban households, it is seen that Matigara CD block at 77.2 per cent of its urban households availing such facility top the contest. On the other hand Phansidewa C D block is at the lowest position with just 18 per cent households having access to banking service facility.

As regards the availability of household assets, 42.9 per cent (31.8 rural 67.0 urban) of the district's total households are having television sets followed by radio /transistor. While at the CD Block level it is seen that, among the CD Blocks situated in the hilly terrain the most common assets are the electronic goods like transistor/radio or television sets, it is the bicycles in the CD Blocks located in the plains. At the same time 35.2 per cent of the district's total households reported possessing none of these specified assets with them.

PEOPLE ORIENTED

Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district and major charecteristics of the district

Buddhism is deep-rooted and popular religion in and around Darjiling. This is evident from the numerous monasteries that dot out the hill. Some of the more famous ones are :

Sangchhen Thong, Delling Gompa (Gying) : In the forecourt of the monastery the year of establishment is written as being 1818. In view of this, it seems to be the oldest monastery in Darjiling. The town of Darjiling was not in existence then, as this area was then a part of the kingdom of Sikkim.

Karma Dorjee Drupgyue Chyoling Monastery : It is popularly known as Bhutia Busty monastery. It is said this monastery was shifted from its origin place at observatory Hill. The original monastery at observatory Hill was built by Lama Dorji Lingpa, and the name Darjiling was derived from his name. A devastating earthquake destroyed the monastery at Bhutia Busty in 1934. With the benevolence of the Chogyal of Sikkim, it was rebuilt in the present location.

Yigah Choling Monastery : It is Popularly known as Ghoom Monastery.The monastery is said to be built in 1875 by Lama sherab gyatso. It is considered to be one of the holiest monasteries among many as these holiest monasteries this was personally blessed by the renowned Tomo Geshe Rimpoche of Tibet. It is also said that the monastery keeps rare books on Buddhism. The monastery has statue of the 'Coming Buddha' known as Maitreye Buddha.

Observatory Hill : Apart from the magnificent view it commands, both Hindu and Buddhist attach great religious importance to the Observatory Hill. The famous Mahakal Temple is also located here. Darjiling is called the queen of Hills. Amongst the hill stations of the country, Darjiling is the best resort for the tourists. When one leaves the plains and starts climbing up, he sees the lofty green promontories head of him and he knows that he has entered a different domain altogether. Brilliant red rhododendron, charming white magnolias and majestic pines welcome him to the land of Darjiling. He has the choice of travelling uphill by motorcar or by famous toy train. The train huffs and puffs its way up the steep incline without the aid of cogwheels that some other hill railway use. Completed in 1881 by Franklin Prestige, the Lilliputian locomotives and cabin haul themselves through perhaps the most romantic railroad in the world. The train exerts its way upto Ghoom, the highest point on the rail line at 7,407 feet and then glides down to Darjiling town, first traversing the Batasia Loop, an engineering marvel, from where the visitor gets the first indelible view of the township.

Tiger Hill : Situated at an altitude of 2,590 meters (8,482ft) and 13 kilometers from the town, this spot has earned international fame for the magnificent view of the sunrise over "Kanchendzanga" and the great eastern Himalayan Mountains. Even Mount Everest, the world's highest peak, is visible from here.

Himalayan Mountaineering Institute : Himalayan Mountaineering Institute, Darjiling is the premier mountaineering institute in the country established in 1954 after the 1st successful ascent of Mount Everest by the late Tenzing Norgay and Sir Edmund Hillary in 1953 under the personal initiative of late Pandit Jawaharlal Neheru.

Parks & Gardens

Lloyd's Botanical garden, a colourful garden situated just below the market motor stand, it contains a representative collection of Himalayan plants, flowers, orchids etc. Inaugurated in 1993 the Japanese Peace Pagoda commands an excellent view of the town and the mountains, on the way one can also see from outside the Darjiling Gorkha Hill Council House or Lal Kothi.

Accommodation

Darjiling district is endowed with 6 government tourist lodges run by the West Bengal Tourism Development Corporation Ltd. as detailed below :

1. Darjiling Tourist Lodge, Bhanu Sarani, Darjiling
2. Kalimpong Tourist Lodge, Kalimpong
3. Tashiding Tourist Lodge, Kalimpong
4. Hill Top Tourist Lodge, Kalimpong
5. Kurseong Tourist Lodge, Kurseong
6. Mainak Tourist Lodge, Pradhan Nagar, Siliguri, Darjiling

Apart from these lodges, the Department of Sports and Youth welfare runs a youth hostel in the district in Kangchendzonga Stadium, Siliguri. There are also 5 forest Bungalows run by the West Bengal Forest Development Corporation Ltd. in Lava, Lolegaon, Kalimpong, Tarkhola and Rang Po respectively. District Census Handbook 1991 asserted existence of 5 Dak Bungalows in Singalila Forest (2), Rimbick, Chon Tong Tea Garden (under Darjiling Pulbazar) and Kurseong respectively and 5 Inspection Bungalows in Rangli Rangliot, Kalimpong (2), Uttar Bagdogra and Siliguri respectively. Also there are a few Bungalows in the district run by Darjiling Gorkha Hill Council.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The people of the district are mostly Buddhists and Hindus. There are also people of Muslim community. Bengali and Nepali are the main languages of the district. In the hilly subdivision Nepali language is used and in the plain people are mostly Bengali speaking. Some Hindi speaking people are also residing in the plains. Bhanu Bhakta is a great writer in Nepali language. Rabindra Nath Tagore had a residence at Mongpu under Sadar Sub-division of Darjiling. Tagore, the great poet liked the place very much.

Scope of Village & Town Directory

The "Village Directory'' is one of the traditional compilations of the census. The format of the directory is almost the same as was prescribed in the 1991 census. It bears the list of villages, their location code numbers, areas, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use pattern for each village. For this purpose, villages have been arranged CD Block wise in order of their location code numbers. The inclusion of alphabetical list of villages with 2001 census population and the map of every CD Block depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the reader in identifying any village in the CD Block.

'Village' is a statutorily recognized unit having a definite boundary and separate land records. In case a complete village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages, which have partly merged in an outgrowth of U.A. data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. Land use data for villages treated as Census Towns (Urban) in 2001 census can be seen in Appendix-III of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The uninhabited village (villages with no population) has been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to the above details, following eight appendices to Village Directory have also been included.

Appendix – I - Abstract of educational, medical and other amenities in Villages - CD Block level

Appendix-IA - Villages by number of Primary Schools

Appendix-IB - Villages by Primary, Middle and Secondary Schools

Appendix-IC - Villages with different sources of drinking water facilities available

Appendix-II - Villages with 5,000 and above population which do not have one or more amenities available

Appendix-IIA - List of Census Towns which do not have one or more amenities

Appendix-III - Land utilisation data in respect of Census Towns/Non Municipal Towns

Appendix-IV - CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V - Summary showing number of Villages having or not having Scheduled Caste Population

Appendix-VI - Summary showing number of Villages having or not having Scheduled Tribe Population

Appendix-VIIA - List of Villages according to the proportion of the Schedule Castes to the total population by ranges

Appendix-VIIB - List of Villages according to the proportion of the Schedule Tribes to the total population by ranges

Appendix-VIII - Number of Villages under each Gram Panchayat (CD Block wise)

The above eight appendices are expected to help the planners for planning inputs in areas / villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes, in particular.

The Village Directory format has 23 columns and

the details given under each column and the abbreviations used to explain availability of amenities are as under.

Column 1 – Serial No. of the villages.

Column 2 – The name and location code number of each village, as this is necessary for proper identification of the village. This also includes the forest and uninhabited villages.

Column 3 – The total area of the village (in hectares) as indicated by the State Revenue Department.

Column 4 – The total population in each village (2001 Census).

Column 5 – The total number of households in the village (2001 Census).

Data on amenities such as educational, medical, drinking water, post, telegraph and telephone, commercial and cooperative Banks, credit societies, Recreational & cultural facilities, communications etc. are shown under columns 6 to 13 of the Village Directory. In case if an amenity is not available within the referent village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz., up to 5 kms., 5-10 kms. and 10+ kms. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimize the regional imbalance in the process of development.

Column 6 shows the number of all kinds of educational institutions run by different agencies, government or private of the level of viz., primary school, middle school, secondary school, senior secondary, college, industrial school, training school adult literacy school / centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc).

If in a village, secondary school has middle and primary classes also, the same has been counted as three schools i.e., secondary, middle and primary school. In case there are more than one institution of any type in a village their number is indicated within brackets against the prescribed abbreviation.

Column 7 provides data on medical facilities available in the village.

Column 8 gives information regarding availability of drinking water within the village. In case more than one source is available to the village the same has been indicated.

Column 9 provides information about the existance of facilities such as post, telegraph and telephone connections available in the village.

Column 10 refers to the availability of banking service in the villages and this is shown by giving the number of commercial and co-operative banks separately.

Column 11 contains information on availability of credit societies in the village. The information is represented separately by recording the number of Agricultural, non-Agricultural and other credit societies.

Column 12 give information on availability of Recreational & Cultural facilities such as Cinema / Video Hall, Sports Club, Stadium / Auditorium, in the village.

Column 13 gives information as to whether the village is served by any mode of public transport like bus, rail and water-ways.

Column 14 refers to the state of roads etc. leading to the village, this is useful in determining as to whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

Column 15 gives the information about the nearest town and its distance in kilometers in bracket from the referent village. In case the nearest town is located in another state, the name of the state has also been furnished.

Column 16 relates to the availability of power supply in the village.

In case the power supply is released only for specific purpose, say agriculture or other it has been stated accordingly. In case the electricity is not available to the village, a dash (-) has been mentioned in the column.

Column 17 is regarding receipt of News Paper / Magazine in the village.

Column 18 has information regarding the name of the most important commodity, manufactured in the village.

Columns 19 to 23 give the details about land utilization. The land use pattern given in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India.

Column 19 includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests has been included under the forest area.

Column 20 indicates extent of irrigated lands under various types of irrigation.

Column 21 cover all agricultural lands including the net area sown with crops and orchards or net cropped area and also current and other fallow lands, the latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. The columns does not include gross year sown or gross cropped area. Net area sown thus represents the area sown with crops and orchards. Area sown more than once in the same year has been counted only once.

Column 22 gives information on cultivable wastelands and includes all lands available for cultivation whether not taken up for cultivation once but not cultivated during the preceding five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles, which are not put to any use. These may be assessed or unassessed and may be in isolated blocks within cultivated holding. Lands under thatching grasses, bamboo, bushes and other groves for fuel etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column 23 includes the land not available for cultivation such as barren, unculturable land and put to non-agricultural use. All lands occupied by buildings, roads, railways, rivers, canals, etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc., which cannot be brought under cultivation, except at a very high cost.

Column 24 and 25 are once again the name of the villages and serial numbers respectively for the readers convinience.

Town Directory :

The town directory is presented for each town covering different aspects of urban life through a set of seven statements from I to VII. The data contained in these statements are about the identification particulars of town, the area, number of households (including houseless households), population and growth rate in 2001 and past censuses, density, sex ratio, physical aspects and location of towns, communications, municipal finances, civic and other amenities, medical, educational, recreational, cultural facilities, trade, commerce, industry, banking, and civic and other amenities in slums. It covers all the towns in the district statutorily notified as well as non-municipal towns (Census Towns). All the towns in the district are arranged in ascending order of location code number.

The data collected in these statements have largely been furnished by the municipal bodies. In case of non municipal towns (Census Towns) the Block level office supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of town (as in 2000). Class of the town indicated under this column has been introduced to factilities the analysis of town directory data at the state and the national level. Census towns have no urban civic status.

Size and Class of Towns :

Class	-	Size
I	-	100,000 and above
II	-	50,000 to 99,999
III	-	20,000 to 49,999
IV	-	10,000 to 19,999
V	-	5,000 to 9,999
VI	-	below 5,000

Column 3 is for representing eight digit permanent code number for each town in the district.

Coulmn 4 indicates the name of police station in which the town is located.

Column 5 is for recording the name of CD Block if the town is located in it.

Column 6 gives area (in sq. kms.) of the town.

Column 7 gives information about number of households including houseless households.

Columns 8 to 18 gives population and growth rate of the town since the Censuses of 1901, which would help in drawing the trends in their growth rate.

Column 19 present density in 2001 Census and 20 to 22 represent the sex ratio.

Statement II shows physical aspects and location of towns. In physical aspects only the rainfall, maximum and minimum temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of information received from the respective district authority. Distances respectively from the state, district and tahsil/CD Block headquarters as well as the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities are shown mentioning railway station, bus route and navigable river/canal.

Statement III deals with municipal finance for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV Scheduled Castes/Scheduled Tribes population figure given in columns 4 and 5 would help in measuring amenities in respect of population size of the weaker sections in the towns. The information on road length within the town shown under column 6 has been obtained from Municipality (except for the highways).

Columns 7 to 12 reflects the information on system of sewerage number of latrines and method of disposal of night soil.

Columns 13 and 14 indicate sources and system of storage with capacity of protected water supply to the inhabitants of the towns.

Column 15 gives information regarding availability of fire fighting services. In case, it is not available in the referent towns, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 16 to 20 pertain to the number of connection of electricity supply available for domestic, industrial, commercial, road lighting (points) and for any other purposes.

Statement V gives information regarding amenities like medical, educational, recreational and cultural facilities available in the town. 2001 population figures for each town have also been indicated and this will facilitate in analyzing data on facilities available to the people.

Data related to medical facilities have been obtained from the concerned district authority and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic, unani or homoeopathic have been covered.

If the medical institution is Ayurvedic, Unani or Homoeopathic the same is indicated in bracket by recording the number of institutions.

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational facilities are depicted in column 6 to 14.

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include Applied Art / Painting college, Pharmacy college, B.Ed. college, Teacher's training institute, Music / Dancing, Nursing school, etc.

Column 15 shows the information in respect of Adult Literacy classes / Centres etc. Similarly in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This data would help in formulating plans for opening new hostels in order to meet the problems of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia , cinema, auditoria / drama / community halls, public libraries indicated as 'PL' and reading rooms indicated as 'RR'.

Statement VI presents information in respect of Trade, Commerce, Industry and Banking services in the town. Columns 3, 4 and 5 contain information about the three most important comodities exported out from the town, column number 6, 7 and 8 in the other hand bears information about the three most important commodities manufactured in the town. Column number 9, 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII provides data in respect of civic and other amenities in the slums.

Abbreviation used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the

abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial & Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational & Cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is

लोकोन्मुख PEOPLE ORIENTED

indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell(with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A & VII B	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.

Abbreviation used in Town Directory

Town Directory Statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/ Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface

are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT -I
STATUS AND GROWTH HISTORY

Sl. No.	Class, name and civic status of town	Location Code Number	Name of Taluk/ Tahsil/ Police Station/ Island etc.	Name of CD block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census	Population and growth rate (in brackets) of the town at the Census of

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication table provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under :

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows :

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Out of 12 CD Blocks of the district, Darjiling Pulbazar has the highest number of Gram Panchayats (23) and Phansidewa has the highest number of villages (113). The lowest number of Gram Panchayats (4) belongs to Kharibari CD Block and the lowest number of villages belongs to Mirik (16+13 part).

Annexure - II

Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Annexure – II (A)
Age Specific Marital Fertility Levels - 1991 in the district of Darjiling

Age group	Darjiling	West Bengal
(1)	(2)	(3)
15-19	0.145	0.160
20-24	0.174	0.191
25-29	0.119	0.133
30-34	0.073	0.082
35-39	0.050	0.050
40-44	0.029	0.030
45-49	0.020	0.016

Source : Fertility Table - F Series 1991 Census

The above table indicates that the fertility level in the age range 15-34 of the district is lower as compared with the State figure. The fertility level in both the district and the State is almost similar in the age group 35-44. But the fertility level of the age group 45-49 in respect of district is higher than the state figure. The differential between the districts and the state are so pronounced in the age group of 20-24, 15-19 and 25-29.

Annexure – II (B)
Other fertility measures in the district of Darjiling

Fertility Measures	Darjiling		West Bengal	
	1981	1991	1981	1991
G.F.R.	134	117	153	122
G.M.F.R.	202	169	185	158
T.F.R.	4.2	3.5	4.3	3.6
T.M.F.R.	6.4	5.7	5.7	5.1
C.B.R.	34.2	29.8	34.7	29.0
No. of children ever born per woman in the age group 45-49	-	4.1	-	4.6
Mean age at Marriage	-	18.8	-	17.2
Child woman ratio	-	61.1	-	71.1

The table shows that out of all fertility measures, fertility under G.F.R. and T.F.R. of the state was lower in Darjiling whereas G.M.F.R and T.M.F.R. was higher than the state average in 1981 and 1991.

Mortality :

Apart from 'fertility' and 'migration' mortality is considered as the other main components of population changes. In census the data on children ever born and children surviving are collected from all ever married women. From this, estimetes of child mortality have been worked out by age of mother by using Brass techique. The table below shows the estimates of child mortality, 1991 in the district of Darjiling.

Annexure – II (C)
Estimate of Child Mortality, 1981-91 in the district of Darjiling

Mortality Level	Census Year	Darjiling			West Bengal		
		P	M	F	P	M	F
q_1	1981	89	94	89	95	103	57
	1991	58	55	62	62	75	51
q_2	1981	84	88	81	102	106	98
	1991	65	62	67	81	79	83
q_3	1981	93	97	88	111	113	110
	1991	71	69	74	86	86	85
q_5	1981	99	101	96	124	123	125
	1991	75	72	78	94	94	92

Source : Occassional Paper No. 1 of 1997

The above table indicates that child mortality at age 1,2,3, and 5 both in 1981 and 1991 was lower in the district as compared to the state. Mortality between sex shows that the male mortality was lower in 1981 and 1991 in Darjiling than the corresponding mortality level prevailing in the state. In case of female it was higher at age for 1981 and 1991 and lower at other ages in Darjiling as compared to respective figures of the State. Another table on fertility of all districts of the state is shown in Annexure - III.

Annexure - II

Fertility and Mortality, 1991 Census

Fertility :

In 'demography' the science of population statistics Fertility is one of the main components of population change whereas others are 'Mortality' and Migration. Fertility deals with actual reproductive performances in a given community at a given period of time.

It has been customary in censuses to collect, compile and analyse the fertility data. In 1991 and 2001 Census, four questions relating to fertility were asked. These are age at marriage, number of children surviving at the time of questioning with their sex and number of children born alive by sex to all ever married woman only. Also, the question "Number of children born alive during last one year" was asked from the currently married women only. Different fertility ratios which are discussed here are based on mainly the answer of the question "Number of children born alive during last one year".

The very common indicator of fertility is Crude Birth Rate (CBR) which denotes the number of live births per 1,000 population. Other common fertility idicators are Age Specfic Fertility Rate (ASFR), General Fertility Rate (GFR), Total Fertility Rate (TFR), Age Specific Marital Fertility Rate (ASMFR), General Marital Fertility Rate (GMFR) and Total Marital Fertility Rate (TMFR). ASFR, GFR and TFR are calculated by taking total no. of women as denominator whereas for ASMFR, GMFR & TMFR are calculated by taking total number of currently married woman as denominator. The table below shows the fertility rate under different measures in the district as well as in the State.

Source : Occasional papers No. 1 of 1997

It is observed from the above table that GFR, GMFR, TFR, TMFR and CBR for the state as a whole are 122, 158, 3.61, 5.13 and 29.01 respectively. Maldah occupies the first position in terms of GFR, TFR and CBR whereas in case of GMFR and TMFR South 24 Parganas is in the first position. Lowest position for GFR and CBR goes to Kolkata whereas the same position is occupied by Hugli for GMFR, TFR and TMFR. Number of children ever born per woman in the age group 45-49 is maximum in Murshidabad with 5.72 which is much higher than the state average of 4.56 and the minimum number is observed in Kolkata (3.06). Child-woman ratio is highest in Murshidabad with 93.03 and Kolkata has the lowest with 37.22. State average mean age at marriage is 17.2. Mean age at marriage is maximum in Kolkata with 19.05 and Murshidabad with 16.49 is the minimum.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. A person moves from his/her place of birth last residence to a new place with some definite reason, it may be economic, social, political or for any other reason. The main source of information on migration of our country is collected through regular decennial census. In 2001 Census, data on migration were collected on different aspects, such as reason for migration from the place of previous residence, duration of stay since migration etc. Tables on migration by place of birth; interstate migration; rural and urban composition of internal migrants by place of birth in the district and in the State are given below.

and 17.9 per cent migrant population in the district born in other states of India and in other countries respectively, which are much higher than the state average of 10.1 and 12.5 per cent respectively.

Annexure - IV

Percentage distribution of Migrants by place of birth, 2001 Census

Migration is an important aspect in the analysis of population change as it affects the size, age and sex structure of the population. However, it can affect the population size at local level only. In most general sense, migration as ordinarily defined movement of people from one place to another place involving change of residence for some definite purpose. Migration may be categorized as internal and international migration. ANNEXURE – IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

	2001					
	West Bengal			Darjiling		
Place of Birth	Persons	Males	Females	Persons	Males	Females
A. Migrants born within the state of Enumeration	19,082,558 (77.4)	4,489,736 (60.0)	14,592,822 (84.9)	251,893 (58.9)	114,690 (55.0)	137,203 (62.5)
i) Migrants born elsewhere in the district of Enumeration	14,526,298 (58.9)	2,892,376 (38.7)	11,633,922 (67.7)	166,020 (38.8)	75,231 (36.1)	90,789 (41.4)
ii) Migrants born in other district of the State	4,556,260 (18.5)	1,597,360 (21.4)	2,958,900 (17.2)	85,873 (20.1)	39,459 (18.9)	46,414 (21.2)
B. Migrants born in other State of India	2,491,932 (10.1)	1,352,219 (18.1)	1,139,713 (6.6)	99,628 (23.3)	54,320 (26.0)	45,308 (20.6)
C. Migrants born in other countries	3,090,393 (12.5)	1,636,343 (21.9)	1,454,050 (8.5)	76,453 (17.9)	39,534 (19.0)	36,919 (16.8)
Total Migrants	**24,664,883 (100.0)**	**7,478,298 (100.0)**	**17,186,585 (100.0)**	**427,974 (100.0)**	**208,544 (100.0)**	**219,430 (100.0)**

From the Annexure-IV(A) it is observed that migrant born within the state of enumeration in the district is 58.9 per cent which is much lower than the state average (77.4 per cent). Out of the total 427,974 migrants 23.3 per cent and 17.9 per cent migrant population in the district born in other states of India and in other countries respectively, which are much higher than the state average of 10.1 and 12.5 per cent respectively.

ANNEXURE – IV (B)

INTERSTATE MIGRANTS TO WEST BENGAL AND DISTRICT, 2001 CENSUS

Place of Birth	Migrants			Percentage to total migrants		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
STATE - WEST BENGAL 19						
1. Bihar	1,160,593	708,591	452,002	46.6	52.4	39.7
2. Jharkhand	441,435	159,689	281,746	17.7	11.8	24.7
3. Uttar Pradesh	309,315	190,832	118,483	12.4	14.1	10.4
Total for three states	**1,911,343**	**1,059,112**	**852,231**	**76.7**	**78.3**	**74.8**
4. Other States	580,589	293,107	287,482	23.3	21.7	25.2
Total	**2,491,932**	**1,352,219**	**1,139,713**	**100.0**	**100.0**	**100.0**
District - Darjiling 01						
1. Assam	12,080	5,768	6,312	12.1	10.6	13.9
2. Bihar	51,296	29,558	21,738	51.5	54.4	48.0
3. Uttar Pradesh	9,459	5,359	4,100	9.5	9.9	9.0
Total for three states	**72,835**	**40,685**	**32,150**	**73.1**	**74.9**	**71.0**
4. Other States	26,793	13,635	13,158	26.9	25.1	29.0
Total	**99,628**	**54,320**	**45,308**	**100.0**	**100.0**	**100.0**

Annexure-IV(B) on interstate migrant shows that in 2001 out of total interstate migrants a highest of 51.5 per cent migrants in the district had place of birth in Bihar and this is consistent with the similar reflection of the state. There is 12.1 per cent migrant population in the district who had their place of birth in Assam.

ANNEXURE – IV (C)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

Place of Birth	Place of Enumeration					
	West Bengal			Darjiling		
	Total	Rural	Urban	Total	Rural	Urban
1	3	4	5	6	7	8
1 Migrants born within the state of Enumeration	19,082,558 (100.0)	14,106,837 (73.9)	4,975,721 (26.1)	251,893 (100.0)	167,887 (66.7)	84,006 (33.3)
2 Migrants born in other State of India	2,491,932 (100.0)	678,906 (27.2)	1,813,026 (72.8)	99,628 (100.0)	42,983 (43.1)	56,645 (56.9)

The above annexure shows rural and urban composition of migrants by place of birth and place of enumeration during 2001 Census of Darjiling district. The district part in table shows that major portion of migrants born within the state of enumeration have been enumerated in rural area (66.7 per cent) whereas the same figure for West Bengal is 73.9 per cent. Further in case of migrants born in other states of India, 56.9 per cent migrants have been enumerated in urban area of Darjiling district whereas the same is 72.8 per cent in case of West Bengal.

ANNEXURE – IV (D)

It is seen from Annexure-IV(D) that in terms of total migrants in absolute figure, North 24 Parganas with 3,693,336 persons comes in first position followed by Medinipur with 2,709,165 persons and Barddhaman with 2,364,020 persons. In case of people born in West Bengal, 9 districts of the state overtake the state percentage of 77.4. So far people born in other states are concerned, 8 districts overtake the State average of 10.1 per cent and regarding people born in other district of West Bengal, only 6 districts overtake the State average of 18.5 per cent. The percentage of people born elsewhere in the district of enumeration varies between the maximum of 87.5 in Medinipur and the minimum of 38.7 in North 24 Parganas district. Similarly, the percentage of people born in other countries varies between the maximum of 33.9 in Nadia and the minimum of 0.2 in Puruliya district.

ANNEXURE - V

BRIEF ACCOUNT OF MAIN RELIGIONS IN THE STATE AND DISTRICT, 2001 CENSUS

Religious communities	Total	Rural	Urban	Per cent to all religions	Percent to total	
					Rural	Urban
1	2	3	4	5	6	7
WEST BENGAL - 19						
All Religions	80,176,197	57,748,946	22,427,251	100.0	72.0	28.0
Hindus	58,104,835	39,406,984	18,697,851	72.5	67.8	32.2
Muslims	20,240,543	16,845,034	3,395,509	25.2	83.2	16.8
Christians	515,150	393,358	121,792	0.6	76.4	23.6
Sikhs	66,391	10,758	55,633	0.1	16.2	83.8
Buddhists	243,364	171,455	71,909	0.3	70.5	29.5
Jains	55,223	9,354	45,869	0.1	16.9	83.1
Others	895,796	875,354	20,442	1.1	97.7	2.3
Religion not stated	54,895	36,649	18,246	0.1	66.8	33.2
DARJILING-01						
All Religions	1,609,172	1,088,740	520,432	100.0	67.7	32.3
Hindus	1,237,714	808,169	429,545	76.9	65.3	34.7
Muslims	85,378	59,808	25,570	5.3	70.1	29.9
Christians	99,232	84,092	15,140	6.2	84.7	15.3
Sikhs	2,229	1,097	1,132	0.1	49.2	50.8
Buddhists	177,327	129,812	47,515	11.0	73.2	26.8
Jains	1,078	188	890	0.1	17.4	82.6
Others	5,507	5,158	349	0.3	93.7	6.3
Religion not stated	707	416	291	0.0	58.8	41.2

From the above table it is observed that the Hindus occupy the first place with 76.9 per cent followed by Buddhists (11.0 per cent) and the Christians (6.2 per cent) of the total population of Darjiling district. The Muslims constitute only 5.3 per cent of the total population, which is fourth highest religion of the district. Both Sikhs and Jains have occupied the lowest rank with 0.1 per cent each only. It is to be noted that the other religious communities constitute only 0.3 per cent of the total population of the district.

Annexure

Annexure - VI

Marital Status of population as per 2001 Census

Marital Status :

Information on sex and marital status of persons, particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to currently married group is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status and broad age group of population as per 2001 census is shown below :

Annexure - VI

Marital Status of Population as per 2001 Census :

Information on sex and marital status of the population is very much important for demographic analysis. Particularly marital status of women population is very much important for measuring fertility rate by age group. Population of women belonging to status of married or currently married is also important for measuring age specific marital fertility rate (ASMFR). A table classified by marital status and broad age group is presented below :

ANNEXURE – VI (A)
PERCENTAGE DISTRIBUTION OF POPULATION CLASSIFIED BY MARITAL STATUS, BROAD AGE GROUP AND SEX, 1991-2001

			Marital Status							
			Never married		Married		Widowed		Divorced or Separated	
Year	Age	Total	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
1991	0-14	100.0	99.7	99.6	0.3	0.4	0.0	0.0	0.0	0.0
	15-34	100.0	57.9	35.8	41.4	62.6	0.4	1.0	0.3	0.6
	35-54	100.0	6.8	5.0	90.1	84.3	2.6	9.7	0.5	1.1
	55+	100.0	4.8	3.0	80.0	52.4	14.3	43.7	0.8	0.9
	All Ages	100.0	57.4	51.3	40.4	43.0	1.9	5.2	0.3	0.5
2001	0-14	100.0	99.7	99.1	0.2	0.8	0.0	0.1	0.0	0.0
	15-34	100.0	58.7	37.6	40.5	60.5	0.4	1.2	0.4	0.8
	35-54	100.0	6.4	5.5	90.0	82.8	2.4	10.1	1.3	1.6
	55+	100.0	4.9	4.6	79.3	51.7	14.9	42.6	1.0	1.1
	All Ages	100.0	54.4	47.5	42.9	45.4	2.1	6.3	0.6	0.7

It is observed from the above table that the percentage of never married males and females in the age group 15-34 has slightly increased in 2001 over 1991, whereas the percentage in respect of married male and female population in the same age group has decreased. In the age group 35-54, the percentage of married males and females decreased slightly in 2001 over 1991. It is to be noted that in 2001 the percentage of married persons (both male and female) is highest in the age group 35-54 like the previous decade, though this time slightly less than 1991 percentage. A Table classified by marital status, broad age group, sex and residence has been shown in Annexure VI (B) for Darjiling district of 2001 Census.

It is observed that 31.5 per cent of the total population of Darjiling district belongs to 0-14 age group and naturally constitute the bulk of the never married as per 2001 Census. The married percentage in 10-14 age group (1.3 per cent) is however negligible. The highest number of married females are found in 25-29 age group (61,564 persons) and the highest number of married males are found in 35-39 age group (56,299 persons) indicating that gradually late marriage is being preferred by both the sexes. Number of widows are always greater than that of widower in each age group. The highest number of widows are in 60-64 age group (6,948 persons). In divorced or separated category from 10-14 age group to 80+ age group, females overtake the number of male population excluding the age groups of 45-49, 70-74, 75-79 and 80+. The highest number of females divorced or separated are found in 35-39 age group (922 persons).

Age not stated	243	129	170	93	163	75	71	23	0	1	4	0	144	36

It is seen that 71.8 per cent of the total population of Darjiling district (80.1 per cent males, 62.9 per cent females) are literates excluding 0-6 age group as per Census 2001. In none of the categories, females have been able to catch up the males as yet, but there is a sign of their struggle to overcome the difference except in the educational level of Middle, Non-Technical diploma or Certificate not equal to degree, Technical diploma or certificate not equal to degree and Graduate & above category, where difference is found to be more prominent. It's worth noting that except in female 45+ age group the number of literates are always higher than the number of illiterates for both the sexes. Whereas, in females 45+ age group number of illiterate females overtake the number of literate females. The number of literates 'without any formal schooling including education level' in the district is very little, i.e. 15,252 males and 10,853 females. And the numbers of graduates and above are also very little i.e. 5.1 per cent.

ANNEXURE - VIII

Distribution of different mother tongues in the district, 2001 Census

Language is an important characteristic of a population particularly in a multi-lingual and multi-cultural society like India. The language census literature that has grown over the last one hundred years of Indian census history has shed light on the linguistic composition of our country. The table below shows the population by mother tongue of the district since 1961. It is to be noted that mother tongues shown in 1971 Census are mother tongues inclusive of language grouped under each. Data shown in 1981 Census is the language mainly spoken in the households.

	(0.6)	(0.4)	(0.4)	(0.3)	(0.3)	(0.3)	(7.6)	

The above table shows that majority population of the district is Nepali/Gorkhali (46.0 per cent) by mother tongue followed by Bengali (24.0 per cent) and Hindi (10.4 per cent). Although the percentage of Nepali/Gorkhali speaking population has decreased over the years from 1961 to 2001, its population in absolute figure has increased from 369,130 persons in 1961 to 739,821 persons in 2001. Regarding Bengali speaking population, its population has increased from 115,172 persons (18.4 per cent) in 1961 to 385,721 persons (24.0 per cent) in 2001 Census. Similarly, Hindi speaking population has increased from 47,842 persons (7.7 per cent) in 1961 to 166,606 persons (10.4 per cent) in 2001 Census. It is worth noting that among the five most spoken mother tongues of Darjiling district (2001 Census), Sadan/Sadri and Kurukh/ Oraon happened to be two non-scheduled languages and its population constitute 50,051 persons (3.1 per cent) and 45,008 persons (2.8 per cent) respectively. Other mother tongues constitute 7.6 per cent (121,757 persons) of the total population of the district.

ANNEXURE - IX :

Scheduled Castes and Scheduled Tribes population - Size and Growth :

The collection of population statistics on the Scheduled Castes and the Scheduled Tribes as per the state Scheduled Castes and Scheduled Tribes lists in the State is one of the most important aspects of decadal census in post independence period. These information are required for the purpose of delimitation of the Assembly and Parliamentary constituencies in the State. The planning for development of these communities is mostly considered on the information of population size and its growth rate, sex-ratio, literacy rate, economic activities etc. Census is the only source which provides data for Scheduled Castes and Scheduled Tribes on various aspects of their life at the micro level.

The district in 1991 Census returned 209,876 Scheduled Caste persons comprising of 109,487 males and 100,389 females accounting for 16.1 per cent of the total population of the district. Of this bulk of Scheduled Caste population 78.1 per cent were in rural areas and 21.9 per cent in urban areas of the district. In all 59 Scheduled Castes were reported and were scattered all over the district. The first three major castes in order of population size were the Rajbanshi (96,745), Kami (Nepali) (30,719), and Namasudra (29,479). Together, these three castes constituted 74.8 per cent of the total Scheduled Castes population of the district. Among these Rajbanshi with 96,745 persons alone constituted 46.1 per cent of the total Scheduled Castes population of the district.

The literacy rate among Scheduled Castes was 46.3 per cent as against general literacy rate of 57.9 per cent in the district. 58.1 per cent of the males and 33.3 per cent of the females were literates among all Scheduled Castes.

The work participation rate among Scheduled Castes was 32.9 per cent corresponding to 34.2 per cent in the general population. The Scheduled caste workers in the district were mainly working as Cultivators (24.2 per cent).

Likewise, the district recorded 179,153 Scheduled Tribes comprising of 91,776 males and 87,377 females accounting for 13.8 per cent of the district's total population. Of this bulk of scheduled tribes population 88.6 per cent were in the rural areas and 11.4 per cent only in urban areas of the district. In all 38 Scheduled Tribes were reported in the district having been scattered all over the district. The first four major tribes in order of population size were the Oraon (57,808), Bhutia, Sherpa, Toto, Dukpa, Kagatey, Tibetan, Yolmo (together 40,165), Lepcha (26,920) and Santal (15,315). Together, these four tribes constituted 67.6 per cent of the total Scheduled Tribes population of the district. Among these four, Oraon tribe with 57,808 population single-handedly constituted 32.3 per cent of the total Scheduled Tribes population of the district.

The literacy rate among Scheduled Tribes was 39.4 per cent as against general literacy rate of 57.9 per cent in the district. 47.5 per cent of the males and 30.8 per cent of females were literates among all Scheduled Tribes.

The work participation rate among Scheduled Tribes was 40.1 per cent corresponding to 34.2 per cent in the general population. The Scheduled Tribes in the district were mainly working as Livestock, Forestry, Fishing, Hunting and Orchard and Allied activities (30.7 per cent) with the female proportion being as high as 48.7 per cent.

As per 2001 Census, Darjiling district has 258,881 Scheduled Caste population comprising of 132,858 males and 126,023 females, accounting for 16.1 per cent of the total population of the district. Among the Scheduled Castes of the district, the first five major castes in order of population size are Rajbanshi with 129,904 persons (50.2 per cent), Namasudra with 41,555 persons (16.1 per cent), Kami (Nepali) with 31,195 persons (12.0 per cent), Damai (Nepali) with 10,082 persons (3.9 per cent) and Sarki (Nepali) with 5,454 persons (2.1 per cent). Out of these only first three castes constitute 78.3 per cent of the total Scheduled Castes population of the district.

Further, the district has also recorded 204,167 Scheduled Tribe population comprising of 102,287 males and 101,880 females in 2001 Census accounting for 12.7 per cent of the district's total population. Among these, the first five major tribes in order of population size are Oraon with 66,978 persons (32.8 per cent), Bhutia/Sherpa/Toto/Dukpa/Kagtay/Tibetan/Yolmo with 45,014 persons (22.0 per cent), Lepcha with 31,210 persons (15.3 per cent), Munda with 17,189 persons (8.4 per cent) and Santal with 14,709 persons (7.2 per cent). Out of these, only first three tribes constitute 70.1 per cent of the total Scheduled Tribe population of the district.

The distribution of rural and urban Scheduled Castes / Tribes population for Darjiling district since 1961 can be observed in the following table :

ANNEXURE - IX
SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN THE DISTRICT OF DARJILING (1961-2001)

T/R/U	1961		1971		1981		1991		2001	
	SC	ST	SC	ST	SC	ST	SC	ST	SC	ST
Total	82,381	96,444	98,277	108,586	145,942	151,073	209,876	179,153	258,881	204,167
			(19.3)	(12.6)	(48.5)	(39.1)	(43.8)	(18.6)	(23.4)	(14.0)
Rural	66,464	85,232	83,459	97,169	119,950	135,943	163,987	158,718	207,422	178,878
			(25.6)	(14.0)	(43.7)	(39.9)	(36.7)	(16.8)	(26.5)	(12.7)
Urban	15,917	11,212	14,818	11,417	25,992	15,130	45,889	20,435	51,459	25,289
			-(6.9)	(1.8)	(75.4)	(32.5)	(76.6)	(35.1)	(12.1)	(23.8)

Note : Figures within bracket indicate decennial growth rate

It can be observed from the above table that the growth rate for Scheduled Caste population between 1961-71 and 1971-81 has increased and after that it has decreasing trend upto 2001. The growth rate observed during 1961-71 was 19.3 per cent which increased to 48.5 per cent during 1971-1981 and that has finally decreased to 23.4 per cent during 1991-2001. The rural growth rate also followed overall the same trend upto 2001. Urban growth rate during 1961-71 has recorded negative growth rate of 6.9 per cent after that it has increased to 76.6 per cent during 1981-91 and again it has decreased to 12.1 per cent during 1991-2001. In case of Scheduled Tribes also, growth rate followed overall the same trend as that of Scheduled Caste population. During 1961-71 growth rate was 12.6 per cent which increased to 39.1 per cent during 1971-81 and finally decreased to 14.0 per cent during 1991-2001. The rural growth rate also followed overall the same trend as that of total Scheduled Tribe population. Urban growth rate has increased from 1.8 per cent during 1961-71 to 35.1 per cent during 1981-91 and finally decreased to 23.8 per cent during 1991-2001.

ABOUT THE SAMPLE REGISTRATION SYSTEM (SRS) IN WEST BENGAL :

The Sample Registration System (SRS) is a large scale demographic sample survey for providing reliable annual estimates of birth rate, death rate and other fertility and mortality indicators at the national and sub-national levels. The field investigation consists of continuous enumeration of births and deaths by a resident part time enumerator and an independent survey every six months by a computer supervisor. The data obtained through these operations are matched. The unmatched and partially matched events are re-verified in the field and thereafter an unduplicated count of births and deaths is obtained. The SRS was initiated by the Office of the Registrar General and Census Commissioner, India on a pilot basis in a few selected states in 1964-65 and it became fully operational during 1969-70 with about 3,700 sample units in India. Thereafter the number of sample units was periodically increased. After completion of 1991 Census these units were replaced during 1993-94 with 6,671 sample units (4,436 rural and

2,235 urban blocks) in all states and union territories. For West Bengal state total number of sample units were 475 (300 rural and 175 urban) after 1991 census. The sample unit in rural areas is a village or a segment of it if the village had a population of 1,500 or more. In urban areas the sampling unit is a census enumeration block with a population ranging from 750 to 1,000. At present SRS is operational in 7,597 sample units (4,433 rural and 3,164 urban) spread across all States and Union territories and covers about 1.3 million households and 6.93 million population based on 2001 Census frame and these were effective from January 2004. In the state of West Bengal SRS is covering about 5.7 lakh population through 555 (310 rural and 245 urban) sample units which is highest among all states and UTs.
